Posting for a Research Associate in the lab of Dr. Luda Diatchenko Faculty of Dentistry

Posting period: September 21 – September 30, 2018

Position title: Clinical Research Associate

Brief description of duties: Under the supervision of Drs. Diatchenko, Martel, and Meloto, the Clinical Research Associate will be responsible for managing multidisciplinary clinical research studies of the CERC’s Human Pain Genetic Program. This includes coordinating multidisciplinary research teams, taking charge of related administrative procedures (e.g. Health Canada and IRB submissions and budgeting), contacting/managing study participants, conducting clinical research procedures (e.g. delivery of consent forms, questionnaires, and/or experimental pain tests), as well as handling biological samples (blood samples, DNA, RNA, plasma, and/or urine).

Qualifications: Experience in clinical research studies is crucial. Ability to write clinical research protocols for IRB submission will also be required. Candidates must have written and verbal communications skills in both English and French and demonstrate ability to clearly transmit and receive information in scientific and lay terms. Candidates must also be pro-active, capable of making decisions, and have proven ability to prioritize and meet deadlines. Having a nursing degree and/or being certified to draw blood from people is not required but will be highly valued.

Education: Masters or PhD in a biological science.

Experience: Minimum of 3 years of clinical research experience.

Particular abilities: Be detail-oriented, with exceptional organizational skills, able to multi-task, and work effectively alone or as part of a team; general computer skills, with good knowledge of Microsoft Office; experience in supervising undergraduate and graduate students.

Name of the immediate supervisor: Dr. Luda Diatchenko, Professor, Faculty of Dentistry, McGill University

Work schedule: 8 hours per day from Monday to Friday from 8:00 am to 5:00 pm

Working hours: 40 hours per week

Location of work: Genome Building, McGill University
740 Dr. Penfield, room 2200
Montreal, Quebec, Canada H3A 0G1

Salary information: $27.26 per hour

Planned start and end date of appointment: November 1st 2018 to October 31st 2019, with option to renew upon mutual agreement.

Applications: People interested in this position are asked to apply by sending their complete CV and a presentation letter by email to:
