Warmest wishes for a wonderful holiday season and a healthy and prosperous new year!

The McGill University GIM Retreat was held in St Sauveur on October 28, 2017. The purpose of the Retreat was to help the Division determine next steps and actions to promote connectivity and integration across sites with the aim of maintaining sustainable growth and innovation. We were 26 members in all who gathered under sunny skies in a beautiful setting and worked together on addressing divisional connectivity and integration within research, medical education, clinical activities and patient safety, and physician wellness. Overall, the Retreat was extremely insightful and produced several recommendations and action items. In the coming weeks, a full report of the proceedings will be circulated and we look forward to starting the implementation process in 2018!
UPCOMING EVENTS

McGill University GIM Rounds
Ballroom, Thomson House
6:00 – 9:00 Thursday 25 January 2018

GIM Residency Training Program Corner

Congratulations to Dr Miriam Harris! She received the GIM scholarly Enrichment Fund Award to support her Masters in Epidemiology and thesis work on her long-standing interest in population health. Her thesis topic is "Computer-aided detection of Pulmonary tuberculosis on digital chest x-rays: an individual patient data meta-analysis with image re-analysis."
