

### COMPARISON OF CITATION SOFTWARE PROGRAMS

The McGill Library supports two citation managers: RefWorks and EndNote (desktop and web versions). To learn more about the programs, visit <http://www.mcgill.ca/library/library-using/citationsoftware>. In addition, there are several free citation management programs available, such as Zotero. All have merits, so the best choice depends on your goals, preferences, and work habits. The chart below lists some features to consider with the recommended program(s) indicated. Note that you can use more than one, since references can be transferred between programs.
