Postdoc position
at Université de Montréal and McGill University

We are looking for a motivated postdoc to conduct a joint project between the laboratories of Dr. Michele Bouchard and Dr. Sami Haddad (UdM) and of Dr. Lisa Munter (McGill). It is a pharmacology project in the context of Alzheimer’s disease to determine pharmacokinetics and pharmacodynamics of a certain drug in mice. Expertise in LC-MS is required, preferably also in the extraction of small molecules from tissues. In the next phases of the project, a computational model will be build and drug effectiveness studies in mice.

More information on munterlab.com, funding, Weston Brain.

Candidates should have a pharmacology background and experience with HPLC and mass spectrometry.

If interested, please contact: lisa.munter@mcgill.ca
sami.haddad@umontreal.ca or michele.bouchard@umontreal.ca.
