

1. PURPOSE

This Standard Operating Procedure (SOP) describes pathogens to be monitored for possible exclusion from rodent facilities.

2. RESPONSIBILITY

Veterinary care staff, facility manager, principal investigator (PI).

3. PROCEDURES

- 3.1. If a pathogen on the below monitored and excluded lists is found in a rodent facility, take the following actions:
 - 3.1.1. Immediately isolate the rodents into a designated quarantine facility as directed by a veterinarian.
 - 3.1.2. Establish with PI, whenever possible, an eradication strategy (depopulation, derivation, etc.).
- 3.2. If a pathogen on the monitored lists below is found, the action to be taken will be decided on a case-by-case basis by the veterinarian, the PI and facility supervisor/manager.
