In addition to the strong training provided by the Major program, it requires students to have direct research experience in a chosen area during their final year of study. Acceptance into the Honours program takes place in the Winter term of U2 and requires a CGPA of 3.30. Students who wish to enter the Honours program should follow the Major program; those who satisfactorily complete the first three terms with a CGPA of at least 3.30 and a mark of B or higher in core Pharmacology courses are eligible for admission. Revised: The Honours program is designed as a preparation for graduate studies and research. In addition to the strong training provided by the Major program, it requires students to have direct research experience in a chosen area during their final year of study. Acceptance into the Honours program takes place in the Winter term of U2 and requires a CGPA of 3.50. Students who wish to enter the Honours program should follow the Major program; those who satisfactorily complete the first three terms with a CGPA of at least 3.50 and a mark of B+ or higher in core Pharmacology courses (PHAR 300, PHAR 301 and PHAR 303) are eligible for admission. Applications can be obtained from the office of the Department of Pharmacology in the McIntyre Medical Building or on the Departmental website. |

5.0 Rationale for revised program:

Since its inception in 2009, the 21 students who have graduated with the B. Sc. Honours degree in Pharmacology have had a mean CGPA of 3.78. One of the requirements for the Honours program is a Research projects course (PHAR599). The proposed changes to the Program Description (CGPA requirement and grade requirement for core Pharmacology courses, i.e. setting the CGPA at 3.5) would have affected one student, which is unfortunate. However, they will help us to ensure that Faculty members are eager to host these students in the labs in the future. This is of concern to the Department since the dramatic increase in the number of students in the Majors program in the last two years is coincident with an overall decrease in CIHR funding (now the national average is 17%). It is also compatible with the excellence of the students in the Honours program to date. We have noted that other Honours programs (Microbiology and Biology) have the same CGPA (3.5) requirement.

The following courses are added to the Upper Level Complementary Course list in U3:

- ANAT 322 Neuroendocrinology
- CHEM 334 Advanced Materials
- EPIB 501 Population Health and Epidemiology
- PSYC 302 The Psychology of Pain
- PSYT 301 Issues in Drug Dependence
- PSYT 500 Advances; Neurobiology of Mental Disorders
- REDM 410 Writing Research Articles
