5.0 Rationale for revised program
Due to increased registration in the Cognitive Science program it is no longer possible to keep PSYC 532 as a required course since it was designed to be a seminar course. It will be added to the complementary course listing in Psychology and students will take one of 9 courses, selected as capstone courses in the various streams of Cognitive Science.

Pertinent and prerequisite courses are being added to improve the program. Removing List A and B from the components will allow students more flexibility of choice to develop their interests within their chosen areas.

COGS 402 is identical to COGS 401, the only difference being that 402 is currently offered in the winter and 401 is in the fall. COGS 402 will therefore be retired from the program and 401 will be offered in both fall and winter.
