### 7.0 Consultation with Related Units

2. Pierre Dutilleul, Domain Advisor  
3. Robert Bonnell, Barbados Field Study Semester Coordinator

### 8.0 Rationale

1. ENVR 466 is being retired.  
2. An understanding of chaotic behavior is useful when modeling complex environmental processes.  
3. AGRI 452 is part of the Barbados Field Study Semester, and is relevant to this section.  
4. This allows students to concentrate more on mathematics and statistics or on environmental sciences, if they wish. The credit total remains the same.
