(3) (Winter) (2 lectures, 3 hours laboratory) (Prerequisite: EPSC 210)
23. Rationale

The proposed reduction from 4 to 3 credits will be achieved by reducing the lecture periods from 1.5 to 1 hr. The purpose of the credit reduction is to lighten the work load and make the course more attractive to a wider audience in associated disciplines by making it easier to fit into programs dominated by 3 credit courses. Some of the material previously taught in this course will be transferred to EPSC 231 whose credit weight is being increased from 2 to 3. The course description has been changed to highlight the increased emphasis that will be given to thin section identification in the laboratory.
