(2) (Summer: Two-week field school in May) (Prerequisite: EPSC 203, EPSC 212, or equivalent)
23. Rationale

The credits for this course are being changed from 2 to 3. Students in this course study 2 weeks in the field for a total of approximately 140 hours. A 3 credit classroom course at McGill consists of 39 hours of lecture combined with approximately 2 to 3 hours outside of class for each contact hour; this results in a typical time commitment of 117 to 156 hours. Thus, from the point of view of the time commitment this course merits 3 credits.

Furthermore, with the addition of selected material from EPSC 212 (please see other Course Revision Form from EPS), a comparison of the material learned in this course with that learned in others indicates that this course covers as much material in 2 weeks as is covered in other 3-credit lecture courses in our department, which also substantiates our need to change the credit weight of this course from 2 to 3 credits.
