11. Rationale for new course  
   The Geography Department proposes this as an intensive course of short duration. It will enable scientists visiting for a short period to share their expertise with our postgraduate students and upper level undergraduate students by offering a course on a topic not covered in any existing Geography course; or allow faculty to take advantage of unique opportunities to facilitate learning (e.g., possibility of student participation in a research project). One or more Geography faculty members will co-supervise the course to maintain McGill’s academic standards in presentation and evaluation. As the background and skill set required will vary registration will be blocked, requiring permission of instructor. This course will be more specialized than the “Selected Topics” course.

12. Course Description  
    (as it will appear in the Calendar [maximum 50 words]):  
    (N.B. Faculty of Medicine must append complete course outline)  
    Intensive review of a current topic or technique in human geography. Instruction through a combination of research seminars, lectures, laboratory or field work accompanied with readings, varying with the subject.

13. Supplementary information to appear in the Calendar in addition to the course description.  
    Such as: equivalent course(s), contact hours, enrolment limitations, language of instruction etc.  
    Please enter the information as it should appear in the calendar notes.  
    This course is offered on an irregular basis.  
    See Geography website for current status.
