### 5.0 Rationale for revised program

The B.A. & Sc. PAC studied the trends of Multi-Track programs chosen by students currently enrolled and found a reasonably large number of students following unfocused programs which did not include any focused major concentration. For example, students would select the biomed major concentration, along with either the Humanistic Studies, or the International Development Studies major concentration. This results in a combined program in which students do not progress to higher-level courses.

This proposal ensures that all B.A. & Sc. students will complete at least one focused major concentration., as specified in List A.

### 6.0 Revised Program Description (Maximum 150 words)

The B.A. & Sc. PAC studied the trends of Multi-Track programs chosen by students currently enrolled and found a reasonably large number of students following unfocused programs which did not include any focused major concentration. For example, students would select the biomed major concentration, along with either the Humanistic Studies, or the International Development Studies major concentration. This results in a combined program in which students do not progress to higher-level courses.

This proposal ensures that all B.A. & Sc. students will complete at least one focused major concentration., as specified in List A.
5.3.5.3 Multi-Track System
To recognise the diversity of student backgrounds and interests and the multiple routes to understanding provided by a modern university, the Faculties of Arts and of Science offer a 90-credit multi-track system that includes a Major Concentration in one faculty complemented by either a Major Concentration or two Minors/Minor Concentrations in the other faculty and that may be completed in one of the following ways:

Options
1) Arts Major Concentration (36) + Science Major Concentration (36-38) (see "Programs in the B.A. & Sc.", section 5.11, for a list of programs open to students in the B.A. & Sc.)
2) Major Concentration in Arts or Science (36-38) + two Minors/Minor Concentrations in the other faculty (2 x 18 = 36)

Regulations
• Programs offered by Computer Science, Mathematics and Statistics, and Psychology are considered Science programs for the purpose of the B.A. & Sc.
• Within both options, all Concentrations must be in different academic units. Thus, students may take a Geography program either in Arts or in Science, but not in both.
• Students will include within the 36 or 18 credits of their Major Concentrations or Minors or Minor Concentrations any university-level (200- or above) prerequisites to required courses within their programs.
• No course may fulfill the requirements for more than one program.

Definitions
Units: academic departments or administrative equivalents.
Programs: lists of required and complementary courses (including prerequisites for required courses) prepared and maintained by units. Major Concentration: 36-38 credits taken from a unit's Major program. Minor Concentration: 18 credits taken from a unit's Minor program. Expandable Minor Concentrations are those that can, on the completion of 18 additional approved credits, be expanded into a Major Concentration within the appropriate unit.
