13. Course Title to Appear in the Calendar (Optional)
   (Limit 59 characters):
   Note: This can ONLY be an expansion of word(s) abbreviated in the 30 character course title in Box 12.

14. Rationale for revised course
   (1) While the broad range of specialized topics will remain, the expected course pedagogical style is altered from lectures to seminar-style discussion. (2) The course number is changed to provide a logical relationship with PHYS 733, "Special Topics in Astrophysics II", the advanced graduate-level seminar. This change is being made in the context of several changes to expand graduate core-level curriculum in astrophysics in the department of physics, as described in "Graduate Curriculum for Masters and Ph.D Degree Students in the Department of Physics, Specializing in Astrophysics." Following the 2000-6 expansion in astrophysics from two to eight faculty, and the expected expansion in the number of MSc and PhD-level students over the next decade, the proposed curriculum will provide coursework at the MSc and PhD level equal to that available at top-tier international programs.

15. New Course Description
