14. Rationale for revised course
   
   We are dropping that restriction that prevents students who have taken BIOL 306 from taking this course PSYC 308. The change is designed to suit the new proposed Major in Neuroscience, which has BIOL 306 as a required course for all students in the Major (with PHGY 311 as an alternate), and PSYC 308 as a required course for students in the Cognitive/Behavioural Option. Careful examination of the current versions of these two courses by the Neuroscience Program Committee revealed that, although they do overlap a bit at the start, they soon diverge, with PSYC 308 specializing in human/mammalian neuroscience and BIOL 306 focusing on comparative and neuroethology. Hence there is no good academic reason to prevent students from taking both courses.
