11. Rationale for new course

The goal of this course is to have students gain a more advanced and in-depth understanding of selected topics in psychoendocrinology than is offered by the 300 level course Hormones and Behavior (PSYC 342). Offering this course at the 500-level would also encourage the participation of graduate students. The proposed course focuses on the influence of specific neuroendocrine mechanisms on specific behaviors and how hypothesis-testing of these hormone-behaviour relationships have led to findings concerning hormonal etiologies and/or remediation of these behaviour disorders in humans. Therefore, there is no overlap with a 300 level course on Neuroendocrinology (ANAT 322) or with a 300 level course on Neurobiology & Behavior (BIOL 306). There is currently no advanced level course in psychoendocrinology in the Department of Psychology.
