RATIONAL FOR CHANGES:

1 Whichever 4 cr course it was that necessitated an extra 1 cr to this limit, is no longer in the program. Credit limit has been revised to be slightly larger than other domains (11 courses instead of 10 courses) because of the large number of 200-level Fundamentals (especially for Faculty of Science students)
Attachment to Program Change Proposals for:
- BSc; Environment; Ecological Determinants of Health Domain - Cellular stream
  (bsc_environment_EDH-cellular_revision_2015.doc)
- BSc (AgEnvSc); Environment; Ecological Determinants of Health Domain - Cellular stream
  (bscagenvsc_environment_EDH-cellular_revision_2015.doc)

2 The courses in the B.I.T.S. (Barbados Interdisciplinary Tropical Studies) field study semester have been added as complementary courses in this domain where appropriate (3 of the 4 courses added -- AEBI 421, AEBI 423, AEBI 427). In addition, one of the context courses (BIOL 451/NRSC 451) of the Africa Field Study Semester (AFSS), which is offered regularly every year, has been added.

3 The addition of GEOG 403 as a required course in this domain has required some category adjustments (Toxicology moved from Fundamentals (required) to Human Health (complementary)) and has necessitated some credit balance adjustments.

4 In addition to the course additions described in points 2 and 3 the following new courses were added to complementary course sections: ANSC 433, ENVR 422, GEOG 503, MIMM 314, NUTR 207, NUTR 450, PARA 515, PHGY 210, PPHS 501, PPHS 529, PSYC 342

5 Notes added to clarify the relationships between (BIOL 200 + BIOL 201) and (LSCI 212 + LSCI 211); and (ANSC 323 + ANSC 424) and (PHGY 209 + PHGY 210)

6 Removed from complementary course lists because they are either retired or infrequently offered: ANSC 330, NRSC 510; or because the hidden pre-requisites make them unrealistic to take: NUTR 403

7 NUTR 512 moved to Toxicology category (now in Human Health section) as NUTR 403 has been removed altogether (because of hidden pre-reqs); Nutrition category in Human Health section deleted.

8 Note added to make clear that students will not receive credit for both.

9 PHAR 300 moved to Toxicology category

10 Name of category revised to better reflect new focus – on hormones, the endocrine system and physiology – this structure also allows students the option of acquiring pairs of pre-reqs needed for upper level courses (see note #5)

11 Moved BREE 322 to Pollution Control & Management category, where it is better suited.

12 NUTR 307 no longer videoconferenced
