5.0 Rationale for revised program

Many students entering the Ph.D. program already have a Master's degree, and are exempted from a number of the required credits. The proposed changes will simply formalize what is already the case in practice, thereby reducing administrative work.

For students without a Master’s degree or without the appropriate background, the department can always add additional requirements at the time of admission. Therefore, the change to the program will yield benefits without damaging the integrity of the Ph.D. program.

6.0 Revised Program Description (Maximum 150 words)
### Doctor of Philosophy (Ph.D.); Mathematics and Statistics

#### Program Requirements

**Thesis**

A thesis for the doctoral degree must constitute original scholarship and must be a distinct contribution to knowledge. It must show familiarity with previous work in the field and must demonstrate ability to plan and carry out research, organize results, and defend the approach and conclusions in a scholarly manner. The research presented must meet current standards of the discipline; as well, the thesis must clearly demonstrate how the research advances knowledge in the field. Finally, the thesis must be written in compliance with norms for academic and scholarly expression and for publication in the public domain.
