## Rationale
This new course coordinated by the Medical Physics Unit is an undergraduate research project course. This course will provide B.Sc. students with research opportunity to work with Medical Physics researchers on a broad range of projects. It will expand the current options available to students and thus further enhance the interdisciplinary nature of the undergraduate program. The course also matches the curriculum goals of the Medical Physics Research Training Network (MPRTN), an NSERC-funded CREATE program in medical physics research training (mprtn.com). This course will be added to the roster of 396 series of Undergraduate Research Projects Courses currently available to Science students (www.mcgill.ca/science/ours/396).

## Responsible Instructor

## Course Description
Independent research project with a final written report and an oral presentation.

## Teaching Dept.
0224 : Medical Physics Unit

## Administering Faculty/Unit
SC : Faculty of Science

## Prerequisites
Completion of at least one undergraduate term with CGPA of 3.0

## Web Registration Blocked?
N

## Corequisites

## Restrictions
This course cannot be taken under the S/U option. Students
cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science. Since this course takes place within a clinical department and may require access to confidential data, the proposed research project needs departmental approval and may need research ethics board approval.
