TO: Members, of Faculty of Science  
SUBJECT: Results of Science Election for Senate

Following the recent Call for Nominations to elect three Science Senators, only three nominations were received. Thus the three nominees are elected to the Senate by acclamation. The new Science Senators are:

- Prof. David Harpp (Chemistry)
- Prof. Nigel Roulet (Geography)
- Prof. David Stephens (Mathematics & Statistics)

These new Senators will start their terms on 1 September 2018, and end on August 31, 2021.

Continuing representatives on Senate, and the number of years they have yet to serve are:

- Prof. Masad Damha (Chemistry) - two years
- Prof. Gregor Fussmann (Biology) - one year
- Prof. Peter Grütter (Physics) - two years
- Prof. John Gyakum (Atmospheric & Oceanic Sciences) - two years
- Prof. Hans Larsson (Redpath Museum/Biology) - one year
- Prof. Jeffrey McKenzie (Earth & Planetary Sciences) - two years

A big congratulations to the new Senators, and a message of appreciation for the work of the continuing Senators.

Josie D'Amico  
Secretary of Faculty

Faculty of Science Meeting  
17 April, 2018
