Welcome to McGill University, Canada’s leading teaching and research-intensive university with a strong “student-centred” mission. Ranked among the top 25 universities in the world, McGill has the highest average entering grades in Canada and its students hail from 140 countries. Our commitment to fostering the best has propelled our students to win more Rhodes scholarships, more national and international awards on average than their peers at any other Canadian university.

You are following in the footsteps of more than 174,000 McGill alumni who continue to help shape the world as Supreme Court justices, award-winning authors and musicians, astronauts, Olympians, and Nobel Prize winners. As such, a lot is expected of you but McGill provides you with the means to succeed and to have a varied experience of academics, athletics and community activities to suit your interests.

All of McGill’s 21 faculties and professional schools strive to offer their students the best education possible. The University’s vibrant learning environment and active campus life support its students’ academic progress and personal development.

Today’s social, technological and medical challenges continue to fuel innovative approaches to research, teaching and learning. At McGill, we welcome these challenges as we undergo an unprecedented period of growth and renewal. New cutting-edge facilities benefit students with state-of-the-art classrooms and laboratories. Likewise, McGill’s professors thrive in this environment as they enjoy some of the highest research successes per full-time professor in Canada. Our dedicated administrative and support staff’s primary focus is to ensure that all students have the necessary resources to effectively respond to academic challenges and develop lifelong skills.

McGill University has been synonymous with first-class education since it was founded in 1821. We remain committed to the ideals that have guided us for the last 185 years and to the quest for the success of our institution, faculty, and students, which still guides us today.

Professor Heather Munroe-Blum
Principal and Vice-Chancellor
The Schulich School of Music’s $70-million New Music Building was inaugurated in September 2005. The building houses the 200-seat Tanna Schulich Recital Hall, the Marvin Duchow Music Library, and the Centre for Interdisciplinary Research in Music, Media and Technology.

**Note:** Not all courses are offered every year, and changes can be made after this calendar is printed. Always check the Class Schedule link at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered. Please check the “Course Information, Regulations and Descriptions” in Appendix B for an explanation of bullets and other symbols.

McGill University reserves the right to make changes to the information contained in this publication – including correcting errors, changing dates, altering fees, schedules of admission and credit requirements and revising or cancelling particular courses or programs – without prior notification.

The Web version of the Calendar at www.mcgill.ca/courses is the most current edition of this document, and is updated at various times of the year.

How to Read This Calendar

This calendar is comprised of the following sections:

- **Calendar of Dates** - Official university calendar of key dates, such as registration, start of lectures, exam periods and various other deadlines.
- **General University Information and Regulations** - University regulations and policies, applicable to all students.
- **Advising and Support** - Information about Advising, Student Services, Residential Facilities, Athletics, Information Technology Resources, and Resources for Study and Research.
- **Program Information** - Generally organized by faculty, and by departments within each faculty, these sections contain faculty-specific regulations, as well as program and degree requirements.
- **Field Studies and Study Abroad Opportunities** - Information about various opportunities for studying outside of McGill, while registered at McGill.
- **Application Procedures, Admission Requirements (Appendix A)** - University policies and procedures on how to apply to McGill.
- **Course Information (Appendix B, yellow-coloured pages)** - Organized alphabetically within each faculty and containing course numbers, titles, credit weights, descriptions, prerequisites and additional course information.

For prospective students, counsellors, and academic advisers, this calendar highlights the myriad of programs and courses offered at McGill.

If you are a newly admitted or current McGill student, this calendar is your official guide to program and degree information, along with faculty-specific and university-wide rules and regulations that you will need to consult throughout your academic career at McGill.

**YOUR ACADEMIC CAREER AT MCGILL**

**Regulations**

This calendar contains the regulations about your undergraduate academic career at McGill.

Regulations concerning when to register, when you can add or drop courses, the consequences of missing deadlines, how grading appears on your transcript, and other important pieces of information can be found in the section 3 "General University Information and Regulations".

You should also consult the appropriate section of the calendar for faculty-specific regulations that may not be covered in the section 3 "General University Information and Regulations".

When you are admitted to McGill, your offer letter indicates the degree and program to which you have been accepted, and the number of credits you need to complete for your degree. McGill has 11 faculties, and every student usually belongs to one of these faculties. For some degrees, such as the B.A. & Sc., you belong to two faculties and will need to consult the section on the Bachelor of Arts and Science as well as the sections on each of the two faculties. This calendar applies to undergraduate programs in the following faculties: Agricultural and Environmental Sciences, Arts, Education, Engineering, Desautels Faculty of Management, Religious Studies, Schulich School of Music, and Science.

For Medicine (including Nursing, and Physical and Occupational Therapy), please consult the Health Science calendar.

**Your Academic Program**

You are registered in a **degree**, but for many degrees there are associated programs (a major, minor, major concentration, etc.). For some degrees, such as the Bachelor of Engineering, you will typically follow one program (such as Computer Engineering). For others, such as the Bachelor of Arts, you will typically follow more than one program (such as a major concentration in English, with a minor concentration in History).

A typical undergraduate degree at McGill is 120-140 credits (four years of study).

- Quebec CEGEP students typically receive 30 credits of advanced standing, so they will usually only have a further 90-110 credits (three years of study) to complete. This can vary by faculty, so consult your faculty section. In your first year, you will be placed in **U1** (undergraduate year 1).
- Most other students typically have 120-140 credits to complete. This can vary by faculty, so consult your faculty section. In your first year, you will be placed in **U0** (undergraduate year 0), which is often referred to in documentation, in this calendar and in other places on campus, as your **freshman** year.
- Many students at McGill come with other forms of advanced standing (International Baccalaureate, French Baccalaureate, advanced placement exams, or students admitted from other universities as transfer students). You will receive information during the admissions process.

You will find **program requirements** in your faculty section or in departmental sections within your faculty. In some cases, you may pursue one of your programs in a department that is outside the faculty to which you belong. For example, if you are enrolled in the Bachelor of Commerce degree, but are pursuing a minor concentration in Italian Civilization, you would consult the Desautels Faculty of Management section for the BCom requirements and the Italian Studies department section, under the Faculty of Arts, for the Italian Civilization program requirements.
Things you need to know about your academic program:

- The number of credits needed to complete your degree. Typically, three credits correspond to a one-term course, but there are many variations.

- **Required courses**: courses that must be completed to fulfill the requirements of a major, minor, etc., unless the student receives exemptions. Students have no choices among required courses.

- **Complementary courses**: A set of alternative courses that can be taken to fulfill the requirements of a major, minor, etc. Students choose a specified number of courses from the set.

- **Elective courses**: Courses that do not count toward the fulfillment of the requirements of a major, minor, etc. They are often, but need not be, selected from outside a student's program of study. Some restrictions may apply, but students have the most choice in selecting elective courses. Some faculties also permit students to take elective courses using the satisfactory/unsatisfactory option. Consult your faculty regulations concerning elective courses.

- Often, the department will also provide you with a **recommended list** of courses (or streams), so that you know the typical term-by-term course pattern.

For more assistance in understanding program requirements, and for a list of advisers on campus, please see the Undergraduate Advising, section 4.1.4 "Contact Information for Advising".

1 Calendar of Dates 2007-08

The complete Calendar of Dates is available on the Web at www.mcgill.ca/student-records. The excerpt published herein was accurate as of February 2007. The information is subject to change and users are advised to verify important dates by checking the Web. Key dates for the faculties and schools included in this Calendar are given below. Unless otherwise specified, dates given for faculties apply to any schools therein.

- Agricultural and Environmental Sciences, including School of Dietetics and Human Nutrition and McGill School of Environment students registered in A&ES
- Arts, including School of Social Work, and McGill School of Environment students registered in Arts
- Education
- Engineering, including School of Architecture
- Desautels Faculty of Management
- Schulich School of Music
- Religious Studies
- Science, including School of Computer Science and McGill School of Environment students registered in Science

2.5.4 Student Government, page 41

2.1 History

The Hon. James McGill, a leading merchant and prominent citizen of Montreal, who died in 1813, bequeathed an estate of 46 acres called Burnside Place together with £10,000 to the “Royal Institution for the Advancement of Learning” upon condition that the latter erect “upon the said tract or parcel of land, an University or College, for the purpose of education and the advancement of learning in this Province”; and further upon condition that “one of the Colleges to be comprised in the said University shall be named and perpetually be known and distinguished by the appellation of ‘McGill College.’”

At the time of James McGill’s death, the Royal Institution, although authorized by law in 1801, had not been created, but was duly instituted in 1819. In 1821 it obtained a Royal Charter for a university to be called McGill College. Further delay was occasioned by litigation, and the Burnside estate was not acquired until March 1829. The Montreal Medical Institution, which had begun medical lectures at the Montreal General Hospital in 1822, was accepted by the College as its Faculty of Medicine in June 1829. After further litigation, the College received the financial endowment in 1835 and the Arts Building and Dawson Hall were erected. The Faculty of Arts opened its doors in 1843.

Progress, however, was slow until the 1821 Charter was amended in 1852 to constitute the members of the Royal Institution as the Governors of McGill College. Since that time the two bodies have been one. It was first called “The University of McGill College” but in 1885 the Governors adopted the name “McGill University.” Even after the amended charter was granted, little advance was made until 1855 when William Dawson was appointed Principal. When he retired 38 years later, McGill had over 1,000 students and Molson Hall (at the west end of the Arts Building), the Redpath Library, the Macdonald Buildings for Engineering and Physics, and a fine suite of medical buildings had been erected.

Since then the University has continued to grow vigorously. In 1864 the first women students were admitted and in 1889 the Royal Victoria College was opened, a gift of Lord Strathcona, to provide separate teaching and residential facilities for women students. Gradually, however, classes for men and women were merged.

In 1905 Sir William Macdonald established Macdonald College at Sainte-Anne-de-Bellevue, as a residential college for Agriculture, Household Science, and the School for Teachers. Those components have since become the Faculty of Agricultural and Environmental Sciences, which includes the School of Dietetics and Human Nutrition, on the Macdonald Campus, and the Faculty of Education, located on the downtown campus. The University’s general development has been greatly facilitated by the generosity of many benefactors, and particularly by the support of its graduates, as regular public funding for general and capital expenditures did not become available until the early 1950s. Since that time government grants have become a major factor in the University’s financial operations, but it still relies on private support and private donors in its pursuit of excellence in teaching and research.

The University now comprises 11 faculties and 10 schools. At present over 32,000 students are taking credit courses; one in four is registered in Graduate Studies. The University is also active in providing courses and programs to the community through the Centre for Continuing Education.

2.2 Incorporated and Affiliated Colleges

INTEGRATED COLLEGE
Royal Victoria College
3425 University Street, Montreal, QC H3A 2A8
The Royal Victoria College, a non-teaching college of McGill University, provides residential accommodation for women students.

AFFILIATED THEOLOGICAL COLLEGES
Montreal Diocesan Theological College
3473 University Street, Montreal, QC H3A 2A8
Principal: J. M. Simons; B.A.(Bishop’s), S.T.B. (Trinity, Toronto), Ph.D.(Georgetown)

Presbyterian College of Montreal
3495 University Street, Montreal, QC H3A 2A8
Principal: J. Vissers; B.A.(Tor.), M.Div.(Knox, Toronto), Th.M.(Princeton), Th.D.(Knox, Toronto)

United Theological College of Montreal
3521 University Street, Montreal, QC H3A 2A9
Principal: P. Joudrey; B.A., M.Div.(Acadia), D.Min.(Andover Newton)

The above three colleges train students for the ministry and grant certificates for ordination but they have remitted their degree-granting powers, except with respect to the M.Div. and honorary doctorates, to the University.

2.3 University Government

McGill University is a corporation created by a Royal Charter granted by the Crown of the United Kingdom, a general supervisory power being retained by the Crown and exercised through the Governor General as Visitor.

The Governors of the University constitute the Royal Institution for the Advancement of Learning, a corporation existing under the laws of the Province of Quebec. In them is vested the management of finances, the appointment of professors, and other duties. Twelve of the governors are elected by the Board from amongst those nominated by its membership committee; three are elected by the Alumni Association; two are elected by Senate from amongst its members; two elected by the full-time administrative and support staff from amongst its members; elected by the full-time academic staff; and four elected by students from amongst the student body. The Board elects the Chancellor of the University and also, from amongst its members, a chair to preside at its meetings, who may also be the Chancellor. The President is, ex officio, Chair of Senate.

The Chair of the Board of Governors is President of the Royal Institution for the Advancement of Learning.

The Principal and Vice-Chancellor is the academic head and chief administrative officer of the University, appointed by the Board of Governors after consultation with a Statutory Committee to Nominate a Principal. The Principal is, ex officio, Chair of Senate.

The Senate is the highest academic authority of the University and has control over admission, courses of study, discipline, and degrees. The regulations of Senate are executed by the various faculties and schools, which also carry primary responsibility for the educational work of the University.
2.4 Recognition of Degrees

The Royal Institution for the Advancement of Learning (McGill University) is a publicly funded institution and holds a Royal Charter dated 1821 (amended in 1852) as well as being incorporated under the laws of the Province of Quebec.

McGill University was a founding member of the organization which evolved into the current Association of Universities and Colleges of Canada (A.U.C.C.) in which it remains very active. In addition, McGill University is a member of the American Association of Universities (A.A.U.). It is also a member of the Association of Commonwealth Universities and the International Association of Universities. Its undergraduate, professional and graduate degrees, including doctorates in a full range of disciplines, have been recognized by educational, government and private organizations worldwide for decades.

All of McGill’s degree programs are approved by the Quebec Ministère de l’Éducation, du Loisir et du Sport (MELS) and the Conférence des recteurs et des principaux des universités du Québec (CREPUQ).

2.5 Board of Governors

(As of January 2007)

VISITOR

The Governor General of Canada

Her Excellency The Right Honourable Michaëlle Jean

BOARDS OF GOVERNORS

Robert Rabinovitch

Chair

Heather Munroe-Blum

Principal and Vice-Chancellor

Members

EX-OFFICIO

The Chancellor

The Chair of the Board of Governors

The Principal and Vice-Chancellor

The Provost, Deputy Provost, and the vice-principals

The deans of faculties

The Dean of Continuing Education

The Dean of Graduate and Postdoctoral Studies

The Dean of Students

The Director of Libraries

Elected Members

63 members elected by the faculties, the University Libraries, the Board of Governors, and administrative and support staff.

Medical Residents or Postdoctoral Scholars Group (1)

Student Members (19)

2.5.2 Administrative Officers

Chancellor

Robert Rabinovitch; B.Com.(McG.), M.A., Ph.D.(Penn.)

Chair of the Board of Governors

Heather Munroe-Blum; O.C., B.A., B.S.W.(McM.), M.S.W.(W.Laur.), Ph.D.(N.Carolina)

Principal and Vice-Chancellor

Anthony Masi; A.B.(Colgate), Ph.D.(Brown)

Provost

TBA Vice-Principal (Administration and Finance)

Ann Dowsett-Johnston; B.A. (Queen's)

Vice-Principal (Development, Alumni and University Relations)

Denis Thérien; B.Sc.(Montr.), M.Sc., Ph.D.(Wat.)

Vice-Principal (Research and International Relations)

Richard I. Levin; B.Sc.(Yale), M.D.(NYU)

Vice-Principal (Health Affairs)

Michael Goldbloom; B.C.L., L.L.B. (McG.)

Vice-Principal (Inter- Institutional Relations)

Chandra Madramootoo; B.Sc., M.Sc., Ph.D.(McG.)

Associate Vice-Principal (Macdonald Campus)

TBA Associate Vice-Principal (Communications)

Johanne Pelletier; B.A., M.A.(McG.)

Secretory-General

Morton Mendelson; B.Sc.(McG.), Ph.D.(Harv.)

Deputy Provost

Martin Kreiswich; B.A. (Hamilton), M.A. (Chic.), Ph.D. (Tor.)

Interim Dean (Graduate and Postdoctoral Studies)

Linda Jacobs Starkey; B.Sc.(Mt. St. Vincent), M.Sc., Ph.D.(McG.)

Interim Dean of Students

Sylvia Franke; LL.B., B.Sc.(Tor.)

Chief Information Officer

Nicholas de Takacsy; B.Sc., M.Sc.(Montr.), Ph.D.(McG.)

Interim Registrar and Executive Director of Admissions, Recruitment and Registrar's Office

2.5.3 Deans, Directors of Schools and Libraries

Chandra Madramootoo; B.Sc., M.Sc., Ph.D.(McG.)

Agricultural and Environmental Sciences

Christopher Manfredi; B.A., M.A.(Calg.), M.A., Ph.D.(Claremont)

Arts

Glenn Cartwright; B.A.(Sir G. Wms.), M.A.(McG.), Ph.D.(Alta.), F.A.A.S.P., F.C.C.T.

Continuing Education-Interim

James Lund; B.D.S.(Adelaide), Ph.D.(W.Ont.)

Dentistry

Roger C. Slee; B.A.(Qld.), M.A., Ph.D.(Alta.)

Education

Christophe Pierre; M.Sc.(Prin.), Ph.D. (Duke)

Engineering

James Nemes; B.Sc.(Md.), M.Sc., D.Sc.(GWU)

Graduate and Postdoctoral Studies - Interim

Nicholas Kasirer; B.A.(Tor.), B.C.L., LL.B.(McG.), D.E.A.(Paris)

Law

Peter Todd; B.Com.(McG.), Ph.D.(Br. Col.)

Management

Richard I. Levin; B.Sc.(Yale), M.D.(NYU)

Medicine

Donald McLean; Mus.Bac., M.A., Ph.D.(Tor.)

Music
2.5.4 Student Government

All students registered in an undergraduate program on the downtown (McGill) campus are registered members of the accredited Student Society McGill University, affectionately known as SSMU (SmOO). Your student society acts as your representation on key issues inside and outside of the campus. There are 6 elected members of the society who represent all 18,000 plus students on the downtown campus. There is a legislative council which meets twice a month that is comprised of a councillor from all faculty associations. This council of 35 members meets to discuss Students’ Society of McGill University business.

Each faculty and each department also have organizations dedicated to providing extra curricular involvement for their students.

The Student Society runs over 150 clubs and 14 services and provides a great deal of extra curricular opportunities for students to balance a life of study with a life of play and also an opportunity to meet other students.

Situated on the downtown campus the Students society operates a five floor building including an international lounge, cafeteria, reading room, club office space and a campus multipurpose venue.

The Students’ Society of McGill University offices are located at 3600 McTavish Street suite 1200 and operate between the hours of 9-5 during the year and operate from 10-4 in the summer.

For more information regarding student government at McGill you can contact:

3.1 General Policies and Information

3.1.1 Authorization, Acknowledgement and Consent

When applying for admission to the University, all students acknowledge that they are bound by and undertake to observe the statutes, rules, regulations, and policies in place from time to time at McGill University and the faculty or faculties in which they are registered, including those policies contained in the University Calendars and related fee documents. Their obligation as a student commences with their registration and terminates in accordance with the University's statutes, regulations, and policies.

Students should verify any information or statement provided as part of their application, realizing that an admission granted based on information in their application or supporting documents that is incorrect or untrue may be revoked at the sole discretion of the University.

3.1.2 Student Rights and Responsibilities

The Handbook of Student Rights and Responsibilities is published jointly by the Office of the Dean of Students and the University Secretariat. A compendium of regulations and policies governing student rights and responsibilities at McGill, it is distributed to new students at the Dean of Students’ Orientation Sessions on both downtown and Macdonald campuses.

The Handbook is also available on the Web at www.mcgill.ca/deanofstudents/rights.

3.1.3 Language Policy

The main language of instruction at McGill is English. Every student has a right to write essays, examinations, and theses in English or in French except in courses where knowledge of a language is one of the objectives of the course.

It is recommended that students who lack proficiency in English avail themselves of the opportunity to take an intensive English as a second language course prior to, or early in, their program of studies. Information concerning second language course offerings can be found in the Faculty of Arts section of this Calendar and in the Summer Studies and Continuing Education Calendars. There are special language requirements for Faculty of Education students; please see Faculty of Education section 7.2.1, "Undergraduate Education Programs".

3.1.4 Policy Concerning Access to Records

Statements of account and all other correspondence are sent directly to students who retain full control as to who has access to their records or accounts. (Officers and members of the University staff may also have access to relevant parts of such records for recognized and legitimate use.) No progress report or any other information is sent to parents and/or sponsors unless specifically requested by the student in writing.

In accordance with the Act Respecting Access to Documents held by Public Bodies and the Protection of Personal Information (the "Access Act") personal information, including transcripts of academic records, may be released only with the authorization of the student. When a student applies to McGill, he/she authorizes the University to release certain personal information (name, address, telephone number, e-mail address, date of birth, program and student status) to the persons and bodies listed below.

The following persons and bodies are included in the authorization:

a. libraries of other Quebec universities with which McGill established reciprocal borrowing agreement (ID number and bar code may also be disclosed to such libraries)
b. the Quebec Ministère de l’Éducation, du Loisir et du Sport (MELS), in order to create, validate and/or modify the student's Permanent Code

c. the appropriate authorities involved with the external or internal funding of the student's fees (financial records may also be disclosed to such authorities)
d. the Association of Universities and Colleges of Canada
e. the Association of Registrars of Universities and Colleges of Canada and the Conférence des recteurs et des principaux des universités du Québec, or the member institutions of these organizations, for the purpose of admissions operations and the production of statistics.
f. the school(s) or college(s) which the student attended
g. students and alumni who have volunteered to speak with admitted students
h. the Student Associations recognized by McGill University for the category(ies) of students to which the student belongs
i. the McGill Alumni Association
j. professional bodies or corporations (e.g., engineers, dentists)
k. McGill Network and Communications Services for the purposes of listing the student’s McGill e-mail address in an online e-mail directory.

Students who choose not to authorize the University to disclose personal information to the organizations mentioned above in h, i, j and k must complete and submit an opposition form. The opposition form is available at the Admissions, Recruitment and Registrar’s Office.

E-mail is an official means of communication between McGill University and its students. All students are assigned a McGill e-mail address. They should view and verify their McGill e-mail address on Minerva, under the Personal menu. As with all official University communications, it is the student's responsibility to ensure that they are kept current and read. E-mail is considered the preferred medium for communication with the University. It is a violation for any user of official McGill e-mail addresses to impersonate a University officer, a member of the faculty, staff or student body, in line with the McGill University "Code of Conduct for Users of McGill Computing Facilities" and relevant federal and provincial legislation.

More information about e-mail procedures is available at www.mcgill.ca/email-policy. E-mail support is provided by IST Customer Services (ICS), visit www.mcgill.ca/ics/tools/email for more information. Please see section 4.5 "Information Technology Resources".

3.1.6 Academic Integrity

Communicating about academic integrity is an essential way to foster it. In submitting work in their courses, students must understand the meaning and consequences of plagiarism and cheating; these are considered to be extremely serious academic offences. Students who have any doubt as to what might be considered plagiarism in preparing an essay or term paper should consult the instructor of the course to obtain appropriate guidelines. There is a student guide to the meaning of plagiarism; students should consult the academic integrity Website at www.mcgill.ca/integrity. Strategies to prevent cheating are also provided on the Integrity Website. The possession or use of unauthorized materials in any test or examination constitutes cheating. Responses on multiple-choice examinations are normally checked by the exam security computer monitoring program. The program detects pairs of students with unusually similar answer patterns on multiple choice exams. Data generated by the exam security computer monitoring program can be used as admissible evidence either to initiate or corroborate an investigation or a charge of cheating under Section 16 of the Code of Student Conduct and Disciplinary Procedures.

The Code of Student Conduct and Disciplinary Procedures includes sections on plagiarism and cheating. The Code is included in the Handbook of Student Rights and Responsibilities, which is
available through the academic integrity Website or at www.mcgill.ca/secretariat.

3.1.7 Proper Use of Computing Facilities

Students are required to comply with the Code of Conduct for Users of McGill Computing Facilities as approved by the University Senate. The Code is published in the Handbook of Student Rights and Responsibilities.

This policy (or code) is also posted on the CIO Website at www.mcgill.ca/cio/e-policies.

3.1.8 Non-smoking Policy

Quebec law prohibits smoking in public buildings.

3.1.9 Health Professions – Immunization Requirement

A compulsory immunization program exists at McGill for students in the health professions, including Dietetics. New students in those programs must complete the immunization program well before classes begin. Further information is available from the Student Health Service, (514) 398-6017.

3.1.10 Health Insurance – International Students

By Senate regulation, all students (full-time, part-time, special, exchange and visiting) and their accompanying dependants who do not have Canadian citizenship or Permanent Resident status must participate in the University’s compulsory sickness and accident plan. For enrolment procedures and details on the health insurance plan, students should consult the International Student Services Website. For information concerning rates, see section 3.4.5, “Other Fees”.

All inquiries related to this University policy must be directed to International Student Services.

International Health Insurance
Telephone: (514) 398-6012
E-mail: international.health@mcgill.ca
Website: www.mcgill.ca/internationalstudents/health

3.1.11 Health Insurance – Canadian Residents

Canadian students from outside the province of Quebec should check with their own provincial medicare office to ensure the validity of their health coverage while studying at McGill.

Canadian students who have been living abroad may not be eligible for provincial health insurance coverage. To ensure adequate health insurance coverage, you may enroll in the group plan offered through International Student Services.

All undergraduate students who pay tuition fees at either the Canadian or Quebec rates and who are members of the Students’ Society of McGill University (SSMU) or the Macdonald Campus Students’ Society (MCSS) are automatically covered by the Students’ Society’s Health and Dental Plans. For details on fees, change-of-Coverage dates and on what is covered by the plans, please refer to the information contained on the Web at www.aseq.com. If you’re not sure of your eligibility, please contact ASEQ, at (514) 789-8775.

3.1.12 Special Medical Needs

Students who have particular medical needs are requested to have their physician submit appropriate information on a confidential basis to the Student Health Service; see section 4.2.2 “Student Services – Downtown Campus” for contact information on the downtown campus and see section 4.2.3 “Student Services – Macdonald Campus” for Macdonald campus contact information.

3.1.13 Minerva

Minerva is McGill’s Web-based information system serving students, staff and faculty. Students view class schedules, including course descriptions and spaces available in course sections, register and make course changes using Minerva at www.mcgill.ca/minerva. Some of the other options available to students on Minerva include viewing their unofficial transcript and degree evaluation reports; viewing their Permanent Code, citizenship and Quebec residency status and fee information; updating their personal information such as address, telephone number and emergency contacts; for some faculties, changing their major or minor; applying to graduate and viewing their graduation status; viewing their McGill log-in information to access the Internet and e-mail; ordering official transcripts; retrieving tax receipts; submitting an on-line course evaluation; applying to McGill and viewing their application status.

3.1.14 myMcGill

Launched in April, 2006, myMcGill is McGill’s own web portal, giving students a personalized and integrated interface to McGill’s information systems. Currently, each McGill system (e.g. Minerva, WebCT, Library and Email) has its own login ID and password. Via a Single-Sign-On (SSO), myMcGill provides users with the advantage of accessing these systems without being prompted for additional or subsequent logins. It also provides direct (one click) access to functions within the back end systems without having to go to the front screen of these systems and navigate through multiple menus. Portlets include direct links to Minerva student information, personalized course list with links to webCT Vista, student society links, and athletics. To log into myMcGill go to: http://my.mcgill.ca or from the McGill homepage number and click on the myMcGill tab at the top right hand corner of the page.

3.2 Personal Information

3.2.1 Updating Personal Information

It is important that all students keep their official records up to date, especially their mailing or student billing address as these are used by the University year round. If all addresses on file are invalid or incomplete, a student’s mail will be held. Once the addresses are updated, future mail will be sent.

Students must update their addresses and/or telephone number and emergency contact information using Minerva -> Personal Menu.

Students who are away from campus and do not have access to the Internet may make the changes by writing to their Student Affairs Office or to the Admissions, Recruitment and Registrar’s Office. A written request must include the student’s signature.

Changes requiring verification of official documents, e.g., change of name or citizenship or correction of birth date, must be reported to the Admissions, Recruitment and Registrar’s Office as soon as possible. Such changes can only be made in person at the ARR Service Centre, James Administration Building, Room 205. Macdonald campus students can request changes in person at the Student Affairs Office, Laird Hall, Room 106.

3.2.2 Legal Documents

3.2.2.1 Why Do We Collect Legal Documents from You?

Your tuition fees at McGill will vary according to whether you are a Quebec student, a Canadian out-of-province student, or an international student, as per section 3.2.2.2, “What Documents Do We Need from You?” Fee schedules are listed in section 3.4, “Fees”.

Some of the documents we ask from you help us obtain your Permanent Code from the government of Quebec. This code is
obligatory, and is needed to comply with government legislation. The consequences of a missing Permanent Code are severe for the university, as the government funding for that student will be withheld. Furthermore, the university is subject to an annual audit by the Ministry of Education to ensure that our document collection and fee assessment processes are accurate.

If you have previously attended school in Quebec you already possess a Permanent Code - you can see it on your school report card or your CEGEP or university transcript. Students can also check if McGill has received their Permanent Code after they have accepted the University's offer of admission on Minerva under the Personal menu.

Students can consult their citizenship and Quebec residency status on Minerva. Select Student Menu -> Student Accounts Menu -> View your Tuition and Legal Status.

### 3.2.2.2 What Documents Do We Need from You?

Follow instructions in the first row of this table that applies to you. Send clear, legible copies of documents (not originals).

**Quebec and Canadian-Out-Of-Provience Students**

<table>
<thead>
<tr>
<th>Condition</th>
<th>Required Documents</th>
</tr>
</thead>
<tbody>
<tr>
<td>You have applied to McGill from CEGEP or you already have a student record at McGill</td>
<td>Usually no documents are required for your Canadian and/or Quebec status, as per our records or as ascertained from the Quebec Ministry of Education (MELS).</td>
</tr>
<tr>
<td>You have applied to McGill from another Quebec University</td>
<td>Canadian birth certificate or Canadian citizenship card (both sides) or Certificate of Indian status card or Record of Permanent Resident status (note 3) For your Quebec residency status, usually no documents are required, unless we cannot ascertain this from the Quebec Ministry of Education (MELS).</td>
</tr>
<tr>
<td>You were born in Quebec</td>
<td>Quebec birth certificate (note 1 &amp; 5) Permanent Code Data Form (note 2 &amp; 6)</td>
</tr>
<tr>
<td>You were born (or became a Landed Immigrant) in a Canadian province other than Quebec</td>
<td>Canadian birth certificate or Canadian citizenship card (both sides) or Certificate of Indian status card or Record of Permanent Resident status (note 3) Permanent Code Data Form (note 2 &amp; 6)</td>
</tr>
<tr>
<td>You are a Quebec resident through one of the other situations outlined by the Ministry of Education</td>
<td>Canadian birth certificate or Canadian citizenship card (both sides) or Certificate of Indian status card or Record of Permanent Resident status (note 3) Permanent Code Data Form (note 2 &amp; 6) Attestation of Residency in Quebec Form (note 6) Other supporting documents, depending on which situation you checked on the above Attestation of Residency form</td>
</tr>
</tbody>
</table>

**International Students**

<table>
<thead>
<tr>
<th>Condition</th>
<th>Required Documents</th>
</tr>
</thead>
<tbody>
<tr>
<td>You will be in Canada for less than 6 months (i.e. for only one academic semester)</td>
<td>Visitors Permit issued by Citizenship and Immigration Canada at your port of entry into Canada Photo page of your passport and the page stamped by Citizenship and Immigration Canada at your port of entry Permanent Code Data Form (note 2 &amp; 6)</td>
</tr>
<tr>
<td>You will be in Canada for more than 6 months (i.e. for two or more consecutive academic semesters)</td>
<td>Certificate of Acceptance of Quebec (CAQ) Permanent Code Data Form (note 2 &amp; 6) Study Permit issued by Immigration Canada (note 4)</td>
</tr>
</tbody>
</table>

**Note 1:** You may alternatively supply your Quebec baptismal certificate if it was issued prior to January 1, 1994 and clearly shows where you were born and that your baptism occurred no more than 4 months after your birth.

**Note 2:** Permanent Code Data Form (signed) is usually required. If the names of your parents appear on your birth certificate, or if you have already provided us with your Permanent Code, you do not need to supply this form.

**Note 3:** Proof of Permanent Resident status can be proved by an IMM 5292 document together with the Permanent Resident card (copy of both sides required). Alternatively, you may provide the IMM 1000 document along with the PR card (copy of both sides required).

**Note 4:** If you are a refugee, you should instead provide your Convention Refugee status document.

**Note 5:** Usually we need your birth certificate to prove your place of birth in Quebec. If you already have a valid MELS Permanent Code, but we are still showing you as being charged Canadian fees, we will accept a Canadian passport that shows your birth place in Quebec as proof that you qualify for Quebec residency.

**Note 6:** The links to download and print the Permanent Code Data and Attestation of Quebec Residency forms can be found at [www.mcgill.ca/student-records/documents](http://www.mcgill.ca/student-records/documents).

**Fee Exemptions**

Exemptions from International Tuition Fees may be claimed by students in certain categories. As well, both international and non-Quebec Canadian students or permanent residents in certain language programs leading to a degree in French may be eligible for a fee exemption from international or the non-Quebec Canadian rate. Please note that the list of language programs is limited and subject to change by the Ministère de l’Éducation, du Loisir et du Sport. Students, if eligible for one of the exemption categories, are then assessed at the Quebec student rate. A list of categories and the required application forms are available at [www.mcgill.ca/student-records/fees/exemption](http://www.mcgill.ca/student-records/fees/exemption) and also at the Admissions, Recruitment and Registrar's Office where the application forms must be submitted. An exemption will not be granted unless the application form is submitted.

### 3.2.2.3 Have We Received Your Documents?

**Quebec/Canadian/International Fees**

It usually takes us about a week to receive and record your documents.

- Check your tuition status on Minerva student accounts menu: Student Menu->Student Accounts Menu->View your Tuition and Legal Status.
- Check the phrase: **Fees currently calculated according to rules for...** This will tell you if you are assessed as: International student, Canadian student, or a Quebec student.
- The University has implemented e-billing as of the 2005-2006 academic year. A paper fee statement will no longer be mailed via Canada Post. For more information please refer to the following Website: [www.mcgill.ca/student-accounts/e-bill](http://www.mcgill.ca/student-accounts/e-bill).

If you do not agree with the assessment, notify us right away. We cannot accept changes or offer you a lower tuition rate after the last day of classes at the end of the term, as the government does not allow us to amend our files at that point.

**Permanent Code**

It can take anywhere from one week to four weeks for the Ministry to verify or issue your Permanent Code. Check your Permanent Code on Minerva: Personal Menu ->Name Change Form or alternately on the student accounts menu: Student Menu->Student Accounts Menu->View your Tuition and Legal Status. If the Permanent Code number appears there, your documents are in order. If not, you have not yet provided us with your documents listed above or we have not yet received confirmation from the Ministry that your documents are sufficient for creation of a Permanent Code.
3.2.2.5 Where Do I Send my Documents?

Send in all your documents after you have been accepted to McGill University. You must send your documents to the appropriate office to ensure that your record is up to date. All documents must be submitted in the following manner:

- Address your email to legaldocumentation@mcgill.ca and attach your relevant scanned document(s).
- Send the attached file in an accepted format:
  - Standard PDF (.pdf)
  - Tagged image format (.tif, .tiff; for scans)
- Note: Individual E-mail size (including your attachments) should not exceed 5 MB (5120 KB).

By E-mail:

By Mail:

In Person or by Courier:

Telephone: (514) 398-4474
E-mail: admissions@mcgill.ca

3.2.3 Identification (ID) Cards

Students registered at McGill are required to present an ID card when writing examinations and when using libraries, Student Services, certain laboratories, and many residences. An ID card cannot be issued until at least 3 hours after the student has registered. When requesting the card, new students must present Permanent Code information and proof of legal status in Canada (for a list of documents please see section 3.2.2, “Legal Documents”). ID cards will not be issued if any of the legal documents are missing. Registered students may obtain an ID card at these times and locations:

Quebec CEGEP students: Tuesday June 12 to Friday August 17, 2007, Open 9:00 a.m. to 5:00 p.m. (note that we are closed on Monday June 25, Monday July 2, and weekends). You are encouraged to come during this period to avoid line-ups later in August. No international students can be carded before August 20.

Canadian and Quebec students: Thursday, August 2 to Friday, August 17, 2007, Open 9:00 a.m. to 5:00 p.m. (except weekends). You are encouraged to come during this period to avoid line-ups later in August. No international students can be carded before August 20.

All students, including international students: Monday August 20 to Friday, August 31st, 2007, Open 9:00 a.m. to 5:00 p.m. including Saturday and Sunday, August 25-26.

Starting Tuesday, September 4, 2007, Normal office hours.

On the Macdonald Campus, newly registered students entering from Quebec CEGEPs, may obtain an ID card from the Student Affairs Office, Room 106, Laird Hall. Office hours are from 9:00 a.m. to 4:00 p.m., Monday through Thursday and 9:00 a.m. to 3:00 p.m. on Friday throughout the Summer. (Please note that the Student Affairs Office will be closed for the statutory holidays of Monday, June 25th and Monday, July 2nd.)

ID cards will be issued to new Canadian and Quebec students during the weeks of August 6 - 10, 13 - 17, 20 - 24, in the Student Affairs Office, Room 106, Laird Hall. Those students missing any of the dates noted will be able to obtain their ID cards during Orientation activities.

Please note that international students may obtain their ID cards as of August 20, 2007.

As of Tuesday, September 4th, 2007, ID cards may be obtained in the Student Affairs Office during normal office hours.

Other notes:

- students who do not register for consecutive terms should retain their ID card to avoid having to replace it when they re-register.
- if your card has expired there is no charge for a replacement as long as you hand in the ID card.
- if you change programs or faculties there is no charge as long as you hand in the ID card.
- if your card has been lost, stolen or damaged, there is a $20 replacement fee.
The Student Identification Card is the property of the University, is to be used by the cardholder only, and is not transferable. Students withdrawing from all of their courses must attach their ID card to the withdrawal form or return their ID card to the Admissions, Recruitment and Registrar's Office (or the Faculty of Agricultural and Environmental Sciences Student Affairs Office, Macdonald Campus).

Students who need security access to labs or other facilities should refer to www.mcgill.ca/security/services/access.

### 3.2.4 Legal Name

All students are registered under their legal name as shown in one of the following documents:
1. Canadian birth certificate.
2. Canadian Immigration Record of Landing (IMM1000 or IMM5292 and Permanent Residence card, both sides).
3. Canadian Immigration Study or Work Permit document.
5. International passport (for Canadians, a Canadian citizenship card is required. Note that a Canadian passport is not acceptable).
6. Letter from the International Students' consulate or embassy in Canada.
7. Marriage certificate issued outside of Quebec* (translated into English or French by a sworn officer if in another language).

In the case of a variation in the spelling of the name among these documents, the University will use the name on the document that appears first on the above list.

**Note:** This is the name that will appear on the student's degree, diploma or certificate on graduation, and on the student's transcript, and used by the Ministère de l'Éducation, du Loisir et du Sport (MELS) to create a Permanent Code.

* Quebec marriage certificates are only acceptable if issued prior to 1984.

### 3.2.5 Verification of Name

Students should verify the accuracy of their name on McGill's student records via Minerva and make any necessary corrections to formatting, e.g., upper/lower case letters, accents and spacing, using the Minerva Name Change Form under the Personal Menu.

Students cannot change the name on their record via Minerva. Requests for such changes must be made by presenting official documents (see section 3.2.4 “Legal Name”) in person at the Admissions, Recruitment and Registrar's Office, James Administration Building, Room 205.

### 3.3 Registration

Once students have confirmed their intention to attend McGill on Minerva, they must register during the registration periods listed below by using Minerva, McGill's Web-based information system, to add courses to their record. They may continue to register throughout the registration period by adding and dropping courses until they have finalized their schedule. Registration is performed on-line at www.mcgill.ca/minerva.

Refer also to Registration information in each faculty section. All course descriptions are in separate sections at the back of the Calendar. New students in particular should refer to “Course Information, Regulations and Descriptions (Appendix B)” to familiarize themselves with McGill's course numbering system, multi-term course rules, and course terminology.

For fee policies related to registration and withdrawal from courses or withdrawal from the University, please refer to all parts of section 3.4, “Fees”.

#### 3.3.1 Registration Periods

The dates given below were accurate when this Calendar was published. Although changes are not anticipated, students are advised to confirm the dates on the Web at www.mcgill.ca/student-records.

**Returning Students**

Registration will take place between Thursday, March 22 and Tuesday, July 31, 2007. Registration will be phased in, opening in the following order:

- **Year 3 and Year 4 students:** Thursday, March 22
- **Year 2 students:** Tuesday, March 27
- **All other returning students:** Thursday, March 29

Some faculties and departments set their own schedules for advising and registration within these dates. Further information is distributed from the faculty Student Affairs Offices.

Successful completion of registration is contingent upon acceptable academic standing in the previous session and payment of any previous outstanding fees and fines.

**Newly Admitted Students Entering in September 2007**

Registration will take place between Tuesday, June 12 and Tuesday, September 4.

Registration will be phased in, opening in the following order:

- **Tuesday, June 12,** registration opens for students admitted from Quebec CEGEPs.
  - **Wednesday, August 1,** registration opens for students whose highest level of education prior to registering at McGill is a French Baccalaureate, International Baccalaureate or at least one year of university.
  - **Thursday, August 2,** registration opens for all other new students.

A newly admitted student entering in September 2007 who wishes to register for courses in the Summer of 2007 may do so on Minerva. Please check the Summer Studies calendar for further information or refer to www.mcgill.ca/summer.

**Newly Admitted Students Entering in January 2008**

Registration will take place between Tuesday, December 4, 2007 and Thursday, January 3, 2008.

Some faculties and departments require that students be advised before registration and set specific dates for advising and registration within these dates. Please refer to the Faculty sections of this Calendar, as well as to the Welcome to McGill booklet or the Essential Guide For New Students, Macdonald Campus, which are included with the acceptance package.

#### 3.3.1.1 Late Registration

Students who fail to register during the normal registration period may do so within the period designated by the University for late registration. They will be assessed a late registration fee as listed below.

**Returning Students:** May register late from Wednesday, August 1 until and including Tuesday, September 4 with the payment of a late registration fee of $50 ($20 for Special Students).

**New and Returning Students (Fall):** Students may register late via Minerva from Wednesday, September 5 until Tuesday, September 18 with the payment of a late registration fee of $100 ($40 for Special Students).

**New and Readmitted Students (Winter):** May register late via Minerva from Friday, January 4 until Tuesday, January 15 with the payment of a late registration fee of $100 ($40 for Special Students).

**Special Late Registration:** Students whose records are not available for registration on-line during the late registration period,
usually due to late admission, may receive special permission to register in person. This information is included with their letter of acceptance.

### 3.3.2 Class Schedule

The Class Schedule for the upcoming Fall and Winter terms normally becomes available in mid-March at [www.mcgill.ca/courses](http://www.mcgill.ca/courses). (The Summer term schedule is normally made available in January.)

The Class Schedule includes the days and times when courses are offered, class locations, names of instructors, and informational remarks and comments. The calendar entries of scheduled courses can be accessed by clicking on the CRN (course reference number) that appears with each course section shown.

Students should make special note of any pre-registration requirements for a course, such as placement tests, or departmental approval/permission required.

Class Schedule information is subject to change and is updated as courses are added, cancelled, rescheduled or relocated.

It is the responsibility of all students to consult the Class Schedule at the time of registration, and again before classes begin, to ensure that changes have not resulted in conflicts in their schedule.

### 3.3.3 Course Load

It is the student’s responsibility to follow the faculty regulations listed below. When registering on Minerva, students must not exceed the maximum credits permitted by their faculty.

For information on course load requirements for entrance scholarships renewal and in-course awards refer to section 3.8.1, "Entrance Awards for McGill Students".

The normal course load in most undergraduate faculties is 15 credits per term. For students in the Faculty of Engineering, Faculty of Education, and Schulich School of Music, however, the normal course load is 15 to 18 credits per term.

Students in satisfactory standing may take up to 17 credits per term (18, in Music and Engineering). Students in Arts, Management, Religious Studies, or Science whose CGPA is above 3.00 may take 18 credits per term. Such students who wish to do so are strongly urged to consult an adviser.

**Students in probationary standing** take a maximum of 12 credits per term, with the following exceptions:

- Agricultural and Environmental Sciences: 14 credits.
- Arts and Science: up to 14 credits, with special approval of the Associate Dean.
- Engineering: 13 credits, including repeated courses.
- Music: 14 credits.
- Management: 12 credits maximum of new material.

In some cases they may add a repeated course in which a grade of D or F was obtained.

**Note:** Students who carry fewer than 12 credits per term are considered to be part-time in that term.

### 3.3.3.1 Course Information and Regulations

For information regarding course information and regulations, students are advised to refer to "Course Information, Regulations and Descriptions (Appendix B)".

### 3.3.4 Changing Programs within Selected Faculties

Students admitted to programs in Arts, Science, Arts and Science, and to certain programs in Management, Education and Engineering may add or change programs within their faculty using Minerva. Certain restrictions apply. In all cases students should consult the appropriate adviser for approval before making any changes and for faculty specific regulations concerning program changes.

Students in the faculties of Arts, Science and the Bachelor of Arts and Science degree may change major/major concentrations, minor/minor concentrations or faculty programs using Minerva. These students may also change into, or out of, an honours program. Some restrictions apply.

Note that students in the Arts, Science or B.A. & Sc. freshman programs (97 or more credits) cannot change program, but may change options within their freshman program.

Students in the Faculty of Management may add or change majors and concentrations within certain programs using Minerva. Students may not add an honours program or change a major or concentration within an honours program. Other restrictions may be verified with the faculty.

Students in the Faculty of Education, registered in the B.Ed. Secondary program, may change subjects or options on Minerva and students in the B.Sc. Kinesiology program may add, drop or change minors.

In the Faculty of Engineering, students who have confirmed their admission to the B.Eng. Electrical/Computer/BSE program may select their specific program option using Minerva. These students cannot use Minerva to change programs once their initial selection is made. To make a further change, students must consult an adviser in the Department of Electrical and Computer Engineering. Students in other programs in the Faculty of Engineering cannot make any program changes using Minerva.

Students are not permitted to use Minerva to change degree (with the exception of Engineering, as above) or to select a program in another faculty or school.

### 3.3.5 Quebec Inter-University Transfer Agreement (IUT)

The IUT Agreement permits concurrent registration at McGill and another Quebec institution.

#### 3.3.5.1 McGill Students

Regular undergraduate and graduate degree, diploma or certificate students registered at McGill may, with the permission of their faculty, register at any university in the province of Quebec for three (3), or exceptionally six (6), credits per term in addition to their registration at McGill. These courses, subject to faculty regulations, will be recognized by McGill for the purpose of the degree for which the student is registered up to the limit imposed by the residency requirements of the program. (Normally, a minimum residency requirement of 60 credits must be completed at McGill in order to qualify for a McGill degree — students should check with their faculty.) This privilege will be granted if there are valid academic reasons.

Students wishing to take advantage of this agreement should consult their Student Affairs Office for details, and are informed that this agreement is subject to the following conditions:

- The other universities concerned may, at their discretion, refuse the registration of a student for any of their courses.
- Students must complete their faculty and program requirement.
- The student is responsible for ensuring that the McGill Class Schedule permits these courses to be taken without conflict.
- The universities concerned are not responsible for special arrangements in cases of examination or class schedule conflicts.
- Marks earned at the host university will not appear on McGill transcripts or be included in McGill grade point averages.
- Students who are attending McGill as exchange students from outside Quebec are not eligible to take courses at another Quebec institution through the IUT agreement.
- Scholarship holders should consult with their Student Affairs Office and the Scholarships Coordinator concerning eligibility for continuation or renewal of their awards.

Students must initiate an on-line Inter-University Transfer (IUT) application to request the required authorizations at [www.mcgill.ca/student-records/register/iut](http://www.mcgill.ca/student-records/register/iut). Students may also find additional information posted at their faculty Website.
Note: Once the IUT application is approved by both the home and host universities, the student remains responsible for registering in the same course for which they have obtained electronic approval. The method of registration of the host university will vary (e.g., Web, in-person, phone, etc.). The student is advised to initiate the electronic application allowing enough time to meet the host university’s registration deadlines. Furthermore, the student is responsible for adhering to all registration deadlines of the host institution. Students who later wish to drop or withdraw from the course(s) for which approval has been granted, will need to drop or withdraw from the course as per the method of registration at the host university AND submit this change on the online IUT application.

For courses that are completed the grade will be automatically submitted to the home university by the host institution.

3.3.5.2 Visiting IUT Students

Students from other Quebec universities wishing to come to McGill using the Inter-University Transfer (IUT) agreement must initiate an on-line application to request the required authorizations at www.mcgill.ca/student-records/register/iut. Visiting students should also refer to their home university website for regulations on the number of credits allowed as well the policies for transferring the credits.

Note: Once the IUT application is approved by both the home and host universities, the student remains responsible for registering in the same course for which they have obtained electronic approval. At McGill, the visiting student whose application has been approved will have to register on Minerva (www.mcgill.ca/minerva). Visiting students will be informed via e-mail of the steps involved in registering once their application has been approved.

The student is advised to initiate the electronic application allowing enough time to meet the host university’s registration deadlines. Furthermore, the student is responsible for adhering to all registration deadlines of the host institution. Students who later wish to drop or withdraw from the course(s) for which approval has been granted, will need to drop or withdraw from the course as per the method of registration at the host university AND submit this change on the online IUT application.

For courses that are completed the grade will be automatically submitted to the home university by the host institution.

3.3.6 Courses Taken under the Satisfactory/ Unsatisfactory (S/U) Option

Where permitted by faculty and program regulations, students may take one elective course per term to be graded under the Satisfactory/Unsatisfactory option, to a maximum of 10% of the student's credits taken at McGill to fulfil the degree requirements.

The decision to have an elective course graded as S/U must be made by the student before the Course Change deadline on Minerva as part of the course add/drop menu. No change can be made thereafter even if the student selected the option in error. If the course is a multi-term course, the S/U option must be selected by the course change deadline of the first part of the course.

Grades will be reported in the normal fashion by the instructor. Grades of A through C will be converted to “Satisfactory” (S), and grades of D and F will become “Unsatisfactory” (U). The courses taken under the S/U option will be excluded from the grade point average calculations, but they will be included in the attempted credits total. Credits for courses with a final grade of S will also be included in the number of credits earned.

Notes:
1. Desautels Faculty of Management students: The S/U option is not available on Minerva for Management students. Please contact the B.Com. Office for details on the conditions that apply.
2. Faculty of Engineering students: If the S/U option is selected for a core course and not removed by the Course Change deadline, the Student Affairs Office will remove the option and notify the student of the change.
3. Schulich School of Music students: The S/U Option is only applicable to non-music electives.
4. To be considered for in-course awards, including Dean’s Honour List designations, and/or the renewal of entrance scholarships, students must complete at least 27 graded credits in the regular academic session, exclusive of courses completed under the S/U option.
5. The S/U option is not available via Minerva to Visiting, Exchange and Quebec Inter-University Transfer Agreement (IUT) students. These students must consult with their faculty Student Affairs Office for approval. Also, visiting students are responsible for ensuring that a course taken under the S/U option is acceptable by their home university and that the credits are transferable.
6. Special Students are not eligible to use the S/U grade mode.

For further information, students should contact their Departmental Adviser or Student Affairs Office, as appropriate.

3.3.7 Course Change Period

During the initial Registration Periods, see section 3.3.1 “Registration Periods”, students may make changes to their course registrations (add or drop courses), subject to the requirements and restrictions of their program and of individual courses.

The Course Change deadline coincides with the deadline for late registration. Please refer to the Calendar of Dates, section 1, “Calendar of Dates 2007-08”.

Students who drop their last Fall course after the end of August or drop their last Winter course after the end of December are considered to be withdrawn from the University. They must follow the procedures for readmission.

Students who are registered in the Fall term may continue to add and drop courses that will begin in the Winter term throughout the Fall term until the deadline for course change/late registration in the Winter term.

After the Course Change deadline, courses may be added according to each faculty’s regulations and only with written permission of the instructor and the Office of the Associate Dean of the student’s faculty (or Director, BCom Program, in the Desautels Faculty of Management). A fee will be charged for each course added.

3.3.8 Regulations Concerning Course Withdrawal

Following the Course Change deadline there is a period of a few days during which students may withdraw, with a grade of W and full refund of course fees, from courses that start in that term.

After the Withdrawal (with refund) deadline, there is a period during which withdrawal from a course will also result in a grade of W but no course fees will be refunded.

Courses that begin in the Fall Term
Deadline for withdrawal (grade of “W”) with refund: Sunday, September 23, 2007
Deadline for withdrawal (grade of “W”) without refund:
- Single-term courses: Sunday, October 21, 2007
- Multi-term courses: Tuesday, January 15, 2008

Courses that begin in the Winter Term
Deadline for withdrawal (grade of “W”) with refund: Sunday, January 20, 2008
Deadline for withdrawal (grade of “W”) without refund:
- Multi-term courses: Thursday, May 15, 2008

*Please note that students in multi-term courses with course numbers ending in N1 and N2 (begin in the winter, skip the summer, are completed in the subsequent Fall term) may withdraw after May 15 and until the end of the Fall term course change period by contacting their faculty Student Affairs Office.
After the withdrawal (without refund) deadline, but before the end of term, the student may, under exceptional circumstances, be granted permission to withdraw from a course. (Permission will not be granted merely because a student is doing unsatisfactory work.) A grade of W or WF, as appropriate, will appear on the transcript but will not be calculated in the GPA. For further information, students should consult their faculty Student Affairs Office.

Note:
1. Students who wish to withdraw from required or complementary courses should also secure permission from their adviser. A course withdrawal form is available from the faculty Student Affairs Office. (Additional restrictions for Music courses are indicated in the Schulich School of Music section.)
2. The responsibility for initiating withdrawal rests solely with the student. Neither notification of the course instructor nor discontinuance of class attendance will suffice. The date on which a student's withdrawal is entered on Minerva is the official date of withdrawal, even if the student stopped attending lectures earlier.
3. Fee refunds, if any, will be in accordance with section 3.4.7, “Fees and Withdrawal from the University”.

3.3.9 Regulations Concerning University Withdrawal

Students considering University withdrawal are strongly urged to consult with their adviser and Student Affairs Office before making a final decision.

Student’s responsibility

The responsibility for initiating University withdrawal rests solely with the student. Neither notification of the course instructor nor discontinuance of class attendance will suffice. The date on which a student drops or withdraws from all courses on Minerva or the date the request for withdrawal is submitted to the Student Affairs Office is the official date of withdrawal, even if the student stopped attending lectures earlier.

3.3.9.1 Deadlines for University Withdrawal

All students who have accessed Minerva to register must officially withdraw within deadlines if they decide not to attend the term(s) for which they have registered. See Withdrawal (W) deadline dates in the Calendar of Dates. Students who drop their last Fall or Winter course by the end of the add/drop period of that term are considered withdrawn from the University. They must follow the procedures for readmission.

Students who wish to withdraw from the University by the deadlines indicated below must drop or withdraw from all courses on Minerva.

Fall Term:
Deadline for University withdrawal with refund (minus $100 for returning and $200 for new students): Sunday, September 23, 2007
Deadline for University withdrawal without refund: Sunday, October 21, 2007

Winter Term:
Deadline for University withdrawal with refund (minus $100 for returning and $200 for new students): Sunday, January 20, 2008
Deadline for University withdrawal without refund: Sunday, February 17, 2008

Students who are blocked from dropping or withdrawing from their last course on Minerva are required to contact their Student Affairs Office. The Student Affairs Office will supply any forms necessary to complete the University withdrawal where the deadline for University withdrawal has not been passed.

Special Note for Faculties of Arts, Science, and Management:
Students who wish to withdraw after the deadlines indicated above may under exceptional circumstances be granted permission to withdraw from the University. Such students should contact the Student Affairs Office for further information.

Special Note for Faculty of Agricultural and Environmental Sciences:
In addition to the above procedures, all students in the Faculty of Agricultural and Environmental Sciences must contact their Student Affairs Office for further information on University withdrawal procedures.

Special Note for Faculty of Engineering:
Students who wish to withdraw after the deadlines indicated above may under exceptional circumstances be granted permission to withdraw from the University.

3.3.9.2 Consequences of University Withdrawal

Fee refunds, if any, for the term in which the student withdraws will be in accordance with section 3.4.7, “Fees and Withdrawal from the University”.

Upon withdrawal, students are required to return their ID card to the University as stated in section 3.2.3, “Identification (ID) Cards”.

Students who withdraw from the University and wish to re-register in a subsequent term must follow the procedures for re-admission, section 3.3.13, “Readmission”.

Students who withdraw during the Fall term are considered withdrawn from the entire academic year, regardless of whether Winter term courses are dropped. If they wish to return for the Winter term, they must follow the procedures for readmission.

3.3.10 Deferred Admission

Students wishing to defer admission to McGill must make an official request no later than August 31 for the Fall term, and December 31 for the Winter term to:
Deferral Coordinator
Admissions, Recruitment and Registrar’s Office
James Administration Bldg.
Fax: 398-4193
E-mail: deferral@mcmill.ca

Please note that several conditions apply for deferral. These conditions and deadlines will be communicated to the student once the official request for deferral has been received.

If you have accepted the offer of admission and registered for courses and now wish to defer your admission, you must withdraw from McGill by dropping those via Minerva by the above deadlines and before submitting a deferral request. If your request for deferral is granted, your deposit of $200 will be transferred to the Deferred Session.

If students do not request a deferral by the deadline, they will be required to re-apply for the next available admission cycle. Registered students who withdraw after the deadline must request re-admission through their Faculty. See section 3.3.13, “Readmission” for more details.

Note: applicants to the Schulich School of Music are not eligible to apply for deferred admission.

3.3.11 Summer Term/Summer Studies

The Summer term at McGill covers the months of May to August. During that period a wide array of credit courses from McGill degree programs is offered. Most are month-long courses with lectures every day. These courses are usually accepted for transfer credit by other universities. For more details, consult the Summer Studies Calendar or Website at www.mcgill.ca/summer or the Summer Studies Office at (514) 398-5212.

Students taking Summer Studies courses to complete their graduation requirements at McGill will receive their degrees at the Fall Convocation (normally held in November).

It is the student’s responsibility to follow the University and faculty regulations. When registering, students must not exceed the maximum credits permitted by their faculty.

Students may register in no more than 12 credits (Management or Music students, 16 credits) during the summer, at McGill or at other universities, except by special permission of their Associate Dean (or Director, BCom Program, Desautels Faculty of Management).
Students registering under the "Quebec Inter-University Transfer Agreement (IUT)”, see section 3.3.5, are limited to 6 credits.

3.3.12 Inter-Faculty Transfer

McGill students who have not graduated and wish to transfer into another undergraduate faculty may now apply using the Minerva Faculty Transfer/Readmission Menu, unless otherwise indicated in the table below.

Students must also refer to the Faculty Website for faculty-specific rules and to determine what supporting documents must be submitted for their application. To access the Faculty Web sites and find more information on Faculty Transfers please refer to www.mcgill.ca/student-records/inter-faculty-transfers.

3.3.13 Readmission

Students wishing to return after an absence of a portion of an academic year can now submit an application for readmission using the Minerva Faculty Transfer/Readmission menu. In their application they would state the reasons for their absence from the University and give a summary of their activities during that period.

Students who withdrew because of illness should provide their Faculty Student Affairs Office with a medical note stating that they are ready to resume studies as a supporting document to their application.

Students should also note time limits for the completion of degrees.

Students wishing to return to a different faculty after an absence can apply for readmission using the Minerva Faculty Transfer/Readmission menu.

For more details on the readmission process you can refer to the following Website: www.mcgill.ca/student-records/inter-faculty-transfers.

3.3.14 Auditing of Courses

No auditing of courses is permitted at McGill.

3.4 Fees

The University reserves the right to make changes without notice in the published scale of fees. (Note: The information in this section was prepared in early December 2006. Fees for the 2007-08 year will only be finalized in the late spring.)

Further information regarding fees can be found on the Student Accounts Website: www.mcgill.ca/student-accounts.

For information on financial support, see section 3.8, “Scholarships and Student Aid”.

3.4.1 Fee Information Booklet

The Fee Information booklet, published in June of each year by the Student Accounts Office, contains additional information as well as any fee adjustments that may have been made after the publication of this Calendar. Students are bound by the policies and procedures contained therein. In the event of any discrepancy, the Fee Information booklet supersedes the Calendar.

A copy of the booklet will be sent to all new students. The contents are also available on the Student Accounts Website at www.mcgill.ca/student-accounts.
3.4.2 Access to Fee Information
Students can view their Account Summary by Term on Minerva. The Fall 2007 term fees will be accessible as of August 1.

3.4.3 Tuition Fees (2006-2007 rates)
Tuition fees vary according to the residence and citizenship status of the student. The rates described below only refer to credit activities.

Quebec Students
Tuition fees for Quebec students who are Canadian citizens or Permanent Residents are $55.61 per credit or $1,668.30 for 30 credits.

In accordance with provincial government requirements, students must provide proof that they qualify for assessment of fees at the Quebec rate; see section 3.2.2.2 "What Documents Do We Need from You?" for details.

Note: Students who do not submit appropriate documentation by the stipulated deadline are billed at the non-Quebec Canadian or the international rate, depending on the documentation submitted. If proof of status is submitted after a student has been billed, but before the document submission deadline, the tuition supplement will be waived. Should your tuition status be reduced during the evaluation period, any late payment and/or interest charges accumulated on the difference will also be waived.

Non-Quebec Students (Canadian or Permanent Resident)
Tuition fees for non-Quebec students who are Canadian citizens or Permanent Residents are $163.79 per credit ($55.61 Quebec rate plus $108.18 Out of Province supplement) or $4913.70 for 30 credits.

Based on past year’s fee increases, the out of province supplement typically increases by 8% per annum. Fee increases will be announced as soon as they are known in the Spring.

In accordance with provincial government requirements, students must provide proof that they qualify for assessment of fees at the non-Quebec Canadian rate; see section 3.2.2.2 "What Documents Do We Need from You?" for details.

Note: Students who do not submit appropriate documentation by the stipulated deadline will be billed at the international rate. If proof of status is submitted after a student has been billed, but before the document submission deadline, the tuition supplement will be waived. Should your tuition status be reduced during the evaluation period, any late payment and/or interest charges accumulated on the difference will also be waived.

International Students
Tuition fees for undergraduate international students range from $431 to $500 per credit ($12,930 - $15,000).

It is expected that tuition fees for international students will increase by 8% in 2007-08.

The international fees listed in section 3.4.10, "Yearly Fees and Charges by Faculty (2006-07)", are representative of fees that students could expect to be charged in each degree program.

Exemption from International Tuition Fees may be claimed by students in certain categories. Such students, if eligible, are then assessed at the Quebec student rate.

3.4.4 Compulsory Fees (2006-2007 rates)

3.4.4.1 Student Services Fees
Student Services fees are governed by the Senate Committee on the Coordination of Student Services, a parity committee composed equally of students and University staff.

The fee, complemented by revenue from the Quebec government, the University, and the generosity of donors, supports Student Health (including Dental), Mental Health, Counselling and Tutorial, Chaplaincy, Career and Placement, Student Aid and International Student Services, the Office for Students with Disabilities, First-Year Office (including the Francophone Assistant), Off-Campus Housing, and the First Peoples' House. The Office of the Dean of Students also administers the academic integrity process as described in the Handbook of Student Rights and Responsibilities.

3.4.4.2 Athletics Fee
The Athletics fee covers athletics facilities, campus recreation (intramurals, fitness & recreation courses, drop-in recreation, etc.), and intercollegiate sports at both the Downtown and Macdonald campuses.

3.4.4.3 Student Society Fees
Student Society fees are compulsory fees collected on behalf of student organizations. Fees must be approved by the student body through fee referenda according to the constitutional rules of the association or society.

Changes to Student Society fees are voted upon by the students during the Spring referendum period.

For Canadian students, the Student Society fees includes Health and Dental Insurance of $184.60 (SSMU - Downtown campus) or $144.60 (MCSS - Macdonald campus).

Note: For international students, the Student Society fee includes a Dental Insurance Plan of $98.20 (SSMU - Downtown campus) or $76.92 (MCSS - Macdonald campus). International students will be obliged to participate in the University's compulsory International Health Insurance Plan, which, at the 2006-07 rate, costs $711 for single coverage. For more information, please contact International Student Services: (514) 398-6012.

3.4.4.4 Registration Charge
The University charges a per-credit registration charge to all students in courses and programs. This is assessed as follows: $6.78 per credit to a maximum of $101.70 per term.

3.4.4.5 Information Technology Charge
The purpose of the information technology charge is to enhance certain technology services provided to students as well as to provide training and support to students in the use of new technology. The fee is assessed as follows: $6.62 per credit to a maximum of $99.30 per term.

3.4.4.6 Transcripts and Diploma Charge
The University charges a per-credit transcript charge to all students. This entitles students to order transcripts free of charge. The fee is assessed as follows: $1.20 per credit to a maximum of $18.00 per term.

3.4.4.7 Copyright Fee
All Quebec universities pay a per credit fee to Copibec (a consortium that protects the interests of authors and editors) for the right to photocopy material protected by copyright. The fee is assessed as follows: $.66 per credit to a maximum of $.90 per term.

3.4.5 Other Fees
International Student Health and Accident Plan (compulsory) (based on 2006-07 rates)
Single $711
Dependant (one student with one dependant) $1,959
Family (one student with two or more dependants) $3,720

Application for Admission
All faculties except MBA $60
MBA $100
Admission appeals charge $100
Late Registration
After regular registration deadline:
• All eligible returning students, except Special students and Graduate part-time and additional session students. $50

McGill University, Undergraduate Programs 2007-2008
3.4.6.3 Guest Access on Minerva

Students may choose to give access privileges to a guest within Minerva. These privileges include viewing e-Bills/Account Summaries, Tax Receipts and e-payment.

A Web page at www.mcgill.ca/student-accounts/guest describes how students can set up this access. Students are asked to provide certain information about the individual for whom they wish to provide access to their fee-related information. The guest will be contacted by e-mail and provided with a link which they must use within a designated time period.

Students may revoke these access privileges at any time. At the same time, note that Student Accounts staff may respond to questions from your authorized guests regarding the information to which you have given them access.

If students do not wish to give a guest access privileges to Minerva, they may still enter alternative student billing e-mail addresses to which Student Accounts will send carbon copies of the monthly e-bill notification. However if someone has been granted access as a guest and their guest email is the same as a carbon copy student billing email address, the University will de-activate the student billing email address in order to only notify your guest about the billings once.

Students are cautioned NOT to share their own PINS with anyone, and guest access allows information to be passed to a guest without giving away your PIN.

3.4.7 Fees and Withdrawal from the University

All students who have accessed Minerva and who drop their last course from September 1 through to the withdrawal period with full refund will be deemed to have withdrawn from the University. They will be automatically charged a minimum charge of $100 (or their registration deposit fee, whichever is higher) to cover administrative costs of registration.

Students who discontinue their classes without taking steps to drop their courses will be liable for all applicable tuition and other fees.

3.4.7.1 Fee Refund Deadlines

The deadline dates for course refunds are independent of the deadline dates given for withdrawal from courses.

Fall Term – up to and including September 23:
Returning students – 100%* refund (less minimum charge of $100 in the case of complete withdrawal)
New students – 100%* refund (less registration deposit or $100, whichever is higher)

Fall Term – after September 23: No refund.

Winter Term – up to and including January 20:
Returning students – 100%* refund (less minimum charge of $100 in the case of complete withdrawal)
New students – 100%* refund (less registration deposit or $100, whichever is higher)

Winter Term – after January 20: No refund.

* Includes tuition fees, society and other fees, student services, registration and transcripts charges, and information technology charge.

If students wish to discuss the refund policy applicable to a special case, they must contact Student Records in the Admissions, Recruitment and Registrar’s Office.

Music students who, in special circumstances such as illness or injury, are given permission to withdraw from practical instruction after the end of the Course Change period will be charged $65 per week for 1-hour lessons ($97.50 for 1½ hours) up to a maximum equivalent to the total fees charged for the course.

3.4.6 Billings and Due Dates

3.4.6.1 Confirmation of Acceptance Deposit

Students admitted to the University will be required to confirm their acceptance of the offer of admission on www.mcgill.ca/minerva/applicants and pay the required $200 deposit by credit card (Visa or MasterCard) at that time.

3.4.6.2 Invoicing of Fees

Fees are assessed on a term by term basis.

Electronic billing is the official means of delivering fee statements to all McGill University students. All charges to the student’s account, including tuition, fees, health insurance and other miscellaneous charges are on your e-bill. E-bills are generally produced in the first few days of the month and an e-mail notification that the e-bill is ready to be viewed on Minerva is sent to the student’s official McGill e-mail address. Charges or payments that occur after the statement date will appear on the next month’s statement, but may be immediately viewed on the Account Summary by Term on Minerva (this is the on-line dynamic account balance view).

Interest will not be cancelled due to non-receipt of fee invoices. Students should access the Student Accounts Website at www.mcgill.ca/student-accounts for information on payment due dates.

Late Payment Fees: Students who still have an outstanding balance greater than $100 on their account as of October 31st (February 28th for the Winter term) will be charged a late payment fee of $25 over and above interest.

3.4.6.3 Late Payment Fees

Late application fee for Music Performance examination (requires permission from Chair, Performance Dept.)

$25

3.4.6.4 Returned cheque charge

$20

3.4.6.5 Audition Fee

$60

3.4.6.6 Late Music Placement Examination Fee

$50

3.4.6.7 Late application fee for Music Performance examination

$25

3.4.6.8 Supplemental Practical Examination in Music

$150

3.4.6.9 Schulich School of Music Fees:

- Audition Fee: $60
- Late Music Placement Examination Fee: $50
- Late application fee for Music Performance examination: $25
- Supplemental Practical Examination in Music: $150
- Music Private Lessons Fee (MUIN, MUPG subject code courses) (fee expected to be $333 in 2007-08): $166.50
Full refunds for practical instruction will be given up to the last Friday of the Course Change period.

3.4.8 Other Policies Related to Fees

3.4.8.1 Overdue Accounts

All tuition and fees assessed by the University must be paid in full or arrangements must be made to settle the debt.

Students’ accounts are considered delinquent if they are not paid in full within 60 days after the bill is issued. A financial hold will be placed on such accounts, preventing students from obtaining official academic transcripts and from accessing Minerva for any registration functions.

Interest: Interest is charged on overdue balances at the monthly rate of 1.24% multiplied by the balance outstanding at the end of the month (14.9% annually). The rate is evaluated each Spring, at which time it is set for the following academic year.

Students are advised to regularly verify their account balance via Minerva.

The University has no obligation to issue any transcript of record, award any diploma, or re-register a student in the case of non-payment of tuition fees, library fees, residence fees or loans on their due date.

Information for Registered Students

Students who have registered in a given term and who have amounts owing from previous terms must either pay their accounts or make payment arrangements with the Student Accounts Office before the end of the course add/drop period. Students in financial difficulty should first consult the Student Aid Office (Brown Student Services Building, Room 3200; 398-6013) to discuss the possibility of obtaining financial aid.

Failure to pay the previous term’s fees or to make arrangements to settle the debt prior to the add/drop deadline will lead to cancellation of registration in the current and subsequent terms.

Information for Students Who Are No Longer Registered

The delinquent accounts of students who fail to settle their debt or reach a suitable arrangement and of students who fail to provide the Student Accounts Office with up-to-date contact information, will be referred to a collection agency. Where neither the University nor the collection agency is able to collect on the account, the University reserves the right to have the student reported to a credit bureau. Students should be aware that the University is entitled to use all legal means to obtain payment and that students will be responsible for all costs associated with such actions.

CANCELLING REGISTRATION FOR NON-PAYMENT

In accordance with the fee policy as stated in section 3.4.8.1, “Overdue Accounts”:

The Student Accounts Office will make all reasonable efforts to notify students with a delinquent student account, and who have more than $100 outstanding from the previous term, that their registration will be cancelled for non-payment. The cancellation will be made effective the last day of the drop/add period unless the account has been settled or payment arrangements have been made with the University by then. After the add/drop deadline, students who pay or make payment arrangements with the Student Accounts Office will be referred to a collection agency. Where neither the University nor the collection agency is able to collect on the account, the University reserves the right to have the student reported to a credit bureau. Students should be aware that the University is entitled to use all legal means to obtain payment and that students will be responsible for all costs associated with such actions.

3.4.8.3 Fees for Students in Two Programs

Students in two programs normally are billed additional fees for their second program. Depending on the level of the two programs, e.g., one at the undergraduate vs one at the graduate level, students may incur both society and faculty fees and/or additional tuition fees. Consult the Student Accounts Website for further details.

Students in two programs may consult the Admissions, Recruitment and Registrar’s Office for information on tuition fees. Adjustments to bills will be made throughout the term when fees cannot be automatically calculated.

3.4.8.4 Québec Exchange (Inter-University Agreements)

Students taking courses as part of the Inter-University Agreement are required to pay the fees at their home university. The Agreement, therefore, relates solely to the transfer of academic credits. International students in undergraduate programs will not normally be permitted to take IUT courses. Students taking courses as part of the Inter-University Agreement are required to pay additional course charges that are compulsory upon registration in a particular course. Such additional course charges may represent special activity charges or course materials. The University reserves the right to refuse course registrations in non-government-funded activities.

3.4.8.5 Senior Citizens

Senior citizens aged 65 and over, registered in credit courses, will be credited an amount equal to 50% of the Quebec tuition fee rate for the 2007-08 academic year. This fee waiver will not be continued in 2008-09, but those who require financial aid should be aware that such aid will be available for students enrolled full-time in degree programs. Students in need may contact the Scholarship and Student Aid Office for more information at (514) 398-6013.

3.4.8.6 Part-time Students

Part-time students will be charged tuition fees at the per credit rates and are also subject to student society fees, student service fees, registration and transcript and diploma charges, information technology charges, and copyright fees.

3.4.9 Deferred Fee Payment

Students with Sponsors

Students whose fees will be paid by an outside agency such as the Department of Veterans Affairs, CIDA, a foreign government, or their University department (i.e., teaching assistants or demonstrators), must have written evidence to that effect. Sponsors and students alike must inform the University that a sponsorship is taking place so that the contract may be initiated and the student’s fee account affected. Notification to the University should occur at least one month prior to the beginning of the term in which the contract is to take effect. Full documentation on the procedure as well as the forms required to be completed are found at www.mcgill.ca/student-accounts/third.

When a third party has agreed to pay fees on behalf of a student, payment will be recorded on the fee account, thereby reducing the balance the student must pay. The University reserves the right to insist upon payment. If the third party does not pay the promised fees within 90 days of invoicing, the student will be responsible for paying the fees plus the late payment fee and accrued interest.

Students Receiving McGill Scholarships/Awards

Fall Term: McGill scholarships or awards normally are credited to the recipient’s fee account by mid-August. These awards have the effect of reducing the student’s outstanding balance.

Winter Term: Students can view upcoming Winter term scholarships or awards on Minerva once processed by the Student Aid Office. These awards are future-dated and will be released to the student’s fee account by January 2.
Students Receiving Government Aid

Students are encouraged to pay their tuition promptly upon receipt of their government assistance. Interest on outstanding tuition is charged monthly beginning in August for returning students and in September for new students. Students who have applied for government assistance by June 30th (June 1st for US students) will be entitled to an exemption of interest and/or late payment charges effective upon receipt of their government aid award at either the Student Aid Office or the Macdonald Campus Student Services.

Students are reminded that tuition and student housing fees have first call upon financial aid received from any source.

3.4.10 Yearly Fees and Charges by Faculty (2006-07)

Tuition fees at the undergraduate level are based on the number of credits taken. The following tables reflect the 2006-07 fees for a normal full-time course load of 30 credits per year.

Part-time students will be charged tuition fees at the per-credit rate and will be subject to student society fees, student services fees, registration and transcripts charges, and information technology charges.

Any changes to these charges will be updated as they become known via the Student Accounts Website: www.mcgill.ca/student-accounts.

### 3.5 Student Records

#### 3.5.1 Academic Standing

Students enter the University in satisfactory standing and their academic standing is determined soon after the end of a term in accordance with the regulations of their faculty. Standing codes are generated in January for the Fall term, in May for the Winter term, and in September for the Summer term. Students who are placed in unsatisfactory standing must apply to the faculty for re-admission. Consult the appropriate section of this Calendar for the Regulations on Academic Standing that apply to a particular faculty.

#### 3.5.2 Credit System

The faculties listed in this Calendar use the credit system, where each course is assigned a credit rating reflecting the number of weekly contact hours. In general, a three-credit course indicates three hours of lectures per week for one term but this does not apply to all faculties. Laboratory contact hours usually count for fewer credits. Credits also reflect the amount of effort required of students and generally assume two hours of personal study for each contact hour.

The credit weight of each course is indicated in parentheses beside the course title.

**Note:** Credit for multi-term courses (courses with the suffix sets: D1, D2; N1, N2; J1, J2, J3) is granted only after successful completion of all components in the specified time frame. For example, a student would have to take D1 and D2 components in consecutive terms and successfully complete them both in order to obtain credit.

Some faculties have specific policies on course credit, so students should consult the faculties’ sections of the Calendar for more information (e.g., Agricultural and Environmental Sciences: see section 13.5.7 “Credit System”, Engineering: see section 8.3.5.4 “Course Credits”; Science: see section 12.3.6.6 “Course Credit Weight”).

#### 3.5.3 Grading and Grade Point Averages (GPA)

Courses can be graded either by letter grades or in percentages, but the official grade in each course is the letter grade. Effective with the Fall term of 2002, all verification forms, transcripts and other documents show only letter grades for all subsequent terms. Where appropriate, a class average will be calculated and appear on transcripts expressed as the letter grade most representative of the class performance.

Grades A through C are termed satisfactory passes, D a conditional (non-continuation) pass, and F a failure. Certain courses have been approved for Pass/Fail (P/F) grading. Students may also designate elective courses to be graded under the S/U option; see section 3.3.6 “Courses Taken under the Satisfactory/ Unsatisfactory (S/U) Option”.

Students must obtain grades of C or better in courses used to fulfill program requirements. Students may not register in a course for which they have not passed all the prerequisite courses with a grade of C or better, except by written permission of the Departmental Chair concerned.

The letter grade is assigned grade points according to the table shown above. A student’s academic standing will be determined on the basis of a grade point average (GPA), which is calculated by dividing the sum of the course credit times the grade points by the total course GPA credits.

The term grade point average (TGPA) will be the GPA for a given term calculated using all the applicable courses at the same level in that term. The cumulative grade point average (CGPA) will be the GPA calculated using the student’s entire record of applicable courses at McGill at the same level; if the level is changed, e.g., from B.Sc. to B.A., the CGPA started again. Therefore, grades of D or F continue to be used in the CGPA calculation even after the course is repeated or if a supplemental examination is taken. Students should note that credits are only granted once for a repeated course regardless of the passing grade.

#### 3.5.3.1 Other Grades

J – unexcused absence (failed): the student is registered for a course but does not write the final examination or do other
3.5.4 Incomplete Courses

If, in the instructor’s opinion, there is sufficient reason to permit a delay in the submission of required term work, an extension of the deadline after the end of the course may be granted to the student. In this case, the instructor will submit a grade of K (incomplete).

If a grade of K is submitted, the instructor will also indicate the date by which the student must complete the work. Consult the faculty sections for maximum extensions.

If the instructor submits a new grade within the deadline, both the new grade and the grade of K will appear on the student's academic record on Minerva using the unofficial transcript to ensure that faculty reports and verification forms. However, on the student's official transcript the new grade will appear.

If the required work is not completed before the deadline, a grade of KF will be updated on the student's record. A KF denotes a failed course and is calculated in the TGPA and CGPA the same as an F.

In exceptional circumstances, and with the approval of the Associate Dean (or Director, BCom Program, Desautels Faculty of Management), the deadline may be extended further, in which case the grade of KE (further extension granted) will appear. If the extended deadline is not met, a grade of KF will replace the KE.

Music students who have marks of K not cleared by mid-May are ineligible for scholarships.

Students who have not, without a valid excuse, participated in or written a final examination or submitted required term work for any courses they were registered in shall be assigned a final grade of J (unexcused absence). For more information, see note regarding J grade above.

3.5.5 Transfer Credits

Students may be granted credit for courses passed with a grade of C or better at other universities, as long as they are within the number of credits imposed by McGill's residency requirements and program requirements in some faculties. In general, a maximum of 30 transfer credits may be granted. Students must be in satisfactory standing in order to be granted the transfer credits. Courses with grades of C-, P, and S will not be considered for transfer credits. The letter grades applied by the host institution take precedence over the numerical grades if both are provided. Students should note that a minimum of 60 credits must be completed at McGill in order to qualify for a McGill degree.

Students must obtain approval from their Student Affairs Office. In some faculties approval must be obtained from the Student Affairs Office as well as the academic adviser prior to taking the course, especially if the course is taken as part of a student's program requirements.

Grades earned at the host university for transfer courses are not entered on the student’s McGill transcript and are not included in the calculation of the TGPA or CGPA.

For universities outside Quebec, it is the student’s responsibility to ensure that an official transcript is sent from the host institution to the Senior Adviser, Student Affairs Office (Arts, Education, Engineering, Music, Science), the Students Affairs Office, Laird Hall, Room 106, Macdonald Campus (Agric. & Envir. Sc.), Students Affairs Office, BCom Program (Desautels Faculty of Management) or the Office of the Associate Dean (all other faculties). It is the student’s responsibility to process the request for transfer of credits with their home faculty at McGill within six months of return from the exchange program or study away. Students studying at another Quebec university on an Inter-University Transfer Agreement (IUT) will have their grade(s) sent to McGill University automatically by the host university. For additional information, please refer to section 3.3.5.7, “Quebec Inter-University Transfer Agreement (IUT)”.

Transcripts for transfer courses must meet the following deadlines:

- April 30, if term of graduation is to be Winter (Convocation in Spring)
- September 15, if term of graduation is to be Summer (Convocation in Fall)
- January 15, if term of graduation is to be Fall (degree granted February, Convocation in Spring)

Transcripts not received by the appropriate date will be considered for the next graduation period only.

3.5.6 Verification of Student Record

3.5.6.1 Unofficial Transcripts

Subject to section 3.5.7, “Changes to Student Records after Normal Deadlines”, students are responsible for verifying their academic record on Minerva using the unofficial transcript to ensure
that they are registered in the proper courses, and that the correct program information and expected term of graduation is appearing on their record.

Graduating students must make sure to verify their record on Minerva prior to the end of term in which they are graduating to ensure that the correct expected term of graduation is indicated on their unofficial transcript; if not, the student may be overlooked for graduation. Any questions or problems with their record should be directed to the Student Affairs Office.

3.5.6.2 Degree Evaluation
Degree Evaluation is a Minerva tool to help students and advisers compare the student's academic record with the requirements of a specific program. Students with access to Degree Evaluation on Minerva can review their progress within their current program. Also, if considering a change in program, students can generate a "what-if" comparison of their academic record with the requirements of another program.

Though program requirements are based on the most recent calendar, the presentation in the degree evaluation report may have a different appearance. For example, a long listing of courses in the calendar may be grouped into one course "attribute" on the report.

Degree Evaluation also provides a central record of adviser/faculty-approved adjustments to a student's program of study, e.g., the replacement of one specified course with another or acceptance of a non-McGill course for credit.

Students using Degree Evaluation are reminded that it is an advising tool only. A Degree Evaluation Report that indicates program requirements have been satisfied does NOT constitute approval to graduate.

For details regarding Degree Evaluation including "reading a degree evaluation report," please consult the Registration, student records and exams Website at: www.mcgill.ca/student-records/degree-evaluation.

3.5.7 Changes to Student Records after Normal Deadlines

3.5.7.1 Student Record Changes
Student record changes include: course add or course drop, course withdrawal, university withdrawal, program change (including changing minors or concentrations).

3.5.7.2 Registrar Deadlines
Fall term - January 31
Winter term - June 1
Summer term - October 1

3.5.7.3 Before Registrar Deadlines
For record changes after the normal deadlines published in the calendar, but before the Registrar deadlines above, the student must make a request in writing to the Associate Dean of their faculty (or Director, BCom Program, Desautels Faculty of Management), clearly explaining the reasons why the change could not have been requested prior to these dates. The Associate Dean will then review the request and render a decision. If permitted, the change will then be processed according to existing faculty and ARR student record procedures.

3.5.7.4 After Registrar Deadlines
A change that is requested after the Registrar deadlines above will not normally be considered. In situations where there are "extraordinary personal" or "extraordinary academic" circumstances that could not have been foreseen prior to these deadlines, students may formally request a student record change from the Associate Dean of the faculty (or Director, BCom Program, Desautels Faculty of Management). If the Associate Dean of the faculty approves the request, the change will then be processed according to faculty and ARR student record procedures. For all changes other than grade changes, full documentation supporting extraordinary circumstances will be filed by the faculty with the Registrar's office.

3.5.7.5 Fee Assessment Consequences
When a change to the student record is made, the revised fee assessment will be reflected on the next fee statement.

If a student wishes to contest the fee assessment, he or she must make a request in writing to Admissions, Recruitment and Registrar's office. The ARR, upon reviewing the extraordinary circumstances described in the supporting documentation provided by the faculty, and upon consultation with the Student Accounts Office if necessary, will decide whether or not to consider the request and will advise the student in writing of the outcome.

3.5.7.6 Student's Citizenship and/or Immigration or Fee Exemption Status
Changes related to student's citizenship and/or immigration or fee exemption status are not handled by the Faculty and are dealt with in section 3.2.2, "Legal Documents".

3.5.8 Transcript of Academic Record

3.5.8.1 Unofficial Transcripts
Students who require a copy of their student record can view and print their own unofficial transcript by accessing Minerva. This applies to records from 1976 to present. For pre-1976 records, an official transcript must be ordered.

3.5.8.2 Official Transcripts
Official transcripts can be ordered on-line via Minerva by going to Student Menu->Student Records Menu->Request Printed/Official Transcript. Students who cannot access Minerva should fill out the "Request for Release of Official Document" form available on-line at www.mcgill.ca/student-records/transcripts or in person at the Admissions, Recruitment and Registrar's Office at the address below. Transcript requests may be submitted by mail, by fax, or in person but must be signed by the student. To protect privacy, we do not accept telephone or e-mail requests.

Montreal, Quebec H3A 2T5
Fax: (514) 398-8939

3.5.8.3 General Information
Transcripts are free of charge.

Official transcripts are sent directly to the addresses provided by the student. Official transcripts in sealed envelopes can be given to those requesting them. Requests are processed in 3 to 5 working days, somewhat longer for pre-1976 records and at peak times.

ARR is not responsible for transcripts that are lost or delayed in the mail.

The University will issue only complete transcripts recording all work attempted and results obtained in any and all programs. In no circumstances will partial transcripts be issued.

Official transcripts will NOT be issued for students registered on or after September 2001 who have failed to provide the information and/or documents necessary to obtain or verify their Permanent Code.

Transcripts will not be issued if you owe fees or fines over $30. Official transcripts are produced on secure paper that cannot be copied.

3.5.8.4 Course Numbering on the Transcript
Prior to September 2002, course numbers had a seven-character designation beginning with the three-number code for the teaching unit/department. The next three digits specified the course, with the first of these indicating its level. The final character was a letter indicating the term, or terms, during which the course was offered. For example:

107-200A = Philosophy (107) course (200) in Fall term (A);
301-202B = Architecture (301) course (202) in Winter term (B);
154-230D = Economics (154) course (230) extending for two terms, Fall and Winter (D).
A list of the former Teaching Unit Codes and their Subject Code equivalents is available on the Web at www.mcgill.ca/student-records/transcripts.

### 3.6 Examinations

#### 3.6.1 Examinations – General Information

In addition to the general policies listed here, students should consult the faculty sections of this Calendar for particular regulations. Students will be informed by the end of the change of course period of the evaluation method to be used in each course.

Every student has a right to write term papers, examinations and theses in English or in French except in courses where knowledge of a language is one of the objectives of the course.

Students will not be permitted to write an examination in any course unless they have fulfilled the requirements of the course to the satisfaction of the instructor and the Associate Dean (or Director, BCom Program, Desautels Faculty of Management). Once students have presented themselves for an examination or test, they must submit all written work to the invigilator before leaving.

Students writing examinations must have with them their valid McGill student ID card. Forgetfulness cannot be considered an acceptable excuse.

**Students are reminded that cheating in any examination is considered a serious offence which could lead to expulsion from the University.** Students are not permitted to have in their possession, or to use, any unauthorized materials during an examination.

Responses on multiple-choice examinations are normally checked by the Exam Security Computer Monitoring Program. The program detects pairs of students with unusually similar answer patterns on multiple-choice examinations. Data generated by the program can be used as admissible evidence either to initiate or corroborate an investigation or a charge of cheating under Section 16 of the Code of Student Conduct and Disciplinary Procedures.

All students are responsible for knowing the University Examination Regulations and the Code of Student Conduct and Disciplinary Procedures. The former are normally posted during the examination period and both may be obtained from the Office of the Associate Dean (or Student Affairs Office, BCom Program, Desautels Faculty of Management).

Information about issues related to academic integrity can be found at www.mcgill.ca/integrity.

**Class Tests**

Members of the teaching staff may from time to time give interim class tests if they think them necessary.

**Special Facilities**

Students with visual or other disabilities should consult the Coordinator, Office for Students with Disabilities, Brown Building, about the possibility of special examination facilities.

**Credit by Examination**

In certain exceptional cases and in certain faculties, students may apply to the Associate Dean (or Director, BCom Program, Desautels Faculty of Management) to write a final examination in order to obtain credit in a course for which they were not registered. This is possible only in those courses where there is no other assessment except the final examination.

#### 3.6.2 Final Examinations

Formal final examinations are held during an examination period following the term in which the course is given. The dates of the examination periods are listed in the Calendar of Dates. **Students are warned not to make travel arrangements to leave Montreal prior to the scheduled end of any examination period.** In some courses there is no final examination; standing in these courses is determined on the basis of term work and class tests.

**3.6.2.1 University Regulations Concerning Final Examinations**

**Preamble**

The objectives of these regulations are as follows:
1. to protect students from excessive workloads;
2. to use the full 15-week term to maximum advantage.

**Regulations**

1. These regulations shall apply to undergraduate courses up to and including the 500 level that are evaluated by the use of written examinations. They shall not apply to clinical, field, laboratory, performance, and seminar courses, or to other courses that are evaluated solely by means of a design, paper, program, or project.

2. Written examinations (including take-home examinations) shall not be held during the last two weeks of scheduled classes during the Fall and Winter terms, except where a pattern of continuous evaluation has been established, in which case the total value of examinations given in this period shall comprise no more than 10% of the final mark.

3. If the written examinations in a course constitute 50% or more of the final mark, one of these shall be given as a final written examination; and it shall take place during the examination period after the last day of scheduled lectures in December or April.

4. A final examination given during the examination period shall be worth at least 25% of the final mark.

5. Students shall be informed of all course requirements by the end of the course change period. All term work shall be assigned early enough in the term for students to complete the assignment(s) by the last day of class.

6. The due date for term work in courses to which these regulations apply shall be no later than the last day of classes.

7. In courses that span the Fall and Winter terms (course pairs with numbers ending D1 and D2), instructors who wish to give a mid-year examination in December must schedule it in the formal examination period.

8. The principles enunciated in these regulations shall be applied, appropriately modified, to courses given during the summer, to other courses of less than a 13-week duration, and to courses in the Faculties of Law, Medicine, Dentistry, and Education that do not follow the normal University Timetable.

9. Individual faculties may propose variations in these regulations to the Academic Policy and Planning Committee in order to meet their special needs.

10. These regulations, and any variations to them, shall be made known to students by each faculty.

**Instructors are not permitted to grant any special treatment regarding examinations to any student.** Students who believe there are circumstances which might justify making special examination arrangements for them or which might legitimately be taken into account in evaluating their performance should apply to the Associate Dean of their faculty (or Director, BCom Program, Desautels Faculty of Management).

**It is the responsibility of the student to confirm the date, time and place of the examination by checking examination schedules posted on notice boards on campus and on the Web at www.mcgill.ca/students.** This information is not available by telephone. No student will be allowed to enter an examination later than one hour after it has started.

**3.6.2.2 Deferred Examinations**

Students who, for serious reasons such as illness or family affliction, have not written one or more examinations, may receive the permission of their own faculty Student Affairs Office to defer the examination to the next supplemental examination period, except
in the Faculties of Engineering and Management (where students write the examination the next time the course is given). Students should be aware that deferred examinations are granted only for compelling reasons, verified and accepted by the Student Affairs Office. Supporting evidence such as an appropriate medical report is required. The Student Affairs Office must be informed as soon as possible after the examination of the reason for their absence from the examination.

Final application deadline in Arts, and Science, Education, and Engineering for deferred examinations is January 15, for Fall term courses, and May 15, for Winter term courses and courses that span the Fall and Winter terms. The Faculty of Agricultural and Environmental Science (FAES) also offers deferred exams for the Fall and Winter period. FAES students should verify dates in the Calendar of Dates and consult their Student Affairs Office for procedures.

If the request is approved, an L will appear in place of a grade in such courses. The grade obtained in the deferred examination after it has been written will replace the grade of L on the student's official transcript.

No supplemental examinations are available for students who receive a grade of D, F, J, or U in a course after a deferred examination. Such students must either re-register in the same course following the term or in an approved course substitute.

A Music student who has a mark of L not cleared by mid-May is ineligible for scholarships.

If deferred status is not granted, the student will receive a grade of J in the course, which will count as a failure in the GPA and CGPA. The student may, however, be allowed to write a supplemental examination. Please note there are no supplemental exams in Agricultural and Environmental Sciences, Architecture, Engineering, or Management courses.

Students in Summer term courses should check with their Student Affairs Office on the availability and restrictions on deferred and supplementary examinations in such courses.

In the event of illness, it is recommended that students consult the McGill Health Service. A medical note is required in support of a request to the Associate Dean of a faculty or a Program Director of a school, as appropriate, for deferred examinations.

Students who have already written an examination may not subsequently request that the exam be deferred. Such students should consult their faculty office regarding the availability of supplemental examinations.

### 3.6.2.3 Reassessments and Rereads

In accordance with the Charter of Student Rights, and subject to the conditions stated therein, students have the right to consult any written submission for which they have received a mark and the right to discuss this submission with the examiner. If, after such discussion, students want to have a formal final examination reread, they must apply in writing to the Student Affairs Office (the Department Chair in Music and the Associate Dean Students Affairs in the Faculty of Agricultural and Environmental Sciences). Students should check with that office regarding application deadlines for formal rereads.

For more detailed regulations concerning reassessments and rereads, students should consult their faculty section in the appropriate University Calendar.

### 3.6.3 Invigilation (Exams from Other Universities)

Upon request, McGill will offer an invigilation service enabling students to write exams given by other universities. Exams must be scheduled on weekdays at 9:30 a.m., and cannot be scheduled on evenings, weekends, statutory holidays, McGill holidays, or Fridays during the months of July and August.

**The Cost**

The cost for invigilation and administration is $50 per student per exam plus $10 for courier charges to Canada and $20 to the USA and $30 courier charges to overseas.

The home university should confirm in advance of the exam date if it is paying; otherwise, the student will be charged.

---

**Setting Up**

Please confirm the exam date and time well in advance of the scheduled exam and also provide your phone number and e-mail address.

Exams and examination booklets, along with full instructions, should be sent to this address well in advance of the scheduled exam:

Admissions, Recruitment and Registrar Service Centre
James Administration Building, Room 205
McGill University
848 Sherbrooke St. West
Montreal, Quebec H3A 2T5
Telephone: (514) 398-2836
Fax: (514) 398-8939
E-mail: exam.arr@mcgill.ca

### 3.7 Internships, Exchanges and Co-op Programs

#### 3.7.1 Internships and Co-op Programs

Several faculties at McGill offer undergraduate students the opportunity to participate in an internship or co-op program.

Faculty of Agricultural and Environmental Sciences students, see section 13.1.3.1, “Internship Opportunities and Co-op Experience”.

Desautels Faculty of Management students, see section 9.3.4, “International Student Exchange Program”.

Faculty of Engineering students, see section 8.2.8, "IYES: Internship Year for Engineering and Science in the Montréal Experience". The Department of Mining, Metals and Materials Engineering also offers Co-op programs in Metallurgical and Mining Engineering.

Students in the Faculty of Science should refer to section 12.11.9, "Internship Programs – Internship Year for Engineering and Science (IYES)".

Students in the Faculty of Arts should refer to the Arts Internships Website: www.mcgill.ca/arts-internships.

#### 3.7.2 Exchange Programs

For information on Exchange Programs, see section 15.3, “Exchange Programs”.

#### 3.7.3 Field Studies

For information on Field Studies, see section 15.1.3, “Field Study Semesters and Off-Campus Courses”.

#### 3.7.4 Canadian University Study Abroad Program (CUSAP)

For information on Canadian University Study Abroad Program (CUSAP), see section 15.3.7, “Canadian University Study Abroad Program (CUSAP)”.

#### 3.7.5 Quebec Government Ministère de l'Education, du Loisir et du Sport (MELS) Travel Awards for Quebec Residents

For information on Quebec Government Ministère de l'Education, du Loisir et du Sport (MELS) Travel Awards for Quebec Residents, see section 15.3.3.2, “Québec Ministère de l’Education, du Loisir et du Sport (MELS) Travel Awards for Quebec Residents”.
3.8 Scholarships and Student Aid

The Scholarships and Student Aid Office offers a complete range of merit and need-based awards for entering and in-course undergraduate students. As well, the office administers all federal, provincial and US government student aid programs. For information and links to government Web sites, please consult www.mcgill.ca/studentaid. Comprehensive information concerning all undergraduate awards is also contained in the Undergraduate Scholarships and Awards Calendar available on the Web at www.mcgill.ca/courses or from the Scholarships and Student Aid Office.

3.8.1 Entrance Awards for McGill Students

Undergraduate Entrance Scholarships are available to students entering McGill University in the first year of their first undergraduate degree program. Students should consult www.mcgill.ca/studentaid/scholarships/entrance for details, the highlights of which include:

- Entrance Scholarships are entirely merit-based and financial need is not considered
- Value ranges from $3,000 to $10,000, renewable
- There are two types: the Basic, whereby eligibility is based solely on academic achievement, and the Major, based on academic achievement as well as leadership qualities in school and/or community activities
- Application Procedures:
  - Basic: by applying to McGill, all eligible applicants are automatically considered. No separate application is required.
  - Major: candidates will be able to apply for a Major Scholarship on the Web after their application for admission has been submitted and they have received an e-mail acknowledgment
- Students must ensure that they have sent in all required supporting documentation
- Applicants to Dentistry, Law and Medicine must inquire at their respective faculty's admissions office regarding availability of awards

For complete information and regulations for Entrance Scholarship recipients, please visit www.mcgill.ca/studentaid/scholarships/recipients.

Need Based Entrance Financial Aid: This program offers financial aid to students from families of modest means who require assistance to enable them to attend McGill. Entrance awards are credited to the tuition fee accounts of students for the following academic year.

3.8.2 In-Course Awards for McGill Students

Faculty scholarships and awards are decided by the individual Faculty Scholarships Committees, and students should consult the appropriate section of this Calendar for regulations and information concerning these awards, or the Undergraduate Scholarships and Awards Calendar, or the following Website: www.mcgill.ca/studentaid/scholarships/in-course.

- Most undergraduate scholarships and awards are granted on the basis of the combined GPA for the fall and winter terms and applications are not required unless specifically indicated in the terms of an award.
- To be considered for in-course awards and/or the renewal of entrance scholarships, students must complete at least 27 graded credits in the regular academic year exclusive of courses completed under the Satisfactory/Unsatisfactory option. Summer courses are not considered.

- Courses taken at other Quebec universities through the Inter-University Transfer (IUT) Agreement may be counted towards the requirements for scholarship renewal or for consideration for other academic awards. Eligibility will be based on all courses taken during the regular academic year and on both the McGill GPA as well as the global GPA, which will include the IUT credits.
- Students must inform themselves of all regulations regarding in-course awards by consulting www.mcgill.ca/studentaid/scholarships/in-course/regulations.
- A maximum of the top 10% of the students in each faculty based on the combined GPA for the fall and winter terms are named to the Dean’s Honour List. This designation, while carrying no monetary reward, is an official University recognition of the student’s achievements and is recorded on the transcript.
- Outstanding students, who rank in a maximum of the top 5% of their faculties, may also be considered for the J.W. McConnell and James McGill Awards, which range in value from $500 to $5,000. These awards are made by the University Committee on Scholarships and Student Aid to top students as ranked and recommended by each faculty.
- All awards, with the exception of prizes, are credited to the tuition fee accounts of students for the following academic year
- Students holding renewable scholarships granted by the University Committee on Scholarships and Student Aid will be eligible for renewal only if they meet the McGill standards for renewal.

Need Based Student Aid: The University offers a program of In-Course Financial Aid to full-time undergraduate degree students on the basis of demonstrated financial need. Need-based financial aid for in-course students includes bursaries, short and long term loans, and a Work Study Program. In order to be considered for McGill Financial Aid, it is recommended that all applicants apply for the maximum government student assistance program for which they are eligible.

- Student Aid Counsellors are available for consultation on an individual basis to provide advice on budgeting and debt management, and to award financial assistance to needy and deserving students.

For more information:
Scholarships and Student Aid Office
William & Mary Brown Student Services Building
3800 McTavish Street, Suite 3200
Montreal, QC H3A 1Y2 Canada
Telephone: (514) 398-6013
E-mail: student.aid@mcgill.ca
Website: www.mcgill.ca/studentaid

3.8.3 Work Study Program

The Work Study Program provides students with financial assistance through part-time employment on campus. Acceptance to the program is based primarily on financial need. Academic standing is also considered. Work Study positions are varied and range from clerical jobs to more challenging work such as research or computer programming. In addition to helping students cope with their financial obligations, Work Study also provides practical work experience which may enhance future employment opportunities.

Further information is available on McGill’s Work Study Website at: www.is.mcgill.ca/studentaid/workstudy.

3.8.4 Students in Need

The Student Aid Office provides information, advice and assistance to students in financial need. The Office administers the University’s loan, bursary and Work Study programs. In addition, it oversees all provincial, federal and U.S. student aid programs and disburses government funds. Student Aid Counsellors are available for consultation on an individual basis to provide advice on
3.9 Graduation

In order to graduate, a student must complete faculty and program requirements. It is the student’s responsibility to ensure that all faculty requirements are met before graduation. All students should talk to their advisors (Senior Student Adviser, in Music) early in the graduating year with any questions as to whether they will meet the necessary program requirements by graduation time.

3.9.1 Apply to Graduate

Most undergraduate students and non-thesis graduate students (master’s, certificates, diplomas) must use Minerva to apply to graduate. It is your responsibility to inform us of your intention to graduate. A student must complete a minimum residency requirement of 60 credits at McGill in order to qualify for a McGill degree. The minimum CGPA required to graduate is 2.00.

Deadlines:

• Students who intend to graduate at the end of the fall term (courses completed December for June convocation) must apply on Minerva by the end of November.
• Students who intend to graduate at the end of the winter term (courses completed April for June convocation) must apply on Minerva by February.
• Students who intend to graduate at the end of the summer term (courses completed by August for October convocation) must apply on Minerva by March.

3.9.2 Graduation Approval Query

Graduating students may view the status of their graduation record on Minerva as part of the Faculty review and approval process. The menu option called “Student Graduation Query” is accessed via the Student Records menu option on Minerva, and becomes available to graduating students approximately 3-4 weeks before the “degree granted” notation is updated on their records.

If all requirements for graduation are met, the student’s record on Minerva will be updated with the “degree granted” notation at the appropriate time:

- late February, if term of graduation is Fall (Convocation in Spring)
- late May, if term of graduation is Winter (Convocation in Spring)
- late October, if term of graduation is Summer (Convocation in Fall)

Note: Information regarding the Convocation ceremonies can be obtained on the McGill Website at www.mcgill.ca/convocations.

3.9.3 Replacement Diploma

There are several instances when students might request a replacement diploma: if your diploma was lost, damaged, or if the name on the diploma should be changed. Students must make a request in writing and should also include a certified cheque or money order for the amount of CDN $60 made payable to McGill University. Students should refer to the sections below to determine which situation applies to them. All requests should be sent to:

Admissions, Recruitment and Registrar's Office Service Centre
Duplicate Diploma Request
McGill University
James Administration Building, Room 205
Montreal QC H3A 2T5
E-mail: registration.arr@mcgill.ca

Please note that requests made on behalf of a student must be accompanied by a signed letter of authorization from the student.

To replace a lost diploma: Students must provide a sworn affidavit from a notary, a lawyer or a commissioner of oaths certifying that the diploma is lost. The affidavit should include:
- full name; student number; address; phone number; date of birth;
- degree granted/year granted; reason for a replacement diploma.

To replace a damaged diploma or change the name on the diploma: Students must send or deliver the original diploma. Include clear and complete photocopies of legal documents supporting the name change. Please refer to section 3.2.4, “Legal Name” for the list of acceptable documents. Please note that the name change must be processed in the system before a duplicate diploma can be issued. Students must enclose a letter containing the following important information: full name; student number; address; phone number; date of birth; reason for a replacement diploma; new spelling/grammar changes.

3.10 Professional and Graduate Studies

Students intending to proceed into Dentistry, Law or Medicine should consult the faculties concerned about their prerequisites for admission.

3.10.1 Language Requirements for Professions

Quebec law requires that candidates seeking admission to provincially recognized professional corporations* must possess a working knowledge of the French language, that is, be able to communicate verbally and in writing in that language.

To demonstrate this capability, candidates will be required to pass an examination set by the Office de la langue française, unless they can show that three years of full-time instruction in a French post-primary school have been completed. Candidates who have completed their secondary education in Quebec in 1986 or later and have received their certificate from secondary school are exempt from writing the examination. The professional corporation will require this certificate, proof of attendance or of successful completion of the Office examination.

The examination may be attempted by registered students during the two years prior to the date they receive a degree giving access to a professional corporation. Application forms for sitting the exam while still a student may be obtained from the Admissions, Recruitment and Registrar’s Office. Priority will be given to those closest to graduation. Examinations take place every three months and may be attempted an unlimited number of times.

More information may be obtained from the Office de la langue française, 125 Sherbrooke Street West, Montréal, Québec, H2X 1X4. Telephone: (514) 873-4833.

Students who need to acquire a functional level of proficiency in French may take courses from either the English and French
Language Centre, Faculty of Arts, or the Centre for Continuing Education, 688 Sherbrooke Street West, telephone (514) 398-6200.

Students already proficient in French but who wish to keep up practice might consider courses in the Department of French Language and Literature, Faculty of Arts.

**Note:** Non-credit language courses, and in some cases credit language courses, completed at the Centre for Continuing Education may not be applied to program/degree requirements. Consult your Faculty for clarification.

* McGill degrees and diplomas currently give access to corporations regulating the activities of the following professional groups:

<table>
<thead>
<tr>
<th>Agrologists</th>
<th>Lawyers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Architects</td>
<td>Licensed General Accountants</td>

</tbody>
</table>

### 3.10.2 Graduate Studies

Please note that students who intend to pursue graduate studies at McGill are not automatically admitted. Further information is available at [www.mcgill.ca/applying/graduate](http://www.mcgill.ca/applying/graduate), and in the Graduate and Postdoctoral Studies Calendar also available on the Web at [www.mcgill.ca/courses](http://www.mcgill.ca/courses).

Additional information regarding postgraduate awards is available at [www.mcgill.ca/gps](http://www.mcgill.ca/gps), or from the Graduate and Postdoctoral Studies Office, James Administration Building, Room 400, 845 Sherbrooke Street West, Montreal, QC H3A 2T5.

Inquiries about graduate assistantships should be directed to the individual departments.

4.1 Undergraduate Advising

4.1.1 Advising and the University Mission

The Mission Statement of the University expresses the commitment to offer students “the best education available”. An essential component of this is the advising process. Because advising takes place in many ways and locations at McGill, it is important that students learn about the different types of advisers (see below) and how each of them can provide students with assistance in reaching their goals.

4.1.2 The Role of the Student in Advising

The active participation of students in the advising process is essential in order for them to access the full range of academic opportunities during their studies. They must be proactive in seeking meetings with various advisers, professors, counsellors, and such to ensure that they receive the advice they need to formulate a personal plan of study and to meet their academic goals. It should be noted that, while advisers are there to provide students with guidance, students are ultimately responsible for meeting the requirements of their degree or diploma. It is their responsibility to inform themselves about the rules and regulations of the University, their faculty, and their program. With the students’ cooperation, all advisers and counsellors will work together to help students throughout their undergraduate studies.

4.1.3 Types of Advising and Advisers

While at McGill, students have access to a variety of advisers, mentors, and counsellors who have different skills, expertise, and levels of authority. Students should ensure that they seek academic and personal advice from the adviser most closely attuned to their academic needs or personal situations. All advisers provide an atmosphere of trust where students can talk about their situation in complete confidentiality. Typical types of advisers are described below. Students should refer to their faculty’s section of the University Undergraduate Programs Calendar for additional advising information specific to their degree program. It should be noted that some academic matters require approval of more than one adviser, e.g., the faculty adviser and the department/school academic adviser.

Faculty Advisers are normally located in the Student Affairs Office of each faculty and are available throughout the calendar year. Faculty Advisers:

• are experts in the rules, regulations, and requirements pertaining to specific degree programs;
• will provide ongoing advice and guidance on program selection, course registration, credit load, deadlines, and majors and minors;
• will offer help managing academic situations during periods of personal, financial, or medical problems, by working with students to identify various possibilities and strategies for making informed decisions;
• will communicate with other advisers within the University and, with a student’s permission, serve as a direct link to other University resources.

Department/School Academic Advisers are normally located closer to the offices of professors in a student’s particular area of study and may only be available during specific times of year (e.g., prior to registration for the next session or during the drop/add period) or during regularly scheduled office hours. Students who are completing a major or minor in more than one unit will often have an adviser in each unit. The academic adviser may be either a professor or member of the administrative staff. Students should contact their department administrative offices to determine the identity and availability of their academic adviser. Students
should ensure that they check their progress with their academic adviser from time to time — and certainly before their final year. The academic adviser:

- will guide students through course selection to meet the subject matter requirements of the major or minor;
- will consider requests for course equivalencies, recommend prior approval for inter-university transfer credits, or explain the rationale for the design of a department/school program;
- may assist in planning for, and applying to, university exchange programs, and may also provide, or direct students to, information about scholarships, awards, research fellowships, and opportunities within a given field;
- is a valuable source of information about the various resources available at McGill;
- can provide support, guidance, and appropriate referrals for students experiencing academic or personal difficulties while studying at McGill;
- will often be responsible for confirming that students have met major or minor program requirements for graduation.

Professors/Lecturers may act in a voluntary capacity to mentor students as they progress through their program. The faculty adviser or department/school academic adviser may be able to help students identify a good resource person in their area of study.

Professors/lecturers:
- may provide advice on the latest trends in a specific field of study and make recommendations on related advanced readings;
- may discuss opportunities for a student research experience and help students connect with a professor or lecturer who best suits their interests or learning style;
- will refer a student back to the faculty adviser or academic adviser for signatures and permission related to program requirements.

Peer Advisers are student volunteers who have been trained by faculty advisers or department/school academic advisers. They often offer drop-in hours for advice on University life and will help students find the information they need in the University Undergraduate Calendar or through other University resources. Peer advisers are only available in some faculties or departments.

Related Services
The First-Year Office (FYO) (Brown Student Services Building; firstyear@mcgill.ca) can help new students navigate their way through the Undergraduate Course Calendar and the information contained in the Welcome to McGill book. They will help students prepare for the course registration period when the Minerva registration system opens for newly admitted students. To maximize this help, it is strongly recommended that students first read the sections in the Welcome to McGill book specific to their faculty. The FYO staff are always available to provide advice and referrals to the many support mechanisms at McGill.

Student Services Counselling Service (Brown Student Services Building; counselling.service@mcgill.ca) has professional counsellors who are available to discuss personal, academic and career goals or problems. They can provide individual or group study skills sessions or guide students through financial, or other, crises by means of interventions or referrals.

Career and Placement Service (Brown Student Services Building; careers.cape@mcgill.ca) provides career education, guidance, and individual advising to students in their search for permanent, part-time, or summer jobs and internships.

Admissions, Recruitment and Registrar's Office (James Administration Building; (514) 398-3910; www.mcgill.ca/student-records) is the place to start for questions related to credits on entrance or advanced standing based on previous studies.

On the Macdonald Campus, information will be provided by the Student Affairs Office, Laird Hall, Room 106.

4.1.4 Contact Information for Advising

In general, newly admitted and returning students contact their faculty student affairs office with any questions on programs.

4.1.4.1 Faculty Student Affairs Offices

Faculty of Agricultural and Environmental Sciences
Tel.: (514) 398-7925
E-mail: studentinfo.macdonald@mcgill.ca
www.mcgill.ca/macdonald

Faculty of Arts
Tel.: (514) 398-4210
E-mail: newstudentadvising.artsci@mcgill.ca for newly admitted students only
www.mcgill.ca/artscisao

Students in U1 or above should also see the contact information for advisers under the heading “Contact Information for Departments, Schools and Programs for Students in the Faculty of Arts (or the B.A. & Sc. Degree)” below.

4.1.4.3 Contact Information for Departments, Schools and Programs for Students in the Faculty of Engineering

All students in the Faculty of Engineering are required to meet with an Academic Adviser prior to the start of classes. Students admitted to U0 and who are seeking transfer credits are initially advised by the Faculty Student Affairs Office followed by advising in their respective departments. Students admitted to U0 who are not seeking transfer credits, as well as students admitted to U1 should contact the department/school directly. Additional contact information can be found in the relevant sections of the calendar.

4.2 Student Services

4.2.1 Office of the Dean of Students

William and Mary Brown Student Services Building
3600 McTavish Street, Suite 4100
Montreal, QC H3A 1Y2

Telephone:
- General Information: (514) 398-3825
- Dean/Associate Dean: (514) 398-4990
- Website: www.mcgill.ca/deanofstudents

The Dean and the Associate Dean of Students coordinate all student services at McGill to promote student success. They are available to provide assistance and/or information on almost all aspects of non-academic student life. Concerns of an academic nature will be directed to the proper individual, office or department.

4.2.2 Student Services – Downtown Campus

Unless otherwise indicated, on the Downtown Campus all Student Services offered by the Office of the Dean of Students are located in the William and Mary Brown Student Services Building, 3600 McTavish Street, Montreal, Quebec H3A 1Y2.

A list of services available is given below. For further information refer to the Student Services Website: www.mcgill.ca/studentservices or the address indicated above.

Student Services
General Information: (514) 398-8238
Website: www.mcgill.ca/studentservices

Career and Placement Service (CAPS): provides a range of services to McGill students, and recent graduates, in the field of student and graduate employment.
Brown Student Services Building, Suite 2200 (514) 398-3304
E-mail: careers.caps@mcgill.ca
Website: www.caps.mcgill.ca

Chaplaincy Service: concerned with the spiritual and mental well-being of all students.
Brown Student Services Building, Suite 4400 (514) 398-4104
E-mail: chaplaincy@mcgill.ca
Website: www.mcgill.ca/chaplaincy

Counselling Service: assists with personal, social, and emotional problems as well as vocational and academic concerns.
Brown Student Services Building, Suite 4200 (514) 398-3601
E-mail: counselling.service@mcgill.ca
Website: www.mcgill.ca/counselling

First Peoples’ House: fosters a sense of community for Aboriginal students studying at McGill.
3505 Peel Street (514) 398-3217
E-mail: firstpeopleshouse@mcgill.ca
Website: www.mcgill.ca/fph

First-Year Office: helps ease the transition of all students new to McGill. Coordinates “Discover McGill”, a one-day, campus-wide University and faculty orientation.
Brown Student Services Building, Suite 2100 (514) 398-6913
E-mail: firstyear@mcgill.ca
Website: www.mcgill.ca/firstyear

Health Services and Dental Clinic: provides access to experienced physicians, nurses and health educators who offer health services and information in a confidential atmosphere. Also operates a laboratory offering a wide array of testing, and a dental clinic.
Brown Student Services Building, Suite 3300 (514) 398-6017
Website: www.mcgill.ca/studenthealth

International Student Services: offers support to international students on non-academic matters (immigration, health insurance, etc.), runs a Buddy Program and an orientation program.
Brown Student Services Building, Suite 3215 (514) 398-4349
E-mail: international.students@mcgill.ca
Website: www.mcgill.ca/internationalstudents

Mental Health Service: a psychiatric clinic which offers easily accessible treatment for mental health problems.
Brown Student Services Building, Suite 5500 (514) 398-6019
Website: www.mcgill.ca/mentalhealth

Student (Financial) Aid Office: provides assistance in the form of loans, bursaries, and work study programs to students requiring financial aid.
Brown Student Services Building, Suite 3200 (514) 398-6013/6014
E-mail: student.aid@mcgill.ca
Website: www.mcgill.ca/studentaid

Student Housing (Off-Campus): maintains computerized lists of available off-campus student housing.
Student Housing Office, 3641 University Street (514) 398-6010
E-mail: offcampus.housing@mcgill.ca
Website: www.mcgill.ca/offcampus

Residences: offers accommodation for approximately 2,400 students. See Residential Facilities, section 4.3, for more information.
Student Housing Office (514) 398-6368
E-mail: housing.residences@mcgill.ca
Website: www.mcgill.ca/residences
Office for Students with Disabilities: coordinates services to meet the special needs of students with disabilities.
Brown Student Services Building, Suite 3100  
(514) 398-6009  
E-mail: disabilities.students@mcgill.ca  
TDD: (514) 398-8198  
Website: www.mcgill.ca/osd

Tutorial Service: sponsors an extensive tutorial program for students.
Brown Student Services Building, Suite 4200  
(514) 398-6011  
E-mail: tutoring.service@mcgill.ca  
Website: www.mcgill.ca/tutoring

4.2.3  Student Services – Macdonald Campus

While students who study on the Macdonald Campus may make full use of all Student Services available at McGill, the Office of the Dean of Students offers students direct access to the services listed below.

Unless otherwise indicated, Macdonald Campus services are located in the Centennial Centre, Room CC1-124, 21,111 Lakeshore Road.

4.2.5  Ombudsperson for Students

The position of Ombudsperson for Students is filled on a half-time basis by an academic staff member. The Ombudsperson receives complaints from students and assists in the resolution of those complaints through informal means including information, advice, intervention, and referrals with a view to avoiding the more formal grievance procedures that already exist in the University.

The Office of the Ombudsperson is a confidential, independent, and neutral dispute resolution service for all members of the student community. Please call (514) 398-7059 for an appointment.

Office of the Ombudsperson, Brown Building, Room 5202  
Website: www.mcgill.ca/ombudsperson

4.2.6  Bookstore

The McGill University Bookstore stocks new and used textbooks, a full range of books for the academic and professional community, stationery supplies, and McGill insignia clothing and gift items.

3420 McTavish Street  
Telephone: (514) 398-7444  
Website: www.mcgill.ca/bookstore

Macdonald Bookstore  
Centennial Centre  
Telephone: (514) 398-8300

4.2.7  Computer Store

The McGill Computer Store, located on the second floor of the University Bookstore, sells a full range of PC, Macintosh and Unix hardware, computer software and consumer electronics at educational prices.

3420 McTavish Street  
Website: www.mcs.mcgill.ca  
E-mail: sales.mcs@mcgill.ca

4.2.8  Day Care

The McGill Childcare Centre is an independently run centre which can accommodate approximately 100 children, ranging in age from 4 months to 5 years. As placements are limited, especially for certain age groups, early application is suggested.

The Centre is located at:
3491 Peel Street, Montreal, QC H3A 1W7  
Telephone: (514) 398-6943

A Campus Day Care Centre, located adjacent to the Macdonald Campus, is an independently run centre which can accommodate approximately 60 children, ranging in age from 4 months to 5 years. In addition, 50 children can be accommodated in Home Day Care within the neighbourhood. Preference is given to the Campus community. Early application is recommended. The Centre is located at:
1 Maple Avenue, Ste. Anne de Bellevue H9X 2E3  
Telephone: (514) 457-7953

For Home Day Care information:  
Telephone: (514) 457-7953

4.3  Residential Facilities

4.3.1  University Residences – Downtown

Residence Admissions Office  
3641 University Street  
Montreal, QC H3A 2B3  
Telephone: (514) 398-6368  
Fax: (514) 398-2305  
E-mail: housing.residences@mcgill.ca  
Website: www.mcgill.ca/residences

The University Centre, 3480 McTavish Street, provides club rooms for these activities in a four-storey building with cafeterias, a ballroom, lounges and an experimental theatre. Activities for graduate students are centred in David Thompson House at 3650 McTavish Street. On the Macdonald Campus facilities are located in the Centennial Centre (refer to FAES section).
McGill Residences collectively house approximately 2,300 undergraduate students in dorms, apartments and shared-facilities houses. McGill offers six dormitory-style residences with full meal service. These more traditional residences house, almost exclusively, first-year students. McGill’s apartment-style residences and shared-facilities houses are popular with first-year students seeking a different style of residence living. Student Animators (Floor Fellows) and Academic Staff (Directors) provide support to all undergraduate residents and live in all McGill Residences. An elected Residence Council serves as the voice of students. All residence rooms have telephone and high-speed network access jacks, which are available at extra cost.

4.3.1.1 Dormitory-style Residences
McGill offers six dormitory-style residences with full meal service. The Bishop Mountain Residences (Gardner, McConnell, Molson and Douglas Halls) are located on the slope of Mount Royal, overlooking the campus, and house both male and female students. Royal Victoria College (RVC), the all-women’s residence, is located one block from the McGill gates. McGill’s newest residence hall is fully co-ed and is located a short walk from the main campus. The New Residence Hall is located 5 easy blocks from campus. Rooms at RVC and the Bishop Mountain Residences are mostly single occupancy. The New Residence Hall offers mostly double rooms. Each student is provided a bed, a desk, chair, chest of drawers, closet and small fridge (one fridge per double room). In all halls residents are responsible for the cleanliness of their rooms. Common bathrooms and showers are located on each floor, except in the New Residence Hall where there are private bathrooms in each room. Each hall has card-operated automatic washers and dryers, as well as ironing facilities. Pay telephones are located in each building. In addition, all rooms are wired for a private telephone and Internet service. There is limited storage space for ski equipment, trunks, and suitcases in every hall. All halls have TV and recreation rooms.

There are on-site cafeterias and the meal plan is compulsory for students living in the dormitory-style residences.

4.3.1.2 Apartment-style Residences
Solin Hall is a modern award-winning apartment-style residence that has two-, three- and four-bedroom apartments. Located four short Metro stops west of the main campus, Solin features large common areas (TV and games rooms) and a computer lab and houses entirely first-year students. Each apartment has its own living room, dining room, kitchen and bathroom(s), with basic furniture such as stove, fridge, table, chairs, sofa, lamps and drapes. Bedrooms are furnished with bed, desk, chair and chest of drawers. All apartments and public area floors are carpeted. Shopping areas are within walking distance from the Hall. Limited indoor parking is available.

The Greenbriar Apartments residence building is located one block from the main campus. It houses mostly first-year and a small number of upper-year undergraduate students in self-contained studio and double-occupancy, one-bedroom apartments. Apartments have fully equipped kitchens (stove, fridge, sink) and are furnished with bed, desk, table, chairs, drawers and blinds.

Although these residences do not offer meal plans, residents may purchase one at the residence cafeterias.

4.3.1.3 Shared-facilities Houses
McGill Residences also offers a number of beautifully renovated older buildings, each housing between 13 and 30 first-year students. These shared-facilities houses are all located within a few blocks of the main campus and have single- and double-occupancy bedrooms with shared kitchens, bathrooms and common areas. Bedrooms are furnished with desks and chairs, beds (many are loft beds), chest of drawers, closet and blinds. Common areas are also fully furnished. Although these residences do not offer meal plans, residents may purchase one at the residence cafeterias.

4.3.1.4 Residence Fees
Residence fees for the 2007-2008 session had not been set at the time this Calendar went to print. Fees for the 2006-2007 session were as follows:

Rates for Gardner, McConnell, Molson and Douglas Halls ranged from $8,842 to $9,646 for a single room. Rates include the mandatory 5-day per week meal plan. The rates at Royal Victoria College include a mandatory 7-day per week meal plan and range from $10,394 to 10,994 for single rooms and $9,812 for double rooms. These rates are for the regular session, September 1 to April 30.

At the New Residence Hall room rates, including mandatory meal plan, were $10,152, per person for double rooms and $11,104 for a single room. These rates are for the regular session, September 1 to April 30.

The rooms in Solin Hall and the Greenbriar apartments are leased on an 11-month basis (September 1 to July 31). The room rates were $7,216 for a single room and $5,593 for a double room in a multi-bedroom apartment at Solin Hall. Single-occupancy studio apartments at Greenbriar were $8,338 and double-occupancy one-bedroom apartments were $5,731 per person. Rates do not include meal plan.

Shared facilities houses are also leased on an 11-month basis (September 1 to July 31). Room rates ranged from $7,301 to $7,982 for a single room and from $5,054 to $5,936 for a double room, depending on the dimensions of the room. Rates do not include meal plan.

4.3.1.5 Meal Plans
Residents at Molson, McConnell and Gardner Halls take their meals together in a large centrally located dining hall. Douglas Hall and RVC have their own dining areas. RVC offers 19 meals per week (7 days per week), while the Bishop Mountain Residences offer 15 meals per week (Monday to Friday). Bag lunches and bag dinners are available. There are kitchenettes in all the Halls where residents may keep food and prepare snacks or meals at any time.

Residents of the New Residence Hall have access to the on-site cafeteria with extended hours. 7 days per week. The meal plan allows them to eat at certain on-campus cafeterias as well. There are kitchenettes on each floor where residents may prepare hot or cold snacks at any time.

Solin Hall, the Greenbriar Apartments and the shared-facilities houses do not offer meal plans. The apartments and houses have fully equipped kitchens where students prepare their own meals. However, residents are welcome to purchase a meal plan at the residence cafeterias.

4.3.1.6 Student Government
Each hall has a Residence Council, elected at the start of the academic year. It is the job of Council to gather hall opinions, supervise financial affairs, and organize sporting and recreational activities within the residences. McGill’s residences are run for the convenience and advantage of the students living in them. Rules and regulations are decided upon and administered by the students themselves.

Note: All fees include an activity fee of $20 collected by the University on behalf of the Residence Council of each hall, and is included in the residence fees.

4.3.2 University Residences – Macdonald Campus
Campus Housing Office
P.O. Box 188, Macdonald Campus of McGill University
Sainte-Anne-de-Bellevue, QC H9X 3V9
Telephone: (514) 398-7716 Fax: (514) 398-7953
E-mail: residences.macdonald@mcgill.ca
Website: www.mcgill.ca/macdonald-residences

Residence life is an integral part of Macdonald Campus activities. Laird Hall, with a capacity 250 students, is arranged on a co-educational basis and provides accommodation for undergraduate.
graduate, and Farm Management Technology students. Residents enjoy modern, equipped rooms, modern kitchens, cozy lounge facilities, and other amenities that help make their residence life a complete and meaningful part of their university experience. All dorm rooms have telephone and high-speed network access jacks, which are available at extra cost.

The EcoResidence, Canada’s first ecologically friendly student residence and winner of the Prix d’excellence from the Ordre des architectes du Québec, accommodates 100 students. The EcoResidence is a unique initiative that recycled two buildings and incorporated ecological construction technology. This type of accommodation will appeal to students who enjoy independent living in self-contained apartments of two or six single-bedroom units. Each unit is built on a split-level concept with large, airy common living areas and fully equipped kitchens.

4.3.2.1 Residence Fees – Macdonald Campus

Residence fees are paid separately from tuition in accordance with regulations of the Fee Payment Option selected at the time of signing a Residence Lease.

The residence fees for the 2007-08 session had not been set at the time this Calendar went to print. The 2006-07 session rates for Laird Hall are (double occupancy) $2,400 and (single occupancy) $2,680. Rates for the EcoResidence vary from $389 to $400 per month. An updated fee sheet will be available with the residence application forms when an offer of accommodation is made.

There is no meal plan offered on the Macdonald Campus. Meals are available on a cash basis from the Centennial Centre cafeteria. The cafeteria is open for breakfast and lunch only, 5 days per week, exclusive of Saturday, Sunday, and holidays designated by the University. For budgeting purposes, the cost of meals per session is approximately $3,000.

4.3.2.2 Residence Occupancy – Macdonald Campus

The residence fees cover the period (August 26, 2007 to May 2, 2008). Students must vacate their rooms at the end of the lease term. Only under exceptional circumstances will a student be granted permission to arrive prior to beginning date of the lease or remain in residence during the summer months. In these cases, students must apply to the Campus Housing Office and an additional fee will be charged if permission is granted.

Students may request permission to extend their stay in residence (at the normal weekly charge) if they are taking extended courses after the regular session, employed on the Campus, or registered for summer courses.

International students or those coming from a distance may be admitted early in exceptional circumstances. Permission from the Campus Housing Office must be obtained prior to the student leaving home. Student Officers may be admitted before the opening date of courses, if permission is granted by the Campus Housing Office.

4.3.2.3 Facilities for Non-Resident Students – Macdonald Campus

Common rooms for studying are provided in the Centennial Centre. Lockers are available in the Macdonald-Stewart Building. Meals may be obtained from the Snack Bar facility of the Centennial Centre. The Snack Bar is open for breakfast and lunch only, 5 days per week, exclusive of Saturday, Sunday, and holidays designated by the University.

Note: Non-resident students may not stay overnight in any residence without permission of the Campus Housing Office.

4.3.2.4 Student Parking – Macdonald Campus

Students who hold parking permits will be allowed to park automobiles on Macdonald Campus provided they observe the parking regulations and other applicable rules. Permits must be obtained from the Campus Security Office, Laird Hall, Room 101, during regular office hours.

4.4 Athletics

Downtown Campus

Athletics: offers programs in recreational, intercollegiate, intramural and sports clubs.

Athletics Complex, 475 Pine Avenue West

E-mail: athletics@mcgill.ca

Website: www.athletics.mcgill.ca

Macdonald Campus

Athletics: Athletics offices are located in the Stewart Athletic Complex, just west of the Centennial Centre. Available at no charge to Macdonald students is a wide selection of activities, as well as the use of an excellent array of equipment. Facilities include a gymnasium, pool, weight room (with monitors on hand four evenings per week), arena, tennis courts, playing fields and large expanses of green space.

In addition to providing many open times for your enjoyment, there are also instructional, recreational, intramural and intercollegiate activities. There are nominal fees for instructional courses.

Stewart Athletic Complex

(514) 398-7789

Website: www.agrenv.mcgill.ca/society/athletic

4.5 Information Technology Resources

4.5.1 IST Customer Services (ICS)

McGill ICS is your first point of contact for problem resolution and help with IT services such as: E-mail, WebCT Vista, Virtual Private Network (VPN), Wireless Network, Dialup Access Service (DAS), and REZ Voice and Data Service (post-installation).

To get solutions to your IT issues and view the latest IT announcements, visit www.mcgill.ca/it.

4.5.2 Network and Communications Services (NCS)

McGill NCS provides data services including access to Local Area Networks (LANs), the Internet, e-mail, McGill central systems, and the McGill University Website — all from virtually anywhere on campus (wired or wireless) and remotely. They also provide voice service (with long distance and voice mail) to students in McGill Residences. The Website at www.mcgill.ca/ncs lists products and services offered by McGill NCS.

4.5.3 Computer Labs

The computer labs are provided by many faculties and departments for students in their programs. A list of these labs can be found at www.mcgill.ca/in dex/computer. Check the unit listings or contact the unit directly for information concerning facilities and accessibility.

4.5.4 Instructional Multimedia Services (IMS)

Instructional Multimedia Services (IMS) provides services related to the use of technology in teaching. It is McGill's central facility for the loan of audiovisual equipment and support for video production.

The IMS Audiovisual Arrangements Section located in the lobby of the Redpath Library and the IMS office at the Macdonald Campus house a full range of audio, video, computer, and projection equipment available for loan to McGill students. Equipment is provided free of charge for credit course activities. Training in equipment use is available and advanced reservations are highly recommended. Further details are available on the IMS Website, www.mcgill.ca/ims/aa/el.
4.6 Resources for Study and Research

4.6.1 Libraries
The Library consists of 13 branch libraries, focusing primarily on specific disciplines. There are, in addition, several affiliated collections within the downtown Montreal campus and at the Macdonald campus on the shores of Lac St. Louis. The Library offers extensive print collections from contemporary fiction and bestselling novels to extensive electronic resources, including early English texts, science and management textbooks and e-journals on topics ranging from philosophy to psychiatry. A wide range of services and a comprehensive Website (www.mcgill.ca/library) link the resources to those who need them for teaching, learning, research and scholarship.

The expert and friendly staff in each branch library assist in locating information for course work, assignments or research topics. Training is provided at all levels to ensure effective access to quality information through efficient database and internet searching, with information skills programs undertaken as part of course curricula. Moreover, Liaison librarians proficient in specific disciplinary areas are on hand to assist students and staff.

Opening hours vary for each library but most are open up to 84 hours per week and, during examination time, the libraries extend their opening hours, with the Humanities and Social Sciences Library open for 24 hours. Assistance is provided by phone, in person and online, including online chat. Hundreds of computers positioned in a secure e-zone environment, can be used for accessing online courses, reading library materials, e-mail, word-processing, preparing assignments and internet searching. Facilities for plugging in laptops are available in a wireless network. There are individual study carrels and group study rooms which can be booked for use. Printing and copying facilities, operated by a card system, are conveniently located in all libraries. Special facilities are available for the vision and hearing impaired.

The Collection contains over 6 million items, with over 1 million e-books. There are 9,000 print journals and almost 38,000 e-journals. Hundreds of databases on topics from art history to zoology guide users to relevant journal articles and research materials. Thousands of videos and sound recordings add visual and auditory enrichment to the collections. All items are listed in the Library’s online catalogue. Materials are arranged on the shelves according to the Library of Congress Classification system. Electronic data resources support empirical and statistical research and a digitization program makes available unique scholarly materials on topics like Napoleon and Canadian military history. Copies of textbooks and some items on reading lists are held in Course Reserve collections for short term use. Links are made from the university’s online learning management system, WebCT to library resources. Past examination papers, McGill theses and newspapers from all over the world are also available online.

4.6.2 University Archives
The McGill University Archives (MUA) acquires, preserves and makes available to researchers (including students) of all disciplines more than 5,000 metres of records dating from 1797 to the present. These records document the history of McGill University faculty research, alumni and student organizations, and select Montreal-based organizations, all in a variety of media (including textual records, photographs, slides, audio-tapes, film, video, University publications, and artifacts). The MUA acquires private records to support University research goals and manages the University’s corporate memory and information assets through its Records Management Program. The Records Management Program regulates the flow of administrative records and protects vital evidence of University functions and activities according to Quebec archives and records legislation. The MUA Reading Room is open to the public Monday-Friday, 9:00-12:30 and 1:45 to 4:45; however, appointments are recommended. The MUA Website includes virtual exhibitions, on-line searching of the MUA holdings, digital collections including the largest campus database of digitized images, and access to the McGill History Portal (focusing on historical information about McGill University and its community).

McLennan Library - Ground Floor
Telephone: (514) 398-3772
Fax: (514) 398-8456
Website: www.archives.mcgill.ca

4.6.3 Museums

4.6.3.1 Redpath Museum
The Redpath Museum exists to foster the study of the history and diversity of the natural world. Its mandate includes geological, biological and cultural diversity. Its collections have been growing for over a century, and provide resources for research and for graduate and undergraduate education in biology, geology, anthropology and other fields. Among the largest collections are fossils from the ancient sea floor of eastern Quebec, the oldest land plants, a vast range of minerals, molluscs from around the world, Egyptian and classical antiquities, and artifacts from Central Africa. The Museum also houses research laboratories and classrooms.

The University’s corporate memory and information assets through its Records Management Program regulates the flow of administrative records and protects vital evidence of University functions and activities according to Quebec archives and records legislation. The MUA Reading Room is open to the public Monday-Friday, 9:00-12:30 and 1:45 to 4:45; however, appointments are recommended. The MUA Website includes virtual exhibitions, on-line searching of the MUA holdings, digital collections including the largest campus database of digitized images, and access to the McGill History Portal (focusing on historical information about McGill University and its community).

4.6.3.2 McCord Museum of Canadian History
The McCord Museum is home to one of the finest historical collections in North America. It possesses some of Canada’s most significant cultural treasures, including the most comprehensive collection of clothing - comprised of over 16,000 garments or accessories - made or worn in Canada; an extensive collection of First Nations artifacts - the most important of its kind in Quebec with a corpus of over 13,000 objects from across Canada; and the renowned Notman Photographic Archives, which contain over 1,000,000 historical photographs and offer a unique pictorial record of Canada from pre-Confederation to the present. The McCord also houses paintings by renowned artists such as Théophile Hamel, Cornelius Krieghoff, James Pattison Cockburn and George Heriot. The Museum’s Textual Archives include some 185 linear metres of documents relating to Canadian history. Finally, the McCord’s Website (www.mccord-museum.qc.ca) features award-winning virtual exhibitions, innovative learning resources and a vast, searchable database of information on the Museum’s collections.

Exhibitions at the McCord provide inspirational and innovative interpretations of the social and cultural history of Montréal, Quebec and Canada. In addition to guided tours, school programs, cultural activities and lectures, the McCord offers a range of services including the Museum Café and the boutique. Researchers welcome by appointment.

690 Sherbrooke Street West
Telephone: (514) 398-7100
Email: info@mccord.mcgill.ca
Website: www.mccord-museum.qc.ca
4.6.3.3 Lyman Entomological Museum and Research Laboratory
Located on the Macdonald Campus, this institution has the largest insect collection of any Canadian university, and is second in both numbers of species and specimens only to the Canadian National Collection of Insects, Ottawa. As its main function is research and teaching, and not exhibition, it is not generally open to the public, but tours are available, by appointment, to interested parties. Telephone: (514) 398-7914.

4.6.3.4 Other Historical Collections
In addition to the above, there are other collections and exhibits of a specialized nature, ordinarily open only to students but to which access may be gained by application to the department concerned. These include the Anatomical and Pathological Museums. The Physics Department has two specialized collections which may be viewed by appointment. The Rutherford Museum contains original apparatus and other items used by Professor Ernest Rutherford in his Nobel Prize-winning research on radioactivity at McGill University, 1898-1907. The McPherson Collection comprises a wide range of historical apparatus and instruments used for measurements and investigations, with special emphasis on 19th-century physics.

5.1.1 Location

Dawson Hall
853 Sherbrooke Street West
Montreal, QC H3A 2T6
Canada

Telephone: (514) 398-4210
Faculty Website: www.mcgill.ca/arts
Student Affairs Office Website: www.mcgill.ca/artscisao

The Student Affairs Office and the Office of the Associate Dean (Student Affairs) of the Faculty of Arts are located in Dawson Hall, Rooms 110 and 115. The Student Affairs Office serves students in the Faculties of Arts and of Science.

5.1.2 Administrative Officers

Christopher Manfredi; B.A., M.A.(Calg.), M.A., Ph.D.(Claremont)  Dean

M.N. Cooke; B.A.(Qu.), M.A.(C'nell), M.A., Ph.D.(Tor.)  Associate Dean (Research and Graduate Studies)

Mary E. MacKinnon; B.A.(Qu.), M.Phil, D.Phil.(Oxf.)  Associate Dean (Academic)

Enrica Quaroni; B.A., Ph.D.(McG.)  Associate Dean (Student Affairs)

Susan Sharpe  Assistant to the Dean

Sara Bezeau; B.A.(Tor.), M.A.(C'dia)  Recorder

Donald Sedgwick; B.Sc., M.Sc.(McG.)  Senior Adviser

5.1.3 Programs and Teaching in Arts

Established in 1843, the Faculty of Arts is one of the oldest in Canada and remains the largest at McGill. With over 6,000 full-time students and over 250 full-time professors, the Faculty offers several hundred courses in many disciplines. The Faculty of Arts permits students great program flexibility. Students may concentrate on one Arts discipline while obtaining Minor Concentrations in different Arts disciplines as well as in other faculties, such as, for example, Science. McGill's historic Arts building is the centrepiece of the University's downtown campus. It houses classrooms, offices and Moyse Hall – an elegant and well-equipped performance theatre. The Faculty maintains bilateral exchange programs with many universities around the world and encourages students to spend a term or two studying abroad.

McGill Arts graduates are valued for their ability to think critically and communicate effectively, often in more than one language. Their skills in research and analysis are applicable in a wide spectrum of professional fields, such as law, education, business, government, and public service.

The Faculty of Arts offers programs leading to the degrees of B.A. and B.S.W. Admission is selective; fulfillment of the minimum requirements does not guarantee acceptance. Admission criteria are described in "Undergraduate Admissions Guide 2007-08 (Appendix A)."

The Faculty of Arts also offers a Diploma in Environment under the McGill School of Environment, a 30-credit program available to holders of a B.Sc. or B.A. or equivalent. All credits for the Diploma must be completed at McGill. For more information on the "Diploma in Environment", see section 14.11.

Finally, the Faculties of Arts and of Science jointly offer the Bachelor of Arts and Science (B.A. & Sc.), which is described in the Arts & Science section of the Calendar.

5.1.4 Student Affairs Office

The Student Affairs Office provides assistance in interpreting records as well as general academic information and advice on the following: prerequisites and programs, degree requirements, registration, course change, procedures for withdrawal, deferred exams, supplemental exams, rereads, academic standing, inter-faculty transfer, year or term away, transfer credits, second programs, second degrees, and graduation.

Special requests can be made, in writing, to the Associate Dean (Student Affairs). For more information, please refer to our Website at www.mcgill.ca/artscisao.

5.2 Faculty Admission Requirements

For information about admission requirements to the B.A. or B.S.W., please refer to "Undergraduate Admissions Guide 2007-08 (Appendix A)."

For information about inter-faculty transfers, please refer to section 3.3.12, “Inter-Faculty Transfer”, as well as to the relevant information posted on the Students Affairs Office Website at www.mcgill.ca/artscisao and in the Student Affairs Office.

5.3 Faculty Degree Requirements

Each student in the Faculty of Arts must be aware of the Faculty regulations as stated in this Calendar and on the McGill Arts, and ARTSCI Websites. While departmental and Faculty advisers and staff are always available to give advice and guidance, the ultimate responsibility for completeness and correctness of course selection and registration, for compliance with, and completion of, program and degree requirements, and for the observance of regulations and deadlines rests with the student. It is the student’s responsibility to seek guidance from the Student Affairs Office if in any doubt; misunderstanding or misapprehension will not be accepted as cause for dispensation from any regulation, deadline, program or degree requirement.

To be eligible for a B.A. degree, students must fulfil all Faculty and program requirements as indicated below:

“Minimum Credit Requirement”, see section 5.3.1
“Residency”, see section 5.3.2
“Cumulative Grade Point Average (CGPA)”, see section 5.3.3
“Time and Credit Limit for Completion of the Degree”, see section 5.3.4
“Program Requirements”, see section 5.3.5
“Course Requirements”, see section 5.3.6

5.3.1 Minimum Credit Requirement

Students must complete the minimum credit requirement for the degree as specified in the letter of admission.

Students are normally admitted to a four-year degree requiring the completion of 120 credits, but advanced standing of up to 30 credits may be granted to students who obtain satisfactory results in the Diploma of Collegial Studies, International Baccalaureate, French Baccalaureate, Advanced Levels, and Advanced Placement tests.

Students who are readmitted after interrupting their studies for a period of five consecutive years or more may be required to complete a minimum of 60 credits and satisfy the requirements of a program. In this case, a new GPA will be calculated. The Associate Dean (Student Affairs), in consultation with the appropriate department, may approve a lower minimum for students who had completed 60 credits or more before interrupting their studies.

Students who are readmitted after a period of absence are normally subject to the program and degree requirements in effect at the time of readmission.
5.3.2 Residency
To obtain a B.A. degree, students must complete satisfactorily a minimum of 60 credits at McGill University towards the fulfilment of the B.A. degree requirements. At least two-thirds of all program requirements (Multi-track, Honours, Faculty) must normally be completed at McGill. In addition, some departments may require that their students complete specific components of their program at McGill.

Exceptionally, and subject to departmental approval, students in a Minor Concentration who pursue an approved exchange or study away program may complete up to half of the Minor Concentration requirements elsewhere.

The residency requirement for the Diploma in Environment is 30 credits completed at McGill.

5.3.3 Cumulative Grade Point Average (CGPA)
Each candidate for a degree must achieve a minimum cumulative grade point average (CGPA) of 2.00.

5.3.4 Time and Credit Limit for Completion of the Degree
Students who need 96 or fewer credits to complete their degree requirements are expected to complete their degree in no more than eight terms after their initial registration for the degree. Students in the Freshman Program become subject to these regulations one year after their initial registration. Students who need or wish to exceed this time limit must apply to the Associate Dean (Student Affairs) for permission to continue their studies.

Students who wish to exceed the minimum credit requirement for their degree must also seek permission of the Associate Dean (Student Affairs) to continue their studies.

Permission for exceeding the time and/ or credit limit will normally be granted only for valid academic reasons, such as a change of program (subject to departmental approval) and part-time status.

5.3.5 Program Requirements

5.3.5.1 Freshman Program
Students who need to complete 97-120 credits to complete their degree requirements must complete the Freshman program, which is designed to provide a basic foundation prior to selecting a departmental program. Students may select one of the following Freshman program options in Minerva:

General Option
- 6 credits in each of three of the following areas:
  - social sciences, languages, humanities, or mathematics and science, with a maximum of 18 credits per area and 12 credits per department.

Arts Legacy (Freshman) Option: Making Modernities
- 24 credits of prescribed courses that will be taught in four consecutive units of six and a half weeks. Courses will be thematically linked and deal in an interdisciplinary way with the Ancient Worlds of China and Greece/Rome, Medieval Mediterranean Worlds, Early Modern Atlantic Worlds, and Global Modern Worlds. Each course features lectures, seminars, tutorials and performances. Enrolment is on a first-come first-served basis. Students should register for six additional credits, preferably from the areas of language or of mathematics and science. For more information, please contact Professor G. Vankeerberghen (Department of History).

French Option
- 18 credits of courses conducted in French. Depending on degree of language proficiency attained, this could include a maximum of 12 credits of intensive French language courses.

For further details, refer to the Arts Freshman information on the Web at www.mcgill.ca/arts cisao.

5.3.5.2 Departmental Programs
Arts students, other than those registered in the Freshman Program, are required to have an approved program (Multi-track, Honours, Faculty), and to select their courses in each term with a view to timely completion of their degree and program requirements. Students must complete one of the following program streams:

MULTI-TRACK SYSTEM
To recognize the diversity of student backgrounds and interests and the multiple routes to understanding provided by a modern university, the Faculty of Arts offers a 90-credit multi-track system that includes a Major Concentration complemented by at least a Minor Concentration and that may be completed in one of the following ways:

Options
A: Major Concentration (36) + Minor Concentration (18) + 36 credits of electives
B: Major Concentration (36) + Major Concentration (36) + 18 credits of electives
C: Major Concentration (36) + Minor Concentration (18) + Minor Concentration (18) + 18 credits of electives

Regulations:
- Within option A and option B, all Concentrations must be in different academic units. (For students completing a second degree in the Faculty of Arts, this regulation is waived.)
- Within option C, one of the Minor Concentrations may be in the same unit as the Major Concentration. Students who pursue a same-unit Minor Concentration will substitute additional complementary (non-required) courses to a total of 18 credits for any courses completed as a part of their Major Concentration within that unit.
- Students will include within the 36 or 18 credits of their Major or Minor Concentration any university-level (200 or above) prerequisites to required courses within their Concentrations.
- No course may fulfill the requirements for more than one program or concentration requirement.

Definitions:
- Units: academic departments or administrative equivalents.
- Programs: lists of required and complementary courses (including prerequisites to required courses) prepared and maintained by units.
- Major Concentration: a program of 36 credits taken from a unit's course offerings.
- Minor Concentration: a program of 18 credits taken from a unit's course offerings. Expandable Minor Concentrations are those which can, on the completion of 18 additional approved credits, be expanded into a Major Concentration within the appropriate unit.

HONOURS PROGRAM
Honours programs demand a high degree of specialisation, and require students to satisfy specific departmental and Faculty Honours requirements while maintaining a good academic standing. They are designed to prepare students for graduate study.

Regulations:
- To be registered in an Honours program after the first year, students must have attained a GPA and CGPA of at least 3.00 in the previous year, unless they have special permission from the department and the Associate Dean (Student Affairs).
- To complete an Honours degree, a student must achieve a minimum CGPA of 3.00. The program GPA (the GPA of all required and complementary courses taken at McGill which constitute the Honours program) must be a minimum of 3.00, although academic units may set higher requirements for their program GPA.
• In addition to the completion of the Honours requirements, students must complete at least a Minor Concentration in an academic unit other than the one in which the Honours requirements are satisfied. (For students completing a second degree in the Faculty of Arts, this regulation is waived.)

**JOINT HONOURS PROGRAM**

Students who wish to study at the Honours level in two disciplines can combine Joint Honours program components from any two Arts disciplines; see section 5.11.4 “Joint Honours Programs” for a list of available programs. Each Joint Honours component consists of a maximum of 36 required and complementary credits (not including program prerequisites). In cases where a minimum of 24 credits are in courses normally restricted to Honours students, the total of required and complementary credits may be as few as 30.

To complete a Joint Honours degree, a student must achieve a minimum CGPA of 3.00. The program GPA (the GPA of all required and complementary courses taken at McGill which constitute the Joint Honours program) must be a minimum of 3.00, although academic units may set higher requirements for their component of the program GPA.

**FACULTY PROGRAM**

A Faculty program is an approved selection of courses constituting a concentration in an intellectually coherent and inter-faculty field of studies. These courses must include approved selections from one of the following:

- The Faculties of Arts and of Science, and at least one other faculty
- The Faculty of Arts, and at least one faculty other than the Faculty of Science
- The Faculty of Arts currently recognizes the following Faculty Programs:
  - Industrial Relations
  - McGill School of Environment

**5.3.6 Course Requirements**

All required and complementary courses used to fulfill program requirements must be completed with a grade of C or better. Students who fail to obtain a satisfactory grade in a required course must either pass the supplemental examination in the course or do additional work for a supplemental grade if these options are available, or repeat the course. Course substitution will be allowed only in special cases; students should consult their academic adviser.

Normally, students are permitted to repeat a failed course only once. (Failure is considered to be a grade of less than C or the administrative failures of J and KF.) If a required course is failed a second time, a student must appeal to the Associate Dean (Student Affairs) for permission to take the course a third time. If permission is denied by the Associate Dean and/or by the Committee on Student Standing, on appeal, the student must withdraw from the program. If the failed course is a complementary course required by the program, a student may choose to replace it with another appropriate complementary course. If a student chooses to substitute another complementary course for a complementary course in which a D was received, credit for the first course will still be given, but as an elective. If a student repeats a required course in which a D was received, credit will be given only once.

Full details of the course requirements for all programs offered are given in each unit’s section together with the locations of departmental advisory offices, program directors and telephone numbers should further information be required.

**5.3.6.1 Course Overlap**

Students will not receive additional credit towards their degree for any course that overlaps in content with a course for which the student has already received credit at McGill, CEGEP, at another university, or Advanced Placement exams. Advanced Level results, International Baccalaureate Diploma, or French Baccalauréat. It is the student’s responsibility to consult the Student Affairs Office or the department offering the course as to whether or not credit can be obtained and to be aware of exclusion clauses specified in the course description in the Calendar. Please refer to the following Website for specific information about advanced standing credits and McGill course exemptions: www.mcgill.ca/student-records/transfercredits.

**Credit for statistics courses** will be given with the following stipulations:

- Credit will be given for ONLY ONE of the following introductory statistics courses: AEMA 310, BIOL 373, ECON 227D1/ECON 227D2, ECON 257D1/ECON 257D2, EPSC 215, GEOG 202, MATH 203, MGCR 271, PSYC 204, SOCI 350.
- Credit will be given for ONLY ONE of the following intermediate statistics courses: AEMA 411, ECON 227D1/ECON 227D2, ECON 257D1/ECON 257D2. GEOG 351, MATH 204, MGCR 272, PSYC 305, SOCI 461.

- Students who have already received credit for MATH 324 or MATH 357 will not receive credit for any of the following: AEMA 310, AEMA 411, BIOL 373, ECON 227D1/ECON 227D2, ECON 257D1/ECON 257D2, EPSC 215, GEOG 202, GEOG 351, MATH 203, MATH 204, MGCR 271, MGCR 272, PSYC 204, PSYC 305, SOCI 350.
- For 500-level statistics courses not listed above, students must consult a program adviser to ensure that no significant overlap exists. Where such overlap exists with a course for which the student has already received credit, credit for the 500-level course will not be allowed.
- Credit for statistics courses offered by faculties other than Arts and Science requires the permission of the Associate Dean (Student Affairs).
- PSYC 204 may not be taken if a grade of 75% was received in an equivalent course completed at CEGEP.

**Credit for computer courses** will be subject to the following restrictions:

- Credit for courses offered by the School of Computer Science is governed by rules specified in its individual course descriptions.
- Credit for computer courses offered by faculties other than Arts or Science requires the permission of the Associate Dean (Student Affairs).

**5.3.6.2 Courses Outside the Faculties of Arts and of Science**

The following regulations apply to students in the Faculty of Arts who wish to take courses outside the Faculties of Arts and of Science:

- Regardless of their minimum credit requirement towards their B.A. degree, students are allowed a maximum of 12 credits in ELECTIVE and/or COMPLEMENTARY courses taken in faculties other than the Faculties of Arts and of Science.
- Students in certain designated programs that include a number of REQUIRED and COMPLEMENTARY courses in other faculties are permitted a maximum of 30 credits outside the Faculties of Arts and of Science. These programs are the Faculty Programs in Industrial Relations and in Environment, the Joint Honours in Economics and Finance, the Minor in Management for students in programs in Economics, the Minor in Marketing for Non-Management Students, the Major and Minor Concentrations in Music, the Major Concentration in Geography (Urban Systems), the Minor Concentration in Educational Psychology, and the Minor in Education for Arts Students.
- Students who combine any two or more of the programs listed above may not exceed 40 credits outside the Faculty of Arts and of Science.

Any courses taught at McGill University may be used towards the maximum allowed with the following exceptions:

- Continuing Education: Continuing Education courses with a teaching unit that starts with C are not for credit (except for CHEM).
- Distance Education: Refer to the "Policy on Distance Education Courses", see section 5.3.6.5.
For the purpose of this policy, courses taught in other faculties and specifically listed in the Arts or Science section of the printed Calendar are considered as courses taught in the Faculties of Arts and of Science.

The maximum number of credits allowed will be strictly enforced.

5.3.6.3 Inter-university Transfer Credit Policy for Courses Taken Outside the Faculties of Arts and of Science

Students who transfer from faculties outside the Faculties of Arts and of Science at another institution may transfer up to a maximum of 30 credits under the following conditions:

- Only courses passed with a grade of C or better will be transferred. Grades of C- are not acceptable. Grades of P or S are not acceptable. The letter grades applied by the former home institution take precedence over the numerical grades if provided.

- Decisions on whether a course is outside the Faculties of Arts and of Science will be based on the original faculty in which the course was taken.

- Refer to the “Policy on Distance Education Courses” in section 5.3.6.5.

- Transfer credits for Continuing Education courses will be granted only if the courses can be used towards a degree program in a faculty other than Continuing Education at the original university.

- Transfer students will be allowed to take courses outside the Faculties of Arts and of Science at McGill only if they have transferred fewer than 12 credits, and then only up to a maximum of 12 credits.

- Transfer students who register for a Faculty of Arts program that requires additional credits outside the Faculties of Arts and of Science will be allowed to take only the number of credits outside the Faculties of Arts and of Science required to complete the program. These programs are the Faculty Programs in Industrial Relations and in Environment, the Joint Honours in Economics and Finance, the Minor in Management for students in programs in Economics, the Minor in Marketing for Non-Management Students, the Major and Minor Concentrations in Music, the Major Concentration in Geography (Urban Systems), the Minor Concentration in Educational Psychology, and the Minor in Education for Arts Students.

5.3.6.4 Inter-faculty Transfer Credit Policy for Courses Taken Outside the Faculties of Arts and of Science

Students will normally have counted for credit (for grades of D or better) and/or GPA (regardless of the grade) all courses in Arts, and up to a maximum of 30 credits of courses outside of Arts and of Science.

- Transfer students will be allowed to take courses outside the Faculties of Arts and of Science at McGill only if they have transferred fewer than 12 credits, and then only up to a maximum of 12 credits.

- Transfer students who register for a Faculty of Arts program that requires additional credits outside the Faculties of Arts and of Science will be allowed to take only the number of credits outside the Faculties of Arts and of Science required to complete the program. These programs are the Faculty Programs in Industrial Relations and in Environment, the Joint Honours in Economics and Finance, the Minor in Management for students in programs in Economics, the Minor in Marketing for Non-Management Students, the Major and Minor Concentrations in Music, the Major Concentration in Geography (Urban Systems), the Minor Concentration in Educational Psychology, and the Minor in Education for Arts Students.

5.3.6.5 Policy on Distance Education Courses

A maximum of 6 credits of elective courses taught through distance education may be used towards the B.A. degree at McGill. Courses taught through distance education from institutions other than McGill will be approved as transfer credits under the following conditions:

- the course is given by a government-accredited, degree-granting institution acceptable to McGill;
- the course counts for credit towards degrees granted at the institution giving the course;
- prior approval for the course is obtained from the Student Affairs Office of the Faculty of Arts.

The combined total of regular course credits and distance education course credits may not exceed the permitted maximum number of credits per term according to Faculty regulations. Courses taught through distance education may not be used to complete program requirements, except on an individual basis when serious, documented circumstances warrant it. In such cases, prior approval must be obtained from the student's program adviser and the Associate Dean (Student Affairs).

5.3.6.6 Internship Courses

The Faculty of Arts offers internship courses for credit. For more information refer to section 5.12.2, “Faculty of Arts Internship Program”.

5.3.6.7 Courses Taken Under the Satisfactory/Unsatisfactory Option

For more information and restrictions, please consult “Courses Taken under the Satisfactory/Unsatisfactory (S/U) Option” in section 3.3.6.

5.3.6.8 Courses in English as a Second Language

ESL courses are only open to students whose primary language is not English and who have studied for fewer than five years in English-language secondary institutions. Students in the Faculty of Arts may take a maximum of 12 credits, including academic writing courses for non-anglophones.

5.4 Advising

Students who need 96 or fewer credits to complete their degree requirements must consult an academic adviser in their proposed department of study to obtain advice and approval of their course selection. To facilitate program planning, they must present their transcripts and letters of admission. For a detailed description of advising and registration procedures, students should refer to Welcome to McGill, which they receive from the Admissions, Recruitment and Registrar’s Office upon their acceptance, as well as the Student Affairs Website, www.mcgill.ca/artscisao and departmental websites.

Students who need 97-120 credits to complete their degree requirements will normally be registered in a Freshman Program until they complete their first year. They must consult an adviser in the Student Affairs Office to obtain advice and approval of their course selection. For a detailed description of advising and registration procedures, Freshman students should refer to “Registration”, in section 3.3 and “Advising and Support”, in section 4. Welcome to McGill, which they receive upon acceptance from the Admissions, Recruitment and Registrar’s Office, as well as the Student Affairs Website, www.mcgill.ca/artscisao.

Academic advising for all returning students takes place in March for the upcoming academic year. For more information, students should refer to the Student Affairs Website, www.mcgill.ca/artscisao.

5.5 Registration

All students register by Minerva, McGill’s Web-based registration system.

For detailed information about registration, please refer to “Registration” in section 3.3. Welcome to McGill, the Student
5.5.1 Program Registration

Students should refer to Welcome to McGill or to the Arts and Science Registration information on how to register for programs on the Student Affairs Website, www.mcgill.ca/arts/cao, and to the Student Records Website, www.mcgill.ca/student-records. See section 5.11, “Programs in the Faculty” for a list of programs that can be taken by Arts students.

5.5.2 Course Registration

All courses have limited enrolment. Students in the Faculty of Arts may register for and take for credit any course, unless otherwise indicated, in the sections of the Calendar applicable to the Faculties of Arts and of Science, subject to the course restrictions listed in this section.

Since the registration system is unable to verify whether or not Faculty regulations are respected, it is technically possible to register for courses that may not be credited towards the B.A. When students' records are manually verified, however, any courses taken that violate the Faculty regulations will be flagged after the end of course period as “not for credit towards the B.A.” As a result, the students' expected date of graduation may be delayed.

Some courses may require special permission. Students should consult this Calendar and/or the Class Schedule at www.mcgill.ca/courses well in advance of the Course Change period to determine if permission is required of the instructor, the department, or the Faculty for any course they wish to take.

5.5.2.1 Registration for First-Year Seminars

Registration for First-Year Seminars is limited to students in their first year of study at McGill, i.e., newly admitted students in U0 or U1. These courses are designed to provide a closer interaction with professors and better working relations with peers than is available in large introductory courses. These seminars endeavour to teach the latest scholarly developments and expose participants to advanced research methods. Registration is on a first-come, first-served basis. The maximum number of students in any seminar is 25, although some are limited to even fewer than that.

Students may take only one First-Year Seminar. Students who register for more than one will be obliged to withdraw from all but one of them. For a complete listing, please see “First-Year Seminars” in section 5.12.1.

The First-Year Seminars offered by the Faculty of Science are also open to Arts students. For a complete listing, please see “Registration for First-Year Seminars” in section 12.5.2.1.

5.5.2.2 Registration in Multi-Term Courses

Students who select a multi-term course are making a commitment to that course for its entirety. Students MUST register in the same section in all terms of a multi-term course. Credit will be jeopardized if students deliberately register in different sections of a multi-term course. A drop of the Winter term portion of a multi-term course in order to change sections is considered a withdrawal from the course. In exceptional cases, when circumstances are beyond the student’s control, the Student Affairs Office may grant permission to change sections mid-way through a multi-term course. Students must make their request in writing to the Associate Dean (Student Affairs), citing their reason for the request. The request must also have the written support of the instructors of the sections involved and of the coordinator of the course (if applicable).

5.5.3 Apply to Graduate

For more information, see section 3.9.1, “Apply to Graduate”.

5.6 Grading and Credit

During the first week of lectures, each instructor will provide students with a written course outline. This information should include, where appropriate:

• whether there will be a final examination in the course;
• how term work will affect the final mark in the course;
• how term work will be distributed through the term;
• whether there will be a supplemental examination in the course, and if so, whether the supplemental exam will be worth 100% of the supplemental grade, or whether term work will be included in the supplemental grade (courses with formal final examinations must have supplementals);
• whether students with marks of D, F, J, or U will have the option of submitting additional work, and, if so, how the supplemental mark will be calculated with the extra work.

5.6.1 Incomplete Grades

An instructor who believes that there is justification for a student to delay submitting term work may extend the deadline until after the end of the course. In this case, the instructor will submit a grade of “K” (incomplete), indicating the date by which the work is to be completed. The maximum extensions for the submission of grades to the Student Affairs Office are as follows:

• students graduating in June:
  Fall, Winter, and multi-term courses April 30
  non-graduating students Fall courses April 30 Winter and multi-term courses July 30

Students’ deadlines for submitting their work must be sufficiently in advance of these dates to ensure that the work can be graded and the mark submitted on time.

It is important to note that instructors may impose earlier deadlines than those listed above. If marks to clear K’s have not been submitted to the Student Affairs Office by April 30 for Fall courses, or July 30 for Winter courses and courses spanning Fall/Winter, the K is automatically changed to a KF and counts as an F in the GPA.
Students with a grade of K who have serious extenuating circumstances may request an extension of the K deadline (KE) from the Associate Dean (Student Affairs).

Please see "Grading and Grade Point Averages (GPA)" in section 3.5.3 for more information.

5.7 Examinations

Students should refer to “Examinations” in section 3.6 for information about final examinations and deferred examinations.

The exam schedules are posted on the McGill Website, www.mcgill.ca, normally one month after the start of classes for the Tentative Exam Schedule, and two months after the start of classes for the Final Examination Schedule. Students should also refer to the Student Affairs Website at www.mcgill.ca/artscisao for more information.

Students are warned not to make travel arrangements to leave Montreal prior to the scheduled end of any examination period.

5.8 Supplemental Assessments

5.8.1 Supplemental Examinations

Students who wish to write supplemental examinations for certain courses must apply to the Student Affairs Office for permission. The following conditions apply:

- students must be in satisfactory or probationary standing;
- students must have received a final grade of D, J, F, or U in the course;
- special permission is required if students wish to write supplemental exams totalling more than 8 credits in any supplemental exam period;
- only one supplemental examination is allowed in a course;
- the supplemental result may count for 100% of the final grade or may include the same proportion of class work as did the original grade; the instructor will announce the arrangements to be used for the course by the end of the course change period;
- the format and content of the supplemental examination will not necessarily be the same as for the final examination, so students should consult the instructor;
- the supplemental result will not erase the grade originally obtained; both the original mark and the supplemental result will be calculated in the CGPA;
- in courses in which both a supplemental examination and additional work are available, students may choose the additional work or the examination or both; where both are written, only one supplemental mark will be submitted, reflecting marks for both the supplemental examination and the additional work;
- additional credit will not be given for a supplemental exam where the original grade for the course was a D and the student already received credit for the course;
- students must apply to write a supplemental exam; the deadline for submission of applications is March 1 for Fall courses and July 15 for Winter courses and courses spanning Fall/Winter; a non-refundable fee is payable for each course at the time of application; additional work applications and further information are available in the Student Affairs Office;
- the weight of the additional work, in calculating the supplemental mark, will be equal to the weight given the work revised or replaced when the original mark was submitted;
- the mark resulting from the revised or additional work will be recorded as a supplemental mark;
- the supplemental result will not erase the grade originally obtained; both the original mark and the supplemental mark will count in calculating the CGPA;
- in courses in which both a supplemental examination and additional work are available, students may choose the additional work or the examination or both; where both are written, only one supplemental mark will be submitted, reflecting marks for both the supplemental examination and the additional work;
- additional work in courses outside the Faculty of Arts is subject to the deadlines, rules, and regulations of the relevant faculty.

5.8.2 Additional Work

Instructors of courses that include graded written term work may choose to provide the option of additional work to eligible students. The following conditions apply:

- if there is an option for additional work, it must be announced in the course outline at the beginning of the course;
- additional work involves revising one or more previously submitted papers or submitting new written work to replace the original work;
- students must be in satisfactory or probationary standing;
- students must have received a final grade of D, J, F, or U in the course;
- students must apply for additional work; the deadline for submission of applications is March 1 for Fall courses and July 15 for Winter courses and courses spanning Fall/Winter; a non-refundable fee is payable for each course at the time of application; additional work applications and further information are available in the Student Affairs Office;
- the weight of the additional work, in calculating the supplemental mark, will be equal to the weight given the work revised or replaced when the original mark was submitted;
- the mark resulting from the revised or additional work will be recorded as a supplemental mark;
- the supplemental result will not erase the grade originally obtained; both the original mark and the supplemental mark will count in calculating the CGPA;
- in courses in which both a supplemental examination and additional work are available, students may choose the additional work or the examination or both; where both are written, only one supplemental mark will be submitted, reflecting marks for both the supplemental examination and the additional work;
- additional work in courses outside the Faculty of Arts is subject to the deadlines, rules, and regulations of the relevant faculty.

5.8.3 Reassessments and Rereads

In accordance with the Charter of Student Rights, and subject to the conditions stated therein, students have the right to consult any written submission for which they have received a mark and the right to discuss this submission with the examiner.

The Faculty of Arts recognizes two types of reassessments or rereads:

- reassessment of coursework (term papers, mid-terms, assignments, quizzes, etc.);
- reread of a final exam.

In both cases, rather than re-correct the work and then grade it as they would have done themselves, reviewers assess the appropriateness of the original grade based, for example, on the application of the grading key to the student's work. If a grade is deemed unfair, it is changed, whether the new grade is higher or lower than the original - i.e. the reviewer's grade takes precedence over the original grade.
Reassessment of Coursework
These reassessments are administered and conducted solely by the units involved according to procedures specified by the units and made available to staff and students. Requests for such reassessments must be made within 10 working days of the date of return of the graded materials. Reassessments should normally be completed within 20 working days of the request.

Rereads of Final Exams
These rereads are administered by the Student Affairs Office, but conducted by the units involved. Students must apply in writing to the Student Affairs Office by March 31 for courses in the Fall term and by September 30 for courses in the Winter or Summer terms (these deadlines are strictly enforced and no requests will be accepted past them). Students are assessed a fee of $35.00 for such rereads. It is strongly recommended, but not required, that students consult with the instructor of the course before requesting a reread of a final exam.

Reassessments and rereads in courses not in the Faculty of Arts are subject to the deadlines, rules, and regulations of the relevant faculty.

5.9 Academic Standing

Academic standing is based primarily on students' cumulative grade point average (CGPA), but may also be affected by the term grade point average (TGPA). Academic standing is assessed in January for the Fall term, in May for the Winter term, and in September for the Summer term. Academic standing in each term determines if students will be allowed to continue their studies in the next term and if any conditions will be attached to their registration.

Decisions about academic standing in the Fall term are based only on grades that are available in January. Grades for courses in which students have deferred examinations and Fall-term grades for courses that span the Fall and Winter terms do not affect academic standing for the Fall term, even though they will ultimately affect students' Fall TGPA. Therefore, academic standings for the Fall term that are designated as "interim" should be interpreted as advisory. Note that interim standings will not appear on external transcripts. Interim standing decisions are mentioned below only if the rules for them differ from those for regular standing decisions.

Interim Satisfactory/Satisfactory Standing
Students in interim satisfactory or satisfactory standing:
• may continue in their program;
• have a CGPA of 2.00 or greater.

Interim Probationary/Probationary Standing
Students in interim probationary standing (at the end of the Fall term):
• may continue in their program;
• should evaluate their course load and reduce it as appropriate;
• are strongly advised to consult a departmental adviser, before the withdrawal deadlines, about their course selection.

Students in probationary standing:
• may continue in their program;
• must carry a reduced load (maximum 14 credits per term);
• must raise their CGPA to return to satisfactory standing (see above);
• should see their departmental adviser to discuss their course selection.

Students will be placed in probationary standing:
• if their CGPA falls between 1.50 and 1.99 and if they were previously in satisfactory standing;
• if their CGPA falls between 1.50 and 1.99 and their TGPA in Fall or Winter is 2.50 or higher, and if they were previously in probationary or interim unsatisfactory standing;
• if their CGPA is less than 2.00, and if they were previously in unsatisfactory readmitted standing and have satisfied the relevant conditions specified in their letter of readmission.

Unsatisfactory Readmitted Standing
Students in unsatisfactory readmitted standing:
• were previously in unsatisfactory standing and were readmitted to the B.A. by the Associate Dean (Student Affairs) or the Committee on Student Standing;
• must meet the conditions specified in their letter of readmission to be allowed to continue in their program;
• should see their departmental adviser to discuss their course selection.

Interim Unsatisfactory/Unsatisfactory Standing
Students in interim unsatisfactory standing (at the end of the Fall term):
• may continue in their program;
• should evaluate their course load and reduce it as appropriate;
• are strongly advised to consult an academic adviser, before the withdrawal deadlines, about their course selection for the Winter term.

Students in unsatisfactory standing:
• have failed to meet the minimum standards set by the faculties;
• may not continue in their program, and their registration will be cancelled.

Students will be placed in unsatisfactory standing:
• if their CGPA falls or remains below 1.50.
• if their TGPA in the Fall of Winter falls below 2.50 and their CGPA is below 2.00 and if they were previously in probationary, unsatisfactory readmitted, or interim unsatisfactory standing;
• if they were previously in unsatisfactory standing and were readmitted to the Faculty by the Associate Dean (Student Affairs) or the Committee on Student Standing but have not satisfied the conditions specified in the letter of readmission.

Appeals for readmission by students in unsatisfactory standing should be addressed to the Associate Dean (Student Affairs) no later than July 15 for readmission to the Fall term and November 15 for the Winter term. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation). Students in unsatisfactory standing for the second time must withdraw permanently.

Normally, supplemental examinations are not permitted; however, students in unsatisfactory standing may appeal to the Associate Dean (Student Affairs) for permission to write a supplemental examination, clearly stating the reasons for special consideration and providing proof as appropriate.

Incomplete Standings
• Standing awaits deferred exam.
• Must clear K's, L's or Supplementals.
• Standing Incomplete.

Students with incomplete standings (in the Winter or Summer term):
• may register for the Fall term, but their standing must be resolved by the end of the course change period for that term.

Students:
• may continue in the program if incomplete standing changes to satisfactory, probationary, or interim unsatisfactory standing;
may not continue in their program and their registration will be cancelled if standing changes to unsatisfactory standing.

Students whose standing changes to unsatisfactory:
• may ask for permission to continue in their program;
• must make a request to the Associate Dean (Student Affairs) as soon as they are placed in unsatisfactory standing;
• must provide proof of extenuating circumstances that affected academic performance (e.g., medical or other documentation).

Students whose standing is still incomplete by the end of course change period should immediately consult with the Student Affairs Office.

At the end of the Winter term, students with a mark of K or L will be placed in the appropriate standing in June, if the outstanding mark in the course will not affect their standing. Otherwise, standing decisions will be made only once incomplete marks have been cleared. For more information about incomplete grades, please refer to “Incomplete Grades” in section 5.6.1.

5.10 Awards and Honorary Designations

5.10.1 Honours and First-Class Honours

Departments may recommend to the Faculty that graduating students registered in an Honours program be awarded Honours or First-Class Honours under the following conditions:
• students must complete all requirements imposed by the department;
• for Honours, the CGPA at graduation must be at least 3.00;
• for First-Class Honours, the CGPA at graduation must be 3.50 or better;
• some departments have additional requirements which must be met before students are recommended for Honours or First-Class Honours (see the departmental entries).

Students in an Honours program whose program GPA or CGPA is below 3.00, or who did not satisfy certain additional program requirements, must consult their adviser to determine if they are eligible to graduate in a program other than Honours.

5.10.2 Distinction and Great Distinction

Students in the Faculty or the Multi-track programs may be awarded their degrees with Distinction or Great Distinction under the following conditions:
• students must have completed a minimum of 60 McGill credits towards the same degree to be considered;
• for Distinction, the CGPA at graduation must be 3.30 to 3.49;
• for Great Distinction, the CGPA at graduation must be at least 3.50;
• these designations may be withdrawn in the case of transfer students, if their CGPA in another faculty or at another university is not comparable to the CGPA earned in the Faculty of Arts.

5.10.3 Dean’s Honour List

The designation Dean’s Honour List may be awarded to a graduating student under the following conditions:
• students must have completed a minimum of 60 McGill credits towards the same degree to be considered;
• students must be among the top 10% of the Faculty’s graduating class of students; this calculation is based on the CGPA;
• this designation may be withdrawn in the case of transfer students, if their CGPA in another faculty or at another university is not comparable to the CGPA earned in the Faculty of Arts.

The designation Dean’s Honour List may be awarded at the end of each academic year to continuing students under the following conditions:
• students must have completed at least 27 graded credits during the academic year to be considered;
• students must be among the top 10% of the Faculty. This calculation is based on the sessional GPA (i.e. the combined GPA for the Fall and Winter terms).

5.10.4 Medals and Prizes

Various medals, scholarships, and prizes are open to continuing and graduating students. Full details of these are set out in the Undergraduate Scholarships and Awards Calendar, available from the Admissions, Recruitment and Registrar’s Office or on the Web, www.mcgill.ca. Application may be required for some scholarships.

5.11.4 Joint Honours Programs

There are two types of Joint Honours Programs available in the Faculty of Arts:

• fully integrated programs such as Mathematics and Computer Science.

• programs that are created by combining the Joint Honours program components from two Arts disciplines. Students must register for both Joint Honours program components. Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Students can choose Joint Honours program components from any two of the following disciplines:

5.12 Academic Programs

5.12.1 First-Year Seminars
See Course section for descriptions.
ECON 199 FYS: Aspects of Globalization
ENGL 199 FYS: Literature and Democracy
FREN 199 FYS: Littérature française
GERM 197 FYS: Images of Otherness
HIST 197 FYS: Race in Latin America
HIST 198 FYS: Nation Building and Nationalism
JWST 199 FYS: Images - Jewish Identities
SOC1 199 FYS: Transition from School to Work
SSMD 199 FYS: Mind-Body Medicine

5.12.2 Faculty of Arts Internship Program
Several departments in the Faculty of Arts offer undergraduate students the opportunity to earn university credit while gaining experience in areas relevant to their fields of study. Open to U2 and U3 students, normally after completing 30 credits of a 90 credit program or 45 credits of a 96 to 120 credit program, normally with a minimum CGPA of 2.7, and permission of the departmental Internship Advisor. Arts internships involve a minimum of 150 hours of work with an approved host institution or organization. Students are required to submit a major topical paper that discusses an aspect of the internship from an academic perspective.
For more information about the Faculty of Arts Internship Program, please refer to www.mcgill.ca/arts-internships.

5.12.3 Field Studies and Study Abroad Programs
The Faculty of Arts offers students many field studies and study abroad opportunities. For more information, please refer to section 15, “Field Studies and Study Abroad Opportunities” of this calendar.

5.12.4 African Studies Program (AFRI)

MINOR CONCENTRATION IN AFRICAN STUDIES (Expandable) (18 credits)
A Minor Concentration in African Studies is available for those students majoring in a discipline of the Faculty of Arts who wish to acquire interdisciplinary knowledge of Africa.

Required Course (3 credits)
AFRI 598 Research Seminar in African Studies

Complementary Courses (15 credits)
To be selected from the courses listed below. Priority should be given to key African courses, designated with an asterisk (*), whenever they are offered.

MAJOR CONCENTRATION IN AFRICAN STUDIES (36 credits)
The Major Concentration in African Studies provides students with an interdisciplinary approach to the study of the African continent.
Students wishing to major in African Studies should consult the Program Coordinator at the beginning of their first academic year.
In the African Studies Major Concentration, students will be encouraged to identify an area within a discipline of the Faculty, taking as many relevant courses as possible in that field.

Required Course (3 credits)
AFRI 598 Research Seminar in African Studies

Complementary Courses (33 credits)
To be selected from the courses listed below. Priority should be given to key African courses, designated with an asterisk (*), whenever they are offered.

COMPLEMENTARY COURSE LIST
These courses are either on African subjects or have significant African content.
If courses listed below are not available in any particular year, modifications to the Programs may be made with the approval of the Program Coordinator.
Students who wish program credit for other courses with African content, or in which they have pursued individual research or written papers on African topics, should seek approval from the Program Coordinator. African content may be found in certain courses offered in Islamic Studies and Religious Studies.

Chair — Michael S. Bisson

Professors
Donna K. L. Atwood; B.A.(Calif.), Ph.D.(McG.)
Laurel Bossen; B.A.(Barnard), M.A., Ph.D.(SUNY,Albany)
Colin Chapman; B.Sc., M.A., Ph.D.(Alta.) (joint appoint. with McGill School of Environment)
Jerome Rousseau; B.Sc., M.A.(Montr.), Ph.D.(Can.)
Philip Carl Salzman; B.A.(Antioch), M.A., Ph.D.(Chic.)
Allan Young; B.A.(Penn.), M.A.(Wash.), Ph.D.(Penn.) (joint appoint. with Social Studies of Medicine)

Associate Professors
Michael S. Bisson; B.A., Ph.D.(Calif.)
John G. Galaty; B.A.(Trin. Coll., Tor.), M.A., Ph.D.(Chic.)
Sandra T. Hyde; B.A.(Calif.-Santa Cruz), M.P.H.(Hawaii), Ph.D.(Calif., Berk.) (on leave Winter 2008)
Carmen Lambert; B.A.(Montr.), M.A., Ph.D.(McG.)

Ronald W. Niezen; B.A.(Br. Col.), M.Phil., Ph.D.(Can.)
Kristin Norgert; B.A.(Vic., BC), M.Phil., D.Phil.(Cant.) (on leave 2007-08)
James M. Savelle; B.Sc., M.Sc.(Ott.), M.A.(Ark.), Ph.D.(Alta.)
Colin H. Scott; B.A.(Regina), M.A., Ph.D.(McG.) (on leave Fall 2007)

Assistant Professors
Andre Costopoulos; B.A.(McG.), M.A.(Montr.), Ph.D.(Can.)
Nicolette Couture; B.A.(Trent), M.A., Ph.D.(Chic.)
Setrag Manoukian; B.A.(Venezia), M.A., Ph.D.(Mich.) (joint appoint. with Islamic Studies)

Associate Member
Ellen Corin; Ph.D.(Louvain)

Adjunct Member
Vinh-Kim Nguyen; B.Sc.(McG.), M.D.(Montr.), M.A., Ph.D.(McG.)

The Honours Program and Major Concentration in Anthropology emphasize the similarity and diversity of human behaviour, understanding of social and cultural systems, and the processes of socio-cultural change from human origins to the present day. Within Anthropology, the Department concentrates on the fields of Archaeology and Socio-Cultural Anthropology.

Our programs serve as a useful background for those who are planning a career in law, foreign service, community organization, public administration, journalism, and teaching and research in social sciences and humanities. The Multi-track Major and Minor Concentrations provide students with a solid grounding in anthropology as a whole, or in selected topical or sub-disciplinary areas, while allowing students to follow programs in other departments that suit their needs and interests. The Honours program provides a greater focus on Anthropology with substantial breadth and depth. The completion of an Honours program is an asset when applying to graduate or professional schools.

Students should have a CGPA of at least 3.30 to register in an Honours or Joint Honours Program after their first year, and maintain it to graduate with an Honours Degree. Graduation with a First Class Honours or Joint Honours Degree requires a CGPA of 3.50 or better.

CORE COURSES

Core courses in Anthropology (350 level) provide students with essential knowledge of method and theory. They are more intensive than other 300-level courses, and are restricted to Anthropology program students in U2 standing or above.

ANTHROPOLOGY MINOR CONCENTRATIONS

The Minor Concentration in Anthropology consists of 18 credits (six 3-credit courses) in the discipline and is designed to complement students’ study in related disciplines or in interdisciplinary programs. The degree may enhance the employment profile of graduating students wishing to work in social services, in multicultural or multiethnic settings, in international development, aboriginal history, museum work, or in educational or media related professions.

Students should register in the Minor Concentration prior to their second year of study at McGill. No credits taken in a Minor may overlap with another degree program. The Minor Concentration may be expanded into the single Anthropology Major Concentration.

The Minor Concentration in Anthropological Archaeology and the Minor Concentration in Socio-Cultural Anthropology were retired at the end of 2004. Students enrolled in either one at that time should consult with a Departmental adviser.

MINOR CONCENTRATION IN ANTHROPOLOGY (Expandable)

(18 credits)

The Minor Concentration in Anthropology permits students to explore the development and diversity of human beings and human society and culture through courses in human evolution, prehistoric archaeology and socio-cultural anthropology. Students may include courses in all of these fields, or may focus on one or two.
MAJOR CONCENTRATION IN ANTHROPOLOGY

The Major Concentration is especially appropriate for students who aim to take courses across several sub-disciplinary or topical concentrations, and for whom specialization is premature. There are no prerequisites for admission to the Major Concentration in Anthropology. Students are encouraged to take a course in quantitative methods (listed under the Honours program below), but this course cannot count as part of this Concentration.

MAJOR CONCENTRATION IN ANTHROPOLOGY (36 credits)
[Addition to course lists under consideration for September 2007. Go to www.mcgill.ca (Course Calendars) in July for details.]

Complementary Courses (36 credits)
6 credits selected from the 200-level courses in Anthropology
6 credits, two Core courses (350-level) selected from:
ANTH 352 (3) History of Anthropological Theory
ANTH 355 (3) Theories of Culture and Society
ANTH 357 (3) Archaeological Methods
ANTH 358 (3) The Process of Anthropological Research
ANTH 359 (3) History of Archaeological Theory

Complementary Courses (18 credits)
6 to 9 credits from the following list:
ANTH 201 (3) Prehistoric Archaeology
ANTH 202 (3) Comparative Cultures
ANTH 203 (3) Human Evolution
ANTH 204 (3) Anthropology of Meaning
ANTH 205 (3) Cultures of the World
ANTH 206 (3) Environment and Culture
ANTH 207 (3) Ethnography through Film
ANTH 208 (3) Evolutionary Anthropology
ANTH 209 (3) Anthropology of Religion
ANTH 212 (3) Anthropology of Development
ANTH 214 (3) Violence, Warfare, Culture
ANTH 221 (3) Introduction to Urban Anthropology
ANTH 222 (3) Legal Anthropology
ANTH 227 (3) Medical Anthropology

3 credits from either one of the following area groups:
Ethnography
ANTH 306 (3) Native Peoples' History in Canada
ANTH 315 (3) Culture/Culture: East Africa
ANTH 321 (3) Peoples and Cultures of Africa
ANTH 322 (3) Social Change in Modern Africa
ANTH 326 (3) Peoples of Central and South America
ANTH 327 (3) Peoples of South Asia
ANTH 329 (3) Native Peoples of North America
ANTH 331 (3) Prehistory of East Asia
ANTH 335 (3) Ancient Egyptian Civilization
ANTH 338 (3) Paleolithic Cultures
ANTH 340 (3) Native Peoples of North America
ANTH 345 (3) Prehistory of Africa
ANTH 347 (3) Prehistory of Africa
ANTH 348 (3) Early Prehistory: New World
ANTH 552 (3) Problems: Prehistory North Eastern America

Honours in Anthropology (60 credits)
The course selection for the program must satisfy the following requirements:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>200- and 300-level courses in Anthropology</td>
<td>36 credits</td>
<td>Max. 36 credits (max. 21 credits at the 200-level)</td>
</tr>
<tr>
<td>Core courses (350-level)</td>
<td>min. 9 credits</td>
<td></td>
</tr>
<tr>
<td>400- and 500-level courses in Anthropology</td>
<td>min. 9 credits</td>
<td></td>
</tr>
<tr>
<td>300- and 400-level courses in other departments (subject to departmental approval)</td>
<td>max. 9 credits</td>
<td></td>
</tr>
<tr>
<td>Honours thesis</td>
<td>6 credits</td>
<td></td>
</tr>
</tbody>
</table>

Students can take a maximum of 9 credits at the 300 level or above given by other departments, if they are directly related to their focus of study within Anthropology and are approved by their adviser in the Anthropology Department. Honours students must maintain a GPA of 3.30 in their program courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Complementary Courses (60 credits)
Maximum of 36 credits at the 200- and 300-level with a maximum of 21 credits at the 200-level from the following:
ANTH 201 (3) Prehistoric Archaeology
ANTH 202 (3) Comparative Cultures
ANTH 203 (3) Human Evolution
ANTH 204 (3) Anthropology of Meaning
ANTH 205 (3) Cultures of the World
ANTH 206 (3) Environment and Culture
ANTH 207 (3) Ethnography through Film
ANTH 208 (3) Evolutionary Anthropology
ANTH 209 (3) Anthropology of Religion
ANTH 212 (3) Anthropology of Development
ANTH 214 (3) Violence, Warfare, Culture
ANTH 221 (3) Introduction to Urban Anthropology
ANTH 222 (3) Legal Anthropology
ANTH 227 (3) Medical Anthropology
ANTH 301 (3) Nomadic Pastoralism
ANTH 302 (3) New Horizons in Medical Anthropology
ANTH 303 (3) Ethnographies of Post-socialism
ANTH 305 (3) Arctic Prehistory
ANTH 306 (3) Native Peoples' History in Canada
ANTH 308 (3) Political Anthropology
ANTH 309 (3) Prehistory of Northern Europe
ANTH 310 (3) Anthropology of the Arts
ANTH 311 (3) Primate Behaviour and Ecology
ANTH 312 (3) Zoarchaeology
ANTH 313 (3) Early Civilizations
ANTH 314 (3) Psychological Anthropology
ANTH 315 (3) Society/Culture: East Africa
ANTH 316 (3) Anthropology of Complex Societies
ANTH 317 (3) Prehistory of North America
ANTH 319 (3) Inka Archaeology & Ethnohistory
ANTH 320 (3) Social Evolution
ANTH 321 (3) Peoples and Cultures of Africa
ANTH 322 (3) Social Change in Modern Africa
ANTH 324 (3) Economic Anthropology
ANTH 326 (3) Peoples of Central and South America
ANTH 327 (3) Peoples of South Asia
ANTH 329 (3) Modern Chinese Society and Change
ANTH 331 (3) Prehistory of East Asia
ANTH 333 (3) Class and Ethnicity
ANTH 334 (3) Kinship and Social Structure
ANTH 335 (3) Ancient Egyptian Civilization
ANTH 336 (3) Ethnohistory: North Eastern North America
ANTH 337 (3) Mediterranean Society and Culture
ANTH 338 (3) Native Peoples of North America
ANTH 339 (3) Ecological Anthropology
ANTH 340 (3) Middle Eastern Society and Culture
ANTH 341 (3) Women in Cross-cultural Perspective
ANTH 342 (3) Gender, Inequality and the State
ANTH 344 (3) Quantitative Approaches to Anthropology
ANTH 345 (3) Prehistory of Africa
ANTH 346 (3) Development in Agrarian Societies
ANTH 347 (3) Paleolithic Cultures
ANTH 348 (3) Early Prehistory: New World
ANTH 381 (3) Special Topic 2
ANTH 382 (3) Special Topic 3
ANTH 383 (3) Special Topic 4
Minimum of 9 credits of Core courses (350-level) from the following:

ANTH 352 (3) History of Anthropological Theory
ANTH 355 (3) Theories of Culture and Society
ANTH 357 (3) Anthropological Methods
ANTH 358 (3) The Process of Anthropological Research
ANTH 359 (3) History of Anthropological Theory

Minimum of 9 credits at the 400- and 500-level from the following:

ANTH 402 (3) Topics in Ethnography 1
ANTH 403 (3) Current Issues in Archaeology
ANTH 404 (3) Topics in Psychological Anthropology
ANTH 405 (3) Topics in Ethnography 2
ANTH 407 (3) Anthropology of the Body
ANTH 412 (3) Topics: Anthropological Theory
ANTH 413 (3) Gender in Archaeology
ANTH 416 (3) Environment/Development: Africa
ANTH 418 (3) Environment and Development
ANTH 419 (3) Archaeology of Hunter-Gatherers
ANTH 420 (3) Lithic Technology and Analysis
ANTH 422 (3) Contemporary Latin American Culture & Society
ANTH 430 (3) Symbolic Anthropology
ANTH 431 (3) Problems in East Asian Archaeology

ANTH 436 (3) North American Native Peoples
ANTH 438 (3) Topics in Medical Anthropology
ANTH 439 (3) Theories of Development
ANTH 440 (3) Cognitive Anthropology
ANTH 443 (3) Medical Anthropological Theory
ANTH 445 (3) Property and Land Tenure
ANTH 461 (3) Research Techniques
ANTH 480 (3) Special Topic 5
ANTH 481 (3) Special Topic 6
ANTH 482 (3) Special Topic 7
ANTH 483 (3) Special Topic 8
ANTH 484 (3) Special Topic 9
ANTH 485 (3) Special Topic 10

ANTH 524 (3) Special Topic 8
ANTH 525 (3) Special Topic 9
ANTH 526 (3) Special Topic 10

JOINT HONOURS – ANTHROPOLOGY COMPONENT (36 credits)

Joint Honours program (Anthropology portion) 36 credits
200-level courses in Anthropology max. 12 credits
300-level courses in Anthropology min. 6 credits
Core courses in Anthropology (350-level) min. 9 credits
400- and 500-level courses in Anthropology min. 6 credits
Honours project 6 credits
* of which 3 credits are normally in the other Joint Honours program

Students interested in Joint Honours should consult an adviser in the other department for specific course requirements. A form will be supplied by the Anthropology Department to keep track of courses required by both departments for the program selected.

Students who wish to study at the Honours level in two disciplines can combine the Joint Honours Program component in Anthropology with one in any other Arts discipline; see section 5.11.4 “Joint Honours Programs” for a list of available programs.

The Joint Honours thesis topic should be arranged by consultation with an adviser in Anthropology and the other discipline and supervisors be appointed in each department who will work together to guide the student.

Joint Honours students must maintain a GPA of 3.30 in their program courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Complementary Courses (36 credits)

Maximum of 12 credits at the 200-level from the following:

ANTH 201 (3) Prehistoric Archaeology
ANTH 202 (3) Comparative Cultures
ANTH 203 (3) Human Evolution
ANTH 204 (3) Anthropology of Meaning
ANTH 205 (3) Cultures of the World
ANTH 206 (3) Environment and Culture
ANTH 207 (3) Ethnography through Film
ANTH 208 (3) Evolutionary Anthropology
ANTH 209 (3) Anthropology of Religion
ANTH 212 (3) Anthropology of Development
ANTH 222 (3) Legal Anthropology
ANTH 227 (3) Medical Anthropology

Minimum of 6 credits at the 300-level from the following:
ANTH 301 (3) Nomadic Pastoralists
ANTH 302 (3) New Horizons in Medical Anthropology
ANTH 303 (3) Ethnographies of Post-socialism
ANTH 305 (3) Arctic Prehistory
ANTH 306 (3) Native Peoples' History in Canada
ANTH 308 (3) Political Anthropology
ANTH 309 (3) Prehistory of Northern Europe
ANTH 310 (3) Anthropology of the Arts
ANTH 311 (3) Primate Behaviour and Ecology
ANTH 312 (3) Zooarchaeology
ANTH 313 (3) Early Civilizations
ANTH 314 (3) Psychological Anthropology
ANTH 315 (3) Society/Culture: East Africa
ANTH 316 (3) Anthropology of Complex Societies
ANTH 317 (3) Prehistory of North America
ANTH 319 (3) Inka Archaeology & Ethnohistory
ANTH 320 (3) Social Evolution
ANTH 321 (3) Peoples and Cultures of Africa
ANTH 322 (3) Social Change in Modern Africa
ANTH 324 (3) Economic Anthropology
ANTH 326 (3) Peoples of Central and South America
ANTH 327 (3) Peoples of South Asia
ANTH 329 (3) Modern Chinese Society and Change
ANTH 331 (3) Prehistory of East Asia
ANTH 333 (3) Class and Ethnicity
ANTH 334 (3) Kinship and Social Structure
ANTH 335 (3) Ancient Egyptian Civilization
ANTH 336 (3) Ethnohistory: North Eastern North America
ANTH 337 (3) Mediterranean Society and Culture
ANTH 338 (3) Native Peoples of North America
ANTH 339 (3) Ecological Anthropology
ANTH 340 (3) Middle Eastern Society and Culture
ANTH 341 (3) Women in Cross-cultural Perspective
ANTH 342 (3) Gender, Inequality and the State
ANTH 344 (3) Quantitative Approaches to Anthropology
ANTH 345 (3) Prehistory of Africa
ANTH 346 (3) Development in Agrarian Societies
ANTH 347 (3) Paleolithic Cultures
ANTH 348 (3) Early Prehistory: New World
ANTH 380 (3) Special Topic 1
ANTH 381 (3) Special Topic 2
ANTH 382 (3) Special Topic 3
ANTH 383 (3) Special Topic 4

Minimum of 9 credits of Core courses (350-level) from the following:
ANTH 352 (3) History of Anthropological Theory
ANTH 355 (3) Theories of Culture and Society
ANTH 357 (3) Archaeological Methods
ANTH 358 (3) The Process of Anthropological Research
ANTH 359 (3) History of Anthropological Theory

Minimum of 6 credits at the 400- and 500-level from the following:
ANTH 402 (3) Topics in Ethnography 1
ANTH 403 (3) Current Issues in Archaeology
ANTH 404 (3) Topics in Psychological Anthropology
ANTH 405 (3) Topics in Ethnography 2
ANTH 407 (3) Anthropology of the Body
ANTH 412 (3) Topics: Anthropological Theory
ANTH 413 (3) Gender in Archaeology
ANTH 416 (3) Environment/Development: Africa
ANTH 418 (3) Environment and Development
ANTH 419 (3) Archaeology of Hunter-Gatherers
ANTH 420 (3) Lithic Technology and Analysis
ANTH 422 (3) Contemporary Latin American Culture & Society
ANTH 430 (3) Symbolic Anthropology
ANTH 431 (3) Problems in East Asian Archaeology

ANTH 436 (3) North American Native Peoples
ANTH 438 (3) Topics in Medical Anthropology
ANTH 439 (3) Theories of Development
ANTH 440 (3) Cognitive Anthropology
ANTH 443 (3) Medical Anthropological Theory
ANTH 445 (3) Property and Land Tenure
ANTH 461 (3) Research Techniques
ANTH 480 (3) Special Topic 5
ANTH 481 (3) Special Topic 6
ANTH 482 (3) Special Topic 7
ANTH 483 (3) Special Topic 8
ANTH 484 (3) Special Topic 9
ANTH 485 (3) Special Topic 10
ANTH 500 (3) Chinese Diversity & Diaspora
ANTH 511 (3) Computational Approaches to Prehistory
ANTH 540 (3) Topics in Anthropological Theory
ANTH 551 (3) Advanced Topics: Archaeological Research
ANTH 555 (3) Advanced Topics in Ethnology

AFRICAN FIELD STUDY SEMESTER
The Department of Geography, Faculty of Science, coordinates the 15-credit interdisciplinary African Field Study Semester; see section 15.2.1 “African Field Study Semester”.

Chair — TBA

Director of Graduate Programs in Communication Studies — Jonathan Sterne

Director of Graduate Programs in Art History — Angela Vanhaelen

Emeritus Professors
George Szanto; B.A.(Dart.), Ph.D.(Harv.)

Professors
Marc Raboy; B.Sc., M.A., Ph.D.(McG.)

Associate Professors
Darin Barney; B.A., M.A.(S.Fraser), Ph.D.(Tor.)
David Crowley; B.A.(Johns H.), M.Sc.(Penn.), Ph.D.(McG.)
Christine Ross; M.A.(C'dia), Ph.D.(Paris l)
Jonathon Sterne; B.A.(Minn.), A.M., Ph.D.(III.-Urbana-Champaign)

Will Straw; B.A.(Car.), M.A., Ph.D.(McG.)
Angela Vanhaelen; B.A.(W. Ont.), M.A., Ph.D.(Br. Col.)
All new students entering the Art History and Communication Orientation Session for New Students described in the Communication Studies, as well as programs at the graduate level as of the Undergraduate Office, Arts Building, Room W-225, (514) 398-6541. A result an appropriate Undergraduate adviser through the Department of Communication Studies undergraduate programs are required to attend an information session prior to registration. In 2007, this session will be held on Wednesday, August 29 at 13:30 hours in Arts W-220.

The Department offers a new Minor Concentration in Communication Studies, as well as programs at the graduate level as described in the Graduate and Postdoctoral Studies Calendar.

Orientation Session for New Students
All new students entering the Art History and Communication Studies undergraduate programs are required to attend an information session prior to registration. In 2007, this session will be held on Wednesday, August 29 at 13:30 hours in Arts W-220.

At the meeting, the Academic Adviser will explain the requirements of the Department’s programs. Incoming students will have an opportunity to ask questions and receive advice on how to plan their courses. Afterwards, students will meet individually with an adviser in order to fill out their Minerva Course Selection Form for registration. Students should sign up for advising appointments after the orientation session.

MINOR CONCENTRATION IN ART HISTORY (Expandable)
(18 credits)

Required Course (3 credits)
ARTH 305 (3) Methods in Art History

Complementary Courses (15 credits)
3 credits in Art History at the 200 level
12 credits in Art History at the 300 level or above, selected in consultation with the departmental adviser.

Note: courses in studio practice cannot be counted towards the Minor Concentration.

MAJOR CONCENTRATION IN ART HISTORY (36 credits)

Required Course (3 credits)
ARTH 305 (3) Methods in Art History

Complementary Courses (33 credits)
a maximum of 12 credits can be at the 200 level
a minimum of 3 credits must be at the 400 level or above (except ARTH 490)

The complementary credits must be selected from at least six of the eight Art History course fields:

- Theories and Methods (I)
- Ancient to Medieval (II)
- 1400 - 1700 (Early Modern) (III)
- 1700 - 1945 (IV)
- Contemporary Art (1945 to present) (V)
- Sites of Visual Culture (VI)
- Medium and Media (VII)

Selected Topics (VIII)

Note: courses in studio practice cannot be counted towards the Major Concentration.

HONOURS IN ART HISTORY (60 credits)

Students are encouraged to apply for this program after their first year of study at the University and after completion of no less than 12 credits in Art History. Admission is on a competitive basis. While the Faculty of Arts regulations require a minimum CGPA of 3.0 for Honours programs, the department requires in addition a program GPA of 3.30 for admission into the program and the awarding of Honours.

Required Courses (9 credits)
ARTH 305 (3) Methods in Art History
ARTH 400 (3) Selected Methods in Art History
ARTH 401 (3) Honours Research Paper

Complementary Courses (51 credits)
a maximum of 15 credits can be at the 200 level
a minimum of 6 credits must be at the 400 level or above
45 credits selected from at least six of the eight Art History course fields listed below.

- Theories and Methods (I)
- Ancient to Medieval (II)
- 1400 - 1700 (Early Modern) (III)
- 1700 - 1945 (IV)
- Contemporary Art (1945 to present) (V)
- Sites of Visual Culture (VI)
- Medium and Media (VII)
- Selected Topics (VIII)

6 credits in a language other than English or in courses in one or two related disciplines and selected with written approval of the academic adviser.

In addition to the completion of the Honours requirements, students must complete at least a Minor Concentration in an academic unit other than the one in which the Honours requirements are satisfied. (For students completing a second degree in the Faculty of Arts, this regulation is waived.)

JOINT HONOURS – ART HISTORY COMPONENT (36 credits)

Students who wish to study at the Honours level in two disciplines can combine Joint Honours Program components from any two Arts disciplines: see section 5.11.4 “Joint Honours Programs”.

Prior to registering for each Joint Honours component, students should consult an adviser in each department for approval of their course selection.

Students are encouraged to apply for admission to the Joint Honours program after their first year of study at the University and after completion of no less than 12 credits in Art History. Admission is on a competitive basis. While the Faculty of Arts regulations require a minimum CGPA of 3.0 for Honours programs, the department requires in addition a program GPA of 3.30 for admission into the program and the awarding of Honours.

Required Courses (9 credits)
ARTH 305 (3) Methods in Art History
ARTH 400 (3) Selected Methods in Art History
ARTH 401 (3) Honours Research Paper

Complementary Courses (27 credits)
a maximum of 9 credits can be at the 200 level
a minimum of 3 credits must be at the 400 level or above
27 credits selected from at least six of the eight Art History course fields listed below.

- Theories and Methods (I)
- Ancient to Medieval (II)
- 1400 - 1700 (Early Modern) (III)
- 1700 - 1945 (IV)
- Contemporary Art (1945 to present) (V)
I. Theories and Methods

Art History courses are divided into eight fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Courses</th>
</tr>

5.12.7 Canadian Ethnic Studies Minor Concentration

Chair — Morton Weinfield
Department of Sociology
E-mail: morton.weinfeld@mcgill.ca
Leacock 714, (514) 398-6853

Advisory Committee

G. Burgos (Sociology), Ian H. Henderson (Religious Studies), A. Hsia (German Studies), S. T. Saideman (Political Science), J. Torczyner (Social Work), U. Turgay (Islamic Studies)

The Minor Concentration in Canadian Ethnic Studies is an interdisciplinary program administered by the Faculty of Arts. It is affiliated with the McGill Institute for the Study of Canada. The Concentration can be taken in conjunction with any primary program in Arts or Science. It offers to undergraduate students a structured framework in which to appreciate the range of social scientific approaches to the study of ethnic diversity in Canada. The term “ethnic” is used in a very broad sense, to include the full spectrum of ethnic, cultural, aboriginal, linguistic, and racial groups in Canada.

The disciplines featured in the program are Sociology, Anthropology, Geography, History, and Political Science. In special
The social sciences.

Other non-governmental organizations; and graduate work in all areas will find familiarity with issues relating to cultural diversity to be an asset. These include the fields of health, social services, education, law, law enforcement, human resources and personnel; occupations in government agencies, in ethnocultural and other non-governmental organizations; and graduate work in all the social sciences.

The Canadian Ethnic Studies Concentration will also sponsor programs of interest for the McGill Community during the course of the year. Students interested in registering in this program should contact the Chair.

**MINOR CONCENTRATION IN CANADIAN ETHNIC STUDIES**

Canadian Studies will be of value to any student considering a career in education, law, business, government, social service, human resources, journalism and the media, and graduate work in the social sciences and humanities.

The Canadian Studies Major and Minor Concentrations seek to provide students with a comprehensive multidisciplinary view of the nature and growth of Canada. Students completing a Major Concentration in Canadian Studies are encouraged to complete a second Major Concentration in a discipline such as Anthropology, Economics, English Literature, History, Political Science or Sociology as a complement to their Canadian Studies requirements. The Minor Concentration may be taken in conjunction with any primary program in Arts or Science.

Students interested in pursuing Canadian Studies at the graduate level should consider the Joint Honours Concentration, which includes the Canadian Studies Component or the Honours Concentration.

9 credits chosen from Canadian Studies (CANS) courses

3 credits taught in French, including language courses (see Canadian Studies Complementary Course List)
HONOURS IN CANADIAN STUDIES

Students planning to pursue an Honours Program option are reminded that they must complete a Minor Concentration (18 credits) in another Arts discipline to graduate.

Students with a GPA of 3.30 in their program courses and, in keeping with Faculty regulations, a minimum CGPA of 3.00 in general, are eligible to apply to the Honours Program in Canadian Studies; application deadlines are December 15 and May 15. Forms are available from the MISC Office.

The Minor Concentration in Catholic Studies seeks to enrich the intellectual experience and academic options available to students, to broaden the course offerings across the disciplines, and to complement the visibility given to other programs such as Jewish Studies, Islamic Studies, and North American Studies.

The Minor Concentration consists of 18 credits. Core and complementary courses provide students an opportunity to deepen their understanding of Catholicism in an increasingly pluralistic world. The program offers a systematic and critical exploration of the diverse ways in which the Catholic tradition informs culture, institutions, and identity.
## MINOR CONCENTRATION IN CATHOLIC STUDIES (18 credits)

**Required Course (3 credits)**

CATH 200 (3) Introduction to Catholicism

**Complementary Courses (15 credits)**

9 credits chosen from:

Assistant Professor, Special Category

Renaud Gagné; B.A,(Montr.)
Faculty Lecturer

Donald W. Baronowski, B.A.(McG.), M.A.(Br. Col.), Ph.D.(Tor.)

The Classics Program offers courses and the full range of degree concentrations and programs (Minor Concentration, Major Concentration, Joint Honours Component and Honours) in the study of the language, literature, history and culture of Ancient Greece and Rome. In general the Minor and Major concentrations provide an intellectual background in humanist perspectives for the enrichment of the undergraduate degree, while the Joint Honours and Honours programs in addition offer students in highest standing the prospect of favourable consideration for graduate and professional schools (such as Law), and other relevant career training. All the Classics concentrations and programs require regular advising for course selection and degree audit. Modern Greek Language and Literature courses bear the CLAS designation and are included in the listings for Classics (Group C).
Complementary courses in Classics are divided into four groups and are listed in the CLAS Complementary Course List. Group A: Ancient Greek Language Group B: Latin Language Group C: Classical Civilization, Modern Greek, Ancient History Group D: Related Courses in Other Departments

The following outlines represent Departmental requirements only. Each student’s program must also satisfy the regulations imposed by the Faculty of Arts. Please consult the Faculty General Information section.

MINOR CONCENTRATION IN CLASSICS (Expandable)
(18 credits)

Complementary Courses (18 credits)
6 - 18 credits from Ancient Greek Language (Group A) and/or Latin Language (Group B)
0 - 12 credits from Classical Civilization, Modern Greek, Ancient History (Group C)
0 - 6 credits from Related Courses in Other Departments (Group D)
Maximum of 12 credits at the 200-level.

MAJOR CONCENTRATION IN CLASSICS (36 credits)

Complementary Courses (36 credits)
15 credits from Ancient Greek Language (Group A) and/or Latin Language (Group B)
21 credits chosen from the four groups (A, B, C, & D)
Maximum of 21 credits in any one group.
Maximum of 12 credits at the 200-level.
Minimum of 3 credits at the 400-level.

HONOURS IN CLASSICS (60 credits)

Complementary Courses (60 credits)
Either: 21 credits in Ancient Greek Language (Group A) and 12 - 21 credits in Latin Language (Group B)
Or: 21 credits in Latin Language (Group B) and 12 - 21 credits in Ancient Greek Language (Group A)
12 - 21 credits in Classical Civilization, Modern Greek, Ancient History (Group C)
0 - 9 credits in Related Courses in Other Departments (Group D)
Maximum of 18 credits at the 200-level
Minimum of 3 credits at the 400-level
One of the following 6-credit courses:
CLAS 515D1/D2 (6) Latin Authors and Texts
CLAS 525D1/D2 (6) Ancient Greek Authors & Texts

According to Faculty regulations, Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

JOINT HONOURS – CLASSICS COMPONENT (36 credits)

Complementary Courses (36 credits)
18 credits in either Ancient Greek Language (Group A) or Latin Language (Group B)
12 credits chosen from the four groups (A, B, C, or D)
Maximum of 18 credits in any one group (A, B, C, or D)
Maximum of 18 credits at the 200-level
One of the following 6-credit courses:
CLAS 515D1/D2 (6) Latin Authors and Texts
CLAS 525D1/D2 (6) Ancient Greek Authors & Texts
Minimum of 3 credits at the 400-level

According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

Students who wish to study at the Honours level in two disciplines can combine Joint Honours Program components from any two Arts disciplines; see section 5.11.4 “Joint Honours Programs” for a list of available programs.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable). For Classics, see the Undergraduate Adviser, L821, (514) 398-6206.

Notes:
1. Students who intend to pursue graduate studies in Classics are advised to follow an Honours or Joint Honours program.
2. Honours students must maintain a CGPA of 3.00 or higher.
3. Courses considered to be related to Classics are those given by the Departments of Art History, English, French, Philosophy, and Political Science.

Complementary Course Lists:

Group A: Ancient Greek Language
CLAS 220 (6) Introductory Ancient Greek
CLAS 321 (3) Intermediate Greek: Plato/Xenophon
CLAS 322 (3) Intermediate Greek: Orators

Faculty of Arts

2007-2008 Undergraduate Programs, McGill University
5.12.11 Minor in Cognitive Science

Students with an interest in cognition may want to consider the Minor in "Cognitive Science" in section 12.13.8, under Science.

5.12.12 Computer Science (COMP)

McConnell Engineering Building, Room 318
Telephone: (514) 398-7071
Fax: (514) 398-3883
E-mail: liette.chin@mcgill.ca
Website: www.cs.mcgill.ca

Students must have completed MATH 133, MATH 140, MATH 141 or equivalents in order to begin taking courses in this program.

For a list of teaching staff, an outline of the nature of computer science and the opportunities for study in this discipline, see the Science entry “Computer Science (COMP)” in section 12.13.9. The School also offers programs in the Faculties of Engineering, Management and Music.

MINOR CONCENTRATION IN COMPUTER SCIENCE
(Non-expandable) (18 credits)

This Minor Concentration may be taken in conjunction with any program in the Faculty of Arts with the approval of the adviser of the student's main program and the School of Computer Science. At the time of registration in the penultimate year, students must declare their intent to receive the Minor, and approval must be given by the School for the particular sequence of courses the student wishes to use for the Minor Concentration.

Required Courses (12 credits)
COMP 202 (3) Introduction to Computing 1
COMP 203 (3) Introduction to Computing 2
COMP 206 (3) Introduction to Software Systems
COMP 302 (3) Programming Languages and Paradigms

Complementary Courses (6 credits)
selected from:
COMP 251 (3) Data Structures and Algorithms
COMP 273 (3) Introduction to Computer Systems
COMP 310 (3) Operating Systems

Note: COMP 251 Data Structures and Algorithms is a prerequisite for many of these complementary courses.

MINOR CONCENTRATION IN COMPUTER SYSTEMS
(Combinable) (18 credits)

This Minor Concentration may be taken only by students registered in the Major Concentration in Foundations of Computing. Taken together, these constitute a program very close to the Major in Computer Science offered by the Faculty of Science. Students who are interested in a career as a computing professional should take this combination in order to match the traditional expectations of employers.

Students with two programs in the same department must have a third in a different discipline to be eligible to graduate. Please refer to the Faculty of Arts Degree Requirements, departmental programs.

Required Courses (9 credits)
COMP 206 (3) Introduction to Software Systems
COMP 273 (3) Introduction to Computer Systems
COMP 310 (3) Operating Systems

Complementary Courses (9 credits)
selected from:
COMP 303 (3) Software Development
COMP 304 (3) Object-Oriented Design
COMP 335 (3) Software Engineering Methods
COMP 409 (3) Concurrent Programming
COMP 417 (3) Introduction Robotics and Intelligent Systems
COMP 420 (3) Secondary Storage Algorithms and Data Structures
COMP 421 (3) Database Systems
COMP 423 (3) Data Compression
COMP 424 (3) Topics: Artificial Intelligence 1
COMP 435 (3) Basics of Computer Networks
COMP 462 (3) Computational Biology Methods
COMP 490 (3) Introduction to Probabilistic Analysis of Algorithms

COMP 505 (3) Advanced Computer Architecture
COMP 506 (3) Advanced Analysis of Algorithms
COMP 507 (3) Computational Geometry
COMP 512 (3) Distributed Systems
COMP 520 (4) Compiler Design
COMP 521 (4) Modern Computer Games
COMP 522 (4) Modelling and Simulation
5.12.13 East Asian Studies (EAST)

3434 McTavish Street

Chair — Grace Fong

Professors
Kenneth Dean, B.A. (Brown), M.A., Ph.D. (Stan.)
Grace S. Fong, B.A., M.A. (Oxf.), M.A. (Calif.), Ph.D. (Harv.)
Thomas LaMarre, B.A. (G'town), M.A., Ph.D. (Chic.), D.Sc. (d'Aix-Marseille II)
Robbin D.S. Yates, B.A., M.A. (Oxf.), M.A. (Calif.), Ph.D. (Harv.)

Associate Professors
Jennie Chang, B.A. (Taiwan), M.A. (Harv.)
Sumi Hasegawa, M.A. (Montr.)
Myung Hee Kim, B.A., M.A. (Montr.)

Miwako Uesaka, B.Sc. (Kyoto Univ), M.A. (McG.)
B. Wang, B.A. (Heilongjiang), M.A. (Calg.)

Associate Members
Laurel Bossen (Anthropology)
Lara Braitstein (Religious Studies)
Sandra Hyde (Anthropology)
Victor Hori (Religious Studies)
Margaret Kuo (History)
Margaret Lock (Anthropology and Social Studies of Medicine)
Lorenz Lüthi (History)
Mark Manger (Political Science)
Junko Shimoyama (Linguistics)
Yuzo Ota (History)
Sarah Turner (Geography)

Heirs to ancient cultures and traditions that are rich, complex, and too little known in the West, East Asian societies are among the most dynamic and rapidly developing in the world today and are having an increasing impact on the international scene, both economically and politically. The study of the languages and cultures of East Asia, whether at the Major or Minor Concentration or Honours level, offers the student an intellectually challenging and personally stimulating educational experience. As well as offering a different perspective on the human condition, it provides excellent preparation for a future career in the professions, international business management, education, law, journalism and communications, in addition to the necessary training for advanced study at the graduate level.

For the courses in the East Asian field that may be used as complementary, please refer to the Departmental listing and the list of courses offered by other departments and in other faculties.

MINOR CONCENTRATION IN EAST ASIAN LANGUAGE AND LITERATURE (Expandable) (18 credits)

Required Courses (18 credits)

EAST 111 (3) Introduction to East Asian Culture: China
EAST 112 (3) Introduction to East Asian Culture: Japan
EAST 113 (3) Introduction to East Asian Culture: Korea

Complementary Courses (18 credits)

3 credits, one of the following introductory culture courses:

EAST 211 (3) Introduction to East Asian Culture: China
EAST 212 (3) Introduction to East Asian Culture: Japan
EAST 213 (3) Introduction to East Asian Culture: Korea

9 credit Language Component:

Students may meet this requirement by passing with a grade of "C" the First level language (EAST 220D1/EAST 220D2, EAST 230D1/EAST 230D2, EAST 240D1/EAST 240D2); students with prior knowledge of an Asian language may substitute a Second level language (EAST 320D1/EAST 320D2, EAST 330D1/EAST 330D2, EAST 340D1/EAST 340D2); or with 6 credits of either Classical Chinese (EAST 533; EAST 534), or Classical Japanese (EAST 543; EAST 544); or with Third or Fourth level language (EAST 420D1/EAST 420D2, EAST 430D1/EAST 430D2; EAST 440D1/EAST 440D2, EAST 520D1/EAST 520D2, EAST 530D1/EAST 530D2; EAST 540D1/EAST 540D2); or with 6 credits of Chinese for Business (EAST 535; EAST 536) or China Today through Translation (EAST 537D1/EAST 537D2) and an additional 3-credit course in East Asian Area Studies. (Admission to language courses is subject to placement tests.)
6 credits at the 300-level or above in the Department of East Asian Studies course offerings:

**EAST 303 (3) Current Topics: Chinese Studies 1**
**EAST 304 (3) Current Topics: Chinese Studies 2**
**EAST 305 (3) Current Topics: Japanese Studies 1**
**EAST 306 (3) Current Topics: Japanese Studies 2**
**EAST 307 (3) Topics: Chinese Language and Literature 1**
**EAST 308 (3) Topics: Chinese Language and Literature 2**
**EAST 313 (3) Current Topics: Korean Studies 1**
**EAST 314 (3) Current Topics: Korean Studies 2**
**EAST 315 (3) Survey: Modern Korean Literature in Translation**
**EAST 317 (3) Gender and Sexuality in Chinese Literature**
**EAST 332 (3) Women Writers of China**
**EAST 333 (3) Critical Approaches to Chinese Literature**
**EAST 334 (3) Approaches to Chinese Cinema**
**EAST 335 (3) Taoist and Buddhist Apocalypses**
**EAST 336 (3) Modern & Contemporary Chinese Art**
**EAST 337 (3) Japanese Cinema**
**EAST 338 (3) Aesthetics and Politics of Vision Premodern Japan**
**EAST 339 (3) Mass Culture and Postwar Japan**
**EAST 340 (3) History of Sexuality in Japan**
**EAST 341 (3) The Chinese Family in History**
**EAST 342 (3) Chinese Drama and Popular Culture**
**EAST 343 (3) Brushwork in Chinese Painting**
**EAST 344 (3) Inventing Modern Japanese Novel**
**EAST 345 (3) Japan in Asia**
**EAST 346 (3) Image, Text, Performance**
**EAST 347 (3) Feminism and Japan**
**EAST 348 (3) Topics: Japanese Cinema**
**EAST 349 (3) Confucius and the Classics**
**EAST 350 (3) Tutorial: East Asian Languages and Literatures 1**
**EAST 351 (3) Special Topics: East Asian Studies 1**
**EAST 352 (3) Special Topics: East Asian Studies 2**
**EAST 353 (3) Advanced Topics in Japanese Studies 1**
**EAST 354 (3) Advanced Topics in Japanese Studies 2**
**EAST 355 (3) Advanced Topics in Chinese Studies 1**
**EAST 356 (3) Advanced Topics in Chinese Studies 2**
**EAST 357 (3) Seminar: Beyond Orientalism**
**EAST 358 (3) Classical Chinese Poetry Themes and Genres**
**EAST 359 (3) Technologies of Self in Early China**
**EAST 360 (3) The Yijing (Book of Changes)**
**EAST 361 (3) Advanced Topics: Chinese Literature**
**EAST 362 (3) Japanese Literary Theory and Practice**
**EAST 363 (3) Images, Imagegrams, Aesthetics**
**EAST 364 (3) Structures of Modernity: Japan**
**EAST 365 (3) Advanced Topics: Japanese Literature**
**EAST 366 (3) Japanese Culture and Society**

**MINOR CONCENTRATION IN EAST ASIAN CULTURAL STUDIES** (Expandable) (18 credits)

**Complementary Courses** (18 credits)

6 credits in Introduction to East Asian Culture courses:

**EAST 211 (3) Introduction: East Asian Culture: China**
**EAST 212 (3) Introduction: East Asian Culture: Japan**
**EAST 213 (3) Introduction: East Asian Culture: Korea**

12 credits chosen from the following East Asian Literature, Culture, and Society courses:

**EAST 214 (3) Japanese Animation and New Media**
**EAST 215 (3) Introduction to Chinese Art**
**EAST 303 (3) Current Topics: Chinese Studies 1**
**EAST 304 (3) Current Topics: Chinese Studies 2**
**EAST 307 (3) Topics: Chinese Language and Literature 1**
**EAST 308 (3) Topics: Chinese Language and Literature 2**
**EAST 313 (3) Current Topics: Korean Studies 1**
**EAST 314 (3) Current Topics: Korean Studies 2**
**EAST 315 (3) Survey: Modern Korean Literature in Translation**
**EAST 317 (3) Gender and Sexuality in Chinese Literature**
**EAST 318 (3) Women Writers of China**
**EAST 319 (3) Critical Approaches to Chinese Literature**
**EAST 320 (3) Approaches to Chinese Cinema**
**EAST 321 (3) Taoist and Buddhist Apocalypses**
**EAST 322 (3) Modern & Contemporary Chinese Art**
**EAST 323 (3) Japanese Cinema**
**EAST 324 (3) Aesthetics and Politics of Vision Premodern Japan**
**EAST 325 (3) Mass Culture and Postwar Japan**
**EAST 326 (3) History of Sexuality in Japan**
**EAST 327 (3) The Chinese Family in History**
**EAST 328 (3) Chinese Drama and Popular Culture**
**EAST 329 (3) Brushwork in Chinese Painting**
**EAST 330 (3) Inventing Modern Japanese Novel**
**EAST 331 (3) Japan in Asia**
**EAST 332 (3) Image, Text, Performance**
**EAST 333 (3) Feminism and Japan**
**EAST 334 (3) Topics: Japanese Cinema**
**EAST 335 (3) Confucius and the Classics**

MINOR CONCENTRATION IN ADVANCED EAST ASIAN STUDIES (Non-expandable) (18 credits)

Complementary Courses (18 credits)
18 credits in Second, Third or Fourth level language or a combination of advanced language and other courses in East Asian culture, literature, or area studies, at the 400-level or above chosen in consultation with the Minors adviser.

MAJOR CONCENTRATION IN EAST ASIAN STUDIES (36 credits)

Complementary Courses (36 credits)
6 credits, two of the following introductory East Asian courses:
EAST 211 (3) Introduction: East Asian Culture: China
EAST 212 (3) Introduction: East Asian Culture: Japan
EAST 213 (3) Introduction: East Asian Culture: Korea

6 - 9 credits to be chosen from the following East Asian language courses:
EAST 220D1 (4.5) First Level Korean
EAST 220D2 (4.5) First Level Korean
EAST 230D1 (4.5) First Level Chinese
EAST 230D2 (4.5) First Level Chinese
EAST 240D1 (4.5) First Level Japanese
EAST 240D2 (4.5) First Level Japanese
EAST 320D1 (4.5) Second Level Korean
EAST 320D2 (4.5) Second Level Korean
EAST 330D1 (4.5) Second Level Chinese
EAST 330D2 (4.5) Second Level Chinese
EAST 340D1 (4.5) Second Level Japanese
EAST 340D2 (4.5) Second Level Japanese
EAST 420D1 (3) Third Level Korean

EAST 564  (3) Structures of Modernity: Japan
EAST 569  (3) Advanced Topics: Japanese Literature
EAST 582  (3) Japanese Culture and Society

Students who wish to study at the Honours level in two disciplines can combine Joint Honours Program components from any two Arts disciplines; see section 5.11.4 “Joint Honours Programs” for a list of available programs.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project if applicable. According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

GENERAL
For more up-to-date, detailed information about the Department and its programs, please visit our Websites as follows: www.mcgill.ca/economics/undergraduates/majorminor for information on the Major and Minor programs and www.mcgill.ca/economics/undergraduates/honours for information on the Honours programs

U0 students interested in economics should take ECON 208 and ECON 209. These courses provide good preparation for the Honours and Major programs, although neither course is a prerequisite for either program.

The first year of microeconomics courses for the Honours Program (ECON 250D1/ECON 250D2) and for the Majors Program (ECON 230D1/ECON 230D2) should not be taken in the U0 year. Please see the following Website to access the document on credit for economics courses taken elsewhere: www.mcgill.ca/economics/undergraduates/courses.

For information on Economics Internships, please see this Website: www.mcgill.ca/arts-internships/departments/economics.

PROGRAMS IN ECONOMICS

MINOR CONCENTRATION IN ECONOMICS
The Minor Concentration in Economics is offered in four streams:
• Stream I – Expandable
• Stream II – Non-expandable
• Stream III – For Management students
• Stream IV – Combinable, for students already registered in a Major Concentration in Economics.

In general, 200-level courses have no prerequisites, ECON 208 and ECON 209 (substitutable by the combination of MGCR 293 and ECON 295 or the more advanced course ECON 230D1/ ECON 230D2 or ECON 250D1/ ECON 250D2) are prerequisites for 300-level courses, ECON 230D1/ECON 230D2 or
ECON 250D1/ ECON 250D2 are prerequisite for 400-level courses.

MINOR CONCENTRATION IN ECONOMICS – STREAM I
(Expandable) (18 credits)
For students whose primary interest is in a field other than Economics but who wish to keep the option of upgrading to a Major Concentration in future.

Required Course (6 credits)
ECON 230D1 (3) Microeconomic Theory
ECON 230D2 (3) Microeconomic Theory

Complementary Courses (12 credits)
12 credits in Economics (with numbers above 209). At least 6 of these credits must be in 300- or 400-level courses.

MINOR CONCENTRATION IN ECONOMICS – STREAM II
(Non-expandable) (18 credits)

Required Courses (6 credits)
ECON 208 (3) Microeconomic Analysis and Applications
ECON 209 (3) Macroeconomic Analysis and Applications

Complementary Courses (12 credits)
12 credits in Economics (with numbers above 209). At least 6 of these credits must be in 300- or 400-level courses.

MINOR CONCENTRATION IN ECONOMICS – STREAM III
For Management Students (18 credits)

Complementary Courses (18 credits)
18 credits in Economics (with numbers above 209). At least 6 of these credits must be in 300- or 400-level courses.
Note: ECON 295, ECON 227 and ECON 257D1/ECON 257D2 will not count as part of this Minor Concentration.

MINOR CONCENTRATION IN ECONOMICS – STREAM IV
(Combinable – for students already registered in a Major Concentration in Economics) (18 credits)
Prerequisites: None
Students who are registered in a Major Concentration in Economics and a Minor Concentration in another unit may complete a second Minor Concentration in Economics with the following structure.

Complementary Courses (18 credits)
18 credits of approved courses in Economics above 209 of which at least 6 credits are of 400- or 500-level and of which not more than 3 credits are at 200-level.
Students should also consult the section on the Minor Concentration at the beginning of the Faculty of Arts section for detailed rules on Minor Concentrations.

MANAGEMENT MINOR
A limited enrolment Management Minor is available to selected Economics Majors and Honours students. Applications are entertained only early in the calendar year, usually February. Students intending to complete a Minor in Management should consult the handbook available in the Economics Department (Leacock 443) for further details and restrictions.

MAJOR CONCENTRATION IN ECONOMICS (36 credits)
The Major Concentration in Economics is a planned sequence of courses designed to permit the student a degree of specialization in economics. It consists of 36 credits in courses approved by the Economics Department.
All students who wish to begin (or continue) a Major Concentration in Economics should see a Majors adviser in the Department of Economics in each of their university years. Further information may be obtained from the Department’s Website, or from any Major adviser; consult the Departmental office for a list of advisers.
Students who are registering for the first time with the Department should attend the orientation meeting (check the Website for details) before seeing an adviser.

A student choosing a Major Concentration in Economics must take 36 credits in Economics. The Economics courses will normally be taken at McGill and will be selected from the courses shown below. Economics Major Concentration students entering University at the U1 year in September should directly proceed to ECON 230D1/ECON 230D2 without taking ECON 208 and ECON 209.

Required Courses (18 credits)
ECON 227D1 (3) Economic Statistics
ECON 227D2 (3) Economic Statistics
ECON 230D1 (3) Microeconomic Theory
ECON 230D2 (3) Microeconomic Theory
ECON 330D1 (3) Macroeconomic Theory
ECON 330D2 (3) Macroeconomic Theory

Complementary Courses (18 credits)
18 credits in Economics selected from other 200- (with numbers above 209), 300-, 400- and 500-level courses. At least 6 of these credits must be in 400- or 500-level courses. No more than 6 credits may be at the 200 level.
Prerequisites: in general 200-level courses have no prerequisites;
300-level courses have ECON 230D1/ECON 230D2 (or the lower level courses ECON 208 and ECON 209, or the combination of MGCR 293 and ECON 295) as prerequisites; and 400-level courses have ECON 230D1/ECON 230D2 as a prerequisite.
Mathematics: it is recommended, but not required, that students acquire mastery of elementary calculus and matrix algebra in their undergraduate years. (See courses listed under the Honours section.)

HONOURS PROGRAM
The Economics Honours program is offered to both B.A. and B.Com. students. All Honours students should consult the handbook describing the Honours programs in Economics, available in the Economics Department Office, 443 Leacock Building. All Honours students must meet with a Department Honours adviser in each year of their Honours program.

HONOURS IN ECONOMICS (42 credits)
The Honours program in Economics (B.A. and B.Com.) consists of 30 specified credits of Honours courses and a further 12 credits of approved Economics courses. Honours students are also required to complete courses in basic calculus and linear algebra.

Required Courses (24 credits)
ECON 250D1 (3) Introduction to Economic Theory: Honours
ECON 250D2 (3) Introduction to Economic Theory: Honours
ECON 257D1 (3) Economic Statistics - Honours
ECON 257D2 (3) Economic Statistics - Honours
ECON 352D1 (3) Macroeconomics - Honours
ECON 352D2 (3) Macroeconomics - Honours
ECON 450D1 (3) Advanced Economic Theory - Honours
ECON 450D2 (3) Advanced Economic Theory - Honours

Complementary Courses (18 credits)
6 credits selected from:
ECON 460 (3) History of Thought 1 - Honours
ECON 461 (3) History of Thought 2 - Honours
or ECON 467D1 (3) Econometrics - Honours
and ECON 467D2 (3) Econometrics - Honours
12 credits of Economics courses at the 300-, 400- or 500-level, approved by an Honours adviser. Normally at least 9 of the 12 will be at the 400- or 500-level. (Note: Honours students are not permitted to register for general Economics courses where an Honours course in the same field is offered.) ECON 450D1/
ECON 450D2 is the capstone course for the Honours program.
Normally, ECON 250D1/ECON 250D2 is taken in the U1 year,
ECON 352D1/ECON 352D2 in U2, and ECON 450D1/
ECON 450D2 in U3. ECON 257D1/ECON 257D2 can be taken in U1 or U2; ECON 460, ECON 461, ECON 467D1/ECON 467D2 can be taken in U2 or U3. Students who have taken an equivalent
statistics course prior to entering the program may be waived from
with a grade of C or higher (normally by the end of U1):
All Honours students must complete the following three courses
These requirements can be met by having passed equivalent
courses at CEGEP or elsewhere. Honours students are encour-
aged, but not required, to take MATH 222 Calculus 3.

JOINT HONOURS – ECONOMICS COMPONENT (30 credits)
The Economics Joint Honours programs offered with the Desau-
tels Faculty of Management are B.Com. Joint Honours in Econom-
ics and Accounting; B.Com. Joint Honours in Economics and
Finance (these programs are available only to B.Com students);
and B.A. Joint Honours in Economics and Finance (available only
to B.A. students).

Students who wish to study at the Honours level in two Arts dis-
ciplines can combine Joint Honours Program components from
any two Arts disciplines; see section 5.11.4 “Joint Honours Pro-
grams” for a list of available programs.

Joint Honours students should consult an adviser in each
department to discuss their course selection and their interdisci-
plinary research project (if applicable).

Joint Honours students are required to complete the 30 speci-
cified credits of Honours courses listed in the Honours Program as
well as the mathematics courses. The additional requirements for
the two B.Com. Joint Honours programs are described in the
Desautels Faculty of Management section. The B.A. Joint Hon-
ours in Economics and Finance requires 30 credits in Manage-
ment. For a complete list of course requirements, please see the
Honours and Joint Honours Programs handbook available in the
Economics Department Office, 443 Leacock Building, and on the

According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum pro-
gram GPA of 3.00.

HONOURS STANDING
To remain in Honours in the U2 year, students are expected to
obtain at least a B in ECON 250D1/ECON 250D2. Students who nar-
rowly miss this grade may apply for “repetitive” status. They
must submit their request by July 15 to the Department of Econom-
ic. They will normally be required to write an examination in Micro-
economic Theory, given by the Department in August.

Only students who have met the mathematics requirements of
the Honours program may apply for transfer from Major Concent-
ration to Honours. Students who obtain an A in ECON
230D1/ECON 230D2 may enter the Honours program in their U2
year. Other students who have taken ECON 230D1/ECON 230D2
and obtained a grade of B+ or A may sit an examination in Micro-
economic Theory, comparable to the supplemental examination in
ECON 250D1/ECON 250D2 given by the Department in August.
They must submit a request to write this exam by July 15 to the
Department of Economics. If they pass this examination with a
grade of B, they may enter the Honours program in their U2 year,
and need not take ECON 250D1/ECON 250D2. Students transfer-
ring from Major Concentration to Honours must take a minimum of
24 credits from 30 credits honors-core and do an additional 12
credits in approved courses.

Normally, to be awarded an Honours Degree a student must
obtain a 3.00 program GPA in the 42 required and complementary
credits in Economics including a 3.00 average GPA in the 30 spec-
ified credits of Honours level courses and must also obtain a 3.00
CGPA. For a First Class Honours degree, the minimum
requirements are normally a 3.50 program GPA, a 3.50 GPA for
the 30 specified credits of Honours level courses, and a CGPA of
3.50.

Please see the following Website to access the document on
credit for economics courses taken elsewhere:

Website: www.mcgill.ca/arts-internships/departments/economics.

5.12.15 Education for Arts Students Minor
Concentration

Student Affairs Office —
Faculty of Education, 3700 McTavish Street
E-mail: sao.education@mcgill.ca
Website: www.mcgill.ca/edu-sao/minors

This Minor Concentration allows Arts students to develop and ex-
lore an interest in education. It will give students a solid footing in
the basics of pedagogy and may provide a starting point towards
a B.Ed. degree.

Completion of the Minor Concentration does not qualify a stu-
dent for certification to teach in the province of Quebec. Students
interested in a teaching career should consult the Faculty of Edu-
cation, “Faculty Programs” in section 7.2.

MINOR CONCENTRATION IN EDUCATION FOR ARTS
STUDENTS (18 credits)

Required Courses (12 credits)
EDEC 262 (3) Media, Technology and Education
EDEM 220 (3) Contemporary Issues in Education
EDPE 300 (3) Educational Psychology
EDP1 309 (5) Exceptional Students

Complementary Courses (6 credits)
3 credits, one of:
EDEC 260 (3) Philosophical Foundations
EDEC 261 (3) Philosophy of Catholic Education

3 credits, one of:
EDEC 233 (3) First Nations and Inuit Education
EDEC 248 (3) Multicultural Education

5.12.16 Educational Psychology Minor Concentration

Program Director — Professor Alenoush Saroyan
Department of Educational and Counselling Psychology
Faculty of Education
(514) 398-4248

Program Coordinator — Mr. Dean Thomson
Faculty of Education, 3700 McTavish Street, Room 614
(514) 398-4248
Fax: (514) 398-6968
Website: www.mcgill.ca/edu-ecp

Educational Psychology encompasses: (a) the theoretical and
applied study of learning, cognition, and instruction in a variety of
educational settings across ages and domains; (b) instructional
technology and computers as cognitive tools in learning;
(c) cognitive and social processes in learning; (d) evaluation and
enhancement of learning and teaching; (e) education of learners
with special needs or difficulties; (f) relationships of these or relat-
ed phenomena to issues in human development, especially for
children and adolescents; and (g) the impact of family and commu-
nity on children’s learning and development.

Completion of this Minor Concentration does not qualify a stu-
dent to enter the teaching profession. Students interested in a
teaching career should consult the Faculty of Education, “Faculty
Programs”, see section 7.2.

In respect of Faculty of Arts multi-track regulations, students
registering for the Major Concentration in Psychology and the
Minor Concentration in Educational Psychology must complete an
additional Minor Concentration in Arts in a unit other than
Psychology.
Students should consult section 5.3.5, “Program Requirements” for additional information on course restrictions, credit counting, etc.

For further information on the Department of Educational and Counselling Psychology, see section 7.4.

MINOR CONCENTRATION IN EDUCATIONAL PSYCHOLOGY
(18 credits - Non-expandable)

Required Course (3 credits)
EDPE 355 (3) Instructional Psychology
This required course has a prerequisite of an introductory course in psychology taken at either CEGEP or university level (e.g., PSYC 100 or EDPE 300). Students who do not have this prerequisite prior to entry into this Minor Concentration may take either PSYC 100 or EDPE 300 and count EDPE 300 as one of the complementary courses for this Minor Concentration.

Complementary Courses (15 credits)
3 credits (to be taken near the end of the sequence), one of:
EDPE 355* (3) Cognition and Education
or EDPE 555(3) Applied Cognitive Science
12 credits selected from
EDPE 309 (3) Exceptional Students
EDPE 526 (3) Talented and Gifted Students
EDPE 527 (3) Creativity and its Cultivation
EDPE 543 (3) Family, School and Community
EDPE 208** (3) Personality and Social Development
EDPE 304 (3) Measurement and Evaluation
EDPE 355 (3) Cognition and Education
EDPE 377 (3) Adolescence and Education
EDPE 510 (3) Learning and Technology
EDPE 515*** (3) Gender Identity Development
EDPE 535 (3) Instructional Design
EDPE 555 (3) Applied Cognitive Science
* Students with a background in psychology should normally select EDPE 355.

Note: EDPE 355 has a prerequisite, either PSYC 213 or permission of the instructor.
** Students may not receive credit for both EDPE 208 and PSYC 304. EDPE 208 is not open to students registered in a Major or Minor Concentration in Psychology.
*** EDPE 515 is also a complementary course in the B.A. Minor Concentration in Women’s Studies (Social Science Options).

The Department of English offers a wide variety of courses covering three linked and overlapping areas: literature written in English; drama, including both courses in dramatic literature and courses that introduce the student to the basic elements of theatrical performance; and cultural studies, including analysis of a variety of visual and verbal media. These three areas are integrally related, and all students in English Department programs are invited to do work in all three, while concentrating in one of them.

The Literature option provides a grounding in the basic texts and methods of the discipline as well as wide acquaintance with substantial areas of the field.

The Drama and Theatre option tries to place its subject in as broad a social and philosophical context as possible. The Drama and Theatre program is not designed to provide professional theatre training. The aim is rather to encourage students to explore the subject as a liberal arts discipline.

The Cultural Studies option concentrates on analysis of forms of cultural expression and symbolic interaction, and of the various media through which these may be disseminated and transformed. Such study concerns symbolic form, aesthetically based forms of analysis, and the various modes of criticism and theory relevant to media which contain both verbal and non-verbal elements. The aim is above all to hone students’ analytical and interpretive skills while introducing them to specific critical approaches to cultural studies. This is not a major in journalism or communications; and while many of our graduates go on to do creative work in a variety of media, instruction in film and video production is not part of the curriculum.

Department Handbook on the Web
For the most up-to-date information on Department requirements and detailed course descriptions, please see the English Department Handbook at www.arts.mcgill.ca/english.

MINOR CONCENTRATIONS
For the current lists of complementary courses in the categories referred to in the Minor Concentrations:

1. Major Authors/Major Figures
2. Pre-1800 courses/Courses with a historical dimension

see the Department’s Website or consult the Departmental office.
MINOR CONCENTRATION IN ENGLISH – LITERATURE
(16 credits) (Expandable to the Major Concentration in English - Literature)

Required Courses (6 credits)
ENGL 202 (3) Departmental Survey of English Literature 1
ENGL 203 (3) Departmental Survey of English Literature 2

Complementary Courses (12 credits)
3 credits from a list of courses on Major Authors
3 credits from a list of pre-1800 courses
6 additional credits from the option’s offerings

MINOR CONCENTRATION IN ENGLISH – DRAMA AND THEATRE (18 credits) (Expandable to the Major Concentration in English - Drama and Theatre)

Required Courses (6 credits)
ENGL 230 (3) Introduction to Theatre Studies
ENGL 269 (3) Introduction to Performance

Complementary Courses (12 credits)
3 credits from a list of courses on Major Figures in Drama/Theatre
3 credits from a list of courses in Drama and/or Theatre with an historical dimension
6 additional credits from the option’s offerings

MINOR CONCENTRATION IN ENGLISH – CULTURAL STUDIES (18 credits) (Expandable to the Major Concentration in English - Cultural Studies)

Required Courses (6 credits)
ENGL 275 (3) Introduction to Cultural Studies
ENGL 276 (3) Methods of Cultural Analysis

Complementary Courses (12 credits)
3 credits from a list of courses on Major Figures in Cultural Studies
3 credits from a list of courses in Cultural Studies with an historical dimension
6 additional credits from the option’s offerings

MAJOR CONCENTRATIONS

Major Concentration students are required to take a 36-credit program, the specific content of which differs in the three options available. Each student must choose one of these options.

• Faculty policy states that, after or while taking a 36-credit Major Concentration in the English Department and an 18-credit Minor Concentration in another department, students may take an additional 18-credit Minor Concentration in English.

For the current lists of complementary courses referred to in the Major Concentrations:
- Major Authors/Major Figures,
- Courses with Canadian content,
- Period courses/Courses with a historical dimension

see the Department’s Website or consult the Departmental Office.

MAJOR CONCENTRATION IN ENGLISH – LITERATURE
(36 credits)

Required Courses (9 credits)
ENGL 202* (3) Departmental Survey of English Literature 1
ENGL 203* (3) Departmental Survey of English Literature 2
ENGL 311* (3) Poetics
*to be taken in the first two terms of the program

Complementary Courses (27 credits)
3 credits from a list of Canadian Literature courses
3 credits from a list of courses in Cultural Studies with a Canadian component
3 credits in Theory or Criticism:
ENGL 317 (3) Theory of English Literature 1
or ENGL 318 (3) Theory of English Literature 2
or ENGL 319 (3) Theory of English Literature 3
or ENGL 322 (3) Theories of the Text
or ENGL 346 (3) Materiality and Sociology of Text
or ENGL 352 (3) Theories of Difference
6 credits from a list of courses in Cultural Studies with an historical dimension
12 additional credits from the option’s offerings

Students are normally permitted to count 6 credits from other departments toward their English program. In exceptional circumstances an advisor, approached by a student with strong academic grounds for including a third such course, may grant permission, to a maximum of 9 extra-departmental credits, and must so indicate in advance by signing the departmental program Audit Sheet.

MAJOR CONCENTRATION IN ENGLISH – CULTURAL STUDIES (36 credits)

Required Courses (12 credits)
ENGL 275* (3) Introduction to Cultural Studies
ENGL 276* (3) Methods of Cultural Analysis
ENGL 277* (3) Introduction to Film Studies
ENGL 359* (3) The Poetics of the Image
* to be taken in the first two terms of the program

Complementary Courses (24 credits)
3 credits from a list of courses on Major Figures in Cultural Studies
3 credits from a list of courses in Cultural Studies with a Canadian component
3 credits in Theory or Criticism:
ENGL 317 (3) Theory of English Literature 1
or ENGL 318 (3) Theory of English Literature 2
or ENGL 319 (3) Theory of English Literature 3
or ENGL 322 (3) Theories of the Text
or ENGL 346 (3) Materiality and Sociology of Text
or ENGL 352 (3) Theories of Difference
6 credits from a list of courses in Cultural Studies with an historical dimension
9 additional credits from the option’s offerings
Students are normally permitted to count 6 credits from other departments towards their English programs. In exceptional circumstances an advisor, approached by a student with strong academic grounds for including a third such course, may grant permission, to a maximum of 9 extra-departmental credits, and must so indicate in advance by signing the departmental program Audit Sheet.

HONOURS PROGRAMS IN ENGLISH (each 60 credits)

Entry to Honours is by application, normally after two terms in a Departmental program, including at least 18 credits of English.

Students intending to apply for Honours or already accepted should consult an Honours adviser regarding their course selections throughout their program. The Faculty of Arts requires that all students admitted to Honours programs complete a second-program Minor in addition to their Honours program.

Admission to the Honours program is limited to a small number of students with excellent records. The minimum CGPA for application to the Honours program is 3.50; students meeting the 3.50 minimum in English Department courses alone (although not in CGPA) may also apply and make a case for their acceptance. In neither instance is admission guaranteed. After admission into the Honours program, the student is required to maintain a CGPA at a level set by the Faculty for graduation with Honours and a program GPA at the level set by the Department. (See requirements for graduation with Honours listed below.)

The Honours program in English requires 60 credits. Students intending to apply for Honours should plan to complete as many of the specific requirements of their option as possible within the first two years. With the written approval of an adviser, up to nine credits may be taken outside the department. All Honours students must complete at least 6 of their complementary credits at the 500 level. Ideally, 500-level seminars chosen will be relevant to the area of the student’s independent study in the Honours Essay course (ENGL 491D1/ENGL 491D2), taken without exception in the final year of the program. The Honours Essay is first planned in consultation with a supervisor at the time of application to the Honours program; it is then guided and evaluated by that supervisor during the completion of ENG 491. Graduation with Honours requires 60 credits of English, a minimum mark of 6+ on the Honours Essay, a minimum CGPA of 3.00, and a minimum program GPA of 3.50. Graduation with First Class Honours requires a mark of A on the Honours Essay, a minimum CGPA of 3.50, and a minimum program GPA of 3.70.

HONOURS IN ENGLISH (LITERATURE) (60 credits)

Required Courses (18 credits)

ENGL 202* (3) Departmental Survey of English Literature 1
ENGL 203* (3) Departmental Survey of English Literature 2
ENGL 311* (3) Poetics
ENGL 360** (3) Literary Criticism
ENGL 491D1 (3) Honours Essay
ENGL 491D2 (3) Honours Essay
* to be taken in the first two terms in the program
** normally taken in the second year of the program

Complementary Courses (42 credits)

15 credits, 3 credits each, of Shakespeare, Canadian Literature, American Literature, Cultural Studies, Drama/Theatre.
3 credits from one of the following areas: Backgrounds of English Literature, Old English, Medieval, Renaissance
3 credits from one of the following areas: Restoration, 18th Century, Romantic, Victorian, 19th-Century American
3 credits from the list of performance-oriented courses
9 credits from a list of courses in Drama and/or Theatre with an historical dimension
3 credits from a list of courses in Cultural Studies with an historical dimension
9 credits from another department with the signed permission of the adviser.

HONOURS IN ENGLISH (DRAMA AND THEATRE) (60 credits)

Required Courses (15 credits)

ENGL 230* (3) Introduction to Theatre Studies
ENGL 269* (3) Introduction to Performance
ENGL 355* (3) The Poetics of Performance
ENGL 491D1 (3) Honours Essay
ENGL 491D2 (3) Honours Essay
* must have been taken by the end of the first two terms of the program

Complementary Courses (45 credits)

3 credits from a list of courses on Major Figures in Drama and/or Theatre
3 credits from a list of courses in Drama and/or Theatre with a Canadian component
6 credits from a list of courses in Drama and/or Theatre with an historical dimension
3 credits of theory:
ENGL 317 (3) Theory of English Studies 1
ENGL 318 (3) Theory of English Studies 2
ENGL 319 (3) Theory of English Studies 3
ENGL 322 (3) Theories of the Text
ENGL 346 (3) Materiality and Sociology of Text
ENGL 352 (3) Theories of Difference
3 credits from a list of courses with a theoretical component, from the option’s offerings at the 400 level or above
9 credits from a list of performance-oriented courses
6 credits chosen from Departmental offerings in English Literature and/or Cultural Studies
12 credits in English selected in consultation with an academic adviser

At least 6 complementary credits must be at the 500 level. A maximum of 9 credits may be from other departments with the signed permission of the adviser.

HONOURS IN ENGLISH (CULTURAL STUDIES) (60 credits)

Required Courses (18 credits)

ENGL 275* (3) Introduction to Cultural Studies
ENGL 276* (3) Methods of Cultural Analysis
ENGL 277* (3) Introduction to Film Studies
ENGL 355* (3) The Poetics of the Image
ENGL 491D1 (3) Honours Essay
ENGL 491D2 (3) Honours Essay
* must have been taken by the end of the first two terms of the program

Complementary Courses (42 credits)

3 credits from a list of courses on Major Figures in Cultural Studies
3 credits from a list of courses in Cultural Studies with a Canadian component
6 credits from a list of courses in Cultural Studies with an historical dimension
3 credits of theory:
ENGL 317 (3) Theory of English Studies 1
ENGL 318 (3) Theory of English Studies 2
ENGL 319 (3) Theory of English Studies 3
ENGL 322 (3) Theories of the Text
ENGL 346 (3) Materiality and Sociology of Text
ENGL 352 (3) Theories of Difference
3 credits from a list of courses in theory, from the option’s offerings at the 400 level or above
12 credits in English Literature and/or Drama and Theatre, of which 6 credits are at the 300 level or higher
12 credits in additional courses in Cultural Studies
At least 6 complementary credits must be at the 500 level.
A maximum of 9 credits may be from other departments with the signed permission of the adviser.

**JOINT HONOURS PROGRAM – ENGLISH COMPONENT**
(36 credits)
Students who wish to study at the Honours level in two Arts disciplines may apply to combine Joint Honours Program components from two Arts disciplines; see section 5.11.4 “Joint Honours Programs” for a list of available programs.

Applications to do a Joint Honours Program in English and another subject in the Faculty of Arts should be submitted once a minimum of 9 credits, and no more than 18 credits, have been completed in English. There are normally two possible application dates for Joint Honours in English: either by the end of January (by which time first-year courses are completed and the grades are available), or at the same time as the Honours application date, typically in mid-April. (Only students who will have completed more than 18 credits in English by the end of January may apply in the Fall.)

Applications will be considered by the Department’s Honours Committee on the basis of the student’s GPA in English courses, at a minimum of 3.50. The application form is available in the Department’s General Office (Arts 155), and the specific submission requirements are described by that form. The application will take some time to prepare, and allowance for such preparation (at least several weeks) must be made in order to meet the application deadline. Incomplete applications will not be considered.

Acceptance into Joint Honours English may be conditional on particular revisions to the Program Course Proposal to be submitted with the application form. This proposal goes on file in the General Office with the other submissions. Only course choices that are appropriate, given the nature of the Joint Honours program proposed, including the Honours Essay if applicable, will be approved. In order to graduate with Joint Honours, all subsequent course substitutions in the initially approved Joint Honours English program must be endorsed by the Joint Honours adviser when they are made (i.e., at the start of each term) and entered on the Program Course Proposal with the adviser’s initialled approval.

The maintenance of a 3.50 GPA in English courses is required for continuation in Joint Honours.

Each academic year there is a special adviser for Joint Honours students, and the receptionist in the General Office can provide his or her name and contact information. The Department’s Website provides additional information on the Joint Honours program and applications, and this Website should also be consulted prior to contacting the adviser.

**Joint Honours Program Descriptions**

**400 Level**
All Joint Honours students’ programs of study shall include 6 credits of study at the 400 level or above.

**Advanced Study**
In addition, Joint Honours students shall undertake at least 6 further credits of advanced study, in one of the following two forms, in order of preference:

- **a. ENGL 491D1/ENGL 491D2, an Honours Essay, or**
- **b. Two 500-level courses**

(In very rare cases, a third alternative may be approved at the discretion of the Joint Honours adviser, but only when it is formally recommended for the joint subject according to the description of that Joint Honours program in the University Calendar. For example, Joint Honours with Anthropology allows the option of combining 3 credits of essay work with 3 credits in the joint subject to create a joint essay.)

**JOINT HONOURS IN ENGLISH (LITERATURE)** (36 credits)

**Required Courses** (6 credits)
ENGL 311 (3) Poetics
ENGL 360 (3) Literary Criticism

**Complementary Courses** (30 credits)
9 credits of pre-1800 English literature
3 credits of theory:
- ENGL 317 (3) Theory of English Studies 1
- or ENGL 318 (3) Theory of English Studies 2
- or ENGL 319 (3) Theory of English Studies 3
- or ENGL 322 (3) Theories of the Text
- or ENGL 346 (3) Materiality and Sociology of Text
- or ENGL 352 (3) Theories of Difference
3 credits of English courses at the 500 level
6 credits of advanced study as specified above
9 credits chosen from among Department offerings

**JOINT HONOURS IN ENGLISH (DRAMA AND THEATRE)** (36 credits)

**Required Courses** (9 credits)
ENGL 230 (3) Introduction to Theatre Studies
ENGL 269 (3) Introduction to Performance
ENGL 355 (3) The Poetics of Performance

**Complementary Courses** (27 credits)
3 credits of theory:
- ENGL 317 (3) Theory of English Studies 1
- or ENGL 318 (3) Theory of English Studies 2
- or ENGL 319 (3) Theory of English Studies 3
- or ENGL 322 (3) Theories of the Text
- or ENGL 346 (3) Materiality and Sociology of Text
- or ENGL 352 (3) Theories of Difference
3 credits in dramatic literature
3 credits in history of the theatre
6 credits of advanced study as specified above
12 credits chosen from among Department offerings

**JOINT HONOURS IN ENGLISH (CULTURAL STUDIES)** (36 credits)

**Required Courses** (9 credits)
ENGL 275 (3) Introduction to Cultural Studies
ENGL 276 (3) Methods of Cultural Analysis
ENGL 359 (3) The Poetics of the Image

**Complementary Courses** (27 credits)
3 credits of theory:
- ENGL 317 (3) Theory of English Studies 1
- or ENGL 318 (3) Theory of English Studies 2
- or ENGL 319 (3) Theory of English Studies 3
- or ENGL 322 (3) Theories of the Text
- or ENGL 346 (3) Materiality and Sociology of Text
- or ENGL 352 (3) Theories of Difference
3 credits from a list of courses in Cultural Studies with an historical dimension.
3 credits from a list of courses on Major Figures in Cultural Studies.
6 credits of advanced study as specified above.
12 credits chosen from among Department offerings.

**Department of English Student Association (DESA)**
DESA is the representative body for the students of the English Department at McGill. Any student taking one or more courses in the Department is automatically a member. For more information, please read the description on the Department's Website.
5.12.18 English as a Second Language (ESLN)

English and French Language Centre
688 Sherbrooke Street West, 2nd Floor
Montreal, QC H3A 3R1
Telephone: (514) 398-4172
Fax: (514) 398-5449
Website: www.mcgill.ca/eflc

Director — Hélène Riel-Salvatore

Lecturers
Robert Myles; B.A., M.A.(Car.), Ph.D.(McG.)
Carolyn Samuel; B.A., Dip.Ed.(McG.), M.Ed.(OISE, Tor.)

Full-time, non-anglophone students whose secondary education (high school and CEGEP) has been in institutions where the primary language of instruction was not English, or who have attended English language secondary institutions (high school and CEGEP) for four years or less, are eligible to take up to 12 credits in English as a Second Language (ESL).

With certain exceptions courses require placement tests, followed by advising and an electronic permit given at the English and French Language Centre. (Exceptions: foreign graduate students registering in ESLN 590 who have met McGill University English language entry requirements, register directly on Minerva. French Language and Literature students registering in ESLN 590 who have met McGill University English language entry requirements, register directly on Minerva.)

Graduate students registering for ESLN 650, placement confirmation on first day of class, register directly on Minerva.)

Placement tests will be held from Tuesday, August 28 to Friday, August 31 at 10:00, 12:00 and 14:00 and on a drop-in basis from Tuesday September 4 until Friday, September 14 (or until spaces are filled). Placement tests are held in the Arts Multimedia Language Facility (AMLF) in the basement of the McLennan-Redpath Library, 3459 McTavish Street.

All students are required to attend class without fail during the first two weeks in order to retain their places.

5.12.19 English for Academic Purposes (EAPR)

English and French Language Centre
688 Sherbrooke Street West, 2nd Floor
Montreal, QC H3A 3R1
Telephone: (514) 398-4172
Fax: (514) 398-5449
Website: www.mcgill.ca/eflc

Director — Hélène Riel-Salvatore

Lecturers
Robert Myles; B.A., M.A.(Car.), Ph.D.(McG.)
Susan Laver; B.A.(S.Fraser), M.A.(East Anglia, Norwich, Eng.), Ph.D.(McG.)

The English for Academic Purposes (EAP) course, EAPR 250 Research Essay & Rhetoric, develops academic writing and critical thinking skills.

The course is for native speakers of English. Near-native English speakers may also take the course, but students with less than advanced English Second Language (ESL) skills are advised to take the academic writing courses listed under ESLN (English as a Second Language) in this Calendar.

Entrance Test: Short composition first day of class. Students with less than advanced ESL skills and students with serious writing problems will be advised on other courses they might take.

5.12.20 Environment

Arts students who are interested in studying the environment should refer to the McGill School of Environment section where they will find information concerning the "Minor Concentration in Environment" in section 14.5.1 and the "B.A. Faculty Program in Environment" in section 14.6.

5.12.21 French as a Second Language (FRSL)

English and French Language Centre
688 Sherbrooke Street West, 2nd Floor
Montreal, QC H3A 3R1
Telephone: (514) 398-4172
Fax: (514) 398-5449
Website: www.mcgill.ca/eflc

Director — Hélène Riel-Salvatore

Lecturers
Loretta Hyrat; B.A., M.A.(McG.)
Denyse Laniel; B.A.(Montr.), M.A.(McG.), Cert. Ed.(’Cdia)
Genèviève Leidélanger; L.ès L.(Nice), M.A.(Vl)
Natallia Liakina; B.A.(Minks Linguistic University), M.A.(W. Ont.)
Suzanne Pellerin; B.A., M.A.(Laval), D.E.A.(Metz)
Hélène Poulin-Mignault; B.A., M.A.(McG.)
Hélène Riel-Salvatore; B.A.(McG.), M.A.(Harv.)
Jean-Yves Richard; B.A., M.A.(Laval)
Marion Vergues; B.A., M.A., D.E.A.(Montpellier Université)

Courses in French as a Second Language are open to students in any program who need to develop their oral and written skills in the French language either for use in their future professional career or as preparation for more advanced studies in French linguistics, literature, civilization, translation or in Canadian studies.

ARTS Freshman students enrolled in the Option 3: En français may select up to a maximum of 18 credits from FRSL courses.

ADMISSION AND REGISTRATION

A Placement Test is required before admission to any FRSL course, including Beginners’ French. All students should bring a photocopy of their transcript from high school or CEGEP. Departmental permission will be given after the student’s level has been determined by a placement test. Where students’ levels in French make admission to this Department inappropriate, they will be directed to the Département de langue et littérature françaises.

No auditors are accepted.

Placement tests and registration take place at 688 Sherbrooke Street West, 2nd floor, on Monday, August 27th at 9:00, 10:00, 11:00, 14:00 and 15:00, Wednesday, August 29th at 10:00, 11:00, 14:00 and 15:00, Thursday, August 30th at 10:00, 11:00, 14:00 and 15:00 and Friday, August 31st, at 10:00 and 11:00. Only a limited number of students are tested at a time, beginning each hour. It is important to arrive on the hour.

Registration is limited and Departmental permission is absolutely required. As numbers are limited in all courses, students who meet the required standard for any given course are admitted on a first-come, first-served basis, until the day before classes start. As of the first day of class, if places open, the department will accept students who have not yet registered based upon the date their permit was issued with priority being given to the earliest date.

The Department reserves the right to transfer a student to another course if the level is inappropriate. Any absence from class during the Course Change period may lead to losing one’s place to another student.

5.12.22 French Language and Literature (FREN)

Pavillon Peterson
3460, rue McTavish
Montréal, QC H3A 1X9

Cours complémentaires (12 crédits)
3 crédits parmi:
- FREN 250 (3) Littérature française avant 1800
- FREN 251 (3) Littérature française depuis 1800
- FREN 252 (3) Littérature québécoise

3 crédits parmi:
- FREN 334 (3) Méthodes d'analyse des textes littéraires 1
- FREN 335 (3) Méthodes d'analyse des textes littéraires 2

6 crédits parmi les cours de littérature française, québécoise ou francophone offerts par le Département de langue et littérature françaises (de niveau 300 ou plus).

CONCENTRATION MAJORE LANGUE ET LITTÉRATURE FRANÇAISES – LETTRES (36 crédits)

Cours obligatoires (12 crédits)
- FREN 250 (3) Littérature française avant 1800
- FREN 251 (3) Littérature française depuis 1800
- FREN 252 (3) Littérature québécoise
- FREN 334 (3) Méthodes d'analyse des textes littéraires 1

Cours complémentaires (24 crédits)
3 crédits parmi:
- FREN 231 (3) Linguistique française
- FREN 245 (3) Grammaire avancée
- FREN 336 (3) La langue française

3 crédits parmi:
- FREN 395 (3) Travaux pratiques 1
- FREN 396 (3) Travaux pratiques 2
- FREN 397 (3) Travaux pratiques 3

18 crédits parmi les cours de littérature française, québécoise ou francophone offerts par le Département de langue et littérature françaises (de niveau 300 ou plus).

CONCENTRATION MAJORE LANGUE ET LITTÉRATURE FRANÇAISES – LETTRES ET TRADUCTION (36 crédits)

Cours obligatoires (15 crédits)
- FREN 231 (3) Linguistique française
- FREN 250 (3) Littérature française avant 1800
- FREN 251 (3) Littérature française depuis 1800
- FREN 252 (3) Littérature québécoise
- FREN 347 (3) Terminologie générale

Cours complémentaires (21 crédits)
12 crédits parmi:
- FREN 239 (3) Stylistique comparée
- FREN 244 (3) Traduction 1
- FREN 346 (3) Traduction 2
- FREN 349 (3) Traduction 3
- FREN 431 (3) Traduction 4
- FREN 441 (3) Thème anglais
- FREN 443 (3) Traduction littéraire
- FREN 494 (3) Séminaire: Traduction spécialisée

9 crédits parmi les cours de littérature française, québécoise ou francophone offerts par le Département de langue et littérature françaises (de niveau 300 ou plus).

CONCENTRATION MAJORE LANGUE ET LITTÉRATURE FRANÇAISES – LINGUISTIQUE DU FRANÇAIS (36 crédits)

Cours obligatoires (21 crédits)
- FREN 231 (3) Linguistique française
- FREN 239 (3) Stylistique comparée
- FREN 433 (3) Sémantique et lexicologie
- FREN 434 (3) Sociolinguistique du français

LING 201 (3) Introduction to Linguistics
LING 230 (3) Phonetics
LING 371 (3) Syntax 1

Cours complémentaires (15 crédits)
(dont au moins trois cours au préfixe LING) parmi les groupes suivants:
- un cours (3 crédits) parmi:
  - LING 200 (3) Introduction to the Study of Language
  - LING 320 (3) Sociolinguistics 1
  - LING 350 (3) Linguistic Aspects of Bilingualism
  - LING 355 (3) Language Acquisition 1

- un cours (3 crédits) parmi:
  - LING 331 (3) Phonology 1
  - LING 370 (3) Introduction to Semantics
  - LING 440 (3) Morphology

n'importe quel cours (3 crédits) parmi les autres cours de linguistique au niveau 400 ou 500

un ou deux cours (6 crédits) parmi:
- FREN 245 (3) Grammaire avancée
- FREN 336 (3) La langue française
- FREN 347 (3) Terminologie générale
- FRSL 431 (6) Français fonctionnel avancé
- FRSL 445 (3) Français fonctionnel, écrit 1
- FRSL 446 (3) Français fonctionnel, écrit 2

PROGRAMME DE SPÉCIALISATION (“HONOURS”) ET DE DOUBLE SPÉCIALISATION (“JOINT HONOURS”)
L'obtention d'un baccalauréat avec Spécialisation ou Double Spécialisation est obligatoire pour l'admission dans les programmes de 2e et 3e cycles (maîtrise et doctorat).

En Spécialisation, les étudiants doivent conserver au minimum une moyenne de 3.00 pour l'ensemble des cours du programme et maintenir un CGPA de 3.00.

Les étudiants qui souhaitent poursuivre leurs études en spécialisation dans deux domaines distincts peuvent s'inscrire dans deux départements de la Faculté des Arts (consulter l'Annuaire de la Faculté section 5.11.4, “Joint Honours Programs”). Ces étudiants devraient rencontrer un conseiller dans chacun des deux départements concernés, pour établir leur choix de cours et formuler leur projet de recherche interdisciplinaire, le cas échéant.

PROGRAMME DE SPÉCIALISATION, OPTION LETTRES (60 crédits)

Cours obligatoires (42 crédits)
- FREN 250 (3) Littérature française avant 1800
- FREN 251 (3) Littérature française depuis 1800
- FREN 252 (3) Littérature québécoise
- FREN 352 (3) Lectures 1
- FREN 353 (3) Lectures 2
- FREN 374 (3) Lectures 3
- FREN 395 (3) Travaux pratiques 1
- FREN 396 (3) Travaux pratiques 2
- FREN 397 (3) Travaux pratiques 3
- FREN 464D1 (3) Mémoire de spécialisation
- FREN 464D2 (3) Mémoire de spécialisation
- FREN 490 (3) Critique et théorie 1
- FREN 493 (3) Critique et théorie 2
- FREN 497 (3) Travaux pratiques 4

Cours complémentaires (18 crédits)
6 crédits parmi les cours suivants (U3):
- FREN 461 (3) Questions de littérature 1
- FREN 472 (3) Questions de littérature 2
- FREN 498 (3) Questions de littérature 3
- FREN 499 (3) Questions de littérature 4

12 crédits au Département, répartis comme suit (maximum de 6 crédits dans les cours de niveau 200; minimum de 6 crédits dans les cours de niveau 400): 3 crédits de littérature/civilisation française
Programme de Spécialisation, Option Lettres et Traduction (60 crédits)

Cours obligatoires (48 crédits)
- FREN 231 (3) Linguistique française
- FREN 244 (3) Traduction 1
- FREN 250 (3) Littérature française avant 1800
- FREN 251 (3) Littérature française depuis 1800
- FREN 252 (3) Littérature québécoise
- FREN 346 (3) Traduction 1
- FREN 347 (3) Terminologie générale
- FREN 349 (3) Traduction 3
- FREN 352 (3) Lectures 1
- FREN 353 (3) Lectures 2
- FREN 374 (3) Lectures 3
- FREN 431 (3) Traduction 4
- FREN 441 (3) Thème anglais
- FREN 490 (3) Critique et théorie 1
- FREN 493 (3) Critique et théorie 2
- FREN 494 (3) Séminaire: Traduction spécialisée

Cours complémentaires (12 crédits)
(Au moins 6 de ces crédits doivent être de niveau 400)
- 6 crédits de langue/traduction
- 6 crédits de littérature/civilisation française/québécoise

Les étudiants peuvent aussi suivre les cours Questions de littérature 1, 2, 3, 4 (FREN 461, FREN 472, FREN 498, FREN 499) et s'inscrire au FREN 464D1/D2 Mémoire de spécialisation.

En plus des cours du programme de Spécialisation, les étudiants doivent faire une Concentration mineure (18 crédits) dans un département autre que celui de leur programme de Spécialisation.

En Spécialisation, les étudiants doivent conserver au minimum une moyenne de 3.00 pour l’ensemble des cours du programme, et maintenir un CGPA de 3.00.

Double Spécialisation, Option Lettres et Traduction (36 crédits)

Cours obligatoires (30 crédits)
- FREN 231 (3) Linguistique française
- FREN 244 (3) Traduction 1
- FREN 250 (3) Littérature française avant 1800
- FREN 251 (3) Littérature française depuis 1800
- FREN 252 (3) Littérature québécoise
- FREN 346 (3) Traduction 2
- FREN 347 (3) Terminologie générale
- FREN 349 (3) Traduction 3
- FREN 431 (3) Traduction 4
- FREN 490 (3) Critique et théorie 1

Cours complémentaires (6 crédits)
Choisis parmi les cours complémentaires de langue/traduction offerts par le Département; 3 crédits doivent être de niveau 400.

En Spécialisation, les étudiants doivent conserver au minimum une moyenne de 3.00 pour l’ensemble des cours du programme, et maintenir un CGPA de 3.00.

5.12.23 Geography (GEOG)
Burnside Hall, Room 705
805 Sherbrooke Street West
Montreal, QC H3A 2K6
Telephone: (514) 398-4951 (or leave message (514) 398-4111)
Fax: (514) 398-7437
Website: www.geog.mcgill.ca

The Geography Department offers programs in both Arts and Science. Consult the Science entry “Geography (GEOG)” in section 12.13.14 for B.Sc. Geography programs, a list of teaching staff, an outline of the nature of Geography and the opportunities for study in this discipline.

Geography is a broad, holistic discipline - both a natural and a social science because it examines people and their environment and serves as a bridge between physical and cultural processes. Human Geography (a social science, thus B.A. programs) is concerned especially with the political, economic, social, and cultural processes and resource practices that create spatial patterns and that define particular places. Physical Geography (B.Sc. programs) integrates disciplines such as climatology, geomorphology, geology, biology, hydrology, ecology, soil science and even marine science. Whether considering greenhouse gas emissions, the spread of disease, or threats to biodiversity, in all cases, geographers are interested in where things happen, why, and with what consequences.

Our graduates go on to careers in environmental consulting, social agencies or non-governmental organizations. Skills in Geographic Information Science (GIS) are very marketable. Students are well prepared for graduate work in social sciences, urban planning and environmental studies at leading schools.

Prerequisites
There are no departmental prerequisites for entrance to the B.A. Major Concentrations or Honours programs in Geography. It is helpful for Arts students to include 6 credits of Mathematics in their CEGEP or pre-university programs. A student who has completed college or pre-university geography courses fully equivalent to those of first year university may, with the adviser's approval, substitute other courses as part of the Major Concentrations or Honours programs. B.A. students in U0 are invited to take GEOG 205 for science credit and GEOG 200 for social science credit.

Minor Concentration in Geography (18 credits)
[Expandable into the Major Concentration in Geography, but not into the Major Concentration in Geography (Urban Systems).]

The Minor Concentration in Geography is designed to provide students in the Faculty of Arts with an overview of basic elements of human geography at the introductory and advanced level.
MINOR CONCENTRATION IN GEOGRAPHIC INFORMATION SYSTEMS (18 credits)
[Expandable into the Major Concentration in Geography, but not into the Major Concentration in Geography (Urban Systems).]
This Minor is designed to provide students in the Faculty of Arts who have an interest in GIS with a basic, but comprehensive knowledge of concepts and methods relating to the analysis of geospatial data.

Required Courses (15 credits)
GEOG 201 (3) Introductory Geo-Information Science
GEOG 306 (3) Raster Geo-Information Science
GEOG 307 (3) Socioeconomic Applications of GIS
GEOG 308 (3) Principles of Remote Sensing
GEOG 506 (3) Advanced Geographic Information Science

Complementary Courses (3 credits)
One course to be chosen from:
ATOC 414 (3) Applications of Remote Sensing
COMP 420 (3) Secondary Storage Algorithms and Data Structures
COMP 557 (3) Fundamentals of Computer Graphics (Note prerequisites)
GEOG 553 (3) Remote Sensing and Interpretation
GEOG 551 (3) Environmental Decisions
URBP 505 (3) Geographic Information Systems

MINOR CONCENTRATION IN GEOGRAPHY (URBAN SYSTEMS) (18 credits) [Expandable into the Major Concentration in Geography (Urban Systems).]

Complementary Courses (18 credits)
Group A (9 or 12 credits)
GEOG 210 (3) Global Places and Peoples
GEOG 217 (3) The Canadian City
GEOG 303 (3) Health Geography
GEOG 311 (3) Canada - A Geo-Economic Perspective
GEOG 315 (3) Urban Transportation Geography
GEOG 331 (3) Urban Social Geography
GEOG 494 (3) Urban Field Studies

Group B (6 or 9 credits)
Architecture* (Faculty of Engineering)
ARCH 378 (3) Site Usage (U2)
ARCH 515 (3) Sustainable Design
ARCH 527 (3) Civic Design (U3)
ARCH 528 (3) History of Housing (U3)
ARCH 529 (3) Housing Theory (U3)
ARCH 550 (4) Urban Planning and Development (U3) (permission of Geography Adviser required)

*Although Architecture courses have prerequisites, they are waived for Urban Systems students, but the course may not be taken before the year indicated.

Civil Engineering
CIVE 433 (3) Urban Planning - limited enrolment, departmental permission required, call (514) 398-6345

Economics
ECON 348 (3) Urban Economics

Complementary Courses (3 credits)
3 credits of introductory physical geography, one of:
GEOG 308 (3) Principles of Remote Sensing
GEOG 307 (3) Socioeconomic Applications of GIS
GEOG 306 (3) Raster Geo-Information Science

3 credits of statistics*, one of:
BIOL 373 (3) Biometry
GEOG 202 (3) Statistics and Spatial Analysis
MATH 203 (3) Principles of Statistics 1
PSYC 204 (3) Introduction to Psychological Statistics
SOCI 350 (3) Statistics in Social Research

* Credit given for statistics courses is subject to certain restrictions; see Faculty Degree Requirements, section 5.3.6.1. "Course Overlap".

3 credits from field courses (field course availability is determined each year in February):
GEOG 290 (1) Local Geographical Excursion (In 2007, reserve Sept. 28 - 30)
GEOG 398 (3) Field Studies in Human Geography
GEOG 494 (3) Urban Field Studies
GEOG 495 (3) Field Studies - Physical Geography
GEOG 496 (3) Geographical Excursion (In 2008, reserve Feb. 22-March 2.)
GEOG 497 (3) Ecology of Coastal Waters
GEOG 499 (3) Subarctic Field Studies

3 credits of analysis and methodology:
GEOG 306 (3) Raster Geo-Information Science
GEOG 307 (3) Socioeconomic Applications of GIS
GEOG 308 (3) Principles of Remote Sensing
GEOG 351 (3) Quantitative Methods
GEOG 506 (3) Advanced Geographic Information Science

18 credits in Geography (excluding GEOG 200, GEOG 205), at least 3 of these 18 to be at the 400 level or above.

MAJOR CONCENTRATION IN GEOGRAPHY (URBAN SYSTEMS) (36 credits)
This interdisciplinary Concentration exposes students to the various approaches to urban studies in many disciplines. Students who wish to retain the option of entering a Geography honours program should include GEOG 201, GEOG 203, GEOG 216, and GEOG 272 as well as the 9 credits of Required Courses listed below.

Students should observe the levels indicated by course numbers: 200-level are first year; 300-level, second year; 400- or 500-level, third year.
For further information on the Urban Systems Concentration telephone (514) 398-4951 or leave a message at (514) 398-4111.
Complementary Courses (24 credits)

3 credits of statistics*, one of:

- BIOL 373 (3) Biometry
- GEOG 202 (3) Statistics and Spatial Analysis
- MATH 203 (3) Principles of Statistics 1
- PSYC 204 (3) Introduction to Psychological Statistics
- SOCI 350 (3) Statistics in Social Research

* Credit given for statistics courses is subject to certain restrictions; see Faculty Degree Requirements, section 5.3.6.1, "Course Overlap".

15 - 21 credits selected from the following courses:

Geography
- GEOG 210 (3) Global Places and Peoples
- GEOG 303 (3) Health Geography
- GEOG 311 (3) Canada - A Geo-Economic Perspective
- GEOG 315 (3) Urban Transportation Geography
- GEOG 380 (3) Adaptive Environmental Management
- GEOG 494 (3) Urban Field Studies

Architecture* (Faculty of Engineering)
- ARCH 378 (3) Site Usage (U2)
- ARCH 515 (3) Sustainable Design
- ARCH 527 (3) Civic Design (U3)
- ARCH 528 (3) History of Housing (U3)
- ARCH 529 (3) Housing Theory (U3)
- ARCH 550 (4) Urban Planning and Development (U3)

* Although Architecture courses have prerequisites, they are waived for Urban Systems Majors, but the course may not be taken before the year indicated. Limited enrolment, early registration recommended.

Civil Engineering
- CIVE 433 (3) Urban Planning (same course as ARCH 550) - limited enrolment, departmental permission required, call (514) 398-6345

Economics
- ECON 348 (3) Urban Economics

History
- HIST 353 (3) History of Montreal

Law
- PUB 104 (3) Land Use Planning Management (Desautels Faculty of Management)
- FINE 445 (3) Real Estate Finance (prereq.)
- FINE 446 (3) Real Estate Investment Analysis (prereq.)
- FINE 447 (3) Real Estate Valuation (prereq.)
- FINE 546 (3) Land Law (prereq.)

Political Science
- POLI 318 (3) Comparative Local Government
- URBP 201 (3) Planning the 21st Century City
- URBP 501 (2) Principles and Practice 1 (6-week intensive)
- URBP 506 (3) Environmental Policy and Planning

Balance (up to 6 credits) selected from the following courses:

Geography
- GEOG 290 (1) Local Geographical Excursion (In 2007, reserve Sept. 28 - 30)
- GEOG 306 (3) Raster Geo-Information Science
- GEOG 307 (3) Socioeconomic Applications of GIS
- GEOG 316 (3) Political Geography

For Urban Systems Majors, the total number of credits permitted outside Arts and Science is 30; see section 5.3.6.2 "Courses Outside the Faculties of Arts and of Science".

Required Courses

- GEOG 201 (3) Introductory Geo-Information Science
- GEOG 217 (3) The Canadian City
- GEOG 331 (3) Urban Social Geography
- GEOG 351 (3) Quantitative Methods

Courses outside Geography, at the 300-level or higher, are approved by the adviser.

Political Science
- POLI 337 (3) Canadian Public Administration
- POLI 411 (3) Immigration and Multiculturalism in Canada

Sociology
- SOCI 230 (3) Sociology of Ethnic Relations
- SOCI 333 (3) Social Stratification
- SOCI 388 (3) Crime

B.A. HONOURS IN GEOGRAPHY (60 credits)

The B.A. Honours program is more concentrated and focused than the Major Concentration. Students must maintain a minimum program GPA of 3.30 and complete a 6-credit Honours thesis. Honours students are encouraged to participate in 500-level seminars with graduate students.

Required Courses

12 credits of introductory courses, four of:
- GEOG 203 (3) Environmental Systems
- GEOG 210 (3) Global Places and Peoples
- GEOG 216 (3) Geography of the World Economy
- GEOG 217 (3) The Canadian City
- GEOG 272 (3) Earth's Changing Surface

3 credits of statistics*, one of:
- BIOL 373 (3) Biometry
- GEOG 202 (3) Statistics and Spatial Analysis
- MATH 203 (3) Principles of Statistics 1
- PSYC 204 (3) Introduction to Psychological Statistics

* Credit given for statistics courses is subject to certain restrictions; see Faculty Degree Requirements, section 5.3.6.1, "Course Overlap".

3 credits from field courses:
- GEOG 290 (1) Local Geographical Excursion (In 2007, reserve Sept. 28 - 30)
- GEOG 398 (3) Field Studies in Human Geography
- GEOG 494 (3) Urban Field Studies
- GEOG 495 (3) Field Studies - Physical Geography
- GEOG 496 (3) Geographical Excursion (In 2008, reserve Feb. 22-March 2.)
- GEOG 497 (3) Ecology of Coastal Waters
- GEOG 499 (3) Subarctic Field Studies

18 additional credits in Geography in consultation with the adviser.

9 credits at the 300 or 400-level or above outside Geography. Courses outside Geography, at the 300-level or higher, are selected from the humanities, social and physical sciences, or engineering and approved by the adviser as related to the focus within Geography.

In addition to the Faculty requirement that Honours students maintain a minimum CGPA of 3.00, students in a Geography Honours Program must maintain a program GPA of at least 3.30.

B.A. JOINT HONOURS – GEOGRAPHY COMPONENT (36 credits)

Required Courses

- GEOG 201 (3) Introductory Geo-Information Science
- GEOG 351 (3) Quantitative Methods
- GEOG 381 (3) Geographic Thought and Practice
- GEOG 491D1 (3) Honours Research
- GEOG 491D2 (3) Honours Research

Complementary Courses

12 credits of introductory courses, four of:
- GEOG 203 (3) Environmental Systems
- GEOG 210 (3) Global Places and Peoples
- GEOG 216 (3) Geography of the World Economy
- GEOG 217 (3) The Canadian City
- GEOG 272 (3) Earth's Changing Surface
- GEOG 351 (3) Quantitative Methods

18 additional credits in Geography in consultation with the adviser.

12 credits at the 300 or 400-level or above outside Geography. Courses outside Geography, at the 300-level or higher, are selected from the humanities, social and physical sciences, or engineering and approved by the adviser as related to the focus within Geography.

In addition to the Faculty requirement that Honours students maintain a minimum CGPA of 3.00, students in a Geography Honours Program must maintain a program GPA of at least 3.30.
GEOG 210 (3) Global Places and Peoples
GEOG 216 (3) Geography of the World Economy
GEOG 217 (3) The Canadian City
GEOG 272 (3) Earth's Changing Surface

3 credits of statistics*, one of:
BIOL 373 (3) Biometry
GEOG 202 (3) Statistics and Spatial Analysis
MATH 203 (3) Principles of Statistics 1
PSYC 204 (3) Introduction to Psychological Statistics
SOCI 350 (3) Statistics in Social Research

* Credit given for statistics courses is subject to certain restrictions; see Faculty Degree Requirements, section 5.3.6.1, “Course Overlap”.

6 to 9 credits from a coherent set of Geography courses approved by the student's adviser. A field course is desirable.

3 or 6 credits from:
GEOG 491D1*(3) Honours Research
GEOG 491D2 (1.5) Joint Honours Research

or, for those who submit the thesis in the other department,
GEOG 492D1 (1.5) Joint Honours Research

* Where both departments require an Honours Thesis, the student has the option of submitting the thesis to either department. If the thesis is submitted to the other department, then the student must register for GEOG 491D1/GEOG 491D2. In some cases, it is required that the thesis be jointly supervised by faculty of both departments.

Students who wish to study at the Honours level in two Arts disciplines can combine Joint Honours Program components from any two Arts disciplines; see section 5.11.4 “Joint Honours Programs” for a list of available programs.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

In addition to the Faculty requirement that Joint Honours students maintain a minimum GPA of at least 3.00, students in a Geography Joint Honours Program must maintain a program GPA of at least 3.30.

AFRICAN FIELD STUDY SEMESTER
The Department of Geography, Faculty of Science, coordinates the 15-credit interdisciplinary African Field Study Semester; see section 15.2.1 “African Field Study Semester”.

PANAMA FIELD STUDY SEMESTER
The program is a joint venture between McGill University and the Smithsonian Tropical Research Institute (STRI) in Panama. For more information; see section 15.2.3 “Panama Field Study Semester”.

GEOGRAPHY COURSES OF MOST INTEREST TO ARTS STUDENTS:
GEOG 199 FYS: Geo-Environments
GEOG 200 Geographical Perspectives: World Environmental Problems
GEOG 201 Introductory Geo-Information Science
GEOG 205 Global Change: Past, Present and Future
GEOG 210 Global Places and Peoples
GEOG 216 Geography of the World Economy
GEOG 217 The Canadian City
GEOG 290 Local Geographical Excursion
GEOG 300 Human Ecology in Geography
GEOG 301 Geography of Nunavut
GEOG 302 Environmental Management 1
GEOG 303 Health Geography
GEOG 306 Raster Geo-Information Science
GEOG 307 Socioeconomic Applications of GIS
GEOG 308 Principles of Remote Sensing
GEOG 309 Geography of Canada
GEOG 311 Canada - A Geo-Economic Perspective

GEOG 315 Urban Transportation Geography
GEOG 316 Political Geography
GEOG 331 Urban Social Geography
GEOG 351 Quantitative Methods
GEOG 370 Protected Areas
GEOG 381 Geographic Thought and Practice
GEOG 398 Field Studies in Human Geography
GEOG 404 Environmental Management 2
GEOG 407 Issues in Geography
GEOG 408 Geography of Development
GEOG 410 Geography of Underdevelopment: Current Problems
GEOG 416 Africa South of the Sahara
GEOG 424 Europe: Places and Peoples
GEOG 490 Geography: Independent Studies
GEOG 494 Urban Field Studies
GEOG 496 Geographical Excursion
GEOG 498 Humans in Tropical Environments
GEOG 500 Geography of Regional Identity
GEOG 501 Modelling Environmental Systems
GEOG 502 Geography of Northern Development
GEOG 504 Industrial Restructuring - Geographic Implications
GEOG 506 Advanced Geographic Information Science
GEOG 508 Resources, People, and Power
GEOG 510 Humid Tropical Environments
GEOG 513 Behavioural Geography
GEOG 551 Environmental Decisions

5.12.24 German Studies (GERM)
688 Sherbrooke Street West, Suite 425
Montreal, QC H3A 3R1
Telephone: (514) 398-3650
Fax: (514) 398-1748
E-mail: german.studies@mcgill.ca
Website: www.mcgill.ca/german

Chair — Karin Bauer
Emeritus Professor
Peter M. Daly; B.A.(Louvain), M.A., Ph.D. (Zur.)
Professor
Josef Schmidt; Ph.D. (Zur.)
Associate Professors
Karin Bauer; M.A., Ph.D.(Wash.)
Paul Peters; B.A.(Man.), Ph.D.(F.U. Berlin)
Assistant Professors
Andrew Piper; B.A.(Prin.), Ph.D.(Calif.,Berk.)
Michael Cowan; B.A., Ph.D.(Calif.,Berk.)

Lecturer
Hans Walter Frischkopf; B.A. (Louvain), M.A. (Bonn)

Note: Students may begin at the intermediate or advanced level in their first year if they have taken German courses in high school or in CEGEP or through McGill Summer Studies. The courses GERM 202 or GERM 307 may be offered through Summer Studies.

Non-program students
Advisers:
Fall 2007 - Professor Michael Cowan, (514) 398-3648;
Winter 2008 - Professor Josef Schmidt, (514) 398-5051

MINOR CONCENTRATION IN GERMAN LANGUAGE
(Expandable to the Major Concentration in German Language and Literature) (18 credits)
Hans Walter Frischkopf, (514) 398-5056

Complementary Courses (18 credits)
chosen from:
GERM 200 (6) German Language, Intensive Beginners
or GERM 202D1 (3) German Language, Beginners' and GERM 202D2 (3) German Language, Beginners' or GERM 300 (6) German Language Intensive Intermediate or GERM 307D1 (3) German Language - Intermediate and GERM 307D2 (3) German Language - Intermediate GERM 325 (6) German Language - Intensive Advanced GERM 336 (3) German Grammar Review GERM 341 (3) Essay Writing GERM 342 (3) Translation GERM 345 (3) Business German 1 GERM 346 (3) Business German 2

MINOR CONCENTRATION IN GERMAN LITERATURE
(Expandable to the Major Concentration in German Language and Literature) (18 credits)

Professor Paul Peters, (514) 398-5050

This is offered as a special program for students who already possess the necessary language skills before coming to McGill, or have acquired the competence by completing the intensive sequence (GERM 200 and GERM 300) as elective courses in their first year.

Required Course (6 credits)
GERM 325 (6) German Language - Intensive Advanced

Complementary Courses (12 credits)
12 credits of courses in German literature or culture, given in German, such as:
GERM 330 (3) Landeskunde
GERM 331 (3) Germany after Reunification
GERM 352 (3) German Literature - 19th Century 3
GERM 353 (3) 19th Century Literary Topics
GERM 360 (3) German Literature 1890 to 1918
GERM 361 (3) German Literature 1918 to 1945
GERM 362 (3) 20th Century Literature Topics
GERM 363 (3) German Postwar Literature
GERM 380 (3) 18th Century German Literature
GERM 400 (3) Interdisciplinary Seminar: Contemporary German Studies
GERM 412 (3) Heroes, Lovers and Crusaders
GERM 450 (3) Classical Period in German Literature

MINOR CONCENTRATION IN GERMAN LITERATURE AND CULTURE IN TRANSLATION (18 credits) (Non-expandable)

Professor Paul Peters, (514) 398-5050

Complementary Courses (18 credits)
18 credits chosen from courses in German literature or culture in translation, such as:
GERM 259 (3) Introduction to German Literature 1
GERM 260 (3) Introduction to German Literature 2
GERM 354 (3) Literary Approach to Song
GERM 355 (3) Nietzsche and Wagner
GERM 358 (3) Franz Kafka
GERM 359 (3) Bertolt Brecht
GERM 364 (3) German Culture: Gender and Society
GERM 365 (3) Language of Media from Manuscript to Hypertext
GERM 366 (3) Postwar German Literature/Film
GERM 367 (3) Topics in German Thought
GERM 371 (3) Cultural Change and Evolution of German
GERM 382 (3) Faust: Chapbook to Horror Film

MAJOR CONCENTRATION IN CONTEMPORARY GERMAN STUDIES (36 credits)
Adviser: Hans Walter Frischkopf, (514) 398-5056

The Major Concentration in Contemporary German Studies is open to students with a sound knowledge of German as acquired in GERM 325 or equivalent. Those students who do not have the required competence in German may take the Major Concentration in Contemporary German Studies only if they also take a Minor Concentration in German Language. Proficiency, equivalency and placement will be determined by the program adviser.

Required Courses (9 credits)
HIST 234 (3) German History to 1648
HIST 235 (3) German History since 1648
GERM 400 (3) Interdisciplinary Seminar: Contemporary German Studies

Complementary Courses (27 credits)

b) 12 credits in German Society chosen from three disciplines including History, or from two disciplines excluding History.

Please contact the department(s) in question for pre/corequisites and availability of the following courses:

Economics:
ECON 340 (3) Ex-Socialist Economies
ECON 345 (3) The International Economy since 1914
ECON 423D1 (3) International Trade and Finance
ECON 423D2 (3) International Trade and Finance

History:
HIST 355D1 (3) Germany 1806-1918
HIST 355D2 (3) Germany 1806-1918
HIST 435D1 (3) Germany in the 20th Century
HIST 435D2 (3) Germany in the 20th Century

Management:
BUS 391 (3) International Business Law
MGCR 382 (3) International Business
MGPO 383 (3) International Business Policy
MRKT 483 (3) International Marketing Management
ORGB 380 (3) Cross Cultural Management

Political Science:
POLI 212 (3) Government and Politics - Developed World
POLI 328 (3) Modern Politics in Western Europe
POLI 331 (3) Politics in East Central Europe
POLI 344 (3) Foreign Policy; Europe
POLI 357 (3) Politics: Contemporary Europe
POLI 358 (3) Comparative State-Society Relations
POLI 431 (3) Nations and States/Developed World
POLI 463 (3) Politics of Germany
POLI 466 (3) Public Policy Analysis

Sociology:
SOC 330 (3) Classical Sociological Theory
SOC 354 (3) Dynamics of Industrial Societies

Any of the courses listed above in b) not already chosen.
Other courses offered in Art History, Geography, Jewish Studies, Music, Philosophy, etc., can be substituted for some of the above courses with the permission of the program adviser. Please contact the department(s) in question for pre/corequisites and availability of the following courses:

**Jewish Studies:**
- JWST 371D1 (3) Jews and the Modern City
- JWST 371D2 (3) Jews and the Modern City
- JWST 383 (3) Holocaust Literature
- JWST 384 (3) Images of Jewish Identities

**Philosophy:**
- PHIL 367 (3) 19th Century Philosophy
- PHIL 474 (3) Phenomenology

**MAJOR CONCENTRATION IN GERMAN LANGUAGE AND LITERATURE (36 credits)**
Professor Paul Peters, (514) 398-5050

**Required Courses (18 credits)**
- GERM 200 (6) German Language, Intensive Beginners'
- and GERM 202D1 (3) German Language, Beginners'
- and GERM 202D2(3) German Language, Beginners'
- GERM 300 (6) German Language Intensive Intermediate
- or GERM 307D1 (3) German Language - Intermediate
- and GERM 307D2(3) German Language - Intermediate
- GERM 325 (6) German Language - Intensive Advanced

* Students with advanced standing in the language will substitute GERM 325 (6) German Language - Intensive Advanced or GERM 307D1 (3) German Language - Intermediate or GERM 307D2(3) German Language - Intermediate and GERM 200 (6) German Language, Intensive Beginners’

**Complementary Courses (18 credits)**
18 credits of courses in literature distributed across different periods chosen from the courses listed below:

- at least one 3-credit course in 20th Century:
  - GERM 354 (3) Literary Approach to Song
  - GERM 360 (3) German Literature 1890 to 1918
  - GERM 361 (3) German Literature 1918 to 1945
  - GERM 362 (3) 20th Century Literature Topics
  - GERM 363 (3) German Postwar Literature
  - GERM 364 (3) German Culture: Gender and Society
  - GERM 365 (3) Language of Media from Manuscript to Hypertext

- at least one 3-credit course in Classicism or Romanticism:
  - GERM 450 (3) Classical Period in German Literature
  - GERM 451 (3) German Romanticism
  - GERM 455 (3) Women of the Romantic Era

- at least one 3-credit course from any other period:
  - GERM 352 (3) German Literature - 19th Century 3
  - GERM 353 (3) 19th Century Literary Topics
  - GERM 380 (3) 18th Century German Literature
  - GERM 382 (3) Faust: Chapbook to Horror Film
  - GERM 412 (3) Heroes, Lovers and Crusaders
  - GERM 511 (3) Middle High German Literature
  - GERM 561 (3) German Literature: Baroque

9 credits selected from any of the literature courses above not already taken or from:
- GERM 331 (3) Germany after Reunification
- GERM 400 (3) Interdisciplinary Seminar: Contemporary German Studies

* Courses on German literature or culture given in English may be substituted for any courses in the above lists, to a maximum of 6 credits.

**Note:** All German literature courses given in German have as prerequisite a linguistic competence as acquired in GERM 325 or equivalent. Such equivalence will be established by the program adviser.

**Complementary Courses (36 credits)**
9 credits chosen from:
- GERM 330 (3) Landeskunde
- GERM 331 (3) Germany after Reunification
- GERM 360 (3) German Literature 1890 to 1918
- GERM 361 (3) German Literature 1918 to 1945
- GERM 362 (3) 20th Century Literature Topics
- GERM 363 (3) German Postwar Literature

15 credits chosen from:
- GERM 352 (3) German Literature - 19th Century 3
- GERM 353 (3) 19th Century Literary Topics
- GERM 380 (3) 18th Century German Literature
- GERM 412 (3) Heroes, Lovers and Crusaders
- GERM 450 (3) Classical Period in German Literature
- GERM 451 (3) German Romanticism
- GERM 455 (3) Women of the Romantic Era
- GERM 511 (3) Middle High German Literature
- GERM 561 (3) German Literature: Baroque

Note: All German literature courses given in German have as prerequisite a linguistic competence as acquired in GERM 325 or equivalent. Such equivalence will be established by the program adviser.

**Complementary Courses (36 credits)**
9 credits chosen from:
- GERM 330 (3) Landeskunde
- GERM 331 (3) Germany after Reunification
- GERM 360 (3) German Literature 1890 to 1918
- GERM 361 (3) German Literature 1918 to 1945
- GERM 362 (3) 20th Century Literature Topics
- GERM 363 (3) German Postwar Literature

12 credits chosen from:
- GERM 259 (3) Introduction to German Literature 1
- GERM 260 (3) Introduction to German Literature 2
- GERM 354 (3) Literary Approach to Song
- GERM 355 (3) Nietzsche and Wagner
- GERM 358 (3) Franz Kafka
- GERM 359 (3) Bertolt Brecht
- GERM 364 (3) German Culture: Gender and Society
- GERM 365 (3) Language of Media from Manuscript to Hypertext
- GERM 366 (3) Postwar German Literature/Film
- GERM 367 (3) Topics in German Thought
- GERM 371 (3) Cultural Change and Evolution of German
- GERM 382 (3) Faust: Chapbook to Horror Film
- GERM 400 (3) Interdisciplinary Seminar: Contemporary German Studies

**HONOURS IN GERMAN STUDIES (60 credits)**
Adviser: Professor Paul Peters, (514) 398-5050

The Honours Program in German Studies consists of 60 credits in German. Literature courses provide an introduction to the major periods from the Middle Ages to the present. Admission to the Honours Program in German Studies requires departmental approval. Students may begin Honours in German Studies in their first year. Honours students must maintain a GPA of 3.30 in their program courses, and, according to Faculty regulations, also must complete at least a Minor Concentration (18 credits) in another academic unit.

**Required Courses (42 credits)**
- GERM 200 (6) German Language, Intensive Beginners’
- GERM 300 (6) German Language Intensive Intermediate
- GERM 325 (6) German Language - Intensive Advanced
- GERM 330 (3) Germany after Reunification
- GERM 361 (3) German Literature 1890 to 1918
- GERM 362 (3) 20th Century Literature Topics
- GERM 363 (3) German Postwar Literature
- GERM 450 (3) Classical Period in German Literature
- GERM 451 (3) German Romanticism
- GERM 511 (3) Middle High German Literature
- GERM 575 (6) Honours Thesis

With permission of the adviser, students with advanced standing in German language will replace language courses for more advanced courses in language, culture or literature.

**Complementary Courses (18 credits)**
12 credits selected from:
GERM 330 (3) Landeskunde
GERM 331 (3) Germany after Reunification
GERM 353 (3) 19th Century Literary Topics
GERM 361 (3) German Literature 1918 to 1945
GERM 362 (3) 20th Century Literature Topics
GERM 365 (3) Language of Media from Manuscript to Hypertext
GERM 380 (3) 18th Century German Literature
GERM 400 (3) Interdisciplinary Seminar: Contemporary German Studies

Note: In the event that there are not enough courses offered in German, substitution with courses from the list below is allowed only with permission of the adviser.

6 credits selected from:
GERM 259 (3) Introduction to German Literature 1
GERM 260 (3) Introduction to German Literature 2
GERM 336 (3) German Grammar Review
GERM 354 (3) Literary Approach to Song
GERM 355 (3) Nietzsche and Wagner
GERM 358 (3) Franz Kafka
GERM 359 (3) Bertolt Brecht
GERM 364 (3) German Culture: Gender and Society
GERM 367 (3) Topics in German Thought
GERM 371 (3) Cultural Change and Evolution of German
GERM 382 (3) Faust: Chapbook to Horror Film
GERM 397 (3) Individual Reading Course
GERM 398 (3) Individual Reading Course
GERM 561 (3) German Literature: Baroque
/ or other suitable courses in the Department or in other related disciplines and departments with the approval of the adviser.

JOINT HONOURS – GERMAN STUDIES COMPONENT
(36 credits)
Adviser: Professor Paul Peters, (514) 398-5050
Admission to the Joint Honours Program in German Studies requires Departmental approval.

Required Courses (21 credits)
GERM 200 (6) German Language, Intensive Beginners'
GERM 300 (6) German Language Intensive Intermediate
GERM 325 (6) German Language - Intensive Advanced
GERM 570 (3) Joint Honours Thesis

With permission of the adviser, students with advanced standing in German language will replace language courses for more advanced courses in language, culture or literature.

Complementary Courses (15 credits)
Selected from 400- to 500-level German literature and culture courses, from at least three centuries, with the approval of the adviser.
Joint Honours students must maintain a GPA of 3.30 in their program courses, and, according to Faculty regulations, a minimum CGPA of 3.00 in general.
Students who wish to study at the Honours level in two Arts disciplines can combine Joint Honours Program components from any two Arts disciplines; see section 5.11.4 “Joint Honours Programs” for a list of available programs.
Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Prerequisites for Literature Courses – The prerequisite for all literature courses taught in German is GERM 325, or equivalent, or permission of the Department.

TOPOICAL LISTINGS
Language
a) General courses
GERM 200 German Language, Intensive Beginners'
GERM 202 German Language, Beginners'

The Department of Hispanic Studies offers courses on literature, intellectual history and the civilization of Spain and Hispanic America, as well as in the Spanish and Portuguese languages. The Department and its programs are committed to expanding the liberal arts background of students by helping to develop the skills
of communication and critical reasoning, and by providing insight into the culture of other regional, linguistic and national groups. McGill University has bilateral exchange agreements with the Universidad de Salamanca (Spain), the Universidad Nacional Autónoma de México, and the Universidad de las Américas, Puebla (Mexico), as well as with other leading universities in the Spanish and Portuguese-speaking world which allow student and faculty exchanges, and other collaborative ventures. Further information about these exchanges may be obtained from the Department. Application forms are available from the Student Exchange Officer in the Admissions, Recruitment and Registrar's Office, James Building Annex.

The Department collaborates closely with the Program in Latin-American and Caribbean Studies, and students are encouraged to consult that program listing.

UNDERGRADUATE PROGRAMS
Adviser: José Jouve-Martin, 688 Sherbrooke, Room 379, (514)398-6657/6683

The Department of Hispanic Studies offers the following undergraduate programs and concentrations, which permit students to pursue a variety of intellectual and pre-professional options:

Minor Concentration in Hispanic Languages (Expandable)

Minor Concentration in Hispanic Literature and Culture (Expandable)

Major Concentration in Hispanic Languages

Major Concentration in Hispanic Literature and Culture

Honours Program in Hispanic Studies

Joint Honours Program in Hispanic Studies

Students who envision graduate studies upon completion of the B.A. are strongly advised to pursue a program of Honours or Joint Honours. (Honours students must submit their thesis by March 15). Although the Major and Minor Concentrations form an important part of the multi-track B.A. in Arts, this general degree does not provide the specialized training called for by most graduate programs in the Humanities and Social Sciences.

Note: Advanced Placement (AP) credits and courses taken at other universities in Quebec will not be accredited towards the Minor.

MINOR CONCENTRATION IN HISPANIC LANGUAGES
(18 credits) (Expandable to the Major Concentration in Hispanic Languages)

Note: Advanced Placement (AP) credits and courses taken at other universities in Quebec will not be accredited towards the Minor.

Complementary Courses (18 credits)
selected from:

HISP 220D1 (3) Portuguese Language: Beginners
HISP 202D2 (3) Portuguese Language: Beginners
HISP 204D1 (3) Portuguese Language: Intermediate
HISP 204D2 (3) Portuguese Language: Intermediate
HISP 210D1 (3) Spanish Language: Beginners
HISP 210D2 (3) Spanish Language: Beginners
HISP 218 (6) Spanish Language Intensive - Elementary
HISP 219 (6) Spanish Language Intensive - Intermediate
HISP 220D1 (3) Spanish Language: Intermediate
HISP 220D2 (3) Spanish Language: Intermediate
HISP 225 (3) Hispanic Civilization 1
HISP 226 (3) Hispanic Civilization 2

Students with advanced standing in the language will replace language courses with more advanced courses in language, culture or literature at the 200-level or above, selected from Departmental offerings.

MINOR CONCENTRATION IN HISPANIC LITERATURE AND CULTURE (18 credits) (Expandable to the Major Concentration in Hispanic Literature and Culture)

Note: Advanced Placement (AP) credits and courses taken at other universities in Quebec will not be accredited towards the Minor.

Required Courses (6 credits)
HISP 225 (3) Hispanic Civilization 1
HISP 226 (3) Hispanic Civilization 2

Complementary Courses (12 credits)
6 credits selected from:

HISP 241 (3) Survey of Spanish Literature 1
HISP 242 (3) Survey of Spanish Literature 2
HISP 243 (3) Survey of Spanish-American Literature 1
HISP 244 (3) Survey of Spanish-American Literature 2

6 credits in literature and/or culture at the 300-level or above, selected from the following:

HISP 321 (3) Spanish Literature - 18th Century
HISP 324 (3) 20th Century Drama
HISP 325 (3) Spanish Novel of the 19th Century
HISP 326 (3) Spanish Romanticism
HISP 327 (3) Literature of Ideas: Spain
HISP 328 (3) Literature of Ideas: Spanish America
HISP 332 (3) Spanish-American Literature of 19th Century
HISP 333 (3) Spanish-American Theatre
HISP 350 (3) The Generation of 1898
HISP 351 (3) Spanish-American Novel 1
HISP 352 (3) Spanish-American Novel 2
HISP 356 (3) Spanish-American Short Story
HISP 358 (3) Women Writers Fiction Spanish-America
HISP 423 (3) Modern Lyric Poetry
HISP 424 (3) Spanish Novel since Civil War
HISP 432 (3) Literature - Discovery and Exploration Spain
HISP 437 (3) Viceregal Spanish America
HISP 438 (3) Topics: Spanish Literature
HISP 439 (3) Topics: Spanish-American Literature
HISP 442 (3) Modernismo
HISP 451D1 (3) Cervantes
HISP 451D2 (3) Cervantes
HISP 453 (3) 20th Century Spanish-American Poetry
HISP 454 (3) Major Figures: Spanish Literature
HISP 455 (3) Major Figures: Spanish-American Literature
HISP 457 (3) Medieval Literature
HISP 458 (3) Golden Age Literature: Renaissance
HISP 460 (3) Golden Age Literature: Baroque
HISP 501 (3) History of the Spanish Language
HISP 506 (3) Seminar in Hispanic Studies
HISP 507 (3) Seminar in Hispanic Studies

The Minor Concentration in Spanish Literature and Culture and the Minor Concentration in Spanish-American Literature and Culture were retired at the end of the 2003-04 academic year. Students enrolled in either program at that time should consult with a Departmental adviser.

MAJOR CONCENTRATION IN HISPANIC LANGUAGES
(36 credits)

Complementary Courses (36 credits)
0 - 18 credits in language and civilization
6 credits in Survey of Literature
12 - 30 credits in Hispanic literature at the 300-level or above, at least 6 credits of which must be in literature of the pre-1700 period (courses marked with an asterisk *), selected from the Complementary course list given under the Major Concentration in Hispanic Literature and Culture.
MAJOR CONCENTRATION IN HISPANIC LITERATURE AND CULTURE (36 credits)

**Required Courses** (18 credits)
- HISP 241 (3) Survey of Spanish Literature 1
- HISP 242 (3) Survey of Spanish Literature 2
- HISP 243 (3) Survey of Spanish-American Literature 1
- HISP 244 (3) Survey of Spanish-American Literature 2
- HISP 451D1 (3) Cervantes
- HISP 451D2 (3) Cervantes

**Complementary Courses** (18 credits)
- HISP 250 (3) Reading Hispanic Literature
- at least 6 credits selected from:
  - HISP 244 (3) Survey of Spanish-American Literature 2
  - HISP 243 (3) Survey of Spanish-American Literature 1
  - HISP 241 (3) Survey of Spanish Literature 1

**Complementary Courses** (3 credits from):
- HISP 424 (3) Spanish Novel since Civil War
- HISP 432* (3) Literature - Discovery and Exploration Spain New World
- HISP 437 (3) Viceregal Spanish America
- HISP 432 (3) Literature - Discovery and Exploration Spain
- HISP 451D2 (3) Cervantes
- HISP 451D1 (3) Cervantes

**Joint Honours – Hispanic Studies Component** (36 credits)
Students who wish to study at the Honours level in two Arts disciplines can combine Joint Honours Program components from any two Arts disciplines. See section 5.11.4, “Joint Honours Programs” for a list of available programs.

Joint Honours students are expected to maintain a program GPA of 3.30 and an overall CGPA of 3.00.

**Required Courses** (12 credits)
- HISP 451D1 (3) Cervantes
- HISP 451D2 (3) Cervantes
- HISP 490D1 (3) Honours Thesis
- HISP 490D2 (3) Honours Thesis

**Complementary Courses** (24 credits)
- at least 6 credits selected from:
  - HISP 437 (3) Viceregal Spanish America
  - HISP 458 (3) Golden Age Literature: Renaissance
  - HISP 460 (3) Golden Age Literature: Baroque

All remaining credits may be selected from courses given in Spanish in the Department at or above the Intermediate Spanish language level (HISP 219 OR HISP 220D1/HISP 220D2).

**Honours in Hispanic Studies** (60 credits)
Prerequisite for admission into Honours: A first-year Spanish course with a final grade of B+. Honours students are expected to maintain a program GPA of 3.30 and an overall CGPA of 3.00. Students must take an 18-credit Minor Concentration in another area.

**Required Courses** (24 credits)
- HISP 241 (3) Survey of Spanish Literature 1
- HISP 242 (3) Survey of Spanish Literature 2
- HISP 243 (3) Survey of Spanish-American Literature 1
- HISP 244 (3) Survey of Spanish-American Literature 2
- HISP 451D1 (3) Cervantes
- HISP 451D2 (3) Cervantes
- HISP 490D1 (3) Honours Thesis
- HISP 490D2 (3) Honours Thesis

**Complementary Courses** (36 credits)
- at least 6 credits selected from:
  - HISP 432 (3) Literature - Discovery and Exploration Spain New World
  - HISP 437 (3) Viceregal Spanish America

PROGRAMS IN HISTORY

The Department offers three kinds of undergraduate programs: Honours, Major Concentration and Minor Concentration. Courses in History fall into one of the following FOUR areas: The Americas; Europe; Asia/Africa/Middle East; Global/thematic. In each program, a specified number of credits may be selected from any single area. Each student’s program is worked out with an adviser to suit the student’s specific needs within the general framework of the program.

Courses within each area are listed in the History Department’s Web site. Please refer to our website for a listing of courses being offered in 2007-08 in each area.

Candidates entering University as U0 or U1 students may, during their first year, take all courses at the 200-level as well as courses at the 300 level for which they have prerequisites. First-Year Seminars are also available in History, see section 5.5.2.1 “Registration for First-Year Seminars”.

MINOR CONCENTRATION IN HISTORY (18 credits)

(Expandable)

Director: TBD

Complementary Courses (18 credits)

A minimum of 15 credits to be taken in one of the following areas:

The Americas
Europe
Asia/Africa/Middle East
Global/thematic

12 credits minimum at the 300-level or higher

Students should see an adviser to plan a program that suits their needs

MAJOR CONCENTRATION IN HISTORY (36 credits)

Director: TBD

Complementary Courses (36 credits)

Within the 36 credits, a maximum of 24 credits from any one of the following areas:

The Americas
Europe
Asia/Africa/Middle East
Global/thematic

A maximum of 12 credits at the 200-level

3 credits in history of the pre-1800 period

3 credits in history of the post-1800 period

HONOURS IN HISTORY (60 credits)

Director: TBD

Required Course (3 credits)

HIST 399 (3) History and Historical Methods

Complementary Courses (57 credits)

A minimum of 12 credits of Honours seminars

A maximum of 15 credits at the 200-level or lower

A maximum of 42 credits in any one of the following areas:

The Americas
Europe
Asia/Africa/Middle East
Global/thematic

Students must maintain a 3.30 grade point average in their program courses and must have no less than a “B” in any program course. In addition, and in accordance with Faculty of Arts rules, students must maintain an overall CGPA of 3.00.

12 credits of Honours seminars;

Students must complete 12 credits worth of work in seminars designated by the Department of History as Honours Seminars. Each Honours seminar comprises a 6-credit course with a D1/D2 course number or two 3-credit courses to be taken consecutively. The second term component includes the completion of a major research paper based substantially on primary-source research. Both parts of a D1/D2 seminar must be completed to receive credit. The first course of a two-part seminar may be taken alone in exceptional circumstances, but in that case will be counted towards the complementary course component of the program only and will not be counted as an Honours seminar.
The Honours seminars are listed following the description of the Joint Honours - History Component. Please consult the internet version of the undergraduate calendar for updates and the departmental web page for the topics of honours seminars, which vary from year to year. Not all seminars are offered each year.

**JOINT HONOURS – HISTORY COMPONENT** (36 credits)

**Required Course** (3 credits)

HIST 399 (3) History and Historical Methods

**Complementary Courses** (33 credits)

A minimum of 6 credits of Honours seminars

A maximum of 12 credits at the 200-level or lower

A maximum of 27 credits in any one of the following areas:

- The Americas
- Europe
- Asia/Africa/Middle East
- Global THEMATIC

Students must maintain a 3.30 grade point average in their program courses and must have no less than a “B” in any program course. In addition, and in accordance with Faculty of Arts rules, students must maintain an overall CGPA of 3.00.

6 credits of Honours seminars:

Students must complete 6 credits worth of work in seminars designated by the Department of History as Honours seminars. Each Honours seminar comprises a 6-credit course with a D1/D2 course number or two 3-credit courses to be taken consecutively. The second term component includes the completion of a major research paper based substantially on primary-source research. Both parts of a D1/D2 seminar must be completed to receive credit. The first course of a two-part seminar may be taken alone in exceptional circumstances, but in that case will be counted towards the complementary course component of the program only and will not be counted as an honours seminar.

The Honours seminars are listed below. Please consult the internet version of the undergraduate calendar for updates and the departmental web page for the topics of honours seminars, which vary from year to year. Not all seminars are offered each year.

**5.12.29 Industrial Relations Faculty Program**

Peterson Hall, Room 220  
3460 McTavish Street  
Montreal, QC H3A 1X9  
Telephone: (514) 398-4301  
E-mail: faye.scrm@mcgill.ca  
Website: www.mcgill.ca/indr/

The Faculty of Arts Faculty Program in Industrial Relations provides students with a basic knowledge of industrial relations institutions and practices as well as the principal social and economic forces that underlie them. The program is composed of 54 credits of courses drawn from the Departments of Economics and Sociology within the Faculty of Arts and from labour-management relations within the Desautels Faculty of Management.

**Further Information**

Changes may be made in the program after this Calendar was prepared. For the most up-to-date information on the program, new and returning students should refer to the Website.

**Advisers**

For a list of advisers, new and returning students should refer to the Website.

**Continuance in the Program**

To remain in the program beyond the first year, students must take the six “U1 Required Courses” listed below during their first year and earn a 2.50 GPA in ECON 208, ECON 209, SOCI 235, SOCI 312 and INDR 294.

**Continuing Education Courses**

Courses in Continuing Education may not be used to fulfill IR program requirements. Similarly, courses in Continuing Education taken before entering the program may not be used to fulfill program requirements.

**Credits outside Arts and Science**

Students in the Faculty Program in Industrial Relations may take no more than 30 credits in courses outside of the Faculties of Arts and of Science. This total includes required and complementary courses taken for the IR Program and elective courses. Moreover, in the U1 year a student should take at most only one 3-credit elective course in the Desautels Faculty of Management in addition to the required courses, INDR 294 and MGCR 222.

Website: www.mcgill.ca/ids

**Program Adviser — Ines Scharnweber**

**Program Chair — TBA**

**Advisory Committee**

Oliver Coomes (Geography); Kathleen Fallon (Sociology); Franque Grimard (Economics); John Kurien (Economics); Sonia Laszlo (Economics); Matthew Lange (Sociology); Kristin Norget (Anthropology); Philip Oxhorn (Political Science) (Director, Centre for Developing Area Studies); Daviken Studnicki-Gizbert (History); Jon Unruh (Geography)

The International Development Studies (IDS) programs are designed for those students who wish to take advantage of the resources available at McGill to pursue an interdisciplinary program of study focusing on the problems of the developing countries.

Most courses above the 200 level have prerequisites. Although these may be waived by instructors in some cases, students are urged to confirm their eligibility for courses when they prepare their programs of study. Note that certain courses (especially those in Management) may not be available owing to space limitations. Students should check the Class Schedule for confirmation as to which term courses are offered.
MINOR CONCENTRATION IN INTERNATIONAL DEVELOPMENT STUDIES (18 credits) (Expandable)

Required Courses (9 credits)
- ECON 208 (3) Microeconomic Analysis and Applications
- ECON 313 (3) Economic Development 1
- INTD 200 (3) Introduction to International Development

Complementary Courses (9 credits)
3 credits selected from the IDS Complementary Course List Group A.
The remaining credits to be selected from the IDS Complementary Course List B.
At least 9 of the 18 credits must be at the 300 level or above.

MAJOR CONCENTRATION IN INTERNATIONAL DEVELOPMENT STUDIES (36 credits)

Required Courses (15 credits)
- ECON 208 (3) Microeconomic Analysis and Applications
- ECON 313 (3) Economic Development 1
- ECON 314 (3) Economic Development 2
- INTD 200 (3) Introduction to International Development
- INTD 497 (3) Research Seminar on International Development

Complementary Courses (21 credits)
A minimum of 6 credits selected from the IDS Complementary Course List Group A. Only one course from each discipline can be counted.
The remaining credits to be selected from the IDS Complementary Course List Group B; at least 12 credits must be taken from one of the three categories. Students must take courses from at least three disciplines.
At least 18 of the 36 credits must be at the 300 level or above.

HONOURS IN INTERNATIONAL DEVELOPMENT STUDIES (57 credits)
Honours students must maintain a program GPA of 3.30 and an overall CGPA of 3.00.

Required Courses (15 credits)
- ECON 208 (3) Microeconomic Analysis and Applications
- ECON 313 (3) Economic Development 1
- ECON 314 (3) Economic Development 2
- INTD 200 (3) Introduction to International Development
- INTD 497 (3) Research Seminar on International Development

Complementary Courses (42 credits)
No more than 21 credits can be taken in any one discipline.
Thesis or research project, 3 to 6 credits; one of:
- INTD 491 (3) Research Project
- INTD 492 (6) Honours Thesis

A minimum of 6 credits selected from the IDS Complementary Course List Group A. Only one course from each discipline can be counted.
21 to 33 credits to be selected from the IDS Complementary Course List Group B; at least 12 credits must be taken from one of the three categories. Students must take courses from at least three disciplines.
Group C – 0 to 9 credits of Introductory and/or Intermediate Language Training.
Students are strongly encouraged to master a language appropriate to an area of the developing world in which they have a particular interest.
Among the languages that are included in this option are Arabic, Chinese, French, Korean, Portuguese, Spanish, and Urdu. Other language options can be approved by the Honours Adviser.

At least 30 of the 57 credits must be at the 300 level or above; 9 credits of these must be at the 400 level or above.

JOINT HONOURS – INTERNATIONAL DEVELOPMENT STUDIES COMPONENT (36 credits)
Joint Honours students must maintain a program GPA of 3.30 and an overall CGPA of 3.00.
Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Required Courses (15 credits)
- ECON 208 (3) Microeconomic Analysis and Applications
- ECON 313 (3) Economic Development 1
- ECON 314 (3) Economic Development 2
- INTD 200 (3) Introduction to International Development
- INTD 497 (3) Research Seminar on International Development

Complementary Courses (21 credits)
No more than 15 credits can be taken in any one discipline.
Thesis or research project, 3 to 6 credits; one of:
- INTD 491 (3) Research Project
- INTD 492 (6) Honours Thesis

6 credits selected from the IDS Complementary Course List Group A. Only one course from each discipline can be counted.
9 to 12 credits to be selected from the IDS Complementary Course List Group B.
At least 24 of the 36 credits must be at the 300 level or above; 6 of these must be at the 400 level or above.

IDS Complementary Course Lists for Minor Concentration, Major Concentration, Honours, Joint Honours

GROUP A
- ANTH 202 (3) Comparative Cultures
- or ANTH 212 (3) Anthropology of Development
- GEOG 210 (3) Global Places and Peoples
- or GEOG 216 (3) Geography of the World Economy

Chair — Lucienne Kroha

Emeritus Professor
Pamela D. Stewart; B.A.(Montr.), M.A.(McG.), F.R.S.C.

Professor
Maria Predelli; Lic.CI., Dott.Lett.(Florence)

Associate Professor
Lucienne Kroha; B.A., M.A.(McG.), Ph.D.(Harv.)

Assistant Professor
Eugenio Bolongaro; B.A., LL.B.,(Br. Col.), Ph.D. (McG.)

Assistant Professor, Special Category
Francesco Borghesi; M.A., Ph.D.(Brown)

Lecturers
Enrica Quaroni; B.A., Ph.D.(McG.)
Jen Wienstein; B.A., M.A., Ph.D.(McG.)

Associate Members
Paula Clarke (History)
Anthony Masi (Sociology)
Filippo Sabetti (Political Science)

Adjunct Professors
Tobias F. Gittes (Liberal Arts College, Concordia)
Silvestra Mariniello (Histoire de l'art et d'études cinématographiques, Montr.)

Advisers:
Minor – Dr. Jen Wienstein, (514) 398-3955
 Majors, Honours and Joint Honours –
 Prof. Eugenio Bolongaro, (514) 398-4400 (ext 09454)

MINOR CONCENTRATION IN ITALIAN LANGUAGE AND LITERATURE (18 credits) (Expandable)
Students with advanced standing in the language must replace language courses with courses from groups B and C.

Complementary Courses (18 credits)
0 - 12 credits chosen from Group A – Basic Language Courses.
0 - 6 credits chosen from Group B – Courses taught in Italian.
0 - 6 credits chosen from Group C – Courses taught in English.

MINOR CONCENTRATION IN ITALIAN CIVILIZATION (18 credits) (Expandable)
Students with advanced standing in the language must replace language courses with courses from groups B, C and D.

Complementary Courses (18 credits)
0 - 12 credits chosen from Group A – Basic Language Courses.
0 - 12 credits chosen from Group B – Courses taught in Italian.
18 - 36 credits (at least 6 of which must be at the 350-level or above) chosen from courses at the 300-level or above as listed in Group B – Courses taught in Italian.

Note: ITAL 300 may not be taken by students who have taken 132-306, and vice-versa.
0 - 18 credits chosen from courses at the 300-level or above as listed in Group C – Courses taught in English.
0 - 6 credits chosen from Group D – Courses offered in other departments.

MAJOR CONCENTRATION IN ITALIAN CIVILIZATION (36 credits)
This program is designed to enable students with no previous knowledge of Italian to pursue a Major Concentration by allowing them to take some literature and culture courses in Italian while acquiring language competency in Italian. This program can be completed at the 300, 400, and 500-level.

Required Courses
ITAL 300 (6 credits)
ITAL 301, 302, 303 (6 credits)
ITAL 470 (3) Honours Thesis

Complementary Courses (48 credits)
48 credits, 9 of which must be at the 400 level or above.
0 - 12 credits from Group A – Basic Language Courses.
30 - 48 credits Group B – Courses taught in Italian.
0 - 9 credits from Group C – Courses taught in English and Group D – Courses taught in other departments.

Students must maintain a minimum CGPA of 3.00 and a GPA of 3.30 in the program courses.

Admission to the Honours program in Italian requires Department approval. Students wishing to register should consult with the Department as early as possible.

HONOURS IN ITALIAN STUDIES (54 credits)
Students with advanced standing in the language must replace language courses with courses from groups B, C, and D.

Required Courses (6 credits)
ITAL 341 (3) The Art of Essay Writing
ITAL 470 (3) Honours Thesis

Complementary Courses (48 credits)
48 credits, 9 of which must be at the 400 level or above.
0 - 12 credits from Group A – Basic Language Courses.
30 - 48 credits Group B – Courses taught in Italian.
0 - 9 credits combined from Group C – Courses taught in English and Group D – Courses offered in other departments.

Students must maintain a minimum CGPA of 3.00 and a GPA of 3.30 in the program courses.

Admission to the Honours program in Italian requires Department approval. Students wishing to register should consult with the Department as early as possible.
Students may begin Honours in Italian Studies in the first year, instead of the second, if in the opinion of the Department they are found to be qualified.

JOINT HONOURS – ITALIAN STUDIES COMPONENT
(36 credits)

Students who wish to study at the Honours level in two Arts disciplines can combine Joint Honours Program components from any two Arts disciplines; see section 5.11.4 “Joint Honours Programs” for a list of available programs.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Admission to Joint Honours requires departmental approval. Students wishing to register in the program should consult with the Department as early as possible.

Students may register for Joint Honours in the first year, instead of the second year, if in the opinion of the departments they are found to be qualified.

Students with advanced standing in the language must replace language courses with courses from groups B, C, and D.

Required Courses (6 credits)
ITAL 341 (3) The Art of Essay Writing
ITAL 470 (3) Honours Thesis

Complementary Courses (30 credits)
30 credits, 6 of which must be at the 400 level or above:

0 - 12 credits from Group A – Basic Language Courses.
12 - 30 credits from Group B – Courses taught in Italian.
0 - 18 credits combined from Group C – Courses taught in English and Group D – Courses offered in other departments.

Students must maintain a minimum CGPA of 3.00 and a GPA of 3.30 in the program courses.

ITALIAN STUDIES COURSE GROUPS

Group A – Basic Language Courses:
ITAL 205D1 (3) Italian for Beginners’
ITAL 205D2 (3) Italian for Beginners’
ITAL 206 (6) Beginners’ Italian Intensive
ITAL 210D1 (3) Elementary Italian
ITAL 210D2 (3) Elementary Italian
ITAL 215D1 (3) Intermediate Italian
ITAL 215D2 (3) Intermediate Italian
ITAL 216 (6) Intermediate Italian Intensive

Group B – Courses taught in Italian:
ITAL 300* (3) Italian Literary Composition
ITAL 306* (6) Advanced Reading and Composition
* only one of ITAL 300 or ITAL 306 can count towards all programs

Acting Chair — Eugene Orenstein

Professors
Gershon D. Hundert; B.A.(Col.), M.A.(Ohio St.), Ph.D.(Col.)
(Leonor Segal Professor of Jewish Studies)
B. Barry Levy; B.A., M.A., B.R.E.(Yeshiva), Ph.D.(NYU)
• elementary, intermediate and advanced courses in Jewish languages – Hebrew, Yiddish, and Aramaic. In the case of the first two, this includes attention to both spoken idiom and written texts;

• specialized courses in the various disciplines that comprise Jewish Studies for students who have specific academic interests;

• a Minor Concentration for students who wish to add competence in Jewish Studies to their major field of study;

• a comprehensive Major Concentration, and an Honours program culminating in advanced seminars and tutorials for students contemplating careers in the various fields of Judaica. The Honours Program in Jewish Studies will give students the necessary linguistic, textual and bibliographical knowledge to enable them to pursue graduate work in Jewish Studies.

MINOR CONCENTRATION IN JEWISH LAW (18 credits)
(Expandable)
Adviser: Professor Lawrence Kaplan, (514) 398-5008

This Minor Concentration in Jewish Law is designed to provide students with a special interest in Law, and particularly students from the Faculty of Law who are now permitted a Minor in the Faculty of Arts, a basic but comprehensive knowledge of the concepts and methods related to Jewish Law.

Complementary Courses (18 credits)
0-3 credits from:
JWST 216 (3) Jewish Studies 2: 400 BCE - 1000
HIST 207 (3) Jewish History: 400 BCE to 1000

15-18 credits from:
JWST 201 (3) Jewish Law
JWST 316 (3) Social and Ethical Issues Jewish Law 1
JWST 374 (3) Talmud and Law 1: Bava Kamma
JWST 375 (3) Talmud and Law 2: Bava Metzia
JWST 474 (3) Maimonides' Mishneh Torah
JWST 475 (3) The Responsum Literature
JWST 576 (3) Jewish Family Law

MINOR CONCENTRATION IN JEWISH STUDIES (18 credits)
(Expandable)
Advisers: Eugene Orenstein, (514) 398-6545
David Aberbach, (514) 398-5009

In order to permit students flexibility within their chosen area, all courses in the Jewish Studies Concentrations are placed into the category “Complementary Courses.”

Complementary Courses (18 credits)
18 credits in Jewish Studies:
9 credits are normally taken at the 300 level and up.
At least 9 credits will normally be taken at the 300 level and above in a single area. (See the list of courses, divided by areas of study, at the end of the Department section.) Consultation with the Adviser is strongly recommended.

Note: Major and Honours students are encouraged to acquire a general background in Jewish Studies, fluency in at least one Jewish language, and expertise in one aspect of the field. While many areas of specialization exist, the groupings which follow the course descriptions represent Departmental strengths and are usually chosen by students.

MAJOR CONCENTRATION IN JEWISH STUDIES (36 credits)
Advisers: Eugene Orenstein, (514) 398-6545

In order to permit students flexibility within their chosen area, all courses in the Jewish Studies Concentrations are placed into the category “Complementary Courses.”

Complementary Courses (36 credits)
36 credits in Jewish Studies, 24 of which are normally taken at the 300 level or above.

6 credits (minimum) in the history of Jewish Civilization to be chosen from:
JWST 211 (3) Jewish Studies 1: Biblical Period
JWST 216 (3) Jewish Studies 2: 400 BCE - 1000
JWST 217 (3) Jewish Studies 3: 1000 to 2000
HIST 207 (3) Jewish History: 400 B.C.E. to 1000
HIST 219 (3) Jewish History: 1000-2000

24 credits in Jewish Studies of which at least 12 are devoted to a single area of study. (See the list of courses, divided by areas of study, at the end of the Department section.) Students without the background necessary to complete the advanced language requirement may substitute up to 12 credits in language.

6 credits reflecting an advanced level of competence in either Hebrew or Yiddish chosen from the following: JWST 327, JWST 328, JWST 329, JWST 330, JWST 331, JWST 332, JWST 333, JWST 340D1/JWST 340D2, JWST 367, JWST 368, JWST 369, JWST 370 or any course at the 400 level (except JWST 404 and JWST 405).

Consultation with the Adviser is strongly recommended.

HONOURS IN JEWISH STUDIES (60 credits)
Honours Adviser: Lawrence Kaplan, (514) 398-5008

Required Courses (9 credits)
JWST 211 (3) Jewish Studies 1: Biblical Period
JWST 491 (3) Honours Thesis 1
JWST 492 (3) Honours Thesis 2

Complementary Courses (51 credits)
3 credits, one of:
JWST 216 (3) Jewish Studies 2: 400 BCE - 1000
HIST 207 (3) Jewish History: 400 B.C.E. - 1000

3 credits, one of:
JWST 217 (3) Jewish Studies 3: 1000 to 2000
HIST 219 (3) Jewish History: 1000-2000

0 - 18 credits: Language
Each Honours student will complete at least one Jewish language at the advanced level of instruction. A student who can demonstrate competence in a Jewish language may be permitted to substitute other courses for all or part of the language requirement.

JWST 220D1 (3) Introductory Hebrew
JWST 220D2 (3) Introductory Hebrew
JWST 320D1 (3) Intermediate Hebrew
JWST 320D2 (3) Intermediate Hebrew
JWST 340D1 (3) Advanced Hebrew
JWST 340D2 (3) Advanced Hebrew
JWST 280D1 (3) Introductory Yiddish
JWST 280D2 (3) Introductory Yiddish
JWST 380D1 (3) Intermediate Yiddish
JWST 380D2 (3) Intermediate Yiddish
JWST 480 (3) Advanced Yiddish 1
JWST 481 (3) Advanced Yiddish 2

27 - 45 credits, planned with an adviser and normally chosen to reflect progress to the advanced level in two of the areas of study: Biblical Studies, Rabbinc Studies, Literature, Jewish Thought, Jewish History, Modern Jewish Studies, and East European Studies.

According to Faculty regulations, Honours students must maintain a minimum CGPA of 3.00 and a Program GPA of 3.00 or higher.

**JOINT HONOURS – JEWISH STUDIES COMPONENT**  
(36 credits)

Students who wish to study at the Honours level in two Arts disciplines can combine Joint Honours program components from any two Arts disciplines; see section 5.11.4 "Joint Honours Programs" for a list of available programs.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

**Required Courses** (9 credits)

JWST 211 (3) Jewish Studies 1: Biblical Period
JWST 491 (3) Honours Thesis 1
JWST 492 (3) Honours Thesis 2

**Complementary Courses** (27 credits)

3 credits, one of:

JWST 216 (3) Jewish Studies 2: 400 BCE - 1000
HIST 207 (3) Jewish History: 400 B.C.E. - 1000

3 credits, one of:

JWST 217 (3) Jewish Studies 3: 1000 to 2000
HIST 219 (3) Jewish History: 1000-2000

0 - 6 credits: Language

Each Joint Honours student will complete at least one Jewish language at the advanced level of instruction. A student who can demonstrate competence in a Jewish language may be permitted to substitute other courses for all or part of the language requirement.

JWST 340D1 (3) Advanced Hebrew
JWST 340D2 (3) Advanced Hebrew
JWST 480 (3) Advanced Yiddish 1
JWST 481 (3) Advanced Yiddish 2

15 - 21 credits, planned with an adviser and normally chosen to reflect progress to the advanced level in one of the areas of study: Biblical Studies, Rabbinc Studies, Literature, Jewish Thought, Jewish History, Modern Jewish Studies, and East European Studies.

According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

**JEWISH TEACHER TRAINING PROGRAM**

Established in 1973 in the Faculty of Education in conjunction with the Department of Jewish Studies, this program prepares students to teach at the elementary and secondary school levels.

Students are encouraged to acquire a strong general background in Bible, Jewish liturgy, traditions and history prior to registering in the program. Students lacking the ability to teach in Hebrew should consider spending a term at an Israeli university.

Further information can be obtained by contacting the Director, Dr. Eric Caplan, at (514) 398-6544; by consulting the Faculty of Education “Concurrent Bachelor of Education in Music and Bachelor of Music (Music Education) Program” in section 7.5.1.2; and from the Web: www.mcgill.ca/edu-jttp.

**Interdepartmental Programming**

Many of the courses in Jewish Studies are related to other departments, e.g., History, Religious Studies. There are also related courses in other departments which students specializing in certain areas of Jewish Studies might be encouraged to include in their programs, e.g., Classical Greek, Arabic, theories of literature, etc.

The following History department courses may be used as Jewish Studies courses in the Department of Jewish Studies programs:

HIST 207 (3) Jewish History: 400 B.C.E. to 1000
HIST 219 (3) Jewish History: 1000-2000
HIST 307 (3) Jews in Poland
HIST 327 (3) Jews in the Orbit of Islam
HIST 427 (3) The Hasidic Movement
HIST 477D1 (3) Seminar In Jewish History
HIST 477D2 (3) Seminar In Jewish History

**AREAS OF STUDY**

It is possible to group the course offerings in Jewish Studies into a number of areas of study. The following is a representative but not exhaustive list.

**Biblical Studies**

JWST 211 Jewish Studies 1: Biblical Period
JWST 310 Believers, Heretics and Critics

5.12.34 Latin-American and Caribbean Studies (LACS)

Office of Interdisciplinary Programs
3715 Peel Street, Room 121
Montreal, Quebec H3A 1X1
Telephone: (514) 398-4804
Fax: (514) 398-8432
E-mail: info.lacs@mcgill.ca
Website: www.mcgill.ca/lacs

Program Adviser — Ines Scharnweber
Advisory Committee Chair — Professor C. LeGrand (History)
Advisory Committee — O. Coomes (Geography), A. Holmes (Hispanic Studies), J. Jouve-Martin (Hispanic Studies), T. Meredith (Geography), K. Nogret (Anthropology), P. Oxoorn (Political Science), K. Sibbald (Hispanic Studies), D. Studnicki-Gizbert (History)

Established in 1971, the interdisciplinary Program in Latin-American and Caribbean Studies offers a comprehensive array of courses on the peoples, cultures, history, literature, politics, economy and geography of Latin America and the Caribbean, providing students with a broad-based understanding of this geographic region, and with the language and research skills required for advanced scholarship. The program in Latin-American and Caribbean Studies encourages the free exchange of ideas and perspectives in order to foster an environment suitable for serious reflection and critical analysis.

Students in the Program in Latin-American and Caribbean Studies are encouraged to consider the opportunities for foreign study and research made available by bilateral exchange agreements with leading universities in the Spanish and Portuguese-speaking world. These exchanges are open to all members of the McGill University community. Further information may be obtained from the Student Exchange and Study Abroad Office, James Administration Building.

An agreement of cooperation with the Centre for Latin American Studies at Georgetown University (Washington, D.C.) permits honours students in Latin-American and Caribbean Studies at McGill to count a portion of their undergraduate coursework toward the degree requirements for Georgetown’s M.A. in Latin American Studies, thus permitting completion of the M.A. in one calendar year. See the Program Adviser for additional information.

Undergraduate Degree Programs
The program in Latin-American and Caribbean Studies offers an interdisciplinary Honours degree and an interdisciplinary Major Concentration as part of the Multi-track B.A. in Arts. Given the constraints of the Multi-track B.A. and our belief that an interdisciplinary program of area studies must include within it the language(s) used by the peoples and cultures under examination, there is at present no interdisciplinary Minor Concentration in Latin-American and Caribbean Studies.

MAJOR CONCENTRATION IN LATIN-AMERICAN STUDIES
(36 credits)

Required Courses (18 credits)
HISP 243* (3) Survey of Spanish-American Literature 1
HISP 244* (3) Survey of Spanish-American Literature 2
HIST 309 (3) History of Latin America to 1825
HIST 360 (3) Latin America since 1825
LACS 497 (3) Research Seminar: Latin America and the Caribbean
POLI 319 (3) Politics of Latin America

* Please note that successful completion of Intermediate Spanish Language (HISP 220D1/HISP 220D2, HISP 219 or the equivalent) is required for admission to HISP 243 and HISP 244.

Complementary Courses (18 credits)

18 credits selected from the Complementary Course List in consultation with the Program Adviser.

Courses from at least two disciplines or departments must be included; at least 6 of the 18 credits must be at the 300 level or above.

No more than 6 credits in Spanish or Portuguese language
(HISP 202D1/HISP 202D2, HISP 204D1/HISP 204D2, HISP 210D1/HISP 210D2, HISP 218, HISP 219, HISP 220D1/HISP 220D2, HISP 222) shall count for the Major Concentration.

HONOURS IN LATIN-AMERICAN AND CARIBBEAN STUDIES

HONOURS IN LATIN-AMERICAN AND CARIBBEAN STUDIES – AREA OPTION
(60 credits)

The Area Option, with its disciplinary clusters, is recommended for students who envision graduate study in a specific discipline, such as History or Political Science.

Required Courses (21 credits)
HISP 243 (3) Survey of Spanish-American Literature 1
HISP 244 (3) Survey of Spanish-American Literature 2
HIST 309 (3) History of Latin America to 1825
HIST 360 (3) Latin America since 1825
LACS 497 (3) Research Seminar: Latin America and the Caribbean

LACS 498 (3) Independent Research Project
POLI 319 (3) Politics of Latin America
Complementary Courses (39 credits)
12 credits in Spanish or Portuguese.
27 additional credits on Latin America and the Caribbean, exclusive of language courses, selected from the Complementary Course List in consultation with the Program Adviser.
At least 15 of these 27 credits must be taken in one of the following disciplinary clusters, which may also include up to 6 credits of theoretical and/or methodological courses of particular relevance to the student's research interests:
- Literature and Culture
- History, Economics and Political Science
- Anthropology, Geography and Sociology

HONOURS IN LATIN-AMERICAN AND CARIBBEAN STUDIES
– THEMATIC OPTION (60 credits)
This option permits highly motivated students to combine the study of Latin America and the Caribbean with a theme or intellectual focus whose roots extend beyond the geographic confines of this area, and for which a high level of methodological and/or theoretical expertise is required.
Themes of study may include, but are not limited to:
- ethnography and ethnohistory; the age of European expansion; transnationalism; the concepts and practice of law and justice; nationalisms and natiön-building; ecology and the management of human and natural resources.

Required Courses (21 credits)
HISP 243 (3) Survey of Spanish-American Literature 1
HISP 244 (3) Survey of Spanish-American Literature 2
HIST 309 (3) History of Latin America to 1825
HIST 360 (3) Latin America since 1825
LACS 497 (3) Research Seminar: Latin America and the Caribbean
LACS 498 (3) Independent Research Project
POLI 319 (3) Politics of Latin America

Complementary Courses (39 credits)
12 credits in Spanish or Portuguese.
12 credits on Latin America and the Caribbean, exclusive of language courses, selected from the Complementary Course List in consultation with the Program Adviser.
15 credits from outside the Complementary Course List, within a coherent theme of specialization, selected in consultation with the Program Adviser.

LACS Complementary Course List
Consult the Courses section for course descriptions and information on prerequisites. Not all courses listed are offered in any given year. Note: no credit will be given for multi-term courses unless all components are successfully completed as specified; for example, D1 and D2 components must both be successfully completed in consecutive terms.

Anthropology
ANTH 212 (3) Anthropology of Development
ANTH 326 (3) Peoples of Central and South America
ANTH 439 (3) Theories of Development

Economics

POLI 473 (3) Democracy and the Market

5.12.35 Linguistics (LING)

Chair — Glyne L. Piggott
Emeritus Professors
C. Douglas Ellis; B.A.(Cantab), B.A.(McG.), M.A.(Tor.), M.A.(Yale), Ph.D.(McG.)
Myrna Gopnik; M.A., Ph.D.(Penn.)
Michel Paradis; B.A.(Montr.), M.A., Ph.D.(McG.), Ph.D.(Montr.), F.R.S.C.

Professors
Yosef Grodzinsky; B.Sc.(Hebrew), Ph.D.(Brandeis) (Canada Research Chair)
Glyne L. Piggott; B.A.(W.I.), M.A., Ph.D.(Tor.)
Lydia White; M.A.(Cant.), Ph.D.(McG.) (James McGill Professor)
Linguistics is the scientific study of human language. Topics include: the structure of the world's languages at the level of sounds (phonetics and phonology), words (morphology), sentences (syntax), and meaning (semantics); how people learn languages (acquisition); how people use two languages (bilingualism); how language is processed and represented in the brain (psycho- and neurolinguistics); how languages change over time (historical linguistics); and how languages vary in relation to region and social identity (dialectology and sociolinguistics). In addition to preparing students for advanced academic work in linguistics and related disciplines (e.g., anthropology, cognitive neuroscience, computer science, philosophy, or psychology), courses in linguistics provide a useful background for many careers, for example, language teaching, translation, child psychology, speech-language pathology, communication, and speech technology.

The Linguistics Department offers a Minor Concentration, a Major Concentration, an Honours program, and a Joint Honours program with other departments in the Faculty of Arts.

**New Students**

Students who are registering with the Department for the first time must attend the Department orientation meeting before seeing an adviser.

**Requirements**

Linguistics students must do at least two-thirds of their linguistics courses at McGill. Honours students must also do their Honours thesis at McGill.

**MINOR CONCENTRATION IN LINGUISTICS** (Expandable) (18 credits)

Inquiries may be addressed to the departmental office or the advisers for undergraduate studies.

**Required Courses** (9 credits)

- LING 201 (3) Introduction to Linguistics
- LING 230 (3) Phonetics
- LING 371 (3) Syntax 1

**Complementary Courses** (9 credits)

9 credits in Linguistics; 3 credits must be selected from the following list, and 3 credits can be chosen according to the student's interests. (If a 400/500 level course is chosen from the following list, the remaining 6 credits can be chosen according to the student's interests.)

- LING 320 (3) Sociolinguistics 1
- LING 350 (3) Linguistic Aspects of Bilingualism
- LING 355 (3) Language Acquisition 1
- LING 390 (3) Neuroscience of Language
- LING 425 (3) Historical Linguistics
- LING 450 (3) Linguistic Theory and Processing
- LING 451 (3) Acquisition of Phonology
- LING 455 (3) Second Language Syntax
- LING 520 (3) Sociolinguistics 2
- LING 521 (3) Dialectology
- LING 555 (3) Language Acquisition 2
- LING 590 (3) Language Acquisition and Breakdown

Students who take LING 370 as one of the complementary courses may also count PHIL 210 as a complementary course, but must take a 400/500 level course from the above list.

**MAJOR CONCENTRATION IN LINGUISTICS** (36 credits)

**Required Courses** (21 credits)

- LING 201 (3) Introduction to Linguistics
- LING 230 (3) Phonetics
- LING 331 (3) Phonology 1
- LING 370 (3) Introduction to Semantics
- LING 371 (3) Syntax 1
- LING 440 (3) Morphology
- PHIL 210 (3) Introduction to Deductive Logic 1

**Complementary Courses** (15 credits)

- 9 credits in Linguistics at the 400/500-level
- 6 credits in Linguistics (normally at the 200/300-level)

**HONOURS IN LINGUISTICS** (60 credits)

**Required Courses** (27 credits)

- LING 201 (3) Introduction to Linguistics
- LING 230 (3) Phonetics
- LING 331 (3) Phonology 1
- LING 370 (3) Introduction to Semantics
- LING 371 (3) Syntax 1
- LING 440 (3) Morphology
- LING 480D1 (3) Honours Thesis
- LING 480D2 (3) Honours Thesis
- PHIL 210 (3) Introduction to Deductive Logic 1

**Complementary Courses** (33 credits)

21 credits in Linguistics:
- 15 credits at the 400/500 level, 3 of which must be selected from:
  - LING 425 (3) Historical Linguistics
  - LING 450 (3) Linguistic Theory and Processing
  - LING 451 (3) Acquisition of Phonology
  - LING 455 (3) Second Language Syntax
  - LING 520 (3) Sociolinguistics 2
  - LING 521 (3) Dialectology
  - LING 525 (3) Topics in Historical Linguistics
  - LING 555 (3) Language Acquisition 2
  - LING 590 (3) Language Acquisition and Breakdown
- 6 credits others, usually at the 200/300 level.

12 credits in related fields to be selected from the following list:

**Computer Science**
- COMP 202 (3) Introduction to Computing 1
- COMP 203 (3) Introduction to Computing 2

**French Language and Literature**
- FREN 231 (3) Linguistique du français
- FREN 336 (3) La langue française
- FREN 434 (3) Sociolinguistique du français

**Mathematics**
- MATH 240 (3) Discrete Structures 1
- MATH 328 (3) Computability and Mathematical Linguistics

**Philosophy**
- Any course in logic or philosophy of science.
- PHIL 304 (3) Chomsky
- PHIL 306 (3) Philosophy of Mind
- PHIL 415 (3) Philosophy of Language
- PHIL 515 (3) Seminar: Philosophy of Language

**Psychology**
- PSYC 311 (3) Human Cognition and the Brain
- PSYC 316 (3) Psychology of Deafness
- PSYC 340 (3) Psychology of Language
- PSYC 341 (3) The Psychology of Bilingualism
- PSYC 343 (3) Language Learning in Children
- PSYC 530 (3) Applied Topics in Deafness
- PSYC 532 (3) Cognitive Science
- PSYC 561 (3) Methods: Developmental Psycholinguistics
5.12.36 Mathematics and Statistics (MATH)

Burnside Hall, Room 1005
Telephone: (514) 398-3800
Website: www.math.mcgill.ca

The Department of Mathematics and Statistics offers programs in both Arts and Science. For a list of teaching staff and an outline of the nature of the discipline refer to the Science entry “Mathematics and Statistics (MATH)” in section 12.13.18. A Desautels Faculty of Management B.Com. degree with a Major in Mathematics and a Schulich School of Music B.Mus. degree with Honours in Theory with Mathematics option are also available.

Students entering a Mathematics program are normally expected to have completed MATH 133, MATH 140 and MATH 141, or their equivalents. Otherwise they will be required to make up any deficiencies in these courses over and above the program credits.

The programs specifically for Arts students are described in this section. The following programs, which are fully described in the Faculty of Science section, may be taken by students in either Arts or Science:

Honours in Mathematics
Honours in Applied Mathematics
Honours in Probability and Statistics
Joint Honours in Mathematics and Computer Science

Students entering one of the Minor or Major Concentrations listed below who have successfully completed a course equivalent to MATH 222 (Calculus 3) prior to coming to McGill are given exemption from taking MATH 222, but must replace it with a Complementary Mathematics course in the program of at least 3 credits.

MINOR CONCENTRATION IN MATHEMATICS (18 credits)
(Expandable and Non-expandable Versions)

Students entering the Minor Concentration in Mathematics are normally expected to have completed MATH 133, MATH 140 and MATH 141 or their equivalents. Otherwise they will be required to make up any deficiencies in these courses over and above the 18 credits required by the program.

The Minor Concentration in Mathematics may be taken in conjunction with a Major Concentration in some other discipline under option A of the Multi-track Program, or together with a Major Concentration and a Minor Concentration in other disciplines under option C.

The Minor Concentration in Mathematics is offered in two versions: an expandable version, for students who wish to leave open the option of expanding the program into a Major Concentration in Mathematics, and a non-expandable version for students who know on entry into the Minor that they do not wish to expand it into a Major.

All courses counted towards the Minor Concentration must be passed with a grade of C or better.

No overlap is permitted with other programs.

MINOR CONCENTRATION IN MATHEMATICS (Expandable) (18 credits)

Program prerequisites: MATH 133, MATH 140 and MATH 141 or their equivalents.

Required Courses (12 credits)
MATH 222 (3) Calculus 3
MATH 235 (3) Algebra 1
MATH 236* (3) Linear Algebra
MATH 315 (3) Ordinary Differential Equations

* credit cannot be received for both MATH 223 and MATH 236

Complementary courses (6 credits)
6 credits to be selected from the Complementary Course list below (MATH 323 strongly recommended).

MINOR CONCENTRATION IN MATHEMATICS (Non-Expandable) (18 credits)

Program prerequisites: MATH 133, MATH 140 and MATH 141 or their equivalents.

Required Courses (9 credits)
MATH 222 (3) Calculus 3
MATH 223* (3) Linear Algebra
MATH 315 (3) Ordinary Differential Equations

* credit cannot be received for both MATH 223 and MATH 236

Complementary courses (9 credits)
9 credits to be selected from the Complementary Course list below (MATH 323 strongly recommended).

Complementary Course List – Mathematics Minor Concentrations

MATH 314 (3) Advanced Calculus
MATH 316 (3) Complex Variables
or MATH 249 (3) Honours Complex Variables
MATH 317 (3) Numerical Analysis
MATH 318 (3) Mathematical Logic
MATH 319 (3) Partial Differential Equations
MATH 320 (3) Differential Geometry
MATH 323* (3) Probability
MATH 324 (3) Statistics
MATH 326 (3) Nonlinear Dynamics and Chaos
MATH 327 (3) Matrix Numerical Analysis
MATH 328 (3) Computability and Mathematical Linguistics
MATH 339 (3) Foundations of Mathematics
MATH 340 (3) Discrete Structures 2
MATH 346 (3) Number Theory
MATH 348 (3) Topics in Geometry
MATH 407 (3) Dynamic Programming
MATH 417 (3) Mathematical Programming

* It is strongly recommended that students in this program take MATH 323.

MINOR CONCENTRATION IN STATISTICS (Non-expandable)
(18 credits)

Students entering the Minor Concentration in Statistics are expected to have completed MATH 133, MATH 140 and MATH 141 or their equivalents.

The Minor Concentration in Statistics may be taken in conjunction with a Major Concentration in some other discipline under option A of the Multi-track Program, or together with a Major Concentration (which may be in Mathematics or some other discipline) and a Minor Concentration (which must be in some other discipline) under option C.

It is not possible to combine this program with the Minor Concentration in Mathematics under option C. Students wishing to do this should instead take the Major Concentration in Mathematics under option B and select a large number of Statistics complementaries.

The Minor Concentration in Statistics is offered only in a non-expandable version, that is, one that cannot be expanded into the Major Concentration in Mathematics. While it is not possible to expand the Minor Concentration, it is possible for students taking the Major Concentration in Mathematics to adopt this program as one of their Minor Concentrations under option C.

Credit cannot be received for both MATH 223 and MATH 236.

All courses counted towards the Minor Concentration must be passed with a grade of C or better.

No overlap is permitted with other programs.

Program prerequisites: MATH 133, MATH 140 and MATH 141 or their equivalents.

Required Courses (15 credits)
MATH 222 (3) Calculus 3
MATH 223* (3) Linear Algebra
MATH 323 (3) Probability
MATH 324 (3) Statistics
MATH 423 (3) Regression and Analysis of Variance

* credit cannot be received for both MATH 223 and MATH 236

Note: If this Minor Concentration is combined with the Major Concentration in Mathematics, the required courses MATH 222, MATH 223, and MATH 323 must be replaced by courses on the list of Complementary Statistics courses.

Complementary Course (3 credits)
one of the following:
COMP 202 (3) Introduction to Computing 1
MATH 204 (3) Principles of Statistics 2
MATH 317 (3) Numerical Analysis
MATH 447 (3) Stochastic Processes
MATH 523 (4) Generalized Linear Models
MATH 524 (4) Nonparametric Statistics
MATH 525 (4) Sampling Theory and Applications

MAJOR CONCENTRATION IN MATHEMATICS (36 credits)

Students entering the Major Concentration are normally expected to have completed MATH 133, MATH 140 and MATH 141 or their equivalents. Otherwise they will be required to make up any deficiencies in these courses over and above the 36 credits required by the program. Students who have done well in MATH 242 and MATH 235 at the end of their first term should consider, in consultation with their adviser and the instructors of the courses involved, the possibility of entering into an Honours program in Mathematics, in Applied Mathematics, in Probability and Statistics, or a Joint Honours program in Mathematics and another discipline.

Guidelines for the selection of courses in the Major Concentration

Where appropriate, Honours-level courses may be substituted for their Majors-level counterparts. Students planning to undertake graduate studies in mathematics are urged to make such substitutions.

Students interested in computer science should consider the courses MATH 317, MATH 318, MATH 327, MATH 328, MATH 340, MATH 407, MATH 417 and take a Minor Concentration in computer science.

Students interested in probability and statistics should consider either taking the Minor Concentration in statistics under option C, or else including some or all of the courses MATH 423, MATH 447, MATH 523, MATH 524, and MATH 525.

Students interested in applied mathematics should consider the courses MATH 317, MATH 319, MATH 324, MATH 326, MATH 327, MATH 407 and MATH 417.

Students interested in careers in business, industry or government should consider the courses MATH 317, MATH 319, MATH 327, MATH 407, MATH 417, MATH 423, MATH 447, MATH 523, and MATH 525.

Program prerequisites: MATH 133, MATH 140, and MATH 141 or their equivalents.

Required Courses (21 credits)
MATH 222 (3) Calculus 3
MATH 235 (3) Algebra 1
MATH 236 (3) Algebra 2
MATH 242 (3) Analysis 1
MATH 243 (3) Analysis 2
MATH 314 (3) Advanced Calculus
MATH 323 (3) Probability

Complementary Courses (15 credits)
at least 9 credits selected from:
MATH 315 (3) Ordinary Differential Equations
MATH 316 (3) Complex Variables
MATH 249 (3) Honours Complex Variables
MATH 317 (3) Numerical Analysis
MATH 324 (3) Statistics
MATH 340 (3) Discrete Structures 2
MATH 423 (3) Regression and Analysis of Variance

the remaining credits to be selected from the following list:
MATH 204 (3) Principles of Statistics 2
MATH 318 (3) Mathematical Logic
MATH 319 (3) Partial Differential Equations
MATH 320 (3) Differential Geometry
MATH 326 (3) Nonlinear Dynamics and Chaos
MATH 327 (3) Matrix Numerical Analysis
MATH 328 (3) Computability and Mathematical Linguistics
MATH 339 (3) Foundations of Mathematics
MATH 346 (3) Number Theory
MATH 348 (3) Topics in Geometry
MATH 352 (1) Problem Seminar
MATH 407 (3) Dynamic Programming
MATH 410 (3) Majors Project
MATH 417 (3) Mathematical Programming
MATH 447 (3) Stochastic Processes
MATH 523 (4) Generalized Linear Models
MATH 524 (4) Nonparametric Statistics
MATH 525 (4) Sampling Theory and Applications

Where appropriate, Honours courses may be substituted for their Majors equivalents.
JOINT HONOURS – MATHEMATICS COMPONENT (36 credits)
Students who wish to study at the Honours level in two Arts disciplines can combine Joint Honours program components from any two Arts disciplines; see section 5.11.4 “Joint Honours Programs” for a list of available programs.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

A student who has not completed the equivalent of MATH 222 will need to take that course in addition to the 36-credit program outlined below.

To remain in the Joint Honours program and receive the Joint Honours degree, a student must maintain the standards set by each discipline, as well as by the Faculty. In the Mathematics courses of the program a GPA of 3.00 and a CGPA of 3.00 must be maintained. Students who have difficulty in maintaining the required level should change to another program before entering their final year.

Required Courses (15 credits)

MATH 235 (3) Algebra 1
MATH 242 (3) Analysis 1
MATH 248 (3) Honours Advanced Calculus
MATH 251 (3) Honours Algebra 2
MATH 255 (3) Honours Analysis 2

Complementary Courses (21 credits)
at least 15 credits selected from the following:

MATH 325 (3) Honours Ordinary Differential Equations
MATH 354 (3) Honours Analysis 3
MATH 355 (3) Honours Analysis 4
MATH 356 (3) Honours Probability
MATH 357 (3) Honours Statistics
MATH 366 (3) Honours Complex Analysis
MATH 370 (3) Honours Algebra 3
MATH 371 (3) Honours Algebra 4
MATH 380 (3) Honours Differential Geometry

The remaining credits to be chosen from the full list of available Honours courses in Mathematics and Statistics.

5.12.37 Middle East Studies Program (MEST)

Program Adviser — Professor Laila Parsons, Department of History and Institute of Islamic Studies, (514) 398-7108
Program Committee Chair — L. Parsons
Program Committee: S. Alvi (Islamic Studies), R. Brynen (Political Science), M. Hartman (Islamic Studies), L. Parsons (History), P. Saltzman (Anthropology), U. Turgay (Islamic Studies), student members
Website: www.mcgill.ca/mes

The Middle East Studies Program is designed for students who wish to pursue an interdisciplinary program of study focusing on the Middle East since the rise of Islam. Courses offered include language, history, religion and philosophy, political science and anthropology. From these are drawn combinations which make up the Major and Minor Concentrations, Honours and Joint Honours in Middle East Studies.

Students wishing to pursue a program in Middle East Studies must consult a Program Adviser each year to devise a suitable program. Before doing so, students should consult the Middle East Studies’ Website at www.mcgill.ca/mes for a full description of each program. Failure to consult an adviser could lead to a delay in completing program requirements. Students wishing to have courses taken at other universities counted as satisfying program requirements must bring copies of their transcripts and course syllabi to the Program Adviser.

MINOR CONCENTRATION IN MIDDLE EAST STUDIES
(Expandable) (18 credits)

Complementary Courses (18 credits)

6 credits selected from History core courses:

ISLA 410 (3) History: Middle-East 1798-1918
ISLA 411 (3) History of the Middle East 1918-1945
ISLA 510D1 (3) History: Islamic Civilization - Classical
ISLA 510D2 (3) History: Islamic Civilization - Classical
ISLA 511D1 (3) History: Islamic Civilization - Mediaeval Era
ISLA 511D2 (3) History: Islamic Civilization - Mediaeval Era

6 credits in Religion and Philosophy:
at least 3 credits from:

ISLA 505 (3) Islam: Origin and Early Developments
ISLA 506 (3) Islam: Later Developments
ISLA 531D1 (3) Survey Development of Islamic Thought
ISLA 531D2 (3) Survey Development of Islamic Thought

the remaining credits, if any, from:

PHIL 356 (3) Early Medieval Philosophy
RELG 204* (3) Judaism, Christianity and Islam
* RELG 204 can only be taken prior to ISLA 505 and ISLA 506

6 credits in Social Science selected from:

ANTH 340 (3) Middle Eastern Society and Culture
POLI 340 (3) Developing Areas/Middle East
POLI 341 (3) Foreign Policy: The Middle East
POLI 347 (3) Arab-Israel Conflict, Crisis, Peace
POLI 437 (3) Politics in Israel

MINOR CONCENTRATION IN MIDDLE EAST LANGUAGES
(Expandable) (18 credits)

18 credits of Middle Eastern language (Arabic, Hebrew, Persian, Turkish), either:

all 18 credits (3 levels) in one language
or 12 credits (2 levels) in one language and 6 credits (1 level) in another language

MAJOR CONCENTRATION IN MIDDLE EAST STUDIES
(36 credits)

Complementary Courses (36 credits)

12 credits (2 levels) in one Middle East language – Arabic, Hebrew, Persian, Turkish.

(In the case of Arabic, the first two levels involve 15 credits. The extra 3 credits will be counted towards the remainder of the program requirements.)

24 credits in Middle East Studies (21 credits if Arabic has been chosen):

6 - 9 credits in History, a minimum of 6 credits from core courses;
6 - 9 credits in Religion and Philosophy, a minimum of 6 credits from core courses;
6 - 9 credits in Social Science.

HONOURS IN MIDDLE EAST STUDIES (60 credits)

The Honours program involves 60 credits in Middle East Studies:

18 credits (3 levels) in one Middle Eastern language;
12 credits in Middle Eastern history, a minimum of 9 credits from Core courses;
6 credits in Middle Eastern religion and philosophy, a minimum of 3 credits from Core courses;
12 credits in Middle East social science courses;
12 credits in Middle East Studies electives.

Honours students must maintain a program GPA of 3.30 in their Middle East Studies courses.

According to Faculty regulations, Honours students must maintain a minimum CGPA of 3.00.
JOINT HONOURS – MIDDLE EAST STUDIES COMPONENT
(36 credits)
Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Complementary Courses (36 credits)
Language:
12 credits (2 levels) in one Middle East language (in the case of Arabic, the first two levels involve 15 credits. The extra 3 credits will be counted toward the remainder of the program).

Middle East Studies:
24 credits (21 if Arabic has been chosen), distributed as follows:

History
6 - 9 credits, a minimum of 6 credits from the following courses:
ISLA 410 (3) History: Middle-East 1798-1918
ISLA 411 (3) History of the Middle East 1918-1945
ISLA 510D1 (3) History: Islamic Civilization - Classical
ISLA 510D2 (3) History: Islamic Civilization - Classical
ISLA 511D1 (3) History: Islamic Civilization - Mediaeval Era
ISLA 511D2 (3) History: Islamic Civilization - Mediaeval Era

Religion and Philosophy
6 - 9 credits, a minimum of 6 credits from the following courses:
ISLA 505 (3) Islam: Origin and Early Developments
ISLA 506 (3) Islam: Later Developments
ISLA 531D1 (3) Survey Development of Islamic Thought
ISLA 531D2 (3) Survey Development of Islamic Thought

Social Science
6 - 9 credits to be selected from:
POLI 340 (3) Developing Areas/Middle East
POLI 341 (3) Foreign Policy: The Middle East
POLI 347 (3) Arab-Israeli Conflict, Crisis, Peace
POLI 437 (3) Politics in Israel
or ANTH 340 (3) Middle Eastern Society and Culture

Independent Research/Honours Seminar
3 credits selected from:
MEST 495 (3) Middle East Studies: Research Seminar
MEST 496 (3) Independent Reading and Research

Joint Honours students must maintain a program GPA of 3.30 in their Middle East Studies courses. According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00.

COURSES
For the most up-to-date list of eligible courses, see www.mcgill.ca/mes.

Students wishing to take upper-level courses in Anthropology and Political Science are expected to take the necessary prerequisites.

Languages
Arabic (Islamic Studies)
ISLA 521D1 (4.5) Introductory Arabic
ISLA 521D2 (4.5) Introductory Arabic
ISLA 522D1 (3) Lower Intermediate Arabic

MEST 496 (3) Independent Reading and Research
Music Programs in Arts

Available within the Faculty of Arts are a Major and a Minor Concentration in Music, and a Minor Concentration in Music Technology.

Admission to the B.A. program is granted according to criteria established by the Faculty of Arts.

Students in the B.A. Freshman Program who are considering a Music Concentration should see the Freshman Adviser in the Arts Student Affairs Office in Dawson Hall. They should also see the Music Adviser in order to ensure that they include any necessary prerequisite Music courses (based on the results of placement examinations) in their first-year selection.

Students interested in a more intensive music program, including practical instruction on an instrument or in voice and additional ensemble participation, should consider the B.Mus. degree or the diplomas offered by the Schulich School of Music; “Degrees and Diplomas Offered” in section 10.3.1.

MINOR CONCENTRATION IN MUSIC (18 credits) (Expandable)

Required Courses (6 credits)
MUTH 210 (3) Tonal Theory and Analysis 1*
MUTH 211 (3) Tonal Theory and Analysis 2*

* Students must take a diagnostic placement examination before registering for this course. If the appropriate level is not achieved on the examination, students will be required to register for Melody and Counterpoint MUTH 110 (3 credits) and/or Elementary Harmony and Analysis MUTH 111 (3 credits). These courses may not be counted toward the 18-credit Music Minor Concentration.

Complementary Courses (12 credits)
9 credits in Music History, Literature or Performance Practice, from any courses with an MUHL prefix at the 300 level – see list of courses in the Schulich School of Music section; an historical performance practice course with an MUPP prefix may be taken with Departmental permission.

3 credits in Music Theory, any course with an MUTH prefix at the 300-level.

MINOR CONCENTRATION IN MUSIC TECHNOLOGY (18 credits) (Non-Expandable)

[Program registration cannot be done via Minerva.]

Enrolment in the Minor in Music Technology program is highly restricted. Application forms will be available from the Department of Theory Office of the Schulich School of Music (Room E235, Strathcona Music Building, 555 Sherbrooke Street West) from February 1, 2007 and must be completed and returned to that office by May 15, 2007. No late applications will be accepted and no students will be admitted to the Minor in January.

Students will be selected on the basis of their previous background or experience in music technology and/or sound recording, their computer programming skills, their expressed interest in the program, and their Cumulative Grade Point Average. Successful applicants will be notified June 1, 2007.

Required Courses (18 credits)
MUHL 342 (3) History of Electroacoustic Music
MUMT 202 (3) Fundamentals of New Media

MUMT 203 (3) Introduction to Digital Audio
MUMT 301 (3) Music and the Internet
MUMT 302 (3) New Media Production 1
MUMT 303 (3) New Media Production 2

With permission of the Chair, Department of Theory, students with advanced programming skills may substitute more advanced MUMT courses in Music Technology for MUMT 301, MUMT 302, and/or MUMT 303.

MAJOR CONCENTRATION IN MUSIC (36 credits)

This Concentration studies music as a vital art form in contemporary society and in the history of Western civilization. Its central purpose emphasizes music within broader intellectual and cultural contexts; the Concentration’s premise is that, as a product of culture, music must be considered in relation to the other humanistic disciplines. This degree could be an excellent preparation for graduate work in music (musicology, music theory, music librarianship, music journalism, arts administration) or for professional studies in other fields.

Students in the Major Concentration MUST consult the Adviser PRIOR to registration each year. Questions regarding the requirements of the B.A. Major Concentration and especially elective courses should be addressed to the Arts Student Affairs Office in Dawson Hall.

Required Courses (13 credits)
MUTH 210 (3) Tonal Theory and Analysis 1*
MUTH 211 (3) Tonal Theory and Analysis 2*
MUSP 229 (2) Musicianship 3**
MUSP 231 (2) Music and the Internet
MUHL 570 (3) Research Methods in Music

* Students must take a diagnostic placement examination before registering for this course. If the appropriate level is not achieved on the examination, students will be required to register for Melody and Counterpoint MUTH 110 (3 credits) and/or Elementary Harmony and Analysis MUTH 111 (3 credits). These courses may not be counted toward the 36-credit Music Major Concentration.

** Students must take a diagnostic placement examination in both Musicianship and Keyboard Proficiency before registering for this course. If the appropriate level is not achieved on these examinations, students will be required to register for Musicianship 1 MUSP 129 (2 credits) and/or Musicianship 2 MUSP 131 (2 credits) and/or Keyboard Proficiency MUSP 170 (1 credit) and/or Keyboard Lab 1 MUSP 171 (1 credit) and/or Keyboard Lab 2 MUSP 172 (1 credit). These courses may not be counted toward the 36-credit Music Major Concentration.

Complementary Courses (23 credits)
9 credits in Music History, Literature or Performance Practice, from any courses with an MUHL prefix at the 300 level; an historical performance practice course with an MUPP prefix may be taken with Departmental permission.

6 credits in Music Theory from any course with an MUTH prefix at the 300 level; see list of courses in the Schulich School of Music section.

8 credits selected from:
MUTH 301 (3) Modal Counterpoint 1
MUTH 302 (3) Modal Counterpoint 2
MUTH 303 (3) Tonal Counterpoint 1
MUTH 304 (3) Tonal Counterpoint 2
MUTH 310 (3) Mid and Late 19th-Century Theory and Analysis
MUTH 327 (3) 20th-Century Analysis
MUTH 427D1 (3) 20th-Century Analysis
MUTH 427D2 (3) 20th-Century Analysis
MUTH 522D1 (3) Advanced Counterpoint
MUTH 522D2 (3) Advanced Counterpoint
MUTH 523D1 (3) Advanced Harmony
MUTH 523D2 (3) Advanced Harmony
MUTH 528 (3) Schenkerian Techniques
MUOC 230D1 (2) The Art of Composition
MUOC 230D2 (2) The Art of Composition
MUOC 260 (2) Instruments of the Orchestra
MUOC 261 (2) Elementary Orchestration
MUHL 220 (3) Women in Music
MUHL 3xx Music History complementary (maximum of 3 credits)

MUSIC ENSEMBLES

Arts students may, with the permission of the instructor and the Associate Dean (Student Affairs) of the Faculty of Arts, participate in one of the following ensembles in a given year. Auditions are held starting the week prior to the beginning of classes in September and continuing during that first week and, in the case of the McGill Symphony Orchestra (MUEN 497), in early January for the Winter term. The schedule and requirements for these auditions are available at the end of June from the Department of Performance office, (514) 398-4542. Normally both the Fall and Winter sections of an ensemble are taken in the same academic year.

MUEN 589 Woodwind Ensembles
MUEN 590 McGill Winds
MUEN 591 Brass Ensembles
MUEN 593 Choral Ensembles
MUEN 594 Contemporary Music Ensemble
MUEN 595 Jazz Ensembles
MUEN 496 Opera Studio
MUEN 597 Orchestral Ensembles
MUEN 598 Percussion Ensembles
MUEN 499 String Ensembles

COURSES OFFERED BY THE SCHULICH SCHOOL OF MUSIC AS ELECTIVES for students in the Faculties of Arts, Science, and Education

The courses referred to below are also open to students from other faculties. Other Music courses may be taken by qualified students from other faculties providing they obtain permission from the relevant department in the Schulich School of Music and from the Associate Dean of their own faculty.

All courses with the prefix MUAR. These are considered to be courses taught in the Faculty of Arts, but they cannot be credited toward the B.A. or B.Sc. Music programs.

The Music History and Literature (MUHL), Music Theory and Analysis (MUTH), and Music Technology (MUMT) courses listed below are considered by the Faculty of Arts as courses taught in the Faculty; however, the Faculty of Science considers them to be courses taught outside of the Faculty.

These courses are intended for students who have at least high school matriculation music or the equivalent. Students who do not have the formal music prerequisites require the permission of the Chair of the Department of Theory to register for any of these courses.

MUHL (Music History and Literature)
MUHL 184 History Survey - Medieval, Renaissance, Baroque
MUHL 185 History Survey - Classical, Romantic, 20th-C.
MUHL 220 Women in Music

MUTH (Music Theory and Analysis)
Students not in the B.A. or B.Sc. Music programs are not required to take the corequisites for the following MUTH courses. However, students intending later to enter either the B.A. Major Concentration or the B.Mus. program would then be required to sit placement tests in Musicianship and Keyboard Proficiency and may be required to take the corequisite courses.

MUTH 110 Melody and Counterpoint
MUTH 111 Elementary Harmony and Analysis
MUTH 210 Tonal Theory and Analysis I
MUTH 211 Tonal Theory and Analysis 2

MUMT (Music Technology)
MUMT 202 Fundamentals of New Media

MUMT 203 Introduction to Digital Audio
MUMT 301 Music and the Internet
MUMT 302 New Media Production 1
MUMT 303 New Media Production 2

5.12.39 North American Studies Program (NAST)

Office of Interdisciplinary Programs
3715 Peel Street, room 121
Montreal, QC H3A 1X1
Telephone: (514) 398-4804
Fax: (514) 398-8432
E-mail: ines.scharnweber@mcgill.ca
Website: www.mcgill.ca/nast

Program Adviser — Ines Scharnweber
Program Committee Chair — TBA

Program Committee:
Charles Boberg (Linguistics), James Delbourgo (History), Catherine Desbarats (History), Allan Hepburn (English), Leonard Moore (History), Gil Troy (History), Harold Waller (Political Science)

The purpose of North American Studies is to provide a comprehensive view of civilization on this continent. Proceeding from the premise that similarities between North American peoples are greater than their differences, the first year in the program requires the traditional mix of history and literature, with the addition of political science, economics and sociology courses to underline differences that may be more substantial.

The introductory complementary credits in the first year are a prelude to a broader list of courses in Economics, Political Science/Sociology, History, and Arts and Letters, where students are allowed greater freedom to direct their own study according to their personal needs and inclinations. Students must ENSURE they have fulfilled the 200-level prerequisites before registering for the advanced-level courses listed below.

Independent study, internships and university exchange arrangements can be worked into a student's program (a certain amount of flexibility is allowed here, but in close conjunction with the program as outlined below).

Each Major Concentration student in third year must enrol in the required North American Studies Seminar offered by the Department of English.

MINOR CONCENTRATION IN NORTH AMERICAN STUDIES (18 credits) (Expandable)

Complementary Courses (18 credits)

3 credits in two of the three introductory level categories listed for the Major Concentration.

Note: Students who take POLI 325D1/D2 at the intermediate level may count 3 credits towards the introductory level - Canadian and American Political Science/Economics/Sociology.

12 credits from courses at the intermediate and senior levels, 3 credits from each of the following four categories: Canadian and American Economics, Canadian and American Political Science/Sociology, Canadian and American History, and Canadian and American Arts and Letters. (See the categories listed for the Major Concentration.)

Students should be aware that some courses listed may have prerequisites at the introductory level, which may have to be taken as electives. No more than 12 credits can be taken outside the Faculties of Arts and Science.

Note: Students in the Minor Concentration are NOT permitted to take courses from the Miscellaneous grouping.

MAJOR CONCENTRATION IN NORTH AMERICAN STUDIES (36 credits)

Required Course (3 credits)
ENGL 529D1 (1.5) Interdisciplinary Seminar - North American Studies
ENGL 529D2 (1.5) Interdisciplinary Seminar - North American Studies

Complementary Courses (33 credits)
9 credits at the introductory level, normally taken in the first year of the program to be chosen as follows:
3 credits in Canadian and American History, selected from:
HIST 202 (3) Survey: Canada to 1867
HIST 203 (3) Survey: Canada since 1867
HIST 211 (3) American History to 1865
HIST 221 (3) United States since 1867

3 credits in Canadian and American Literature, selected from:
ENGL 225 (3) American Literature 1
ENGL 226 (3) American Literature 2
ENGL 228 (3) Canadian Literature 1
ENGL 229 (3) Canadian Literature 2

3 credits in Canadian and American Political Science, Economics/Sociology selected from:
CANS 200 (3) Introduction to the Study of Canada
ECON 208 (3) Microeconomic Analysis and Applications
ECON 209 (3) Macroeconomic Analysis and Applications
ECON 219 (3) Current Economic Problems: Topics
ECON 223 (3) Political Economy of Trade Policy
POLI 221 (3) Government of Canada
POLI 222 (3) Political Process and Behaviour in Canada
POLI 325D1 (3) Government and Politics: United States
POLI 325D2 (3) Government and Politics: United States
SOCI 230 (3) Sociology of Ethnic Relations
SOCI 233 (3) Canadian Society

Note: Students who take POLI 325D1/2 at the intermediate level may count 3 credits towards the introductory level - Canadian and American Political Science/Economics/Sociology

24 credits from courses at intermediate and senior levels, 6 from each of the following groups: Canadian and American Economics, Canadian and American Political Science, Canadian and American History, Canadian and American Arts and Letters. A maximum of 3 credits may be selected from the Miscellaneous grouping. Students must receive prior approval from the Program Adviser.

Students should be aware that some courses listed below may have prerequisites at the introductory level, which may have to be taken as electives. No more than 12 credits can be taken outside of the Faculties of Arts and Science.

Canadian and American Economics
BUSA 364 (3) Business Law 1
BUSA 368 (3) Business Law 2

Hasana Sharp; A.B.(Occidental), M.A.(Binghampton), Ph.D.(Penn)

Adjunct Professor
Steven Davis(Car.)

Auxiliary Professor

Associate Members
Lawrence Kaplan (Jewish Studies)

Broadly speaking, the principal aim of philosophy is to increase our understanding of ourselves, the world, and our place in it. Philosophy differs from the empirical and social sciences in important respects. One way to characterise philosophy is by the sorts of questions it seeks to answer, and the ways in which it seeks to answer them. Different areas of philosophy are characterised by the questions they address. For example, Epistemology inquires into the nature of knowledge, Metaphysics is concerned with the fundamental nature of the world and of the types of things that it contains, Ethics investigates the nature of moral judgment and moral reasoning, while Political Philosophy examines such matters as justice, freedom, rights, democracy, and power, and Logic is broadly the analysis of the structure of correct reasoning. In addition, there are the various 'Philosophies of...,' e.g., Philosophy of Science, Philosophy of Language, Philosophy of Mind, Philosophy of Religion.

Some of the courses in the Department are explicitly devoted to these specific areas of philosophy, each exploring one or several ways of construing and answering the questions it poses. Other courses explore some period or individual figure in the history of philosophy, approaching philosophical questions through the work of past thinkers, and often exploring connections between the different areas of philosophy.

The discipline of Philosophy, as a particular way of thinking, emphasizes clarity in expression, both written and oral, and rigour in argument. Philosophical questions are intriguing and hard, and so philosophical method stresses thoroughness and intellectual generosity – the willingness and ability to grasp another's arguments and respond to them. The Department requires of all (and only) Honours and Joint Honours students that they take a special 3-credit course (PHIL 301), the principal aim of which is to equip students with the distinctively philosophical skills required for advanced work in the field.

The B.A. in Philosophy is not a professional qualification. It prepares students for graduate work in philosophy and for study in other disciplines, e.g., Law. As the interdisciplinary discipline par excellence, philosophy also maintains and encourages ties with other fields, so many students will find that certain classes in philosophy are directly relevant to their major area of study. The department has a strong commitment to providing an intensive yet broad-based philosophical education. The research interests of members of the Department are wide-ranging.

See also the separate listing for History and Philosophy of Science (HPSC), section 5.12.27.

Note: Philosophy students may use either PHIL 200 or PHIL 201 towards their program requirements, but not both. Students may, however, take both for credit (using the second as an elective), as the content in PHIL 201 does not overlap with PHIL 200.
MINOR CONCENTRATION IN PHILOSOPHY (18 credits)
Complementary Courses (18 credits)
15 credits from Groups A - E, with one course from at least four of the five groups.
Group A
PHIL 230 (3) Introduction to Moral Philosophy 1
PHIL 237 (3) Contemporary Moral Issues
PHIL 242 (3) Introduction to Feminist Theory
PHIL 334 (3) Ethics 1
PHIL 343 (3) Biomedical Ethics
PHIL 348 (3) Philosophy of Law 1
PHIL 442 (3) Topics in Feminist Theory
Group B
PHIL 210 (3) Introduction to Deductive Logic 1
PHIL 220 (3) Introduction to History and Philosophy of Science 1
PHIL 221 (3) Introduction to History and Philosophy of Science 2
PHIL 304 (3) Chomsky
PHIL 306 (3) Philosophy of Mind
PHIL 310 (3) Intermediate Logic
PHIL 341 (3) Philosophy of Science 1
PHIL 370 (3) Problems in Analytic Philosophy
PHIL 410 (3) Advanced Topics in Logic 1
PHIL 411 (3) Topics in Philosophy of Logic and Mathematics
PHIL 415 (3) Philosophy of Language
PHIL 419 (3) Epistemology
PHIL 421 (3) Metaphysics
PHIL 441 (3) Philosophy of Science 2
PHIL 470 (3) Topics in Contemporary Analytic Philosophy
Group C
PHIL 375 (3) Existentialism
PHIL 474 (3) Phenomenology
PHIL 475 (3) Topics in Contemporary European Philosophy
Group D
PHIL 344 (3) Medieval and Renaissance Political Theory
PHIL 345 (3) Greek Political Theory
PHIL 350 (3) History and Philosophy of Ancient Science
PHIL 353 (3) The Presocratic Philosophers
PHIL 354 (3) Plato
PHIL 355 (3) Aristotle
PHIL 356 (3) Early Medieval Philosophy
PHIL 357 (3) Late Medieval and Renaissance Philosophy
PHIL 452 (3) Later Greek Philosophy
PHIL 453 (3) Ancient Metaphysics and Natural Philosophy
PHIL 454 (3) Ancient Moral Theory
Group E
PHIL 360 (3) 17th Century Philosophy
PHIL 361 (3) 18th Century Philosophy
PHIL 366 (3) 18th and Early 19th Century German Philosophy
PHIL 367 (3) 19th Century Philosophy
PHIL 444 (3) Early Modern Political Theory
PHIL 445 (3) 19th Century Political Theory
PHIL 230 (3) Introduction to Moral Philosophy 1
PHIL 237 (3) Contemporary Moral Issues
PHIL 242 (3) Introduction to Feminist Theory
Group F
PHIL 334 (3) Ethics 1
PHIL 343 (3) Biomedical Ethics
PHIL 348 (3) Philosophy of Law 1
PHIL 434 (3) Ethics 2
PHIL 442 (3) Topics in Feminist Theory

3 additional credits from the lists above or from other Philosophy courses.

In total, no more than 9 credits may be at the 200-level, and at least 9 credits must be at the 400 or 500 level.

MAJOR CONCENTRATION IN PHILOSOPHY (36 credits)
Required Course (3 credits)
PHIL 210 (3) Introduction to Deductive Logic 1

Complementary Courses (33 credits)
33 credits, of which no more than 9 may be at the 200-level, and at least 9 must be at the 400 or 500 level, distributed as follows:
6 credits, one course from each of Groups A and B:
Group A
PHIL 304 (3) Chomsky
PHIL 306 (3) Philosophy of Mind
PHIL 310 (3) Intermediate Logic
PHIL 341 (3) Philosophy of Science 1
PHIL 370 (3) Problems in Analytic Philosophy
PHIL 410 (3) Advanced Topics in Logic 1
PHIL 411 (3) Topics in Philosophy of Logic and Mathematics
PHIL 415 (3) Philosophy of Language
PHIL 419 (3) Epistemology
PHIL 421 (3) Metaphysics
PHIL 441 (3) Philosophy of Science 2
PHIL 470 (3) Topics in Contemporary Analytic Philosophy
Group B
PHIL 375 (3) Existentialism
PHIL 474 (3) Phenomenology
PHIL 475 (3) Topics in Contemporary European Philosophy
6 credits, two courses from Group C OR two from Group D:
Group C
PHIL 344 (3) Medieval and Renaissance Political Theory
PHIL 345 (3) Greek Political Theory
PHIL 350 (3) History and Philosophy of Ancient Science
PHIL 353 (3) The Presocratic Philosophers
PHIL 354 (3) Plato
PHIL 355 (3) Aristotle
PHIL 356 (3) Early Medieval Philosophy
PHIL 357 (3) Late Medieval and Renaissance Philosophy
PHIL 452 (3) Later Greek Philosophy
PHIL 453 (3) Ancient Metaphysics and Natural Philosophy
PHIL 454 (3) Ancient Moral Theory
Group D
PHIL 360 (3) 17th Century Philosophy
PHIL 361 (3) 18th Century Philosophy
PHIL 366 (3) 18th and Early 19th Century German Philosophy
PHIL 367 (3) 19th Century Philosophy
PHIL 444 (3) Early Modern Political Theory
PHIL 445 (3) 19th Century Political Theory
6 credits, one course from each of Groups E and F:
Group E
PHIL 360 (3) 17th Century Philosophy
PHIL 361 (3) 18th Century Philosophy
PHIL 366 (3) 18th and Early 19th Century German Philosophy
PHIL 367 (3) 19th Century Philosophy
PHIL 444 (3) Early Modern Political Theory
PHIL 445 (3) 19th Century Political Theory
PHIL 230 (3) Introduction to Moral Philosophy 1
PHIL 237 (3) Contemporary Moral Issues
PHIL 242 (3) Introduction to Feminist Theory
Group F
PHIL 334 (3) Ethics 1
PHIL 343 (3) Biomedical Ethics
PHIL 348 (3) Philosophy of Law 1
PHIL 434 (3) Ethics 2
PHIL 442 (3) Topics in Feminist Theory

15 additional credits from the lists above or from other Philosophy courses. Only one of PHIL 200 and PHIL 201 can be included in the program.

HONOURS IN PHILOSOPHY (60 credits)
60 credits in Philosophy, to include:
• PHIL 210, or equivalent, and one of: PHIL 306, PHIL 310, PHIL 370, PHIL 410, PHIL 411, PHIL 415, PHIL 419, PHIL 421, PHIL 470
• PHIL 301
• PHIL 334, and one of: PHIL 230, PHIL 237, PHIL 240, PHIL 241, PHIL 242
• two of: PHIL 345, PHIL 350, PHIL 353, PHIL 354, PHIL 355, PHIL 452, PHIL 453, PHIL 454
ARTS – PHILOSOPHY AND WESTERN RELIGIONS

• two of: PHIL 360, PHIL 361, PHIL 366, PHIL 367, PHIL 444, PHIL 445
• one of: PHIL 375, PHIL 474, PHIL 475
• 12 credits from 400–500 level courses (not including the Honours tutorial), at least 3 of which must be 500-level
• 6 credits of Honours tutorial with thesis (PHIL 499)

According to Faculty regulations, Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

JOINT HONOURS – PHILOSOPHY COMPONENT (36 credits)
36 credits in Philosophy, to include:
• PHIL 210, or equivalent, and one of PHIL 306, PHIL 310, PHIL 370, PHIL 410, PHIL 411, PHIL 415, PHIL 419, PHIL 421, PHIL 470
• PHIL 301
• PHIL 334, and one of PHIL 230, PHIL 237, PHIL 240, PHIL 241, PHIL 242
• two of: PHIL 345, PHIL 350, PHIL 353, PHIL 354, PHIL 355, PHIL 452, PHIL 453, PHIL 454
• OR two of: PHIL 360, PHIL 361, PHIL 366, PHIL 367, PHIL 444, PHIL 445
• one of: PHIL 375, PHIL 474, PHIL 475
• 9 credits from 400–500 level courses (not including the Honours tutorial), at least 3 of which must be 500-level
• 3 credits of Honours tutorial with thesis, which can take either of two forms: a 6-credit interdisciplinary thesis, or a 3-credit thesis in philosophy (PHIL 498).

Students who wish to study at the Honours level in two Arts disciplines can combine Joint Honours Program components from any two Arts disciplines; see section 5.11.4 “Joint Honours Programs” for a list of available programs.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

ADMISSION TO HONOURS AND JOINT HONOURS

Students must attain a 3.00 CGPA and have a 3.00 GPA in Philosophy courses.

All Honours and Joint Honours students are bound by the following constraints:
• students may use a maximum of 15 credits from 200-level courses towards satisfaction of their program requirements in Philosophy;
• students cannot count both PHIL 200 and PHIL 201 towards satisfaction of their program requirements in Philosophy.

Minor in Cognitive Science

Students following Major or Honours programs in Philosophy with an interest in cognition may consider the Minor in Cognitive Science, described in the Faculty of Science section.

5.12.41 Philosophy and Western Religions (PHWR)

Office of Interdisciplinary Programs

Chair – Carlos Fraenkel (Philosophy and Jewish Studies) — Program Committee
E. Caplan (Jewish Studies), M. Deslauriers (Philosophy), D. Farrow (Religious Studies), I. Henderson (Religious Studies), T. Kirby (Religious Studies), B. Levy (Religious Studies), S. Menn (Philosophy), R. Myles (English and French Language Centre), G. Oegema (Religious Studies), R. Wisnovsky (Islamic Studies)

This interdisciplinary program, in which the Department of Philosophy, the Institute of Islamic Studies, the Department of Jewish Studies and the Faculty of Religious Studies collaborate, was designed for students who wish to study the encounter between philosophy and the three Abrahamic religions (Judaism, Christianity, and Islam), an encounter which shaped the basic patterns of Western and Muslim intellectual history. The program covers the period from Antiquity to the Enlightenment during which philosophy and religious thought were inseparably interwoven, making visible the wide range of links between the intellectual worlds of these three religious traditions. Although the interaction between philosophy and religious thought continued in a variety of forms also after the Enlightenment’s critique of religion, this critique transformed their relationship in a fundamental way, and for this reason will be used to delimit the chronological scope of the program. During the period in question, the impact of Greek philosophy on theologians, philosophers, and mystics within Judaism, Christianity, and Islam determined often in a decisive way – both positively and negatively – the interpretation of their Holy Scriptures, and their understanding of crucial religious concepts such as God, creation, revelation, providence, divine Law, and the origin of evil. The interdisciplinary approach takes into account that the history of the encounter in question crossed the linguistic, cultural and religious boundaries which define the areas of the traditional academic disciplines. This approach permits the student to pursue the development of a philosophical or religious concept from its origin through the different historical and geographical contexts in which it was received by Jewish, Christian and Muslim thinkers.

In order to achieve its goal the program focuses on (i) the acquisition of relevant languages (Greek, Latin, Arabic, Hebrew), (ii) the history of Ancient, Medieval and Early Modern Philosophy, (iii) the Holy Scriptures and the history of Judaism, Christianity, and Islam, (iv) the reception and transformation of philosophical ideas in Jewish, Christian, and Islamic thought, and (v) the multiple points of contact among the different traditions of religious thought.

The program provides excellent preparation for graduate studies in Philosophy (with the appropriate choice of electives, or in combination with a Minor in Philosophy), in Religious Studies and, with the relevant language component, in Islamic Studies and Jewish Studies as well. Students wishing to pursue graduate studies in a particular discipline should consult about specific requirements with a faculty member of the corresponding department at McGill.

MINOR CONCENTRATION IN PHILOSOPHY AND WESTERN RELIGIONS (18 credits)

Students will benefit most from the Minor if they combine it with programs in Philosophy, Islamic Studies, Jewish Studies, Religious Studies, or Classics. Students are also encouraged to complete a Minor Concentration in one of the languages relevant to the academic field.

Note: Not all courses listed below are offered every year, and some of the courses have limited enrolment.

Required Course (3 credits)
RELG 307 (3) Bible, Quran & Interpretations

Complementary Courses (15 credits)

Students must complete 6 credits in two of the following three categories: Philosophy and Western Religions; History of Philosophy; and Jewish, Christian and Islamic Thought.

3 - 6 credits*, Philosophy and Western Religions,
PHWR 300 (3) Philosophy & Western Religions 1
PHWR 301 (3) Philosophy & Western Religions 2
* Students are strongly encouraged to take both PHWR 300 and PHWR 301.

3 - 6 credits, History of Philosophy, at least one of:
PHIL 354 (3) Plato
PHIL 355 (3) Aristotle
The remaining credits, if any, to be chosen from:

<table>

3 - 6 credits to be chosen from the PHWR Complementary Course List - Jewish, Christian, and Islamic Thought.

**MAJOR CONCENTRATION IN PHILOSOPHY AND WESTERN RELIGIONS (36 credits)**

The Major Concentration in Philosophy and Western Religions has an option without language requirement (Option A), and an option with language requirement (Option B). The latter was designed for students who wish to acquire the linguistic skills allowing them to read and research source texts in the original languages. Students will benefit most from the Major Concentration if they combine it with a program in Philosophy, Islamic Studies, Jewish Studies, Religious Studies, or Classics. Students are also encouraged to complete a Minor Concentration in one of the languages relevant to the academic field.

Students are strongly encouraged to consult an adviser each year to devise a suitable course combination.

**Note:** Not all courses listed below are offered every year, and some of the courses have limited enrolment.

**Required Course (3 credits)**

RELG 307 (3) Bible, Quran & Interpretations

**Complementary Courses (33 credits)**

3 - 9 credits*, Philosophy and Western Religions,

PHWR 300 (3) Philosophy & Western Religions 1

PHWR 301 (3) Philosophy & Western Religions 2

PHWR 500D1 (1.5) Interdisciplinary Seminar

PHWR 500D2 (1.5) Interdisciplinary Seminar

* Students are strongly encouraged to take both PHWR 300 and PHWR 301.

24 - 30 credits taken in either Option A or Option B as follows:

**Option A - Without Language Component**

9 - 12 credits, History of Philosophy:

at least one of:

0 - 3 credits to be chosen from the PHWR Complementary Course List - Scriptures and History of the Western Religious Traditions.

6 - 9 credits to be chosen from the PHWR Complementary Course List - Jewish, Christian, and Islamic Thought, with a maximum of 6 credits from any one of the three groups.

**HONOURS IN PHILOSOPHY AND WESTERN RELIGIONS**

(60 credits)

The Honours Program in Philosophy and Western Religions was designed for students who wish (i) to explore in depth the intertwined intellectual worlds of Judaism, Christianity and Islam, and the interaction between philosophy and religion from Antiquity to the Enlightenment and (ii) to acquire the linguistic and conceptual tools allowing them to read source texts in the original languages, and to conduct research in the areas investigated by the interdisciplinary program. Students are encouraged to complete, in addition, a Minor Concentration in one of the languages relevant to the academic field.

Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

Students are strongly encouraged to consult an adviser each year to devise a suitable course combination.

Students who combine the Honours Program with a Minor Concentration in one of the languages relevant to the academic field, or who have acquired proficiency in one language elsewhere may replace 6 credits of the language requirements through additional credits in other segments of the program.

**Note:** Not all courses listed below are offered every year, and some of the courses have limited enrolment.

**Required Course (3 credits)**

RELG 307 (3) Bible, Quran & Interpretations

**Complementary Courses (57 credits)**

6 - 9 credits*, Philosophy and Western Religions,

PHWR 300 (3) Philosophy & Western Religions 1

PHWR 301 (3) Philosophy & Western Religions 2

PHWR 500D1 (1.5) Interdisciplinary Seminar

PHWR 500D2 (1.5) Interdisciplinary Seminar

* Students are strongly encouraged to take both PHWR 300 and PHWR 301.

9 - 12 credits, History of Philosophy,

at least one of:

<table>
<thead>
<tr>
<th>Course</th>

The Joint Honours Philosophy and Western Religions Component was designed for students who wish (i) to explore the intertwined intellectual worlds of Judaism, Christianity and Islam, and the interaction between philosophy and religion from Antiquity to the Enlightenment and (ii) to acquire the linguistic and conceptual tools allowing them to read source texts in the original languages, and to conduct research in the areas investigated by the interdisciplinary program. Students will benefit most from the Joint Honours if they combine it with a program in Philosophy, Islamic Studies, Jewish Studies, Religious Studies, or Classics. Students are also encouraged to complete a Minor Concentration in one of the languages relevant to the academic field.

Joint Honours students must maintain a minimum CGPA of 3.00 and a minimum program GPA of 3.00.

Note: Not all courses listed below are offered every year, and some of the courses have limited enrolment.

Required Course (3 credits)

RELG 307 (3) Bible, Quran & Interpretations

Complementary Courses (33 credits)

3 - 9 credits*. Philosophy and Western Religions,
PHWR 300 (3) Philosophy & Western Religions 1
PHWR 301 (3) Philosophy & Western Religions 2
PHWR 500D1 (1.5) Interdisciplinary Seminar
PHWR 500D2 (1.5) Interdisciplinary Seminar
* Students are strongly encouraged to take both PHWR 300 and PHWR 301.

3 - 6 credits, History of Philosophy, at least one of:

PHIL 355 (3) Aristotle
PHIL 356 (3) Early Medieval Philosophy
PHIL 357 (3) Late Medieval and Renaissance Philosophy
PHIL 360 (3) 17th Century Philosophy
The remaining credits, if any, to be chosen from:
CLAS 415 (3) Advanced Latin: Oratory
CLAS 426 (3) Advanced Greek: Philosophy
PHIL 356 (3) Early Medieval Philosophy
PHIL 357 (3) Late Medieval and Renaissance Philosophy
PHIL 360 (3) 17th Century Philosophy
PHIL 452 (3) Later Greek Philosophy

0 - 3 credits to be chosen from the PHWR Complementary Course List - Scriptures and History of the Western Religious Traditions.

3 credits, specialized skills for conducting research, chosen from:
PHWR 400 (3) Joint Honours/Honours Tutorial
PHWR 500D1 (1.5) Interdisciplinary Seminar
PHWR 500D2 (1.5) Interdisciplinary Seminar

### 5.12.42 Political Science (POLI)

Stephen Leacock Building, Room 414
855 Sherbrooke Street West
Montreal, QC H3A 217

**Chair — Richard Schultz**

- Emeritus Professors
  - Baldev Raj Nayar; B.A., M.A.(Punjab), M.A., Ph.D.(Chic.)
  - Blema Steinberg; B.A.(McG.), M.A.(C’nell), Ph.D.(McG.)
- Professors
  - Michael Brecher; B.A.(McG.), M.A., Ph.D.(Yale), F.R.S.C.
  - Mark R. Brawley; B.A.(Calif.), M.A., Ph.D.(Calif.-LA)
  - Rex Brynen; B.A.(Vic., BC), M.A., Ph.D.(Calg.)
  - Elisabeth Gidengil; B.A.(LSE), M.A.(N.Y.), Ph.D.(McG.)
- Associate Professors
  - Christopher Manfredi; B.A., M.A.(Calg.), M.A., Ph.D.(Claremont)
  - T.V. Paul; B.A.(Kerala), M.Phil.(JNU), M.A., Ph.D.(Calif.-LA)
  - (James McGill Professor)
  - Filippo Sabetti; B.A.(McM.), M.A., Ph.D.(Ind.)
  - Richard Schultz; B.A.(York), M.A.(Manc.), Ph.D.(York) (James McGill Professor)
  - Harold M. Waller; M.S.(N’western), Ph.D.(G’town)
- Jody Heymann; B.A.(Yale), M.D., Ph.D.(Harv.) (Canada Research Chair)

**Group of Canadian Ethnic Studies**

- Hudson Meadowell; B.A.(Man.), M.A., Ph.D.(Duke)
- Philip D. Oxhorn; B.A.(Redlands), M.A.(Cant.), Ph.D.(Harv.)
- Stephen Saideman; B.A.(Obertin), M.A., Ph.D.(Calif.-San Diego) (Canada Research Chair)
- Stuart Soroka; B.A.(Qu.), M.A.(Car.), Ph.D.(Br. Col.) (William Dawson Scholar)
- Dietlind Stolle; M.A.(Claremont), Ph.D.(Prin.) (on leave 2007-2008)
- Narendra Subramanian; B.A.(Prin.), M.A., Ph.D.(MIT)
- Assistant Professors
  - Arash Abizadeh; B.A.(Winn.), M.Phil.(Oxf.), Ph.D.(Harv.) (on leave 2007-2008)
  - Éric Bélanger; B.A., M.A.(Laval), Ph.D.(Montr.)
  - Erik Kuhonta; B.A.(Penn.), Ph.D.(Prin.)
  - Mark Manger; M.Sc.(Hamburg), Ph.D.(Br. Col.)
  - Khalid Medani; B.A.(Brown), M.A.(G’town), M.A., Ph.D.(Calif., Berk.)
  - Maria Popova; B.A.(Dart.), Ph.D.(Harv.)
  - Vincent Pouliot; B.Sc.(Montr.), D.E.A.(Bordeaux), Ph.D.(Tor.)
  - Christina Tarnopolsky; B.A.(Tor.), M.A., Ph.D.(Chic.)

Students wishing to do an Honours degree or a Major or Minor Concentration in Political Science should consult with a Political
Science Departmental Adviser each year in order to devise a suitable program. Proper selection of courses is required if a student wishes to graduate on time.

1. **Procedure for NEW Students**

All new students entering the Political Science Program (including Minor Concentrations) are strongly urged to attend an Information Meeting scheduled at the end of August. The date and location of the meeting will be posted on the Web. Attendance will help students prepare for their session with an adviser. It is the student's responsibility to be in Montreal for the meeting. The following brochures are available on the Web: "Programs in Political Science," and "Minor Concentrations in Political Science". It is essential to read through these prior to attending the Information Meeting.

2. **For all Political Science Students**

"Programs in Political Science," and "Minor Concentrations in Political Science," are all available in the Department as well as on the Web. Students wishing to have courses taken at other universities counted as satisfying program requirements must bring copies of their transcripts and course syllabi to the Director of the Major or Honours Program or the Director of Undergraduate Studies. Students are not accepted into the Honours Program in Political Science before their second year in Political Science; an exception is made for those in Joint Honours Programs.

As course and personnel changes may occur after this Calendar has gone to press, students should not use it to plan their program of studies without first consulting the Department Office for updated information.

### MINOR CONCENTRATION IN POLITICAL SCIENCE

(18 credits) (Expandable)

#### Complementary Courses (18 credits)

6 - 9 credits at the 200 level, from at least two fields:

**Canadian Politics Field**

- POLI 221 (3) Government of Canada
- POLI 222 (3) Political Process and Behaviour in Canada
- POLI 226 (3) La vie politique québécoise

**Comparative Politics Field**

- POLI 211 (3) Comparative Government and Politics
- POLI 212 (3) Governor and Politics - Developed World
- POLI 227 (3) Developing Areas/Introduction

**International Relations Field**

- POLI 243 (3) International Politics of Economic Relations
- POLI 244 (3) International Politics: State Behaviour

**Political Theory Field**

- POLI 231 (3) Introduction to Political Theory
- POLI 232 (3) Modern Political Thought

9 - 12 credits above the 200 level from at least two fields:

**Canadian Politics Field**

- POLI 320 (3) Issues in Canadian Democracy
- POLI 321 (3) Issues: Canadian Public Policy
- POLI 326 (3) Provincial Politics
- POLI 336 (3) Le Québec et le Canada
- POLI 337 (3) Canadian Public Administration
- POLI 342 (3) Canadian Foreign Policy
- POLI 371 (3) Challenge of Canadian Federalism
- POLI 372 (3) Aboriginal Politics in Canada
- POLI 378 (3) The Canadian Judicial Process
- POLI 379 (3) Topics in Canadian Politics
- POLI 411 (3) Canadian Political Parties
- POLI 412 (3) Canadian Voting/Public Opinion
- POLI 415 (3) Political Parties
- POLI 416 (3) Political Economy of Canada
- POLI 417 (3) Health Care in Canada
- POLI 421 (3) Social Movements in Canada
- POLI 426 (3) Partis politiques et comportements électoraux au Québec
- POLI 427 (3) Selected Topics: Canadian Politics
- POLI 447 (3) Canadian Constitutional Politics
- POLI 467 (3) Politique et société à Montréal
- POLI 469 (3) Policy of Regulation
- POLI 478 (3) The Canadian Constitution

**Comparative Field (Developed and Developing)**

- POLI 300D1 (3) Developing Areas/Revolution
- POLI 300D2 (3) Developing Areas/Revolution
- POLI 315 (3) Approaches to Political Economy
- POLI 318 (3) Comparative Local Government
- POLI 319 (3) Politics of Latin America
- POLI 322 (3) Political Change in South Asia
- POLI 323 (3) Developing Areas/China and Japan
- POLI 324 (3) Developing Areas/Africa
- POLI 325D1 (3) Government and Politics: United States
- POLI 325D2 (3) Government and Politics: United States
- POLI 328 (3) Modern Politics in Western Europe
- POLI 329 (3) Russian and Soviet Politics
- POLI 331 (3) Politics in East Central Europe
- POLI 332 (3) Politics of Former Soviet Republics
- POLI 338 (3) Developing Areas/Topics 1
- POLI 339 (3) Comparative Developed: Topics 1
- POLI 340 (3) Developing Area/Middle East
- POLI 355 (3) Public Policy: Western Europe
- POLI 357 (3) Politics: Contemporary Europe
- POLI 361 (3) Political Participation in Comparative Perspective
- POLI 411 (3) Immigration and Multiculturalism in Canada
- POLI 414 (3) Society and Politics in Italy
- POLI 419 (3) Transitions from Communism
- POLI 422 (3) Developing Areas/Topics 2
- POLI 423 (3) Politics of Ethno-Nationalism
- POLI 424 (3) Media and Politics
- POLI 425 (3) Topics in American Politics
- POLI 428 (3) Politics of France
- POLI 429 (3) The Politics of South Africa
- POLI 430 (3) The Politics of Scandinavia

- POLI 474 (3) Inequality and Development
- POLI 475 (3) Social Capital in Comparative Perspective

MINOR CONCENTRATION IN INTERNATIONAL RELATIONS
(Non-expandable) (18 credits)

Required Courses (6 credits)
- POLI 243 (3) International Politics of Economic Relations
- POLI 244 (3) International Politics: State Behaviour

Complementary Courses (12 credits)
12 credits, of which 6 credits must be in thematic courses:
Thematic courses
- POLI 345 (3) International Organizations
- POLI 347 (3) Arab-Israel Conflict, Crisis, Peace
- POLI 351 (3) The Causes of Major Wars
- POLI 354 (3) Approaches to International Political Economy
- POLI 360 (3) Security: War and Peace
- POLI 362 (3) Political Theory and International Relations
- POLI 441 (3) IPE: North-North Relations
- POLI 445 (3) International Political Economy: Monetary Relations
- POLI 450 (3) Peacebuilding
- POLI 451 (3) The European Union

Regional courses
- POLI 341 (3) Foreign Policy: The Middle East
- POLI 342 (3) Canadian Foreign Policy
- POLI 344 (3) Foreign Policy: Europe
- POLI 346 (3) American Foreign Policy
- POLI 349 (3) Foreign Policy-Asia Pacific
MINOR CONCENTRATION IN POLITICAL ECONOMY
(Non-expandable) (18 credits)

Complementary Courses (18 credits)
3 credits selected from:
Poli 211 (3) Comparative Government and Politics
Poli 227 (3) Developing Areas/Introduction
Poli 243 (3) International Politics of Economic Relations

3 credits selected from:
Econ 208 (3) Microeconomic Analysis and Applications
Econ 209 (3) Macroeconomic Analysis and Applications

Students who take Econ 230D1/Econ 230D2 or Econ 250D1/
Econ 250D2D are deemed to have fulfilled the economics
requirement;

12 credits selected from:
Poli 243 (3) International Politics of Economic Relations
Poli 315 (3) Approaches to Political Economy
Poli 321 (3) Issues: Canadian Public Policy
Poli 364 (3) Approaches to International Political Economy
Poli 416 (3) Political Economy of Canada
Poli 441 (3) IPE: North-North Relations
Poli 445 (3) International Political Economy: Monetary
Relations
Poli 451 (3) The European Union
Poli 469 (3) Politics of Regulation
Poli 473 (3) Democracy and the Market

MINOR CONCENTRATION IN POLITICS, LAW AND SOCIETY
(Non-expandable) (18 credits)

Required Courses (6 credits)
Poli 211 (3) Comparative Government and Politics
Poli 378 (3) The Canadian Judicial Process

Complementary Courses (12 credits)
3 credits selected from:
Poli 221 (3) Government of Canada
Poli 222 (3) Political Process and Behaviour in Canada

9 credits, at least 6 of which must be non-political science credits
selected from:
Hist 344 (3) Police Institutions
Jwst 316 (3) Social and Ethical Issues in Jewish Law 1
Leel 482 (3) Law and Poverty
Phil 348 (3) Philosophy of Law 1
Poli 318 (3) Comparative Local Government
Poli 321 (3) Issues: Canadian Public Policy
Poli 337 (3) Canadian Public Administration
Poli 417 (3) Health Care in Canada
Poli 447 (3) Canadian Constitutional Politics
Poli 466 (3) Public Policy Analysis
Poli 469 (3) Politics of Regulation
Poli 478 (3) The Constitution
Poli 486 (3) Political Institutions

* Procedure for taking Law courses: to take these courses, the
student must apply as a Special Student through the Faculty of
Law and provide the following: curriculum vitae, copy of academic
record and reason for wanting to take the course.

MINOR CONCENTRATION IN SOUTH ASIA (Non-expandable)
(18 credits)

Required Courses (6 credits)
Poli 227 (3) Developing Areas/Introduction
Poli 322 (3) Political Change in South Asia

Complementary Courses (12 credits)
3 credits selected from:
Anth 327 (3) Peoples of South Asia
Isla 500D1 (3) History of Islamic India

ISLA 500D2 (3) History of Islamic India
Relg 252 (3) Hinduism and Buddhism
Relg 344 (3) Mahayana Buddhism
Relg 348 (3) Classical Hinduism
Relg 350 (3) Bhakti Hinduism
Relg 454 (3) Modern Hindu Thought

6 - 9 credits selected from:
Anth 212 (3) Anthropology of Development
Anth 327 (3) Peoples of South Asia
Anth 427 (3) Social Change in South Asia
Isla 505 (3) Major Themes of Islamic Religious Expression
Isla 506 (3) Islam: Later Development
Relg 339 (3) Gender & Sexuality in Buddhism
Relg 342 (3) Theravada Buddhist Literature
Relg 371 (3) Ethics of Violence/Non-Violence
Soci 254 (3) Development and Underdevelopment

MAJOR CONCENTRATION IN POLITICAL SCIENCE
(36 credits)

Complementary Courses (36 credits)
36 credits of Political Science courses, as follows:

No more than one-half (18 credits) of the credits in a single field.
(If the field in question is Comparative Politics, the maximum is 21
credits, provided courses are taken in both Developed Areas and
Developing Areas.)

In the first year of the program, students are advised to select 12 -
15 credits from at least three of the four main fields (Comparative
Government and Politics, Canadian and Quebec Government
and Politics, International Politics, Political Theory).

No more than 15 of the 36 credits may be at the 200 level.

In the final year, no program courses may be taken below the 300
level.

Students may take only one 500-level Political Science Honours
Seminar and it is to be taken in the final year.

The normal course load for a first-year student is 30 credits; a
typical course distribution is given in the Departmental guidelines.

First-year students normally may take courses at the 200-level on-
ly. First-year students in the second term of a 90-credit program
may, with the approval of their advisor at Course Change period,
take one 300-level course provided that they have ob-
tained an average of B+ in their first-term courses and that they
have taken the prerequisite 200-level course. Second-year stu-
dents in the third term of a 120-credit program may take one 300-
level course provided they have taken the prerequisite course at
the 200 level.

HONOURS IN POLITICAL SCIENCE (54 credits)

Note: The following provides only a summary view of the program.
Detailed information is provided in the handout “Programs in Poli-
tical Science,” available from the Department or on the Web; all
Honours and potential Honours students must read it before see-
ing an advisor.

The Honours program in Political Science consists of 54 credits,
of which 48 must be in Political Science. The remaining 6 credits
must be in related social studies disciplines and must be taken at
the 300 or 400 level.

Students wishing to take Honours Political Science will be
admitted to the program in their second year in Political Science.
In their first year in political science, they should register as Major
students and take 12-15 credits in Political Science spread over at
least three of the four main fields offered by the Department
(Comparative Politics, Canadian and Quebec Politics, Interna-
tional Politics, Political Theory). Potential Honours students are
also strongly encouraged to take one of the basic courses in eco-
nomic analysis (ECON 208 and ECON 209 or ECON 230D1/
ECON 230D2). The introductory course requirements in the vari-
ous fields of Political Science are the same as those presented in
the description of the Major program above.
Students in the Honours Political Science program are encouraged to concentrate in one or two of the major fields offered by the Department. While concentration is considered beneficial, excessive specialization is discouraged. Students will normally not be permitted to take more than half of their Political Science credits in any one field. Honours students are required to take a 3-credit course in Methods (POLI 311) and a 3-credit course in Political Theory (at any level). They are also required to take one-quarter of their Political Science credits (12 credits) at the 400 level or higher, including at least one 500- or 600-level Seminar. Students can satisfy this one-quarter rule by taking one 400-, one 500-, and one 600-level course. Students who do not have the prerequisites for a course may be asked to withdraw from the course. Further information may be obtained from one of the Honours advisers.

Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.30.

**JOINT HONOURS – POLITICAL SCIENCE COMPONENT**
(36 credits)

Students who wish to study at the Honours level in two Arts disciplines can combine Joint Honours Program components from any two Arts disciplines; see section 5.11.4 “Joint Honours Programs” for a list of available programs.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

**Note:** The following provides only a summary view of the program. Detailed information is provided in the handout "Programs in Political Science," available from the Department; all Joint Honours and potential Joint Honours students must read it before seeing an adviser.

To meet the requirements for Joint Honours degrees, students must complete 36 credits in Political Science and meet the requirements set forth by the other Department. Students wishing to follow a Joint Honours program will be admitted in their first year in political science. Joint Honours students normally take 12 credits in Political Science, 12 credits in the other Honours subject and 6 credits of other courses in each year of their program.

In the first year in political science, the 12 credits in Political Science should cover at least two (preferably three) of the four main fields offered by the Department. While some concentration is encouraged, students will normally not be permitted to take more than half their Political Science credits in any one field. Joint Honours students are required to take a Political Science course in Methods (POLI 311) unless they are authorized to take an equivalent social science methods course in another department (Sociology, Economics). In that case they are required to take a course (at any level) in Political Theory. They are also required to take one-quarter of their Political Science credits (i.e., 9 credits) at the 400 level or higher, including at least one 500- or 600-level Seminar. Students can satisfy the one-quarter rule by taking one 500- and one 600-level course. Students who do not have the prerequisites for a course may be asked to withdraw from the course.

According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.30.

**HONOURS STANDARDS**

To enter, remain and graduate in Honours, students must achieve/maintain a B+ average in their political science courses and more than half of the political science grades must be at the B+ level or higher. To be awarded First Class Honours at graduation, in addition to a 3.50 CGPA, students must achieve an A-average in their political science courses and more than half of political science grades must be at the A-level or higher. All political science courses taken at McGill are counted in determining a student's standing. (The specific criteria are given in the brochure “Programs in Political Science,” which may also be found on the Department Website.) To be awarded Honours at graduation, students must be registered in the Honours program in their final year. At graduation, students' Honours standing will be determined by their overall record in the Honours program.

Further information may be obtained from the Head of the Honours program.

**5.12.43 Psychology (PSYC)**
Stewart Biological Sciences Building, Room W8/1
1205 Docteur Penfield Avenue
Montreal, QC H3A 1B1
Telephone: (514) 398-6100
Fax: (514) 398-4896
E-mail: info@psych.mcgill.ca
Website: www.psych.mcgill.ca

The Psychology department offers programs in both Arts and Science. For a list of teaching staff and an outline of the nature of Psychology refer to the Science entry “Psychology (PSYC)” in section 12.13.29. Programs which may be taken by Arts students are described in this section, those listed under the Faculty of Science may be taken by Science students only.

**Note:** The B.A. (or B.Sc.) with a Major Concentration or Honours degree in psychology is not a professional qualification. It does not qualify the individual to carry on professional work in psychology.

**INFORMATION MEETINGS FOR NEW STUDENTS**

All new students entering the Psychology undergraduate program are required to attend an Information Meeting prior to registration. Students planning to pursue a Bachelor of Arts, or a Bachelor of Arts and Science, with a Major Concentration in Psychology must attend one of these meetings. Newly admitted students from CEGEPs should attend an information session on June 14, 2007 at 10:00 a.m. in Room S3/3 of the Stewart Biological Sciences building. There will be another information session on August 27, 2007 at 14:30 in Room S1/3 of the Stewart Biological Sciences building for all other students, and for any CEGEP students who could not attend the earlier meeting. At this meeting, Nicole Allard, the Academic Adviser, will explain the requirements of the Department's programs. Incoming students will have an opportunity to ask questions and receive advice on how to plan their courses. After this meeting students in the Major Concentration in Psychology will make appointments for individual advising sessions and fill out their Study Plan form for registration.

Entering students must bring their letter of acceptance and a copy of their collegiate transcripts. They will also need this Calendar and a preliminary Class Schedule. Students will also find the Psychology Department Handbook helpful. The Handbook contains more detailed descriptions of Psychology courses, as well as providing guidelines for how students might pursue particular areas of interest. The Handbook is available on the Department Website: www.psych.mcgill.ca/ugrad/ugradm.htm.

Students entering the Psychology program in January are encouraged to call the Academic Adviser, Nicole Allard, in December to clarify their course selections.

**COURSE GROUPS: LIST A AND LIST B**

The study of psychology covers many fields. To develop a breadth of understanding in psychology, students are expected to obtain knowledge beyond the introductory level in two or more areas of psychology. To ensure this requirement is met, Psychology courses are divided into two lists. List A covers the areas of behavioural neuroscience, cognition and quantitative methods. List B covers social, health and developmental psychology.

**List A (Behavioural Neuroscience, Cognition and Quantitative Methods)**
- PSYC 301 (3) Animal Learning & Theory
- PSYC 308 (3) Behavioral Neuroscience 1
- PSYC 310 (3) Human Intelligence
- PSYC 311 (3) Human Cognition and the Brain
- PSYC 315 (3) Computational Psychology
- PSYC 317 (3) Genes and Behaviour

**MINOR CONCENTRATION IN PSYCHOLOGY** *(18 credits)*

Students registered in a Bachelor of Arts program in another department may pursue a Minor Concentration in Psychology. This Minor Concentration is expandable for students who may wish to transfer into a Major Concentration in Psychology at a later date.

**Recommended background:** Students are advised to complete a course in Introductory Psychology at the collegial or freshman level. Students who have not previously completed CEGEP Psychology 350-101 or 350-102 or equivalent are required to complete PSYC 100 during the first year of study at McGill.

**Complementary Courses** *(18 credits)*

6 credits selected from:

- PSYC 204 (3) Introduction to Psychological Statistics
- PSYC 211 (3) Intro Behavioral Neuroscience
- PSYC 212 (3) Perception
- PSYC 213 (3) Cognition
- PSYC 215 (3) Social Psychology

12 credits in Psychology at the 300 level or above.

**MINOR CONCENTRATION IN BEHAVIOURAL SCIENCE** *(18 credits)*

Students who wish to go on to graduate training in Psychology, and those who may wish to apply for membership in the Ordre des Psychologues du Québec (once the additional graduate requirements of the Ordre have been completed), are advised to take the following supplementary Minor Concentration in Behavioural Science. Note that this counts as a second Minor Concentration, and is open only to students registered in the Major Concentration in Psychology. A first Minor Concentration must also be completed in a discipline other than Psychology.

**Complementary Courses** *(18 credits)*

3 credits in Psychology from List A
3 credits in Psychology from List B
3 credits in Psychology at the 400 or 500 level
9 credits at the 300 level or above from one or more of the following disciplines: Psychology (PSYC), Anthropology (ANTH), Linguistics (LING), or Sociology (SOCI)

**MAJOR CONCENTRATION IN PSYCHOLOGY** *(36 credits)*

Students with a Major Concentration in Psychology must obtain a minimum grade of C in all 36 credits of the program. A grade lower than C may be made up by taking another equivalent course (if there is one), by successfully repeating the course, or by successfully writing a supplemental examination (if there is one).

The Major Concentration in Psychology does not provide sufficient undergraduate background to enable students to apply for membership in the Ordre des Psychologues du Québec, even once the additional graduate requirements of the Ordre have been completed. Students who are interested in practising psychology in Quebec are advised to also complete the Minor Concentration in Behavioral Science.

**Recommended Background:**

Students registered in a Bachelor of Arts degree with a Major Concentration or Honours program in Psychology, and those registered in a Bachelor of Arts and Science degree with a Major Concentration or Joint Honours Component in Psychology, are advised to complete courses in Introductory Psychology and Human Biology at the collegial level.

Students who have not previously completed Psychology 350-101 or 350-102 in CEGEP will be required to register for PSYC 100 during their U1 year. Bachelor of Arts students who have not completed one Biology 101-301, 101-401, 101-911 or 101-921 in CEGEP will be required to complete BIOL 115 (or, if they prefer, BIOL 111 or BIOL 112) during their U1 year.
of Arts and Science students who have not completed one course in General Biology (CEGEP objective OOUK, OOXU or equivalent) will be required to complete one of BIOI 111 or BIOI 112 during their U1 year.

All students who have completed either Mathematics 201-307 or 201-337 or equivalent, or the combination of Quantitative Methods 360-300 with Mathematics 201-300, and who obtained a minimum grade of 75%, will be exempt from PSYC 204. Bachelor of Arts students will replace this requirement with 3 credits at the 300 level in one of the following disciplines: Psychology (PSYC), Anthropology (ANTH), Linguistics (LING) or Sociology (SOCI).

Bachelor of Arts and Science students will replace this requirement with 3 credits in Psychology at the 300 level or above.

### Required Courses (18 credits)
- PSYC 204 (3) Introduction to Psychological Statistics
- PSYC 211 (3) Intro Behavioral Neuroscience
- PSYC 212 (3) Perception
- PSYC 213 (3) Cognition
- PSYC 215 (3) Social Psychology
- PSYC 305 (3) Statistics for Experimental Design

### Complementary Courses (18 credits)
3 credits in Psychology from List A
3 credits in Psychology from List B
12 credits in Psychology, at least 6 at the 400 or 500 level

**Note:** Students who wish to apply to the Honours Program in Psychology must complete the following courses in their U1 year to be eligible for admission: PSYC 204, PSYC 211, PSYC 212, PSYC 213, PSYC 215. Students who have been exempted from PSYC 204 are advised to complete PSYC 305 in U1. All students must complete a minimum of 27 graded credits in U1 to be eligible for admission to the Honours Program.

### B.A. HONOURS IN PSYCHOLOGY (60 credits)
Honours in Psychology prepares students for graduate study, and so emphasises practice in the research techniques which are used in graduate school and professionally later on. Students are accepted into Honours at the beginning of their U2 year, and the two-year sequence of Honours courses continues through U3.

Admission to Honours is selective. Students with a cumulative grade point average of 3.00 or better are eligible to apply, since enrolment is limited. The usual GPA for admission to this program is 3.50 (based on a 27-30 graded credit program over two terms). Students must complete the following courses in their U1 year to be eligible to apply to the Honours Program: PSYC 204, PSYC 211, PSYC 212, PSYC 213 and PSYC 215. Students who have been exempted from PSYC 204 due to previous courses completed in CEGEP are advised to complete PSYC 305 in their U1 year. Once in the Honours Program, the student must obtain a GPA of 3.00 in the U2 year in order to continue in the program for U3. Students in the Honours Program are required to complete a minimum of 27 graded credits per academic year.

Applications can be obtained from the Undergraduate Office of the Department of Psychology, Room N7/9A, Stewart Biological Sciences Building. The applications must be completed and returned to the Undergraduate Office by August 1 for September admission and by December 1 for January admission. Candidates will be advised of the Department's decision through a notice posted in front of the Undergraduate Adviser's Office, N7/9, before classes begin in September or in January.

Students should note that awarding of the Honours degree will depend on both cumulative grade point average and a minimum grade of B on PSYC 380D1/PSYC 380D2. PSYC 482, "First Class Honours" is awarded to students who obtain a minimum CGPA of 3.50 and a minimum grade of A- in the required honours courses, namely PSYC 380D1/D2, PSYC 482. "Honours" is awarded to students with a minimum CGPA of 3.00 and a minimum grade of B in the required honours courses, namely PSYC 380D1/D2, PSYC 482. More specifically, awarding of the Honours degree normally requires completion of two full years of study, U2 and U3, in the Psychology Department. Students with particularly strong academic records may be admitted for the U3 year only on the basis of their marks and research experience. These students must complete all Honours Program requirements.

#### U1 Required Courses (15 credits)
- PSYC 204 (3) Introduction to Psychological Statistics
- PSYC 211 (3) Intro Behavioral Neuroscience
- PSYC 212 (3) Perception
- PSYC 213 (3) Cognition
- PSYC 215 (3) Social Psychology

Note: PSYC 100 may be taken as a corequisite with these basic courses.

#### U1 or U2 Required Course (3 credits)
- PSYC 305 (3) Statistics for Experimental Design

#### U2 Required Courses (9 credits)
- PSYC 380D1 (4.5) Honours Research Project Seminar
- PSYC 380D2 (4.5) Honours Research Project Seminar

#### U3 Required Courses (3 credits)
- PSYC 482 (3) Advanced Honours Seminar

### Complementary Courses (30 credits)
12 credits to be selected from:
- PSYC 403 (3) Modern Psychology in Historical Perspective
- PSYC 483 (3) Seminar in Experimental Psychopathology
- PSYC 495 (6) Psychology Research Project 2
- PSYC 496 (6) Seniors Honours Research 1
- PSYC 497 (6) Seniors Honours Research 2
- PSYC 498D1 (4.5) Senior Honours Research
- PSYC 498D2 (4.5) Senior Honours Research

Any Psychology course at the 500 level.

6 credits in Psychology from List A
6 credits in Psychology from List B

6 credits at the 300 level or above in the following disciplines: Psychology (PSYC), Anthropology (ANTH), Linguistics (LING), or Sociology (SOCI)

### JOINT HONOURS – PSYCHOLOGY COMPONENT (36 credits)

Students planning to pursue the Joint Honours Component in Psychology are advised to complete courses in Introductory Psychology and Human Biology at the collegial level.

Students who have completed either Mathematics 201-307 or 201-337 or equivalent, or the combination of Quantitative Methods 360-300 with Mathematics 201-300, and who obtained a minimum grade of 75%, will be exempt from PSYC 204. Bachelor of Arts students who have not completed one Biology 101-301, 101-401, 101-911 or 101-921 in CEGEP will be required to complete BIOI 115 (or, if they prefer, BIOI 111 or BIOI 112) during their U1 year.

Bachelor of Arts students who have not completed one Biology 101-301, 101-401, 101-911 or 101-921 in CEGEP will be required to complete BIOI 115 (or, if they prefer, BIOI 111 or BIOI 112) during their U1 year.

Bachelor of Arts and Science students who have not completed one course in General Biology (CEGEP objective OOUK, OOXU or equivalent) will be required to complete one of BIOI 111 or BIOI 112 during their U1 year. Students who have not completed Biology CEGEP objective OOUK or OOXU or equivalent will be required to complete BIOI 111 or BIOI 112 during their U1 year.

All students who have completed either Mathematics 201-307 or 201-337 or equivalent, or the combination of Quantitative Methods 360-300 with Mathematics 201-300, and who obtained a minimum grade of 75%, will be exempt from PSYC 204. Bachelor of Arts students will replace this requirement with 3 credits at the 300 level in one of the following disciplines: Psychology (PSYC), Anthropology (ANTH), Linguistics (LING) or Sociology (SOCI).

Bachelor of Arts and Science students will replace this requirement with 3 credits in Psychology at the 300 level or above.

Students may apply to the Joint Honours Component upon completion of the U1 year. Eligible students must have completed the following Psychology courses: PSYC 204, PSYC 211, PSYC 212, PSYC 213 and PSYC 215. Students who have been exempted from PSYC 204 due to previous studies must complete PSYC 305. Admission to the Joint Honours Component is selective. Students with a cumulative grade point average of 3.00 or higher are eligible to apply; however, normally only students with a U1 GPA above 3.50 based on a 27-30 graded credit program are
admitted. Once in the Joint Honours Component, students must obtain a GPA of 3.00 in the U2 year in order to continue in the program for U3. Students in the Joint Honours Component are required to complete 27 graded credits per academic year (Fall and Winter terms), and those who intend to apply for admission to the Joint Honours Component should do so as well.

“First Class Honours” is awarded to students who obtain a minimum CGPA of 3.50 and a minimum grade of A- in the required honours courses, namely PSYC 380D1/D2, PSYC 482. “Honours” is awarded to students with a minimum CGPA of 3.00 and a minimum grade of B in the required honours courses, namely PSYC 380D1/D2, PSYC 482.

**U1 Required Courses** (15 credits)
- PSYC 204 (3) Introduction to Psychological Statistics
- PSYC 211 (3) Intro Behavioral Neuroscience
- PSYC 212 (3) Perception
- PSYC 213 (3) Cognition
- PSYC 215 (3) Social Psychology

Note: PSYC 100 may be taken as a corequisite with these basic courses.

**U1 or U2 Required Course** (3 credits)
- PSYC 305 (3) Statistics for Experimental Design

**U2 Required Courses** (9 credits)
- PSYC 380D1 (4.5) Honours Research Project Seminar
- PSYC 380D2 (4.5) Honours Research Project Seminar

**U3 Required Course** (3 credits)
- PSYC 482 (3) Advanced Honours Seminar

**Complementary Courses** (6 credits)
- 3 credits in Psychology at the 300 level or above
- 3 credits in Psychology at the 400 or 500 level

**LA CONCENTRATION MINEUR EN ÉTUDES SUR LE QUÉBEC MINOR CONCENTRATION IN QUEBEC STUDIES** (18 credits) (Expandable)

La concentration Mineur en Études sur le Québec a pour but de donner à l'étudiant(e) une connaissance générale de la société québécoise à la fois interdisciplinaire et complémentaire à sa propre discipline de spécialisation.

On peut s'inscrire à la concentration Mineur en U2 ou en U3. Le titre de chaque cours indique s'il est donné en français ou en anglais, mais les travaux et examens peuvent toujours être rédigés dans l'une ou l'autre de ces deux langues (sauf au Département de langue et littérature françaises, où le français est de rigueur).

The Quebec Studies Program is intended to stimulate interdisciplinary studies and exchanges centering on Quebec society.

With departmental support, a Major Concentration and a Minor Concentration are offered, both of which consist of a coherent series of courses providing an interdisciplinary perspective on Quebec society in a Canadian and an international context.

Except for the general course (QCST 300), the Tutorial (QCST 472D1/QCST 472D2) and the seminar (QCST 440), courses included in the Major Concentration or Minor Concentration are the responsibility of the departments. To obtain a complete description of these courses and the admission requirements (where applicable), students should read the relevant sections of the McGill Calendar and, if necessary, consult with the departments concerned, bearing in mind that not all courses are available in any given year. Please take note that an adviser or a director of a program can recommend registration in a course without imposing this choice. The final decision belongs to the student if the student has successfully completed the course prerequisites.

The title of each course indicates whether it is given in French or English, but term papers and exams can be written in either of these two languages (except in the French Language and Literature Department, where French is the rule).

**Cours Obligatoires/Required Courses** (6 credits)
- Études sur le Québec (QCST 300)
- Aspects du Québec contemporain (QCST 440)

**Complémentaires/Complementary** (12 credits)
- 12 crédits, dont au moins 3 doivent faire partie du tronc commun et les autres peuvent provenir de l'ensemble des cours.
- Le choix de ces cours se fera en consultation avec le Directeur du programme et variera selon le domaine de spécialisation de chaque étudiant(e).

12 credits, at least 3 of which must be from Core courses, chosen from the Complementary Course lists below.

The selection of courses will be made in consultation with the Program Director and will vary depending on the Major Concentration or Honours program of each student.
Cours obligatoires/Required Courses
(36 credits)

La concentration Majeur en études sur le Québec s'adresse aussi bien aux étudiant(e)s du Québec et du Canada qu'à ceux et celles de l'étranger. Ce programme veut offrir à chaque étudiant(e) une connaissance du Québec à la fois large et approfondie, tout en lui permettant de recevoir une bonne formation interdisciplinaire.

The Major Concentration in Quebec Studies is intended for students from inside as well as outside Quebec and Canada. Its goal is to provide the student with a wide and thorough knowledge of Quebec, while allowing him/her to focus on several fields of study.

(James McGill Professor of Hinduism/Comparative Religion)

Associate Professors
Ellen B. Aitken; A.B.(Harvard), M.Div.(University of the South), Th.D.(Harvard) (Associate Professor of Early Christian History and Literature)
Ian H. Henderson; B.A.(Man.), B.D.(St. Andrews), M.A.(McMaster), D.Phil.(Oxford)
G. Victor Horii; B.A.(York), M.A.(Toronto), Ph.D.(Stanford)
W.J. Torrance Kirby; B.A.(King's; Halifax), M.A., D.Phil.(Oxford)
Patricia G. Kirkpatrick; B.A.(Dalhousie), M.T.(London), Ph.D.(Oxford)

Assistant Professors
Lara Braitstein; B.A., M.A.(McGill) (Assistant Professor of Buddhism)
Daniel Cere, B.A., M.A.(McGill), Ph.D.(Ottawa)
Gaëlle Fiasse; B.A., M.A., Ph.D.(Louvain-le-Neuve) (Assistant Professor of Ethics and Religious Ethics) (Joint appointment with Department of Philosophy)
Devesh Soneji, B.A.(Manitoba), Ph.D.(McGill) (Assistant Professor of Hinduism)

Faculty Lecturer
Jim Kanaris; B.A.(Ottawa), M.A., Ph.D.(McGill)

Course Lecturers
Norman Cernott; A.B.(California), M.A., Ph.D.(McGill)
Melissa Curley; B.A., M.A., Ph.D. Candidate(McGill)
Michel Distefano; B.A.(Providencia Col.), M.A.(Trinity International University)
Manuel J. JMartin; B.A.(Ottawa), B.Lit(Oxford), D.Phil.(Strasbourg)
Jeffrey Keiser; B.Sc.(Biology), B.A.(Harvard), Ph.D. Candidate(McGill)
David Koloszycz, B.A., M.A., Ph.D. Candidate(McGill)
Sanjay Kumar; B.A.(Maharshi Dayanand), M.A.(Meerut), M.Phil.(University of Delhi), Ph.D. Candidate(McGill)
Cory Labrecque; B.Sc., M.A.(McGill)

Adjunct Professor
Lois Anwen; B.A.(Toronto), B.A.(Winnipeg), M.S.T.(St. Andrew's Col., Sask.), S.T.M.(St. Andrew's Col., Sask.), Ph.D. Candidate(McGill)
Lucille Marr; B.A., M.A., Ph.D.(Waterloo)
Rowshan Nemaatee; B.A.(Trinity College of Vermont), M.A.(McGill)
Michelle Rebidoux; B.A.(York), M.A.(UBC)
Vanessa Sasson; B.A., M.A., Ph.D.(McGill)
Manjit Singh; B.A., M.A.(Delhi)
John M. Simons; B.A.(Bishop's), S.T.B.(Trinity), Ph.D.(Georgetown) (PT)
Glenn Smith; B.A.(Michigan), M.A.(Ottawa), M.Div.(Northwestern Baptist College, Illinois), D.Min.(United University of the South)
Michael Storch; B.A.(Alta), Ph.D. Candidate(McGill)
Philippe Turenne, B.A., Ph.D. Candidate(McGill)
John Vissers; B.A.(Toronto), M.Div.(Knox, Toronto), Th.M.(Princeton), Th.D.(Toronto)
Richard Walker; B.A., M.A.(Calgary), Ph.D. Candidate(McGill)
R. Saraswati Sainath, B.Sc., M.A., M.Phil., Ph.D.(Madrasi), Ph.D. Candidate(McGill)

Numata Visiting Professor
Joel Tatelman; B.A.(Manitoba), M.A.(Toronto), M.Div.(McGill), D.Phil.(Oxford)

Associate Member
Leigh Turner; B.A.(Winnipeg), M.A.(Manitoba), M.A., Ph.D.(USC)

Adjunct Professor
Philip Joubert; B.A., M.Div.(Acadia), M.Div.
Tim Jipa Langri; Dr. Div., B.A.(King's College), Ph.D.(Cambridge)
John M. Simons; B.A.(Bishop's), S.T.B.(Trinity), Ph.D.(Georgetown) (PT)

Religious Studies Programs in Arts
Available within the Faculty of Arts are a Major Concentration and a Minor Concentration in World Religions, a Major Concentration in Scriptures and Interpretations, and a Minor Concentration in Scriptural Languages as well as an Honours and a Joint Honours Program with two options: Western Religions and Asian Religions.
These programs are administered by the Faculty of Arts and the general rules, regulations and requirements of that Faculty apply to them. Students interested in these programs can obtain information from the Faculty of Arts Website at www.mcgill.ca/arts and the Religious Studies Website, or from a Religious Studies B.A. Adviser. For general information on Religious Studies programs, make an appointment to see an adviser by telephoning (514) 398-4121 or visiting the Reception office in the Birks Building. Admission to the B.A. program is granted according to criteria established by the Faculty of Arts.

Students interested in theology programs will find information about the Bachelor of Theology (B.Th.), see section 11.5 and the Master of Divinity (M.Div.), section 11.4.

MINOR CONCENTRATION IN WORLD RELIGIONS (18 credits) (Expandable to Major Concentration in World Religions) The Minor Concentration in World Religions introduces students to the major world religions and to the academic study of religion.

Complementary Courses (18 credits*)
12 credits in Religious Traditions, chosen from the following:

**Judaism and Christianity**
- RELG 201 (3) Religions of the Ancient Near East
- RELG 202 (3) Religion of Ancient Israel
- RELG 203 (3) Bible and Western Culture
- RELG 204 (3) Judaism, Christianity and Islam
- RELG 210 (3) Jesus of Nazareth
- RELG 300 (3) Second Temple Judaism
- RELG 302 (3) Old Testament Studies 1
- RELG 303 (3) Literature of Ancient Israel 2
- RELG 306 (3) Rabbinic Judaism
- RELG 307 (3) Bible, Quran & Interpretations
- RELG 311 (3) New Testament Studies 1
- RELG 312 (3) New Testament Studies 2
- RELG 313 (3) Topics in Biblical Studies 1
- RELG 314 (3) Topics in Biblical Studies 2
- RELG 320 (3) History of Christian Thought 1
- RELG 322 (3) The Church in History 1
- RELG 323 (3) The Church in History 2
- RELG 324 (3) Armenian Apostolic Tradition
- RELG 325 (3) Varieties Religious Experience in Christianity
- RELG 326 (3) Ancient Christian Church AD54 - AD604
- RELG 327 (3) History of Christian Thought 2
- RELG 330 (3) Reformed Theology
- RELG 336 (3) Contemporary Theological Issues
- RELG 338 (3) Women and the Christian Tradition
- RELG 399 (3) Christian Spirituality
- RELG 420 (3) Canadian Church History
- RELG 423 (3) Reformation Thought
- RELG 470 (3) Theological Ethics
- RELG 502 (3) Greco-Roman Judaism

**Hinduism and Buddhism**
- RELG 252 (3) Hinduism and Buddhism
- RELG 253 (3) Religions of East Asia
- RELG 337 (3) Themes in Buddhist Studies
- RELG 339 (3) Gender & Sexuality in Buddhism
- RELG 342 (3) Theravada Buddhist Literature
- RELG 344 (3) Maháyána Buddhism
- RELG 348 (3) Classical Hinduism
- RELG 350 (3) Bhakti Hinduism
- RELG 352 (3) Japanese Religions
- RELG 354 (3) Chinese Religions
- RELG 356 (3) Gender & Sexuality in Hinduism
- RELG 442 (3) Pure Land Buddhism
- RELG 451 (3) Zen: Maxims and Methods
- RELG 452 (3) East Asian Buddhism
- RELG 453 (3) Vajrayana Buddhism
- RELG 454 (3) Modern Hindu Thought
- RELG 546 (3) Indian Philosophy
- RELG 547 (3) Special Topics in Hinduism
- RELG 548 (3) Indian Buddhist Metaphysics
- RELG 549 (3) Japanese Buddhist Philosophy
- RELG 551 (3) Special Topics in Buddhism
- RELG 552 (3) Advaita Vedanta
- RELG 553 (3) Religions of South India 1
- RELG 554 (3) Religions of South India 2
- RELG 556 (3) Issues in Buddhist Studies
- RELG 557 (3) Asian Ethical Systems

6 credits in Comparative Studies, chosen from the following:
- RELG 207 (3) The Study of World Religions 1
- RELG 256 (3) Women in Judaism and Islam
- RELG 270 (3) Religious Ethics and the Environment
- RELG 271 (3) Sexual Ethics
- RELG 315 (3) Special Topics in Religion 1
- RELG 316 (3) New Religious Movements
- RELG 317 (3) Special Topics in Religion 2
- RELG 318 (3) Special Topics in Religion 3
- RELG 319 (3) Special Topics in Religion 4
- RELG 341 (3) Introduction: Philosophy of Religion
- RELG 345 (3) Religion and the Arts 1
- RELG 347 (3) Topics in Religion and the Arts
- RELG 355 (3) Religion and the Arts 2
- RELG 361 (3) Religious Behaviour
- RELG 370 (3) Human Condition
- RELG 371 (3) Ethics of Violence/Non-Violence
- RELG 376 (3) Religious Ethics
- RELG 555 (3) Honours Seminar
- RELG 571 (3) Religion and Medicine

* No more than 12 credits of the Minor may be taken at the 200 level.

MINOR CONCENTRATION IN SCRIPTURAL LANGUAGES (18 credits) (Non-expandable) The Minor Concentration in Scriptural Languages is designed to provide students with the skills necessary to read Scriptural sources in their original languages. The Minor is recommended to be followed in conjunction with the Major Concentration in Scriptures and Interpretations.

Students will choose from one of two streams:
- Stream I: Biblical Languages
- Stream II: Indo-Tibetan Languages

**MINOR CONCENTRATION IN SCRIPTURAL LANGUAGES STREAM I: BIBLICAL LANGUAGES COMPLEMENTARY COURSES (18 credits)**
chosen from among the following:

**Biblical Hebrew**
- RELG 390D1* (3) Elementary Biblical Hebrew
- RELG 390D2* (3) Elementary Biblical Hebrew
- RELG 491 (3) Hebrew Texts
- RELG 492 (3) Hebrew Texts
- JWST 327 (3) A Book of the Bible
- JWST 328 (3) A Book of the Bible
- JWST 329 (3) A Book of the Bible
- JWST 330 (3) A Book of the Bible

**Biblical Greek**
- RELG 280 (6) Elementary New Testament Greek
- RELG 381 (3) Advanced New Testament Greek
- RELG 482 (3) Exegesis of Greek New Testament
- RELG 583 (3) Hellenistic Religious Texts

* Students with advanced standing in Hebrew may take Aramaic as part of their program.

**MINOR CONCENTRATION IN SCRIPTURAL LANGUAGES STREAM II: INDO-TIBETAN LANGUAGES** Sanskrit is the language of classical Indian civilization and is recommended for students interested in gaining access to religious
texts, philosophical works, academic treatises on all subjects and poetry written in classical and medieval India.

Classical Tibetan is one of the main scriptural languages of Buddhism. Many texts originally composed in Sanskrit are only extant in their Tibetan translations, and a vast body of philosophical, devotional, poetic and academic works composed in Classical Tibetan is only accessible to one who has a firm grasp of the language.

**Complementary Courses** (18 credits)
chosen from among the following:

*Sanskrit*
- RELG 257D1 (3) Introductory Sanskrit
- RELG 257D2 (3) Introductory Sanskrit
- RELG 357D1 (3) Sanskrit 2
- RELG 357D2 (3) Sanskrit 2
- RELG 457D1 (3) Advanced Sanskrit
- RELG 457D2 (3) Advanced Sanskrit

*Tibetan:*
- RELG 264 (3) Introductory Tibetan 1
- RELG 265 (3) Introductory Tibetan 2
- RELG 364 (3) Intermediate Tibetan 1
- RELG 365 (3) Intermediate Tibetan 2
- RELG 464 (3) Advanced Tibetan 1
- RELG 465 (3) Advanced Tibetan 2

### MAJOR CONCENTRATION IN WORLD RELIGIONS
(36 credits)
The Major Concentration in World Religions offers students a broad introduction to the study of the world's major religions, with the possibility for concentration in a student's specific areas of interest. Developing an understanding of methods and problems in comparative approaches to the academic study of religion will be encouraged.

**Required Course** (3 credits)
- RELG 456 (3) Theories of Religion

**Complementary Courses** (33 credits)
33 credits, no more than 12 of which may be taken at the 200 level.

24 credits in World Religions chosen from the following, according to the student's area of interest:

*Judaism and Christianity*
- RELG 201 (3) Religions of the Ancient Near East
- RELG 202 (3) Religion of Ancient Israel
- RELG 203 (3) Bible and Western Culture
- RELG 204 (3) Judaism, Christianity and Islam
- RELG 210 (3) Jesus of Nazareth
- RELG 300 (3) Second Temple Judaism
- RELG 302 (3) Old Testament Studies 1
- RELG 303 (3) Literature of Ancient Israel 2
- RELG 306 (3) Rabbinic Judaism
- RELG 307 (3) Bible, Quran & Interpretations
- RELG 311 (3) New Testament Studies 1
- RELG 312 (3) New Testament Studies 2
- RELG 313 (3) Topics in Biblical Studies 1
- RELG 314 (3) Topics in Biblical Studies 2
- RELG 320 (3) History of Christian Thought 1
- RELG 322 (3) The Church in History 1
- RELG 323 (3) The Church in History 2
- RELG 324 (3) Armenian Apostolic Tradition
- RELG 325 (3) Varieties Religious Experience in Christianity
- RELG 326 (3) Ancient Christian Church AD54 - AD604
- RELG 327 (3) History of Christian Thought 2
- RELG 336 (3) Contemporary Theological Issues
- RELG 338 (3) Women and the Christian Tradition
- RELG 399 (3) Christian Spirituality
- RELG 420 (3) Canadian Church History
- RELG 423 (3) Reformation Thought
- RELG 470 (3) Theological Ethics

*Hinduism and Buddhism*
- RELG 252 (3) Hinduism and Buddhism
- RELG 253 (3) Religions of East Asia
- RELG 337 (3) Themes in Buddhist Studies
- RELG 339 (3) Gender & Sexuality in Buddhism
- RELG 342 (3) Theravada Buddhist Literature
- RELG 344 (3) Mahayana Buddhism
- RELG 348 (3) Classical Hinduism
- RELG 350 (3) Bhakti Hinduism
- RELG 352 (3) Japanese Religions
- RELG 354 (3) Chinese Religions
- RELG 356 (3) Gender & Sexuality in Hinduism
- RELG 442 (3) Pure Land Buddhism
- RELG 451 (3) Zen: Maxims and Methods
- RELG 452 (3) East Asian Buddhism
- RELG 453 (3) Vajrayana Buddhism
- RELG 454 (3) Modern Hindu Thought
- RELG 456 (3) Indian Philosophy
- RELG 457 (3) Special Topics in Hinduism
- RELG 458 (3) Indian Buddhist Philosophy
- RELG 459 (3) Japanese Buddhist Philosophy
- RELG 551 (3) Special Topics in Buddhism
- RELG 552 (3) Advaita Vedanta
- RELG 553 (3) Religions of South India 1
- RELG 554 (3) Religions of South India 2
- RELG 556 (3) Issues in Buddhist Studies
- RELG 557 (3) Asian Ethical Systems

9 credits in Comparative Studies, chosen from the following according to the student's area of interest:
- RELG 207 (3) The Study of World Religions 1
- RELG 256 (3) Women in Judaism and Islam
- RELG 270 (3) Religious Ethics and the Environment
- RELG 271 (3) Sexual Ethics
- RELG 315 (3) Special Topics in Religion 1
- RELG 316 (3) New Religious Movements
- RELG 317 (3) Special Topics in Religion 2
- RELG 318 (3) Special Topics in Religion 3
- RELG 319 (3) Special Topics in Religion 4
- RELG 341 (3) Introduction: Philosophy of Religion
- RELG 345 (3) Religion and the Arts 1
- RELG 347 (3) Topics in Religion and the Arts
- RELG 355 (3) Religion and the Arts 2
- RELG 361 (3) Religious Behaviour
- RELG 370 (3) Human Condition
- RELG 371 (3) Ethics of Violence/Non-Violence
- RELG 376 (3) Religious Ethics
- RELG 571 (3) Religion and Medicine
- RELG 555 (3) Honours Seminar

### MAJOR CONCENTRATION IN SCRIPTURES AND INTERPRETATIONS
(36 credits)
The Major Concentration in Scriptures and Interpretations is designed for students interested in understanding scriptural literatures and their place in developing religious traditions. While students will be able to concentrate in the area of their choice (Jewish, Christian, or Hindu and Buddhist Scriptures and Interpretations), they will study scriptures of at least two religious traditions, either in English translation or, if their skills permit, in the original languages.

**Required Courses** (6 credits)
- RELG 307 (3) Bible, Quran & Interpretations
- RELG 456 (3) Theories of Religion

**Complementary Courses** (30 credits)
30 credits, a minimum of 18 credits from one area of specialization and a minimum of 6 credits from a second area. No more than 12 credits of complementary courses may be taken at the 200 level.
(a) Jewish Scriptures and the History of Their Interpretation

JWST 310 (3) Believers, Heretics and Critics
JWST 324 (3) Biblical Interpretation - Antiquity
JWST 327 (3) A Book of the Bible
JWST 328 (3) A Book of the Bible
JWST 329 (3) A Book of the Bible
JWST 330 (3) A Book of the Bible
JWST 331 (3) Bible Interpretation/Medieval Ashkenaz
JWST 332 (3) Bible Interpretation/Sefardic Tradition
JWST 510 (3) Jewish Biblical Interpretation 1
JWST 511 (3) Jewish Biblical Interpretation 2
RELG 202 (3) Religion of Ancient Israel
RELG 203 (3) Bible and Western Culture
RELG 300 (3) Second Temple Judaism
RELG 302 (3) Old Testament Studies 1
RELG 303 (3) Literature of Ancient Israel 2
RELG 306 (3) Rabbinic Judaism
RELG 308 (3) Ancient Bible Translations
RELG 390D1 (3) Elementary Biblical Hebrew
RELG 390D2 (3) Elementary Biblical Hebrew
RELG 407 (3) The Writings
RELG 408 (3) The Prophets
RELG 491 (3) Hebrew Texts
RELG 492 (3) Hebrew Texts
RELG 502 (3) Greco-Roman Judaism

(b) Christian Scriptures and the History of Their Interpretation

RELG 203 (3) Bible and Western Culture
RELG 210 (3) Jesus of Nazareth
RELG 280 (6) Elementary New Testament Greek
RELG 302 (3) Old Testament Studies 1
RELG 303 (3) Literature of Ancient Israel 2
RELG 308 (3) Ancient Bible Translations
RELG 311 (3) New Testament Studies 1
RELG 312 (3) New Testament Studies 2
RELG 313 (3) New Testament Studies 2
RELG 314 (3) Topics in Biblical Studies 1
RELG 315 (3) Topics in Biblical Studies 2
RELG 381 (3) Advanced New Testament Greek
RELG 411 (3) New Testament Exegesis
RELG 482 (3) Exegesis of Greek New Testament
RELG 583 (3) Hellenistic Religious Texts

(c) Hindu and Buddhist Scriptures and the History of Their Interpretations

RELG 252 (3) Hinduism and Buddhism
RELG 253 (3) Religions of East Asia
RELG 254 (3) Introduction to Sikhism
RELG 257D1 (3) Introductory Sanskrit
RELG 257D2 (3) Introductory Sanskrit
RELG 264 (3) Introductory Tibetan 1
RELG 265 (3) Introductory Tibetan 2
RELG 341 (3) New Testament Exegesis
RELG 342 (3) Theravada Buddhist Literature
RELG 344 (3) Mahāyāna Buddhism
RELG 348 (3) Classical Hinduism
RELG 350 (3) Bhakti Hinduism
RELG 352 (3) Japanese Religions
RELG 354 (3) Chinese Religions
RELG 357D1 (3) Sanskrit 2
RELG 357D2 (3) Sanskrit 2
RELG 364 (3) Intermediate Tibetan 1
RELG 365 (3) Intermediate Tibetan 2
RELG 442 (3) Pure Land Buddhism
RELG 443 (3) Japanese Esoteric Buddhism
RELG 451 (3) Zen: Maxims and Methods
RELG 452 (3) East Asian Buddhism
RELG 453 (3) Vajrayana Buddhism
RELG 454 (3) Modern Hindu Thought

HONOURS IN RELIGIOUS STUDIES (60 credits)

The Honours program in Religious Studies offers a degree of analysis and concentration beyond that of the Major program through coursework, intensive research and discussion with peer groups. To register, students must, however, maintain a program GPA and a CGPA of 3.00 (or 3.50 for First Class Honours).

While gaining general knowledge of the study of religion, students also develop more concentrated expertise in either Western religious traditions (Option 1) or Asian religious traditions (Option 2).

Required Courses (9 credits)

RELG 204 (3) Judaism, Christianity and Islam
RELG 456 (3) Theories of Religion
RELG 555 (3) Honours Seminar

Complementary Courses (51 credits)

3 credits, one of:

RELG 252 (3) Hinduism and Buddhism
RELG 253 (3) Religions of East Asia

6 credits of scriptural languages (Biblical Greek, Biblical Hebrew, Sanskrit, or Tibetan), related to the specialization option and chosen in consultation with the adviser.

9 credits, religion and culture, chosen from:

RELG 256 (3) Women in Judaism and Islam
RELG 270 (3) Religious Ethics and the Environment
RELG 271 (3) Sexual Ethics
RELG 338 (3) Women and the Christian Tradition
RELG 339 (3) Gender & Sexuality in Buddhism
RELG 340 (3) Religion and the Sciences
RELG 341 (3) Religion, Science and the Arts
RELG 345 (3) Religion and the Arts 1
RELG 347 (3) Topics in Religion and the Arts
RELG 355 (3) Religion and the Arts 2
RELG 356 (3) Gender & Sexuality in Hinduism
RELG 361 (3) Religious Behaviour
RELG 370 (3) Human Condition
RELG 371 (3) Ethics of Violence/Non-Violence
RELG 375 (3) Religion and Society
RELG 376 (3) Religious Ethics
RELG 377 (3) Religious Controversies

12 credits chosen from a list of approved courses in other departments in consultation with the adviser. At least 6 credits must be from the specialization option which was not selected.

21 credits chosen from either specialization, Option 1 or Option 2, at least 3 of these credits must be a 500-level research seminar.

Option 1: Western Religions

JWST 510 (3) Jewish Biblical Interpretation 1
RELG 201 (3) Religions of the Ancient Near East
RELG 202 (3) Religion of Ancient Israel
RELG 203 (3) Bible and Western Culture
RELG 204 (3) Judaism, Christianity and Islam
RELG 210 (3) Jesus of Nazareth
RELG 300 (3) Second Temple Judaism
RELG 301 (3) Jewish Thought 200 B.C.E. - 200 C.E.
RELG 306 (3) Rabbinic Judaism
RELG 307 (3) Bible, Quran & Interpretations
RELG 308 (3) Ancient Bible Translations
RELG 311 (3) New Testament Studies 1
RELG 312 (3) New Testament Studies 2

2007-2008 Undergraduate Programs, McGill University
ARTS – RELIGIOUS STUDIES

RELG 313 (3) Topics in Biblical Studies 1
RELG 314 (3) Topics in Biblical Studies 2
RELG 322 (3) The Church in History 1
RELG 323 (3) The Church in History 2
RELG 326 (3) Ancient Christian Church AD54 - AD604
RELG 334 (3) The Christian Faith
RELG 336 (3) Contemporary Theological Issues
RELG 381 (3) Advanced New Testament Greek
RELG 399 (3) Christian Spirituality
RELG 423 (3) Reformation Thought
RELG 438 (3) Topics in Jewish Theology
RELG 482 (3) Exegesis of Greek New Testament

RELG 532 (3) History of Christian Thought 1
RELG 533 (3) History of Christian Thought 2
RELG 583 (3) Hellenistic Religious Texts

Option 2: Asian Religions
RELG 337 (3) Themes in Buddhist Studies
RELG 339 (3) Gender & Sexuality in Buddhism
RELG 342 (3) Theravada Buddhist Literature
RELG 344 (3) Mahayana Buddhism
RELG 348 (3) Classical Hinduism
RELG 350 (3) Bhakti Hinduism
RELG 352 (3) Japanese Religions
RELG 354 (3) Chinese Religions
RELG 422 (3) Pure Land Buddhism
RELG 451 (3) Zen: Maxims and Methods
RELG 452 (3) East Asian Buddhism
RELG 453 (3) Vajrayana Buddhism
RELG 454 (3) Modern Hindu Thought
RELG 546 (3) Indian Philosophy
RELG 547 (3) Special Topics in Hinduism
RELG 548 (3) Indian Buddhist Philosophy
RELG 549 (3) Japanese Buddhist Philosophy
RELG 551 (3) Special Topics in Buddhism
RELG 552 (3) Advaita Vedanta
RELG 553 (3) Religions of South India 1
RELG 554 (3) Religions of South India 2
RELG 556 (3) Issues in Buddhist Studies
EAST 354 (3) Taoist and Buddhist Apocalypses

JOINT HONOURS – RELIGIOUS STUDIES COMPONENT
(36 credits)

Students who wish to study at the Honours level in two Arts disciplines can combine Joint Honours Program components from any two Arts disciplines, see section 5.11.4 “Joint Honours Programs” for a list of available programs.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Students in Joint Honours must maintain a program GPA and a CGPA of 3.00 (3.50 for First Class Honours) and attain a B- or higher in each program course. No overlap is allowed between the courses forming each segment of the Joint Honours program.

Complementary Courses (36 credits)
3 credits from the following:
RELG 252 (3) Hinduism and Buddhism
or RELG 253 (3) Religions of East Asia
3 credits from the following:
RELG 456 (3) Theories of Religion
or RELG 555 (3) Honours Seminar
9 credits selected from the following, with at least 3 credits from each group

Sources of Western Religious Traditions
RELG 201 (3) Religions of the Ancient Near East
RELG 202 (3) Religion of Ancient Israel

RELG 204 (3) Judaism, Christianity and Islam
RELG 311 (3) New Testament Studies 1
RELG 312 (3) New Testament Studies 2
RELG 320 (3) History of Christian Thought 1
RELG 325 (3) Varieties Religious Experience in Christianity
RELG 326 (3) Ancient Christian Church AD54 - AD604
RELG 327 (3) History of Christian Thought 2
RELG 338 (3) Women and the Christian Tradition

6 credits in Religion and Culture, selected from the following:
RELG 256 (3) Women in Judaism and Islam
RELG 271 (3) Sexual Ethics
RELG 340 (3) Religion and the Sciences
RELG 341 (3) Introduction: Philosophy of Religion
RELG 345 (3) Religion and the Arts 1
RELG 347 (3) Topics in Religion and the Arts
RELG 355 (3) Religion and the Arts 2
RELG 361 (3) Religious Behaviour
RELG 370 (3) Human Condition
RELG 371 (3) Ethics of Violence/Non-Violence
RELG 375 (3) Religion and Society
RELG 376 (3) Religious Ethics
RELG 377 (3) Religious Controversies

15 credits, selected in consultation with an adviser, from Religious Studies courses (or approved related courses in other departments) at the 300 level or above.

APPROVED COURSES IN OTHER DEPARTMENTS

In consultation with the Adviser, students may select courses in other departments to count towards Religious Studies programs. Generally no more than four such courses will be counted towards an Honours program; no more than two such courses towards a Joint Honours program; no more than two such courses towards a Minor program. Listed below are some of the courses that have been approved in the past for inclusion in Religious Studies programs.

This list is NOT comprehensive: Students may take approved related courses in other departments of the Faculty of Arts, such as Anthropology, Art History, Classics, English, History, Italian Studies, Philosophy, Sociology. Contact the Religious Studies Office at (514) 398-4121 to speak with an adviser.

Please note that some of these courses have prerequisites that are not approved for Religious Studies programs.

Institute of Islamic Studies
ISLA 410 (3) History: Middle-East 1798-1918
ISLA 411 (3) History of the Middle East 1918-1945
ISLA 505 (3) Major Themes of Islamic Religious Expression
ISLA 510D1 (3) History: Islamic Civilization - Classical
ISLA 510D2 (3) History: Islamic Civilization - Classical
ISLA 511D1 (3) History: Islamic Civilization - Medieval Era
ISLA 511D2 (3) History: Islamic Civilization - Medieval Era
ISLA 531 (3) Survey of the Development of Islamic Thought

Jewish Studies
JWST 211 (3) Jewish Studies 1: Biblical Period (students may not take both JWST 211 and RELG 202 for core credit)
JWST 213 (3) Jewish Studies 3: The Medieval Period
JWST 214 (3) Jewish Studies 4: The Modern Period
JWST 252 (3) Interdisciplinary Lectures (this course will be allowed only when the topic is appropriate)
JWST 316 (3) Social and Ethical Issues in Jewish Law 1
JWST 359 (3) Topics in Jewish Philosophy 2

Courses requiring reading knowledge of Hebrew:
JWST 330 (3) A Book of the Bible
JWST 345 (3) Introduction to Rabbinic Literature
JWST 510 (3) Jewish Biblical Interpretation 1
JWST 511 (3) Jewish Biblical Interpretation 2
JWST 535 (3) Exegetical Midrash
JWST 543 (3) Maimonides as Parshan

Chair — Laura Beraha
Associate Professors
Paul M. Austin; M.A.(C’nell), B.A., Ph.D.(Tor.)
Laura Beraha; B.A., M.A., Ph.D.(McG.)
Many opportunities are open to students with qualifications in Russian and other Slavic studies. Students may be interested in the organization of human society, comparative literature, linguistics – Russian studies are highly relevant to all of these. In addition, because of similar problems in geography, climate, industrial and economic growth, Russian studies may have a particular fascination for the Canadian student. Besides being the language of the Russian Federation, Russian is still widely used in the countries of the former Soviet Union. Since most Eastern European countries have academic exchange programs with Canada, well-qualified students should encounter little difficulty in continuing their university studies in Russia or in Eastern Europe.

Advisers: Professor Paul M. Austin, Room 335, (514) 398-4984
Professor Laura Beraha, Room 341, (514) 398-2802
Professor Lyudmila Parts, Room 332, (514) 398-1719

**MINOR CONCENTRATION IN RUSSIAN** (18 credits)
(Expandable)
The Minor Concentration in Russian includes complementary courses chosen from ONE of the following streams:
- Russian Language & Literature
- Russian Language & Culture
- Advanced Russian Literature
- Advanced Russian Language

Students who wish to follow the Advanced Russian Literature or Advanced Russian Language stream must receive Departmental approval; they are designed primarily for students also intending to complete a Major Concentration in Russian.

Enrolment in courses above the 200 level is by permission of the Department only.

**Required Courses** (12 credits*)
RUSS 210 (3) Elementary Russian Language 1
RUSS 211 (3) Elementary Russian Language 2
RUSS 310 (3) Intermediate Russian Language 1
RUSS 311 (3) Intermediate Russian Language 2

* The required courses are designed to give students a basic working knowledge of Russian. Students who can demonstrate to the Department that they have acquired the equivalent competence elsewhere will replace these credits with courses from the Complementary Course list.

Students must obtain Departmental approval to register for language courses and are strongly urged to consult with the Department for advice/approval of their program plans.

**Complementary Courses** (6 - 18 credits)
6 - 18 credits to be selected from one of the following streams:

**Stream 1: Russian Language & Literature**
RUSS 217 (3) Russia's Eternal Questions
RUSS 330 (3) Introduction to Soviet Russian Language before WWII
RUSS 331 (3) Introduction to Soviet Russian Language after WWII
RUSS 400 (3) Advanced Russian Language 1
RUSS 401 (3) Advanced Russian Language 2

**Stream 2: Russian Language & Culture**
RUSS 199 (3) FYS: Patterns - Russian Culture
RUSS 218 (3) Russian Literature in Revolution
RUSS 219 (3) Russian Literature in Recovery
RUSS 221 (3) Russian Prose: 1980s and 1990s
RUSS 222 (3) Russian Writers - 19th Century
RUSS 224 (3) From War to Revolution

**Stream 3: Advanced Russian Literature**
RUSS 327 (3) Outlines 19th Century Russian Literature: Romantic Period
RUSS 328 (3) Outlines 19th Century Russian Literature: Russian Realism

**MINOR CONCENTRATION IN RUSSIAN CIVILIZATION**
(Non-expandable) (18 credits)
The Minor Concentration in Russian Civilization is designed primarily as an adjunct to area studies and/or programs in the humanities or social sciences. As there are no Russian language requirements, this is a non-expandable program.

There are no prerequisites for Departmental courses. For pre/corequisites and availability of Economics, History, Jewish Studies and Political Science courses, students should refer to the departmental Calendar entry.

**Required Courses** (12 credits)
RUSS 218 (3) Russian Literature in Revolution
RUSS 219 (3) Russian Literature in Recovery
RUSS 223 (3) Russian Writers - 19th Century
RUSS 224 (3) From War to Revolution

**Complementary Courses** (6 credits)
6 credits to be selected from the following list. Please contact the department(s) in question for pre/corequisites and availability of the following courses:
ECON 331 (3) Economic Development: Russia and USSR
ECON 340 (3) Ex-Socialist Economies
HIST 216 (3) History of Russia to 1801
HIST 226 (3) Eastern Europe in 20th Century
HIST 236 (3) Russia from 1801 to 1991
HIST 306 (3) East Central Europe since 1944
HIST 312 (3) East-Central Europe: 1453-1740

**RUSS 330 (3)** Introduction to Soviet Russian Literature before WWII
**RUSS 331 (3)** Introduction to Soviet Russian Literature after WWII
**RUSS 410 (3)** Drama in Russian Literature before 1850
**RUSS 411 (3)** Drama in Russian Literature after 1850
**RUSS 450 (3)** 20th-Century Russian Language and Literature before WWII
**RUSS 451 (3)** 20th-Century Russian Language and Literature after WWII
**RUSS 458 (3)** Development Russian Novel before Turgenev
**RUSS 459 (3)** Russian Novel Pushkin - Gogol
**RUSS 460 (3)** Russian Novel 1860-1900 1
**RUSS 461 (3)** Russian Novel 1860-1900 2
**RUSS 462 (3)** Soviet Literature: Thaw - Early 70s
**RUSS 463 (3)** Soviet Literature: Early 70s - Perestroika
**RUSS 465 (3)** Russian Modernism 1
**RUSS 466 (3)** Russian Modernism 2
**RUSS 468 (3)** Pushkin and Contemporaries 1
**RUSS 469 (3)** Pushkin and Contemporaries 2
**RUSS 470 (3)** Individual Reading Course
**RUSS 471 (3)** Independent Research
**RUSS 510 (3)** High Stalinist Culture

* By arrangement with the Department and subject to University approval, transfer credits will be accepted from Department-approved exchange/immersion programs.

**MINOR CONCENTRATION IN RUSSIAN AND SLAVIC STUDIES**
**MAJOR CONCENTRATION IN RUSSIAN** (36 credits)

Enrolment in courses above the 200 level is by permission of the Department only.

**Required Courses** (18 credits)

**HONOURS IN RUSSIAN** (60 credits)

The Department offers a full Honours Program in Russian for students intending to pursue graduate studies or advanced careers in the field. Students must complete 60 credits in the Program, as well as maintaining a CGPA in accordance with Faculty requirements. All students applying for an Honours in Russian must consult with an academic adviser in the Department for approval of their program. Normally, 200-level courses are taken in U1, 300 in U2 and 400 in U3. By arrangement with the Department and subject to University approval, transfer credits will be accepted from Department-approved exchange/immersion programs. Up to 9 credits, in total, can be taken toward a student’s Honours program from courses offered in other departments in the Faculty, listed at the end of this section. Students who have acquired competency elsewhere will replace lower-level courses with upper-level courses.

In addition to the completion of the Honours requirements, students must also complete at least one Minor Concentration (18 credits) in an academic unit other than the one in which the Honours requirements are satisfied.

**Additional Complementary Courses** (6 credits)

**HIST 313 (3)** East-Central Europe: 1740-1914
**HIST 316 (3)** Russia: Revolutions 1905 and 1917
**HIST 326 (3)** Russia from 1905 to Present
**HIST 329 (3)** Eastern Europe: 4th Century - 1453
**HIST 387 (3)** The First World War
**HIST 388 (3)** The Second World War
**HIST 406 (3)** Petrine and Catherian Russia
**HIST 436 (3)** Topics: European History
**HIST 446 (3)** Russian Thought to 1825
**HIST 456 (3)** Russian Intellectual History 1825-1917
**JWST 303 (3)** The Soviet Jewish Experience
**POLI 329 (3)** Russian and Soviet Politics
**RUSS 199 (3)** FYS: Patterns - Russian Culture
**RUSS 217 (3)** Russia’s Eternal Questions
**RUSS 221 (3)** Russian Prose: 1980s and 1990s
**RUSS 510 (3)** High Stalinist Culture
**SOCI 455 (3)** Post-Socialist Societies

**RUSS 462 (3)** Soviet Literature: Thaw - Early 1970s
**RUSS 461 (3)** Russian Novel 1860-1900 1
**RUSS 460 (3)** Russian Novel 1860-1900 2
**RUSS 459 (3)** Russian Novel Pushkin - Gogol
**RUSS 458 (3)** Development Russian Novel before Turgenev
**RUSS 457 (3)** Russian Modernism 1
**RUSS 466 (3)** Russian Modernism 2
**RUSS 468 (3)** Pushkin and Contemporaries 1

**RUSS 469 (3)** Pushkin and Contemporaries 2
**RUSS 510 (3)** High Stalinist Culture

By arrangement with the Department and subject to University approval, transfer credits will be accepted from Department-approved exchange/immersion programs.
Students must maintain a CGPA in accordance with Faculty regulations. According to Faculty regulations, Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

**JOINT HONOURS – RUSSIAN COMPONENT** (36 credits)

Students must maintain a CGPA in accordance with Faculty requirements. 12 credits in Russian and 12 credits in the cooperating department are normally taken each year. For information telephone (514) 398-3639.

Students who wish to study at the Honours level in two Arts disciplines can combine Joint Honours programs from any two Arts disciplines; see section 5.11.4 “Joint Honours Programs” for a list of available programs.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

**5.12.47 Science for Arts Students**

*Director — Professor Louis Lefebvre (Biology)*, (514) 398-6457

The following courses offered by the Faculty of Science may be of interest to Arts students. Not all courses are available in any given year.

### Atmospheric and Oceanic Sciences

- **ATOC 210** (3) Introduction to Atmospheric Science
- **ATOC 220** (3) Introduction to Oceanic Sciences

### Biology

- **BIOL 115** (3) Essential Biology
- **BIOL 210** (3) Perspectives of Science
- **BIOL 373** (3) Biometry

### Chemistry

- **CHEM 150** (3) World of Chemistry: Food
- **CHEM 160** (3) World of Chemistry: Technology
- **CHEM 170** (3) World of Chemistry: Drugs
- **CHEM 180** (3) World of Chemistry: Environment

### Computer Science

- **COMP 102** (3) Computers and Computing

### Earth and Planetary Sciences

- **EPSC 200** (3) The Terrestrial Planets
- **EPSC 201** (3) Understanding Planet Earth
- **EPSC 210** (3) Introductory Mineralogy
- **EPSC 233** (3) Earth and Life History
- **EPSC 243** (3) Environmental Geology
- **EPSC 334** (3) Invertebrate Paleontology

### Geography

- **GEOG 203** (3) Environmental Systems
- **GEOG 205** (3) Global Change: Past, Present and Future

### Physics

- **PHYS 224** (3) Physics and Psychophysics of Music
- **PHYS 225** (3) Musical Acoustics

### MINOR CONCENTRATION IN SCIENCE FOR ARTS STUDENTS (18 credits)

Freshman students interested in this Minor Concentration should seek advice at the earliest opportunity, either through the Freshman Advisers or by contacting the Program Director. In general, students should declare their intention to obtain this Minor Concentration during their U1 year and consult the Program Director regarding approval of courses to meet the requirements.

This Minor Concentration is administered by the Department of Biology. For more information contact Ms. Anne Comeau in the Biology Department, Room W4/13, Stewart Biological Sciences Building, (514) 398-4109; or the Program Director, Professor Louis Lefebvre, Room W6/10, Stewart Biological Sciences Building, (514) 398-6457.

### Required Courses (3 credits)

- **BIOL 210** (3) Perspectives of Science (in U1)

### Complementary Courses (15 credits)

15 credits taken in one of the disciplinary areas given below. Where suggested courses have prerequisites at the 200 or 300 level associated with them, credit for the associated prerequisites may also be counted as part of the 15 credits.

Prerequisites at the 100 level cannot be counted towards the Minor Concentration.

With the prior written approval of the Program Director, an appropriate alternative set of courses may be substituted.

### DISCIPLINARY AREAS

#### Atmospheric and Oceanic Sciences

Students should note that MATH 133 (or its CEGEP equivalent) is not essential as a prerequisite for these courses.

- **ATOC 210** (3) Introduction to Atmospheric Science
- **ATOC 214** (3) Intro to the Physics of the Atmosphere
- **ATOC 215** (3) Oceans, Weather and Climate
- **ATOC 220** (3) Introduction to Oceanic Sciences

#### Biochemistry

Prerequisites which cannot be counted towards the Minor Concentration: BIOL 111 and BIOL 112 plus CHEM 120 or CHEM 121 or their CEGEP equivalents.

15 credits taken from the following courses and their associated prerequisites:

- **ANAT 262** (3) Introductory Molecular and Cell Biology
- **BIOC 212** (3) Molecular Mechanisms of Cell Function (Prerequisite: BIOL 200)
- **BIOL 200** (3) Molecular Biology
- **CHEM 212** (4) Introductory Organic Chemistry 1

Students who have completed CHEM 212 and CHEM 222 or their CEGEP equivalents may take one or both of the following:

- **BIOC 311** (3) Metabolic Biochemistry (Prerequisite: BIOL 200, BIOL 201 or BIOC 212, CHEM 222)
- **BIOC 312** (3) Biochemistry of Macromolecules (Prerequisite: BIOC 311, BIOL 200, BIOL 201 or BIOC 212)
Biology
Students interested in Biology can choose between two streams. One is oriented towards cell and molecular biology and leads to upper level courses in developmental biology, human genetics, molecular biology, or allied fields. The other is oriented more to organismal biology and leads to upper level courses in biodiversity, ecology, sociobiology, neurobiology, behaviour, or conservation biology. See Ms. Anne Comeau in the Biology Department, Room WA4/13, Stewart Biology Building, to arrange a session for counsel on choice of courses above the 200 level.

Prerequisites which cannot be counted towards the Minor Concentration: BIOL 111 and BIOL 112 plus CHEM 120 (or CHEM 121) or their CEGEP equivalents.

Cell and Molecular Stream:
Note: CHEM 212 or its CEGEP equivalent is prerequisite to this stream.

Chemistry
Prerequisites which cannot be counted towards the Minor Concentration: CHEM 120 (or CHEM 121) or their equivalents.

The Department also strongly encourages students to take one or more courses involving a laboratory because the science of chemistry is rooted in laboratory experience.

Note: CHEM 212 or its CEGEP equivalent is prerequisite to all 200-level or higher courses.

</table>

Computer Science
[Students in any Minor or Major Concentration or Honours Program in Computer Science cannot choose this disciplinary area.]

Prerequisites which cannot be counted towards the Minor Concentration: MATH 139 or MATH 140, MATH 141, and MATH 133 and COMP 102 or their CEGEP equivalents.

A selection of courses should be taken from:

<table>
<thead>

</tbody>
</table>

Geography
[Students in any Minor or Major Concentration or Honours Program in Geography cannot choose this disciplinary area.]

Geography advisers recommend including some preparation in chemistry, statistics and calculus for study in this area even if formal prerequisites are not in place. A selection of courses should be taken from:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 203</td>
<td>Environmental Systems</td>
<td></td>
</tr>
<tr>

<tr>
<td>GEOG 322</td>
<td>Environmental Hydrology (Prerequisite: GEOG 203 or equivalent)</td>
<td></td>
</tr>
<tr>
<td>GEOG 350</td>
<td>Ecological Biogeography (Prerequisite: GEOG 302 or BIOL 205)</td>
<td></td>
</tr>
</tbody>
</table>
GEOG 372 (3) Running Water Environments (Prerequisite: GEOG 203 and GEOG 272 or ENVR 200 and ENVR 202)

Mathematics and Statistics
[Students in any Minor or Major Concentration or Honours Program in Mathematics and Statistics cannot choose this disciplinary area.]
Suggested courses:
MATH 133 (3) Vectors, Matrices and Geometry
MATH 203 (3) Principles of Statistics 1
MATH 204 (3) Principles of Statistics 2 (Prerequisite: MATH 203 or equivalent)
MATH 222 (3) Calculus 3
MATH 338 (3) History and Philosophy of Mathematics

Microbiology and Immunology
Prerequisites which cannot be counted towards the Minor Concentration: BIOL 111 and BIOL 112, CHEM 120 (CHEM 121) or their CEGEP equivalents.

Pathology
Prerequisites which cannot be counted towards the Minor Concentration: BIOL 111 and BIOL 112 plus CHEM 120 (or CHEM 121) or their CEGEP equivalents.

Physics
Prerequisites which cannot be counted towards the Minor Concentration: Most of the courses listed require at least CEGEP-level prerequisites or their equivalent in both Mathematics and Physics.

Psychology
[Students in any Minor or Major Concentration or Honours Program in Psychology cannot choose this disciplinary area.]

Students should take either:
PHGY 201 (3) Human Physiology: Control Systems (Prerequisite: CHEM 212) and PHGY 202 (3) Human Physiology: Body Functions (Prerequisite: CHEM 212)
or PHGY 209 (3) Mammalian Physiology 1 (Prerequisite: CHEM 212, BIOL 200, BIOL 201 or BIOL 212) and PHGY 210 (3) Mammalian Physiology 2 (Prerequisite: CHEM 212, BIOL 200, BIOL 201 or BIOL 212)

and one or more of these higher level courses:
PHGY 311 (3) Intermediate Physiology 1 (Prerequisite: PHGY 209, PHGY 210 or equivalent or permission.)
PHGY 312 (3) Intermediate Physiology 2 (Prerequisite: PHGY 209, PHGY 210 or equivalent, PHGY 311 or permission.)
PHGY 313 (3) Intermediate Physiology 3 (Prerequisite: PHGY 209, PHGY 210 or equivalent, PHGY 311 or permission.)

Suggested courses:
PSYC 211 (3) Intro Behavioral Neuroscience
PSYC 212 (3) Perception
PSYC 213 (3) Cognition
PSYC 215 (3) Social Psychology

plus one or more Psychology courses at the 300 level or higher (excluding PSYC 305). Students are recommended to satisfy the upper level course requirement by taking 6 credits from one of the areas of specialization specified in the Psychology section.

5.12.48 Sexual Diversity Studies Program

Office of Interdisciplinary Programs

Advisory Committee
K. Boms (English), S. Brotman (Social Work), E. Elbourne (History), A. Hepburn (English), S. Mulay (Medicine and McGill Centre for Research and Teaching on Women), L. Whitesell (Music)

The Minor Concentration in Sexual Diversity Studies is informed by a tradition of critical inquiry developed within various frameworks including Women's Studies and Gay, Lesbian and Queer Studies. It is designed to introduce students to the latest scholarship on the study of sexuality and sexual and gender diversity across a wide range of disciplines and cultures.
MINOR CONCENTRATION IN SEXUAL DIVERSITY STUDIES

(18 credits)

**Required Course** (3 credits)
SDST 250 (3) Introduction: Sexual Diversity Studies

**Note:** Indicates courses that are acceptable only when the topic is appropriate for Sexual Diversity Studies.

**Complementary Courses** (15 credits)
COMS 310 (3) Media and Feminist Studies
EAST 350 (3) Gender and Sexuality in Chinese Literature
EAST 370 (3) History of Sexuality in Japan
ENGL 354 (3) Sexuality and Representation
ENGL 493 (3) Image and Text 2
HIST 323 (3) History and Sexuality 1
HIST 347 (3) History and Sexuality 2
HIST 420 (3) Gender and Sexuality in Modern China
HIST 424 (3) Gender, Sexuality & Medicine
HIST 433 (3) British Queer History
MUAR 399 (3) Music and Queer Identity
PHIL 242 (3) Introduction to Feminist Theory
PHIL 442 (3) Topics in Feminist Theory
PSYC 436 (3) Human Sexuality and its Problems
RELG 271 (3) Sexual Ethics
RELG 339 (3) Gender & Sexuality in Buddhism
RELG 366 (3) Gender & Sexuality in Hinduism
SDST 450 (3) Independent Reading & Research
SOCI 489 (3) Gender, Deviance and Social Control
SOCI 530 (3) Sex and Gender
SWRK 342 (3) Practice with Gay, Lesbian, Bisexual & Two-Spirit People
WMST 402* (3) Women's Studies Special Topics 2
WMST 513 (3) Gender, Race and Science

Chair — Alberto Cambrosio

Professors
Alberto Cambrosio; M.A.(Sher.), Ph.D.(Montr.)
Margaret Lock; B.Sc.(Leeds), M.A., Ph.D.(Calif.) (Marjorie Bronfman Professor in Social Studies of Medicine)
Andrea Tone; B.A.(Qu.), M.A., Ph.D.(Emory) (Canada Research Chair in the Social History of Medicine)
George Weisz; M.A., Ph.D.(SUNY), Dr. 3rd Cy(Paris) (Cotton-Hannah Professor of the History of Medicine)
Allan Young; M.A.(Wash.), B.A., Ph.D.(Penn.)

Associate Professors
Faith Wallis; M.A., M.L.S.(McG.), Ph.D.(Tor.)
Thomas Schlich; M.D.(Marburg), Ph.D.(Freiburg) (Canada Research Chair in History of Medicine)

The Minor Concentration in Social Studies of Medicine is an interdisciplinary concentration of courses designed to address the needs of (1) undergraduates preparing for one of the health professions, and (2) social sciences and humanities undergraduates who wish to gain a broader interdisciplinary understanding of medicine and health issues. The Minor Concentration in Social Studies of Medicine presents medicine as a complex network of institutions, cultures and political relations embedded in the institutions, cultures and political relations of the larger society. Courses are divided into three groups: History of Medicine, Anthropology of Medicine, and Sociology of Medicine.

Director — Wendy Thomson

Emeritus Professor
David E. Woodsworth; B.A., Dipl.S.W.(Tor.), M.A.(Mich.), Ph.D.(Brandeis)
THREE-YEAR PROGRAM – ADMISSION

BACHELOR OF SOCIAL WORK (B.S.W.)

Three categories of applicants are eligible to apply for September admission to the Three-Year Bachelor of Social Work:

1. Applicants who have completed a DEC from CEGEP or have completed equivalent studies with better than average grades and have related social work experience will be considered for admission to a minimum 90-credit program.

2. Transfer Students
   Students who have begun undergraduate degree programs either at McGill or at other universities may apply to transfer to the School of Social Work. In order to qualify as a transfer student, applicants are expected to have a B average in their core course work (minimum 3.00 CGPA). While previously taken credits may be accepted towards the B.S.W. program requirements, accepted applicants will be required to complete a minimum of 60 approved McGill credits over three academic years. Accepted transfer credits are assessed individually at the point of admission. Students wishing to transfer after their Freshman year must have completed the minimum 24 credits required for the Arts Freshman Program. Completion of these credits does not exempt students from any of the course requirements for the B.S.W. degree, nor decrease their credit requirement. Those who have taken more than 24 credits may, however, have their social science course requirements decreased.

3. Mature Students
   Residents of Canada who are 23 years of age or older, and who lack the academic background normally required for admission, may apply for entrance as mature students. To be considered for the B.S.W. program, applicants must have had significant paid or volunteer community work experience in related fields, and must also have completed a minimum of two appropriate courses at the college or university level, achieving a grade of B or better in each.

   Enrolment in the B.S.W. program is limited. Candidates whether entering or transferring are expected to have better than average grades. Within the group of applicants who meet the academic requirements, preference is given to those who have had social work-related experience, paid or volunteer, and also to those who demonstrate personal suitability for the social work profession.

   More details on entrance requirements can be found on the Web at www.mcgill.ca/applying.

BACHELOR OF SOCIAL WORK (B.S.W.)
THREE-YEAR PROGRAM (90 credits)

(Pending approval of Senate)

The B.S.W. degree is awarded upon successful completion of 90 credits of study.

Required Courses (57 credits)

- SWRK 220 (3) History & Philosophy of Social Work
- SWRK 221 (3) Public Social Services in Canada
- SWRK 222 (3) Introduction to Practicum
- SWRK 223 (3) Poverty and Inequality
- SWRK 224 (3) Human Development Across the Lifespan
- SWRK 320 (3) Practice with Individuals and Families
- SWRK 321 (3) Practice with Groups and Communities
- SWRK 322 (3) Field Practice 1
- SWRK 323 (3) Field Practice 2
- SWRK 325 (3) Anti-Oppression Social Work Practice
- SWRK 420 (3) Advanced Field Practice 1
- SWRK 421 (3) Advanced Field Practice 2
- SWRK 422 (3) Integrative Seminar
- SWRK 423 (3) Social Work Research
- SWRK 424 (3) Mental Health and Illness
- SWRK 428 (3) Social Policy and Administration
- SWRK 525 (3) Critical Thought and Ethics in Social Work

Complementary Courses (27 credits)

- 9 credits of Social Work courses (SWRK)
- 18 credits of Social Sciences to be completed in Anthropology (ANTH), Economics (ECON), Political Science (POLI), Psychology (PSYC), or Sociology (SOCI).
- 6 of the 18 credits must be taken at the 300-level or higher.

   Courses given in other departments may be considered on an individual basis and require special permission of the Undergraduate Coordinator.

Electives (6 credits)

To be taken in a discipline other than Social Work
Please note that, although not a requirement for the 3-year B.S.W. program, a course in statistics is a prerequisite for admission into the M.S.W. program at McGill. Students in the 3-year B.S.W. program who have not previously completed a course in statistics and are planning on completing a graduate degree are, therefore, strongly encouraged to take a statistics course during their undergraduate studies.

Field Practicum
Students in the 3-year B.S.W. program complete a field placement during their second and third years, 2 days per week, in different settings each year. Students must have completed a minimum of 24 credits of the 90 credits of study before commencing their second year placement, and 54 credits before commencing their third year placement.

Grading Policy
Students are required to obtain a grade of C or better in all of their Social Work courses (66 credits) and also in their 18 social science credits. If students receive a D in any of these courses, they must take additional courses to satisfy the program requirement. Only in an elective course will the grade of D be counted for credit.

Satisfactory/Unsatisfactory (S/U) Option Policy
Please note that the S/U option can only be selected for an elective course; please see "Courses Taken under the Satisfactory/Unsatisfactory (S/U) Option", in section 3.3.6.

BACHELOR OF SOCIAL WORK (B.S.W.) – ADMISSION TWO-YEAR PROGRAM (60 credits)
(Pending approval of Senate)

Admission Requirements
The minimum requirements for admission to the Two-Year Bachelor of Social Work are as follows:

1. Bachelor's degree (DCS/DEC from CEGEP plus a minimum of a 90-credit, or three-year university degree; or, a high school diploma plus a minimum of a 120-credit or four-year university degree).

2. Completion of at least 9 credits (3 courses) in social sciences (including Anthropology, Economics, Political Science, Psychology, or Sociology).

3. 3 credits (one course) in Human Development and 3 credits (one course) in Research Methods at university level.

4. 3 credits (one course) in Statistics at university or CEGEP level.

5. Minimum CGPA of 3.0 out of 4.0 (or equivalent).

6. Paid and voluntary work experience.

While not a prerequisite for admission, working knowledge of the French language is important not only for candidates who intend to seek admission to the Quebec professional corporation, but also for those who will be completing a field placement in the province of Quebec.

More details on entrance requirements are available on the Web, at www.mcgill.ca/applying.

BACHELOR OF SOCIAL WORK (B.S.W.) – TWO-YEAR PROGRAM (60 credits)
(Pending approval of Senate)

The B.S.W. degree is awarded upon successful completion of 60 credits of study.

Required Courses (48 credits)

- SWRK 220 (3) History & Philosophy of Social Work
- SWRK 221 (3) Public Social Services in Canada
- SWRK 320D1/D2 (6) Practice with Individuals and Families
- SWRK 321D1/D2 (6) Practice with Groups and Communities
- SWRK 322 (3) Field Practice 1
- SWRK 323 (3) Field Practice 2
- SWRK 325 (3) Anti-Oppression Social Work Practice
- SWRK 420 (3) Advanced Field Practice 1
- SWRK 421 (3) Advanced Field Practice 2
- SWRK 422D1/D2 (3) Integrative Seminar

Electives (3 credits)

To be taken in a discipline other than Social Work

Note: Students in the 60-credit BSW program are eligible to apply to the Master of Social Work program (MSW) after successfully completing 30 credits of their first year of the 60-credit program plus SWRK 324 (3 credits) Field Practice 3.

Field Practicum
Field Practicum takes place in one field setting 2½ days per week during the academic year.

Grading Policy
Students are required to obtain a grade of C or better in all of their courses. If students receive a D in any of these courses, they must take additional courses to satisfy the program requirement.

Satisfactory/Unsatisfactory (S/U) Option Policy
Please note that the S/U option can only be selected for an elective course; please see "Courses Taken under the Satisfactory/Unsatisfactory (S/U) Option", in section 3.3.6.

5.12.51 Sociology (SOCI)

Stephen Leacock Building, Room 712
855 Sherbrooke Street West
Montreal, QC H3A 2T7

Chair — Suzanne Staggenborg

Director, Undergraduate Studies — Michael Smith
Director, Graduate Studies — Morton Weinfield

Emeritus Professor

Maurice Pinard, B.A., L.L.L., M.A.(Montr.), Ph.D.(Johns H.), F.R.S.C.

Professors

Alberto Cambrosio; Diploma(Basel), M.A.(Sher.), Ph.D.(Montr.)

(Social Studies of Medicine)

John A. Hall; B.A.(Oxf.), M.A.(Penn.), Ph.D.(Lond.Sch. of Economics)

Céline Le Bourdais; B.Sc.(Montr.), B.Sc.(Laval), M.Sc.(Montr.), Ph.D.(Brown) (Canada Research Chair in Statistics and Family Change)

Anthony Masi; A.B.(Colgate), M.A., Ph.D.(Brown) (Deputy Provost and Chief Information Officer)

Michael Smith; B.A.(Leic.), M.A., Ph.D.(Brown)

Suzanne Staggenborg; B.A.(Miami), M.A.(Wash.), Ph.D.(N'western)

Axel P.M. van den Berg; Kand. Doc.(Amst.), Ph.D.(McG.)

Morton Weinfield; B.A.(McG.), Ed.M., Ph.D.(Harv.) (Chair, Canadian Ethnic Studies)

Associate Professors

Lucia Benaquisto; B.A.(SUNY, Albany.), A.M., Ph.D.(Harv.)

Shelley Clark; B.A.(Virg.), M.A., Ph.D.(Prin.)

Uli Locher; Ph.D.(Yale)

Steven L. Rytina; B.G.S., Ph.D.(Mich.)

Donald Von Eschen; A.B.(Beloit), M.A.(Chic.), Ph.D.(Johns H.)

Assistant Professors

Giovani Burgos; B.A.(SUNY Albany), M.A., Ph.D.(Ind.)

Jason Carmichael; B.A.(Arizona St.), M.A, Ph.D.(Ohio St.)

Kathleen Fallon; B.A.(Calif.), M.A., Ph.D.(Ind.)

Jennifer Fosket; B.A. (Mills), Ph.D.(California San Francisco)
Sociology is commonly defined as the scientific study of society. It offers the student an educational experience which is both intellectually rewarding and practically useful as a preparation for future career opportunities. It provides the student with the theoretical and analytical tools to better understand the complex social forces which affect our lives, contributing in this way to personal enrichment and more effective citizenship. It is also valuable preparation for advanced study in the social sciences, as well as for careers in the professions, management, education, law, medicine and health-related areas, social work, and communications in both the public sector and private industry.

The Department offers a Minor Concentration, a Major Concentration, and an Honours Program in Sociology. Although students from outside the Department may take courses in the Department without having had SOCI 210 Sociological Perspectives (except where noted otherwise), the course is recommended. The purpose of the Minor Concentration is to give the student a basic understanding of the field of Sociology, while the Major Concentration will provide a more comprehensive coverage of the field. The purpose of the Honours Program is to permit a student to study the field in depth, and to do an Honours Project – a research paper under the supervision of a faculty member, the topic and supervisor chosen by mutual agreement between the student and the professor.

Undergraduate Adviser:
Elaine Weiner (Chair)
Telephone: (514) 398-6686
Email: elaine.weiner@mcgill.ca

Honours Undergraduate Adviser:
Rodney Nelson
Telephone: (514) 398-6212
E-mail: rodney.nelson@mcgill.ca

General Program Inquiries:
Joanne Terrasi, Undergraduate Program Coordinator
Telephone: (514) 398-6686
E-mail: undergraduate.sociology@mcgill.ca

Orientation Session for New Students
The Sociology Department Orientation Session will be held in Leacock 738 (7th floor of the Stephen Leacock Building, directly opposite the elevators).

SUBSTANTIVE AREAS OF STUDY
The Department offers four substantive areas of study:
- Institutions, Deviance, and Culture
- Politics and Social Change
- Social Stratification: Class, Ethnicity, and Gender
- Work, Organizations, and the Economy

The following lists indicate the courses which are included within each Substantive Area:

Institutions, Deviance, and Culture
SOCI 216 (3) Social Psychology
SOCI 217 (3) Canadian Mass Communications
SOCI 219 (3) Sociology of Culture
SOCI 225 (3) Medicine and Health in Modern Society
SOCI 247 (3) Family and Modern Society
SOCI 250 (3) Social Problems
SOCI 305 (3) Socialization
SOCI 309 (3) Health and Illness

Politics and Social Change
SOCI 222 (3) Urban Sociology
SOCI 234 (3) Population and Society
SOCI 254 (3) Development and Underdevelopment
SOCI 265 (3) War, States and Social Change
SOCI 326 (3) Political Sociology
SOCI 345 (3) Selected Topics
SOCI 354 (3) Dynamics of Industrial Societies
SOCI 370 (3) Sociology: Gender and Development
SOCI 386 (3) Contemporary Social Movements
SOCI 390 (3) Gender and Health
SOCI 424 (3) Networks and Social Structures
SOCI 455 (3) Post-Socialist Societies
SOCI 484 (3) Emerging Democratic States
SOCI 495 (3) Social Problems and Conflicts
SOCI 507 (3) Social Change
SOCI 511 (3) Movements/Collective Action
SOCI 519 (3) Gender and Globalization
SOCI 545 (3) Sociology of Population
SOCI 550 (3) Developing Societies
SOCI 565 (3) Social Change in Panama

Social Stratification: Class, Ethnicity, and Gender
SOCI 230 (3) Sociology of Ethnic Relations
SOCI 270 (3) Sociology of Gender
SOCI 301 (3) Comparative Ethnic Relations
SOCI 327 (3) Jews in North America
SOCI 333 (3) Social Stratification
SOCI 353 (3) Inequality and Social Conflict
SOCI 475 (3) Canadian Ethnic Studies Seminar
SOCI 510 (3) Seminar in Social Stratification
SOCI 512 (3) Ethnicity & Public Policy
SOCI 520 (3) Migration and Immigrant Groups
SOCI 530 (3) Sex and Gender
SOCI 555 (3) Comparative Historical Sociology

Work, Organizations, and the Economy
SOCI 235 (3) Technology and Society
SOCI 304 (3) Sociology of the Welfare State
SOCI 312 (3) Sociology of Work and Industry
SOCI 321 (3) Gender and Work
SOCI 420 (3) Organizations
SOCI 422 (3) Health Care Providers
SOCI 470 (3) Topics in Economic Sociology
MINOR CONCENTRATION IN SOCIOLOGY (18 credits) (Expandable)
The purpose of the Minor Concentration is to give the student a basic understanding of the field of sociology.

U1 Required Courses (6 credits)
SOCI 210 (3) Sociological Perspectives
SOCI 211 (3) Sociological Inquiry

Complementary Courses (12 credits)
3 credits, one of the following courses to be taken in the second year.
SOCI 330 (3) Classical Sociological Theory
SOCI 350 (3) Statistics in Social Research
9 credits, 3 courses, to be chosen from any ONE of the four Substantive Areas. At least 3 credits, 1 course, must be taken at the 300 level or above.
500-level seminars are open to Honours students and social science Major Concentration students in their final year, and Minor Concentration students only with permission of the instructor.

MAJOR CONCENTRATION IN SOCIOLOGY (36 credits)
The purpose of the Major Concentration is to give the student a comprehensive understanding of the field of sociology.

U1 Required Courses (6 credits)
SOCI 210 (3) Sociological Perspectives
SOCI 211 (3) Sociological Inquiry

U2 Required Courses (6 credits)
SOCI 330 (3) Classical Sociological Theory
SOCI 350 (3) Statistics in Social Research

Complementary Courses (24 credits*)
12 credits, 4 courses from one of the four Substantive Areas. 6 credits, 2 courses from a second Substantive Area. 6 credits, 2 courses from a third Substantive Area. *At least 12 credits, 4 courses, must be taken at the 300 level or above. A student taking the Major Concentration may take no more than 6 credits throughout the three-year program from the following: SOCI 340/SOCI 341, SOCI 342/SOCI 343, SOCI 440/ SOCI 441, SOCI 442/SOCI 443.

Seminars at the 500 level are open to Honours students and social science Major Concentration students in their final year, and Minor Concentration students only with permission of the instructor.

Graduate Seminars listed below are open to final-year Honours students with adequate preparation:
SOCI 627 Political Sociology
SOCI 652 Current Sociological Theory

HONOURS IN SOCIOLOGY (51 credits)
Students may register for the Honours Program at the beginning of their second year (U2).
To remain in the Honours Program and receive an Honours degree, students must maintain a cumulative grade point average (CGPA) of 3.00, as well as a program GPA of 3.30. For more information see section 5.3.5 “Program Requirements”.
A Minor Concentration outside Sociology must be taken.

Required Courses (18 credits)
SOCI 210 (3) Sociological Perspectives
SOCI 211 (3) Sociological Inquiry
SOCI 330 (3) Classical Sociological Theory
SOCI 350 (3) Statistics in Social Research
SOCI 461 (3) Quantitative Data Analysis
SOCI 480 (3) Honours Project

Complementary Courses (33 credits*)
12 credits from one of the four Substantive Areas. 12 credits from a second Substantive Area. 9 credits from the two remaining Substantive Areas, a minimum of 3 credits from each.  *At least 15 of the credits in Sociology must be taken at the 300 level or above, and 24 credits must be taken at the 400 level or above (for a total of at least 39 credits at or above the 300 level).

JOINT HONOURS – SOCIOLOGY COMPONENT (36 credits)
Students who wish to study at the Honours level in two Arts disciplines can combine Joint Honours program components from any two Arts disciplines; see section 5.11.4 “Joint Honours Programs” for a list of available programs.
Students may register for the Joint Honours program at the beginning of their second year (U2).
Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).
Joint Honours students must maintain a minimum CGPA of 3.00 as well as a minimum GPA of 3.30 in this component.

Required Courses (18 credits)
SOCI 210 (3) Sociological Perspectives
SOCI 211 (3) Sociological Inquiry
SOCI 330 (3) Classical Sociological Theory
SOCI 350 (3) Statistics in Social Research
SOCI 461 (3) Quantitative Data Analysis
SOCI 480 (3) Honours Project

Complementary Courses (18 credits)
18 credits of Sociology courses approved by the Departmental Honours Adviser.

5.12.52 Women’s Studies (WMST)
McGill Centre for Research and Teaching on Women (MCRTW)
3487 Peel Street, Second Floor
Montreal, QC H3A 1W7

Student Representatives 2007-2008

TBA

Additional Representative 2007-2008
TBA

Ex-officio
Director, MCRTW (TBA)
Graduate Student Representative (TBA)

Women’s Studies is a multidisciplinary program that offers courses in a wide range of subject areas, all of which have as their focus the study of women and gender. The program provides students with the opportunity to examine the many different ways in which gender intersects with issues such as ethnicity, sexuality, religion, class, economics and culture. Students are encouraged to explore feminist theoretical and empirical scholarship that seeks to understand major social and intellectual issues, both past and present and throughout the world.

Students must take certain core courses in Women’s Studies. The remainder of the student’s courses will be selected from
Courses currently awaiting University approval to be cross-listed as Women’s Studies courses will be added to the on-line calendar and the MCRTW Website. Please go to www.mcgill.ca/courses/current and www.mcgill.ca/mcrtw.

Notes:
Courses that appear in more than one component may not be double counted.

* indicates courses that are acceptable ONLY when the topic is appropriate for Women’s Studies.

6.1.1 Location
853 Sherbrooke Street West
Montreal, QC H3A 2T6
Canada
Telephone: (514) 398-4210
Faculty Websites: www.mcgill.ca/arts and www.mcgill.ca/science
Degree Website: www.mcgill.ca/artscisao/basc

Student Affairs Office
Website: www.mcgill.ca/artscisao
The Student Affairs Office of the Faculties of Arts and of Science and the Office of the Associate Dean (Student Affairs) of the Faculty of Science are located in Dawson Hall, Rooms 110 and 115. The Student Affairs Office serves students in the Faculties of Arts and of Science.

6.1.2 Administrative Officers
For a listing of administrative officers in the Faculty of Arts, refer to section 5.1.2 “Administrative Officers”, and for those in the Faculty of Science, refer to section 12.1.2 "Faculty Administrative Officers”. Note that the Associate Dean (Student Affairs) of Science is responsible for students pursuing a B.A. & Sc.

The B.A. & Sc. Program Administration Committee (PAC), which oversees the curriculum and regulations for the degree, consists of the following members:

Bruce A. Arndtsen; B.A.(Car. College), Ph.D.(Stan.)

André Costopoulos; B.A.(McG.), M.A.(Montr.), Ph.D.(Oulu)

Laurie Hendren; B.Sc., M.Sc.(Qu.), Ph.D.(C'nell)

Mary MacKinnon; B.A.(Qu.), M.Phil, D.Phil.(Oxf.)

402 Chemistry

André Costopoulos; B.A.(McG.), M.A.(Montr.), Ph.D.(Oulu)

Laurie Hendren; B.Sc., M.Sc.(Qu.), Ph.D.(C'nell)

Mary MacKinnon; B.A.(Qu.), M.Phil, D.Phil.(Oxf.)

Poly Science

Daniel Levitin; A.B.(Stan.), M.S., Ph.D.(Ore.)

Psychology

Daniel Levitin; A.B.(Stan.), M.S., Ph.D.(Ore.)

Associate Dean (Academic), Faculty of Science

Mary MacKinnon; B.A.(Qu.), M.Phil, D.Phil.(Oxf.)

Associate Dean (Academic), Faculty of Arts
Bill Allen; B.Sc., M.D., Ph.D.

6.13 Programs and Teaching in Arts and in Science

Programs and teaching in Arts are described in section 5.3.1 “Programs and Teaching in Arts”. Those in Science are described in section 12.1.3 “Programs and Teaching in Science”. The two faculties jointly offer the B.A. & Sc., so students pursuing that degree are at home in both Arts and Science.

6.14 Student Affairs Office

The Student Affairs Office provides assistance in interpreting records as well as general academic information and advice on the following: prerequisites and programs, degree requirements, registration, course change, procedures for withdrawal, deferred exams, supplemental exams, rereads, academic standing, inter-faculty transfer, year or term away, transfer credits, second programs, second degrees, and graduation.

Special requests can be made, in writing, to the Associate Dean (Student Affairs) of Science, who is responsible for students pursuing a B.A. & Sc.

The Committee on Student Standing (CSS) of the Faculty of Science will consider appeals of the Associate Dean’s (Student Affairs) decisions. For information about CSS, see the Associate Dean’s (Student Affairs) assistant.

For more information, please refer to our Website at www.mcgill.ca/artscisao.

6.2 Degree Admission Requirements

For information about admission requirements to the B.A. & Sc., please refer to “Undergraduate Admissions Guide 2007-08 (Appendix A).”

For information about inter-faculty or inter-degree transfers, please refer to “Inter-Faculty Transfer”, section 3.3.12, as well as to the relevant information posted on the Student Affairs Office Website at www.mcgill.ca/artscisao and in the Student Affairs Office.

6.3 Degree Requirements

Each student pursuing a B.A. & Sc. must be aware of the regulations as stated in this section of the Calendar and on the McGill and Student Affairs Office Websites.

While departmental and Faculty advisors and staff are always available to give advice and guidance, the ultimate responsibility for completeness and correctness of course selection and registration, for compliance with, and completion of, program and degree requirements, and for the observance of regulations and deadlines rests with the student. It is the student’s responsibility to seek guidance from the Student Affairs Office if in any doubt; misunderstanding or misapprehension will not be accepted as cause for dispensation from any regulation, deadline, program or degree requirement.

To be eligible for a B.A. & Sc., students must fulfill all Faculty degree and program requirements as indicated below:

"Degree Requirements”, section 6.3
"Residency”, section 6.3.2
"Cumulative Grade Point Average (CGPA)”, section 6.3.3
"Time and Credit Limit for Completion of the Degree”, section 6.3.4
"Program Requirements”, section 6.3.5
"Course Requirements”, section 6.3.6

6.3.1 Minimum Credit Requirement

Students must complete the minimum credit requirement for the degree as specified in the letter of admission.

Students are normally admitted to a four-year degree requiring the completion of 120 credits, but advanced standing of up to 30 credits may be granted to students who obtain satisfactory results in the Diploma of Collegial Studies, International Baccalaureate, French Baccalaureate, Advanced Levels, and Advanced Placement tests.

Students who are readmitted after interrupting their studies for a period of five consecutive years or more may be required to complete a minimum of 60 credits and satisfy the requirements of a program. In this case, a new GPA will be calculated. The Associate Dean (Student Affairs) of Science, in consultation with the appropriate department, may approve a lower minimum for students who had completed 60 credits or more before interrupting their studies.

Students who are readmitted after a period of absence are normally subject to the program and degree requirements in effect at the time of readmission.

6.3.2 Residency

To obtain a B.A. & Sc., students must satisfy the following residency requirements: a minimum of 60 credits of courses used to satisfy the B.A. & Sc. requirements must be taken and passed at McGill, exclusive of any courses completed as part of the basic science requirements defined below. At least two-thirds of all departmental program requirements (Multi-track, Honours, Interfaculty) must normally be completed at McGill. However, students in Major Concentrations or Interfaculty or Honours programs who pursue an approved Study Away or Exchange program may, with departmental approval, be exempted from the two-thirds rule. In addition, some departments may require that their students complete specific components of their program at McGill.

6.3.3 Cumulative Grade Point Average (CGPA)

Each candidate for a B.A. & Sc. must achieve a minimum cumulative grade point average (CGPA) of 2.00.

6.3.4 Time and Credit Limit for Completion of the Degree

Students who need 96 or fewer credits to complete their degree requirements are expected to complete their degree in no more than eight terms after their initial registration. Students in the Freshman Program become subject to these regulations one year after their initial registration. Students who need or wish to exceed this time limit must receive permission from the Associate Dean (Student Affairs) of Science to continue their studies. Students who wish to exceed the minimum credit requirements for their degree must also seek permission of the Associate Dean (Student Affairs) of Science. Permission for exceeding the time and/or credit limits will normally be granted only for valid academic reasons, such as a change of program (subject to departmental approval) and part-time status.

6.3.5 Program Requirements

Students with specific career goals should consult an academic adviser about their choice of program within the B.A. & Sc. However, students intending to pursue further studies following the B.A. & Sc. should refer to the admissions requirements of particular programs for the appropriate prerequisite courses. In particular, students should note the following:

• The minimum freshman science requirements in the B.A. & Sc. may not satisfy the introductory science requirements of all medical/dental schools.

• The Major Concentration in Psychology does not provide sufficient undergraduate background to enable students to apply for membership in the Ordre des Psychologues du Québec, even once the additional graduate requirements of the Ordre have been completed.

• The Major Concentration in Chemistry is not certified by the Ordre des Chimistes du Québec. Students interested in
pursuing a career in Chemistry in Quebec are advised to take
an appropriate B.Sc. program in Chemistry.

6.3.5.1 Freshman Program

Students who need to complete 97-120 credits to fulfill their degree
requirements are admitted to the Freshman Program. The Fresh-
man Program requirements include foundational courses in both
Science and Arts which must be selected as follows:

B.A. & Sc. FRESHMAN PROGRAM (30 credits)

At least two mathematics courses selected from:

- MATH 139 (4) Calculus
- or MATH 140 (3) Calculus 1
- or MATH 150 (4) Calculus A

MATH 141 (4) Calculus 2
- or MATH 151 (4) Calculus B

MATH 133 (3) Vectors, Matrices and Geometry

At least three foundational science courses selected from:

- BIOL 111 (3) Principles: Organismal Biology
- BIOL 112 (3) Cell and Molecular Biology
- CHEM 110 (4) General Chemistry 1
- CHEM 120 (4) General Chemistry 2
- PHYS 101 (4) Introductory Physics - Mechanics
- or PHYS 131 (4) Mechanics and Waves
- PHYS 102 (4) Introductory Physics - Electromagnetism
- or PHYS 142 (4) Electromagnetism and Optics

At least three Arts courses (or 9 credits) to be chosen in two
of the following three categories:

- Social Sciences: Anthropology, Economics, History, Linguistics,
  Political Science, Sociology
- Humanities (Literature and Civilization): Art History and
  Communications Studies, Classics, East Asian Studies,
  English, French Language and Literature, German Studies,
  Hispanic Studies, Islamic Studies, Italian studies, Jewish
  Studies, Philosophy, Religious Studies, Russian Studies
- Languages (courses may be taken in this category to improve
  language skills): Classics (Latin, Ancient Greek or Modern
  Greek), East Asian Studies (Chinese, Japanese, Korean),
  English or French as a Second Language, French Language
  and Literature, German Studies, Hispanic Studies (Spanish),
  Islamic Studies (Arabic, Persian, Turkish, Urdu), Italian, Jewish
  Studies (Hebrew, Yiddish), Russian and Slavic Studies (Polish,
  Russian, Armenian)

A minimum of two courses (or 6 credits) may be chosen from
one category, and no more than two courses (or 6 credits) can be
taken in any one department.

No course may fulfill the requirements for more than one
program, including the B.A. & Sc. Freshman program.

Students who have completed the Diploma of Collegial Studies,
Advanced Placement exams, Advanced Levels, the International
Baccalaureate, the French Baccalaureate, or McGill placement
examinations may receive exemption and/or credit for all or part of
the Mathematics and foundational science courses as well as ex-
emption from all or part of the Arts courses requirement of the
Freshman Program. Similarly, students who have completed
courses at other universities or colleges may receive exemptions
and/or credits.

Students must carefully select their mathematics and science
Freshman courses so that they have all the required prerequisites
for their intended Departmental Programs.

For further details, refer to information about the B.A. & Sc.

6.3.5.2 Departmental Programs

Students pursuing a B.A. & Sc., other than those registered in the
Freshman Program, are required to have an approved program
(Multi-track, Honours, Joint Honours, Interfaculty), and to select
their courses in each term with a view to timely completion of their
degree and program requirements. Students must complete one
of the program streams described below.

In all cases, the degree also includes a required integrative
course (BASC 201; 3 credits), a complementary integrative course
(3 credits) within or outside a student’s programs selected from the
complementary list in “Integrative Courses”, section 6.11.6, plus
electives (10-15 credits).

MULTI-TRACK SYSTEM

To recognize the diversity of student backgrounds and interests
and the multiple routes to understanding provided by a modern
university, the Faculties of Arts and of Science offer a 90-credit
multi-track system that includes a Major Concentration in one fac-
culty complemented by either a Major Concentration or two Mi-
 nors/Minor Concentrations in the other faculty and that may be
completed in one of the following ways:

Options
- Arts Major Concentration (36 credits) + Science Major Concen-
  tration (36-38 credits) (see "Programs in the B.A. & Sc.",
  section 6.11, for a list of programs open to students in the
  B.A. & Sc.)
- Major Concentration in Arts or Science (36-38 credits) + two
  Minors/Minor Concentrations in the other faculty (2 x 18 credits
  = 36 credits)

Regulations
- Programs offered by Computer Science, Mathematics and Sta-
  tistics, and Psychology are considered Science programs for
  the purpose of the B.A. & Sc.
- Within both options, all Concentrations must be in different aca-
  demic units. Thus, students may take a Geography program
either in Arts or in Science, but not in both.
- Students will include within the 36 or 18 credits of their Major
  Concentrations or Minors or Minor Concentrations any univer-
  sity-level (200- or above) prerequisites to required courses
  within their programs.
- No course may fulfill the requirements for more than one pro-
  gram.

Definitions

Units: academic departments or administrative equivalents.
Programs: lists of required and complementary courses (including
prerequisites for required courses) prepared and maintained by
units.

Major Concentration: a program of 36-38 credits taken from a
unit's course offerings.

Minor Concentration: a program of 18 credits taken from a unit's
course offerings. Expandable Minor Concentrations are those
that, on the completion of 18 additional approved credits, be
expanded into a Major Concentration within the appropriate unit.

HONOURS PROGRAM

Honours programs demand a high degree of specialisation, and
require students to satisfy specific departmental and Faculty Hon-
ours requirements while maintaining good academic standing.
They are designed to prepare students for graduate study. Stu-
dents in the B.A. & Sc. who complete an approved Honours pro-
gram must also complete an approved Minor Concentration or a
Minor in the Faculties of Arts or of Science. Students must com-
plete at least 30 credits in the Faculty of Arts and at least 30 in the
Faculty of Science as part of their Honours program and their Mi-
nor Concentration or Minor program.

At the time of publishing this Calendar, another Honours pro-
gram in Cognitive Science is under development for the B.A. & Sc.
Students should consult www.mcgill.ca/artscisao/basc for an up-
to-date list of B.A. & Sc. programs.

JOINT HONOURS PROGRAM

Students who wish to study at the Honours level in two disciplines
can combine a Joint Honours program component from an Arts
discipline with one from a Science discipline; see section 5.11.4
"Joint Honours Programs" for a list of available programs. Each
Joint Honours component consists of a maximum of 36-38
required and complementary credits (not including program
prerequisites). In cases where a minimum of 24 credits are in

McGill University, Undergraduate Programs 2007-2008
courses normally restricted to Honours students, the total of required and complementary credits may be as few as 30.

To complete a Joint Honours degree, a student must achieve a minimum CGPA of 3.00. The program GPA (the GPA of all required and complementary courses taken at McGill that constitute the Joint Honours program) must be a minimum of 3.00, although academic units may set higher requirements for their component of the program GPA.

**INTERFACULTY PROGRAM**

An Interfaculty program is an approved selection of courses constituting a concentration in an intellectually coherent and inter-faculty field of studies. These courses must include approved selections from the Faculties of Arts and of Science and possibly other faculties. Students in the B.A. & Sc. who complete an approved Interfaculty program must also complete an approved Minor Concentration or a Minor in the Faculties of Arts or of Science.

Students must complete at least 30 credits in the Faculty of Arts and at least 30 in the Faculty of Science as part of their Interfaculty program and their Minor Concentration or Minor program.

### 6.3.6 Course Requirements

All required and complementary courses used to fulfill program requirements, including the Freshman Program, must be completed with a grade of C or better. Students who fail to obtain a satisfactory grade in a required course must either pass the supplemental examination in the course or do additional work for a supplemental grade, if these options are available, or repeat the course. Course substitution will be allowed only in special cases; students should consult their academic adviser.

Normally, students are permitted to repeat a failed course only once. (Failure is considered to be a grade of less than C or the administrative failures of J and KF.) If a required course is failed a second time, a student must appeal to the Associate Dean (Student Affairs) of Science for permission to take the course a third time. If permission is denied by the Associate Dean (Student Affairs) and/or by the Committee on Student Standing of the Faculty of Science, on appeal, the student must withdraw from the program. If the failed course is a complementary course required by the program, a student may choose to replace it with another appropriate complementary course. If a student chooses to substitute another complementary course for a complementary course in which a D was received, credit for the first course will still be given, but as an elective. If a student repeats a required course in which a D was received, credit will be given only once.

Full details of the course requirements for all programs as well as the locations of departmental advisory offices, program directors, and telephone numbers for further information are available as follows:

For descriptions of B.A. & Sc. programs that are available to Arts students, see section 5.12 "Academic Programs".

For descriptions of B.A. & Sc. Science programs that are available to Science students, see section 12.13 "Academic Programs".

For descriptions of B.A. & Sc. Science programs that are not available to Arts or Science students, see the unit's section below.

For descriptions of B.A. & Sc. Science programs offered by the McGill School of Environment, see "Programs Offered" in section 14.3.

### 6.3.6.1 Course Overlap

Students will not receive additional credit towards their degree for any course for which the student has already received credit at McGill, CEGEP, at another university, or as a result of Advanced Placement, Advanced Level, International Baccalaureate, or French Baccalaureate exams. It is the student's responsibility to consult the Student Affairs Office or the department offering the course as to whether or not credit can be obtained and to be aware of exclusion clauses specified in the course description in the Calendar.

Please refer to the following Website for specific information about advanced standing credits and McGill course exemptions:

www.mcgill.ca/student-records/transfercredits

Sometimes two different departments offer the same course. Such courses are called "double-prefix" courses. When such courses are offered simultaneously, students should take the course offered by the department in which they are obtaining their degree. For example, in the case of double-prefix courses CHEM XYZ and PHYS XYZ, Chemistry students take CHEM XYZ and Physics students take PHYS XYZ. If different departments offer a double-prefix course in alternate years, students may take whichever course best fits their schedule.

Credit for statistics courses will be given with the stipulations specified in "Course Overlap", section 12.3.6.1 in the Science section of the Calendar.

Credit for computer courses will be subject to the following restrictions:

- Credit for courses offered by the School of Computer Science is governed by rules specified in its individual course descriptions.
- Credit for computer courses offered by faculties other than Arts or Science requires the permission of the Associate Dean (Student Affairs) of Science.

### 6.3.6.2 Courses outside the Faculties of Arts and of Science

The following regulations apply to students in the B.A. & Sc. who wish to take courses outside the Faculties of Arts and of Science:

- Regardless of their minimum credit requirement towards their B.A. & Sc., students are allowed a maximum of 12 credits in ELECTIVE and/or COMPLEMENTARY courses taken in faculties other than the Faculties of Arts and of Science.
- Students in certain designated programs that include a number of REQUIRED and COMPLEMENTARY courses in other faculties are permitted a maximum of 30 credits outside the Faculties of Arts and of Science. These programs are the Interfaculty Program in Environment, the Minor Concentration in Environment, and the Major Concentration in Geography (Urban Systems).
- Any courses taught at McGill University may be used towards the maximum allowed except for courses in Continuing Education, for which students receive credit only in Continuing Education.
- For the purpose of this policy, courses taught in other faculties and specifically listed in the Arts or Science section of the printed Calendar are considered as courses taught in the Faculties of Arts and of Science.
- The maximum number of credits allowed will be strictly enforced.

### 6.3.6.3 Distance Education Courses

A maximum of 6 credits of courses taught through distance education may be used as electives towards the B.A. & Sc. degree at McGill.

Courses taught through distance education from institutions other than McGill will be approved as transfer credits under the following conditions:

- the course is given by a government-accredited, degree-granting institution acceptable to McGill;
- the course counts for credit towards degrees granted at the institution giving the course;
- prior approval for the course is obtained from the Arts and Science Student Affairs Office.

The combined total of regular course credits and distance education course credits may not exceed the permitted maximum number of credits per term according to the regulations for the B.A. & Sc.

Courses taught through distance education may not be used to complete program requirements, except on an individual basis when serious, documented circumstances warrant it. In such
cases, prior approval must be obtained from the student’s program advisor and the Associate Dean (Student Affairs) of the Faculty of Science.

6.3.6.4 Courses Taken Under the Satisfactory/ Unsatisfactory Option

For more information and restrictions, please see section 3.3.6 “Courses Taken under the Satisfactory/ Unsatisfactory (S/U) Option”.

6.3.6.5 Courses in English as a Second Language

ESL courses are only open to students whose primary language is not English and who have studied for fewer than five years in English-language secondary institutions. Students in the B.A. & Sc. may take a maximum of 12 credits, including academic writing courses for non-anglophones.

6.4 Advising

Students who need 96 or fewer credits to complete their degree requirements must consult academic advisers in their proposed departments of study to obtain advice and approval of their course selection (please see “Departmental Programs” in section 6.3.5.2). To facilitate program planning, they must present their transcripts and letters of admission. Students who have not fulfilled the B.A. & Sc. Freshman Program requirements should also seek advice from an adviser in the Student Affairs Office. For a detailed description of advising and registration procedures, students should refer to “Registration”, in section 3.3 and “Advising and Support”, in section 4, to Welcome to McGill, which they receive upon acceptance from the Admissions, Recruitment and Registrar’s Office, as well as to the information posted on the Student Affairs Website, www.mcgill.ca/artscisao, and to the departmental Websites.

Students who need 97-120 credits to complete their degree requirements will normally be registered in a Freshman Program until they complete their first year. They must consult an adviser in the Student Affairs Office to obtain advice and approval of their course selection. For a detailed description of advising and registration procedures, Freshman students should refer to Welcome to McGill, which they receive upon acceptance from the Admissions, Recruitment and Registrar’s Office, as well as the Student Affairs Website, www.mcgill.ca/artscisao.

Advising for all returning students takes place in March for the upcoming academic year. For more information, students should refer to the Student Affairs Website, www.mcgill.ca/artscisao.

6.4.1 Choosing a B.A. & Sc. Program

The B.A. & Sc. is intended for students with well-defined interdisciplinary interests. There are several options for the main program, all of which specify 75-80 of the 90 credits, leaving only 10-15 credits for electives. Since there are relatively few electives, students entering a program in the B.A. & Sc. degree should have a clear idea of their objectives, goals, and intended areas of study, so that they can plan their curriculum carefully.

It should be noted that there also exists considerable flexibility within the B.A. (Faculty of Arts) and B.Sc. (Faculty of Science) programs. Students who are more interested in Arts, but would like to study some Science can do so within the B.A. degree. Similarly, students who are more interested in Science, but would like to study some Arts can do so within the B.Sc. degree. For example, B.Sc. students may complete minor concentrations in Arts and vice versa.

There are four ways to complete programs in the B.A. & Sc. degree.

1) Multi-track System

The multi-track system is intended for students who want a program that includes significant components from both Arts and Science.

Students complete 36 credits of Arts, 36-38 credits of Science, and 6 courses of integrative courses. Students can either combine an Arts major concentration with a Science major concentration (36-38 credits) or they can select a major concentration from one faculty and two 18 credit minor concentrations from the other. Additional guidelines for the multi-track system can be found in "Departmental Programs", in section 6.3.5.2. Students will find the program descriptions for the major and minor concentrations in Science unique to the B.A. & Sc. within this section of the calendar.

Descriptions of programs offered in Arts are located in the Arts section of the calendar.

2) Interfaculty Programs

Interfaculty programs are interdisciplinary in nature. There are currently two such programs: environment and cognitive science. Students in these programs complete 54 credits of the interfaculty program, a minor of 18 credits, and 6 credits of integrative courses.

ENVIRONMENT

In contrast to other Environment programs offered through the McGill School of Environment, the B.A. & Sc. Interfaculty Environment program does not have pre-defined themes and is intended for students who have a specific goal and want to define their own theme by choosing courses that help them progress towards that goal. Further information about Environment programs and academic advising can be found at www.mcgill.ca/mse.

COGNITIVE SCIENCE

The interfaculty program in Cognitive Science offered within the B.A. & Sc. degree is the only major program currently offered at McGill for students interested in this discipline. The requirements encourage students to choose courses in two of the five subject areas in Cognitive Science (Computer Science, Linguistics, Neuroscience, Philosophy, Psychology) as the focus of their program. In addition, students interested in research in this field may include up to 12 credits of research courses within their program.

3) Joint Honours

The Joint Honours option is similar to the multi-track system except that students complete two Joint Honours components, one in Arts and one in Science. At present, the choice of Science component is restricted to either Math or Psychology. However, there is a great range of choices for the Arts component. To choose the Joint Honours option, students must meet the GPA/GCPA requirements set out in "Departmental Programs", in section 6.3.5.2.

4) Honours

There is currently only one B.A. & Sc. Honours program which is the Environment Honours program. This program is similar to the Interfaculty program in Environment, but has additional GPA requirements and an additional 6 credits of required research courses.

At the time of publishing this calendar, there is a second Honours program, in Cognitive Science, in the approval process. Students should consult the online calendar for updates at www.mcgill.ca/courses.

6.4.2 Preparation for Graduate School

Any choice of undergraduate degree and program constrains options for graduate school. The B.A. & Sc. provides good preparation for graduate degrees in integrated disciplines such as Cognitive or Environmental Science. Depending on the Arts or Science specific program you wish to enter in graduate school the B.A. & Sc. may or may not be adequate preparation. If you intend to pursue an Arts or Science specific program at the graduate level, you should consult academic advisors in that discipline at McGill and at universities where you intend to apply in order to find out whether the B.A. & Sc. will prepare you adequately. If you are considering continuing on in a specific Science graduate program, you should examine the difference between the preparation provided...
by the 36-credit major concentrations in the B.A. & Sc. program versus the significantly more specialized major and honours pro-
grams offered in the B.Sc. programs.

6.5 Registration

All students register by Minerva, McGill’s Web-based registration system.

For detailed information about registration, please refer to “Reg-
nistration” in section 3.3. “Welcome to McGill, the Student Affairs
Website,” www.mcgill.ca/artsci, and the Student Records Web-

Students who fall into unsatisfactory standing at the end of the academic year will have their registration cancelled. They may not re-register. However, students who can provide proof of extenuat-
ing circumstances that affected their academic performance may appeal to the Associate Dean (Student Affairs) of Science for readmission. For more information, students should see section
3.3.13 “Readmission”.

Students who have an outstanding fee balance from a previous term or outstanding fines will not be permitted to register. In addi-
tion, students who have registered for the upcoming academic
year, but who subsequently take Summer courses without paying the fees, will have their registration cancelled. Registration will be denied until these debts are paid in full. Students must pay all
debts before the end of the registration period to be permitted to
register. Students with financial problems should consult the
Student Aid Office, Brown Student Services Building.

Students who decide not to return to McGill after initiating reg-
nistration must withdraw from all of their courses on Minerva or in-
form the Student Affairs Office in writing. The deadline for
withdrawal from the University is the same deadline as for a course
withdrawal; see section 3.3.8 “Regulations Concerning Course
Withdrawal” and section 3.3.9 “Regulations Concerning University
Withdrawal”. After the deadline, students may, under exceptional
circumstances, be granted permission to withdraw from the Uni-
versity. Such students should contact the Student Affairs Office for
further information.

6.5.1 Program Registration

Students should refer to Welcome to McGill or to the Arts and Sci-
ence Registration information on how to register for programs on
programs that can be taken by students pursuing a B.A. & Sc.,
see section 6.11 “Programs in the B.A. & Sc.”

6.5.2 Course Registration

All courses have limited enrolment. Students pursuing a B.A. & Sc.
may register for, and take for credit, any course, unless otherwise
indicated, in the sections of the Calendar applicable to the Facul-
ties of Arts and of Science, subject to the course restrictions listed
in this section.

Since the registration system is unable to verify whether or not
degree regulations are respected, it is technically possible to reg-
ister for courses that may not be credited towards the B.A. & Sc.
When students’ records are manually verified, however, any
courses taken that violate the degree regulations will be flagged af-
ter the end of course change period as “not for credit towards the
B.A. & Sc.” As a result, the students’ expected date of graduation
may be delayed.

Some courses may require special permission. Students should consult this Calendar and/or the Class Schedule at
www.mcgill.ca/courses well in advance of the course change
(drop/add) period to determine if permission is required of the in-
structor, the department, or the Faculty for any course they wish to
take.

Students who believe they have valid reasons to take a course
that may not be credited towards the B.A. & Sc. must obtain the
permission of the Associate Dean (Student Affairs) of Science.

6.5.2.1 Registration for First-Year Seminars

Registration for First-Year Seminars is limited to students in their
first year of study at McGill, i.e., newly admitted students in U0 or
U1. These courses are designed to provide a closer interaction
with professors and better working relations with peers than is
available in large introductory courses. These seminars endeav-
our to teach the latest scholarly developments and expose partici-
pants to advanced research methods. Registration is on a first-
come, first-served basis. The maximum number of students in any
seminar is 25, although some are limited to even fewer than that.

Students may take only one First-Year Seminar during their first
year at McGill. Students who register for more than one will be
obliged to withdraw from all but one of them.

A list of First-Year Seminars is available in the Arts General
section and the Science General section of the Calendar, “Regis-
tration for First-Year Seminars”.

6.5.2.2 Freshman Interest Groups

Freshman Interest Groups (FIGs) are groups of approximately 15
U0 students in the B.Sc. or B.A. & Sc., led by a professor in the
Faculty of Science or Faculty of Medicine and an upper-year un-
dergraduate student. They meet once every two weeks in the fall
semester to discuss a wide range of topics, such as science in the
news, program choices, undergraduate research opportunities, or
just aspects of life in Montreal. The purpose of a FIG is to ease the
transition to McGill and Montreal and to provide students an oppor-
tunity to interact with a professor and with other U0 students in
a small group. FIGs carry no credit and there is no charge. For more
information and to see how to register refer to www.mcgill.ca/
science/student/fig.

6.5.2.3 Registration in Multi-Term Courses

Students who select a multi-term course are making a commit-
ment to that course for its entirety. Students MUST register in the
same section in all terms of a multi-term course. Credit will be jeop-
ardized if students deliberately register in different sections of a
multi-term course. A drop of the second term portion of a multi-
term course in order to change sections is considered a withdrawal
from the course. In exceptional cases, when circumstances are
beyond the student’s control, the Student Affairs Office may grant
permission to change sections mid-way through a multi-term
course. Students must make their request in writing to the Associ-
ate Dean (Student Affairs) of Science citing their reason for the re-
quest. The request must also have the written support of the
instructors of the sections involved and of the coordinator of the
course (if applicable).

6.5.3 Apply to Graduate

For more information, see section 3.9.1 “Apply to Graduate”.

6.6 Grading and Credit

During the first week of lectures, each instructor will provide stu-
dents with a written course outline. This information should in-
clude, where appropriate:

• whether there will be a final examination in the course;
• how term work will affect the final mark in the course;
• how term work will be distributed through the term;
• whether there will be a supplemental examination in the course,
and if so, whether the supplemental examination will be worth 100% of
the supplemental grade or whether term work will be included in
the supplemental grade (courses with formal final examinations
must have supplemental examinations);
• whether students with marks of D, F, J, or U will have the option of submitting additional work, and, if so, how the supplemental mark will be calculated with the extra work.

### 6.6.1 Incomplete Grades

An instructor who believes that there is justification for a student to delay submitting term work may extend the deadline until after the end of the course. In this case, the instructor will submit a grade of K (incomplete), indicating the date by which the work is to be completed. The maximum extensions for the submission of grades to the Student Affairs Office are as follows:

- students graduating in June:  
  - Fall, Winter, and multi-term courses: April 30
  - non-graduating students:  
    - Fall courses: April 30
    - Winter and multi-term courses: July 30

Students’ deadlines for submitting their work must be sufficiently in advance of these dates to ensure that the work can be graded and the mark submitted on time.

It is important to note that instructors may impose earlier deadlines than those listed.

If marks to clear K’s have not been submitted to the Student Affairs Office by April 30 for Fall courses, or July 30 for Winter courses and courses spanning Fall/Winter, the K is automatically changed to a KF and counts as an F in the GPA.

Students with a grade of K who have serious extenuating circumstances may request an extension of the K deadline (KE) from the Associate Dean (Student Affairs) of Science. Please see section 3.3 “Registration” for more information.

### 6.7 Examinations

Students should see “Examinations” in section 3.6 for information about final examinations and deferred examinations. The exam schedules are posted on the McGill Website, www.mcgill.ca, normally one month after the start of classes for the tentative Exam Schedule, and two months after the start of classes for the final Examination Schedule. Students should also refer to the Student Affairs Website at www.mcgill.ca/artscisao for more information.

Students are warned not to make travel arrangements to leave Montreal prior to the scheduled end of any examination period.

### 6.8 Supplemental Assessments

#### 6.8.1 Supplemental Examinations

Students who wish to write supplemental examinations for certain courses must apply to the Student Affairs Office for permission. The following conditions apply:

- students must be in satisfactory or probationary standing;
- students must have received a final grade of D, J, F, or U in the course;
- special permission from the Associate Dean (Student Affairs) of Science is required if students wish to write supplemental exams totalling more than 8 credits in any supplemental exam period;
- only one supplemental examination is allowed in a course;
- the supplemental result may count for 100% of the final grade or may include the same proportion of class work as did the original grade; the instructor will announce the arrangements to be used for the course by the end of the drop/add period;
- the format and content of the supplemental examination will not necessarily be the same as for the final examination, so students should consult the instructor;
- the supplemental result will not erase the grade originally obtained; both the original mark and the supplemental result will be calculated in the CGPA;

### 6.8.2 Additional Work

Instructors of courses that include graded written term work may choose to provide the option of additional work to eligible students. The following conditions apply:

- if there is an option for additional work, it must be announced in the course outline at the beginning of the course;
- additional work involves revising one or more previously submitted papers or submitting new written work to replace the original work;
- students must be in satisfactory or probationary standing;
- students must have received a final grade of D, J, F, or U in the course;
- students must apply for additional work: the deadline for submission of applications is March 1 for Fall courses and July 15 for Winter courses and courses spanning Fall/Winter; a non-refundable fee is payable for each supplemental paper at the time of application; supplemental examination applications are available at www.mcgill.ca/artscisao and from the Student Affairs Office.

Additional work is subject to the deadlines, rules, and regulations of the relevant faculty.

Students who write the supplemental exams at the time of the next supplemental examination period (for Fall courses during the month of May, and for Winter courses and courses spanning Fall/Winter during the last week of August for the Faculties of Arts and of Science);

- supplemental examinations in courses outside the Faculties of Arts or Science are subject to the deadlines, rules, and regulations of the relevant faculty;
- no supplemental examinations are available for students who fail to achieve satisfactory grades in deferred examinations.

Students who register for a supplemental examination and subsequently find themselves unprepared for it should not write it; except for the loss of the registration fee, there is no penalty for not writing a supplemental examination. Students should consult the Student Affairs Office for further information.

#### 6.8.3 Reassessments and Rereads

In accordance with the Charter of Student Rights, and subject to the conditions stated therein, students have the right to consult any written submission for which they have received a mark and the right to discuss this submission with the examiner.
6.9 Academic Standing

Academic standing is based primarily on students' cumulative grade point average (CGPA), but may also be affected by their term grade point average (TGPA). Academic standing is assessed in January for the Fall term, in May for the Winter term, and in September for the Summer term. Academic standing in each term determines if students will be allowed to continue their studies in the next term and if any conditions will be attached to their registration. Decisions about academic standing in the Fall term are based only on grades that are available in January. Grades for courses in which students have deferred examinations and Fall-term grades for courses that span the Fall and Winter terms do not affect academic standing for the Fall term, even though they will ultimately affect students' Fall TGPA. Therefore, academic standings for the Fall term that are designated as interim should be interpreted as advisory. Note that interim standings will not appear on external transcripts. Interim standing decisions are mentioned below only if the rules for them differ from those for regular standing decisions.

6.9.1 Interim Satisfactory/Satisfactory Standing

Students in interim satisfactory or satisfactory standing:
• may continue in their program;
• have a CGPA of 2.00 or greater.

6.9.2 Interim Probationary/Probationary Standing

Students in interim probationary standing (at the end of the Fall term):
• may continue in their program;
• should evaluate their course load and reduce it as appropriate;
• may register for the Fall term, but their standing must be resolved by the end of the course-change period for that term. Students with incomplete standings in the Winter or Summer term must clear Ks, Ls or Supple  ments.

Students in probationary standing:
• may continue in their program;
• must carry a reduced load (maximum 14 credits per term);
• must raise their CGPA to return to satisfactory standing (see above);
• should see their departmental adviser to discuss their course selection.

Students will be placed in probationary standing:
• if their CGPA falls between 1.50 and 1.99 and if they were previously in satisfactory standing;
• if their CGPA falls between 1.50 and 1.99 and their TGPA in Fall or Winter is 2.50 or higher, and if they were previously in probationary, or interim unsatisfactory standing;
• if their CGPA is less than 2.00, and if they were previously in unsatisfactory readmitted standing and have satisfied the relevant conditions specified in their letter of readmission.

6.9.3 Unsatisfactory Readmitted Standing

Students in unsatisfactory readmitted standing:
• were previously in unsatisfactory standing and were readmitted to the B.A. & Sc. by the Associate Dean (Student Affairs) of Science or the Committee on Student Standing of the Faculty of Science;
• must meet the conditions specified in their letter of readmission to be allowed to continue in their program;
• should see their departmental adviser to discuss their course selection.

6.9.4 Interim Unsatisfactory/Unsatisfactory Standing

Students in interim unsatisfactory standing (at the end of the Fall term):  
• may continue in their program;
• should evaluate their course load and reduce it as appropriate;
• are strongly advised to consult an academic adviser, before the withdrawal deadlines, about their course selection for the Winter term.

Students in unsatisfactory standing:
• have failed to meet the minimum standards set by the faculties;
• may not continue in their program, and their registration will be cancelled.

Students will be placed in unsatisfactory standing:
• if their CGPA falls or remains below 1.50;
• if their TGPA in the Fall or Winter falls below 2.50 and their CGPA is below 2.00 and if they were previously in probationary, unsatisfactory readmitted, or interim unsatisfactory standing;
• if they were previously in unsatisfactory standing and were readmitted to the B.A. & Sc. by the Associate Dean (Student Affairs) of Science or the Committee on Student Standing of the Faculty of Science but have not at least satisfied the conditions specified in the letter of readmission.

Appeals for readmission by students in unsatisfactory standing should be addressed to the Associate Dean (Student Affairs) of Science no later than July 15 for readmission to the Fall term and November 15 for the Winter term. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation). Students in unsatisfactory standing for the second time must withdraw permanently.

Normally, supplemental examinations are not permitted; however, students in unsatisfactory standing may appeal to the Associate Dean (Student Affairs) of Science for permission to write a supplemental examination, clearly stating the reasons for special consideration and providing proof as appropriate.

6.9.5 Incomplete Standings

Standing awaits deferred exam. Must clear Ks, Ls or Supple  ments.

Standing Incomplete.

Students with incomplete standings in the Winter or Summer term may register for the Fall term, but their standing must be resolved by the end of the course-change period for that term. Students whose standing changes to unsatisfactory, probationary, or interim unsatisfactory standing may continue in the program. Students whose standing changes to unsatisfactory standing may not continue in their program, and their registration will be cancelled.

Students whose standing changes to unsatisfactory and who wish to ask for permission to continue in their program must make a request to the Associate Dean (Student Affairs) of Science as soon as they are placed in unsatisfactory standing. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation).

Students whose standing is still incomplete by the end of course change period should immediately consult with the Student Affairs Office.

At the end of the Winter term, students with a mark of K or L will be placed in the appropriate standing in June, if the outstanding mark in the course will not affect their standing. Otherwise the standing decision will only be made once their incomplete marks
have been cleared. For more information about incomplete grades please refer to “Incomplete Grades” in section 6.6.1.

6.10 Awards and Honorary Designations

6.10.1 Honours and First-Class Honours

Departments may recommend to the Faculties of Arts and of Science that graduating students registered in an Honours program be awarded Honours or First-Class Honours under the following conditions:

• students must complete all requirements imposed by the department;
• for Honours, the CGPA at graduation must be at least 3.00;
• for First-Class Honours, the CGPA at graduation must be 3.50 or better;
• some departments have additional requirements that must be met before students are recommended for Honours or First-Class Honours (see the departmental entries);
• Students in an Honours program whose program GPA or CGPA is below 3.00 or who did not satisfy certain additional program requirements must consult their academic adviser to determine if they are eligible to graduate in a program other than Honours.

6.10.2 Distinction and Great Distinction

Students in the Interfaculty or the Multi-track programs may be awarded their degrees with Distinction or Great Distinction under the following conditions:

• students must have completed a minimum of 60 McGill credits towards the same degree to be considered;
• for Distinction, the CGPA at graduation must be 3.30 to 3.49;
• for Great Distinction, the CGPA at graduation must be at least 3.50;
• these designations may be withdrawn in the case of transfer students, if their CGPA in another degree program or at another university is not comparable to the CGPA earned in the B.A. & Sc.

6.10.3 Dean’s Honour List

The designation Dean’s Honour List may be awarded to a graduating student under the following conditions:

• students must have completed a minimum of 60 McGill credits towards the same degree;
• students must have a CGPA that is greater than the mean of the minimum CGPAs required for students in the Faculties of Arts and of Science to be placed on their respective Dean’s Honour Lists;
• this designation may be withdrawn in the case of transfer students, if their CGPA in another degree program or at another university was not comparable to the CGPA earned in the B.A. & Sc.

The designation Dean’s Honour List may be awarded at the end of each academic year to continuing students under the following conditions:

• students must have completed at least 27 graded credits during the academic year;
• students must have a sessional GPA (i.e., combined GPA for the Fall and Winter terms) that is greater than the mean of the minimum sessional GPAs required for students in the Faculties of Arts and of Science to be placed on their respective Dean’s Honour Lists.

6.10.4 Medals and Prizes

Various medals, scholarships, and prizes are open to continuing and graduating students. Full details of these are set out in the Undergraduate Scholarships and Awards Calendar, available from the Admissions, Recruitment and Registrar’s Office or on the Web at www.mcgill.ca. Application may be required for some scholarships.

6.11 Programs in the B.A. & Sc.

6.11.1 Major Concentrations

6.11.1.1 Arts

The Arts Major Concentrations available to B.A. & Sc. students are listed here and are described in detail in the Faculty of Arts section of the Calendar

Psychology (A), page 376
6.11.2 Interfaculty Programs

The Interfaculty Programs available to B.A. & Sc. students are listed here and are described in detail either below in the Arts & Science (AS) section or in the McGill School of Environment (E) section of the Calendar as indicated.

6.11.3 Honours Programs

Currently there is only one Honours program available to the B.A. & Sc. Students. It is listed here and described in detail in "Honours Program in Environment", section 14.10 of the Calendar.

An Honours program in Cognitive Science is under development. Students should consult the online calendar for updates at www.mcgill.ca/courses.

Students interested in an Honours degree should also consider the joint honours programs in the next section.

6.11.4 Joint Honours Programs

Joint Honours programs in the B.A. & Sc. are created by combining a Joint Honours Program component from an Arts discipline with one from a Science discipline. Students must register for both Joint Honours Program components. Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

6.11.4.1 Arts

The Arts Joint Honours components available to B.A. & Sc. students are listed here and are described in detail in the Faculty of Arts section of the Calendar.

6.11.6 Integrative Courses
6.11.6.1 Required Integrative Course
All students pursuing a B.A. & Sc. must take BASC 201, normally in U1.

6.11.6.2 Complementary Integrative Course
Students in the B.A. & Sc. are required to complete at least one other integrative course (at least 3 credits), possibly within one of their programs, chosen from the following:

ANTH 201 Prehistoric Archaeology
ANTH 203 Human Evolution
ANTH 227 Medical Anthropology
ANTH 312 Zooarchaeology
ATOC/EPSC 250 Natural Disasters
COMP 280 History and Philosophy of Computing
ECON 347 Economics of Climate Change
ENGC 200 Communications - Pre-Electronic Age
ENGC 210 History of Communication - Electronic Age
ENVR 200 The Global Environment
ENVR 201 Society and Environment
ENVR 202 The Evolving Earth
ENVR 203 Knowledge, Ethics and Environment
GEOG 200 Geographical Perspectives: World Environmental Problems
GEOG 203 Environmental Systems
GEOG 302 Environmental Management 1
GEOG 350 Ecological Biogeography
LING 390 Neuroscience of Language
LING 555 Language Acquisition 2
MATH 328 Computability and Mathematical Linguistics
MATH 330 Mathematical Finance
MATH 338 History and Philosophy of Mathematics
PHIL 220 Introduction to History and Philosophy of Science 1
PHIL 221 Introduction to History and Philosophy of Science 2
PHIL 341 Philosophy of Science 1
PHIL 350 History and Philosophy of Ancient Science
PHIL 361 18th Century Philosophy
PHIL 411 Topics in Philosophy of Logic and Mathematics
PHIL 441 Philosophy of Science 2
SOCI 225 Medicine & Health in Modern Society
SOCI 234 Population and Society
SOCI 235 Technology and Society
SOCI 338 Intro. to Biomedical Knowledge
SOCI 525 Health Care Systems in Comparative Perspective

As a substitute, students can fulfill the requirement for a complementary integrative course by conducting library or empirical research that integrates the components of their program as a 3- or 6-credit independent study course, thesis course, or research course.

6.12 Academic Programs
6.12.1 Required Integrative Course for B.A. & Sc.
BASC 201 (Arts & Science Integrative Topics) is a required course in the B.A. & Sc., normally taken in U1. It introduces students to a variety of interdisciplinary topics that exemplify the benefits of applying scholarship from Arts and Science to a problem. It also provides students in the degree with a common experience and a reference group. For details, see the Course section of the Faculty of Science.

6.12.2 Programs in Arts or in Science
All B.A. & Sc. Arts programs are described in detail in the Faculty of Arts section of the Calendar. B.A. & Sc. Science programs that are open to B.A. students (i.e., programs in Computer Science, Mathematics and Statistics, and Psychology as well as some in Geography) are described in the Faculty of Arts section. Science Minors that are open to B.A. & Sc. students are described in the Faculty of Science section. B.A. & Sc. Science programs that are open only to B.A. & Sc. students are described below.

For information about where each B.A. & Sc. program is listed, see "Programs in the B.A. & Sc."

6.12.3 Biology (BIOL)
The Department of Biology, the discipline, and specific courses are described in the Faculty of Science section of the Calendar.

The minimum freshman science requirements in the B.A. & Sc. may not satisfy the introductory science requirements of all medical/dental schools (see section 6.3.5 "Program Requirements").

MAJOR CONCENTRATION IN BIOLOGY - CELL/ MOLECULAR OPTION (36 credits)
The Major Concentration in Biology, Cell/Molecular Option, which is restricted to students in the B.A. & Sc. or B.Sc./B.Ed. (see section 12.13.31 "Science for Teachers"), is a planned sequence of courses designed to permit a degree of specialization in cell/molecular biology.

Required Courses* (29 credits)
BIOL 200 (3) Molecular Biology
BIOL 201 (3) Cell Biology and Metabolism
BIOL 202 (3) Basic Genetics
BIOL 205 (3) Biology of Organisms
BIOL 215 (3) Introduction to Ecology and Evolution
BIOL 300 (3) Molecular Biology of the Gene
BIOL 301 (4) Cell and Molecular Laboratory
BIOL 303 (3) Developmental Biology
CHEM 212 (4) Organic Chemistry 1

* Required courses taken at CEGEP or elsewhere that are not credited toward the B.A. & Sc. or B.Sc./B.Ed. (see section 12.13.31 "Science for Teachers") must be replaced by 3-credit courses from the Complementary Course List. Regardless of the substitution, students must take at least 36 credits in this program.

Complementary Courses (7 credits minimum)
at least 7 credits selected from:
BIOL 306 (3) Neurobiology and Behaviour
BIOL 313 (3) Eukaryotic Cell Biology
BIOL 314 (3) Molecular Biology of Oncogenes
BIOL 370 (3) Human Genetics Applied
BIOL 373 (3) Biometry
BIOL 413 (1) Directed Reading
BIOL 568 (3) Topics on the Human Genome
BIOL 575 (3) Human Biochemical Genetics
or other appropriate course at the 300 level or higher with permission of an adviser.
MAJOR CONCENTRATION IN BIOLOGY - ORGANISMAL OPTION (37 credits)
The Major Concentration in Biology, Organismal Option, which is restricted to students in the B.A. & Sc. or B.Sc./B.Ed. (see section 12.13.31 “Science for Teachers”) is a planned sequence of courses designed to permit a degree of specialization in organismal biology.

Required Courses* (28 credits)
BIOL 200 (3) Molecular Biology
BIOL 201 (3) Cell Biology and Metabolism
BIOL 202 (3) Basic Genetics
BIOL 205 (3) Biology of Organisms
BIOL 206 (3) Methods in Biology of Organisms
BIOL 215 (3) Introduction to Ecology and Evolution
BIOL 304 (3) Evolution
BIOL 308 (3) Ecological Dynamics
CHEM 212 (4) Organic Chemistry 1

* Required courses taken at CEGEP or elsewhere that are not credited toward the B.A. & Sc. or B.Sc./B.Ed. (see section 12.13.31 “Science for Teachers”) must be replaced by 3-credit courses from the Complementary Course List. Regardless of the substitution, students must take at least 36 credits in this program.

Complementary Courses (9 credits)
9 credits selected from:
BIOL 303 (3) Developmental Biology
BIOL 305 (3) Animal Diversity
BIOL 306 (3) Neurobiology and Behaviour
BIOL 307 (3) Behavioural Ecology/Sociobiology
BIOL 331 (3) Ecology/Behaviour Field Course
BIOL 341 (3) History of Life
BIOL 350 (3) Insect Biology and Control
BIOL 351 (3) The Biology of Invertebrates
BIOL 352 (3) Vertebrate Evolution
BIOL 373 (3) Biometry
BIOL 427 (3) Herpetology
BIOL 435 (3) Natural Selection
BIOL 441 (3) Biological Oceanography
BIOL 442 (3) Marine Biology
BIOL 465 (3) Conservation Biology
or other appropriate course at the 300 level or higher with permission of an adviser.

MINOR CONCENTRATION IN BIOLOGY - CELL/ MOLECULAR OPTION (18 or 19 credits)
The Minor Concentration in Biology, Cell/Molecular Option, is restricted to students in the B.A. & Sc. It is a sequence of courses designed to yield a broad introduction to cell/molecular biology.

Required Courses* (13 credits)
BIOL 200 (3) Molecular Biology
BIOL 201 (3) Cell Biology and Metabolism
BIOL 202 (3) Basic Genetics
CHEM 212* (4) Organic Chemistry 1

* Required courses taken at CEGEP or elsewhere that are not credited toward the B.A. & Sc. must be replaced by approved complementary courses. Regardless of the substitution, students must take at least 18 credits in this program.

Complementary Courses (6 credits)
Any biology course at the 300 level or higher approved by an adviser.

MINOR CONCENTRATION IN BIOLOGY - ORGANISMAL OPTION (18 or 19 credits)
The Minor Concentration in Biology, Organismal Option, is restricted to students in the B.A. & Sc. It is a sequence of courses designed to yield a broad introduction to organismal biology.

Required Courses* (16 credits)
BIOL 200 (3) Molecular Biology
BIOL 201 (3) Cell Biology and Metabolism
BIOL 205 (3) Biology of Organisms
BIOL 215 (3) Introduction to Ecology and Evolution
CHEM 212 (4) Organic Chemistry 1

* Required courses taken at CEGEP or elsewhere that are not credited toward the B.A. & Sc. must be replaced by approved complementary courses. Regardless of the substitution, students must take at least 18 credits in this program.

Complementary Courses (3 credits)
Any biology course at the 300 level or higher approved by an adviser.

6.12.4 Biomedical Sciences
Major Concentration in Biomedical Sciences - Program Advisers:
All U1 students pursuing a B.A.& Sc. Biomedical Science must meet with a Student Affairs Officer.
Professor Teresa Trippenbach, Department of Physiology
McIntyre Medical Sciences Building, Room 1116
E-mail: teresa.trippenbach@mcgill.ca
Telephone: (514) 398-3431
Professor Ann Wechsler, Department of Physiology
McIntyre Medical Sciences Building, Room 1135
E-mail: ann.wechsler@mcgill.ca
Telephone: (514) 398-4341

The following departments jointly offer this B.A. & Sc. program:
Anatomy and Cell Biology (ANAT)
Biochemistry (BIOC)
Microbiology and Immunology (MIMM)
Pharmacology (PHAR)
Physiology (PHGY)

The individual departments, their disciplines, and specific courses offered by them are described in their respective entries in the Faculty of Science section of the Calendar.

The minimum freshman science requirements in the B.A. & Sc. may not satisfy the introductory science requirements of all medical/dental schools (see section 6.3.5 "Program Requirements").

MAJOR CONCENTRATION IN BIOMEDICAL SCIENCES (36-38 credits)
The Major Concentration in Biomedical Sciences, which is restricted to students in the B.A. & Sc., is a planned sequence of courses designed to permit students to survey the various biomedical sciences and acquire some additional in-depth exposure to one of them.

Required Courses (18 credits)
BIOC 212 (3) Molecular Mechanisms of Cell Function
BIOL 200 (3) Molecular Biology
BIOL 202 (3) Basic Genetics
MIMM 211 (3) Introductory Microbiology
PHGY 209 (3) Mammalian Physiology 1
PHGY 210 (3) Mammalian Physiology 2

Complementary Courses (18-20 credits)
3 credits selected from:
ANAT 214 (3) Systemic Human Anatomy
ANAT 262 (3) Introductory Molecular and Cell Biology

4 credits selected from:
ANAT 261 (4) Introduction to Dynamic Histology
BIOL 301 (4) Cell and Molecular Laboratory
CHEM 222 (4) Introductory Organic Chemistry 2

2-4 credits selected from:
MIMM 212* (2) Laboratory in Microbiology
PHGY 212 (1) Introductory Physiology Lab 1
PHGY 213 (1) Introductory Physiology Lab 2
CHEM 212** (4) Introductory Organic Chemistry 1
**Major Concentration in Chemistry** (36 credits)

The Major Concentration in Chemistry, which is restricted to students in the B.A. & Sc. or B.Sc./B.Ed. (see section 12.13.31 "Science for Teachers"), is a planned sequence of courses designed to permit a degree of specialization in this discipline.

**Required Courses** (18 credits)

*Not offered 2007-8. Students entering in Sept. 2007 will take CHEM 363 in U2 or U3 instead.

### 6.12.6 Cognitive Science

Cognitive Science is the multidisciplinary study of cognition in humans and machines. The goal is to understand the principles of intelligence with the hope that this will lead to better comprehension of the mind and of learning and to the development of intelligent devices that constructively extend human abilities.

An Interfaculty Program in Cognitive Science (54 credits) is offered by the following departments, which are described fully in the Faculty of Arts or Faculty of Science section of the Calendar:

- Computer Science (COMP) (Science)
- Linguistics (LING) (Arts)
- Physiology (PHGY) (Science)
- Philosophy (PHIL) (Arts)
- Psychology (PSYC) (Science)

### Interfaculty Program in Cognitive Science (54 credits)

The Interfaculty Program in Cognitive Science, which is restricted to students in the B.A. & Sc., is a planned sequence of courses designed to permit students to focus on at least two relevant areas of study.

**Required Course** (3 credits)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tbody>
</table>
18 credits from List A in one of Computer Science, Linguistics, Neuroscience, Philosophy, or Psychology.

12 credits from List A in one of the four remaining units.

18 credits, at least 12 at the 400 level or higher, chosen from Lists A and/or B in Computer Science, Linguistics, Neuroscience, Philosophy, Psychology and/or Research Courses.

Note 1: Students are responsible for ensuring that they meet all pre- and corequisites for all their courses.

Note 2: With the permission of the Director of the Cognitive Science program, students may be able to substitute courses in cognate departments, such as Anatomy and Cell Biology, Biology, Neurology, or Physiology.

Note 3: B.A. & Sc. students who take Interfaculty Programs must take at least 30 credits in Arts and 30 in Science across their Interfaculty Program and their Minor or Minor Concentration.

**COMPUTER SCIENCE**

**List A:**
- MATH 240 (3) Discrete Structures 1
- COMP 206 (3) Introduction to Software Systems
- COMP 250 (3) Introduction to Computer Science
- COMP 251 (3) Data Structures and Algorithms
- COMP 302 (3) Programming Languages and Paradigms
- COMP 424 (3) Topics: Artificial Intelligence 1
- COMP 426 (3) Automated Reasoning

**List B:**
- MATH 222 (3) Calculus 3
- MATH 223 (3) Linear Algebra
- MATH 328 (3) Computability and Mathematical Linguistics
- COMP 360 (3) Algorithm Design Techniques
- COMP 490 (3) Introduction to Probabilistic Analysis of Algorithms
- COMP 526 (3) Probabilistic Reasoning and AI
- COMP 531 (3) Theory of Computation
- COMP 538 (3) Person-Machine Communication
- COMP 558 (3) Fundamentals of Computer Vision

**LINGUISTICS**

**List A:**
- LING 201 (3) Introduction to Linguistics
- LING 230 (3) Phonetics
- LING 331 (3) Phonology 1
- LING 355 (3) Language Acquisition 1
- LING 370 (3) Introduction to Semantics
- LING 371 (3) Syntax 1
- LING 390 (3) Neuroscience of Language
- LING 419 (3) Linguistic Theory 1
- LING 451 (3) Acquisition of Phonology
- LING 455 (3) Second Language Syntax

**List B:**
- LING 440 (3) Morphology
- LING 531 (3) Phonology 2
- LING 555 (3) Language Acquisition 2
- LING 560 (3) Formal Methods in Linguistics
- LING 571 (3) Syntax 2
- LING 590 (3) Language Acquisition and Breakdown

**PHILOSOPHY**

**List A:**
- PHIL 304 (3) Chomsky
- PHIL 306 (3) Philosophy of Mind
- PHIL 310 (3) Intermediate Logic
- PHIL 341 (3) Philosophy of Science 1
- PHIL 360 (3) 17th Century Philosophy
- PHIL 370 (3) Problems in Analytic Philosophy
- PHIL 415 (3) Philosophy of Language
- PHIL 419 (3) Epistemology
- PHIL 441 (3) Philosophy of Science 2
- PHIL 506 (3) Seminar: Philosophy of Mind
- PHIL 507 (3) Seminar: Cognitive Science

**List B:**
- PHIL 410 (3) Advanced Topics in Logic 1
- PHIL 411 (3) Topics in Philosophy of Logic and Mathematics
- PHIL 421 (3) Metaphysics
- PHIL 470 (3) Topics in Contemporary Analytic Philosophy
- PHIL 474 (3) Phenomenology
- PHIL 510 (3) Seminar: Advanced Logic 2
- PHIL 511 (3) Seminar: Philosophy of Logic and Mathematics
- PHIL 519 (3) Seminar: Epistemology
- PHIL 521 (3) Seminar: Metaphysics
- PHIL 560 (3) Seminar: 17th Century Philosophy

**PSYCHOLOGY**

**List A/B:**
- PSYC 212 (3) Perception
- PSYC 213 (3) Cognition
- PSYC 301 (3) Learning
- PSYC 305 (3) Statistics for Experimental Design
- PSYC 308 (3) Behavioural Neuroscience 1
- PSYC 311 (3) Human Cognition and the Brain
- PSYC 317 (3) Genes and Behaviour
- PSYC 318 (3) Behavioural Neuroscience 2
- PSYC 329 (3) Introduction to Auditory Cognition
- PSYC 340 (3) Psychology of Language
- PSYC 343 (3) Language Learning in Children
- PSYC 352 (3) Cognitive Psychology Laboratory
- PSYC 353 (3) Laboratory in Human Perception
- PSYC 410 (3) Special Topics in Neuropsychology
- PSYC 413 (3) Cognitive Development
- PSYC 470 (3) Memory and Brain
- PSYC 472 (3) Scientific Thinking and Reasoning
- PSYC 503 (3) Computational Psychology
- PSYC 522 (3) Neurochemistry and Behaviour
- PSYC 526 (3) Advances in Visual Perception
- PSYC 529 (3) Music Cognition
- PSYC 537 (3) Advanced Seminar in Psychology of Language
- PSYC 561 (3) Methods: Developmental Psycholinguistics

**NEUROSCIENCE**

**List A/B:**
- ANAT 321 (3) Circuitry of the Human Brain
- BIOL 530 (3) Neural Basis of Behaviour
- BIOL 531 (3) Neurobiology Learning Memory
- BIOL 588 (3) Molecular/Cellular Neurobiology
- NEUR 310 (3) Cellular Neurobiology
- PHGY 311 (3) Intermediate Physiology 1
- or BIOL 306 (3) Neurobiology & Behaviour
- PHGY 314 (3) Integrative Neuroscience
- PHGY 520 (3) Ion Channels
- PHGY 556 (3) Topics in Systems Neuroscience
- PSYC 308 (3) Behavioural Neuroscience 1
- PSYC 311 (3) Human Cognition and the Brain
- PSYC 317 (3) Genes and Behaviour
- PSYC 318 (3) Behavioural Neuroscience 2
- PSYC 410 (3) Special Topics in Neuropsychology
- PSYC 522 (3) Neurochemistry and Behaviour

**RESEARCH COURSES**
- COGS 401 (6) Research Cognitive Science 1
- COGS 402 (6) Research Cognitive Science 2

6.12.7 Computing, Foundations of

The requirements for the B.A. & Sc. Major Concentration in Foundations of Computing are described in detail in section 5.12.12 “Computer Science (COMP)” of the Faculty of Arts section of the Calendar.
6.12.8 Earth and Ocean Sciences
The following departments jointly offer a B.A. & Sc. program:
Atmospheric and Oceanic Sciences (ATOC)
Earth and Planetary Sciences (EPSC)
The departments, the disciplines, and specific courses are described in their respective entries in the Faculty of Science section of the Calendar.

MAJOR CONCENTRATION IN EARTH, ATMOSPHERE AND OCEAN SCIENCES (36 credits)
The Major Concentration in Earth, Atmosphere and Ocean Sciences, which is restricted to students in the B.A. & Sc., is a sequence of courses designed to permit a degree of specialization in these disciplines.

Required Courses (24 credits)
ATOC 214 (3) Introduction: Physics of the Atmosphere
ATOC 215 (3) Oceans, Weather and Climate
ATOC 220 (3) Introduction to Oceanic Sciences
ATOC 315 (3) Water in the Atmosphere
EPSC 210 (3) Introductory Mineralogy
EPSC 212 (3) Introductory Petrology
EPSC 233 (3) Earth and Life History
EPSC 243 (3) Environmental Geology

Complementary Courses (12 credits minimum)
a minimum of 12 credits, at least 6 of which must be at the 300 level or higher, distributed as follows:

at least 6 credits selected from:
EPSC 203 (3) Structural Geology 1
EPSC 220 (3) Principles of Geochemistry
EPSC 231 (3) Field School 1
EPSC 250 or (3) Natural Disasters
ATOC 250
EPSC 320 (3) Elementary Earth Physics
EPSC 331 (3) Field School 2
EPSC 341 (3) Field School 3
EPSC 425 (3) Sediments to Sequences
EPSC 455 (3) Sedimentary Geology
EPSC 542 (3) Chemical Oceanography
6 credits of analytical techniques selected from:
GEOG 272 (3) Earth’s Changing Surface
GEOG 301 (3) Environmental Management 1
GEOG 305 (3) Soils and Environment
GEOG 322 (3) Environmental Hydrology
GEOG 323 (3) Geographical Excursion
GEOG 324 (3) Ecology of Coastal Waters
GEOG 336 (3) Subarctic Field Studies
GEOG 351 (3) Principles of Remote Sensing
GEOG 352 (3) Principles of Remote Sensing
GEOG 353 (3) Principles of Remote Sensing

6.12.9 Environment
The requirements for the B.A. & Sc. Interfaculty Program and the Honours Program in Environment are described in detail in the section on McGill School of Environment. Please see section 14.7 “B.A. & Sc. Interfaculty Program in Environment” or see section 14.10 “Honours Program in Environment”.

6.12.10 Geography (GEOG)
The Department of Geography, the discipline, and specific courses are described in the Faculty of Science section of the Calendar. Note that students may take a Geography program either in Arts or in Science, but not in both.

The following are considered Arts programs in the B.A. & Sc. and are described in the Faculty of Arts section of the Calendar:
Major Concentration in Geography
Major Concentration in Geography (Urban Systems)
Minor Concentration in Geography

The following are considered Science programs in the B.A. & Sc. and are described either below (Major Concentration) or in the Faculty of Science section (Minors) of the Calendar:
Major Concentration in Geography (Physical Geography)
Minor in Geographical Information Systems
Minor in Geography

MAJOR CONCENTRATION PHYSICAL GEOGRAPHY OPTION (36 credits)
The Major Concentration in Geography, which is restricted to students in the B.A. & Sc., is a planned sequence of courses designed to permit a degree of specialization in this discipline.

Required Courses (12 credits)
GEOG 201 (3) Introductory Geo-Information Science
GEOG 202 (3) Statistics and Spatial Analysis
GEOG 203 (3) Environmental Systems
GEOG 272 (3) Earth’s Changing Surface

Complementary Courses (24 credits)
6 credits of analytical techniques selected from:
GEOG 306 (3) Raster Geo-Information Science
GEOG 308 or (3) Principles of Remote Sensing
ATOC 308
GEOG 351 (3) Quantitative Methods
3 credits of field courses selected from:
GEOG 495 (3) Field Studies - Physical Geography
GEOG 496 (3) Geographical Excursion
GEOG 497 (3) Ecology of Coastal Waters
GEOG 499 (3) Subarctic Field Studies
9 - 15 credits in systematic physical geography selected from:
GEOG 305 (3) Soils and Environment
GEOG 321 (3) Climatic Environments
GEOG 322 (3) Environmental Hydrology
GEOG 350 (3) Ecological Biogeography
GEOG 372 (3) Running Water Environments
GEOG 396 (3) Geographical Excursion
GEOG 495 (3) Field Studies - Physical Geography
GEOG 496 (3) Geographical Excursion
GEOG 497 (3) Ecology of Coastal Waters
GEOG 499 (3) Subarctic Field Studies
9 - 15 credits in systematic physical geography selected from:
GEOG 305 (3) Soils and Environment
GEOG 321 (3) Climatic Environments
GEOG 322 (3) Environmental Hydrology
GEOG 350 (3) Ecological Biogeography
GEOG 372 (3) Running Water Environments
GEOG 396 (3) Geographical Excursion
GEOG 495 (3) Field Studies - Physical Geography
GEOG 496 (3) Geographical Excursion
GEOG 497 (3) Ecology of Coastal Waters
GEOG 499 (3) Subarctic Field Studies
9 - 15 credits in systematic physical geography selected from:
GEOG 305 (3) Soils and Environment
GEOG 321 (3) Climatic Environments
GEOG 322 (3) Environmental Hydrology
GEOG 350 (3) Ecological Biogeography
GEOG 372 (3) Running Water Environments

6.12.11 Mathematics
The requirements for the B.A. & Sc. Major Concentration in Mathematics are described in detail in section 5.12.36 "Mathematics and Statistics (MATH)" of the Faculty of Arts section of the Calendar.

6.12.12 Physics (PHYS)
The Department of Physics, the discipline, and specific courses are described in the Faculty of Science section of the Calendar.

MAJOR CONCENTRATION IN PHYSICS (36 credits)
The Major Concentration in Physics, which is restricted to students in the B.A. & Sc. or B.Sc./B.Ed., (see section 12.13.31 “Science for Teachers”), is a planned sequence of courses designed to permit a degree of specialization in this discipline.

Required Courses* (30 credits)
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 314 (3) Advanced Calculus
MATH 315 (3) Ordinary Differential Equations
PHYS 230 (3) Dynamics of Simple Systems
PHYS 232 (3) Heat and Waves
PHYS 257 (3) Experimental Methods 1
PHYS 333 (3) Thermal and Statistical Physics
PHYS 340 (3) Electricity and Magnetism
PHYS 446 (3) Quantum Physics
* Required courses taken at CEGEP or elsewhere that are not credited toward the B.A. & Sc. or B.Sc./B.Ed. (see section 12.13.31 “Science for Teachers”) must be replaced by courses from the Complementary Course List.

**Complementary Courses (6 credits)**

6 credits selected from:

- PHYS 214 (3) Introductory Astrophysics
- PHYS 225 (3) Musical Acoustics
- PHYS 241 (3) Signal Processing
- PHYS 258 (3) Experimental Methods 2
- PHYS 334 (3) Advanced Materials
- PHYS 534 (3) Nanoscience and Nanotechnology

or any 300- or 400-level course approved by an adviser

### 6.12.13 Psychology

The requirements for the B.A. & Sc. Major Concentration in Psychology, Joint Honours Component in Psychology and Minor Concentration in Psychology are described in detail in section 5.12.43 “Psychology (PSYC)” of the Faculty of Arts section of the Calendar.

7.1.2 Administrative Officers
Jamshid Beheshti; B.A.(S.Fraser), M.L.S., Ph.D.(W. Ont.) Associate Dean (Administration)
Spencer Boudreau; B.A. (Don Bosco), B.A., M.A. (Sher.), Ph.D. (C’dia.) Associate Dean (Teaching, Learning and Students)
Cathrine Le Maistre; B.Sc., Dip. Ed. (Exe.), M.Ed., Ph.D. (McG.) Associate Dean (Academic Affairs)
Robert J. Bracewell; B.Sc., M.A. (McM.), Ph.D. (Tor.) Associate Dean (Graduate Studies)
France Bouthillier; B.Ed. (UQAM), M.B.SI. (Montr.), Ph.D. (Tor.) Director, Graduate School of Library and Information Studies
Steven Jordan; B.A. (Kent), M.Sc. (Lond.), Ph.D. (McG.) Chair, Department of Integrated Studies in Education
Greg Reid; B.Ed. (P.E.) (McG.), M.S. (Calif.), Ph.D. (Penn. St.) Acting Chair, Department of Kinesiology and Physical Education
Susanne P. Lajoie; B.A., M.A. (McG.), Ph.D. (Stan.) Chair, Department of Educational and Counselling Psychology
Anne Farray Assistant to the Dean/APR
Christine Zilberman Senior Student Affairs Officer
Susan Mao Cheia Financial Officer
7.1.3 The Faculty Then and Now

The Faculty of Education traces its beginnings back to 1857, when the McGill Normal School was established at McGill by agreement between the University and the Government of Quebec. In 1907, it was renamed the School for Teachers and was moved to Sainte-Anne-de-Bellevue, where it became part of Macdonald College. At this time also, the Macdonald Chair of Education was endowed at McGill University and a Department of Education was created in the Faculty of Arts and Science for the purpose of preparing candidates for the High School Diploma. The first graduate program was inaugurated in 1930, and in 1953, the University established the B.Ed. degree.

In 1955, the School for Teachers and the Department of Education were combined to become the Institute of Education within the Faculty of Arts and Science. To these was joined, in 1957, the McGill School of Physical Education (founded in 1912).

The Institute was reconstituted as the Faculty of Education in 1965 and the work continued on both the McGill and Macdonald Campuses. The St. Joseph Teachers College and the Faculty of Education were amalgamated in 1970 and relocated in a new building on the McGill Campus. In 1996, the Graduate School of Library and Information Studies became affiliated with the Faculty. The Faculty serves approximately 2,000 students enrolled in undergraduate, graduate and professional development programs. The Faculty is organized into three departments and the Graduate School of Library and Information Studies. In addition, the Faculty has a number of research and service centres, several of an interdisciplinary nature.

Like other faculties of education in Quebec and Canada, the Faculty has had a traditional role in the initial training of teachers and leaders in education-allied occupations. It is also concerned with constructing knowledge through research and scholarship and with providing professional development services to the wider educational community.

In recent years a number of links have been established with counterparts in other countries for teaching, research and development purposes. Current active projects, some of which involve students as well as staff, include those in Japan, Indonesia, South Africa and Mexico.

7.1.4 Faculty Facilities

Centre for Educational Leadership (CEL)

CEL, a unit of the Department of Integrated Studies in Education, is committed to the development of leadership for all educational stakeholders through teacher preparation, graduate studies, research and varied approaches to professional development. The Centre seeks to promote dialogue, partnerships and projects among teachers, policy makers and other educational leaders in the local community and beyond through credit and non-credit work, research and development activities.

Director: Dr. Lynn Butler-Kisber
CEL is located in the Faculty of Education (Room 422)
Telephone: (514) 398-6961 extension 1591
Fax: (514) 398-7436
Website: www.mcgill.ca/edu-integrated

Education Library and Curriculum Resources Centre

The Education Library and Curriculum Resources Centre are located on the first floor of the Education Building. The Library provides resources and services to support the teaching and research programs of the Faculty. The education collection includes over 120,000 monograph volumes, more than 500 periodical titles with access to full-text electronic journals, microforms, government publications and multimedia materials.

The Curriculum Resources Centre adjoining the Library houses a collection of elementary and secondary school textbooks, teachers' resource guides, videos, DVDs, audiotapes, CD-ROMs, games, kits, puppets, big books, and equipment for viewing and listening. The Children's Literature Collection located at the back of the room includes fiction, non-fiction, poetry, folklore, and picture books.

Tours and instructional workshops are offered at the beginning of each term to introduce students to information skills that will help them with their assignments. They cover searching the Library Catalogue [MUSE], cross-searching a wide range of electronic resources and databases including ERIC, PsychINFO; and Education Full Text and creating references and bibliographies for papers using EndNote citation management software.

The Library provides computers for student use, wired study carrels to connect laptops, and is also a wireless zone. Students may select to work in quiet study areas in the Annex and E-Zone, or prefer the group study area in the Curriculum Lab. Visit the Education Library Website to learn more about library loans, hours, reserve readings, and links to important education sites.

Head Librarian: Marilyn Cohen
Telephone: (514) 398-4689
Website: www.mcgill.ca/education-library

Education Undergraduate Society (EDUS)

The Society is the students' voice of undergraduates within the Faculty and its primary purpose is to serve and to inform the students. It also attempts to unify students through sponsorship of activities such as career placement, student orientation, participation in teachers' conventions, library donations and the organization of an Education Career Fair. Other activities include the assignment of lockers for students, selling merchandise in the Spirit Store, the coordination of the Graduation Ball, as well as fundraising and events throughout the academic year. Students are encouraged to participate and to make their opinions known. The Society Office is located in Room B179 of the Education Building.

Telephone: (514) 398-7048
Fax: (514) 398-2476
E-mail: president.edus@mail.mcgill.ca
Website: www.mcgilledus.ca

Media Services

Media Services specializes in helping all Education students and teaching staff use a broad selection of educational technologies. We feature experienced technical support staff and provide free access to a wide range of multimedia, computer and audiovisual equipment and facilities for course and research work.

Highlighted in our educational equipment inventory is a 30 seat mobile laptop computer lab. This lab provides wireless access to the Internet in most of our classrooms. We also boast an eight seat video editing lab featuring workstations with large 20” screens and DVD burners. While the lab is configured and used extensively for video editing many other popular multimedia applications are also available. These include PowerPoint production, photo editing, audio editing, creation of PDF files and Website development.

For course and research work students and staff can select from the following equipment loan inventory:

- Windows laptop computers
- Macintosh laptop computers
- Mobile 30 seat wireless laptop lab
- Mobile computer presentation carts with data projectors
- Portable data projector for computer and video
- Digital video cameras
- Digital still cameras
- Digital audio recorders
- Analog audio recorders
- Portable stereos (CD, MP3 and cassette playback)

In-class technical support services are provided as needed, both by appointment and in urgent situations, as well as through ongoing maintenance of classroom technology facilities. All classrooms in the Faculty have Internet access, most being equipped with wireless (wi-fi) connectivity. Currently, fourteen classrooms are equipped with permanently installed data projectors for computer and video display. Students and teaching staff can connect
to these using their own laptop computers or one borrowed from our equipment loan inventory.

We provide free technical production services to all teaching staff for creating teaching materials and the recording of teaching events. This service requires advance reservation and carries charges for consumables. All free technical work is restricted to Faculty of Education courses. Production services include video, photography, Websites, PowerPoint, booklets, pamphlets, posters, banners, and media duplication when not prohibited by copyright. Production services are also available to research, administration and external clientele at competitive pricing.

Conferences sponsored by the Faculty and held in the Education building have access to a full range of technical support services including pre-conference planning, promotional and conference day materials preparation, and extensive conference-day technical support staff.

Instructional functions comprise small group workshops and Media Services facilities tours (both by appointment only), individual equipment and software operation assistance and troubleshooting, and technical support to courses.

Media Services manages and maintains the Faculty web server, participates in maintaining the Faculty Website and provides production services for the Faculty newsletter.

Sessional Hours (September to June):
Monday to Thursday 08:15 - 20:45
Friday 08:15 - 16:45

Summer Hours (July):
Monday to Thursday 08:15 - 16:45

Annual Closing (August):
Media Services re-opens one week before Fall classes begin.
Please note that the above schedule varies slightly from year to year. Exact schedules will be posted at the Media Services entrance and on the Website: www.mcgill.ca/education/resources/media.

Media Services is closed on Saturdays, Sundays and holidays.

Media Services is located in Room 219 of the Faculty of Education.
Manager: Mr. Jim Harris
Telephone: (514) 398-6950
Website: www.mcgill.ca/education/resources/media

Computer Facilities
The Faculty has a large computer complex located in Room 328 of the Education Building. It houses a lab with Windows computers, a second lab with Apple Macintosh computers, and a smaller work area with additional computers. Colour and black-and-white laser printing and scanning facilities are available. Consultants are available for help. This facility is available for courses, workshops and individual use by Education students and staff.

Closed Sundays, holidays and during August.
Hours for the Fall and Winter terms are:
Monday to Thursday 09:00 - 21:00
Friday 09:00 - 17:00
Saturday 11:00 - 16:00
Website: www.mcgill.ca/education/resources/lab

McGill Career and Placement Service (CAPS)
Refer to the General University Information section for further information on this service.

For Information, contact:
Career Adviser: Alain Villemaire
Telephone: (514) 398-2484
E-mail: alain.villemaire@mcgill.ca
Website: www.mcgill.ca/edu-sao/careerandplacementservices

McGill Journal of Education
The McGill Journal of Education is published three times a year: Winter, Spring, and Fall. It includes work in English and French from local, national and international sources. The Journal publish-
Seagram Sport Science Centre
The Seagram Sport Science Centre, opened in 1993, houses five laboratories for faculty and graduate students in the Department of Kinesiology and Physical Education. The five laboratories include Adapted Physical Activity, Exercise Physiology, Biomechanics, Health & Sport Psychology and Motor Control. The activities of the Centre include ongoing research programs funded in part by CIHR, NSERC, SSHRRC and CFI grants, performance testing of elite athletes, joint research activities with other departments within McGill and industry.
Director: Dr. David Pearsall, Faculty of Education
Telephone: (514) 398-4184 ext. 09976

Office of Student Teaching (OST)
The Office of Student Teaching is responsible for the planning and implementation of field experiences and arranging with school boards and schools for the placement of student teachers in the Bachelor of Education programs. The Office coordinates student teaching among Departments within the Faculty, and develops partnerships with the education community. The Office offers training to colleagues in schools.
Office Hours: Monday to Friday 08:30 - 17:00
Director: Professor Fiona J. Benson
Office: Education Building, Room 431A
Telephone: (514) 398-7046
Fax: (514) 398-3179
E-mail: ost.education@mcgill.ca
Website: www.mcgill.ca/ost

Student Affairs Office (SAO)
The Student Affairs Office is responsible for student records and registration as well as general academic information and advice on undergraduate program and degree requirements, course change, withdrawal, supplemental and deferred exams, rereads, academic standing, inter-faculty transfer, readmission, study away, scholarships and awards, graduation and teacher certification.
Special requests can be made, in writing, to the Associate Dean (Teaching, Learning and Students).
Office: Education Building, Room 243
Telephone: (514) 398-4679
Fax: (514) 398-3179
E-mail: sao.education@mcgill.ca
Website: www.mcgill.ca/edu-sao

7.2 Faculty Programs
The Faculty of Education offers three different kinds of programs.

Undergraduate Programs
The Faculty offers programs leading to the Bachelor of Education (B. Ed.) degree for those wishing to become teachers, and a B.Sc. (Kinesiology). Advanced standing may be given to those already holding a university degree.

Programs of Professional Development
For qualified teachers wishing to enhance their knowledge and skills, the Faculty offers programs of professional development leading to specialized Certificates and Diplomas. Most courses that are required to complete these programs are offered in the evenings and in the summer.

Graduate Programs
The Faculty offers graduate programs for those already holding a university degree who wish to pursue advanced study and research leading to master’s and doctoral degrees in various fields of education and psychology, and library and information studies.

Undergraduate programs of initial teacher education are described in this Calendar, programs of professional development are described in the most current Centre for Continuing Education Calendar, and graduate programs are described in the most current Graduate and Postdoctoral Studies Calendar.

7.2.1 Undergraduate Education Programs
The Faculty of Education offers the following Undergraduate programs. Details of each program may be found in this Calendar under the headings of the appropriate department. The credit weights given are for students who have graduated from appropriate Quebec CEGEP programs; students who do not possess a Diplôme d'études collégiales (DEC) are normally required to complete an additional 30 credits.

Normally, Bachelor of Education programs may only be followed on a full-time day basis.

Admission is competitive and it may not be possible to accept all applicants who meet the minimum requirements.

All Bachelor of Education programs have been accredited by the Comité d'agrément des programmes de formation à l'enseignement (CAPFE).

For "Bachelor of Education Secondary Program", see section 7.5.1.1, page 207. A 120-credit program offered by the Department of Integrated Studies in Education.

For "Bachelor of Education Kindergarten and Elementary Program", see section 7.5.1.4, page 210.

For "Bachelor of Education Kindergarten and Elementary Program (First Nations and Inuit Studies Option)", see section 7.5.1.5, page 210. A 120-credit program, offered by the Department of Integrated Studies in Education.

For "Bachelor of Education Kindergarten and Elementary Program (Jewish Studies Option)", see section 7.5.1.7, page 211. Students taking this option take 128 credits, offered by the Department of Integrated Studies in Education.

For "Baccalauréat en enseignement du français langue seconde", see section 7.5.1.8, page 211. A 120-credit program, offered by the Department of Integrated Studies in Education jointly with the Université de Montréal.

For "Bachelor of Education in Teaching English as a Second Language", see section 7.5.1.9, page 212. A 120/121-credit program offered by the Department of Integrated Studies in Education.

For "Bachelor of Education Physical Education", no new students will be admitted to this program; refer to previous Calendars for program details.

For "Bachelor of Education Physical and Health Education", see section 7.6.1.1, page 217. A 120-credit program offered by the Department of Kinesiology and Physical Education.

For "Concurrent Bachelor of Education in Music and Bachelor of Music (Music Education Program)", see section 7.5.1.2, page 208. A 143/144-credit program offered jointly by the Department of Integrated Studies in Education and the Schulich School of Music. See also section 10.6.5 “B.Mus./B.Ed. Bachelor of Music and Bachelor of Education Concurrent Program”.

For "Concurrent Bachelor of Science (Major or Major Concentration with a Minor for Teachers) and Bachelor of Education Secondary Program", see section 7.5.1.3, page 209. This program is offered jointly by the Department of Integrated Studies in Education and the Faculty of Science.

A student who successfully completes any of the above programs, (and meets other requirements set out by the MELS (Ministère de l'Éducation, du Loisir et du Sport) is recommended for certification as a teacher in the province of Quebec, see section 7.2.1.3 "Quebec Teacher Certification", on page 199.

For "Bachelor of Education Kinesiology", no new students will be admitted to this program; refer to previous Calendars for program details.
For "Bachelor of Science (Kinesiology)", see section 7.6.2, page 218. A 90-credit program offered by the Department of Kinesiology and Physical Education.

The program entails a comprehensive understanding of human movement. Kinesiology is a multidisciplinary field viewing human movement from social, historical, psychological, or biological perspectives. The program provides students with a breadth of theoretical knowledge as well as an opportunity to explore related areas in greater depth, including minor programs available elsewhere within the University. Students may opt for either General or Applied emphasis, with an Honours program available for particularly strong students.

7.2.1.1 General Admission Requirements

For information about admission requirements to the B.Ed, B.Sc. (Kinesiology) or the Concurrent B.Sc./B.Ed. or B.Mus./B.Ed. programs please refer to the “Undergraduate Admissions Guide 2007-08 (Appendix A)”. Applicants to the Concurrent B.Sc./B.Ed. apply through the Faculty of Science, and to the Concurrent B.Mus./B.Ed. apply through the Faculty of Music.

For information about Inter-Faculty Transfer or Re-admission, please see section 3.3.12 “Inter-Faculty Transfer”, or section 3.3.13 “Re-admission”, as well as information posted on the Student Affairs Office web site www.mcgill.ca/edu-sao/admissions.

Although no additional prerequisite courses are required, the Faculty recommends that applicants to the B.Ed. Secondary, Science & Technology, and B.Ed. Physical & Health Education programs have appropriate background science and mathematics courses, i.e., biology, chemistry, physics and mathematics. Students having other backgrounds will be considered for admission but will be required to complete prerequisite courses in mathematics and science that may increase the number of credits required for the degree.

7.2.1.2 Advanced Standing/Transfer Credits

Advanced standing credit will be granted on an individual basis depending upon the student’s academic background. A minimum of 60 credits must be completed at McGill in order to obtain a McGill degree. Courses taken more than 5 years before the time of admission are not permitted in subjects where there have been substantial content changes, nor in any pedagogy courses specific to the Quebec K-11 curriculum. Courses more than 5 years old in other subject areas may be considered on an individual subject basis by the program director. Please note that transfer credit evaluation can only be determined after the formal application and all necessary supporting documents have been received by the Admissions, Recruitment and Registrar’s Office. Students who wish to request a review of their advanced standing allocation must do so in the first year of their program. For more details, see “Undergraduate Admissions Guide 2007-08 (Appendix A)”.

7.2.1.3 Quebec Teacher Certification

Please note that graduates of teacher education programs are recommended by the University for Quebec Certification to the Quebec Ministère de l’Éducation, du Loisir et du Sport (MELS).

Teacher Certification in Quebec is the responsibility of the MELS. Students who complete requirements for the Bachelor of Education degree and who meet the MELS requirements (specified below) are recommended for certification.

All graduates of the 120-credit Bachelor of Education Teacher Education programs may apply for a permanent Teaching Diploma (Brevet) immediately upon graduation.

In order to be eligible for a “Permit to Teach” or a permanent Quebec Diploma, candidates must be either Canadian citizens or Permanent Residents.

In June 2005, the National Assembly of Quebec adopted an Act amending the Education Act and the Act respective to Private Education. The amendments concern the verification of judicial antecedents of persons holding or applying for a permit to teach in the youth, adult and vocational sectors.

Anyone seeking Teacher certification in the Province of Quebec is required to submit a confidential declaration concerning their judicial record to the Minister of Education. This document is available on the MELS Website at www.mels.gouv.qc.ca/dfpps/interieur/PDF/Antecedents_judiciaires_a.pdf.

In addition to meeting these requirements, candidates for Teacher certification must be recommended by McGill University in a series of core professional competencies specified in “Teacher Training Orientations – Professional Competencies” (MEQ 69-2099A).

Holders of a temporary Permit or of a permanent Diploma wishing to teach in another province or in another country must apply directly to the Teacher Certification Agency in the relevant province or country. Similarly, teachers from other provinces or countries who wish to teach in Quebec must apply to the Ministère de l’Éducation du Loisir et du Sport 600 Fullum, 2e étage Montréal, QC H2K 4L1 Telephone: (English) (514) 873-4630

Please refer to the following web site for further information on obtaining a Quebec Teaching Licence www.mels.gouv.qc.ca.

It is recommended that applicants intending to teach in other provinces obtain information beforehand concerning the requirements for certification in the appropriate province.

Fluency (oral and written) in the language of instruction is a requirement for all those seeking certification.

7.2.2 Programs of Professional Development

The Faculty of Education offers programs of professional development in several fields. All such programs are 30 credits, unless otherwise indicated, and may be completed through part-time study. They are intended to provide an opportunity for teachers and other educators to enhance their existing knowledge and skills or to develop new ones, and thus are normally available only to those who are already certified as teachers.

Detailed information regarding general regulations, admission requirements and program profiles for the following certificates and diplomas may be found in the section for offering departments.

Faculty of Education

Student Affairs Office
3700 McTavish Street, Room 243
Montreal, QC, H3A 1Y2
Telephone: (514) 398-7042
Fax: (514) 398-4679
E-mail: sao.education@mcgill.ca
Website: www.mcgill.ca/conted-edu

Department of Educational and Counselling Psychology
Certificate in Inclusive Education
Diploma in Human Relations and Family Life Education
Further information is available from the program secretary at (514) 398-4248.

Courses offered through Continuing Education and Summer Studies

A wide range of courses, enabling students either to acquire prerequisite credits or to earn credit towards their degree, is offered through Continuing Education and Summer Studies. For courses offered, please check Minerva.

7.2.3 Programs for First Nations and Inuit

The following programs are offered for First Nations and Inuit teachers by the Faculty of Education. Information can be obtained by contacting:
Office of First Nations and Inuit Education (OFNIE)
3700 McTavish Street, Room 244
Montreal, QC, H3A 1Y2
Telephone: (514) 398-4533
Fax: (514) 398-2553
Website: www.education.mcgill.ca/ofnie/default.html
7.3 Faculty Regulations for Undergraduate Programs

Please consult the General University Information section for regulations and procedures regarding registration, fees, course load, course change (drop/add), withdrawal, verification, examinations, inter-university transfer, and graduation. In addition, the following section provides regulations specific to Faculty of Education students.

Note: Each student in the Faculty of Education must be aware of and comply with the Faculty regulations as stated in this Calendar. While departmental and Faculty advisers and staff are always available to give advice and guidance, the ultimate responsibility for complete and correct course selection and registration, for compliance with, and completion of, program and degree requirements, and for the observance of regulations and deadlines, and for academic records, rests with the student. It is the student’s responsibility to seek guidance. Misunderstanding will not be accepted as cause for dispensation from any regulation, program or degree requirement.

Advising
Refer to section 4.1 “Undergraduate Advising”, and the Student Affairs Website, www.mcgill.ca/edu-sao/advisinginfo/advisors, for further information. Assistance is also available by e-mailing sao.education@mcgill.ca.

All newly admitted students are required to attend the academic advising sessions scheduled during August prior to the beginning of the Fall term. For a detailed description of advising and registration procedures, students should refer to Welcome to McGill, which is sent to all newly admitted students by the Admission, Recruitment and Registrar’s Office upon their acceptance, as well as the Student Affairs Website, www.mcgill.ca/edu-sao/advisinginfo/new.

Academic advising for all returning students takes place in March for the upcoming academic year. Detailed advising and registration information is posted on the Student Affairs Website: www.mcgill.ca/edu-sao/advisinginfo/returning. Students entering their graduating year are encouraged to meet with their adviser during this advising period.

All students admitted into the Freshman Year (Year 0) are required to meet with an adviser during the Advising period in August. Please see section 7.3 “Faculty Regulations for Undergraduate Programs” for further information.

A list of recommended courses for Freshman (Year 0) students is available on the Web www.mcgill.ca/edu-sao/advisinginfo/freshman.

7.3.1 Code of Professional Conduct
Faculty of Education programs have professional components and field placements. In all aspects of any program, on campus and off, students are expected to demonstrate ethical, responsible, and professional behaviour in the performance of their duties, to conduct themselves in accordance with the law (e.g., Youth Protection), and to meet the expectations of schools, boards and other host institutions receiving them for field placements. This applies to all aspects of professional conduct, including but not limited to respect for persons, property and confidentiality, appropriate dress and punctuality. Failure to meet these expectations, regardless of performance in courses or other formal program requirements, will be taken into account in the assessment of the students’ overall academic standing in the program and, in the most serious instance, may result in a requirement to withdraw from the program.

7.3.2 English Language Requirement

The Quebec Ministère de l’Éducation, du Loisir et du Sport (MELS), and the Faculty of Education require that all students in teacher education programs demonstrate their proficiency in the language of instruction. To fulfill this obligation, all students are required to pass an English Language Proficiency Test in the Fall term of their first year of admission to the Faculty. The test will be administered in the December examination period. Students who fail the test the first time and who wish to remain in the program will have adequate opportunities to improve the quality of their English language skills. Students who were unsuccessful in their first test in the first year in the program will be required to register and take the test again in the Fall term of the second year of the program. Students who fail the second test will be placed in unsatisfactory standing and must withdraw from the program. Students who fail to register for the test in the Fall term of their first year in the program will be given only one opportunity to pass the test, in the Fall term of their second year. Students admitted with advanced standing requiring fewer than 75 credits who fail EDEC 215 at the first attempt in December must pass the examination in the following June.

Note: This requirement does not apply to students in the B.Ed. TESL or the Certificate in Education for First Nations and Inuit programs.

Language Requirement for Applicants to B.Ed. TESL, TFSL Programs
Applicants to the B.Ed. TESL or TFSL programs are required to pass written and oral language tests in order to fulfill the admission requirements of these two programs.

7.3.3 Course Information

Course Load
Undergraduate Education programs can normally only be followed on a full-time basis. Students must take a minimum of twelve (12) credits per term unless the Associate Dean (Teaching, Learning and Students) gives them special permission. Special permission must be requested prior to the end of Course Add/Drop period.

Any absence or reduction in course load that may impact the regular progression of a student’s program must have written approval by the Associate Dean (Teaching, Learning and Students). The normal course load per term is 15 credits. Students whose GPA is above 3.00 may take up to 18 credits per term. Overloads are not allowed in major field experience terms for students in the B.Ed. programs.

Time Limit for Completion of Degrees
Students are expected to complete their program in no more than five (5) years after their initial registration for the degree. Students who enter in a freshman year become subject to these regulations one year after their initial registration. Students who exceed these limits must apply to the Faculty for permission to continue.
Course Requirements
All required and complementary courses used to fulfill program requirements must be completed with a grade of C or better. A failure (F, J, KF, WF) in any level of field experience or the English Language Proficiency Test (EDEC 215), second attempt, places a student in unsatisfactory standing requiring withdrawal from the University. Further details on requirements for field experience are listed in section 7.3.7 “Student Teaching/Field Experience”.

Courses Taken as Transfer Credit
Please refer to section 3.5.5 “Transfer Credits” for further information. Students are not permitted to take transfer courses during their graduating term.

Courses Taken under Satisfactory/Unsatisfactory Option
Required or Complementary courses cannot be taken under this option. Please consult section 3.3.6 “Courses Taken under the Satisfactory/Unsatisfactory (S/U) Option”.

Course Equivalencies
For the Bachelor of Education programs, the following 3-credit courses are considered equivalent:
- EDEC 233 First Nations and Inuit Education (formerly EDEE 441)
- EDEC 248 Multicultural Education
- EDEC 410 Multi-cultured/Multi-racial Class (retired Fall 2005)
- EDER 464 Intercultural Education (retired Fall 2005)
(Only one of these courses may be taken for credit.)
Also for the Bachelor of Education programs, the following 3-credit courses are considered equivalent:
- EDES 201 Effective Written Communication
- EDEC 202 Effective Communication
- EDEC 203 Communication in Education
(Only one of these courses may be taken for credit.) Credit for Elementary Computing ACOM150, offered by the Faculty of Arts, will not be given if taken concurrently with or after EDPT 200.

Dress Regulations
All students enrolled in teacher certification programs are advised that school boards and individual schools may have regulations concerning acceptable attire. Students must adhere to any such regulations.
Students in Kinesiology and Physical Education programs are required to wear appropriate clothing for activity courses as approved by the instructor(s). Students may also be responsible for providing some items of personal equipment.

7.3.4 Registration
Course Selection
Students in Faculty of Education programs should register for the courses as outlined in the individual program overviews provided at the time of admission. The B.Ed. programs are very structured and students are advised to follow the sequence as outlined. Student must register on-line using Minerva. Information is distributed at the time of admission and is also available on the Faculty Website, www.mcgill.ca/edu-sao. For more information on registration, see section 3.3 “Registration”.
Students in the B.Ed. programs who are required to be registered for Field Experience should consult section 7.3.7 “Student Teaching/Field Experience” for more information.

Withdrawals: There are three course withdrawal periods published in the Calendar and on the University Website, www.mcgill.ca/students, or section 3.3.8 “Regulations Concerning Course Withdrawal”. Approval to withdraw after the published deadlines will be granted only in exceptional circumstances.
Students withdrawing from student teaching should refer to section 7.3.6 “Grading and Examination”.

7.3.5 Attendance
The pattern of attendance necessary to satisfy the requirements of coursework will vary according to the nature of different subjects and the professors’ approaches to them. A course constitutes a contractual, professional, academic and social obligation between the professor and the student. It is, therefore, the responsibility of the professor to make students aware of the unique requirements of a course and the manner in which they may be fulfilled, and the responsibility of the student to meet these requirements.

7.3.6 Grading and Examination
For information on Grading, please see section 3.5 “Student Records”. For information on Examinations, please see section 3.6 “Examinations”.

7.3.7 Student Teaching/Field Experience
The Office of Student Teaching (OST), www.mcgill.ca/ost, is responsible for arranging the placement and evaluation of all student teachers in supervised Field Experiences.

Field Experiences:
- Are required courses (with the subject code EDFE) for all students in the B.Ed. Program from 1st through 4th year.
- Are the sole responsibility of the OST, and under no circumstances should students make their own placement arrangements.
- Should be taken in the required sequence.
- Require that ‘Newly Admitted’ and ‘Returning Students’ follow registration procedures (see below) or risk not being placed in a host school.
- Are completed in English schools in the province of Quebec in the majority of cases, with the exception of the B.Ed. TESL Program Field Experiences which take place in French schools in the province of Quebec.
- Can be specialized in some circumstances. Refer to the OST Website for information regarding such opportunities (distance, special needs, resource room, adult education, private school, etc.).
- Could require that students travel some distance to their host school and students should therefore budget a sum of money to offset such travel costs.
- Require that students be placed at host schools for specific periods of time ranging from 10-40 days.
- Continue during the University-scheduled Study Break in the Winter term (refer to the Calendar of Dates).
- Continue through May in the Summer term (refer to the OST Website).

Newly Admitted Students:
- Must be registered for their first year Field Experience and submit their Student Teaching Placement form by August 31.
- Who have acquired formal teaching experience prior to admission to the Bachelor of Education program may be granted exemption for the 1st year Field Experience. Written requests must be made to the Director of the OST by August 31 of the year of admission. Requirements for supporting documentation can be found on the OST Website.

Returning Students:
- Must register for Field Experience on Minerva at least three months prior to commencement of the term in which the Field Experience takes place.
- Must submit a Student Teaching Placement Form to the OST by the same deadline.
• Must be in satisfactory standing and have satisfied all pre-requisite and co-requisite course requirements (refer to www.mcgill.ca/edu-sao/advisinginfo/returning).

• In the B.Ed. K/Elem, B.Ed. Secondary or B.Ed. TESL who wish to transfer from one program to the other will not be required to repeat 1st year Field Experience.

Because Field Experience registration procedures pertaining to ‘Newly Admitted’ and ‘Returning Students’ vary somewhat for students in the Physical and Health Education Program from those outlined above, those students are required to contact their program advisor for all Field Experience registration information, and to read the information pertaining to the Physical and Health Education Program on the OST Website.

Field Experience Protocols
Students are responsible for familiarizing themselves with the guidelines governing their pedagogical and professional behaviour whilst on Field Experience (refer to the OST Website).

Students should not engage in any type of employment, nor register for any course that might interfere with the successful outcome of a Field Experience.

Field Experience Courses
Punctual attendance is required at the assigned school for the entire Field Experience. Absences are only excused in exceptional circumstances, and must be reported immediately to both the Faculty Office of Student Teaching and the cooperating teacher in the school to which they are assigned. Students will be required to make up for any absences.

Field Experience Evaluation
Students are responsible for familiarizing themselves with the objectives, evaluation criteria and forms for each level of Field Experience. Detailed information is included on the OST Website, www.mcgill.ca/ost.

Where a student is experiencing serious difficulties in a Field Experience but has demonstrated some potential to successfully reach the required standard, the student will be granted a "D" grade. In this case, the Director of the OST has the authority to grant special permission for a student to repeat a Field Experience during the next regularly scheduled session of the Field Experience. This special permission will be granted once only in a student's program.

Students must receive a Pass grade in order to proceed in the B.Ed. program. Failure (F, J, KF, WF) in any Field Experience places a student in “Unsatisfactory Standing”, requiring withdrawal from the Teacher Education Program. Students who fail in a Fall term Field Experience may be allowed to continue taking courses in the program to enable transfer to another faculty.

A student may appeal a failing grade or termination of a Field Experience by making a formal application to the Associate Dean (Teaching, Learning, and Students).

Withdrawal from Field Experience
• Withdrawal for any reason before commencing a Field Experience must be done at least 2 weeks prior to the start date of the Field Experience. The student is responsible for notifying the OST in writing by this deadline.

• Students having to withdraw for any reason from a field experience that is underway must immediately inform the OST. Based on the circumstances around the withdrawal, the Director of the OST will determine the final outcome of that Field Experience.

7.3.7.1 Code of Professional Conduct

CODE OF ETHICS FOR STUDENT TEACHERS

A. Preamble - A Student-centred Perspective

Mandate
A joint subcommittee consisting of members from two standing committees of the Faculty of Education (Faculty of Education Ethical Review Board and Student Standing) was created to develop a Code of Ethics for Student Teachers and to examine the ways in which this Code will be communicated to students, faculty members and educational partners.

Goals and Rationale
The interests of the two Standing Committees of the Faculty of Education in promoting appropriate ethical and professional conduct have led us to develop the following Code of Ethics for Student Teachers. This code seeks to respond to and address the following needs:

• The Code addresses the interdependent duties, rights and responsibilities of student teachers, faculty members and educational partners.

• By addressing common issues and needs, the Code seeks to articulate and make explicit ethical principles that transcend disciplinary boundaries. These principles reflect the fundamental values that are expressed in the duties, rights and responsibilities of all involved in Teacher Education.

• The Code requires a reasonable flexibility in the implementation of common principles. It is designed to help those involved in Teacher Education, as a matter of sound ethical reasoning, to understand and respect the contexts in which they work and accommodate the needs of others.

• The Code seeks to encourage continued reflection and thoughtful response to ethical issues. It does not seek definitive answers to all ethical questions or situations. Rather, it seeks to outline the guiding principles to ethical conduct and to identify major issues which are essential to the development and implementation of this Code.

Context of an Ethics Framework for Student Teachers
The principles and norms guiding ethical conduct are developed within an ever-evolving complex societal context, elements of which include the need for reflective action and ethical principles.

Education is premised on a fundamental moral commitment to advance and construct knowledge and to ensure human understanding and respect for individual and collective well-being and integrity.

The moral imperative of respect translates into the following ethical principles that assume a student-centred perspective as articulated in the Quebec Curriculum Reform and Competencies outlined for Teacher Education.

B. Academic Freedom and Responsibilities

Teachers enjoy, and should continue to enjoy, important freedoms and privileges. However, with freedoms come responsibilities and ethical challenges. This Code of Ethics is in keeping with the philosophy and spirit of the New Directions that are embedded in the document "Teacher Training: Orientations, Professional Competencies" (MEQ 2001) and the reflective practice literature.

The role of the teacher and the contexts of teaching have changed. Thus, new resources (knowledge, skills, attitudes) are required to practice the profession and meet the challenges of teaching and learning in whatever contexts student teachers may find themselves and to engage in professional development individually and with others.

C. Ethics and Law
"Teaching is governed by a legal and regulatory framework" (MEQ 2001, p. 120). The law affects and regulates the standards and norms of teaching behaviours in a variety of ways such as respecting privacy, confidentiality, intellectual property, competence. Human rights legislation prohibits discrimination and recognizes equal treatment as fundamental to human dignity and well being. Teachers should respect the spirit of the Canadian Charter of Rights and Freedoms, particularly the sections dealing with life, liberty and the security of the person, as well as those involving equality and discrimination and the Education Act that sets out the obligations and rights of teachers.
D. Guiding Ethical Principles

Ethical student teachers should respect the following guiding ethical principles:

1. Respect for Human Dignity
   • Speaks and acts towards all students with respect and dignity; and deals judiciously with them at all times, always mindful of their individual rights and personal sensibilities.
   • Respects the dignity and responsibilities of cooperating teachers, peers, principals, parents and other professionals or para-professionals within the school, school board and community.

2. Respect for Vulnerable Persons
   • Respects and recognizes ethical obligations towards vulnerable persons. This principle recognizes that students are in a vulnerable position and that student teachers are in a privileged relationship with students and their families and will always refrain from exploiting that relationship in any form or manner.

3. Respect for Confidentiality and Privacy
   • Respects the confidential nature of all information related to students and their families and will share such information in an appropriate manner only with those directly concerned with their welfare.
   • Respects the confidential nature of all information related to all school personnel and will share such information in an appropriate manner.

4. Respect for Justice
   • Respects and recognizes the right of individuals to be treated with fairness and equity and the importance of avoiding conflicts of interest.

5. Respect for Safety of Students
   • Respects the right of individuals to expect that student teachers will engage in practices that aim to ensure the physical, psychological and emotional safety of students.

6. Respect for Existing Ethical Codes and Professional Standards
   • Respects the authority, roles and responsibilities of the cooperating teacher and agrees to adhere to the responsibilities and obligations for teachers as outlined in the Education Act, Faculty and University handbooks as well as all local agreements by host school boards and schools.

7. Balancing Harm and Benefits
   • Acknowledges that any potentially harmful practices (e.g., science labs and physical education activities) must be balanced with anticipated benefits and conducted in a prudent, informed manner.

E. Putting Principles into Practice: Venues for Communication

More than one principle may apply to a given case or situation. For meaningful and effective implementation of these principles, they must be widely communicated and applied in appropriate contexts.

The Code of Ethics will be published on the Faculty of Education Website with links from department Web pages to the Code, and in the Student Teaching Handbook and Undergraduate Student Handbook.

7.3.8 Academic Standing

Academic standing is based primarily on students’ cumulative grade point average (CGPA), but may also be affected by their term grade point average (TGPA). Academic standing, which is assessed after the end of term, determines if students will be allowed to continue their studies in the next term and if any conditions will be attached to their registration. Information about academic standing appears on records that are internal to McGill for the information of students and others, such as academic advisors.

Decisions about academic standing in the Fall term are based only on grades that are available in January. Grades for courses in which students have deferred examinations and Fall-term grades for courses that span the Fall and Winter terms do not affect academic standing for the Fall term, even though they will ultimately affect students’ Fall TGPA. Therefore, academic standing for the Fall term are designated as “interim” and should be interpreted as advisory. Interim standing decisions are mentioned below only if the rules for them differ from those for regular standing decisions.

Satisfactory/Interim Satisfactory Standing

Students in satisfactory standing may continue in their program.
• New students are admitted to satisfactory standing.
• Students with a CGPA of 2.00 or greater and with a Pass grade in Field Experience courses are in satisfactory standing.

Probationary/Interim Probationary Standing

Students in probationary standing may continue in their program, but must carry a reduced load (maximum 14 credits per term) and raise their TGPA and CGPA to return to satisfactory standing (see above). They should see their departmental adviser to discuss their course selection. Students in probationary standing are not permitted to take any level student teaching/field experience course during that academic year.

Students in interim probationary standing may continue in their program, but should evaluate their course load and reduce it as appropriate. They are strongly advised to consult a departmental adviser, before the withdrawal deadlines, about their course selection for the winter term. Students in interim probationary standing will be permitted to proceed with the next scheduled Field Experience course, i.e., Winter or Spring, for First- or Second-Year Field Experiences only.

• Students who were previously in satisfactory standing will be placed in probationary standing if their CGPA falls between 1.50 and 1.99.
• Students who were previously in probationary standing will remain in probationary standing if their CGPA falls between 1.50 and 1.99 and their TGPA is 2.50 or higher, although the TGPA requirement will not apply to the Summer term.
• Students who were previously in interim unsatisfactory standing will be placed in probationary standing if their CGPA falls between 1.50 and 1.99 and their TGPA is 2.50 or higher.
• Students who were previously in unsatisfactory standing and who were readmitted to the Faculty by the Associate Dean or the Committee on Student Standing will be placed in probationary standing if their CGPA is less than 2.00, but if they satisfy relevant conditions specified in their letter of readmission.
• Students who receive a grade of D for any level Field Experience course will be placed in probationary standing.

Readmitted Unsatisfactory Standing

Students who were previously in unsatisfactory standing and who were readmitted to the Faculty by the Associate Dean or the Committee on Student Standing will have their standing changed to readmitted unsatisfactory standing. Their course load is specified in their letter of readmission, as are the conditions they must meet to be allowed to continue in their program. They should see their departmental adviser to discuss their course selection. Students who have failed EDEC 215 twice must pass the examination as part of the readmission criteria.

Unsatisfactory/Interim Unsatisfactory Standing

Students in interim unsatisfactory standing may continue in their program, but should evaluate their course load and reduce it as appropriate. They are strongly advised to consult a departmental adviser, before the withdrawal deadlines, about their course selection for the Winter term. Students in interim unsatisfactory standing will not be permitted to proceed with the next normally scheduled Field Experience.

Students in unsatisfactory standing have failed to meet the minimum standards set by the Faculty, so they may not continue in their program. Normally, supplemental examinations are not permitted; however, students in unsatisfactory standing may appeal to the Associate Dean for permission to write a supplemental examination,
Students who receive a failure (F, J, KF, WF) in any level of students must satisfactorily complete a minimum of 60 credits at minimum cumulative grade point average (CGPA) of 2.00. Students who were previously in probationary, unsatisfactory readmitted, or interim unsatisfactory standing will be placed in unsatisfactory standing if their TGPA falls below 2.50 and their CGPA is below 2.00.

Students who were previously in unsatisfactory standing and who were readmitted to the Faculty by the Associate Dean or the Committee on Student Standing and who have not at least satisfied the conditions to attain probationary standing that were specified in the letter of readmission will be placed in unsatisfactory standing.

Students who receive a failure (F, J, WF) in any level of student teaching/Field Experience course are automatically placed in unsatisfactory standing and must withdraw from the program.

Students in Teacher Education Programs who receive a failure in the English Language Requirement Test for the second time are automatically placed in unsatisfactory standing and are required to withdraw from the program.

Students in either the Concurrent B.Sc./B.Ed. or B.Mus./B.Ed. program who receive an F or J in any Education Field Experience course, or fail the English Language Proficiency Test for the second time, are placed in unsatisfactory standing. Although they may complete their term, they are required to withdraw from the Concurrent program. They may, however, contact the Faculties of Science or Music regarding application to their general degrees.

Appeals for readmission by students in unsatisfactory standing should be addressed to the Associate Dean no later than June 1 for readmission to the Fall term. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation). Students in unsatisfactory standing for the second time must withdraw permanently. Students who were placed in unsatisfactory standing due to a failure in student teaching/Field Experience cannot apply for readmission for at least one full year.

Incomplete Standings
Standing awaits deferred or supplemental exams. Must clear K’s, L’s or Supplementals. Standing incomplete.

Students with incomplete standings in the Winter or Summer term may register for the Fall term, but their standing must be resolved by the end of the course change period for that term; students whose incomplete standing changes to satisfactory, probationary, or interim unsatisfactory standing may continue in the program.

Students whose standing changes to unsatisfactory may not continue in their program.

Students whose standing changes to unsatisfactory and who wish to ask for permission to continue in their program must make a request to the Associate Dean of Student Affairs as soon as they are placed in unsatisfactory standing. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation).

Students whose standing is still incomplete by the end of course change period should immediately consult with the Student Affairs Office.

### 7.3.9 Graduation Requirements

To be eligible for a B.Ed. or the B.Sc. (Kinesiology) degree, students must fulfill all Faculty and program requirements. This includes completing the minimum credit requirements for the degree as stipulated in the letter of acceptance; obtaining a grade of C or better in all required and complementary courses; and achieving a minimum cumulative grade point average (CGPA) of 2.00. Students must satisfactorily complete a minimum of 60 credits at McGill University towards the fulfillment of the degree requirements. In addition, students must complete specific components of their program at McGill.

Students enrolled in Kinesiology and Physical Education programs are required, before graduation, to show proof of certification in Standard Level Safety Oriented First Aid, and Level C in Cardiopulmonary Resuscitation, or equivalencies.

Students must complete the degree requirements within five (5) years of admission to a program of 90 credits or more, and within four (4) years of admission to a program of 60 credits. Students in the part-time B.Ed. for Certified Teachers and B.Ed. (Vocational) programs are allowed a maximum of 12 years to complete the requirements for the degree.

It is the student's responsibility to ensure that all Faculty requirements are met before graduation.

Early in their graduating year all students should check with their adviser to make sure that they will meet all program requirements in time for graduation. It is essential that students in their final year indicate the expected date of graduation on Minerva and verify this date on Minerva; see section 3.9 “Graduation”. When a final-year student changes the expected date of graduation, the student must notify the Student Affairs Office immediately. It is also the student’s responsibility to complete the required forms for teacher certification, and to check that his/her name appears on the graduation list. For further information, contact the Student Affairs Office at (514) 398-7042.

Students are not permitted to take courses outside McGill University during the last term prior to graduation. Students who fail to graduate as expected and who do not re-register must apply to the Associate Dean (Teaching, Learning and Students) to graduate.

Application to graduate must be made sufficiently in advance of the expected graduation date to allow the Faculty to verify the student's record.

Information pertaining to the convocation ceremonies can be obtained on the McGill Website: www.mcgill.ca/convocations.

### 7.3.10 Undergraduate Program Awards

#### Dean's Honour List Designation for Graduating Students

The designation Dean's Honour List may be awarded to graduating students under the following conditions:

- students must be among the top 10% of the Faculty's graduating students;
- students must have completed a minimum of 60 McGill credits to be considered;
- the designation is based on the cumulative academic record (CGPA).

#### Dean's Honour List Designation for In-course Students

The designation Dean's Honour List may be awarded to in-course students under the following conditions:

- students must be among the top 10% of the Faculty's students;
- students must have completed at least 27 graded credits during the academic year;
- the designation is based on the sessional GPA.

### Scholarships and Awards

Various scholarships and awards are open to both graduating and in-course students. Full details may be found in the Undergraduate Scholarships and Awards Calendar available on the Web at www.coursecalendar.mcgill.ca.

### 7.4 Department of Educational and Counselling Psychology

Faculty of Education
3700 McTavish Street, Room 513
Montreal, QC, H3A 1Y2
Joseph Rochford; B.A.(McG.), M.A.(Qu.), Ph.D.(C\'dia)
Laill K.
Srivastava; B.Sc., M.Sc.(Allahabad), Ph.D.(Jawaharlal, New Delhi)
Claire-Dominique Walker; B.Sc.(Collège
genova),
Ph.D.(Salk Institute and U. of Geneva)

Part-time Instructors
Shawna Atkins, Maureen Baron, Dianne Bateman, Andrew Bennett, Gloria Berdugo, Miriam Berkovic, Elena Bloom, Sam Bruzese, Andrew Chiarella, Kevin Chin, Scott Conrod, Karen Gazith-Cohen, Enika Franz, Sandy Freedman, Phelesha Hudson, Andrew Hum, Judy McBride, Sharon Miller, Nancy Modrag, Stephanie Mitelman, Carolyn Nelham, Judith Norton, Monica Oala, Olga Pazzia-Guiducci, Lisa Reisinger, Kieron Rogan, Vera Romano, Christina Rudd, Niki Saros, Caroline Zanni-Dansereau.

Educational Psychology encompasses a) the theoretical and applied study of learning, cognition, and instruction in a variety of educational settings across ages and domains; b) instructional technology and computers as cognitive tools in learning; c) cognitive and social processes in learning; d) evaluation and enhancement of learning and teaching; e) methods for fostering inclusive education; f) relationships of these or related phenomena to issues in human development, especially for children and adolescents; and g) the impact of family and community on children's learning and development.

At the undergraduate level, the Department of Educational and Counselling Psychology is responsible for the B.A., see section 5.12.16 "Educational Psychology Minor Concentration", under the Faculty of Arts, and for a variety of undergraduate courses in the areas of learning, cognition and development, inclusive education, gifted education, educational media and computers, and educational measurement and evaluation.

In professional development, the Department offers diploma or certificate programs in Human Relations and Family Life Education, Educational Technology, Inclusive Education, the Psychology and Education of the Gifted, and First Nations and Inuit Student Personnel Services. For more information, see section 7.2.2 "Programs of Professional Development" and see section 7.2.3 "Programs for First Nations and Inuit".

At the graduate level, the department offers a Graduate Certificate in Counselling Applied to Teaching. In addition, there are graduate programs leading to Ph.D., M.A. (thesis and non-thesis) and M.Ed. degrees in instructional psychology, applied cognitive psychology, special populations of learners (special needs and gifted education), counselling psychology, school/applyed child psychology, family life education, computer applications in education, adult professional education, and the psychology of gender. For further information, consult the most current Graduate and Postdoctoral Studies Calendar.

Special services offered by the Department include the McGill-EMSB Gifted Summer School (Explorations), and the Psychoeducational and Counselling Clinic, Neuroscience Lab for Research and Education in Developmental Disorders and the International Centre for Youth Gambling and High Risk Behaviour.

7.5 Department of Integrated Studies in Education

Faculty of Education
3700 McTavish Street, Room 244
Montreal, QC, H3A 1Y2
Telephone: (514) 398-4525
Fax: (514) 398-4527
Website: www.mcgill.ca/edu-integrated

Undergraduate Programs:
Telephone: (514) 398-4527
Fax: (514) 398-4529

Graduate Programs: (Culture & Values, Second Language Education)
Telephone: (514) 398-1591
Fax: (514) 398-4529
Graduate & Certificate Programs (Leadership & Curriculum Studies):

Telephone: (514) 398-6985
Fax: (514) 398-4529

Chair — Steven Jordan
Director of Undergraduate Programs — Caroline Riches
Co-Directors of Graduate Programs — Roy Lyster and Carolyn E. Turner

Director of Music Education — Joan Russell

Emeritus Professors
Patrick X. Dias; B.A., M.A. (Karachi), B.Ed., Ph.D. (Montr.)
Margaret Gillett; B.A., Ed. (Dip.), M.A. (Russel Sage), Ed.D. (Col.) (William C. Macdonald Emeritus Professor of Education)
Wayne C. Hall; B.A., M.A. (Bishop's) (William C. Macdonald Emeritus Professor of Education)
Norman Henchey; B.A., B.Ped., Lic.Ped. (Montr.), Ph.D. (McG.)
Jacques J. Rebuffot; Bès L., L.ès L., D.E.S. (Aix-Marseille), Dip. I.E.P., Dr. 3rd Cy. (Stras.)

Professors
David Dillon; B.A. (St. Columban's), M.S. (SW Texas St.), Ph.D. (Texas)
Barry Levy; B.A., M.A., B.E. (Yeshiva), Ph.D. (NYU)
Joe Kinchloce; B.A. (Emory & Henry), B.Ed., M.A. (Tennessee), Ph.D. (Tenn.) (Canada Research Chair)
Denise Lussier; B.A. (Coll. Jesus Marie de Sillery), M.Ed. (Toronto), M.A., Ph.D. (Laval)
Claudia A. Mitchell; B.A. (Brandon), M.A. (Mt. St. Vincent), Ph.D. (Alta.) (James McGill Professor)
Anthony Paré; B.Ed., M.Ed., Ph.D. (McG.)
Bernard Shapiro; B.A. (McG.), M.A.T., Ed.D. (Harv.)

Associate Professors
Helen Amoriggi; B.Sc., M.A. (Rhode Is.), Ed.D. (Boston)
Ann J. Beer; B.A. (Ox.), M.A. (Toronto), D.PhiL (Ox.)
Jon G. Bradly; B.A., M.A. (Toronto), D.PhiL (Ox.)
Lynn Butter-Kisber; B.Ed., M.Ed. (Montr.), Ed.D. (Harv.)
Janet Donin; B.A. (Toronto), M.A. (Illinois), Ph.D. (Calgary) (joint appoint. with Educational and Counselling Psychology)
Michael Doxtater; B.A. (McM.), M.Sc., Ph.D. (C'nell)
Steven Jordan; B.A. (Kent), M.Sc. (London), Ph.D. (McG.)
Yaremka Kelebay; B.A., B.Ed. (Montr.), M.A. (Sir G. Wms.), Ph.D. (C'dia)
Cathrine Le Maistre; B.Sc., Dip.Ed. (Exe.), M.Ed., Ph.D. (McG.)
Charles S. Lusthaus; B.S., M.S. (Canisius), Ph.D. (SUNY)
Kevin McDonagh; B.A., B.Ed., M.Ed. (Alta.), Ph.D. (Ill.)
Christopher S. Milligan; B.A. (Sir G. Wms.), M.Ed. (McG.), Ed.D. (Torr.)

Assistant Professors
Spencer Boudreau; B.A. (Don Bosco), B.A., M.A. (Sherbrooke), Ph.D. (C'dia)
Eric Caplan; B.A. (Toronto), M.A. (Hebrew), Ph.D. (McG.)
Michael Hoechsmann; B.A., M.A. (S. Fraser), Ph.D. (Toronto)
Bronwen Low; B.A. (Q.), M.A. (British Columbia), Ph.D. (York)
Joan Russell; B.Mus., L.Mus., M.Ed., Ph.D. (McG.)
Mela Sarkar; B.A.(McG.), M.A., Ph.D. (C'dia)
Marc Schwartz; B.S., M.Ed. (New Hampshire), Ed.D. (Harvard)
Shaheen Shariff; B.A.G.S., M.A. Educ, Ph.D. (S. Fraser)
Sylvia Sklar; Dip.Ed. (McG.), B.A. (C'dia), M.Ed. (McG.)
Doreen Starke-Meyering; B.Ed. (Potsdam), M.A. (North Dakota), Ph.D. (Minnesota)
Shirley Steinberg; B.Ed., M.Ed. (Lethbridge), Ph.D. (Pennsylvania)

Associate Members
Brian J. Alters; B.S., Ph.D. (USC) (William Dawson Scholar)
Richard Harris; B.A., Oxon., D.PhiL (Sus.)
Lynn McAlpine; B.A. (McG.), M.A. (C'dia), Ph.D. (Torr.)

Faculty Lecturers
Linda Cooper; B.A. (C'dia), M.A., M.C.M.
Diane Eyre; B.A. (Montr.)
Kathleen Greenfield; B.A. (McG.), B.A. (Wat.), M.Ed. (McG.)
Mark Hegins; B.A. (Wat.)
Charlotte Hussey; B.A. (Weaton), M.A. (C'dia), M.F.A. (W. Wilson), Ph.D. (McG.)
Carolyn Pittenger; B.A., M.A. (SUNY, Albany), M.Ed. (McG.)
Caroline Riches; B.A., M.Sc. (Alta.), Ph.D. (McG.)

Emeritus Professors
Wayne C. Hall; B.A. (Bishop's), M.Sc. (Bishop's), Ph.D. (Toronto)
Bob Shiels; B.A. (Ox.), M.Ed. (Ox.)

Adjunct Professors
Betsy Annahata; B.Ed., M.Ed. (McG.)
Luci Bobbish-Salt; B.Ed. (UQAC)
Tino Bordonaro; B.A. (Bishop's), M.A. (McG.)
Norrie Burke; B.Ed., M.Ed. (McG.)
Gretta Chambers; B.A. (McG.)
J. Kenneth Robertson; B.Ed., M.A. (Alberta), Ph.D. (Alta.)

Associate Professors
Helen Amoriggi; B.Sc., M.A. (Rhode Island), Ed.D. (Boston)
Ann J. Beer; B.A. (Ox), M.A. (Toronto), D.PhiL (Ox.)

Adjunct Professors

The Department of Integrated Studies in Education, created September 2001, incorporates the programs and staff previously associated with the Departments of Culture and Values in Education, Educational Studies, and Second Language Education.

The Department offers four-year programs for CEGEP graduates and five-year programs for out-of-province students leading to a B.Ed. degree. For B.Ed. program overviews, see www.mcgill.ca/edu-sao.

The following programs are offered:

**Bachelor of Education: Secondary Program (120 credits)**

The aim of the B.Ed. Secondary is to prepare strong beginning teachers for the secondary school level. This integrated 120-credit program (150 credits for out-of-province students) consists of academic studies to provide background depth in subjects taught in the secondary school, professional studies centred on school-based practicum, supported by studies in pedagogy, curriculum and educational foundations. Students choose their teaching profiles from: English, Mathematics, Science and Technology, Social Sciences (History and Citizenship, and one of: Geography or Ethics and Religious Culture).

**Concurrent Bachelor of Education in Music/Bachelor of Music (Music Education) program (143/144 credits)**

This program provides students with the opportunity to obtain a Bachelor of Music degree and a Bachelor of Education degree concurrently. The two degrees are awarded during the same convocation period.

**Concurrent Bachelor of Science/Bachelor of Education (Secondary) (135 credits)**

This program provides students with the opportunity to attain a Bachelor of Science degree and a Bachelor of Education degree concurrently. The two degrees are awarded during the same convocation period.

**Bachelor of Education (Kindergarten and Elementary) (120 credits)**

This program leads to certification to teach children between the ages of 5 and 11 years. It consists of four years of full-time study requiring the completion of 120 credits (150 credits or five years for out-of-province students), of academic and professional courses and practica.

Options within the B.Ed. (Kindergarten and Elementary) program are:
- First Nations and Inuit Studies
- Jewish Studies
- Programme intensif de français * under revision for 2007-08.*

**Baccalauréat en enseignement du français langue seconde (120 credits) (B.Ed. TFSL)**

This four-year program prepares specialist teachers to teach French as a second language, in Core French programs, immersion programs, intensive programs and classes d'accueil, at both the elementary and the secondary levels. Offered by the Department of Integrated Studies in Education jointly with the Université de Montréal.

**Bachelor of Education in Teaching English as a Second Language (120 credits)**

This program prepares specialist teachers to teach English as a second language at both the elementary level (including regular and intensive ESL) and the secondary level (including regular ESL and ESLA – English Second Language Arts). This integrated 120-credit program (150 credits for out-of-province students) consists of academic and professional components. The academic components provide students with opportunities to develop a broad liberal education and to study language and language learning from linguistic, social, cultural and psychological perspectives. The professional components revolve around school-based Field Experiences which are supported by studies in pedagogy and educational foundations.

**GRADUATE PROGRAMS**

At the Graduate level, the Department offers M.A. programs with thesis and non-thesis options in the following areas: Culture and Values in Education, Educational Studies (Curriculum), Educational Studies (Leadership), and Second Language Education.

**IN-SERVICE PROGRAMS**

The Department of Integrated Studies in Education offers three in-service programs:
- A 90-credit Bachelor of Education (Vocational) program offered through the Centre for Continuing Education for practising vocational teachers possessing a provisional teaching authorization in a vocational area. (This program will not accept students in 2007-08.)
- A 30-credit Certificate in Second Language Teaching (TESL) normally offered through Distance Education. (This program will not accept students in 2007-08.)
- A Certificate in Aboriginal Education for Certified Teachers through the Office of First Nations and Inuit Education.

The Office of First Nations and Inuit Education also offers a Certificate in Education for First Nations and Inuit, a Certificate in Aboriginal Literacy Education, and a Certificate in Middle School Education in Aboriginal Communities.

The Department is also involved in a variety of in-service activities with administrators, teachers, consultants and other educational leaders through the Centre for Educational Leadership (CEL).

### 7.5.1 Bachelor of Education Programs

#### 7.5.1.1 Bachelor of Education Secondary Program

**ACADEMIC COMPONENTS**

A sequence of courses normally to be taken in the Faculties of Arts, Science and Education showing a sequence of levels and totalling 54 credits, including required and complementary courses, and at least 36 credits in one “teachable” academic subject: English, Mathematics, Science & Technology, Social Sciences (History & Citizenship, and one of Geography or Ethics & Religious Studies). Academic courses must be selected in consultation with an academic advisor. Additionally, students who have selected the Social Sciences Profile are required to take: HIST 202, HIST 203 and HIST 303 or HIST 353. Students who select the English Profile are required to take at least 2 of: EDSL 305, EDSL 350, ENGL 340, LING 200, LING 201, LING 355.

Advising note: The department is committed to supporting students in the development and creation of their individual professional portfolios throughout their program.

### 7.5.1.2 Concurrent Bachelor of Education in Music and Bachelor of Music (Music Education) Program

The Bachelor of Education in Music is an integrated four-year program of 120/121-credit initial teacher training that leads to certification as a teacher in the Province of Quebec. When offered concurrently with the Bachelor of Music (Major in Music Education), the program offers students the opportunity to obtain a Bachelor of Education degree and a Bachelor of Music degree after the completion of 143/144 credits, normally five years (173/174 credits or six years for out-of-province students). The concurrent program combines academic studies in music, professional studies and field experience. The department is committed to supporting students in the development and creation of their individual professional portfolios throughout their program. The two degrees are awarded during the same convocation period.

Applicants to the music specialist teacher training program should apply to the Concurrent Bachelor of Education in Music/Bachelor of Music (Music Education) program. Students who have completed only a Bachelor of Music may transfer at any time into the Bachelor of Education in Music/Bachelor of Music (Music Education) program. Application to the Concurrent Bachelor of Education in Music/Bachelor of Music (Music Education) program may be made on-line at www.mcgill.ca/applying. Information is available on that site or may be obtained from:

**Admissions Office**
McGill University
Schulich School of Music
555 Sherbrooke Street West
Montreal, QC, H3A 1E3
Telephone: (514) 398-4546

Those who have completed a Bachelor of Music degree may apply for advanced standing in the Bachelor of Education in Music program. Application to the Bachelor of Education in Music may be made on-line at www.mcgill.ca/applying. Information is available on that site or may be obtained from:

**Admissions, Recruitment and Registrar’s Office**
McGill University
845 Sherbrooke Street West
Montreal, QC H3A 2T5
Telephone: (514) 398-3910
Fax: (514) 398-4193

Program details are available from:

Professor Joan Russell, Program Director (on leave 2007-08)
Department of Integrated Studies in Education
Telephone: (514) 398-2447

The components of the 143/144-credit Concurrent Bachelor of Education in Music/Bachelor of Music (Music Education) are as follows:
- 53/54 professional credits,
- 78 music credits,
- 12 elective credits.

Students who wish to complete only the Bachelor of Education in Music have the option of doing so after the successful completion of the first two years of the concurrent program and Music 321 concentration exam or equivalent. Students who decide to complete only a Bachelor of Music may transfer at any time into the Bachelor of Music, Faculty Program.

Students who opt for the Bachelor of Education in Music would be required to complete 61 music credits, 6 elective credits, and 53/54 professional credits from the program given below, with the following notes:

1. These credits are required for the Bachelor of Music only.
2. These credits are required for the Bachelor of Music, complementary for the Bachelor of Education in Music.

For prerequisite requirements for the Concurrent Bachelor of Education in Music/Bachelor of Music (Music Education) Program, see section 10.6.5 “B.Mus./B.Ed. Bachelor of Music and Bachelor of Education Concurrent Program” of the Schulich School of Music chapter in this calendar.

TOTAL CREDITS 143/144

7.5.1.3 Concurrent Bachelor of Science (Major or Major Concentration with a Minor for Teachers) and Bachelor of Education Secondary Program

Coordinator, Faculty of Education — Professor Marc Schwartz
Coordinator, Faculty of Science — Professor Richard Harris

This program has been designed to provide students with the opportunity to attain a Bachelor of Science degree and a Bachelor of Education degree after 135 credits of study (165 credits for students who have not completed the basic sciences, see Note below).

To be admitted to the Concurrent program, students must satisfy the regular admission requirements of the Faculties of Science and Education. Normally, students will be admitted to both components of the Concurrent program simultaneously, however, it is possible for students in a B.Sc. or B.Ed. program to transfer into the Concurrent program at any time. Students in the Concurrent program may change to either a B.Sc. or a B.Ed., but may not subsequently switch back to the Concurrent program.

Note: Science students are normally admitted to a four-year program requiring the completion of 120 credits, but advanced standing of up to 30 credits may be granted to students who obtain satisfactory results in International Baccalaureate, French Baccalaureate, Advanced Levels, Advanced Placement tests, or the Diploma of Collegial Studies (DCS). Quebec students with a DCS in Science are granted 30 credits advanced standing and will have normally completed the equivalent of, and are therefore exempt from, the basic science courses in biology, chemistry, mathematics and statistics, and physics. Students with satisfactory results in International Baccalaureate, French Baccalaureate and Advanced Levels, and Advanced Placement tests may be exempt from some or all of the basic science courses.

Students in the Concurrent B.Sc./B.Ed. who receive an F or J in any Field Experience course are placed in unsatisfactory standing. Although they may complete their term, they are required to withdraw from the Concurrent program. However, they may apply to transfer to the conventional B.Sc. program as outlined in Faculty of Science, "Science for Teachers", see section 12.13.31. The two degrees are awarded during the same convocation period.

The two components of the Concurrent program are the B.Ed. Secondary program and one of the B.Sc. programs described in the Faculty of Science, "Science for Teachers", see section 12.13.31:
- biology, with chemistry
- biology, with physics
- chemistry, with biology
- chemistry, with physics
- physics, with biology
- physics, with chemistry
- mathematics

The requirements for the B.Ed. component are as described in the "Bachelor of Education Secondary Program", see section 7.5.1.1 with the following exceptions:

A. Students in the Concurrent B.Sc./B.Ed. program must choose their 54 academic credits from the lists of required and complementary courses in their respective B.Sc. Major or Major Concentration with a Minor.

B. Students in the Concurrent B.Sc./B.Ed. program must take EDEC 262 Media, Technology and Education.
7.5.1.4 Bachelor of Education Kindergarten and Elementary Program

The four-year program begins with the foundation courses in the first term and has a higher concentration of academic courses in the first two years. The professional courses and practicum have a heavier weight in the final two years. The practicum consists of school-based experiences and a series of professional seminars that provide an opportunity for students to reflect on that experience in a systematic way. The department is committed to supporting students in the development and creation of their individual professional portfolios throughout their program.

ACADEMIC COMPONENT 42

This component provides background in the subject areas of the elementary school curriculum. Students must select academic courses in "teachable" subjects in consultation with an academic advisor.

Required Courses
- EDEC 203 Communication in Education 3
- EDEC 230 Elementary School Mathematics 3
- EDEC 270 Elementary School Science 3
- EDEC 280 Geography, History and Citizenship Education 3
- EDEC 247 Policy Issues in Quebec Education 3

Complementary Courses
- one of:
  - EDER 309 The Religious Quest
  - EDER 395 Moral Values and Human Action
  - EDER 473 Living with Insight
  - EDER 494 Ethics in Practice
  - RELG 207 The Study of World Religions 1

b) 18 credits from one of these areas:

- 9 credits, 3 credits from each of any three areas not chosen in b) above.

PROFESSIONAL COMPONENT 72

This component includes the practicum, theoretical aspects of pedagogy, the pedagogical support for the practicum and foundation courses, divided as follows:

PRACTICUM 24

Required Courses
- EDFE 200 First Year Field Experience 2
- EDFE 256 Second Field Experience 3
  (Kindergarten/Elementary)
- EDFE 306 Third Field Experience 8
  (Kindergarten/Elementary)
- EDFE 406 Fourth Field Experience (K/Elem) 7
- EDEC 247 Policy Issues in Quebec Education 3

PROFESSIONAL SEMINARS
- EDEC 201 First Year Professional Seminar 1
- EDEC 405 Fourth Year Professional Seminar 3
  (K/Elem)

FOUNDATIONS 15

Required Courses
- EDEC 215 English Language Requirement 0
- EDEC 247 Policy Issues in Quebec Education 3
- EDPI 309 Exceptional Students 3
- EDPI 341 Instruction in Inclusive Schools 3
- EDPE 300 Educational Psychology 3

Complementary Courses
- one of:
  - EDEC 260 Philosophical Foundations
  - EDEC 261 Philosophy of Catholic Education

PEDAGOGY 22

Required Courses
- EDEC 223 Language Arts 3
- EDEC 250 The Kindergarten Classroom 2
- EDEC 275 Science Teaching 2
- EDEC 295 Mohawk Language 1
- EDEC 296 Mohawk Language 2
- EDEC 298 Mohawk Second Language 1
- EDEC 297 Mohawk Second Language 2

EDER 395 Moral Values and Human Action 3
- EDER 473 Living with Insight 3
- EDER 494 Ethics in Practice 3

EDPI 309 Exceptional Students 3
- EDPI 341 Instruction in Inclusive Schools 3

EDER 360 Ethics and Religious Culture 2
  (K/Elementary)

6 additional credits of methodology courses chosen from Plastic Arts, Drama, Music, Physical Education, L2 teaching, at least one course must be from Plastic Arts, Drama, Music

PEDAGOGICAL SUPPORT 11

Required Courses
- EDEC 352 Classroom Practices 2
- EDEC 355 Classroom-based Evaluation 3

Complementary Courses
- EDEC 262 Media, Technology and Education 3
- EDEC 280 Geography, History and Citizenship Education 3
- EDPT 341 Instructional Programming 1
- EDPT 420 Media Literacy for Education 3

One 3-credit course in Multicultural Education from the following list:
- EDEC 233 First Nations and Inuit Education
- EDEC 248 Multicultural Education

ELECTIVE COURSES 6

TOTAL CREDITS 120

7.5.1.5 Bachelor of Education Kindergarten and Elementary Program (First Nations and Inuit Studies Option)

(Pending University approval)

ACADEMIC COMPONENT 48

This component provides background in the subject areas of the elementary school curriculum. Students must select academic courses in "teachable" subjects in consultation with an academic advisor.

Required Courses
- EDEC 203 Communication in Education 3
- EDEC 230 Elementary School Mathematics 3
- EDEC 270 Elementary School Science 3
- EDEC 280 Geography, History and Citizenship Education 3
- EDEP 292 Nutrition and Wellness 3
- EDSL 305 L2 Learning: Classroom Settings 3
- RELG 207 The Study of World Religions 1
- EDEE 342 Intermediate Inuktitut/Amerindian Language 3
- EDEE 344 Advanced Inuktitut/Amerindian Language 3
- EDEA 242 Cultural Skills 1 3
- EDEA 243 Cultural Skills 2 3
- EDSL 247 Second Language Education in Aboriginal Communities 3
- EDEE 291 Cultural Values and Socialization 3

Complementary Courses
- 3 credits from English or the Arts 3
- 6 credits from the following according to language and fluency (each course is 3 credits):
  - EDEC 241 Cree Language 1
  - EDEC 242 Cree Language 2
  - EDEC 296 Mohawk Second Language 1
  - EDEC 297 Mohawk Second Language 2
  - EDEC 298 Mohawk Language 1
  - EDEC 299 Mohawk Language 2
  - EDEC 293 Algonquin Second Language 1
  - EDEC 294 Algonquin Second Language 2
  - EDEC 295 Algonquin Language 2
  - EDEC 249 Inuktitut Orthography and Grammar
  - EDEC 403 The Dialects of Inuktitut

CREDITS

EDEE 282 Teaching Social Sciences 2
EDEE 332 Teaching Mathematics 1 3
EDEE 350 Integrating the Curriculum 2
EDER 360 Ethics and Religious Culture 2
6 additional credits of methodology courses chosen from Plastic Arts, Drama, Music

TOTAL CREDITS 120
**7.5.1.7 Bachelor of Education Kindergarten and Elementary Program (Jewish Studies Option)**

Students who have already been accepted into the B.Ed. (Kindergarten/Elementary) program may apply for the Jewish Studies Option. This Option allows qualified candidates an opportunity to select specific academic and pedagogical Jewish Studies courses in place of selected education electives and academic courses. Additionally, students will have an opportunity to have one of their major field placements in a Jewish school environment.

Students who wish to follow this option should contact:
Professor Eric Caplan
Department of Integrated Studies in Education
Faculty of Education
Telephone: (514) 398-6544
E-mail: eric.caplan@mcgill.ca

7.5.1.8 Baccalauréat en enseignement du français langue seconde

This program is offered jointly by the Université de Montréal and McGill University. Students will be admitted into, and registered at, one of the two as their “home” university. Courses will be offered at the Université de Montréal during the Fall term and at McGill during the Winter term.

Students admitted to this program are required to take a diagnostic test in mathematics administered by the Université de Montréal. A student who fails this test will be required to pass a remedial course in mathematics in addition to the regular program.

The Baccalauréat en enseignement du français langue seconde (B.Ed. in Teaching French as a Second Language) is a four-year program. It prepares specialist teachers to teach French as a second language, in Core French programs, immersion programs, intensive programs and classes d’accueil, at both the elementary and the secondary levels.

This integrated 120-credit program (150 credits for out-of-province students) includes studies in language and language learning from linguistic, literary, cultural and psychological perspectives accompanied by Field Experiences. The academic components aim to increase students’ general competence, mostly in literature and linguistics. In addition, complementary courses combine academic content with methodology. The professional components allow students to learn how to teach subjects taught at the elementary or secondary levels, how to teach the different programs offered in FSL and how to intervene with the various clientele. They revolve around school-based Field Experiences which are supported by studies in pedagogy and educational foundations. The department is committed to supporting students in the development and creation of their individual professional portfolios throughout their program.

7.5.1.9 Bachelor of Education in Teaching English as a Second Language

The B.Ed. in Teaching English as a Second Language (TESL) program prepares specialists to teach English as a second language (ESL) at both the elementary school and secondary school levels. This integrated 121-credit program (151 credits for out-of-province students) includes studies in language and language learning from linguistic, literary, social, cultural, and psychological perspectives, accompanied by field experiences. The academic components aim to increase students' academic knowledge, with emphasis on language, linguistics and literature. Complementary courses address both academic and professional concerns. The professional components revolve around school-based Field Experiences which are supported by studies in pedagogy and educational foundations. These prepare students to teach ESL at both the elementary school level (including regular and intensive ESL) and the secondary school level (including regular ESL and ESLA - English Second Language Arts), and provide a base for adult and other ESL teaching. The department is committed to supporting students in the development and creation of their individual professional portfolios throughout their program.

7.5.2 Programs for First Nations and Inuit

The following programs are offered in First Nations and Inuit communities for First Nations and Inuit students through the:
Faculty of Education
First Nations and Inuit Education (FNIE)
3700 McTavish Street, Room 244
Montreal, QC, H3A 1Y2
Telephone: (514) 398-4533
Fax: (514) 398-2553
Website: www.education.mcgill.ca/ofnie/default.html

For details about the First Nations and Inuit Studies option within the Bachelor of Education Kindergarten and Elementary program, see section 7.5.1.5 "Bachelor of Education Kindergarten and Elementary Program (First Nations and Inuit Studies Option)".

7.5.2.1 Certificate in Education for First Nations and Inuit

This 60-credit program provides an opportunity for Algonquin, Cree, Inuit, Mi'kmaq and Kanien'kehaka (Mohawk) people to become qualified as teachers. It is offered on a part-time basis in Indigenous communities throughout Quebec in collaboration with the Cree School Board, the Kativik School Board, and various Mi'kmaq, Mohawk and Algonquin education authorities. A full-time and part-time program is also available to Inuit in Nunavut, in collaboration with the Nunavut Teacher Education Program of Nunavut Arctic College, Iqaluit, NU.

Quebec graduates of this program receive Ministry (MELS) certification to teach at the elementary level in First Nations and Inuit schools.

Admission to the Certificate in Education for First Nations and Inuit

An applicant will normally be employed as a teacher or as a classroom assistant, have a valid teaching authorization from the appropriate teaching authority or a community education committee, be recommended by the school principal and an officer of the education authority, be recommended by a local community education committee, and be at least 21 years of age. Younger applicants will be considered for admission if they hold a Grade 12 High School Diploma or a Diploma of Collegial Studies. The right of final decision for acceptance of candidates rests with McGill.

Those intending to complete the programs offered in cooperation with the Kativik School Board or the Nunavut Teacher Education Program must be fluent and literate in Inuktitut/Inuinnaqtun.

Fluency in Algonquin, Cree, Mi'kmaq or Mohawk is not a condition for acceptance for applicants from these communities, but is considered an asset. Courses are available in all four of these languages for those teaching in immersion classes and other teaching situations where a knowledge of the First Languages is essential.

Time Limit

The time limit for completion of the 60-credit Certificate in First Nations and Inuit Education is 12 years. The University reserves the right to request that a student retake a course or courses after a 5-year period if it is felt that too long a break has occurred in the ongoing nature of the training.

PROGRAM PROFILE – CERTIFICATE IN EDUCATION FOR FIRST NATIONS AND INUIT (60 credits)

On completion of the Certificate requirements, trainees may apply for admission to the B.Ed. for Certified Teachers program with up to 30 credits advanced standing. Certain non-credit academic upgrading courses may be required of B.Ed. applicants.

a) THE ABORIGINAL SCHOOL AND CLASSROOM

Required Courses
EDEE 249 Inuktitut Orthography and Grammar (The term "Inuktitut" in all course descriptions includes "Inuktitu" and "Inuinnaqtun").

Complementary Courses
One 3-credit course from Language complementary course list
FOR ALGONQUIN, CREE, MI'KMAQ AND KANIEKKEHAKA (MOHAWK) STUDENTS

Required Courses
EDEE 293 (3) Algonquin Second Language 1
EDEE 294 (3) Algonquin Second Language 2
EDEE 295 (3) Algonquin Language 2
EDEC 241 (3) Cree Language 1
EDEC 242 (3) Cree Language 2
EDEC 237 (3) Mi'kmaq Second Language 1
EDEC 238 (3) Mi'kmaq Second Language 2
EDEC 239 (3) Mi'kmaq Language 1
EDEC 296 (3) Mohawk Second Language 1
EDEC 236 (3) Mohawk Second Language 2
EDEC 297 (3) Mohawk Language 1
EDEC 298 (3) Mohawk Language 2

b) LANGUAGE

FOR INUIT STUDENTS

Required Courses
EDEE 293 (3) Algonquin Second Language 1
EDEE 294 (3) Algonquin Second Language 2
EDEE 295 (3) Algonquin Language 2
EDEC 241 (3) Cree Language 1
EDEC 242 (3) Cree Language 2
EDEC 237 (3) Mi'kmaq Second Language 1
EDEC 238 (3) Mi'kmaq Second Language 2
EDEC 239 (3) Mi'kmaq Language 1
EDEC 240 (3) Mi'kmaq Language 2
EDEC 296 (3) Mohawk Second Language 1
EDEC 236 (3) Mohawk Second Language 2
EDEC 297 (3) Mohawk Language 1
EDEC 298 (3) Mohawk Language 2

c) CONTENT AND TEACHING METHODS

(at least 18 credits)

Required Courses
EDEA 242 Cultural Skills 3

Complementary Courses
At least five 3-credit courses from Content and Teaching Methods complementary course list. At least three of these five courses should be in different subject content areas.

For trainees specializing in Physical Education:

Required Courses
EDKP 241 Aboriginal Physical Activities replaces EDEA 242 Cultural Skills
EDKP 342 Physical Education Methods
EDKP 493 Administration
(EDKP 342 and EDKP 493 replace any two of the Content and Teaching Methods courses.)
Complementary Courses

At least three 3-credit courses from Content and Teaching Methods complementary course list.

d) PSYCHOLOGICAL, SOCIAL AND PHYSICAL DEVELOPMENT OF THE CHILD

Required Courses

EDPI 211 Social and Emotional Development 3
EDPI 212 Perceptual Motor Development 3
EDPI 341 Instruction in Inclusive Schools 3
EDEE 246 Cultivating Language and Thought 3

e) PRACTICUM

FOR ALL STUDENTS EXCEPT NUNAVUT TEACHER EDUCATION PROGRAM STUDENTS

Required Courses

EDFE 214 Aboriginal Education Practicum 1 3
EDFE 325 Aboriginal Education Practicum 2 3
EDFE 326 Aboriginal Education Practicum 3 3
EDFE 425 Aboriginal Education Practicum 4 3

(Students in the Physical Education concentration will do 6 of their total practicum credits in Physical Education settings.)

FOR NUNAVUT TEACHER EDUCATION PROGRAM STUDENTS

Required Courses

EDFE 214 Aboriginal Education Practicum 1 3
EDFE 325 Aboriginal Education Practicum 2 3
EDFE 326 Aboriginal Education Practicum 3 3

(EDFE 425 is an option for students enrolled in the Nunavut Teacher Education Program. These students can take another complementary course in lieu of EDPE 425.)

(f) ELECTIVE COURSES (not more than 6 credits)

Students make up the total of 60 credits from courses listed below, or any other suitable courses approved by the Director of First Nations and Inuit Education.

EDEE 241 (3) Basic Art Media for Classroom
EDEE 242 (3) Teaching Mathematics
EDEE 243 (3) Teaching Language Arts
EDEE 244 (3) Teaching: Multigrade Classrooms
EDEE 245 (3) Teaching Inuktitut/Cree
EDEE 246 (3) Teaching Science
EDEE 247 (3) Teaching Social Studies
EDEE 248 (3) Teaching Social Studies
EDEE 249 (3) Teaching Social Studies

7.5.2.2 Certificate in Aboriginal Literacy Education

This 30-credit program is designed for Algonquin, Cree, Inuit, Mi'kmaq and Kanienkehaka (Mohawk) students who wish to gain a deeper understanding of their Indigenous language, especially in its written form. It is aimed mainly at those who will be teaching their Indigenous language and is only available through partnerships with the communities concerned.

Admission to the Program in Aboriginal Literacy Education

Students admitted to this program will be recommended by their communities (as is presently the case with the Certificate in Education for First Nations and Inuit). If the program is used for professional development, students will be Indigenous teachers employed in local schools. As with the Certificate in Education for First Nations and Inuit, they must be mature students, or hold a Secondary V diploma or equivalent. The right of final decision for acceptance of candidates rests with McGill.

This certificate may be taken concurrently and completed within the B.Ed. for Certified Teachers if the required B.Ed. profile is fulfilled. See section 7.5.2.5 "Bachelor of Education for Certified Teachers (Elementary Education)."

PROGRAM PROFILE – CERTIFICATE IN ABORIGINAL LITERACY EDUCATION (30 credits)

Required Courses

CREDITS 12

A beginning course in the Indigenous language as a first language (e.g., EDEC 241 Cree Language 1) 3
A second-level course in the same language (e.g., EDEC 242 Cree Language 2) 3
EDEE 342 Intermediate Inuktitut/Amerindian Language 3

Complementary Courses

CREDITS 12

Four courses to be chosen from the following list:
EDEA 242 (3) Cultural Skills
EDPT 200 (3) Integrating Educational Technology in Classrooms
EDSL 247 (3) Second Language Education in Aboriginal Communities
EDSL 305 (3) L2 Learning: Classroom Settings
or other courses which may be approved by the Director of First Nations and Inuit Education

TOTAL CREDITS 30

This certificate may be taken concurrently and completed within the "Bachelor of Education for Certified Teachers (Elementary Education)", see section 7.5.2.5, if the required B.Ed. profile is fulfilled.

7.5.2.4 Certificate in First Nations and Inuit Educational Leadership

This 30-credit program is designed for First Nations and Inuit organizations to develop their role as leaders within the educational community. The program will focus on developing the core competencies of educational leaders, e.g., decision making and problem solving; fostering a self-reflective leader able to partner with parents to create community outreach; cultivating awareness of the holistic learning and developmental cycles of a child and the role of the educational leader in enhancing that development; maintaining the continuity of community and cultural values and aspirations within the structure of the administration of the school and other educational milieu; and understanding and supporting the pedagogical objectives and the administrative framework of the educational system.

Admission to the Certificate in First Nations and Inuit Educational Leadership

Students admitted to this program will be recommended by their communities. They must be mature students (21 years of age), or hold a Secondary V diploma or equivalent. Students must speak, read, and write fluently the language of instruction as agreed upon between the unit and the client School Board or Education Centre. For Nunavik applicants, students must have experience in a Nunavik educational or community organization. The right of final decision for acceptance of candidates rests with McGill.

TOTAL CREDITS 30

This certificate may be taken concurrently and completed within the "Bachelor of Education for Certified Teachers (Elementary Education)", see section 7.5.2.5, if the required B.Ed. profile is fulfilled.

It may also be followed concurrently with the "Certificate in Education for First Nations and Inuit", see section 7.5.2.1.
7.5.2.5 Bachelor of Education for Certified Teachers (Elementary Education)

The Faculty of Education offers a 90-credit program for teachers who are already certified to teach in elementary schools and who wish to earn a B.Ed. degree. Normally, a minimum of 60 credits must be taken in the program, and no more than 30 credits may be transferred from other institutions. Credits may be transferred from programs leading to the Certificates in Educational Technology, Second Language Teaching, Inclusive Education, or Aboriginal Literacy Education taken concurrently. Credit may also be transferred from the Certificate in Education for First Nations and Inuit, which is normally completed before the B.Ed.

Students completing the Bachelor of Education for Certified Teachers following the Certificate in Education for First Nations and Inuit will have accumulated a total of 120 credits, 60 for the Certificate and a further 60 for the B.Ed.

Admission Requirements for the B.Ed. for Certified Teachers

Applicants apply on the basis of having completed the Certificate in Education for First Nations and Inuit or equivalent and must have the continued support of their education authority to attend the field-based program. The right of final decision for acceptance of candidates rests with McGill.

PROGRAM PROFILE – B.Ed. FOR CERTIFIED TEACHERS (90 credits)

Candidates enrolled in the program complete coursework within the following general pattern:

COMPLEMENTARY COURSES

CREDITS

Academic Concentration 30
In five (5) subject areas relevant to elementary education in a 12-9-3-3-3 pattern (i.e., 12 credits in one subject, 9 credits in a second subject, and 3 credits in each of three other subject areas), or 30 academic credits in three subject areas in a 15-9-6 pattern.

Note: Subject areas relevant to elementary education, in broad terms, are the Arts (Art, Music and Drama), English, French, Science, Mathematics, Physical Education, Moral and Religious Education, Social Studies, Educational Technology, or an Aboriginal language.

Cultural Development 15
Chosen from courses which will enhance the candidate’s cultural development. These are to be chosen in consultation with the Director of First Nations and Inuit Education.

ELECTIVE COURSES 15
Courses selected by the candidate after consultation with the Director of the First Nations and Inuit Education.

EDUCATION CONCENTRATION 30
Normally the Education concentration is completed within the Certificate in Education for First Nations and Inuit.

TOTAL CREDITS 90

The Certificate in Aboriginal Literacy Education, the Certificate in Middle School Education in Aboriginal Communities, or the Certificate in First Nations and Inuit Educational Leadership may be taken concurrently and completed within the B.Ed. for Certified Teachers if the required B.Ed. profile is fulfilled.

This program does not lead to further certification.

7.5.2.6 Certificate in Aboriginal Education for Certified Teachers

This 30-credit professional development program provides training to assist mainstream teachers in becoming more effective teachers in First Nations and Inuit communities. It is designed to address subjects of particular interest and need in First Nations and Inuit schools, such as cultural socialization, cooperative learning, second language teaching, and curriculum development.

Admission Requirements for the Certificate in Aboriginal Education for Certified Teachers

Applicants must provide the following:

- a Diploma of Collegial Studies (DEC) or its equivalent;
- evidence of having completed teacher training at an approved institution;
- a letter of recommendation from a competent authority.

All courses (except EDEE 441) are normally given off-campus and are normally limited to students enrolled in off-campus programs delivered through First Nations and Inuit Education. The right of final decision for acceptance of candidates rests with McGill.

or any other suitable course approved by the Director of First Nations and Inuit Education.

TOTAL CREDITS 30

7.5.2.7 Certificate in First Nations and Inuit Student Personnel Services

This program is offered by the Department of Educational and Counselling Psychology through First Nations and Inuit Education. This program is designed to provide Aboriginal school personnel advisers with a training program which will enable them to learn about the principles and practice of personnel services as generally applied in educational settings, to help Aboriginal student personnel advisers develop their personal skills, and to modify or adapt their services and the content to best suit the cultural and educational needs of Aboriginal students; to encourage Aboriginal student personnel advisers to take leadership in developing educational programs which address the social needs of their communities, to upgrade their academic qualifications and professional development; and to develop and make available, in English and the languages of instruction, collections of professional and scholarly knowledge about students’ needs, and services in First Nations and Inuit communities.

Bearers of this Certificate will be qualified to work as Educational and School Personnel Advisers within the employ of an Aboriginal educational authority.

Admission Requirements

1. Speak, read, and write fluently the language of instruction as agreed upon between the Department and the contracting school board.
2. Hold a student adviser position in an Aboriginal community.
3. Be recommended by the local education authority.
4. Be at least 23 years of age (except for special permission). By this means students will qualify for admission as Mature...
Students under McGill regulations, and thereby not be required to have a Diploma of Collegial Studies (DEC).

5. Be recommended and selected by the school administration in collaboration with McGill personnel.

The right of final decision for acceptance of candidates rests with McGill.

Greg Reid; B.Ed.(P.E.)(McG.), M.S.(Calif.), Ph.D.(Penn. St.)

Associate Professors

Gordon Bloom; M.A.(W.Ont.), M.A.(York), Ph.D.(Ott.)
David J. Pearsall; B.A., BPHE, M.Sc., Ph.D.(Queen’s)
René A. Turcotte; H.B.P.H.E.(Lauren.), M.Sc., Ph.D.(Alta.)

Assistant Professors

Julie Côté; B.Sc., M.Sc.(University of Wisconsin-Madison), Ph.D.(Montr.)
Enrique Garcia; BPE, INEF(Madrid), M.Sc.(Laval), Ph.D.(Alta.)
William Harvey; B.Ed., M.A., Ph.D.(McG.)
Dilson Rassier; BPE(Brazil), M.Sc.(Brazil), Ph.D.(Calg.)
Paul James Stapley; B.A.(Leeds Poly.), M.Sc.(Northumbria), Ph.D.(Université de Bourgogne)

Tanja Taivassalo; B.Sc., Ph.D.(McG.)

Adjunct Professors

Bernard Aguilaniu; M.D., Ph.D.(Grenoble)
Robert Boushel; B.A.(P.E.)(Acadia), M.A.(S. Florida), D.Sc.(Boston)
Karen Johnston; B.Sc., M.D., Ph.D.(Tor.)

The Department of Kinesiology and Physical Education offers one program leading to a B.Ed. degree, one program leading to a B.Sc. degree and a Minor in "Kinesiology for Science Students", see section 12.13.16.

The Department also offers programs at the graduate level leading to an M.A. and M.Sc., and possibilities for doctoral studies. For further information, see the most current Graduate and Post-doctoral Studies Calendar.

7.6.1 Bachelor of Education Programs

7.6.1.1 Bachelor of Education Physical and Health Education

This four-year, 120-credit (150 credits for out-of-province students) specialist program prepares students to teach physical and health education at the elementary and secondary levels. This program interweaves academic studies, professional coursework, and teaching practices in mutually beneficial ways throughout the four years.

Graduation Requirement

All students in Physical Education programs are required, before graduation, to show proof of certification in Standard Level Safety Oriented First Aid, and Level C in Cardiopulmonary Resuscitation, or equivalencies.

FOUNDATION COURSES  12

Required Courses
EDEC 215  English Language Requirement  0
EDEC 247  Policy Issues in Quebec Education  3
EDEC 260  Philosophical Foundations  3
EDPE 208  Personality and Social Development  3
EDPE 300  Educational Psychology  3

PEDAGOGY COURSES  9
Required Courses
EDKP 342  Physical Education Methods  3
EDKP 442  Physical Education Pedagogy  3
EDKP 494  Physical Education Curriculum Development  3

PEDAGOGICAL SUPPORT COURSES  6

Complementary Courses
A 3-credit course in Multicultural Education from the following list  3
EDEC 233  First Nations and Inuit Education
EDEC 248  Multicultural Education
A 3-credit course in Media, Technology, Computers and Education from the following list:  3
EDEC 262  Media, Technology and Education
EDPT 310  Educational Computer Applications
EDPT 200  Integrating Educational Technology in Classrooms
EDPT 204  Educational Media 1
For students with a background in computers or other media applications in education, the following courses may be substituted for the above:
EDPT 341  Instructional Programming 1
EDPT 420  Media Literacy for Education

ELECTIVE COURSES  18

18 credits chosen from any of the University’s offerings to contribute to the student’s academic proficiency and professional preparation.

TOTAL CREDITS  120

7.6.2 Bachelor of Science (Kinesiology)

(Awaiting accreditation from CUCPEKA [Canadian Council of University Physical Education and Kinesiology Administrators]).

The focus of the 90-credit (120 credits for out-of-province students) Bachelor of Science (Kinesiology) is a comprehensive understanding of human movement. Kinesiology is a multidisciplinary field viewing human movement from social, historical, psychological, or biological perspectives. The program provides students with a breadth of theoretical knowledge as well as an opportunity to explore related areas in greater depth, including Minor programs available elsewhere within the University.

Students may opt for either General or Applied emphasis, with an Honours program available for particularly strong students. Students must obtain a CGPA of 3.3 after two years in Kinesiology to qualify for the Honours Program, and must retain this CGPA until graduation.

A maximum of 6 credits of overlap is allowed between the Minor and the primary program. Science Minors consist of up to 24 credits. Arts Minor Concentrations consist of 18 credits. A minimum of 18 new credits must be completed in the Minor or Minor Concentration. For a list of approved Minors and Minor Concentrations, please refer to the Faculty of Science, “Minor Programs”, see section 12.11.6, and “Faculty of Arts Major and Minor Concentration Programs Available to Science Students”, see section 12.11.10.

Graduation Requirement

Students are required, before graduation, to show proof of certification in Standard Level Safety Oriented First Aid, and Level C in Cardiopulmonary Resuscitation, or equivalencies.

B.S.C. (KINESIOLOGY) – MAJOR IN APPLIED KINESIOLOGY

(90 credits)

Required Courses (40 credits)
CHEM 212  (4) Introductory Organic Chemistry 1
EDKP 206  (3) Biomechanics of Human Movement
EDKP 261  (3) Motor Development
EDKP 292  (3) Nutrition and Wellness
EDKP 330  (3) Physical Activity and Health
EDKP 393  (3) Skill Learning and Expertise
EDKP 394  (3) Historical Perspectives
EDKP 395  (3) Exercise Physiology
EDKP 396  (3) Adapted Physical Activity
EDKP 443  (3) Research Methods
EDKP 485  (3) Exercise Pathophysiology 1
EDKP 495  (3) Scientific Principles of Training
EDKP 498  (3) Sport Psychology

Complementary Courses (33 credits)

3 credits, one of the following courses:
ANAT 214  (3) Systemic Human Anatomy or equivalent

6 credits, one of the following course sets:
PHGY 201  (3) Human Physiology: Control Systems
PHGY 202  (3) Human Physiology: Body Functions
PHGY 209  (3) Mammalian Physiology 1
PHGY 210  (3) Mammalian Physiology 2

3 credits, one of the following courses:
BIOL 373  (3) Biometry
MATH 203  (3) Principles of Statistics 1
MGCR 271  (3) Business Statistics
PSYC 204  (3) Introduction to Psychological Statistics
SOCI 350  (3) Statistics in Social Research

18 credits chosen from the following courses:
EDKP 200  (1) Weight Training
EDKP 201  (3) Physical Activity Leadership
EDKP 249  (1) Physical Activity Appraisal
EDKP 250  (3) Practicum 1
EDKP 252  (2) Racquet Sports
EDKP 254  (2) Principles of Dance
EDKP 311  (3) Athletic Injuries
EDKP 350  (3) Physical Fitness Evaluation Methods
EDKP 450  (3) Practicum 3
EDKP 451  (3) Personal Trainer Practicum
EDKP 452  (3) Fitness & Lifestyle Consulting
EDKP 553  (3) Physical Activity Assessments

Elective Courses (17 credits)

Students are encouraged to obtain all, or part, of their remaining program credits by completing one of the Minor/Minor Concentrations (18 - 24 credits) available in the Faculties of Arts and of Science.
B.SC. (KINESIOLOGY) – MAJOR IN GENERAL KINESIOLOGY
(90 credits)

Required Courses (40 credits)
CHEM 212 (4) Introductory Organic Chemistry 1
EDKP 206 (3) Biomechanics of Human Movement
EDKP 261 (3) Motor Development
EDKP 292 (3) Nutrition and Wellness
EDKP 330 (3) Physical Activity and Health
EDKP 393 (3) Skill Learning and Expertise
EDKP 394 (3) Historical Perspectives
EDKP 395 (3) Exercise Physiology
EDKP 396 (3) Adapted Physical Activity
EDKP 443 (3) Research Methods
EDKP 485 (3) Exercise Pathophysiology 1
EDKP 488 (3) Scientific Principles of Training
EDKP 498 (3) Sport Psychology

Complementary Courses (24 credits)
ANAT 214 (3) Systemic Human Anatomy or equivalent
3 credits, one of the following courses:
ANAT 315 (4) Anatomy/Limbs and Back
EDKP 205 (3) Structural Anatomy
6 credits, one of the following course sets:
PHGY 201 (3) Human Physiology: Control Systems
and PHGY 202 (3) Human Physiology: Body Functions
or PHGY 209 (3) Mammalian Physiology 1
and PHGY 210 (3) Mammalian Physiology 2
3 credits, one of the following courses:
BIOL 373 (3) Biometry
MATH 203 (3) Principles of Statistics 1
MGCR 271 (3) Business Statistics
PSYC 204 (3) Introduction to Psychological Statistics
SOCI 350 (3) Statistics in Social Research
9 credits chosen from the following courses:
EDKP 200 (1) Weight Training
EDKP 201 (3) Physical Activity Leadership
EDKP 244 (1) Dance and Fitness
EDKP 249 (1) Physical Activity Appraisal
EDKP 250 (3) Practicum 1
EDKP 303 (3) Advanced Biomechanics
EDKP 311 (3) Athletic Injuries
EDKP 350 (3) Physical Fitness Evaluation Methods
EDKP 444 (3) Ergonomics
EDKP 445 (3) Exercise Metabolism
EDKP 446 (3) Physical Activity and Ageing
EDKP 447 (3) Motor Development 2
EDKP 448 (3) Exercise and Health Psychology
EDKP 449 (3) Exercise Pathophysiology 2
EDKP 450 (3) Practicum 3
EDKP 451 (3) Personal Trainer Practicum
EDKP 452 (3) Fitness & Lifestyle Consulting
EDKP 505 (3) Sport in Society
EDKP 542 (3) Environmental Exercise Physiology
EDKP 553 (3) Physical Activity Assessments
EDKP 566 (3) Muscle Mechanics
EDKP 568 (3) Biomechanics Instrumentation
NUTR 503 (3) Bioenergetics and the Lifespan

Elective Courses (26 credits)
Students are encouraged to obtain some of their remaining program credits by completing one of the Minor/Minor Concentrations (18 - 24 credits) available in the Faculties of Arts and of Science.

B.SC. (KINESIOLOGY) – HONOURS IN KINESIOLOGY
(90 credits)
Students must obtain a CGPA of 3.3 after two years in Kinesiology to qualify for the Honours Program, and must retain this CGPA until graduation.

Required Courses (43 credits)
CHEM 212 (4) Introductory Organic Chemistry 1
EDKP 206 (3) Biomechanics of Human Movement
EDKP 261 (3) Motor Development
EDKP 292 (3) Nutrition and Wellness
EDKP 330 (3) Physical Activity and Health
EDKP 393 (3) Skill Learning and Expertise
EDKP 394 (3) Historical Perspectives
EDKP 395 (3) Exercise Physiology
EDKP 396 (3) Adapted Physical Activity
EDKP 443 (3) Research Methods
EDKP 453 (3) Research Practicum in Kinesiology
EDKP 485 (3) Exercise Pathophysiology 1
EDKP 495 (3) Scientific Principles of Training
EDKP 498 (3) Sport Psychology

Complementary Courses (27 credits)
ANAT 214 (3) Systemic Human Anatomy or equivalent
3 credits, one of the following courses:
ANAT 315 (4) Anatomy/Limbs and Back
EDKP 205 (3) Structural Anatomy
6 credits, one of the following course sets:
PHGY 201 (3) Human Physiology: Control Systems
and PHGY 202 (3) Human Physiology: Body Functions
or PHGY 209 (3) Mammalian Physiology 1
and PHGY 210 (3) Mammalian Physiology 2
3 credits, one of the following courses:
BIOL 373 (3) Biometry
MATH 203 (3) Principles of Statistics 1
MGCR 271 (3) Business Statistics
PSYC 204 (3) Introduction to Psychological Statistics
SOCI 350 (3) Statistics in Social Research
12 credits chosen from the following courses:
EDKP 303 (3) Advanced Biomechanics
EDKP 444 (3) Ergonomics
EDKP 445 (3) Exercise Metabolism
EDKP 446 (3) Physical Activity and Ageing
EDKP 447 (3) Motor Development 2
EDKP 448 (3) Exercise and Health Psychology
EDKP 449 (3) Exercise Pathophysiology 2
EDKP 505 (3) Sport in Society
EDKP 542 (3) Environmental Exercise Physiology
EDKP 566 (3) Muscle Mechanics
EDKP 568 (3) Biomechanics Instrumentation
NUTR 503 (3) Bioenergetics and the Lifespan

Elective Courses (20 credits)
Students are encouraged to obtain all, or some, of their remaining program credits by completing one of the Minor/Minor Concentrations (18 - 24 credits) available in the Faculties of Arts and of Science.

Director — France Bouthillier

Professor Emerita
Effie C. Astbury; B.A., B.L.S.(McG.), M.L.S.(Tor.)

Professors
J. Andrew Large; B.Sc.(Lond.), Ph.D.(Glas.), Dip.Lib.(Lond.)
(CN-Pratt-Grinstad Professor of Information Studies)
Peter F. McNally; B.A.(W. Ont.), B.L.S., M.L.S., M.A.(McG.)

Associate Professors
Jamshid Beheshti; B.A.(S. Fraser), M.L.S., Ph.D.(W. Ont.)
France Bouthillier; B.Ed.(UQAM), M.B.S.I.(Montr.), Ph.D.(Tor.)
John E. Leide; B.S.(Mit), M.S.(Wis.), Ph.D.(Rutg.)
Diane Mittermeyer; B.A., B.L.S.(Montr.), M.L.S., Ph.D.(Tor.)

Assistant Professors
Joan Bartlett; B.Sc., M.L.S., Ph.D. (Tor.)
Kim Dalkir; B.Sc., M.B.A.(McG.), Ph.D.(C'dia)
Catherine Guastavino; B.Sc.(McG.), M.Sc.(Aix-Marseille),
Ph.D.(Paris)
Eun Park; B.A.(Pusan), M.L.I.S.(III.), M.B.A.(Pitt.), Ph.D.(Calif.-LA)

Professional Associate
Fiona Tam; B.B.A.(HKUST), M.L.I.S.(McG.)

Faculty Lecturers
Joy Bennett; B.A., M.L.S.(McG.), Ph.D.(C'dia)
Leanne Bowler; B.A., M.L.I.S., M.Ed.(McG.)
Erica Burnham; B.A., M.L.I.S.(McG.)
Gordon Burr; B.A., M.L.S.(McG.)
Louise Carpentier; B.L.S.(Tor.), M.Bibl.(Montr.), M.P.P.PA.(C'dia)
Larry Deck; B.A.(Windsor), M.A.(Montr.), M.L.I.S.(McG.)
Danielle Dennie; B.Sc.(Laur.), M.Sc.(Inst.Armand-Frappier),
M.L.I.S.(McG.)
Jocelyn Godolphin; B.A.(Man.), M.A.(Ore.), M.L.S.(U.B.C.)
Jim Henderson; B.Sc.(Vic., BC), M.Sc.(Qu.), M.L.S.(B.Col.)
Alexander Jerabek; B.A.(McG.), M.A.(C'dia), M.L.I.S.(McG.)
Tao Jin; B.A.(Beijing), M.L.I.S.(McG.)
Evelyne Mondou; B.Sc.(Montr.), M.L.I.S.(McG.)
Valerie Nesset; B.A.(Qu.), M.L.I.S.(McG.)
Cecilia Tellis; B.A.(Tor.), M.L.I.S.(McG.)
Richard Virr; B.A.(Tulane), M.A.(Qu.), Ph.D.(McG.)

The Graduate School of Library and Information Studies focuses upon the knowledge and skills necessary to identify, acquire, organize, retrieve and disseminate information so as to meet people’s varied information needs.

The Graduate School of Library and Information Studies offers four programs at the graduate level. Its 48-credit Master of Library and Information Studies (MLIS) has three areas of specialization: Archival Studies, Knowledge Management and Librarianship. Accredited by the American Library Association, the MLIS program prepares professionals to manage information resources and services in libraries and the wider information industries. Its 30-credit Graduate Diploma in Library and Information Studies and 15-credit Graduate Certificate in Library and Information Studies are designed to provide a formal environment in which information professionals can update, specialize, and redirect their careers for advanced responsibilities. Its Ph.D. (ad hoc) program provides an opportunity to undertake research at the doctoral level in library and information studies within an interdisciplinary context.

For further information concerning programs, requirements, and courses, consult the Graduate School of Library and Information Studies section of the most current Graduate and Postdoctoral Studies Calendar or the School Website.
8 Faculty of Engineering, including Schools of Architecture and Urban Planning

8.4.251 Degree Programs
are designed to qualify the graduates for immediate employment.

222 2007-2008 Undergraduate Programs, McGill University

degrees are offered in all Engineering Departments. These programs are described in the Graduate and Postdoctoral Studies Calendar found at www.mcgill.ca/courses.

The academic programs are divided into required and complementary sections. The required courses emphasize those basic principles which permit graduates to keep abreast of progress in technology throughout their careers. Exposure to current technology is provided by the wide variety of complementary courses which allow students to pursue in depth a particular interest. For program details refer to section 8.5 "Academic Programs".

An internship program involving a paid 8- to 16-month industrial work experience is available to Engineering and Science students. Generally, students will enter the internship program before starting their final year of undergraduate studies. Details can be found in section 8.2.6 "YES: Internship Year for Engineering and Science and IP: Industrial Practicum". In addition, CO-OP programs are offered in Mining Engineering and in Metals and Materials Engineering.

Postgraduate programs leading to Master’s and doctoral degrees are offered in all sectors of the Faculty. Numerous areas of specialization are available in each of the departments and schools. All postgraduate programs, including the professional degree programs in Architecture and in Urban Planning are described in the Graduate and Postdoctoral Studies Calendar found at www.mcgill.ca/courses.

8.1.5 Special Facilities and Related Programs

8.1.5.1 Engineering Microcomputing Facility

In addition to the services provided by the Computing Centre, the Faculty, in conjunction with its departments and schools, maintains specialized computing and information resources in support of teaching and research. These vary from desktop PCs distributed throughout the Engineering complex to very high performance scientific workstations found in the research laboratories. Each unit organizes and maintains facilities that are designed around specific roles, e.g., CAD/CAM, microelectronic design, software engineering, circuit simulation, process control, polymers, structural mechanics, metal processing, etc., in addition to systems dedicated to administrative support.

The role of the Faculty is to provide access to computing resources on a 24-hour basis and to provide services that are not covered by individual units. The Faculty works in close cooperation with the McGill Computing Centre, which provides remote access to the Faculty network.

8.1.5.2 Bioresource Engineering

The Faculty of Engineering cooperates with the Faculty of Agricultural and Environmental Sciences in providing courses of instruction for a curriculum in agricultural and biosystems engineering to meet requirements for a professional degree awarded in the Faculty of Agricultural and Environmental Sciences. The second term of the penultimate year of the program is given by the Faculty of Engineering on the downtown campus. For details of the curriculum, see section 13.6.3 "Department of Bioresource Engineering".

Some of the courses offered by the Department of Bioresource Engineering (Subject Code BREE) may be of interest to students in the Faculty of Engineering.

8.1.5.3 Department of Biomedical Engineering

Lyman Duff Medical Sciences Building
3775 University Street
Montreal, QC H3A 2B4
Telephone: (514) 398-8278

Andrew Kirk; B.Sc.(Brist.), Ph.D.(Lond.) (William Dawson Scholar) Associate Dean, Research and Graduate Education

David Covo; B.Sc.(Arch.), B.Arch.(McG.), M.R.A.I.C., O.A.Q. Director, School of Architecture

David F. Brown; B.A.(Bishop's), M.U.P.(McG), Ph.D.(Sheff.) Director, School of Urban Planning

Dimitrios Berk; B.Sc.(Bosphorus), M.E.Sc.(W.Ont.), Ph.D.(Calg.), P.Eng. Chair, Department of Chemical Engineering

Van-Thanh-Van Nguyen; B.M.E.(Vietnam), M.C.E.(A.I.T.), D.A.Sc.(Montr.), Eng. Chair, Department of Civil Engineering and Applied Mechanics (Acting)

David V. Plant; M.S., Ph.D.(Brown), F.O.S.A., (James McGill Professor) Chair, Department of Electrical and Computer Engineering (Interim)

Chair, Department of Mechanical Engineering

Robin A.L. Drew; B.Tech.(Brad.), Ph.D.(Newcastle, UK), Eng. Chair, Department of Mining, Metals and Materials Engineering

Colin Rogers; B.A.Sc., M.A.Sc.(Wat.), Ph.D.(Syd.), P.Eng. Secretary of Faculty

Christine Tutt Faculty Administrator and Manager of Operations

Debbie Morzajew Manager, EMF

Jonathan Rousham Facilities Manager

Tania Chomyk Area Personnel Officer

Enza De Martinis Financial Officer

Judy Pharo Associate Director, Student Affairs

Stacey Comeau Records - Student Affairs Officer (Acting)

Susie Vodopivec Student Affairs Administrator

8.1.3 Historical Note

The Faculty of Engineering began in 1871 as the Department of Practical and Applied Science in the Faculty of Arts with degree programs in Civil Engineering and Surveying, Mining Engineering and Assaying, and Practical Chemistry. Diploma courses had been offered from 1859, and by 1871 the staff and enrolments had increased sufficiently to justify the creation of the Department. Continued growth led to the formation of the Faculty of Applied Science in 1876. By 1910 there were ten degree programs offered, including Architecture and Railroad Engineering. Subsequent changes in the overall pattern of the University led to the creation of the Faculty of Engineering in 1931 with a departmental structure very similar to that which exists at present.

8.1.4 The Faculty Today

The Faculty currently includes five engineering departments and two schools:

The Departments

Chemical Engineering
Civil Engineering and Applied Mechanics
Electrical and Computer Engineering
Mechanical Engineering
Mining, Metals and Materials Engineering

The Schools

Architecture
Urban Planning

The Faculty serves approximately 2,600 undergraduate students and 900 graduate students in a wide variety of academic programs. Undergraduate programs leading to professional bachelor degrees are offered in all Engineering Departments. These programs are designed to qualify the graduates for immediate employment in a wide range of industries and for membership in the appropriate professional bodies. Additionally, a non-professional undergraduate degree is offered in the School of Architecture for those who plan to work in related fields not requiring professional qualification. The curricula are structured to provide suitable preparation for those who plan to continue their education in postgraduate studies either at McGill or elsewhere. The professional degrees in Architecture and Urban Planning are offered at the Master’s level and are described in the Graduate and Postdoctoral Studies Calendar found at www.mcgill.ca/courses.

The academic programs are divided into required and complementary sections. The required courses emphasize those basic principles which permit graduates to keep abreast of progress in technology throughout their careers. Exposure to current technology is provided by the wide variety of complementary courses which allow students to pursue in depth a particular interest. For program details refer to section 8.5 "Academic Programs".

An internship program involving a paid 8- to 16-month industrial work experience is available to Engineering and Science students. Generally, students will enter the internship program before starting their final year of undergraduate studies. Details can be found in section 8.2.6 "YES: Internship Year for Engineering and Science and IP: Industrial Practicum". In addition, CO-OP programs are offered in Mining Engineering and in Metals and Materials Engineering.

Postgraduate programs leading to Master's and doctoral degrees are offered in all sectors of the Faculty. Numerous areas of specialization are available in each of the departments and schools. All postgraduate programs, including the professional degree programs in Architecture and in Urban Planning are described in the Graduate and Postdoctoral Studies Calendar found at www.mcgill.ca/courses.

8.1.5 Special Facilities and Related Programs

8.1.5.1 Engineering Microcomputing Facility

In addition to the services provided by the Computing Centre, the Faculty, in conjunction with its departments and schools, maintains specialized computing and information resources in support of teaching and research. These vary from desktop PCs distributed throughout the Engineering complex to very high performance scientific workstations found in the research laboratories. Each unit organizes and maintains facilities that are designed around specific roles, e.g., CAD/CAM, microelectronic design, software engineering, circuit simulation, process control, polymers, structural mechanics, metal processing, etc., in addition to systems dedicated to administrative support.

The role of the Faculty is to provide access to computing resources on a 24-hour basis and to provide services that are not covered by individual units. The Faculty works in close cooperation with the McGill Computing Centre, which provides remote access to the Faculty network.

8.1.5.2 Bioresource Engineering

The Faculty of Engineering cooperates with the Faculty of Agricultural and Environmental Sciences in providing courses of instruction for a curriculum in agricultural and biosystems engineering to meet requirements for a professional degree awarded in the Faculty of Agricultural and Environmental Sciences. The second term of the penultimate year of the program is given by the Faculty of Engineering on the downtown campus. For details of the curriculum, see section 13.6.3 "Department of Bioresource Engineering".

Some of the courses offered by the Department of Bioresource Engineering (Subject Code BREE) may be of interest to students in the Faculty of Engineering.

8.1.5.3 Department of Biomedical Engineering

Lyman Duff Medical Sciences Building
3775 University Street
Montreal, QC H3A 2B4
Telephone: (514) 398-8278

222 2007-2008 Undergraduate Programs, McGill University
Engineering undergraduates who are interested in the biomedical applications of engineering techniques should contact the Chair of their department or the graduate Chair of Biomedical Engineering. Some of the courses offered by the Department (Subject Code BMDE) may be of interest to Engineering students, and may be approved as complementary courses. For more information, students should refer to “Course Information, Regulations and Descriptions (Appendix B)”.

8.1.6 Library Facilities

8.2 General Information

8.2.1 Admission Requirements
The Faculty of Engineering offers programs leading to the degrees of B.Eng. and B.Sc.(Arch.). Enrolment in some programs is limited.

Specific information on admissions requirements for Quebec students, students from provinces of Canada other than Quebec, and applicants from outside of Canada can be found in “Undergraduate Admissions Guide 2007-08 (Appendix A)”.

8.2.2 Exchange Programs
The Faculty of Engineering participates in a number of bilateral exchange programs that provide undergraduates with an opportunity to study in Australia, Austria, Canada, Denmark, France, Germany, Hong Kong, Mexico, New Zealand, Singapore, Sweden, United Kingdom, and the US. Applicants must have completed at least one year of study and have maintained an average of 3.00 or better. Further information may be obtained from the Faculty of Engineering Student Affairs Office in the Engineering Student Centre (www.mcgill.ca/engineering/resources/offices) and the Office of Student Exchanges and Study Abroad (www.mcgill.ca/studyabroad).

8.2.3 Transfer Credits
In certain cases, credits may be granted for courses passed with a C or better that were taken at other universities prior to admission. The number of transfer credits that will be granted will be limited to ensure that the student must complete a minimum of 60 credits of program-related courses at McGill University, excluding those taken to satisfy the basic science requirements listed under section 8.3.1.2 “Basic Science Requirements for Students Entering from Outside Quebec”.

8.2.4 Registration
Students who are currently registered and intend to return to the same degree program in the following academic session should contact the Chair of their department for course confirmation during the first two weeks of the Fall term and, if changes are being made, during the first two weeks of the Winter term.

Information regarding course registration is sent to new students at the time of admission. All new students must see a Departmental Academic adviser during the advising period.

8.2.4.1 Course Load
For students in the Faculty of Engineering the normal course load is 15 to 18 credits per term. Students who register for fewer than 12 credits per term are considered to be part-time in that term. A student who wishes to register for more than 18 credits in a term may only do so with special permission of the departmental advisers of the department. Students on probationary standing may register for a maximum of 13 credits, per term including repeated courses. Student with deferred exams should refer to section 8.3.5.11 “Deferred Examinations” for credit requirements. Where appropriate, students must ensure that they register for sufficient credits to satisfy visa, financial aid and/or scholarship requirements.

8.2.4.2 Registration for Continuing Education Courses
Students may register for Continuing Education courses through Minerva. Students must refer to the Centre for Continuing Education Calendar and Schedule for course information and deadlines. Language courses given through Continuing Education will count for credits. For further information, contact the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre.

8.2.4.3 Course Withdrawal
Students may withdraw from a course without academic penalty provided they do so within the appropriate deadlines of the term. Beyond this time their names will appear on the mark reports and, in the event that they do not take the examination, they will be given a J grade. For more information on course withdrawal, see “Regulations Concerning Course Withdrawal”, in section 3.3.8.

8.2.5 Advising
All students are required to seek academic advising about their programs from the department in which they study. Additional information may be obtained by calling:

- Student Affairs Office (514) 398-7257
- Architecture (514) 398-6702
- Chemical Engineering (514) 398-4494
- Civil Engineering (514) 398-6860
- Electrical and Computer Engineering (514) 398-3943
- Mechanical Engineering (514) 398-8070
- Mining, Metals and Materials Engineering (514) 398-4755
- Urban Planning (514) 398-4075

For more information on advising, see section 4 “Advising and Support”.

8.2.6 Student Activities
The campus offers a wide variety of extracurricular activities for students. All are encouraged to participate. Many of these are organized within the Faculty under the auspices of the Engineering Undergraduate Society (EUS), or the Architectural Student Association (ASA). Both of these organizations publish handbooks describing their operations and the activities of various Faculty clubs and societies. All undergraduate students automatically become members of the EUS or the ASA, as appropriate.

8.2.7 Scholarships and Bursaries
Scholarships, bursaries and loans are open to students in the Faculty of Engineering. Students should consult the Undergraduate Scholarships and Awards Calendar available at www.mcgill.ca/courses or from the Admissions, Recruitment and Registrar’s Office. Specific information concerning these awards may be obtained from the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre.

(www.mcgill.ca/engineering/student/scholarships)
8.2.8 IYES: Internship Year for Engineering and Science and IP: Industrial Practicum

Employers value experience. The IYES Program (8, 12 or 16 months) and the IP course (4 months) allow undergraduate students in Engineering and Science to gain professional work experience during the course of their undergraduate studies while at the same time earning a salary within the average range of those for entry-level professional positions. Other benefits include:

- improved employment prospects upon graduation and at a higher starting salary;
- the opportunity to test a career choice before launching into a full time job after graduation;
- the opportunity to develop communication skills and to acquire a business perspective that cannot be learned in school.

Employment begins in January, May or September. IYES internships are for a duration of 8, 12 or 16 months, while the IP is for 4 months. Employers choose the most suitable students for their organization through the application and interview process. While employed by the participating companies, students work on assignments related to their field of study. Completion of an IP or IYES will be noted on the student’s transcript. Successful completion of an 8, 12 or 16 month internship will qualify the student to graduate with the Internship Program designation.

STUDENT ELIGIBILITY
All students participating in the IYES Program or the IP course must:

- have a good academic record (GPA of 2.6 or higher);
- be registered full time in their program;
- remain a degree candidate while on internship;
- return to complete studies at McGill (internship students will receive an automatic extension for the completion of their studies). Students are not allowed to complete their undergraduate degree during the internship period.
- International students are eligible to apply for IYES positions and Summer IPs (a few restrictions may apply)

Further information can be obtained at www.mecc.mcgill.ca or by sending an e-mail to info.mecc@mcgill.ca.

8.2.9 Calculators in Faculty Tests and Examinations

The use of calculators during tests and examinations is at the discretion of the course instructor. If a calculator is permitted in the examination, the Faculty requires that the students use a Faculty Standard Calculator, i.e., the CASIO fx-115, CASIO fx-991, SHARP EL-520, or SHARP EL-546. Under these circumstances, no other calculators will be permitted, regardless of their level of sophistication. Non-regulation calculators will be removed and no replacement calculator will be provided. All Engineering students are expected to own one of the above listed Faculty Standard Calculators.

8.3 Academic Requirements

8.3.1 Degree Requirements

In order to obtain a Bachelor’s degree, students must complete one of the departmental programs described in section 8.5 “Academic Programs”.

8.3.1.1 Entrance Requirements

The degree programs in the Faculty of Engineering are designed for students who have completed a general and basic science program. This basic science requirement consists of two terms of calculus, chemistry, physics, one term of vectors, matrices and geometry and one term of humanities or social sciences.

Students entering the Faculty of Engineering from Quebec complete these courses at CEGEP and enter a seven-term program.

Students entering from outside Quebec with a high school diploma generally enter an eight-term program and complete the basic science requirements at McGill.

Students who have completed Advanced Placement Exams, Advanced Levels, the International Baccalaureate Exam, or McGill placement and/or advanced credit examinations may receive exemptions and/or credits for all or part of the basic science requirements. Similarly, students who have completed courses at other universities or colleges may receive exemptions and/or credits. Please see www.mcgill.ca/engineering/newstudents/credit for specific information on transfer credits.

8.3.1.2 Basic Science Requirements for Students Entering from Outside Quebec

Generally, students admitted to Engineering from outside Quebec are required to complete the basic science requirements outlined below, in addition to the departmental programs described in section 8.5 “Academic Programs”.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 110</td>
<td>4</td>
<td>General Chemistry 1</td>
</tr>
<tr>
<td>CHEM 120</td>
<td>4</td>
<td>General Chemistry 2</td>
</tr>
<tr>
<td>MATH 139</td>
<td>4</td>
<td>Calculus</td>
</tr>
<tr>
<td>or MATH 140</td>
<td>3</td>
<td>Calculus</td>
</tr>
<tr>
<td>MATH 141</td>
<td>4</td>
<td>Calculus</td>
</tr>
<tr>
<td>MATH 153</td>
<td>3</td>

</tr>
<tr>
<td>PHYS 131</td>
<td>4</td>
<td>Mechanics and Waves</td>
</tr>
<tr>
<td>PHYS 142</td>
<td>4</td>
<td>Electromagnetism and Optics</td>
</tr>
</tbody>
</table>

Students who are uncertain as to which calculus course sequence is appropriate for them should contact the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre, (514) 398-7257.

Students who successfully complete one, or more, McGill Placement Tests will obtain credit(s) for the equivalent(s), i.e., CHEM 110, CHEM 120, MATH 139, MATH 141, MATH 133, PHYS 131, PHYS 142. Details are provided on the Faculty Website at www.mcgill.ca/engineering/newstudents.

Students entering with advanced standing credits (Advanced Placements, Advanced Levels, International Baccalaureate examinations, McGill Placement Tests) are required to meet with an Adviser, in the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre, to finalize their program of study. (This must be done prior to meeting with the Departmental Adviser.) An information session will be held prior to the advising sessions to process these advanced credits. Information is available on the Faculty Website at www.mcgill.ca/engineering/newstudents.

8.3.1.3 Architecture – Basic Science Requirements for Students Entering from Outside Quebec

Generally, students admitted to Architecture from outside Quebec are required to complete the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 110</td>
<td>4</td>
<td>General Chemistry 1</td>
</tr>
<tr>
<td>CHEM 120</td>
<td>4</td>
<td>General Chemistry 2</td>
</tr>
<tr>
<td>MATH 139</td>
<td>4</td>
<td>Calculus</td>
</tr>
<tr>
<td>or MATH 140</td>
<td>3</td>
<td>Calculus</td>
</tr>
<tr>
<td>MATH 141</td>
<td>4</td>
<td>Calculus</td>
</tr>
<tr>
<td>MATH 153</td>
<td>3</td>
<td>Vectors, Matrices and Geometry</td>
</tr>
<tr>
<td>PHYS 131</td>
<td>4</td>
<td>Mechanics and Waves</td>
</tr>
<tr>
<td>PHYS 142</td>
<td>4</td>
<td>Electromagnetism and Optics</td>
</tr>
</tbody>
</table>
Students may write McGill Placement Tests to obtain credit for CHEM 110, CHEM 120, MATH 140, MATH 141, MATH 133, PHYS 131 and PHYS 142, in the event that they have studied similar material previously. Details on the advanced placement examinations are provided in the Welcome to McGill guide for new students. Information is also available at www.mcgill.ca/engineering/newstudents.

### 8.3.2 Degrees and Requirements for Professional Registration

**Non-Professional:**
- Bachelor of Science (Architecture)

The first professional degree in architecture is the Master of Architecture I. The description of the M.Arch. I program can be found in the Graduate and Postdoctoral Studies Calendar at www.mcgill.ca/courses.

**Professional:**
- Bachelor of Engineering
- Bachelor of Engineering (Honours)
- Bachelor of Software Engineering

The B.Eng. programs are accredited by the Accreditation Board of the Canadian Council of Professional Engineers (CCPE) and fulfill the academic requirements for admission to the provincial engineering professional organizations. The CCPE has also negotiated agreements with engineering organizations in other countries to grant Canadian licensed engineering the same privileges accorded to professional engineering in those countries. See the CCPE website for further information (www.ccpe.ca). All students are encouraged to seek professional registration after graduation.

To become a Professional Engineer in Canada, a graduate must pass an examination on legal aspects as well as on the principles of professional practice, and acquire two to four years of engineering experience, depending on the province. Only persons duly registered may use the title of “engineer” and perform the professional activities reserved for engineers by the provincial laws and regulations.

In Quebec, the professional engineering body is the Ordre des ingénieurs du Québec (OIQ). In order to better prepare new graduates for the practice of their profession, McGill organizes seminars in cooperation with the OIQ on various aspects of the profession. The OIQ also has a student section. As soon as students have accumulated 60 credits in a B.Eng. program, they can join the Student Section of the OIQ. Registration is free.

### 8.3.3 Prerequisites and/or Corequisites

Prerequisites and/or corequisites must be completed prior to course registration, if applicable. If a student has registered for a course and did not satisfy the prerequisites and/or corequisites, the course may be dropped from his/her record automatically by Minerva.

Those students who have received advance credits/exemptions or passed a placement exam, and are blocked from registration in a course due to a prerequisite and/or corequisite block, must complete a Course Authorization Form and submit it to the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre. A Departmental adviser must sign and make a notation on the Course Authorization Form indicating that the prerequisite and/or corequisite has been satisfied.

Further information may be obtained from the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre.

### 8.3.4 Complementary Studies

Engineering students must complete 6 credits of additional complementary courses as follows:

1) Three credits on the impact of technology on society are to be chosen from the following list of courses:
   - CHEE 230 Environmental Aspects of Technology
   - CHEE 430 Technology Impact Assessment
   - CIVE 469 Infrastructure and Society
   - ECON 225 Economics of the Environment
   - ENVR 201 Society and Environment
   - ENVR 480 Topics in Environment 2
   - GEOG 200 Geographical Perspectives: World Environmental Problems
   - GEOG 203 Environmental Systems
   - GEOG 205 Global Change: Past, Present and Future
   - GEOG 302 Environmental Management 1
   - MIME 308 Social Impact of Technology
   - PHIL 343 Biomedical Ethics
   - SOCI 235 Technology and Society
   - SOCI 312 Sociology of Work and Industry

2) Three credits in the humanities and social sciences, administrative studies and law are to be chosen from the following list of courses:

   **A. Humanities and Social Sciences**
   - Any course at the 200 level or above from the departments of:
     - Anthropology (Subject Code ANTH)
     - Economics (any 200- or 300-level course excluding ECON 208, ECON 217, ECON 227, ECON 259 and ECON 337)
     - History (Subject Code HIST)
     - Philosophy (excluding PHIL 210)
     - Political Science (Subject Code POLI)
     - Psychology (excluding PSYC 204, PSYC 305 and PSYC 435 but including PSYC 100)
     - Religious Studies (Subject Code RELG)
     - School of Social Work (Subject Code SWRK)
     - Sociology (excluding SOCI 350 or ARCH 350 The Material Culture of Canada or ENVR 203 Knowledge, Ethics and Environment or ENVR 400 Environmental Thought or MATH 338 History and Philosophy of Mathematics

   **B. Administrative Studies and Law**
   - Faculty of Engineering
     - FACC 220 Law for Architects and Engineers
     - FACC 500 Technology Business Plan Design
     - FACC 501 Technology Business Plan Project
   - Desautels Faculty of Management
     (Management courses have limited enrolment and registration dates, see Calendar of Dates.)
     - BUSA 465 Technological Entrepreneurship
     - INDR 234 Introduction to Labour-Management Relations
     - MGCR 222 Introduction to Organizational Behaviour
     - MGCR 320 Managing Human Resources
     - MGCR 352 Marketing Management 1
     - MGCR 360 Social Context of Business
     - MKRT 360 Marketing of Technology
     - ORGB 321 Leadership

   **C. Language Courses**
   - Any language course which is deemed by the academic adviser to have a sufficient cultural component or, in the case of a student who was not already proficient in a specific language, 3 program credits will be given a successfully completed, academically approved 6-credit language course.
8.3.5 Student Progress

The B.Eng. programs may be completed in seven terms. The B.Sc.(Arch.) program may be completed in six or eight terms, depending upon point of entry.

A student must successfully complete the B.Eng. or B.Sc.(Arch.) programs within six years of entry. Candidates admitted to a lengthened program, or to a shortened program because of advanced standing, or who are participating in the IYES Program, will have a correspondingly greater or lesser period in which to complete their program. Extensions may be granted by the Committee on Standing in cases of serious medical problems or where other similarly uncontrollable factors have affected a student's progress.

8.3.5.1 Letter Grades

In the Faculty of Engineering, letter grades are assigned according to the grading scheme adopted by the professor in charge of a particular course. They have the designations:

A, A- Very Good
B+, B, B- Good
C+, C Satisfactory
KF Incomplete
Failed

Grades A, B and C indicate satisfactory results. Grade D indicates marginal results which may be acceptable for peripheral courses but not for core courses required by the program. The classification of a course as core or peripheral depends on the individual student's program and will be decided by the department concerned.

Grade F is a permanent grade indicating unsatisfactory results. Grade J indicates an unexcused failure to submit assignments or an unexcused absence from an examination. It is equivalent to an F grade.

8.3.5.2 Incomplete Course Deadlines

Those students with a K grade (incomplete) MUST complete the course within three (3) months, after which the student will be given a grade of KF (incomplete/failed).

If the student is unable to complete the course within the given deadlines, a request for an extension provided by the department must be forwarded to the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre.

Students who have a K or KE in their final term can expect delays in graduation.

8.3.5.3 Satisfactory/Unsatisfactory Option

The Satisfactory/Unsatisfactory Option (S/U) may be used for complementary studies involving a Social Science/Humanities course, or a course dealing with the impact of technology on society; or to elective courses taken outside the School of Architecture by architecture students. It does not apply to the "technical complementaries" or "architectural complementaries", or to any other category of the Engineering or Architecture programs.

Students must specify courses as S/U at the time of registration. The option will not be manually added or removed from a student's record after the Add/Drop deadline. Once a mark has been submitted, this option will not be reversed.

- A C grade is considered a pass under the University Satisfactory/Unsatisfactory option. (Students should note that the Faculty of Engineering accepts a D grade as a pass when courses eligible for the S/U option are taken in the conventional manner.)
- Only students in satisfactory standing will be permitted to take a course under the Satisfactory/Unsatisfactory option. Only one course (3 credits) per term, to a maximum of 10% of a student's credits taken at McGill, may be taken this way. Grades will be reported in the normal fashion by the instructor and the grades of C and above will be converted to Satisfactory (S) and grades of D and F will be converted to Unsatisfactory (U).
- The courses taken under this option will be excluded from the GPA, but will be included in the number of credits.

8.3.5.4 Course Credits

The credit assigned to a particular course reflects the amount of effort it demands of the student. One credit normally represents three hours total work per week. This is, in general, a combination of lecture hours and other contact hours such as laboratory periods, tutorials and problem periods as well as personal study hours. As a guide, the average division of time for a course is indicated in hours in the course listing after the course credit. For example, (3) (3-0-6) indicates a three-credit course consisting of three lecture hours per week, no other contact hours and six hours of personal study per week.

8.3.5.5 Extra Courses

Courses that a student elects to take which lie outside their program may be classified as "extra", provided the student chooses this option at the time of registration. Extra courses are indicated on the student's transcript and grades earned in those courses do not affect the grade point average. The option will not be added to a student's record after the Add/Drop deadline. Courses that are taken to satisfy the student's engineering program or a Minor cannot be designated as extra.

8.3.5.6 Academic Standing Decisions

In the Faculty of Engineering, a decision on the student's academic standing is based on the CGPA (Cumulative Grade Point Average) according to the criteria listed below.

- Satisfactory standing - CGPA equal to 2.00 or greater.
- Probationary standing - CGPA less than or equal to 1.99 or equal to or greater than 1.20.
- Unsatisfactory standing - CGPA less than 1.20 or failure to meet the conditions of Probationary standing as described below (if this is the student's first term, the student is normally readmitted to Probationary Standing by Faculty decision).

Note: The Faculty makes academic standing decisions after the completion of each term (Fall, Winter and Summer) based on academic results to date. Thus, if a student has been granted permission to defer one or more examinations, the standing decision will be made regardless of such deferrals. Please see below for further information about academic standing decisions.

Satisfactory Standing

Students in satisfactory standing may proceed, with the following conditions:

- All core courses in which D or F grades were obtained must either be repeated successfully (grade C or better) or be replaced by an alternative approved course which is completed successfully.
- All other courses in which F grades were obtained must either be repeated successfully at some point before graduation or be replaced by some alternative approved course which is completed successfully before graduation.

Students in poor academic standing are strongly urged to contact the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre to discuss their situation. An adviser is available to help guide students and to provide useful advice to help students achieve their goals. Helpful workshops are provided by Student Services, e.g., study skills, stress management, test anxiety. Students who are experiencing difficulties are encouraged to explore these avenues.
Probationary Standing

Students placed on Probationary Standing may proceed with their studies under the following conditions.

- Students must reduce their credit load to a maximum of 13 credits per term and must achieve at the end of the term either a CGPA of 2.00 or better, or a term GPA (TGPA) of 2.50 or better in order to continue.
- A student whose TGPA is 2.50 or better, but whose CGPA is less than 2.00, may continue on with his/her studies but will remain on Probationary Standing.
- Failure to achieve either the TGPA or CGPA requirements noted above will result in the student being placed on "Unsatisfactory Standing" (see below). Students will remain on probationary standing until they achieve a CGPA equal to or exceeding 2.00, at which time their standing will be changed to "satisfactory".
- Students placed on Probationary Standing who need to reduce their credit load but are unable to drop course(s) must complete a Course Authorization Form and submit it to the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre. The course(s) will then be deleted manually from the student’s record.

Unsatisfactory Standing

Students who have been placed on Unsatisfactory Standing will be asked to withdraw from the Faculty of Engineering for a minimum of one term. Courses for which the student is currently registered will be deleted automatically from the student’s record by the Faculty. Students whose most recent academic standing is currently unsatisfactory as indicated on Minerva, and who wish to return to the Faculty of Engineering after a compulsory absence of a minimum of one term away, must apply for readmission on Minerva, no later than November 1 (Winter term) and June 1 (Fall term), at www.mcgill.ca/engineering/student/information/facultytransfer_readmission/readmission. Upon readmission, the student will be placed back on Probationary Standing. While on probation the student must reduce his/her credit load to a maximum of 13 credits per term, and must meet or exceed a TGPA greater than or equal to 2.50 or a CGPA greater than or equal to 2.00. A student will remain on probationary standing until they achieve a CGPA greater than or equal to 2.00, at which time their standing will be changed to "satisfactory".

Students who fail to achieve the required TGPA will be permanently withdrawn from the program with no chance of readmission. In addition, students who have returned to satisfactory standing, but whose CGPA falls below 2.00 in a subsequent term, will be required to permanently withdraw from the program with no chance of readmission.

8.3.5.7 Repeated Courses

Students who fail to achieve the required results in a course must either repeat it successfully or complete a substitute course approved by their department. For students who fail prerequisite courses which are offered only in the Fall or Winter, the department responsible may, in appropriate cases, arrange "reading courses" during the other term or during the Summer months. Such courses taken during a Fall or Winter term constitute a normal part of the candidate's work load. If the student is on probation, these courses must be included in the workload reduction.

8.3.5.8 Reassessment and Reread of a Grade

In accordance with the Charter of Student Rights, and subject to the conditions stated therein, students have the right to consult any written submission for which they have received a mark and the right to discuss this submission with the examiner. If, after discussion with the instructor, a student decides to request a formal re-read of a final exam, the student must apply in writing, complete the Reread form and submit it to the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre. The following conditions apply:

- requests for rereads in more than one course per term will not be accepted, unless permission is given by the Faculty of Engineering;
- grades may be either raised or lowered as the result of a reread;
- rereads in courses not in the Faculty of Engineering are subject to the deadlines, rules and regulations of the relevant faculty;
- any request to have term work re-evaluated must be made directly to the instructor concerned.

The deadlines to make an application for a formal reread of a final exam are:
- the last working day of March for Fall courses,
- the last working day of July for Winter courses, and
- the last working day of November for Summer courses.

A $35 fee for each reread will be assessed directly to the student’s McGill account if the result remains the same or is lowered. If the grade is increased, no charge is made.

For further information, students may consult the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre.

8.3.5.9 Examination Regulations

For information regarding the Faculty of Engineering examination regulations and procedures, please refer to the Engineering Website at www.mcgill.ca/engineering.

8.3.5.10 Supplemental Examinations

Courses administered by the Faculty of Engineering do not have supplemental examinations; however, Engineering students may be eligible to write supplemental examinations in courses administered by the Faculties of Arts and Science (i.e., typically Humanities and Social Science courses and freshman (U0) courses). The following conditions apply:

- students must be in satisfactory or probationary standing;
- students are permitted to write a supplemental for courses in which they have received a mark of D, F, J or U;
- students must write the supplemental exam at the time of the next supplemental examination period;
- special permission of the Associate Dean, Student Affairs, Faculty of Engineering, is required if a student wishes to write supplemental exams totalling more than eight (8) credits;
- only one supplemental examination is allowed in a course;
- the supplemental result may or may not include the same proportion of class work as did the original grade. The instructor will announce the arrangements to be used for the course by the end of the course change period;
- the format of the supplemental examination (e.g., multiple-choice or essay questions) will not necessarily be the same as the format for the final examination, so students should consult the instructor about the format of the supplemental;
- the supplemental result will not erase the grade originally obtained; both the original mark and the supplemental result will be calculated in the CGPA;
- in courses in which both a supplemental examination and additional work are available, the student may choose the additional work or the examination or both; where both are written, only one supplemental mark will be submitted, reflecting marks for both the supplemental examination and the additional work;
- additional credit will not be given for a supplemental exam where the original grade for the course was a D and the student already received credit for the course;
- no supplemental examinations are available for students who fail to achieve satisfactory grades in a course with a deferred examination.

The supplemental examination period for Fall courses is during the months of April and May, and for Winter courses and courses spanning Fall/Winter during the last week of August. It is the student’s responsibility to confirm the date and time of the supplemental exam. Supplemental exam applications are available on our Website at www.mcgill.ca/engineering/student/policies/exam/supplements or are available from the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre.
The deadline for submission of applications is March 1st for Fall courses and July 15th for Winter courses and courses spanning Fall/Winter terms. There is a $35 non-refundable fee for each supplemental exam, payable at the time of the application and charged directly to the students McGill account.

Students should consult the Faculty of Engineering, Student Affairs Office for more information.

### 8.3.5.11 Deferred Examinations

Students who have missed a final examination due to illness or family affiliation must submit the following documentation to the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre:

- an original medical certificate or other documentation that covers the date of the missed examination, and the nature and duration of the illness;
- a completed Deferral Request Form;
- a detailed letter justifying the request for a deferral.

Students must also attest that they have completed all coursework up to date, which will be verified with the instructor(s). The Faculty of Engineering, Student Affairs Office in the Engineering Student Centre must be informed of the reasons for absences from final examination no later than one week after the date of the final examination that was missed.

A student’s signature on the Deferral Request Form will allow the Faculty to verify the authenticity of the medical certificate and the nature of the illness, or any other documentation provided. If the form is not signed, it will result in the assignment of a J grade in the course.

If a student becomes ill during a formal examination, he/she must inform the invigilator as soon as possible. If necessary, the student will be escorted to the Health Services. As stated above, the student must return to the Faculty of Engineering, Student Affairs Office in the Engineering Student Centre with medical certification within one week of the exam. IMPORTANT: If a student completes the exam in routine fashion, the grade received CANNOT be changed.

Students are advised that deferrals are granted ONLY for compelling reasons. If the request for deferral is denied by the Associate Dean Student Affairs the student will receive a “J” grade (absent) in the course. For the purpose of calculating GPAs and CGPAs, the grade of “J” is treated as an “F” (failed, 0%). Students will be contacted regarding the approval of a deferral via e-mail at their McGill e-mail address or Uniform Email Address (UEA) provided by the University.

Students granted a deferral will be given an “L” grade which will be replaced by a “J” should the students miss the next deferred or regular examination in the course, whichever occurs first. Please note that you are ONLY allowed to write the final exam for the course in which you have been granted a deferral. You are NOT allowed to redo any portion of the coursework such as assignments, projects, labs, midterms, quizzes, etc. without the prior explicit permission of the Associate Dean, Student Affairs. Such permission is only granted in exceptional circumstances, which you can request by providing a detailed justification of your reasons in a letter to the Associate Dean.

If a deferral is granted, the maximum number of courses that a student may register for will be limited to ensure that no more than 18 credits of course work are to be satisfied in a single term or no more than 6 exams are to be written, whichever is greater. This will provide a student with sufficient time during the term and the exam period to properly prepare for deferred examinations. For further information, refer to section 3.6.2.2 “Deferred Examinations”.

In courses offered by the Faculty of Engineering, students granted a deferral must write the examination the next time the course is given.

In courses offered by the Faculty of Management, students granted a deferral must write the examination the next time the course is given.

In courses offered by the Faculties of Arts and Science, students granted a deferral must write the examination during the next supplemental/deferred examination period.

### 8.4 Degrees and Programs Offered

#### 8.4.1 CO-OP Programs

- Materials Engineering, page 242
- Mining Engineering, page 243

#### 8.4.2 Major Programs

- Architecture (B.Sc.), page 230
- Chemical Engineering (B.Eng.), page 231

Fax: (514) 398-7372
Website: [www.mcgill.ca/architecture](http://www.mcgill.ca/architecture)

**Director — David Covo**

**Emeritus Professors**

- Derek Drummond; B.Arch.(McG.), F.R.A.I.C., O.A.A.(William C. Macdonald Emeritus Professor of Architecture)
Professors
Annamarie Adams; B.A.(McG.), M.Arch., Ph.D.(Calif., Berk.), M.R.A.I.C. (William C. Macdonald Professor of Architecture)

Associate Professors
Lambert, Seymour Levine, Rosanne Moss, Joanna Nash, Harry Émond, Miguel Escobar, Julia Gersovitz, Pierre Jampen, Phyllis Cameron Charlebois, Howard Davies, Georges Drolet, François Adjunct Professors
Nik Luka; B.A.A.(Ryerson), M.Arch.(Laval), Ph.D.(Tor.), M.C.I.P.

Assistant Professor
Pieter Sijpkes; B.Sc.(Arch.), B.Arch.(McG.)

Adjunct Professors
Cameron Charlebois, Howard Davies, Georges Drolet, François Émond, Miguel Escobar, Julia Gersovitz, Pierre Jampen, Phyllis Lambert, Seymour Levine, Rosanne Moss, Joanna Nash, Harry Parnass, Mark Poddubniuk, Louis Pretty, Christoph Reinhart, Conor Sampson, Samson Yip, Jozef Zorko

Faculty Lecturer
Julia Bourke

Course Lecturers

Research Associates
Jim Donaldson, Rafik Salama

Associate Member
Howard Shubert

Senior Critic
Dan Hanganu

Visiting Critics and Lecturers
Each year visitors are involved in the teaching of certain courses as critics and lecturers. These visitors change from year to year. In 2006, they were:

ARCHITECTURAL CERTIFICATION IN CANADA
In Canada, all provincial associations recommend a degree from an accredited professional degree program as a prerequisite for licensure. The Canadian Architectural Certification Board (CACB), which is the sole agency authorized to accredit Canadian professional degree programs in architecture, recognizes two types of accredited degrees: the Bachelor of Architecture and the Master of Architecture. A program may be granted a five-year, three-year, or two-year term of accreditation, depending on its degree of conformance, with established educational standards.

Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Since all provincial associations in Canada recommend any applicant for licensure to have graduated from a CACB-accredited program, obtaining such a degree is an essential aspect of preparing for the professional practice of architecture. While graduation from a CACB-accredited program does not assure registration, the accrediting process is intended to verify that each accredited program substantially meets those standards that, as a whole, comprise an appropriate education for an architect.

PROGRAMS OF STUDY
McGill’s professional program in architecture is structured as a four-and-a-half-year, or nine-term, course of study divided into two parts.

The first part, for students entering with the Diploma of Collegial Studies in Pure and Applied Science or the equivalent, is a six-term design program leading to a non-professional degree, Bachelor of Science (Architecture). [Most students from outside Quebec are admitted to an eight-term B.Sc.(Arch.) program and enter a first year which includes courses outlined in section 8.3.1.3 “Architecture – Basic Science Requirements for Students Entering from Outside Quebec.”]

The second part, for students with the McGill B.Sc.(Arch.) degree, is a one-and-a-half-year, or three-term, program leading to the Master of Architecture (Professional) degree. The M.Arch. (Professional) degree is accredited by the Canadian Architectural Certification Board (CACB), and is recognized as accredited by the National Council of Architectural Registration Boards (NCARB) in the USA.

Students in the B.Sc.(Arch.) program who intend to proceed to the professional degree must satisfy certain minimum requirements including:
1. complete the B.Sc.(Arch.) degree, including the series of required and complementary courses stipulated for professional studies, with a minimum CGPA of 3.00;
2. submit a portfolio of work executed in the sequence of six design studios, as well as samples of professional and personal work;
3. complete the minimum period of relevant work experience according to the current Work Experience Guidelines.

Further information on the M.Arch. (Professional) program is available at www.mcgill.ca/architecture.

Student Exchanges
A limited number of qualified students may participate in an exchange with schools of architecture at other universities which have agreements with the McGill School of Architecture, for a maximum of one term in the second year of the B.Sc.(Arch.) program. These include: Università Iuav di Venezia, Venice, Italy; Fakultät für Raumplanung und Architektur, Technische Universität Wien, Vienna, Austria; Institut Supérieur d'Architecture, Saint-Luc Bruxelles, Brussels, Belgium; École Nationale Supérieure d'Architecture de Grenoble, Grenoble, France; École Nationale Supérieure d’architecture de Clermont-Ferrand, Clermont-Ferrand, France; Facoltà di Architettura Civile Politecnico di Milano (Bovisa); Universidad Nacional Autonoma de Mexico, Facultad de Arquitectura; Tecnológico de Monterrey (Campus Monterrey), Departamento de Arquitectura; Ball State University, Department of Landscape Architecture; University of Texas at Austin, IC* Institute; The Royal Danish Academy of Fine Arts, School of Architecture.
ANCILLARY ACADEMIC FACILITIES

Laboratories and Workshops
Architectural Workshops – David Speller, Technician
Communications Laboratory, including Photo Lab – Carrie Henzie, Media Technician
Computers in Architecture Laboratories – Professor Robert Mellin
Building Science Resource Centre – Dr. Avi Friedman

Library
Blackader-Lauterman Library of Architecture and Art, located in the Redpath Library – Marilyn Berger

Collections
Visual Resources Collection, including slides, film, video and other materials – Dr. Annmarie Adams
The John Bland Canadian Architecture Collection, housed in the Blackader-Lauterman Library – Ann Marie Holland, Preservations Librarian.
Orson Wheeler Architectural Model Collection – Ann Marie Holland

Materials Resource Centre – Dr. Avi Friedman

CURRICULUM FOR THE B.Sc.(Arch.) DEGREE

Current information on program structure and courses is posted on the School of Architecture Website at www.mcgill.ca/architecture.

REQUIRED COURSES

Non-Departmental Subjects
CIVE 294 Structural Engineering Basics 4
CIVE 385* Structural Steel and Timber Design 3
CIVE 388* Foundations and Concrete Design 3
CIVE 492* Structures 2
FACC 220 Law for Architects and Engineers 3 15

* Candidates intending not to proceed to the M.Arch. (Professional) degree may substitute other courses of equal total weight for any of these.

Architectural Subjects
ARCH 201 Communication, Behaviour and Architecture 6
ARCH 202 Architectural Graphics and Design Elements 6
ARCH 217 Freehand Drawing 1 1
ARCH 218 Freehand Drawing 2 1
ARCH 240 Organization of Materials in Building 3
ARCH 241 Architectural Structures 3
ARCH 242 Digital Representation 2
ARCH 250 Architectural History 1 3
ARCH 251 Architectural History 2 3
ARCH 303 Design and Construction 1 6
ARCH 304 Design and Construction 2 6
ARCH 321 Freehand Drawing 3 1
ARCH 322 Freehand Drawing 4 1
ARCH 324 Sketching School 1 1
ARCH 354 Architectural History 3
ARCH 355 Architectural History 4
ARCH 375 Landscape 2
ARCH 377 Energy, Environment and Buildings 3
ARCH 405 Design and Construction 3 6
ARCH 406 Design and Construction 4 6
ARCH 447 Lighting 2
ARCH 451 Building Regulations and Safety 2 70

COMPLEMENTARY COURSES

Students must complete 9 credits of architectural complementaries, from the following list in order to qualify for the B.Sc.(Arch.) degree.
ARCH 318 Design Sketching 3
ARCH 319 The Camera and Perception 3
ARCH 350 The Material Culture of Canada 3
ARCH 352 Art and Theory of House Design 3

ARCH 363 Structure, Organization and Form 2
ARCH 372 History of Architecture in Canada 2
ARCH 378 Site Usage 3
ARCH 379 Summer Course Abroad 4
ARCH 383 Geometry/Architecture/Environment 3
ARCH 388 Introduction to Historic Preservation 2
ARCH 461 Freehand Drawing and Sketching 1
ARCH 471 Computer-Aided Building Design 2
ARCH 490 Selected Topics in Design 2
ARCH 512 Architectural Modelling 3
ARCH 514 Community Design Workshop 3
ARCH 515 Sustainable Design 3
ARCH 520 Montreal: Urban Morphology 3
ARCH 521 Structure of Cities 3
ARCH 522 History of Domestic Architecture in Quebec 3
ARCH 523 Significant Texts and Buildings 3
ARCH 524 Seminar on Architectural Criticism 3
ARCH 525 Seminar on Analysis and Theory 3
ARCH 526 Philosophy of Structure 3
ARCH 527 Civic Design 3
ARCH 528 History of Housing 3
ARCH 529 Housing Theory 3
ARCH 531 Architectural Intentions Vitruvius - Renaissance 3
ARCH 532 Origins of Modern Architecture 3
ARCH 533 New Approaches to Architectural History 3
ARCH 534 Architectural Archives 3
ARCH 540 Selected Topics in Architecture 1 3
ARCH 541 Selected Topics in Architecture 2 3
ARCH 554 Mechanical Services 2
ARCH 555 Environmental Acoustics 2
OCC 1442 Enabling Environments 2

ELECTIVE COURSES

6 credits must be completed outside the School of Architecture, subject to approval by the Student adviser.

TOTAL 100

Sasha Omanovic; B.Sc., Ph.D.(Zagreb)
acquaint a broad, balanced education in the natural sciences. In chemical engineering, students complete a variety of courses that will provide a solid foundation in the field. The central purpose of engineering is to design solutions to technological problems that are typically found in the "chemical process industries", which include the chemical manufacturing, plastics, water treatment, pulp and paper, petroleum refining, ceramics, and paint industries as well as substantial portions of the food processing, textile, nuclear energy, biochemical and pharmaceutical industries. The technological problems and opportunities in these industries are often closely linked to social, economic and environmental concerns. For this reason, practitioners of chemical engineering often deal with these questions when they are working in management, pollution abatement, product development, marketing and equipment design.

The discipline of chemical engineering is distinctive in being based equally on physics, mathematics and chemistry. Application of these fundamental sciences is basic to a quantitative understanding of the process industries. Those with an interest in the fourth major science, biology, will find several courses in the chemical engineering curriculum which integrate aspects of the biological sciences relevant to process industries such as food processing, fermentation and water pollution control. Courses on the technical operations and economics of the process industries are added to this foundation. The core curriculum concludes with process design courses taught by practising design engineers. Problem-solving, experimenting, planning and communication skills are emphasized in courses throughout the core curriculum.

By means of complementary courses, students can also obtain further depth in technical areas and breadth in non-technical subjects. Some students elect to complete a minor in biotechnology, management, materials engineering, computer science, environmental engineering or chemistry.

The solution to many environmental problems requires an understanding of technological principles. A chemical engineering degree provides an ideal background. In addition to relevant material learned in the core program, a selection of environmental engineering courses is available. The involvement of many chemical engineering staff members in environmental research provides the opportunity for undergraduate students to carry out research projects in this area.

The curriculum also provides the preparation necessary to undertake postgraduate studies leading to the M.Eng. or Ph.D. degrees in chemical engineering. Students completing this curriculum acquire a broad, balanced education in the natural sciences with the accent on application. Thus, for those who do not continue in chemical engineering, it provides an exceptionally balanced education in applied science. For others, it will form the basis of an educational program that may continue with a variety of studies such as business administration, medicine or law. Versatility is, then, one of the most valuable characteristics of the graduate of the chemical engineering program.

ACADEMIC PROGRAM

For those who have completed the Quebec CEGEP-level program in Pure and Applied Sciences, the Chemical Engineering Program comprises 111 credits as outlined below. Certain students who take advantage of summer session courses can complete the departmental programs in three calendar years. Students who have passed Chemistry 202 or 302 at the CEGEP level may be exempt from course CHEM 212 or CHEM 234, respectively (Introductory Organic Chemistry 1 and Selected Topics in Organic Chemistry), the corresponding courses are transferred from required courses to electives.

For appropriately qualified high school graduates from outside Quebec, an extended credit program is available, as described in section 8.3.4 "Basic Science Requirements for Students Entering from Outside Quebec".

In some cases students from university science disciplines have sufficient credits to complete the requirements for the B.Eng. (Chemical) program in two years. Those concerned should discuss this with their adviser.

Students must obtain a C grade or better in all core courses. For the Department of Chemical Engineering, core courses include all required courses (departmental and non-departmental) as well as complementary courses (departmental).

COMPLEMENTS COURSES

Courses to be selected from those approved by the Department (see list of technical complements below)

Two courses (6 credits), selected from an approved list: one course on the impact of technology on society and one in the humanities and social sciences, administrative studies and law. See section 8.3.4 “Complementary Studies” for further information.

TOTAL

For students starting their B.Eng. studies in September who have completed the Quebec Diploma of Collegial Studies, a program for the first two terms of study is given below:

<table>
<thead>

McGill University, Undergraduate Programs 2007-2008
MATH 262 Intermediate Calculus 3
MIME 221 Engineering Professional Practice 2 17

TERM 2
CHEE 204 Chemical Manufacturing Processes 3
CHEE 220 Chemical Engineering Thermodynamics 3
CHEM 234 Topics in Organic Chemistry 3
COMP 208 Computers in Engineering 3
MATH 263 Ordinary Differential Equations and Linear Algebra 3 15

Students entering their second year of study or who are starting in January must plan their program of studies in consultation with their Departmental adviser.

Additional information can be found on the Faculty Website at www.mcgill.ca/engineering, as well as in section 8.3.1.2 “Basic Science Requirements for Students Entering from Outside Quebec”.

TECHNICAL COMPLEMENTARIES

A minimum of 9 credits of complementary courses must be chosen from a list of technical complementaries approved by the Department. The purpose of this requirement is to provide students with an area of specialization within the broad field of chemical engineering. Alternatively, some students use the technical complementaries to increase the breadth of their chemical engineering training.

At least two (2) technical complementary courses are to be selected from those offered by the Department (list below). Permission is given to take the third complementary course from other suitable undergraduate courses in the Faculty of Engineering.

The Technical Complementary courses currently approved by the Department are as follows:

BIOT 505 Selected Topics in Biotechnology
   (Biotechnology Minor students only)
CHEE 363 Projects Chemical Engineering 1
CHEE 438 Engineering Principles in Pulp and Paper Processes
CHEE 452 Particulate Systems
CHEE 458 Computer Applications
CHEE 464 Projects in Chemical Engineering 2
CHEE 487 Chemical Processing Electronics Industry
CHEE 494 Research Project and Seminar 1
   or CHEE 495 Research Project and Seminar 2
   or CHEE 496 Environmental Research Project
CHEE 541 Electrochemical Engineering
CHEE 543 Plasma Engineering
CHEE 563 Biofluids and Cardiovascular Mech.
   or MECH 563 Biofluids and Cardiovascular Mech.
CHEE 571 Small Computer Applications: Chemical Engineering
CHEE 582 Polymer Science & Engineering
CHEE 584 Polymer Processing
CHEE 591 Environmental Bioremediation
CHEE 592 Industrial Air Pollution Control
   or MECH 534 Air Pollution Engineering
CHEE 593 Indus Water Pollution Control
   or CIVE 430 Water Treatment and Pollution Control
CHEE 594 Bio colloids in Environmental Systems
CHEE 595 Energy Recovery, Use, & Impact

Courses CHEE 582 and CHEE 584 comprise a Polymeric Materials sequence. Additional courses in this area are available in the Chemistry Department (e.g., CHEM 455) or at the graduate level (CHEE 681 to CHEE 684). The Department has considerable expertise in the polymer area.

Courses CHEE 370 and CHEE 474 make up a sequence in Biochemical Engineering-Biotechnology. Students interested in this area may take additional courses, particularly those offered by the Department of Food Science and Agricultural Chemistry, Faculty of Agricultural and Environmental Sciences, and courses in biochemistry and microbiology. The food, beverage and pharmaceutical industries are large industries in the Montreal area and these courses are relevant to these industries and to the new high-technology applications of biotechnology.

The third area in which there is a sequence of courses is Pollution Control. The Department offers three courses in this area: CHEE 591 CHEE 592, and CHEE 593. As some water pollution control problems are solved by microbial processes, course CHEE 474 is also relevant to the pollution control area. Likewise, the solution to pollution problems frequently involves removal of particulate matter from gaseous or liquid streams, course CHEE 452 is also relevant. Additional courses in this area are listed under section 8.6.8 “Environmental Engineering Minor”.

A Minor in Biotechnology is also offered in the Faculties of Engineering and of Science with emphasis on Molecular Biology and Chemical Engineering Processes. A full description of the program appears in section 8.6.3 “Biotechnology Minor”.

Note that many of the technical complementaries are offered only in alternate years. Students should, therefore, plan their complementaries as far ahead as possible. With the approval of the instructor and academic adviser, students may take graduate (CHEE 500-level) courses as technical complementaries.

ELECTIVE COURSES

Students who have obtained exemptions for courses, i.e., for CEGEP courses equivalent to CHEM 212 or CHEM 234, or who take more than the minimum requirements for the degree, may choose university-level courses in any field. Approval of an elective course requires only that no timetable conflicts are created and that it not be a repetition of material already covered in the curriculum or already mastered by the student.

CURRICULUM COMMITTEE

The Curriculum Committee is composed of three students, elected by their classes, and two staff members. This Committee provides a forum for all matters involving undergraduate student/staff interactions. While the primary concern is with matters of curriculum and courses (their content, evaluation, scheduling, etc.), the Committee has also taken up a number of other matters in recent years, e.g., working space, facilities (equipment and libraries), etc.

CANADIAN SOCIETY FOR CHEMICAL ENGINEERING

The Chemical Engineering Student Society has for many years been affiliated both with the CScHE (Canadian Society for Chemical Engineering) and with the AIChE (American Institute of Chemical Engineers). For a nominal fee students receive Canadian Chemical News, a monthly publication, and the AIChE Student Members Bulletin as well as other privileges of student membership in the two societies. The student chapter also organizes a series of local social, educational and sporting events. For example, recent events have included student-professor banquets and Christmas parties, dances, speakers, broomball games and joint meetings with the Montreal Section of the CScHE. The latter gives students a chance to mix with practising chemical engineers.

8.5.3 Department of Civil Engineering and Applied Mechanics

Macdonald Engineering Building, Room 492

ENGINEERING – CIVIL ENGINEERING AND APPLIED MECHANICS

Professors
Vladimir H. Chu; B.S.Eng.(Taiwan), M.A.Sc.(Tor.), Ph.D.(MIT), Eng.
James Nicell; B.A.Sc., M.A.Sc., Ph.D.(Windsor), P.Eng. (William Dawson Scholar)
Suresh C. Shrivastava; B.Sc.(Eng.) (Vikram), M.C.E.(Del.), Sc.D.(Col.), Eng.

Associate Professors
Susan J. Gaskin; B.Sc.(Qu.), Ph.D.(Cant.)
Ronald Gehr; B.Sc.(Eng.)(Rand), M.A.Sc., Ph.D.(Tor.), P.Eng.
Subhash Ghoshal; B.C.E.(Jadavpur), M.S.(Missouri), Ph.D.(Carn. Mill.), Associate Dean (William Dawson Scholar)
Ghyslaine Morin; B.Eng.(Montr.), S.M.C.E.(MIT), Ph.D.(Montr.), Eng., Graduate Program Director
Colin Rogers; B.A.Sc., M.A.Sc.(Wat.), Ph.D.(Syd.), P.Eng.
Yixin Shao; B.S., M.S.(Tongji), Ph.D.(N'western), P.Eng., Undergraduate Program Director

Assistant Professors
Andrew J. Boyd; B.Sc.(Eng.)(New Br.) M.A.Sc.(Tor.), Ph.D.(Br. Col.)
Dominic Frigon; B.Sc.(Agr.Sci.)(McG.), M.Sc.(McG.), PhD. (Env.Sci.(III))
Mohamed Abdel-Meguid; B.Sc(Cairo, Azhar), M.Sc., Ph.D.(W. Ont.)

Adjunct Professors

Civil engineers have traditionally applied scientific and engineering knowledge to the task of providing the built environment, from its conception and planning to its design, construction, maintenance, and rehabilitation. Examples include buildings, bridges, roads, railways, dams, and facilities for water supply and treatment, and waste disposal. With the aging and deterioration of an already vast infrastructure, its maintenance and rehabilitation has become an increasingly important role of the civil engineering profession. Also, with worldwide concern about the detrimental impact of human activities on the environment, civil engineers are now in the forefront of developing and providing the means for both prevention and remediation of many aspects of environmental pollution.

The program in Civil Engineering is comprehensive in providing the fundamentals in mechanics and engineering associated with the diverse fields of the profession, in offering choices of specialization, and in fully reflecting the advances in science, mathematics, engineering and computing that have transformed all fields of engineering in recent years. The resulting knowledge and training enables graduates to not only enter the profession thoroughly well prepared, but also to adapt to further change.

The required courses ensure a sound scientific and analytical basis for professional studies through courses in solid mechanics, fluid mechanics, soil mechanics, environmental engineering, water resources management, structural analysis, systems analysis and mathematics. Fundamental concepts are applied to various fields of practice in both required and complementary courses.

By a suitable choice of complementary courses, students can attain advanced levels of technical knowledge in the specialized areas mentioned above. Alternatively, students may choose to develop their interests in a more general way by combining complementary courses within the Department with several from other departments or faculties.

Students who wish to extend their knowledge in certain areas beyond the range that the program complementary courses allow can also take a Minor program. Minors are available in fields such as Arts, Economics, Management, Environmental Engineering, and Construction Engineering and Management. These require additional credits to be taken from a specified list of topics relating to the chosen field. Further information on the various Minor programs may be found in section 8.6 "Minor Programs". Details of how the Minors can be accommodated within the Civil Engineering program will be made available at the time of preregistration counselling.

ACADEMIC PROGRAMS

Considerable freedom exists for students to influence the nature of the program of study which they follow in the Department of Civil Engineering and Applied Mechanics. A variety of advanced complementary courses is offered in five main groupings: Environmental Engineering, Geotechnical and Geoenvironmental Engineering, Water Resources and Hydraulic Engineering, Structural Engineering, and Transportation Engineering.

Guidance on the sequence in which required core courses should be taken is provided for students in the form of a sample program which covers the entire period of study. The technical complementary courses selected, usually in the last two terms of the program, will depend upon the student's interests. All students must meet with their adviser each term to confirm the courses for which they are registered.

Courses taken in Term 3 or later will depend on a student's interests and ability. Information and advice concerning different possibilities are made available in the Department prior to registration. All programs require the approval of a staff adviser. Programs for students transferring into the Department with advanced standing will be dependent upon the academic credit previously achieved, and such a program will be established only after consultation with a staff adviser.

COMPLEMENTARY COURSES
A minimum of six credits to be selected from list (a) and the remaining nine credits to be selected from lists (a) or (b) or from other suitable undergraduate or 500-level courses.

(a) Design Technical Complementaries
CIVE 416  (3)  Geotechnical Engineering
CIVE 421  (3)  Municipal Systems
CIVE 428  (3)  Water Resources and Hydraulic Engineering
CIVE 430  (3)  Water Treatment and Pollution Control
CIVE 462  (3)  Design of Steel Structures
CIVE 463  (3)  Design of Concrete Structures

(b) General Technical Complementaries
CIVE 433  (3)  Urban Planning
CIVE 440  (3)  Traffic Engineering
CIVE 446  (3)  Construction Engineering
CIVE 451  (3)  Geoenvironmental Engineering
CIVE 456  (3)  Environmental Transport Processes
CIVE 470  (3)  Research Project
CIVE 512  (3)  Advanced Civil Engineering Materials
CIVE 526  (3)  Solid Waste Management
CIVE 527  (3)  Renovation and Preservation: Infrastructure
CIVE 540  (3)  Urban Transportation Planning
CIVE 541  (3)  Rail Engineering
CIVE 550  (3)  Water Resources Management
CIVE 551  (3)  Environmental Transport Processes
CIVE 553  (3)  Stream Pollution and Control
CIVE 555  (3)  Environmental Data Analysis
CIVE 570  (3)  Waves and Coastal Engineering
CIVE 572  (3)  Computational Hydraulics
CIVE 573  (3)  Hydraulic Structures
CIVE 574  (3)  Fluid Mechanics of Water Pollution
CIVE 576  (3)  Hydrodynamics
CIVE 577  (3)  River Engineering
CIVE 579  (3)  Water Power Engineering
CIVE 585  (3)  Groundwater Hydrology
CIVE 586  (3)  Earthwork Engineering
CIVE 587  (3)  Pavement Design

Two courses (6 credits), selected from an approved list: one course on the impact of technology on society and one in the humanities and social sciences, administrative studies and law. See section 8.3.4 "Complementary Studies" for further information.

Tal Arbel; M.Eng., Ph.D.(McG.)

The Department of Electrical and Computer Engineering offers undergraduate degree programs in Electrical Engineering, Electrical Engineering (Honours), Computer Engineering, and Software Engineering. All programs provide students with a strong background in mathematics, basic sciences, engineering science, engineering design and complementary studies, in conformity with the requirements of the Canadian Engineering Accreditation Board (CEAB).

The program in Electrical Engineering provides students with a broad understanding of the key principles that are responsible for the extraordinary advances in the technology of computers, micro-electronics, automation and robotics, telecommunications and power systems. These areas are critical to the development of our industries and, more generally, to our economy. A graduate of this program is exposed to all basic elements of electrical engineering and can function in any of our client industries. This breadth is what distinguishes an engineer from, say, a computer scientist or physicist.

The program in Electrical Engineering (Honours) is designed for students who wish to pursue postgraduate work and look to a career in advanced research and development. The technical complementsaries are selected from graduate courses, facilitating the transition to postgraduate studies. Students in this curriculum benefit from smaller classes and have more contact with professorial staff and graduate students. However, the program is quite demanding. Students are expected to register for at least 14 credits per term; they may register for a smaller number only with the permission of the Chair of this Department. Students in the Honours program must maintain a minimum GPA of 3.30. Those who fail to maintain this standard are transferred to the regular program.

The program in Computer Engineering provides students with greater depth and breadth of knowledge in the hardware and software aspects of computers. Students are exposed to both theoretical and practical issues of both hardware and software in well-equipped laboratories. Although the program is designed to meet the growing demands by industry for engineers with a strong background in modern computer technology, it also provides the underlying depth for graduate studies in all fields of Computer Engineering.

The Department also offers a Bachelor of Software Engineering program. This program is currently going through an accreditation process. When complete, graduates of the program will be eligible to apply for registration as professional engineers in Canada. This program offers students the opportunity to focus their studies on the skills needed to design and develop complex software systems. This emerging field of engineering is a major component of the growing Information Technology (IT) sector of the economy, in which the demand for qualified personnel continues to outstrip supply. Graduates of this program will have a solid foundation for careers in the software industry. 

In addition to technical complementary courses, students in all three programs take general complementary courses in social sciences, administrative studies and humanities. These courses allow students to develop specific interests in areas such as psychology, economics, management or political science.

**Entry into the Honours Program**

The Honours program is a limited enrolment program and entry is highly competitive. There is no direct entry to the Honours program in the first year. Students may enter the Honours program in the following ways:

- Students from CEGEP will be admitted, on the basis of their grades, at the start of the third term.
- Students from outside Quebec will be admitted, on the basis of their grades, at the start of the fifth term.

Entry into the Honours programs is highly competitive. There is no direct entry to the Honours program in the first year. Students may enter the Honours program in the following ways:

- Students from CEGEP will be admitted, on the basis of their grades, at the start of the third term.
- Students from outside Quebec will be admitted, on the basis of their grades, at the start of the fifth term.

Though not required to do so, students in the Honours program or wishing to enter the Honours program are encouraged to take the following advanced math and physics courses:

- **MATH 325 Honours Ordinary Differential Equations**
- **MATH 247* Honours Applied Linear Algebra**
- **MATH 264 Advanced Calculus (3)**
- **MATH 271 Linear Algebra and Partial Differential Equations (3)**
- **MATH 248* Honours Advanced Calculus**
- **MATH 281 Complex Variables and Functions (3)**

To remain in the Honours program and to be awarded the Honours degree, a student must have completed at least 14 credits in each term since entering Electrical and Computer Engineering, except for the final two terms of their degree, and maintained a CGPA of at least 3.30 since entering Electrical and Computer Engineering. In either of their final two full terms (i.e., Fall and Winter, or Winter and Fall) students may drop below 14 credits, provided the cumulative total for the two terms is at least 16 credits. For more information, please contact the Departmental office at (514) 398-3943.

**COMPLEMENTARY COURSES**

**Technical Complementaries**  9

Three technical complementary courses (9 credits), which must be ECSE courses at the 500 level (or ECSE 427, ECSE 451).

ECSE 427  Operating Systems  3
ECSE 451  EM Transmission and Radiation  3
ECSE 500  Mathematical Foundadations of Systems  3
ECSE 501  Linear Systems  3
ECSE 504  Sampled Data Control  3
ECSE 505  Nonlinear Control Systems  3
ECSE 506  Stochastic Control & Decision Theory  3
ECSE 507  Optimization and Optimal Control  3
ECSE 508  Multi-Agent Systems  3
ECSE 509  Probability and Random Sig. 2  3
ECSE 510  Stochastic Processes and Systems  3
ECSE 511  Introduction to Digital Communication  3
ECSE 512  Digital Signal Processing 1  3
ECSE 520  Parallel Computing Systems  3
ECSE 521  Digital Communications 1  3
ECSE 523  Speech Communications  3
ECSE 524  Interconnects and Signal Integrity  3
ECSE 525  Computer Architecture  3
ECSE 527  Optical Engineering  3
ECSE 528  Telecommunication Network Architecture  3
ECSE 529  Image Processing and Communication  3
ECSE 530  Logic Synthesis  3
ECSE 532  Computer Graphics  3
ECSE 533  Physical Basis of Semiconductor Devices  3
ECSE 534  Analog Microelectronics  3
ECSE 536  RF Microelectronics  3
ECSE 545  Microelectronics Technology  3
ECSE 548  Introduction to VLSI Systems  3
ECSE 549  Expert Systems in Electrical Engineering  3
ECSE 559  Flexible AC Transmission Systems  3
ECSE 563  Power Systems Operation and Planning  3
ECSE 565  Introduction to Power Electronics  3
ECSE 571  Optoelectronic Devices  3
ECSE 573  Microwave Electronics  3
ECSE 593  Antennas and Propagation  3
ECSE 596  Optical Waveguides  3
ECSE 597  Circuit Simulators  3

**Laboratory Complementaries**  2-3

One course must be chosen from the following list:

ECSE 426  Microprocessor Systems  3
ECSE 431  Introduction to VLSI CAD  3
ECSE 435  Mixed-Signal Test Techniques  3
ECSE 436  Signal Processing Hardware  3
ECSE 435  Electromagnetic Compatibility  3
ECSE 485  IC Fabrication Laboratory  3
ECSE 486  Power Laboratory  3
ECSE 487  Computer Architecture Laboratory  3
ECSE 488  High Frequency Laboratory  3
ECSE 490  Digital Signal Processing Laboratory  3
ECSE 491  Communication Systems Laboratory  3
ECSE 493  Control and Robotics Laboratory  3

**General Complementaries**  6

Two courses (6 credits), selected from an approved list: one course on the impact of technology on society and one in the humanities and social sciences, administrative studies and law. See section 8.3.4 “Complementary Studies” for further information.

**TOTAL CREDITS** 109-110

**CURRICULUM FOR THE B.ENG. DEGREE IN ELECTRICAL ENGINEERING (REGULAR)**

**COMPLEMENTARY COURSES**

**Technical Complementaries**  12

Four courses must be taken from the following list

ECSE 404  Control Systems  3
ECSE 405  Antennas  3
ECSE 411  Communications Systems 1 3
ECSE 412  Discrete Time Signal Processing 3
ECSE 413  Communications Systems 2 3
ECSE 414  Introduction to Telecommunication Networks 3
ECSE 421  Embedded Systems 3
ECSE 422  Fault Tolerant Computing 3
ECSE 423  Fundamentals of Photonics 3
ECSE 424  Human-Computer Interaction 3
ECSE 425  Computer Organization and Architecture 3
ECSE 426  Microprocessor Systems 3
ECSE 427  Operating Systems 3
The Institute for Electrical Power Engineering was recently established at McGill University to provide a comprehensive program and state-of-the-art laboratory facilities, and a point of contact between industry and universities. The Institute sponsors a number of courses and is company-sponsored for students in power engineering, preferably at the Institute or with a company sponsoring the Institute.

Eligibility criteria: To be considered in September 2007, the applicant must:

- be registered in the B.Eng. program (regular Electrical Engineering);
- have a cumulative GPA of at least 2.70;
- have completed or be registered in ECSE 361 (Power Engineering);
- be able to complete the degree requirements by Spring 2008;
- agree to follow the curriculum requirements set out below.

Selection criteria: The number of students selected, expected to be between 5 and 10, will be the subject of a specific agreement between the University and the Institute. Selection criteria to the Institute will be based on CGPA and on the curriculum vitae. The selection process for the scholarship may involve an interview with the committee presided by Hydro-Québec. There is a possibility of an internship with Hydro-Québec.

Curriculum requirements for selected students: Generally, unless the University has authorized specific substitutions, students must complete the degree requirements set out in the 2007-08 Undergraduate Programs Calendar with the following specifications:

Technical Complementaries and Laboratories: All students must take (or have taken) five courses from the following list, for a total of 15 credits.

Compulsory:
- ECSE 464 Power System Analysis 1
- ECSE 465 Power Electronic Systems

And one of the following:
- ECSE 460 Appareillage électrique (Electrical Power Equipment)
- ECSE 468 Electricité industrielle (Industrial Power Systems)

ECSE 469 Protection des réseaux électriques

Courses ECSE 460, ECSE 463, ECSE 467, ECSE 468 and ECSE 469 are taught in French. ECSE 460, ECSE 463, ECSE 464 (Fall semester). ECSE 465, ECSE 467, ECSE 468 and ECSE 469 are courses sponsored by the Institute and taught at Ecole Polytechnique de Montreal.

In addition, students must complete ECSE 474 and 475 (Electrical Engineering Design Projects 1 and 2) on a practical project in power engineering, preferably at the Institute or with a company sponsoring the Institute.

COMPLEMENTARY COURSES

Basic Science Complementary courses (For CEGEP students only) 0-3

Students from CEGEP are required to complete one approved 3 credit courses, 200-level or higher from the following science departments.

Atmospheric and Oceanic Sciences (ATOC)
Chemistry (CHEM)
Earth and Planetary Sciences (EPSC)
Earth System Science (ESYS)
Physics (PHYS)

Technical Complementaries 9

One course must be chosen from List A and 2 courses from List B. The course chosen from List A is meant to enhance the Body of Knowledge while the courses chosen from List B are to provide breadth.

List A
ECSE 424 Human-Computer Interaction 3
ECSE 428 Software Engineering Practice 3
ECSE 431 Introduction to VSLI CAD 3

List B
ECSE 404 Control Systems 3
ECSE 411 Communications Systems 1 3
ECSE 412 Discrete Time Signal Processing 3
ECSE 420 Parallel Computing 3
ECSE 421 Embedded Systems 3
ECSE 422 Fault Tolerant Computing 3
ECSE 429 Software Validation 3
ECSE 436 Signal Processing Hardware 3
ECSE 443 Introduction to Numerical Methods of Electrical Engineering 3
ECSE 450 Electromagnetic Compatibility 3
ECSE 526 Artificial Intelligence 3
ECSE 530 Logic Synthesis 3
ECSE 532 Computer Graphics 3
ECSE 548 Introduction to VLSI Systems 3

Laboratory Complementaries 2

One course must be chosen from the following list. Note that the lab course is intended to strengthen the practical knowledge within one of the BOK core units and as such should complement one of the BOK core unit lecture courses, namely ECSE 334, ECSE 425, or COMP 535 (ECSE 414).

ECSE 434 Microelectronics Laboratory 3
ECSE 487 Computer Architecture Laboratory 3
ECSE 489 Telecommunication Network Lab 3
ECSE 490 Digital Signal Processing Laboratory 3
ECSE 491 Communication Systems Laboratory 3
ECSE 493 Control and Robotics Laboratory 3

General Complementaries 6

Two courses (6 credits), selected from an approved list: one course on the impact of technology on society and one in the humanities and social sciences, administrative studies and law. See section 8.3.4 “Complementary Studies” for further information.

Basic Science Complementary courses (For CEGEP students only) 0-6

Students from CEGEP are required to complete one approved 6 credit courses, 200-level or higher from the following science departments.

Atmospheric and Oceanic Sciences (ATOC)
Chemistry (CHEM)
Earth and Planetary Sciences (EPSC)
Earth System Science (ESYS)
Physics (PHYS)

Technical Complementaries 12 - 14

Students should take 12-14 credits of which 6 credits must be taken from group A and 6-8 credits from group B. It is possible that not all the courses listed will be offered in a given year. Please refer to the up-to-date course assignments before selecting any course. Permission will not be granted to take Technical Complementary courses that are not on this list.

Chair — Arun K. Misra

Emeritus Professors
Abdul M. Ahmed; B.Sc.(Dhaka), M.Eng., Ph.D.(McG.), Eng. (Thomas Workman Emeritus Professor of Mechanical Engineering)

Post-Retirement
Glen Bach; B.Sc.(Alta.), M.Sc.(Birm.), Ph.D.(McG.)

Professors
Bartwai Baliga; B.Tech.(IIT), M.Sc.(Case West.), Ph.D.(Minn.)
Wagdi G. Habashi; B.Eng., M.Eng.(McG.), Ph.D.(C'nell), P.Eng., F.C.A.E., F.A.S.M.E., NSERC-J. Armand Bombardier Industrial Research Chair in Multidisciplinary CFD, Honorary Prof. (Tongji University, Shanghai)
John H.S. Lee; B.Eng.(McG.), M.Sc.(MIT), P.Eng.(McG.), Eng.

Adjunct Professors

Mechanical engineers are traditionally concerned with the conception, design, implementation and operation of mechanical systems. Typical fields of work are aerospace, energy, manufacturing, machinery, and transportation. Because of the very broad nature of the discipline there is usually a high demand for mechanical engineers.

Many mechanical engineers follow other career paths. Graduate studies are useful for the specialists working in research establishments, consulting firms, or in corporate research and development.

To prepare the mechanical engineer for a wide range of career possibilities, there is a heavy stress in our curriculum on the fundamental analytical disciplines. This is balanced by a sequence of experimental and design engineering courses which include practice in design, manufacture and experimentation. In these courses students learn how to apply their analytical groundwork to the solution of practical problems.

Specialist interests are satisfied by selecting appropriate complementary courses from among those offered with a specific subject concentration, such as management, industrial engineering, computer science, controls and robotics, bio-engineering, aeronautics, combustion, systems engineering, etc.

The Department offers an Honours Program which is particularly suitable for those with a high aptitude in mathematics and physics and which gives a thorough grounding in the basic engineering sciences. The complementary courses in this program can be
utilized to take courses with applied engineering orientation, such as those offered in the regular program, or preferred, to obtain an even more advanced education in engineering science.

Concentrations in Aeronautical Engineering, Mechatronics and Design are available for students in either the Regular or Honours programs who wish to specialize in these areas.

While the program is demanding, there is time for many extracurricular activities. Students are active in such professional societies as CASI (Canadian Aeronautics and Space Institute), SAE (Society of Automotive Engineers), and ASME (American Society of Mechanical Engineers) and in various campus organizations.

Relations between faculty and students are extremely close. Social functions, at which students and professors meet to exchange views and get to know each other better, are organized frequently.

CURRICULUM FOR THE B.ENG. DEGREE IN MECHANICAL ENGINEERING (REGULAR)

REQUIRED COURSES COURSE CREDIT

| Non-Departmental Subjects | MECH 201 | Introduction to Mechanical Engineering | 2 |
| Departmental Courses | MECH 210 | Mechanics 1 | 2 |
| | MECH 220 | Mechanics 2 | 4 |
| | MECH 240 | Thermodynamics 1 | 3 |
| | MECH 260 | Machine Tool Laboratory | 2 |
| | MECH 262 | Statistics and Measurement Laboratory | 3 |
| | MECH 289 | Design Graphics | 3 |
| | MECH 292 | Conceptual Design | 3 |
| | MECH 309 | Numerical Methods in Mechanical Engineering | 3 |
| | MECH 314 | Dynamics of Mechanisms | 3 |
| | MECH 315 | Mechanics 3 | 4 |
| | MECH 321 | Mechanics of Deformable Solids | 3 |
| | MECH 331 | Fluid Mechanics 1 | 3 |
| | MECH 341 | Thermodynamics 2 | 3 |
| | MECH 346 | Heat Transfer | 3 |
| | MECH 362 | Mechanical Laboratory 1 | 2 |
| | MECH 383 | Applied Electronics and Instrumentation | 3 |
| | MECH 393 | Machine Element Design | 3 |
| | MECH 412 | Dynamics of Systems | 3 |
| | MECH 430 | Fluid Mechanics 2 | 3 |
| | MECH 463D1 | Mechanical Engineering Project | 3 |
| | MECH 463D2 | Mechanical Engineering Project | 3 |

COMPLEMENTARY COURSES

2 courses (6 credits) at the 300 level or higher to be selected from these courses: Microdevices, Microprocessors for Mechanical Systems, Mechanical Design, Microfluidics and Cardiovascular Mechanics, Fluid Flow and Heat Transfer Equipment, Mechanics of Robotic Systems, Optimum Design, Design Theory and Methodology.

TOTAL CREDITS 112

Students entering in September or January must plan their program of studies in accordance with the regulations posted on the Faculty Website at www.mcgill.ca/engineering. After registering, students must consult with their academic adviser.

Additional information can be found in section 8.3.1.2 “Basic Science Requirements for Students Entering from Outside Quebec”.

CURRICULUM FOR THE B.ENG. DEGREE IN MECHANICAL ENGINEERING (HONOURS)

REQUIRED COURSES COURSE CREDIT

| Non-Departmental Subjects | MECH 201 | Introduction to Mechanical Engineering | 2 |
| Departmental Courses | MECH 210 | Mechanics 1 | 2 |
| | MECH 220 | Mechanics 2 | 4 |
| | MECH 240 | Thermodynamics 1 | 3 |
| | MECH 260 | Machine Tool Laboratory | 2 |
| | MECH 262 | Statistics and Measurement Laboratory | 3 |
| | MECH 289 | Design Graphics | 3 |
| | MECH 292 | Conceptual Design | 3 |
| | MECH 309 | Numerical Methods in Mechanical Engineering | 3 |
| | MECH 314 | Dynamics of Mechanisms | 3 |
| | MECH 315 | Mechanics 3 | 4 |
| | MECH 321 | Mechanics of Deformable Solids | 3 |
| | MECH 331 | Fluid Mechanics 1 | 3 |
| | MECH 341 | Thermodynamics 2 | 3 |

| | MECH 463D2 | Mechanical Engineering Project | 3 |

TOTAL CREDITS 112

Students entering in September or January must plan their program of studies in accordance with the regulations posted on the Faculty Website at www.mcgill.ca/engineering. After registering, students must consult with their academic adviser.

Additional information can be found in section 8.3.1.2 “Basic Science Requirements for Students Entering from Outside Quebec”.

FACULTY OF ENGINEERING
COMPLEMENTARY COURSES  24
1 course from the following (3 credits):
To be chosen with the approval of either the thesis supervisor or the coordinator of the Honours Program, when a thesis supervisor has not as yet been secured.
MATH 327 Matrix Numerical Analysis
MATH 381 Complex Variables and Transforms
MATH 417 Mathematical Programming
plus
2 of the following three courses (6 credits):
MECH 546 Finite Element Methods in Solid Mechanics
MECH 562 Advanced Fluid Mechanics
MECH 578 Advanced Thermodynamics
2 courses (6 credits) at the 300 level or higher to be selected from Mechanical Engineering, one of these two courses must be chosen from the following list:
MECH 497 Value Engineering
MECH 498 Interdisciplinary Design Project 1
MECH 499 Interdisciplinary Design 2
MECH 513 Control Systems
MECH 524 Computer Integrated Manufacturing
MECH 526 Manufacturing and the Environment
MECH 528 Product Design
MECH 541 Kinematic Synthesis
MECH 542 Spacecraft Dynamics
MECH 543 Design with Composite Materials
MECH 544 Advanced Processing of Composite Materials
MECH 546 Finite Element Methods in Solid Mechanics
MECH 553 Design and Manufacture of Microdevices
MECH 554 Microprocessors for Mechanical Systems
MECH 555 Design and Manufacture of Microdevices
MECH 557 Mechatronic Design
MECH 561 Biomechanics of Musculoskeletal Systems
MECH 562 Advanced Fluid Mechanics
MECH 563 Biofluids and Cardiovascular Mechanics
MECH 565 Fluid Flow and Heat Transfer Equipment
MECH 566 Fluid-Structure Interactions
MECH 567 Mechanics of Robotic Systems
MECH 568 Advanced Thermodynamics
MECH 569 Advanced Thermodynamics
MECH 572 Introduction to Robotics
MECH 573 Mechanics of Robot Systems
MECH 577 Optimum Design
MECH 578 Advanced Thermodynamics
MECH 593 Design Theory and Methodology

TOTAL CREDITS  112

Students entering in September or January must plan their program of studies in accordance with the regulations posted on the Faculty Website at www.mcgill.ca/engineering. After registering, students must consult with their academic adviser.

Additional information can be found in section 8.3.1.2 “Basic Science Requirements for Students Entering from Outside Quebec”.

LIST OF COMPLEMENTARY COURSES (DEPARTMENTAL)
(Each is 3 credits)
MECH 432 Aircraft Structures
MECH 434 Turbomachinery
MECH 447 Combustion
MECH 474 Selected Topics in Operations Research
MECH 497 Value Engineering
MECH 498 Interdisciplinary Design 1
MECH 499 Interdisciplinary Design 2
MECH 500 Selected Topics in Mechanical Engineering
MECH 501 Special Topics: Mechanical Engineering
MECH 513 Control Systems
MECH 515 Unsteady Gasdynamics 1
MECH 522 Production Systems
MECH 524 Computer Integrated Manufacturing
MECH 526 Manufacturing and the Environment
MECH 528 Product Design

MECH 529 Discrete Manufacturing Systems
MECH 530 Mechanics of Composite Materials
MECH 531 Aeroelasticity
MECH 532 Aircraft Performance, Stability and Control
MECH 533 Subsonic Aerodynamics
MECH 534 Air Pollution Engineering
MECH 537 High-Speed Aerodynamics
MECH 538 Unsteady Aerodynamics
MECH 539 Computational Aerodynamics
MECH 541 Kinematic Synthesis
MECH 542 Spacecraft Dynamics
MECH 543 Design with Composite Materials
MECH 544 Advanced Processing of Composite Materials
MECH 546 Finite Element Methods in Solid Mechanics
MECH 553 Design and Manufacture of Microdevices
MECH 554 Microprocessors for Mechanical Systems
MECH 555 Design and Manufacture of Microdevices
MECH 557 Mechatronic Design
MECH 561 Biomechanics of Musculoskeletal Systems
MECH 562 Advanced Fluid Mechanics
MECH 563 Biofluids and Cardiovascular Mechanics
MECH 565 Fluid Flow and Heat Transfer Equipment
MECH 566 Fluid-Structure Interactions
MECH 567 Mechanics of Robot Systems
MECH 568 Advanced Thermodynamics
MECH 569 Advanced Thermodynamics
MECH 572 Introduction to Robotics
MECH 573 Mechanics of Robot Systems
MECH 577 Optimum Design
MECH 578 Advanced Thermodynamics
MECH 593 Design Theory and Methodology

TYPICAL PROGRAM OF STUDIES FOR REGULAR OR HONOURS
For students starting their B.Eng. studies in September 2004 who have completed the Quebec Diploma of Collegial Studies, a program for the first two terms of study is given below. Students will be advised by the Department whether they should follow Stream A or Stream B.

STREAM A:
Term 1 (Fall)
COMP 208 Computers in Engineering
MATH 262 Intermediate Calculus
MECH 201 Introduction to Mechanical Engineering
MECH 210 Mechanics 1
MECH 260 Machine Tool Laboratory
MIME 221 Engineering Professional Practice

Term 2 (Winter)
MATH 263 Differential Equations
MATH 264 Advanced Calculus
MECH 220 Mechanics 2
MECH 262 Statistics and Measurement Laboratory
MECH 289 Design Graphics

STREAM B:
Term 1 (Fall)
COMP 208 Computers in Engineering
MATH 262 Intermediate Calculus
MECH 201 Introduction to Mechanical Engineering
MECH 210 Mechanics 1
MECH 260 Machine Tool Laboratory
MECH 289 Design Graphics
MIME 221 Engineering Professional Practice

Term 2 (Winter)
MATH 263 Differential Equations
MATH 264 Advanced Calculus
MECH 210 Mechanics 1
MECH 262 Statistics and Measurement Laboratory
MIME 260 Materials Science and Engineering

For all Minors and Concentrations, students should complete a special form available from the Undergraduate Program Secretary indicating their intention to take the Minor or the Concentration.

AERONAUTICAL ENGINEERING CONCENTRATION
Students in this Concentration should take five courses in the area of Aeronautical Engineering.
Complementary Courses

MECH 533 (3) Subsonic Aerodynamics

The remaining three courses are to be chosen from the list below:

MECH 499 Interdisciplinary Design Project 2
MECH 565 (3) Fluid Flow and Heat Transfer Equipment
MECH 539 (3) Computational Aerodynamics
MECH 531 (3) Aeroelasticity
MECH 434 (3) Turbomachinery

All courses must be passed at a level C or better.

Students should also discuss the matter with their adviser and complete a special form indicating their intention to take this Concentration.

DESIGN CONCENTRATION

Students in this Concentration should take five courses in the area of Design, including the completion of an interdisciplinary design project.

Of the five courses, two are required:

MECH 498 Interdisciplinary Design Project 1
MECH 499 Interdisciplinary Design Project 2

The remaining three courses are to be chosen from the list below:

ABEN 412 Machinery Systems Engineering
ARCH 515 Sustainable Design
CHEE 453 Process Design
MECH 497 Value Engineering
MECH 526 Manufacturing and the Environment
MECH 528 Product Design
MECH 530 Mechanics of Composite Materials
MECH 541 Kinematic Synthesis
MECH 543 Design with Composite Materials
MECH 554 Microprocessors for Mechanical Systems
MECH 557 Mechatronics Design
MECH 565 Fluid Flow and Heat Transfer Equipment
MECH 576 Computer Graphics and Geometrical Modeling
MECH 577 Optimum Design
MECH 593 Design Theory and Methodology

MECHATRONICS CONCENTRATION

Students in this Concentration should take six courses in the area of Control, Robotics and/or CAD/CAM. They must take the following four required courses:

MECH 513 Control Systems
MECH 554 Microprocessors for Mechanical Systems
MECH 557 Mechatronic Design
MECH 572 Introduction to Robotics

and two of the following:

MECH 528 Product Design
MECH 541 Kinematic Synthesis
MECH 573 Mechanics of Robotic Systems
MECH 576 Computer Graphics and Geometrical Modelling

8.5.6 Department of Mining, Metals and Materials Engineering

Wong Building, Room 2160
3610 University Street
Montreal, QC H3A 2B2
Website: www.mcgill.ca/minmet

Materials
Telephone: (514) 398-1040 Fax: (514) 398-4492

Mining
Telephone: (514) 398-2215 Fax: (514) 398-7099
find employment in a wide range of industries, including the resource and manufacturing sectors. Students in the CO-OP program benefit from practical learning experience gained from work-term employment in meaningful engineering jobs, as well as non-tangible learning experiences arising from the responsibilities required to obtain and successfully complete the work terms. Regarding Co-op Program fees, an amount of $200 will be billed during 10 consecutive terms for a total amount of $2,000 before graduation. These fees cover expenses directly related to the operation of the Co-op program. Students must register for each of the above-mentioned industrial training courses and pay the associated fees by the Minerva course registration deadlines or late fees will apply.

**Mining Engineering (CO-OP)** McGill, which has the oldest mining engineering program in Canada, has traditionally been known for the excellence of its courses as well as the training it provides in mining technology, mineral economics and mining practice. Graduates in mining engineering are in demand not only in Canada but throughout the world. There have been rapid technical developments in recent years, presenting a challenge to the imaginative student with a strong engineering interest. The Department offers a cooperative program leading to the B.Eng. degree in Mining Engineering. The CO-OP program is offered in collaboration with the Département des génies civil, géologique et des mines at École Polytechnique in Montreal, and includes formal industrial work periods. Students registered at McGill are required to take a series of technical mining courses at École Polytechnique in the latter part of the program. These courses are designated as such in the program outline (Subject Code MPMC).

Students must pay a two-credit course fee for each of the four work terms (MIME 290, 291, 392 and 494). In addition, an amount of $300 will be billed for each work term to cover expenses directly related to the operation of the CO-OP program. Students must register for each work term and pay associated fees by the Minerva registration deadline or else late fees will apply. Before registering in any work term, students must report to the Mining CO-OP coordinator.

**Scholarships**
The Department offers renewable Entrance Scholarships every year, valued at $3,000 each. A substantial number of other scholarships and bursaries are also awarded by the Department as well as by the Canadian Mineral Industry Education Foundation.

**Student Advising**
Students entering the Mining or Materials Engineering programs must plan their schedule of studies in consultation with one of the departmental advisers: Professor Brochu, Ms. Nikki Middlemiss (Materials), Professor Jacques Ouellet (Mining) or Mr. John Mossop (Mining).

Telephone: (514) 398-4075
Fax: (514) 398-8376
E-mail: admissions.planning@mcgill.ca
Website: www.mcgill.ca/urbanplanning

Director — David F. Brown
Emeritus Professor
Jeanne M. Wolfe; B.Sc.(Lond.), M.Sc.(W.Ont.), M.A.(McG.)
Professor
Jane M. Glenn; B.A., LL.B.(Qu.), D. en Droit(Stras.)
Associate Professors
David F. Brown; B.A.(Bishop’s), M.U.P.(McG.), Ph.D.(Sheffield)
Raphaël Fischler; B.Eng. (V. Tech. Eindhoven), M.S. Arch.S.; M.C.P.(MIT), Ph.D.(Calif., Berk.)
Assistant Professors
Madhav G. Badami; B.Tech. (IIT, Madras) M.E.Des.(Calg.), Ph.D.(Br. Col.) (joint appoint. with McGill School of Environment)
Lisa Bornstein; B.Sc.(Calif., Berk.), M.R.P.(C’nell), Ph.D.(Calif., Berk.)
Nik Luka; B.A.(Ryerson), M.Arch.(Laval), Ph.D.(Tor.) (joint appoint. with Architecture)
Instructor
François Dufaux; B.Arch.(Laval), M.U.P.(McG.)
Adjunct Professors
David Farley; B.Arch.(Mcg.), M.Arch., M.C.P.(Harv.)
Mario Polèse; B.A.(CUNY), M.A., Ph.D.(Penn.)
Ray Tomalty; B.A., M.P.A.(Qu.), Ph.D.(Wat.)
Guest Lecturers
Cameron Charlebois, Luc Danielse, Marc Denhez, Miguel Escobar, Andrew Hoffmann, Paul le Cavalier, Damaris Rose, Alain Trudeau, Martin Wexler, etc.

Modern urban planning developed into a profession in the early decades of the 20th century, largely as a response to the appalling sanitary, social and economic conditions of rapidly developing industrial cities. Initially, the disciplines of architecture, landscape architecture, civil engineering and public health provided the nucleus of concerned professionals; beautification schemes and infrastructure works marked the early stages of public intervention in the 19th century. Architects, engineers and public health specialists were joined by economists, sociologists, lawyers and geographers as the complexities of the city's problems came to be more fully understood and public pressure mounted for their solution. Contem-porary urban and regional planning techniques for survey,
analysis, design and implementation developed from an interdisciplinary synthesis of these various fields.

Today, urban planning can be described as the collective management of urban development. It is concerned with the welfare of communities, control of the use of land, design of the built environment, including transportation and communication networks, and protection and enhancement of the natural environment. It is at once a technical and a political process which brings together actors from the public, private and community spheres. Planners participate in that process in a variety of ways, as designers and analysts, advocates and mediators.

McGill University was the first institution in Canada to offer a full-time planning program. An interdisciplinary program was established in 1947, in which students combined a master’s degree in Urban Planning with one in a related field. An autonomous program was established in 1972. It became the School of Urban Planning in 1976.

Students come to the School from diverse backgrounds, the physical sciences, the traditional professions, such as architecture and engineering, and the social sciences. Alumni of the School work as planners and designers at various levels of government, in non-profit organizations and with private consulting firms. Their expertise ranges from historic preservation to transportation planning, from housing development to computer imaging. They devote their efforts in increasing numbers to environmental planning and sustainable development.

The School is a partner in the Montreal Interuniversity Group “Urbanization and Development”, a consortium recognized by CIDA as a Centre of Excellence, which is devoted to the study of urban problems and the formulation of policies in developing regions. Faculty and students collaborate actively with members of other McGill departments, notably Architecture, Geography, Civil Engineering and Law, and with colleagues at other institutions in Canada and abroad.

The objective of the School is to produce qualified professional urban planners for the public, private and not-for-profit sectors. Training is provided at the postgraduate level; the degree offered is the Master of Urban Planning (M.U.P.). Upon completion of the two-year program of studies, graduates are expected to have acquired basic planning skills, a broad understanding of urban issues, and specialized knowledge in a field of their own choice.

The program of study offered by the School is fully recognized by the Ordre des Urbanistes du Québec (O.U.Q.) and the Canadian Institute of Planners (C.I.P.). Graduates can become full members of the O.U.Q. and other provincial planning associations by meeting their respective internship and examination requirements; this, in turn, will make them eligible for membership in the C.I.P. Admission to the American Institute of Certified Planners and other such organizations is also possible on the basis of the M.U.P. degree.

For details of the M.U.P. admission requirements and curriculum, consult the Graduate and Postdoctoral Studies Calendar, available at www.mcgill.ca.

8.6 Minor Programs

Minors are coherent sequences of courses which may be taken in addition to the courses required for the B.Eng. degree. Minor programs normally consist of 18-24 credits, allowing 9-12 credits of overlap with the degree program. The real credit cost to the student is typically 9 to 15 credits, representing one term beyond the full-time degree program. All courses in a Minor program must be passed with a grade of C or better.

Students of the Faculty have a considerable variety of complementary course choices, which fall into the categories of technical and complementary studies. Students should refer to their respective departments for information concerning complementary course selections. Departments also publish, in this Calendar and in separate documents, information regarding the choice of courses. Students should also consult their course advisers.

General information concerning Minors that are designed for students registered in the Faculty of Engineering is listed below. In addition, students are also permitted to register for Minor Concentrations offered through the various departments in the Faculty of Arts. Students are advised to seek approval from the specific department in the Faculty of Arts as well as the Faculty of Engineering.

8.6.1 Arts Minor

Engineering students may obtain a Minor in Arts as part of their B.Eng. degree by satisfying the 24-credit requirement described below. In general, complementary studies courses given in the Faculty of Arts and listed under: (i) “3 credits of studies of the Impact of Technology on Society” and (ii) “the remaining credits to be social science and humanities courses” (see section 8.3.4 “Complementary Studies”) may be used to satisfy some of these requirements. In no case will more than 9 credits taken from these complementary studies requirements be credited towards the Minor in Arts.

Requirements

1. The program must consist of 24 credits as follows:
   a) at least two areas of concentration from within the Faculty of Arts must be chosen, with the minimum number of credits in any one area being 6;
   b) at least 12 credits must be at the 300 or above level.
2. All courses in the Minor program must be passed with a grade of C or better.
3. The selection of courses for the Minor is to be done in consultation with the Associate Director, Ms. Judy Pharo, Faculty of Engineering, Student Affairs Office, Engineering Student Centre, Frank Dawson Adams, Suite 22 or Professor B. Haskel, Political Science.

8.6.2 Biomedical Engineering Minor

The Minor in Biomedical Engineering is intended to allow interdisciplinary preparation by providing access to otherwise unavailable courses in either the basic life sciences or the applied math tools required in the interdisciplinary field of Biomedical Engineering. The Minor consists of 21 - 25 credits as outlined below.

Complementary Introductory Courses in Live Sciences (3-7 credits)

One course from the following list: (equivalents can be approved)

- ANAT 212 Molecular Mechanisms of Cell Function
- BIOL 200 Molecular Biology
- BIOL 201 Cell Biology and Metabolism
- BIOL 212 Molecular Mechanics of Cell Function
- CHEM 212 Introductory Organic Chemistry 1
- PHGY 201 Human Physiology: Control Systems
- PHGY 202 Human Physiology: Body Functions
- PHGY 209 Mammalian Physiology 1
- PHGY 210 Mammalian Physiology 2

Specialization Courses (Minimum of 12 credits)

A minimum of 6 credits must be taken from a department other than the student’s department and at least 1 BMDE course must be selected. These BMDE courses are best taken near the end of the program, when prerequisites are satisfied.

- Artificial Cells and Organs
- BMDE 505 Cell and Tissue Engineering
- PHGY 311 Intermediate Physiology 1
to one area of concentration as grouped. Alternatively, or in addition, courses may be taken from the lists below, in which case at least three courses must be taken from one area of concentration as grouped. * As 18 credits must be applied exclusively to the Minor, approved substitutions must be made for any of the specified courses which are part of the student's main program.

Biomedicine
- ANAT 541 Cell and Molecular Biology of Aging
- EXMD 504 Biology of Cancer
- PATH 300 Human Disease

Chemistry
- CHEM 382 Organic Chemistry: Natural Products
- CHEM 502 Advanced Bio-organic Chemistry
- CHEM 552 Physical Organic Chemistry

Immunology
- ANAT 261 Introduction to Dynamic Histology
- BIOC 503 Immunochemistry
- MIMM 314 Immunology
- MIMM 414 Advanced Immunology
- PHGY 513 Cellular Immunology

Management*
- ECON 208 Microeconomics Analysis and Applications
- MGCR 211 Introduction to Financial Accounting
- MGCR 341 Finance 1
- MGCR 352 Marketing Management 1
- MGCR 472 Operations Management

* These courses may not also be used for a Management Minor, nor for complementary, by Engineering students.

Microbiology
- MIMM 323 Microbial Physiology
- MIMM 324 Fundamental Virology
- MIMM 413 Parasitology
- MIMM 465 Bacterial Pathogenesis
- MIMM 466 Viral Pathogenesis

Molecular Biology (Biology)
- BIOL 300 Molecular Biology of the Gene
- BIOL 314 Molecular Biology of Oncogenes
- BIOL 520 Gene Activity in Development
- BIOL 551 Molecular Biology: Cell Cycle
### 8.6.4 Chemistry/Chemical Engineering Minor

The Departments of Chemistry and Chemical Engineering offer a Minor Program in Chemistry, of particular interest to Chemical Engineering students, and a Minor in Chemical Engineering, of interest to Chemistry students (described under the Faculty of Science). The Minor in Chemistry consists of 25 credits as follows:

1. Required courses, 10 credits: CHEM 212 and CHEM 234 (or CEGEP equivalent) and either CHEM 233 or CHEE 310.
2. At least 15 credits from the following list, two of which must be laboratory courses (* indicates lab). Note that CHEM 212 is a prerequisite for most of the courses listed below, as are CHEM 223 and CHEM 243 or their equivalents, for the physical chemistry courses. If students take CHEM 222* instead of CHEM 234, they will receive credit for one of the two laboratories that are required but they must have a total of 25 Chemistry credits for the Minor.

### 8.6.5 Computer Science Courses and Minor Program

The School of Computer Science offers an extensive range of courses for Engineering students interested in computers. The course explicitly for Engineering students (COMP 208) and other courses in the core of the various Engineering programs are listed below. Descriptions of these and other Computer Science courses can be found on Class Schedule or in the Courses section.

- COMP 202 Introduction to Computing 1
- COMP 208 Computers in Engineering
- COMP 250 Introduction to Computer Science
- COMP 302 Programming Languages and Paradigms

Engineering students may obtain a Minor in Computer Science as part of their B.Eng. degree by satisfying the 24-credit requirement described below. In general, some complementary courses within Engineering departmental programs may be used to satisfy some of these requirements, but the Minor in Computer Science will require at least 12 extra credits from Computer Science (COMP) courses beyond those needed for the B.Eng. degree. Students should consult their departments about the use of complementaries, and credits that can be double counted.

Students should see the Undergraduate Secretary in the Lorne Trottier Building, Room 2060, to obtain the appropriate forms and to make an appointment to see the Minor adviser for approval of their course selection. Forms must be approved before the end of the Add/Drop period of the student’s final term.

For further information, please check the School of Computer Science Website, [www.cs.mcgill.ca](http://www.cs.mcgill.ca).

### Minor in Computer Science for Engineering Students

The program must consist of 24 credits, from courses passed with a grade of C or better, as follows:

#### Required Course (6 credits)

- COMP 206 (3) Introduction to Software Systems
- COMP 302 (3) Programming Languages and Paradigms

#### Complementary Courses (18 credits)

- 3 credits – one of the following courses:
  - COMP 203 (3) Introduction to Computing 2
  - COMP 250 (3) Introduction to Computer Science

- 3 credits – one of the following courses:
  - COMP 273 (3) Introduction to Computer Systems
  - ECSE 221 (3) Introduction to Computer Engineering

### Note:

A. COMP 202 and COMP 208 (compulsory for some Engineering students) do not form part of the Minor.

B. COMP 203 and COMP 250 are considered to be equivalent from a prerequisite point of view, and cannot both be taken for credit.
C. COMP 208 may be taken before COMP 250, however, it cannot be taken for credit in the same term or afterwards.

8.6.6 Construction Engineering and Management Minor

Students in the Faculty of Engineering may obtain a Minor in Construction Engineering and Management by completing 24 to 25 credits chosen from the required and complementary courses listed below. By a careful selection of complementary courses, a Civil Engineering student may obtain this Minor by completing as few as 9 additional credits. Students in other departments would typically require 12 to 15 additional credits to complete the Minor. For further information, contact Professor L. Chouinard at (514) 398-6446, Room 488, Macdonald Engineering Building.

Prerequisites:
CIVE 208 Civil Engineering Systems Analysis
or an equivalent course in Operations Research
CIVE 302 Probabilistic Systems or equivalent
COMP 208 Computers in Engineering or equivalent
MIME 310 Engineering Economy

Requirements:
The 24 to 25 credits listed below must be completed with a grade of C or higher in order to fulfill the requirements of the Minor.

1. Management and Law: 15 credits, as follows:
   FACC 220 (3) Law for Architects and Engineers
   INDR 294 (3) Introduction to Labour-Management Relations
   MGCR 211 (3) Introduction to Financial Accounting
   MGCR 341 (3) Finance 1
   and one of:
   CIVE 324 (3) Construction Project Management
   MECH 472 (3) Case Studies in Project Mgmt

2. Either 3 or 4 credits, as follows:
   a) 4 credits - Any two of the following relating to Building Structures:
      ARCH 447 (2) Lighting
      ARCH 451 (2) Building Regulations and Safety
      ARCH 554 (2) Mechanical Services
      CIVE 492 (2) Structures
   b) 3 credits - One of the following relating to Heavy Construction:
      MIME 322 (3) Rock Fragmentation
      MIME 333 (3) Materials Handling

3. Other Construction-Related Complementaries: 6 credits
   Any two of the following:
   BREE 411 (3) Off-Road Power Machinery
   BUSA 462 (3) Management of New Enterprises
   CIVE 446 (3) Construction Engineering
   CIVE 527 (3) Renovation and Preservation: Infrastructure
   CIVE 586 (3) Earthwork Engineering
   ECSE 461 (3) Electric Machinery
   FINE 445 (3) Real Estate Finance
   MIME 520 (3) Stability of Rock Slopes
   MIME 521 (3) Stability of Underground Openings
   MPMC 321 (3) Mécanique des roches et contrôle des terrains

Total requirement: 24 or 25 credits

8.6.7 Economics Minor

The Minor consists of 18 credits in courses given in the Economics Department. It consists of required courses and complements. In addition, it is presumed that all Engineering students will have a sufficient background in statistics. Engineering Economy, MIME 310, does not form part of this Minor. For more information see the Department of Economics, Room 443, Leacock Building.

Required Courses (9 credits)
ECON 230D1* Microeconomic Theory
ECON 230D2 Microeconomic Theory
ECON 209** Macroeconomic Analysis and Applications

Complementary Courses (9 credits) from:
ECON 225 Economics of the Environment
ECON 302D1 Money and Banking
ECON 302D2 Money and Banking
ECON 303D1 Canadian Economic Policy
ECON 303D2 Canadian Economic Policy
ECON 305 Industrial Organization
ECON 306D1 Labour Economics and Institutions
ECON 306D2 Labour Economics and Institutions
ECON 308 Public Policies Toward Business
ECON 311 United States Economic Development
ECON 313 Economic Development 1
ECON 314 Economic Development 2
ECON 316 The Underground Economy
ECON 321 The Quebec Economy
ECON 326 Ecological Economics
ECON 329 Economics of Confederation
ECON 330D1 Macroeconomic Theory
ECON 330D2 Macroeconomic Theory
ECON 331 Economic Development: Russia and USSR
ECON 335 The Japanese Economy
ECON 337 Introductory Econometrics 1
ECON 344 The International Economy, 1830 - 1914
ECON 345 The International Economy Since 1914
ECON 347 Economics of Climate Change
ECON 348 Urban Economics
ECON 404 Transportation
ECON 405 Natural Resource Economics
ECON 406 Topics in Economic Policy
ECON 408D1 Public Sector Economics
ECON 408D2 Public Sector Economics
ECON 411 Economic Development: A World Area
ECON 416 Topics in Economic Development 2
ECON 420 Topics in Economic Theory
ECON 423D1 International Trade and Finance
ECON 423D2 International Trade and Finance
ECON 426 Labour Economics
ECON 434 Current Economic Problems
ECON 440 Health Economics
ECON 447 Economics of Information and Uncertainty
ECON 467D1 Econometrics - Honours
ECON 467D2 Econometrics - Honours
ECON 525 Project Analysis
ECON 534 Pensions Crisis
ECON 546 Game Theory

Mining Engineering students will be permitted to include Mineral Economics (MIME 526) among these 18 credits.

* Students may, with consent of instructor, take ECON 250D1/ ECON 250D2 Introduction to Economic Theory: Honours, in place of ECON 230D1/ECON 230D2.

** This requirement is waived for students who choose ECON 330D1/ECON 330D2 from the list of complementaries. Students may not take both ECON 209 and ECON 330D1/ ECON 330D2.

8.6.8 Environmental Engineering Minor

The Environmental Engineering Minor is offered for students of Engineering and the Department of Bioresource Engineering (formerly Agricultural and Biosystems Engineering) wishing to pursue studies in this area.

The Minor program consists of 21 credits in courses. Up to a maximum of 12 credits of coursework in the student’s B.Eng. program may double-count with the Minor.

To complete the Minor in Environmental Engineering, students must obtain a grade of C or better in all approved courses in the Minor, and satisfy the requirements of the Minor and of their departmental program.

The Environmental Engineering Minor Program is administered by the Department of Civil Engineering and Applied Mechanics.
Further information may be obtained from Professor Gehr, Room 487, Macdonald Engineering Building.

**Note:** Not all courses listed are offered every year. Students should consult with the department concerned about the courses that are offered in a given year.

**Minor Requirements** (21 credits)
- Introductory course (3 credits minimum) – one of:
  - CHEE 230 (3) Environmental Aspects of Technology
  - CIVE 225 (4) Environmental Engineering

A minimum of 18 credits, either:

- 15 credits* (minimum) Engineering courses and
- 3 credits (minimum) Non-Engineering courses, from the course lists below:

* A minimum of 6 credits must be from outside the student’s principal departmental program. A maximum of 6 credits of research project courses may be counted towards this category provided the project has sufficient environmental engineering content (project proposal requires approval of project supervisor and Coordinator of the Minor).

**OR**

15 credits specified for the section 15.2.2 "Barbados Field Study Semester", provided the project for CIVE/AGRI/URBP 519 Sustainable Development Plans has sufficient environmental engineering content (project proposal requires approval of the Coordinator of the Minor) and

3 credits chosen from the Engineering Course list below, excluding CHEE 496.

### Engineering Course List (Environmental Engineering Minor)

#### Agricultural Engineering (Macdonald Campus)
- **BREE 217 (3)** Hydrology and Water Resources
  - (not open to students who have passed CIVE 323)
- **BREE 322 (3)** Organic Waste Management
- **BREE 416 (3)** Engineering for Land Development
- **BREE 518 (3)** Bio-Treatment of Wastes

#### Chemical Engineering
- **CHEE 351 (3)** Separation Processes
- **CHEE 370 (3)** Elements of Biotechnology
- **CHEE 430 (3)** Technology Impact Assessment (not open to students who have passed WILD 437)
- **CHEE 452 (3)** Particulate Systems (offered in alternate years)
- **CHEE 496 (3)** Environmental Research Project
- **CHEE 591 (3)** Environmental Bioremediation

#### Civil Engineering and Applied Mechanics
- **CIVE 225 (4)** Environmental Engineering
- **CIVE 323 (3)** Hydrology and Water Resources (not open to students who have passed BREE 217)
- **CIVE 421 (3)** Municipal Systems
- **CIVE 430 (3)** Water Treatment and Pollution Control
- **CIVE 451 (3)** Geoenvironmental Engineering
- **CIVE 526 (3)** Solid Waste Management
- **CIVE 550 (3)** Water Resources Management
- **CIVE 553 (3)** Stream Pollution and Control
- **CIVE 555 (3)** Environmental Data Analysis
- **CIVE 572 (3)** Advanced Hydraulics
- **CIVE 574 (3)** Fluid Mechanics of Water Pollution
- **CIVE 577 (3)** River Engineering
- **CIVE 585 (3)** Groundwater Hydrology

#### Mechanical Engineering
- **MECH 343 (3)** Energy Conversion
- **MECH 434 (3)** Turbomachinery
- **MECH 447 (3)** Combustion
- **MECH 525 (3)** Intro. to Nuclear Engineering
- **MECH 526 (3)** Manufacturing and the Environment
- **MECH 534 (3)** Air Pollution Engineering

### Mining, Metals and Materials Engineering
- **MIME 412 (3)** Corrosion and Degradation
- **MIME 451 (3)** Environmental Controls: Met’l Plants
- **MIME 555 (3)** Corrosion and Degradation of Materials
- **MPMC 327 (3)** Hydrogéologie appliquée
- **MPMC 328 (3)** Environnement et gestion des rejets miniers
- **MPMC 422 (3)** Ventilation minière et hygiène du travail

#### Urban Planning
- **URBP 506 (3)** Environmental Policy and Planning

### Non-Engineering Course List (Environmental Engineering Minor)

#### Agricultural Sciences (Macdonald Campus)
- **AEBI 200 (3)** Biology of Organisms
- **AEBI 201 (3)** Biology of Organisms 2
- **AEBI 205 (3)** Principles of Ecology
- **AEPH 510 (3)** Agricultural Micrometeorology
- **ENTO 380 (3)** Food Systems and the Environment
- **MICR 230 (3)** Introductory Microbiology (not open to students who have passed CHEE 370)
- **MICR 331 (3)** Microbial Ecology (not open to students who have passed CHEE 370)
- **MICR 341 (3)** Mechanisms of Pathogenicity
- **SOIL 210 (3)** Principles of Soil Science (not part of the Minor for Agricultural Engineering Students)
- **SOIL 331 (3)** Soil Physics
- **WILD 333 (3)** Physical and Biological Aspects of Pollution
- **WILD 375 (3)** Issues: Environmental Sciences
- **WILD 415 (3)** Conservation Law
- **WILD 437 (3)** Assessing Environmental Impact (not open to students who have passed CHEE 430)
- **WOOD 420 (3)** Environmental Issues: Forestry
- **ZOOL 315 (3)** Science of Inland Waters

#### Anthropology
- **ANTH 206 (3)** Environment and Culture

#### Atmospheric and Oceanic Sciences
- **ATOCC 210 (3)** Introduction to Atmospheric Science (not open to students who have passed GEOG 321)
- **ATOCC 220 (3)** Introduction to Oceanic Sciences

#### Biology
- **BIOL 205 (3)** Biology of Organisms
- **BIOL 208 (3)** Introduction to Ecology
- **BIOL 432 (3)** Limnology
- **BIOL 470 (3)** Lake Management

#### Chemistry
- **CHEM 307 (3)** Analytical Chemistry of Pollutants

#### Earth and Planetary Sciences
- **EPSC 243 (3)** Environmental Geology (not open to students who have passed or will take EPSC 221)
- **EPSC 549 (3)** Groundwater Hydrology

#### Economics
- **ECON 225 (3)** Economics of the Environment
- **ECON 326 (3)** Ecological Economics
- **ECON 347 (3)** Economics of Climate Change

#### Geography
- **GEOG 200 (3)** Geographical Perspectives: World Environmental Problems
- **GEOG 201 (3)** Introductory Geo-Information Science
- **GEOG 203 (3)** Environmental Systems
- **GEOG 205 (3)** Global Change: Past, Present and Future
- **GEOG 302 (3)** Environmental Management 1
- **GEOG 308 (3)** Principles of Remote Sensing
- **GEOG 321 (3)** Climatic Environments (not open to students who have passed ATOC 210)
- **GEOG 404 (3)** Environmental Management 2

#### Law
- **CMPL 580 (3)** Environment and the Law
8.6.9 Minor in Environment

Environmental studies involve the interactions between humans and their natural or technological environment. Environmental problems are frequently comprehensive and complex, and their satisfactory solutions require the synthesis of humanistic, scientific, and institutional knowledge.

The Minor in Environment is offered and administered by the McGill School of Environment (MSE). Inquiries should be directed to Mr. Peter Barry, MSE Program Coordinator, e-mail pete.barry@mcgill.ca or telephone (514) 398-4306.

Since the program comprises a total of 18 credits for the Minor, additional credits beyond those needed for the B.Eng. degree are required. Students wishing to receive the Minor should prepare a program and have it approved by both their regular Engineering adviser and the MSE adviser. For program details, see "Minor in Environment", in section 14.5.

8.6.10 Management Courses and Minor Program

Many engineers begin to assume management functions within a few years of graduation. They can, at this stage, take up the study of economics, behavioural science and other management subjects. Students wishing to include such studies in their undergraduate program can take suitable courses from Engineering and Management as listed below.

Engineering Economy MIME 310 introduces the concept of costs into evaluations of engineering projects and architectural proposals. Prerequisite to entry to this Minor is a grade C or better in MIME 310.

Several additional courses are available, subject to timetable requirements, from the core program of the Desautels Faculty of Management. Other courses from the Management core program have considerable overlap with Engineering courses and thus are available to Engineering students.

Note: Course MGCR 211, a course in statistics, and a course in micro-economics are prerequisite for MGCR 341. If included in the Minor in Management, MGCR 423 should be taken at the end of the program.

Engineering students may obtain a Minor in Management by completing 15 credits of courses from the following list of Desautels Faculty of Management courses with a grade of C or better. Successful completion of this Minor is noted on a student's transcript.

Required Courses (6 credits)
MGCR 211 Introduction to Financial Accounting
MGCR 320 Managing Human Resources

Complementary Courses (9 credits)
3 credits, one of List A:
MGCR 213 Introduction to Management Accounting
MGCR 341 Finance 1
MGCR 373 Operations Research 1
MGCR 382 International Business
3 credits, one of List B:
BUS 426 Management of New Enterprises
or BUSA 465 Technological Entrepreneurship
MGCR 222 Introduction to Organizational Behaviour
MGCR 352 Marketing Management 1
or MRKT 360 Marketing of Technology
MGCR 360 Social Context of Business
MGCR 423 Organizational Policy
3 credits, any available 300- or 400-level Management course (for which the prerequisites, if any, have been met).

An Engineering course deemed equivalent by the Desautels Faculty of Management may be substituted for course MGSC 373. There are three courses in Engineering that qualify: CIVE 208, MECH 474 and MPME 326. It should be noted that MGSC 373 does not count as a technical complementary course.

A student embarking on the Minor must be prepared to take additional credits to the normal Engineering program. The student may choose the non-technical complementary course(s) required in his/her program from list B above, but under no circumstances will more than 6 credits of non-technical complementary courses count towards both the Engineering program and the Minor. Students considering this Minor should consult their adviser or the Faculty of Engineering, Student Affairs Office, Engineering Student Centre, Frank Dawson Adams, Suite 22.

8.6.11 Materials Engineering Minor

Engineering students may obtain a Minor in Materials Engineering by completing 24 credits chosen from the required and complementary courses listed below. By a careful selection of complementary courses, Engineering students may obtain this Minor with a minimum of 15 additional credits. It should be noted that some departments (e.g., Mechanical Engineering) will allow their students to take courses from this list and complete the Minor before graduation. For more information, please contact the coordinator, Prof. J. Szpunar, Room 2M020, Wong Building.

Required Courses (15 credits)
MIME 260 Materials Science and Engineering
or CHEE 380 Materials Science
MIME 367 Electronic Properties of Materials
MIME 465 Ceramic Engineering
CHEE 481 Polymer Engineering
CHEE 484 Materials Engineering

Complementary Courses (9 credits)
Three courses to be chosen from the following list:
CHEE 381 Polymer Technology
CHEE 483 Industrial Rheology
CHEE 487 Chemical Processing Electronics Industry
CHEE 530 Structure and Properties of Paper
CHEM 455 Introductory Polymer Chemistry
ECSE 545 Microelectronics Technology
MECH 530 Mechanics of Composite Materials
MIME 360 Phase Transformations: Solids
MIME 361 Liquid State Processing of Materials
MIME 362 Mechanical Properties
MIME 412 Corrosion and Degradation
MIME 560 Joining Processes
MIME 561 Advanced Materials Design
MIME 563 Hot Deformation of Metals
MIME 564 X-Ray Diffraction Analysis of Materials
MIME 566 Texture, Structure & Properties of Polycrystalline Materials
MIME 569 Electron Beam Analysis of Materials

8.6.12 Mathematics Minor

The Minor in Mathematics for students in the Faculty of Engineering requires satisfactory passes in 24 credits of approved courses in Mathematics not including the following:

MATH 247 (or MATH 223)
MATH 260 (or MATH 262 or MATH 222)
MATH 261 (or MATH 263 or MATH 315 or MATH 325)
MATH 265 (or MATH 264 or MATH 248 or MATH 314)
MATH 266
MATH 270
MATH 319

At least 18 credits must be chosen from the Mathematics and Statistics courses approved for the Mathematics Major or Honours.
program, or from MATH 249, MATH 363, MATH 381, MATH 386. The remaining credits may be chosen from mathematically allied courses.

In addition to an Engineering adviser, each student in the Minor program must have an adviser designated by the Department of Mathematics and Statistics, normally beginning in the U2 year. The selection of courses for the Minor is to be done in conjunction with the Minor adviser. Please consult the Department of Mathematics and Statistics for an adviser.

**8.6.13 Mining Engineering Minor**

Students in Engineering may obtain a minor in Mining Engineering by completing 24 credits chosen from the required and complementary courses listed below.

One of the required courses is a work term for which enrollment may be limited. Interested students should contact the coordinator, Professor J. Ouellet, Room 115, Adams Building.

**Required Courses** (12 credits)

- MIME 200 Introduction to the Minerals Industry
- MIME 291 Industrial Work Period 2
- MIME 313 Mining Science and Technology Seminar
- MIME 322 Rock Fragmentation
- MIME 333 Materials Handling

**Complementary Courses** (12 credits)

Courses to be chosen from the following lists:

**List A: Mining Engineering (minimum 6 credits)**

- MIME 320 Extraction of Energy Resources
- MIME 323 Rock and Soil Mass Characterization
- MIME 325 Mineral Industry Economics
- MIME 341 Introduction to Mineral Processing
- MIME 419 Surface Mining
- MIME 426 Development and Services
- MIME 520 Stability of Rock Slopes
- MIME 521 Stability of Underground Openings
- MIME 526 Mineral Economics

**List B: Mechanical Engineering (maximum 6 credits)**

- MECH 497 Value Engineering
- MECH 554 Microprocessors for Mechanical Systems
- MECH 557 Mechatronic Design
- MECH 572 Introduction to Robotics
- MECH 573 Mechanics of Robotic Systems
- MECH 577 Optimum Design

**List C: Civil Engineering (maximum 6 credits)**

- CIVE 416 Geotechnical Engineering
- CIVE 451 Geoenvironmental Engineering
- CIVE 462 Design of Steel Structures
- CIVE 463 Design of Concrete Structures
- CIVE 527 Renovation and Preservation: Infrastructure

**List D: Chemical Engineering (maximum 6 credits)**

- CHEE 453 Process Design
- CHEE 455 Process Control
- CHEE 484 Materials Engineering

**8.6.14 Physics Minor**

Students in Honours Electrical Engineering may obtain a Minor in Physics as part of their B.Eng. degree by satisfying the 18-credit requirement listed below:

- PHYS 253 Thermal Physics
- PHYS 357 Quantum Physics 1
- PHYS 457 Quantum Physics 2

and at least 9 credits chosen from the following:

- PHYS 332 Physics of Fluids
- PHYS 362 Statistical Mechanics
- PHYS 451 Classical Mechanics
- PHYS 514 General Relativity
- PHYS 551 Quantum Theory
- PHYS 557 Nuclear Physics

**8.6.15 Technological Entrepreneurship Minor**

Engineering students may obtain a minor in Technological Entrepreneurship by completing 6 courses (18 credits) as listed below. Up to two courses (6 credits) may be double-counted for credit towards the Humanities and Social Sciences Complementary Courses.

This Minor is offered jointly by the Faculties of Engineering and Management. It will appeal to those students who have a concept, process or product idea in mind and who want to explore the opportunity of commercializing it. It will also be of interest to students who have a general interest in entrepreneurship and intend to pursue a career in small and medium-sized high technology/ engineering companies.

Students considering this Minor should consult with the Associate Director, Ms. Judy Pharo, Faculty of Engineering, Student Affairs Office, Engineering Student Centre, Frank Dawson Adams, Suite 22.

**Complementary Courses** (18 credits)

- BUSA 465 (3) Technological Entrepreneurship
- FACC 500 (3) Technology Business Plan Design
- FACC 501 (3) Technology Business Plan Project
- MGCR 320 (3) Managing Human Resources
- MGCR 423 (3) Organizational Policy
- MKRT 360 (3) Marketing of Technology
- ORGB 321 (3) Leadership

**8.6.16 Software Engineering Minor**

This Minor will prepare an engineering student for a career in software engineering. It will provide a foundation in basic computer science, computer programming and software engineering practice.

The Minor consists of 24 credits (8 courses). Up to four of the courses (12 credits) may be double-counted for credit towards the B.Eng. degree in Electrical Engineering or Computer Engineering. Students in other programs may double-count up to three courses (9 credits).

Students considering this Minor should consult with the Associate Director, Ms. Judy Pharo, Faculty of Engineering, Student Affairs Office, Engineering Student Centre, Frank Dawson Adams, Suite 22.

**Required Courses** (9 credits)

- ECSE 221 (3) Introduction to Computer Engineering
- ECSE 321 (3) Introduction to Software Engineering
- ECSE 428 (3) Software Engineering Practice

**Complementary Courses** (15 credits)

One course (3 credits), either:

- COMP 203 (3) Introduction to Computing
- or COMP 250 (3) Introduction to Computer Science

At least one course (3 credits) must be selected from the following list of engineering courses:

- CHEE 458 (3) Computer Applications
- CHEE 571 (3) Small Computer Applications: Chemical Engineering
- CIVE 460 (3) Matrix Structural Analysis
- CIVE 550 (3) Water Resources Management
- CIVE 572 (3) Computational Hydraulics
- ECSE 322 (3) Computer Engineering
- ECSE 420 (3) Parallel Computing
ECSE 421 (3) Embedded Systems
ECSE 422 (3) Fault Tolerant Computing
ECSE 424 (3) Human-Computer Interaction
ECSE 427 (3) Operating Systems
ECSE 429 (3) Software Validation
ECSE 526 (3) Artificial Intelligence
ECSE 532 (3) Computer Graphics
MECH 474 (3) Selected Topics in Operations Research
MECH 524 (3) Computer Integrated Manufacturing
MECH 539 (3) Computational Aerodynamics
MECH 545 (3) Advanced Stress Analysis
MECH 576 (3) Computer Graphics and Geometrical Modelling

No more than two courses (6 credits) can be selected from the following list of courses offered by the School of Computer Science:

COMP 302 (3) Programming Languages and Paradigms
COMP 335 (3) Software Engineering Methods
COMP 420 (3) Secondary Storage Algorithms and Data Sources
COMP 421 (3) Database Systems
COMP 424 (3) Topics: Artificial Intelligence 1
COMP 426 (3) Automated Reasoning
COMP 431 (3) Algorithms for Engineers
COMP 538 (3) Person-Machine Communication

9.1.3 The Faculty Then and Now

The Faculty was established in 1968, incorporating the Graduate School of Business with the School of Commerce of the Faculty of Arts and Science, where courses in commerce had been offered since 1906.

Since 1971 the Faculty has been located at the corner of Sherbrooke and McTavish, easily accessible to the community it serves, in the Samuel Bronfman Building, named in honour of the late Mr. Bronfman who, while a Governor of the University, made a donation which was key to its construction.

The Faculty has gained a worldwide reputation as one of Canada’s leading international business schools and attracts top students and faculty members from every continent. The academic programs in Management offer strong international content in conjunction with a variety of functional specializations and include an opportunity for students to participate in exchange programs with many leading universities in Europe, Asia, Australia, the United States and South America. This recognition of the global nature of business was further reflected by the introduction of a Faculty Program in International Management as part of the BCom program in 1997. In November 2005, the Faculty was named in honour of Marcel Desautels, who gave the largest donation to a business school in Canadian history.

9.1.4 Student Affairs Office

The Student Affairs Office provides assistance in interpreting records, including academic information and advice on the following: prerequisites and programs, degree requirements, registration, course change, procedures for withdrawal, deferred exams, supplemental exams, rereads, academic standing, inter-faculty transfer, exchange, year or term away, transfer credits, second programs, second degrees, scholarships, academic advising and graduation.

Special requests can be made, in writing, to the Associate Director. For more information, please refer to our Website at www.mcgill.ca/bcom.

9.2 Faculty Admission Requirements

For information about inter-faculty transfers, please refer to the relevant information posted on the Student Affairs Office Website at www.mcgill.ca/bcom/prospective/interfac-transfer and in the Student Affairs Office.

9.3 General Information

9.3.1 Aims of the BCom Program

The primary objective of the undergraduate program in management is to prepare students for effective professional and managerial careers. At a general level this preparation includes developing in students a capacity for critical thinking, for integrating knowledge across different disciplines, and for utilizing current theory in approaching practical business problems. Students are also expected to become comfortable with taking risks and working as part of a team, and to develop the necessary skills to lead others.

At a more specific level, students must acquire the critical management competencies which will enable them to respond to the ever-changing, increasingly complex global marketplace.

The BCom curriculum offers students both breadth and depth. Breadth is achieved through a broad-based core of required courses which provide the necessary quantitative, analytical, and communication skills, while grounding students in applied theory and practice across the major management disciplines. Depth is achieved through specialized areas of study designed to meet the needs of a highly diverse student body with a wide range of career interests and priorities.

General Management (Concentration) students pursue focused study in at least two different areas. They must choose one Concentration in Management, and for their second area of study, they have three options: 1) choosing a second Concentration in Management; 2) pursuing a Minor in another faculty; or 3) custom designing their own sequence of higher level courses around a theme, with approval from the Area Coordinator of their Concentration or from the Associate Director of the BCom Program.

Majors and Honours programs are available for students wishing to focus their study in primarily one area in order to get maximum exposure to their chosen field.

The Faculty Program in International Management allows students to pursue interdisciplinary study of a particular world region – East Asia, Latin America and the Caribbean, Western Europe, or North America. Language, social science, and humanities courses are taken, in combination with integrative, international topics in management courses, to expand understanding of other cultures and to gain the necessary perspective for an international business career.

9.3.2 Part-time BCom Program

Students taking fewer than 12 credits per term are considered to be part-time students. Such students generally follow their program through evening courses offered by the Centre for Continuing Education. The range of Management and non-Management course offerings in an evening program is more restricted than in the day program. It is not possible to complete certain Concentrations, Honours or Majors, or the Faculty Program by taking only evening courses. Further information on program requirements for students who change from the full- to part-time program, or vice versa, can be obtained from the Student Affairs Office by calling (514) 398-4068 or e-mailing bcom.mgmt@mcgill.ca.

9.3.3 Summer Studies

Students wishing to make up deficiencies in their background, or to accelerate their progress to the degree, may do so by taking summer courses at this University.

Each summer, from early May to mid-August, many Core courses and several elective courses are offered by the Desautels Faculty of Management for full credit. They are available to Management students, and to students from other faculties and universities with the necessary course prerequisites. The University also offers a number of summer courses in various disciplines at different levels. Information on Management summer courses is available from the Student Affairs Office at (514) 398-4068 or bcom.mgmt@mcgill.ca, or from the Summer Studies Office, at (514) 398-5212 or summer.studies@mcgill.ca.

Students working full or part-time during the summer will be allowed to take only one course in each of the two Summer Sessions.

Students who are not working and wish to follow a full-time period of study will be permitted to enrol for more than six credits per period only with special permission of the Associate Director. In no circumstance will they be allowed to take more than 9 credits in either period of the Summer Studies, and may take no more than 18 credits in a single summer.

Should students wish to pursue courses at another institution, they must apply to the Associate Director, BCom Program. Credit will be granted for such work only if it fits into the student's overall program, and if written permission to do such work for credit has been obtained.
been obtained in advance. A course which overlaps with course material already completed in the student’s program, or a language course which does not substantially progress beyond corresponding language courses already taken by the student, will not receive credit approval. See section 9.3.5 “Transfer Credit and Advanced Standing” for more information about transferring credits.

9.3.4 International Student Exchange Program

Students are encouraged to participate in the International Student Exchange Program to gain a broader international perspective. Through this program, students may study and earn academic credits at over 50 universities in countries around the world. Exchange opportunities are open to students in all specializations.

More information may be obtained from the Student Affairs Office at (514) 398-4068, e-mail bcom.mgmt@mcgill.ca, or on the McGill Website at www.mcgill.ca/studyabroad.

9.3.5 Transfer Credit and Advanced Standing

Students who transfer course credit from another institution may transfer up to one third of the credits required in their degree program, including the Concentration, Major or Honours requirements under the following conditions:

- Only courses passed with a grade of C or better at the host institution will be transferred. Grades of C- are not acceptable. Grades of P or S are acceptable only if transferred from faculties within McGill. The letter grades applied by the former home institution or host institution (for exchanges and study away) take precedence over the numerical grades if provided.
- Grades of P or S are acceptable only if transferred from faculties within McGill.
- The letter grades applied by the former home institution or host institution (for exchanges and study away) take precedence over the numerical grades if provided.
- For exchange or study away purposes, it is required that course and credit approval is obtained before courses are taken at the host institution.
- The four-year program will require a minimum 81-credit residency.
- The three-year program will require a minimum 60-credit residency.

9.3.6 Career Centre

The Career Centre is a career planning resource, an active promoter of students to employers and a source of career-related information, offering a gamut of services such as résumé and cover letter review, interview preparation, taped mock interviews, career planning (CareerLeader), Career Day, company presentations and the opportunity to participate in our on-line résumé book.

The Career Centre helps, directs and guides students to make the job search process easier. The centre organizes a series of activities designed to assist students in networking and meeting various employers throughout the course of the year. Most events tend to be concentrated in the fall, during the “On-Campus Recruiting Season” (OCR).

The Career Centre Website has restricted access and is only available to Management students. With a password, students can access job postings, useful job search links, employer database, on-line registration to company information sessions as well as CareerLeader.

Workshops include: “How to Survive the OCR Process”, a workshop to help prepare students for the upcoming recruiting season, and “Résumé & Cover Letter Writing”, “Interview Preps”, “Taped Mock Interviews”, “Cold Calling” and “Networking Essentials”.

Career Day is the Desautels Faculty of Management’s biggest career fair. Over 45 firms are recruited to participate in a fair held off campus in the month of September. It is an opportunity for students to practice their networking skills, gain valuable contacts and learn more about firms.

The Career Centre also coordinates a variety of employer development visits in Montreal, Toronto and New York City. During the visits students have the opportunity to tour company facilities, meet decision makers and learn more about their industry of choice.

Students are encouraged to come see our team of professionals and to visit our Website at www.mcgill.ca/management/career.

9.3.6.1 Career Centre Internship Program

Students wishing to integrate valuable hands-on work experience in their academic studies are encouraged to apply to the Internship Program. This program provides students an opportunity to work for four or eight months in a business environment where they can apply their theoretical knowledge into practice.

The program is very competitive and requires that students submit a thorough application and pass an interview. To be eligible, students must meet the following requirements: be registered in the full-time Bachelor of Commerce program, have a minimum CGPA of 3.0/4.0, have completed a minimum set of core courses and have at least 12 credits remaining in the program. Students may register for internships starting in the Fall, Winter or Summer.

A student who is completing an internship will receive a mid-term and final performance evaluation. After completing the internship, the student is required to submit a written project report to the Internship Manager and return to McGill to complete the Bachelor of Commerce program. Students who have successfully completed the Internship Program will receive one credit for each four-month internship appointment, up to a maximum of two credits, and will receive the Internship Program notation on their transcript.

The fees associated with the program include a $25 enrolment fee and a $400 internship fee for each appointment the student undertakes, as well as the cost assessed for each credit. More information is available on our Website at www.mcgill.ca/management/career or contact the Internship Program Manager at the Career Centre by telephone: (514) 398-2071 or by e-mail: intern.mgmt@mcgill.ca.

Note: The list of course requirements is available on our Website and is subject to change without prior notice.

9.3.6.2 Professional Development Series

The Professional Development Series is a series of workshops designed to give students the skills and knowledge necessary to succeed in the job search process and succeed in the workplace. Examples of subjects include Effective Interviewing Techniques and Presentations, Résumé and Cover Letter workshops, Workshops on Non-Traditional Careers, Careers in Finance, Non-Profit Sector and Consulting. All workshops are conducted by leaders from the industry such as Andy Nulman (BCom ’83), Co-Founder of Just For Laughs and President of Airborne Entertainment; and Stephane Vaillancourt (MBA ’95), CEO of the YMCA Greater Montreal.

9.3.7 Management Undergraduate Society

The Management Undergraduate Society (MUS) represents all undergraduate students in the Desautels Faculty of Management and hosts a wide range of events, activities and resources, which add value to the quality of student life. The MUS offers countless services ranging from academic tutoring to fun-filled social gatherings to business contact opportunities. Through extra-curricular involvement with the MUS, students increase the value of their education and are provided with the opportunity to gain essential skills that are directly applicable in the business world. There are over 150 positions under the MUS that offer students the opportunity to get involved, meet new people and enhance their university experience.

Activities sponsored by the MUS include: Management Welcome Week, Management Winter Carnival, Management Achievement Awards Luncheon, Jeux du Commerce/Commerce Games, the AIDS benefit fashion show, the Cancer Auction, a Faculty newspaper and magazine, a yearbook and a Graduation Ball. The MUS is also the umbrella organization under which the McGill
investment Club, the Information Systems Club, the Marketing Network, the International Management Society and the McGill Accounting Society all operate. Each club organizes career information sessions, guest speakers, peer tutorial programs, social activities, as well as other activities that complement regular classes.

9.4 BCom Degree Requirements

9.4.1 Academic Requirements for Graduation

Each student in the Desautels Faculty of Management must be aware of the faculty regulations as stated in this Calendar and on the McGill and BCom Websites. While departmental and Faculty advisers and staff are always available to give advice and guidance, the ultimate responsibility for completeness and correctness of course selection and registration, for compliance with, and completion of, program and degree requirements, and for the observance of regulations and deadlines rests with the student. It is the student’s responsibility to seek guidance from the Student Affairs Office if in any doubt; misunderstanding or misapprehension will not be accepted as cause for dispensation from any regulation, deadline, program or degree requirement.

A student is graduated upon satisfactory completion of the full number of credits indicated in the letter of acceptance, subject to the curriculum requirements. For students entering with a CEGEP Diploma, the number of credits will generally be 90. Students from outside the province of Quebec who have not completed the equivalent of CEGEP graduation will normally be required to complete 120 credits.

All students are expected to conform to the curriculum set out below. It is the student’s responsibility to make sure his/her course of study conforms with the curriculum requirements as described. A student wishing to depart from that program must obtain written permission from the Associate Director.

A student who has transferred with advanced standing to the Desautels Faculty of Management from another university is normally required to complete a minimum of 80 credits while registered in the Bachelor of Commerce program, including such required courses as are deemed necessary, to become eligible for the degree of Bachelor of Commerce.

Completion of the 90-credit degree requirements normally will require three years of study. A maximum of five years is permitted, however, for completion of the requirements for the degree. In exceptional circumstances, this maximum requirement may be extended by the Associate Director.

9.4.2 Academic Advising

Students entering the Faculty for the first time are required to attend an Orientation and Advising Session during the last week of August, at which the Associate Director and advising staff (Helen Van Eyk, Giulia Campofredano, Ron Critchley, Heather McComb, Naomi Neuburger, and Michael Rankin) from the BCom Office provide information on all aspects of the BCom program. Students who have had difficulty registering for their courses have the opportunity to resolve the problem at this session.

Appointments may be made after the first week of class to discuss programs of study with the advisers. Counselling is available throughout the year with area coordinators to discuss potential career paths.

In February or March, an Information Session takes place which aids the student to select a course of study for specialization.

In April, students continuing in the BCom program plan their studies for the following year using the requirements as listed in the Calendar, or in the Degree Evaluation Module (DEV) available through Minerva, as a guide to their course selection. Advice is also available in the Student Affairs Office for students having difficulty. Students then register on-line using Minerva at www.mcgill.ca/minerva-students. The Study Plan Form must be signed by one of the advisers.

General Management students choosing to do a Minor in another Faculty as their second area of study should meet with the appropriate department adviser to plan their courses. Students may also custom design their own sequence of six courses as “structured electives” for their second area, with approval from the Area Coordinator of their Concentration or the Associate Director before taking more than two courses out of the six required at the 300- or 400-level. It should be noted that Minors must have a minimum of 18 credits not overlapping with other program requirements. Students taking the Minor in Economics MUST see an adviser in the Student Affairs Office for approval of their program.

Students in the Honours or Majors programs in Economics or Mathematics must have their Study Plan Form initially authorized by the appropriate Area Coordinator or Department Adviser prior to submission to the BCom Office.

Faculty Program in International Management students should meet with the appropriate adviser(s), Giulia Campofredano or Heather McComb, in the Desautels Faculty of Management at least once a year to plan their course of study.

Students continuing in the part-time (evening) BCom program should have their Study Plan Form authorized by Ron Critchley.

Students requesting general information about the program, or encountering difficulties (academic or personal) during the session, should contact an adviser.

9.4.3 Registration

Course Selection: Full-time students must register on-line using Minerva. Additional information for new students is distributed at the time of admission and is also available on the Faculty Website at www.mcgill.ca/management under Degree Programs - BCom - Accepted Students and www.mcgill.ca/student-records.

Information for returning students and part-time students is available at the BCom Office.

Course Change: Students who wish to change the courses for which they are registered within the course change period must do so on-line using Minerva. Students should complete and return to the BCom Office a Course Change Form after they have successfully made their course changes using Minerva.

Withdrawals: Students wishing to withdraw from a course after the course change deadline must do so on-line using Minerva by the withdrawal deadline. A grade of “W” will be indicated on the transcript. See the Regulations Concerning Course Withdrawal, section 3.3.8, for details.

Approval to withdraw after the withdrawal deadline will be granted only in exceptional circumstances.

Students whose circumstances require withdrawal from their complete program should report to the BCom Office.

9.4.4 Course Overlap

Students will not receive credit towards their degree for any course that overlaps in content with a course taken for credit at McGill, CEGEP, at another university, or advanced placement exams, Advanced Level results, International Baccalaureate Diploma, or French Baccalaureate Diploma.

It is the student’s responsibility to consult the Student Affairs Office as to whether or not credit can be obtained and to be aware of exclusion clauses specified in the course description in the Calendar.

9.4.5 Academic Standing

Academic standing is based primarily on students’ cumulative grade point averages (CGPA), but may also be affected by their term grade point averages (TGPA). Academic standing is assessed in January for the Fall term, in May for the Winter term, and in September for the Summer term. Academic standing in each term determines if students will be allowed to continue their studies in the next term and if any conditions will be attached to their registration.
Decisions about academic standing in the Fall term are based only on grades that are available in January. Grades for courses which students have deferred examinations and Fall-term grades for courses that span the Fall and Winter terms do not affect academic standing for the Fall term, even though they will ultimately affect students’ Fall TGPAs. Therefore, academic standings for the Fall term are designated as “interim” and should be interpreted as advisory. Note that interim standing will not appear on external transcripts. Interim standing decisions are mentioned below only if the rules for them differ from those for regular standing decisions.

**Satisfactory/Interim Satisfactory Standing**
Students in satisfactory standing may continue in their program.
- New students are admitted to satisfactory standing.
- Students with a CGPA of 2.00 or greater are in satisfactory standing.

**Probationary/Interim Probationary Standing**
Students in probationary standing may continue in their program, but must carry a reduced load (maximum 14 credits per term) and raise their TGPA and CGPA to return to satisfactory standing (see above). They should see their departmental adviser to discuss their course selection.

Students in interim probationary standing may continue in their program, but should evaluate their course load and reduce it as appropriate. They are strongly advised to consult with Ronald Critchley or Heather McCombie in the Student Affairs Office, before the withdrawal deadlines, about their course selection for the Winter term.
- Students who were previously in satisfactory standing will be placed in probationary standing if their CGPA falls between 1.50 and 1.99.
- Students who were previously in probationary standing will remain in probationary standing if their CGPA falls between 1.50 and 1.99 and their TGPA is 2.50 or higher, although the TGPA requirement will not apply to the Summer term.
- Students who were previously in interim unsatisfactory standing will be placed in probationary standing if their CGPA falls between 1.50 and 1.99 and their TGPA is 2.50 or higher.
- Students who were previously in unsatisfactory standing and who were readmitted to the Faculty by the Associate Director will be placed in probationary standing if their CGPA is less than 2.00. To remain in the program, students must satisfy relevant conditions specified in their letter of readmission.

**Unsatisfactory Readmitted Standing**
Students who were previously in unsatisfactory standing and who were readmitted to the Faculty by the Associate Director will have their standing changed to unsatisfactory readmitted standing. Their course load is specified in their letter of readmission, as are the conditions they must meet to be allowed to continue in their program. They should see their faculty adviser to discuss their course selection.

**Unsatisfactory/Interim Unsatisfactory Standing**
Students in interim unsatisfactory standing may continue in their program, but should evaluate their course load and reduce it as appropriate. They are strongly advised to consult a faculty adviser, before the withdrawal deadlines, about their course selection for the Winter term.

Students in unsatisfactory standing have failed to meet the minimum standards set by the Faculty. They may not continue in their program, and their registration will be cancelled.

Appeals for readmission by students in unsatisfactory standing should be addressed to the Associate Director no later than July 15 for readmission to the Fall term and November 15 for the Winter term. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation). Students in unsatisfactory standing for the second time must withdraw permanently.
- Students will be placed in unsatisfactory standing (Winter or Summer term) or interim unsatisfactory standing (Fall term) if their CGPA falls or remains below 1.50.
- Students who were previously in probationary, unsatisfactory readmitted, or interim unsatisfactory standing will be placed in unsatisfactory standing if their TGPA falls below 2.50 and their CGPA is below 2.00.
- Students who were previously in unsatisfactory standing and who were readmitted to the Faculty by the Associate Director and who have not at least satisfied the conditions to attain probationary standing that were specified in the letter of readmission will be placed in unsatisfactory standing.

**Incomplete Standings**
Standing awaits deferred exam. Standing Incomplete.

Students with incomplete standings in the Winter or Summer term may register for the Fall term, but their standing must be resolved by the end of the course change period for that term; otherwise, their registration will be cancelled. Students whose incomplete standing changes to satisfactory, probationary, or interim unsatisfactory standing may continue in the program. Students whose standing changes to unsatisfactory standing may not continue in their program, and their registration will be cancelled.

Students whose standing changes to unsatisfactory and who wish to ask for permission to continue in their program must make a request to the Associate Director as soon as they are placed in unsatisfactory standing. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation).

Students whose standing is still incomplete by the end of course change period should immediately consult with the Student Affairs Office.

**9.4.6 Examinations**
The following is supplemental to that which is listed under section 3.6 “Examinations”.

**Supplemental Examinations**
Supplemental examinations are not offered in undergraduate courses administered by the Desautels Faculty of Management. A student required to improve his/her standing in a course must repeat the course in a subsequent term, completing all course requirements to the satisfaction of the instructor.

**Deferred Examinations**
Students should apply in writing to their Associate Director within FIVE days of the final examination for deferred examination privileges. If approved, such a deferred examination will generally be written within the next formal period for which there is an examination in the course. Special arrangements may be made where a student has an authenticated case of long-term illness.

**9.4.7 Verification of Grades and Rereads**
Every student has the right to arrange a meeting with the instructor to review the examination questions and see the corrected solutions. The instructor has the option of meeting with the student to answer any questions that the student may have about the grading of the paper, or alternatively, the instructor may provide the student with a sheet containing the correct answers to the examination questions. The student may review this in the presence of the faculty member or designate, but may not take the material away. Students must exercise their right to see their papers by the end of the third week of classes in September for preceding Winter and Summer courses, or by the end of the third week of classes in January for preceding Fall courses.

In a case where a student feels that an error has been made in arriving at the final grade, a Verification of Grade Application must
be completed in the Student Affairs Office, requesting the instructor to carry out a detailed check that all questions have been marked, and that the final grade has correctly been computed on the basis of the term work, final examination, etc. However, during the course of the term, any requests to have term work re-evaluate should initially be made directly to the instructor. Students may apply to the Student Affairs Office for rereads of written coursework. Rereads for computer-scored examinations are not possible, but students may request verification of their final grade.

The deadline for applying for a Verification of Grade or Reread for the Winter and Summer term courses is the end of September; the deadline for Fall term courses is the end of January. There is no charge for Verification of Grades; students will pay a fee (which will be billed to their account) for each Reread. Verification of Grades or Rereads in courses not offered by the Desautels Faculty of Management are subject to the deadlines, rules and regulations of the particular faculty concerned.

When a Reread is requested, a second reader will be appointed, and will review the examination paper and several other papers in the same general mark range, and will be concerned with actual errors of marking, whether they be errors of omission or judgment. The recommendation of the second reader will stand, whether this recommendation involves an upgrading or a downgrading of the original mark. In a case where the original mark has been upgraded, the Reread fee will be refunded to the student.

### 9.4.8 Awards and Honorary Designations

#### 9.4.8.1 Honours and First-Class Honours

Graduating students registered in an Honours program may be awarded Honours or First-Class Honours under the following conditions:

- for Honours, the CGPA at graduation must be at least 3.0; overall and in specified courses of the program
- for First-Class Honours, the CGPA of all Honours courses and the over-all CGPA must be at least 3.5; overall and in specified courses of the program

Students in an Honours program whose GPA or CGPA is below 3.0, or who did not satisfy certain additional program requirements, must consult their adviser to determine if they are eligible to graduate in a program other than Honours.

#### 9.4.8.2 Distinction and Great Distinction

Graduating students not in an Honours program may be awarded their degrees with **Distinction** or **Great Distinction** under the following conditions:

- students must have completed a minimum of 60 McGill credits towards the same degree to be considered
- for **Great Distinction**, the CGPA at graduation must be a CGPA of 3.5 or better
- for **Distinction**, the CGPA at graduation must be between 3.30 and 3.49
- in the case of transfer students or transfer credits, consideration is given to the quality of the work done elsewhere in addition to the CGPA requirement

#### 9.4.8.3 Dean's Honour List

- Full-time students will be given the designation "Dean's Honour List" when their academic standing is in the upper 10% of the BCom student body. The designation, while carrying no monetary reward, is an official recognition of the student's achievement and will be noted on the student's transcript. A minimum of 27 graded credits must have been completed during the academic year to be eligible; 14 credits in one term.
- The designation of Dean's Honour List for graduating students will be awarded by the Faculty to a maximum of 10% of its graduating students. The award will be made on the basis of the CGPA, with the minimum standard being set at a CGPA not lower than 3.50.

### 9.4.8.4 Scholarships, Prizes and Medals

Various scholarships, prizes and medals are open to returning and graduating students. Full details can be found in the Undergraduate Scholarships and Awards Calendar available from the Admissions, Recruitment and Registrar's Office or on the Web at www.mcgill.ca. For information, see "Scholarships and Student Aid", section 3.8.

Registered students are automatically considered by the Faculty Scholarship Committee for each award for which they are eligible, with the following exceptions: Sheila Wellington BMO Financial Group Awards, KPMG Scholarship, Commerce '55 Scholarships, Hyman Herbert Stein Award, Export Development Corporation International Studies Scholarships, Stephen S. Goldbloom Memorial Prize, Donald R. McBride Award, Great-West Life & London Life Scholarship, Hugh Howson Memorial Prize, Dr. Alex Paterson Scholarship, Paul-Hervé Desrosiers Scholarship in Entrepreneurial Studies, Richter Scholarship, and Shirin Yeganegi Memorial Scholarship. For these, the Faculty Scholarship Committee welcomes applications and recommendations, substantiated by curriculum vitae, from individual students, student groups and clubs. Such information should be forwarded to Heather McCombie, Academic Adviser, BCom Program. A minimum of 27 graded credits must have been completed in the year to be eligible; 14 credits in one term.

#### 9.5 BCom Program Credit Structure

The Bachelor of Commerce (B.Com) degree program is a three- or four-year program when taken full-time. It can also be pursued on a part-time evening basis.

Although the language of instruction at McGill is English, those who plan to be part of the Quebec business environment are reminded of the importance of competence in both written and oral French.

Note: Minors exempt the non-management electives requirement in the 3-year program.

#### Concentrations

- Accounting, page 260
- Finance, page 260
- International Business, page 261
- Marketing, page 261
- Entrepreneurship, page 260
- Information Systems, page 261
- Labour-Management Relations, page 261
- Operations Management, page 262
- Strategic Management, page 262
- Organizational Behaviour and Human Resource Management, page 262

#### Minors/Minor Concentrations for Management Students

Although only the Mathematics and Statistics Minors are outlined in this section, a wide variety of programs are available as listed in the sections for the Faculties of Arts and Science. Popular choices include Anthropology, Canadian Studies, Computer Science, English - Literature, Environmental Studies, Geological Sciences,
German, History, International Development, Political Science, Women's Studies, etc.

Students interested in the Minor in Economics must see an adviser in the BCom Office for Faculty approval.

It should be noted that a minimum of 18 credits of the Minor's requirements must not overlap with any other part of the student's program.

### 9.5.2 Major or Honours Programs

- **BCom with Major or Honours**
  - **90-credit**
    - Freshman Requirements: 0
    - Core: 36
    - Major or Honours requirements as per discipline: 30 - 42
    - Non-Management Electives: 0 - 6
    - Free Electives: 12 - 24
  - **120-credit**
    - Freshman Requirements: 18
    - Core: 36
    - Major or Honours requirements as per discipline: 30 - 42
    - Non-Management Electives: 12 - 18
    - Free Electives: 24 - 24

Note: Economics and Mathematics Honours, Majors or Minors exempt the non-management elective requirement in the 3-year program.

### 9.5.3 Faculty Program in International Management

- **BCom Faculty Program in International Management**
  - **90-credit**
    - Freshman Requirements: 0
    - Core: 36
    - Regional Interdisciplinary Area of Specialization: 27
    - Advanced Management Courses on Integrative or International Topics: 9
    - Non-Management Electives: 0
    - Free Electives: 18
  - **120-credit**
    - Freshman Requirements: 18
    - Core: 36
    - Regional Interdisciplinary Area of Specialization: 27
    - Advanced Management Courses on Integrative or International Topics: 9
    - Non-Management Electives: 12
    - Free Electives: 18

Note: Faculty Program in International Management exempts the non-management elective requirement in the 3-year program.

### Areas of specialization:

- Canadian Studies, page 271
- East Asian Studies, page 269
- Latin America and Caribbean
- American Studies, page 271
- Studies, page 268
- Western European Studies (France, Germany, Italy, or Spain), page 269

### 9.6 120-credit Program, Freshman Course Distribution

Students admitted to a program requiring 97-120 credits (four years) register in a Freshman Year in which they must complete MATH 122 and MATH 123 (or equivalents) as well as the 12 credits of Complementary Courses specified below.

A minimum grade of C is required for all MATH and Freshman Complementary courses.

**The Freshman Course Distribution is as follows:**

#### U0 Required Courses (6 credits)
- MATH 122 (3) Calculus for Management
- MATH 123 (3) Linear Algebra and Probability

#### U0 Complementary Courses (12 credits)
- 6 credits of Humanities or Language courses, as specified below:
  - **Freshman Humanities/Languages Course List** (6 credits)
    - Any course at the 100 or 200 level with these Subject Codes: ARTH (Art History), CANS (Canadian Studies), CLAS (Classics), EAST (Asian Languages and Literature), ENGC (English Communications), ENGL (English), FREN (French), FRSL (French as a Second Language), GERM (German), HISP (Hispanic Studies), ITAL (Italian), JWST (Jewish Studies), PHIL (Philosophy), RELG (Religious Studies), RUSS (Russian)
  - And the following Faculty of Education courses: EDEA 204, EDEA 205, EDEE 205, EDEE 325.

  **Note:** Chosen courses from the above-mentioned Subject Codes need to be approved by the offering Department. Any language courses offered through the Faculty of Arts, with approval from the appropriate department. Additional courses may be taken with approval of a Faculty Adviser.

- 6 credits of Social Science and Science courses, as specified below:
  - **Freshman Social Sciences/Sciences Course List** (6 credits)
    - Any course at the 100 or 200 level with these Subject Codes: ANTH (Anthropology), ATOC (Atmospheric and Ocean Sciences), BIOL (Biology), CANS (Canadian Studies), CHEM (Chemistry) a maximum of 3 credits from CHEM 150, CHEM 160, CHEM 170, CHEM 180; ECON (Economics) excluding ECON 208, ECON 209, ECON 217, ECON 227, ECON 230, ECON 250, ECON 257, ECON 295; EPSC (Earth and Planetary Sciences) excluding EPSC 200, EPSC 201; GEOG (Geography); HIST (History); LING (Linguistics); PHGY (Physiology); PHYS (Physics); POLI (Political Science); PSYC (Psychology) excluding PSYC 204; SOCI (Sociology) excluding SOCI 211; SSMD (Social Studies of Medicine); WMST (Women's Studies).
    - Any course at the 200 level with these Subject Codes: COMP (Computer Science), MATH (Mathematics) excluding MATH 203, MATH 204.

  **Note:** Chosen courses from the above-mentioned Subject Codes need to be approved by the offering Department. Additional courses may be taken with approval of a Faculty Adviser.

#### U0 Elective Courses (12 credits)

**Program Footnotes:**

1. Students considering a Major or Minor in Mathematics, or an Honours or Joint Honours program in Economics replace MATH 122 and MATH 123 with three of the following courses, or demonstrated proficiency through appropriate McGill Placement tests.
   - MATH 133 (3) Vectors, Matrices and Geometry
   - MATH 139 (4) Calculus
   - or MATH 140 (3) Calculus 1
   - MATH 141 (4) Calculus 2

Six of these credits would be counted in the Freshman Year requirements, the remaining credits would be counted as Humanities or Science Complementary.

Management students cannot receive credit for ACOM 150, COMP 102, ECON 208, ECON 209, ECON 217, ECON 227, ECON 230, ECON 250 or ECON 257, or MATH 203, MATH 204, as elective courses.
9.7 Management Core

All BCom students take the 36-credit Core curriculum set out below, except where modifications are specifically required by a Major or Honours program. Any other student wishing to deviate from this program must obtain written permission from the Associate Director.

A grade of C or better is required for all Core courses. If a D is obtained in a Core course, the grade must be improved the following term.

9.7.1 Core Course Distribution

Required Courses (36 credits)

Program Footnotes:

1. Students considering a Major or Minor in Mathematics replace MGCR 271 with MATH 324. Students considering an Honours or Joint Honours Program in Economics replace MGCR 271 with ECON 257D1/ECON 257D2.

2. Students entering an Economics program replace MGCR 293 with either ECON 230D1/ECON 230D2 (for the Majors program) or ECON 250D1/ECON 250D2 (for the Honours Program); and replace ECON 295 in U2 with either ECON 330D1/ECON 330D2 (for the Majors program) or ECON 352D1/ECON 352D2 (for the Honours Program) taken in U2.

Also note that:

- A maximum of 6 credits will be permitted within the BCom program for MGCR 293 and ECON 230D1/ECON 230D2 or ECON 250D1/ECON 250D2.
- A maximum of 6 credits will be permitted within the BCom program for ECON 295 and ECON 330D1/ECON 330D2 or ECON 352D1/ECON 352D2.

9.8 Concentrations (General Management Major)

In order to complete a Concentration, the student must achieve a grade of C or better in all the courses which comprise the Concentration. The student who has failed to earn 15 satisfactory credits will be required to embark on a new Concentration, repeat the course(s) in question or, where possible, to replace the course(s) with a satisfactory substitution from the Complementary courses of the Concentration.

In general, the student will begin taking courses from the chosen Concentration(s) in the U2 year.

An adviser is appointed for each Management Concentration to assist students in choosing a Concentration and provide additional information regarding course selection.

Second Concentration:

Students who choose to take a second Concentration will be required to complete 15 non-overlapping credits at a satisfactory level with a minimum grade of C in each course.

9.8.1 Accounting Concentration

Adviser: Professor F.W. Valliant

This Concentration is designed to meet the needs of Management students who want to have a good basic understanding of accounting but do not intend to become professional accountants or accounting specialists. It is primarily oriented towards users of financial information and emphasizes breadth of knowledge in a coherent selection of courses.

The Accounting Concentration complements or forms part of the BCom, General Management Program. The individual courses in the Concentration also act as service courses for other areas in the Faculty for their Majors or Concentrations.

Required Courses (6 credits)

- ACCT 351 (3) Intermediate Financial Accounting 1
- ACCT 361 (3) Intermediate Management Accounting 1

Complementary Courses (9 credits)

- ACCT 352 (3) Intermediate Financial Accounting 2
- ACCT 354 (3) Financial Statement Analysis
- ACCT 362 (3) Intermediate Management Accounting 2
- ACCT 385 (3) Principles of Taxation
- ACCT 452 (3) Financial Reporting Valuation
- ACCT 453 (3) Advanced Financial Accounting
- ACCT 454 (3) Financial Reporting
- ACCT 463 (3) Advanced Management Accounting
- ACCT 475 (3) Principles of Auditing
- ACCT 486 (3) Business Taxation 2

9.8.2 Entrepreneurship Concentration

Adviser: Professor D. Lank

This Concentration is concerned with the genesis and development of entrepreneurial activities. It deals with the integration of marketing, finance, organization and policy in the development and expansion of business enterprise. Included are the evaluation of new business ventures, the role of acquisitions, and the strategic issues and operating problems at various stages of a firm's existence from its beginnings to maturity.

Complementary Courses (15 credits)

- BUSA 462 (3) Management of New Enterprises
- BUSA 464 (3) Management of Small Enterprises
- BUSA 465 (3) Technological Entrepreneurship

remaining credits to be selected from:

- ACCT 361 (3) Intermediate Management Accounting 1
- ACCT 385 (3) Principles of Taxation
- BUSA 364 (3) Business Law 1
- FINE 442 (3) Capital Markets and Institutions
- INSY 332 (3) Accounting Information Systems
- INSY 432 (3) Information Technology in Business
- INSY 454 (3) Technological Foundation for E-Commerce
- MGPO 445 (3) Industry Analysis & Competitive Strategy
- MGPO 450 (3) Ethics in Management
- MGPO 460 (3) Managing Innovation
- MRKT 438 (3) Brand Management
- MRKT 452 (3) Consumer Behaviour
- MRKT 453 (3) Advertising Management
- MRKT 483 (3) International Marketing Management
- ORGP 380 (3) Cross Cultural Management

or a 400-level course approved by the adviser.

9.8.3 Finance Concentration

Advisers: Professors M. Chaudhury, A. Durnev, J. Ericsson and K. Jacobs

This Concentration has been designed to provide understanding of key concepts in finance theory, financial institutions, investment analysis, risk management, and applied techniques. Graduates
find a strong demand among financial organizations, government
ments, and non-financial firms where they pursue careers which
lead to positions such as Managing Partner, Treasurer and V.P.
Finance.

**Required Courses** (9 credits)
- FINE 342 (3) Finance 2
- FINE 441 (3) Investments and Portfolio Management
- FINE 443 (3) Applied Corporate Finance

**Complementary Courses** (6 credits)
two of:
- FINE 434 (3) Topics in Finance
- FINE 442 (3) Capital Markets and Institutions
- FINE 445 (3) Real Estate Finance
- FINE 448 (3) Derivatives and Risk Management
- FINE 449 (3) Market Risk Models
- FINE 451 (3) Fixed Income Analysis
- FINE 480 (3) Global Investments
- FINE 482 (3) International Finance 1
- FINE 492 (3) International Finance 2
- FINE 541 (3) Applied Investments
- FINE 547 (3) Advanced Finance Seminar

### 9.8.4 Information Systems Concentration

**Adviser:** Professor R. Donovan

This 15-credit concentration prepares students for a multitude of IT and IT-related career opportunities. The IS concentration is an ideal complement to the majors and concentrations of several other areas. It employs a blend of theoretical concepts, hands-on tools, actual case studies and real-life projects to train students to identify business challenges that can benefit from information systems support and implement appropriate solutions.

Graduates completing a concentration in IS can expect to find employment as business or system analysts in the IT field or as IT specialists within their own field, including but not limited to, banking, insurance, manufacturing, retailing, and consulting.

**Required Courses** (9 credits)
- INSY 331 (3) Managing Information Technology
- INSY 333 (3) Systems Analysis and Modeling
- INSY 437 (3) Managing Data and Databases

**Complementary Courses** (6 credits)
two of:
- INSY 332 (3) Accounting Information Systems
- INSY 341 (3) Developing Business Applications
- INSY 342 (3) Advanced Application Development
- INSY 431 (3) System Design and Implementation
- INSY 432 (3) Information Technology in Business
- INSY 434 (3) Advanced Topics
- INSY 438 (3) Interface Design and Prototyping
- INSY 440 (3) Information Technology Challenges in Electronic Business
- INSY 444 (3) Managing Knowledge with Information Technology
- INSY 450 (3) Information Systems Project Management
- INSY 454 (3) Technological Foundation for E-Commerce

### 9.8.5 International Business Concentration

**Adviser:** Professor H. Etemad

The objective of this Concentration is to help the student develop conceptual and analytical skills needed to formulate feasible and effective management policies in an international setting. With economic and business activity becoming increasingly internationalized, the program provides useful preparation for careers in a variety of internationally oriented organizations, including local business firms involved in international trade, licensing or financial arrangements; headquarters or subsidiaries of multinational companies; banks and other international financial institutions; and various governmental organizations.

**Required Course** (3 credits)
- MGPO 383 (3) International Business Policy

**Complementary Courses** (12 credits)
four of:
- BUSA 391 (3) International Business Law
- BUSA 394 (3) Asia/Pacific Management
- BUSA 395 (3) European Economy and Business
- BUSA 434 (3) Topics in Management
- BUSA 481 (3) North America: Global Markets
- BUSA 493 (3) Global Economic Competitiveness
- FINE 478 (3) International Financial Management
- MGPO 469 (3) Managing Globalization
- MRKT 483 (3) International Marketing Management
- ORGB 380 (3) Cross Cultural Management

### 9.8.6 Labour-Management Relations Concentration

**Adviser:** Professor R. Hebdon

The objective of this Concentration is to provide a general understanding of the factors affecting employer-employee relations, both at the micro-level and in relation to the socio-economic context in which they occur. Students interested in more intensive study of this area are urged to consider the Major Program in Labour-Management Relations.

**Required Courses** (6 credits)
- IND 194 (3) Introduction to Labour-Management Relations
- IND 496 (3) Collective Bargaining

**Complementary Courses** (9 credits)
three of:
- IND 434 (3) Topics: Labour-Management Relations
- IND 449 (3) Occupational Health and Safety
- IND 459 (3) International Labour Relations
- IND 492 (3) Public Policy in Industrial Relations
- IND 494 (3) Labour Law
- IND 495 (3) Labour Relations: Public Sector
- IND 497 (3) Contract Administration

### 9.8.7 Management Science Concentration

This concentration is no longer being offered. For additional information about this concentration, please refer to the 2006-2007 undergraduate calendar.

### 9.8.8 Marketing Concentration

**Advisers:** Professors M.S. Jo, E. Sarigollu and D. Vakratsas

This Concentration prepares the student for a wide variety of career opportunities. Marketing graduates historically have found employment in the fields of product management, advertising, sales management, marketing management, pricing, marketing research, distribution and retailing. The Marketing Concentration provides a balance between courses focusing on fundamental, theoretical and “need to know” material, and courses with a strong practical and applied orientation.

**Required Courses** (12 credits)
- MRKT 354 (3) Marketing Management 2
- MRKT 357 (3) Marketing Planning 1
- MRKT 451 (3) Marketing Research (to be taken in U2)
- MRKT 452 (3) Consumer Behaviour

**Complementary Course** (3 credits)
one of:
- MRKT 351 (3) Marketing in Society
- MRKT 355 (3) Services Marketing
- MRKT 365 (3) New Products
- MRKT 434 (3) Topics in Marketing
- MRKT 438 (3) Brand Management
- MRKT 453 (3) Advertising Management
- MRKT 455 (3) Sales Management
MRKT 456 (3) Business to Business Marketing
MRKT 459 (3) Retail Management
MRKT 461 (3) Advertising Practicum
MRKT 483 (3) International Marketing Management
MRKT 557 (3) Marketing Productivity

9.8.9 Operations Management Concentration

Advisers: Professors S. Li and S. Ray

Operations Management is concerned with the design, planning, control, coordination and improvement of business processes, systems and resources integral to the creation of the firm's products and services. Emphasizing quantitative analysis and cross-functional thinking, the Operations Management Concentration provides training on traditional as well as emerging operations strategies, concepts, models and techniques which are essential to any firm in today's competitive marketplace. Operations management graduates find career opportunities in a variety of industries and fields including consulting, manufacturing, distribution, retail, transportation, health care, public sector, among others.

Required Courses (6 credits)
MGSC 373 (3) Operations Research 1
MGSC 431 (3) Operations Analysis

Complementary Courses (9 credits)
three courses chosen from:
MGSC 272 (3) Advanced Business Statistics
MGSC 402 (3) Operations Strategy
MGSC 403 (3) Introduction to Logistics Management
MGSC 405 (3) Quality Management
MGSC 415 (3) Supplier Management
MGSC 434 (3) Topics in Management Science
MGSC 479 (3) Applied Optimization
MGSC 575 (3) Applied Time Series Analysis Managerial Forecasting
MGSC 578 (3) Simulation of Management Systems
and approved courses in other Areas or faculties.

9.8.10 Organizational Behaviour and Human Resource Management Concentration

Adviser: Professor A. Jaeger

This Concentration provides an opportunity for students to increase their awareness of behavioural issues encountered in job and organizational settings, and prepare themselves for graduate study in the behavioural sciences or for careers in general management or human resource management.

Complementary Courses (15 credits)
five of:
ORG 321 (3) Leadership
ORG 325 (3) Negotiations and Conflict Resolutions
ORG 380 (3) Cross Cultural Management
ORG 409 (3) Organizational Research Methods
ORG 420 (3) Managing Organizational Teams
ORG 421 (3) Managing Organizational Change
ORG 429* (6) Organizational Behaviour for Course Counsellors
ORG 434 (3) Advanced Topics in Organizational Behaviour
ORG 435 (3) Women as Global Leaders and Managers
ORG 525 (3) Compensation Management
* If ORGB 429 is taken, only 3 credits will count towards the Concentration, the other 3 will be counted as elective.

9.8.11 Strategic Management Concentration

Advisers: Professors J. Jorgensen and O. Toulan

There are two options offered in the Strategic Management Concentration: Global Strategy and Social Context.

The Global Strategy option is intended for students who want to learn strategic management and analysis with special attention to the not-for-profit, or civil sector, or who want to focus on broader or more complex social issues within the for-profit sector. The civil sector – made up of voluntary and non-governmental organizations and foundations – is the sector that has been the fastest growing employer for the past decade. Students who focus on this stream will be challenged to place a high priority on environmental issues, as well as issues of sustainability, corporate social responsibility, and social impact. They will also investigate the social tools and mechanisms necessary to employ cross-sectoral collaboration to achieve desired social outcomes.

GLOBAL STRATEGY OPTION

Complementary Courses (15 credits)

at least 9 credits from the following:
MGPO 383 (3) International Business Policy
MGPO 445 (3) Industry Analysis & Competitive Strategy
MGPO 460 (3) Managing Innovation
MGPO 469 (3) Managing Globalization
MGPO 470 (3) Strategy and Organization

the remaining credits to be chosen from:
BUSA 391 (3) International Business Law
ECON 219 (3) Current Economic Problems: Topics
ECON 305 (3) Industrial Organization
MGPO 434 (3) Topics in Policy
MGPO 440 (3) Strategies for Sustainability
MGPO 450 (3) Ethics in Management
MGPO 468 (3) Managing Organizational Politics
MGPO 475 (3) Strategies for Developing Countries
MGPO 562 (3) Seminar in Organizational Strategy

SOCIAL CONTEXT OPTION

Required Courses (9 credits)
three courses chosen from:
MGPO 440 (3) Strategies for Sustainability
MGPO 450 (3) Ethics in Management
MGPO 468 (3) Managing Organizational Politics
MGPO 475 (3) Strategies for Developing Countries

Complementary Courses (6 credits)
two courses chosen from:
BUSA 391 (3) International Business Law
MGPO 383 (3) International Business Policy
MGPO 434 (3) Topics in Policy
MGPO 445 (3) Industry Analysis & Competitive Strategy
MGPO 460 (3) Managing Innovation
MGPO 469 (3) Managing Globalization
MGPO 470 (3) Strategy and Organization
MGPO 562 (3) Seminar in Organizational Strategy
MGPO 567 (3) Business in Society

9.9 Minors for Management Students

BCom Program Minors Adviser: Ron Critchley

The Minor programs offered in the Faculties of Arts and Science may be taken in conjunction with any BCom program.
Students doing a Minor program must have a Desautels Faculty of Management Minor Approval Form, listing the courses being applied to the Minor, signed by the Minor adviser in the relevant department.

For the Minor in Economics, students must complete 18 credits of material which does not overlap with Management course content. A maximum of 6 credits will be permitted within the BCom program for MGCR 293 and ECON 230D1/D2 or ECON 250D1/D2, and a maximum of 6 for ECON 295 and ECON 330D1/D2 or ECON 352D1/D2. Students interested in this Minor must obtain approval from Ron Critchley in the Student Affairs Office.

The Minor in Mathematics and the Minor in Statistics are detailed below. For all other Minors, please refer to the Arts and Science Faculty sections. Students should begin the Minor in Mathematics and the Minor in Statistics no later than the penultimate year and should immediately consult the appropriate adviser in the Department of Mathematics and Statistics.

Students planning to take the Minor in Mathematics or the Minor in Statistics are advised to substitute MATH 324 for MGCR 271. That course will then count as 3 credits towards the Minor. If the decision to take a Minor program is made after MGCR 271 has been taken, students who wish to take MATH 324 will receive three additional credits; however MATH 324 will only count towards the 18-credit Minor requirement.

9.9.1 Minor in Mathematics

Adviser: Professor W.J. Anderson, Department of Mathematics and Statistics, Faculty of Science

Program prerequisites: MATH 133, MATH 140 and MATH 141 or their equivalents.

Required Courses (12 credits)
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 315 (3) Ordinary Differential Equations
MGSC 373 (3) Operations Research 1

Complementary Courses (6 credits)
Maximum of 3 credits from:
MGSC 272 (3) Advanced Business Statistics
MGSC 479 (3) Applied Optimization
MGSC 575 (3) Applied Time Series Analysis Managerial Forecasting
MGSC 578 (3) Simulation of Management Systems

The remaining credits selected from the following:
MATH 316 (3) Complex Variables
MATH 317 (3) Numerical Analysis
MATH 319 (3) Partial Differential Equations
MATH 323 (3) Probability
MATH 326 (3) Nonlinear Dynamics and Chaos
MATH 340 (3) Discrete Structures 2
MATH 407 (3) Dynamic Programming
MATH 417 (3) Mathematical Programming

9.9.2 Minor in Statistics

Adviser: Professor K. Worsley, Department of Mathematics and Statistics, Faculty of Science

Program prerequisites: MATH 133, MATH 140 and MATH 141 or their equivalents.

Required Courses (15 credits)
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 323 (3) Probability
MATH 324* (3) Statistics
MATH 423 (3) Regression and Analysis of Variance

*Credits for MATH 324 are counted in the Management core, where they replace MGCR 271. MATH 324 is a required course in the program and may be double-counted for this Minor.

Complementary Courses (6 credits)
Selected from:
MATH 204** (3) Principles of Statistics 2
MATH 447 (3) Stochastic Processes
MATH 523 (4) Generalized Linear Models
MATH 524 (4) Nonparametric Statistics
MATH 525 (4) Sampling Theory and Applications
MGSC 575 (3) Applied Time Series Analysis Managerial Forecasting
MGSC 578 (3) Simulation of Management Systems

**Students should consult the rules for credit for statistics courses in the course overlap section of the calendar. In particular, MATH 204 cannot be taken for credit after credit for MATH 324 has been obtained.

9.10 Minors for Non-Management Students

9.10.1 Minor in Management for Economics Students

Adviser: Ron Critchley

A limited enrolment Management Minor is available to selected Economics Majors and Honours students. Students intending to complete a Minor in Management should consult the Economics Department (Leacock 443) for further details and restrictions.

Required Course (3 credits)
MGCR 211 (3) Introduction to Financial Accounting

Complementary Courses (15 credits)
Category A (3 credits from the following)
MGCR 213 (3) Introduction to Management Accounting
MGCR 341 (3) Finance 1
MGCR 382 (3) International Business

Category B (3 credits from the following)
MGCR 222 (3) Introduction to Organizational Behaviour
MGCR 320 (3) Managing Human Resources
MGCR 352 (3) Marketing Management 1

Category C (3 credits from the following)
MGCR 360 (3) Social Context of Business
MGCR 423 (3) Organizational Policy
MGSC 373 (3) Operations Research 1

Category D (6 credits)
Any 300 or 400 level Management courses for which the prerequisites, if any, have been met.

9.10.2 Minor in Management for Engineering Students

Detailed information on this minor can be found in the Faculty of Engineering; see section "Management Courses and Minor Program", section 8.6.10.

9.10.3 Minor in Management for Science Students

Detailed information on this minor can be found in the Faculty of Science; see section "Management Minor Program", section 12.13.17.

9.10.4 Minor in Technological Entrepreneurship for Engineering Students

Detailed information on this minor can be found in the Faculty of Engineering; see section "Technological Entrepreneurship Minor", section 8.6.15.

9.10.5 Minor in Technological Entrepreneurship for Science Students

Detailed information on this minor can be found in the Faculty of Science; see section "Technological Entrepreneurship for Science Students", section 12.13.32.
## 9.10.6 Minor in Marketing
Adviser: Ron Critchley

The Minor in Marketing for non-management students is currently offered to students in the Faculties of Arts, Science and the Schulich School of Music. This minor is designed to provide students with an understanding of the fundamental concepts in marketing and a framework for applying marketing in a decision-making context. Students will be introduced to the basic concepts in marketing. The use of marketing theory and concepts for decision making will be covered. Marketing research methods for marketing decisions is introduced. Subsequently, students will be able to specialize by choosing from the list of complementary courses.

### Required Courses
(9 credits)
- MGCR 352 (3) Marketing Management 1
- MRKT 354 (3) Marketing Management 2
- MRKT 451 (3) Marketing Research

### Complementary Courses
(9 credits)
1. 3 credits of statistics:
   - MGCR 271 (3) Business Statistics or equivalent
2. 6 credits from the following:
   - MRKT 357 (3) Marketing Planning 1
   - MRKT 365 (3) New Products
   - MRKT 438 (3) Brand Management
   - MRKT 452 (3) Consumer Behaviour
   - MRKT 453 (3) Advertising Management
   - MRKT 455 (3) Sales Management
   - MRKT 459 (3) Retail Management
   - MRKT 461 (3) Advertising Practicum
   - MRKT 483 (3) International Marketing Management

Or other appropriate 300 or 400 level MRKT courses with the approval of the program adviser.

*3 credits of statistics: Students who have taken an equivalent statistics course that is already counted towards another program may not double count those credits and must complete an additional 3 credit complementary course chosen in consultation with an adviser.

Students should select their statistics course only after consulting "Course Overlap", section 5.3.6.1 in the Faculty of Arts, and "Course Overlap", section 12.3.6.1 in the Faculty of Science, to avoid overlapping statistics courses.

## 9.11 Majors
BCom Program Majors Adviser: Ron Critchley

Because of the heavier demands of Major programs, students desiring to pursue a program of this type are advised to declare their intention at the beginning of the program. Only grades of C or better may count towards the Major requirements.

### 9.11.1 Major in Accounting
Adviser: Professor L. Goldman

This 30-credit major is designed to meet the increased demand for accounting options within the BCom Program.

### Required Courses
(18 credits)
- ACCT 351 (3) Intermediate Financial Accounting 1
- ACCT 352 (3) Intermediate Financial Accounting 2
- ACCT 361 (3) Intermediate Management Accounting 1
- ACCT 362 (3) Intermediate Management Accounting 2
- ACCT 385 (3) Principles of Taxation
- ACCT 455 (3) Development of Accounting Thought

### Complementary Courses
(12 credits)
- ACCT 354 (3) Financial Statement Analysis
- ACCT 356 (3) International Accounting
- ACCT 434 (3) Topics in Accounting
- ACCT 452 (3) Financial Reporting Valuation
- ACCT 453 (3) Advanced Financial Accounting
- ACCT 454 (3) Financial Reporting
- ACCT 463 (3) Advanced Management Accounting
- ACCT 471 (3) Non-Profit Accounting
- ACCT 475 (3) Principles of Auditing
- ACCT 476 (3) Internal Auditing
- ACCT 477 (3) External Auditing
- ACCT 486 (3) Business Taxation 2

### 9.11.2 Major in Economics for Management Students
Advisers: Professors L. Brooks, P. Dickinson (2nd term), M. Frankman, C. Green, J. Handa (Director), R.T. Naylor, T. Velk, and A. Vicas; Department of Economics, Faculty of Arts

Please consult the Economics department Website at www.mcgill.ca/economics.

This Major is comprised of 36 credits of Economics courses (6 credits of which are counted as Core credits).

### Required Courses
(12 credits)
- ECON 230D1 (3) Microeconomic Theory
- ECON 230D2 (3) Microeconomic Theory
- ECON 330D1** (3) Macroeconomic Theory
- ECON 330D2** (3) Macroeconomic Theory

* 3 of the 6 credits for Microeconomic Theory are counted in the Core, where it replaces MGCR 293.

** 3 of the 6 credits for Macroeconomic Theory are counted in the Core, where it replaces ECON 295.

### Complementary Courses
(24 credits)
24 credits from other 200-, 300- and 400-level courses in Economics (Subject Code ECON), excluding courses with numbers below 210. At least 6 of these 24 credits should be taken from courses with 400-level numbers. No more than 6 of the 24 credits may be taken at the 200 level.

ECON 227D1/ECON 227D2 and ECON 257D1/ECON 257D2 or other economics statistics courses taken elsewhere to meet statistics requirements in lieu of MGCR 271 will not count as part of the 24 credits.

### 9.11.3 Major in Finance
Advisers: Professors M. Chaudhury, A. Durnev, J. Ericsson and K. Jacobs

The 30-credit Finance Major has been designed to meet the increasing demand for expertise in this rapidly growing functional area of business. The Major is designed to provide in-depth knowledge of finance theory, financial institutions, investment analysis, risk management, and applied techniques. Employment for graduates is most often obtained in investment and commercial banking, manufacturing and service firms, non-profit organizations and governments, and non-financial firms.

### Required Courses
(15 credits)
- FINE 342 (3) Finance 2
- FINE 441 (3) Investments and Portfolio Management
- FINE 443 (3) Applied Corporate Finance
- FINE 448 (3) Derivatives and Risk Management
- FINE 482 (3) International Finance 1

### Complementary Courses
(15 credits)
at least 9 credits from:
- FINE 434 (3) Topics in Finance
- FINE 442 (3) Capital Markets and Institutions
- FINE 449 (3) Market Risk Models
9.11.4 Major in Information Systems

Adviser: Professor R. Donovan

This 30-credit major prepares students for the multitude of IT-related career opportunities available in industry. It employs a blend of theoretical concepts, hands-on tools, and actual case studies to train students to identify business problems and opportunities, analyze business processes, and develop and implement information systems to support them. The IS Major covers a variety of topics including strategic planning and investment in information technologies, analysis, design, and deployment of information systems, understanding the opportunities and challenges of Web-based businesses, and managing resistance to IT-initiated changes in organizations.

Graduates of this program may expect to find employment as business or systems analysts, consultants, IS quality assurance specialists, and project managers in diverse industries, including banking, insurance, manufacturing, retailing, and consulting.

Required Courses (21 credits)
- INSY 331 (3) Managing Information Technology
- INSY 333 (3) Systems Analysis and Modelling
- INSY 341 (3) Developing Business Applications
- INSY 431 (3) System Design and Implementation
- INSY 432 (3) Information Technology in Business
- INSY 437 (3) Managing Data and Databases
- INSY 450 (3) Information Systems Project Management

Complementary Courses (9 credits)

9 credits chosen from the following:
- INSY 332 (3) Accounting Information Systems
- INSY 342 (3) Advanced Application Development
- INSY 434 (3) Advanced Topics
- INSY 438 (3) Interface Design and Prototyping
- INSY 440 (3) Information Technology Challenges in Electronic Business
- INSY 444 (3) Managing Knowledge with Information Technology
- INSY 454 (3) Technological Foundation for E-Commerce
- BUSA 499* (3) Case Analysis and Presentation

* Students wishing to take BUSA 499 as a complementary course must seek prior approval from the adviser.

9.11.5 Major in Labour-Management Relations

Adviser: Professor R. Hebdon

This 30-credit Major provides students with a general understanding of the factors affecting employer-employee relations, including labour unions and laws that regulate the employment relationship. It is integral to the practice of human resource management, particularly in a unionized environment.

In addition to giving students a foundation in various aspects of labour relations and labour markets, this program provides understanding of federal and provincial labour legislation, training in collective bargaining, the administration of trade union contracts, handling of grievances and preparation for participation in arbitration proceedings, a view of human resources, problems and planning on the macro level.

Required Courses (30 credits)
- IND 294 (3) Introduction to Labour-Management Relations
- IND 449 (3) Occupational Health and Safety
- IND 459 (3) International Labour Relations
- IND 492 (3) Public Policy in Industrial Relations
- IND 494 (3) Labour Law
- IND 495 (3) Labour Relations: Public Sector
- IND 496 (3) Collective Bargaining
- IND 497 (3) Contract Administration
- ECON 306D1 (3) Labour Economics and Institutions
- ECON 306D2 (3) Labour Economics and Institutions

9.11.6 Major in Marketing

Adviser: Professors M.S. Jo, E. Sarigolli and D. Vakratsas

This 30-credit Marketing Major is designed to provide students with a strong background in marketing in order to prepare them for the wide variety of marketing careers available. The Major is most appropriate for those students seeking a career in brand management, small business marketing, selling and sales management and business-to-business marketing.

(Program revision awaiting University approval.)

Required Courses (15 credits)
- MRKT 354 (3) Marketing Management 2
- MRKT 357 (3) Marketing Planning 1
- MRKT 451 (3) Marketing Research
- MRKT 452 (3) Consumer Behaviour
- MRKT 453 (3) Advertising Management

Complementary Courses (15 credits)
five of:
- BUSA 464 (3) Management of Small Enterprises
- MRKT 351 (3) Marketing in Society
- MRKT 355 (3) Services Marketing
- MRKT 365 (3) New Products
- MRKT 438 (3) Brand Management
- MRKT 455 (3) Sales Management
- MRKT 456 (3) Business to Business Marketing
- MRKT 459 (3) Retail Management
- MRKT 461 (3) Advertising Practicum
- MRKT 483 (3) International Marketing Management
- MRKT 557 (3) Marketing Productivity

9.11.7 Major in Mathematics for Management Students

The Major in Mathematics for Management Students is no longer being offered. For information on this program, please refer to the 2006-2007 calendar.

9.11.8 Major Concentration in Mathematics for Management Students

Adviser: Professor A. Hundemer, Department of Mathematics and Statistics, Faculty of Science

This program is comprised of 39 credits.

Students entering the Major Concentration in Mathematics are normally expected to have completed MATH 133, MATH 140, and MATH 141 or their equivalents. Otherwise they will be required to make up any deficiencies in these courses over and above the 39 credits required by the program.

Required Courses (30 credits)
- MATH 222 (3) Calculus 3
- MATH 235 (3) Algebra 1
- MATH 236 (3) Algebra 2
- MATH 242 (3) Analysis 1
- MATH 243 (3) Analysis 2
- MATH 314 (3) Advanced Calculus
Complementary Courses (9 credits)
6 credits selected from:
MATH 204** (3) Principles of Statistics 2
MATH 316 (3) Complex Variables
MATH 317 (3) Numerical Analysis
MATH 319 (3) Partial Differential Equations
MATH 326 (3) Nonlinear Dynamics and Chaos
MATH 407 (3) Dynamic Programming
MATH 410 (3) Majors Project
MATH 417 (3) Mathematical Programming
MATH 423* (3) Regression and Analysis of Variance

3 credits selected from:
MGSC 272 (3) Advanced Business Statistics
MGSC 479 (3) Applied Optimization
MGSC 575 (3) Applied Time Series Analysis Managerial Forecasting
MGSC 578 (3) Simulation of Management Systems

*MGSC 272 and MATH 423 cannot both be taken for program credit.
**MATH 204 cannot be taken for credit after credit for MATH 324 has been obtained. The two courses can be taken concurrently. Students should consult the rules for credit for statistics courses in the course overlap section; see section 12.3.6.1 “Course Overlap”.

9.11.9 Major in Psychology for Management Students
Adviser: Professor A. Jaeger
This Major is comprised of 30 credits – 24 credits in Psychology and 6 credits to be taken in Management.

The Desautels Faculty of Management, in collaboration with the Psychology Department, Faculty of Science, offers programs of study in organizational and consumer psychology leading to the BCom degree. These programs concentrate on providing an education in the fundamentals of experimental and social psychology.

In view of rapid changes in practical methods and professional techniques employed by managers and professional consultants, broad training in such fundamentals is seen as excellent preparation for graduate school in psychology and management as well as for a successful managerial career.

Required Courses (12 credits)
PSYC 213 (3) Cognition
PSYC 215 (3) Social Psychology
PSYC 301 (3) Learning
PSYC 333 (3) Personality and Social Psychology

Complementary Courses (18 credits)
12 credits chosen from:
PSYC 211 (3) Introductory Behavioural Neuroscience
PSYC 212 (3) Perception
PSYC 310 (3) Human Intelligence
PSYC 331 (3) Inter-Group Relations
PSYC 332 (3) Introduction to Personality
PSYC 335 (3) Formal Models: Psychological Processes
PSYC 336 (3) Measurement of Psychological Processes
PSYC 340 (3) Psychology of Language
PSYC 341 (3) The Psychology of Bilingualism
PSYC 351 (3) Research Methods in Social Psychology
PSYC 352 (3) Cognitive Psychology Laboratory
PSYC 403 (3) Modern Psychology in Historical Perspective
PSYC 406 (3) Psychological Tests
PSYC 408 (3) Principles of Cognitive Behaviour Therapy
PSYC 429 (3) Health Psychology

PSYC 451 (3) Human Factors Research and Techniques
PSYC 471 (3) Human Motivation
PSYC 473 (3) Social Cognition and the Self
PSYC 474 (3) Interpersonal Relationships
PSYC 510 (3) Statistical Analysis of Tests
PSYC 534 (3) Community Psychology
PSYC 535 (3) Advanced Topics in Social Psychology

and 6 credits taken in one of the following two options:

Organizational Psychology Option
two of:
ORGB 321 (3) Leadership
ORGB 325 (3) Negotiations and Conflict Resolutions
ORGB 380 (3) Cross Cultural Management.
ORGB 409 (3) Organizational Research Methods
ORGB 420 (3) Managing Organizational Teams
ORGB 421 (3) Managing Organizational Change
ORGB 434 (3) Advanced Topics in Organizational Behaviour
ORGB 435 (3) Women as Global Leaders and Managers

Consumer Psychology Option
two of:
MRKT 451 (3) Marketing Research
MRKT 452 (3) Consumer Behaviour
MRKT 557 (3) Marketing Productivity

9.11.10 Major Concentration in Statistics for Management Students
Adviser: Professor K. Worsley, Department of Mathematics and Statistics, Faculty of Science
This program is comprised of 39 credits.

Students entering the Major Concentration in Statistics are normally expected to have completed MATH 133, MATH 140, and MATH 141 or their equivalents. Otherwise they will be required to make up any deficiencies in these courses over and above the 39 credits required by the program.

Required Courses (27 credits)
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 242 (3) Analysis 1
MATH 243 (3) Analysis 2
MATH 314 (3) Advanced Calculus
MATH 323 (3) Probability
MATH 324* (3) Statistics
MATH 423 (3) Regression and Analysis of Variance
MGSC 373 (3) Operations Research 1

* credits for MATH 324 are counted toward Management Core, where they replace MGCR 271.

Complementary Courses (12 credits)
maximum of 6 credits from:
MGSC 479 (3) Applied Optimization
MGSC 575 (3) Applied Time Series Analysis Managerial Forecasting
MGSC 578 (3) Simulation of Management Systems

remaining credits to be taken from:
MATH 204** (3) Principles of Statistics 2
MATH 315 (3) Ordinary Differential Equations
MATH 340 (3) Discrete Structures 2
MATH 410 (3) Majors Project
MATH 447 (3) Stochastic Processes
MATH 523 (4) Generalized Linear Models
MATH 524 (4) Nonparametric Statistics
MATH 525 (4) Sampling Theory and Applications

**MATH 204 cannot be taken for credit after credit for MATH 324 has been obtained. The two courses can be taken concurrently. Students should consult the rules for credit for statistics courses in the course overlap section; see section 12.3.6.1 “Course Overlap”.
9.12 Honours

BCom Program Honours Adviser: Ron Critchley

An Honours program is available in Accounting and in Economics, as well as Joint Honours programs in Economics and Accounting, and in Economics and Finance.

The difference between the Honours and Major programs is not one of quantity but rather of quality, the Honours program involving study in greater depth. Students must register with the Economics Department, Faculty of Arts, for the Honours in Economics program. This will usually be done at the beginning of their U1 year but special arrangements may be made for students wishing to enter the program at the beginning of U2.

Graduation with an Honours standing requires a minimum CGPA of 3.00 and an average of 3.00 in the specified courses of the program.

9.12.1 Honours in Economics for Management Students

Advisers in Economics: Professors G. Grantham, F. Grimard (Director), J. Kurien, R. Rowley, M. Sinitsyn, D. Sutthiphisal and N. Turdaliev, Department of Economics, Faculty of Arts

Please consult the Economics department Website at www.mcgill.ca/economics.

This program is comprised of 42 credits of Honours Economics courses (9 credits of which are counted as Core credits).

To remain in the Honours program, students must obtain a grade of at least B in ECON 250D1/ECON 250D2.

Graduation with an Honours standing requires a minimum CGPA of 3.00 and an average of 3.00 in the specified courses of the program.

Required Courses (24 credits)
ECON 250D1 (3) Introduction to Economic Theory: Honours
ECON 250D2 (3) Introduction to Economic Theory: Honours
ECON 257D1 (3) Economic Statistics - Honours
ECON 257D2 (3) Economic Statistics - Honours
ECON 352D1 (3) Macroeconomics - Honours
ECON 352D2 (3) Macroeconomics - Honours
ECON 450D1 (3) Advanced Economic Theory - Honours
ECON 450D2 (3) Advanced Economic Theory - Honours

Notes:
1. 3 of the 6 credits for Introduction to Economic Theory are counted in the Core, where it replaces MGCR 293.
2. 3 of the 6 credits for Economics Statistics - Honours are counted in the Core, where it replaces MGCR 271.
3. 3 of the 6 credits for Macroeconomics are counted in the Core, where it replaces ECON 295.

Complementary Courses (12 credits)
ECON 460 (3) History of Thought 1 - Honours
ECON 461 (3) History of Thought 2 - Honours
ECON 467D1 (3) Econometrics - Honours
ECON 467D2 (3) Econometrics - Honours
plus 6 credits of other Economics courses approved by an Honours adviser.

Accounting Required Courses (9 credits)
ACCT 351 (3) Intermediate Financial Accounting 1
ACCT 352 (3) Intermediate Financial Accounting 2
ACCT 361 (3) Intermediate Management Accounting 1

Accounting Complementary Course (3 credits)
ACCT 362 (3) Intermediate Management Accounting 2 or ACCT 385 (3) Principles of Taxation

9.12.2 Joint Honours in Economics and Accounting

Advisers in Economics: Professors G. Grantham, F. Grimard (Director), J. Kurien, R. Rowley, M. Sinitsyn, D. Sutthiphisal and N. Turdaliev, Department of Economics, Faculty of Arts

Please consult the Economics department Website at www.mcgill.ca/economics.

This Joint Honours program is comprised of 36 credits of Honours Economics courses (9 credits of which are counted as Core credits) and 12 credits of courses from the Major in Accounting program.

To earn an Honours designation, a CGPA of 3.00 is required in the 36 credits in Economics (including a 3.00 CGPA in the specified courses) and a grade of B- or better with a CGPA of 3.00 in all Accounting courses.

Economics Required Courses (24 credits)
ECON 250D1 (3) Introduction to Economic Theory: Honours
ECON 250D2 (3) Introduction to Economic Theory: Honours
ECON 257D1 (3) Economic Statistics - Honours
ECON 257D2 (3) Economic Statistics - Honours
ECON 352D1 (3) Macroeconomics - Honours
ECON 352D2 (3) Macroeconomics - Honours
ECON 450D1 (3) Advanced Economic Theory - Honours
ECON 450D2 (3) Advanced Economic Theory - Honours

Notes:
1. 3 of the 6 credits for Introduction to Economic Theory are counted in the Core, where it replaces MGCR 293.
2. 3 of the 6 credits for Economics Statistics - Honours are counted in the Core, where it replaces MGCR 271.
3. 3 of the 6 credits for Macroeconomics are counted in the Core, where it replaces ECON 295.

Economics Complementary Courses (12 credits)
ECON 460 (3) History of Thought 1 - Honours
ECON 461 (3) History of Thought 2 - Honours
ECON 467D1 (3) Econometrics - Honours
ECON 467D2 (3) Econometrics - Honours
plus 6 credits of other Economics courses approved by an Honours adviser.

Accounting Required Courses (9 credits)
ACCT 351 (3) Intermediate Financial Accounting 1
ACCT 352 (3) Intermediate Financial Accounting 2
ACCT 361 (3) Intermediate Management Accounting 1

Accounting Complementary Course (3 credits)
ACCT 362 (3) Intermediate Management Accounting 2 or ACCT 385 (3) Principles of Taxation

9.12.3 Joint Honours in Economics and Finance

Advisers in Economics: Professors G. Grantham, F. Grimard (Director), J. Kurien, R. Rowley, M. Sinitsyn, D. Sutthiphisal and N. Turdaliev, Department of Economics, Faculty of Arts

Adviser: Professor V. Erunza

Please consult the Economics department Website at www.mcgill.ca/economics.

This Joint Honours program is comprised of 30 credits of Honours Economics courses (9 credits of which are counted as Core credits) and 18 credits in Finance.

This program is designed to take advantage of both McGill’s Finance and Economics course offerings to produce a student who is well trained in these two complementary areas. It is particularly attractive to those planning careers in finance, economics or financial economics in both industry and government. The program is a demanding one and its potential rewards are correspondingly high.

To earn the Honours designation, a CGPA of 3.00 is required in the Economics credits and a grade of B- or better with a CGPA of 3.00 in all Finance courses.

Economics Required Courses (24 credits)
ECON 250D1 (3) Introduction to Economic Theory: Honours
ECON 250D2 (3) Introduction to Economic Theory: Honours
ECON 257D1 (3) Economic Statistics - Honours
ECON 257D2 (3) Economic Statistics - Honours
ECON 352D1 (3) Macroeconomics - Honours
ECON 352D2 (3) Macroeconomics - Honours
ECON 450D1 (3) Advanced Economic Theory - Honours
ECON 450D2 (3) Advanced Economic Theory - Honours

Notes:
1. 3 of the 6 credits for Introduction to Economic Theory are counted in the Core, where it replaces MGCR 293.
2. 3 of the 6 credits for Economics Statistics - Honours are counted in the Core, where it replaces MGCR 271.
3. 3 of the 6 credits for Macroeconomics are counted in the Core, where it replaces ECON 295.

Economics Complementary Courses (12 credits)
ECON 460 (3) History of Thought 1 - Honours
ECON 461 (3) History of Thought 2 - Honours
ECON 467D1 (3) Econometrics - Honours
ECON 467D2 (3) Econometrics - Honours
plus 6 credits of other Economics courses approved by an Honours adviser.

Accounting Required Courses (9 credits)
ACCT 351 (3) Intermediate Financial Accounting 1
ACCT 352 (3) Intermediate Financial Accounting 2
ACCT 361 (3) Intermediate Management Accounting 1

Accounting Complementary Course (3 credits)
ACCT 362 (3) Intermediate Management Accounting 2 or ACCT 385 (3) Principles of Taxation

MANAGEMENT – HONOURS
ECON 450D2 (3) Advanced Economic Theory - Honours

Notes:
1. 3 of the 6 credits for Introduction to Economic Theory are counted in the Core, where it replaces MGCR 293.
2. 3 of the 6 credits for Economic Statistics are counted in the Core, where it replaces MGCR 271.
3. 3 of the 6 credits for Macroeconomics are counted in the Core, where it replaces ECON 295.

Economics Complementary Courses (6 credits)
ECON 460 (3) History of Thought 1 - Honours
and ECON 461 (3) History of Thought 2 - Honours
or ECON 467D1 (3) Econometrics - Honours
and ECON 467D2 (3) Econometrics - Honours

Finance Required Courses (12 credits)
FINE 342 (3) Finance 2
FINE 441 (3) Investments and Portfolio Management
FINE 443 (3) Applied Corporate Finance
FINE 547 (3) Advanced Finance Seminar

Finance Complementary Courses (6 credits)

9.13 Faculty Program in International Management

BCom Faculty Program Adviser: Giulia Campofredano

Students who choose this course of study take the standard 36 credits of Core courses but, instead of choosing a Major, Honours or Concentration, they focus on gaining knowledge of a specific geographical region of the world by taking a minimum of 27 credits of courses in an interdisciplinary area of study in the Faculty of Arts. The program also includes a minimum of 9 credits of 300 or higher level courses on integrative or international topics in management. All students admitted into the full-time BCom program are eligible for this course of study. It should be noted that it is also possible to complete a Concentration or Minor within the normal minimum credit requirements of the degree.

In order to fulfill the requirements of this option in the three or four years typically taken to complete a BCom degree, students should select their region of specialization by the Spring of their U1 year. An adviser from the Faculty will be appointed to each of the interdisciplinary regional areas of study to help students plan their programs of study.

Regional Interdisciplinary Areas of Specialization

Three areas of study are offered to all students: Latin America and the Caribbean, East Asia, and Western Europe (Germany, Italy, France, or Spain). Two additional areas of study (Canada and the United States) are offered for foreign students who come to McGill from other countries.

Students must complete 9 to 12 credits of language study appropriate to their regional area of study, unless they can demonstrate proficiency, in which case they must substitute courses taught in the language of their chosen region.

In addition to language study, a minimum of 15 to 18 credits of courses focused on the geographical region of choice must be taken. These courses are from a wide range of Faculty of Arts departments: Anthropology, Economics, Geography, History, Political Science, Religious Studies, etc.

A Term Abroad

All students in the program will be expected to spend one term in the region they have chosen to study. During this term they would be required to either:

a) take approved courses which can be used towards their language credits, their regional area studies, or the advanced management courses on integrative or international topics; or

b) work in a job where they must use a language from their chosen region. If they are able to arrange a verifiable, paid work experience, they will be eligible to receive 3 course credits to be used toward their advanced management courses if they make arrangements in advance to take an Independent Study course and write a paper related to their experiences.

9.13.1 Integrative or International Topics in Management

Students must take at least 9 credits of courses on international or integrative business topics. At least one of the courses must include an assignment which requires students to capitalize on their broad interdisciplinary knowledge and expertise gained from their study of a particular culture, as well as management.

Integrative/International Topics in Management Component
9 credits chosen from the following:
BUSA 320 (3) International Business Law
BUSA 391 (3) International Business Policy
BUSA 394* (3) Asia/Pacific Management
BUSA 395 (3) European Economy and Business
BUSA 397 (3) Topics in Management
BUSA 462 (3) Management of New Enterprises
BUSA 481 (3) North America: Global Markets
BUSA 493 (3) Global Economic Competitiveness
FINE 478 (3) International Financial Management
FINE 482 (3) International Finance 1
MGPO 383 (3) International Business Policy
MGPO 440 (3) Strategies for Sustainability
MGPO 469 (3) Managing Globalization
MRKT 483 (3) International Marketing Management
ORGB 380 (3) Cross Cultural Management

* This course is required for students taking the East Asian Studies option.

9.13.2 Latin American and Caribbean Studies

LANGUAGE COMPONENT (12 credits)
12 credits of Spanish language courses at the level deemed appropriate for the student or, with the approval of the Area adviser, of courses taught in Spanish from the Hispanic Studies department list below.

Spanish Language Courses List
HISP 210D1 (3) Spanish Language: Beginners
HISP 210D2 (3) Spanish Language: Beginners
or HISP 218 (3) Spanish Language Intensive - Elementary
HISP 220D1 (3) Spanish Language: Intermediate
HISP 220D2 (3) Spanish Language: Intermediate
or HISP 219 (3) Spanish Language Intensive - Intermediate

Other Hispanic Studies Department Courses List
HISP 243 (3) Survey of Spanish-American Literature 1
HISP 244 (3) Survey of Spanish-American Literature 2
HISP 302 (3) Hispanic Literature - English Translation 2
HISP 328 (3) Literature of Ideas: Spanish America
HISP 332 (3) Spanish American Literature of 19th Century
HISP 333 (3) Spanish-American Drama
HISP 351 (3) Spanish-American Novel 1
HISP 352 (3) Spanish-American Novel 2
HISP 356  (3) Spanish-American Short Story
HISP 358  (3) Women Writers Fiction Spanish-America
HISP 432  (3) Literature - Discovery and Exploration Spain New World
HISP 437  (3) Viceregal Spanish America
HISP 442  (3) Modernismo
HISP 453  (3) 20th Century Spanish-American Poetry
HISP 505  (3) Seminar in Hispanic Studies
HISP 506  (3) Seminar in Hispanic Studies
HISP 507  (3) Seminar in Hispanic Studies

**AREA FOCUS COMPONENT (15 credits)**

**Required Courses (6 credits)**

HIST 309  (3) History of Latin America to 1825
HIST 360  (3) Latin America since 1825

**Complementary Courses (9 credits)**

6 credits, either the following two, or authorized substitutions from the list of Hispanic Studies Department courses given above:

HISP 225  (3) Hispanic Civilization 1
HISP 226  (3) Hispanic Civilization 2

3 credits chosen from the following:

- ANTH 326  (3) Peoples of Central and South America
- ECON 410  (3) Economic Development: Selected World Area
- HIST 464D1**  (3) Topics: Latin American History
- HIST 464D2**  (3) Topics: Latin American History
- LACS 497  (3) Research Seminar on Latin America and the Caribbean
- POLI 319  (3) Politics of Latin America
- POLI 472  (3) Developing Areas/Social Movements
- SOCI 368  (3) Social Change in the Caribbean

**if HIST 464D1/HIST 464D2 is taken, only 3 of the 6 credits will count towards the Option, the other 3 will be counted as elective.**

**9.13.3 East Asian Studies**

**Note:** All students taking the East Asian Studies option must take BUSA 394 Asia-Pacific Management as part of the Integrative/International Topics in Management Component.

The East Asian Studies option combines the study of either Chinese or Japanese with related courses in culture and history as follows:

**LANGUAGE COMPONENT (9 credits)**

9 credits of First Level Korean, Chinese or Japanese language or, with the approval of the Area Adviser, courses taught in one of those languages by the East Asian Studies department.

**East Asian Languages Courses List**

- EAST 220D1  (4.5) First Level Korean
- EAST 220D2  (4.5) First Level Korean
- or EAST 230D1  (4.5) First Level Chinese
- and EAST 230D2  (4.5) First Level Chinese
- or EAST 240D1  (4.5) First Level Japanese
- and EAST 240D2  (4.5) First Level Japanese

Students with a prior knowledge of an Asian language may substitute a second-level language course (EAST 320D1/EAST 320D2, EAST 330D1/EAST 330D2, EAST 340D1/EAST 340D2) for 9 credits, or a third- or fourth-level course for 6 credits, along with an additional 3-credit course from the Complementary course list below.

**AREA FOCUS COMPONENT (18 credits)**

**Complementary Courses (18 credits)**

6 credits, at least, from the following:

- EAST 351  (3) Women in Chinese Literature
- EAST 353  (3) Approaches to Chinese Cinema
- EAST 362  (3) Japanese Cinema
- EAST 363  (3) Aesthetics and Politics of Vision Premodern Japan
- EAST 364  (3) Mass Culture and Postwar Japan
- EAST 384  (3) Comparative Socioeconomic History Japan and Korea
- EAST 453  (3) Topics: Chinese Literature
- EAST 456  (3) Chinese Drama and Popular Culture
- EAST 461  (3) Inventing Modern Japanese Novel
- EAST 462  (3) Japan in Asia
- EAST 464  (3) Image, Text, Performance
- EAST 466  (3) Feminism and Japan
- EAST 515  (3) Seminar: Beyond Orientalism
- EAST 551  (3) Technologies of Self in Early China
- EAST 563  (3) Images, Ideograms, Aesthetics
- EAST 564  (3) Structures of Modernity: Japan
- EAST 590  (3) Multiple Narratives of “Orient”

the remaining credits, if any, to be chosen from the following:

- ANTH 329  (3) Modern Chinese Society and Change
- ECON 335  (3) The Japanese Economy
- ECON 411  (3) Economic Development: A World Area
- HIST 208  (3) Introduction to East Asian History
- HIST 308  (3) Formation of Chinese Tradition
- HIST 318  (3) History of Japan 1
- HIST 328  (3) China in Revolution 1: 1840-1921
- HIST 337  (3) Japanese Intellectual History 1
- HIST 338  (3) China in Revolution 2: 1921-1997
- HIST 348  (3) China: Science-Medicine-Technology
- HIST 352  (3) Japanese Intellectual History 2
- HIST 358  (3) Medieval to Early Modern China
- HIST 359  (3) History of Japan 2
- HIST 439  (3) History of Women in China
- HIST 441  (3) Topics: Culture and Ritual in China
- HIST 442  (3) Asian Diaspora: Chinese Overseas
- HIST 443  (3) China in the Modern World
- HIST 445  (3) Late Imperial China
- HIST 497D1  (3) Topics in Chinese History
- HIST 497D2  (3) Topics in Chinese History
- HIST 579  (3) The Arts of Healing in China
- HIST 581  (3) The Art of War in China
- POLI 323  (3) Developing Areas/China and Japan
- POLI 349  (3) Foreign Policy: Asia
- RELG 253  (3) Religions of East Asia
- RELG 352  (3) Japanese Religions
- RELG 354  (3) Chinese Religions
- RELG 442  (3) Pure Land Buddhism
- RELG 451  (3) Zen: Maxims and Methods
- RELG 452  (3) East Asian Buddhism
- RELG 549  (3) East Asian Buddhist Philosophy

Students are encouraged to choose courses related to their language study although alternative programs are acceptable after consultation with an adviser.

**9.13.4 Western European Studies**

The Western European Studies Focus combines the study of a European language with related courses in culture, history, and economics. Students choose one of the four geographical areas listed below in which to concentrate their studies.

**9.13.4.1 France**

**LANGUAGE COMPONENT (12 credits)**

12 credits of French language courses at the level deemed appropriate for the student or, with the approval of the Area adviser, of courses taught in French by the French Language and Literature Department.
French Language Courses List
FREN 201 (3) Composition 1
FREN 203 (3) Composition 2
FRSL 101 (6) Beginners’ French
FRSL 207 (6) Elementary French
FRSL 211 (6) Oral and Written French 1
FRSL 215 (6) Oral and Written French 1 - Intensive
FRSL 302 (3) Listening Comprehension and Oral Expression 1
FRSL 303 (3) Listening Comprehension and Oral Expression 2
FRSL 305 (3) Intermediate French: Writing
FRSL 321 (6) Oral and Written French 2

AREA FOCUS COMPONENT (15 credits)
Complementary Courses (15 credits)
6 credits selected from:
FREN 336 (3) La langue française
FREN 221 (3) Civilisation française 1
FREN 324 (3) Civilisation française 5: La France d’aujourd’hui
FREN 310 (3) Histoire du cinéma français
or FREN 311 (3) Histoire du cinéma français 2
9 credits selected from:
FREN 250 (3) Littérature française avant 1800
FREN 251 (3) Littérature française depuis 1800
FREN 336 (3) La langue française

HIST 346 (3) France, 1914 to the Present
and/or any of the French Literature and French Civilization courses offered by the French Language and Literature Department or from the courses listed in “Complementary Courses Open to All Students in the Western European Studies Focus”, section 9.13.4.5.

9.13.4.2 Germany
LANGUAGE COMPONENT (12 credits)
12 credits of German language courses at the level deemed appropriate for the student or, with the approval of the Area adviser, of courses taught in German by the German Studies department.

German Language Courses List
GERM 202D1 (3) German Language, Beginners
GERM 202D2 (3) German Language, Beginners
GERM 200 (6) German Language, Intensive Beginners’
GERM 300 (6) German Language Intermediate
GERM 307D1 (3) German Language - Intermediate
GERM 307D2 (3) German Language - Intermediate
GERM 345 (3) Business German 1
GERM 346 (3) Business German 2

AREA FOCUS COMPONENT (15 credits)
(Program revisions awaiting University Approval)
Required Courses (6 credits)
GERM 400 (3) Interdisciplinary Seminar: Contemporary German Studies
HIST 235 (3) German History since 1648

Complementary Courses (9 credits)
9 credits selected from:
HIST 214 (3) Introduction to European History
HIST 215 (3) Modern European History
HIST 234 (3) German History to 1648
and/or from all courses offered by the German Studies department or from the courses listed in “Complementary Courses Open to All Students in the Western European Studies Focus”, section 9.13.4.5.

9.13.4.3 Italy
LANGUAGE COMPONENT (12 credits)
12 credits of Italian language courses at the level deemed appropriate for the student or, with the approval of the Area Adviser, of courses taught in Italian by the Italian Studies department.

Italian Language Courses List
ITAL 205D1 (3) Italian for Beginners
ITAL 205D2 (3) Italian for Beginners
ITAL 206 (6) Beginners’ Italian Intensive
ITAL 210D1 (3) Elementary Italian
ITAL 210D2 (3) Elementary Italian
ITAL 215D1 (3) Intermediate Italian
ITAL 215D2 (3) Intermediate Italian
ITAL 216 (6) Intermediate Italian Intensive

AREA FOCUS COMPONENT (15 credits)
Complementary Courses (15 credits)
15 credits from the following list:
ANTH 337 (3) Mediterranean Society and Culture

10.1 The Faculty

10.1.1 Location
Strathcona Music Building
555 Sherbrooke Street West
Montreal, QC H3A 1E3
Canada
Telephone: (514) 398-4535
Fax: (514) 398-8061
Website: www.mcgill.ca/music

10.1.2 The Faculty Then and Now
McGill’s Schulich School of Music (www.mcgill.ca/music) is the largest university-based school for professional musical training and music research in Canada. Founded as the Conservatorium of Music in 1904 and incorporated as a Faculty in 1920, the school moved to its current location in the impressive and historic Strathcona Music Building (formerly the main section of Royal Victoria College) in 1972. During its 2004-05 centennial season, the Faculty added a new eight-storey building that will evolve into a world-leading facility for sound recording and music technology research. McGill Music is renowned for its orchestral, choral, opera, jazz, chamber, contemporary and early music programs and for its award-winning creative and research work in composition, music theory, musicology, music education, sound recording and music technology.

The Faculty is also home to the Centre for Interdisciplinary Research in Music Media and Technology (CIRMMT), an inter-faculty, inter-university, international consortium that brings together researchers in music, sound recording, music technology, psychology, neuroscience, engineering, and medicine (www.music.mcgill.ca/cirmmt).

The current student enrolment is over 600 at the undergraduate level and over 200 at the graduate level. The teaching staff includes 55 full-time and over 140 part-time members. Students and staff play a major role in Montreal’s vibrant cultural scene, presenting over 650 concert events annually, as well as master classes, lectures, and symposia, all enhanced by very active student societies, a gig office, and excellent support staff.

10.2 Faculty Administrative Officers

10.2.1 Dean’s Office
Don McLean; Mus.Bac., M.A., Ph.D.(Tor.)  Dean
Mary-Beth Campbell; B.Mus., M.Mus.(McG.)  Communications and Special Events Administrator
Joanne Niles; B.A., M.A.(C'dia)  Assistant to the Dean and Area Personnel Manager
Valerie McConnell  Senior Administrative Coordinator
Linda Mannix; B.A.(C'dia)  Receptionist
Donna Williams; B.A.(W.Ont.)  Development Officer
Paul Vandenberg; B.Mus.(McG.)  Development and Alumni Relations Associate
Kate Herzberg; B.Mus., Dip.Ed.(McG.), Dip.TEFL(Rutg.)  Development and Alumni Relations Associate
Quynh-Ly Pham; B.Sc.(McG.)  Budget Officer
Catherine Healy  Secretary

10.2.2  Associate Deans’ Office
Gordon Foote; B.Sc., M.A.(Minn.)  Associate Dean (Academic and Student Affairs)
Bruce Minorgan; B.Mus.(Br. Col.), M.A.(Tor.)  Associate Dean (Administration)
Tracy Roach; B.Mus.(McG.)  Administration and Student Affairs Coordinator
Charles Wan; B.CompSc.(C'dia)  Banner (FIS) Liaison
Alain Terriault  LAN Manager

10.2.3  Graduate Studies
Hank Knox; B.Mus., M.Mus.(McG.)  Director, Graduate Studies
Hélène Drouin  Secretary for Graduate Studies

10.2.4  Academic Affairs
TBA  Chair, Department of Performance
Christine Sgherri; B.F.A.(C’dia)  Department Secretary
Jennifer Stephenson; B.A.(McG.)  Timetable and Scheduling Coordinator
TBA  Chair, Department of Theory
Fernando Longueira  Department Secretary

10.2.5  Student Affairs
Patrick O’Neil; B.A.(McG.)  Admissions Officer
Mary Di Stefano  Admissions Secretary
Pia D’Amico  Admissions Secretary
Reisa Lipszyc; B.Mus.(McG.)  Recruitment and Liaison
Olga Makarios; Cert. in Mgmt.(McG.)  Recruitment Secretary
Marie Moscato  Senior Student Adviser
Egidia De Michele  Senior Student Affairs Coordinator
Dana Pietrzak  Student Affairs Secretary

10.2.6  Building Management
Peter Wightman; L.Mus., B.Mus., M.Mus.(McG.)  Building Director
Katherine Simons; B.Mus.(W. Laur.)  Assistant Building Director
Kerry Wagner; C.T.T.  Piano Technician
Nick Zervos  A/V Technician

10.2.7  Administrative Units
CONCERTS AND PUBLICITY
Box Office (weekdays: 12:00 to 18:00): (514) 398-4547
Concert Information: (514) 398-4547 or 398-5145
Bookings: (514) 398-8993

Louise Ostiguy; B.Mus.(Montr.), C.G.E.(H.E.C.)  Director
Daria Lavigne  Secretary
Diana Toni Dutz; B.Mus.(W.Ont.), Grad.Dip.(C’dia)  Marketing and Publicity Coordinator
Marie Pothier; B.Mus.(Montr.)  Publicity Secretary
Johanne Froncioni  Production Coordinator
Serge Filiatrault  Stage Manager (Pollack Hall)
Jordan Gasparik; B.Mus.(McG.)  Assistant Stage Manager (Pollack Hall)
Neil Middleton; B.Mus.(Sask.), M.Mus. (McG.)  Assistant Stage Manager (Redpath Hall)
Christopher Smythe; B.Mus., M.Mus.(McG.)  Stage Manager (Redpath Hall)
Jacqueline Gauthier  Box Office and Front-of-House Coordinator
François Robitaille  Piano Technician

MARVIN DUCHOW MUSIC LIBRARY
Telephone: (514) 398-4695
Cynthia Leive; B.Mus.(Eastman), M.L.S.(SUNY, Geneseo), M.F.A.(Car.)  Librarian
Brian McMillian; B.Mus., M.Mus.(McG.), M.I.St.(Tor.)  Reference Librarian
John Black; B.A.(McG.)  Audio Room Supervisor
Melanie Preuss  Library Assistant, Audio Room and Circulation
Andrew Senior; B.A., MPhil.(York)  Specialized (Audio/Visual) Cataloguing Editor
Gail Youster  Library Assistant, Circulation and Serials
David Curtis; B.Sc.(McG.)  Library Assistant, Circulation and Reserves

PERFORMANCE LIBRARY
Telephone: (514) 398-4553
Erika Kirsch; B.Mus.(Southern Methodist Univ.), M.Mus.(Eastman)  Librarian

OPERA MCGILL
Telephone: (514) 398-4535, ext. 0489
Julian Wachner; B.Mus., Mus.Doc.(Boston)  Principal Conductor
TBA  Executive Director

DIGITAL COMPOSITION STUDIO
Telephone: (514) 398-4552
Sean Ferguson; B.Mus.(Atla.), M.Mus., D.Mus.(McG.)  Director
Richard McKenzie  Technician

RECORDING STUDIO
Telephone: (514) 398-4549
Wieslaw Wosczczyk; M.A., Ph.D.(F. Chopin Academy of Music, Warsaw)  Director
Ieronim Catanescu  Technician

MUSIC TECHNOLOGY RESEARCH LABORATORIES
COMPUTATIONAL ACOUSTIC MODELING LABORATORY
Telephone: (514) 398-4535, ext. 0504
Gary P. Scavone; B.A., B.S.(Syr.), M.S., Ph.D.(Stanford)  Director

DISTRIBUTED DIGITAL MUSICAL LIBRARIES LABORATORY
Telephone: (514) 398-4535, ext. 0300
Ichiro Fujinaga; B.Mus., B.Sc.(Alta.), M.A., Ph.D.(McG.)  Director

SOUND PROCESSING AND CONTROL LABORATORY
Telephone: (514) 398-4535, ext. 00271
Fax: (514) 398-2962
10.3 General Information

10.3.1 Degrees and Diplomas Offered

DEGREE OF BACHELOR OF MUSIC (B.Mus.)
The degree of Bachelor of Music may be obtained in any one of the following fields:
Composition (Major, page 284, and Honours, page 285)
Faculty Program, page 288
Music Education – available only as a component of the Concurrent B.Mus./B.Ed. program, page 300
Music History (Major, page 286 and Honours, page 286)
Music Technology (Honours, page 285)
Music Theory (Major, page 287, and Honours, page 288)
Performance (Major, page 290, and Honours, page 292)
Performance (Church Music) (Major, page 294)
Performance (Keyboard Studies) (Major, page 291)
Early Music Performance (Major, page 294, and Honours, page 295)
Jazz Performance (Major, page 296)

Designated Major
Special programs of study in music may be proposed in consultation with Faculty advisers. Such special proposals must be approved by the relevant department, the Executive Committee and by Faculty Council.

Faculty Program
This program is designed to accommodate those students who are either undecided about the area of music in which they wish to specialize, or who are interested in a pattern of specialization not provided in the established majors and honours programs, or who are interested in combining studies in music with studies in other disciplines.
All of the above B.Mus. programs normally require three years of study following completion of the Quebec Diploma of Collegial Studies or four years of study following completion of secondary school elsewhere.

B.A. Major Concentration in Music
The Faculty of Arts offers a Bachelor of Arts degree with a Major Concentration in Music. Further details on the program can be found under Music in the Faculty of Arts section.

Minor Programs
A Minor in Music History for Performers is available to all students in Performance (Major or Honours) programs. This option will take the place of music electives, as well as history, literature and performance practice complementary courses, in Performance programs.
A Minor in Music Technology is available to music students who wish to graduate with a knowledge of newer technologies and the impact they are having on the field of music. (Space permitting, the Minors in Music Technology are also available to B.A. and B.Sc. students.)
A Minor in Marketing is available to all students in a BMUS program. Further information on this Minor can be found under the Faculty of Management, see section 9.10.6.2 “Minor in Marketing”.
Minor programs in Music are also available to students in the Faculty of Arts and the Faculty of Science. Further information on these Minors can be found under the Faculty of Arts and see section 5.12.38 “Music (MUAR)” and the Faculty of Science, see section 12.13.20 “Music”.

M.Mus. Performance (Prerequisite courses)
Students wishing to prepare for the Master of Music in Performance should include, in their Bachelor of Music program, the courses listed under section 10.6.3.20 “Special Prerequisite Courses for M.Mus. in Performance”.

M.Mus. Sound Recording (Prerequisite courses)
Students wishing to prepare for the Master of Music in Sound Recording should include, in their Bachelor of Music program, the courses listed under section 10.6.3.20 “Special Prerequisite Courses for M.Mus. in Sound Recording”.

LICENTIATE IN MUSIC (L.Mus.)
The Licentiate in Music is offered in Performance and is designed for advanced instrumentalis, singers and Jazz performers who wish to concentrate on their practical subject while limiting their theoretical studies to basic areas in Music History, Theory and Musicianship. This program normally requires three years of study. For more information, please see sections: section 10.6.3.14 “Licentiate in Music (L.Mus.) (Piano)”; section 10.6.3.15 “Licentiate in Music (L.Mus.) (All Instruments except Piano, Voice and Jazz)”; section 10.6.3.16 “Licentiate in Music (L.Mus.) (Voice)”; and section 10.6.3.17 “Licentiate in Music (L.Mus.) Jazz Performance”.

ARTIST DIPLOMA
The Artist Diploma is available only to advanced instrumentalis and singers who demonstrate technical and musical maturity. Admission into the program requires completion of a Bachelor of Music degree in Performance, a Licentiate in Music, or the equivalent.
DEGREE OF MASTER OF ARTS (M.A.)
The Master of Arts degree (M.A.) is available as a thesis option in Music Education, Music Technology, Musico, and Theory and as a non-thesis option in Music Education, Musicology, and Theory.

DEGREE OF MASTER OF MUSIC (M.Mus.)
The Master of Music degree (M.Mus.) is available in Composition, Performance, and Sound Recording. Within the Performance option are offered specializations in: piano, guitar, orchestral instruments, organ, conducting, chamber music, orchestral training, piano accompaniment, vocal, opera, opera coaching, vocal pedagogy, early music, church music — organ, and jazz.

DEGREE OF DOCTOR OF MUSIC (D.Mus.)
The Doctor of Music degree (D.Mus.) is available in Composition and Performance Studies.

DEGREE OF DOCTOR OF PHILOSOPHY (Ph.D.)
The Doctor of Philosophy degree (Ph.D.) is available in Music Education, Musicology, Music Technology, Sound Recording, and Theory.

For details of the Master’s and Doctoral programs, please consult the Graduate and Postdoctoral Studies Calendar.

10.3.2 Orchestral Training
Orchestral Training at McGill includes all students in the B.Mus., L.Mus., Artist Diploma, and M.Mus. degrees and diplomas whose major is one of the orchestral instruments. Many of its graduates are now members of professional orchestras throughout North America, Europe, and the rest of the world. Led by full-time conductors in residence and supported by a number of full-time staff as well as many members of the top professional orchestras in and around Montreal, Orchestral Training at McGill provides for regular private practical lessons as well as performance in one or more large instrumental ensembles including a full symphonic orchestra (approximately 100 players), a contemporary music ensemble, a percussion ensemble and a variety of small chamber music groups. It also includes regular coached orchestral sectionals and orchestral repertoire classes.

10.3.3 Scholarships and Financial Aid
General information on scholarships, including McGill Entrance Scholarships, and a detailed listing of all awards is contained in the Undergraduate Scholarships and Awards Calendar, available on the Web (www.mcgill.ca) or from the Admissions, Recruitment and Registrar’s Office.

A limited number of Music Entrance Scholarships (valued at $2,000 each) are awarded to incoming Performance students on the basis of auditions held only in February. All instruments, including voice, are eligible. In addition, outstanding string players applying to the Schulich School of Music are encouraged to audition for the Lloyd Carr-Harris String Scholarships (valued at $10,000 each). Application for admission must be submitted by January 15.

While taking into account the stipulations of the individual awards, Schulich School of Music scholarships, awards and prizes are given on the basis of a student’s record for the academic session ending in April and are tenable during the next academic year beginning in September. Students must have successfully completed at least 27 credits (excluding courses completed under the satisfactory/unsatisfactory option) in the academic year preceding the award and must register for full-time studies during the subsequent year, unless fewer credits are needed to complete the program. Students whose records contain outstanding incompletes or deferrals will not be considered. No application is required.

10.3.4 Summer Studies
Summer Studies offers courses starting in May, June, and July. Students may take a maximum of 18 credits for the whole summer session. Those wishing to take more than 5 credits in any one month must obtain the permission of the Senior Student Adviser.

Information concerning course offerings and application forms may be obtained from the McGill Summer Studies Office Website, www.mcgill.ca/summer, or by calling (514) 398-5212.

10.3.5 Music Credit Options for Students in Other Faculties
The Schulich School of Music offers three groups of courses that may be taken for credit by students in other faculties. The first group consists of music literature and theory courses especially designed for students from other faculties who may not have taken formal studies in music but who wish to take elective courses in the cultural, historical and theoretical aspects of music.

The second group is the sequence of courses in music theory and history which are part of the Schulich School of Music undergraduate curriculum. These courses may be taken by those having the necessary prerequisite studies in music.

The third group of courses consists of selected music ensembles, open, by audition, to students in other faculties.

For further details on these courses, please see section 5.12.38 “Music (MUAR)” under the Faculty of Arts. Other music courses may be taken by qualified students from other faculties providing they obtain permission from the relevant department in the Schulich School of Music and from the Associate Dean of their own faculty.

10.3.6 Conservatory of Music
The McGill Conservatory of Music offers instruction in piano, guitar, harp, most orchestral instruments and voice, as well as Theory and Ear Training from the elementary level up to and including Collegiate levels.

In addition, the Conservatory offers Suzuki method instrumental instruction, a Music for Children course based on Orff/Kodaly principles, orchestras, children’s and youth choirs, chamber music ensembles, a variety of jazz combos, and a summer day camp.

Practical examinations to the Collegiate II level and Theory and Ear Training examinations from the Secondary III to Secondary V levels are offered to both internal and external students. Theory and Ear Training examinations at the Elementary and Collegiate I and II levels are available to internal students only.

The Conservatory also welcomes adult students (at any level) and encourages their participation not only in practical instruction but also in the orchestras, instrumental ensemble groups and Theory and Ear Training courses.

Further information is available from the McGill Conservatory of Music and on their Website at www.mcgill.ca/conservatory.

10.4 Admission

10.4.1 Application Procedure
All inquiries regarding admission should be directed to the Admissions Office, Schulich School of Music, McGill University, 555 Sherbrooke Street West, Montreal, QC H3A 1E3.

Full information, including a Web-based application form, is available at www.mcgill.ca/music/prospective/undergraduate/applying.

In order to ensure proper consideration, Web applications for September must be submitted by January 15. For admission in January (Canadians and Permanent Residents only) – to those programs which accept students into the Winter term – the application deadline is November 1. Applications received after these deadlines will be considered if places are still available.

Application information should include detailed descriptions of the applicant’s musical background, training and statement of intent including photocopies of diplomas, certificates and/or tran-
scripts. An official up-to-date transcript must also be sent directly by the school attended. All applicants must arrange to have a Music Evaluation form submitted on their behalf. All supporting documents for undergraduate applications must be mailed to: McGill University, ARR Documentation Centre, 688 Sherbrooke Street West, Montreal, Quebec, H3A 3R1.

Applicants are advised that satisfying the entrance requirements does not guarantee admission where instrumental places are limited.

### 10.4.2 Music Entrance Requirements

The minimum music entrance requirements are the equivalent of McGill Conservatory Collegial I Instrument or Voice (Performance applicants: Collegial II) and Secondary V Theory and Ear Training.

**Approximate Equivalents to Entrance Requirements in Practical Subjects (McGill Conservatory Collegial I – Instrument/Voice)**

<table>
<thead>
<tr>
<th>Quebec CEGEPS</th>
<th>CEGEP II</th>
</tr>
</thead>
<tbody>
<tr>
<td>Toronto Conservatory</td>
<td>Grade 9</td>
</tr>
<tr>
<td>Western Board</td>
<td>Grade 9</td>
</tr>
<tr>
<td>Mount Allison</td>
<td>Grade 9</td>
</tr>
<tr>
<td>Associated Board of the Royal Schools of Music</td>
<td>Grade 7</td>
</tr>
</tbody>
</table>

The above listing is intended only as a general guide. Admissibility to any program is determined by audition. Students wishing to major in Performance should be approximately two years more advanced, and be able to demonstrate potential as performers at their audition.

All applicants in piano, female voice, and in all jazz instruments will be required to submit a tape-recording (CD, video, etc.) for pre-selection by January 15. Following a review of these recordings, selected applicants will be invited to attend a live audition. No live audition will be scheduled in piano, female voice, or in any jazz instrument until a tape-recording has been received and reviewed. All applicants must perform an audition of approximately 15 minutes’ duration. The student should choose material that will represent different musical periods and reveal musicianship and technical proficiency to best advantage. Applicants for the Artist Diploma program must prepare an audition of recital material lasting approximately 60 minutes. For entrance audition requirements please refer to [www.mcgill.ca/music/prospective/undergraduate/requirements](http://www.mcgill.ca/music/prospective/undergraduate/requirements).

The entrance audition dates for September 2007 admission are February 17 to 25, 2007. At the time of audition, all applicants will be required to sit a rudiments/musicianship test.

The entrance audition dates for September 2008 admission are February 16 to 24, 2008.

Recordings (compact disc and/or video) are acceptable when distance prevents an applicant from attending an audition in person.

Applicants for Composition are asked to submit two or three samples of their written work.

Music Education applicants are asked to outline reasons for wishing to enter the Music Education field in their statement of intent and have a letter of reference sent from someone attesting to his or her suitability for teaching.

### 10.4.3 Academic Entrance Requirements

**Bachelor of Music**

The applicant's entrance audition and the academic record are considered when making an admission decision. As a limit is placed upon the number of students admitted to study a particular instrument, fulfillment of the minimum entrance requirements does not guarantee acceptance. TOEFL may be required of non-Canadian students whose mother tongue is not English. It is the applicant’s responsibility to make the necessary arrangements with the examining board to write the test in the country of residence.

**CEGEP Applicants**

Students are expected to obtain the Quebec Diploma of Collegial Studies (Diplôme d’études collégiales) in the Music Concentration or equivalent. Applicants with a DCS/DEC in a field other than Music must have the equivalent Music prerequisites. The minimum overall average required is 70%. CEGEP graduates are admitted to a three-year program.

**Canadian High School (excluding Quebec) Applicants**

Applicants are expected to obtain a high school graduation diploma which leads to university admission in the student’s home province. Ontario high school students are normally expected to have obtained a minimum of 6 OACs; at least four of the six must have been taken at the 4U level. There are no specific non-music prerequisite courses required and the minimum overall average should be 70%. Canadian high school graduates are admitted to a four-year program.

**U.S. High School Applicants**

Applicants are expected to obtain a high school graduation diploma which meets the requirements for university/college admission in the U.S. The minimum overall average required is B+. There are no specific non-music prerequisite courses, or SAT and Achievement Test results required. Some credit will be granted for Advanced Placement Examinations in appropriate subjects. U.S. high school graduates are admitted to a four-year program.

**International Applicants**

In general, applicants must be eligible for admission to university in their country of origin and have above-average grades. Students who have completed an International Baccalaureate, a French Baccalaureate, or a minimum of three GCE “A” (Advanced) Level examinations are considered for admission into a three-year program. Normally, applicants with five GCE “O” (Ordinary) Level results, plus one year of schooling beyond the Ordinary Level, are admitted to a four-year program. Applicants with qualifications from other systems will be considered for either a three-year or a four-year program.

**Transfer Students**

Transfer students are considered on the basis of both their university or college work and previous studies. Normally, students are expected to complete a full year of university studies prior to applying for admission and to be in good standing as defined by the university previously attended. The minimum overall average required is a CGPA of 3.00. Transfer credits for non-music courses in which a grade of C or better has been received are granted following an evaluation of the student’s transcript. Transfer credits, with certain restrictions, are granted for music complementary or elective courses following an evaluation of the student’s transcript (a higher grade may often be required). Transfer students must complete a minimum of 60 credits at McGill in order to obtain a degree.

**Mature Students**

Applicants who are at least 21 years of age at or before registration, who have not met the high school or CEGEP academic requirements, and who are able to demonstrate exceptional talent in their discipline may be considered for admission. Such applicants may be resident anywhere. All available academic/educational documents must be submitted. An interview may be required.

**Special Students**

Special Students do not need to fulfill any of the academic requirements outlined previously but are required to have the necessary music prerequisites for the courses concerned. Registration is subject to the availability of space in the course(s) concerned. Special Students are normally not entitled to lessons in an instrument or in voice. Registration is permitted for one year only, after which time the student must apply for admission to either the B.Mus. or the L.Mus. program.
Visiting Students
Individuals wishing to take courses at McGill for credit at another university may be admitted as Visiting Students provided they have the prerequisites for the course(s) concerned and have official permission from their home university.

10.4.4 Diploma Programs

L.Mus. (All Applicants)
For admission to the Licentiate program, the applicant must have completed secondary school. The applicant's music qualifications must be equivalent to McGill Conservatory Collegial II Instrument or Voice and Secondary V Theory/Ear Training. An entrance audition is required.

Artist Diploma (All Applicants)
For admission to the Artist Diploma program, the applicant must have a Bachelor of Music degree in Performance, the Licentiate in Music of the McGill Schulich School of Music, or the equivalent and must pass a performance audition.

10.4.5 Music Placement Examinations
All applicants must sit diagnostic placement examinations in Theory, Musicianship (Ear Training), Music History, Keyboard Proficiency and, for jazz majors, Jazz Materials, in order to determine their course levels. General placement/advanced standing examinations will be given during the week prior to the beginning of classes in September.

Students accepted into either the Licentiate Diploma (L.Mus.) or the Artist Diploma, who have completed the degree of Bachelor of Music at a Canadian or American university (or the equivalent elsewhere) within the preceding three (3) years will not be required to sit the Music Placement Examinations and will be exempted from required Theory, Musicianship, and Music History, Literature or Performance Practice courses. Should such students wish to avail themselves of the diagnostic service that the Music Placement Examinations provide, they may sit them — without, however, being bound by the recommendation generated from their results.

Nevertheless, should great difficulties arise in a specific class because of lack of adequate preparation, the Department Chair, upon the advice of the instructor, reserves the right to counsel the student to undertake studies at a lower level.

10.4.6 Keyboard Proficiency Test (MUSP 170)
Students entering any of the B.Mus. or L.Mus. programs should be prepared to demonstrate, in a Keyboard Proficiency Test, keyboard skills sufficient to enable them to use the piano as a tool in their studies at McGill.

Those who are unable to do so must register continuously for Keyboard Proficiency MUSP 170 until they successfully complete the course. Majors in Jazz Performance must enrol in MUSP 170. Students in Jazz Performance who have completed MUJZ 170 and MUJZ 171, and who transfer to a Department of Theory program, will be required to complete MUSP 172. Students who have been admitted to a degree or diploma program with keyboard as their principal instrument are exempt from the MUSP 170 Test (but not from MUSP 171 and MUSP 172).

The requirements of the Keyboard Proficiency Test are as follows:
1. Sightreading (simple two-part piece using treble, bass and alto clefs).
2. Technique (scales, triads and arpeggios). Two octaves, hands together.
3. Prepared piece (contrapuntal texture in two or three parts, or simple homophonic textures, level equivalent to McGill Conservatory Secondary III).
4. Keyboard rudiments (recognition/playing of intervals, chords, scalar patterns, etc.).

Students will not be allowed to proceed with higher-level Musician- ship or Theory studies until these requirements are met. Exact test dates are determined by the Department of Theory.

10.4.7 Readmission
Students in satisfactory standing, who have not been registered in the Schulich School of Music for one or two terms, may return to the program in which they were previously registered upon permission of the Faculty. Those who have been out for longer than two terms may be readmitted upon permission of the Faculty, subject to the student's previous record and current Faculty limitations on enrolment, but will be required to re-audition.

Students wishing to return in the Winter or Summer term must submit a request in writing to the Student Affairs Office, giving a summary of their activities during their absence, and complete a Readmission Application Form. The deadline for the January session is November 15; for the May session, April 1.

Students wishing to return in the Fall term must submit an electronic readmission application, available on Minerva, by March 1. See www.mcgill.ca/student-records/readmission for more information.

Fees
The University reserves the right to make changes without notice in the published scale of fees.

10.4.8 Tuition Fees
General information on Tuition and Other Fees will be found in section 3.4 "Fees".

Individual practical instruction on a main instrument or voice as indicated in the various degree and diploma programs, see section 10.3.1 "Degrees and Diplomas Offered", is included at the per-credit rate only while the student is full-time, and for a maximum number of years according to the following table:

<table>
<thead>
<tr>
<th>Category of Student</th>
<th>Maximum Years of Practical Instruction at the per-credit rate, 1 hour per week</th>
</tr>
</thead>
<tbody>
<tr>
<td>High School graduates (Gr.12) [Canadian, except Quebec; United States; Overseas]</td>
<td>5 years 4 years</td>
</tr>
<tr>
<td>CEGEP graduates [Holders of D.E.C. or D.C.S. in Music or a non-Music specialization]</td>
<td>4 years 3 years</td>
</tr>
<tr>
<td>Transfer students [from other colleges, universities or McGill faculties] or degree holders</td>
<td>4 years 3 years</td>
</tr>
<tr>
<td>Mature Students [without above academic qualifications but who are 21 years old as of Sept.]</td>
<td>4 years 3 years</td>
</tr>
</tbody>
</table>

* Composition, Music Education, Music History, Music Technology, Theory, Faculty Program

L.Mus. students are entitled to practical instruction at the per-credit rate for a maximum of 4 years, 1 hour per week; Artist Diploma students, 2 years, 1 1/2 hours per week.

The maximum of 4 years of practical instruction for L.Mus. students includes instruction received while in a B.Mus. program either during or prior to registration in the L.Mus. program.

Note: Part-time students in the B.Mus. and L.Mus. programs and those who have exhausted the above-listed maxima will be charged $785 per term ($1,570 per year) for practical instruction in addition to the per-credit fees. (Artist Diploma students: $1,175 per term or $2,350 per year.)

Special or part-time Visiting students who are permitted to enrol for practical instruction will also be charged an extra $785 per term, in addition to the per-credit fees, as will all other students taking instruction in a second practical subject.
Voice Coaching (MUIN 300, MUIN 301) is available at the per-credit rate for a maximum of two terms for full-time voice students only. In all other cases, the extra fee for this course is $350 per term.

Special students in the Opera Studio will be charged an additional $860 per term ($1,360 per year). Degree or diploma candidates registered in Opera Studio, as well as Special students taking practical instruction at $785 per term, will be charged the per-credit fee for Opera Studio.

10.5 Academic Information

Students are required to be punctual at all classes and lessons. Grades in theoretical subjects are calculated on the basis of class work and/or examinations. Students are warned that by missing examinations or class work they risk failure in the subject concerned.

10.5.1 Ensemble Policy and Regulations

A. Preamble

The ensemble program comprises areas of activity designed to provide an enriched and cohesive curriculum in practical musicianship for every student. Much of this training is accomplished in the context of a large instrumental or choral ensemble, or specialized ensembles, over the three-year period that students normally spend on undergraduate studies. Students are advised to check their program carefully in order to verify their basic (large) and small ensemble requirements.

Basic (large) Ensemble: All students registered as full-time or part-time students in the Department of Performance must audition for, and participate in, a basic (large) ensemble. This means that a student from the Province of Quebec must have a minimum of 12 credits for basic ensemble in order to graduate. A student from outside the province must have a minimum of 16 credits in order to graduate. In those cases where a student in the orchestral training program is registered for additional sessions, he/she must also register for basic ensemble for each additional session. (For exemptions, see section K.)

A student in the orchestral training program who is not assigned a basic ensemble following the auditions in either September or January because there is not a space available may substitute either:
1. an additional small ensemble in lieu of the basic ensemble with the approval of the Chair of the Performance Department, or
2. a choral ensemble following an audition, with the permission of the Chair of the Choral Area and the Chair of the Performance Department.

Small Ensemble: With the exception of students registered in the regular Voice program, all students registered as full-time or part-time students in the Department of Performance must audition for, and participate in, a small ensemble. A student must have a minimum of 6 credits for small ensemble in order to graduate. With the exception of Keyboard, Guitar and Jazz students, this is an ongoing requirement.

Performance majors as well as sufficiently advanced players and singers from other programs are encouraged to participate in one or more small ensembles which meet their particular interest. This policy and its regulations apply to all students performing in all ensembles, large or small, required, complementary, or elective. They apply also to all students who have been assigned to an ensemble for any reason, including conducting students, composers- and arrangers-in-residence, and others.

Important: This policy also applies to all students enrolled in vocal and instrumental techniques classes (MUCT 235, MUCT 335, MUIT 201, MUIT 202, MUIT 203, MUIT 204, MUIT 301, MUIT 302) and in choral and instrumental conducting classes (MUCT 315, MUCT 415, MUIT 315, MUIT 415) who are required to participate in Music Education ensemble labs. STUDENTS IN THESE LABS MUST FILL OUT REQUEST FORMS FOR ALL ABSENCES, INCLUDING ALL FIELD TRIPS IN WHICH THEY MAY PARTICIPATE. These forms should be returned to the Chair of the Music Education Area, not to the Ensemble Committee; students should consult the Chair of the Music Education Area for further details.

Note: In all cases where the term “Director” of an ensemble is used, it is understood to mean the conductor, director, stage director or coach of the ensemble.

B. Basic Ensemble Training and Assigned Small Ensembles

Basic Ensemble Training requirements vary by program and according to the student’s practical concentration. For ensemble purposes, the orchestral instruments include flute, oboe, clarinet, bassoon, saxophone, french horn, trumpet, trombone, tuba, percussion, harp, violin, viola, cello and double bass. Students studying these instruments will receive their Basic Ensemble Training in the large instrumental ensembles. Students whose principal instrument is other than one of these (except voice majors) will normally receive their Basic Ensemble Training in the choral ensembles. Voice majors may choose from a group of vocal and choral ensembles appropriate to the level of their development.

In all programs which specify an assigned small ensemble, the following are considered assigned small ensembles:

- MUEN 560 Chamber Music Ensemble
- MUEN 580 Early Music Ensemble
- MUEN 589 Woodwind Ensembles
- MUEN 591 Brass Ensembles
- MUEN 598 Percussion Ensembles

C. Additional Ensembles

Additional ensembles chosen by students to reflect their particular interests may, with Departmental approval, be applied as Music Elective credit. Students electing an ensemble will normally be required to audition and will be placed accordingly.

D. Assignment and Auditions

All students registered as full-time or part-time students in the Department of Performance must audition for a basic ensemble in September and, where applicable, in January (e.g., woodwind and brass players in the orchestral training program). A student who cannot audition for a basic ensemble at the times indicated in the calendar must give due notice to the Performance department of their non-availability at least five days before the date of the first audition. The student must have a valid reason (i.e., illness, death in the family, career commitment, etc.). If a student misses an audition for reasons unacceptable to the Performance department, that student will not be allowed to audition for that semester and the requirement will have to be fulfilled later in order that the student can graduate. If the reason given is valid, the student will audition for whatever positions remain unassigned upon his/her arrival at the Faculty.

Assignments are posted on the Department of Performance notice board. Re-assignments or subsequent auditions may be made from time to time during a term and will also be posted. Jazz Majors in the rhythm section sight-reading ensemble must audition every semester. Students are reminded that auditions for major ensembles are mandatory. Students who do not take the auditions cannot be assigned to any major ensembles, and they would have to make up the credit at a later time.

In the case of the Jazz Ensembles, an open challenge system is used as follows:

1. At any time during a term, a student may challenge for a position in a Jazz Ensemble.
2. The challenger must speak to the band directors involved, specifying the chair being challenged.
3. The challenger will have a private audition with not less than two directors who will offer a non-binding recommendation to the student as to whether or not to proceed with the challenge.
4. Should the challenger wish to proceed, the student being challenged will be notified by the Coordinator of the Jazz Ensembles.
5. The challenge will take the form of an audition of both the regular member of the ensemble and the challenger in a full band rehearsal, following which the directors will make a decision.

E. Commitment
Ensembles are courses. Each student who has registered for an ensemble, or who has been assigned to or who is auditioning an ensemble, has made a commitment to the ensemble and is required to attend all rehearsals, concerts, performances, field trips, recordings and other activities which constitute the course requirements of that ensemble. Except for reasons of ill health or in the case of an excused absence granted by the Ensemble Committee (see Section G, below), any absence may result in a failing grade for the student.

F. Failing Grade
A failing grade in any of the mandatory ensembles (Basic Ensemble, assigned small ensemble, complementary or elective ensemble) obliges the student to make up the credit at a later date. A subsequent failure in the same course may result in the student being required to withdraw from the Faculty.

G. Request to be Excused from a Rehearsal
ANY STUDENT WHO CANNOT ATTEND A REHEARSAL OR COACHING SESSION FOR ANY ENSEMBLE IS REQUIRED TO FILL OUT A REQUEST TO BE EXCUSED FROM ENSEMBLE FORM. THIS FORM IS AVAILABLE FROM THE DEPARTMENT OF PERFORMANCE OFFICE (E222).

Students are required to submit a completed copy of this form to the Department of Performance office (E222) at least eight (8) days prior to the rehearsal or coaching session which will be missed, stating the reason for the request. Students who have missed a rehearsal or coaching session due to illness must submit one of these forms within three (3) days of returning to school. In such cases a doctor’s certificate or statement from the Student Health Service must be attached to the form.

Ensemble Committee meets weekly during the term to consider the requests, and approve or refuse each individual case. Students are welcome to appear at this meeting to explain particular circumstances affecting their request. Students should check the Performance notice board after the day the form is submitted to see if their request has been approved.

Students may be excused from a rehearsal or coaching session of an ensemble for the following reasons:

1. Sickness, or emergency medical or dental work.
2. An audition for a permanent professional engagement
3. A master class
4. A major competition
5. A professional engagement deemed, in the opinion of the Ensemble Committee, to be very important for a student’s developing career
6. Family emergency or an especially important family occasion
7. A conflict between an irregularly scheduled ensemble rehearsal or coaching session and a previous important commitment made by the student (proof required)
8. A field trip for another ensemble or class
9. An authorized McGill function
10. A religious holiday

For Nos. 2, 3, 4 and 5, the request must be accompanied by authorization from the student’s practical teacher and the appropriate area Chair. This permission is given for no more than three (3) rehearsals or coaching sessions.

Note: NO PERMISSION IS GIVEN TO BE EXCUSED FROM A DRESS REHEARSAL OR FROM A CONCERT EXCEPT FOR NO. 1 AND NO. 2 ABOVE. IN THE CASE OF OPERA MCGILL, NO ONE CAN BE EXCUSED FROM REHEARSALS DURING THE THREE (3) WEEKS PRECEDING THE OPENING NIGHT PERFORMANCE.

Students are not excused from ensemble rehearsals or coaching sessions for either of the following reasons:

1. Gigs
2. Non-emergency medical or dental appointments. Students should request appointment times that do not conflict with rehearsals or coaching sessions.

H. Preparation
If the Director of an ensemble is not satisfied with the quality of preparation that a student has been making for the ensemble, the Director shall first warn the student. This warning shall be communicated by the Director to the Ensemble Committee, which shall inform the student in writing. If, in the Director's opinion, this lack of preparation continues, the student will be required to perform the music for a committee consisting of the Director of the ensemble, the Chair of the area (Orchestral Training, Choral, Opera, Voice, etc.) and the Department Chair. If this committee decides that there has been a lack of sufficient preparation, the student will be required to appear before the Ensemble Committee to show cause why he or she should not be required to withdraw.

For any particular performance, if—afer a written warning to the student(s) at least two (2) weeks prior to the performance, with a copy to the Ensemble Committee—the Director, in consultation with his/her coaches, feels that the performance of a student or group of students will not meet a certain minimum standard established by the Director, the Director may cancel the performance of the student(s).

I. Discipline
The Director of an ensemble may recommend that a student withdraw from an ensemble for disciplinary reasons. A student asked to do so will be required to appear before the Ensemble Committee to show cause why he or she should not be required to withdraw.

Students who are required to withdraw from an ensemble for reasons of lack of preparation or discipline will be given a grade of F which will be reflected in their Grade Point Average (GPA).

J. Withdrawal
Withdrawal for any reason obliges the student to make up the credit(s) at a later date.

K. Exemption from a Required Ensemble
In order to be given permission not to participate in a required ensemble for a term or part thereof, a student must:

i. be a participant in a major national or international competition, or (in the case of voice students) be given a significant role with a recognized performing arts ensemble, and (in the case of all students) have completed the minimum number of required terms of the ensemble, and have the permission of:
   1. his or her practical teacher
   2. the area Chair
   3. the Director of the ensemble
   4. Chair of the Orchestral Training, Choral, Opera or Voice Area (where appropriate)
   5. Ensemble Committee

or

ii. have completed all program requirements except the final exam on his or her instrument

or

iii. have completed all musical requirements of his or her program, having only Arts and Science electives remaining
or iv. have a significant medical reason.

NOTE:
1. Permission not to participate in a required or complementary ensemble for a term or part thereof is not an exemption and does not satisfy any credit requirements for a degree.
2. Students who are given permission not to participate in Orchestra (MUEN 597 or MUEN 697) for a term or part thereof may be ineligible to hold an Orchestral Instruments Scholarship for that term and may be ineligible for consideration for an Orchestral Instruments Scholarship for the following year based on that term.

L. Substitution of an Ensemble
1. In order to be given permission to substitute another large ensemble for a required or complementary large ensemble for a term, a student must:
   i. have completed the minimum number of terms in the required or complementary large ensemble and
   ii. have the permission as in K.i. (1-5) above, with the added condition that the Director of the required or complementary large ensemble may refuse consent for the simple reason that the student is needed in that ensemble.
2. Keyboard and Guitar Performance majors in all programs may substitute up to two (2) terms of Studio Accompanying (MUEN 584) for two (2) terms of Choral Ensemble.
3. Performance majors are not permitted to substitute Basic Ensemble credits for required or complementary assigned small ensemble credits.

M. Rotation
Whenever possible and musically satisfactory, and in order to ensure equal opportunity and experience for students in the large instrumental ensembles, the seating of students in these ensembles may be rotated periodically throughout the term or year. The Director of the ensemble will determine whether or not rotation is possible and musically satisfactory.

N. Missed Classes due to Field Trips
Situations will arise where students are required to miss classes—both in the Schulich School of Music as well as in other faculties—because of field trips. Teaching staff in the Schulich School of Music are encouraged to assist students who approach them for information about course content and assignments that have been missed. Nonetheless, the onus remains on the student who goes on a field trip to complete class work.

O. Transfer Credits
The previous ensemble participation of students coming to McGill from other universities will be recognized if their ensemble experience was similar to that required of McGill students. In general, transfer credit is made on a term-for-term basis (not by credits) and usually does not exceed two (2) terms. Students are normally not permitted to reduce the Basic Ensemble Training requirements of their McGill program to less than the number of terms required for them to complete the rest of their program. In such cases, transfer credit may be given as Music Elective credit.

P. Extra Basic Ensemble Training Credits
Basic Ensemble Training credits accumulated above the minimum may be applied as Music Elective credits.

Q. Performance Library
Students are responsible for the music which has been loaned to them for their use, and for its return in good condition to the Performance Library. Students will be required to pay for the replacement of any music which has been lost, stolen or damaged.

10.5.2 Accompanying
All Music students registered for practical instruction (including elective study) are eligible for subsidized accompaniment up to a specified maximum number of hours. Students wishing to use this program should request further details from the Department of Performance office.

10.5.3 Academic Category
All Music students are registered in one of the following categories:

Major: B.Mus. candidates may choose one or more of several majors as described under section 10.6 “Programs of Study”.
Honours: A more intensive program than a major, B.Mus. students may choose one or more honours programs as described under section 10.6 “Programs of Study”. Generally, an honours degree in the appropriate field is prerequisite to graduate study.
Faculty Program: A general B.Mus. program (section 10.6.2.8 “Faculty Program”).
L.Mus., Artist Dip.: Diploma programs are designed for advanced instrumentalists and singers who wish to concentrate on their practical subject.
Special: Those who are not proceeding towards a degree or diploma.
Visiting: Those taking courses at McGill for credit towards a degree at another university.

10.5.4 Auditing
For information on auditing, see Auditing of Courses, section 3.3.14.

10.5.5 Music Electives
Unless otherwise specified, any music course numbered at the 200 level or higher which is not a required course in the student’s program can be counted as a Music Elective in the B.Mus. or Artist Diploma programs. Two credits per term of practical instruction may be applied as Music Electives only if the lessons are taken after completion of the final examination required in the student’s program. Practical instruction in a second instrument may be taken for elective credit at the 100 level under certain conditions. Consult the Department of Performance for details. Basic Ensemble credits accumulated above the minimum may be applied as Music Elective credits.

10.5.6 Non-Music Electives
In all B.Mus. programs, students are required to complete a minimum of 18 elective credits from courses offered by other faculties. Students admitted from high schools outside Quebec, not holding a DCS, must complete an additional 6 credits of non-music electives for a total of 24. Students holding a DCS in a non-Music program are exempt from 6 credits of their requirement. Students should note that certain programs have requirements in addition to the above.

The Schulich School of Music allows up to 12 credits in English as a Second Language as a non-music elective in the B.Mus. program. These credits may be taken in the Faculty of Arts at the Intermediate or Advanced level OR they may be taken at the Centre for Continuing Education at level 4 or above.

10.5.7 Course Changes
Students are permitted to change courses and/or sections of a course during the first two-week period of classes in each term. This is referred to as the official Course Change Period. Course and section changes are made by the student, using Minerva to access his/her record directly. Worksheets for this purpose are
available at the Student Affairs Office in the Strathcona Music Building. For more information, see section 3.3.8 “Regulations Concerning Course Withdrawal”.

Late course change requests, if approved, will be processed only upon payment of a fee of $25. No charge will be made for late changes imposed by the Faculty. If students’ registrations must be corrected after the Course Change Period to bring their records into conformity with the courses they are actually taking, the students will be charged the late fee.

10.5.8 Withdrawal from Course(s)

Students are permitted to withdraw from courses other than practical instruction or ensembles after the end of the Course Change Period. In such cases the student's mark in the course will be W. Course withdrawals are also processed on Minerva, within permissible dates. For more information, see section 3.3.8 “Regulations Concerning Course Withdrawal”.

The final deadlines for withdrawing from Music courses are:

For a one-term course: The end of the seventh week of classes.

For a two-term course: The end of the Course Change period in the second term.

THE DEADLINE FOR WITHDRAWING FROM PRACTICAL LESSONS AND ENSEMBLES IS THE END OF THE SECOND WEEK OF CLASSES IN ANY TERM.

Music students who, in special circumstances such as illness or injury, are given permission to withdraw from practical instruction after the end of the Course Change Period will be charged $65 per week (for 1-hour lessons; $97.50 for 1½ hours) up to a maximum equivalent to the total fees charged for the course. Full refunds for practical instruction will be given up to the end of the Course Change Period.

Note: Students who do not complete a course for which they remain registered will receive a grade of F or J.

For information on the REFUND POLICY, please see section 3.3.8 “Regulations Concerning Course Withdrawal”.

10.5.9 Incompletes

At the discretion of the instructor, a mark of K (Incomplete) may be given to a student who, due to extenuating circumstances, has not finished the coursework on time. The deadline for completion and submission of the required work shall be set by the instructor but may not be later than four months after the K was given. A special form for incompletes, available from the Student Affairs Office, must be signed by the student and the instructor by the last day of lectures. If the “Incomplete” is not removed by this time, the mark will be changed to KF (Incomplete Failed), unless an extension has been granted (KE). Completion of the course will cause the K to be replaced on official transcripts by the actual mark when the examination is written. A mark of L not cleared by mid-May makes the student ineligible for scholarships.

10.5.10 Deferrals

Deferred examinations are permitted in case of illness or other exceptional circumstances. A written request for the deferment of an examination (with the exception of practical examinations) must be submitted to the Senior Student Adviser; a practical music examination, to the Performance Department Chair.

A deferred examination will be entered as L, which will be replaced on official transcripts by the actual mark when the examination is written. A mark of L, not cleared by mid-May, makes the student ineligible for scholarships.

10.5.11 Supplementals

Supplemental examinations may be given at the discretion of the instructor. A student who receives a mark below 30% in a course is not permitted to take a supplemental examination but must repeat the course.

10.5.12 Rereading of Examinations

A student wishing to have an examination paper reread should apply in writing to the Departmental Chair. There is a non-refundable fee of $35. The mark given in the rereading, whether higher or lower, will replace the mark originally given. Any request to have a term paper or other coursework reassessed must be made directly to the instructor concerned.

10.5.13 Academic Standing

Academic standing is based primarily on students' cumulative grade point average (CGPA), but may also be affected by their term grade point average (TGPA). Academic standing, which is assessed after the end of each term, determines if students will be allowed to continue their studies in the next term and if any conditions will be attached to their registration.

Decisions about academic standing in the Fall term are based on grades that are available in January. Grades for courses in which students have deferred examinations and Fall-term grades for courses that span the Fall and Winter terms do not affect academic standing for the Fall term, even though they will ultimately affect students’ Fall TGPA. Therefore, academic standings for the Fall term are designated as “interim” and should be interpreted as advisory; moreover, interim standings will not appear on external transcripts. Interim standing decisions are mentioned below only if the rules for them differ from those for regular standing decisions.

Satisfactory/Interim Satisfactory Standing

Students in satisfactory standing may continue in their program.

• New students are admitted to satisfactory standing.

• Students with a CGPA of 2.00 or greater are in satisfactory standing.

Probationary/Interim Probationary Standing

Students in interim probationary standing may continue in their program, but should evaluate their course load and reduce it as appropriate. They are strongly advised to consult a departmental adviser, before the withdrawal deadlines, about their course selection for the Winter term.

• Students who were previously in satisfactory standing will be placed in probationary standing if their CGPA falls between 1.50 and 1.99.

• Students who were previously in probationary standing will remain in probationary standing if their CGPA falls between 1.50 and 1.99 and their TGPA is 2.50 or higher, although the TGPA requirement will not apply to the Summer term.

• Students who were previously in interim unsatisfactory standing will be placed in probationary standing if their CGPA falls between 1.50 and 1.99 and their TGPA is 2.50 or higher.

• Students who were previously in unsatisfactory standing and who were readmitted to the Faculty by the Associate Dean will be placed in probationary standing if their CGPA is less than 2.00, but if they satisfy relevant conditions specified in their letter of readmission.

Readmitted Unsatisfactory Standing

Students who were previously in unsatisfactory standing and who were readmitted to the Faculty by the Associate Dean will have their standing changed to readmitted unsatisfactory standing.
Their course load is specified in their letter of readmission as are the conditions they must meet to be allowed to continue in their program. They should see the Senior Student Adviser to discuss their course selection.

**Unsatisfactory/Interim Unsatisfactory Standing**

Students in interim unsatisfactory standing may continue in their program, but should evaluate their course load and reduce it as appropriate. They are strongly advised to consult the Senior Student Adviser, before the withdrawal deadlines, about their course selection for the Winter term.

Students in unsatisfactory standing who have failed to meet the minimum standards set by the Faculty may not continue in their program and their registration will be cancelled.

Appeals for readmission by students in unsatisfactory standing should be addressed to the Associate Dean no later than July 15 for re-admission to the Fall term and November 15 for the Winter term. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation). Students in unsatisfactory standing for the second time must withdraw permanently.

Normally, supplemental examinations are not permitted; however, students in unsatisfactory standing may appeal to the Senior Student Adviser for permission to write a supplemental examination, clearly stating the reasons for special consideration and providing proof as appropriate.

- Students will be placed in unsatisfactory standing (Winter or Summer term) or interim unsatisfactory standing (Fall term) if their CGPA falls or remains below 1.50.
- For the Fall and Winter terms, students who were previously in probationary, readmitted unsatisfactory, or interim unsatisfactory standing will be placed in unsatisfactory standing if their TGPA falls below 2.50 and their CGPA is below 2.00.
- Students who were previously in unsatisfactory standing and who were readmitted to the Faculty by the Dean who have not at least satisfied the conditions to attain probationary standing that were specified in the letter of re-admission will be placed in unsatisfactory standing.

**Incomplete Standings**

Standing awaits deferred exam.

Must clear K’s, L’s or Supplicants.

Standing Incomplete.

Students with incomplete standings in the Winter or Summer term may register for the Fall term, but their standing must be resolved by the end of the course change period for that term. Students whose incomplete standing changes to satisfactory, probationary, or interim unsatisfactory standing may continue in the program. Students whose standing changes to unsatisfactory standing may not continue in their program.

Students whose standing changes to unsatisfactory and who wish to ask for permission to continue in their program must make a request to the Dean as soon as they are placed in unsatisfactory standing. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation). Students whose standing is still incomplete by the end of Course Change Period should immediately consult with the Student Affairs Office.

### 10.5.14 Graduation Requirements

1. Completion of all courses and proficiency requirements specified in the candidate’s program. Students registered in two programs must fulfill all requirements for both programs. A grade of C or better must be achieved in all Required courses, all Complementary courses specified by course number, and in those courses which are prerequisites or corequisites. A grade of D (non-continuation pass) is acceptable only in terminal Elective courses or Complementary courses that are not specified by course number.
2. Minimum cumulative grade point average of 2.00.
3. Completion of a minimum of credits in residence at McGill University (B.Mus: 60 credits, L.Mus: 48 credits, Artist Dip: 32 credits).

For more information on applying to graduate, see section 3.9 “Graduation”.

#### 10.5.15 Graduation with Distinction

Students in B.Mus. programs whose academic performance is appropriate may be awarded their degrees with Distinction or High Distinction on the basis of their CGPA under the following conditions:

- The top 15% of the graduating class of each Department (Performance and Theory) will graduate with High Distinction.
- The next 10% of the graduating class of each Department (Performance and Theory) will graduate with Distinction.

Departments may recommend to the Faculty that students be awarded Outstanding Achievement in recognition of superior performance on an instrument or in an academic discipline.

The designation Dean’s Honour List may be awarded to a graduating student who, on the basis of his/her CGPA, is among the top 10% of the B.Mus. graduating class.

### 10.6 Programs of Study

#### 10.6.1 Four-Year Program (Prerequisite Courses)

Students who hold a high school graduation diploma (minimum years of schooling: 12) from other provinces, the United States or overseas may apply for admission to any of the Major or Honours programs leading to the Bachelor of Music Degree, and may be admitted to a program of approximately 120 credits, normally requiring four years to complete. These programs will include the following prerequisite courses in addition to the requirements listed in:

- section 10.6.2 “Department of Theory: Composition; Music History; Music Technology; Theory; Faculty Program”
- section 10.6.3 “Department of Performance”
- section 10.6.4 “Designated Major Program”
- or section 10.6.5 “B.Mus./B.Ed, Bachelor of Music and Bachelor of Education Concurrent Program”

**All students take:**

MUSP 172 Keyboard Lab 2 1
Practical Study 4 7

**Total for students other than Jazz or Performance Majors**: 33
### 10.6.2 Department of Theory:

**Composition; Music History; Music Technology; Theory; Faculty Program**

The Department embraces the disciplines of Composition, Music Education, Music History, Music Technology, and Theory at both the undergraduate and graduate levels, and Sound Recording at the graduate level. The philosophy of the Department is to encourage integration of the disciplines as much as possible within the learning process in each program of study: the development of basic musicianship, the absorption of the grammar and syntax of musical discourse, and the study of the world of ideas are understood as interconnected.

Honours programs provide a high degree of specialization and are a foundation for graduate-level study leading to academic careers in each discipline. Majors programs offer the student some focus with the flexibility to pursue other areas of interest. The Faculty Program is intended to offer an option for individual and creative plans of study. All of the Department's programs give a solid grounding in analytic, synthetic, and writing skills that are useful preparation not only for the musical profession but also for professions as diverse as law, journalism, management, and librarianship.

The Music Education program combines an orientation towards a professional career in primary and secondary schools with sensitivity to broader intellectual frameworks against which teachers should understand their roles. This program is offered concurrently with the B.Ed., Music.

Music Technology encourages interaction between musical creation, technology and research. The pedagogical goal of the Music Technology program is to provide students with an environment for professional-level music training with an intensive focus on programming of advanced music technologies. This training prepares students to meet the technological demands of contemporary composition and performance practice, and offers students a wide range of employment possibilities in the music technology and media industries.

The Department also offers a Minor in Music History to performance majors who seek to place their work in a larger context, and a Minor in Music Technology to Music and to B.A. and B.Sc. students.

For each program, all courses listed are REQUIRED Courses unless otherwise indicated.

### 10.6.2.1 B.Mus. with a Major in Composition

For prerequisite requirements for this program, see section 10.6.1 “Four-Year Program (Prerequisite Courses).”

### 10.6.2.4 B.Mus. with a Major in Music History
For prerequisite requirements for this program, see section 10.6.1 "Four-Year Program (Prerequisite Courses)".

#### REQUIRED HISTORY 3 credits
- MUHL 570 Research Methods in Music 3

#### COMPLEMENTARY HISTORY 21 credits
- 7 complementary courses from Groups I and II, with a minimum of two from each group.

##### Group I
- MUHL 220 Women in Music 3
- MUHL 377 Baroque Opera 3
- MUHL 379 Solo Song 1100-1700 3
- MUHL 380 Medieval Music 3
- MUHL 381 Renaissance Music 3
- MUHL 382 Baroque Music 3
- MUHL 395 Keyboard Literature before 1750 3
- MUHL 591D1 Paleography 1.5
- MUHL 591D2 Paleography 1.5
- MUPP 381 Topics: Performance Practice before 1800

##### Group II
- MUHL 330 Music and Film 3
- MUHL 342 History of Electroacoustic Music 3
- MUHL 362 Popular Music 3
- MUHL 366 The Era of the Fortepiano 3
- MUHL 372 Solo Song outside Germany and Austria 3
- MUHL 383 Classical Music 3
- MUHL 384 Romantic Music 3
- MUHL 385 Early Twentieth-Century Music 3
- MUHL 386 Chamber Music Literature 3
- MUHL 387 Opera from Mozart to Puccini 3
- MUHL 388 Twentieth-Century Opera 3
- MUHL 389 Orchestral Literature 3
- MUHL 390 The German Lied 3
- MUHL 391 Canadian Music 3
- MUHL 392 Music since 1945 3
- MUHL 393 History of Jazz 3
- MUHL 396 Era of the Modern Piano 3
- MUHL 397 Choral Literature after 1750 3
- MUHL 398 Wind Ensemble Literature after 1760 3
- MUPP 385 Topics: Performance Practice after 1800

### REQUIRED COURSES (20 credits)

#### THEORY 12 credits
- MUTH 210 Tonal Theory and Analysis 1 3
- MUTH 211 Tonal Theory and Analysis 2 3
- MUTH 310 Mid and Late 19th-Century Theory and Analysis 3
- MUTH 311 20th-Century Theory and Analysis 3

#### MUSICIANSHIP 8 credits
- MUSP 229 Musicianship 3 2
- MUSP 231 Musicianship 4 2
- MUSP 329 Musicianship 5 2
- MUSP 331 Musicianship 6 2

### REQUIRED PERFORMANCE 8 credits
- MUIN 220 Practical Instruction 3 2
- MUIN 221 Practical Instruction 4 2
- MUIN 320 Practical Instruction 5 2
- MUIN 321 Practical Instruction 6 2
- MUIN 322 Concentration 2 Examination 0

#### COMPLEMENTARY PERFORMANCE 8 credits from**:
- MUEN 573 Baroque Orchestra 2
- MUEN 590 McGill Winds 2
- MUEN 594 Contemporary Music Ensemble 2
- MUEN 595 Jazz Ensembles 2
- MUEN 597 Orchestral Ensembles 2

### NON-MUSIC ELECTIVES 18 credits

### FREE ELECTIVES 14 credits

### TOTAL CREDITS 92 credits

* A maximum of 2 credits of Complementary Ensemble may be substituted for 2 credits of Basic Ensemble Training, with Departmental approval.

### 10.6.2.5 B.Mus. with Honours in Music History
For prerequisite requirements for this program, see section 10.6.1 "Four-Year Program (Prerequisite Courses)".

#### REQUIRED HISTORY 6 credits
- MUHL 570 Research Methods in Music 3
- MUHL 591D1 Paleography 1.5
- MUHL 591D2 Paleography 1.5

#### COMPLEMENTARY HISTORY 9 credits from Groups I and II, with a minimum of three from each group.

##### Group I
- MUHL 220 Women in Music 3
- MUHL 377 Baroque Opera 3
- MUHL 379 Solo Song 1100-1700 3
- MUHL 380 Medieval Music 3
- MUHL 381 Renaissance Music 3
- MUHL 382 Baroque Music 3
- MUHL 395 Keyboard Literature before 1750 3
- MUPP 381 Topics: Performance Practice before 1800

##### Group II
- MUHL 330 Music and Film 3
- MUHL 342 History of Electroacoustic Music 3
- MUHL 362 Popular Music 3
- MUHL 366 The Era of the Fortepiano 3
- MUHL 372 Solo Song outside Germany and Austria 3
- MUHL 383 Classical Music 3
- MUHL 384 Romantic Music 3
- MUHL 385 Early Twentieth-Century Music 3
- MUHL 386 Chamber Music Literature 3
- MUHL 387 Opera from Mozart to Puccini 3
- MUHL 388 Twentieth-Century Opera 3
- MUHL 389 Orchestral Literature 3
- MUHL 390 The German Lied 3
- MUHL 391 Canadian Music 3
- MUHL 392 Music since 1945 3
- MUHL 393 History of Jazz 3
- MUHL 396 Era of the Modern Piano 3
- MUHL 397 Choral Literature after 1750 3
- MUHL 398 Wind Ensemble Literature after 1760 3
- MUPP 385 Topics: Performance Practice after 1800

### COMPLEMENTARY PERFORMANCE 27 credits
- 9 complementary courses from Groups I and II, with a minimum of three from each group.

### TOTAL CREDITS 110 credits

* A maximum of 2 credits of Complementary Ensemble may be substituted for 2 credits of Basic Ensemble Training, with Departmental approval.
### Group II

Total Credits: 92

### Special Requirements:
1. Cumulative Grade Point Average: minimum 3.00.
2. Minimum grade of B in all MUSIC HISTORY courses.
3. A maximum of 2 credits of Complementary Ensemble may be substituted for 2 credits of Basic Ensemble Training, with Departmental approval.

## 10.6.2.8  Faculty Program

The Faculty Program in Music has been designed to accommodate those students who are either undecided about the area of music in which they wish to specialize, or who are interested in a pattern of specialization not provided in the established majors and honours programs, or who are interested in combining studies in music with studies in other disciplines. Students registered in the Faculty Program may, with the approval of a staff adviser, design their own programs around specific interests or develop programs with a broader base by incorporating courses from other disciplines.

### REQUIRED COURSES (20 credits)

### 10.6.2.11 Minor in Music Technology

Available to Music students who wish to graduate with a knowledge of newer technologies and the impact they are having on the field of music.

Enrolment in the Minor in Music Technology program is highly restricted. Application forms will be available from the Academic Affairs Office of the Schulich School of Music (Room E235, Strathcona Music Building, 555 Sherbrooke Street West) from February 1, 2007 and must be completed and returned to that office by May 15, 2007. No late applications will be accepted and no students will be admitted to the Minor in January.

Students will be selected on the basis of their previous background or experience in music technology and/or sound recording, their computer programming skills, their expressed interest in the program, and their Cumulative Grade Point Average. Successful applicants will be notified June 1, 2007.

### 10.6.3 Department of Performance

The Department offers undergraduate and graduate degree programs leading to the B.Mus. and M.Mus., and diploma programs leading to the L.Mus. and Artist Diploma in all areas of musical performance. Programs include regular practical instruction available on all instruments and a highly developed ensemble program. The programs offer a number of major options including Orchestral Training, Solo, Jazz, Early Music, and Church Music. The Orchestral Training program is the largest performance program – many of its graduates are now members of professional orchestras throughout North America and Europe. McGill ensembles perform many concerts each year, including a number in centres across North America. (Within the past several years, McGill ensembles have performed at Carnegie Hall, Le Grand Théâtre (Quebec), the National Arts Centre, the International Buxtehude-Scheidt Festival, Lincoln Center, Roy Thomson Hall, Salle Wilfrid Pelletier, the International Association of Jazz Educators Convention in New...
Schulich School of Music

Orleans, in Washington and Boston, Paris, London and Cork [Ireland], and at the Holetown Festival in Barbados.) In addition, they have recorded for McGill Records. These recordings have received considerable critical acclaim and a number of awards, including a Noah Greenberg Award, three Grand Prix du Disques, and a Juno Award.

Performance Specialization is available in: Violin, Viola, Cello, Double Bass, Viola da Gamba, Guitar, Harp, Recorder, Flute, Oboe, Clarinet, Saxophone, Bassoon, French Horn, Trumpet, Trombone, Tuba, Percussion, Piano, Organ, Harpsichord, Voice, Baroque Instruments (Violin, Viola, Cello, Flute, Oboe, Bassoon). Performance Programs are also available in Church Music, Early Music, and Jazz.

For each program, all courses listed are REQUIRED Courses unless otherwise indicated.

Note: The course MUPG 100 Life as a Professional Musician is a requirement for all Performance students to be completed within the first year of study.

10.6.3.1 B.Mus. with a Major in Performance (Piano)

For prerequisite requirements for this program, see section 10.6.1 “Four-Year Program (Prerequisite Courses)”.

TOTAL CREDITS 99
Harpischord and Organ majors must take:
- MUPG 272D1 Continuo 2
- MUPG 272D2 Continuo 2

Harpischord majors must also take:
- MUPG 372D1 Continuo 1
- MUPG 372D2 Continuo 1

PERFORMANCE PRACTICE ELECTIVE 3
NON-MUSIC ELECTIVES 18
TOTAL CREDITS 93 - 99

Ensemble Requirements:
1. Students majoring in violin, viola, or cello must commence their assigned ensembles with four terms of string quartets.
2. Violin Majors will be required to complete two terms of ensemble playing on viola.

Special Requirements:
1. Cumulative Grade Point Average of 3.00 or better.
2. Continuation in the program requires a minimum grade of A- in practical instruction/exams and ensembles.

* Students majoring in Harpsichord and Baroque Instruments will take MUPP 381 (Topics: Performance Practice before 1800) instead of Contemporary Music Ensemble.

10.6.3.10 B.Mus. with a Major in Performance (Church Music)

For prerequisite requirements for this program, see section 10.6.1 "Four-Year Program (Prerequisite Courses)".

PERFORMANCE
- Practical: Organ Major (4 credits each term) 24
- Performance 3 Examination 12
- Basic Ensemble Training: Choral Ensemble during each of the first six terms 12
- MUPG 272D1 Continuo 2
- MUPG 272D2 Continuo 2

THEORY 12
- MUTH 210 Tonal Theory and Analysis 1 3
- MUTH 211 Tonal Theory and Analysis 2 3
- MUTH 310 Mid and Late 19th-Century Theory and Analysis 3
- MUTH 311 20th-Century Theory and Analysis 3

MUSICIANSHIP 8
- MUSP 229 Musicianship 3 2
- MUSP 231 Musicianship 4 2
- MUSP 329 Musicianship 5 2
- MUSP 331 Musicianship 6 2

HISTORY 6
- MUHL 399 Church Music 3

MUSIC HISTORY, LITERATURE OR PERFORMANCE PRACTICE COMPLEMENTARY
- (courses with a MUHL or MUPP prefix, may include MUHL 362 or MUHL 393 but not both) 3

MUSIC EDUCATION 9
- MUCT 315 Vocal Techniques 3
- MUCT 415 Choral Conducting 2 3

MUSIC ELECTIVES (with Departmental Approval) 6

ARTS AND SCIENCE ELECTIVES 18

Students are encouraged to include at least one course in the Faculty of Religious Studies.

TOTAL CREDITS 99

Special Requirements:
1. Continuation in the program requires a minimum grade of B- in practical instruction/exams and ensembles.
2. Students majoring in Church Music are not required to perform their examinations from memory.

10.6.3.11 B.Mus. with a Major in Early Music Performance

(Baroque Violin, Viola, Cello, Viola da Gamba, Flute, Recorder, Oboe, Voice, Organ, Harpsichord and Early Brass Instruments)

For prerequisite requirements for this program, see section 10.6.1 "Four-Year Program (Prerequisite Courses)".

REQUIRED PERFORMANCE 24
- MUIN 230 Performance Practical Instruction 3 4
- MUIN 231 Performance Practical Instruction 4 4
- MUIN 232 Performance 1 Examination 0
- MUIN 330 Performance Practical Instruction 5 4
- MUIN 331 Performance Practical Instruction 6 4
- MUIN 332 Performance 2 Examination 0
- MUIN 430 Performance Practical Instruction 7 4
- MUIN 431 Performance Practical Instruction 8 4
- MUIN 432 Performance 3 Examination 0

COMPLEMENTARY PERFORMANCE (18 credits)

Large Ensemble - during every term of enrolment as a full-time or part-time student.
12 credits from:
- MUEN 572 Cappella Antica 2
- MUEN 573 Baroque Orchestra 2
- MUEN 593 Choral Ensembles 2
- MUEN 580 Early Music Ensemble (1cr. x 6 semesters) 1

Voice Majors: Students must complete two terms of Choral Ensemble and may choose Cappella Antica or Collegium Musicum to make up the total of 12 credits.

Instrumentalists: students must register in Collegium Musicum.
- Keyboard players: students must normally register in Choral Ensemble but with the permission of the Area Chair may play continuo in Collegium Musicum to satisfy their Basic Ensemble requirement.
- Assigned small ensemble - during every term of enrolment as a full-time or part-time student 6 credits of the following:
- MUEN 580 Early Music Ensemble (1cr. x 6 semesters) 6
- With the permission of the instructor and the Area Chair, students may participate in a second Basic Ensemble to fulfill the Early Music Ensemble requirement. Any extra credits earned may be applied as music electives.

REQUIRED COURSES (20 Credits)

THEORY 12
- MUTH 210 Tonal Theory and Analysis 1 3
- MUTH 211 Tonal Theory and Analysis 2 3
- MUTH 310 Mid and Late 19th-Century Theory and Analysis 3
- MUTH 311 20th-Century Theory and Analysis 3

MUSICIANSHIP 8
- MUSP 229 Musicianship 3 2
- MUSP 231 Musicianship 4 2
- MUSP 329 Musicianship 5 2
- MUSP 331 Musicianship 6 2

COMPLEMENTARY MUSIC HISTORY, LITERATURE OR PERFORMANCE PRACTICE 9
- MUPP 381 Topics: Performance Practice before 1800 3

plus 6 complementary credits from the following with at least one course from each group.

(a) MUHL 380 Medieval Music 3
- MUHL 381 Renaissance Music 3
- MUHL 382 Baroque Music 3
- MUHL 383 Classical Music 3

(b) MUHL 395 Keyboard Literature before 1750 3
- MUHL 570 Research Methods in Music 3
MUHL 591D1 Paleography 1.5
and MUHL 591D2 Paleography 1.5

MUSIC ELECTIVES 6 or 8
(except for Harpsichord, Organ or Voice students)

Harpischord/Organ majors must include the following:
MUPG 272D1 Continuo 2
MUPG 272D2 Continuo 2
MUPG 372D1 Continuo 1
MUPG 372D2 Continuo 1

Voice majors must include the following:
MUPG 210 Italian Diction 2
MUPG 211 French Diction 2
MUPG 212 English Diction 2
MUPG 213 German Diction 2

8

NON-MUSIC ELECTIVES* 18
TOTAL CREDITS 95 or 97

Special Requirements:
1. Continuation in the program requires a minimum grade of B- in practical instruction/exams and ensembles.

2. *Prior to, or concurrent with registration in the corresponding Diction courses, the Voice Major must furnish evidence of having completed ESLN 400 or ESLN 401, ITAL 205D1/ITAL 205D2, GERM 202, and FRSL 207, or their equivalent. This language requirement may be fulfilled by appropriate High School or CEGEP courses, or as part of the non-music elective requirements above, or by extra University courses.

10.6.3.12 B.Mus. with Honours in Early Music Performance (Baroque Violin, Viola, Cello, Viola da Gamba, Flute, Recorder, Oboe, Voice, Organ, Harpsichord and Early Brass Instruments)

For prerequisite requirements for this program, see section 10.6.1 “Four-Year Program (Prerequisite Courses)”.

TOTAL CREDITS 98

Special Requirements:
1. Students majoring in Jazz Performance must achieve a minimum grade of B- in all Jazz courses and Practical Instruction/Exams, including Jazz Combo and Ensembles, excluding MUJZ 1xx courses.
2. Prior to graduation, all woodwind Jazz Performance Majors (saxophone, clarinet, flute) will be required to pass a non-credit Doubling Proficiency test (two of: MUIN 180, MUIN 181, and/or MUIN 182) on their two non-major instruments.

Note: MUIT 356 may be substituted by graduate pedagogy course (MUJZ 601).

| TOTAL CREDITS | 92 |

Special Requirements:
* The courses comprising the major field are selected in consultation with a faculty adviser. The complete program for a student must be approved by the relevant department, the Executive Committee and by Faculty Council. The required and complementary courses represent the minimum requirement in the areas of Theory, Musicianship, History, Practical and Ensemble. More advanced-level courses may be substituted in these areas if desired. When appropriate, certain of the required or complementary courses may comprise part of the Designated Major Area, in which case additional courses must be taken to make up the required 92 credits.

** Maximum of 2 credits of Complementary Ensemble may be substituted for 2 credits of Basic Ensemble Training, with Departmental approval.

McGill University, Undergraduate Programs 2007-2008  299
### 10.6.5 B.Mus./B.Ed. Bachelor of Music and Bachelor of Education Concurrent Program

The Bachelor of Education in Music is an integrated four-year 120/121-credit program of initial teacher training that leads to certification as a teacher in the Province of Quebec. When offered concurrently with the Bachelor of Music (Major in Music Education), the program offers students the opportunity to obtain a Bachelor of Education degree and a Bachelor of Music degree after the completion of 143/144 credits, normally five years (173/174 credits or six years for out-of-province students). The concurrent program combines academic studies in music, professional studies and field experience. The two degrees are awarded during the same convocation period.

To be admitted to the Concurrent Program, students must satisfy the regular admission requirements of the Faculty of Education and the Schulich School of Music. Normally, students will be admitted to both components of the Concurrent Program simultaneously. Applicants who already hold a Bachelor of Music degree should apply to the Faculty of Education. Students who have completed 30 or more credits in a Bachelor of Music program, exclusive of the Freshman Year for out-of-province students, may apply for admission to the Concurrent Program.

All applications for the Concurrent Program are to be made to the Admissions Office of the Schulich School of Music.

Music Education in the Schulich School of Music focuses on the development of the prospective music educator as a musician. This is achieved not only through core music history, theory, musicianship, and performance courses but also through different instrumental, vocal and conducting techniques courses. Laboratory experiences provide an opportunity to develop facility with basic music rehearsing/teaching techniques, with emphasis on the ability to diagnose and correct technical and musical problems.

The components of the 143/144-credit Bachelor of Education in Music/Bachelor of Music (Music Education) are as follows:

- 53/54 professional credits,
- 78 music academic credits (including 9 music elective credits),
- 12 elective credits.

Students who wish to complete only the Bachelor of Education in Music have the option of doing so after the successful completion of the first two years of the Concurrent Program and completion of MUIN 321 Concentration 2 Exam or equivalent. Students who decide to complete only a Bachelor of Music may transfer at any time into the Bachelor of Music, Faculty Program. Students in the Concurrent B.Mus./B.Ed. who receive an F or J in any Field Experience course must pass the course before they are placed in unsatisfactory standing. Although they may complete their term, they are required to withdraw from the Concurrent Program; however, they may apply to transfer to the B.Mus. Faculty Program.

**CONCURRENT BACHELOR OF MUSIC (MUSIC EDUCATION) AND BACHELOR OF EDUCATION IN MUSIC PROGRAM (143/144 credits)**

For prerequisite requirements for this program, see section 10.6.1 "Four-Year Program (Prerequisite Courses)".

### PERFORMANCE COURSES 16

- Practical Concentration 8
- Basic Ensemble Training 8

### COMPLEMENTARY MUSIC HISTORY COURSES 6

- 3 credits chosen from Music History (MUHL) offerings at the 300 level 3
- 3 credits of Music History/Literature chosen from:
  - MUHL 389 Orchestral Literature 3
  - MUHL 397 Choral Literature after 1750 3
  - MUHL 398 Wind Ensemble Literature after 1750 3

### MUSIC EDUCATION COURSES 25

- MUCT 235 Vocal Techniques 3
- MUGT 215 Basic Conducting Techniques 1
- MUGC 365 Music for Children 1: Philosophy and Techniques 3
- MUGC 357 Music for Children 2: Philosophy and Techniques 3
- MUGC 401 Issues in Music Education 3
- MUIT 202 Woodwind Techniques 3
- MUIT 203 Brass Techniques 3
- MUIT 204 Percussion Techniques 3
- MUIT 356 Jazz Instruction: Philosophy and Techniques 3

### COMPLEMENTARY MUSIC EDUCATION COURSES 9

- MUIT 201 String Techniques 3
- or MUIT 250 Guitar Techniques 3
- MUCT 315 Choral Conducting 1 3
- or MUIT 315 Instrumental Conducting 3
- EDEA 362 Movement, Music and Communication 3
- or any course with a prefix of MUIT or MUGC

### ELECTIVE 12

### PROFESSIONAL COMPONENTS 53 - 54

#### PROFESSIONAL SEMINARS 4

- EDEA 206 1st Year Professional Seminar 1
- EDEA 407 Final Year Professional Seminar Music 3

#### FIELD EXPERIENCE 20

- Required Courses
  - EDFE 205 First Year Field Experience (Music) 2
  - EDFE 208 Second Field Experience (Music) 3
  - EDFE 308 Third Year Field Experience (Music) 8
  - EDFE 407 Fourth Year Field Experience Music 7

#### FOUNDATION COURSES 12

- Required Courses
  - EDEC 215 English Language Requirement 0
  - EDEC 247 Policy Issues in Quebec Education 3
  - EDPE 300 Educational Psychology 3
  - EDPI 309 Exceptional Students 3

#### Complementary Courses

- EDEC 260 Philosophical Foundations 3
- or EDEC 261 Philosophy of Catholic Education 3

  - EDEC 442 Elementary Music Curriculum and Instruction 3
  - EDEC 472 Secondary Music Curriculum and Instruction 3

#### PEDAGOGICAL SUPPORT COURSES 11 - 12

- one of:
  - EDEC 248 Multicultural Education 3
  - EDEC 233 First Nations and Inuit Education 2
- one of:
  - EDES 352 Classroom Practices 3
  - EDES 350 Classroom Practices (Secondary) 3
- one of:
  - EDEC 262 Media, Technology and Education 3
10.7 Practical Subjects

10.7.1 Practical Assignments and Lessons

10.7.1.1 Registration/Withdrawal

Registration for practical instruction and examinations is not available on Minerva. Students are reminded to submit a Lesson Assignment Card to the Department of Performance by the specified deadlines. Practical Instruction will then be added onto students' records.

The deadline for withdrawing from practical lessons is the end of the second week of classes in any term.

10.7.1.2 Assignment of Teachers

The assignment of students to teachers for private lessons is the responsibility of the Chair of the Department of Performance. Student requests for specific teachers will be taken into consideration where possible. In general, students will be assigned on a first priority basis to study with full-time members of the teaching staff.

It is understood that returning students will study with the same teacher unless prior arrangements have been made with the Chair of the Department in consultation with the teachers concerned. However, those students who do not return the Lesson Assignment Card (including Voice Coaching) by the specified deadline cannot be guaranteed the teacher of their choice, and they will be assessed a late fee of $25. Teacher assignments will be made soon after the period of enrolment and posted on the notice boards during the first week of classes. Following this assignment, it is the students’ responsibility to contact their teachers and arrange lesson times.

Individual lessons missed as a consequence of the instructor’s absence will be made up at the mutual convenience of the instructor and student. Lessons missed as the result of the student’s absence will be made up only if notice of cancellation has been given 48 hours in advance, or if a doctor’s certificate is produced and prior notice of the cancellation is given.

Note: Students who are taking practical lessons in fulfillment of the requirements for any degree are required to study with teachers on the staff of the Schulich School of Music.

10.7.1.3 Credit Weights for Practical Study

B.Mus. Elective or Concentration 2 credits per term
B.Mus. Major or Honours 4 credits per term
L.Mus. 8 credits per term
Artist Diploma 8 credits per term

10.7.2 Examinations and Goals in Practical Subjects

Different levels of achievement are required of students depending upon the program of study for which they are registered. These levels are defined in part by the difficulty of material and length of program required at the various examinations, and in part by the examiners’ assessment of how well the student plays this material.

In general there are five categories of practical study:

Concentration Study, Major and Honours Study, Licentiate Study, Postgraduate Study, and Elective Study.

10.7.2.1 Concentration Study

A student in the Faculty Program or specializing in Composition, Music Education, Music History, Music Technology, or Theory is obliged to present two examinations in order to fulfill the practical requirement of these programs. These are: the Concentration 1 Examination MUIN 222 and the Concentration 2 Examination MUIN 322.

The sequence would normally be:

- MUIN 120 Practical Instruction 1
- MUIN 121 Practical Instruction 2
- MUIN 220 Practical Instruction 3
- MUIN 221 Practical Instruction 4
- MUIN 222 Concentration 1 Examination
- MUIN 320 Practical Instruction 5
- MUIN 321 Practical Instruction 6
- MUIN 322 Concentration 2 Examination

Concentration 1 Examination (MUIN 222)

Purpose: To assess the student’s progress in the practical area and make recommendations for further study. The panel may recommend to the Department in which the student is registered that:

- a) the student be asked to withdraw from the program; or
- b) the student, having made sufficient progress, may proceed to the Concentration 2 Exam.

Panel: A minimum of two staff members (not including the teacher), one of whom must be from the area. The panel is appointed by the Chair of the Department of Performance. At the discretion of the Departmental Chair, the teacher may be included on panels of three or more examiners.

Distribution of Marks: For students registered in practical lessons through the Schulich School of Music, the teacher submits a term mark which is included as 50% of the final mark. In instances where the student’s teacher is on the panel, the teacher’s global evaluation will nevertheless be equal to 50% of the final mark. This grade will also be entered in the student’s current or most recent term of practical instruction. When a student is not registered for lessons through the Schulich School of Music, the final mark will be the average of the marks submitted by the examination panel and will also be entered in the most recent term of practical instruction.

Concentration 2 Examination (MUIN 322)

Purpose: To determine that the student is sufficiently accomplished to qualify for the degree of Bachelor of Music.

Panel: A minimum of two staff members (not including the teacher), one of whom must be from the area. The panel is appointed by the Chair of the Department of Performance. At the discretion of the Departmental Chair, the teacher may be included on panels of three or more examiners.

Distribution of Marks: For students registered in practical lessons through the Schulich School of Music, the teacher submits a term mark which is included as 33% of the final mark. In instances where the student’s teacher is on the panel, the teacher’s global evaluation will nevertheless be equal to 33% of the final mark. This grade will also be entered in the student’s current or most recent term of practical instruction. When a student is not registered for lessons through the Schulich School of Music, the final mark will be the average of the marks submitted by the examination panel and will also be entered in the most recent term of practical instruction.

10.7.2.2 Major and Honours Study

A student majoring in Performance (B.Mus. or L.Mus.) must show talent for this field before being admitted to the program. The practical requirement for these programs comprises examinations and recitals as specified in the programs.

Any U1 Performance Major (except Jazz Performance) may indicate an intention to pursue an Honours program but admission becomes final only after the results of the Major Performance 1 Exam are available. Admission to the Honours program requires a grade of A- or better in the Performance 1 Exam (or most recent exam), a GPA of 3.00 or better, the approval of the student’s
teacher and the examining panel. Following the Major Performance 1 Exam, Honours students must present the Honours Performance 2 Exam and the Honours Performance 3 Exam.

B.MUS. MAJOR IN PERFORMANCE, MAJOR IN EARLY MUSIC PERFORMANCE, AND MAJOR IN JAZZ PERFORMANCE

The sequence would normally be:

- MUIN 130 Performance Practical Instruction 1
- MUIN 131 Performance Practical Instruction 2
- MUIN 230 Performance Practical Instruction 3
- MUIN 231 Performance Practical Instruction 4
- MUIN 232 Performance 1 Examination
- MUIN 330 Performance Practical Instruction 5
- MUIN 333 Piano Techniques 2
- MUIN 331 Practical Instruction 6
- MUIN 332 Performance 2 Examination
- MUIN 430 Performance Practical Instruction 7
- MUIN 433 Piano Techniques 3
- MUIN 431 Performance Practical Instruction 8
- MUIN 432 Performance 3 Examination
- MUIN 369 Concerto (mandatory test for pianists)

Performance 1 Examination (MUIN 232)

Purpose: To assess the student’s progress in the practical area and determine whether or not the student may continue in the program. The panel may recommend to the Department that the student be: a) asked to withdraw from the program; b) permitted to continue to the Performance 2 Exam; c) admitted to the Performance Honours program.

Panel: A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.

Distribution of Marks: The teacher submits a term mark which is included as 50% of the final mark. In instances where the student’s teacher is on the panel, the teacher’s global evaluation will nevertheless be equal to 50% of the final mark. This grade will also be entered in the student’s current or most recent term of practical instruction.

Performance 2 Examination (MUIN 332)

Purpose: To assess the student’s ability to perform a program of sufficient length and suitable repertoire as specified in the requirements for each instrument.

Panel: A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.

Distribution of Marks: Each member of the panel submits a mark for the examination, with the final mark being the average. This grade will also be entered in the student’s current or most recent term of practical instruction.

Performance 3 Examination (MUIN 432)

Purpose: All recitals are to be performed in public before a jury and are intended to demonstrate technical mastery of their instrument/voice as well as an understanding of different musical styles appropriate to their level of study.

Panel: A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.

Distribution of Marks: Each member of the panel submits a mark for the examination, with the final mark being the average. This grade will also be entered in the student’s current or most recent term of practical instruction.

B.MUS. HONOURS IN PERFORMANCE AND IN EARLY MUSIC PERFORMANCE

The sequence would normally be:

- MUIN 130 Performance Practical Instruction 1
- MUIN 131 Performance Practical Instruction 2
- MUIN 230 Performance Practical Instruction 3
- MUIN 231 Performance Practical Instruction 4
- MUIN 232 Performance 1 Examination
- MUIN 340 Honours Practical Instruction 5
- MUIN 333 Piano Techniques 2
- MUIN 341 Honours Practical Instruction 6
- MUIN 342 Honours Performance 2 Examination
- MUIN 369 Concerto (mandatory test for pianists)
- MUIN 440 Honours Practical Instruction 7
- MUIN 442 Honours Performance 3 Examination
- MUIN 433 Piano Techniques 3
- MUIN 441 Honours Practical Instruction 8

Performance 1 Examination (MUIN 232)

Purpose: To assess the student’s progress in the practical area and determine whether or not the student may continue in the program. The panel may recommend to the Department that the student be: a) asked to withdraw from the program; b) permitted to continue to the Performance 2 Exam; c) admitted to the Performance Honours program.

Panel: A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.

Distribution of Marks: The teacher submits a term mark which is included as 50% of the final mark. In instances where the student’s teacher is on the panel, the teacher’s global evaluation will nevertheless be equal to 50% of the final mark. This grade will also be entered in the student’s current or most recent term of practical instruction.

Honours Performance 2 Examination (MUIN 342)

Purpose: The recital is a public presentation, before a jury, intended to demonstrate competence in public solo performance. Non-keyboard performers and singers must use appropriate accompaniment.

Panel: A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.

Distribution of Marks: Each member of the panel submits a mark for the examination, with the final mark being the average. This grade will also be entered in the student’s current or most recent term of practical instruction.

Honours Performance 3 Examination (MUIN 442)

Purpose: All recitals are to be performed in public before a jury and are intended to demonstrate technical mastery of their instrument/voice as well as an understanding of different musical styles appropriate to their level of study.

Panel: A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.

Distribution of Marks: Each member of the panel submits a mark for the examination, with the final mark being the average. This grade will also be entered in the student’s current or most recent term of practical instruction.

10.7.2.3 Licentiate Study

A student must show talent for this field before being admitted to the program. Grades of A-in all practical requirements are mandatory for continuation in the program.

L.MUS. PERFORMANCE

The sequence would normally be:

- MUIN 250 L.Mus. Practical Instruction 1
- MUIN 251 L.Mus. Practical Instruction 2
- MUIN 252 L.Mus. Performance 1 Examination
- MUIN 250 L.Mus. Practical Instruction 3
- MUIN 333 Piano Techniques 2
- MUIN 351 L.Mus. Practical Instruction 4
- MUIN 352 L.Mus. Performance 2 Examination
- MUIN 450 Practical Instruction
- MUIN 433 Piano Techniques 3
- MUIN 451 L.Mus. Practical Instruction 6
- MUIN 452 L.Mus. Performance 3 Examination
- MUIN 369 Concerto (mandatory test for pianists)
L.Mus. Performance 1 Examination (MUIN 252)
*Purpose:* To assess the student’s progress in the practical area and determine whether or not the student may continue in the program. The panel may recommend to the Department that the student be: a) asked to withdraw from the program; or b) permitted to continue to the L.Mus. Performance 2 Exam.
*Panel:* A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.
*Distribution of Marks:* The teacher submits a term mark which is included as 50% of the final mark. In instances where the student’s teacher is on the panel, the teacher’s global evaluation will nevertheless be equal to 50% of the final mark. This grade will also be entered in the student’s current or most recent term of practical instruction.

L.Mus. Performance 2 Examination (MUIN 352)
*Purpose:* The recital is a public presentation, before a jury, intended to demonstrate competence in public solo performance. Non-keyboard performers and singers must use appropriate accompaniment.
*Panel:* A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.
*Distribution of Marks:* Each member of the panel submits a mark for the examination, with the final mark being the average. This grade will also be entered in the student’s current or most recent term of practical instruction.

L.Mus. Performance 3 Examination (MUIN 452)
*Purpose:* All recitals are to be performed in public before a jury and are intended to demonstrate technical mastery of their instrument/voice as well as an understanding of different musical styles appropriate to their level of study.
*Panel:* A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.
*Distribution of Marks:* Each member of the panel submits a mark for the examination, with the final mark being the average. This grade will also be entered in the student’s current or most recent term of practical instruction.

10.7.2.4 Postgraduate Study
Artist Diploma candidates must present a number of public recitals and fulfill various special performance requirements (concertos, chamber music, orchestral passages, etc.). Grades of A- in all practical requirements are mandatory for continuation in the program.
M.Mus. candidates should consult the Graduate and Postdoctoral Studies Calendar for requirements of their program.

ARTIST DIPLOMA
The sequence would normally be:
- MUIN 460 Artist Diploma Practical Instruction 1
- MUIN 461 Artist Diploma Practical Instruction 2
- MUIN 462 Artist Diploma Recital 1
- MUIN 560 Artist Diploma Practical Instruction 3
- MUIN 561 Artist Diploma Practical Instruction 4
- MUIN 562 Artist Diploma Recital 2
- MUIN 563 Artist Diploma Recital 3

In addition, the Artist Diploma program in orchestral instruments, piano and voice requires the candidate to present two concertos:
- MUIN 469 Artist Diploma Concerto 1
- MUIN 469 Artist Diploma Concerto 2
- MUIN 569 Artist Diploma Concerto 1
- MUIN 569 Artist Diploma Concerto 2

Applications for Artist Diploma Concerto hearings must be submitted to the Department of Performance Office five (5) weeks prior to the proposed date. The concerto examinations may be planned for any time during the academic session subject to the availability of examiners and facilities.

Artist Diploma Recital 1 (MUIN 462)
*Purpose:* Recital programs are intended to demonstrate that the student is qualified to engage in professional performance activities, and has attained the high level of performing ability required for the Artist Diploma.
*Panel:* The panel consists of the Departmental Chair or delegate as well as two staff members from the area concerned (in Voice recitals, one voice teacher plus one staff member from another area).
*Distribution of Marks:* Examiners judge the recital independently and submit their evaluation without consulting the other examiners. All of the examiners must judge the recital to be satisfactory for the candidate to pass. This grade will also be entered in the student’s current or most recent term of practical instruction.

Artist Diploma Recital 2 (MUIN 562)
*Purpose:* Recital programs are intended to demonstrate that the student is qualified to engage in professional performance activities, and has attained the high level of performing ability required for the Artist Diploma.
*Panel:* The panel consists of the Departmental Chair or delegate as well as two staff members from the area concerned (in Voice recitals, one voice teacher plus one staff member from another area).
*Distribution of Marks:* Examiners judge the recital independently and submit their evaluation without consulting the other examiners. All of the examiners must judge the recital to be satisfactory for the candidate to pass. This grade will also be entered in the student’s current or most recent term of practical instruction.

Artist Diploma Recital 3 (MUIN 563)
*Purpose:* Recital programs are intended to demonstrate that the student is qualified to engage in professional performance activities, and has attained the high level of performing ability required for the Artist Diploma.
*Panel:* The panel consists of the Departmental Chair or delegate as well as two staff members from the area concerned.
*Distribution of Marks:* Examiners judge the recital independently and submit their evaluation without consulting the other examiners. All of the examiners must judge the recital to be satisfactory for the candidate to pass.

Artist Diploma Concerto 1 (MUIN 469)
*Purpose:* The Artist Diploma program in orchestral instruments, piano and voice requires the candidate to present concertos which are normally examined only by a jury. The concerto examinations may be planned for any time during the academic session subject to the availability of examiners and facilities.
*Panel:* A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.
*Distribution of Marks:* Examiners judge the concerto independently and submit their evaluation without consulting the other examiners. All the examiners must judge the concerto to be satisfactory for the candidate to pass.

Artist Diploma Concerto 2 (MUIN 569)
*Purpose:* The Artist Diploma program in orchestral instruments, piano and voice requires the candidate to present concertos which are normally examined only by a jury. The concerto examinations may be planned for any time during the academic session subject to the availability of examiners and facilities.
*Panel:* A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.
*Distribution of Marks:* Examiners judge the concerto independently and submit their evaluation without consulting the other examiners. All the examiners must judge the concerto to be satisfactory for the candidate to pass.
10.7.2.5 Elective Study
Students may elect to pursue further practical study in addition to their curricular requirements. The student is not expected to follow a specific program. Additional fees apply.

10.7.3 Practical Examinations
Details of specific examination requirements for each area (Brass, Early Music, Guitar, Harp, Jazz, Organ, Percussion, Piano, Strings, Voice, Woodwinds) may be obtained from the Department of Performance Office.

10.7.3.1 Application for Examination
Examinations and recitals must be presented in one of the examination periods. When a student and his/her teacher agree to present a required practical examination, the student must make an application by the deadline specified below. Permission to withdraw from, or postpone, a practical examination will normally be granted only in the case of illness. A medical certificate must be submitted to the Departmental Secretary within seven days after the withdrawal request has been received. Withdrawal from a practical examination on other than medical grounds must be authorized by the Departmental Chair.

Application for the above examinations must be made on the appropriate form available at the Performance Academic Affairs Office. Applicants must obtain their teachers’ approval on this form and submit it according to the following schedule.

<table>
<thead>
<tr>
<th>Examination Period</th>
<th>Application Deadline*</th>
<th>Deadline for Cancellations</th>
</tr>
</thead>
<tbody>
<tr>
<td>September 10-14, 2007**</td>
<td>June 1***</td>

<td>October 15</td>
<td>October 31</td>
</tr>
<tr>
<td>April 11-30, 2008</td>
<td>February 1</td>
<td>March 1</td>
</tr>
</tbody>
</table>

*All students must apply by this deadline. Applications may be withdrawn without penalty any time up to the deadline for cancellations given above.

**The September examination period is available only for Summer graduands. No supplemental or deferred examinations will be given at this time.

***It is recommended that students planning to take an examination in September submit the program for approval before the end of May otherwise the program may not be seen by the Area Committee until September.

Applications received after these deadlines will only be accepted with special permission for the Performance Departmental Chair and on payment of a $25 late application fee.

10.7.3.2 Examination Marking
Normally, the final mark for any practical examination is the average of all the marks submitted by the individual examiners. In addition, however, at least half of the examiners on the panel must pass the student in order to continue to the next level of examination. (NB: the passing grade in the Honours, L.Mus. and Artist Diploma programs is A-; in the Major Performance programs, it is B-.) In instances where the average mark is a passing grade but a majority of the panel has failed the student, the final mark will be the letter grade immediately below the required passing grade.

Cherney, Brian; Mus.Bac., Mus.M., Ph.D.(Tor.); Professor; Composition, Theory and Analysis, History and Literature
Ferguson, Sean; B.Mus.(Alta.), M.Mus., D.Mus.(McG.); Assistant Professor; Composition; Director, Digital Composition Studio

Del Rame, Denys; L.Mus.(McG.); Montreal Symphony; Instructor
Gaudreault, Jean; LL.L.(Montr.), Graduate, Conservatoire de Musique de Québec; Montreal Symphony; Assistant Professor
Zirbel, John; B.Mus.(Wisc.); Principal Horn, Montreal Symphony; Associate Professor

Trumpet
DeVuyst, Russell; B.Mus.Ed.(Boston Cons.), M.M.(New England Cons.); Associate Principal, Montreal Symphony; Assistant Professor
Merkelo, Paul; B.Mus.(Eastman); Principal Trumpet, Montreal Symphony; Instructor

Trombone
Box, James; M.M.(S. Methodist), M.M.(Cleveland Inst. Music); Principal Trombone, Montreal Symphony; Assistant Professor
Burden, Douglas; National Arts Centre Orchestra; Instructor
Dix, Trevor; M.Mus.(McG.); Instructor
Lee, Vivian; Montreal Symphony; Instructor
Martin, David; Montreal Symphony; Instructor

Tuba/Euphonium
Cazes, Alain; Premier Prix(Conservatoire de Montréal); Assistant Professor
Johnson, Sasha; Instructor
Miller, Dennis; Principal Tuba, Montreal Symphony; Assistant Professor

CHORAL AREA
Ingari, Robert; Assistant Professor
Wachtner, Julian; B.Mus., Mus.Doc.(Boston); Associate Professor; Principal Conductor, Opera McGill; Choral Area Chair

EARLY MUSIC AREA
Beauséjour, Luc; Instructor; Harpsichord
Beghin, Tom; Diplome Supérieur(Louvain), M.A., D.M.A.(C'nell); Associate Professor; Fortepiano
Bergeron, Sylvain; B.Mus.(Laval); Instructor; Lute
Grew, John; L.T.C.L.(Lond.), B.Mus.(Mt. All.), M.Mus.(Mich.), D.D.(United Theological Coll.), LL.D.(Mt.All.); University Organist; Professor; Organ Area Chair; Organ, Harpsichord
Guimond, Claire; B.Mus.(McG.); Instructor; Baroque Flute
Haynes, Bruce; Instructor; Baroque Oboe
Jennewein, Matthew; B.A.(Sask.); B.Mus.(Br. Col.); Instructor; Baroque Oboe
Kinos, Valerie; B.A.(McG.); Assistant Professor; Early Music, Voice
Kirk, Douglas; B.S., B.A.Mus. Hons.(Iowa), M.M.(Texas at Austin), Ph.D.(McG.); Instructor; Cornetto
Knox, Hank; B.Mus., M.Mus.(McG.); Associate Professor; Early Music Area Chair; Continuo, Harpsichord (William Dawson Scholar)
Lortie, Dominique; Instructor; Sackbut
Lussier, Mathieu; Instructor; Baroque Bassoon
MacMillan, Betsy; B.Mus.(W.Ont.); M.Mus.(McG.); Instructor; Viola da Gamba
Maute, Matthias; Instructor; Recorder
Michaud, Nathalie; B.A.(OTT.), Cert. of Interpretation(The Hague), M.A.(Montr.); Instructor; Recorder
Napper, Suzie; Instructor; Baroque Cello
Oldengarm, Jonathan; B.Mus.(W.Laur.); M.Mus., Artist Dip., D.Mus.(McG.); Instructor, Continuo
Plouffe, Hélène; Instructor; Baroque Viola
Rémiillard, Chantal; B.Mus.(Montr.); Instructor, Baroque Violin

ENSEMBLES
Bouiliane, Denys; B.Mus., M.Mus.(Laval), Graduate, Hochschule für Musik (Hamburg); Associate Professor; Contemporary Music Ensemble
Cazes, Alain; Premier Prix(Conservatoire de Montréal); Assistant Professor; Wind Symphony, Wind Orchestra
Di Lauro, Ron; B.Mus.(McG.); Instructor; Jazz Orchestra II
Foote, Gordon; B.Sc., M.A.(Minn.); Associate Professor; Jazz Orchestra I
Hauser, Alexis; Diplom(Konservatorium der Stadt, Wien); Associate Professor; McGill Symphony Orchestra
Thériault, Madeleine; Instructor; Jazz Vocal Workshop
Kennedy, Donny; B.Mus., M.Mus.(McG.); Jazz Combo Coordinator
MacMillan, Betsy; B.Mus.(W.Ont.); M.Mus.(McG.); Instructor; Early Music Ensemble Coordinator
McNabney, Douglas; B.Mus.(Tor.), M.M.(U.Ont.), D.Mus.(Montr.); Associate Professor; Chamber Music Coordinator
JAZZ AREA
Jazz Bass
Boisvert, Guy; Instructor
Hollins, Fraser; Instructor
Hurley, Brian; Instructor
Lessard, Daniel; Instructor
Pépin, Pierre; Instructor
Walkington, Alexander; B.Mus., M.Mus.(McG.); Instructor

Jazz Drums
Laing, David; B.A.(McG.); Instructor
Lambert, Michel; Instructor
McCann, Chris; Instructor
White, André; B.A.(C'dia), M.Mus.(McG.); Assistant Professor

Jazz Flute
Gossage, Dave; Instructor

Jazz Guitar
Amirault, Greg; B.Mus.(McG.); Instructor
Clayton, Greg; Instructor
Gauthier, Michael; Instructor
Gearey, Jon; Instructor

Jazz Piano
Downes, Wray; A.T.C.L., L.T.C.L., F.T.C.L.(Lond.); Instructor
Jarzyczyk, Jan; B.A., M.A.(Academy of Music, Cracow), Dip. (Berklee); Associate Professor; Jazz Area Chair
Johnston, Jeffrey; Instructor
Rager, Josh; B.Mus., M.Mus.(McG.); Instructor
Roney, John; M.Mus.(McG.); Instructor
White, André; B.A.(C'dia), M.Mus.(McG.); Assistant Professor

Jazz Saxophone
Bolduc, Rémi; Instructor
Kennedy, Donny; B.Mus., M.Mus.(McG.)
Lozano, Frank; Instructor
Miller, Joel; B.Mus.(McG.); Instructor
Turner, Dave; Instructor

Jazz Trombone
Abdul Al-Khabbyr, Muhammad; Instructor
Grott, David; Instructor

Jazz Trumpet
Couture, Jocelyn; Instructor
Dean, Kevin; B.M.E.(Iowa), M.Mus.(Miami); Associate Professor
Di Lauro, Ron; B.Mus.(McG.); Instructor
Mahar, Bill; B.Mus.(McG.); Instructor
Sullavan, Joe; B.A.(Ott.), M.M.(New England Cons.); Assistant Professor

Jazz Voice
Lee, Raneen; Instructor
Thériault, Madeleine; Instructor

OPERA AREA
Della Pergola, Edith; Graduate, Royal Conservatory(Bucharest);
Emeritus Professor
Haas, Samantha; Instructor
Ross-Neill, Dixie; B.Mus.(N. Carolina), M.Mus.(Texas); Associate Professor
Wachner, Julian; B.Mus., Mus.Doc.(Boston); Principal Conductor

ORGAN AREA
Gilbert, Kenneth; D.Mus. honoris causa(Mcg.), O.C., F.R.S.C., HonRAM; Adjunct Professor
Grew, John; L.T.C.L.(Lond.), B.Mus.(Mt. All.), M.Mus.(Mich.), D.D.(United Theological Coll.), LL.D.(Mt.All.); University Organist; Professor; Organ Area Chair
Porter, William; Assistant Professor

PERCUSSION AREA
Huang, Aiyun; B.A.(Tor.); D.M.A.(Calif.-San Diego); Percussion Area Chair
Malashenko, Andrei; L.Mus.(McG.); Principal Timpani, Montreal Symphony; Instructor
Marandola, Fabrice; Premier Prix(Conservatoire de Paris, M.Mus.,
Ph.D.(Sorbonne); Assistant Professor
Mativetsky, Shawn; B.Mus., M.Mus.(McG.); Instructor

PIANO AREA
Davidson, Thomas; B. Mus.(Qu.), M.Mus.(McG.), Cert. of Advanced Study(R.C.M., Lond.), A.R.C.M., L.T.C.L; Faculty Lecturer
Gavriloa, Julia; M.Mus., D.Mus.(McG.); Instructor
Hashimoto, Kyoko; B.A.(Tokyo); Associate Professor
Laimon, Sara; B.Mus.(Br. Col.), M.Mus.(Yale), D.M.A.(SUNY, Stony Brook); Associate Professor
McMahon, Michael; B.Mus.(McG.), Graduate, Hochschule für Musik (Vienna); Associate Professor
Mdivani, Marina; Post-graduate Dip.(Moscow Cons.); Associate Professor
Morton, Dorothy; Graduate, Conservatoire de Musique de Québec; Emeritus Professor
Plaunt, Tom; B.A.(Tor.), Graduate, Nordwestdeutsche Musik-Akademie(Detmold, Germany); Assistant Professor
Raymond, Richard; Premier Prix(Conservatoire de Montréal), M.Mus.(Montr.); Associate Professor; Piano Area Chair
Zuk, Luba; L.Mus.(McG.), Graduate, Conservatoire de Musique de Québec; Associate Professor

STRING AREA
Violin
Jonathan Crow; B.Mus. (McG.); Assistant Professor
Lupien, Denise; B.M., M.M.(Juillard); Concertmaster, Orchestre Métropolitain; Assistant Professor
Roberts, Richard; B.Mus.(Ind.); Concertmaster, Montreal Symphony; Assistant Professor
Williams, Thomas; B.Mus.(Bran.); Associate Professor

Viola
Marzocchi, Marie-Clavie; B.Mus.(McG.); Instructor

Cello
Dolin, Elizabeth; B.Mus.(Tor.), Artist Dip.(Ind.); Assistant Professor

Double Bass
Chappell, Eric; B.Mus.(McG.); Montreal Symphony; Instructor
Denis, Marc; Instructor
Pépin, Pierre; Instructor
Quarrington, Joel; Instructor
Robinson, Brian; B.Mus.(Tor.); Montreal Symphony; Instructor

Guitar
Antonio, Garry; B.Mus., M.Mus.(McG.), D.Mus.(Montr.),
D.I.A.(C'dia); Instructor; Guitar Area Chair

Harp
Swartz, Jennifer; Dip.(Curtis); Principal Harp, Montreal Symphony; Assistant Professor

VOICE AREA
Agiar, Stefano; Assistant Professor
Evans, Lucile; Dip.(Vincent d'Indy); Associate Professor
Kinslow, Valérie; B.A.(McG.); Assistant Professor; Early Music, Voice Area Chair
Kolomyytsev, Andrew; B.Mus. (Tor.); Assistant Professor
Meraw, Michael; B.Mus., M.Mus.(McG.); Assistant Professor

Jazz Area Chair
Kinslow, Valerie; B.A.(McG.); Assistant Professor; Early Music, Voice Area Chair
Kolomyjec, Joanne; B.Mus. (Tor.); Assistant Professor
Meraw, Michael; B.Mus., M.Mus.(McG.); Assistant Professor
Purdy, Winston; B.Mus.(McG.), M.M.(Eastman); Assistant Professor
Sevadjian, Thérèse; B.Mus., M.Mus.(Montr.); Associate Professor
VOCAL COACHING
Diamond, Louise; M.Mus.(McG.); Vocal Repetiteur
Evans, Robert; B.Mus.(New England Cons.), Ph.D.(Ohio St.); Instructor
McLean, Pierre; Vocal Repetiteur
Nigrim, Dana; Vocal Repetiteur
Pelletier, Louise; B.Ed., M.Mus.(UQAM), M.Mus.(Montr.); Vocal Repetiteur
Roy, Dominique; B.Mus., M.Mus.(McG); Vocal Repetiteur

WOODWIND AREA
Flute
Bluteau, Denis; M.Mus.(Montr.); Associate Principal, Montreal Symphony; Instructor
Christie, Carolyn; B.Mus.(McG.); Montreal Symphony; Assistant Professor
Howes, Heather; B.Mus., M.Mus.(McG.); Instructor
Hutchins, Timothy; Dip. L.G.S.M.(Guildhall), B.A. Hons.Mus. (Dal.); Principal Flute, Montreal Symphony; Associate Professor
Kestenberg, Abe; Associate Professor; Woodwind Area Chair
Shuter, Cindy; B.Mus.(Tor.); Instructor

Oboe
Baskin, Theodore; B.Mus.(Curtis), M.Mus.(Auck.); Principal Oboe, Montreal Symphony; Associate Professor
Forget, Normand; Instructor
Zirbel, Alexa; Graduate, Hochschule für Musik(Freiburg); Montreal Symphony; Instructor

Clarinet
Aldrich, Simon; B.Mus., L.Mus.(McG.); Instructor
Crowley, Robert; B.M.(Eastman), M.M.(Clev. Inst. of Music); Principal Clarinet, Montreal Symphony; Assistant Professor
Desgagné, Alain; Instructor
Dumouchel, Michael; B.Mus.(Eastman); Montreal Symphony; Instructor
Freedman, Lori; Instructor
Freeman, Peter; L.Mus., B.Mus., M. Mus.(McG.); Instructor
Kestenberg, Abe; Associate Professor; Woodwind Area Chair

Bassoon
Lévesque, Stéphane; Premier Prix(Conservatoire de Montréal), M.Mus.(Yale); Principal Bassoon, Montreal Symphony; Assistant Professor
Mangrum, Martin; Montreal Symphony; Instructor
Romatz, Mark; Montreal Symphony; Instructor

Saxophone
Freeman, Peter; L.Mus., B.Mus., M. Mus.(McG.); Instructor
Kestenberg, Abe; Associate Professor; Woodwind Area Chair
11 Faculty of Religious Studies

11.1 The Faculty

11.1.1 Location
William and Henry Birks Building
3520 University Street
Montreal, QC H3A 2A7
Canada
Telephone: (514) 398-4121
Website: www.mcgill.ca/religiousstudies

11.1.2 Administrative Officers
Luvana Di Francesco Administrative Assistant
Bruna Salhany Administrative Affairs/Dean's Assistant

11.1.3 History
The Faculty and the Colleges

During the 19th century several Theological Colleges in Montreal became affiliated with McGill. In 1912 they formed a Joint Board for the academic study of Theology, leaving each denominational College to provide its own professional training for Christian ministry. This relationship between the Colleges and the University led naturally to the creation in 1948 of a Faculty of Divinity, which assumed the academic functions of the Joint Board, now designated the Montreal School of Theology. This University Faculty now offers the Bachelor of Theology (B.Th.) degree and several graduate degree programs.

11.1.4 Facilities
The Faculty of Religious Studies is located in the handsome (William and Henry) Birks Building, erected in 1931, formerly known as Divinity Hall, at 3520 University Street. Besides the usual classrooms, offices and common rooms, this building accommodates the University Chapel and the Birks Reading Room.

11.1.5 Birks Lectures
An annual series was established in 1950 through the generosity of the late William M. Birks. The lectures are given by distinguished visitors, usually in late September or early October. The first lecturer was the Right Reverend Leslie Hunter. More recent lecturers have included Huston Smith, Northrop Frye, Wilfred Cantwell Smith, Gregory Baum, Robert McAfee Brown, Krister Stendahl, Charles Adams, Jon Levenson, David Little, Azim Nami, Paul Griffiths, Bernadette J. Brooten and Harvey Cox.

11.1.6 Numata Visiting Professor in Buddhist Studies
In recognition of the strong Buddhist Studies program in the Faculty of Religious Studies, the Numata Foundation has given a 20-year grant to the Faculty to bring a visiting scholar in Buddhist Studies to McGill each year.

The Visiting Professor teaches two courses, one at the undergraduate level and one at the graduate level, gives a public lecture and is available to students for conferences and consultation. The first Numata Professor, in 1999-2000, was Dr. Mahinda Deegalle (Ph.D., Chicago), a Theravada Buddhist Sri Lankan monk. Subsequent visiting professors include Dr. John Petitt, Professor Robert Morrison, Dr. Thuppen Jinfo, Dr. Kate Crosby, Ven. Yifa, Dr. Robert Kritzer and Dr. Andrew Skilton.

11.2 Degrees Offered by the Faculty
Bachelor of Arts (B.A.) in Religious Studies, page 309
Master of Divinity (M.Div.), page 310
Bachelor of Theology (B.Th.), page 310

11.3 Bachelor of Arts (B.A.) in Religious Studies
Honours Concentration, Major Concentration and Minor Concentration in Religious Studies are offered in cooperation with the Faculty of Arts. Religious Studies B.A. Honours, Major, and Minor students may take any of the courses described below except where otherwise indicated.

Admission is to the Faculty of Arts and all admission requirements and procedures, academic rules and regulations of that Faculty apply to students in these programs. For general information on B.A. Honours, Major Concentrations and Minor Concentrations, consult the advisers. Check the Faculty’s Website for a list of advisers. For specific course information, consult the instructor. Detailed descriptions of the Religious Studies programs for Arts students are found in the Arts section of the calendar in section 5.12.45 “Religious Studies (RELG).”

Students who are interested in the Bachelor of Theology (B.Th.) or Master of Divinity (M.Div.) programs should refer to the appropriate listing.
11.4 Master of Divinity (M.Div.)

Students who have completed a first degree prior to the B.Th. with a minimum CGPA of 2.7 are eligible to apply to the B.Th. degree towards the Master of Divinity (M.Div.) degree conferred by the Theological Colleges. This degree requires, in addition to the B.Th. degree, successful involvement in integrative seminars during the two B.Th. years and a year of professional pastoral study beyond the B.Th. This is called the “In-Ministry Year” (IMY) and is offered by the three affiliated Theological Colleges under the auspices of the Montreal School of Theology.

Students from the affiliated colleges may be eligible for bursary assistance if they are properly registered candidates for the ministry. Information about church requirements and the professional year should be sought from the principals of the appropriate colleges.

One biblical language, usually Greek, is required by some of the colleges. Ministerial candidates should consult with the College advisers regarding biblical language requirements.

Prospective candidates for ordination with a B.A. Honours or Major in Religious Studies and a CGPA of 3.3 (B+) may apply for the S.T.M. degree, followed upon completion by the professional year (IMY).

Applicants for the M.Div. program must apply to the McGill B.Th. program as well as to one of the Theological Colleges. College application forms should be requested from one of the following:

- The Montreal School of Theology
  (formerly the Joint Board of Theological Colleges)
- École théologique de Montréal (affiliés à l’Université McGill)
  3473 University Street, Montreal, Quebec H3A 2A8
- Montreal Diocesan Theological College
  3473 University Street, Montreal, Quebec H3A 2A8
- The Presbyterian College
  3495 University Street, Montreal, Quebec H3A 2A8
- The United Theological College/Le séminaire Uni,
  3521 University Street, Montreal, Quebec H3A 2A8

Prospective students should contact the Chair of the B.Th. Committee to discuss their qualifications, expectations and objectives. Applications can be made by telephoning (514) 398-3995 or by visiting the B.Th. Program Coordinator, Room 113, Birks Building.

11.5 Bachelor of Theology (B.Th.)

The Bachelor of Theology (B.Th.) program is designed primarily for those who intend to qualify for the ordained ministry in a Christian denomination, although some students pursue the degree out of an interest in the academic study of theology for its own sake. Those studying for the ordained ministry pursue the B.Th. as part of the Master of Divinity (M.Div.) degrees (see above) offered by the three Theological Colleges affiliated with McGill: Montreal Diocesan Theological College (Anglican Church of Canada), the Presbyterian College (Presbyterian Church in Canada), and United Theological College (United Church of Canada).

The main goals of the program are:

1) to offer the academic disciplines of theology within a university setting and

2) to contribute to preparation for ministry in the contemporary world by giving special attention to:

   a) the Canadian and North American contexts;
   b) the Quebec context;
   c) religious pluralism.

11.5.1 ATS Accreditation

The B.Th. program offered by McGill and the M.Div. program offered by the Theological Colleges are together fully accredited by the Association of Theological Schools in the U.S. and Canada (ATS).

11.5.2 Admission Requirements

The B.Th. program has three points of entry:

1. To enter the 120-credit from outside Quebec, the applicant must hold a high school diploma, with a minimum average of 75%, or the equivalent. A maximum of 60 credits from another institution of higher learning can be considered for transfer into the 120-credit program.

2. To enter the 90-credit first-degree program, the applicant is expected to have completed the Diploma of Collegial Studies (DCS) of a Quebec CEGEP with a minimum average of cote R of 24, or the equivalent elsewhere. A maximum of 30 credits from another institution of higher learning can be considered for transfer into this program.

3. To enter the 60-credit program, the applicant must have completed a B.A. or other Bachelor’s degree with a minimum CGPA of 2.7 (B-). No credits can be transferred from another institution of higher learning into the 60-credit program.

Any McGill student in good standing, with a minimum of 30 credits, may apply for transfer from their current degree program into a B.Th. program.

11.5.2.1 Mature Student Admissions Policy

Those who will be 23 years of age or older by September 1 of the year that they seek admission (or by January 1 for admission to the Winter Term) and who lack the academic qualifications normally required for entry into the B.Th. program may apply as mature students for admission to a qualifying year in the B.Th. program.

Admitted students enroll in a qualifying year (30 credits) of designated Religious Studies and Arts courses (determined by the Chair of the B.Th. Committee).

Those who, during the qualifying year, earn a CGPA of 2.9 to 2.5 (with no grade less than 60%) normally will be granted admission to the 120-credit B.Th. program. Credits completed during the qualifying year may be applied toward the 120 credit requirement.

Those who, during the qualifying year, earn a CGPA of at least 3.0 (having taken 30 credits, including at least two 300-level courses and with no grade less than 65%) normally will be granted admission to the 90-credit B.Th. program. Credits completed during the qualifying year may be applied toward the 90 credit requirement.

Students who, during the qualifying year, do not earn a minimum CGPA of 2.5 or who have grades less than 60%, may apply to retake courses, pending approval of the Chair of the B.Th. Committee.

11.5.3 Competence in English

Please note that for non-Canadian applicants whose mother tongue is not English, documented proof of competency in oral and written English by an appropriate examination is required. Test of English as a Foreign Language (TOEFL) with a minimum score of 575 for the paper-based version is required. Permanent residents of Canada may be required to submit a TOEFL score as well. All official documents must be sent to the Faculty of Religious Studies address given below.

11.5.4 Applying to the B.Th. Program

All applications must be made on-line at the McGill University Website for prospective students: www.mcgill.ca/applying. The on-line application process should take about 20 minutes and a credit card is required for payment of the application fee. Once completed, the on-line application form may be printed for your own records.

Note: Owing to McGill University’s implementation of a comprehensive on-line application system, paper

---

310 2007-2008 Undergraduate Programs, McGill University
applications to the B.Th. Program can no longer be accepted. All applicants must apply on-line.

11.5.4.1 Required Documents

- Two letters of reference, at least one of which should be from an instructor in an academic institution previously attended.
- A personal statement, according to the directions in the application.
- Official transcript(s) of all previous post-secondary academic work.
- A complete set of these required documents must be sent to the Faculty of Religious Studies (see address below).

If you are applying for admission to one of the Theological Colleges, another complete set of these required documents must also be sent to the College concerned.

Please note that your file will not be considered by the Admissions Committee until all the required documents have been received.

11.5.4.2 Mailing Address

Bachelor of Theology Program
McGill University
ARR Documentation Centre
688 Sherbrooke Street West
Montreal, QC H3A 3R1
Canada

11.5.5 Application Deadlines

Applicants to the B.Th. Program may be accepted into either the Fall, Winter, or Summer term. The on-line application deadline is June 15 (May 1 for International students) for September admissions; November 1 for January admissions and March 1 for May admissions. Please note that all required documents listed above must be received by the Faculty of Religious Studies prior to these deadlines in order for the applicant to be considered by the Admissions Committee.

11.5.6 Tuition Fees and Funding

Information concerning current tuition fees may be found at the following Website: www.mcgill.ca/student-accounts. Applicants for admission to one of the affiliated Colleges should contact the institution concerned for information regarding College-related fees.

11.5.7 Appeals Procedures

An unsuccessful applicant or a Faculty of Religious Studies Council member acting on behalf of the applicant who believes that not all factors having a bearing on the application have been fully considered has the right to request that the B.Th. Admissions and Awards Committee review the application.

If the findings of the review procedure uphold the initial decision of the B.Th. Admissions and Awards Committee, the applicant has the right to appeal in writing to the Dean. The Dean shall put the appeal before the B.Th. Appeals Committee, which shall consist of three full-time members of the Faculty of Religious Studies Council who are not at the same time members of the B.Th. Admissions and Awards Committee.

The decision of the B.Th. Appeals Committee may be appealed to the Vice-Principal (Academic).

11.5.8 Registration Procedures

Students register on-line at www.mcgill.ca/minerva-students. Minerva for students provides Web access to registration, class schedules, course descriptions, and address changes.

- Returning students must register via Minerva between March 22 and the first day of classes. After this period a late registration fee will be applied.
- New students accepted from CEGEP should register via Minerva between June 12 and Sept. 4, 2007. All other new students should register via Minerva between August 2 and September 4, 2007. After September 4 a late registration fee will be applied.
- All B.Th. students should consult their adviser before registration.

11.5.9 Withdrawal Procedures

Withdrawal from and adding courses prior to the deadline listed in the Calendar (see above) must be done via Minerva. The permission of the adviser is required for all such changes in the initial registration. In case of withdrawal from the University prior to the published course withdrawal deadline, the student must withdraw from all courses via Minerva. In addition, students must contact the Chair of the B.Th. Committee and complete the necessary withdrawal form.

11.5.10 Graduation Requirements

a) The B.Th. is either a 120-credit program (for those admitted from outside Quebec and without a prior Bachelor's degree), a 90-credit program (for those who were admitted on the basis of a Quebec D.C.S. or equivalent), or a 60-credit program (for those who were admitted on the basis of a recognized Bachelor's degree).

b) Qualification for the degree shall include satisfactory standing (a grade of C or better) in all required courses and the complementary courses specified in year three, and the accumulation of sufficient acceptable credits to make a total of either 60, 90 or 120 credits. It should be noted that students who take the B.Th. program as part of the M.Div. program need to maintain a minimum CGPA of 2.5 to be eligible for the M.Div. degree.

c) Normally, the program credits must be earned within five years from the date of entrance.

11.5.11 Course Selection

Candidates for the ministry from the three Theological Colleges associated with the Faculty must select their courses in consultation with their College advisers. The course selection form needs to be signed by the Chair of the B.Th. Committee.

Those seeking the degree and not sponsored by one of the three Colleges associated with the Faculty will need to clear their course selections with the chair of the B.Th. Committee.

In all cases this consultation should take place before registration.

11.5.12 Academic Standing and Course Loads

Satisfactory Standing

Students enter the University in satisfactory standing and remain in this standing unless their GPA (grade point average) or CGPA (cumulative grade point average) for any year drops below 2.00. The normal course load in any academic session is five courses per term (15 credits per term). A student with a high GPA (at least 3.00) may take more than the normal five courses per term.

Probationary Standing

A student is placed in probationary standing if the GPA/CGPA falls between 1.50 and 1.99. Probationary students may take a maximum of 12 credits per term, and must raise their CGPA to 2.00 within one academic session. Those who fail to do so will be placed in unsatisfactory standing.

A student in probationary standing may return to satisfactory standing at the end of the next academic session by obtaining either a GPA of at least 2.50 or both a GPA and a CGPA of 2.00 or greater unless the student was admitted on probationary standing. A student admitted on probationary standing must obtain a GPA of 2.50.
Students in probationary standing who obtain a GPA between 1.50 and 1.99 remain in probationary standing if they also have a CGPA of 2.00 or greater.

A student in probationary standing who fails to achieve the levels of performance specified above will be placed in unsatisfactory standing.

**Unsatisfactory Standing**

A GPA of less than 1.50 places a student in unsatisfactory standing.

A student in unsatisfactory standing will have to withdraw, or seek readmission as a probationary student with special permission from the B.Th. Committee and the Dean. A student who is readmitted on probationary standing may have additional restrictions or conditions to meet over and above those required of students referred to above under “Probationary Standing”.

A student in unsatisfactory standing for the second time must withdraw permanently.

**Incomplete Standing**

A student whose record in any year shows a mark of K, K*, L, L*, or & & will have no GPA or CGPA calculated for that year, and the record will show “Standing Incomplete”. After completing the appropriate course requirements the GPA and CGPA will be calculated and the student's standing determined as described above.

Students whose standing is still “incomplete” at the time of registration for the next academic year must obtain a Letter of Permission to Register from the Chair of the B.Th. Committee.

### 11.5.13 Academic Achievement

Several designations are used to acknowledge the superior academic achievement of in-course and graduating students. These designations are awarded at the discretion of the Faculty:

**Distinction:** to designate graduating students, not in Honours, who have completed a minimum of 60 credits at McGill and achieved a CGPA of 3.30 - 3.49.

**Great Distinction:** to designate graduating students, not in Honours, who have completed a minimum of 60 credits at McGill and achieved a CGPA of 3.50 or better.

**Honours:** to designate graduating students who have completed a minimum of 60 credits at McGill and have fulfilled the Honours course requirements with a CGPA of 3.20, or 3.50 for First Class Honours.

**Dean's Honour List:** to designate graduating students with a CGPA of 3.50 or better. This designation applies in addition to those described in b) and c) above, except that it may not normally be awarded to more than 10% of the graduating class.

**Dean's Honour List:** to designate in-course students who have completed a minimum of 27 credits during regular session (14 credits for those registered for one term) and have attained a GPA placing them in the top 5%-10% of their class.

### 11.5.14 Evaluation

Competence in a course may be determined by examinations and/or essays, or by other means chosen by the instructor and approved by the Dean.

### 11.5.15 Bachelor of Theology Program Requirements

The course extends over three academic years of full-time studies for those admitted with a Diploma of Collegial Studies and two academic years for those admitted with a Bachelor's degree. The normal load consists of five 3-credit courses (15 credits) each term.

Students entering the B.Th. as a first degree program take 90 credits, beginning with the following courses:

**Year 1 - Required Courses** (9 credits)

- RELG 204 (3) Judaism, Christianity and Islam
- RELG 210 (3) Jesus of Nazareth
- RELG 334 (3) The Christian Faith

**Year 1 - Elective Courses** (21 credits)

To be determined in consultation with the B.Th. program adviser.

Students entering the B.Th. as a second degree program take 60 credits, beginning with **Year 2 courses**:

**Year 2 - Required Courses** (24 credits)

- RELG 302 (3) Old Testament Studies 1
- RELG 303 (3) Literature of Ancient Israel 2
- RELG 311 (3) New Testament Studies 1
- RELG 312 (3) New Testament Studies 2
- RELG 322 (3) The Church in History 1
- RELG 323 (3) The Church in History 2
- RELG 333 (3) Principles of Christian Theology 1
- RELG 341 (3) Introduction: Philosophy of Religion

**Year 2 - Complementary Courses** (6 credits)

To be chosen from among the 300- or 400-level courses offered in the B.Th. or B.A. Religious Studies programs (or RELG 280D1/RELG 280D2) in consultation with the B.Th. program adviser.

**Year 3 - Required Courses** (12 credits)

- RELG 420* (3) Canadian Church History
- RELG 434 (3) Principles of Christian Theology 2
- RELG 470 (3) Theological Ethics
- RELG 479 (3) Christianity in Global Perspective

* Exception permitted if recommended by College adviser.

**Year 3 - Complementary Courses** (18 credits)

One 3-credit course in a religious tradition other than Christianity, such as:*  

- RELG 252 (3) Hinduism and Buddhism
- RELG 253 (3) Religions of East Asia
- RELG 306 (3) Rabbinic Judaism
- RELG 352 (3) Japanese Religions
- RELG 354 (3) Chinese Religions

* Students who have previously taken a university-level course in world religions may replace this with another complementary course.

9 credits, one 3-credit course in each of the following areas:

- **Old Testament**
  - RELG 407 (3) The Writings
  - RELG 408 (3) The Prophets

- **New Testament**
  - RELG 411 (3) New Testament Exegesis
  - RELG 482 (3) Exegesis of Greek New Testament

- **Christian Theology**
  - RELG 330 (3) Reformed Theology
  - RELG 336 (3) Contemporary Theological Issues
  - RELG 399 (3) Christian Spirituality
  - RELG 423 (3) Reformation Thought

6 credits, to be chosen from among the 300- or 400-level courses offered in the B.Th. or B.A. Religious Studies programs (or RELG 280D1/RELG 280D2) in consultation with the B.Th. program adviser.

By permission of the B.Th. Committee, students may substitute courses for any of the required courses if they have already taken them or similar courses for credit elsewhere.

Permission is needed from the B.Th. Committee for courses selected from the curriculum of other departments of the University.

By permission of the Dean and the Chair of the B.Th. Committee, students may also enrol for courses at any university in the province of Quebec. See section 3.3.5 "Quebec Inter-University
Transfer Agreement (IUT) in the General University Information section for details.

Professional and vocational courses (e.g., leading to ordination) are available through the In-Ministry Year (Master of Divinity (M.Div.)) upon the completion of the B.Th. degree.

11.5.16 B.Th. Honours

Students who have achieved a CGPA of 3.30 at the end of B.Th. 2 year may apply to the B.Th. Committee for permission to enter the Honours program. They will be required to complete RELG 494 and 495 in the B.Th. 3 year with a grade of B or better, to complete the degree with Honours.

11.6 Academic Staff

Emeritus Professors

Gregory B. Baum; B.A.(McM.), M.A.(Ohio St.), D.Th.(Fribourg)

Joseph C. McLelland; B.A.(McM.), M.A.(Tor.), B.D.(Knox, Tor.), Ph.D.(Edin.), D.D.(Montr. Dio. Coll.; Knox, Tor.)

Post-Retirement

Robert C. Culley; B.D.(Knox, Tor.), M.A., Ph.D.(Tor.)

Frederik Wisse; Ing.(Utrecht), B.A., B.D.(Calvin, Mich.), Ph.D.(Claremont)

Professors

Maurice Boutin; B.A., B.A., B.A.(Montr.), D.Th.(Munich)

(J.W. McConnell Professor of Philosophy of Religion)

G.S. Oegema; B.A., Th.D.(Vrije: Amsterdam), M.A., Ph.D.

(Freie: Berlin), Dr. Theo. Habil(Tübingen)

Arvind Sharma; B.A., (Allahabad), M.A. (Syr.), M.T.S., Ph.D.(Harv.)

(Henry Birs Professor of Comparative Religion)

Katherine K. Young; B.A.(Vermont), M.A., (Chic.), Ph.D.(McG.)

(James McGill Professor of Hinduism/Comparative Religion)

Associate Professors

Ellen B. Atkens; A.B.(Harv.), M.Div.(University of the South), Th.D.(Harv.) (Associate Professor of Early Christian History and Literature)

Daniel Cere; B.A., M.A.(McG.), PhD ('dla)

Douglas Farrow; B.R.E.(Providence), M.Div.(Grace), M.Th.(Regent), Ph.D.(Lon.)

Ian H. Henderson; B.A.(Manit.), B.D.(St. And.), M.A.(McM.)

D. Phil.(Oxf.)

G. Victor Hori; B.A.(York), M.A.(Tor.), Ph.D.(Stan.)

W.J. Torrance Kirby; B.A.(K.N.S.), M.A., D. Phil.(Oxf.)

Patricia G. Kirkpatrick; B.A.(Dal.), M.T.(Lon.), D. Phil.(Oxf.)

Assistant Professors

Lara Braitestein; B.A., M.A., Ph.D.(McG.) (Assistant Professor of Buddhism)

Gaëlle Fiasse; B.A., M.A., Ph.D.(Louvain) (Assistant Professor of Ethics and Religious Ethics) (joint appointment with Department of Philosophy)

Devesh Soneji; B.A.(Manit.), Ph.D.(McG.) (Assistant Professor of Hinduism)

Faculty Lecturer

Jim Kanaris; B.A.(C'dia), M.A., Ph.D.(McG.)

Course Lecturers

Norman Cornett; A.B.(Calif.), M.A., Ph.D.(McG.)

Melissa Curley; B.A., M.A., Ph.D. Candidate(McG.)

Michel DiStefano; B.A.(Providence), M.A.(Trinity International)

Manuel M. Jinbachian; B.Litt(Oxf.), Ph.D.(Stras.)

Jeffrey Keiser; B.Sc.(Biol), M.A.(Harv.), Ph.D. Candidate(McG.)

David Koloszcz; B.A., M.A.(Tor.), Ph.D. Candidate(McG.)

Sanjay Kumar; B.A.(Maharshi Dayanand), M.A.(Meerut), M.Phil., Ph.D.(Delhi)

Nathan Loewen; B.Th.(Can. Mennonite), M.A., Ph.D.(McG.)

Lucille Mar; B.A., M.A., Ph.D.(Wat.)

Rowshan Nemazee; B.A.(Trin. Coll., Vermont), M.A., Ph.D.

Candidate(McG.)

Michelle Rebidoux; B.A.(York), M.A.(Br. Col.), Ph.D. Candidate

(McG.)

Vanessa Sasson; B.A., M.A., Ph.D.(McG.)

Manjit Singh; B.A., M.A.(Delhi)

Glenn Smith; B.A.(Mich.), M.A.(Ott.), D.Min.(Northern Baptist Seminary, Ill.), D.Hon.(Union des universités privées d’Haiti)

Michael Storch; B.A.(Alta.), Ph.D. Candidate(McG.)

Philippe Turenne; B.A., Ph.D. Candidate(McG.)

Richard Walker; B.A., M.A.(Calg.), Ph.D. Candidate(McG.)

R. Saraswati Sainath; B.Sc., M.A., M.Phil., Ph.D.(Madr.), Ph.D. Candidate(McG.)

Numata Visiting Professor

Joel Tatelman; B.A.(Manit.), M.A.(Tor.), M.A., Ph.D.(McM.), D.Phil.(Oxf.)

Associate Member

Leigh Turner; B.A.(Winn.), M.A.(Manit.), M.A., Ph.D.(S. Calif.)

Adjunct Professors

Philip Joudrey; B.A., M.Div.(Acad.), D.Min.(Andover Newton Theological School)

T. Jinpa Langri; Dr. Div., B.A.(King's Coll., Lond.), Ph.D.(Camb.)

John M. Simons; B.A.(Bishop's), S.T.B.(Trin. Coll., Tor.), Ph.D.(G'town) (PT)

John Vissers; B.A.(Tor.), M.Div.(Knox, Tor.), Th.M.(Prin.), Th.D.(Knox, Tor.) (PT)

Joel Tatelman; B.A.(Manit.), M.A.(Tor.), M.A., Ph.D.(McM.), D.Phil.(Oxf.)

12.1 The Faculty

12.1.1 Location
Dawson Hall
853 Sherbrooke Street West
Montreal, QC H3A 2T6
Canada
Telephone: (514) 398-4210
Faculty Website: www.mcgill.ca/science
Student Affairs Office Website: www.mcgill.ca/artsci

The Student Affairs Office and the Office of the Associate Dean (Student Affairs) of the Faculty of Science are located in Dawson Hall, Rooms 110 and 115. The Student Affairs Office serves students in the Faculties of Arts and of Science.

12.1.2 Faculty Administrative Officers
Martin Grant; B.Sc.(PEI), M.Sc., Ph.D.(Tor.)  Dean
Laurie Hendren; B.Sc., M.Sc.(Qu.), Ph.D.(C’nell),  Associate Dean (Academic)
Henry Leighton; B.Sc., M.Sc.(McG.), Ph.D.(Alta.)  Associate Dean (Student Affairs)
David H. Burns; B.Sc.(Puget Sound), Ph.D.(Was.)  Associate Dean (Research and Graduate Education)
Josie D’Amico  Assistant to the Dean
Sharon Bezeau; B.A.(Tor.), M.A.(C’dia)  Recorder
Donald Sedgwick; B.Sc., M.Sc.(McG.)  Senior Adviser

12.1.3 Programs and Teaching in Science
The Faculty of Science is committed to providing outstanding teaching and research facilities. The Faculty draws on its involvement in cutting-edge research to ensure teaching excellence at the undergraduate level. Professors who are spearheading projects that are changing people’s understanding of the world teach regularly at the undergraduate level. Also, research-based independent study courses offer students the opportunity to contribute to their professors’ work, rather than just learn about it.

In an effort to supplement classroom learning with real-life experience, the Faculty of Science has increased opportunities for undergraduate students to participate in fieldwork. All B.Sc. programs can include an internship component. This is on top of the many undergraduate students the Faculty hires for Work-Study projects and other research programs. McGill Science students have an opportunity to get involved in the structuring of their own education. A Science Undergraduate Society initiative launched Operation Open Access, a project that gives Science students universal access to e-mail, the Internet, and the latest in science software through computer ‘infopoints’ located in areas of the campus frequented by Science students.

The Faculty of Science offers programs leading to the degree of Bachelor of Science (B.Sc.). Admission is selective; fulfilment of the minimum requirements does not guarantee acceptance. Admission criteria are described in “Undergraduate Admissions Guide 2007-08 (Appendix A)”.

There are also two Diploma programs offered in Science. The "Diploma in Environment", offered in section 14.11, under the McGill School of Environment, is a 30-credit program available to holders of a B.Sc. or B.A. or equivalent. The Diploma in Meteorology, is a one-year program available to holders of a degree in Mathematics, Engineering, Physics and other appropriate disciplines who wish to qualify for a professional career in Meteorology. See section 12.13.3 "Atmospheric and Oceanic Sciences (ATOC)". All credits for these diplomas must be completed at McGill.

The concurrent B.Sc./B.Ed. program is designed to provide students with the opportunity to obtain both a B.Sc. and a B.Ed. after a minimum of 135 credits of study. For more information, see section 12.13.31 "Science for Teachers" and "Concurrent Bachelor of Science (Major or Major Concentration with a Minor for Teachers) and Bachelor of Education Secondary Program", in section 7.5.1.3, Faculty of Education.

In addition to the Major Program in Software Engineering offered in the Faculty of Science, there is also a Bachelor of Software Engineering program offered jointly with the Faculty of Engineering (refer to the "Department of Electrical and Computer Engineering", in section 8.5.4).

Finally, the Faculties of Arts and Science jointly offer the Bachelor of Arts and Science (B.A. & Sc.), which is described in section 6 "Bachelor of Arts and Science".

12.1.4 Student Affairs Office
The Student Affairs Office provides assistance in interpreting records as well as general academic information and advice on the following: prerequisites and programs, degree requirements, registration, course change, procedures for withdrawal, deferred exams, supplemental exams, rereads, academic standing, inter-faculty transfer, year or term away, transfer credits, second programs, second degrees, and graduation.

Students should consult with advisers in the Student Affairs Office (adviser.artsci@mcgill.ca) as well as departmental advisers. If necessary, special requests can be made, in writing, to the Associate Dean (Student Affairs).

The Committee on Student Standing (CSS) will consider appeals of the Associate Dean’s (Student Affairs) decisions. For information about CSS, see the Associate Dean’s assistant.

12.2 Faculty Admission Requirements
For information about admission requirements for the B.Sc., please refer to "Undergraduate Admissions Guide 2007-08 (Appendix A)".

For information about inter-faculty transfers, please refer to the General University Information and Regulations, "Inter-Faculty Transfer", in section 3.3.12, as well as the relevant information posted on the Student Affairs Office Website at www.mcgill.ca/artsci, and in the Student Affairs Office.

12.3 Faculty Degree Requirements
Each student in the Faculty of Science must be aware of the Faculty Regulations as stated in this Calendar and on the McGill, Science, and ARTSCI Websites. While departmental and faculty advisers and staff are always available to give advice and guidance, the ultimate responsibility for completeness and correctness of course selection and registration, for compliance
with, and completion of, program and degree requirements, and for the observance of regulations and deadlines rests with the student. It is the student’s responsibility to seek guidance from the Student Affairs Office if in any doubt; misunderstanding or misapprehension will not be accepted as cause for dispensation from any regulation, deadline, program or degree requirement.

To be eligible for a B.Sc. degree, students must fulfill all Faculty and program requirements as indicated below:

- "Minimum Credit Requirement", see section 12.3.1
- "Residency", see section 12.3.2
- "Cumulative Grade Point Average (CGPA)", see section 12.3.3
- "Time and Credit Limit for the Completion of the Degree", see section 12.3.4
- "Program Requirements", see section 12.3.5
- "Course Requirements", see section 12.3.6

### 12.3.1 Minimum Credit Requirement

Each student’s minimum credit requirement for the degree is determined at the time of acceptance and is specified in the letter of admission.

Students are normally admitted to a four-year degree requiring the completion of 120 credits.

#### 12.3.1.1 Advanced Standing

Advanced standing of up to 30 credits may be granted to students who obtain satisfactory results in International Baccalaureate, French Baccalaureate, Advanced Levels, Advanced Placement tests, or the Diploma of Collegial Studies (DCS). Quebec students with a DCS in Science are granted 30 credits advanced standing and will have normally completed the equivalent of, and are therefore exempt from, the basic science courses in biology, chemistry, mathematics and physics. Students with satisfactory results in International Baccalaureate, French Baccalaureate, Advanced Levels, and Advanced Placement tests may be exempt from some or all of the basic science courses. Students will not be given additional credit towards their degree for any McGill course where the content overlaps substantially with any other course for which the student has already received credit, such as for advanced standings results.

AP Examination results with a score of 4 or 5 must be declared by the student at the time of initial registration at the university. For more information about advanced standing, please consult: www.mcgill.ca/student-records/transfercredits.

#### 12.3.1.2 Equivalencies for Non-Basic Science Courses

Note that equivalencies for some non-basic science courses, such as CHEM 212 and 222 and PSYC 204, are granted on a per-CEGEP basis. In some cases a grade greater than the minimum passing grade may be required. For more information about equivalences for non-basic Science courses, please consult: www.mcgill.ca/student-records/transfercredits.

If the CEGEP and/or course is not listed on this Website, students should refer to the Student Affairs Website and follow the instructions for advanced standing for students admitted to McGill from CEGEP: www.mcgill.ca/artscisao.

#### 12.3.1.3 Re-admission after Interruption of Studies for a Period of Five Consecutive Years or More

Students who are re-admitted after interrupting their studies for a period of five consecutive years or more may be required to complete a minimum of 60 credits and satisfy the requirements of a program. In this case, a new CGPA will be calculated. The Associate Dean (Student Affairs), in consultation with the appropriate department, may approve a lower minimum for students who had completed 60 credits or more before interrupting their studies.

Students who are re-admitted after a period of absence are subject to the program and degree requirements in effect at the time of re-admission. The Associate Dean (Student Affairs), in consultation with the department, may approve exemption from any new requirements.

### 12.3.2 Residency

To obtain a B.Sc. degree, students must satisfy the following residency requirements: a minimum of 60 credits of courses used to satisfy the B.Sc. degree requirements must be taken and passed at McGill, exclusive of any courses completed as part of the Science Freshman requirements defined below. At least two-thirds of all departmental program requirements (Honours, Major, Faculty program, or Minor) must normally be completed at McGill. However, students in Honours, Major, and Faculty program who pursue an approved Study Away or Exchange program may, with departmental approval, be exempted from the two-thirds rule. In addition, some departments may require that their students complete specific components of their program at McGill.

The residency requirement for diplomas is 30 credits completed at McGill.

### 12.3.3 Cumulative Grade Point Average (CGPA)

Each candidate for the degree must achieve a minimum cumulative grade point average (CGPA) of 2.00.

### 12.3.4 Time and Credit Limit for the Completion of the Degree

Students who need 96 or fewer credits to complete their degree requirements are expected to complete their degree in no more than eight terms after their initial registration for the degree. Students who wish or need to exceed this limit must receive permission from the Associate Dean (Student Affairs) to continue their studies. Students who wish to exceed the minimum credit requirement for their degree must also seek permission of the Associate Dean (Student Affairs) to continue their studies. Permission for exceeding the time and/or credit limits will normally be granted only for valid academic reasons, such as a change of program (approval of the department is required) and part-time status.

Students in the Freshman Program become subject to these regulations one year after their initial registration.

### 12.3.5 Program Requirements

#### 12.3.5.1 Science Freshman Program

Students who need 97-120 credits (four years) to complete their degree requirements must register in the Science Freshman Program, which is designed to provide the basic science foundation for a student's subsequent three-year Faculty, Major, or Honours program. For a detailed description of the Science Freshman Program, students should consult "Science Freshman Program", in section 12.13.1 and Arts and Science Freshman Student information available on the Student Affairs Website, www.mcgill.ca/artscisao.

Students who have completed the Diploma of Collegial Studies, Advanced Placement exams, Advanced Levels, the International Baccalaureate, the French Baccalaureate, or McGill placement examinations may receive exemption and/or credit for all or part of the basic science courses in biology, chemistry, mathematics and physics. Similarly, students who have completed courses at other universities or colleges may receive exemptions and/or credits. Students should consult www.mcgill.ca/student-records/transfercredits for more information.

#### 12.3.5.2 Faculty, Major, and Honours Programs

Science students who need 96 or fewer credits to complete their degree requirements are required to select their courses in each term with a view to timely completion of their degree and program requirements. Students must register in one of the following types of departmental programs leading to the degree of Bachelor of Science:

* A Faculty program is an approved coherent selection of courses giving students a useful concentration in a recognized area. Students in a Faculty program may choose a pattern of study
that can range from one yielding a broad education to one special-iz- ing in particular areas. Faculty programs will be offered for stu- dents entering their departmental programs in Fall 2007. Faculty programs will be replaced by the newly proposed Liberal pro- grams.

Major programs are more specialized than Faculty or Liberal programs and are usually centred on a specific discipline or department. For prospective teachers, the Faculty also offers Major programs that can constitute the Science component of the Concurrent B.Sc./B.Ed. Program. For more information about this joint degree, refer to section 12.3.5.5 "Concurrent B.Sc./B.Ed. Program". Honours programs typically involve an even higher degree of specialization, often include supervised research, and require stu- dents to maintain a high academic standard. Although Honours programs are specially designed to prepare students for graduate studies, graduates of the other degree programs are also normally admissible to most graduate schools. Students who intend to pursue graduate studies in their discipline should consult a depart- mental adviser regarding the appropriate selection of courses in their field.

12.3.5.3 Minor and Minor Concentration Programs
In addition to the above degree programs, students in the Faculty of Science may select a Minor or approved Minor Concentration program. These are coherent sequences of courses in a given disci- pline or interdisciplinary area that may be taken in addition to the courses required for the degree program. Science Minors consist of up to 24 credits. Arts Minor Concentrations consist of 18 credits. A minimum of 18 new credits must be completed in the Minor or Minor Concentration.

For a list of "Minor Programs", see section 12.11.6; for Minor Concentrations that are approved for Science students, see section 12.11.10 "Faculty of Arts Major and Minor Concentration Programs Available to Science Students".

12.3.5.4 Other Second Programs
In addition to a Faculty, Major, or Honours program, students may pursue a second Faculty, Major, or Honours program, or an Arts Major Concentration program. A minimum of 36 new credits must be completed in the second program.

12.3.5.5 Concurrent B.Sc./B.Ed. Program
The Concurrent B.Sc./B.Ed. Program described in section 12.13.3.1 “Science for Teachers” is designed to provide students with the opportunity to obtain both a B.Sc. and a B.Ed after a minimum of 135 credits of study. Science students who might want to enter the program should visit the B.Sc./B.Ed. Website at www.mcgill.ca/arts/sas or contact Prof. Dik Harris, e-mail: dik.harris@mcgill.ca.

12.3.5.6 Internship Program for Engineering and Science (IYES)
All B.Sc. programs can include an internship component. For more details, students should refer to www.mcgill.ca/science/ student/internships.

12.3.5.7 McGill School of Environment
The Faculty of Science is one of the three faculties in partnership with the McGill School of Environment; see section 14 "McGill School of Environment".

12.3.6 Course Requirements
All required and complementary courses used to fulfill program requirements, including the basic science requirements, must be completed with a grade of C or better. Students who fail to obtain a satisfactory grade in a required course must either pass the sup- plemental examination in the course or do additional work for a supplemental grade, if these options are available, or repeat the course. Course substitution will be allowed only in special cases; students should consult their academic adviser.

Normally, students are permitted to repeat a failed course only once. (Failure is considered to be a grade of less than C or the administrative failures of J and KF.) If a required course is failed a second time, a student must appeal to the Associate Dean (Stu- dent Affairs) for permission to take the course a third time. If per- mission is denied by the Associate Dean and/or by the Committee on Student Standing, on appeal, the student must withdraw from the program. If the failed course is a complementary course required by the program, a student may choose to replace it with another appropriate complementary course. If a student chooses to substitute another complementary course for a complementary course in which a D was received, credit for the first course will still be given, but as an elective. If a student repeats a required course in which a D was received, credit will be given only once. Full details of the course requirements for all programs offered are given in each unit’s section together with the locations of departmental advisory offices, program directors, and telephone numbers should further information be required.

12.3.6.1 Course Overlap
Students will not receive additional credit towards their degree for any course that overlaps in content with a course for which the stu- dent has already received credit at McGill, at another university, at CEGEP, or for Advanced Placement, Advanced Level, Interna- tional Baccalaureate, or French Baccalaureate results. It is the stu- dent’s responsibility to consult the Student Affairs Office or the department offering the course as to whether or not credit can be obtained and to be aware of exclusion clauses specified in the course description in the Calendar. Please refer to the following website for specific information about advanced standing credits and McGill course exemptions: www.mcgill.ca/student- records/transfercourses.

Sometimes the same course is offered by two different depart- ments. Such courses are called “double-prefix” courses. When such courses are offered simultaneously, students should take the course offered by the department in which they are obtaining their degree. For example, in the case of double-prefix courses CHEM XYZ and PHYS XYZ, Chemistry students take CHEM XYZ and the Physics students take PHYS XYZ. If a double-prefix course is offered by different departments in alternate years, stu- dents may take whichever course best fits their schedule.

Credit for computer and statistics courses offered by faculties other than Science requires the permission of the Associate Dean of Science (Student Affairs) and will be granted only under excep- tional circumstances. Credit for statistics courses will be given with the following stipu- lations:

- Credit will be given for ONLY ONE of the following introductory statistics courses: AEMA 310, BIOL 373, ECON 227D1/ ECON 227D2, ECON 257D1/ECON 257D2, EPSC 215, GEOG 202, MATH 203, MGCR 271, PSYC 204, SOCI 350.
- Credit will be given for ONLY ONE of the following intermediate statistics courses: AEMA 411, ECON 227D1/ECON 227D2, ECON 257D1/ECON 257D2, GEOG 351, MATH 204, MGCR 272, PSYC 305, SOCI 461.
- Students who have already received credit for MATH 324 or MATH 357 will NOT receive credit for any of the following: AEMA 310, AEMA 411, BIOL 373, ECON 227D1/ ECON 227D2, ECON 257D1/ECON 257D2, ECON 257D1/ECON 257D2, EPSC 351, MATH 204, MGCR 272, PSYC 305, SOCI 461.
- For 500-level statistics courses not listed above, students must consult a program adviser to ensure that no significant overlap exists. Where such overlap exists with a course for which the student has already received credit, credit for the 500-level course will not be allowed.
• Credit for statistics courses offered by faculties other than Arts and Science requires the permission of the Associate Dean of Science (Student Affairs), except for students in the B.Sc. Major in Environment, who may take required statistics courses in the Faculty of Agricultural and Environmental Sciences necessary to satisfy their program requirements.
• PSYC 204 may not be taken if a grade of 75% or better was received in an equivalent course completed at CEGEP.

12.3.6.2 Courses Outside the Faculties of Arts and Science
Students in the Faculty of Science should consult the statement of regulations for taking courses outside the Faculties of Arts and of Science. The regulations are posted in the Student Affairs Office and on the Student Affairs Website, www.mcgill.ca/artscisao. A list of approved/not approved courses in other faculties is posted with the regulations; students may take courses on the approved list and may not, under any circumstances, take courses on the not-approved list. Requests for permission to take courses that are not on either list should be addressed to the Associate Dean (Student Affairs).

The regulations are as follows:
• Courses in other faculties that are considered as taught by Science (e.g., BIOT, EXMD, and PHAR) are so designated in the Science section of the Calendar.
• Courses in Music are considered as outside the Faculties of Arts and of Science, except MUAR courses, which are considered as Arts courses.
• Courses in other faculties can be taken as elective courses or as part of a program as specified in the Calendar.
• Students may take only 6 credits per year, up to 18 credits in all, of courses outside the Faculties of Arts and of Science.
• Students must have the necessary prerequisites and permission of the instructor for such courses.
• Credit for courses in Education and Continuing Education requires the permission of the Associate Dean of Science (Student Affairs).
• Credit for computer and statistics courses offered by faculties other than Arts and Science requires the permission of the Associate Dean of Science (Student Affairs) and will be granted only under exceptional circumstances.
• Students who use Minerva to register for a course that exceeds the specified limitations or that is not approved will have the course flagged for no credit after the course change period.
• Credit will not be given for any “how to” courses offered by other faculties that are intended to provide students with only practical or professional training in specific applied areas. Examples include courses that teach the use of certain computer packages (databases, spreadsheets, etc.) or computer languages (SQL, COBOL, FORTRAN, etc.), machine shop or electronic shop courses, technical drawing courses, and professional practice courses.
• For students registered in the McGill School of Environment before September 2003: Students in the MSE may take as many courses outside the Faculties of Arts and of Science as are necessary to complete their program of study. They may also take up to 18 credits of approved courses outside the Faculties of Arts and of Science beyond the requirements of their MSE programs.
• For students who registered in the McGill School of Environment on or after September 2003: Students in the MSE may exceed the 18-credit limit for courses outside the Faculties of Arts and of Science, provided that all such courses are necessary to complete their program of study.
• Students in the Major in Software Engineering may take as many courses outside the Faculties of Arts and of Science as are necessary to complete their program of study. They may also take up to 18 credits of approved courses outside the Faculties of Arts and Science beyond the requirements of their major.
• Students taking the Minor in Management may take 21 credits of courses outside the Faculties of Arts and of Science.
• The 18-credit limit applies to students taking the Minor in Nutrition; equivalent courses in Science should be taken instead of courses in the Faculty of Agricultural and Environmental Sciences.

12.3.6.3 Correspondence, Distance Education or Web-based Courses
Science students may obtain transfer credit for correspondence, distance education or Web-based courses if they receive prior approval from the appropriate McGill department for the course content and prior approval from the Associate Dean of Science (Student Affairs) for the method of delivery and evaluation. Courses taught through distance education from institutions other than McGill will only be considered for transfer credits under the following conditions:
• The course is given by a government-accredited degree-granting institution acceptable to McGill;
• The course counts for credit towards degrees granted at the institution giving the course.

12.3.6.4 Courses Taken under the Satisfactory/Unsatisfactory Option
For more information, students should consult "Courses Taken under the Satisfactory/Unsatisfactory (S/U) Option," in section 3.3.6.

12.3.6.5 Courses in English as a Second Language (ESL)
ESL courses are open to Science students under the regulations specified by the English and French Language Centre; see "English as a Second Language (ESL)" in section 5.12.18.

12.3.6.6 Course Credit Weight
The credit assigned to a particular course should reflect the amount of effort it demands of the student. Normally, one credit will represent three hours total work per week for one term — including a combination of lecture hours, other contact hours, such as laboratory periods, tutorials, and problem periods, as well as personal study time.

12.4 Advising
Students who need 96 or fewer credits to complete their degree requirements must consult an academic adviser in their proposed department of study to obtain advice and approval of their course selection. Quebec students with a Diploma of Collegial Studies in Science have normally taken the equivalent of, and are therefore exempt from, the 100-level basic science courses in Biology, Chemistry, Mathematics, and Physics. Such students may also be exempt from some 200-level courses. Students with satisfactory results in International Baccalaureate, French Baccalaureate, Advanced Levels, and Advanced Placement tests may also be exempt from some or all of the Science Freshman courses. To facilitate program planning, they must present their transcripts and letters of admission. For a detailed description of advising and registration procedures, students should refer to "Registration", in section 3.3 and "Advising and Support", in section 4, to Welcome to McGill, which they receive upon acceptance from the Admissions, Recruitment and Registrar's Office, as well as to the information posted on the Student Affairs Website, www.mcgill.ca/artscisao, and to the departmental Websites.

Students who need 97-120 credits to complete their degree requirements will normally be registered in a Freshman Program until they complete their first year. They must consult an adviser in the Student Affairs Office to obtain advice and approval of their course selection. For a detailed description of advising and registration procedures, Freshman students should refer to Welcome to
### 12.5 Registration

All students register by Minerva, McGill’s Web-based registration system.

For detailed information about registration, students should refer to "Registration", in section 3.3; Welcome to McGill; the Student Affairs Website, www.mcgill.ca/artscisao; and the Student Records Website, www.mcgill.ca/student-records.

Students who fall into unsatisfactory standing at the end of the academic year will have their registration cancelled. They may not re-register in the Faculty. However, students who can provide proof of exceptional extenuating circumstances that affected their academic performance may appeal to the Associate Dean of Science (Student Affairs) for readmission. For more information, students should see section 3.3.13 "Readmission".

Students who have an outstanding fee balance from a previous term or outstanding fines will not be permitted to register. In addition, students who have registered for the upcoming academic year, but subsequently take Summer courses without paying the fees, will have their registration cancelled. Registration on Minerva will be denied until these debts are paid in full. Students must pay all debts before the end of the registration period to be permitted to re-register. Students with financial problems should consult the Student Aid Office, Brown Student Services Building.

Students who decide not to return to McGill after initiating registration must withdraw from all of their courses on Minerva or inform the Student Affairs Office in writing. The deadline for withdrawal from the University is the same deadline as for a course withdrawal; see section 3.3.9 "Regulations Concerning Course Withdrawal" and section 3.3.9 “Regulations Concerning University Withdrawal". After the deadline, students may, under exceptional circumstances, be granted permission to withdraw from the University. Such students should contact the Student Affairs Office for further information.

#### 12.5.1 Program Registration

For detailed information about registering for programs, students should refer to Welcome to McGill; the Arts and Science Registration information on the Student Affairs Website, www.mcgill.ca/artscisao; or the Student Records Website, www.mcgill.ca/student-records.

See section 12.11 “Lists of Programs Offered” for a list of programs that can be taken by Science students.

#### 12.5.2 Course Registration

All courses have limited enrolment. Subject to the course restrictions listed in this section and unless otherwise indicated, students in the Faculty of Science may register for and take credit for any course in the sections of the Calendar applicable to the Faculties of Arts and of Science.

Since the registration system is unable to verify whether or not Faculty regulations are respected, it is technically possible to register for courses that are closed to Science students. When students’ records are manually verified, however, any “closed” courses will be flagged after the end of course change period as “not for credit towards the B.Sc.” As a result, the students’ expected date of graduation may be delayed.

Some courses may require special permission. Students should consult this Calendar and the Class Schedule at www.mcgill.ca/courses to determine whether permission is required of the instructor, the department, or the Faculty for any course they wish to take.

Students who believe they have valid reasons to take a course that is normally closed to Science students must obtain permission from the Associate Dean of Science (Student Affairs) before registering for the course. Only the Associate Dean or, on appeal, the Committee on Student Standing, can make exceptions to the Faculty rules.

#### 12.5.2.1 Registration for First-Year Seminars

Registration for First-Year Seminars is limited to students in their first year of study at McGill, i.e., newly admitted students in U0 or U1. These courses are designed to provide a closer interaction with professors and better working relations with peers than is available in large introductory courses. These seminars endeavor to teach the latest scholarly developments and expose participants to advanced research methods. Registration is on a first-come, first-served basis. The maximum number of students in any seminar is 25, although some are limited to even fewer than that.

Students may take only one First-Year Seminar. Students who register for more than one will be obliged to withdraw from all but one of them. Please consult the departmental listings for course descriptions and availability.

CHEM 199 FYS: Why Chemistry?
COMP 199 FYS: Excursions in Computer Science
GEOG 199 FYS: Geo-Environments
PSYT 199 FYS: Mental Illness and the Brain

The First-Year Seminars offered by the Faculty of Arts are also open to Science students. For a complete listing, please consult Arts “First-Year Seminars”, in section 5.12.1.

#### 12.5.2.2 Freshman Interest Groups

Freshman Interest Groups (FIGs) are groups of approximately 15 U0 students and U1 in their first semester, in the B.Sc. or B.A. & Sc., led by a professor in the Faculty of Science or Faculty of Medicine and an upper-year undergraduate student. They meet once every two weeks in the fall semester to discuss a wide range of topics, such as science in the news, program choices, undergraduate research opportunities, or just aspects of life in Montreal. The purpose of a FIG is to ease the transition to McGill and Montreal and to provide students an opportunity to interact with a professor and with other U0 students in a small group. FIGs carry no credit and there is no charge. For more information and to see how to register refer to www.mcgill.ca/science/student/fig.

#### 12.5.2.3 Registration in Multi-Term Courses

Students who select a multi-term course are making a commitment to that course for its entirety. Students MUST register in the same section in all terms of a multi-term course. Credit will be jeopardized if students deliberately register in different sections of a multi-term course. In exceptional cases, when circumstances are beyond the student’s control, the Student Affairs Office may grant permission to change sections mid-way through a multi-term course. Students must make their request in writing to the Associate Dean (Student Affairs) citing their reason for the request. The request must also have the written support of the instructors of the sections involved and of the coordinator of the course (if applicable).

#### 12.5.3 Apply to Graduate

For more information, see section 3.9.1 “Apply to Graduate”.

### 12.6 Grading and Credit

During the first week of lectures, each instructor will provide students with a written course outline. This information should include, where appropriate:

- whether there will be a final examination in the course;
- how term work will affect the final mark in the course;
• how term work will be distributed through the term;
• whether there will be a supplemental examination in the course, and, if so, whether it will count for 100% of the supplemental grade or whether term work will be included in the supplemental grade (courses with formal final examinations must have supplements);
• whether students with marks of D, F, J or U will have the option of submitting additional work, and, if so, how the supplemental mark will be calculated with the extra work.

12.6.1 Incomplete Grades

An instructor who believes that there is justification for a student to delay submitting term work may extend the deadline until after the end of the course. In this case, the instructor will submit a grade of K (incomplete), indicating the date by which the work is to be completed. The maximum extensions for the submission of grades to the Student Affairs Office are as follows:
• students graduating in June:
  - Fall, Winter, and multi-term courses: April 30
• non-graduating students:
  - Fall courses: April 30
  - Winter and multi-term courses: July 30

Students’ deadlines for submitting their work must be sufficiently in advance of these dates to ensure that the work can be graded and the mark submitted on time. It is important to note that instructors may impose earlier deadlines than those listed above.

If marks to clear Ks have not been submitted to the Student Affairs Office by April 30 for Fall courses, or July 30 for Winter courses and courses spanning Fall/Winter, the K is automatically changed to a KE and counts as an F in the GPA.

Students with a grade of K who have serious extenuating circumstances may request an extension of the K deadline (KE) from the Associate Dean (Student Affairs). Please refer to “Grading and Grade Point Averages (GPA),” in section 3.5.3 for more information about grading and credit.

12.7 Examinations

Students should refer to “Examinations,” in section 3.6, for information about final examinations and deferred examinations. Note that for the Faculty of Science, “University Regulations Concerning Final Examinations,” in section 3.6.2.1 applies to courses up to and including the 500 level.

The exam schedules are posted on the McGill Website, www.mcgill.ca, normally one month after the start of classes for the Tentative Exam Schedule, and two months after the start of classes for the Final Examination Schedule. Students should also refer to the Student Affairs Website for more information: www.mcgill.ca/artsci/artsinfo. Students are warned not to make travel arrangements to leave Montreal prior to the scheduled end of any examination period.

12.8 Supplemental Assessments

12.8.1 Supplemental Examinations

Students who wish to write supplemental examinations for certain courses must apply to the Student Affairs Office for permission. The following conditions apply:
• students must be in satisfactory or probationary standing;
• students must have received a final grade of D, F, J or U in the course;
• students must avail themselves of this privilege at the time of the next supplemental examination period;
• special permission is required if a student wishes to write supplements totaling more than 8 credits;
• only one supplemental examination is allowed in a course;
• the supplemental result may count for 100% of the final grade or may include the same proportion of class work as did the original grade; the instructor will announce the arrangements to be used for the course by the end of the course change period;
• the format and content of the supplemental examination will not necessarily be the same as for the final examination, so students should consult the instructor;
• the supplemental result will not erase the grade originally obtained, which is used in calculating the GPA; both the original mark and the supplemental result will be calculated in the CGPA;
• in courses in which both a supplemental examination and additional work are available, the student may choose the additional work or the examination or both; where both are written, only one supplemental mark will be submitted, reflecting marks for both the supplemental examination and the additional work;
• additional credit will not be given for a supplemental exam where the original grade for the course was D and the student already received credit for the course;
• supplemental examinations in courses outside the Faculty of Science are subject to the deadlines, rules and regulations of the relevant faculty;
• no supplemental examinations are available for students who fail to achieve satisfactory grades in deferred examinations.

For courses in the Faculties of Arts and of Science, the supplemental examination period for Fall courses is during the month of May; for Winter courses, and courses spanning Fall/Winter, the supplemental examination period is during the last week of August.

Supplemental examination applications are available at the Student Affairs Office, and on their Website at www.mcgill.ca/studentaffairs. The deadline for submission of applications is March 1 for Fall courses and July 15 for Winter courses and courses spanning Fall/Winter. A non-refundable fee for each supplemental paper is payable at the time of application. Students who register for a supplemental examination and subsequently find themselves unprepared for it should not write it; except for the loss of the registration fee, there is no penalty for not writing a supplemental examination. Students should consult the Student Affairs Office for further information.

12.8.2 Additional Work

Instructors of courses that include graded written term work may choose to provide the option of additional work to eligible students. The following conditions apply:
• if there is an option for additional work, it must be announced in the course outline at the beginning of the course;
• additional work involves revising one or more previously submitted papers or submitting new written work to replace the original work;
• students must be in satisfactory or probationary standing;
• students must have received a final grade of D, J, F, or U in the course;
• the weight of the additional work will be equal to the weight given the work revised or replaced when the original mark was submitted;
• the mark resulting from the revised or additional work will be recorded as a supplemental mark;
• the supplemental result will not erase the grade originally obtained, which is used in calculating the GPA; both the original mark and the supplemental mark will count in calculating the CGPA;
• in courses in which both a supplemental examination and additional work are available, the student may choose the additional work or the examination or both; where both are written, only
one supplemental mark will be submitted, reflecting marks for both the supplemental examination and the additional work;

- additional work in courses outside the Faculty of Science is subject to the deadlines, rules, and regulations of the relevant faculty.

Additional work applications are available in the Student Affairs Office. The deadline for submission of applications is March 1 for Fall courses and July 15 for Winter courses and courses spanning Fall/Winter. A non-refundable fee is payable for each course at the time of application. Students should consult the Student Affairs Office for further information.

12.8.3 Reassessments and Rereads

In accordance with the Charter of Student Rights, and subject to the conditions stated therein, students have the right to consult any written submission for which they have received a mark, to discuss this submission with the examiner, and to obtain an impartial and competent review of any mark.

The Faculty of Science recognizes two types of impartial reviews: reassessments of coursework (i.e., of term papers, mid-terms, assignments, quizzes, etc.) and rereads of final examinations. In both cases, rather than re-correct the work and grade it as they would have done themselves, reviewers assess the appropriateness of the original grade based, for example, on the application of the grading key to the student’s work. If a grade is deemed unfair, it is changed, whether the new grade is higher or lower than the original — i.e., the reviewer’s grade takes precedence over the original grade.

A. Reassessment of Coursework

Reassessments of coursework are administered and conducted solely by the units involved according to procedures specified by the units and made available to staff and students. Requests for such reassessments must be made within 10 working days after the graded material has been made available for students to view it. Reassessments should normally be completed within 20 working days of the request.

B. Rereads of Final Examinations

Rereads of final examinations are administered by the Student Affairs Office, but conducted by the units involved. Students must apply in writing to the Student Affairs Office by March 31 for courses in the Fall term and by September 30 for courses in the Winter or Summer terms (these deadlines are strictly enforced and no requests for rereads will be accepted past them). Students are assessed a fee of $35 for such rereads. It is strongly recommended, but not required, that students consult the instructor of the course before requesting a reread of a final examination.

Reassessments and rereads in courses not in the Faculty of Science are subject to the deadlines, rules, and regulations of the relevant faculty.

12.9 Academic Standing

Academic standing is based primarily on students’ cumulative grade point average (CGPA), but may also be affected by their term grade point average (TGPA). Academic standing is assessed in January for the Fall term, in May for the Winter term, and in September for the Summer term. Academic standing in each term determines if students will be allowed to continue their studies in the next term and if any conditions will be attached to their registration.

Decisions about academic standing in the Fall term are based only on grades that are available in January. Grades for courses in which students have deferred examinations and Fall-term grades for courses that span the Fall and Winter terms do not affect academic standing for the Fall term, even though they will ultimately affect students’ Fall TGPA. Therefore, academic standings for the Fall term that are designated as “interim” should be interpreted as advisory. Note that interim standings will not appear on external transcripts. Interim standing decisions are mentioned below only if the rules for them differ from those for regular standing decisions.

Satisfactory/Interim Satisfactory Standing

Students in satisfactory standing may continue in their program.

- New students are admitted to satisfactory standing.
- Students with a CGPA of 2.00 or greater are in satisfactory standing.

Probationary/Interim Probationary Standing

Students in probationary standing may continue in their program, but must carry a reduced load (maximum 14 credits per term) and raise their TGPA and CGPA to return to satisfactory standing (see above). They should see their departmental adviser to discuss their course selection.

Students in interim probationary standing may continue in their program, but should evaluate their course load and reduce it as appropriate. They are strongly advised to consult a departmental adviser, before the withdrawal deadlines, about their course selection for the Winter term.

- Students who were previously in satisfactory standing will be placed in probationary standing if their CGPA falls between 1.50 and 1.99.
- Students who were previously in probationary standing will remain in probationary standing if their CGPA falls between 1.50 and 1.99 and their TGPA is 2.50 or higher, although the TGPA requirement will not apply to the Summer term.
- Students who were previously in interim unsatisfactory standing will be placed in probationary standing if their CGPA falls between 1.50 and 1.99 and their TGPA is 2.50 or higher.
- Students who were previously in unsatisfactory readmitted standing will be placed in probationary standing (for the Fall or Winter term) if their CGPA is less than 2.00, and if they satisfy relevant conditions specified in their letter of readmission.

Unsatisfactory Readmitted Standing

Students who were previously in unsatisfactory standing and who were readmitted to the Faculty by the Associate Dean (Student Affairs) or the Committee on Student Standing will have their standing changed to unsatisfactory readmitted standing. Their course load is specified in their letter of readmission, as are the conditions they must meet to be allowed to continue in their program. They should see their departmental adviser to discuss their course selection.

Unsatisfactory/Interim Unsatisfactory Standing

Students in interim unsatisfactory standing may continue in their program, but should evaluate their course load and reduce it as appropriate. They are strongly advised to consult a departmental adviser, before the withdrawal deadlines, about their course selection for the Winter term.

Students in unsatisfactory standing have failed to meet the minimum standards set by the Faculty. They may not continue in their program, and their registration will be cancelled.

Appeals for readmission by students in unsatisfactory standing should be addressed to the Associate Dean (Student Affairs) no later than July 15 for readmission to the Fall term and November 15 for the Winter term. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation). Students in unsatisfactory standing for the second time must withdraw permanently.

Normally, supplemental examinations are not permitted; however, students in unsatisfactory standing may appeal to the Associate Dean (Student Affairs) for permission to write a supplemental examination, clearly stating the reasons for special consideration and providing proof as appropriate.

- Students will be placed in unsatisfactory standing (Winter or Summer term) or interim unsatisfactory standing (Fall term) if their CGPA falls or remains below 1.50.
• Students who were previously in probationary, unsatisfactory standing will be placed in unsatisfactory standing (Fall or Winter term) if their TGPA falls below 2.50 and their CGPA is below 2.00.
• Students who were previously in unsatisfactory standing and who were readmitted to the Faculty by the Associate Dean (Student Affairs) or the Committee on Student Standing and who have not at least satisfied the conditions to attain probationary standing that were specified in the letter of readmission will be placed in unsatisfactory standing.

Students in the Concurrent B.Sc./B.Ed. Program who receive an F or J in any Education Field Experience course are placed in unsatisfactory standing. Although they may complete their term, they are required to withdraw from the Concurrent Program. However, they may apply to transfer to a conventional B.Sc. program as outlined in section 12.13.31 “Science for Teachers”.

Incomplete Standings
Standing awaits deferred examination. Must clear Ks, Ls or Supplemental. Standing Incomplete.

Students with incomplete standings in the Winter or Summer term may register for the Fall term, but their standing must be resolved by the end of the course-change period for that term. Students whose incomplete standing changes to satisfactory, probationary, or interim unsatisfactory standing may continue in the program. Students whose standing changes to unsatisfactory standing may not continue in their program, and their registration will be cancelled.

Students whose standing changes to unsatisfactory and who wish to ask for permission to continue in their program must make a request to the Associate Dean (Student Affairs) as soon as they are placed in unsatisfactory standing. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation). Students whose standing is still incomplete by the end of course change period should immediately consult with the Student Affairs Office.

At the end of the Winter term, students with a mark of K or L will be placed in the appropriate standing in June, if the outstanding mark in the course will not affect their standing. Otherwise, the standing decision will only be made once their incomplete marks have been cleared. For more information about incomplete grades, please refer to section 12.6.1 “Incomplete Grades”.

12.10 Awards and Honorary Designations

12.10.1 Honours and First-Class Honours

Departments may recommend to the Faculty that graduating students registered in an Honours program be awarded Honours or First-Class Honours under the following conditions:
• students must complete all requirements imposed by the department;
• for Honours, the CGPA at graduation must be at least 3.00;
• for First-Class Honours, the CGPA at graduation must be at least 3.50;
• some departments may impose additional requirements, which must be met before students are recommended for Honours or First-Class Honours. These are found in the departmental descriptions of Honours programs.

Students in an Honours program whose CGPA is below 3.00 or who did not satisfy certain program requirements must consult their adviser to determine if they are eligible to graduate in a program other than Honours.

12.10.2 Distinction or Great Distinction

Students in Faculty or Major programs may be awarded their degrees with Distinction or Great Distinction under the following conditions:
• students must have completed a minimum of 60 McGill credits towards the B.Sc. degree to be eligible;
• for Distinction, the CGPA at graduation must be 3.30 to 3.49;
• for Great Distinction, the CGPA at graduation must be 3.50 or greater;
• these designations may be withdrawn in the case of transfer students, if their CGPA in another faculty or at another university is not comparable to the CGPA earned in the Faculty of Science.

12.10.3 Dean’s Honour List

The designation Dean’s Honour List may be awarded to graduating students under the following conditions:
• students must have completed a minimum of 60 McGill credits towards the B.Sc. degree to be considered;
• students must be in the top 10% of the Faculty’s graduating class of students; this calculation is based on the CGPA;
• this honorary designation may be withdrawn in the case of transfer students, if their CGPA in another faculty or at another university is not comparable to the CGPA earned in the Faculty of Science.

The designation Dean’s Honour List may be awarded at the end of each academic year to continuing students under the following conditions:
• students must have completed at least 27 graded credits during the academic year to be considered;
• students must be among the top 10% of the Faculty. This calculation is based on the sessional GPA (a combined GPA for Fall and Winter terms).

12.10.4 Dean’s Multidisciplinary Undergraduate Research List

Please see “Dean’s Multidisciplinary Undergraduate Research List”, in section 12.12.1.2.

12.10.5 Medals and Prizes

Various medals, scholarships and prizes are open to continuing and graduating students. Full details of these are set out in the Undergraduate Scholarships and Awards Calendar, available in the Admissions, Recruitment and Registrar’s Office or on the Web: www.mcgill.ca. No application is required except in the case of the Moyse Travelling Scholarships.

12.11 Lists of Programs Offered

12.11.1 Faculty Programs

Faculty programs will be offered for students entering their departmental programs in Fall 2007. Faculty programs will be replaced
by the newly proposed Liberal programs. For further details, see the online version of this calendar at www.mcgill.ca/courses.

12.11.8 Bachelor of Arts and Science
Please see the "Bachelor of Arts and Science", in section 6 of the Calendar, for details.

12.11.9 Internship Programs – Internship Year for Engineering and Science (IYES)
McGill University offers an internship program with 8, 12 or 16 month placements, known as IYES (Internship year for Engineering & Science). This program is open to all Science undergraduate students. An internship is a career-related, professionally supervised, paid work term which allows you to experience firsthand the current practices and technologies in business and industry. The IYES program offers you the chance to test your career goals, gain confidence and experience and to return to your studies more focused, with a sense of where your academic careers might lead. Due to the longer work term, employers tend to assign IYES interns to significant projects which can be seen through from start to finish.
To learn more about the IYES program and how it might benefit you, visit www.mcgill.ca/science/student/internships.

12.11.10 Faculty of Arts Major and Minor Concentration Programs Available to Science Students
For more information, please see the relevant departmental entries in the Faculty of Arts section.

12.12 Undergraduate Research Opportunities

Because McGill is a research-intensive university, research informs the curriculum. There are many opportunities for talented students to take part in research during their undergraduate studies, whether at McGill, in affiliated hospitals, at other universities, or in the field. Many of these are organized through formal courses or programs organized by the Faculty of Science or its departments, and are listed in the following sections; however, see section 12.3.6 "Course Requirements" for information about other opportunities. The Office for Undergraduate Research in Science (OURS) coordinates several of the following programs, and can help students find out about other opportunities. Visit the OURS Website at www.mcgill.ca/science/ours to find out more.

12.12.1 Department Research Projects

Departments offer a variety of research-based courses which allow you to perform research under the supervision of a McGill researcher for academic credit. Depending on the unit, courses featuring undergraduate research may bear names such as: majors project, honours project, advanced lab, independent research, technical project, independent study, research project & seminar. For more information, see the course listings for Faculty of Science departments see "Course Information, Regulations and Descriptions (Appendix B)" of the Calendar.

12.12.1.1 "396" Undergraduate Research Project Courses

"396" undergraduate research project courses are offered by most departments – ANAT 396, ATOC 396, BIOL 396, etc. They are elective courses, which can be taken outside your own department. Students can consult a list of past projects and currently available projects on the Science website at www.mcgill.ca/science/ours/396, or they can devise a new project in consultation with a McGill researcher and download the required paperwork.

12.12.1.2 Dean's Multidisciplinary Undergraduate Research List

The Dean's Multidisciplinary Undergraduate Research List recognizes students who have participated in substantial and broad undergraduate research. To be placed on the Dean's Multidisciplinary Undergraduate Research List at graduation time, a student must have completed at least 9 credits of research-based courses, taken for a letter grade, where qualifying courses are specified in the list of approved research courses (see www.mcgill.ca/science/ours/researchcourses). Furthermore, considering all qualifying research-based courses on the student's transcript at graduation time:

- at least one course, worth at least 3 credits, must be from a different unit than the other research-based courses; and
- every qualifying course must have been completed with a grade of C or above; and
- the average GPA over all qualifying courses must be 3.0 or above.

12.12.2 NSERC Undergraduate Student Research Awards

The Natural Sciences and Engineering Research Council of Canada Undergraduate Student Research Awards (NSERC USRA) in Universities program: this award supports 16 consecutive weeks of paid full-time research under the supervision of a professor who holds an NSERC grant. It is an excellent way to prepare for graduate studies or a future career in science. This program is offered at most universities across Canada, and a travel allowance from NSERC is available. To apply, students must first identify a proposed supervisor who holds an NSERC grant. Students should apply at the university where they wish to hold the award. Applicants must be Canadian citizens or permanent residents of Canada. See www.mcgill.ca/science/ours/nserc for more information.

12.12.2.1 Related program: NSERC Industrial Undergraduate Student Research Awards

In cooperation with a company, students can also apply for an Industrial NSERC Award to provide salary support to gain industrially relevant experience. Students apply for these awards through one or more companies (not through McGill). For more information on forms, student eligibility, and company eligibility, please visit the NSERC website www.nserc.ca and look for the Industrial Undergraduate Student Research Awards.

12.12.2.2 Related program: FRSQ Undergraduate Student Research Awards and McEntyre USRA

These programs are meant to stimulate interest for research in students registered in an undergraduate program in Health Sciences or other disciplines offering specialization in health sciences, including social sciences, natural sciences, and engineering. For more information see www.mcgill.ca/gps/fellowships/undergrad/frsq-usra.

12.12.3 Undergraduate Research Conference

Each fall, the Faculty of Science holds an Undergraduate Research Conference to celebrate the research accomplishments of our undergraduate students. The conference also includes a public lecture by a Nobel laureate or other luminary on a topic related to scientific discovery. Students who wish to present their research posters should contact their departments in the preceding summer, since departments nominate participants for the conference. Everyone is welcome to attend. This is an excellent opportunity to see what McGill undergraduates undertake as research projects. The conference normally takes place on the Friday of Homecoming weekend.

For more details, please see www.mcgill.ca/science/ours/urc.
12.13 Academic Programs

12.13.1 Science Freshman Program

Students who need 97-120 credits to complete their degree requirements will normally be registered in the Science Freshman Program until they complete their first year. They must consult an adviser in the Student Affairs Office to obtain advice and approval of their course selection. Full details are available on the Student Affairs Office Website at www.mcgill.ca/artscisao."There is no need to choose a major when entering for the Science Freshman Program, but students may choose to elect a major and/or minor. Students wishing to take elective courses may choose them from the List of approved Science Courses, from the Sciences and Arts curriculum, or from other faculties. Interdepartmental and elective courses include at least one course in each discipline.

12.13.2 B.Sc. Freshman Program Requirements

Science Complementary (1 course)

One additional course from the list of Approved Freshman Science Courses.

Electives

Students wishing to take elective courses may choose them from the introductory courses offered by departments in the Faculties of Science or of Arts. Certain courses offered by other faculties may also be taken, but some restrictions apply. Consult the Student Affairs Office website at www.mcgill.ca/artscisao for more information about taking courses from other faculties.

12.14 Internship Year in Engineering and Science (IYES) and Industrial Practicum (IP)

These programs are open to all Science undergraduate students. An internship is a career-related, professionally supervised, paid work term. Internships may have a basis in research. For more information on IYES and IP, please see www.mcgill.ca/science/student/internships.

12.15 Field study and study abroad

McGill's Field Study Semester programs (in Africa, Barbados, and Panama) are research-based, as are many shorter field courses offered by the Departments of Biology, Earth & Planetary Sciences, and Geography. See "Field Studies and Study Abroad Opportunities" for more information about these programs and courses.

12.16 Other opportunities

While the application process for the NSERC USRA and some other research awards may be highly competitive, individual departments and researchers offer many other research opportunities. Some of these opportunities are formal programs and are listed on this page; however, many opportunities arise as a result of students talking with their professors. Students should feel free to do so.

In addition to opportunities available at McGill, there are several external opportunities at other institutions.

The website of the Office for Undergraduate Research in Science has information on external opportunities as well as how to find opportunities at McGill or elsewhere. For more information, see www.mcgill.ca/science/ours/opportunities and www.mcgill.ca/science/ours/how.

12.17 Other opportunities

While the application process for the NSERC USRA and some other research awards may be highly competitive, individual departments and researchers offer many other research opportunities. These may be paid or unpaid, for academic credit or not for credit. Some of these opportunities are formal programs and are listed on this page; however, many opportunities arise as a result of students talking with their professors. Students should feel free to do so.

In addition to opportunities available at McGill, there are several external opportunities at other institutions.

The website of the Office for Undergraduate Research in Science has information on external opportunities as well as how to find opportunities at McGill or elsewhere. For more information, see www.mcgill.ca/science/ours/opportunities and www.mcgill.ca/science/ours/how.

12.13.3 Science Freshman Program

Students who need 97-120 credits to complete their degree requirements will normally be registered in the Science Freshman Program until they complete their first year. They must consult an adviser in the Student Affairs Office to obtain advice and approval of their course selection. Full details are available on the Student Affairs Office Website at www.mcgill.ca/artscisao. Academic advising is also available by e-mail. The address is newstudentadvising@artsci.mcgill.ca.

B.SC. FRESHMAN PROGRAM REQUIREMENTS

Students normally complete 30 credits which must include at least 7 courses from the list of Approved Freshman Science courses.

General Math and Science Breadth (6 courses)

Six of the freshman courses must satisfy one of the following:
1. 2 courses from MATH and 4 courses from BIOL, CHEM or PHYS;
or
2. 3 courses from MATH and 3 courses from BIOL, CHEM or PHYS.

Science Complementary (1 course)

One additional course from the list of Approved Freshman Science Courses.

Notes:
1. Students who have not studied all of Biology, Chemistry and Physics at the grade 12 level or equivalent are strongly advised to include at least one course in the missing discipline in their freshman program.
2. Many students will complete more than 7 courses from the Approved Freshman Science Courses list, particularly those who wish to leave several options open for their choice of major.
3. Students entering the Freshman Program should be aware of the department specific requirements when selecting their courses. Detailed advising information will be available at www.mcgill.ca/artscisao.
4. The maximum number of courses per term, required, complementary and elective, is five.
5. Some medical and dental schools have specific freshman course requirements. Check the admission requirements of the school(s) to which you intend to apply.

Pierre Thibault; Ph.D.(Montr.)
Jan Van Oostrum; M.A., M.Phil., Ph.D.(Columbia)

Faculty Lecturer:
Aymen Behiery; M.B., Ch.B(Cairo)

The Department of Anatomy and Cell Biology offers courses that deal with cell biology, histology, embryology, neuroanatomy, and gross anatomy. The Honours Program is designed as the first phase in the training of career cell and molecular biologist. The Major and Faculty programs offer decreasing levels of specialization in Anatomy and Cell Biology but with a broader base in other biological sciences. These programs also form a sound groundwork for graduate studies in Anatomy and Cell Biology, or for further professional training in schools of medicine, dentistry and other health sciences. A B.Sc. in Anatomy and Cell Biology provides an excellent preparation for technical and administrative positions in laboratories of universities, research institutions, hospitals and pharmaceutical and biotechnological industries.

The Department is equipped to perform cell fractionation, protein purification, recombinant DNA technology, micro-injection of molecules into single cells, cytochemical, immunocytochemical and fluorescent analysis and electron microscopy, proteomics and genomics. The Department has a well-equipped centre for electron microscopy as well as a centre for confocal and immunofluorescence.

Inquiries about programs should be directed to the Department of Anatomy and Cell Biology.

A Science Major Concentration in Biomedical Sciences is available to students pursuing the B.A. & Sc. degree. This Major Concentration is described in the Bachelor of Arts and Science section of the Calendar; see "Biomedical Sciences", in section 6.12.4 for details.

PROPOSED B.SC. LIBERAL PROGRAM

A proposed B.Sc. Liberal Program is currently under University review and is intended to replace the B.Sc. Faculty programs offered by units. Faculty programs will be retired starting September 2008, and September 2007 will be the last year in which new students are accepted into Faculty programs. Students enrolled in a Faculty program will be able to complete that program.

As part of the proposed B.Sc. Liberal Program, the Department of Anatomy and Cell Biology will be offering a Core Science Component in Anatomy and Cell Biology. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit's entry in the online 2007-2008 Calendar, which will be available in the summer.

FACULTY PROGRAM IN ANATOMY AND CELL BIOLOGY (57 credits)

Required Courses (36 credits)
ANAT 212 (3) Molecular Mechanisms of Cell Function
ANAT 214 (3) Systemic Human Anatomy
ANAT 261 (4) Introduction to Dynamic Histology  
   (must be taken in U1)  
ANAT 262 (3) Introductory Molecular and Cell Biology  
Biol 200 (3) Molecular Biology  
Biol 202 (3) Basic Genetics  
Chem 212* (4) Introductory Organic Chemistry 1  
Chem 222* (4) Introductory Organic Chemistry 2  
Phyg 209 (3) Mammalian Physiology 1  
Phyg 210 (3) Mammalian Physiology 2  
Math 203* (3) Principles of Statistics 1  
or Psych 204 (3) Introduction to Psychological Statistics  
or Biol 373 (3) Biometry  
* If the equivalents to these courses were passed in CEGEP (as defined at www.mcgill.ca/student-records/transfercredits) they are not required for the Anatomy and Cell Biology programs, and may not be re-taken at McGill. Students must take the equivalent number of credits in Elective Courses to satisfy the total credit requirement for their degree.

Complementary Courses (21 credits)  
12 credits selected from:  
ANAT 321 (3) Circuitry of the Human Brain  
ANAT 322 (3) Neuroendocrinology  
ANAT 385 (3) Cellular Trafficking  
ANAT 381 (3) Basis of Embryology  
ANAT 458 (3) Membranes and Cellular Signaling  
Neur 310 (3) Cellular Neurobiology  
9 credits selected from biologically oriented courses (BOC), as defined in the Faculty Program.

HONOURS IN ANATOMY AND CELL BIOLOGY (73 credits)  
Students should register at the Major level in U1 and, if accepted, may enter the Honours Program at the beginning of U2. To enter the program, the student must obtain a CGPA of at least 3.00 at the end of U1. For promotion to the U3 year of the Honours program, or for entry into the program at this level, the student must have a CGPA of at least 3.20 at the end of their U2 year. It is expected that at the beginning of the third year the students who wish to continue in the Honours Program will be those who feel that they are seriously interested in a career in Cell Biology. The Honours Degree will be recommended after successful completion of the Program with a CGPA of at least 3.20.

Required Courses (52 credits)  
all Major Program required courses, plus:  
ANAT 432 (9) Honours Research Project  
Complementary Courses (21 credits)  
18 credits from:  
ANAT 321 (3) Circuitry of the Human Brain  
ANAT 322 (3) Neuroendocrinology  
ANAT 365 (3) Cellular Trafficking  
ANAT 381 (3) Basis of Embryology  
ANAT 458 (3) Membranes and Cellular Signaling  
ANAT 541 (3) Cell and Molecular Biology of Aging  
Neur 310 (3) Cellular Neurobiology  
3 credits of biologically oriented courses (BOC), as defined in the Faculty Program.
### PROPOSED B.SC. LIBERAL PROGRAM
As part of the proposed B.Sc. Liberal Program currently under University review, the Department of Atmospheric and Oceanic Sciences will be offering a Core Science Component in Atmospheric and Oceanic Sciences. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit's entry in the online 2007-2008 Calendar, which will be available in the summer.

### MINOR IN ATMOSPHERIC SCIENCE (18 credits)
The Minor may be taken in conjunction with any program in the Faculty of Science.

**Required Courses (15 credits)**
- ATOC 214 (3) Introduction: Physics of the Atmosphere
- ATOC 215 (3) Oceans, Weather and Climate
- ATOC 219 (3) Introduction to Atmospheric Chemistry
- or CHEM 219 (3) Introduction to Atmospheric Chemistry
- ATOC 309 (3) Weather Radars and Satellites
- ATOC 315 (3) Water in the Atmosphere

**Complementary Course (3 credits)**
- ATOC 412 (3) Atmospheric Dynamics
- or ATOC 540 (3) Synoptic Meteorology 1

### MAJOR IN ATMOSPHERIC SCIENCE (61 credits)

**Required Courses (46 credits)**
- ATOC 214 (3) Introduction: Physics of the Atmosphere
- ATOC 215 (3) Oceans, Weather and Climate
- ATOC 309 (3) Weather Radars and Satellites
- ATOC 315 (3) Water in the Atmosphere
- ATOC 412 (3) Atmospheric Dynamics
- ATOC 540 (3) Synoptic Meteorology 1
- ATOC 541 (3) Synoptic Meteorology 2
- ATOC 546 (1) Current Weather Discussion
- COMP 208 (3) Computers in Engineering
- MATH 222 (3) Calculus 3
- MATH 223 (3) Linear Algebra
- MATH 314 (3) Advanced Calculus
- MATH 315 (3) Ordinary Differential Equations
- PHYS 230 (3) Dynamics of Simple Systems
- PHYS 232 (3) Heat and Waves
- PHYS 257 (3) Experimental Methods 1

**Complementary Courses (15 credits)**
- 3-6 credits to satisfy a statistics requirement, usually:
  - MATH 203 (3) Principles of Statistics 1
  - or MATH 323 (3) Probability
  - and MATH 324 (3) Statistics
- 3 credits selected from:
  - PHYS 333 (3) Thermal and Statistical Physics
  - PHYS 340 (3) Electricity and Magnetism
- 6-9 credits ordinarily selected from:
  - ATOC 419 (3) Advances in Chemistry of Atmosphere
  - or CHEM 419 (3) Advances in Chemistry of Atmosphere
  - ATOC 515 (3) Turbulence in Atmosphere and Oceans
  - GEOG 322 (3) Environmental Hydrology
  - GEOG 372 (3) Running Water Environments
  - MATH 317 (3) Numerical Analysis
  - MATH 319 (3) Partial Differential Equations
  - MATH 423 (3) Regression and Analysis of Variance
  - PHYS 241 (3) Signal Processing
  - PHYS 331 (3) Topics in Classical Mechanics
  - PHYS 332 (3) Physics of Fluids
  - or MATH 555 (4) Fluid Dynamics
  - PHYS 340 (3) Electricity and Magnetism
  - PHYS 342 (3) Electromagnetic Waves

---

**Internship Year for Engineering and Science (IYES)**
IYES is a pre-graduate work experience program available to eligible students and normally taken between their U2 and U3 years. For more information, see "IYES: Internship Year for Engineering and Science and IP: Industrial Practicum", in section 8.2.8.

The following programs are also available with an internship component:

- **Major in Atmospheric Science**
- Honours in Atmospheric Science

A Science Major Concentration in Earth, Atmospheric and Ocean Sciences is available to students pursuing the B.A. & Sc. degree. This Major Concentration is described in the Bachelor of Arts and Science section of the Calendar; see "Earth, Atmosphere and Ocean Sciences", in section 6.12.8 for details.
MAJOR PROGRAM IN ATMOSPHERIC SCIENCE
(ATMOSPHERIC CHEMISTRY OPTION)
This program is currently being considered. Please consult www.mcgill.ca/courses for updates.

JOINT MAJOR IN ATMOSPHERIC SCIENCE AND PHYSICS
(67 credits)
This Major provides a solid basis for postgraduate study in meteorology, atmospheric physics, or related fields, and the necessary preparation for embarking on a professional career as a meteorologist directly after the B.Sc.
The program is jointly administered by the Department of Physics and the Department of Atmospheric and Oceanic Sciences. Students should consult undergraduate advisers in both departments.

Required Courses (64 credits)
ATOC 214 (3) Introduction: Physics of the Atmosphere
ATOC 215 (3) Oceans, Weather and Climate
ATOC 309 (3) Weather Radars and Satellites
ATOC 315 (3) Water in the Atmosphere
ATOC 412 (3) Atmospheric Dynamics
ATOC 540 (3) Synoptic Meteorology 1
ATOC 541 (3) Synoptic Meteorology 2
ATOC 546 (1) Current Weather Discussion
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 314 (3) Advanced Calculus
MATH 315 (3) Ordinary Differential Equations
MATH 319 (3) Partial Differential Equations
MATH 317 (3) Numerical Analysis
GEOG 372 (3) Running Water Environments
GEOG 322 (3) Environmental Hydrology

Complementary Courses
PHYS 257 (3) Experimental Methods 1

6 credits ordinarily selected from:
ATOC 419
or CHEM 419

HONOURS PROGRAM IN ATMOSPHERIC SCIENCE
(ATMOSPHERIC CHEMISTRY OPTION)
This program is currently being considered. Please consult www.mcgill.ca/courses for updates.

DIPLOMA IN METEOROLOGY (30 credits)
The Department offers an intensive, one-year program in theoretical and applied meteorology to B.Sc. or B.Eng. graduates of suitable standing in physics, applied mathematics or other appropriate disciplines, leading to a Diploma in Meteorology. The program is designed for students with little or no previous background in meteorology who wish to direct their experience to atmospheric or environmental applications, or who need to fulfill academic prerequisites in meteorology to qualify for employment. For further information, consult the Administrative Officer, Burnside Hall, Room 946.

An exemption of up to 6 credits may be allowed for courses already taken. Students granted such exemptions are required to add complementary courses from an approved list to maintain a total credit count of 30 completed at McGill.

Required Courses (18 credits)
ATOC 512 (3) Atmospheric & Oceanic Dynamics
ATOC 513 (3) Waves and Stability
ATOC 530 (3) Climate Dynamics 1
ATOC 531 (3) Climate Dynamics 2
ATOC 540 (3) Synoptic Meteorology 1
ATOC 541 (3) Synoptic Meteorology 2

Complementary Courses (12 credits)
6 credits selected from:
ATOC 309 (3) Weather Radars and Satellites
ATOC 315 (3) Water in the Atmosphere
ATOC 419 (3) Advances in Chemistry of Atmosphere
or CHEM 419

6 credits ordinarily selected from:
ATOC 515 (3) Turbulence in Atmosphere and Oceans
GEOG 522 (3) Advanced Environmental Hydrology
MATH 317 (3) Numerical Analysis
MATH 319 (3) Partial Differential Equations
PHYS 331  (3)  Topics in Classical Mechanics
PHYS 340  (3)  Electricity and Magnetism
PHYS 342  (3)  Electromagnetic Waves
PHYS 332  (3)  Physics of Fluids
or MATH 555  (4)  Fluid Dynamics

EARTH SYSTEM SCIENCE INTERDEPARTMENTAL MAJOR
[Awaiting approval of the Ministère de l'Éducation, du Loisir et du Sport]

This program is offered by the Departments of Atmospheric & Oceanic Sciences, Earth & Planetary Sciences and Geography.

Students in the Department of Atmospheric & Oceanic Sciences interested in this program should consult Professor Peter Yau (peter.yau@mcgill.ca). For more information, see section 12.13.11 “Earth System Science Interdepartmental Major (ESYS)”.

12.13.4  Biochemistry (BIOC)

Chair — David Y. Thomas

Emeritus Professors
Angus F. Graham; M.Sc.(Tor.), Ph.D., D.Sc.(Edin.), F.R.S.C.
Rose M. Johnston; B.Sc., Ph.D.(McG.), F.R.S.C.
Edward A. Meighen; B.Sc.(Alta), Ph.D.(Berk.)
Samuel Solomon; M.Sc., Ph.D.(McG.), F.R.S.C.
Theodore L. Sourkes; M.Sc.(McG.), Ph.D.(C'nell), F.R.S.C.
Clifford P. Stanners; B.Sc.(McM.), M.A., Ph.D.(Tor.)

Professors
Nicole Beauchemin; B.Sc., M.Sc., Ph.D.(Montr.) (joint appoint. with Oncology)
Rhoda Blosstein; B.Sc., M.Sc., Ph.D.(McG.), F.R.S.Q. (joint appoint. with Medicine)
Philip E. Branton; B.Sc., M.Sc.(Tor.) (Gilman Cheney Professor of Biochemistry)
Peter E. Braun; B.Sc., M.Sc.(Br. Col.), Ph.D.(Berk.)
Kalle Gehring; M.Sc.(Mich.), Ph.D.(Berk.)
Vincent Giguère; B.Sc., Ph.D.(Laval) (joint appoint. with Oncology)
Philippe Gros; B.Sc., M.Sc.(Montr.), Ph.D.(McG.) (James McGill Professor)
Annette A. Herscovics; B.Sc., Ph.D.(McG.), F.R.S.C. (joint appoint. with Oncology)
Robert E. MacKenzie; M.N.S., B.Sc.(Agr.) (McG.), Ph.D.(C'nell)
William Muller; B.Sc., Ph.D.(McG.)
Walter E. Mushinsky; B.Sc., Ph.D.(McG.)
Alain Nepveu; B.Sc., M.Sc.(Montr.), Ph.D.(Sher.) (joint appoint. with Oncology)

Morag Park; B.Sc., Ph.D.(Glasgow) (William Dawson Scholar) (joint appoint. with Oncology)
Jerry Pelletier; B.Sc., Ph.D.(McG.)
Gordon C. Shore; B.Sc.(Guelph), Ph.D.(McG.)
Joseph Shuster; B.Sc.(McG.), Ph.D.(Calif.), M.D.(Alta.) (joint appoint. with Medicine)
John R. Silvis; B.Sc., Ph.D.(Alta)
Nahum Sonenberg; M.Sc., Ph.D.(Weizmann Inst.), F.R.S.C. (James McGill Professor)
David Y. Thomas; B.Sc.(Brist.), M.Sc., Ph.D.(Univ. Coll., Lond.), F.R.S.C.
Michel L. Tremblay; B.Sc., M.Sc.(Sher.), Ph.D.(McM.)
Maria Zannis-Hadjopoulos; B.Sc., M.Sc., Ph.D.(McG.) (joint appoint. with Oncology)

Associate Professors
Albert Berghuis; B.Sc., M.Sc.(Rijks Univ.Groningen, the Netherlands), Ph.D.(Br. Col.)
Annim Pause; B.Sc., M.Sc.(U. Konstanz, Germ.), Ph.D.(McG.)

Assistant Professors
Maxime Bouchard; B.Sc., Ph.D.(Laval)
Josée Dostie; B.Sc.(Sher.), Ph.D.(McG.)
Thomas Duchaine; B.Sc., Ph.D.(Montr.)
Imed Gallouzi; Maitrise, DEA, Ph.D.(Montpellier,France)
Bhushan Nagar; B.Sc., Ph.D.(Tor.)
Joe Teodoro; B.Sc.(W. Ont.), Ph.D.(McG.)
Jason Young; B.Sc.(Tor.), Ph.D.(McM.)

Associate Members
Karina Auclair (Chemistry); John J. Bergeron (Anatomy & Cell Biology); Mark S. Featherstone (Oncology); William C. Galley (Chemistry); Jacques Genest (Medicine); Matthias Gottle (Microbiology and Immunology); Michael Hallett (Computer Science); Robert Scott Kiss (Medicine); Peter J. Roughley (Shriners Hospital); Maya Saleh (Medicine); Erwin Schurr (Exp. Medicine, RVH); Charles Scrivner (Pediatrics, MCH); Peter Siegel (Medicine); Bernard Turcotte (Exp. Medicine, RVH); Simon Wing (Medicine); Xiang-Jiao Yang (Molecular Oncology, RVH)

Adjunct Professors
Prabhat Arya (NRC, Ottawa); Katherine Cianflone (Laval); Mirek Czygan (Montreal); Donald Nicholson (Mercy); Maureen D. O'Connor-McCourt (B.R.I.); Enrico Purisima (B.R.I.); Martine Raymond (I.R.C.Montr.); Sophie Roy (Merck)

Biochemistry is the application of chemical, genetic, and biophysical approaches to the study of biological processes at the cellular and molecular level. Biochemists are interested in the dynamic events that occur in cells, for example, in mechanisms of brain function; cellular differentiation; energy utilization by animals and microorganisms and in the molecular basis of inheritance and disease. The biochemist seeks to determine how specific molecules such as proteins, nucleic acids, lipids, vitamins and hormones function in various cellular processes. Biochemists place particular emphasis on the regulation of reactions in living cells. The knowledge and methods developed by biochemists are applied in all fields of medicine, in agriculture and in many chemical and health-related industries. Biochemistry is unique in providing basic theoretical training as well as basic practical laboratory training and research in both enzymology and genetic engineering, the two basic components in the rapidly expanding field of Biotechnology. Three programs are offered by the Department of Biochemistry. The Honours and Major programs provide a sound background for students who wish to have a professional career in biochemistry and can lead to postgraduate studies and research careers in hospital, university or industrial laboratories. The Faculty program is less specialized, offering students opportunities to select courses in other fields of interest.

During the first year, each program provides basic training in organic, physical and analytical chemistry as well as in biology and physiology. The Honours and Major programs become more specialized in biochemistry during the following two years with additional work in chemistry and biology.

Students interested in pursuing an ad hoc Joint Major or Joint Honours degree between Biochemistry and a second discipline may consult with our Chief Adviser.

The increasing involvement of complex molecules in modern society requires personnel trained in both chemistry and biology. With the advent of biotechnology, the combination of chemistry, molecular biology, enzymology and genetic engineering found in the biochemistry program provides the essential background and training in this area as well. The biochemist is in an advantageous position to fulfill this role and assume a wide variety of positions in industry and the health field. These range from research and development in the chemical and pharmaceutical industries to testing as well as research in government and hospital laboratories to management. Many graduates take higher degrees in research and attain academic positions in universities and colleges.
PROPOSED B.SC. LIBERAL PROGRAM
A proposed B.Sc. Liberal Program is currently under University review and is intended to replace the B.Sc. Faculty programs offered by units. Faculty programs will be retired starting September 2008, and September 2007 will be the last year in which new students are accepted into Faculty programs. Students enrolled in a Faculty program will be able to complete that program.

As part of the proposed B.Sc. Liberal Program, the Department of Biochemistry will be offering a Core Science Component in Biochemistry. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit's entry in the online 2007-2008 Calendar, which will be available in the summer.

U1 Required Courses (16 credits)
- BIOC 212 (3) Molecular Mechanisms of Cell Function
- BIOL 200 (3) Molecular Biology
- BIOL 202 (3) Basic Genetics
- CHEM 204 (3) Physical Chemistry/Biological Sciences 1
- CHEM 222 (4) Introductory Organic Chemistry 2

U1 Complementary Courses (9 credits)
6 credits selected from:
- BIOL 205 (3) Biology of Organisms
- MIMM 211 (3) Introductory Microbiology
- PHGY 209 (3) Mammalian Physiology 1
- PHGY 210 (3) Mammalian Physiology 2

3 credits selected from:
- BIOL 373 (3) Biometry
- COMP 202 (3) Introduction to Computing 1
- MATH 203 (3) Principles of Statistics 1
- MATH 222 (3) Calculus 3
- PSYC 204 (3) Introduction to Psychological Statistics

U2 Required Courses (15 credits)
- BIOC 300D1 (3) Laboratory in Biochemistry
- BIOC 300D2 (3) Laboratory in Biochemistry
- BIOC 311 (3) Metabolic Biochemistry
- BIOC 312 (3) Biochemistry of Macromolecules
- CHEM 302 (3) Introductory Organic Chemistry 3

U2 Complementary Courses (3 credits)
3 credits selected from:
- ANAT 262 (3) Introductory Molecular and Cell Biology
- BIOL 303 (3) Developmental Biology
- BIOL 313 (3) Eukaryotic Cell Biology
- CHEM 352 (3) Structural Organic Chemistry
- CHEM 382 (3) Organic Chemistry: Natural Products
- MIMM 314 (3) Immunology

U3 Complementary Courses (12 credits)
at least 3 credits selected from:
- BIOC 450 (3) Protein Structure and Function
- BIOC 454 (3) Nucleic Acids

the remaining credits selected from the following list or the above:
- ANAT 261 (4) Introduction to Dynamic Histology
- BIOC 404 (3) Biophysical Chemistry
- BIOC 455 (3) Neurochemistry
- BIOC 458 (3) Membranes and Cellular Signaling
- BIOL 205 (3) Biology of Organisms
- BIOL 300 (3) Molecular Biology of the Gene
- BIOL 303 (3) Developmental Biology
- BIOL 304 (3) Evolution
- BIOL 314 (3) Molecular Biology of Oncogenes
- CHEM 214 (3) Physical Chemistry/Biological Sciences 2
- CHEM 257D1 (2) Introductory Analytical Chemistry
- CHEM 257D2 (2) Introductory Analytical Chemistry
- CHEM 352 (3) Structural Organic Chemistry
- CHEM 362 (2) Advanced Organic Chemistry Laboratory
- CHEM 382 (3) Organic Chemistry: Natural Products
- CHEM 502 (3) Advanced Bio-organic Chemistry
- CHEM 572 (3) Synthetic Organic Chemistry
- MIMM 211 (3) Introductory Microbiology
- MIMM 314 (3) Immunology
- PHAR 300 (3) Drug Action
- PHAR 301 (3) Drugs and Disease
- PHGY 209 (3) Mammalian Physiology 1
- PHGY 210 (3) Mammalian Physiology 2

MAJOR IN BIOCHEMISTRY (67 or 70 credits)
Students may transfer into the Major program at any time provided they have met all course requirements.

U1 Required Courses (20 credits)
- BIOC 212 (3) Molecular Mechanisms of Cell Function
- BIOL 200 (3) Molecular Biology
- BIOL 202 (3) Basic Genetics
- CHEM 204 (3) Physical Chemistry/Biological Sciences 1
- CHEM 222 (4) Introductory Organic Chemistry 2
- CHEM 257D1 (2) Introductory Analytical Chemistry
- CHEM 257D2 (2) Introductory Analytical Chemistry

U1 Complementary Courses (9 credits)
6 credits, selected from:
- BIOL 205 (3) Biology of Organisms
- MIMM 211 (3) Introductory Microbiology
- PHGY 209 (3) Mammalian Physiology 1
- PHGY 210 (3) Mammalian Physiology 2

3 credits selected from:
- BIOL 309 (3) Mathematical Models in Biology
- BIOL 373 (3) Biometry
- COMP 202 (3) Introduction to Computing 1
- MATH 203 (3) Principles of Statistics 1
- MATH 222 (3) Calculus 3
- PSYC 204 (3) Introduction to Psychological Statistics

U2 Required Courses (22 credits)
- all Faculty Program U2 Required Courses, plus:
- ANAT 262 (3) Introductory Molecular and Cell Biology
- CHEM 214 (3) Physical Chemistry/Biological Sciences 2
- CHEM 362 (2) Advanced Organic Chemistry Laboratory

U2 Complementary Courses (3 credits)
3 credits selected from:
- BIOL 303 (3) Developmental Biology
- BIOL 313 (3) Eukaryotic Cell Biology
- CHEM 352 (3) Structural Organic Chemistry
- CHEM 382 (3) Organic Chemistry: Natural Products
- MIMM 314 (3) Immunology
U3 Required Courses (6 credits)
BIOC 450  (3)  Protein Structure and Function
BIOC 454  (3)  Nucleic Acids

U3 Complementary Courses (6 or 9* credits)

BIOC 404  (3)  Biophysical Chemistry
BIOC 455  (3)  Neurochemistry
BIOC 458  (3)  Membranes and Cellular Signalling
BIOC 460*  (6)  Advanced Lab in Biochemistry
BIOC 503  (3)  Immunoochemistry

the remainder, if any, to be selected from the following list:
BIOC 460*  (6)  Advanced Lab in Biochemistry
BIOC 458  (3)  Membranes and Cellular Signalling
BIOC 455  (3)  Neurochemistry

U3 Required Courses (6 credits)
BIOC 458  (3)  Membranes and Cellular Signalling
BIOC 491  (6)  Independent Research
BIOC 503  (3)  Immunoochemistry

the remainder, if any, to be selected from the following list:
BIOC 312 will be of particular importance for continuation in the U3 Honours program. To be eligible for Promotion to U3 year is based on satisfactory completion of U2 courses with a GPA of at least 3.20 and a B in every required course. Students who satisfactorily complete the U1 Major program with a GPA of at least 3.20 and a mark of B- or better in every required course are eligible for admission to the Honours program. Students seeking admission to the Honours program must obtain permission from the Student Affairs Officer during the Add/Drop period in September of their second year.

HONOURS IN BIOCHEMISTRY (76 credits)

U1 Required Courses (20 credits)
as for the Major Program U1

U1 Complementary Courses (9 credits)
as for the Major Program U1

U2 Required Courses (23 credits)
as for the Major Program U2

U2 Complementary Courses (3 credits)
as for the Major Program U2

U3 Required Courses (15 credits)
BIOC 404  (3)  Biophysical Chemistry
BIOC 450  (3)  Protein Structure and Function
BIOC 454  (3)  Nucleic Acids
BIOC 460  (6)  Advanced Lab in Biochemistry

U3 Complementary Courses (6 credits)
at least 3 credits selected from:
BIOC 455  (3)  Neurochemistry

Redpath Museum: David Green, Hans Larsson, Anthony Ricciardi

Adjunct Professors
NRC Lab: Malcolm S. Whitey

Biology is the study of living things at the molecular, cellular and organismal levels. It deals with fundamental questions such as the origin and evolution of plants and animals, interactions between living organisms and their environment, mechanisms of embryonic development, structure and function of the living cell and its organelles, molecular basis of inheritance, biochemical and genetic basis of human diseases, and the operation of the brain and the nervous system. The study of biology also has vast practical applications. The knowledge, methods and concepts developed through research in the various fields of biology are applied extensively in agriculture, medicine, biotechnology, genetic engineering, environmental protection and wildlife management.

The Department of Biology offers two Faculty Programs, a Major Program, an Honours Program, a Minor Program and a Minor Concentration in Science for Arts students. The details of these programs are given below.

The prerequisites for Biology programs include, in addition to the minimum requirements for admission to the Faculty of Science, an additional Biology and one course in Organic Chemistry. Students who have a DEC in Science but lack either of these courses must take them as extra requirements. It is advisable to take the additional CEGEP Biology in advance, if possible. The two Biology courses together prepare students for the Biology Program at McGill.

The programs in Biology offer students an opportunity to specialize in more than one area of biology and provide them with a broad training in biology as compared to the more specialized programs in Biochemistry, Microbiology, Physiology and Anatomy. A B.Sc. degree in Biology, therefore, prepares students for a wide range of employment opportunities, including entry to professional schools in medicine, veterinary science, dentistry, agriculture, nursing, education and library science. It also provides solid background for those interested in careers related to environmental protection, wildlife management, biotechnology and genetic engineering. A B.Sc. degree in Biology can also lead to postgraduate studies and research careers in universities, research institutes, hospitals, and industrial or governmental laboratories.

The Department of Biology has well-equipped teaching and research laboratories and its academic staff members, research associates, postdoctoral fellows and graduate students carry out research in areas of molecular biology, human genetics, ecology, animal behaviour, developmental biology, bioinformatics, neurobiology, marine biology, plant biology, and evolution. Its teaching and research resources are extended by the Redpath Museum; the Montreal Children's, Jewish General, Montreal General, Royal Victoria and Shriners Hospitals; Macdonald Campus, Montreal Neurological Institute; and the Sheldon Biotechnology Centre. For courses taught in the field, the stations at the Gault Nature Reserve, the Morgan Arboretum, the Bellairs Research Institute in Barbados, the Huntsman Marine Science Centre in New Brunswick, and the Smithsonian Tropical Research Institute in Panama are used. In addition, field stations near Lake Memphremagog and at Schefferville in northern Quebec are available for research projects.

The Department of Biology Undergraduate Programs 2007-2008 booklet (“Blue Book”) describes in detail the content of each course and the level at which it is given, the aims and methods used, lectures, references, grading procedures, etc. The “Blue Book” also contains more information on registration, counselling, committee structure and the research interests and facilities which are represented in the Department. It is available on the Web at www.biology.mcgill.ca/undergrad/bluebook.html.

Inquiries about undergraduate programs should be directed to the Undergraduate Affairs Office, in Room W4/8, Stewart Biological Sciences Building, telephone (514) 398-7045.

Two Major Concentrations in Biology as well as two Minor Concentrations in Biology (Organismal and Cell/Molecular Options) are available to students pursuing the B.A. & Sc. degree. These Major Concentrations are described in the Bachelor of Arts and Science section of the Calendar; see “Biology (BIOL)”, in section 6.12.3 for details.

MINOR IN BIOLOGY (24 credits)

The Minor in Biology may be taken in conjunction with any primary program in the Faculty of Science (other than programs offered by the Department of Biology). Students are advised to consult the Undergraduate Adviser in Biology as early as possible (preferably during their first year), in order to plan their course selection.

Six credits of overlap are allowed between the Minor and the primary program.

Note: Although CHEM 212 is not part of the program, either CHEM 212 or CEGEP competency 00XV is required as a pre- or co-requisite for BIOL 200.

Required Courses (15 credits)
BIOL 200 (3) Molecular Biology
BIOL 201 (3) Cell Biology and Metabolism
BIOL 202 (3) Basic Genetics
BIOL 205 (3) Biology of Organisms
BIOL 215 (3) Introduction to Ecology and Evolution
Complementary Courses (9 credits)
9 credits to be chosen from the Biology Department's course offerings, at the 300 level or above.

PROPOSED B.SC. LIBERAL PROGRAM
A proposed B.Sc. Liberal Program is currently under University review and is intended to replace the B.Sc. Faculty programs offered by units. Faculty programs will be retired starting September 2008, and September 2007 will be the last year in which new students are accepted into Faculty programs. Students enrolled in a Faculty program will be able to complete that program.

As part of the proposed B.Sc. Liberal Program, the Department of Biology will be offering a Core Science Component in Biology. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit's entry in the online 2007-2008 Calendar, which will be available in the summer.

FACULTY PROGRAMS
In view of the constantly changing job market for B.Sc. graduates in biology, the Department has designed Faculty Programs to allow students to prepare for a wide range of employment opportunities. These programs offer students an opportunity to specialize in more than one area of biology, and broaden the scope of their scientific background. These programs can be tailored to provide a relatively broad spectrum of biology courses, or provide a degree of specialization in biology which approaches that of a Major Program. The flexibility and scope of these programs will not only enhance the graduate's prospects for employment, but also entrance into graduate studies.

Students in the Faculty Programs are permitted to take a maximum of 9 credits of research courses.

Note: Although CHEM 212 is not part of the programs, either CHEM 212 or CEGEP competency 00XV is required as a pre- or co-requisite for BIOL 200.

FACULTY PROGRAM IN BIOLOGY (54 or 55 credits)
Required Courses (15 credits)
BIOL 200 (3) Molecular Biology
BIOL 201 (3) Cell Biology and Metabolism
BIOL 202 (3) Basic Genetics
BIOL 205 (3) Biology of Organisms
BIOL 215 (3) Introduction to Ecology and Evolution
Complementary Courses (39 or 40 credits)
21 or 22 credits of Biology courses, including
3 or 4 credits selected from:
  BIOL 206 (3) Methods in Biology of Organisms
  BIOL 301 (4) Cell and Molecular Laboratory
18 credits of Science courses including, at most, 3 credits of general interest Science courses (not listed in Science Major Programs).

Of the Complementary courses at least 6 of the 18 remaining Biology credits and 6 of the 18 Science credits must be above the 200 level, none may be at the 100 level; all are to be approved by the adviser.

FACULTY PROGRAM IN BIOLOGY AND MATHEMATICS (57 credits)
Required Courses (21 credits)
COMP 202 (3) Introduction to Computing 1
MATH 133 (3) Vectors, Matrices and Geometry
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 315 (3) Ordinary Differential Equations
MATH 323 (3) Probability
MATH 324 (3) Statistics
Complementary Courses (36 credits)
21 credits in Biology including
12 credits selected from:
  BIOL 200 (3) Molecular Biology
  BIOL 206 (3) Methods in Biology of Organisms
  BIOL 215 (3) Introduction to Ecology and Evolution

U1 Required Courses (18 credits)
BIOL 200 (3) Molecular Biology
BIOL 201 (3) Cell Biology and Metabolism
BIOL 202 (3) Basic Genetics
BIOL 205 (3) Biology of Organisms
BIOL 206 (3) Methods in Biology of Organisms
BIOL 215 (3) Introduction to Ecology and Evolution

U2 or U3 Required Courses (4 credits)
BIOL 301 (4) Cell and Molecular Laboratory

U2 or U3 Complementary Courses (12 credits)
12 credits selected from:
BIOL 300 (3) Molecular Biology of the Gene
BIOL 303 (3) Developmental Biology
BIOL 304 (3) Evolution
BIOL 306 (3) Neurobiology and Behaviour
BIOL 308 (3) Ecological Dynamics

Other Complementary Courses (21 credits)
To be selected in consultation with the student's adviser. All courses must be at the 300 level or higher; they are to include any seven Biology courses of which at most three may be substituted, given the adviser's consent, with science courses offered by other
departments. Unless required by the Major Program, prerequisites for these courses must be taken as electives.

**BIOLOGY CONCENTRATIONS**

**Note:** The concentrations set out below are only guidelines for specialized training. *They do not constitute sets of requirements.*

Students interested in advanced studies in any biological discipline are strongly advised to develop their skills in computing as appropriate. As an aid to students wishing to specialize, the concentrations list key and other suggested courses by discipline.

**Animal Behaviour Concentration**

Understanding the diverse ways in which animals feed, mate, care for their offspring, avoid predators, select their habitats, communicate, and process information constitute the subject matter of behaviour. Several approaches are used to study these questions. Some focus on ecological consequences and determinants, some on physiological, genetic and developmental mechanisms, others on evolutionary origins.

Key courses:
- BIOL 304, BIOL 305, BIOL 306, BIOL 307, BIOL 331 or BIOL 334D1/BIOL 334D2 or another field course with a significant behavioural component, BIOL 373, BIOL 507.

Other suggested courses:
- BIOL 377, BIOL 468, BIOL 467, BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2, BIOL 507

Since animal behaviour builds upon the fields of biology, ecology, and evolutionary biology, most courses from these fields will be relevant. Some courses that focus on a particular taxonomic group such as birds (Natural Resource Sciences WILD 420), amphibians and reptiles (BIOL 427) and marine mammals (BIOL 335) include a significant amount of behaviour.

**Biological Diversity and Systematics**

The study of biological diversity deals with the maintenance, emergence, and history of the inexhaustible variety of different kinds of organisms. It is deeply concerned with the particular characteristics of different organisms and therefore emphasizes the detailed study of particular groups and forms the basis of comparative biology. Our knowledge of diversity is organized through the study of systematics, which seeks to understand the history of life and the phylogenetic and genetic relationships of living things. Appreciation and knowledge of diversity and systematics are essential in ecology and evolutionary biology and underlie all work in resource utilization and conservation biology.

Key course:
- BIOL 304, BIOL 305, BIOL 373

Other suggested courses:
- BIOL 240, BIOL 324, BIOL 328, BIOL 329, BIOL 331 or BIOL 334D1/BIOL 334D2, BIOL 335, BIOL 350/ENTO 350, BIOL 352, BIOL 377, BIOL 427, BIOL 465, BIOL 466 or BIOL 467, BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2, BIOL 505, BIOL 555D1/BIOL 555D2, BIOL 569, BIOL 571, BIOL 594

Macdonald Campus:
- PLNT 358; ENTO 440; WILD 212, WILD 307, WILD 313, WILD 350, WILD 420; WILD 424

**Conservation Biology Concentration**

Conservation Biology is the study and protection of biological diversity. It is a scientific discipline closely connecting ecology and evolutionary biology with applications in public processes working within a functional ecological context and deals with issues of how the wide variety of organisms and ecosystems can be maintained and prevented from declining. It considers population and habitat viability and complexity in the face of threats and perturbations. Cognizance of biological diversity, knowledge and expertise in both ecology and evolutionary biology, and appreciation for the political, social and economic contexts of the biodiversity crisis underlie all work in conservation biology.

Key courses:
- BIOL 308, BIOL 373, BIOL 465 plus at least one of the following field courses: BIOL 328 or BIOL 329 or BIOL 331 or, BIOL 334D1/BIOL 334D2 or, BIOL 553.

Other suggested courses:
- BIOL 304, BIOL 305, BIOL 307, BIOL 324, BIOL 350, BIOL 355, BIOL 377, BIOL 413, BIOL 427, BIOL 434, BIOL 466, BIOL 467, BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2, BIOL 505, BIOL 510, BIOL 540, BIOL 594; ECON 225, ECON 326; GEOG 350, GEOG 370, GEOG 380.

Macdonald Campus: NRSC 437; PLNT 358; WILD 350, WILD 415, WILD 420, WILD 421.

**Evolutionary Biology Concentration**

Evolutionary Biology is the study of processes that change organisms and their characteristics through time. Evolutionary biologists are concerned with adaptations of organisms and the process of natural selection.

Key courses:
- BIOL 304, BIOL 305, BIOL 307, BIOL 324, BIOL 331, BIOL 352, BIOL 373, BIOL 377, BIOL 435, BIOL 466 or BIOL 467, BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2, BIOL 555 D1/BIOL 555 D2, BIOL 569, BIOL 570, BIOL 571, BIOL 572, BIOL 594.

Other suggested courses in Organismal Biology:
- BIOL 240, BIOL 328, BIOL 335, BIOL 350/ENTO 350, BIOL 427

Macdonald Campus: PLNT 358, WILD 420

**Genetics and Development**

- BIOL 300, BIOL 303

**Ecology and Behaviour**

- BIOL 309, BIOL 329, BIOL 331, BIOL 434

**Experimental Plant Biology Concentration**

Research interests span modern molecular genetics, plant physiology and biochemistry, plant ecology and genetics, plant morphogenesis, and the adaptation and evolution of plant form and function. Research is carried out in the field and in the Department's large, excellent controlled-environment facilities. The importance of adaptation to climate and the use of plants for food, chemicals, pharmaceuticals and materials underlie research using biotechnology and quantitative methods to improve cultivated plants and understand natural plant populations.

Key courses:
- BIOL 300, BIOL 303, BIOL 350

Other suggested courses:
- BIOL 377, BIOL 465, BIOL 466 or BIOL 467, BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2, BIOL 555 D1/BIOL 555 D2

**Human Genetics Concentration**

The courses recommended for students interested in Human Genetics are designed to offer a broad perspective in this rapidly advancing area of biology. Genetics is covered at all levels of organization (the gene, the chromosome, the cell, the organism and the population), using pertinent examples from all species, but with special emphasis on humans.

Key courses:
- BIOL 301, BIOL 370, BIOL 373, BIOL 416, BIOL 520, BIOL 568, BIOL 575

Other suggested courses:
- BIOL 311; BIOL 314, BIOL 466, BIOL 467, BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2; CHEM 203 or CHEM 204 and CHEM 214, MIMM 314

**Molecular Genetics and Development Concentration**

The discoveries that have fuelled the ongoing biomedical and biotechnological revolution have arisen at the intersection of a number of fields of biological investigation, including molecular biology, genetics, cellular and developmental biology and biochemistry. A substantial and significant quantity of this research has been conducted upon model eukaryotic organisms, such as yeast, nematode, the fruit fly, and the mustard weed, Arabidopsis. In the molecular genetics and development concentration students will obtain a comprehensive understanding of how the “model
eukaryotes“ have advanced our knowledge of the mechanisms responsible for cellular function and organismal development. Graduates from this concentration will be well prepared to pursue higher degrees in the fields of basic biology, biotechnology, and biomedicine or to assume a wide variety of positions in government, universities, and medical and industrial institutions.

Key courses:  
BIOL 300, BIOL 301, BIOL 303, BIOL 373, BIOL 569; CHEM 203 or CHEM 204 combined with CHEM 214

Other suggested courses:  
BIOL 313, BIOL 314, BIOL 416, BIOL 466, BIOL 467, BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2, BIOL 518, BIOL 520, BIOL 524, BIOL 544

Neurobiology Concentration
Nervous systems are perhaps the most complex entities in the natural world, being composed of up to trillions of interconnected cells that must operate in a coordinated manner to produce behaviour which can range from the mundane (e.g., regulation of heart rate) to the magnificent (e.g., musical composition). The neurobiology discipline is one of the fastest growing areas of modern biology, seeks to understand the evolution, development, and operation of nervous systems. The neurobiology concentration addresses these issues by examination of neural structure, function and development at levels of organization that range from the molecular to the organismal. As a result of exposure to a wide range of experimental and intellectual approaches, students receive a sound, broadly based education in biology.

Key courses:  
BIOL 306, BIOL 373, BIOL 389, BIOL 507, BIOL 530, BIOL 531, BIOL 532, BIOL 588

Other suggested courses:  
ANAT 321, ANAT 322; BIOC 455; BIOL 300, BIOL 303, BIOL 466, BIOL 467, BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2, BIOL 507; NEUR 310; PHAR 562; PHGY 451, PHGY 556; PSYC 311, PSYC 318, PSYC 342, PSYC 410, PSYC 470; PSY 500

CONCENTRATIONS AVAILABLE WITHIN THE AREA OF ECOLOGY

Ecology is the study of the interactions between organisms and environment that affect distribution, abundance, and other characteristics of the organisms. A strong analytical and quantitative orientation is common to all areas of ecology, and thus students wishing to specialize in these areas are strongly encouraged to develop their background in statistical analysis, computing, and mathematical modelling. Many of the ecology courses feature a strong analytical component, and students will find that background preparation in this area is very useful, if not essential. Ecology depends heavily on field research, and thus BIOL 331 and/or other field courses should be considered as vital to all concentrations in this area.

Aquatic Ecology Concentration
This concentration is designed to introduce the principles of ecology as they pertain to aquatic ecosystems and aquatic biota. Since it is essential to know how knowledge is obtained, as well as what has been learned, one of the courses (limnology) involves field components that stress the techniques used to study aquatic ecology. In addition, the concentration includes a field course in ecology. There is also a variety of courses in aquatic disciplines offered in other departments that complement the aquatic ecology courses offered in Biology.

Key courses:  
BIOL 305, BIOL 308, BIOL 331 or another field course, BIOL 373, BIOL 432, BIOL 441, BIOL 442, BIOL 465; COMP 202 or COMP 273

Other suggested courses:  
BIOL 307, BIOL 329, BIOL 434; GEOG 305, GEOG 306, GEOG 308, GEOG 322

Macdonald Campus:  
NRSC 315

General and Applied Ecology Concentration
The concentration in general and applied ecology is designed to introduce the breadth of contemporary ecology, at the levels of the ecosystem, communities and populations, and at the level of the individual organism, with an accent on the application of this science to practical problems in environmental management, and the management of resources and pests. In addition to general courses dealing with general principles, there is a selection of courses dealing with particular groups of organisms. Since it is essential to know how knowledge is obtained, the concentration includes a field course in ecology.

Key courses:  
BIOL 305, BIOL 308, BIOL 331 or BIOL 334, BIOL 350/ENTO 350, BIOL 373; COMP 202 or COMP 273

Other suggested courses:  
BIOL 307, BIOL 324, BIOL 329, BIOL 427, BIOL 432, BIOL 434, BIOL 441, BIOL 442, BIOL 465, BIOL 540, BIOL 571, BIOL 590, BIOL 594; GEOG 302

Macdonald Campus:  
PL NT 451, PL NT 460

Marine Biology Concentration
This concentration is designed to offer students a broad introduction to marine biology and marine ecology, which will form the basis for graduate studies in the fields, or to employment in aquatic biology and oceanography.

Key courses:  
BIOL 305, BIOL 308, BIOL 335, BIOL 373, BIOL 441, BIOL 442

Other suggested courses:  
ACRO 220, ACRO 550, ATOC 561; BIOL 329, BIOL 331, BIOL 334/BIOL 334D2, BIOL 432, BIOL 434, BIOL 465; EPSC 542

For students intending to proceed to graduate work, one independent studies course (BIOL 466 or BIOL 467; BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2) is recommended. Because of the importance of numerical analyses in all fields of ecology, courses in Biometry (e.g. BIOL 373) and Computer Science (COMP 202 or COMP 273) are recommended.

HONOURS IN BIOLOGY (68 or 71 credits)
The Honours Program in Biology is designed expressly as a preparation for graduate studies and research, and provides students with an enriched training in biology and some research experience in a chosen area. Acceptance into the Honours Program at the end of U2 requires a CGPA of 3.50 and approval of a 9- or 12-credit Independent Studies proposal (see listing of BIOL 479 and BIOL 480 for details). For an Honours degree, a minimum CGPA of 3.50 in the U3 year and adherence to the program as outlined below are the additional requirements. The new 3.50 requirement applies only beginning with students entering McGill in the Fall of 2005.

U1 Required Courses (18 credits) as for the Major program

U2 and U3 Required Courses (7 credits)

BIOL 301 (4) Cell and Molecular Laboratory
BIOL 373 (3) Biometry

U2 and U3 Complementary Courses (30 credits)

12 credits selected from:

BIOL 300 (3) Molecular Biology of the Gene
BIOL 303 (3) Developmental Biology
BIOL 304 (3) Evolution
BIOL 306 (3) Neurobiology and Behaviour
BIOL 308 (3) Ecological Dynamics
18 credits in Biology at the 300 level or higher
U3 Required Courses (4 credits)
- BIOL 499D1 (2) Honours Seminar in Biology
- BIOL 499D2 (2) Honours Seminar in Biology

U3 Complementary Courses (9 or 12 credits)
either:
- BIOL 479D1 (4.5) Honours Research Project 1
- BIOL 479D2 (4.5) Honours Research Project 1
or:
- BIOL 480D1 (6) Honours Research Project 2
- BIOL 480D2 (6) Honours Research Project 2

PANAMA FIELD STUDY SEMESTER The program is a joint venture between McGill University and the Smithsonian Tropical Research Institute (STRI) in Panama. For more information, see section 15.2.3 “Panama Field Study Semester”. You can also visit the following Website for details: www.mcgill.ca/mse

AFRICAN FIELD STUDY SEMESTER The Department of Geography, Faculty of Science, coordinates the 15-credit interdisciplinary African Field Study Semester, see section 15.2.1 “African Field Study Semester”.

Also available is a "MINOR IN COMPUTATIONAL MOLECULAR BIOLOGY", for more information, see section 12.13.9 "Computer Science (COMP)".

12.13.6 Biotechnology (BIOT)

Sheldon Biotechnology Centre
Lyman Duff Building
Telephone: (514) 398-3998

Program Supervisor
Professor Hugh P.J. Bennett; B.A.(York, UK), Ph.D.(Brunel)

Biotechnology, the science of understanding, selecting and promoting useful organisms and specific gene products for commercial and therapeutic purposes, is the success story of this generation. It demands a broad comprehension of biology and engineering as well as detailed knowledge of at least one basic subject such as molecular genetics, protein chemistry, microbiology, or chemical engineering.

The Minor in Biotechnology is offered by the Faculties of Engineering and of Science, and students combine the Minor with the regular departmental Major (or Honours or Faculty) program. The Minor emphasizes an area relevant to biotechnology which is complementary to the main program.

Students should identify their interest in the Biotechnology Minor to their departmental academic adviser and to the Program Supervisor of the Minor and, at the time of registration for the U2 year, should declare their intent to embark on the Minor. Before registering for the Minor, and with the agreement of the academic adviser, students must submit their course list to the Program Supervisor, who will certify that the student’s complete program conforms to the requirements for the Minor. Students should ensure that they will have fulfilled the prerequisite requirements for the courses selected.

The BIOT course listed in the course section of this Calendar is considered as a course taught by the Faculty of Science.

GENERAL REGULATIONS
To obtain the Minor in Biotechnology students must:
- a) satisfy the requirements both for the departmental program and for the Minor.
- b) complete 24 credits, 18 of which must be exclusively for the Minor program.
- c) obtain a grade of C or better in the courses presented for the Minor.

MINOR IN BIOTECHNOLOGY (24 credits)

PROGRAM FOR STUDENTS IN THE FACULTY OF SCIENCE*

Required Courses (15 credits)
- BIOL 200 (3) Molecular Biology
- BIOL 201 (3) Cell Biology and Metabolism
- BIOL 202 (3) Basic Genetics
- BIOT 505 (3) Selected Topics in Biotechnology
- MIMM 211 (3) Introductory Microbiology

Complementary Courses (9 credits)
selected from courses outside the department of the main program, these may be taken from those listed as required courses for Engineering students. Alternatively, or in addition, courses may be taken from the lists below, in which case at least three courses must be taken from one area of concentration as grouped.

* As 18 credits must be applied exclusively to the Minor, approved substitutions must be made for any of the specified courses which are part of the student’s main program.

Chemical Engineering
- CHEE 200 (3) Introduction to Chemical Engineering
- CHEE 204 (3) Chemical Manufacturing Processes
- CHEE 474 (3) Biochemical Engineering

Biomedicine
- ANAT 541 Cell and Molecular Biology of Aging
- EXMD 504 Biology of Cancer
- PATH 300 Human Disease

Chemistry
- CHEM 382 Organic Chemistry: Natural Products
- CHEM 502 Advanced Bio-organic Chemistry
- CHEM 552 Physical Organic Chemistry

Immunology
- ANAT 261 Introduction to Dynamic Histology
- BIOC 403 Immunology
- MIMM 414 Advanced Immunology
- PHGY 513 Cellular Immunology

Management
- ECON 208 Microeconomics Analysis and Applications
- MGGR 211 Introduction to Financial Accounting
- MGGR 341 Finance 1
- MGGR 352 Marketing Management 1
- MGGR 472 Operations Management

Microbiology
- MIMM 323 Microbial Physiology
- MIMM 324 Fundamental Virology
- MIMM 413 Parasitology
- MIMM 465 Bacterial Pathogenesis
- MIMM 466 Viral Pathogenesis

Molecular Biology (Biology)
- BIOL 300 Molecular Biology of the Gene
- BIOL 314 Molecular Biology of Oncogenes
- BIOL 520 Gene Activity in Development
- BIOL 551 Molecular Biology: Cell Cycle
- BIOL 524 Topics in Molecular Biology

Molecular Biology (Biochemistry)
- BIOC 311 Metabolic Biochemistry
- BIOC 312 Biochemistry of Macromolecules
- BIOC 450 Protein Structure and Function
- BIOC 454 Nucleic Acids
- BIOC 455 Neurochemistry

Pharmacology
- EXMD 401 Physiology and Biochemistry Endocrine Systems
- EXMD 502 Advanced Endocrinology
- EXMD 503 Advanced Endocrinology
- PHAR 562 General Pharmacology 1
- PHAR 563 General Pharmacology 2
- PHGY 517 Artificial Internal Organs
PHGY 518  Artificial Cells
Plant Biology
BIOL 357  Plant Physiology
BIOL 526  Plants and Extreme Environments
Pollution
CHEE 471  Industrial Water Pollution Control
CIVE 225  Environmental Engineering
CIVE 430  Water Treatment and Pollution Control
CIVE 526  Solid Waste Management
CIVE 553  Stream Pollution and Control
General
MIME 310  Engineering Economy

PROGRAM FOR STUDENTS IN THE FACULTY OF ENGINEERING

Please see the "Biotechnology Minor", in section 8.6.3 for details.

Chair — R. Bruce Lennox
Emeritus Professors
Byung Chan Eu; B.Sc.(Seoul), Ph.D.(Brown)
Tak-Hang Chan; B.Sc.(Tok., M.A., Ph.D.(Prin.), F.C.I.C., F.R.S.C.
(Tomlinson Emeritus Professor of Chemistry)
John F. Harrod; B.Sc., Ph.D.(Birm.) (Tomlinson Emeritus Professor of Chemistry)
(Tomlinson Professor of Industrial Chemistry)
Robert H. Marchessault; B.Sc.(Loyola), Ph.D.(McG.), D.Sc.
(C'dia), F.R.S.C. (E.B. Eddy Professor of Industrial Chemistry)
Mario Onyszchuk; B.Sc.(McG.), M.Sc.(W.Ont.), Ph.D.(McG.), Ph.D.(Can.)
Donald Patterson; M.Sc.(McG.), Doc.(St-Etienne) (Otto Maass Emeritus Professor of Chemistry)
Arthur S. Perlin; M.Sc., Ph.D.(McG.), F.R.S.C.(E.B. Eddy Emeritus Professor of Industrial Chemistry)
William C. Purdy; B.A.(Amherst), Ph.D.(MIT), F.C.I.C. (William C. Macdonald Emeritus Professor of Chemistry)
Alan G. Shaver; B.Sc.(Car.), Ph.D.(MIT)
Leon E. St-Pierre; B.Sc.(Alta.), Ph.D.(Notre Dame), F.C.I.C.
Michael A. Whitehead; B.Sc., Ph.D., D.Sc.(Lond.), F.C.I.C.
Professors
D. Scott Bohle; B.A.(Reed College), M.Phil., Ph.D.(Auck.), (CRC Tier I Chair)
David H. Burns; B.Sc.(Puget Sound), Ph.D.(Wash.)
Masad J. Damha; B.Sc., Ph.D.(McG.) (James McGill Professor)
Adi Eisenberg; B.S. (Worcester Polytech.), M.A., Ph.D.(Prin.), F.C.I.C. (Otto Maass Professor of Chemistry)
Derek G. Gray; B.Sc. (Bell.), M.Sc., Ph.D.(Manit.), F.C.I.C. (NSERC Paprican Chair)
David N. Harpp; A.B.(Middlebury), M.A.(Weslayan), Ph.D.(N.Carolina), F.C.I.C. (William C. Macdonald Professor of Chemistry)
R. Bruce Lennox; B.Sc., M.Sc., Ph.D.(Tor.) (Tomlinson Professor of Chemistry)
C.J. Li; B.Sc.(Zhengzhou), M.Sc.(C.A.S.), Ph.D.(McG.) (CRC Tier I Chair)
David Ronis; B.Sc.(McG.), Ph.D.(MIT)
Eric D. Salin; B.Sc.(Calif.), Ph.D.(Oreg.St.)
Bryan C. Sanctuary; B.Sc., Ph.D.(Br. Col.)
Theo G.M. van de Ven; Cand. Doc.(Utrecht), Ph.D.(McG.), (NSERC Paprican Chair)
Associate Professors
Mark P. Andrews; B.Sc., M.Sc., Ph.D.(Tor.)
Bruce Arndtsen; B.A.(Car. College), Ph.D.(Stan.) (William Dawson Scholar)
Parisa Aryan; B.Sc., Ph.D.(York) (William Dawson Scholar) (joint appoint. with Atmospheric & Oceanic Sciences)
Christopher J. Barrett; B.Sc., M.Sc., Ph.D.(Qu.)
William C. Galley; B.Sc.(McG.), Ph.D.(Calif.)
James Gleason; B.Sc.(McG.), Ph.D.(Vig.)
Ashok K. Kakkar; B.Sc.(Punjab), M.Sc.(H.P.U.), Ph.D.(Wat.)
Joan F. Power; B.Sc., Ph.D.(C’dia)
Linda Reven; B.A.(Car. Coll.), Ph.D.(III.)
Hanadi Sleiman; B.Sc.(A.U.B.), Ph.D.(Stan.) (William Dawson Scholar)
Assistant Professors
Karine Auclair; B.Sc.(UQAC), Ph.D.(Alta.)
Gonzalo Cosa; B.Sc. (Rio Cuarto), Ph.D.(Ott.)
Patanjali Kambhampati; B.A.(Car. Coll.), Ph.D.(Texas)
Hung-Wen Li; B.Sc.(Taiwan), Ph.D.(Berk.)
U. Marcus Lindström; B.Sc.(Lund), L.Chem.Eng.(Lund), Ph.D. (Stockholm)
Anthony Mittermaier ; B.Sc (Guelph), Ph.D.(Tor.)
Nicolas Moitessier; Ph.D.(Nancy)
Audrey Moores; B.Sc., M.Sc., Ph.D.(École Poly., Palaiseau, Fr.)
(Pac. Sci. Tier II Chair)
Dmitri Perepichka; B.S., M.Sc., Ph.D.(Ukraine)
Bradley Siwick; B.A.Sc., M.Sc., Ph.D.(Tor.) (joint appoint. with Physics)
Paul Wiseman; B.Sc.(St.FX), Ph.D.(W.Ont.) (joint appoint. with Physics)
Faculty Lecturers
John Finkenbine; B.S.(Capital), Ph.D.(McG.)
Grażyna Wilczek; M.Sc., Doctorate Chem. Sci.(Warsaw)
Associate Members
James A. Finch(Mining & Metallurgical Engineering)
P. Grütter(Physics)
Orval A. Mamer(University Clinic)
Adjunct Professors
Yvan Guindon; B.Sc., Ph.D.(Montr.), F.C.I.C., F.R.S.C.
Christian Reber; B.Sc., Ph.D.(Berne)
Ivor Wharf; B.Sc., Ph.D.(Lond.), A.R.C.S., D.I.C., C.T. Yim; B.Sc.(Fu-Dan), Ph.D.(McG.)
Robert Zamboni; B.Sc., Ph.D.(McG.)
Office for Science and Society
The Office for Science and Society is dedicated to the promotion of critical thinking and the presentation of practical scientific information to the public, educators and students in an accurate and responsible fashion. The Office answers queries from the public as well as from the media, with a view towards establishing scientific information to the public, educators and students in an accurate and responsible fashion. The Office answers queries from the public as well as from the media, with a view towards establishing scientific accuracy. The Office also offers a variety of educational and interesting presentations on scientific topics and its members contribute to a number of courses under the umbrella of "The World of Chemistry".
Director
Joseph A. Schwarcz; B.Sc., Ph.D.(McG.)
Members
Ariel Fenster; L.Sc., D.E.A.(Paris), Ph.D.(McG.)
David N. Harpp; A.B.(Middlebury), M.A.(Wes.).
Ph.D.(N.Carolina), F.C.I.C. (William C. Macdonald Professor of Chemistry)

Chemistry is both a pure science, offering a challenging intellectual pursuit, and an applied science whose technology is of fundamental importance to the economy and society. Modern chemists seek an understanding of the structure and properties of atoms and molecules to predict and interpret the properties and transfor-
mations of matter and the energy changes that accompany those transformations. Many of the concepts of physics and mathematics are basic to chemistry, while chemistry is of fundamental importance to many other disciplines such as the biological and medical sciences, geology, metallurgy, etc.

A degree in chemistry leads to a wide variety of professional vocations. The large science-based industries (petroleum refining, plastics, pharmaceuticals, etc.) all employ chemists in research, development and quality control. Many federal and provincial departments and agencies employ chemists in research and testing laboratories. Such positions are expected to increase with the currently growing concern for the environment and for consumer protection. A background in chemistry is also useful as a basis for advanced study in other related fields, such as medicine and the biological sciences. For a business career, a B.Sc. in Chemistry can profitably be combined with a master's degree in Business Administration, or a study of law for work as a patent lawyer or forensic scientist.

Chemistry courses at the university level are traditionally divided into four areas of specialization: 1) organic chemistry, dealing with the compounds of carbon; 2) inorganic chemistry, concerned with the chemistry and compounds of elements other than carbon; 3) analytical chemistry, which deals with the identification of substances and the quantitative measurement of their compositions; and 4) physical chemistry, which treats the physical laws, kinetics, and energetics governing chemical reactions. Naturally, there is a great deal of overlap between these different areas, and the boundaries are becoming increasingly blurred. After a general course at the collegial level, courses in organic, inorganic, analytical and physical chemistry are offered through the university years. Since chemistry is an experimental science, laboratory classes accompany most undergraduate courses. In addition, courses are offered in polymer, theoretical, green, nano and biological chemistry to upper-year undergraduates.

There are two main programs in the Department of Chemistry, Honours and Major. The Honours program is intended primarily for students wishing to pursue graduate studies in chemistry. While the Major program is somewhat less specialized, it is still recognized as sufficient training for a career in chemistry. It can also lead to graduate studies although an additional qualifying year may be necessary. There are also a number of Faculty programs available. Interested students may inquire about these at the Student Advisory Office, Room 304, Otto Mass Chemistry Building, or see www.chemistry.mcgill.ca/advising/index.htm.

PRE-PROGRAM REQUIREMENTS

Students entering from the Freshman program must have included CHEM 120/CHEM 110, BIOC 111 or BIOC 112, MATH 133, MATH 150/151 or MATH 140/141, PHYS 131/PHYS 142, or their equivalents in their Freshman year. Quebec students must have completed the DEC with appropriate science and mathematics courses.

REQUIRED COURSES IN CHEMISTRY PROGRAMS

The required courses in Chemistry programs consist of 56 credits in chemistry, physics and mathematics, listed below. The courses marked with an asterisk (*) are omitted from the program of students who have successfully completed them at the CEGEP level but the Chemistry courses must be replaced by courses in that discipline if students wish to be eligible for admission to the Order des chemists du Quebec. Students from outside Quebec who transfer students should consult the academic adviser. A computer science course, either COMP 102, or COMP 202, or COMP 208, will be required during U1 for students who have no previous introduction to computer programming. Students are required to contact their adviser on this matter. Completion of Mathematics MATH 222 and MATH 315 during U1 is strongly recommended. Physics PHYS 242 should be completed during U2.

Chemistry Majors and Honours Programs

Required Courses (53 credits)

CHEM 281 (3) Inorganic Chemistry 1
CHEM 302 (3) Introductory Organic Chemistry 3
CHEM 345 (3) Molecular Properties and Structure 1
CHEM 355 (3) Molecular Properties and Structure 2
CHEM 365 (2) Statistical Thermodynamics
CHEM 367 (3) Instrumental Analysis 1
CHEM 377 (3) Instrumental Analysis 2
CHEM 381 (3) Inorganic Chemistry 2
CHEM 392 (3) Integrated Inorganic/Organic Laboratory
CHEM 393 (2) Physical Chemistry Laboratory 2
MATH 222** (3) Calculus 3
MATH 315 (3) Ordinary Differential Equations
PHYS 242 (2) Electricity and Magnetism

* denotes courses with CEGEP equivalents

** Students who have successfully completed MATH 150 and MATH 151 are not required to take MATH 222.

***Not offered 2007-8. Students entering in Sept. 2007 will take CHEM 363 in U2 or U3 instead.

HONOURS IN CHEMISTRY (71 credits)

Required Courses (53 credits)

53 credits as listed above

Complementary Courses (18 credits)

6 credits of research: CHEM 470 (6) Research Project or CHEM 480 (3) Research Project and CHEM 490 (3) Research Project

and 12 credits of additional Chemistry courses: 6 credits of which must be at the 300 level or higher, and 6 credits of which must be at the 400 level or higher

* Students may take up to 12 Research Project credits but only 6 of these may be used to fulfill the program requirement.

Attainment of the Honours degree requires a CGPA of at least 3.00.

HONOURS WITH BIO-ORGANIC OPTION (75 credits)

Required Courses (57 credits)

51 credits, all courses specified above for Chemistry Honours, except PHYS 242

plus the following 6 credits:

<table>

and 6 credits of additional Chemistry courses at the 400 level or higher.

* Students may take up to 12 Research Project credits but only 6 of these may be used to fulfill the program requirement.
Attainment of the Honours degree requires a CGPA of at least 3.00.

**HONOURS IN CHEMISTRY: ATMOSPHERE AND ENVIRONMENT OPTION (75 credits)**

**Required Courses (60 credits)**
51 credits, all courses specified above for Honours Chemistry, except PHYS 242.

plus the following 9 credits:
- CHEM 219 (3) Introduction to Atmospheric Chemistry
- CHEM 419 (3) Advances in Chemistry of Atmosphere
- CHEM 462 (3) Green Chemistry

**Complementary Courses (15 credits)**

6 credits of research:
- CHEM 470 (6) Research Project
- or CHEM 480 (3) Research Project
- and CHEM 490 (3) Research Project

3 credits, one of:
- ATOC 214 (3) Introduction: Physics of the Atmosphere
- CHEM 307 (3) Analytical Chemistry of Pollutants
- CHEM 352 (3) Structural Organic Chemistry
- MATH 317 (3) Numerical Analysis

6 credits, two of:
- ATOC 315 (3) Water in the Atmosphere
- ATOC 412 (3) Atmospheric Dynamics
- CHEM 567 (3) Chemometrics: Data Analysis
- CHEM 575 (3) Chemical Kinetics
- CHEM 597 (3) Analytical Spectroscopy
- EPSC 542 (3) Chemical Oceanography

* Students may take up to 12 Research Project credits but only 6 of these may be used to fulfill the program requirement.

Attainment of the Honours degree requires a CGPA of at least 3.00.

**HONOURS WITH MATERIALS OPTION (74 credits)**

**Required Courses (59 credits)**
53 credits, all courses specified above for Honours Chemistry plus the following 6 credits:
- CHEM 334 (3) Advanced Materials
- CHEM 455 (3) Introductory Polymer Chemistry

**Complementary Courses (15 credits)**

6 credits of research:
- CHEM 470 (6) Research Project
- or CHEM 480 (3) Research Project
- and CHEM 490 (3) Research Project

6 credits, two of:
- CHEM 531 (3) Chemistry of Inorganic Materials
- CHEM 534 (3) Nanoscale and Nanotechnology
- CHEM 543 (3) Chemistry of Pulp and Paper
- CHEM 571 (3) Polymer Synthesis
- CHEM 585 (3) Colloid Chemistry

3 credits, one of:
- CHEE 481 (3) Polymer Engineering
- MIME 260 (3) Materials Science and Engineering
- MRKT 360 (3) Marketing of Technology

* Students may take up to 12 Research Project credits but only 6 of these may be used to fulfill the program requirement.

Attainment of the Honours degree requires a CGPA of at least 3.00.

**MAJOR IN CHEMISTRY** (59 credits)

**Required Courses (53 credits)**
53 credits as listed above.

**Complementary Courses (6 credits)**
6 credits of additional Chemistry courses at the 300 level or higher.

Attainment of the Major degree requires a CGPA of 2.00.

**MAJOR WITH BIO-ORGANIC OPTION** (63 credits)

**Required Courses (60 credits)**
51 credits, all courses specified above for the Chemistry Major, except PHYS 242.

plus the following 9 credits:
- BIOL 200 (3) Molecular Biology
- BIOL 201 (3) Cell Biology and Metabolism
- CHEM 502 (3) Advanced Bio-Organic Chemistry

**Complementary Course** (3 credits)

one of:
- BIOL 202 (3) Basic Genetics
- BIOL 301 (3) Cell and Molecular Laboratory
- MIMM 211 (3) Introductory Microbiology
- PHGY 201 (3) Human Physiology: Control Systems
- PHGY 202 (3) Human Physiology: Body Functions
- PHGY 209 (3) Mammalian Physiology 1
- PHGY 210 (3) Mammalian Physiology 2

Attainment of the Major degree requires a CGPA of 2.00.

**MAJOR IN CHEMISTRY: ATMOSPHERE AND ENVIRONMENT OPTION** (63 credits)

**Required Courses (59 credits)**
51 credits, all courses specified above for the Chemistry Major, except PHYS 242.

plus the following 3 credits:
- CHEM 219 (3) Introduction to Atmospheric Chemistry

**Complementary Course** (9 credits)

3 credits, one of:
- CHEM 419 (3) Advances in Chemistry of Atmosphere
- CHEM 462 (3) Green Chemistry

3 credits, one of:
- ATOC 214 (3) Introduction: Physics of the Atmosphere
- CHEM 307 (3) Analytical Chemistry of Pollutants
- CHEM 352 (3) Structural Organic Chemistry
- MATH 317 (3) Numerical Analysis

3 credits, one of:
- ATOC 315 (3) Water in the Atmosphere
- ATOC 412 (3) Atmospheric Dynamics
- CHEM 567 (3) Chemometrics: Data Analysis
- CHEM 575 (3) Chemical Kinetics
- CHEM 597 (3) Analytical Spectroscopy
- EPSC 542 (3) Chemical Oceanography

Attainment of the Major degree requires a CGPA of 2.00.

**MAJOR WITH MATERIALS OPTION** (62 credits)

**Required Courses (59 credits)**
53 credits, all courses specified above for the Chemistry Major, plus the following 6 credits:
- CHEM 334 (3) Advanced Materials
- CHEM 455 (3) Introductory Polymer Chemistry

**Complementary Course** (3 credits)

one of:
- CHEM 531 (3) Chemistry of Inorganic Materials
- CHEM 534 (3) Nanoscience and Nanotechnology
- CHEM 543 (3) Chemistry of Pulp and Paper
- CHEM 571 (3) Polymer Synthesis
- CHEM 585 (3) Colloid Chemistry

Attainment of the Major degree requires a CGPA of 2.00.
PROPOSED B.SC. LIBERAL PROGRAM

A proposed B.Sc. Liberal Program is currently under University review and is intended to replace the B.Sc. Faculty programs offered by units. Faculty programs will be retired starting September 2008, and September 2007 will be the last year in which new students are accepted into Faculty programs. Students enrolled in a Faculty program will be able to complete that program.

As part of the proposed B.Sc. Liberal Program, the Department of Chemistry will be offering a Core Science Component in Chemistry. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit's entry in the online 2007-2008 Calendar, which will be available in the summer.

FACULTY PROGRAMS IN CHEMISTRY

Faculty programs in Chemistry are constructed from the U1 courses and the general courses of U2 and U3 intended for these students. Consult the Department of Chemistry Student Advisory Office for an adviser. A computer science course, either COMP 102 or COMP 202, will be required during U1 for students who have no previous introduction to computer programming.

FACULTY PROGRAM IN MATHEMATICS, CHEMISTRY AND PHYSICS, see "Mathematics and Statistics (MATH)", in section 12.13.18.

The Major Concentration in Chemistry (part of B.A. & Sc. degree), the Faculty Programs in Chemistry, and Minor in Chemistry are not accredited by l'Ordre des chimistes du Québec or the Chemical Institute of Canada.
MINOR IN CHEMISTRY (18 credits)

**Required Courses** (18 credits)
- CHEM 203 (3) Survey of Physical Chemistry
- CHEM 212 (4) Introductory Organic Chemistry 1
- CHEM 222* (4) Introductory Organic Chemistry 2
- CHEM 257D1 (2) Introductory Analytical Chemistry
- CHEM 257D2 (2) Introductory Analytical Chemistry
- CHEM 281 (3) Inorganic Chemistry 1

* asterisks denote courses with CEGEP equivalents

Substitutions for these by more advanced courses may be made at the discretion of the adviser.

MINOR IN CHEMICAL ENGINEERING (24 credits)

A Chemical Engineering Minor will be of interest to Chemistry students who wish to study the problems of process engineering and its related subjects. A student completing this Minor will be able to make the important link between molecular sciences and industrial processing. This Minor will not provide Professional Engineering accreditation.

**Required Courses** (7 credits)
- CHEE 200 (4) Introduction to Chemical Engineering
- CHEE 204 (3) Chemical Manufacturing Processes

**Complementary Courses** (17 credits)
- CHEE 220 (3) Chemical Engineering Thermodynamics
- CHEE 314 (4) Fluid Mechanics

with the remainder chosen from the following:
- CHEE 230 (3) Environmental Aspects of Technology
- CHEE 315 (4) Heat and Mass Transfer
- CHEE 351 (3) Separation Processes
- CHEE 370 (3) Elements of Biotechnology
- CHEE 380 (3) Materials Science
- CHEE 392 (4) Project Laboratory 1
- and CHEE 393 (5) Project Laboratory 2
- CHEE 438 (3) Engineering Principles in Pulp and Paper Processes
- CHEE 452 (3) Particulate Systems
- CHEE 471 (3) Industrial Water Pollution Control
- CHEE 472 (3) Industrial Air Pollution Control
- CHEE 481 (3) Polymer Engineering
- CHEE 487 (3) Chemical Processing: Electronics Industry
- CHEE 494 (3) Research Project and Seminar
- or CHEE 495 (4) Research Project and Seminar
- MATH 314 (3) Advanced Calculus

**MINOR IN COGNITIVE SCIENCE** (27 credits)

**Required Course** (3 credits)
- PSYC 532 (3) Cognitive Science

**Complementary Courses** (24 credits)
from outside of the student's home department, selected from the courses listed below.

**Computer Science**
- COMP 424 (3) Topics: Artificial Intelligence 1

**Educational Psychology**
- EDPE 555 (3) Applied Cognitive Science

**LINGUISTICS**
- LING 331 (3) Phonology 1
- LING 355 (3) Language Acquisition 1
- LING 370 (3) Introduction to Semantics
- LING 371 (3) Syntax 1
- LING 419 (3) Linguistic Theory 1
- LING 440 (3) Morphology
- LING 531 (3) Phonology 2
- LING 555 (3) Language Acquisition 2
- LING 571 (3) Syntax 2
- LING 590 (3) Language Acquisition and Breakdown

**MATHEMATICS**
- MATH 318 (3) Mathematical Logic
- MATH 328 (3) Computability and Mathematical Linguistics

**PHILOSOPHY**
- PHIL 210 (3) Introduction to Deductive Logic 1
- PHIL 304 (3) Chomsky
- PHIL 306 (3) Philosophy of Mind
- PHIL 310 (3) Intermediate Logic
- PHIL 410 (3) Topics in Advanced Logic 1
- PHIL 415 (3) Philosophy of Language
- PHIL 419 (3) Epistemology
- PHIL 506 (3) Seminar: Philosophy of Mind
- PHIL 507 (3) Seminar: Cognitive Science

**Psychology**
- PSYC 211 (3) Intro Behavioural Neuroscience
- PSYC 212 (3) Perception
- PSYC 213 (3) Cognition
- PSYC 301 (3) Learning
- PSYC 308 (3) Behavioural Neuroscience 1
- PSYC 311 (3) Human Cognition and the Brain
- PSYC 353 (3) Laboratory in Human Perception
- PSYC 410 (3) Special Topics in Neuropsychology
- PSYC 413 (3) Cognitive Development
- PSYC 470 (3) Memory and Brain

**Director** — Sue Whitesides

**Emeritus Professor**
Christopher Paige

**Professors**
- David M. Avis; B.Sc.(Wat.), Ph.D.(Stan.)
- Luc P. Devroye; M.S.(Louvain), Ph.D.(Texas) (James McGill Professor)
- Laurie Hendren; B.Sc., M.Sc.(Qu.), Ph.D.(C’nell)
- Tim H. Merrett; B.Sc. (Qu.), D.Phil.(Ox.)
- Monroe M. Newborn; B.E.E.(R.P.I.), Ph.D.(Ohio St.), F.A.C.M.
- Prakash Panangaden; M.Sc.(IIT, Kanpur), M.S.(Chic.), Ph.D.(Wis.)
The study of computer science encompasses everything from pure theory to hands-on applications including the analysis of algorithms, programming languages, compilers, databases, operating systems, robotics, computer vision, artificial intelligence and computational biology.

The School of Computer Science (SOCS) currently offers eight undergraduate computing labs and two large open work areas consisting of workstations on the 3rd floor of the Lorne Trottier server, backup server, mail server, and web server. Dialup Internet access is provided through the McGill Computing Centre.

The undergraduate teaching facilities consist of a network of servers, three Windows remote application servers, a central file server, backup server, mail server, and web server. Dialup Internet access is provided through the McGill Computing Centre.

All students planning to enter Computer Science programs should make an appointment with an academic advisor through the School's Undergraduate Student Affairs Office. The School of Computer Science offers:

• A major program and an honours program in Computer Science through the Faculty of Science
• A major program in Software Engineering through the Faculty of Science
• A minor through the Faculty of Science and the Faculty of Engineering
• A joint major and a joint honours program with the Department of Mathematics and Statistics through the Faculty of Science (see section 12.13.18 “Mathematics and Statistics (MATH)”)• A joint major with the Department of Physics through the Faculty of Science (see section 12.13.26 “Physics (PHYS)”)
• A major concentration and minor concentration through the Faculty of Arts
• A minor in Computational Molecular Biology
• Special programs involving Computer Science are also available in the Faculties of Management, Engineering and Music. Some graduate courses in Computer Science are available to suitably qualified senior undergraduates. The School also offers graduate research studies leading to M.Sc. and Ph.D. degrees. For further details, consult the Graduate and Postdoctoral Studies Calendar.

The School's courses are available as electives to Engineering students. Engineering students interested in a Minor in Computer Science should consult "Computer Science Courses and Minor Program", in section 8.6.5 in the Faculty of Engineering section.

Internship Opportunities

Students who want to gain practical experience in industry before graduation are encouraged to participate in one of the following internship programs:

• The Internship Year in Engineering and Science (IYES) is an academic program offered for a duration of 8, 12 or 16 months. It is reflected on the transcript and included in the program name (Bachelors of Science - Internship program). Eligible students usually take this program between their U2 and U3 years.

The Industrial Practicum (IP) has a duration of 4 months and is usually carried out starting in May. It will appear as a 0-credit, pass/fail course on your transcript.

For more information on these programs, consult "Internship Year in Engineering and Science (IYES) and Industrial Practicum (IP)", in section 12.12.4.

Research Opportunities

Several research opportunities are provided to interested students throughout the 396 project courses, as well as through NSERC undergraduate research assistantships in the School. Students who take 396 courses in more than one department can be eligible for the Dean's Multidisciplinary Undergraduate Research List. For more information, consult "Dean's Multidisciplinary Undergraduate Research List", in section 12.12.1.2.

Students intending to pursue a Major in Computer Science or Software Engineering should have a reasonable mathematical background and should have completed MATH 140 (or MATH 150), MATH 141 (or MATH 151) and MATH 133, or their CEGEP equivalents. These three mathematics courses should have been completed with at least an average of B-. A background in computer science is not necessary as students may start their studies with the introductory course COMP 202. However, taking COMP 202 in the Freshman Year, or completing an equivalent course in CEGEP, would be an asset and allows students to take more advanced courses earlier in their program.

More information about the admission process and the programs is available at www.cs.mcgill.ca.
MINOR IN COMPUTER SCIENCE (24 credits)
The Computer Science Minor may be taken in conjunction with any program in the Faculties of Science and Engineering (with the exception of other programs in Computer Science). Students must obtain approval from the adviser of their main program. Approval must be given by the School of Computer Science for the particular selection of courses to be credited towards the Computer Science Minor. This should be done before registering for the final term of studies. All courses must be passed with a grade of C or better.

Students may receive credit towards their Computer Science Minor by taking certain approved courses outside the School of Computer Science. These courses must have a high computer science content. A student will not be permitted to receive more than six credits from such courses. These courses must be approved by the School of Computer Science in advance.

If a student's Major program requires Computer Science courses, up to six credits of Computer Science courses may be used to fulfill both Major and Minor requirements.

### Required Courses (12 credits)
- COMP 202 (3) Introduction to Computing 1
- COMP 203 (3) Introduction to Computing 2
- COMP 206 (3) Introduction to Software Systems
- COMP 302 (3) Programming Languages and Paradigms

### Complementary Courses (12 credits)
Selected from:
- COMP 251* (3) Data Structures and Algorithms
- COMP 273 (3) Introduction to Computer Systems
- COMP 303 (3) Software Development
- COMP 304 (3) Object-oriented Design
- COMP 310 (3) Operating Systems
- COMP 321 (1) Programming Challenges
- COMP 322 (1) Introduction to C++
- COMP 330 (3) Theoretical Aspects: Computer Science
- COMP 335 (3) Software Engineering Methods
- COMP 350 (3) Numerical Computing
- MATH 317 (3) Numerical Analysis
- COMP 360 (3) Algorithm Design Techniques
- COMP 409 (3) Concurrent Programming
- COMP 417 (3) Intro Robotics and Intelligent Systems
- COMP 420 (3) Secondary Storage Algorithms and Data Structures
- COMP 421 (3) Database Systems
- COMP 423 (3) Data Compression
- COMP 424 (3) Topics: Artificial Intelligence 1
- COMP 426 (3) Automated Reasoning
- COMP 435 (3) Basics of Computer Networks
- COMP 462 (3) Computational Biology Methods
- COMP 490 (3) Intro to Probabilistic Analysis Algorithms
- COMP 505 (3) Advanced Computer Architecture
- COMP 506 (3) Advanced Analysis of Algorithms
- COMP 507 (3) Computational Geometry
- COMP 512 (4) Distributed Systems
- COMP 520 (4) Compiler Design
- COMP 521 (4) Modern Computer Games
- COMP 522 (4) Modelling and Simulation
- COMP 523 (3) Language-based Security
- COMP 524 (3) Theoretical Foundations of Programming Languages
- COMP 526 (3) Probabilistic Reasoning and AI
- COMP 529 (4) Software Architecture
- COMP 533 (3) Object-Oriented Software Development
- COMP 535 (3) Computer Networks 1
- COMP 537 (3) Internet Programming
- COMP 540 (3) Matrix Computations
- COMP 557 (3) Fundamentals of Computer Graphics
- COMP 558 (3) Fundamentals of Computer Vision
- COMP 560 (3) Graph Algorithms and Applications
- COMP 563 (3) Molecular Evolution Theory
- COMP 564 (3) Computational Gene Regulation
- COMP 566 (3) Discrete Optimization 1
- COMP 567 (3) Discrete Optimization 2
- COMP 575 (3) Fundamentals of Distributed Algorithms
- COMP 577 (3) Distributed Database Systems
- MATH 240 (3) Discrete Structures 1
- or from courses outside the School approved by the adviser, to a maximum of 6 credits.

* Note: COMP 251 is a prerequisite for many of the other complementary courses.

MINOR IN COMPUTATIONAL MOLECULAR BIOLOGY (24 credits)
Computational molecular biology is the sub-discipline of bioinformatics that is located at the intersection of computer science and molecular biology. The focus of this area is on techniques for managing and analyzing molecular sequence data. This program will provide undergraduate students in the biological sciences with the skills from computer science to solve computational problems arising in molecular biology and genomics and will provide students with the necessary skills to build software tools from these algorithms.

The Minor in Computational Molecular Biology is not open to students in Computer Science or Joint Computer Science programs.

### Required Courses (24 credits)
- COMP 202 (3) Introduction to Computing 1
- COMP 203 (3) Introduction to Computing 2
- COMP 206 (3) Data Structures and Algorithms
- COMP 360 (3) Algorithm Design Techniques
- COMP 409 (3) Computational Biology Methods
- COMP 417 (3) Computational Biology Methods
- COMP 420 (3) Molecular Evolution Theory
- COMP 564 (3) Computational Gene Regulation
- MATH 240 (3) Discrete Structures 1

PROPOSED B.SC. LIBERAL PROGRAM
A proposed B.Sc. Liberal Program is currently under University review and is intended to replace the B.Sc. Faculty programs offered by units. Faculty programs will be retired starting September 2008, and September 2007 will be the last year in which new students are accepted into Faculty programs. Students enrolled in a Faculty program will be able to complete that program.

As part of the proposed B.Sc. Liberal Program, the School of Computer Science will be offering a Core Science Component in Computer Science. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit's entry in the online 2007-2008 Calendar, which will be available in the summer.

FACULTY PROGRAM IN MATHEMATICS AND COMPUTER SCIENCE under "Mathematics and Statistics (MATH)", in section 12.13.18.

FACULTY PROGRAM IN MATHEMATICS, STATISTICS AND COMPUTER SCIENCE under "Mathematics and Statistics (MATH)", in section 12.13.18.

MAJOR IN COMPUTER SCIENCE (60 credits)
Freshman Program students interested in Computer Science should try to take COMP 202 if possible, but it is not required for entry to the Major. A student entering the Major with insufficient programming background may take COMP 202, which will not count for credit toward the Major but will count for elective credit.

### Required Courses (42 credits)
- COMP 250 (3) Introduction to Computer Science
- COMP 251 (3) Data Structures and Algorithms
- COMP 206 (3) Introduction to Software Systems
- COMP 273 (3) Introduction to Computer Systems
- COMP 302 (3) Programming Languages and Paradigms
- COMP 310 (3) Operating Systems
- COMP 330 (3) Theoretical Aspects: Computer Science
### COMP 303 (3) Software Development
- Software Development

### COMP 304 (3) Object-oriented Design
- Object-oriented Design

### COMP 321 (1) Programming Challenges
- Programming Challenges

### COMP 322 (1) Introduction to C++
- Introduction to C++

### COMP 335 (3) Software Engineering Methods
- Software Engineering Methods

### COMP 361 (3) Systems Development Project
- Systems Development Project

### COMP 409 (3) Concurrent Programming
- Concurrent Programming

### COMP 417 (3) Intro Robotics and Intelligent Systems
- Intro Robotics and Intelligent Systems

### COMP 420 (3) Secondary Storage Algorithms and Data Structures
- Secondary Storage Algorithms and Data Structures

### COMP 421 (3) Database Systems
- Database Systems

### COMP 423 (3) Data Compression
- Data Compression

### COMP 424 (3) Topics: Artificial Intelligence 1
- Topics: Artificial Intelligence 1

### COMP 426 (3) Automated Reasoning
- Automated Reasoning

### COMP 435 (3) Basics of Computer Networks
- Basics of Computer Networks

### COMP 462 (3) Computational Biology Methods
- Computational Biology Methods

### COMP 490 (3) Intro to Probabilistic Analysis Algorithms
- Intro to Probabilistic Analysis Algorithms

### COMP 505 (3) Advanced Computer Architecture
- Advanced Computer Architecture

### COMP 506 (3) Advanced Analysis of Algorithms
- Advanced Analysis of Algorithms

### COMP 507 (3) Computational Geometry
- Computational Geometry

### COMP 512 (4) Distributed Systems
- Distributed Systems

### COMP 520 (4) Compiler Design
- Compiler Design

### COMP 521 (4) Modern Computer Games
- Modern Computer Games

### COMP 522 (4) Modelling and Simulation
- Modelling and Simulation

### COMP 523 (3) Language-based Security
- Language-based Security

### COMP 524 (3) Theoretical Foundations of Programming Languages
- Theoretical Foundations of Programming Languages

### COMP 525 (3) Formal Verification
- Formal Verification

### COMP 526 (3) Probabilistic Reasoning and AI
- Probabilistic Reasoning and AI

### COMP 529 (4) Software Architecture
- Software Architecture

### COMP 530 (3) Numerical Computing
- Numerical Computing

### COMP 531 (3) Theory of Computation
- Theory of Computation

### COMP 532 (3) Object-Oriented Software Development
- Object-Oriented Software Development

### COMP 533 (3) Computer Networks 1
- Computer Networks 1

### COMP 534 (3) Internet Programming
- Internet Programming

### COMP 540 (3) Matrix Computations
- Matrix Computations

### COMP 547 (4) Cryptography and Data Security
- Cryptography and Data Security

### COMP 548 (3) Fundamentals of Computer Graphics
- Fundamentals of Computer Graphics

### COMP 555 (3) Fundamentals of Computer Vision
- Fundamentals of Computer Vision

### COMP 560 (3) Graph Algorithms and Applications
- Graph Algorithms and Applications

### COMP 563 (3) Molecular Evolution Theory
- Molecular Evolution Theory

### COMP 564 (3) Computational Gene Regulation
- Computational Gene Regulation

### COMP 566 (3) Discrete Optimization 1
- Discrete Optimization 1

### COMP 567 (3) Discrete Optimization 2
- Discrete Optimization 2

### COMP 575 (3) Fundamentals of Distributed Algorithms
- Fundamentals of Distributed Algorithms

### COMP 577 (3) Distributed Database Systems
- Distributed Database Systems

### ECSE 508 (3) Multi-Agent Systems
- Multi-Agent Systems

### 3 credits of Mathematics selected from:

#### MATH 242 (3) Analysis 1
- Analysis 1

#### MATH 243 (3) Analysis 2
- Analysis 2

#### MATH 255 (3) Honours Analysis 2
- Honours Analysis 2

or any 300-level or above Mathematics course (excluding MATH 338, MATH 323, MATH 340)

**JOINT MAJOR IN MATHEMATICS AND COMPUTER SCIENCE**
under "Mathematics and Statistics (MATH)", in section 12.13.18.

**JOINT MAJOR IN PHYSICS AND COMPUTER SCIENCE**
HONOURS IN COMPUTER SCIENCE (72 credits)
Honours students must maintain a CGPA of 3.00 and must have at least this average upon graduation as well.

Required Courses (45 credits)
COMP 205 (3) Introduction to Software Systems
COMP 250 (3) Introduction to Computer Science
COMP 252 (3) Algorithms and Data Structures
COMP 275 (3) Introduction to Computer Systems
COMP 302 (3) Programming Languages and Paradigms
COMP 310 (3) Operating Systems
COMP 330 (3) Theoretical Aspects: Computer Science
COMP 350 (3) Numerical Computing
COMP 362 (3) Honours Algorithm Design
COMP 400 (3) Technical Project and Report
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 240 (3) Discrete Structures 1
MATH 323 (3) Probability
MATH 340 (3) Discrete Structures 2
or MATH 350 (3) Graph Theory and Combinatorics

Complementary Courses (27 credits)
24 credits of COMP and/or ECSE courses, 12 credits of which must be at the 500 level, from the list of complementary courses for the Major in Computer Science, with the addition of COMP 552 Combinatorial Optimization.
3 credits, any 300-level or above Mathematics course (excluding MATH 323, MATH 338, MATH 340, MATH 350)

JOINT HONOURS IN MATHEMATICS AND COMPUTER SCIENCE under “Mathematics and Statistics (MATH)”, in section 12.13.18. Students must consult an Honours adviser in both Departments.

MINOR IN COGNITIVE SCIENCE
Students following Major or Honours programs in Computer Science may want to consider the Minor in Cognitive Science.

Professors
Don R. Baker; A.B.(Chic.), Ph.D.(Penn. St.)

Don M. Francis; B.Sc.(McG.), M.Sc.(Br. Col.), Ph.D.(MIT)
Andrew J. Hynes; B.Sc.(Tor.), Ph.D.(Cant.) (William E. Logan Professor of Geology)
Olivia G. Jensen; B.Sc., M.Sc., Ph.D.(Br. Col.)
Robert F. Martin; B.Sc.(Ott.), M.S.(Penn. St.), Ph.D.(Stan.)
Alfonso Mucci; B.Sc., M.Sc.(Montr.), Ph.D.(Miami)
A.E. (Willy) Williams-Jones; B.Sc., M.Sc.(Natal), Ph.D.(Qu.)
Associate Professors
Bruce Hart; B.A.(McM.), M.Sc.(UQ à Rimouski), Ph.D.(W.Ont.)
Jeanne Paquette; B.Sc., M.Sc.(McG.), Ph.D.(Stonybrook)
Michael Riedel; Vordipl.(Cl.-Zell.), Dipl.(Kiel), Ph.D.(Vic., BC)
(T.H. Clark Chair in Sedimentary and Petroleum Geology)
John Stix; A.B.(Dart.), M.Sc., Ph.D.(Tor.)
Hojatollah Vali; B.Sc., M.Sc., Ph.D.(Munich) (Director, Electron Microscopy Centre)

Assistant Professors
Mairi Best; B.Sc.(Laur.), Ph.D.(Chic.) (on leave of absence)
Jeffrey McKenzie; B.Sc.(McG.), M.Sc., Ph.D.(Syr.)
Bowell Wing; A.B.(Harv.), M.A., Ph.D.(Johns H.)

Faculty Lecturer
W. Minarik; B.A.(St. Olaf), M.Sc.(Wash.), Ph.D.(Rensselaer)

Adjunct Professors
H. Hofmann, B. Sundby

Retired Professors
R. Hesse

The domain of Earth and Planetary Sciences includes the solid Earth and its hydrosphere and extends to the neighbouring terrestrial planets. It is a multidisciplinary field in which the principles of physics, chemistry, and mathematics are applied to the problems of the real world in order to understand how planets like the Earth work; in the past, the present, and the future.

Career opportunities are many and varied for graduates in the Earth and Planetary Sciences. There is presently a demand for graduates with experience in many disciplines of the Earth Sciences. Our students are recruited for employment in the petroleum and mining industries, and in the environmental sector. During the Summer months, undergraduate students are generally able to obtain employment from industry or government agencies, providing them with both financial benefits and first-hand geoscientific experience. Career opportunities in planetary science are present in universities and research organizations. The Department has a full-time staff of 14 professors and one faculty lecturer. There are approximately 40 graduate and 35 undergraduate students. Classes are therefore small at all levels, resulting in an informal and friendly atmosphere throughout the Department in which most of the faculty and students interact on a first-name basis. Emphasis is placed equally on quality teaching and research providing undergraduate students with a rich and exciting environment in which to explore and learn.

The undergraduate curriculum is designed to provide both a rigorous foundation in the physical sciences and the flexibility to create an individualized program in preparation for careers in industry, teaching, or research. In addition to the Major and Honours undergraduate programs, the Department is part of the Earth System Science Inter-departmental program, and also offers a Joint Major in Physics and Geophysics which provides a rigorous mathematics and physics preparation and a geological background in the geosciences.

The Minor in Earth and Planetary Sciences offers students from other departments the opportunity to obtain exposure to the Earth Sciences, while the Minor in Geochemistry is oriented towards Chemistry Major students who want to see the application of chemistry to problems in Earth and Planetary Sciences.

Students interested in any of the programs should inquire at Room 238, Frank Dawson Adams Building, (514) 398-6767, or should consult the Undergraduate Director, Bruce Hart, Room 332, Frank Dawson Adams Building, (514) 398-3677, if they do not have an adviser.

A Science Major Concentration in Earth, Atmosphere and Ocean Sciences is available to students pursuing the B.A. & Sc.
degree. This Major Concentration is described in the Bachelor of Arts and Science section of the Calendar; see "Earth, Atmosphere and Ocean Sciences", in section 6.12.8 for details.

MINOR IN EARTH AND PLANETARY SCIENCES
(18 credits)

Required Courses (6 credits)
EPSC 210 (3) Introductory Mineralogy
EPSC 212 (3) Introductory Petrology

Complementary Courses (12 credits)
EPSC 201 (3) Understanding Planet Earth
or EPSC 233 (3) Earth and Life History

9 credits selected from:
EPSC 203 (3) Structural Geology 1
EPSC 231 (3) Field School 1
EPSC 243 (3) Environmental Geology
EPSC 334 (3) Invertebrate Paleontology
EPSC 350 (3) Tectonics
EPSC 451 (3) Hydrothermal Mineral Deposits
EPSC 452 (3) Mineral Deposits 2
EPSC 542 (3) Chemical Oceanography
EPSC 561 (3) Ore-forming Processes 1
EPSC 562 (3) Ore-forming Processes 2
BIOL 352 (3) Vertebrate Evolution

Other Earth and Planetary Sciences courses may be substituted with permission.

MINOR IN GEOCHEMISTRY (24 credits)

Required Courses (9 credits)
EPSC 201 (3) Understanding Planet Earth
EPSC 210 (3) Introductory Mineralogy
EPSC 212 (3) Introductory Petrology

Complementary Courses (15 credits)
15 credits selected from:
EPSC 220 (3) Principles of Geochemistry
EPSC 243 (3) Environmental Geology
EPSC 501 (3) Crystal Chemistry
EPSC 519 (3) Isotope Geology
EPSC 542 (3) Chemical Oceanography
EPSC 545 (3) Low-Temperature Geochemistry
EPSC 561 (3) Ore-forming Processes 1
EPSC 562 (3) Ore-forming Processes 2

PROPOSED B.SC. LIBERAL PROGRAM

As part of the proposed B.Sc. Liberal Program currently under University review, the Department of Earth and Planetary Sciences will be offering a Core Science Component in Earth and Planetary Sciences. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit's entry in the online 2007-2008 Calendar, which will be available in the summer.

MAJOR IN EARTH AND PLANETARY SCIENCES (66 credits)

Undergraduate Director: Bruce Hart, FD Adams 332, (514) 398-3677

U1 Required Courses (27 credits)
EPSC 203 (3) Structural Geology 1
EPSC 210 (3) Introductory Mineralogy
EPSC 212 (3) Introductory Petrology
EPSC 220 (3) Principles of Geochemistry
EPSC 231 (3) Field School 1
EPSC 233 (3) Earth and Life History
EPSC 312 (3) Spectroscopy of Minerals
MATH 222 (3) Calculus 3

approved (3) statistics course

Note: Students who have not had the following course or its equivalent in CEGEP or the Freshman Program may be required to take MATH 133 Vectors, Matrices and Geometry.

U2 and/or U3 Required Courses (24 credits)
EPSC 320 (3) Elementary Earth Physics
EPSC 334 (3) Invertebrate Paleontology
EPSC 350 (3) Tectonics
EPSC 423 (3) Igneous Petrology
EPSC 445 (3) Metamorphic Petrology
EPSC 452 (3) Mineral Deposits 2
EPSC 455 (3) Sedimentary Geology
EPSC 519 (3) Isotope Geology

Complementary Courses (15 credits)
3 credits, one of:
EPSC 331 (3) Field School 2
EPSC 341 (3) Field School 3

plus 12 credits (4 courses) chosen from the following:
EPSC 330 (3) Earthquakes and Earth Structure
EPSC 425 (3) Sediments to Sequences
EPSC 435 (3) Geophysical Applications
EPSC 451 (3) Hydrothermal Mineral Deposits
EPSC 501 (3) Crystal Chemistry
EPSC 530 (3) Volcanology
EPSC 542 (3) Chemical Oceanography
EPSC 547 (3) High Temperature Geochemistry
EPSC 548 (3) Processes of Igneous Petrology
EPSC 549 (3) Hydrogeology
EPSC 550 (3) Selected Topics 1
EPSC 551 (3) Selected Topics 2
EPSC 552 (3) Selected Topics 3
EPSC 561 (3) Ore-forming Processes 1
EPSC 562 (3) Ore-forming Processes 2
EPSC 570 (3) Cosmochemistry
EPSC 580 (3) Aqueous Geochemistry
EPSC 590 (3) Applied Geochemistry Seminar

Note: Courses at the 300 or higher level in other departments in the Faculties of Science and Engineering may also be used as complementary credits, with the permission of the Director of Undergraduate Studies.

HONOURS IN EARTH SCIENCES (75 credits)
(CGPA ≥ 3.20)

U1 Required Courses (27 credits)
EPSC 203 (3) Structural Geology 1
EPSC 210 (3) Introductory Mineralogy
EPSC 212 (3) Introductory Petrology
EPSC 220 (3) Principles of Geochemistry
EPSC 231 (3) Field School 1
EPSC 233 (3) Earth and Life History
EPSC 312 (3) Spectroscopy of Minerals
MATH 222 (3) Calculus 3
approved (3) statistics course

Note: Students who have not had the following course or its equivalent in CEGEP or the Freshman Program may be required to take MATH 133 Vectors, Matrices and Geometry.

U2 and/or U3 Required Courses (33 credits)
EPSC 320 (3) Elementary Earth Physics
EPSC 334 (3) Invertebrate Paleontology
EPSC 423 (3) Igneous Petrology
EPSC 445 (3) Metamorphic Petrology
EPSC 452 (3) Mineral Deposits 2
EPSC 455 (3) Sedimentary Geology
EPSC 480D1 (3) Honours Research Project
EPSC 480D2 (3) Honours Research Project
EPSC 519 (3) Isotope Geology
MATH 314 (3) Advanced Calculus
MATH 315 (3) Ordinary Differential Equations

Complementary Courses (15 credits)
3 credits, one of:
EPSC 331 (3) Field School 2
EPSC 341 (3) Field School 3
MATH 133 Vectors, Matrices and Geometry.

Students who have not had the following course or its equivalent may be required to take:

Note:

≥ 3.20

U1 Required Courses (27 credits)

Joint Major in Physics and Geophysics

Note: Courses at the 300 or higher level in other departments in the Faculties of Science and Engineering may also be used as complementary credits, with the permission of the Director of Undergraduate Studies.

12.13.11 Earth System Science Interdepartmental Major (ESYS)

Earth System Science (ESYS) views Earth as a single integrated system that provides a unifying context to examine the interrelationships between all components of the Earth system. The approach concentrates on the nature of linkages among the biological, chemical, human and physical subsystems of the Earth. ESS examines the dynamics and interrelationships among these processes at time scales that range from billions of years to days, and seeks to understand how these interrelationships have changed over time.

The ESS Major is offered jointly by the following departments:

- Atmospheric and Oceanic Sciences (ATOC)
- Earth and Planetary Sciences (EPSC)
- Geography (GEOG)

The individual departments, their disciplines, and specific courses offered by them are described in their respective entries in this Calendar.

Program Advisers:

Department of Atmospheric and Oceanic Sciences:
- Professor Peter Yau
  - Burnside Hall, Room 818
  - E-mail: peter.yau@mcgill.ca
  - Telephone: (514) 398-3719

Department of Earth and Planetary Sciences:
- Professor Jeffrey McKenzie
  - Frank Dawson Adams, Room 131C
  - E-mail: mckenzie@eps.mcgill.ca
  - Telephone: (514) 398-3833

Department of Geography:
- Professor Bernhard Lehner
  - Burnside Hall, Room 612
  - E-mail: bernhard.lehner@mcgill.ca
  - Telephone: (514) 398-8794

GEOG 372 (3) Running Water Environments
GEOG 380 (3) Adaptive Environmental Management
GEOG 495 (3) Field Studies - Physical Geography
GEOG 499 (3) Subarctic Field Studies
GEOG 505 (3) Global Biogeochmistry
GEOG 506 (3) Advanced Geographic Information Science
GEOG 522 (3) Advanced Environmental Hydrology
GEOG 535 (3) Remote Sensing and Interpretation
GEOG 536 (3) Geocryology
GEOG 537 (3) Advanced Fluvial Geomorphology
GEOG 550 (3) Historical Ecology Techniques
MATH 314 (3) Advanced Calculus
MATH 315 (3) Ordinary Differential Equations
MATH 317 (3) Numerical Analysis
MATH 319 (3) Partial Differential Equations
MATH 323 (3) Probability
MATH 326 (3) Nonlinear Dynamics and Chaos
MATH 423 (3) Regression and Analysis of Variance
MATH 437 (3) Mathematical Methods in Biology
MATH 447 (3) Stochastic Processes
MATH 525 (3) Sampling Theory and Applications
NRS 540 (3) Socio-Cultural Issues in Water
PHYS 331 (3) Topics in Classical Mechanics
PHYS 332 (3) Physics of Fluids
PHYS 340 (3) Electricity and Magnetism
PHYS 342 (3) Electromagnetic Waves

Note: Courses at the 300 level or higher in other departments in the Faculties of Science and Engineering may also be used as complementary credits, with the permission of an academic adviser. Please see the list posted on the Departmental webpage.

12.13.12 Environment

All courses given by the McGill School of Environment (Subject Code ENVR) are considered as courses taught by the Faculty of Science.

Science students who are interested in studying the environment should refer to the "McGill School of Environment", in section 14, where they will find information concerning the Minor Program in Environment, the B.Sc. Major Program in Environment and the B.Sc. Honours Program in Environment.

12.13.13 Experimental Medicine (EXMD)

Lady Meredith House, Room 101
E-mail: experimental.medicine@mcgill.ca
Website: www.medicine.mcgill.ca/EXPMED/expmed1.html

Experimental Medicine is a division of the Department of Medicine. There are no B.Sc. programs in Experimental Medicine, but the EXMD courses listed in the Courses section of this Calendar are considered as courses taught by the Faculty of Science.

12.13.14 Geography (GEOG)
Faculty of Science

L. Müller-Wille; Dr.phil.(Münster)
W.H. Pollard; B.A., M.Sc.(Guelph), Ph.D.(Ott.)
J. Unruh; B.A.(Kansas), M.S.(Wis.), Ph.D.(Ariz.)

Assistant Professors
S. Breau; B.A.(Montreal), M.A.(Laval), Ph.D.(UCLA)
B. Lehner; Dip. Hydrol. (Freiburg) Ph.D. (Frankfurt)
G. Peterson; B.A.Sc., M.Sc.(Wat.), Ph.D.(Flor.) (joint appoint. with McGill School of Environment)

N. Ramankutty; B.E. (P.S.G. Coll. of Tech.), M.S. (III.) Ph.D., (Wis.)
N.A. Ross; B.A., M.A.(Qu.), Ph.D.(McM.)
J.W. Seaquist; B.Sc.(Tor.), Ph.D.(Lund.) (on leave 2007)
R. Sengupta; B.Sc.(Bombay), M.Sc.(IIT, Mumbai), M.S., Ph.D.(S.Illinois-Carbondale) (joint appoint. with McGill School of Environment)

I.B. Strachan; B.Sc.(Tor.), B.Sc.(Tokyo), Ph.D.(Lund.) (on leave Sept. 2006 - Aug. 2007)

The Department of Geography offers programs in both Arts and Science. All B.A. programs in Geography (including Urban Systems) can be found in the Faculty of Arts entry "Geography (GEOG)", in section 5.12.23.

Geography is a broad, holistic discipline - both a natural and a social science because it examines people and their environment and serves as a bridge between physical and cultural processes. Human Geography (a social science, thus B.A. programs) is concerned especially with the political, economic, social, and cultural processes and resource practices that create spatial patterns and that define particular places. Physical Geography (B.Sc. programs) integrates disciplines such as climatology, geomorphology, geology, biology, hydrology, ecology, soil science and even marine science. Whether considering greenhouse gas emissions, the spread of disease, or threats to biodiversity, in all cases, geographers are interested in where things happen, why, and with what consequences.

Our graduates go on to careers in environmental consulting, social agencies or non-governmental organizations. Skills in Geographic Information Science (GIS) are very marketable. Students are well prepared for graduate work in social sciences, urban planning and environmental studies at leading schools.

PREREQUISITES
There are no departmental prerequisites for entrance to the B.Sc. Geography programs. Students who have completed college or pre-university geography courses fully equivalent to those in the first year of university may, with an adviser's approval, substitute other courses as part of their program.

A Science Major Concentration in Geography - Physical Option is available to students pursuing the B.A. & Sc. degree. This Major Concentration is described in the Bachelor of Arts and Science section of the Calendar; see "Geography (GEOG)", section 5.12.23 for details.

Note: The Geography Departmental Orientation for newly admitted students who are in a Geography program will be held on September 7, 2007, at 2:00 PM, in Burnside Hall, Room 426.

MINOR IN GEOGRAPHY (expandable into the B.Sc. Major in Geography) (18 credits)
The Minor in Geography is designed to provide students in the Faculty of Science with an overview of basic elements of geography at the introductory and advanced level.

This Minor permits no overlap with any other programs.

Required Courses (12 credits)
GEOG 203 (3) Environmental Systems
GEOG 216 (3) Geography of the World Economy
GEOG 217 (3) The Canadian City
GEOG 302 (3) Environmental Management 1

Complementary Courses (6 credits)
6 credits of Geography courses at the 300 and 400 level.

B.Sc. MINOR IN GEOGRAPHICAL INFORMATION SYSTEMS (18 credits)
The Minor in GIS is designed to provide students in the Faculty of Science who have an interest in GIS with a basic, but comprehensive, knowledge of concepts and methods relating to the analysis of geospatial data.

Required Courses (15 credits)
GEOG 201 (3) Introductory Geo-Information Science
GEOG 306 (3) Raster Geo-Information Science
GEOG 307 (3) Socioeconomic Applications of GIS
GEOG 308 (3) Principles of Remote Sensing
GEOG 506 (3) Advanced Geographic Information Science

Complementary Course (3 credits)
one course to be chosen from:
ATOC 309 (3) Weather Radars and Satellites
COMP 420 (3) Secondary Storage Algorithms and Data Structures
COMP 557* (3) Fundamentals of Computer Graphics
GEOG 535 (3) Remote Sensing and Interpretation
GEOG 551 (3) Environmental Decisions
URBP 505 (3) Geographic Information Systems

*Note prerequisites

PROPOSED B.SC. LIBERAL PROGRAM
As part of the proposed B.Sc. Liberal Program currently under University review, the Department of Geography will be offering a Core Science Component in Geography. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit's entry in the online 2007-2008 Calendar, which will be available in the summer.

B.Sc. MAJOR IN GEOGRAPHY (58 credits)
The Major is designed to provide a coverage of the main elements of physical geography.

Required Courses (22 credits)
GEOG 201 (3) Introductory Geo-Information Science
GEOG 203 (3) Environmental Systems
GEOG 216 (3) Geography of the World Economy
GEOG 217 (3) The Canadian City
GEOG 272 (3) Earth’s Changing Surface
GEOG 302 (3) Environmental Management 1
GEOG 351 (3) Quantitative Methods
GEOG 290 (1) Local Geographical Excursion
(on 2007 reserve September 28 - 30)

Complementary Courses (36 credits)
3 credits of statistics*
BIOL 373 (3) Biometry
GEOG 202 (3) Statistics and Spatial Analysis
MATH 203 (3) Principles of Statistics 1
PSYC 204 (3) Introduction to Psychological Statistics
SOC 250 (3) Statistics in Social Research

* Credit given for statistics courses is subject to certain restrictions, see Faculty Degree Requirements, section 12.3.6.1 "Course Overlap"

3 credits of GIS techniques:
GEOG 306 (3) Raster Geo-Information Science
GEOG 308 (3) Principles of Remote Sensing

12 credits of systematic physical geography:
GEOG 305 (3) Soils and Environment
GEOG 321 (3) Climatic Environments
GEOG 322 (3) Environmental Hydrology
GEOG 350 (3) Ecological Biogeography
GEOG 372 (3) Running Water Environments
3 credits of field courses:
GEOG 495 (3) Field Studies - Physical Geography
GEOG 496 (3) Geographical Excursion
GEOG 497 (3) Ecology of Coastal Waters
GEOG 499 (3) Subarctic Field Studies

3 credits of field courses:
GEOG 495 (3) Field Studies - Physical Geography
GEOG 496 (3) Geographical Excursion
GEOG 497 (3) Ecology of Coastal Waters
GEOG 499 (3) Subarctic Field Studies

Advising Note: See the Geography Website for the list of approved courses in the Faculty of Science. Some courses require the permission of the department and from the Associate Dean of Science, Student Affairs.

Geography Approved Course List – Majors and Honours
GEOG 404 (3) Environmental Management 2
GEOG 501 (3) Modelling Environmental Systems
GEOG 505 (3) Global Biogeochemy
GEOG 506 (3) Advanced Geographic Information Science
GEOG 522 (3) Advanced Environmental Hydrology
GEOG 523 (3) Advanced Climatology
GEOG 535 (3) Remote Sensing and Interpretation
GEOG 536 (3) Geocryology
GEOG 537 (3) Advanced Fluvial Geomorphology
GEOG 550 (3) Historical Ecology Techniques

B.Sc. HONOURS IN GEOGRAPHY (66 credits)
The Honours program is designed to provide specialized systematic training in physical geography. In addition to the Faculty requirement that Honours students maintain a minimum CGPA of at least 3.00, students who enter a Geography Honours Program on or after September 2006 must have a program GPA of 3.3.
Honours students are encouraged to participate in 500-level seminars with graduate students, but it is not advisable to take more than one in a term.

Required Courses (24 credits)
GEOG 201 (3) Introductory Geo-Information Science
GEOG 203 (3) Environmental Systems
GEOG 272 (3) Earth's Changing Surface
GEOG 302 (3) Environmental Management 1
GEOG 351 (3) Quantitative Methods
GEOG 381 (3) Geographic Thought and Practice
GEOG 491D1 (3) Honours Research
GEOG 491D2 (3) Honours Research

Complementary Courses (42 credits)
6 credits of introductory courses, two of:
GEOG 210 (3) Global Places and Peoples
GEOG 216 (3) Geography of the World Economy
GEOG 217 (3) The Canadian City
3 credits of statistics*, one of:
BIOL 373 (3) Biometry
GEOG 202 (3) Statistics and Spatial Analysis
MATH 203 (3) Principles of Statistics 1
PSYC 204 (3) Introduction to Psychological Statistics
SOCI 350 (3) Statistics in Social Research
* Credit given for statistics courses is subject to certain restrictions, see Faculty Degree Requirements, section 12.3.6.1 "Course Overlap"

3 credits of GIS techniques:
GEOG 306 (3) Raster Geo-Information Science
GEOG 308 (3) Principles of Remote Sensing

12 credits of systematic physical geography:
GEOG 555  Ecological Restoration

EARTH SYSTEM SCIENCE INTERDEPARTMENTAL MAJOR, see section 12.13.11 "Earth System Science Interdepartmental Major (ESYS)". [Awaiting approval of the Ministère de l'Éducation, du Loisir et du Sport].

This program is offered by the Departments of Atmospheric & Oceanic Sciences, Earth & Planetary Sciences and Geography.

Students in the Department of Geography interested in this program should contact:— Professor Bernhard Lehner (bernhard.lehner@mcgill.ca)

12.13.15  Immunology Interdepartmental Honours

Students must obtain a U1 GPA or a U2 CGPA of 3.30 for admission to this enrolment-limited program. U1 students should inform the program adviser of their intent to enter the Honours Immunology Program during their U1 Winter term and confirm their intention in writing by April 1. U2 or U3 students can apply for admission at any time.

For graduation in the Honours program, the student must complete a minimum of 90 credits, and achieve a CGPA of not less than 3.30. The immunology courses (BIOC 503, MIMM 314, MIMM 414, MIMM 509, PHGY 419D1/D2, PHGY 513, PHGY 531) must all be passed with a grade not less than B+. Students who do not maintain Honours standing must transfer their registration to a program in one of the three participating Departments.

Apply to Dr. M. G. Baines, Microbiology and Immunology, malcolm.baines@mcgill.ca, (514) 398-4443 or Dr. Julie Desbarats, Physiology, julie.desbarats@mcgill.ca, (514) 398-5126.

INTERDEPARTMENTAL HONOURS IN IMMUNOLOGY
(75 credits)

Required Courses (48 credits)

U1 Required Courses (20 credits)

BIOL 200  (3) Molecular Biology
BIOL 201  (3) Cell Biology and Metabolism
or BIOC 212  (3) Molecular Mechanisms of Cell Function
CHEM 203  (3) Survey of Physical Chemistry
or CHEM 204  (3) Physical Chemistry/Biological Sciences 1
CHEM 212  (4) Introductory Organic Chemistry 1
CHEM 222  (4) Introductory Organic Chemistry 2
PHGY 209  (3) Mammalian Physiology 1
or MIMM 211  (3) Introductory Microbiology

U2 Required Courses (13 credits)

ANAT 261  (4) Introduction to Dynamic Histology
BIOC 311  (3) Metabolic Biochemistry
BIOC 312  (3) Biochemistry of Macromolecules
MIMM 314  (3) Immunology

U3 Required Courses (15 credits)

MIMM 414  (3) Advanced Immunology
PHGY 419D1  (4.5) Project and Seminar in Immunology
PHGY 419D2  (4.5) Project and Seminar in Immunology
PHGY 513  (3) Cellular Immunology

Complementary Courses (27 credits)

U1 Complementary Courses (6 credits)

3 credits selected from:

BIOL 373  (3) Biometry
MATH 203  (3) Principles of Statistics 1
PSYC 204  (3) Introduction to Psychological Statistics
plus 3 credits selected from:

ANAT 214  (3) Systematic Human Anatomy
ANAT 262  (3) Introductory Molecular and Cell Biology
BIOL 202  (3) Basic Genetics
BIOL 205  (3) Biology of Organisms
BIOL 304  (3) Evolution
CHEM 257D1  (2) Introductory Analytical Chemistry
CHEM 257D2  (2) Introductory Analytical Chemistry

U2 Complementary Courses (12 credits)

3 credits selected from:

BIOL 300D1  (3) Laboratory in Biochemistry
or BIOC 300D2  (3) Laboratory in Biochemistry
or MIMM 386D1  (3) Laboratory in Microbiology and Immunology
or MIMM 386D2  (3) Laboratory in Microbiology and Immunology
or PHGY 212  (1) Introductory Physiology Laboratory 1
and PHGY 213  (1) Introductory Physiology Laboratory 2
and BIOL 301  (4) Cell and Molecular Laboratory
plus 6 credits, selected from:

BIOC 503  (3) Immunochemistry
BIOC 519  (3) Molecular Biology of the Gene
BIOC 531  (3) Molecular Biology of Oncogenes
CHEM 301  (3) Introductory Organic Chemistry 3
MATH 222  (3) Calculus 3
MATH 315  (3) Ordinary Differential Equations
or BIOC 531  (3) Topics in Applied Immunology
MIMM 323  (3) Microbial Physiology
MIMM 324  (3) Fundamental Virology
PATH 300  (3) Human Disease
PHAR 300  (3) Drug Action
PHAR 301  (3) Drugs and Disease
PHAR 303  (3) Principles of Toxicology
PHGY 311  (3) Intermediate Physiology 1
PHGY 312  (3) Intermediate Physiology 2
PHGY 313  (3) Intermediate Physiology 3
PHGY 314  (3) Integrative Neuroscience

U3 Complementary Courses (9 credits)

3 credits selected from:

BIOC 503  (3) Immunochemistry
MIMM 509  (3) Inflammatory Processes
PHGY 531  (3) Topics in Applied Immunology
plus 6 credits selected from:

BIOC 520  (3) Gene Activity in Development
BIOC 404  (3) Biophysical Chemistry
BIOC 450  (3) Protein Structure and Function
BIOC 454  (3) Nucleic Acids
BIOC 458  (3) Membranes and Cellular Signaling
or ANAT 458  (3) Membranes and Cellular Signaling
BIOC 503  (3) Immunology
MIMM 413  (3) Parasitology
MIMM 465  (3) Bacterial Pathogenesis
MIMM 466  (3) Viral Pathogenesis
MIMM 509  (3) Inflammatory Processes
PHAR 503  (3) Drug Design and Development 1

PHGY 552  (3) Cellular and Molecular Physiology

12.13.16  Kinesiology for Science Students

The Minor in Kinesiology is designed to provide students in B.Sc. programs with basic but comprehensive knowledge of scientific bases of human physical activity and its relationship with health and well-being.

Students registered in the Minor in Kinesiology for Science Students may not take additional courses outside the Faculties of Arts and of Science.
To obtain the Minor, all courses must be completed with a grade of C or better.

MINOR IN KINESIOLOGY FOR SCIENCE STUDENTS (24 credits)

Required Courses (9 credits)
- EDKP 206 (3) Biomechanics of Human Movement
- EDKP 393 (3) Skill Learning and Expertise
- EDKP 395 (3) Exercise Physiology

Complementary Courses (15 credits)
- 6 credits, two of the following courses:
  - PHGY 201 (3) Human Physiology: Control Systems
  - or PHGY 209 (3) Mammalian Physiology 1
  - PHGY 202 (3) Human Physiology: Body Functions
  - or PHGY 210 (3) Mammalian Physiology 2
- 9 credits, three of the following courses:
  - EDKP 261 (3) Motor Development
  - EDKP 303 (3) Advanced Biomechanics
  - EDKP 330 (3) Physical Activity and Health
  - EDKP 394 (3) Historical Perspectives
  - EDKP 396 (3) Adapted Physical Activity
  - EDKP 444 (3) Ergonomics
  - EDKP 445 (3) Exercise Metabolism
  - EDKP 446 (3) Physical Activity and Ageing
  - EDKP 447 (3) Motor Development 2
  - EDKP 448 (3) Exercise and Health Psychology
  - EDKP 449 (3) Exercise Pathophysiology 1
  - EDKP 485 (3) Exercise Pathophysiology 2
  - EDKP 495 (3) Scientific Principles of Training
  - EDKP 498 (3) Sport Psychology
  - EDKP 505 (3) Sport in Society
  - EDKP 542 (3) Environmental Exercise Physiology
  - EDKP 550 (3) Analyzing Instructional Behaviors
  - EDKP 553 (3) Physical Activity Assessments
  - EDKP 566 (3) Muscle Mechanics
  - EDKP 568 (3) Biomechanics Instrumentation

MINOR IN MANAGEMENT (24 credits)

Required Courses (9 credits)
- MGCR 211 (3) Introduction to Financial Accounting
- MGCR 293 (3) Managerial Economics
- MATH 203 (3) Principles of Statistics 1

or its equivalent as authorized by the Faculty of Science.

Students majoring in certain programs, for example in Mathematics, cannot take MATH 203 but must take MATH 324 instead. (Note: Credit given for statistics courses is subject to certain restrictions, see Faculty Degree Requirements, section 12.3.6.1 “Course Overlap”.)

Complementary Courses (15 credits)
- 3 credits from:
  - MGCR 213 (3) Introduction to Management Accounting
  - MGCR 341 (3) Finance 1
  - MGCR 382 (3) International Business
- 3 credits from:
  - MGCR 222 (3) Introduction to Organizational Behaviour
  - MGCR 320 (3) Managing Human Resources
  - MGCR 352 (3) Marketing Management 1
- 3 credits from:
  - MGCR 360 (3) Social Context of Business
  - MGCR 373 (3) Operations Research 1
  - MGCR 423 (3) Organizational Policy
- 6 credits from:
  - any approved 300- or 400-level Management courses for which the prerequisites, if any, have been met.

Note: B.Sc. students must not take MGCR 331, ORGB 420, ORGB 429 or any INSY course.

12.13.18 Mathematics and Statistics (MATH)

The Minor in Mathematics and Statistics is designed for Science students who wish to pursue a minor in mathematics or statistics that complements their major field of study. The program provides a solid foundation in mathematical and statistical concepts and techniques that are applicable in various scientific disciplines.

Required Courses (9 credits)
- MATH 133 (3) Linear Algebra
- MATH 223 (3) Calculus 3
- MATH 224 (3) Calculus 4

or the equivalent as authorized by the Faculty of Science.

Students majoring in certain programs, for example in Mathematics, cannot take MATH 203 but must take MATH 324 instead. (Note: Credit given for statistics courses is subject to certain restrictions, see Faculty Degree Requirements, section 12.3.6.1 “Course Overlap”.)

Complementary Courses (15 credits)
- 3 credits from:
  - MGCR 213 (3) Introduction to Management Accounting
  - MGCR 341 (3) Finance 1
  - MGCR 382 (3) International Business
- 3 credits from:
  - MGCR 222 (3) Introduction to Organizational Behaviour
  - MGCR 320 (3) Managing Human Resources
  - MGCR 352 (3) Marketing Management 1
- 3 credits from:
  - MGCR 360 (3) Social Context of Business
  - MGCR 373 (3) Operations Research 1
  - MGCR 423 (3) Organizational Policy
- 6 credits from:
  - any approved 300- or 400-level Management courses for which the prerequisites, if any, have been met.

Note: B.Sc. students must not take MGCR 331, ORGB 420, ORGB 429 or any INSY course.

Chair — David Wolfson
Emeritus Professors
- Michael Barr; A.B., Ph.D.(Penn.) (Peter Redpath Emeritus Professor of Pure Mathematics)
- Marta Bunge; M.A., Ph.D.(Penn.)
- Jal R. Choksi; B.A.(Cant.), Ph.D.(Manc.)
- Joachim Lambek; M.Sc., Ph.D.(McG.), F.R.S.C.(Peter Redpath Emeritus Professor of Pure Mathematics)
- Arak M. Mathai; M.Sc.(Kerala), M.A., Ph.D.(Tor.)
- Shraga A. Maslowe; B.Sc.(Wayne State), M.Sc., Ph.D.(Calif.)
- William O.J. Moser; B.Sc.(Manit.), M.A.(Minn.), Ph.D.(Tor.)
- V. Seshadri; B.Sc., M.Sc.(Madr.), Ph.D.(Okla.)
- George P.H. Styan; M.A., Ph.D.(Col.)
- John C. Taylor; B.Sc.(Acad.), M.A.(Qu.), Ph.D.(McM.)

Professors
- William J. Anderson; B.Eng., Ph.D.(McG.)
- William G. Brown; M.A.(Col.), B.A., Ph.D.(Tor.)
- Henri Darmon; B.Sc.(McG.), Ph.D.(Harv.), F.R.S.C.
- (James McGill Professor)
- Stephen W. Drury; M.A., Ph.D.(Cant.)
- Kohur GowriSankaran; B.A., M.A.(Madr.), Ph.D.(Bombay)
- Pengfei Guan; B.Sc.(Zhejiang), M.Sc., Ph.D.(Prin.)
- Jacques C. Hurtubise; B.Sc.(Montr.), Ph.D.(Oxf.), F.R.S.C.
- Niky Kamran; B.Sc., M.Sc.(Brussels), Ph.D.(Wat.), F.R.S.C.
- (James McGill Professor)
- Olga Kharlampovich; M.A.(Ural State), Ph.D.(Leningrad), Dr.of.Sc.(Steklov Institute)
- Alexei Miasnikov; M.Sc.(Novosibirsk), Ph.D., Dr.Sc.(Leningrad)
- Charles Roth; M.Sc.(McG.), Ph.D.(Hebrew)
- Karl Peter Russell; Vor.Dip.(Hamburg), Ph.D.(Calif.)
- Georg Schmidt; B.Sc.(Natal), M.Sc.(S.A.), Ph.D.(Stan.)
F. Bruce Shepherd; B.Sc.(Vic., Tor.), M.Sc.(Wat.), Ph.D.(Wat.) (James McGill Professor)
David A. Stephens; B.Sc., Ph.D.(Nott.)
David Wolfson; M.Sc.(Natal), Ph.D.(Purd.)
Keith J. Worsley; B.Sc., M.Sc., Ph.D.(Auck.), F.R.S.C. (James McGill Professor)
Jian-Ju Xu; B.Sc., M.Sc.(Beijing), M.Sc., Ph.D.(Renss.)

Associate Professors
Masoud Asgharian; B.Sc.(Shahid Beheshti), M.Sc., Ph.D.(McG.)
Peter Bartello; B.Sc.(Tor.), M.Sc., Ph.D.(McG.) (joint appoint. with Atmospheric and Oceanic Sciences)
Eyal Z. Goren; B.A., M.S., Ph.D.(Hebrew)
Dmitry Jakobson; B.Sc.(MIT), Ph.D.(Prin.) (William Dawson Scholar)
Wilbur Jonsson; M.Sc.(Manit.), Dr.Rer.Nat.(Tübingen)
Tony Humphries; B.A., M.A.(Camb.), Ph.D.(Bath)
Ivo Klemes; B.Sc.(Tor.), Ph.D.(Calif.Tech.)
John P. Labute; B.Sc(Windsor), M.A., Ph.D (Harv.)
James G. Loveys; B.A.(St.M.), M.Sc., Ph.D.(S.Fraser)
Neville G.F. Sancho; B.Sc., Ph.D.(Belf.)
John A. Toth; B.Sc., M.Sc.(McM.), Ph.D.(MIT) (William Dawson Scholar)
Alain Vandal; B.Sc., M.Sc.(McG.), Ph.D.(Auck.)
Daniel T. Wise; B.A.(Yeshiva), Ph.D.(Prin.)

Assistant Professors
Nilima Nigam; B.Sc.(IIT, Bombay), M.S., Ph.D.(Delaware)
Russell Steele; B.S., M.S.(Cam. Meil), Ph.D.(Wash.)
Paul Tupper; B.Sc.(S. Fraser), Ph.D.(Stan.)
Jacques Verstraete; B.Sc., M.Sc.(Natal), Ph.D.(Camb.)
Adrian Vetta; B.Sc., M.Sc.(London School of Economics), Ph.D.(MIT) (joint appoint. with Computer Science)
Thomas P. Witler; M.S., Ph.D.(ETH)

Associate Members
Xiao-Wen Chang (Computer Science), Luc P. Devroye (Computer Science), P.R.L. Dutilleul (Plant Science), Leon Glass (Physiology), Jean-Louis Goffin (Management), James A. Hanley (Epidemiology & Biostatistics), Lawrence Joseph (Epidemiology & Biostatistics), Michael Mackey (Physiology), Lawrence A. Mysak (A.O.S.), Christopher Conway Paige (Computer Science), Prakash Panangaden (Computer Science), Robert W. Platt (Pediatrics), James O. Ramsay (Psychology), Peter Swain (Physiology), George Alexander Whitmore (Management), Christina Wolfson (Epidemiology & Biostatistics)

Adjunct Professors
Donald A. Dawson; B.Sc., M.Sc.(McG.), Ph.D.(MIT)
Martin J. Gander; M.S.(ETH), M.S., Ph.D.(Stan.)
Andrew Granville; B.A., CASM(Camb.), Ph.D.(Qu.)
Ming Mei; B.Sc., M.Sc.(Jiangxi Normal University), Ph.D.(Kanazawa)
M. Ram Murty; B.Sc.(Car.), Ph.D.(MIT), F.R.S.C.
Vladimir Remeslenikov; M.Sc.(Perm, Russia), Ph.D.(Novosibirsk)
Robert A. Seely; B.Sc.(McG.), Ph.D.(Cant.)

Faculty Lecturers
Jose A. Correa; M.Sc.(Wat.), Ph.D.(Car.)
Axel Hundemer; M.Sc., Ph.D.(Munich)

Mathematics has evolved to a discipline that is mainly characterized by its method of proof, its concern for a progressive broadening of its concepts, and by the search for mathematical entities and operations that represent aspects of reality. It is a subject that is pursued by many for its own sake, and regarded as part of the mainstream of human culture. Mathematics pervades modern society with an impact which, already immense, is rapidly growing.

The two principal divisions of mathematics are pure mathematics and applied mathematics. The pure mathematician is interested in abstract mathematical structures and in mathematics as an intellectual enterprise. The primary concern may not be with its utilitarian aspects or with the current needs of science and technology, although many problems in pure mathematics have developed from the sciences.

The applied mathematician is more interested in how mathematics can be used to study some aspects of the world. Mathematicians are engaged in the creation, study and application of advanced mathematical methods relevant to scientific problems. Statistical science and methodology today is concerned with phenomena in which there is a background of uncertainty arising from inherent variability and the investigator is obliged to arrive at conclusions from limited data. A key tool in statistics is probability. Some of the fields in which pure mathematicians work are algebra, analysis, geometry, topology, number theory and foundations. Applied mathematics, which once referred to the application of mathematics to such disciplines as mechanics and fluid dynamics, has currently assumed a much broader meaning and embraces such diverse fields as communication theory, theory of optimization, theory of games and numerical analysis.

Mathematics offers many vocational possibilities. Such fields as teaching, computing, applied statistics and actuarial science offer opportunities for B.Sc. graduates. Opportunities to do original research in pure and applied mathematics are available in universities and research institutions. Employment is to be found in financially or technologically oriented business firms. The Department of Mathematics and Statistics through its various programs attempts to provide courses to suit the diverse interests within mathematics and statistics.

The Honours Program in Mathematics demands of the student a talent for abstraction in addition to a high level of competence in the use of mathematical tools. This program is intended for students who plan to work in an area where mathematical innovations may be needed. It is almost essential for students contemplating a career in mathematical research.

The Major Program involves the same subjects as the Honours Program but is less demanding in terms of abstraction. It is designed primarily for students who will need mathematical tools in their work but whose creative activity will involve applications of mathematics to other areas. Within the framework of the Mathematics Major, various combinations of courses are suggested to meet the needs of different students. These include course suggestions for secondary school teachers, careers in management, and for careers in industry, government or actuarial sciences. It is possible for Major students to include a number of Honours courses in their programs. This will be an advantage for those students who plan to use their mathematics in graduate studies.

Students interested in a less intensive mathematics program linked to other disciplines are advised to consider the available Faculty Programs.

In planning their programs students are advised to seriously consider developing some depth in another discipline – preferably one for which mathematics has some relevance and use. Mathematics has been closely linked to areas such as computer science, physics and engineering but has recently come to play an increasingly important role in fields such as biology, linguistics, management and psychology. Students should consider completing the requirements for Minor programs such as those available in Cognitive Science, Computer Science and Statistics.

Students considering programs in Mathematics and Statistics should contact the Department to arrange for academic advising.

The student's attention is called to the fact that a B.Com. degree with a Major in Mathematics is available from the Desautels Faculty of Management. In addition, the Schulich School of Music offers the B.Mus. degree with Honours in Theory with Mathematics Option.

Internship Opportunities
Students who want to get practical experience in industry before graduation are encouraged to participate in one of the following internship programs:

- The Internship Year in Engineering and Science (IYES) is an academic program offered for a duration of 8, 12 or 16 months. It is reflected on the transcript and included in the program name (Bachelor of Science - Internship program). Eligible students usually take this program between their U2 and U3 years.
MINOR IN MATHEMATICS (24 credits)

The Minor may be taken in conjunction with any primary program in the Faculty of Science (other than programs in Mathematics). Students should declare their intention to follow the Minor in Mathematics at the beginning of the penultimate year and should obtain approval for the selection of courses to fulfill the requirements for the Minor from the Departmental Chief Adviser (or delegate).

It is strongly recommended that students in the Minor Program take MATH 323. The remaining credits may be freely chosen from the required and complementary courses for Majors and Honours students in Mathematics, with the obvious exception of courses that involve duplication of material. Alternatively, up to six credits may be allowed for appropriate courses from other departments.

All courses counted towards the Minor must be passed with a grade of C or better.

Generally no more than six credits of overlap are permitted between the Minor and the primary program. However, with an approved choice of substantial courses the overlap restriction may be relaxed to nine credits for students whose primary program requires 60 credits or more and to 12 credits when the primary program requires 72 credits or more.

Required Courses (9 credits)
MATH 222 (3) Calculus 3
MATH 223* (3) Linear Algebra
MATH 315 (3) Ordinary Differential Equations

*MATH 223 may be replaced by MATH 235 and MATH 236. In this case the complementary credit requirement is reduced by three.

Complementary Courses (15 credits)
To be selected from the required and complementary courses for Majors and Honours students in Mathematics, with MATH 323 strongly recommended; alternatively, up to six credits may be allowed for appropriate courses from other departments.

MINOR IN STATISTICS (24 credits)

The Minor may be taken in conjunction with any primary program in the Faculty of Science. Students should declare their intention to follow the Minor in Statistics at the beginning of the penultimate year and must obtain approval for the selection of courses to fulfill the requirements for the Minor from the Departmental Chief Adviser (or delegate).

All courses counted towards the Minor must be passed with a grade of C or better. Generally no more than six credits of overlap are permitted between the Minor and the primary program. However, with an approved choice of substantial courses the overlap restriction may be relaxed to nine credits for students whose primary program requires 60 credits or more and to 12 credits when the primary program requires 72 credits or more.

Required Courses (15 credits)
MATH 222 (3) Calculus 3
MATH 223* (3) Linear Algebra
MATH 323 (3) Probability
MATH 324 (3) Statistics
MATH 423 (3) Regression and Analysis of Variance

*MATH 223 may be replaced by MATH 235 and MATH 236. In this case the complementary credit requirement is reduced by three.

Complementary Courses (9 credits)
selected from:
CHEM 593 (3) Statistical Mechanics
GEOG 351 (3) Quantitative Methods
MATH 447 (3) Stochastic Processes
MATH 523 (4) Generalized Linear Models
MATH 525 (4) Sampling Theory and Applications
MATH 556 (4) Mathematical Statistics I
MATH 557 (4) Mathematical Statistics II
PHYS 362 (3) Statistical Mechanics
PHYS 559 (3) Advanced Statistical Mechanics
SOCI 504 (3) Quantitative Methods 1
SOCI 505 (3) Quantitative Methods 2

No more than six credits may be taken outside the Department of Mathematics and Statistics.

Further credits (if needed) may be freely chosen from the required and complementary courses for Majors and Honours students in Mathematics, with the obvious exception of courses that involve duplication of material.

PROPOSED B.SC. LIBERAL PROGRAM

A proposed B.Sc. Liberal Program is currently under University review and is intended to replace the B.Sc. Faculty programs offered by units. Faculty programs will be retired starting September 2008, and September 2007 will be the last year in which new students are accepted into Faculty programs. Students enrolled in a Faculty program will be able to complete that program.

As part of the proposed B.Sc. Liberal Program, the Department of Mathematics and Statistics will be offering a Core Science Component in Mathematics and Statistics. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit's entry in the online 2007-2008 Calendar, which will be available in the summer.

FACULTY PROGRAMS

Programs linking mathematics and other disciplines are available. With careful selection of courses in U1, it is possible to transfer to a Major program in Mathematics in U2. Except where otherwise noted these Faculty Programs lead to a B.Sc. degree. Students interested in any of these Faculty Programs should consult the Department of Mathematics and Statistics for an adviser.

FACULTY PROGRAM IN BIOLOGY AND MATHEMATICS

under "Biology (BIOL)", in section 12.13.5.

FACULTY PROGRAM IN CHEMISTRY AND MATHEMATICS
under "Chemistry (CHEM)", in section 12.13.7.

FACULTY PROGRAM IN MATHEMATICS AND COMPUTER SCIENCE (54 credits)

Required Courses (48 credits)
COMP 202 (3) Introduction to Computing 1
COMP 203 (3) Introduction to Computing 2
COMP 206 (3) Introduction to Software Systems
COMP 251 (3) Data Structures and Algorithms
COMP 273 (3) Introduction to Computer Systems
COMP 302 (3) Programming Languages and Paradigms
COMP 310 (3) Operating Systems
COMP 330 (3) Theoretical Aspects: Computer Science
COMP 420 (3) Secondary Storage Algorithms and Data Structures
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 240 (3) Discrete Structures 1
MATH 315 (3) Ordinary Differential Equations
Required courses

- MATH 346 (3) Number Theory
- MATH 348 (3) Topics in Geometry
- MATH 352 (1) Problem Seminar
- MATH 407 (3) Dynamic Programming
- MATH 410 (3) Majors Project
- MATH 417 (3) Mathematical Programming
- MATH 423 (3) Regression and Analysis of Variance
- MATH 430 (3) Mathematical Finance
- MATH 447 (3) Stochastic Processes
- MATH 523 (4) Generalized Linear Models
- MATH 525 (4) Sampling Theory and Applications

6 additional credits in Mathematics or related disciplines selected in consultation with the adviser.

JOINT MAJOR IN MATHEMATICS AND COMPUTER SCIENCE (72 credits)

- Required courses (51 credits)
  - COMP 206 (3) Introduction to Software Systems
  - COMP 235 (3) Data Structures and Algorithms
  - COMP 271 (3) Introduction to Computer Systems
  - COMP 280 (3) Programming Languages and Paradigms
  - COMP 310 (3) Operating Systems
  - COMP 330 (3) Theoretical Aspects: Computer Science
  - COMP 360 (3) Algorithm Design Techniques
  - MATH 222 (3) Calculus 2
  - MATH 235 (3) Algebra 1
  - MATH 236 (3) Algebra 2
  - MATH 242 (3) Analysis 1
  - MATH 315 (3) Algebra 1
  - MATH 317 (3) Numerical Analysis
  - MATH 318 (3) Mathematical Logic
  - MATH 323 (3) Probability
  - MATH 340 (3) Discrete Structures 2

- Complementary Courses (15 credits)
  - 9 credits from the set of courses recommended for a Major or Honours Program in Mathematics.
  - 12 credits from the set of courses recommended for a Major or Honours Program in Computer Science.

JOINT MAJOR IN PHYSIOLOGY AND MATHEMATICS

Under *Physiology (PHGY)*, in section 12.13.27.

HONOURS PROGRAMS

The minimum requirement for entry into the Honours program is that the student has completed with high standing the following courses: MATH 133, MATH 140, MATH 141, or their equivalents. In addition, a student who has not completed the equivalent of MATH 222 must take it in the first term without receiving credits towards the credits required in the Honours program.

Students who transfer to Honours in Mathematics from other programs will have credits for previous courses assigned, as appropriate, by the Department.

To remain in an Honours program and to be awarded the Honours degree, the student must maintain a 3.00 GPA in the required and complementary Mathematics courses of the program, as well as an overall CGPA of 3.00.

HONOURS IN MATHEMATICS (60 credits)

Required Courses (45 credits)

- MATH 235 (3) Algebra 1
- MATH 242 (3) Analysis 1
- MATH 248* (3) Honours Advanced Calculus
- MATH 251 (3) Honours Algebra 2
- MATH 255 (3) Honours Analysis 2
- MATH 325 (3) Honours Ordinary Differential Equations
- MATH 354 (3) Honours Analysis 3
- MATH 355 (3) Honours Analysis 4
- MATH 356 (3) Honours Probability
- MATH 357 (3) Honours Statistics
- MATH 366 (3) Honours Complex Analysis
- MATH 370 (3) Honours Algebra 3
- MATH 371 (3) Honours Algebra 4
- MATH 375 (3) Honours Partial Differential Equations
- MATH 380 (3) Honours Differential Geometry

* MATH 314 may be substituted for MATH 248 if MATH 222 had to be taken in the Fall.

Complementary Courses (15 credits)

15 credits selected from:

- MATH 350 (3) Graph Theory and Combinatorics
- MATH 352 (1) Problem Seminar
- MATH 376 (3) Honours Nonlinear Dynamics and Chaos
- MATH 377 (3) Honours Number Theory
- MATH 387 (3) Honours Numerical Analysis
- MATH 389 (3) Honours Matrix Numerical Analysis
- MATH 470 (3) Honours Project (highly recommended)
- MATH 480 (3) Honours Independent Study
- MATH 487 (3) Honours Mathematical Programming
- MATH 488 (3) Set Theory

Honours-level courses from related disciplines:

- COMP 250* (3) Introduction to Computer Science
- COMP 252 (3) Algorithms and Data Structures

*COMP 250 may be preceded by COMP 202

no more than 6 credits from the following courses for which no Honours equivalent exists:

- MATH 204 (3) Principles of Statistics 2
- MATH 329 (3) Theory of Interest
- MATH 338 (3) History and Philosophy of Mathematics
- MATH 339 (3) Foundations of Mathematics
- MATH 348 (3) Topics in Geometry
- MATH 407 (3) Dynamic Programming
- MATH 437 (3) Mathematical Methods in Biology
- MATH 447 (3) Stochastic Processes

Other courses with the permission of the Department.

HONOURS IN APPLIED MATHEMATICS (68 credits)

Aside from seeking to develop a sound basis in Applied Mathematics, one of the objectives of the program is to kindle the students' interest in possible areas of application. The extra-mural courses included to ensure that the student has some appreciation of the scope of Applied Mathematics and is familiar with at least one of the diverse areas in which applications can be found.

Required Courses (36 credits)

- COMP 252 (3) Algorithms and Data Structures
- COMP 250* (3) Introduction to Computer Science
- MATH 235 (3) Algebra 1
- MATH 242 (3) Analysis 1
- MATH 248* (3) Honours Advanced Calculus
- MATH 251 (3) Honours Algebra 2
- MATH 255 (3) Honours Analysis 2
- MATH 325 (3) Honours Ordinary Differential Equations
- MATH 354 (3) Honours Analysis 3
- MATH 355 (3) Honours Analysis 4
- MATH 356 (3) Honours Probability
- MATH 357 (3) Honours Statistics
- MATH 366 (3) Honours Complex Analysis
- MATH 370 (3) Honours Algebra 3
- MATH 371 (3) Honours Algebra 4
- MATH 375 (3) Honours Partial Differential Equations
- MATH 380 (3) Honours Differential Geometry

*COMP 250 may be preceded by COMP 202

Complementary Courses (32 credits)

at least 3 credits selected from:

- MATH 350 (3) Graph Theory and Combinatorics
- MATH 352 (1) Problem Seminar
- MATH 376 (3) Honours Nonlinear Dynamics and Chaos
- MATH 377 (3) Honours Number Theory
- MATH 387 (3) Honours Numerical Analysis
- MATH 389 (3) Honours Matrix Numerical Analysis
- MATH 470 (3) Honours Project (highly recommended)
- MATH 480 (3) Honours Independent Study
- MATH 487 (3) Honours Mathematical Programming
- MATH 488 (3) Set Theory

Honours-level courses from related disciplines:

- COMP 250* (3) Introduction to Computer Science
- COMP 252 (3) Algorithms and Data Structures

no more than 6 credits from the following courses for which no Honours equivalent exists:

- MATH 204 (3) Principles of Statistics 2
- MATH 329 (3) Theory of Interest
- MATH 338 (3) History and Philosophy of Mathematics
- MATH 339 (3) Foundations of Mathematics
- MATH 348 (3) Topics in Geometry
- MATH 407 (3) Dynamic Programming
- MATH 437 (3) Mathematical Methods in Biology
- MATH 447 (3) Stochastic Processes

Other courses with the permission of the Department.
MATH 397 (3) Honours Matrix Numerical Analysis
at least 6 credits selected from:
MATH 350 (3) Graph Theory and Combinatorics
MATH 354 (3) Honours Analysis 3
MATH 355 (3) Honours Analysis 4
MATH 370 (3) Honours Algebra 3
MATH 371 (3) Honours Algebra 4
MATH 380 (3) Honours Differential Geometry
at least 9 credits selected from:
MATH 352 (1) Problem Seminar
MATH 376 (3) Honours Nonlinear Dynamics and Chaos
MATH 470 (3) Honours Project
MATH 487 (3) Honours Numerical Analysis
MATH 523 (4) Generalized Linear Models
MATH 525 (4) Sampling Theory and Applications
MATH 533 (4) Honours Regression and Analysis of Variance
MATH 552 (4) Combinatorial Optimization
MATH 555 (4) Fluid Dynamics
MATH 556 (4) Mathematical Statistics 1
MATH 557 (4) Mathematical Statistics 2
MATH 580 (4) Optimization
MATH 581 (4) Analytical Mechanics
MATH 584 (4) Ordinary Differential Equations
MATH 585 (4) Partial Differential Equations
MATH 587 (4) Numerical Analysis 1
MATH 579 (4) Numerical Differential Equations
MATH 580 (4) Applied Partial Differential Equations 1
MATH 581 (4) Applied Partial Differential Equations 2
and the following, for which half credit only may be counted:
MATH 204 (3) Principles of Statistics 2
MATH 407 (3) Dynamic Programming
MATH 447 (3) Stochastic Processes
12 credits of extra-mural courses:
chosen in consultation with the student's adviser from approved courses in other departments. A list of such courses is available from the Department of Mathematics and Statistics. Student initiative is encouraged in suggesting other courses that fulfill the intentions of this section as described above. Such suggestions must receive departmental approval. They must be in a field related to Applied Mathematics such as Atmospheric and Oceanic Science, Biology, Biochemistry, Chemistry, Computer Science, Earth and Planetary Science, Economics, Engineering, Management, Physics, Physiology and Psychology. At least 6 credits must be chosen from a single department other than Computer Science.

HONOURS IN PROBABILITY AND STATISTICS (64 credits)

Required Courses (46 credits)
COMP 250* (3) Introduction to Computer Science
MATH 235 (3) Algebra 1
MATH 242 (3) Analysis 1
MATH 248 (3) Honours Advanced Calculus
MATH 251 (3) Honours Algebra 2
or MATH 247 (3) Honours Applied Linear Algebra
MATH 255 (3) Honours Analysis 2
MATH 354 (3) Honours Analysis 3
MATH 355 (3) Honours Analysis 4
MATH 356 (3) Honours Probability
MATH 357 (3) Honours Statistics
MATH 523 (4) Generalized Linear Models
MATH 533 (4) Honours Regression and Analysis of Variance
MATH 556 (4) Mathematical Statistics 1
MATH 557 (4) Mathematical Statistics 2

Complementary Courses (18 credits)
selected from:
MATH 325 (3) Honours Ordinary Differential Equations
MATH 350 (3) Graph Theory and Combinatorics
MATH 352 (1) Problem Seminar
MATH 366 (3) Honours Complex Analysis
MATH 375 (3) Honours Partial Differential Equations
MATH 380 (3) Honours Differential Geometry
MATH 387 (3) Honours Numerical Analysis
MATH 397 (3) Honours Matrix Numerical Analysis
MATH 470 (3) Honours Project
MATH 490 (3) Mathematics of Finance
MATH 524 (4) Nonparametric Statistics
MATH 525 (4) Sampling Theory and Applications
MATH 550 (4) Combinatorics
MATH 587 (4) Advanced Probability Theory 1
MATH 589 (4) Advanced Probability Theory 2
with at most 3 credits from the following courses having no Honours version:
MATH 204 (3) Principles of Statistics 2
MATH 407 (3) Dynamic Programming
MATH 447 (3) Stochastic Processes

JOINT HONOURS IN MATHEMATICS AND COMPUTER SCIENCE (72 credits)
Students must consult an Honours adviser in both departments.

Required Courses (42 credits)
COMP 206 (3) Introduction to Software Systems
COMP 250* (3) Introduction to Computer Science
COMP 252 (3) Algorithms and Data Structures
COMP 273 (3) Introduction to Computer Systems
COMP 302 (3) Programming Languages and Paradigms
COMP 310 (3) Operating Systems
COMP 330 (3) Theoretical Aspects: Computer Science
COMP 362 (3) Honours Algorithm Design
MATH 235 (3) Algebra 1
MATH 242 (3) Analysis 1
MATH 248 (3) Honours Advanced Calculus
MATH 251 (3) Honours Algebra 2
MATH 255 (3) Honours Analysis 2
MATH 350 (3) Graph Theory and Combinatorics

Complementary Courses (30 credits)
18 credits in Mathematics,
at least 12 credits selected from:
MATH 354 (3) Honours Analysis 3
MATH 355 (3) Honours Analysis 4
MATH 356* (3) Honours Probability
MATH 370 (3) Honours Algebra 3
MATH 371 (3) Honours Algebra 4
MATH 387 (3) Honours Numerical Analysis

The remaining credits selected from honours courses given by the Department of Mathematics and Statistics.

Students with appropriate background in probability may substitute MATH 587 for MATH 356 and must then also register for MATH 355.

12 credits in Computer Science, selected from:
COMP 303 (3) Software Development
COMP 304 (3) Object-Oriented Design
COMP 335 (3) Software Engineering Methods

400-level and 500-level Computer Science courses with the exception of COMP 431.

Chair — Greg J. Matlashewski

Professors
Zafer Ali-Khan; B.Sc.(Bilal), M.Sc.(Karachi), Ph.D.(Tulane)
Malcolm G. Baines; B.Sc., M.Sc., Ph.D.(Queen's)
James W. Coulson; B.Sc.(Carleton), M.Sc.(Calg.), Ph.D.(W. Ont.)
John Hiscott; B.Sc., M.Sc.(W. Ont.), Ph.D.(N.Y.)
Greg Matlashewski; B.Sc.(C'dia), Ph.D.(Ott.)
Robert A. Murgita; B.Sc.(McG.), M.Sc.(McG.), Ph.D.(McG.)
Mark A. Wainberg; B.Sc.(McG.), M.Sc., Ph.D.(Col.)

Associate Professors
Albert Berghuis; M.Sc.(The Netherlands), Ph.D.(Br. Col.)
Dalius J. Briedis; B.Sc.(McG.), M.Sc., Ph.D.(Johns H.)
Martin Olivier; B.Sc.(Carleton), Ph.D.(McG.)
Silvia Vital; Ph.D. (U. Geneve)

Assistant Professors
Benoit Cousineau; B.Sc., M.Sc., Ph.D.(Montr.)
M. Gotte; Ph.D.(Max Planck)
Samatha Gruenheld; Ph.D. (Br. Col.)
Sylvie Fournier; Ph.D.(Montr.)
Hervé Le Moul; Ph.D.(Montr.)
Shan-Lu Liu; Ph.D.(Wash.)
Gregory T. Marcyniuk; B.Sc., Ph.D.(Ill.)
Ciriaco Piccirillo; B.Sc., Ph.D.(McG.)
Donald Sheppard; M.D.(Tor.)

Associate Members
Institute of Parasitology: Gaetan Faubert, Armando Jardim, Paula Ribeiro, Terence Spithill
Division of Experimental Medicine: Clement Couture
Microbiology & Immunology: Lawrence Kleinman

Neuroimmunology: Amit Bar-On
Neurology & Neurosurgery: Jack Antel
Oncology: Anne Gattinol, Antonis E. Koromilas, Andrew Moulard, Armin Pause, Stephane Richard
Surgery: Nicholas V. Christou

Adjunct Professors
Vibhuti Dave; M.Sc., Ph.D.(Bombay)
Albert Descoteaux; B.Sc., M.Sc.(Montr.), Ph.D.(McG.)
Eliai Haddad; B.Sc., M.Sc.(Beirut), Ph.D.(McG.)
Taff Jones; B.Sc., Ph.D.(U. College Lond.)
George Kukolj; B.Sc., Ph.D.(McG.)
Peter Lau; Ph.D.(Ottawa)
Byong Lee; Ph.D.(Penn.)
Andrew Makrigiannis; B.Sc., Ph.D.(Dalhousie)
Allan M. Matte; B.Sc., M.Sc.(Guelph), Ph.D.(Sask.)
Clement Riou; B.Sc., M.Sc.(Laval), Ph.D.(Guelph)
Rafick-P. Sekaly; B.A.(Stanislas), B.Sc., M.Sc.(Montr.)
Ph.D.(Lausanne)

Telephone: (514) 398-8038. Director: E. Skamene

12.13.19 Microbiology and Immunology (MIMM)

Microbiology is the study of microorganisms such as bacteria, viruses, unicellular eukaryotes, and parasites. Microorganisms play an important role in human and animal disease, food production (bread, cheese, wine), decay and spoilage, contamination and purification of water and soil. Microbiologists study these tiny, self-replicating machines to understand the basic principles of life: growth, metabolism, cell division, control of gene expression, response to environmental stimuli. Microbiologists are also concerned with controlling or harnessing microorganisms for the benefit of people, by isolating antibiotics or producing vaccines to protect against disease, and by developing and perfecting microorganisms for industrial uses.

Immunology is the study of the molecular and cellular basis of host resistance and immunity to external agents such as pathogenic microorganisms. Immunologists study the mechanisms by which the body recognizes foreign antigens, generates appropriate antibodies to an enormously diverse spectrum of antigens, and sequesters and kills invading microorganisms. Their discoveries lead to vaccination against disease, transfusions and organ transplants, allergies, cancer, autoimmune diseases and immune-deficiency diseases such as AIDS. Antibodies may soon be used in conjunction with antibiotics or chemical agents as specific “magic bullets” to diagnose disease and attack microbes and cancers.

The disciplines of microbiology and immunology are natural partners in research, and both fields use the modern methods of cell biology, molecular biology and genetics to study basic life processes. The members of the Department of Microbiology and Immunology perform research on microbial physiology and genetics, microbial pathogenesis, molecular virology, cellular and molecular immunology, and parasitology. Students registered in the Department therefore are exposed to these related areas and receive an excellent background in basic biology and chemistry as well as in the more applied areas of biotechnology and medicine.

Many opportunities exist for careers in basic or applied microbiology and immunology, medical microbiology, environmental microbiology, and biotechnology. They include positions in industry (pharmaceutical and biotechnology), hospitals, universities, and government (environment, public health, and energy). A degree in microbiology also provides an excellent basis for entering professional and postgraduate programs in medicine, dentistry, the veterinary sciences, research, and education.

Notes on admission to Microbiology and Immunology programs. Please note that enrolment in Microbiology and Immunology programs is limited to a total of 120 students per year. Students seeking admission to the Faculty, Majors and Honours programs must have completed BIOL 112, CHEM 110, CHEM 120, MATH 112, MATH 139 or MATH 140, MATH 141, PHYS 101 and PHYS 102 or their equivalent with an overall average of at least of B+ (75%).

Students transferring from other programs may be admitted with a B+ average up to the maximum program capacity of 120 students. Applicants not admitted will be placed on a waiting list and will be considered should vacancies occur. Application deadline for U0 or transfer students from other departments and faculties is April 21. Students who want to transfer to Microbiology and Immunology programs should consider applying to MIMM 211, or equivalent, as a complementary course.

An Undergraduate Handbook, containing detailed course descriptions, a listing of faculty research interests, and information on careers in microbiology and immunology, is available from the Student Affairs Office in room 511 of the Lyman Duff Building and on the Web at www.mcgill.ca/microimm.

All students (U1, U2, U3) must attend an advising session. Please check www.mcgill.ca/microimm for dates.

A Science Major Concentration in Biomedical Sciences is available from the faculty of science to students pursuing the B.A. & Sc. degree. This Major Concentration is described in the Bachelor of Arts and Science section of the Calendar; see “Biomedical Sciences”, in section 6.12.4 for details.

McGill University, Undergraduate Programs 2007-2008 361
PROPOSED B.SC. LIBERAL PROGRAM
A proposed B.Sc. Liberal Program is currently under University review and is intended to replace the B.Sc. Faculty programs offered by units. Faculty programs will be retired starting September 2008, and September 2007 will be the last year in which new students are accepted into Faculty programs. Students enrolled in a Faculty program will be able to complete that program.

As part of the proposed B.Sc. Liberal Program, the Department of Microbiology and Immunology will be offering a Core Science Component in Microbiology and Immunology. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit's entry in the online 2007-2008 Calendar, which will be available in the summer.

FACULTY PROGRAM IN MICROBIOLOGY AND IMMUNOLOGY (57 credits)
The Faculty Program is intended to offer a basic education in microbiology and immunology to undergraduate students who wish greater flexibility to choose a substantial number of courses from other departments or faculties within the University.

U1 Required Courses (18 credits)
BIOL 200 (3) Molecular Biology
BIOL 201 (3) Cell Biology and Metabolism
or BIOC 212 (3) Molecular Mechanisms of Cell Function
BIOL 202 (3) Basic Genetics
CHEM 212 (4) Introductory Organic Chemistry 1
MIMM 211 (3) Introductory Microbiology
MIMM 212 (2) Laboratory in Microbiology

U1, U2 or U3 Required Course (3 credits)
BIOL 373 (3) Biometry
or MATH 203 (3) Principles of Statistics 1
or PSYC 204 (3) Introduction to Psychological Statistics

U2 Required Courses (15 credits)
MIMM 314 (3) Immunology
MIMM 323 (3) Microbial Physiology
MIMM 324 (3) Fundamental Virology
MIMM 386D1 (3) Laboratory in Microbiology and Immunology
MIMM 386D2 (3) Laboratory in Microbiology and Immunology

U3 Complementary Courses (6 credits)
6 credits selected from:
MIMM 387 (3) Applied Microbiology and Immunology
MIMM 413 (3) Parasitology
MIMM 414 (3) Advanced Immunology
MIMM 465 (3) Bacterial Pathogenesis
MIMM 466 (3) Viral Pathogenesis
MIMM 509 (3) Inflammatory Processes

U1, U2 or U3 Complementary Courses (15 credits)
15 credits selected from:
ANAT 261 (4) Introduction to Dynamic Histology
ANAT 262 (3) Introductory Molecular and Cell Biology
ANAT 458 (3) Membranes and Cellular Signalling
or BIOC 458 (3) Membranes and Cellular Signalling
PHGY 209 (3) Mammalian Physiology 1

U1 Required Courses (25 credits)
as for the Faculty Program, plus:
CHEM 222 (4) Introductory Organic Chemistry 2
CHEM 203 (3) Survey of Physical Chemistry
or CHEM 204 (3) Physical Chemistry/Biological Sciences 1

U1, U2 or U3 Required Statistics Courses (3 credits)
as for the Faculty Program

U2 Required Courses (21 credits)
as for the Faculty program, plus
BIOC 311 (3) Metabolic Biochemistry
BIOC 312 (3) Biochemistry of Macromolecules

U3 Required Courses (9 credits)
MIMM 413 (3) Parasitology
MIMM 465 (3) Bacterial Pathogenesis
MIMM 466 (3) Viral Pathogenesis

Complementary Courses (9 credits)
9 credits selected from:
ANAT 261 (4) Introduction to Dynamic Histology
ANAT 262 (3) Introductory Molecular and Cell Biology
ANAT 458 (3) Membranes and Cellular Signalling
or BIOC 458 (3) Membranes and Cellular Signalling
PHGY 209 (3) Mammalian Physiology 1

HONOURS IN MICROBIOLOGY AND IMMUNOLOGY (73 required credits)
The Honours Program is designed to offer, in addition to the substantial background given by the Major Program, a significant research experience in a laboratory within the Department during the U3 year. Students are prepared for this independent research project by following an advanced laboratory course in U2. This Program is intended to prepare students for graduate study in microbiology and immunology or related fields, but could also be chosen by students intending to enter medical research after med-
ical school, or intending to enter the job market in a laboratory research environment. Students intending to apply to Honours must follow the Major program in U1 and U2 and must obtain a CGPA of at least 3.50 at the end of their U2 year. For graduation in Honours, students must pass all required courses with a C or better, and achieve a sessional GPA of at least 3.30 in the U3 year.

**U1 Required Courses** (25 credits)
as for the Major Program

**U1, U2 or U3 Required Statistics Courses** (3 credits)
as for the Faculty Program

**U2 Required Courses** (21 credits)
as for the Major program

**U3 Required Courses** (21 credits)
as for the Major Program, plus:

- MIMM 502D1 (6) Honours Research Project
- MIMM 502D2 (6) Honours Research Project

**Complementary Courses** (3 credits)
3 credits selected from:
- BIOL 520 (3) Gene Activity in Development
- BIOT 505 (3) Selected Topics in Biotechnology
- ANAT 458 (3) Membranes and Cellular Signaling
- or BIOC 458 (3) Membranes and Cellular Signaling
- BIOC 404 (3) Biophysical Chemistry
- BIOC 450 (3) Protein Structure and Function
- BIOC 454 (3) Nucleic Acids
- BIOC 455 (3) Neurochemistry
- MIMM 414 (3) Advanced Immunology
- MIMM 509 (3) Inflammatory Processes
- PHAR 562 (3) General Pharmacology 1
- PHAR 563 (3) General Pharmacology 2

**INTERDEPARTMENTAL HONOURS IN IMMUNOLOGY.** under "Immunology Interdepartmental Honours", in section 12.13.15. This program is offered by the Departments of Biochemistry, Microbiology and Immunology, and Physiology. Students interested in immunology may choose between this Honours program and the Honours program of the Department of Microbiology and Immunology. Details of this program may also be obtained from Professor Baines in the Department of Microbiology and Immunology, Room 404, telephone (514) 398-4443 or 3928, e-mail malcolm.baines@mcgill.ca.

**12.13.20 Music**

Strathcona Music Building
555 Sherbrooke Street West
Montreal, QC H3A 1E3

Telephone: (514) 398-4535
Fax: (514) 398-8061
Website: [www.mcgill.ca/music](http://www.mcgill.ca/music)

*Department of Theory — TBA (Chair)*

*Department of Performance — TBA (Chair)*

*Adviser (B.A./B.Sc. Music programs) — B. Minorgan*

(514) 398-4535, ext. 6333

**SCIENCE MINOR IN MUSIC TECHNOLOGY** (24 credits)
[Program registration done by Student Affairs Office]

Enrolment in the Minor in Music Technology program is highly restricted. Application forms will be available from the Department of Theory office of the Schulich School of Music (Room E235, Strathcona Music Building, 555 Sherbrooke Street West) from February 1, 2007 and must be completed and returned to that office by May 15, 2007. No late applications will be accepted and no students will be admitted to the Minor in January.

Students will be selected on the basis of their previous background or experience in music technology and/or sound recording, their computer programming skills, their expressed interest in the program, and their Cumulative Grade Point Average. Successful applicants will be notified June 1, 2007.

**Required Courses** (24 credits)

- MUHL 342 (3) History of Electroacoustic Music
- MUMT 202 (3) Fundamentals of New Media
- MUMT 203 (3) Introduction to Digital Audio
- MUMT 301 (3) Music and the Internet
- MUMT 302 (3) New Media Production 1
- MUMT 303 (3) New Media Production 2
- PHYS 224 (3) Physics and Psychophysics of Music
- PHYS 225 (3) Musical Acoustics

Music science students are eligible to take the Arts Minor Concentration in Music, see section 5.12.38 "Music (MUAR)".

**12.13.21 Neurology and Neurosurgery (NEUR)**

There are no B.Sc. programs in Neurology and Neurosurgery, but the NEUR course listed in the Courses section of this Calendar, which is part of the Minor in Neuroscience, is considered as a course taught by the Faculty of Science.

**12.13.22 Neuroscience**

Program Coordinator:
Professor Ellis Cooper, Department of Physiology
McIntyre Medical Sciences Building, Room 1127
E-mail: ellis.cooper@mcgill.ca
Telephone: (514) 398-4334

Neuroscience is a multidisciplinary science devoted to the understanding of the nervous system. The brain is one of the most complex systems in the universe, and understanding how it functions is among the most challenging questions in science. Scientists are investigating the brain at many levels, from the molecules at synapses to complex forms of behaviour, and use methods of inquiry that are drawn from a number of disciplines including molecular and cellular biology, physiology, behavioural and cognitive psychology; computer science and artificial intelligence. In addition, scientists are investigating the nervous system of many different animals, from simple invertebrates to humans. These wide-ranging investigations are providing a clearer understanding of how neurons work; how they communicate with one another; how they are organized into local or distributed networks; how the connections between neurons are established and change with experience, how neuronal function is influenced by pharmacological agents, and during disease states. As a result, we are gaining deeper insights into the neural basis of mental activity, as well as developing new therapeutic approaches to alleviate neurological and psychological diseases.

**MAJOR IN NEUROSCIENCE** (66 credits)

(Awaiting approval of the Ministère de l'Éducation, du Loisir, et du Sport)

Please consult [www.mcgill.ca/courses](http://www.mcgill.ca/courses) for the most up-to-date changes to this program.

The interdepartmental Biology, Physiology and Psychology Major program in Neuroscience is a focused program for students interested in how the nervous system functions. Research in neuroscience is highly interdisciplinary in nature, and borrows principles from a number of subjects including: biology, biochemistry, physiology, psychology, as well as mathematics, physics and computer science. To ensure that students have the appropriate foundation, they are required to take 27 credits in lower-level courses from physiology, biology, mathematics, computer science, psychology,
and philosophy. While flexible, the program offers students a concentrated selection of 15 credits to be taken from one of three areas of current scientific activities in the neurosciences: Cell/Molecular, Neurophysiology/Computation, or Cognition/Behaviour. In addition, students select 24 credits from a wide array of upper-level complementary courses to obtain more specialized training in areas of neuroscience that best suit their interest.

All course selections for the Major in Neuroscience must be approved by an adviser. Contact the Student Affairs Officer, Department of Physiology. Students should consult the Calendar for restrictions for the following four courses: ANAT 321, BIOL 306, PHGY 314, PSYC 308.

Core Required Courses (9 credits)
BIOL 200 (3) Molecular Biology
PHGY 209 (3) Mammalian Physiology 1
PSYC 311 (3) Human Cognition and the Brain

Core Complementary Courses (18 credits)
3 credits from:
PSYC 211 (3) Introductory Behavioural Neuroscience
PSYC 212 (3) Perception
PSYC 213 (3) Cognition
3 credits from:
BIOL 373 (3) Biometry
PSYC 305 (3) Statistics for Experimental Design
3 credits from:
COMP 202 (3) Introduction to Computing 1
or equivalent in Computer Science
3 credits from:
MATH 222* (3) Calculus 3
BIOL 309 (3) Mathematical Models in Biology
3 credits from:
PHGY 311 (3) Intermediate Physiology 1
BIOL 306 (3) Neurobiology and Behaviour
3 credits from:
PHIL 306 (3) Philosophy of Mind
PHIL 341 (3) Philosophy of Science 1
or equivalent

Complementary Courses (39 credits)
15 credits from Stream A, Stream B, or Stream C.

A. Cell and Molecular Stream (15 credits)
BIOL 201 (3) Cell Biology and Metabolism
or BIOL 212 (3) Molecular Mechanisms of Cell Function.
BIOL 202 (3) Basic Genetics
BIOL 300 (3) Molecular Biology of the Gene
BIOL 311 (3) Metabolic Biochemistry
PHGY 314 (3) Integrative Neuroscience

B. Neurophysiology/Neural Computation Stream (15 credits)
BIOL 201 (3) Cell Biology and Metabolism
or BIOL 212 (3) Molecular Mechanisms of Cell Function
ANAT 321 (3) Circuitry of the Human Brain
MATH 222* (3) Calculus 3
or BIOL 309 (3) Mathematical Models in Biology
COMP 206 (3) Introduction to Software Systems
PHGY 314 (3) Integrative Neuroscience

C. Cognitive/Behavioural Stream (15 credits)
PSYC 308 (3) Behavioural Neuroscience 1
PSYC 318 (3) Behavioural Neuroscience 2
and 9 credits chosen from:
PSYC 317 (3) Genes and Behaviour
PSYC 342 (3) Hormones and Behaviour
PSYC 410 (3) Special Topics in Neuropsychology
PSYC 470 (3) Memory and Brain
LING 390 (3) Neuroscience of Language
24 credits from the list below.
At least 18 credits must be at the 400- or 500-level.

BIOL 301 (4) Cell and Molecular Laboratory
BIOL 389 (3) Laboratory in Neurobiology
COMP 206 (3) Introduction to Software Systems
Or equivalent 300- or 400-level Computer Science course
PHGY 530 (3) Neural Basis of Behaviour
PHGY 531 (3) Neurobiology Learning Memory
PHGY 532 (3) Developmental Neurobiology Seminar
PHGY 588 (3) Molecular/Cellular Neurobiology
BIOC 455 (3) Neurochemistry
BMDE 519 (3) Biomedical Signals and Systems
MATH 315 (3) Ordinary Differential Equations
MATH 323 (3) Probability
MATH 324 (3) Statistics
MATH 437 (3) Mathematical Methods in Biology
or PHYS 413 (3) Physical Basis of Physiology
NEUR 310 (3) Cellular Neurobiology
NEUR 550 (3) Free Radical Biomedicine
PHAR 562 (3) General Pharmacology 1
PHAR 563 (3) General Pharmacology 2
PSYC 451 (3) Advanced Neurophysiology
PHGY 520 (3) Ion Channels
PHGY 556 (3) Topics in Systems Neuroscience
PSYC 410 (3) Special Topics in Neuropsychology
PSYC 427 (3) Sensorimotor Behaviour
PSYC 470 (3) Memory and Brain
PSYC 505 (3) The Psychology of Pain
PSYC 526 (3) Advances in Visual Perception
PSYC 532 (3) Cognitive Science
PSYT 500 (3) Advances: Neurobiology of Mental Disorders

A maximum of 9 credits from:
PHGY 461D1 (4.5) Experimental Physiology
PHGY 461D2 (4.5) Experimental Physiology
PSYC 395 (6) Psychology Research Project 1
PSYC 495 (5) Psychology Research Project 2
PSYC 494D1 (4.5) Psychology Research Project
BIOL 377 (3) Independent Reading Project
BIOL 469D1 (4.5) Independent Research Project 4
BIOL 469D2 (4.5) Independent Research Project 4
BIOL 471 (6) Independent Studies 3
BIOL 477 (3) Independent Studies 4
BIOL 478 (3) Independent Studies 5

* Students who have successfully completed an equivalent to MATH 222 at CEGEP or elsewhere, must substitute another 3-credit course for MATH 222.

MINOR IN NEUROSCIENCE (24 credits)
The Minor is composed of 24 credits, 18 of which must be selected from two of the five topic areas listed below. Twelve credits of the 18 must be at the 400/500 level and from at least two different departments. A maximum of 6 credits can be counted both for the student’s primary program and for the Minor in Neuroscience, where appropriate.

All course selections for the Minor in Neuroscience must be approved by an adviser. Contact the Student Affairs Officer, Department of Physiology. Students should consult the Calendar for restrictions for the following four courses: ANAT 321, BIOL 306, PHGY 314, PSYC 308.

Complementary Courses (24 credits)
6 credits selected from:
ANAT 321 (3) Circuitry of the Human Brain
NEUR 310 (3) Cellular Neurobiology
PSYC 308 (3) Behavioural Neuroscience 1
or BIOL 306 (3) Neurobiology and Behaviour
or PHGY 311 (3) Intermediate Physiology 1

364
2007-2008 Undergraduate Programs, McGill University
18 additional credits:
9 credits each from 2 of the 5 areas listed below, 6 credits in each area must be from 400- or 500-level courses.

**Neurobiology and Behaviour**
- BIOL 306 (3) Neurobiology and Behaviour
- BIOL 389 (3) Laboratory in Neurobiology
- BIOL 530 (3) Neural Basis of Behaviour
- BIOL 531 (3) Neurobiology Learning Memory
- PHGY 311 (3) Intermediate Physiology 1
- PHGY 556 (3) Topics in Systems Neuroscience
- PSYC 318 (3) Behavioural Neuroscience 2
- PSYC 427 (3) Sensormotor Behaviour
- PSYC 505 (3) The Psychology of Pain
- PSYC 522 (3) Neurochemistry and Behaviour
- PSYT 500 (3) Advances: Neurobiology of Mental Disorders

**Molecular and Developmental Neurobiology**
- ANAT 321 (3) Circuitry of the Human Brain
- BIOC 455 (3) Neurochemistry
- BIOL 531 (3) Neurobiology Learning Memory
- BIOL 588 (3) Molecular/Cellular Neurobiology
- NEUR 310 (3) Cellular Neurobiology
- PHGY 311 (3) Intermediate Physiology 1
- PHGY 451 (3) Advanced Neurophysiology

**Neurophysiology**
- ANAT 322 (3) Neuroendocrinology
- BIOL 389 (3) Laboratory in Neurobiology
- BIOL 531 (3) Neurobiology Learning Memory
- BIOL 588 (3) Molecular/Cellular Neurobiology
- PHGY 311 (3) Intermediate Physiology 1
- PHGY 451 (3) Advanced Neurophysiology
- PHGY 520 (3) Ion Channels
- PHGY 556 (3) Topics in Systems Neuroscience
- PSYC 427 (3) Sensormotor Behaviour

**Neuropsychology**
- ANAT 321 (3) Circuitry of the Human Brain
- ANAT 322 (3) Neuroendocrinology
- BIOL 306 (3) Neurobiology and Behaviour
- PSYC 311 (3) Human Cognition and the Brain
- PSYC 318 (3) Behavioural Neuroscience 2
- PSYC 410 (3) Special Topics in Neuropsychology
- PSYC 470 (3) Memory and Brain
- PSYC 505 (3) The Psychology of Pain
- PSYC 522 (3) Neurochemistry and Behaviour
- PSYC 526 (3) Advances in Visual Perception

**Neuropharmacology**
- ANAT 321 (3) Circuitry of the Human Brain
- BIOC 455 (3) Neurochemistry
- BIOL 588 (3) Molecular/Cellular Neurobiology
- PHAR 300 (3) Drug Action
- PHAR 301 (3) Drug and Disease
- PHAR 562 (3) General Pharmacology 1
- PHGY 311 (3) Intermediate Physiology 1
- PHGY 451 (3) Advanced Neurophysiology
- PHGY 520 (3) Ion Channels
- PSYT 301 (3) Issues in Drug Dependence
- PSYT 500 (3) Advances: Neurobiology of Mental Disorders

**12.13.25 Pharmacology and Therapeutics (PHAR)**

Chair — Hans H. Zingg

Emeritus Professor

Joseph Mancini; M.Sc., Ph.D.(McG.)

Lorella Garofalo; Ph.D.(McG.)

Yves De Koninck; Ph.D.(McG.)

Sylvain Chemtob; M.D.(Montr.), Ph.D.(McG.)

Bruce Allen; Ph.D.(Br. Col.)

Adjunct Professors

Xiang-Jiao Yang; Ph.D.(Shanghai

Roger Prichard; B.Sc., Ph.D.(N.S.W.)

Stephane Laporte; Ph.D.(Sher.)

Sarah Kimmins; Ph.D.(Dal.)

Ante L. Padjen; M.D., M.Sc., D.Sc.(Zagreb)

H. Uri Saragovi; Ph.D.(Miami)

Betty I. Sasyniuk; B.S.P., Ph.D.(Manit.)

Edith A. Zorychta; B.Sc.(St. FX), M.Sc., Ph.D.(McG.)

Assistant Professors

Derek Bowie; B.Sc., Ph.D.(Lond.)

Greg Miller; Ph.D.(W. Ont.)

Associate Members

Moulay Alouai-Jamali; Ph.D.(Sorbonne)

Gerald Batist; M.D.,C.M.,(McG.)

Giovanni Di Battista; B.Sc., Ph.D.(Montr.)

Lesley Fellows; M.D,(McG.), Ph.D.(Oxf.)

Pierre Fiset; M.D.(Laval), F.R.C.P.S.(C).

Serge Gauthier; M.D.(Montr.)

Bertrand Jean-Claude; M.Sc.(Moncton), Ph.D.(McG.)

Sarah Kimmins; Ph.D.(Dal.)

Stephanie Laporte; Ph.D.(Sher.)

Roger Prichard; B.Sc., Ph.D.(N.S.W.)

Remi Quirion; M.Sc., Ph.D.(Sher.)

Xiang-Jiao Yang; Ph.D.(Shanghai

Adjunct Professors

Bruce Allen; Ph.D.(Br. Col.)

Sylvain Chemtob; M.D.(Montr.), Ph.D.(McG.)

Yves De Koninck; Ph.D.(McG.)

Lorella Garofalo; Ph.D.(McG.)

Jennifer M.A. Laird; Ph.D.(Brit.)

Joseph Mancini; M.Sc., Ph.D.(McG.)

Pharmacology is the science that deals with all aspects of drugs and their interactions with living organisms. Thus, it involves the physical and chemical properties of drugs, their biochemical and physiological effects, mechanisms of action, pharmacokinetics, and therapeutic and other uses. Since the word “drug” encompasses all chemical substances that produce an effect on living cells, it is evident that pharmacology is a very extensive subject. Pharmacology is a multidisciplinary science. It has developed its own set of principles and methods to study the mode of the action.

---

**12.13.23 Nutrition (NUTR)**

The School of Dietetics and Human Nutrition offers a Minor in Human Nutrition which can be taken by Science students, see section 13.6.4 “School of Dietetics and Human Nutrition”.

NUTR 307 is considered as a course taught by the Faculty of Science and is offered simultaneously on both campuses.

**12.13.24 Pathology (PATH)**

There are no B.Sc. programs in Pathology, but the PATH course listed in the Courses section of this Calendar is considered as one taught by the Faculty of Science.
of drugs, but it has also utilized many techniques and approaches from various disciplines including biochemistry, physiology, anatomy and molecular biology, as well as others. Pharmacology encompasses a number of different areas such as pharmacogenomics, molecular biology, bioinformatics, neuropharmacology, reproductive pharmacology, endocrine pharmacology, receptor pharmacology, cardiovascular pharmacology, toxicology, developmental pharmacology, autonomic pharmacology, biochemical pharmacology, and the, pharmacology.

Training in pharmacology is conducted at both the undergraduate and graduate levels. Because of its breadth, students may be attracted to the subject from a variety of viewpoints; this includes those completing a Bachelor’s degree in any number of basic science disciplines, such as biology, zoology, chemistry, physics, biochemistry, microbiology, anatomy and physiology. At the undergraduate level, seven lecture courses are offered. A course involving research projects in pharmacology is also available to provide the student with the opportunity to get first-hand experience in a pharmacology research laboratory. These courses provide students with knowledge concerning the actions of drugs on living systems and insight into approaches to basic pharmacological research.

A Science Major Concentration in Biomedical Sciences is available to students pursuing the B.A. & Sc. degree. This Major Concentration is described in the Bachelor of Arts and Science section of the Calendar; see "Biomedical Sciences", in section 6.12.4 for details.

MINOR IN PHARMACOLOGY (24 credits)

The Minor in Pharmacology is intended for students registered in a complementary B.Sc program who are interested in a focused introduction to specialized topics in pharmacology to prepare them for professional schools, graduate education, or entry into jobs in industry or research institutes. Students should declare their intent to enter the Minor in Pharmacology at the beginning of their U2 year. They must consult with, and obtain the approval of, the Coordinator for the Minor Program in the Department of Pharmacology and Therapeutics. (Please contact the coordinator: Dr. Terry Hébert; terence.hebert@mcgill.ca; 514-398-1398)

All courses in the Minor Program must be passed with a minimum grade C or better. Generally, no more than 6 credits of overlap are permitted between the Minor and the primary program.

366  2007-2008 Undergraduate Programs, McGill University
Physics is in many ways the parent of the other natural sciences and its discoveries and laws continually affect their development. Its range and scope extend in space and time from subnuclear particles to the universe itself. The subfields of physics such as mechanics, thermodynamics, electricity, atomic physics and quantum mechanics, to mention but a few, permeate all other scientific disciplines. People trained in physics are employed in industry, government, and educational systems where they find many challenges as teachers, researchers, administrators and in the rapidly developing area of scientific business.

The two main undergraduate programs in Physics at McGill are the Honours and the Major. The Honours program is highly specialized and the courses are very demanding. This program is appropriate for students who wish to make an in-depth study of the subject in preparation for graduate work and an academic or professional career in physics. The two joint honours, one in Mathematics and Physics, and the other in Physics and Chemistry, are even more specialized and demanding. They are intended for students who wish to develop a strong basis in both physics and the other discipline and are intended as preparation for graduate work and a professional or academic career. Although these two programs have a bias for theoretical work, they are broad enough and strong enough to prepare students for further study in either experimental physics or respectively mathematics or chemistry. High standing in CEGEP or Freshman-year mathematics and physics is a requirement for admission to these Honours programs.

The Major program, on the other hand, offers a broad training in classical and modern physics and yet leaves room for the student to take a meaningful sequence of courses in other areas. It is intended primarily for students who wish to pursue careers in fields for which physics provides a basis. However, this program also provides a preparation for graduate studies, especially if a student chooses, in consultation with the departmental adviser, a number of Honours Physics courses in the U2 and U3 years.

It is possible for students to transfer from the Major program to the Honours program after the first year of studies; see comments to this effect below after the description of the Honours program. There are also a number of other Major programs: Atmospheric Sciences and Physics, Physics and Computer Science, Physics and Geophysics, and Physiology and Physics, offered jointly with other departments, and a Minor program in Electrical Engineering, available only to students in the Physics Major program. In addition, there is a Minor in Physics, a Faculty program in Physics and a Joint Faculty program in Mathematics, Chemistry and Physics, which provide a broad base for students less interested in a specialized education.

For those interested in a career as a high school science teacher, the concurrent program leading to both a B.Sc. and a B.Ed. degree provides several physics options. These combine physics courses from the Major and Minor programs with courses from either Biology or Chemistry and with Education courses. (For details, see "Science for Teachers", in section 12.13.31.)

Students from outside of the Province of Quebec will ordinarily register in the Science Freshman program. Physics offers two sequences of courses for this program: they are described below. The list of pre- and corequisites is not absolute. In many cases permission of the Department may be sought to have a specific prerequisite waived. The procedure is to ask the professor in charge of the course to review the request for such a waiver. The prerequisites of the 100-level courses are described in the following section entitled Science Freshman Program.

Students interested in any of the Physics programs should contact the Department for an Adviser.

A Science Major Concentration in Physics is available to students pursuing the B.A. & Sc. degree. This Major Concentration is described in the Bachelor of Arts and Science section of the Calendar; see "Physics (PHYS)", in section 12.13.26 for details.

Internship Year for Engineering and Science (IYES)

IYES is a pre-graduate work experience program available to eligible students and normally taken between their U2 and U3 years. For more information, see "IYES: Internship Year for Engineering and Science and IP: Industrial Practicum", in section 8.2.8, under Faculty of Engineering.

The following programs are also available with an internship component:

- Faculty Program in Physics
  - Major in Physics
  - Honours in Physics
  - Joint Honours Program in Physics and Chemistry
  - Joint Honours Program in Physics and Mathematics
  - Joint Faculty Program in Mathematics, Chemistry and Physics
  - Joint Major Program in Atmospheric Science and Physics
  - Joint Major Program in Physics and Computer Science
  - Joint Major Program in Physics and Geophysics

SCIENCE FRESHMAN PROGRAM

Students entering McGill with a Quebec CEGEP profile in Science will normally begin their programs in Physics with courses at the 200 level.

Students without this profile will normally take courses PHYS 131 and PHYS 142 if they have previously taken physics at the high school level and will be taking differential calculus concurrently with PHYS 131 and integral calculus concurrently with PHYS 142. Those students who have not previously taken physics at the high school level and who intend to do programs in the Biological Sciences may take courses PHYS 101 and PHYS 102. All students are expected to have reasonable fluency in algebra, geometry and trigonometry at the high school level. If this is not the case, then MATH 112 should be taken concurrently with PHYS 101. Those for whom this is not necessary are advised to take MATH 139 concurrently with PHYS 101.

MINOR IN PHYSICS (18 credits)

The 18-credit Minor permits no overlap with any other programs. It contains no Mathematics courses, although many of the courses in it have Math pre- or corequisites. It will, therefore, be particularly appropriate to students in Mathematics, but it is also available to any Science student with the appropriate mathematical background.

Students in certain programs (e.g., the Major in Chemistry) will find that there are courses in the Minor that are already part of their program, or that they may not take for credit because of a substantial overlap of material with a course or courses in their program. After consultation with an adviser, such students may complete the Minor by substituting any other physics course(s) from the Major or Honours Physics programs.

Required Course (3 credits)

PHYS 257  (3)  Experimental Methods 1

Complementary Courses (15 credits)

15 credits to be selected as follows:

PHYS 230  (3)  Dynamics of Simple Systems

PHYS 231  (3)  Classical Mechanics

PHYS 235  (3)  Electricity and Magnetism

PHYS 242  (3)  Quantum Mechanics I

PHYS 250  (3)  Modern Physics

PHYS 257  (3)  Experimental Methods 2
or PHYS 251 (3) Classical Mechanics 1
PHYS 232 (3) Heat and Waves
or PHYS 253 (3) Thermal Physics
or PHYS 254 (3) Experimental Methods 2
or PHYS 241 (3) Signal Processing
PHYS 271 (3) Quantum Physics
or PHYS 260 (3) Modern Physics and Relativity
or PHYS 214 (3) Introductory Astrophysics
or PHYS 225 (3) Musical Acoustics
PHYS 340 (3) Electricity and Magnetism
or PHYS 350 (3) Electromagnetism

PROPOSED B.SC. LIBERAL PROGRAM
A proposed B.Sc. Liberal Program is currently under University review and is intended to replace the B.Sc. Faculty programs offered by units. Faculty programs will be retired starting September 2008, and September 2007 will be the last year in which new students are accepted into Faculty programs. Students enrolled in a Faculty program will be able to complete that program.

As part of the proposed B.Sc. Liberal Program, the Department of Physics will be offering a Core Science Component in Physics. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit's entry in the online 2007-2008 Calendar, which will be available in the summer.

FACULTY PROGRAM IN PHYSICS (54 credits)
Required Courses (36 credits)
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 314 (3) Advanced Calculus
MATH 315 (3) Ordinary Differential Equations
PHYS 230 (3) Dynamics of Simple Systems
PHYS 232 (3) Heat and Waves
PHYS 257 (3) Experimental Methods 1
PHYS 258 (3) Experimental Methods 2
PHYS 333 (3) Thermal and Statistical Physics
PHYS 340 (3) Electricity and Magnetism
PHYS 436 (3) Modern Physics
PHYS 446 (3) Quantum Physics

Complementary Courses (18 credits)

at least 3 credits selected from:
PHYS 241 (3) Signal Processing
PHYS 434 (3) Optics
PHYS 439 (3) Laboratory in Modern Physics
the remainder selected from:
COMP 202 (3) Introduction to Computing 1
EPSC 320 (3) Elementary Earth Physics
MATH 316 (3) Complex Variables
MATH 317 (3) Numerical Analysis
MATH 319 (3) Partial Differential Equations
PHYS 328 (3) Electronics
PHYS 331 (3) Topics in Classical Mechanics
PHYS 339 (3) Measurements Laboratory in General Physics
PHYS 342 (3) Electromagnetic Waves

FACULTY PROGRAM IN MATHEMATICS, CHEMISTRY AND PHYSICS, see under "Mathematics and Statistics (MATH)", in section 12.13.18.

MAJOR IN PHYSICS (60 credits)

U1 Required Courses (21 credits)
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
PHYS 230 (3) Dynamics of Simple Systems
PHYS 232 (3) Heat and Waves
PHYS 241 (3) Signal Processing
PHYS 257 (3) Experimental Methods 1

PHYS 258 (3) Experimental Methods 2

U2 Required courses (24 credits)
MATH 314 (3) Advanced Calculus
MATH 315 (3) Ordinary Differential Equations
PHYS 328 (3) Electronics
PHYS 331 (3) Topics in Classical Mechanics
PHYS 333 (3) Thermal and Statistical Physics
PHYS 339 (3) Measurements Laboratory in General Physics

U3 Required Courses (15 credits)
PHYS 434 (3) Optics
PHYS 436 (3) Modern Physics
PHYS 439 (3) Laboratory in Modern Physics
PHYS 446 (3) Quantum Physics
PHYS 449 (3) Majors Research Project

It is possible for students to transfer from the Major to the Honours program after the U1 year; see the conditions and courses described after the description of the Honours program.

JOINT MAJOR IN PHYSICS AND GEOPHYSICS (69 credits)
The Joint Major program in Physics and Geophysics provides a firm basis for graduate work in geophysics and related fields as well as a sound preparation for those who wish to embark on a career directly after the B.Sc.

U1 Required Courses (30 credits)
EPSC 203 (3) Structural Geology 1
EPSC 210 (3) Introductory Mineralogy
EPSC 231 (3) Field School 1
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 314 (3) Advanced Calculus
PHYS 230 (3) Dynamics of Simple Systems
PHYS 232 (3) Heat and Waves
PHYS 257 (3) Experimental Methods 1
PHYS 258 (3) Experimental Methods 2

U2 Required Courses (18 credits)
EPSC 320 (3) Elementary Earth Physics
EPSC 350 (3) Tectonics
MATH 315 (3) Ordinary Differential Equations
MATH 319 (3) Partial Differential Equations
PHYS 339 (3) Measurements Laboratory in General Physics
PHYS 340 (3) Electricity and Magnetism

U2 or U3 Required Courses (6 credits)
EPSC 330 (3) Earthquakes and Earth Structure
EPSC 510 (3) Geodynamics and Geomagnetism

U3 Required Courses (15 credits)
PHYS 331 (3) Topics in Classical Mechanics
PHYS 332 (3) Physics of Fluids
PHYS 333 (3) Thermal and Statistical Physics
PHYS 342 (3) Electromagnetic Waves
PHYS 446 (3) Quantum Physics

JOINT MAJOR IN ATMOSPHERIC SCIENCE AND PHYSICS
under "Atmospheric and Oceanic Sciences (ATOC)", in section 12.13.3. This program provides a firm basis for graduate work in atmospheric science and related fields as well as a sound preparation for those who wish to embark on a career directly after the B.Sc. Students should consult undergraduate advisers in both departments.

JOINT MAJOR IN PHYSICS AND COMPUTER SCIENCE
(66 credits)
The Joint Major in Physics and Computer Science is designed to give motivated students the opportunity to combine the two fields in a way that will distinguish them from the graduates of either field by itself. The two disciplines complement each other, with physics...
providing an analytic problem-solving outlook and basic understanding of nature, while computer science enhances the ability to make practical and marketable applications, in addition to having its own theoretical interest. Graduates of this program may be able to present themselves as being more immediately useful than a pure physics major, but with more breadth than just a programmer. They will be able to demonstrate their combined expertise in the Special Project course which is the centrepiece of the final year of the program.

U1 Required Courses (21 credits)
COMP 250 (3) Introduction to Computer Science
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 240 (3) Discrete Structures 1
PHYS 230 (3) Dynamics of Simple Systems
PHYS 257 (3) Experimental Methods 1
PHYS 258 (3) Experimental Methods 2

U2 Required Courses (24 credits)
COMP 206 (3) Introduction to Software Systems
COMP 251 (3) Data Structures and Algorithms
COMP 302 (3) Programming Languages and Paradigms
COMP 350 (3) Numerical Computing
MATH 314 (3) Advanced Calculus
MATH 315 (3) Ordinary Differential Equations
PHYS 232 (3) Heat and Waves
PHYS 241 (3) Signal Processing

U3 Required Courses (21 credits)
COMP 360 (3) Algorithm Design Techniques
MATH 323 (3) Probability
PHYS 331 (3) Topics in Classical Mechanics
PHYS 339 (3) Measurements Laboratory in General Physics
PHYS 340 (3) Electricity and Magnetism
PHYS 446 (3) Quantum Physics
PHYS 489 (3) Special Project

JOINT MAJOR IN PHYSIOLOGY AND PHYSICS under "Physiology (PHGY), in section 12.13.27. This program provides a firm basis for graduate work in bio-physics and other interdisciplinary fields involving the physical and biological sciences.

HONOURS IN PHYSICS (78 credits)

Students entering this program for the first time should have high standing in mathematics and physics. In addition, a student who has not completed the equivalent of MATH 222 must take it in the first term without receiving credits toward the 78 credits required in the Honours program.

A student whose average in the required and complementary courses in any year falls below a GPA of 3.00, or whose grade in any individual required or complementary course falls below a C (in both the final examination and supplemental examination if taken), may not register in the Honours program the following year, or graduate with the Honours degree, except with the permission of the Department.

U1 Required Courses (27 credits)
MATH 247 (3) Honours Applied Linear Algebra
MATH 248 (3) Honours Advanced Calculus
MATH 249 (3) Honours Complex Variables
MATH 325 (3) Honours Ordinary Differential Equations
PHYS 241 (3) Signal Processing
PHYS 251 (3) Classical Mechanics 1
PHYS 257 (3) Experimental Methods 1
PHYS 258 (3) Experimental Methods 2
PHYS 260 (3) Modern Physics and Relativity

U2 Required Courses (24 credits)
MATH 375 (3) Honours Partial Differential Equations
PHYS 253 (3) Thermal Physics
PHYS 350 (3) Electromagnetism
PHYS 357 (3) Quantum Physics 1
PHYS 359 (3) Laboratory in Modern Physics

PHYS 362 (3) Statistical Mechanics
PHYS 451 (3) Classical Mechanics
PHYS 457 (3) Quantum Physics 2

U3 Required Courses (6 credits)
PHYS 551 (3) Quantum Theory
PHYS 552 (3) Electromagnetic Waves

U3 Complementary Courses (21 credits)
6 credits selected from:
PHYS 459D1 (3) Honours Research Thesis
PHYS 459D2 (3) Honours Research Thesis
PHYS 469 (3) Laboratory in Modern Physics 2
PHYS 479 (3) Honours Research Project
15 credits selected from:
PHYS 332 (3) Physics of Fluids
PHYS 434 (3) Optics
PHYS 479 (3) Honours Research Project
PHYS 514 (3) General Relativity
PHYS 521 (3) Astrophysics
PHYS 557 (3) Nuclear Physics
PHYS 558 (3) Solid State Physics
PHYS 559 (3) Advanced Statistical Mechanics
PHYS 562 (3) Electromagnetic Theory
PHYS 567 (3) Particle Physics
PHYS 580 (3) Introduction to String Theory
or other 3-credit course approved by the Department of Physics.

Physics Major students may enter the Honours program after their first year if they have passed all of the following courses with a C or better, and obtained a GPA of 3.5 or better in these courses:
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 314 (3) Advanced Calculus
MATH 315 (3) Ordinary Differential Equations
PHYS 230 (3) Dynamics of Simple Systems
PHYS 232 (3) Heat and Waves
PHYS 241 (3) Signal Processing
PHYS 257 (3) Experimental Methods 1
PHYS 258 (3) Experimental Methods 2

The written permission of an advisor is required for this change of program.

JOINT HONOURS IN MATHEMATICS AND PHYSICS (81 credits)

This is a specialized and demanding program intended for students who wish to develop a strong basis in both Mathematics and Physics in preparation for graduate work and a professional or academic career. Although the program is optimized for theoretical physics, it is broad enough and strong enough to prepare students for further study in either experimental physics or mathematics.

The minimum requirement for entry into the program is completion with high standing of the usual CEGEP courses in physics and in mathematics. In addition, a student who has not completed the equivalent of MATH 222 must take it in the first term without receiving credits toward the 81 credits required in the Joint Honours program.

A student whose average in the required and complementary courses in any year falls below a GPA of 3.00, or whose grade in any individual required or complementary course falls below a C (in both the final examination and supplemental examination if taken), may not register in this Joint Honours program the following year, or graduate with the Joint Honours degree, except with permission of both Departments.

The student will have two advisers, one from Mathematics and the other from Physics.

U1 Required Courses (27 credits)
MATH 235 (3) Algebra 1
MATH 248 (3) Honours Advanced Calculus
MATH 249 (3) Honours Complex Variables
MATH 325 (3) Honours Ordinary Differential Equations
PHYS 241 (3) Signal Processing
PHYS 251 (3) Classical Mechanics 1
PHYS 257 (3) Experimental Methods 1
PHYS 258 (3) Experimental Methods 2
PHYS 260 (3) Modern Physics and Relativity

U1 Complementary Course (3 credits)
3 credits selected from:
MATH 251 (3) Honours Algebra 2
MATH 247 (3) Honours Applied Linear Algebra

U2 Required Courses (27 credits)
MATH 242 (3) Analysis 1
MATH 255 (3) Honours Analysis 2
MATH 375 (3) Honours Partial Differential Equations
PHYS 253 (3) Thermal Physics
PHYS 350 (3) Electromagnetism
PHYS 357 (3) Quantum Physics 1
PHYS 362 (3) Statistical Mechanics
PHYS 451 (3) Classical Mechanics
PHYS 457 (3) Quantum Physics 2

U3 Required Courses (12 credits)
MATH 354 (3) Honours Analysis 3
MATH 380 (3) Honours Differential Geometry
PHYS 352 (3) Electromagnetic Waves
PHYS 359 (3) Laboratory in Modern Physics

U3 Complementary Courses (12 credits)
3 credits selected from:
MATH 355 (3) Honours Analysis 4
MATH 370 (3) Honours Algebra 3
6 credits selected from:
PHYS 479 (3) Honours Research Project
PHYS 514 (3) General Relativity
PHYS 551 (3) Quantum Theory
PHYS 521 (3) Astrophysics
PHYS 557 (3) Nuclear Physics
PHYS 558 (3) Solid State Physics
PHYS 559 (3) Advanced Statistical Mechanics
PHYS 562 (3) Electromagnetic Theory
PHYS 567 (3) Particle Physics
PHYS 580 (3) Introduction to String Theory
3 credits in Honours Mathematics

JOINT HONOURS IN PHYSICS AND CHEMISTRY (80 credits)
This is a specialized and demanding program intended primarily, although not exclusively, for students with a theoretical bias who are interested in working in fields of study at the crossroads of physical chemistry and physics. The program will prepare students for either theoretical or experimental graduate work in departments where there is an emphasis on such cross-disciplinary areas as condensed matter physics, chemical physics, or material science.

A student whose average in the required and complementary courses in any year falls below a GPA of 3.00, or whose grade in any individual required or complementary course falls below a C (in both the final examination and supplemental examination if taken), may not register in this Joint Honours program the following year, or graduate with the Joint Honours degree, except with permission of both Departments.

U1 Required Courses (28 credits)
CHEM 223 (2) Introductory Physical Chemistry 1
CHEM 243 (2) Introductory Physical Chemistry 2
CHEM 253* (1) Introductory Physical Chemistry 1 Laboratory
CHEM 263* (1) Introductory Physical Chemistry 2 Laboratory
MATH 247 (3) Honours Applied Linear Algebra
MATH 248 (3) Honours Advanced Calculus
MATH 249 (3) Honours Complex Variables
MATH 325 (3) Honours Ordinary Differential Equations

U2 Required Courses (26 credits)
CHEM 212 (4) Introductory Organic Chemistry 1
CHEM 281 (3) Inorganic Chemistry 1
CHEM 355 (3) Molecular Properties and Structure 2
CHEM 365 (2) Statistical Thermodynamics
COMP 208 (3) Computers in Engineering
PHYS 350 (3) Electromagnetism
PHYS 357 (3) Quantum Physics 1
PHYS 457 (3) Quantum Physics 2

U3 Required Courses (14 credits)
CHEM 393 (2) Physical Chemistry Laboratory 2
CHEM 455 (3) Introductory Polymer Chemistry
CHEM 556 (3) Advanced Quantum Mechanics
PHYS 352 (3) Electromagnetic Waves
PHYS 558 (3) Solid State Physics

U3 Complementary Courses (12 credits)
(with at least 3 credits in Chemistry and 3 credits in Physics)
3 credits selected from:
CHEM 593 (3) Statistical Mechanics
PHYS 559 (3) Advanced Statistical Mechanics
9 credits selected from:
CHEM 480D1 /D2 (3) Research Project
CHEM 490D1/D2 (3) Research Project
CHEM 531 (3) Chemistry of Inorganic Materials
CHEM 575 (3) Chemical Kinetics
CHEM 585 (3) Colloid Chemistry
MATH 375 (3) Honours Partial Differential Equations
PHYS 434 (3) Optics
PHYS 451 (3) Classical Mechanics
PHYS 469 (3) Laboratory in Modern Physics 2
PHYS 479 (3) Honours Research Project
PHYS 562 (3) Electromagnetic Theory

MINOR IN ELECTRICAL ENGINEERING (23 or 25 credits)
[Program registration done by Student Affairs Office]
The Minor program does not carry professional recognition. Only students who satisfy the requirements of the Major in Physics are eligible for this Minor. Students registered for this option cannot count PHYS 241 towards the requirements of the Major in Physics, and should replace this course by another Physics or Mathematics course. Students who select ECSE 334 in the Minor cannot count PHYS 328 towards the requirements of the Major in Physics, and should replace this course by another Physics or Mathematics course.

Required Courses (17 or 19 credits)
ECSE 200 (3) Fundamentals of Electrical Engineering
ECSE 210 (3) Circuit Analysis
ECSE 291 (2) Electrical Measurements Laboratory
ECSE 303 (3) Signals and Systems 1
ECSE 305 (3) Probability and Random Sig. 1
or ECSE 334(5) Introduction to Microelectronics
ECSE 330 (3) Introduction to Electronics

Complementary Courses (6 credits)
12.13.27 Physiology (PHGY)

McIntyre Medical Sciences Building, Room 1021
3655 Promenade Sir William Osler
Montreal, QC H3G 1Y6
Telephone: (514) 398-4316
Fax: (514) 398-7452
Website: www.medicine.mcgill.ca/physio

Chair — John Orlowski

Emeritus Professors
G. Melvill Jones; B.A., M.A., M.B., B.Ch., M.D.(Cant.), F.R.C.S(Can.), F.R.C.S.(Eng.)
Kresimir Krmjevic; O.C., B.Sc., Ph.D., M.B., Ch.B.(Edin.), F.R.S.C.

Professors
Thomas M.S. Chang; B.Sc., M.D., C.M., Ph.D.(McG.), F.R.C.P.(C)
Monroe W. Cohen; B.Sc., Ph.D.(McG.)
Ellis J. Cooper; B.Eng.(Sir G.Wms.), M.Sc.(Surrey), Ph.D.(McM.)
Leon Glass; B.S.(Brooklyn), Ph.D.(Chic.) (Isadore Rosenfield Professor of Cardiology)
Phil Gold; C.C., B.Sc., M.Sc., Ph.D., M.D., C.M.(McG.), F.R.C.P.(C.), F.R.S.C. (joint appoint. with Medicine)
David Goltzman; B.Sc., M.D., C.M.(McG.) (Antoine G. Massabki Professor of Medicine) (joint appoint. with Medicine)
John Hanrahan; Ph.D.(Br. Col.)
Mortimer Levy; B.Sc., M.D., C.M.(McG.), F.R.C.P.(C)(joint appoint. with Medicine)
Michael Mackey; B.A., Ph.D.(Wash.) (Joseph Morley Drake Professor of Physiology)
Jacapo P. Mortola; M.D.(Milan)
John Orlowski; B.Sc.(McG.), M.Sc., Ph.D.(Qu.) (James McGill Professor)
Premysyl Ponka; M.D., Ph.D.(Prague)
Alvin Shrier; B.Sc.(C'dia), Ph.D.(Dal.) (Hosmer Professor of Physiology)
Douglas G.D. Watt; M.D., Ph.D.(McG.)

Assistant Professors
Erik Cook; Ph.D.(Baylor College, Houston)
Maurice Chacron; Ph.D.(Ott.)
Julie Desbarats; Ph.D.(McG.)
Pejmun Haghighi; Ph.D.(McG.)
Julio Martinez-Trujillo; Ph.D.(Tübingen)
Peter Swain; Ph.D.(Univ. London)

Associate Professors
Kathleen Cullen; B.Sc.(Brown), Ph.D.(Chic.) (William Dawson Scholar)
Riaz Farooki; B.Sc., M.Sc.(MIT), Ph.D.(Tufts)
Mladen Glavinovic; B.Sc.(Zagreb), M.Sc.(Tor.), Ph.D.(McG.)
Michael Guevara; B.Sc., M.Eng., Ph.D.(McG.)
Sheldon Magder; M.D.(Tor.) (joint appoint. with Medicine)
Ursula Stochaj; Ph.D.(Cologne)
Ann Wechsler; B.A.(Tor.), M.Sc., Ph.D.(McG.)
John White; B.Sc., M.Sc.(Car.), Ph.D.(Harv.)

Associate Professor (Part Time)
Nicole Bernard; B.Sc.(McG.), Ph.D.(Duke)

Associate Members
Anaesthesia: Steven Backman, Fernando Cervero
Biomedical Engineering: Robert E. Kearney, Satya Prakash, Tomoko Takano
Nephrology: Serge Lemay
Neurology: David Ragsdale
Neurology & Neurosurgery: Massimo Avoli, Charles Bourque, Sal T. Carsonet, Daniel Guilton
Ophthalmology: Curtis Baker
Otolaryngology: Bernard Segal

Pediatrics: Charles Rohlicek
Pharmacology: Terence Hebert
Psychiatry: Nicolas Cermakian, Bernardo Dubrovsky, Christina Gianoulakis

Adjunct Professors
Roy Caplan, Montreal
Pierre Drapeau, Montreal
John Milton, Chicago
Serge Rossignol, Montreal
Malmur R.I. Sairam, Montreal

Physiology has its roots in many of the basic sciences including biology, chemistry, mathematics, and physics. Physiology overlaps with other biomedical sciences such as anatomy, biochemistry, pathology and pharmacology, and with psychology and biomedical engineering, and is one of the prime contributors of basic scientific knowledge to the clinical medical sciences.

Members of the Department of Physiology at McGill are engaged in studies dealing with molecules, single cells, or entire systems in a variety of vertebrates, including man. A wide range of interest and expertise is represented, including cardiovascular, respiratory, gastrointestinal and renal physiology, the physiology of exercise, neurophysiology, endocrinology, immunology, biophysics and biometrics. Some faculty members have formal or informal links with the departments of mathematics, physics, electrical engineering, and chemistry, and with clinical departments (medicine, surgery, pediatrics, neurology, obstetrics, psychiatry, anesthesiology, reflecting and reinforcing the close ties between physiology and other disciplines.

The programs offered in Physiology differ in their orientation but they all have a common core of material covering cardiovascular, respiratory, gastrointestinal and renal physiology, neurophysiology, endocrinology and immunology. The specified U1 courses are identical for all programs except the Joint Major Programs in Physiology and Physics, Physiology and Mathematics, and the Joint Honours Program in Immunology and thus afford the student maximal flexibility before deciding on a particular program to follow in U2 and U3.

Academic advising is compulsory. All new students to the Department, Freshman and CEGEPs, must see an adviser upon entering the program. Contact the Student Affairs Officer at (514) 398-3689 for more information.

Academic advising is compulsory. All new students to the Department, Freshman and CEGEPs, must see an adviser upon entering the program. Contact the Student Affairs Officer at (514) 398-3689 for more information.

Returning students are required to consult with their advisers during the advising period for returning students, and regularly throughout the year. It is important that graduating students have their record checked by their adviser at the beginning of their final year.

PLEASE NOTE: Complementary courses are not electives.

The difference between Complementary courses and Required courses is that Complementary courses are defined as offering an element of choice, however small that choice may be. Students may choose from the two (or more) courses specified within Complementary Course segments of a program description, but ONLY from those. For further information, refer to section "Course Information, Regulations and Descriptions (Appendix B)".

A Science Major Concentration in Biomedical Sciences is available to students pursuing the B.A. & Sc. degree. This Major Concentration is described in the Bachelor of Arts and Science section of the Calendar; see "Biomedical Sciences", in section 6.12.4 for details.
PROPOSED B.SC. LIBERAL PROGRAM
A proposed B.Sc. Liberal Program is currently under University review and is intended to replace the B.Sc. Faculty programs offered by units. Faculty programs will be retired starting September 2008, and September 2007 will be the last year in which new students are accepted into Faculty programs. Students enrolled in a Faculty program will be able to complete that program.

As part of the proposed B.Sc. Liberal Program, the Department of Physiology will be offering a Core Science Component in Physiology. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit’s entry in the online 2007-2008 Calendar, which will be available in the summer.

FACULTY PROGRAM IN PHYSIOLOGY (55 credits)
If not previously taken CHEM 212 Introductory Organic Chemistry 1 must be completed in addition to the 55 program credits.

Required Courses (34 credits)
BIOL 200 (3) Molecular Biology
BIOL 202 (3) Basic Genetics
BIOL 301 (4) Cell and Molecular Laboratory
CHEM 222 (4) Introductory Organic Chemistry 2
PHGY 209 (3) Mammalian Physiology 1
PHGY 210 (3) Mammalian Physiology 2
PHGY 212 (1) Introductory Physiology Laboratory 1
PHGY 213 (1) Introductory Physiology Laboratory 2
PHGY 311 (3) Intermediate Physiology 1
PHGY 312 (3) Intermediate Physiology 2
PHGY 313 (3) Intermediate Physiology 3
PHGY 314 (3) Integrative Neuroscience

Complementary Courses (21 credits)
6 credits selected from:
BIOL 201 (3) Cell Biology and Metabolism
or BIOC 212 (3) Molecular Mechanisms of Cell Function
BIOL 373 (3) Biometry
or BIOL 309 (3) Mathematical Models in Biology

9 credits selected from upper level physiology courses – see approved list on Department Website.

JOINT MAJOR IN PHYSIOLOGY AND MATHEMATICS (77 credits)

U1 Required Courses (14 credits)
PHGY 212 (1) Introductory Physiology Laboratory 1
PHGY 213 (1) Introductory Physiology Laboratory 2
MATH 222 (3) Calculus 3
MATH 247 (3) Honours Applied Linear Algebra
or MATH 223 (3) Linear Algebra
BIOL 200 (3) Molecular Biology
BIOL 309 (3) Mathematical Models in Biology

U1 Complementary Courses (15 credits)
9 credits selected from:
MATH 248 (3) Honours Advanced Calculus
or MATH 314 (3) Advanced Calculus
MATH 325 (3) Honours Ordinary Differential Equations
or MATH 315 (3) Ordinary Differential Equations

U2 Required Courses (24 credits)
MATH 242 (3) Analysis 1
MATH 243 (3) Analysis 2
MATH 323 (3) Probability
MATH 248 (3) Honours Advanced Calculus
PHGY 209 (3) Mammalian Physiology 1
and PHGY 210 (3) Mammalian Physiology 2
or PHGY 201 (3) Human Physiology: Control Systems
and PHGY 202 (3) Human Physiology: Body Functions
6 credits selected from:

U2 or U3 Required Courses (6 credits)
MATH 437 (3) Mathematical Methods in Biology
PHYS 413 (3) Physical Basis of Physiology

U3 Required Courses (18 credits)

JOINT MAJOR IN PHYSIOLOGY AND PHYSICS (80 credits)
This program provides a firm foundation in physics, mathematics and physiology. It is appropriate for students interested in applying methods of the physical sciences to problems in physiology and allied biological sciences.

U1 Required Courses (17 credits)
MATH 222 (3) Calculus 3
PHGY 212* (1) Introductory Physiology Laboratory 1
PHGY 213* (1) Introductory Physiology Laboratory 2
PHYS 230 (3) Dynamics of Simple Systems
PHYS 232 (3) Heat and Waves
PHYS 257 (3) Experimental Methods 1
PHYS 258 (3) Experimental Methods 2
U1 Complementary Courses (9 credits)

HONOURS IN PHYSIOLOGY (75 credits)

All admissions to the Honours program will be in U2, and the student must have a U1 GPA of 3.30, with no less than a B in PHGY 209 and PHGY 210. Admission to U3 requires a U2 CGPA of 3.20 with no less than a B in U2 Physiology courses. Decisions for admission to U3 will be heavily influenced by student standing in U2 courses.

The Department reserves the right to restrict the number of entering students in the Honours program. Students who do not maintain Honours standing may transfer to the Major Program in Physiology.

The deadline to apply to the Honours Program is June 1. Application forms are available in McIntyre 1021. Students should include in their letters telephone numbers where they can be reached during the last week of August. Students are responsible for picking up their letters of decision in McIntyre 1021 no later than one week before classes start.

Graduation: To graduate from the Honours Physiology Program the student will have a CGPA of 3.20 with no mark less than a B in all Physiology courses.

If not previously taken CHEM 212 Introductory Organic Chemistry 1 must be completed in addition to the 75 program credits.

Required Courses (60 credits)

6 credits selected from upper level physiology courses – see approved list on Department Website.

INTERDEPARTMENTAL HONOURS IN IMMUNOLOGY, under "Immunology Interdepartmental Honours," in section 12.13.15.

This program is offered by the Departments of Biochemistry, Microbiology and Immunology, and Physiology. Physiology students interested in the program should contact Dr. Julie Desbarats, julie.desbarats@mcgill.ca, (514) 398-5126.

12.13.28 Psychiatry (PSYT)

There are no B.Sc. programs in Psychiatry, but the PSYT courses listed in the Courses section of this Calendar are administered by the Faculty of Science and are not considered as courses outside of Arts and Science.

12.13.29 Psychology (PSYC)

Stewart Biological Sciences Building, Room W8/1
1205 Avenue Docteur Penfield
Montreal, QC, H3A 1B1
Telephone: (514) 398-6100
Fax: (514) 398-4896
E-mail: info@psych.mcgill.ca

Kristine Onishi; B.A.(Brown), M.A., Ph.D.(Ill.)
Zeev Rosberger; B.Sc.(McG.), M.A., Ph.D.(C’dia) (part-time)
Athena Vouloumanos; B.Sc.(McG), Ph.D.(Br. Col)

Lecturers
Nicole Allard; B.A.(W.Ont.), M.A.(Guelph), M.Ed.(McG.)
Rhonda Amsei; B.Sc., M.Sc.(McG.)

Associate Members
Clinical Research Institute of Montreal: Terrance J. Coderre
Douglas Hospital: Howard Steiger
Desautels Faculty of Management (McG.): Ulf Bockenholt
Montreal Neurological Institute: Lesley Fellows, Marilyn Jones-Gotman, Brenda Milner, Edward Ruthazer, Wayne Sossin, Viviane Sziklas, Robert Zatorre
Psychiatry: Frances Abbott
Vision Research Unit (Ophthalmology): Curtis Baker, Robert Hess, Frederick A.A. Kingdon, Kathleen Mullen
Music Faculty: Stephen McAdams

Adjunct Professors
M. Bruck; B.A.(Wheaton), M.A., Ph.D.(McG.)
S. Burststein; B.Sc.(McG.), M.A., Ph.D.(Wat.)
P. Delise; B.Sc., M.Ps., Ph.D.(Montr.)
P. Grendrie; B.A.(College St. Marie), B.Ph., L.Ph., Ph.D.(Montr.)
Moon-Ho R. Ho; B.Sc., M.Phil(Chinese Univ. of Hong Kong), M.S., Ph.D.(Ill.)
A. Routenberg; B.A.(McG.), M.A.(western)
D. Sookman; B.A.(McG.), M.A.(Guelph), Ph.D.(C’dia)
M. Spevack; B.Sc.(McG.), M.A.(Dal.), Ph.D.(McG.)
A. Surkus; Ph.D.(Montr.)

P. Zelazo; B.A.(Amer.Int’l Coll.), M.S.(N. Carolina), Ph.D.(Wat.)

Part-time Appointments
Jorge Amory; B.Sc.(Buenos Aires), M.Sc., Ph.D.(NYU)
Vetleqilj Mohbot; B.A.(McG.), M.A., Ph.D.(Ariz.)
Pasqualina Di Dio; B.A.(McG.), M.A., Ph.D.(Roch.)
Judith LeGallais; B.A., M.A., Ph.D.(McG.)
Martin LePage; B.A.(C’dia), Ph.D.(UQAM)
Marco Leyton; B.Sc.(Nfld.), M.A., Ph.D.(Conc.)
Brian Little; B.A.(Vic. B.C.); Ph.D.(Calif.)
Sonia Lupien; B.Sc., M.Sc., Ph.D.(Montr.)
Zbigniew Pleszewski; M.A., Ph.D.(Poznan)
Stephen Stotland; B.A.(C’dia), M.A.(Tor.), Ph.D.(McG.)
Vanessa Taler; B.A.(Auck.), M.A.(McG.), Ph.D.(Montr.)
Shahin Zangenehpour; B.Sc. (Br. Col.), Ph.D.(McG)

The Department of Psychology offers programs in both Arts and Science. All B.A. programs in Psychology can be found in the Faculty of Arts entry, see section 5.12.43 “Psychology (PSYC)”.

Psychology is the scientific study of mind and behaviour. It is both a social and a biological science. As a social science, psychology studies social interactions. As a biological science, it regards humans as the product of evolution and so studies them in biological perspective, comparing and contrasting human behaviour with that of other species.

The data of psychology are collected within the psychological laboratory by the use of experimental methods in the study of behaviour, and outside the laboratory by systematic observation of the behaviour of humans and animals. The aim is to formulate general principles of perception, learning, motivation, cognition and social psychology that are relevant to different aspects of human life. Experimentation, laboratory techniques, observational procedures, measurement, and statistical methods are important tools of the psychologist.

Psychology has many interdisciplinary aspects. The study of psychological problems often involves knowledge drawn from other disciplines such as biology, physiology, linguistics, sociology, philosophy, and mathematics. For this reason a student with varied interests can frequently find a place for these in psychology. Psychology is a young science so that explanations of the processes underlying observed phenomena are often theoretical and speculative. The major objectives of psychological study are to reduce the discrepancy between theory and fact and to provide better answers about why humans think and behave as they do. Although a number of undergraduate courses in psychology have applied implications, applied training is not the purpose of the undergraduate curriculum. Its purpose is to introduce the student to an understanding of the basic core of psychological knowledge, theory, and method, regardless of questions of practical application.

The B.Sc. or B.A. with a Major or Honours degree in psychology is not a professional qualification. It does not qualify the individual to carry on professional work in psychology. In the Province of Quebec the minimum requirement for membership in the Order of Psychologists, the professional association governing the work of psychologists in the province, is an M.A. or M.Sc. degree, or other equivalent degree. All students planning to practise in the Province of Quebec will be examined on their proficiency in French before being admitted to the professional association. Undergraduate courses in psychology may prove of considerable value to students planning careers in professional fields other than psychology. These include but are not restricted to medicine, education, social work, human communication sciences, or business and industry.

Students who are interested in psychology as a career must pursue graduate studies. Persons who hold graduate degrees in psychology, usually the Ph.D., may find employment in universities, research institutes, hospitals, community agencies, government departments, large corporations, or may act as self-employed consultants. At the graduate level, psychology has many specialized branches including social psychology, physiological psychology, experimental psychology, clinical psychology,
child psychology, industrial psychology, community psychology, educational psychology, and others.

Requirements for admission to graduate studies in psychology vary from one university to another and from one country to another. Nonetheless, both the Honours and Major degrees in psychology may qualify the student for admission to many graduate schools, provided that sufficiently high grades are obtained. During the U2 year, undergraduate students are strongly advised to verify the admission requirements of various graduate programs. This is to ensure that sufficient time is available for students to complete all necessary requirements for admission to their preferred graduate programs.

The essential differences between the Honours and the Major program are an emphasis on research methodology courses and practice in the Honours program, and that higher academic standards are required of Honours students. Honours students also have an opportunity to work in small groups closely with staff members.

INFORMATION MEETINGS FOR NEW STUDENTS

All new students entering the Psychology undergraduate program are required to attend an Information Meeting prior to registration. Students who have been accepted into a Bachelor of Science program in Psychology must attend one of these meetings. Newly admitted students from CEGEPs should attend an information session on June 13, 2007 at 10:00 a.m. in Room S3/3 of the Stewart Biological Sciences building. There will be another information session on August 27, 2007 in S1/3 at 1:00 p.m. in the Stewart Biological Sciences building for all other students, and for any CEGEP students who could not attend the earlier meeting. Students accepted into a Bachelor of Arts program must attend an separate information meeting. For details, consult the Psychology program listing in the Faculty of Arts section. At this meeting, Nicole Allard, the Academic Adviser, will explain the requirements of the Department's programs. Incoming students will have an opportunity to ask questions and receive advice on how to plan their courses. After this meeting students will make appointments for individual advising sessions, during which they will fill out their Study Plan form for registration.

Entering students must bring their letter of acceptance and a copy of their collegial transcript(s). They will also need this Calendar and a preliminary Class Schedule. Students will also find the Psychology Department Handbook helpful. It contains more detailed descriptions of psychology courses, as well as providing guidelines for how students might pursue particular areas of interest. The Handbook is available on the Department Website, www.psych.mcgill.ca/ugrad/ugradm.htm

Students entering the Psychology program in January are encouraged to call the academic adviser, Nicole Allard, in December to clarify their course selections.

MINOR IN PSYCHOLOGY (24 credits)

A Minor program in Psychology is available to students registered in any B.Sc. program (other than Psychology). This program is intended to complement a student's primary field of study by providing a focused introduction to specialized topics in psychology.

A separate Minor Concentration exists for students registered in a program in the Faculty of Arts. Please see section 5.12.43 "Psychology (PSYC)" in Faculty of Arts section for more information.

The Minor program for Science students requires the completion of 24 credits, of which no more than 6 may overlap with the primary program. All courses in the Minor program must be passed with a minimum grade of C. A prerequisite to the program is PSYC 204 or equivalent, see section 12.3.6.1 "Course Overlap".

Complementary Courses (24 credits) at least 3, but no more than 6, credits selected from:

- PSYC 211 (3) Intro Behavioural Neuroscience
- PSYC 212 (3) Perception
- PSYC 213 (3) Cognition
- PSYC 215 (3) Social Psychology
- 18-21 credits selected from among Psychology courses at the 300 level or above

PROPOSED B.SC. LIBERAL PROGRAM

As part of the proposed B.Sc. Liberal Program currently under University review, the Department of Psychology will be offering a Core Science Component in Psychology. Details of the proposed B.Sc. Liberal Program, as well as details of Core Science Components for all units offering the B.Sc. degree, may be found under each unit's entry in the online 2007-2008 Calendar, which will be available in the summer.

MAJOR AND HONOURS PROGRAMS IN PSYCHOLOGY

Recommended Background

It is expected that most students who enter a Major or Honours Program in Psychology will have taken introductory psychology, biology and statistics at the collegial level. Recommended CEGEP courses include Psychology 350-101 or 350-102 or equivalent, Biology CEGEP objective 00UK, 00XU or equivalent, Statistics (Mathematics) 201-307 or 201-337 or equivalent. Students must obtain a minimum grade of 75% in their CEGEP level statistics course. In the first year those students who have not taken the recommended collegial level statistics course, or those who have obtained a grade below 75%, must take Psychology PSYC 204. Those who have not taken the recommended collegial level biology must take BIOL 111 or BIOL 112, and those who have not taken Introductory Psychology in college must take PSYC 100.

Course Groups: List A and List B

The study of psychology covers many fields. To develop a breadth of understanding in psychology, students are expected to obtain knowledge beyond the introductory level in two or more areas of psychology. To ensure this requirement is met, Psychology courses are divided into two lists. List A covers the areas of behavioural neuroscience, cognition and quantitative methods. List B covers social, health and developmental psychology.

List A (Behavioural Neuroscience, Cognition and Quantitative Methods)

- PSYC 301 (3) Animal Learning and Theory
- PSYC 308 (3) Behavioural Neuroscience I
- PSYC 310 (3) Human Intelligence
- PSYC 311 (3) Human Cognition and the Brain
- PSYC 315 (3) Computational Psychology
- PSYC 317 (3) Genes and Behaviour
- PSYC 318 (3) Behavioural Neuroscience II
- PSYC 329 (3) Introduction to Auditory Cognition
- PSYC 340 (3) Psychology of Language
- PSYC 341 (3) The Psychology of Bilingualism
- PSYC 342 (3) Hormones and Behaviour
- PSYC 352 (3) Cognitive Psychology Laboratory
- PSYC 353 (3) Laboratory in Human Perception
- PSYC 403 (3) Modern Psychology in Historical Perspective
- PSYC 406 (3) Psychological Tests
- PSYC 410 (3) Special Topics in Neuropsychology
- PSYC 413 (3) Cognitive Development
- PSYC 427 (3) Sensorimotor Behaviour
- PSYC 451 (3) Human Factors Research and Techniques
- PSYC 470 (3) Memory and Brain
- PSYC 502 (3) Psychoneuroendocrinology
- PSYC 505 (3) The Psychology of Pain
- PSYC 510 (3) Statistical Analysis of Tests
- PSYC 522 (3) Neurochemistry and Behaviour
- PSYC 526 (3) Advances in Visual Perception
- PSYC 529 (3) Music Cognition
- PSYC 531 (3) Structural Equation Models
- PSYC 532 (3) Cognitive Science
- PSYC 536 (3) Correlational Techniques
- PSYC 537 (3) Advanced Seminar in Psychology of Language

List B

- PSYC 541 (3) Multilevel Modelling
- PSYC 545 (3) Topics in Language Acquisition
- PSYC 561 (3) Methods: Developmental Psycholinguistics
- PSYC 562 (3) Measurement of Psychological Processes
List B (Social, Health and Developmental Psychology)
PSYC 304 (3) Child Development
PSYC 316 (3) Psychology of Deafness
PSYC 331 (3) Inter-Group Relations
PSYC 332 (3) Introduction to Personality
PSYC 333 (3) Personality and Social Psychology
PSYC 337 (3) Introduction: Abnormal Psychology 1
PSYC 338 (3) Introduction: Abnormal Psychology 2
PSYC 343 (3) Language Acquisition in Children
PSYC 351 (3) Research Methods in Social Psychology
PSYC 408D (3) Principles of Cognitive Behaviour Therapy
PSYC 412 (3) Introduction: Child Development
PSYC 414 (3) Social Development
PSYC 416 (3) Advanced Topics in Child Development
PSYC 429 (3) Health Psychology
PSYC 436 (3) Human Sexuality and its Problems
PSYC 471 (3) Human Motivation
PSYC 473 (3) Social Cognition and the Self
PSYC 474 (3) Interpersonal Relationships
PSYC 491D1 (3) Advanced Study: Behavioural Disorders
PSYC 491D2 (3) Advanced Study: Behavioural Disorders
PSYC 507 (3) Emotions, Stress, and Illness
PSYC 511 (3) Infant Competence
PSYC 512 (3) Advanced Personality Seminar
PSYC 528 (3) Vulnerability to Depression
PSYC 530 (3) Applied Topics in Deafness
PSYC 533 (3) International Health Psychology
PSYC 535 (3) Advanced Topics in Social Psychology

Unclassified Courses
PSYC 395 (6) Psychology Research Project 1
PSYC 450D1 (4.5) Research Project and Seminar
PSYC 450D2 (4.5) Research Project and Seminar
PSYC 488D2 (1.5) Special Topics Seminar
PSYC 492 (3) Special Topics Seminar 1
PSYC 493 (3) Special Topics Seminar 2
PSYC 494D1 (4.5) Psychology Research Project
PSYC 494D2 (4.5) Psychology Research Project
PSYC 495 (6) Psychology Research Project 2
PSYC 499 (1) Reading Project

B.Sc. MAJOR IN PSYCHOLOGY (54 credits)
Students majoring in Psychology must obtain a minimum grade of C in all 54 credits of the program. A grade lower than C may be made up by taking another equivalent course (if there is one), by successfully repeating the course, or by successfully writing a supplemental examination (if there is one).

U1 Required Courses (12 credits)
PSYC 211 (3) Intro Behavioural Neuroscience
PSYC 212 (3) Perception
PSYC 213 (3) Cognition
PSYC 215 (3) Social Psychology
Note: PSYC 100 may be taken as a corequisite with these basic courses.

U1 or U2 Required Course (3 credits)
PSYC 305 (3) Statistics for Experimental Design

Complementary Courses (39 credits)
6 credits in Psychology from List A
6 credits in Psychology from List B
6 credits in Psychology at the 300 level or above
9 credits in Psychology 400 or 500 level
12 credits at the 300 level or above in the following disciplines:
- Psychology (PSYC), Anatomy and Cell Biology (ANAT), Biology (BIOL), Biochemistry (BIOC), Chemistry (CHEM), Computer Science (COMP), Mathematics (MATH), Physiology (PHGY), Psychiatry (PSYT).

B.Sc. HONOURS IN PSYCHOLOGY (60 credits)
Honours in Psychology prepares students for graduate study, and so emphasizes practice in the research techniques which are used in graduate school and professionally later on. Students are accepted into Honours at the beginning of their U2 year, and the two-year sequence of Honours courses continues through U3.

Admission to Honours is selective. Students with a cumulative grade point average of 3.00 or better are eligible to apply; since enrolment is limited the usual GPA for admission to this program is 3.50 (based on a 27/30 graded credit program over two terms). Students must complete the following courses in their U1 year to be eligible to apply to the Honours Program: PSYC 204, PSYC 211, PSYC 212, PSYC 213 and PSYC 215. Students who have been exempted from PSYC 204 due to previous courses completed in CEGET are advised to complete PSYC 305 in their U1 year. Once in the Honours Program, the student must obtain a GPA of 3.00 in the U2 year in order to continue in the program for U3. Students in the Honours Program are required to complete a minimum of 27 graded credits per academic year.

Applications can be obtained from the Undergraduate Office of the Department of Psychology, Room N7/9A, Stewart Biological Sciences Building. The applications must be completed and returned to the Undergraduate Office by August 1st for September admission and by December 1 for January admission. Candidates will be advised of the Department’s decision through a notice posted in front of the Undergraduate Adviser’s Office, N7/9, before classes begin in September or in January.

Students should note that awarding of the Honours degree will depend on both cumulative grade point average and a minimum grade of B on PSYC 380D1/PSYC 380D2, PSYC 482. “First Class Honours” is awarded to students who obtain a minimum cumulative grade point average of 3.50 and a minimum CGPA of 3.50 and a minimum grade of A- in the required honours courses, namely PSYC 380D1/PSYC 380D2, PSYC 482. “Honours” is awarded to students with a minimum cumulative grade point average of 3.00 and a minimum program GPA of 3.00 and a minimum grade of B in the required honours courses, namely PSYC 380D1/PSYC 380D2, PSYC 482. Moreover, the awarding of the Honours degree normally requires completion of two full years of study, U2 and U3, in the Psychology Department. Students with particularly strong academic records may be admitted for the U3 year only on the basis of their marks and research experience. These students must complete all honors program requirements.

U1 Required Courses (12 credits)
PSYC 211 (3) Intro Behavioural Neuroscience
PSYC 212 (3) Perception
PSYC 213 (3) Cognition
PSYC 215 (3) Social Psychology
Note: PSYC 100 may be taken as a corequisite with these basic courses.

U1 or U2 Required Course (3 credits)
PSYC 305 (3) Statistics for Experimental Design

U2 Required Courses (9 credits)
PSYC 380D1 (4.5) Honours Research Project and Seminar
PSYC 380D2 (4.5) Honours Research Project and Seminar

U3 Required Courses (3 credits)
PSYC 482 (3) Advanced Honours Seminar

Complementary Courses (33 credits)
12 credits to be selected from:
- PSYC 403 (3) Modern Psychology in Historical Perspective
- PSYC 483 (3) Seminar in Experimental Psychopathology
- PSYC 495 (6) Psychology Research Project 2
- PSYC 496 (6) Honours Research Project 2
- PSYC 497 (6) Honours Research Project 2
- PSYC 498D1 (4.5) Senior Honours Research
- PSYC 498D2 (4.5) Senior Honours Research
Any Psychology course at the 500 level.
6 credits in Psychology from List A
6 credits in Psychology from List B
9 credits at the 300 level or above selected from: Anatomy and Cell Biology (ANAT), Biochemistry (BIOC), Biology (BIOL), Chemistry (CHEM), Computer Science (COMP), Mathematics (MATH), Physiology (PHGY), Psychiatry (PYST), Psychology (PSYC).
* Please see Faculty Regulations concerning "Course Requirements", section 12.3.6.

12.13.30 Redpath Museum (REDM)

Redpath Museum, Room 102
859 Sherbrooke St. W.
Montreal, QC H3A 2K6
Telephone: (514)398-4086
Fax: (514) 398-3185
Website: www.mcgill.ca/redpath

Director — David M. Green
Emeritus Professor
Robert L. Carroll; B.Sc.(Mich.), Ph.D.(Harv.), F.R.S.C., F.L.S.
Professor
David M. Green; B.Sc.(Br. Col.), M.Sc.,Ph.D.(Guelph)
Associate Professor
Brian J. Alters; B.Sc., Ph.D.(S.Calif.) (Tomlinson Chair in Science Education, Sir William Dawson Scholar)

Assistant Professors
Claire de Mazancourt; Bacc.(École des Mines), DEA, Ph.D. (Paris VI)
Andrew Hendry; B.Sc.(Vic., BC), M.Sc.,Ph.D.(Wash.) (joint appoint. with Biology)
Hans C.E. Larsson; B.Sc.(McG.), Ph.D.(Chic.) (CRC Tier 2 Chair in Paleontology)
Brian Leung; B.Sc.(Br. Col.), Ph.D.(Car.) (joint appoint. with Biology & MSE)
Anthony Ricciardi; B.Sc.(Agr.), M.Sc.,Ph.D.(McG.) (joint appoint. with MSE)

Faculty Lecturer
Linda Cooper; B.A.(C’dia), M.A.(McM.)

Curator
Virginie Millien; Maîtrise(Paris VI), DEA, Ph.D.(Montpellier II)

Associate Members
Biology: Graham A.C. Bell; Earth & Planetary Sciences: Jeanne Paquette

Adjunct Professors
Hendy M. Reiswig, Hans Hofmann, Robert Holmes, Michael Woloch

The Redpath Museum exists to foster the study of the history and diversity of the natural world. Its mandate includes biological, geological and cultural diversity, and science education. It conducts academic teaching and research activities and also provides academic services to other units. There are no B.Sc. Programs at the Redpath Museum but the REDM courses listed in the Courses section of this Calendar are considered as ones taught by the Faculty of Science.

12.13.31 Science for Teachers

Rutherford Physics Building
3600 University Street
Montreal, QC, H3A 2T8
Fax: (514) 398-8434
E-mail: bscbed@physics.mcgill.ca
Coordinator - Science — R. Harris
Coordinator - Education — M. Schwartz

The training and certification of school teachers has traditionally been the responsibility of the Faculty of Education and requires the completion of a Bachelor of Education.

The Faculties of Education and of Science have introduced a number of measures to make the B.Ed. degree as accessible as possible to Science students, subject to Ministère de l’Éducation, du Loisir et du Sport (MELS) regulations. Two of these measures are the Minor in Education for Science Students and the Concurrent B.Sc./B.Ed. programs.

MINOR IN EDUCATION FOR SCIENCE STUDENTS (18 credits)

Program Adviser — Student Affairs Office, Faculty of Education

This Minor allows Science students to develop or explore an interest in Education without committing themselves to completing a B.Ed. degree. Only a few students are prepared to commit to a teaching career at the start of university, but many students see it as a viable option toward the end of their B.Sc. program. At that time Science students who have taken the Minor in Education will have completed a substantial number of the necessary credits for the B.Ed. degree. Students whose B.Sc. degree also substantially matches the content of one of the concurrent B.Sc./B.Ed. programs (see below) are likely eligible for the maximum number of 60 Advanced standing credits, as specified in the Faculty of Education section "Advanced Standing/Transfer Credits", in section 7.2.1.2.

The 18 credits for the Minor are the same courses approved by the Faculty of Science as Education electives within the Concurrent B.Sc./B.Ed.

Required Courses (12 credits)
- EDEM 220 (3) Contemporary Issues in Education
- EDEC 262 (3) Media, Technology and Education
- EDPE 300 (3) Educational Psychology
- EDPI 309 (3) Exceptional Students

Complementary Courses (6 credits)
- 3 credits from: EDEC 260 (3) Philosophical Foundations
- EDEC 261 (3) Philosophy of Catholic Education
- EDEC 233 (3) First Nations and Inuit Education
- EDEC 248 (3) Multicultural Education

CONCURRENT B.SC./B.ED.PROGRAM

The Concurrent B.Sc./B.Ed. is intended as a very rigorous but rewarding alternative to taking the B.Sc. and the B.Ed. in sequence. The Concurrent program is specifically designed to train teacher/scientists. The program is rigidly structured and closely integrated so as to satisfy the academic requirements of both degrees.

Concurrency is an essential characteristic of the B.Sc./B.Ed.; it is not intended that the Science and Education components be taken separately and then combined. Normally students will be admitted to both components of the Concurrent Program simultaneously, but it is possible for Science students to opt into this program at any time during their B.Sc. program. However, because this is a concurrent program, both degrees must be granted at the same Convocation. It will not be possible to receive one degree first, and the other subsequently.

Students in the Concurrent Program may apply to transfer to either a conventional B.Sc. or a conventional B.Ed program. To do so, they must submit a Faculty Transfer Application to the appropriate Student Affairs Office. The decision will be based on their grades in the relevant component of the Concurrent Program. Students who do transfer to a conventional program may not transfer back to the Concurrent Program.

Students who receive an F or J in an Education Field Experience course are placed in unsatisfactory standing. Although they may complete their term, they are required to withdraw from the Concurrent Program. However, they may apply to transfer to a conventional B.Sc. program as outlined above.
To be admitted, candidates must satisfy the admission requirements of both faculties.

Students who wish to be registered in the Concurrent Program must contact one of the coordinators through the Student Affairs Office of either faculty.

This program has been designed to provide students with the opportunity to attain a Bachelor of Science degree and a Bachelor of Education degree after 135 credits of study (165 credits for students who have not completed the basic sciences).

The two components of the Concurrent Program are the B.Ed. Secondary Program and one of the B.Sc. programs for teachers. These two components are described in what follows, including an identification of the elements that are counted towards the requirements of both degrees. These provisions are exceptional and apply exclusively to the Concurrent Program.

The following Science components have been approved for the Concurrent Program:

- biology, with chemistry
- biology, with physics
- chemistry, with biology
- chemistry, with physics
- physics, with biology
- physics, with chemistry
- mathematics

BACHELOR OF EDUCATION SECONDARY PROGRAM (120 credits)
The aim of this B.Ed. is to prepare teachers for the secondary school level through a program of academic studies and professional studies centred on school-based practicum components supported by courses in pedagogy, curriculum and educational foundations. In the case of the Concurrent Program, the academic component must be chosen from those listed above.

See the Faculty of Education for a full description of the "Bachelor of Education Secondary Program", in section 7.5.1.1. In summary, it consists of the following:

Academic components (54 credits): In the present case these courses will be selected from the B.Sc. components of the Concurrent Program, and will count towards both degrees.

Professional components (60 credits): These include professional seminars, field experiences, foundation courses, pedagogy courses, and pedagogical support courses.

Pedagogy courses for the Concurrent program must include EDES 370 Teaching General Science and EDEC 335 Teaching Secondary Science, or, if Mathematics is the academic component chosen, EDES 353 Secondary School Mathematics 1 and EDEC 338 Secondary School - Mathematics 2.

The following 18 credits can be included as electives in the B.Sc. component of the Concurrent program, and will count towards both degrees: EDEC 247, EDEC 262, EDPI 309, EDPE 300, either EDEC 260 or EDEC 261, and one of EDEC 248 or EDEC 233.

Electives (6 credits).

BACHELOR OF SCIENCE MAJOR OR MAJOR CONCENTRATION WITH A MINOR FOR TEACHERS (120 credits)
These B.Sc. programs, with the exception of the Major in Mathematics, are designed specifically as the Science component of the Concurrent B.Sc./B.Ed. Program. The general structure of these B.Sc. programs is as follows:

Basic sciences (30 credits): Quebec students with a DCS in Science are granted 30 credits advanced standing and will have normally completed the equivalent of, and are therefore exempt from, the basic science courses in biology, chemistry, mathematics and statistics, and physics. Students with satisfactory results in International Baccalaureate, French Baccalaureate and Advanced Levels, and Advanced Placement tests may be exempt from some or all of the basic science courses.

Required and complementary courses (54-70 credits): The details of these programs are given below. Note that 54 of these credits can be counted towards the academic component of the B.Ed. program, but only for students in the Concurrent Program.

Elective courses (20-36 credits): These are electives from the B.Sc. perspective, but they must be suitably chosen if the student wishes to complete the Concurrent Program with the minimum of 135 credits. The following Education courses can count towards both the B.Sc. and the B.Ed. components of the Concurrent Program.

EDEC 247 (3) Policy Issues in Quebec Education
EDEC 260 (3) Philosophical Foundations
or EDEC 261 (3) Philosophy of Catholic Education
EDEC 262 (3) Media, Technology and Education
EDEC 248 (3) Multicultural Education
or EDEC 233 (3) First Nations and Inuit Education
EDPE 300 (3) Educational Psychology
EDPI 309 (3) Exceptional Students

MAJOR CONCENTRATION IN BIOLOGY WITH A MINOR IN CHEMISTRY FOR TEACHERS (69 or 70 credits)
This program includes the 36 credits of the "MAJOR CONCENTRATION IN BIOLOGY - CELL/ MOLECULAR OPTION", under "Biology (BIOL)", in section 6.12.3 or the 37 credits of the "MAJOR CONCENTRATION IN BIOLOGY - ORGANISMAL OPTION", under "Biology (BIOL)", in section 6.12.3 and the 18 credits of the "MINOR IN CHEMISTRY", under "Chemistry (CHEM)", in section 12.13.7, as well as the 15 credits of Science courses listed below.

Additional Science courses (15 credits)
BIOL 210 (3) Perspectives of Science
CHEM 381 (3) Inorganic Chemistry 2
MATH 203 (3) Principles of Statistics 1
MATH 222 (3) Calculus 3
plus 3 credits, one of:
CHEM 150 (3) World of Chemistry: Food
CHEM 160 (3) World of Chemistry: Technology
CHEM 170 (3) World of Chemistry: Drugs
CHEM 180 (3) World of Chemistry: Environment

Note: Students must take one additional BIOL course (3 credits) to be approved by the Biology Department. This course is required because both the Major Concentration and the Minor include CHEM 212 Introductory Organic Chemistry 1.

MAJOR CONCENTRATION IN BIOLOGY WITH A MINOR IN PHYSICS FOR TEACHERS (69 or 70 credits)
This program includes the 36 credits of the "MAJOR CONCENTRATION IN BIOLOGY - CELL/ MOLECULAR OPTION", "Biology (BIOL)", in section 6.12.3 or the 37 credits of the "MAJOR CONCENTRATION IN BIOLOGY - ORGANISMAL OPTION", under "Biology (BIOL)", in section 6.12.3, and the 18 credits of the "MINOR IN PHYSICS", under "Physics (PHYS)", in section 12.13.26, as well as the 15 credits of Science courses listed below.

Additional Science courses (15 credits)
BIOL 210 (3) Perspectives of Science
MATH 203 (3) Principles of Statistics 1
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 314 (3) Advanced Calculus

MAJOR CONCENTRATION IN CHEMISTRY WITH A MINOR IN BIOLOGY FOR TEACHERS (69 credits)
This program includes the 36 credits of the "MAJOR CONCENTRATION IN CHEMISTRY", under "Chemistry (CHEM)", in section 6.12.5, the 24 credits of the "MINOR IN BIOLOGY", under "Biology (BIOL)", in section 12.13.5 and the 9 credits of Science courses listed below.
Additional Science courses (9 credits)
BIOL 210 (3) Perspectives of Science
MATH 203 (3) Principles of Statistics 1
MATH 222 (3) Calculus 3

MAJOR CONCENTRATION IN CHEMISTRY WITH A MINOR IN PHYSICS FOR TEACHERS (69 credits)
This program includes the 36 credits of the "MAJOR CONCENTRATION IN CHEMISTRY", under "Chemistry (CHEM)", in section 6.12.5, the 18 credits of the "MINOR IN PHYSICS", under "Physics (PHYS)", in section 12.13.26, and the 15 credits of Science courses listed below.

Additional Science courses (15 credits)
BIOL 210 (3) Perspectives of Science
MATH 203 (3) Principles of Statistics 1
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 314 (3) Advanced Calculus

MAJOR CONCENTRATION IN PHYSICS WITH A MINOR IN BIOLOGY FOR TEACHERS (69 credits)
This program includes the 36 credits of the "MAJOR CONCENTRATION IN PHYSICS", under "Physics (PHYS)", in section 6.12.12, the 24 credits of the "MINOR IN BIOLOGY", under "Biology (BIOL)", in section 12.13.5, and the 9 credits of Science courses listed below.

Additional Science courses (9 credits)
BIOL 210 (3) Perspectives of Science
MATH 203 (3) Principles of Statistics 1
plus 3 credits, one additional Physics course approved by the Physics Department.

MAJOR CONCENTRATION IN PHYSICS WITH A MINOR IN CHEMISTRY FOR TEACHERS (69 credits)
This program includes the 36 credits of the "MAJOR CONCENTRATION IN PHYSICS", under "Physics (PHYS)", in section 6.12.12, the 18 credits of the "MINOR IN CHEMISTRY", under "Chemistry (CHEM)", in section 12.13.7 and the 15 credits of Science courses listed below.

Additional Science courses (15 credits)
BIOL 210 (3) Perspectives of Science
CHEM 381 (3) Inorganic Chemistry 2
MATH 203 (3) Principles of Statistics 1
plus 3 credits, one of:
CHEM 150 (3) World of Chemistry: Food
CHEM 160 (3) World of Chemistry: Technology
CHEM 170 (3) World of Chemistry: Drugs
CHEM 180 (3) World of Chemistry: Environment
plus 3 credits, one additional Physics course approved by the Physics Department.

MAJOR IN MATHEMATICS FOR TEACHERS (54 credits)
This program includes the 54 credits of the "MAJOR IN MATHEMATICS", under "Mathematics and Statistics (MATH)", in section 12.13.18. Students taking the Major in Mathematics as part of the Concurrent Program are required to include the following courses as part of the Major.

COMP 202* (3) Introduction to Computing 1
MATH 324 (3) Statistics
MATH 338 (3) History and Philosophy of Mathematics
MATH 348 (3) Topics in Geometry
* or equivalent

12.13.32 Technological Entrepreneurship for Science Students
Science students who wish to become entrepreneurs or to enter small to medium-sized companies in the high technology sector will find within this Minor a set of six (6) courses that cover relevant management concepts and skills.
Also available to Science students is the Minor in Management, under "Management Minor Program", in section 12.13.17.
Acceptance to the program is both competitive and restricted. Application procedures will be announced in September. Please consult Ron Critchley, Student Adviser, Desautels Faculty of Management Student Affairs Office, Bronfman 110, for details.
Students registered in the Minor in Technological Entrepreneurship for Science Students may not take additional courses outside the Faculties of Arts and of Science.
To obtain the Minor, all courses must be completed with a grade of C or better.
Please note: the courses must be taken sequentially over five terms, as follows: ACCT 210, MRKT 360 and either MGCR 320 or ORGB 321, BUSA 465, MGPO 562, BUSA 466.

MINOR IN TECHNOLOGICAL ENTREPRENEURSHIP FOR SCIENCE STUDENTS (18 credits)
Required Courses (15 credits)
ACCT 210 (3) Accounting for Managers
MRKT 360 (3) Marketing of Technology
BUSA 465 (3) Technological Entrepreneurship
MGPO 562 (3) Seminar in Organizational Strategy
BUSA 466 (3) Technological Entrepreneurship Project

Complementary Courses (3 credits)
one of the following courses:
MGCR 320 (3) Managing Human Resources
ORGB 321 (3) Leadership
13 Faculty of Agricultural and Environmental Sciences, including School of Dietetics and Human Nutrition

13.1 The Faculty

Mission statement: The Faculty of Agricultural and Environmental Sciences is committed to excellence in teaching, research and service to ensure that humanity’s present and future food, health and natural resource needs are met while protecting the environment.

13.1.1 Location
McGill University, Macdonald Campus
21,111 Lakeshore Road
Sainte-Anne-de-Bellevue, QC H9X 3V9
Canada
Telephone: (514) 398-7928
Website: www.mcgill.ca/macdonald

The Faculty of Agricultural and Environmental Sciences and the School of Dietetics and Human Nutrition are located on the Macdonald Campus of McGill University in Sainte-Anne-de-Bellevue at the western end of the Island of Montreal.

Served by public transport (STM, bus and train), it is easily reached from the McGill downtown campus and from the Pierre Elliott Trudeau International Airport. Arrangements can also be made to use the McGill intercampus shuttle bus service. The shuttle service is available to all registered students.
13.1.3 Programs

The Faculty of Agricultural and Environmental Sciences and the School of Dietetics and Human Nutrition offer degrees in Bachelor of Science in Agricultural and Environmental Sciences, Bachelor of Engineering in Bioresource Engineering, Bachelor of Science in Food Science, Bachelor of Science in Nutritional Sciences, Certificate in Ecological Agriculture, Certificate in Entrepreneurship, Diploma in the Environment, and Diploma of Collegial Studies in Farm Management and Technology. The Faculty of Agricultural and Environmental Sciences is one of the three faculties in partnership with the McGill School of Environment.

Several programs offered by the Faculty and School lead toward professional accreditation. These include Dietetics (membership in the Dietitians of Canada and the Ordre professionnel des diététistes du Québec); Agricultural Economics, Agricultural Sciences, Agricultural Sciences Internship, Animal Science and Plant Science (membership in the Ordre des agricultores du Québec and other provincial Institutes of Agriculture); Bioresource Engineering (membership as a professional Engineer in any province of Canada plus the Ordre des agronomes du Québec); Food Science (Ordre des chimistes du Québec). Professional Practice experiences to complete the dietetics practicum are provided in the McGill teaching hospitals and in a wide variety of health, education, business, government and community agencies. The Faculty also offers M.Sc. and Ph.D. programs in the areas of Agricultural Sciences, Biological Sciences, Bioresource Engineering, Biotechnology, Environmental Sciences, Food Science, and Nutritional Sciences. M.Sc.(A) programs are offered in some disciplines. In addition, a Graduate Certificate in Biotechnology and a Graduate Diploma in Dietitian Credentialing are offered.

13.1.3.1 Internship Opportunities and Co-op Experience

All students in agricultural programs have the opportunity to participate in a summer-long internship on a farm or related agricultural enterprise. Students who register in the Agricultural Sciences Internship Program benefit from two summers of internship experience, one on a farm and the other in industry, in research, or with an accredited agrologist.

Most undergraduate programs offered in the Faculty include the opportunity for a Co-op work experience. Internships and Co-op experience both involve a work placement of a minimum 12 weeks' duration where the student is exposed to the main areas of operation of the employer. Each work placement is unique, and the student benefits from a program developed by both the employer and the instructor exclusively for that student.

Students who register for a Co-op experience benefit from practical learning arising from work-term employment in a meaningful job situation. Students also benefit from the non-tangible learning experience arising from the increased responsibilities required to obtain and successfully complete the work term. Students have the opportunity to pursue a 6 credit internship within the Barbados and Panama Field Studies semesters. For details, see www.mcgill.ca/mse - Programs

13.1.3.2 Exchange Programs

The Faculty of Agricultural and Environmental Sciences participates in all university-wide student exchange programs available at McGill and also has faculty-specific exchange programs. For more information, please see section 15.3 "Exchange Programs".

13.1.4 Macdonald Campus Facilities

Morgan Arboretum

The Morgan Arboretum has 245 hectares of managed and natural woodlands, fields and tree plantations used for environmental research and teaching in a wide range of courses. Groups of most Canadian native trees and many useful and important exotics are also present. The Arboretum features self-guided interpretation trails, 20 kilometres of wooded trails, a variety of forest ecosystems, conservation projects, and forest operations such as plantation management, timber harvesting and maple syrup production. A nature interpretation program is also offered.

Macdonald Campus Library

Located in the Barton Building, the Macdonald Campus Library's collection encompasses a wide variety of resources in agriculture, food and animal science, nutrition, entrepreneurship, the environment, ecology, plant science, and biotechnology. The library is a depository for many print and electronic government publications. All computers provide access to the on-line catalogue, databases, electronic journals and resources, as well as the Internet. In the electronic classroom, students can do research, write papers, and save documents. The library is a wireless zone allowing students to use laptops that have wireless network interface cards. There are designated areas in the library that allow laptops to connect to the McGill server and Internet via VPN (Virtual Private Network). Students can request articles or books through the interlibrary loan service; the forms are available on-line. Reference service is available to assist users in obtaining necessary print or electronic resources, and a comprehensive library instruction service is provided throughout the year. For further information about Macdonald Campus Library visit the Website at www.mcgill.ca/macdonald-library or feel free to drop by.

Macdonald Campus Computing Centre

The Macdonald Campus Computing Centre, located in the Macdonald-Stewart Building, is staffed and managed by McGill's IST Customer Services (ICS) unit. The complex is comprised of a helpdesk with walk-in/phone support, offices, and a technical repair unit, open 9:00 a.m. to 5:00 p.m., Mon.-Fri. Also available, are three undergraduate labs offering the following resources (open 24/7 x 365): 48 computers running MS Office, 2 black and white printers, 1 colour printer, 3 scanners, multimedia card reader and a wheelchair-friendly workstation is available in lab MS2-028. ICS is also responsible for supporting the Faculty's computers and public E-mail stations, conveniently located across the Campus. More information is available at www.mcgill.ca/ics/labs/macdonald.

Lyman Entomological Museum and Research Laboratory

Originally established in 1914 and formerly housed in the Redpath Museum, the Lyman Entomological Museum was moved to the Macdonald Campus in 1961. It houses the largest university collection of insects in Canada, second in size only to the National Collection. The Museum also has an active graduate research pro-

13.2.2 Environmental Sciences Programs

McGill School of Environment (MSE)

The MSE is a joint initiative of the Faculty of Agricultural and Environmental Sciences, the Faculty of Arts, and the Faculty of Science. It offers a B.Sc.(Ag.Env.Sc.) Major in Environment, a B.Sc. Major in Environment, a B.A.&Sc. Faculty Program in Environment, a B.A. Faculty Program in Environment, a Minor in Environment and a Diploma in Environment. Many of the MSE programs allow students to choose to study exclusively on the Macdonald or downtown campuses, or to take advantage of both.

A list of the B.Sc.(Ag.Env.Sc.) Domains is given under section 13.2.1.1 “Major Programs”. Further information on all programs is given under the McGill School of Environment.

Other Environmental Programs at Macdonald Campus

A number of other integrated environmental science programs are also offered on the Macdonald Campus. The objective of these interdepartmental programs is to provide the student with a well-rounded training in a specific interdisciplinary subject as well as the basis for managing the natural resource. The programs include:

- Agricultural Economics Major, Natural Resource Economics Option
- Agricultural Science Major, Ecological Agriculture Option
- Agricultural Sciences Internship Major, Ecological Agriculture Option
- Applied Zoology Major
- Bioresource Engineering Major, BioEnvironmental Engineering Stream
- Bioresource Engineering Major, Soil & Water Engineering Stream
- Botanical Science Major, Ecology Option
- Environmental Biology Major
- Microbiology Major, Ecology Option
- Microbiology Major, Environment Option
- Resource Conservation Major
- Wildlife Biology Major

13.3 Faculty Admission Requirements

For information about the admission requirements for this faculty please refer to "Undergraduate Admissions Guide 2007-08 (Appendix A)". Applications are submitted directly online at www.mcgill.ca/applying. Please note that the same application is used for all undergraduate programs at McGill and two program choices can be entered. For further information contact:

Student Affairs Office
Macdonald Campus of McGill University
21,111 Lakeshore Road
Sainte-Anne-de-Bellevue, Quebec H9X 3V9

E-mail: studentinfo.macdonald@mcgill.ca
Website: www.mcgill.ca/macdonald/prospective

More specific information on application deadlines and admission requirements can be found on the Web or in "Undergraduate Admissions Guide 2007-08 (Appendix A)".

13.4 Student Information

13.4.1 Student Services

Students who study on the Macdonald Campus may make full use of all McGill "Student Services", see section 4.2. The Office of the Dean of Students offers students direct access to several services, see "Student Services – Macdonald Campus", section 4.2.3.

13.4.2 Athletic Services

All students who have paid Student Services fees are also eligible to use any Athletic facility without additional expense. For further information please visit the Website www.agrenv.mcgill.ca/society/athletic or telephone the Stewart Athletic Complex at (514) 398-7789.

13.4.3 Macdonald Campus Residences

Students may apply for residence in either of two distinctive facilities:

- Laird Hall, with a capacity of 250 students, is arranged on a co-educational basis and provides single and double room accommodation for both undergraduate and graduate students.
- The EcoResidence, Canada's first ecologically friendly student residence and winner of the Prix d'excellence from the Ordre des architectes du Québec, accommodates 100 students in apartment-style living.

For further information, please refer to "University Residences – Macdonald Campus", section 4.3.2, or the Faculty Website, www.mcgill.ca/macdonald-residences, or e-mail residences.macdonald@mcgill.ca.

13.4.4 Extracurricular Activities

All undergraduate, postgraduate, and Farm Management Technology students are members of the Macdonald Campus Students’ Society. The MCSS, through the 19-member Students’ Council, is involved in numerous campus activities such as social events, academic affairs, and the coordination of clubs and organizations. Student life is informal and friendly and student groups range from the Outdoor Adventure Club to the Photography Society. Major social events include Orientation activities, Halloween Party and Winter Carnival. The Ceilidh, a student-run bar located in the Centennial Centre, is open every Thursday night.

The Centennial Centre is the centre of student life, offering facilities for student activities, such as meeting rooms, a Yearbook room, pool tables, great places to relax, listen to music and meet friends. Also located in the Centre are the Students’ Council offices, an information desk, the Robber’s Roost Campus Bookstore and cafeteria.

13.4.5 Student Rights and Responsibilities

The Handbook of Student Rights and Responsibilities is published jointly by the Office of the Dean of Students and the University Secretariat. A copy of the Handbook can be found on the Web at www.mcgill.ca/secretariat/handbooks/student or obtained from the Student Affairs Office or the Macdonald Campus Student Services Office.

13.4.6 Fees

The University reserves the right to make changes without notice in its published scale of tuition, residence and other fees. Payment of student fees can be made directly on Minerva through internet banking or pre-authorized debit charges. The first fee statement is sent by regular mail followed by e-billing viewable on Minerva which students are notified of at their McGill e-mail address.

The University shall have no obligation to issue any transcript of record, award any diploma or re-register a student in case of non-payment of tuition fees, library fines, residence fees, or loans on their due date.
Tuition Fees
General information on Tuition and other fees is found under "Fees", section 3.4.

Other Expenses
In addition to tuition fees and the cost of accommodation and meals, students should be prepared to spend a minimum of $1,000 (dependent on program) on prescribed textbooks and classroom supplies. These may be purchased at the Campus Bookstore in the Centennial Centre.

Uniforms are required for food laboratories. Students in the B.Sc.(Nutr.Sc.) program will be advised of the uniform requirements on acceptance or promotion.

13.4.7 Scholarships and Bursaries
Various entrance and in-course scholarships and bursaries are available. For for details see www.mcgill.ca/studentaid/scholarships.

13.4.8 Immunization for Dietetics Majors
Students in the Dietetics Major are required to complete the Compulsory Immunization Program for Health Care Students prior to registration. Participation in Professional Practice (Stage) in Dietetics will only be permitted for those students who have completed all immunization requirements.

13.4.9 Language Requirement for Professions
Quebec law requires that candidates seeking admission to provincially recognized Quebec professional corporations or ordres possess a working knowledge of the French language, i.e., be able to communicate verbally and in writing in that language. Agrologists, chemists, dietitians, and engineers are among those within this group.

For additional information, see section 3.10.1 “Language Requirements for Professions”.

13.5 Faculty Information and Regulations
Each student in the Faculty of Agricultural and Environmental Sciences must be aware of the Faculty Regulations as stated in this Calendar. While departmental and faculty advisers and staff are always available to give advice and guidance, the ultimate responsibility for completeness and correctness of course selection and registration, for compliance with, and completion of program and degree requirements, and for the observance of regulations and deadlines rests with the student. It is the student's responsibility to seek guidance if in any doubt; misunderstanding or misapprehension will not be accepted as cause for dispensation from any regulation, deadline, program or degree requirement.

13.5.1 Minimum Credit Requirement
Students must complete the minimum credit requirement for the degree as specified in the letter of admission.

Students are normally admitted to a four-year program requiring the completion of 120 credits, but advanced standing of up to 30 credits may be granted to students who obtain satisfactory results in the Diploma of Collegial Studies, International Baccalaureate, French Baccalaureate, Advanced Levels, and Advanced Placement tests.

Normally, Quebec students who have completed the Diplôme d'études collégiales (DEC) or equivalent diploma are admitted to the first year of a program requiring the completion of a minimum of 90 credits. 96 credits for Agricultural Sciences Major Internship Options, 111 credits for Bioresource Engineering, or 113 credits for Dietetics.

Students from outside Quebec who are admitted on the basis of a high school diploma enter the Freshman Major (see "Freshman Major", section 13.5.3).

Students will not receive credit towards their degree for any course that overlaps in content with a course successfully completed at McGill, at another university, at CEGEP, or Advanced Placement exams, Advanced Level results, International Baccalaureate Diploma, or French Baccalaureate.

Students in the B.Sc.(Ag.Env.Sc.) must take a minimum of two-thirds of their course credits within the Faculty of Agricultural and Environmental Sciences.

13.5.2 Minimum Grade Requirement
Students must obtain grades of C or better in any required, complementary and freshman courses used to fulfill program requirements. Students may not register in a course for which they have not passed all the prerequisite courses with a grade of C or better, except by written permission of the Departmental Chair concerned.

13.5.3 Freshman Major
Students entering university for the first time from a high school system (outside of Quebec CEGEP system) will be required to complete the 30 credits listed below.

Required Courses - Fall
- AEBI 120 General Biology 3.0
- AEMA 101 Calculus 1 3.0
- AEPH 112 Introductory Physics 1 4.0
- AGRI 195* Freshman Seminar 1 0.5
- FDSC 230 Organic Chemistry 4.0

Required Courses - Winter
- AEMA 102 Calculus 2 4.0
- AEPH 114 Introductory Physics 2 4.0
- AGRI 196* Freshman Seminar 2 0.5
- FDSC 110 Inorganic Chemistry 4.0

Elective - Winter
- Elective 3.0

- AEBI 202 Cellular Biology must be substituted for students in programs in the B.Sc.(Nutr.Sc.) degree.
- BREE 103 Linear Algebra must be substituted for students in the B.Eng.(Bioresource) degree.

Total Credits 30.0

* AGRI 195 and AGRI 196 are required for all freshmen, excluding Bioresource Engineering students who must take BREE 187 Freshman Seminar 1 and BREE 188 Freshman Seminar 2 and are optional for Dietetics and Nutrition students who may substitute an elective.

Normally, students registered in the Faculty of Agricultural and Environmental Sciences Freshman program may take a maximum of 8 credits outside the Faculty offerings to meet the requirements of the program. Permission to exceed this limit must be received from the Associate Dean (Student Affairs) prior to registration.

Freshman students in the B.Sc.(Ag.Env.Sc.) degree will automatically be moved to the default major, Agricultural Sciences-General Option, upon completion of their freshman year. Students must provide a program change form if this is not the major of their choice.

13.5.4 Academic Advisers
Before registration, all students entering the Faculty must consult with the Academic Adviser of their program for selection and scheduling of required, complementary, and elective courses. The Academic Adviser will normally continue to act in this capacity for the duration of the student's studies in the Faculty.

13.5.5 Categories of Students

Full-Time Students
Full-time students in satisfactory standing take a minimum of 12 credits per term.

Where students in probationary standing are not normally permitted to take more than 14 credits per term. In exceptional
5. Normally, proposals for Second Academic Majors will be initiated before completion of U1 year of the First Academic Major.
6. The academic standards applicable to each Major will be respected.

13.5.9 Regulations Regarding Second Academic Majors

While registered in a Major in the Faculty of Agricultural and Environmental Sciences, a student may pursue a second set of courses of greater scope than a Minor (e.g., Faculty Program, Major, Honours Program, Major Concentration) in either this Faculty or another Faculty. Application for a Second Academic Major shall be made to the Associate Dean (Student Affairs) in the Student Affairs Office, Laird Hall, Room 106. Following are the regulations and procedures for Second Academic Majors:

1. The applicant for a Second Academic Major must be in Satisfactory academic standing with a minimum CGPA of 3.00.
2. The applicant, in consultation with the appropriate authority associated with each Major (Academic Adviser, Associate Dean) must construct a proposal showing all the courses that are to be taken to satisfy the entrance and program requirements of both the First and Second Academic Majors.
3. A minimum of 36 credits must be unique to the Second Major (i.e., not part of the Required or Complementary courses taken for the First Major).
4. Students in the Faculty of Agricultural and Environmental Sciences must obtain prior approval for all proposed Second Academic Majors from their Academic Adviser and the Student Affairs Office and from the Associate Dean, adviser or appropriate committee of the other faculty concerned.
5. Normally, proposals for Second Academic Majors will be initiated before completion of U1 year of the First Academic Major.
6. The academic standards applicable to each Major will be respected.

13.5.10 Course Change Information

1. Courses: please refer to “Course Change Period”, section 3.3.7 and the Calendar of Dates.
2. Course withdrawal (Transcript notation of “W”): please refer to “Regulations Concerning Course Withdrawal”, section 3.3.8 and the Calendar of Dates.
3. Other changes: Information about changes may be obtained from the Student Affairs Office of the Faculty.
13.5.11 Graduate Courses Available to Undergraduates

Undergraduates wishing to take such courses must have a cumulative grade point average (CGPA) of at least 3.20. Final approval must be obtained from the Graduate and Postdoctoral Studies Office.

13.5.12 Attendance and Conduct in Class

Matters of discipline connected with, or arising from, the general arrangement for teaching are under the jurisdiction of the Dean of the Faculty.

Students may be admonished by a professor or instructor for dishonest or improper conduct or may be reported to the Associate Dean (Student Affairs) for disciplinary action.

Punctual attendance at all classes, laboratory periods, tests, etc., is expected of all students.

13.5.13 Incomplete Grades

An instructor who believes that there is justification for a student to delay submitting term work may extend the deadline until after the end of the course. In this case, the instructor will submit a grade of K (incomplete), indicating the date by which the work is to be completed. The maximum extensions for the submission of grades to the Student Affairs Office are as follows:

- Students graduating in June:
  - Fall courses: January 15
  - Winter courses, and courses spanning Fall/Winter: April 30
- Non-graduating students:
  - Fall courses: January 15
  - Winter courses, and courses spanning Fall/Winter: May 15

Students’ deadlines for submitting their work must be sufficiently in advance of these dates to ensure that the work can be graded and final marks submitted on time. It is important to note that instructors may impose earlier deadlines than those listed above.

If marks to clear Ks have not been submitted to the Student Affairs Office by the above dates, the K is automatically changed to a KF and counts as an F in the GPA.

Students with a grade of K who have serious extenuating circumstances may request an extension of the K deadline (KE) from the Associate Dean (Student Affairs). Please refer to "Grading and Grade Point Averages (GPA)", section 3.5.3 for more information about grading and credit.

13.5.14 Examinations

Students should refer to "Examinations", section 3.6 for information about final examinations and deferred examinations. Examination schedules are posted on the McGill website, www.mcgill.ca, normally one month after the start of classes for the Tentative Exam Schedule, and two months after the start of classes for the Final Exam Schedule.

Every student has a right to write essays, examinations and theses in English or in French except in courses where knowledge of a language is one of the objects of the course.

Oral presentations made as part of course requirements shall be in English.

13.5.14.1 Reassessments and Rereads

In accordance with the Charter of Student Rights, and subject to the conditions stated therein, students have the right to discuss this submission with the examiner.

If, after discussion with the instructor, students request a formal final examination reread, they must apply in writing to the Associate Dean (Student Affairs). The following conditions apply:

- grades may be either raised or lowered as the result of a reread;
- rereads in courses outside the Faculty of Agricultural and Environmental Sciences are subject to the deadlines, rules and regulations of the relevant faculty.

Application for rereads must be made by March 31 for Fall term courses and by September 30 for Winter term and Summer term courses. Students are assessed a fee for formal rereads. Any request to have term work re-evaluated must be made directly to the instructor concerned. Students should consult the Student Affairs Office for further information.

13.5.14.2 Deferred Examinations

The Faculty offers deferred exams for medical reasons and exceptional circumstances (to be approved by the Associate Dean (Student Affairs)) for the Fall and Winter period. Verify date in Calendar of Dates and consult the Student Affairs Office for procedures.

13.5.15 Degree Requirements

To be eligible for a B.Eng. (Biorecourse), B.Sc.(Ag.Env.Sc.), B.Sc.(F.Sc.), or B.Sc.(Nutr.Sc.) degree, students must have passed, or achieved exemption, with a minimum C grade in all required and complementary courses of the program. They must have a CGPA of at least 2.00.

Students must have completed all Faculty and program requirements, "Minimum Credit Requirement", section 13.5.1.

A student must complete a minimum residency requirement of 60 credits at McGill in order to qualify for a McGill degree. Students in the B.Sc.(Ag.Env.Sc.) must take a minimum if 2/3 of their course credits within the Faculty of Agricultural and Environmental Sciences.

In addition, students in the Dietetics program must have completed the Stages of professional formation requiring a CGPA of 2.5.

13.5.16 Honours and First Class Honours

Departments may recommend to the Faculty that graduating students registered in an Honours program be awarded Honours or First-Class Honours under the following conditions:

- students must complete all Honours program requirements;
- for Honours, the CGPA at graduation must be at least 3.00;
- for First-Class Honours, the CGPA at graduation must be at least 3.50;
- some programs may impose additional requirements, which must be met before students are recommended for Honours or First-Class Honours.

Students in an Honours program whose CGPA is below 3.00 or who did not satisfy certain program requirements must consult their academic adviser to determine their eligibility to graduate in a program other than Honours.

13.5.17 Distinction or Great Distinction

Students in Major programs whose academic performance is appropriate may be awarded their degrees with Distinction or Great Distinction under the following conditions:

- for Distinction, the CGPA at graduation must be 3.30 to 3.49;
- for Great Distinction, the CGPA at graduation must be 3.50 or greater.

13.5.18 Dean's Honour List

The designation Dean's Honour List may be awarded to graduating students under the following conditions:

- students must be in the top 10% of the Faculty’s graduating students.

13.5.19 Medals and Prizes

Various medals, scholarships and prizes are open to graduating students. No application is required. Full details of these are set out in the Undergraduate Scholarships and Awards Calendar, available in the Student Affairs Office, Laird Hall, Room 108.

McGill University, Undergraduate Programs 2007-2008 387
13.6 Academic Programs

13.6.1 Department of Agricultural Economics

Macdonald Stewart Building – Room MS-3040
Telephone: (514) 398-7820
Fax: (514) 398-8130
Website: www.agreenv.mcgill.ca/agrecon

Program Director — John C. Henning
Assistant Professor — Anwar Naseem
Associate Professors — John C. Henning, Paul Thomassin

See "Department of Natural Resource Sciences", section 13.6.6, for Agricultural Economics Programs.

13.6.2 Department of Animal Science

Macdonald Stewart Building - Room MS1-084
Telephone: (514) 398-7794
Fax: (514) 398-7964
E-mail: animal.science@mcgill.ca
Website: www.mcgill.ca/animal

Chair — TBA
Emeritus Professor — John E. Moxley, Roger B. Buckland
Professors — Kwet Fane Ng Kwai Hang, Flannan Hayes, Urs Kuhnlein, Xin Zhao (James McGill Professor)
Associate Professors — Roger I. Cue, Humberto G. Monardes, Arif Mustafa (William Dawson Scholar), Leroy E. Phillip, Kevin Wade, David Zadworny
Assistant Professors — Vilceu Bordignon, Sarah Kimmins, Ciro Ruiz-Feria
Associate Member — Ri-Cheng Chian
Adjunct Professors — Herman Baldassare, Pierre Lacasse, Daniel Lefebvre, Bruce Murphy

The Department of Animal Science offers Majors in Animal Science and Animal Biology.

ANIMAL SCIENCE MAJOR

Academic Advisers: J.F. Hayes (U1), D. Zadworny (U2), V. Bordignon (U3)

The curriculum in Animal Science involves intensive training in both the basic and applied biological sciences as related to domestic animals and qualifies the graduate for membership in the Ordre des agronomes du Québec and other professional organizations. Graduates generally enter agricultural industries, mainly sales and marketing, government service (Provincial or Federal), extension, teaching or postgraduate studies. Some students go on to study veterinary medicine.

Required Courses: 63 credits
Complementary Courses: 6 credits
Electives: 21 credits to meet the minimum credit requirement for the degree

ANSC 454 Swine Production 3
ANSC 456 Poultry Production 3
ANSC 485 Seminar 1 1
ANSC 496 Seminar 2 1
BREE 322 Organic Waste Management 3
FDSC 211 Biochemistry 1 3
MICR 230 Introductory Microbiology 3
PLNT 211 Principles of Plant Science 3
SOIL 210 Principles of Soil Science 3
WILD 375 Issues: Environmental Sciences 3

Complementary Courses: 6 credits
One Ethics course: 3
ENVR 203 (3) Knowledge, Ethics and Environment or RELG 270 (3) Religious Ethics and the Environment
One additional Economics course 3

ANIMAL BIOLOGY MAJOR

Academic Adviser: H. Monardes

The Animal Biology Major is directed towards students who wish to further their studies in the basic biology of the larger mammals and birds. Successful completion of the program will enable students to qualify in applying to most professional schools in North America, to postgraduate schools in a variety of biological-oriented programs, and to work in most laboratory settings. The program is not intended for students wishing to become professional agrologists.

Required Courses: 34 credits
Complementary Courses: 24 credits, minimum
Electives: To meet the minimum credit requirement for the degree

ANSC 250 Principles of Animal Science 3
ANSC 251 Comparative Anatomy 3
ANSC 323 Mammalian Physiology 4
ANSC 330 Fundamentals of Nutrition 3
ANSC 324 Biochemistry 2
ANSC 496 Seminar 2 1
CELL 204 Genetics 4
FDSC 211 Biochemistry 1 3
MICR 230 Introductory Microbiology 3

Complementary Courses: 24 credits
A minimum of 24 credits selected from the following list in consultation with the Academic Adviser:

ANSC 301 (3) Principles of Animal Breeding
ANSC 312 (3) Animal Health and Disease
ANSC 324 (3) Animal Reproduction
ANSC 400 (3) Eukaryotic Cells and Viruses
ANSC 424 (3) Metabolic Endocrinology
ANSC 433 (3) Animal Nutrition
ANSC 560 (3) Biology of Lactation
MICR 341 (3) Mechanisms of Pathogenicity
ENTO 550 (3) Veterinary and Medical Entomology
PARA 438 (3) Immunology
WILD 307 (3) Natural History of Vertebrates
WILD 311 (3) Ethology
WILD 410 (3) Wildlife Ecology
WILD 424 (3) Parasitology
WILD 350 (3) Mammalogy
The student may replace up to 12 credits of the complementary courses listed above by choosing, with the student adviser’s approval, any course offerings (300 level or higher) in Anatomy and Cell Biology, Biochemistry, Biology, Microbiology and Immunology, Neurology and Neurosurgery, Pharmacology and Therapeutics, Physiology, and Psychology. Any prerequisites for these courses must be taken as electives.

13.6.3 Department of Bioresource Engineering

Macdonald Stewart Building – Room MS1-027
Telephone: (514) 398-7773
Fax: (514) 398-8387
E-mail: robert.kok@mcgill.ca
Website: www.mcgill.ca/agreng

Chair — Robert Kok
Emeritus Professor — Robert S. Broughton
Professors — Suzelle Barrington, Robert Kok, Chandra Madramootoo (James McGill Professor), Edward McKyes, Shiv O. Prasher (James McGill Professor), G.S. Vijaya Raghavan (James McGill Professor)
Associate Professors — Robert B. Bonnell (Brace Centre for Water Resources Management), Michael O. Ngadi (William Dawson Scholar)
Adjunct Professors — S. Guiot, C. Vigneault

BIORESOURCE ENGINEERING MAJOR

The Department of Bioresource Engineering collaborates with other departments and the Faculty of Engineering in providing courses of instruction for a curriculum in Bioresource Engineering. Graduates qualify to apply for registration as professional engineers in any province of Canada.

There are four streams offered within the Bioresource Engineering Major. Via the appropriate choice of elective course sets, a particular area of study may be emphasized.

In the Bio-Environmental Engineering stream students learn about soil and water quality management and conservation, geomatics, hydrology and water resources, organic waste treatment, use of GIS for biosystem operation, engineering for land development, climate control in buildings, ecosystem remediation, and many other related topics.

Students who follow the Soil and Water stream learn about hydrology, irrigation and drainage, soil and water management, environmental quality control and remediation, structural design, machinery design, artificial intelligence, GIS, and remote sensing.

In the Food and Bioprocessing stream students are taught about the engineering of foods and food processes, physical properties of biological materials, post-harvesting technology, fermentation and bio-processing, the management of organic wastes, biotechnology, the design of machinery for bioprocessing, etc.

Students who specialize in the Agricultural Engineering stream will learn about machine design, machinery, robotics, structural design, environmental quality control, waste management, artificial intelligence, GIS, remote sensing, complex system simulation, and much more.

All required and complementary courses must be passed with a minimum grade of C. One term is spent taking courses from the Faculty of Engineering on the McGill downtown campus.

Students also have the opportunity to pursue a Minor. Several possibilities are: Agricultural Production, Environment, Ecological Agriculture, Biotechnology, Computer Science, Construction Engineering and Management, Entrepreneurship, and Environmental Engineering. Details of some of these Minors can be found in the Faculty of Engineering "Minor Programs", section 8.6. To complete a Minor, it is necessary to spend at least one extra term beyond the normal requirements of the B.Eng.(Bioresource) program.

Required Courses: 53 credits

Complementary Courses: 60 credits

Complementary Courses:

Set A (6 credits):
One of the following:
- AEMA 310 (3) Statistical Methods 1
- CIVE 302 (3) Probabilistic Systems
- MATH 323 (3) Probability

One of the following:
- CHEE 315 (4) Heat and Mass Transfer
- MECH 346 (3) Heat Transfer

Set B - Basic Sciences (9 credits):
9 credits from the following, with at least 3 credits chosen from:
- AEBI 202 (3) Cellular Biology
- FDSC 211 (3) Biochemistry 1
- MICR 230 (3) Introductory Microbiology
- PLNT 201 (3) Comparative Plant Biology
- WILD 200 (3) Comparative Zoology
- WILD 205 (3) Principles of Ecology

and the remainder, if any, chosen from:
- AGRI 340 (3) Principles of Ecological Agriculture
- ANSC 250 (3) Principles of Animal Science
- FDSC 200 (3) Introduction to Food Science
- GEOG 203 (3) Environmental Systems
- NRSC 201 (3) Introductory Meteorology
- NRSC 333 (3) Physical and Biological Aspects of Pollution
- NRSC 437 (3) Assessing Environmental Impact
- NRSC 510 (3) Agricultural Micrometeorology
- PLNT 211 (3) Principles of Plant Science
- PLNT 300 (3) Cropping Systems
- PLNT 322 (3) Greenhouse Management
- PLNT 421 (3) Landscape Plant Materials
- SOIL 210 (3) Principles of Soil Science
- SOIL 331 (3) Soil Physics
- SOIL 410 (3) Soil Chemistry

Set C - Social Sciences (9 credits):
One 3-credit course on the impact of technology on society from the following list:
- CHEE 230 (3) Environmental Aspects of Technology
13.6.4 School of Dietetics and Human Nutrition

Macdonald Stewart Building – Room MS2-039
Telephone: (514) 398-7840
Fax: (514) 398-7739
E-mail: nutrition.dietetics@mcgill.ca
Website: www.mcgill.ca/dietetics

Director — Kristine G. Koski

Emeritus Professor — Helen R. Neilson

Professors — Timothy A. Johns, Harriet V. Kuhnlein, Luis B. Agellon

Associate Professors — Grace Egeland (Canada Research Chair), Katherine Gray-Donald, Kristine G. Koski, Stan Kubow, Louise Thibault, Hope Weiler (Canada Research Chair), Linda Wykes (William Dawson Scholar), Grace S. Marquis (Canada Research Chair)

Lecturers — Peter Bender (PT), Lynda Fraser (PT), Mary Hendrickson, Linda Jacobs Starkey, Maureen Rose, Joane Routhier, Sandy Phillips, Hugues Plourde, Heidi Ritter

Adjunct Professors — Mary l’Abbe, Laurie Chan, Kevin A. Cockell, Edward Farnsworth, Peter J.H. Jones

Cross-Appointed Staff —
Food Science and Agricultural Chemistry: Selim Kermasha
Medicine: Louis Beaumier, Franco Carli, Réjeanne Gougeon, L. John Hofer, Errol Marliss, Thomas Schricker, Jean-François Yale
Parasitology: Marilyn E. Scott
MUHC: Sonya Page

Health and well-being of individuals in relation to food choices and physiological status prevails as the unifying theme of the programs in the School of Dietetics and Human Nutrition. The availability of food, normal metabolism and clinical nutrition, community nutrition at the local and international level, the evaluation of nutritional products and their use in nutrition, and the communication of information about food and health form the core of academic programs.

DIETETICS MAJOR

Academic Advising Coordinator: Linda Jacobs Starkey, Ph.D., RD, FDC

Graduates are qualified for challenging professional and leadership positions related to food and health, as dietitians, nutritionists and food administrators. The designations “Dietitian” and “Nutritionist” are indicators of reserved titles and reserved acts in the province of Quebec. As clinical nutritionists, dietitians may work in health-care settings and food service centres, nutrition counselling centres, clinics and private practice. As community nutritionists, dietitians are involved in nutrition education programs through school boards, sports centres and local and international health agencies. The dietitian in the food service sector participates in all aspects of management to assure quality food products. Postgraduate programs are available to qualified graduates. The duration of the program is three and one-half years.

Successful graduates are qualified for membership in Dietitians of Canada and the l’Ordre professionnel des diététistes du Québec. Forty weeks of supervised professional experience in clinical and community nutrition and food service systems management are included.

Required Courses: 100 credits

Note: The School firmly applies prerequisite requirements for registration in all required courses in the Dietetics Major. All required and complementary courses must be passed with a minimum grade of C.
**Electives:** 9 credits to meet the minimum credit requirements for the degree.

**Two Complementary Courses are to be selected from the following, as specified:**

- 3 credits of Human Behavioural Science courses chosen from: NUTR 301 (3) Psychology
- or equivalent course from another faculty.
- 3 credits from the social sciences:
  - AGEC 200 (3) Principles of Microeconomics
  - AGEC 230 (3) Agricultural and Food Marketing
  - ENV 201 (3) Society and Environment
  - ENV 203 (3) Knowledge, Ethics and Environment
  - RELG 270 (3) Religious Ethics and the Environment
- or equivalent courses from another faculty.

**Elective Courses:**

- The following courses most often fit the timetable; elective choice is not limited to these courses:
  - FDSC 200 (3) Introduction to Food Science
  - FDSC 212 (3) Bioseparation Techniques
  - FDSC 425 (3) Principles of Quality Assurance
  - NUTR 420 (3) Toxicology and Health Risks
  - NUTR 430 (3) Directed Studies: Dietetics and Nutrition

- NUTR 451 (3) Analysis of Nutrition Data
- NUTR 501 (3) Nutrition in Developing Countries
- NUTR 503 (3) Bioenergetics and the Lifespan
- NUTR 511 (3) Nutrition and Behaviour
- NUTR 512 (3) Herbs, Foods and Phytochemicals

* Successful completion of all component parts of each level of Stage (Professional Practice) in Dietetics courses is a prerequisite for the next level and must be passed with a minimum grade of C. Undergraduate registration is restricted to students in the Dietetics Major, CGPA greater than or equal to 2.50. Visiting students must contact the Academic Advising Coordinator (Dietetics) regarding course registration eligibility.

Students are reminded that ethical conduct on Professional Practice (Stage) rotations is required. The Faculty reserves the right to require the withdrawal of any student at any time if it (Faculty) feels the student has displayed unprofessional conduct or demonstrates incompetence.

**A compulsory immunization program exists at McGill which is required for Dietetics students to practice. Students should complete their immunization before arriving at Macdonald Campus; medical/health documentation must be received prior to commencement of Stage.**

**NUTRITION MAJOR**

Academic Advising Coordinator: Kristine G. Koski, Ph.D., RD (USA)

This Major covers the many aspects of human nutrition and food and gives first, an education in the scientific fundamentals of these disciplines and second, an opportunity to focus in (a) nutritional biochemistry and metabolism, (b) global nutrition issues, (c) food function, product development and safety and/or (d) sports nutrition. Graduates are qualified for careers in pharmaceutical and/or food industries or government laboratories, the health science communications field, sports clinics and national or international food support programs. Graduates often continue on to further studies preparing for careers in research, medicine, and dentistry or as specialists in nutrition. Aside from working as university teachers and researchers, postgraduates may be employed by government and health protection agencies, in world development programs or in the food sector.

(CURRENTLY UNDER REVISION.)

**Required Courses:** 55 credits

All required courses must be passed with a minimum grade of C.

**Complementary Courses:** 15/16 credits

**Electives:** 17/18 credits to meet the minimum credit requirement for the degree. Reciprocal agreement allows all students to take a limited number of electives at any Quebec university. With prior approval students can take electives at any Canadian or international university.

MINOR IN HUMAN NUTRITION
Academic Adviser: Linda Wykes, Ph.D.

The Minor in Human Nutrition is intended to complement a student’s primary field of study by providing a focused introduction to the metabolic aspects of human nutrition. It is particularly accessible to students in Biochemistry, Biology, Physiology, Anatomy and Cell Biology, Microbiology and Immunology, Animal Science or Food Science programs. The completion of 24 credits is required, of which at least 18 must not overlap with the primary program. All courses must be taken in the appropriate sequence and passed with a minimum grade of C. Students may declare their intent to follow the Minor program at the beginning of their U2 year. They must then consult with the Academic Adviser for the Human Nutrition Minor in the School of Dietetics and Human Nutrition to obtain approval for their course selection. Since some courses may not be offered every year, students are urged to prepare their program of study well before their final year.

The Minor program does not carry professional recognition; however, successful completion may enable students to qualify for many postgraduate nutrition programs. The completion of 24 credits is required, of which at least 18 must not overlap with the primary program. All courses must be taken in the appropriate sequence and passed with a minimum grade of C. Students may declare their intent to follow the Minor program at the beginning of their U2 year. They must then consult with the Academic Adviser for the Human Nutrition Minor in the School of Dietetics and Human Nutrition to obtain approval for their course selection. Since some courses may not be offered every year, students are urged to prepare their program of study well before their final year.

Notes:
1. Most courses listed at the 300 level and higher have prerequisites. Although instructors may waive prerequisite(s) in some cases, students are urged to prepare their program of study well before their final year.
2. Some courses may not be offered every year. For information on available courses, consult Class Schedule at www.mcgill.ca/minerva; complete listings can be found in the Courses section of this Calendar.

Chair — Selim Kermasha

Associate Professors — Ashraf A. Ismail, Selim Kermasha, Benjamin K. Simpson, Varoujan Yaylayan
Adjunct Professors — John W. Austin, Byong H. Lee, Yasuo Konishi, Michèle Marcotte, J.R. Jocelyn Paré

FOOD SCIENCE MAJOR
This program is intended for those students interested in the multidisciplinary field of food science. The courses are integrated to acquaint the student with food processing, food chemistry, quality assurance, analytical procedures, food products, standards and regulations. The program prepares graduates for employment as scientists in industry or government, in regulatory, research, quality assurance, or product development capacities.

Graduates have the academic qualifications for membership in the Canadian Institute of Food Science and Technology. Graduates can also qualify for recognition by the Institute of Food Technologists (IFT) and the Ordre des chimistes du Québec (OCQ) by selection of an appropriate option.

All options are completed to 90 credits with free elective courses.

Required Courses: 54 or 81 credits
Electives: selected in consultation with Academic Adviser, to meet the minimum 90-credit requirement for the degree. A portion of these credits should be in the humanities/social sciences.

Required Courses Common to all 3 Options: 42
AEMA 310 Statistical Methods 1 3
BREE 324 Elements of Food Engineering 3
FDSC 200 Introduction to Food Science 3
FDSC 211 Biochemistry 1 3
FDSC 251 Food Chemistry 1 3
FDSC 300 Principles of Food Analysis 1 3
FDSC 310 Post Harvest Fruit and Vegetable Technology 3
FDSC 330 Food Processing 3
FDSC 400 Food Packaging 3
FDSC 425 Principles of Quality Assurance 3
FDSC 442 Food Microbiology 3
FDSC 495 Food Science Seminar 3
MICR 230 Introductory Microbiology 3
NUTR 207 Nutrition and Health 3
* If an introductory CEGEP level Organic Chemistry course has not been completed, then FDSC 230 (Organic Chemistry) must be completed as a replacement.

Food Chemistry Option (OCQ & IFT) Additional Required Credits 39
AGRI 510 Professional Practice 3
FDSC 212 Bioseparation Techniques 3
FDSC 213 Analytical Chemistry 1 3
FDSC 233 Physical Chemistry 3
FDSC 305 Food Chemistry 2 3
FDSC 315 Separation Techniques in Food Analysis 3
FDSC 319 Food Commodities 3
FDSC 334 Analysis of Food Toxins and Toxicants 3
FDSC 410 Flavour Chemistry 3
FDSC 490 Research Project 1 3
FDSC 491 Research Project 2 3
FDSC 510 Food Hydrocolloid Chemistry 3
FDSC 520 Biophysical Chemistry of Food 3

Food Science Option Additional Required Credits 12
FDSC 213 Analytical Chemistry 1 3
FDSC 305 Food Chemistry 2 3
FDSC 315 Separation Techniques in Food Analysis 3
FDSC 319 Food Commodities 3

Food Industry Option Additional Required Credits 12
AGEC 242 Management Theories and Practices 3
AGEC 344 Entrepreneurial Leadership 3
BTEC 502 Biotechnology Ethics and Society 3
FDSC 233 Physical Chemistry 3

Complementary Courses 12
Students completing the Food Science or Food Industry options complete 12 credits of complementsaries.

AGRI 510 Professional Practice 3
BREE 530 Fermentation Engineering 3
FDSC 212 Bioseparation Techniques 3
FDSC 213 Analytical Chemistry 1 3
FDSC 233 Physical Chemistry 3
FDSC 319 Food Commodities 3
FDSC 334 Analysis of Food Toxins and Toxicants 3
FDSC 410 Flavour Chemistry 3
FDSC 515 Enzyme Thermodynamics/Kinetics 3
FDSC 519 Advanced Food Processing 3
FDSC 520 Biophysical Chemistry of Food 3
FDSC 535 Food Biotechnology 3
FDSC 536 Food Traceability 3
FDSC 537 Nutraceutical Chemistry 3
NUTR 420 Toxicology and Health Risks 3
NUTR 512 Herbs, Foods and Phytochemicals 3

Certificate in Food Science

Academic Adviser: Hosahalli S. Ramaswamy
This 30 credit program will appeal to mature students who have a first degree in a science-related discipline. Students must complete the Introduction to Food Science, Food Microbiology and Quality Assurance courses, at least three food chemistry/analysis courses, two processing/engineering courses, and at least one course in communication skills, ethics or business skills. Entry to this program is permitted only in September.

Required Courses: 9 credits

Food Chemistry Option (OCQ & IFT) Additional Required Credits 39
AGRI 510 Professional Practice 3
FDSC 212 Bioseparation Techniques 3
FDSC 213 Analytical Chemistry 1 3
FDSC 233 Physical Chemistry 3

FDSC 315 Separation Techniques in Food Analysis 3
FDSC 319 Food Commodities 3
FDSC 334 Analysis of Food Toxins and Toxicants 3
FDSC 410 Flavour Chemistry 3
FDSC 490 Research Project 1 3
FDSC 491 Research Project 2 3
FDSC 510 Food Hydrocolloid Chemistry 3
FDSC 520 Biophysical Chemistry of Food 3

Food Science Option Additional Required Credits 12
FDSC 213 Analytical Chemistry 1 3
FDSC 305 Food Chemistry 2 3
FDSC 315 Separation Techniques in Food Analysis 3
FDSC 319 Food Commodities 3

Food Industry Option Additional Required Credits 12
AGEC 242 Management Theories and Practices 3
AGEC 344 Entrepreneurial Leadership 3
BTEC 502 Biotechnology Ethics and Society 3
FDSC 233 Physical Chemistry 3

Complementary Courses 21
At least 9 credits from the following:
FDSC 251 Food Chemistry 1 3
FDSC 300 Principles of Food Analysis 1 3
FDSC 305 Food Chemistry 2 3
FDSC 315 Separation Techniques in Food Analysis 3
FDSC 319 Food Commodities 3
At least 6 credits from the following:
BREE 324 Elements of Food Engineering 3
FDSC 310 Post Harvest Fruit and Vegetable Technology 3
FDSC 330 Food Processing 3
At least 3 credits from the following:
AGEC 242 Management Theories and Practices 3
AGEC 344 Entrepreneurial Leadership 3
AGRI 510 Professional Practice 3
FDSC 536 Food Traceability 3
NUTR 322 Applied Sciences Communication 3

13.6.6 Department of Natural Resource Sciences
AGRICULTURAL ECONOMICS MAJOR

Increasingly complex economic problems facing the agriculture and food system and our natural environment have intensified the need for specialized knowledge and training in the field of agricultural economics. The curriculum is designed to provide students with the knowledge, analytical and decision-making skills required in a career in agribusiness, resource management, international development, and research. The selection of courses from the agribusiness, agricultural system or natural resource economics options permits a degree of specialization along those lines, in conjunction with the core courses listed below.

Graduates are eligible to apply for membership in the Ordre des agronomes du Québec (OAQ) if they fulfill the agronomic course requirements (consult the academic adviser).

Core Required Courses: 39 credits

AGROBUSINESS OPTION

Whether one has interests in agricultural supply, production, marketing, finance, food processing or retailing, professional management skills are the key to success. The agribusiness option prepares students for managerial responsibility by drawing on the resources of both the Desautels Faculty of Management and the Faculty of Agricultural and Environmental Sciences. This special partnership provides students with not only a first-class business training but also a specialization in the field of agriculture.

AGRICULTURAL SYSTEMS OPTION

The smooth functioning of the agriculture and food system requires good market analysis and appropriate policy and program development and management in the public sector. Agricultural economists are called upon to perform these tasks, utilizing their knowledge of the economic forces that affect the industry and the methods of analysis to predict the outcome of the numerous changes that occur. The agricultural systems orientation is intended to provide students with a broad understanding of the many dimensions of agriculture and food systems, including economic development, international agriculture, and food and agricultural policy.

NATURAL RESOURCE ECONOMICS OPTION

This option integrates biological sciences and environmental decision making with the economics of natural resource use and development. The natural resource economics option is intended to prepare students for careers in the management of natural resources and the analysis of natural resource problems and policies.

MINOR IN AGRICULTURAL ECONOMICS

A Minor in Agricultural Economics will complement a student’s education in four ways. First, as a social science, Economics will
provide an alternative perspective for students in the Faculty. Second, the Minor will provide an excellent foundation of the workings of the economy at large. Third, it will aid students to understand the business environment surrounding the agri-food industry. Finally, it will challenge students to analyze the interaction between the agricultural economy and the natural resource base.

General Regulations:
To obtain a Minor in Agricultural Economics, students must:

a) Ensure that their academic record at the University includes a C grade or higher in the courses specified in the course requirements below.

b) Complete a minimum total of 24 credits from the courses given below, of which not more than 6 credits may be counted for elective courses in the Major program.

Required Courses: 12 credits
Complementary Courses: 12 credits

MINOR IN ENTREPRENEURSHIP

Academic Adviser: Robert Oxley or Paul Thomassin

Note: the Certificate in Entrepreneurship is under revision; please consult your Academic Adviser.

The Minor in Entrepreneurship is concerned with the genesis and development of entrepreneurial activities. It deals with marketing, finance, organization, and policy in the development and expansion of small businesses in the agri-food and environment sectors. This 24-credit Minor will be of interest to students who already hold a bachelor’s degree and wish to develop the skills and perspectives necessary to be successful in an entrepreneurial environment, whether they be self-employed in a start-up business or within an established corporation that employs entrepreneurial management strategies.

Students holding a B.Sc. in agriculture or a related area are eligible for admission to the Faculty. Students who have completed the Minor in Entrepreneurship are not permitted to register for this program.

General Regulations
To obtain a Certificate in Entrepreneurship, students must complete a minimum of 30 credits from the courses as given below.

Required Courses: 27 credits

APPLIED ZOOLOGY MAJOR

Academic Advisers: Professor T. A. Wheeler (U1, U3), C. Buddle (U2)

The great diversity of animals form the focus of this Major, from the invertebrates, with their many beneficial and pest insects, to vertebrates, including fish and wildlife. The interaction of animals with each other and with human populations is stressed. By careful course selection students may emphasize life in soils or water, entomology, physiology, parasitology or vertebrate biology and ecology. Career opportunities exist in both the public and private sectors.
sectors in research, program development and implementation, pest control, wildlife management, etc.

**Required Courses:** 27 credits

**Complementary Courses:** 36 credits

**Electives:** To meet the minimum credit requirement for the degree.

**CREDITS**

**Required Courses:** 27

- AEBI 202 Cellular Biology 3
- AEMA 310 Statistical Methods 1 3
- CELL 204 Genetics 4
- FDSC 211 Biochemistry 1 3
- NRSC 491 Scientific Communication 1 1

- WILD 410 (3) Wildlife Ecology

\(^1\) Downtown Campus

**MACDONALD SUMMER FIELD COURSE:**

One course is available during Summer Session that provides students the opportunity to participate in supervised field research concerning soil, flora and fauna not easily studied at other times of the year, and to apply knowledge from the classroom to environmental issues in the field.

NRSC 384 (3) Field Research Project

---

**ENVIRONMENTAL BIOLOGY MAJOR**

Academic Advisers: Professors E. Bennett (U3), I. Strachan(U1, U2)

This program provides scientists with basic knowledge in Biology and strong emphasis in Ecology. As ecologists they will be equipped to investigate the scientific aspects of the relationships between organisms and their environment.

**Required Courses:** 27 credits

**Complementary Courses:** 30 credits

**Electives:** To meet the minimum credit requirement for the degree.

**CREDITS**

**Required Courses:** 27

- AEBI 202 Cellular Biology 3
- AEMA 310 Statistical Methods 1 3

- WILD 401 (4) Fisheries and Wildlife Management
- WILD 410 (3) Wildlife Ecology
- WILD 475 (3) Desert Ecology
- WOOD 410 (3) The Forest Ecosystem
- WOOD 420 (3) Environmental Issues: Forestry

With the permission of the Academic Adviser and the Committee on Academic Standing, ecological or environmental courses offered on the Downtown Campus may be substituted for those appearing in the above list of Complementary Courses.

**MICROBIOLOGY MAJOR**

Academic Advisers: Professors L. Whyte (U2), B. Driscoll (U3), D. Niven (U1)

Students receive training in fundamental principles and applied aspects of Microbiology, choosing one of the three options: Biotechnology, Ecology or Environment. Successful graduates are competent to work in university, government and industrial research laboratories and in the pharmaceutical, fermentation and food industries.
**Electives:** To meet the minimum credit requirement for the degree.

- WILD 210 (3) Principles of Soil Science
WILDLIFE BIOLOGY MAJOR
Academic Advisers: Professors D. Bird (U2), M. Humphries (U3), R. Titman (U1)

This program emphasizes understanding the ecology of vertebrate animals, their biological and physical environment and the interactions that are important in the management of ecological communities and wildlife species. Employment opportunities exist in resource planning, nature interpretation, wildlife management and environmental impact assessment. By careful course selection students may meet requirements for certification by the Wildlife Society.

Required Courses: 37 credits

Electives: To meet the minimum credit requirement for the degree

CREDITS

Required Courses: 34

AEMA 310 (3) Statistical Methods
CELL 204 (3) Genetics
FDSC 211 (3) Biochemistry
NRSC 491 (1) Scientific Communication
NRSC 492 (1) Scientific Communication 2
PLNT 201 (3) Comparative Plant Biology
PLNT 358 (3) Flowering Plant Diversity
WILD 200 (3) Comparative Zoology
WILD 205 (3) Principles of Ecology
WILD 212 (3) Evolution and Systematics
WILD 307 (3) Natural History of Vertebrates
WILD 401 (4) Fisheries and Wildlife Management

Complementary Courses: 27

9 credits from List A (Organismal Biology)
BIOL 327 (3) Herpetology
WILD 311 (3) Ethology
WILD 350 (3) Mammalogy
WILD 420 (3) Ornithology
WILD 424 (3) Parasitology

18 credits from List B (Integration and Applications)
AEMA 306 (3) Mathematical Methods in Ecology
AGEC 333 (3) Resource Economics
ANSC 323 (4) Mammalian Physiology
BIOL 465 (3) Conservation Biology
NRSC 315 (3) Science of Inland Waters
NRSC 437 (3) Assessing Environmental Impact
NRSC 497 (2) Research Project 1
NRSC 498 (3) Research Project 2
NUTR 420 (3) Toxicology and Health Risks
PLNT 460 (3) Plant Ecology
WILD 313 (3) Phylogeny and Zoogeography
WILD 382 (3) Fish and Wildlife Propagation
WILD 415 (2) Conservation Law
WILD 421 (3) Wildlife Conservation
WILD 475 (3) Desert Ecology
WOOD 410 (3) The Forest Ecosystem
WOOD 441 (3) Integrated Forest Management

Electives: To meet the minimum credit requirement for the degree.

Note: Courses marked with an asterisk (*) are offered on the downtown campus.

Required Courses: 42 credits

Complementary Courses: 18 credits, selected from an approved list in consultation with the Academic Adviser; taken in either the Ecology or the Molecular Option.

Electives: To meet the minimum credit requirement for the degree.

Note: Courses marked with an asterisk (*) are offered on the downtown campus.

CREDITS

Required Courses: 41

AEBI 202 (3) Cellular Biology
AEMA 310 (3) Statistical Methods
CELL 204 (3) Genetics
FDSC 211 (3) Biochemistry

PLNT 496 (3) Seminar 2
WILD 200 (3) Comparative Zoology
WILD 205 (3) Principles of Ecology

Complementary Courses 18

Either the Ecology Option or the Molecular Option

Ecology Option: 18

at least 12 credits must be chosen from the following:
AEMA 306 (3) Mathematical Methods in Ecology
AGRI 340 (3) Principles of Ecological Agriculture
*BIOI 324 (3) Ecological Genetics
*BIOI 331 (3) Ecology/Behaviour Field Course
*BIOI 334 (3) Applied Tropical Ecology
*BIOI 465 (3) Conservation Biology
The Plant Science Major offers intensive training in agricultural plant science. Comprehensive studies are offered in all aspects of biology and production practices related to important crop plant species. Studies include laboratory, greenhouse, and field exposure relating to agronomic, horticultural, or field crop development, production, and management.

Graduates are eligible to apply for membership in the Ordre des agronomes du Québec (OAQ) and the Agricultural Institute of Canada (AIC). Graduates rapidly find employment in agricultural industries, government services, extension, consulting, teaching, or go on to do postgraduate research.

Required Courses: 49 credits

Electives: To meet the minimum credit requirement for the degree.

PLANT SCIENCE MAJOR
Academic Adviser: Professor J. Bede
E-mail: jacqueline.bede@mcgill.ca

Required Courses: CREDITS
AEMA 310 Statistical Methods 1 3
ANSC 200 Principles of Microeconomics 3
ANSC 250 Principles of Animal Science 3
CELL 204 Genetics 4
FDSC 211 Biochemistry 1 3

PLNT 344 (1) Horticulture - Salad Crops
PLNT 345 (1) Horticulture - Solanaceous Crops
PLNT 346 (1) Horticulture - Temperate Fruits
PLNT 347 (1) Horticulture - Small Fruits
PLNT 348 (1) The Brassicas
PLNT 421 (3) Landscape Plant Materials
PLNT 460 (3) Plant Ecology
PLNT 535 (3) Plant Breeding

MINOR IN AGRICULTURAL PRODUCTION
Academic Adviser: Professor K. A. Stewart
E-mail: katrine.stewart@mcgill.ca

This Minor program is designed to allow students in non-agricultural production Majors to receive credit for courses in agricultural production and to stimulate “cross-over” studies. The Minor can be associated with existing Major programs in the Faculty, but in some instances it may require more than 90 credits to meet the requirements of both the Major and the Minor.

Students are advised to consult their Major Program adviser and the Academic Adviser of the Minor in their first year. At the time of registration for their penultimate year, students must declare their intent to obtain a Minor in Agricultural Production. With the agreement of their Major Program adviser they must submit their program of courses already taken, and to be taken in their final year, to the Academic Adviser of the Agricultural Production Minor. The Academic Adviser of the Agricultural Production Minor will then certify which courses the student will apply toward the Minor and that the student's program conforms with the requirements of the Minor.

General Regulations
To obtain a Minor in Agricultural Production, students must:

a) ensure that their academic record at the University includes a C grade or higher in the courses as specified in the course requirements given below.
b) offer a minimum total of 24 credits from the courses as given below, of which not more than 6 credits may be counted for...
both the Major and the Minor programs. This restriction does not apply to elective courses in the Major program.

Required Courses: 12 credits
Complementary Courses: 12 credits

Required Courses:
- ANSC 250 Principles of Animal Science 3
- PLNT 211 Principles of Plant Science 3
- PLNT 300 Cropping Systems 3
- SOIL 210 Principles of Soil Science 3

Complementary Courses: 12 credits
- ANSC 450 (3) Dairy Cattle Production
- ANSC 452 (3) Beef Cattle and Sheep Production
- ANSC 454 (3) Swine Production
- ANSC 456 (3) Poultry Production
- PLNT 331 (3) Field Crops
- PLNT 341 (1) Horticulture - The Alliums
- PLNT 342 (1) Horticulture - Cole Crops
- PLNT 343 (1) Horticulture - Root Crops
- PLNT 344 (1) Horticulture - Salad Crops
- PLNT 345 (1) Horticulture - Solanaceous Crops
- PLNT 346 (1) Horticulture - Temperate Fruits
- PLNT 347 (1) Horticulture - Small Fruits
- PLNT 348 (1) The Brassicas

Notes:
1. Most courses listed at the 300 level and higher have prerequisites. Although instructors may waive prerequisite(s) in some cases, students are urged to prepare their program of study well before their final year.
2. Not all courses are offered every year. For information on available courses, consult Class Schedule at www.mcgill.ca/minerva; complete listings can be found in the Courses section of this Calendar.

MINOR IN ECOLOGICAL AGRICULTURE
Academic Adviser: Professor J. Henning

This Minor program is designed to focus on the principles underlying the practice of ecological agriculture and is suitable for students wishing to farm, do extension and government work, and those intending to pursue postgraduate studies in this field.

The Minor can be associated with existing Major programs in the Faculty, but in some instances it may require more than 90 credits to meet the requirements of both the Major and the Minor.

Students are advised, during the U1 year, to consult their Major Program adviser and the academic adviser of the Minor. At the time of registration for the U2 year, students must declare their intent to obtain the Minor. With the agreement of their Major Program adviser they must submit their program of courses already taken, and to be taken, to the academic adviser of the Minor. The academic adviser of the Minor will then certify which courses the student will apply toward the Minor and confirm that the student’s program conforms with the requirements of the Minor.

General Regulations
To obtain a Minor in Ecological Agriculture, students must:

a) Ensure that their academic record at the University includes a C grade or higher in the courses as specified in the course requirements given below.

b) Offer a minimum total of 24 credits from the courses as given below, of which not more than 6 credits may be counted for both the Major and the Minor programs. This restriction does not apply to elective courses in the Major program.

Required Courses: 9 credits
Complementary Courses: 21 credits

Required Courses:
- AGRI 210 Agro-Ecological History 3
- AGRI 340 Principles of Ecological Agriculture 3
- AGRI 341 Ecological Agriculture Systems 3

Complementary Courses: 21 credits
- AGRI 435 (3) Soil and Water Quality Management
- AGRI 435 (3) Agroenviron. Fertilizer Use
- AGRI 491D1 (1.5) Co-op Experience
- AGRI 491D2 (1.5) Co-op Experience
- SOIL 335 (3) Soil Ecology and Management
- SOIL 445 (3) Agroenviron. Fertilizer Use

with at least 3 credits chosen from: 3-6

and the remaining credits to be chosen from: 9-12

AGEC 333 (3) Resource Economics
AGRI 345 (3) Soil and Water Quality Management
AGRI 491D1 (1.5) Co-op Experience
AGRI 491D2 (1.5) Co-op Experience

INTERDISCIPLINARY STUDIES

ECOLOGICAL AGRICULTURE
Academic Adviser: Professor J. Henning

This 30-credit Certificate Program is very similar to the Minor Program and is designed to focus on the principles underlying the practice of ecological agriculture. The Certificate may be of special interest to professional agrologists who wish further training, as well as formal recognition that they have completed a coherent program of courses beyond their B.Sc. studies.

Students holding a B.Sc. in agriculture or a related area are eligible to register for this program provided that they are otherwise acceptable for admission to the University. Students who have completed the Minor in Ecological Agriculture are not permitted to register for this program.

General Regualtions
To obtain a Certificate in Ecological Agriculture, students must offer a minimum total of 30 credits from the courses as given below.

Required Courses: 9 credits
Complementary Courses: 15 credits

Required Courses:
- AGRI 210 Agro-Ecological History 3
- AGRI 340 Principles of Ecological Agriculture 3
- AGRI 341 Ecological Agriculture Systems 3

Complementary Courses: 15 credits
- AGRI 435 (3) Soil and Water Quality Management
- AGRI 435 (3) Agroenviron. Fertilizer Use
- AGRI 491D1 (1.5) Co-op Experience
- AGRI 491D2 (1.5) Co-op Experience
- SOIL 335 (3) Soil Ecology and Management
- SOIL 445 (3) Agroenviron. Fertilizer Use

with at least 3 credits chosen from: 3-6

and the remaining credits to be chosen from: 9-12

AGEC 333 (3) Resource Economics
AGRI 345 (3) Soil and Water Quality Management
AGRI 491D1 (1.5) Co-op Experience
AGRI 491D2 (1.5) Co-op Experience
AGRICULTURAL SCIENCES MAJORS

Academic Adviser: Katherine McClintock
Department of Plant Science
Telephone: (514) 398-7940

The Agricultural Sciences Majors are designed to provide students with a broad appreciation of the scientific and applied aspects of modern agriculture and the flexibility to pursue individual interests. During the summer months, students can gain valuable practical field experience (and obtain additional course credit) in the Agricultural Sciences Internship Major.

Students in the Agricultural Sciences Majors can enroll in the Agricultural Sciences Internship Major, Agricultural Sciences Major – General Option, or the Agricultural Sciences Major – Agricultural Biotechnology Option. As described for the Agricultural Sciences Major, or obtain more specialized experience by selecting the Ecological Agriculture, International Agriculture, Soil Sciences, or Agricultural Biotechnology Options.

AGRICULTURAL SCIENCES MAJOR – GENERAL OPTION (90 credits)

Required Courses: 49 credits

Complementary Courses: 22 credits

Electives: To meet the minimum credit requirement for the degree.

- PLNT 331 (3) Field Crops

At least one course in Agricultural Engineering:
- BREE 217 (3) Hydrology and Water Resources
- BREE 314 (3) Agri-Food Buildings
- BREE 322 (3) Organic Waste Management
- BREE 327 (3) Bio-Environmental Engineering

Choose 9 credits from the following list, with a maximum of 3 credits at the 200-level. Courses marked with an asterisk (*) are part of either the "Barbados Field Study Semester", section 15.2.2 or the "Panama Field Study Semester", section 15.2.3, and must be taken as part of the 15-credit field study semester.

Students should be aware that participation in AGRI 305 or an International Field Semester will entail extra cost.

As described for the Agricultural Sciences Major – Soil Science Option.

13.6.9 Field Studies

African Field Study Semester

The Department of Geography, Faculty of Science, coordinates the 15-credit interdisciplinary African Field Study Semester, see section 15.2.1 "African Field Study Semester".
1. to make our graduates competent in the exercise of their profession;
2. to help the student's integration into professional life;
3. to foster professional mobility;
4. to foster a need for continual development of professional knowledge.

Six academic terms are spent on the Macdonald Campus studying a sequence of courses in soil, plant science, animal science, engineering, economics and management. The first summer of the program includes a 13-week internship on an agricultural enterprise other than the home farm, or an agricultural business where the student learns the many skills and encounters the many problems related to modern commercial agriculture. Students prepare for their Enterprise internship during both academic semesters of Year 1 through two Farm Practice courses.

During the second summer, students are registered in Entrepreneurship 1, which involves agricultural enterprises. The students will be responsible for data collection to be used in their Farm Project and the Nutrient Management Plan 2 when they return to campus for the Fall semester. The internships and practicums will enable the students to relate their academic work to the reality of farming and the agri-food sector.

Finally, courses in English, Français, Humanities, Physical Education and two complementary courses taken during the program will entitle the student to receive a Diplôme d'études collégiales (DEC) from the Ministère de l'Éducation, du Loisir et du Sport du Québec. Students will also receive a certification from Macdonald Campus stating that they have successfully completed the requirements of the Farm Management and Technology Program.

13.8.2 Entrance Requirements – FMT
1. Students should have a good practical knowledge of farming under eastern Canadian conditions. One year of experience is recommended but under special conditions a four-month summer season is acceptable.
2. The minimum academic entrance requirements are a Quebec High School Leaving Certificate (Secondary V), or its equivalent and any other academic requirement set by the M.E.L.S.
3. All candidates for admission must make arrangements to come to the Macdonald Campus for an interview prior to admission to the program.
4. Admission to this program is only in the Fall semester.
5. We strongly encourage incoming students to acquire their driver’s permit (both for cars and farm equipment) before coming to Macdonald Campus. This is first for safety reasons, given that students work with farm equipment (Soil Preparation) very early on as they arrive at Macdonald. As well, most farmers require that their employees and stagiaires know how to drive and possess the appropriate driver’s license.

13.8.3 Registration – FMT
Students in the Farm Management and Technology Program must register on-line using Minerva at www.mcgill.ca/minerva-students for each semester at McGill.

Note: The University reserves the right to make changes without prior notice to the information contained in this publication, including the alteration of various fees, schedules, conditions of admission and credit requirements and the revision or cancellation of particular courses. In normal circumstances, individual courses will not be offered with less than five registrants.

**COMPLEMENTARY COURSES**

Students must take the following complementary courses to meet the program requirements:

- FMTP 096  Forests, Forestry and Society
- FMTP 097  Landscape Design

* After consultation with their academic adviser, students can substitute complementary courses taken at another collegial institution. This includes science courses which are required for further studies in a degree program. The cost associated with courses taken elsewhere must be assumed by the students.

**COMPREHENSIVE ASSESSMENT**

The objective of this examination is to ensure that students have attained the objectives and standards for each competency in the program. Successful completion of the Comprehensive Assessment is mandatory to obtain the D.E.C.

- The passing grade is 60%. The mark indicating that the student has successfully completed the Comprehensive Assessment will appear on the student's transcript.

**ENGLISH EXIT EXAMINATION**

All students who wish to graduate and obtain the D.E.C. must pass the English Exit Examination that is offered by the M.E.L.S. Students must take this examination on the date selected by the M.E.L.S.

**13.8.5  Academic Rules and Regulations – FMT**

**13.8.5.1  Sessional Dates**

The number of teaching and examination days is set by the Ministère de l'Éducation, du Loisir et du Sport du Québec. The sessional dates vary from year to year. At the present time, each semester has 75 teaching days and 7 days of exams.

**13.8.5.2  Last Day for Withdrawal or Course Additions**

The last day to make course registration changes for Fall term courses is September 20.

The last day to make course registration changes for Winter term courses is February 15.

**13.8.5.3  Academic Standing**

Attendance in class is compulsory. Students with attendance of less than 80% may not be permitted to write examinations. Examinations and other work in courses will be marked according to the percentage system. The minimum passing mark in a course is 60%.

- When a student's cumulative percent average (CPA) or semester percent average (SPA) first drops below 60%, or they fail four or more courses in a semester, withdrawal is advised. Students who choose to remain in the program are on probation.

- Students on probation are normally permitted to register for not more than 10 credits per semester. They are not permitted to be on probation for more than one semester unless they obtain a SPA of 70% or higher.

- Students who do not raise their CPA to 60% (or obtain a SPA of 70%) while on probation are not permitted to continue. They are required to withdraw from the Program for one year. If, after this period, students wish to be readmitted, they must apply in writing to the Director of the Program.

**13.8.5.4  Handbook on Student Rights and Responsibilities**

This Handbook is a compendium of regulations and policies governing student rights and responsibilities at McGill University. It is published jointly by the Dean of Students' Office and the Secretariat. A copy of the Handbook can be found on the Web at www.mcgill.ca/secretariat/handbooks/student or obtained from the Student Affairs Office or the Macdonald Campus Student Affairs Office.

**13.8.5.5  Institutional Policy on the Evaluation of Student Achievement**

The policy has the following objectives:

- to establish and explain the principles followed in evaluating student learning;
- to describe the means of translating these principles into practice and to establish the required procedures;
- to articulate the appropriate responsibilities of students, instructors, departments, and academic administrators;

McGill University, Undergraduate Programs 2007-2008 405
• to account to students, parents, universities and employers for the standards of learning at the campus;
• to create an environment of awareness and free discussion of pedagogical concerns within all segments of the campus community;
• to provide information which will allow students to more fully understand and participate in the educational process;
• to provide the framework within which instructors and academic administrators can exercise their professional judgment in a competent, just, and coherent fashion.

Copies are available in the Library and students are informed of it at registration.

13.8.6 Fees and Expenses – FMT

13.8.6.1 Fees

Tuition fees for all full-time students who are eligible for the Farm Management and Technology Program are paid by the ministère de l’Agriculture, des Pêcheries et de l’Alimentation du Québec. Students and Student Societies’ fees, as well as course material fees, will be charged according to the schedule in effect for all Macdonald Campus students. At the time of printing, the fees were $723.00 for the Fall semester and $578.40 for the Winter semester.

* 2007-08 fees, subject to change without notice.

13.8.6.2 Textbooks and Supplies

The cost of textbooks and supplies is estimated at $200.00 per semester.

13.8.6.3 Financial Assistance

A limited number of loans are granted on the basis of financial need to full-time students who maintain satisfactory academic standing, however, all applicants for McGill aid must apply for maximum government aid or other assistance for which they are eligible.

Applicants must arrange for an interview with the Loan Administrator for the Quebec region. During the academic year, the Administrator visits Macdonald Campus once a week to help students with financial difficulties.

For more information see "Scholarships and Student Aid", section 3.6, or contact the Student Services Centre, telephone (514) 398-7992. Applications for McGill loans are available on-line. Applicants must log-in to Minerva and visit Financial Aid to complete an application.

13.8.7 Residence Accommodation – FMT

The Laird Hall Residence has a capacity of 250 students. It accommodates undergraduate, graduate, and Farm Management and Technology Program students on the Macdonald Campus. For more information, see section 4.3.2 “University Residences – Macdonald Campus”.

13.9 Instructional Staff

Agellon, Luis B.; B.Sc., Ph.D. (McG.); Professor of Human Nutrition

Alli, Inteaz; B.Sc. (Guyana), M.Sc., Ph.D. (McG.); Professor of Food Science and Agricultural Chemistry

Barrington, Robert S.; B.S.A., B.A.Sc. (Tor.), S.M. (MIT), Ph.D. (McG.); Professor of Human Nutrition and Canada Research Chair (William Dawson Scholar)

Bird, David M.; B.Sc. (Guelph), M.Sc., Ph.D. (McG.); Fellow A.O.U.; Professor of Wildlife Biology and Director, Avian Science and Conservation Centre

Blackwood, A. Clark; B.Sc., M.Sc. (Alta.), Ph.D. (Wis.), F.R.S.C.; Emeritus Professor of Microbiology

Bonnett, Roger B.; B.Sc. (Agr.), M.Sc. (McG.), Ph.D. (McG.); Emeritus Professor of Animal Science

Buckland, Roger B.; B.Sc. (Agr.), M.Sc. (McG.), Ph.D. (McG.); Emeritus Professor of Animal Science

Budde, Christopher; B.Sc. (Guelph), Ph.D. (Alta.); Assistant Professor of Forest Wildlife Ecology

Buzas, Deborah J.I.; B.Sc. (Bath), Ph.D. (London); Professor of Plant Science

Côté, Benoît; B.Sc., Ph.D. (Laval); Associate Professor of Woodland Resources, Chair of Department of Natural Resource Sciences

Cue, Roger I.; B.Sc. (Newcastle, UK), Ph.D. (Edin.); Associate Professor of Animal Science

Curtis, Mark; B.Sc., M.Sc., Ph.D. (McG.); Associate Professor of Wildlife Biology

de Blois, Sylvie; B.Sc. (Agr.) (McG.), M.Sc., Ph.D. (Montr.), Assistant Professor of Plant Science and McGill School of Environment

Donnelly, Danielle J.; B.Sc. (Agr.) (McG.), M.Sc. (Br. Col.), Ph.D. (S. Fraser); Associate Professor of Plant Science

Driskell, Brian T.; B.Sc., Ph.D. (McM.); Associate Professor of Microbiology

Dunphy, Gary B.; B.Sc. (New Br.), M.Sc., Ph.D. (Nfld.); Associate Professor of Entomology

Dutilleul, Pierre R.; B.Sc., Ph.D. (Belgium); Professor of Statistics

Dzierszinski, Florence; Bacc. (Université de Lille I); M.Sc. (Université de Compiègne/Université de Lille I); Ph.D. (Université de Lille I); Assistant Professor of Parasitology

Egelund-Hovda, Grace M.; B.A. (Luther), Ph.D. (Pitt.); Associate Professor of Human Nutrition and Canada Research Chair

Elyett, William R.; B.A. (Sir G. Wms.), B.Ed. (P.E.) (McG.); Faculty Lecturer, Farm Management and Technology Program and Director of Athletics

Erright, Peter; B.Sc. (Agr. Eng.), M.Sc. (McG.); Faculty Lecturer, Director, Farm Management and Technology Program

Faubert, Gaétan M.; B.Sc. (Sher.), M.Sc. (Montr.), Ph.D. (McG.); Professor of Parasitology

Fortin, Marc G.; B.Sc., M.Sc. (Laval), Ph.D. (McG.); Professor of Plant Science (William Dawson Scholar)

Fyles, James W.; B.Sc., M.Sc. (Vic., BC), Ph.D. (Alta.); Professor of Woodland Resources (Tomlinson-Fowler Professor of Forest Ecology)

Geary, Timothy G.; B.Sc. (Notre Dame), Ph.D. (Mich.); Professor, Institute Parasitology, Canada Research Chair in Parasite Biotechnology

Georges, Elia; B.Sc., Ph.D. (McG.); Associate Professor of Parasitology

Grant, William F.; B.A., M.A. (McG.), Ph.D. (Virg.), F.L.S.; Emeritus Professor of Genetics

Gray-Donald, Katherine; B.Sc., Ph.D. (McG.); Associate Professor of Human Nutrition

Hayes, J. Flannan; B.Agr.Sc., M.Agr.Sc. (Dublin), Ph.D. (N.Carolina St.); Professor of Animal Science

Hendershot, William H.; B.Sc. (Tor.), M.Sc. (McG.), Ph.D. (U.B.C.); Associate Dean (Academic), Professor of Soil Science
Vickery, Vernon R.; B.Sc.(Agr.), M.Sc., Ph.D.(McG.); Emeritus Curator of the Lyman Entomological Museum and Research Laboratory
Wade, Kevin; B.Agr.Sc., M.Agr.Sc.(Dublin), Ph.D.(C'nell); Associate Professor of Animal Science
Waterway, Marcia J.; B.A.(Calvin), M.S.(Wis.), Ph.D.(C'nell); Associate Professor of Plant Science and Curator, McGill University Herbarium
Watson, Alan K.; B.Sc.(Agr.), M.Sc.(Br. Col.), Ph.D.(Sask.); Professor of Agronomy and Director, Phytorium/Biopesticide Quarantine Facility
Wees, David D.; B.Sc.(Agr.), M.Sc.(McG.); Faculty Lecturer, Department of Plant Science
Weiler, Hope; BASc.(Guelph), Ph.D.(McM.); Associate Professor of Human Nutrition and Canada Research Chair
Whalen, Joann; B.Sc.(Agr.),(Dal.); M.Sc.(McG.); Ph.D.(Ohio St.); Associate Professor of Soil Science
Wheeler, Terry; B.Sc.(Nfld.), M.Sc., Ph.D.(Guelph); Associate Professor of Entomology and Director, Lyman Entomological Museum and Research Laboratory
Whyte, Lyle G; B.Sc.(Regina), Ph.D.(Wat.); Associate Professor of Microbiology and Canada Research Council Chair
Wykes, Linda; B.Sc., M.Sc., Ph.D.(Tor.); Associate Professor of Dietetics and Human Nutrition (William Dawson Scholar)
Yaylayan, Varoujan A.; B.Sc., M.Sc.(Beirut), Ph.D.(Alta.); Associate Professor of Food Science and Agricultural Chemistry
Zadworny, David; B.Sc., Ph.D.(Guelph); Associate Professor of Animal Science
Zhao, Xin; B.Sc., M.Sc.(Nanjing IT), Ph.D.(C'nell); Professor of Animal Science and Chair of Department (William Dawson Scholar)

Brian Leung; B.Sc.(Br. Col.); Ph.D.(Car.) (joint appoint. with Biology)
Gregory Mikkelson; B.A.(Trinity), M.S., Ph.D.(Chic.) (joint appoint. with Philosophy)
Garry Peterson; B.Sc. (Wat.), M.Sc., Ph.D. (Flor.) (joint appoint. with Geography)
Anthony Ricciardi; B.Sc.(Agr.), M.Sc., Ph.D.(McG.) (joint appoint. with Redpath Museum)
14.1.5 Goals of the School

The McGill School of Environment has the following goals:

- to provide an exciting and rigorous program that allows for intellectual growth in the comprehension of environmental systems or components of the environment;
- to impart to students an understanding of current environmental concerns;
- to help students gain an understanding of the complexity and conflicts that underlie most environmental problems; and
- to give students an opportunity to apply their knowledge in the analysis of specific, contemporary environmental issues.

14.2 Admission, Registration and Regulations

14.2.1 Admission

Students may be admitted to a B.A., B.A.&Sc., B.Sc.(Ag.Env.Sc.), or a B.Sc. program, offered by the MSE on the University's two campuses: the Macdonald Campus and the Downtown Campus. They register as students within their Faculty of admission and are governed by all rules and regulations of that Faculty.

Students who have already completed a Bachelor or an equivalent degree may be admitted to the Diploma in Environment through any of the three MSE Faculties: Agricultural and Environmental Sciences, Arts, and Science. They register as students within their Faculty of admission and are governed by all rules and regulations of that Faculty relative to the Diploma.

Please see section "Undergraduate Admissions Guide 2007-08 (Appendix A)".

14.2.2 Degree Requirements

To be eligible for a B.A. degree, students must fulfill all the faculty and program requirements as indicated under Arts (see section 5.3 "Faculty Degree Requirements").

To be eligible for a B.A.&Sc. degree, students must fulfill all the faculty and program requirements as indicated under the Bachelor of Arts and Science (see section 8.3 "Degree Requirements").

To be eligible for a B.Sc.(Ag.Env.Sc.) degree, students must fulfill all the faculty and program requirements as indicated under Agricultural and Environmental Sciences (see section 13.5.15 "Degree Requirements").

To be eligible for a B.Sc. degree, students must fulfill all the faculty and program requirements as indicated under Science (see section 12.3 "Faculty Degree Requirements").

To be eligible for the Diploma in Environment, students must fulfill all program requirements as specified in section 14.11 "Diploma in Environment".

To be eligible for an Honours degree, students must fulfill all the faculty and program requirements as indicated under their home faculty. For Agricultural and Environmental Sciences, see section 13.5.16 "Honours and First-Class Honours"; for Arts, see section 5.10.1 "Honours and First-Class Honours"; for Arts & Science, see section 6.10.1 "Honours and First-Class Honours"; for Science, see section 12.10.1 "Honours and First-Class Honours".

In addition to the requirements above, students must also fulfill the honours program requirements outlined in Honours Program in Environment, section 14.10.
14.2.3 Important Information about Program Selection

The MSE uses students' program selections to identify which students are in the School's major programs (and, by extension, which students are in the McGill Environmental Students' Society). Students in U1 who are unsure of the Domain they want to pursue may register in the Major or Faculty program in Environment without picking a Domain. However, they must pick a Domain in their U2 year.

Note: Students must select a Domain in order to graduate; they cannot graduate without choosing a Domain.

(Any of the above applies to students in the B.A.&Sc., Minor or Diploma Programs.)

14.2.4 Course Numbering System at McGill

The first four characters of a McGill course number refer to the unit offering the course. For example, MSE courses begin with the Subject Code ENVR (formerly 170-).

The first three numbers following the Subject Code refer to the course itself, with 200-level courses usually taken by U1 students, 300-level by U2 students, and 400-level by U3 students. Senior undergraduate students can also take some 500-level courses, but they should limit themselves to no more than one per term. See Course Information, Regulations and Descriptions (Appendix B) for more information.

14.2.5 Examination Regulations

Regulations concerning the method of evaluation of any course (including those governing supplemental examinations) are those of the faculty that offers the course. Students should note that supplemental exams are available for courses taught in the Faculties of Arts, of Science, and of Education, but not for courses taught in the Faculties of Agricultural and Environmental Sciences, of Engineering, or of Management.

Note: All ENVR courses, regardless of where they are taught, are offered only by the Faculty of Science.

See Examinations, section 3.6, for more information on the University regulations and procedures.

14.2.6 Courses Outside the Student's Faculty

Students in the School's B.A., B.A.&Sc., B.Sc. and B.Sc.(Ag.Env.Sc.) programs may take courses outside their faculty according to the regulations of their faculty of admission. These regulations are not identical:

- Arts students, see Faculty of Arts, see section 3.6.2 "Courses outside the Faculties of Arts and of Science".
- Arts and Science students, see Bachelor of Arts and Science, see section 6.3.6.2 "Courses outside the Faculties of Arts and of Science".
- Science students, see Faculty of Science, see section 3.6.3 "Courses outside the Faculties of Arts and Science".
- Agricultural and Environmental Sciences students, see section 13.5.1 "Minimum Credit Requirement".
- Faculty of Science students in particular should be aware that some courses are restricted and cannot be taken for credit. See the Science Student Affairs Website at www.mcgill.ca/artsciassn. Check under Departmental Students; Course and Program Selection; Science Students; Policy for Courses Outside Arts and Science.
- Students in the Diploma of Environment follow the program as specified; see section 14.11 "Diploma in Environment".

14.3 Programs Offered

The McGill School of Environment has developed seven programs, which are offered on the Downtown and Macdonald campuses. These programs strive to offer the flexibility necessary to deal with the environment through a set of core courses that provide the general knowledge base of the program combined with a progressive series of courses in a trans-disciplinary area of environmental specialization, referred to as a Domain.

The programs are designed to prepare students for further study in environment or discipline-based graduate programs, and for employment in industry, government, and education.

The MSE offers five options for students interested in pursuing environmental studies.

1. A Minor in Environment is open to all undergraduate students. For more information, see section 14.5 "Minor in Environment" on page 411.

2. A Faculty Program in Environment leading to a B.A is open to students meeting the entrance requirements of the Faculty of Arts. For more information, see section 14.6 "B.A. Faculty Program in Environment" on page 412.

3. An Interfaculty Program in Environment leading to a B.A & Sc. is open to students meeting the entrance requirements for the Bachelor of Arts and of Science. For more information, see section 14.7 "B.A. & Sc. Interfaculty Program in Environment" on page 416.

4. A Major in Environment leading to a B.Sc.(Ag.Env.Sc.) is open to students meeting the entrance requirements of the Faculty of Agricultural and Environmental Sciences. For more information, see section 14.8 "Major in Environment – B.Sc.(Ag.Env.Sc.)" on page 417.

5. A Major in Environment leading to a B.Sc. is open to students meeting the entrance requirements of the Faculty of Science. For more information, see section 14.8 "Major in Environment – B.Sc." on page 417.

6. Honours Program in Environment, which is open to senior Environment students in the B.A., B.A.&Sc., B.Sc.(Ag.Env.Sc.) and B.Sc. degrees. For more information, see section 14.10 "Honours Program in Environment" on page 429.

7. A Diploma in Environment is available only to students who have already completed a Bachelor or an equivalent degree, and who wish to return to university for further undergraduate study. The Diploma is offered by all three MSE Faculties: Agricultural and Environmental Sciences, Arts, and Science. For more information, see section 14.11 "Diploma in Environment" on page 429.

14.4 Suggested Courses for Freshmen Students

The MSE does not recommend that students in their Freshman (U0) year take the ENVR Core courses. Instead, a list of courses that provide an introductory exposure to the concepts and issues in the natural and social environmental sciences can be found on the MSE website. Students in their U1 to U3 years are welcome to take selected ENVR courses, even if they are not in the Environment programs.

14.5 Minor in Environment

The Minor in Environment is intended to complement an expertise obtained through a Major, Major Concentration or a Faculty Program offered by an academic unit other than the MSE. Students taking the Minor in Environment are exposed to different approaches, perspectives, and world views that will help them gain
an understanding of the complexity and conflicts that underlie environmental problems.

Students, after consulting with their adviser in their major program or concentration and the MSE Program Coordinator, can declare their intention to do a Minor in Environment.

To obtain a Minor in Environment, students must:

a. register for the Minor on-line, using Minerva;

b. submit their program of courses already taken and to be taken for the Minor in Environment to the MSE Program Coordinator for approval (only courses at the 200-level and above will be approved);

c. pass all courses counted towards the Minor with a grade of C or higher;

d. complete 18 credits in environmentally related subjects selected with the approval of the program adviser (at least 3 credits must be in social sciences).

e. ensure that all the credits specified in (c) above are taken outside the discipline or field of the student’s Major program or concentration.

14.5.1 Minor Concentration in Environment

This 18-credit Minor is intended for Arts students in the multi-track system.

Adviser: Mr. Peter Barry, MSE Program Coordinator
E-mail: pete.barry@mcgill.ca
Telephone: (514) 398-4306

Advising note: Consultation with the program adviser for approval of course selection to meet program requirements is obligatory. Only courses at the 200-level and above will be approved.

Complementary Courses (18 credits)
12 credits selected from the MSE core courses:
ENVR 200 (3) The Global Environment
ENVR 201 (3) Society and Environment
ENVR 202 (3) The Evolving Earth
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 400 (3) Environmental Thought

6 credits in environmentally related subjects selected with the approval of the program adviser (at least 3 credits must be in social sciences).

A list of suggested courses is available on the MSE Website in “Undergraduate Programs: Minor”. Students are also encouraged to examine the course lists of the various Domains in the Environment Program on the next few pages of the Calendar for courses that interest them.

Course descriptions and prerequisites can be found in the Courses section. The most up-to-date information on courses being offered this academic year is available on Class Schedule at www.mcgill.ca/minerva.

14.6 B.A. Faculty Program in Environment

The B.A. Faculty Program has two components: Core and Domain. Students follow three steps in their degree program.

1. Core: The Core consists of four introductory courses and one intermediate-level course where students are exposed to the different approaches, perspectives, and world views that will help them gain an understanding of the complexity and conflicts that underlie most environmental problems. Through the Core program students go beyond the confines of their individual views of environment.

2. Domain: Domains provide a trans-disciplinary study of a particular theme or component of the environment.

3. Senior Core and Research: In the two senior courses of the Core, students will apply the general and specialized knowledge that they have gained in the program to the analysis of some specific, contemporary environmental problems.

To obtain a B.A. Faculty Program in Environment students must:

a. register in a Domain on-line, using Minerva;

b. satisfy the co- / prerequisites for the program (calculus and a basic science course);

c. pass all courses counted towards the Faculty Program with a grade of C or higher;

d. confirm that their course selection satisfies the required components of the MSE Core and their chosen Domain, and that the complementary courses are approved courses in their chosen Domain; and

e. fulfill all Faculty requirements as specified for the B.A. in the Arts, see section 3 “Faculty Degree Requirements”, which include meeting the minimum credit requirement as specified in their letter of admission.

B.A. FACULTY PROGRAM IN ENVIRONMENT (54 credits)

The B.A. Faculty Program requires, as either a pre- or corequisite for the first year of the program:

3 credits of calculus:
MATH 139 Calculus
or MATH 140 Calculus 1
or equivalent (e.g., CEGEP objective 00UN)

3 credits of basic science chosen from:
BIOL 111 Principles: Organismal Biology (required for the Ecological Determinants of Health in Society Domain)
or CHEM 110 General Chemistry 1
or PHYS 101 Introductory Physics - Mechanics
or their equivalents (e.g., CEGEP objectives: Biology 00UK, Chemistry 00UL, Physics 00UR).
Core: Required Courses (18 credits)
The Core courses are listed below in the Domain descriptions.

Core: Complementary Course – Senior Research Project
(3 credits)
The research courses are listed in the Domain descriptions.

Domain (33 credits)
one MSE Domain selected from those available to students in the B.A. Faculty program.
Currently available:
Ecological Determinants of Health in Society
Economics and the Earth’s Environment
Environment and Development

Each Domain has different requirements which are listed below. Course descriptions and prerequisites can be found in the Courses section. The most up-to-date information on courses being offered this academic year is available on Class Schedule at www.mcgill.ca/minerva.

**14.6.1 Ecological Determinants of Health in Society Domain**

This Domain (54 credits including Core) is open only to students in the B.A. Faculty Program in Environment.

Adviser: Professor Tim Johns
E-mail: tim.johns@mcgill.ca
Telephone: (514) 398-7847

An understanding of the interface between human health and environment depends not only on an appreciation of the biological and ecological determinants of health, but equally on an appreciation of the role of social sciences in the design, implementation, and monitoring of interventions. Demographic patterns and urbanization, economic forces, ethics, indigenous knowledge and culture, and an understanding of how social change can be effected are all critical if we are to be successful in our efforts to assure health of individuals and societies in the future. Recognizing the key role that nutritional status plays in maintaining a healthy body, and the increasing importance of infection as a health risk linked intimately with the environment, this domain prepares students to contribute to the solution of problems of nutrition and infection by tying the relevant natural sciences to the social sciences.

Course descriptions and prerequisites can be found in the Courses section. The most up-to-date information on courses being offered this academic year is available on Class Schedule at www.mcgill.ca/minerva.

Courses offered at Macdonald Campus are marked with an (M). (Core Required courses are offered on both campuses.)

Prerequisite or Corequisite Courses for Program
All B.A. Environment students must take these courses, or their equivalents. These courses should be taken in the Freshman year if possible. Quebec students can take them in U1.

MATH 139 (4) Calculus or MATH 140 (3) Calculus 1 or equivalent (e.g., CEGEP objective 00UN)
BIOL 111 (3) Principles: Organismal Biology or AEBI 120 (3) General Biology (M) or equivalent (e.g., CEGEP objective 00UK or equivalent)

Other suggested first year (U1) courses:
These courses are listed below in the program requirements.
They are good courses to start out with.

ECON 208 (3) Microeconomic Analysis and Applications or AGEC 200 (3) Principles of Microeconomics (M)
NUTR 200 (3) Contemporary Nutrition or NUTR 207 (3) Nutrition and Health (M)
SOC1 234 (3) Population and Society

Statistics:
GEOG 202, PSYC 204, BIOL 373 or AEMA 310 (M)
See section 5.3.6.1 "Course Overlap" in this Calendar about statistics and restricted courses.

Program Requirements (54 credits)
NOTE: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses, but does not include the Program prerequisites or corequisites listed above.

Core: Required Courses (18 credits)
ENVR 200 (3) The Global Environment
ENVR 201 (3) Society and Environment
ENVR 202 (3) The Evolving Earth
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

Core: Complementary Course – Senior Research Project
(3 credits*)
AGRI 519 (6) Sustainable Development Plans (in Barbados)
ENVR 401 (3) Environmental Research
ENVR 451 (6) Research in Panama (in Panama)
* Only 3 credits will be applied to the program; extra credits will count as electives.

Domain: Required Courses (6 credits)
PARA 410 (3) Environment and Infection (M)
SOC1 234 (3) Population and Society

Domain: Complementary Courses (27 credits)
12 credits of Fundamentals (maximum 3 credits from any one category):

Health and Pollution
ANTH 227 (3) Medical Anthropology
NRSC 332 (3) Physical and Biological Aspects of Pollution (M)

Economics
AGEC 200 (3) Principles of Microeconomics (M)
ECON 208 (3) Microeconomic Analysis and Applications

Nutrition
NUTR 200 (3) Contemporary Nutrition
NUTR 207 (3) Nutrition and Health (M)

Statistics
AEMA 310 (3) Statistical Methods 1 (M)
MATH 203 (3) Principles of Statistics 1
SOC1 350 (3) Statistics in Social Research or equivalent

9 credits from List A (maximum 3 credits from any one category):

Hydrology and Climate
BREE 217 (3) Hydrology and Water Resources (M)
GEOG 321 (3) Climatic Environments
GEOG 322 (3) Environmental Hydrology
NRSC 350 (3) Agricultural Micrometeorology (M)

Agriculture
AGRI 210 (3) Agro-Ecological History (M)
AGRI 340 (3) Principles of Ecological Agriculture (M)
AGRI 411 (3) International Agriculture (M)

Decision Making
AGEC 242 (3) Management Theories and Practices (M)

ECON 440 (3) Health Economics
PHIL 343 (3) Biomedical Ethics

Biology Fundamentals
BIOL 200 (3) Molecular Biology
BIOL 205 (3) Biology of Organisms
BIOL 308 (3) Ecological Dynamics
FDSC 211 (3) Biochemistry 1 (M)
PHGY 202 (3) Human Physiology: Body Functions
PLNT 201 (3) Comparative Plant Biology (M)
WILD 200 (3) Comparative Zoology (M)
WILD 205 (3) Principles of Ecology (M)

Development and Ecology
ANTH 212 (3) Anthropology of Development
ANTH 339 (3) Ecological Anthropology
GEOG 300 (3) Human Ecology in Geography
Courses offered at Macdonald Campus are marked with an (M). (Core Required courses are offered on both campuses.)

Prerequisite or Corequisite Courses for Program
All B.A. Environment students must take these courses, or their equivalents. These courses should be taken in the Freshman year if possible. Quebec students can take them in U1.

3 credits of calculus:
- MATH 139 Calculus
- or MATH 140 Calculus 1
- or equivalent (e.g., CEGEP objective 00UN)

3 credits of basic science chosen from:
- BIOL 111 Principles: Organismal Biology
- or CHEM 110 General Chemistry 1
- or PHYS 101 Introductory Physics - Mechanics
- or their equivalents (e.g., CEGEP objectives: Biology 00UK, Chemistry 00UL, Physics 00UR).

Other suggested first year (U1) courses:
- These courses are listed below in the program requirements.
- They are good courses to start out with.
- ECON 230D1 (3) Microeconomic Theory
- or ECON 230D2 (3) Microeconomic Theory
- or EPSC 210 (3) Introductory Mineralogy
- or EPSC 212 (4) Introductory Petrology

Statistics:
- GEOG 202, PSYC 204, BIOL 373 or AEMA 310 (M)

See section 5.3.6.1 “Course Overlap” in this Calendar about statistics and restricted courses.

Program Requirements (54 credits)

NOTE: Students are required to take a maximum of 34 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses, but does not include the Domain prerequisites or corequisites listed above.

Core: Required Courses (18 credits)
- ENVR 200 (3) The Global Environment
- ENVR 201 (3) Society and Environment
- ENVR 202 (3) The Evolving Earth
- ENVR 203 (3) Knowledge, Ethics and Environment
- ENVR 301 (3) Environmental Research Design
- ENVR 400 (3) Environmental Thought

Core: Complementary Course – Senior Research Project (3 credits*)
- AGRI 519 (6) Sustainable Development Plans (in Barbados)
- ENVR 401 (3) Environmental Research
- ENVR 451 (6) Research in Panama (in Panama)

* Only 3 credits will be applied to the program; extra credits will count as electives.

Domain: Required Courses (16 credits)
- ECON 230D1 (3) Microeconomic Theory
- or ECON 230D2 (3) Microeconomic Theory
- or ECON 405 (3) Natural Resource Economics
- or EPSC 210 (3) Introductory Mineralogy
- or EPSC 212 (4) Introductory Petrology

Domain: Complementary Courses (17 credits)
- 3 credits of ecology:
  - BIOL 308 (3) Ecological Dynamics
  - WILD 205 (3) Principles of Ecology (M)

- 3 credits of statistics:
  - AEMA 310 (3) Statistical Methods 1 (M)
  - GEOG 202 (3) Statistics and Spatial Analysis
  - MATH 203 (3) Principles of Statistics 1

- 6 credits of economics:
  - AGEC 333 (3) Resource Economics (M)
  - ECON 326 (3) Ecological Economics
  - ECON 347 (3) Economics of Climate Change
ECON 416 (3) Topics in Economic Development 2
ECON 525 (3) Project Analysis
5 credits minimum of advanced courses:
AGRI 413 (3) Globalization: Issues of Change (in Barbados)
AGRI 435 (3) Soil and Water Quality Management
AGRI 452 (3) Water Resources in Barbados (in Barbados)
AGRI 550 (3) Sustained Tropical Agriculture (in Panama)
ANTH 339 (3) Ecological Anthropology
BIOL 305 (3) Animal Diversity
CHEE 430 (3) Technology Impact Assessment
ECON 305 (3) Industrial Organization
ECON 313 (3) Economic Development 1
ECON 314 (3) Economic Development 2
ECON 408D1 (3) Public Sector Economics
ECON 408D2 (3) Public Sector Economics
ECON 412 (3) Topics in Economic Development 1
EPS 312 (3) Spectroscopy of Minerals
EPS 334 (3) Invertebrate Paleontology
ENVR 465 (3) Environment and Social Change (at Bay of Fundy)
GEOG 302 (3) Environmental Hydrology
GEOG 322 (3) Environmental Management 1
GEOG 357 (3) Environmental Management 2 (in Panama)
GEOG 404 (3) Environmental Management 2 (in Panama)
GEOG 498 (3) Humans in Tropical Environments (in Panama)
NRSC 437 (3) Assessing Environmental Impact (M)
SOIL 410 (3) Soil Chemistry (M)
WILD 415 (2) Conservation Law (M)

14.6.3 Environment and Development Domain

This Domain (54 credits including Core) is open only to students in the B.A. Faculty Program in Environment.

Adviser: Mr. Peter Barry, MSE Program Coordinator
E-mail: pete.barry@mcgill.ca
Telephone: (514) 398-4306

The quest for sustainable paths to economic development requires scholars and practitioners to transcend the boundaries of traditional disciplines. This Domain offers students sufficient depth and breadth of study to acquire a strong grasp of current theories, concepts, and approaches to environment and development. It prepares them for graduate study in interdisciplinary programs (e.g., development studies or environmental studies) as well as in integrative social sciences (e.g., anthropology, geography, etc.).

Course descriptions and prerequisites can be found in the Courses section. The most up-to-date information on courses being offered this academic year is available on Class Schedule at www.mcgill.ca/minerva.

Courses offered at Macdonald Campus are marked with an (M). (Core Required courses are offered on both campuses.)

Prerequisite or Corequisite Courses for Program
All B.A. Environment students must take these courses, or their equivalents. These courses should be taken in the Freshman year if possible. Quebec students can take them in U1.

3 credits of calculus:
MATH 139 Calculus
or MATH 140 Calculus 1
or equivalent (e.g., CEGEP objective 00UN)

3 credits of basic science chosen from:
BIOL 111 Principles: Organismal Biology
or CHEM 110 General Chemistry 1
or PHYS 101 Introductory Physics - Mechanics
or their equivalents (e.g., CEGEP objectives: Biology 00UK, Chemistry 00UL, Physics 00UR).

Other suggested first year (U1) courses:
These courses are listed below in the program requirements. They are good courses to start out with.

ECON 208 (3) Microeconomic Analysis and Applications
or AGEC 200 (3) Principles of Microeconomics (M)
WILD 205 (3) Principles of Ecology (M)

Statistics: GEOG 202, PSYC 204, BIOL 373 or AEMA 310 (M)

See section 5.3.6.1 "Course Overlap" in this Calendar about statistics and restricted courses.

Program Requirements (54 credits)

NOTE: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses.

Core: Required Courses (18 credits)
ENVR 200 (3) The Global Environment
ENV 301 (3) Society and Environment
ENV 202 (3) The Evolving Earth
ENV 301 (3) Knowledge, Ethics and Environment
ENV 400 (3) Environmental Thought

Core: Complementary Course – Senior Research Project (3 credits*)
AGRI 519 (6) Sustainable Development Plans (in Barbados)
ENV 403 (3) Environmental Research
ENV 451 (6) Research in Panama (in Panama)
* Only 3 credits will be applied to the program; extra credits will count as electives.

Domain: Required Courses (12 credits)
ANTH 339 (3) Ecological Anthropology
ECON 313 (3) Economic Development 1
ECON 314 (3) Economic Development 2
GEOG 302 (3) Environmental Management 1

Domain: Complementary Courses (21 credits)
3 credits of microeconomics:
AGEC 200 (3) Principles of Microeconomics (M)
ECON 208 (3) Microeconomic Analysis and Applications

3 credits of statistics:
AEMA 310 (3) Statistical Methods 1 (M)
GEOG 202 (3) Statistics and Spatial Analysis
MATH 203 (3) Principles of Statistics 1
PSYC 204 (3) Introduction to Psychological Statistics or equivalent

3 credits of ecology:
BIOL 308 (3) Ecological Dynamics
WILD 205 (3) Principles of Ecology (M)

6 credits of advanced development courses:
AGEC 442 (3) Economics of International Agricultural Development
ANTH 418 (3) Environment and Development
GEOG 408 (3) Geography of Development
GEOG 410 (3) Geography of Underdevelopment: Current Problems

3 credits of natural sciences:
AGRI 550 (3) Sustained Tropical Agriculture (in Panama)
BIOL 465 (3) Conservation Biology
BIOL 553 (3) Neotropical Environments (in Panama)
GEOG 305 (3) Soils and Environment
GEOG 322 (3) Environmental Hydrology
NUTR 403 (3) Nutrition (M)
NUTR 501 (3) Nutrition in Developing Countries (M)
PARA 410 (3) Environment and Infection (M)

3 credits of social sciences:
AGEC 333 (3) Resource Economics (M)
AGEC 442 (3) Economics of International Development (M)
AGRI 210 (3) Agro-Ecological History (M)
AGRI 413 (3) Globalization: Issues of Change (in Barbados)
AGRI 452 (3) Water Resources in Barbados (in Barbados)
ANTH 439 (3) Theories of Development
14.7 B.A. & Sc. Interfaculty Program in Environment

To obtain a B.A. & Sc. Interfaculty Program in Environment students must:

a. register in the program on-line, using Minerva;

b. satisfy the co- / prerequisites for the program

c. pass all courses counted towards the Interfaculty Program with a grade of C or higher;

d. confirm that their course selection satisfies the required components of the program

e. fulfill all requirements specified for the B.A. & Sc. in section 6.3 "Degree Requirements", which include meeting the minimum credit requirement as specified in their letter of admission.

B.A. & Sc. INTERFACULTY PROGRAM IN ENVIRONMENT

This program (54 credits) is open only to students in the B.A. & Sc. degree.

Adviser: Mr. Peter Barry, MSE Program Coordinator
E-mail: pete.barry@mcgill.ca
Telephone: (514) 398-4306

The growth of technology, globalization of economies, and rapid increases in population and per capita consumption have all had dramatic environmental impacts. The Interfaculty Program in Environment for the Bachelor of Arts and Science is designed to provide students with a broad "Liberal Arts/Science" training. In combination with careful mentoring, this program offers a great degree of flexibility, allowing students to develop the skills and knowledge base required to face the myriad of environmental problems that currently need to be addressed.

1. Students are required to take a maximum of 21 credits at the 200-level and a minimum of 12 credits at the 400-level or higher in this program. This includes Required courses.

2. Students must complete at least 30 credits in the Faculty of Arts and at least 30 in the Faculty of Science as part of their interfaculty program and their minor or minor concentration. ENVR courses are considered courses in both Arts and Science, and so the credits are split between the two faculties for the purpose of this regulation.

Required Courses (18 credits)

- ANTH 445 (3) Property and Land Tenure
- CANS 407 (3) Regions of Canada
- ECON 326 (3) Ecological Economics
- ECON 405 (3) Natural Resource Economics
- ENVR 465 (3) Environment and Social Change (at Bay of Fundy)
- GEOG 201 (3) Introductory Geo-Information Science
- GEOG 300 (3) Human Ecology in Geography
- GEOG 331 (3) Urban Social Geography
- GEOG 380 (3) Adaptive Environmental Management
- GEOG 404 (3) Environmental Management 2 (in Panama or Africa)
- GEOG 408 (3) Geography of Development
- GEOG 496 (3) Regional Geographical Excursion (in Barbados)
- GEOG 498 (3) Humans in Tropical Environments (in Panama)
- GEOG 510 (3) Humid Tropical Environments
- GEOG 551 (3) Environmental Decisions
- MGPO 440 (3) Strategies for Sustainability
- POLI 445 (3) International Political Economy: Monetary Relations
- POLI 472 (3) Developing Areas/ Social Movements
- SOCI 565 (3) Social Change in Panama (in Panama)
- URBP 507 (3) Planning and Infrastructure (in Barbados)

ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

Complementary Courses (36 credits)

- AEMA 310 (3) Statistical Methods 1 (M)
- BIOL 373 (3) Biometry
- GEOG 202 (3) Statistics and Spatial Analysis
- PSYC 204 (3) Introduction to Psychological Statistics

30 credits – students must take courses from 3 of the following areas and at least 6 credits must be at the 400-level or higher, selected either from these lists or in consultation with the program advisor.

Area 1: Population, Community and Ecosystem Ecology

- BIOL 308 (3) Ecological Dynamics
- BIOL 432 (3) Limnology
- BIOL 441 (3) Biological Oceanography
- ENVR 540 or BIOL 540 (3) Ecology of Species Invasions
- GEOG 350 (3) Ecological Biogeography
- PLNT 460 (3) Plant Ecology (M)
- WILD 205 (3) Principles of Ecology (M)
- WILD 410 (3) Wildlife Ecology (M)
- WOOD 410 (3) The Forest Ecosystem (M)

Area 2: Biodiversity and Conservation

- BIOL 305 (3) Animal Diversity
- BIOL 327 (3) Herpetology
- BIOL 341 (3) History of Life.
- BIOL 355 (3) Trees: Ecology & Evolution
- BIOL 465 (3) Conservation Biology
- ENTO 440 (3) Systematic Entomology (M)

14.8 Major in Environment – B.Sc.(Ag.Env.Sc.) and B.Sc.

Students in the Faculty of Agricultural and Environmental Sciences B.Sc.(Ag.Env.Sc.) program and students in the Faculty of Science B.Sc. program can register in the Major in Environment. The Major has two components: Core and Domain. Students follow three steps in their degree program.

1. Core: The Core consists of four introductory courses and one intermediate-level course where students are exposed to the different approaches, perspectives, and world views that will help them gain an understanding of the complexity and conflicts that underlie most environmental problems. Through the Core program students go beyond the confines of their individual views of environment.

2. Domain: Domains provide a trans-disciplinary study of a particular theme or component of the environment.

3. Senior Core and Research: In the two senior courses of the Core, students will apply the general and specialized knowledge that they have gained in the program to the analysis of some specific, contemporary environmental problems.

To obtain a Major in Environment, students must:
- register in a Domain, on-line using Minerva;
- pass all courses counted towards the Major with a grade of C or higher;
- confirm that their course selection satisfies the required components of the MSE Core and their chosen Domain, and that the complementary courses are approved courses in their chosen Domain; and
- fulfill all faculty requirements as specified by the faculty in which they are registered: for the B.Sc. refer to Agricultural and Environmental Sciences section 13.5 “Faculty Information and Regulations”; for the B.Sc. see section 12.3 “Faculty Degree Requirements”. This includes meeting the minimum credit requirement as specified in their letter of admission.

MAJOR PROGRAM IN ENVIRONMENT
(57 to 66 credits – depending upon Domain selected)

Core: Required Courses (18 credits)
The Core courses are listed below in the Domain descriptions.

Core: Complementary Course – Senior Research Project (3 credits)
The research courses are listed in the Domain descriptions.

Domain (36 to 45 credits – depending upon Domain selected) one MSE Domain selected from those available to students in the Major.

Currently available for B.Sc.(Ag.Env.Sc.) or B.Sc.:
- Biodiversity and Conservation (42 credits)
- Ecological Determinants of Health – Population Stream or Cellular Stream (42 credits)
- Environmetrics (42 credits)
- Food Production and Environment (42 credits)
- Land Surface Processes and Environmental Change (42 credits)
- Renewable Resource Management (42 credits)
- Water Environments and Ecosystems Physical Stream or Biological Stream (36 - 39 credits)

Currently available for B.Sc. only (see section 14.9 “Major in Environment – B.Sc.”):
- Atmospheric Environment and Air Quality (39 credits)
- Earth Sciences and Economics (45 credits)

Each Domain has different requirements, which are listed below. Course descriptions and prerequisites can be found in the Courses section. The most up-to-date information on courses
Core: Complementary Course – Senior Research Project
(3 credits)
AGRI 519  (6) Sustainable Development Plans (in Barbados)
ENVR 401 (3) Environmental Research
ENVR 451 (6) Research in Panama (in Panama)
* Only 3 credits will be applied to the program; extra credits will count as electives.

Domain: Required Courses (9 credits)
9 credits, basic courses in the biological principles of diversity, systematics and conservation:
BIOL 304 (3) Evolution
BIOL 305 (3) Animal Diversity
BIOL 465 (3) Conservation Biology

Domain: Complementary Courses (33 credits)
3 credits of ecology:
BIOL 308 (3) Ecological Dynamics
or WILD 205 (3) Principles of Ecology (M)
3 credits of statistics:
BIOL 373 (3) Biometry
or AEMA 310 (3) Statistical Methods 1 (M)
9 credits, interface between science, policy and management:
ANTH 418 (3) Environment and Development
ECON 208 (3) Microeconomic Analysis and Applications
or AGEC 200 (3) Principles of Microeconomics (M)
ECON 225 (3) Economics of the Environment
GEOG 302 (3) Environmental Management
or GEOG 380 (3) Adaptive Environmental Management
GEOG 408 (3) Geography of Development
GEOG 410 (3) Geography of Underdevelopment: Current Problems
3 credits of field courses:
BIOL 331 (3) Ecology/Behaviour Field Course (at Mont St. Hilaire)
BIOL 334 (3) Applied Tropical Ecology (in Barbados)
BIOL 553 (3) Neotropical Environments (in Panama)
GEOG 495 (3) Field Studies - Physical Geography (at Mont St. Hilaire)
GEOG 497 (3) Ecology of Coastal Waters (at Bay of Fundy)
GEOG 499 (3) Subarctic Field Studies (in Schefferville)
WILD 475 (3) Desert Ecology (in Arizona)
6 credits of general scientific principles:
BREE 430 (3) GIS for Bioresource Management (M)
or GEOG 306 (3) Raster Geo-Information Science
BIOL 324 (3) Ecological Genetics
BIOL 341 (3) History of Life
BIOL 432 (3) Limnology
BIOL 441 (3) Biological Oceanography
BIOL 442 (3) Marine Biology
BIOL 505 (3) Diversity and Systematics Seminar
GEOG 272 (3) Earth's Changing Surface
GEOG 321 (3) Climatic Environments
GEOG 350 (3) Ecological Biogeography
MICR 331 (3) Microbial Ecology (M)
NRSC 437 (3) Assessing Environmental Impact (M)
PLNT 460 (3) Plant Ecology (M)
WILD 313 (3) Phylogey and Zoogeography (M)
WILD 375 (3) Issues: Environmental Sciences (M)
WILD 410 (3) Wildlife Ecology (M)
WOOD 410 (3) The Forest Ecosystem (M)
WOOD 420 (3) Environmental Issues: Forestry (M)
(200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses.
Core: Required Courses (18 credits)
ENVR 200 (3) The Global Environment
ENVR 201 (3) Society and Environment
ENVR 202 (3) The Evolving Earth
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

Program Requirements (63 credits)
NOTE: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses.

Program Requirements (63 credits)
NOTE: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses.

Program Requirements (63 credits)
NOTE: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses.

Program Requirements (63 credits)
NOTE: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses.
by deforestation, by urbanization, and by human interventions. The distribution of infectious diseases is influenced by planned and unplanned environmental disturbances. For example, agricultural practices shift the balance between beneficial and harmful ingredients of food. Use of insecticides presents dilemmas with regard to the environment, economics and human health. The distribution of infectious diseases is influenced by the climatic conditions that permit vectors to coexist with man, by deforestation, by urbanization, and by human interventions ranging from the building of dams to provision of potable water. In designing interventions that aim to prevent or reduce infectious contaminants in the environment, or to improve food production and nutritional quality, not only is it important to understand methods of intervention, but also to understand social forces that influence how humans respond to such interventions.

Students in the Population Concentration will gain a depth of understanding at an ecosystem level that looks at society, land and population health. Students in the Cellular Concentration will explore the interactions in more depth, at a physiological level.

Course descriptions and prerequisites can be found in the Courses section. The most up-to-date information on courses being offered this academic year is available on Class Schedule at www.mcgill.ca/minerva. Courses offered at Macdonald Campus are marked with an (M). Core Required courses are offered on both campuses.

Ecological Determinants of Health Domain – Cellular

The Cellular Concentration (63 credits) in this Domain is open only to students in the B.Sc. (Ag. Env. Sc.) Major in Environment or B.Sc. Major in Environment program.

Suggested first year (U1) courses:

Although not all of these are listed in the Domain, they satisfy prerequisites for upper level biology courses. They are good courses to start out with.

- BIOL 200 (3) Molecular Biology
- CHEM 212 (3) Introductory Organic Chemistry
- BIOL 202 (3) Basic Genetics
- BIOL 205 (3) Biology of Organisms
- BIOL 206 (3) Comparative Plant Biology
- Statistics: (Although these are 300-level courses, they can be taken in U1.)

Program Requirements (63 credits)

NOTE: Students are required to take a maximum of 31 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses.

Core: Required Courses (18 credits)

- AGRI 519 (6) Sustainable Development Plans (in Barbados)
- ENVR 401 (3) Environmental Research
- ENVR 451 (6) Research in Panama (in Panama)

* Only 3 credits will be applied to the program; extra credits will count as electives.

Domain: Required Courses (6 credits)

- PARA 410 (3) Environment and Infection
- SOCI 234 (3) Population and Society

Domain - Cellular Concentration: Complementary Courses (36 credits)

18 credits of fundamentals, maximum of 3 credits from any one category:

- Toxicology
- NUTR 420 (3) Toxicology and Health Risks (M)
- PHAR 303 (3) Principles of Toxicology

- Cellular Biology
- AEBI 202 (3) Cellular Biology (M)
- BIOL 201 (3) Cell Biology and Metabolism

- Genetics
- BIOL 202 (3) Basic Genetics
- CELL 204 (4) Genetics (M)

- Molecular Biology
- BIOL 200 (3) Molecular Biology

- Statistics
- AEMA 310 (3) Statistical Methods 1 (M)
- MATH 203 (3) Principles of Statistics 1
- or equivalent

- Nutrition
- ANSC 330 (3) Fundamentals of Nutrition (M)
- NUTR 307 (3) Human Nutrition (Video conference in Downtown and Macdonald)
**Suggested first year (U1) courses:**

Although not all of these are listed in the Domain, they satisfy prerequisites for upper level biology courses. They are good courses to start out with.

- **BIOL 200 (3) Molecular Biology**
- **or FDSC 211(3) Biochemistry 1**
- **CHEM 212 (4) Introductory Organic Chemistry 1**
- **or FDSC 230(4) Organic Chemistry**
- **BIOL 202 (3) Basic Genetics**
- **or CELL 204 (3) Genetics**
- **BIOL 205 (3) Biology of Organisms**
- **or PLNT 201 (3) Comparative Plant Biology**

Statistics: (Although these are 300-level courses, they can be taken in U1.)

- **BIOL 373 (3) Biometry**
- **or AEMA 310(3) Statistical Methods 1 (M)**

B.Sc. students see section 12.3.6.1 “Course Overlap” in this Calendar about statistics and restricted courses.

### Program Requirements (63 credits)

**NOTE:** Students are required to take a maximum of 31 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses.

#### Core: Required Courses (18 credits)

- **ENVR 200 (3) The Global Environment**
- **ENVR 201 (3) Society and Environment**
- **ENVR 202 (3) The Evolving Earth**
- **ENVR 203 (3) Knowledge, Ethics and Environment**
- **ENVR 204 (3) Environmental Thought**

#### Core: Complementary Course – Senior Research Project (3 credits*)

- **AGRI 519 (6) Sustainable Development Plans (in Barbados)**
- **ENVR 451 (6) Research in Panama (in Panama)**

* Only 3 credits will be applied to the program; extra credits will count as electives.

**Domain: Required Courses (6 credits)**

- **PARA 410 (3) Environment and Infection (M)**
- **SOCI 234 (3) Population and Society**

**Domain - Population Concentration: Complementary Courses (36 credits)**

18 credits of fundamentals, maximum of 3 credits from each category:

#### Toxicology

- **NUTR 420 (3) Toxicology and Health Risks (M)**

#### Genetics

- **PHAR 303 (3) Principles of Toxicology**

#### Biology

- **BIOL 202 (3) Basic Genetics**

#### Statistics

- **MATH 203 (3) Principles of Statistics 1**

#### Nutrition

- **ANSC 330 (3) Fundamentals of Nutrition (M)**

#### Advanced Ecology

- **AEMA 306 (3) Mathematical Methods in Ecology (M)**
- **BIOL 465 (3) Conservation Biology**
- **BIOL 553 (3) Neotropical Environments (in Panama)**
- **ENVR 540 (3) Ecology of Species Invasions**
- **GEOG 497 (3) Ecology of Coastal Waters (at Bay of Fundy)**
- **MICR 331 (3) Microbial Ecology (M)**
- **PLNT 460 (3) Plant Ecology (M)**

---

**McGill School of Environment**

12 credits chosen from Human Health, maximum of 3 credits from any one category:

**Immunology and Pathogenicity**

- **MICR 341 (3) Mechanisms of Pathogenicity (M)**
- **MIMM 314 (3) Immunology**
- **PARA 438 (3) Immunology (M)**
- **PATH 300 (3) Human Disease**

**Infectious Disease**

- **ANSC 400 (3) Eukaryotic Cells and Viruses (M)**
- **MIMM 324 (3) Immunology**
- **MIMM 413 (3) Parasitology**
- **PARA 400 (3) Eukaryotic Cells and Viruses (M)**
- **WILD 424 (3) Parasitology (M)**

**Nutrition**

- **NUTR 403 (3) Nutrition in Society (M)**
- **NUTR 512 (3) Herbs, Foods and Phytochemicals (Video conference Downtown and Macdonald)**

**Drugs and Hormones**

- **ANSC 424 (3) Metabolic Endocrinology (M)**
- **PHAR 300 (3) Drug Action**

**Physiology**

- **ANSC 323 (4) Mammalian Physiology**
- **PHGY 209 (3) Mammalian Physiology 1**

6 credits chosen from the Natural Environment, maximum of 3 credits from any one category:

**Hydrology and Climate**

- **AGRI 452 (3) Water Resources in Barbados (in Barbados)**
- **BREE 217 (3) Hydrology and Water Resources (M)**
- **GEOG 321 (3) Climatic Environments**
- **GEOG 322 (3) Environmental Hydrology**
- **NRSC 510 (3) Agricultural Micrometeorology (M)**

**Techniques and Management**

- **BREE 322 (3) Organic Waste Management (M)**
- **CHEE 230 (3) Environmental Aspects of Technology**
- **GEOG 302 (3) Environmental Management 1**
- **NRSC 437 (3) Assessing Environmental Impact (M)**
- **URBP 507 (3) Planning and Infrastructure (in Barbados)**

**Pest Management**

- **Biol 350 (3) Pest Management and the Environment (M)**

**Pollution Control and Management**

- **BREE 518 (3) Bio-Treatment of Wastes (M)**
- **CHEM 307 (3) Analytical Chemistry of Pollutants**
- **NRSC 333 (3) Physical and Biological Aspects of Pollution (M)**

**Ecology**

- **BIOL 432 (3) Limnology**
- **BIOL 465 (3) Conservation Biology**
- **BIOL 553 (3) Neotropical Environments (in Panama)**
- **ENVR 540 (3) Ecology of Species Invasions**
- **GEOG 497 (3) Ecology of Coastal Waters (at Bay of Fundy)**
- **MICR 331 (3) Microbial Ecology (M)**
- **PLNT 361 (3) Pest Management and the Environment (M)**
- **PLNT 460 (3) Plant Ecology (M)**
- **WILD 410 (3) Wildlife Ecology (M)**
- **WOOD 410 (3) The Forest Ecosystem (M)**

**Ecological Determinants of Health Domain – Population**

The Population Concentration (63 credits) in this Domain is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc. Major in Environment program.

**Suggested first year (U1) courses:**

- **BIOL 200 (3) Molecular Biology**
- **or FDSC 211(3) Biochemistry 1**
- **CHEM 212 (4) Introductory Organic Chemistry 1**
- **or FDSC 230(4) Organic Chemistry**
- **BIOL 202 (3) Basic Genetics**
- **or CELL 204 (3) Genetics**
- **BIOL 205 (3) Biology of Organisms**
- **or PLNT 201 (3) Comparative Plant Biology**

Statistics: (Although these are 300-level courses, they can be taken in U1.)

- **BIOL 373 (3) Biometry**
- **or AEMA 310(3) Statistical Methods 1 (M)**

B.Sc. students see section 12.3.6.1 “Course Overlap” in this Calendar about statistics and restricted courses.

### 14.8.3 Environmetrics Domain

This Domain (63 credits including Core) is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc. Major in Environment program.

---

**Program Requirements** (63 credits)

**Core: Required Courses** (18 credits)

- ENVR 200 (3) The Global Environment
- ENVR 201 (3) Society and Environment
- ENVR 202 (3) The Evolving Earth
- ENVR 203 (3) Knowledge, Ethics and Environment
- ENVR 301 (3) Environmental Research Design
- ENVR 400 (3) Environmental Thought

**Core: Complementary Course – Senior Research Project** (3 credits)*

- AGRI 519 (6) Sustainable Development Plans (in Barbados)
- ENVR 401 (3) Environmental Research
- ENVR 451 (6) Research in Panama (in Panama)

* Only 3 credits will be applied to the program; extra credits will count as electives.

**Domain: Required Course** (6 credits)

- AEMA 403 (3) Environmetrics Stage (internship) *(M)*
- AEMA 414 (3) Temporal and Spatial Statistics *(M)*
14.8.4 Food Production and Environment Domain

This Domain (63 credits including Core) is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc in Environment program.

Adviser: Professor Sylvie de Blois
E-mail: sylvie.deblois@mcgill.ca
Telephone: (514) 398-7581

The business of food production is an area of human activity with a large and intimate interaction with the environment. Modern agriculturalists must strike a delicate balance between trying to provide food for themselves, their families and urban dwellers while trying to minimize environmental damage. When negative effects due to agricultural activities do occur, they are not usually the classic point source effects that we have come to associate with industry or large cities. Rather, the effects are over extremely large land areas cumulating, perhaps, in pollution of river systems or lakes some distance away. As world populations grow, and as diets change, potentially negative interactions between agricultural systems and other facets of the environment will become more frequent. In the same way, urban sprawl will make conflicts between agriculture and urbanites more common.

With a judicious choice of courses, graduates of this Major may be eligible to apply for membership in the Ordre des agronomes du Québec (OAQ) and the Agricultural Institute of Canada (AIC). See the MSE Website for details at www.mcgill.ca/mse: (BSc Programs: Food Production and Environment Domain).

Courses offered at Macdonald Campus are marked with an (M). (Core Required courses are offered on both campuses.)

Prerequisite or Corequisite Courses for Domain

FDSC 211 (3) Biochemistry 1 (M)
or BIOL 112 (3) Cell and Molecular Biology
or CEGEP equivalent (e.g., CEGEP objective 00XU)
FDSC 230 (4) Organic Chemistry (M)
or CHEM 212 (4) Introductory Organic Chemistry 1 or CEGEP equivalent (e.g., CEGEP objective 00XV)

Suggested first year (U1) courses:
These are prerequisites for many of the upper level courses, and are recommended to be taken in U1 if possible.

PLNT 211 (3) Principles of Plant Science
BIOL 202 (3) Basic Genetics
or CELL 204 (3) Genetics
Statistics: GEOG 202, PSYC 204, BIOL 373 or AEMA 310 (M)

B.Sc. students see section 12.3.6.1 “Course Overlap” in this Calendar about statistics and restricted courses.

Program Requirements (63 credits)

NOTE: Students are required to take a maximum of 34 credits at the 200 level and a minimum of 15 credits at the 400 level or higher in this program. This includes Core and Required courses, but does not include the Domain prerequisites or corequisites listed above.

Core: Required Courses (18 credits)

ENVR 200 (3) The Global Environment
ENVR 201 (3) Society and Environment
ENVR 202 (3) The Evolving Earth
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

WILD 401 (4) Fisheries and Wildlife Management (M)
WOOD 300 (3) Urban Forests and Trees (M)
WOOD 420 (3) Environmental Issues: Forestry (M)
Core: Complementary Course – Senior Research Project
(3 credits*)
AGRI 519 (6) Sustainable Development Plans (in Barbados)
ENVR 401 (3) Environmental Research
ENVR 451 (6) Research in Panama (in Panama)
* Only 3 credits will be applied to the program; extra credits will count as electives.

Domain: Required Courses (9 credits)
AGRI 210 (3) Agro-Ecological History (M)
PLNT 211 (3) Principles of Plant Science (M)
PLNT 300 (3) Cropping Systems (M)

Domain: Complementary Courses (33 credits)
15 or 16 credits of Basic Sciences:
AEMA 310 (3) Statistical Methods 1 (M)
or MATH 203 (3) Principles of Statistics 1
or equivalent
AGRI 340 (3) Principles of Ecological Agriculture (M)
or ANSC 250 (3) Principles of Animal Science (M)
BIOL 202 (3) Basic Genetics
or CELL 204 (4) Genetics (M)
GEOG 305 (3) Soils and Environment
or SOIL 210 (3) Principles of Soil Science (M)
WILD 205 (3) Principles of Ecology (M)
or BIOL 308 (3) Ecological Dynamics

12 credits of Applied Sciences:
BREE 217 (3) Hydrology and Water Resources (M)
or GEOG 322 (3) Environmental Hydrology
BREE 322 (3) Organic Waste Management (M)
BREE 518 (3) Bio-Treatment of Wastes (M)
AGRI 341 (3) Ecological Agricultural Systems (M)
AGRI 411 (3) International Agriculture (M)
AGRI 435 (3) Soil and Water Quality Management (M)
or ANSC 550 (3) Sustained Tropical Agriculture (in Panama)
ANSC 501 (3) Advanced Animal Production Systems (M)
BIOL 465 (3) Conservation Biology
BIOL 553 (3) Neotropical Environments (in Panama)
ENTO 446 (3) Apiculture
FDSC 200 (3) Introduction to Food Science (M)
or NUTR 207 (3) Nutrition and Health (M)
FDSC 535 (3) Food Biotechnology (M)
GEOG 302 (3) Environmental Management 1
GEOG 380 (3) Adaptive Environmental Management
MICR 331 (3) Microbial Ecology (M)
NRSC 333 (3) Physical and Biological Aspects of Pollution (M)
NRSC 437 (3) Assessing Environmental Impact (M)
NUTR 403 (3) Nutrition in Society (M)
NUTR 420 (3) Toxicology and Health Risks (M)
PARA 410 (3) Environment and Infection (M)
PHAR 303 (3) Principles of Toxicology
PLNT 361 (3) Pest Management and the Environment (M)
PLNT 434 (3) Weed Biology and Control (M)
SOIL 315 (3) Soil Fertility and Fertilizer Use (M)
SOIL 410 (3) Soil Chemistry (M)
SOIL 445 (3) Agroenvironmental Fertilizer Use
SOIL 521 (3) Soil Microbiology and Biochemistry (M)
WILD 401 (4) Fisheries and Wildlife Management (M)

6 credits in Social Sciences/Humanities:
AGEC 200 (3) Principles of Microeconomics (M)
or ECON 208 (3) Microeconomic Analysis and Applications
AGEC 320 (3) Economics of Agricultural Production (M)
AGEC 331 (3) Farm Business Management (M)
AGEC 333 (3) Resource Economics (M)
or ECON 405 (3) Natural Resource Economics
AGEC 430 (3) Agriculture, Food and Resource Policy (M)
AGEC 442 (3) Economics of International Agricultural Development (M)
AGRI 413 (3) Globalization: Issues of Change (in Barbados)
ANTH 418 (3) Environment and Development
ECON 225 (3) Economics of the Environment
ENVR 465 (3) Environment and Social Change (at Bay of Fundy)
GEOG 404 (3) Environmental Management 2 (in Panama)
GEOG 410 (3) Geography of Underdevelopment: Current Problems
GEOG 498 (3) Humans in Tropical Environments (in Panama)
GEOG 510 (3) Humid Tropical Environments
SOCI 254 (3) Development and Underdevelopment
SOCI 565 (3) Social Change in Panama (in Panama)
WILD 415 (2) Conservation Law (M)
(if this course is taken, 1 additional credit of complementary courses must be taken)

14.8.5 Land Surface Processes and Environmental Change Domain

This Domain (63 credits including Core) is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc. Major in Environment program.
Adviser: Before January 2008:
Professor Ian Strachan
E-mail: ian.strachan@mcgill.ca
Telephone: (514) 398-7935
After January 2008:
Pete Barry
Email: pete.barry@mcgill.ca
Telephone: (514) 398-4306

The thin soil layer on the planet’s land surfaces controls the vital inputs of water, nutrients and energy to terrestrial and freshwater aquatic ecosystems. Widespread occurrences around the globe of desertification, soil erosion, deforestation and land submergence over water reservoirs indicate that this dynamic system is under increasing pressure from population growth and changes in climate and land uses. Production of key greenhouse gases (water vapor, CO2 and methane) is controlled by complex processes operating at the land surface, involving climate change feedbacks that need to be fully understood, given current global warming trends.

The program introduces students to the interacting physical and biogeochemical processes at the atmosphere-lithosphere interface, which fashion land surface habitats and determine their biological productivity and response to anthropogenic or natural environmental changes. Through an appropriate selection of courses, students can prepare for graduate training in emerging research areas such as earth system sciences, environmental hydrology and landscape ecology.

Course descriptions and prerequisites can be found in the Courses section. The most up-to-date information on courses being offered this academic year is available on Class Schedule at www.mcgill.ca/minerva.

Courses offered at Macdonald Campus are marked with an (M). (Core Required courses are offered on both campuses.)

Suggested first year (U1) courses:
These courses are listed below in the program requirements.
They are good courses to start out with.
GEOG 203 (3) Environmental Systems
ATOC 215 (3) Oceans, Weather and Climate
or NRSC 201(3) Introductory Meteorology (M)
GEOG 272 (3) Earth’s Changing Surface
or SOIL 200 (3) Introduction to Earth Science (M)
GEOG 322 (3) Environmental Hydrology
or BREE 217(3) Hydrology and Water Resources (M)
GEOG 321 (3) Climatic Environments
Statistics: GEOG 202, PSYC 204, BIOL 373 or AEMA 310 (M)
B.Sc. students see section 12.3.6.1 “Course Overlap” in this Calendar about statistics and restricted courses.
Program Requirements (63 credits)
NOTE: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses.

Core: Required Courses (18 credits)
ENVR 200 (3) The Global Environment
ENVR 201 (3) Society and Environment
ENVR 202 (3) The Evolving Earth
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

Core: Complementary Course – Senior Research Project (3 credits*)
AGRI 413 (3) Globalization: Issues of Change (in Barbados)
AGRI 550 (3) Sustained Tropical Agriculture (in Panama)
ENVR 401 (3) Environmental Research
ENVR 400 (3) Environmental Thought

Domain: Required Course (3 credits)
GEOG 203 (3) Environmental Systems

Domain: Complementary Courses (39 credits)
3 credits of statistics chosen from:
AEMA 310 (3) Statistical Methods 1 (M)
GEOG 202 (3) Statistics and Spatial Analysis
MATH 203 (3) Principles of Statistics 1 or equivalent
3 credits of ecology chosen from:
Biol 308 (3) Ecological Dynamics
WILD 205 (3) Principles of Ecology (M)
3 credits of weather and climate chosen from:
ATOC 215 (3) Oceans, Weather and Climate
NRSC 201 (3) Introductory Meteorology (M)
9 credits of fundamental land surface processes chosen from:
GEOG 272 (3) Earth’s Changing Surface
or SOIL 200 (3) Introduction to Earth Science (M)
GEOG 305 (3) Soils and Environment
or SOIL 326 (3) Soil Genesis and Classification (M)
GEOG 322 (3) Environmental Hydrology
or BREE 217 (3) Hydrology and Water Resources (M)
3 credits of environment and resource management chosen from:
AGRI 435 (3) Soil and Water Quality Management (M)
AGRI 452 (3) Water Resources in Barbados (in Barbados)
AGRI 550 (3) Sustained Tropical Agriculture (in Panama)
Biol 465 (3) Conservation Biology
CHEE 230 (3) Environmental Aspects of Technology
CIVE 225 (4) Environmental Engineering
GEOG 302 (3) Environmental Management 1
GEOG 380 (3) Adaptive Environmental Management
GEO 404 (3) Environmental Management 2 (in Panama)
NRSC 437 (3) Assessing Environmental Impact (M)
WOOD 420 (3) Environmental Issues: Forestry (M)
WOOD 441 (3) Integrated Forest Management (M)
3 credits of a field course chosen from:
Biol 553 (3) Neotropical Environments (in Panama)
GEOG 495 (3) Field Studies - Physical Geography (at Mont St. Hilaire)
GEOG 496 (3) Geographical Excursion (in Barbados)
GEOG 497 (3) Ecology of Coastal Waters (at Bay of Fundy)
GEOG 499 (3) Subarctic Field Studies (in Schefferville)
NRSC 382 (3) Environmental Chemistry (M)
WILD 475 (3) Desert Ecology (in Arizona)
3 credits of social science issues chosen from:
AGRI 413 (3) Globalization: Issues of Change (in Barbados)
ANTH 339 (3) Ecological Anthropology
ECON 225 (3) Economics of the Environment
ECON 326 (3) Ecological Economics
ECON 405 (3) Natural Resource Economics
or AGEC 333 (3) Resource Economics (M)
ENVR 465 (3) Environment and Social Change (at Bay of Fundy)
GEOG 408 (3) Geography of Development
GEOG 498 (3) Humans in Tropical Environments (in Panama)
GEOG 508 (3) Resources, People and Power
SOCI 565 (3) Social Change in Panama (in Panama)
12 credits total of advanced studies chosen from the following two lists:
3 credits minimum of advanced study of particular environments:
PLNT 358 (3) Flowering Plant Diversity (M)
BIOL 432 (3) Limnology
or NRSC 315 (3) Science of Inland Waters (M)
GEOG 350 (3) Ecological Biogeography
GEOG 372 (3) Running Water Environments
GEOG 536 (3) Geocryology
GEOG 550 (3) Historical Ecology Techniques
PLNT 460 (3) Plant Ecology (M)
WOD 410 (3) The Forest Ecosystem (M)
6 credits minimum of advanced study of surface processes:
BREE 509 (2) Hydrologic Systems and Modelling (M)
ATOC 315 (3) Water in the Atmosphere
EPSC 549 (3) Hydrogeology
EPSC 580 (3) Aquatic Geochemistry
GEOG 501 (3) Modelling Environmental Systems
GEOG 505 (3) Global Biogeochecmistry
GEOG 522 (3) Advanced Environmental Hydrology
GEOG 537 (3) Advanced Fluvial Geomorphology
NRSC 333 (3) Physical and Biological Aspects of Pollution (M)
SOIL 331 (3) Soil Physics (M)
SOIL 410 (3) Soil Chemistry (M)

14.8.6 Renewable Resource Management Domain
This Domain (63 credits including Core) is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc. Major in Environment program.
Adviser: Professor Joann Whalen
E-mail: whalen@nrs.mcgill.ca
Telephone: (514) 398-7943

Renewable resource management is an emerging field that focuses on the ecosystem structures and processes required to sustain the delivery, to humanity, of ecosystem goods and services such as food, clean water and air, essential nutrients, and the provision of beauty and inspiration. Renewable resource management recognizes humans as integral components of ecosystems and is used to develop goals that are consistent with sustainability and ecosystem maintenance.

The Renewable Resource Management domain provides students with an understanding of: 1) the interactions between physical and biological factors that determine the nature and dynamics of ecosystems; 2) the ways in which ecosystems can be managed to meet specific goals for the provision of goods and services; 3) the economic and social factors that determine how ecosystems are managed; 4) the ways in which management of natural resources can affect the capability of natural ecosystems to continue to supply human needs in perpetuity; and 5) the approaches and technologies required to monitor and analyze the dynamics of natural and managed ecosystems.

Course descriptions and prerequisites can be found in the Courses section. The most up-to-date information on courses being offered this academic year is available on Class Schedule at www.mcgill.ca/minerva.
Courses offered at Macdonald Campus are marked with an (M). (Core Required Courses are offered on both campuses.)

Prerequisite or Corequisite Courses for Domain
FDSC 211 (3) Biochemistry 1 (M)
or BIOL 112 (3) Cell and Molecular Biology
or CEGEP equivalent (e.g., CEGEP objective 00XU)
FDSC 230 (4) Organic Chemistry (M)
or CHEM 212 (4) Introductory Organic Chemistry 1
or CEGEP equivalent (e.g., CEGEP objective 00XV)

Suggested 1st year (U1) courses
These courses are listed below in the program requirements. They are good courses to start out with.
WILD 200 (3) Comparative Zoology (M)
or BIOL 305 (3) Animal Diversity
or PLNT 201 (3) Comparative Plant Biology (M)

Statistics: (Although these are 300-level courses, they can be taken in U1.)
BIOL 373 (3) Biometry
or AEMA 310 (3) Statistical Methods 1 (M)

B.Sc. students see section 12.3.6.1 “Course Overlap” in this Calendar about statistics and restricted courses.

Program Requirements (63 credits)

NOTE: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses, but does not include the Domain prerequisites or corequisites listed above.

Core: Required Courses (18 credits)
ENVR 200 (3) The Global Environment
ENVR 201 (3) Society and Environment
ENVR 202 (3) The Evolving Earth
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

Core: Complementary Course – Senior Research Project
(3 credits*)
AGRI 519 (6) Sustainable Development Plans (in Barbados)
ENVR 401 (3) Environmental Research
ENVR 451 (6) Research in Panama (in Panama)

* Only 3 credits will be applied to the program; extra credits will count as electives.

Domain: Complementary Courses (42 credits)
9 credits of basic principles of ecosystem processes and diversity
WILD 200 (3) Comparative Zoology (M)
or BIOL 305 (3) Animal Diversity
or PLNT 201 (3) Comparative Plant Biology (M)
WILD 205 (3) Principles of Ecology (M)
or BIOL 308 (3) Ecological Dynamics
or SOIL 210 (3) Principles of Soil Science (M)

6 credits statistics and GIS methods
BREE 430 (3) GIS for Bioresource Management (M)
or GEOG 201 (3) Introductory Geo-Information Science
AEMA 310 (3) Statistical Methods 1 (M)
or BIOL 373 (3) Biometry

6 credits of advanced ecosystem components
PLNT 358 (3) Flowering Plant Diversity (M)
BIOL 553 (3) Neotropical Environments (in Panama)
GEOG 372 (3) Running Water Environments
SOIL 326 (3) Soil Genesis and Classification (M)
WILD 307 (3) Natural History of Vertebrates (M)

6 credits of advanced ecological processes
BREE 217 (3) Hydrology and Water Resources (M)
or GEOG 322 (3) Environmental Hydrology
BIOL 432 (3) Limnology
or NRSC 315 (3) Science of Inland Waters (M)

MSE – MAJOR IN ENVIRONMENT – B.Sc.(Ag.Env.Sc.) and B.Sc.

14.8.7 Water Environments and Ecosystems Domain

This Domain is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc. Major in Environment program.

To educate students in both the ecological and physical facets of the water environment, this Domain offers two concentrations, with students choosing one or the other.

Those electing the biological concentrations will focus on the mechanisms regulating the different forms of life in water bodies. They will acquire, as well, a good understanding of the physical mechanisms controlling water properties.

Students interested in studying the transport and transformation mechanisms of water on the planet, from rivers to the oceans and atmosphere, will select the physical concentrations. They will acquire, as well, a solid background in the biological processes taking place in water bodies.

Graduates of this Domain are qualified to enter the work force or to pursue advanced studies in fields such as marine biology, geography, physical oceanography and atmospheric science.

Water Environments and Ecosystems – Biological
This concentration (57 credits including Core) is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc. Major in Environment program.

Adviser: Mr. Peter Barry, MSE Program Coordinator
E-mail: pete.barry@mcgill.ca
Telephone: (514) 398-4306

Course descriptions and prerequisites can be found in the Courses section. The most up-to-date information on courses...
Courses offered at Macdonald Campus are listed with an (M). (Core Required Courses are offered on both campuses.)

Suggested first year (U1) courses:
These courses are selected from the program requirements. They are good courses to start with.

ATOC 215 (3) Oceans, Weather and Climate

Statistics: BIOL 373 or AEMA 310 (M)

Students in this program should consider taking BIOL 373 or AEMA 310 (M) instead of MATH 203. They are more suitable for life sciences. Generally, statistics is recommended over Calculus 3 for life sciences, although if you want to take upper level oceanography courses in ATOC, you will also need Calculus 3.

B.Sc. students see section 12.3.6.1 "Course Overlap" in this Calendar about statistics and restricted courses.

Program Requirements (57 credits)
Note: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses.

Core: Required Courses (18 credits)
- ENVR 200 (3) The Global Environment
- ENVR 201 (3) Society and Environment
- ENVR 202 (3) The Evolving Earth
- ENVR 203 (3) Knowledge, Ethics and Environment
- ENVR 301 (3) Environmental Research Design
- ENVR 400 (3) Environmental Thought

Core: Complementary Course – Senior Research Project (3 credits*)
- AGRI 519 (6) Sustainable Development Plans (in Barbados)
- ENVR 401 (3) Environmental Research
- ENVR 451 (6) Research in Panama (in Panama)
* Only 3 credits will be applied to the program; extra credits will count as electives.

Domain: Required Course (3 credits)
- ATOC 215 (3) Oceans, Weather and Climate

Domain: Complementary Courses (33 credits)
6 credits chosen from:
- BREE 217 (3) Hydrology and Water Resources (M)
  or GEOG 322 (3) Environmental Hydrology
- WILD 205 (3) Principles of Ecology (M)
  or BIOL 308 (3) Ecological Dynamics
3 credits of math and statistics from:
- AEMA 202 (3) Intermediate Calculus (M)
- AEMA 310 (3) Statistical Methods 1 (or equivalent) (M)
- MATH 203 (3) Principles of Statistics (M)
- MATH 222 (3) Calculus 3
3 credits chosen from:
- BIOL 331 (3) Ecology/Behaviour Field Course (at Mont St. Hilaire)
- GEOG 495 (3) Field Studies - Physical Geography (at Mont St. Hilaire)
- GEOG 497 (3) Ecology of Coastal Waters (at Bay of Fundy) or an equivalent aquatic field course
3 credits chosen from:
- AGEC 333 (3) Resource Economics (M)
- AGRI 413 (3) Globalization Issues of Change
- ANTH 339 (3) Ecological Anthropology
- ANTH 418 (3) Environment and Development
- ECON 225 (3) Economics of the Environment
- ECON 326 (3) Ecological Economics
- ENVR 465 (3) Environment and Social Change (at Bay of Fundy)
- GEOG 404 (3) Environmental Management 2 (in Panama)
- GEOG 498 (3) Humans in Tropical Environments (in Panama)

Other Approved courses
- BIOL 301 (3) Introduction to Animal Behavior
- BIOL 309 (3) Marine Ecology
- BIOL 432 (3) Limnology
- BIOL 441 (3) Biological Oceanography
- BIOL 442 (3) Marine Biology
- BIOL 465 (3) Conservation Biology
- BIOL 453 (3) Advanced Seminar in Evolutionary Biology
- ENVR 540 or (M) Ecology of Species Invasions

Water Environments and Ecosystems – Physical
This concentration (60 credits including Core) is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc. Major in Environment program.

Adviser: Before September 2008:
Professor Peter Yau

MATH 222 (3) Calculus 3
or CEGEP 201-301 or equivalent

MATH 222 is recommended for students in the Biochemistry stream and for students in the Biology stream.

* Only 3 credits will be applied to the program; extra credits will count as electives.

or GEOG 322 (3) Environmental Hydrology
NOTE: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses, but does not include the Domain prerequisites or corequisites listed above.

Program Requirements (60 credits)

Core: Required Courses (18 credits)
ENVR 200 (3) The Global Environment
ENVR 201 (3) Society and Environment
ENVR 202 (3) The Evolving Earth
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

Core: Complementary Course – Senior Research Project
(3 credits*)
AGRI 519 (6) Sustainable Development Plans (in Barbados)
ENVR 401 (3) Environmental Research
ENVR 451 (6) Research in Panama (in Panama)
* Only 3 credits will be applied to the program; extra credits will count as electives.

Domain: Required Courses (9 credits)
ATOC 215 (3) Oceans, Weather and Climate
ATOC 315 (3) Water in the Atmosphere
GEOG 372 (3) Running Water Environments

Domain – Complementary Courses (30 credits)
6 credits chosen from:
WILD 205 (3) Principles of Ecology (M)
or BIOL 308 (3) Ecological Dynamics
BREE 217 (3) Hydrology and Water Resources (M)
or GEOG 322 (3) Environmental Hydrology
3 credits of statistics or calculus:
AEMA 310 (3) Statistical Methods 1 (or equivalent) (M)
AEMA 202 (3) Intermediate Calculus (M)
MATH 203 (3) Principles of Statistics 1
MATH 222 (3) Calculus 3
3 credits of field courses
GEOG 495 (3) Field Studies - Physical Geography (at Mont St. Hilaire)
GEOG 497 (3) Ecology of Coastal Waters (at Bay of Fundy) (or an equivalent aquatic field course)

12 credits chosen from:
BREE 416 (3) Introduction: Physics of the Atmosphere
or GEOG 306 (3) Raster Geo-Information Science
BREE 506 (3) Advances in Drainage Management (M)
or BREE 509 (3) Hydrologic Systems and Modelling (M)
or GEOG 522 (3) Advanced Environmental Hydrology
AEMA 305 (3) Differential Equations (M)
or MATH 315 (3) Ordinary Differential Equations
AGRI 435 (3) Soil and Water Quality Management (M)
ATOC 308 (3) Principles of Remote Sensing
or GEOG 308 (3) Principles of Remote Sensing
ATOC 309 (3) Weather Radars and Satellites
ATOC 568 (3) Ocean Physics
CIVE 323 (3) Hydrology and Water Resources
EPSC 549 (3) Hydrogeology
GEOG 201 (3) Introductory Geo-Information Science
GEOG 537 (3) Advanced Fluvial Geomorphology
GEOG 305 (3) Soils and Environment
or SOIL 210 (3) Principles of Soil Science (M)
NRSC 315 (3) Agricultural Micrometeorology

6 credits chosen from:
AGRI 452 (3) Water Resources in Barbados (in Barbados)
BIOL 432 (3) Limnology
BIOL 441 (3) Biological Oceanography
NRSC 510 (3) Science of Inland Waters (M)

BiOL 442 (3) Marine Biology
BiOL 465 (3) Conservation Biology
BiOL 553 (3) Neotropical Environments (in Panama)
GEOG 350 (3) Ecological Biogeography
GEOG 505 (3) Global Biogeochernistry
WILD 401 (4) Fisheries and Wildlife Management (M)

14.9 Major in Environment – B.Sc.

In addition to the selection of Domains available to students in the Major program in either the Faculty of Science or the Faculty of Agricultural and Environmental Sciences, “Major in Environment - B.Sc.,” students in the Faculty of Science program can choose from one of the two Domains limited to Science students only: Atmospheric Environment and Air Quality, or Earth Sciences and Economics.

Refer to section 14.8 “Major in Environment – B.Sc.(Ag.Env.Sc.) and B.Sc.” for the general guidelines and regulations which apply to all Domains in the Major in Environment program.

14.9.1 Atmospheric Environment and Air Quality Domain

This Domain (60 credits including Core) is open only to students in the B.Sc. Major in Environment program in the Faculty of Science.
Adviser: Professor Peter Yau
E-mail: peter.yau@mcgill.ca
Telephone: (514) 398-3719

The rapid expansion of industrialization has been accompanied with a host of environmental problems, many, if not most, involving the atmosphere. Some problems are of a local nature, such as air pollution in large urban centres, while others are global, or at least reach areas far removed from industrial activities.

The emphasis in this Domain is on the mechanisms of atmospheric flow and on atmospheric chemistry. Courses examine how the atmosphere transports pollution, lifting it to great heights into the stratosphere or keeping it trapped near the ground, moving it around the globe or imprisoning it locally, or how it simply cleanses itself of the pollution through rainfall. The Domain also gives students the training required to understand the important chemical reactions taking place within the atmosphere, as well as the knowledge necessary to measure and analyze atmospheric constituents.

Course descriptions and prerequisites can be found in the Courses section. The most up-to-date information on courses being offered this academic year is available on Class Schedule at www.mcgill.ca/minerva.

Courses offered at Macdonald Campus are marked with an (M). (Core Required courses are offered on both campuses.)

Suggested first year (U1) courses:
These courses are listed below in the program requirements.

They are good courses to start with.
ATOC 214 (3) Introduction: Physics of the Atmosphere
ATOC 215 (3) Oceans, Weather and Climate
ATOC 219 (3) Introduction to Atmospheric Chemistry
or CHEM 219 (3) Introduction to Atmospheric Chemistry
CHEM 257D1 (2) Introductory Analytical Chemistry
CHEM 257D2 (2) Introductory Analytical Chemistry
or FDSC 213 (3) Analytical Chemistry 1 (M)
MATH 222 (3) Calculus 3
or AEMA 202 (3) Intermediate Calculus (M)

Program Requirements (60 credits)
NOTE: Students are required to take a maximum of 31 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Core and Required courses.
Core: Required Courses (18 credits)
ENVR 200 (3) The Global Environment
ENVR 201 (3) Society and Environment
ENVR 202 (3) The Evolving Earth
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

Core: Complementary Course – Senior Research Project
(3 credits*)
AGRI 519 (6) Sustainable Development Plans (in Barbados)
ENVR 401 (3) Environmental Research
ENVR 451 (6) Research in Panama (in Panama)
* Only 3 credits will be applied to the program; extra credits will count as electives.

Domain: Required Courses (18 credits)
ATOC 214 (3) Introduction: Physics of the Atmosphere
ATOC 215 (3) Oceans, Weather and Climate
ATOC 219 (3) Introduction to Atmospheric Chemistry
or CHEM 219 (3) Introduction to Atmospheric Chemistry
ATOC 308 (3) Principles of Remote Sensing
or GEOG 308 (3) Principles of Remote Sensing
ATOC 315 (3) Water in the Atmosphere
CHEM 307 (3) Analytical Chemistry of Pollutants

Domain: Complementary Courses (21 credits)
6 credits from:
CHEM 257 (2) Introductory Analytical Chemistry
CHEM 273 (1) Chemical Kinetics
CHEM 377 (3) Instrumental Analysis 2
CIVE 225 (4) Environmental Engineering
COMP 208 (3) Computers in Engineering
GEOG 505 (3) Global Biogeochemistry
MATH 222 (3) Calculus 3
or AEMA 202 (3) Intermediate Calculus (M)
3 credits from:
MATH 203 (3) Principles of Statistics 1
or AEMA 310 (3) Statistical Methods 1 (M)
or equivalent
9 credits of math or physical science (at least 6 credits of which are at the 300 level or above):
ATOC 309 (3) Weather Radars and Satellites
ATOC 412 (3) Atmospheric Dynamics
ATOC 419 (3) Advances in Chemistry of Atmosphere
or CHEM 419 (3) Advances in Chemistry of Atmosphere
ATOC 540 (3) Synoptic Meteorology 1
CHEE 230 (3) Environmental Aspects of Technology
CHEM 273 (1) Chemical Kinetics
CHEM 377 (3) Instrumental Analysis 2
CIVE 225 (4) Environmental Engineering
COMP 208 (3) Computers in Engineering
GEOG 505 (3) Global Biogeochemistry
MATH 222 (3) Calculus 3
MATH 315 (3) Ordinary Differential Equations
or AEMA 305 (3) Differential Equations (M)
or equivalent
9 credits of math or physical science (at least 6 credits of which are at the 300 level or above):
NRSC 333 (3) Physical and Biological Aspects of Pollution (M)
NRSC 510 (3) Agricultural Micrometeorology (M)
3 credits of social science:
ANTH 206 (3) Environment and Culture
ANTH 418 (3) Environment and Development
ECON 225 (3) Economics of the Environment
ECON 347 (3) Economics of Climate Change
ENVR 465 (3) Environment and Social Change (in Bay of Fundy)
GEOG 302 (3) Environmental Management 1
GEOG 380 (3) Adaptive Environmental Management
GEOG 404 (3) Environmental Management 2 (in Panama or in Africa)
GEOG 498 (3) Humans in Tropical Environments (in Panama)
POLI 466 (3) Public Policy Analysis

14.9.2 Earth Sciences and Economics Domain

This Domain (66 credits including Core) is open only to students in the B.Sc. Major in Environment program in the Faculty of Science.
Adviser: Professor Don Baker
E-mail: donb@eps.mcgill.ca
Telephone: (514) 398-7485

The resources necessary for human society are extracted from the Earth, used as raw materials in our factories and refineries, and then returned to the Earth as waste. Geological processes produce resources humans depend on, and they also determine the fate of wastes in the environment. Understanding Earth's geologic processes provides us with the knowledge to mitigate many of our society's environmental impacts due to resource extraction and waste disposal. Additionally, economics frequently affects what energy sources power our society and how our wastes are treated. Earth sciences and economics are essential for our understanding of the many mechanisms, both physical and social, that affect Earth's environment.

This Domain includes the fundamentals of each discipline. Students learn of minerals, rocks, soils, and waters and how these materials interact with each other and with the atmosphere. Fundamental economic theory and the economic effects of public policy towards resource industries, methods of waste disposal, and the potential effects of global warming on the global economy are also explored.

Course descriptions and prerequisites can be found in the Courses section. The most up-to-date information on courses being offered this academic year is available on Class Schedule at www.mcgill.ca/minerva.

Courses offered at Macdonald Campus are marked with an (M). (Core Required courses are offered on both campuses.)

Suggested first year (U1) courses:
These courses are listed below in the program requirements. They are good courses to start out with.
ECON 230D1 (3) Microeconomic Theory
ECON 230D2 (3) Microeconomic Theory
EPSC 210 (3) Introductory Mineralogy
EPSC 212 (4) Introductory Petrology
EPSC 220 (3) Principles of Geochemistry
Statistics: GEOG 202, PSYC 204, BIOL 373 or AEMA 310 (M)
See section 12.3 of the Calendar about course overlap and restricted courses.

Program Requirements (66 credits)
NOTE: Students are required to take a maximum of 34 credits at the 200 level and a minimum of 15 credits at the 400 level or higher in this program. This includes Core and Required courses.

Core: Required Courses (18 credits)
ENVR 200 (3) The Global Environment
ENVR 201 (3) Society and Environment
ENVR 202 (3) The Evolving Earth
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

Core: Complementary Course – Senior Research Project
(3 credits*)
AGRI 519 (6) Sustainable Development Plans (in Barbados)
ENVR 401 (3) Environmental Research
ENVR 451 (6) Research in Panama (in Panama)
* Only 3 credits will be applied to the program; extra credits will count as electives.

Domain: Required Courses (22 credits)
ECON 230D1 (3) Microeconomic Theory
ECON 230D2 (3) Microeconomic Theory
ECON 405 (3) Natural Resource Economics
14.10 Honours Program in Environment

Adviser: Mr. Peter Barry, MSE Program Coordinator
E-mail: pete.barry@mcgill.ca
Telephone: (514) 398-4306

This Program is open only to students in the B.Sc. Major in Environment, B.Sc.(Ag.Env.Sc.) Major in Environment, B.A. Faculty Program in Environment, and the B.A.&Sc. Interfaculty Program in Environment.

The Honours Program in Environment offers students the opportunity to undertake a year-long research project in close association with a professor. Honours research provides excellent preparation for graduate studies, but is not required for such studies.

The Honours in Environment adds 6 credits of research to the regular Environment program. Since the Honours research is carried out in the final year at the same time as the regular courses, it does not add to the length (duration) of the degree. Students who successfully complete the Honours research requirements, however, may still graduate with the regular Environment program.

To be eligible for Honours, students must satisfy the requirements set by their degree (B.A., B.Sc., B.A.(Ag.Env.Sc), or B.A.&Sc.).

In addition, students must satisfy the following:

1. Students apply for the Honours program in March of their U2 year. See Peter Barry for details.

2. Applicants must have a minimum Program GPA (GPA of all required and complementary courses for the program in Environment taken at McGill) of 3.3 to enter the Honours program.

3. Students must earn a B grade (3.0) or higher for the Honours Research course (ENVR 495 or ENVR 496 & ENVR 497).

4. Students are required to achieve a minimum overall CGPA of 3.0 at graduation, and a minimum Program GPA of 3.3 to obtain Honours.

5. Arts (B.A.) students must complete a Minor Concentration in a program other than Environment. See Minor Concentrations, see section 5.11.5 for options open to B.A. students.

6. B.A.&Sc. students must complete at least 30 credits in the Faculty of Arts and at least 30 in the Faculty of Science as part of their Honours program and their Minor Concentration or Minor program. See section 6.11.5 “Minor Concentrations or Minors” for options open to B.A.&Sc. students.

Note that the Honours Research course number is different for the B.Sc.(Ag.Env.Sc.) degree.

B.A., B.Sc., B.A.&Sc.

Honours - Required Courses (6 credits)

ENVR 495 D1/N2 (3) Honours Research
ENVR 496 D1/N1 (3) Honours Research

Students in the B.A. or B.Sc. Honours programs complete the Core and Domain courses (54 to 66 credits) according to their chosen Domain as well as the Honours required courses. (Note, courses vary with each Domain.)

Students in the B.A.&Sc. Honours program complete the coursework (54 credits) for the Interfaculty Program in Environment as well as the Honours required courses.

B.Sc. (Ag.Env.Sc.)

Honours - Required Courses (6 credits)

ENVR 496 (3) Honours Research Part 1
ENVR 497 (3) Honours Research Part 2

Students in the B.Sc.(Ag.Env.Sc.) Honours program complete the Core and Domain courses (57 to 63 credits) according to their chosen Domain as well as the Honours required courses. Note: courses vary with each Domain.

In addition to completing the Honours Research course, all students must present their results to the MSE at the end of the second semester. They must also give the MSE a complete, clean (after corrections) copy of their thesis.

14.11 Diploma in Environment

Adviser: Mr. Peter Barry, MSE Program Coordinator
E-mail: pete.barry@mcgill.ca
Telephone: (514) 398-4306

The Diploma is designed for students with an undergraduate degree who wish to enrich or reorient their training, supplementing their specialization with additional undergraduate-level coursework. The Diploma requires 30 credits of full-time or part-time studies at McGill; it may be started in either January or September. The Diploma is a one-year program if taken full-time.

Students holding a B.Sc. or a B.A. degree or equivalent in good standing will be permitted to register for the Diploma through the Faculty of Agricultural and Environmental Sciences, the Faculty of Arts, or the Faculty of Science, provided they are otherwise acceptable for admission to the University.

Students must have a grade of C or higher in all courses for the Diploma.
Advising note: Consultation with the program adviser for approval of course selection to meet program requirements is obligatory. Only courses at the 200 level and above will be approved.

DIPLOMA IN ENVIRONMENT (30 credits)

Required Courses (18 credits)
ENVR 200 (3) The Global Environment
ENVR 201 (3) Society and Environment
ENVR 202 (3) The Evolving Earth
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

Complementary Courses (12 credits)
3 credits must be taken with the approval of the program adviser in an area outside of the student's previous degree (e.g., those with a B.A. or equivalent degree must take 3 credits in the natural sciences; those with a B.Sc. or equivalent degree must take 3 credits in the social sciences). A list of suggested courses is available from the program adviser, and on the MSE Website in “Undergraduate Programs: Diploma”.

9 credits must be taken in an area of focus chosen by the student with the approval of the program adviser. At least 6 credits must be taken at the 400 level or higher.

Course descriptions and prerequisites can be found in the Courses section. The most up-to-date information on courses being offered this academic year is available on Class Schedule at www.mcgill.ca/minerva.

14.12 Field Studies

Field study semesters are available in Africa, Barbados, and Panama. See section 15.2 “Field Studies” of this Calendar for details.
15 Field Studies and Study Abroad Opportunities

15.1 Study Abroad Options, page 431
15.1.1 Bilateral Student Exchanges, page 431
15.1.2 CRÉPUQ Exchanges, page 431
15.1.3 Field Study Semesters and Off-Campus Courses, page 431
15.1.4 Study Away On Your Own, page 431
15.2 Field Studies, page 431
15.2.1 African Field Study Semester, page 431
15.2.2 Barbados Field Study Semester, page 432
15.2.3 Panama Field Study Semester, page 432
15.3 Exchange Programs, page 433
15.3.1 Eligibility, page 433
15.3.2 Applying for an Exchange, page 433
15.3.2.1 Deadlines, page 433
15.3.2.2 Bilateral or CRÉPUQ, page 433
15.3.3 Awards and Financial Assistance, page 433
15.3.3.1 Travel Awards, page 433
15.3.3.2 Québec Ministère de l’Éducation, du Loisir et du Sport (MELS) Travel Awards for Québec Residents, page 433
15.3.3.3 Universitas 21 Travel Awards, page 433
15.3.3.4 McGill Scholarships and Awards, page 433
15.3.3.5 Financial Assistance, page 433
15.3.4 Transfer of Credits from Host Institution, page 433
15.3.5 Universitas 21, page 434
15.3.6 The Killam Fellowships Program, page 434
15.3.7 Canadian University Study Abroad Program (CUSAP), page 434
15.3.8 Further Information and the Student Exchanges and Study Abroad (SESA) Service Desk, page 434
15.4 Internships and Co-op Programs, page 434
15.5 Off-Campus Courses, page 434
15.5.1 Chinese Summer School, page 434
15.5.2 McGill Summer Courses in Italy, page 434
15.5.3 Desautels Faculty of Management, page 434
15.6 Off-Campus Courses, page 434
15.6.1 Architecture, page 434
15.6.2 Art History & Communication Studies, page 435
15.6.3 Biology, page 435
15.6.4 Earth & Planetary Sciences, page 435
15.6.5 East Asian Studies, page 435
15.6.6 Geography, page 435
15.6.7 History, page 435
15.6.8 Italian Studies, page 435
15.6.9 Political Science, page 435

Besides the many academic resources McGill offers on campus, there are also unparalleled opportunities to enrich your educational experience through exchange programs, internships, field study programs and McGill courses taught abroad.

15.1 Study Abroad Options

There are four types of Study Abroad options available:

15.1.1 Bilateral Student Exchanges

Bilateral student exchange agreements are tuition exchange agreements that exist between McGill University and one other institution, which have been reviewed and approved by McGill. McGill University has bilateral agreements in many countries including: Australia, Austria, Belgium, Canada, China, Czech Republic, Denmark, Finland, France, Germany, Hong Kong, Hungary, Ireland, Italy, Japan, Korea, Mexico, the Netherlands, New Zealand, Norway, Russia, Singapore, Spain, Sweden, Switzerland, Thailand, Turkey, the United Kingdom, and the United States of America. Exchange programs can be university-wide or faculty-specific. Faculty-specific agreements are only open to students in the specified faculty. The full listing of bilateral partners can be found at www.mcgill.ca/studyabroad.

15.1.2 CRÉPUQ Exchanges

The Conférence des recteurs et principaux des universités du Québec has established tuition exchange agreements in which all Quebec university students may participate, regardless of whether or not they are Quebec residents. The listing of CRÉPUQ partners is accessible from www.echanges-etudiants.crepuq.qc.ca.

15.1.3 Field Study Semesters and Off-Campus Courses

McGill offers students a chance to put theory into practice through local, regional, and international field study semesters and individual courses. Field studies provide practical experience and a chance to integrate and apply knowledge gained in the classroom. In many cases, field courses can be counted towards major program requirements. Students should see their adviser for details.

Field Study Semesters are packages of McGill courses aimed at upper year students which focus on the physical and social aspects of the environment. They are offered in various regions around the world in either the Fall or Winter Term. Currently, Field Study Semesters are offered in East Africa (Kenya, Uganda and/or Tanzania), Barbados, and Panama. Enrolment is limited, and application deadlines and costs vary, so students should consult the relevant sections of the Calendar for details. Students who are interested in participating should begin planning their courses well in advance of the Field Study semester, as some of the field courses require prerequisites.

Off-campus McGill courses are also offered to students, and sometimes require separate departmental application. The courses are typically offered during the summer months and can be offered in places as varied as Italy, Mexico, Brazil or China and in disciplines in Arts, Engineering, Science, Management or Music.

15.1.4 Study Away On Your Own

Students who wish to study as a Visiting student at a university with which McGill does not have a student exchange agreement must consult the Student Affairs Office of their McGill faculty, as well as the Admissions Office of the university to which they are applying regarding application requirements. Students pay tuition to the host institution.

15.2 Field Studies

15.2.1 African Field Study Semester

Website: www.mcgill.ca/africa

The African Field Study Semester (AFSS) is run through McGill’s Canadian Field Study in Africa Program (CFSIA). The AFSS provides one term of integrated field study in East Africa, with emphasis on environmental conservation, culture change and sustainable development. Students investigate challenges of sustaining biological diversity and social justice in African environments subject to cultural
FIELD STUDIES AND STUDY ABROAD OPPORTUNITIES

change, economic development and environmental stress. Cultural and ecological variation is examined in highland, montane, rangeland, desert, riverine, salt and fresh water lake, coastal, and urban settings.

**McGill students** should note that although the AFSS is not a degree program (such as a Minor or Minor Concentration), its 15 credits constitute a full single-term credit load that can be counted towards certain McGill degrees with the permission of program advisers.

**Students from other universities** are eligible to apply to the McGill CFSIA and must also meet the criteria for admission to McGill as a Visiting Student. Please see the AFSS Website for details.

The AFSS comprises 15 credits of field study courses. Two courses (6 credits) in the natural and social sciences provide interdisciplinary academic context for field study. The other 9 credits are taken from course offerings in two thematic areas and Special Topics.

Visit the AFSS Website [www.mcgill.ca/africa](http://www.mcgill.ca/africa), or go to [www.mcgill.ca](http://www.mcgill.ca) (Course Calendars) in July for details of program updates.

**Offered:** Winter term
**Location:** East Africa
**Enrolment Limit:** 38 students

**Fees:** In addition to the regular McGill fees, students will be required to pay the additional costs associated with delivering the courses in the field. These costs include airfare, local travel, all food and accommodation, special admission fees for parks and museums as well as other field costs. Airfares and currency fluctuation will determine the amount of this charge. The 2007 trip cost is $12,250. The actual cost for 2008 will be determined by September 2007.

Quebec residents may be eligible for a financial subsidy from the Ministère de l'Éducation, du Loisir et du Sport (MELS), see section 15.3.3.2 "Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS) Travel Awards for Quebec Residents".

**Application Deadline:** April 30, 2007. Depending on space, there will be a second intake with a deadline date of November 1, 2007.

**Application Details:** Students must submit a letter of intent, a CV, a copy of their transcript and two reference letters to June Connolly in the Geography Department office, Room 705, Burnside Hall. See the Website for details: [www.mcgill.ca/africa](http://www.mcgill.ca/africa).

**Prerequisites:** The AFSS is intended for students in their final two years.

**AFRICAN FIELD STUDY SEMESTER**

(15 credits)

**Required Courses** (6 credits)
GEOG 416 (3) Africa South of the Sahara
NRSC 300 (3) Natural History: East Africa

**Complementary Courses** (9 credits)
9 credits from thematic areas:
Courses include:
Area A - Biodiversity and conservation in Africa
BIOL 328 (3) Biological Diversity in Africa
NUTR 403* (3) Nutrition in Society
WILD 420* (3) Ornithology
WILD 421* (3) Wildlife Conservation
* Offered on a rotational basis, at least 3 credits annually

Area B - Environment and development in Africa
Courses include:
ANTH 416 (3) Environment/Development Africa
GEOG 404* (3) Environmental Management
ANTH 315 (3) Society/Culture: East Africa
* Offered on a rotational basis, at least 3 credits annually

---

**15.2.2 Barbados Field Study Semester**

**Website:** [www.mcgill.ca/mse](http://www.mcgill.ca/mse) → Programs

The Barbados Field Study Semester (BFSS) provides one term of integrated field study for students with an interest in global issues related to natural resource use as affected by socio-economic, management, urban and physical constraints. Offered at the Bellairs Research Institute in Barbados, this program challenges students to be more effective environmental decision makers, policy makers, urban planners, managers, and auditors. There is a growing need for professionals with such skills at all levels of government, within NGOs, and in the private sector. The overall goal of the BFSS is to equip future leaders to address the complexity of issues associated with the formulation and implementation of organizational strategies compatible with the societal goal of sustainable use and development of our natural resources, with a focus on water.

The BFSS is intended for senior undergraduate students from across the University and students in the School of Urban Planning. Students must apply to participate in the program. Selection will be based on the student’s academic standing and demonstrated interests and involvement in international issues related to natural resource use.

The semester is not a degree program, but credits can be counted toward certain McGill degrees with the permission of program advisers.

**Offered:** Fall Term
**Location:** Bellairs Research Institute in Barbados
**Enrolment Limit:** 25 students

**Fees:** In addition to the regular McGill fees, students will be required to pay the additional costs associated with delivering the courses in the field. These costs include airfare, accommodation and most food, as well as other field costs. Although airfares and currency fluctuation will determine the exact cost, fees for 2007 are expected to be approximately $6,050 CDN.

Quebec residents may be eligible for a financial subsidy from the Ministère de l'Éducation, du Loisir et du Sport (MELS), see section 15.3.3.2 "Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS) Travel Awards for Quebec Residents".

**Application Deadline:** March 16, 2007
**Application Details:** Students must submit a letter of intent, a CV and a copy of their transcript to the Department of Bioresource Engineering, c/o susan.gregus@mcgill.ca. Further details are available at [www.mcgill.ca/mse](http://www.mcgill.ca/mse).

**Prerequisites:** None

**BARBADOS FIELD STUDY SEMESTER**

(15 credits)

**Required Courses** (6 credits)
URBP 507 (3) Planning and Infrastructure
URBP 520 (3) Globalization: Planning and Change

**Complementary Courses** (9 credits)
one of the following cross-listed courses:
AGRI 452 (3) Water Resources in Barbados
CIVE 452 (3) Water Resources in Barbados
and one of the following cross-listed project courses:
AGRI 519 (6) Sustainable Development Plans
CIVE 519 (6) Sustainable Development Plans
URBP 519 (6) Sustainable Development Plans

---

**15.2.3 Panama Field Study Semester**

**Website:** [www.mcgill.ca/mse](http://www.mcgill.ca/mse) → Programs

This program is offered in Panama with the support of the Smithsonian Tropical Research Institute (STRI).

Hands-on experience is gained through research projects organized around multidisciplinary environmental issues. The nature of these projects will centre on practical environmental...
problems/questions important for Panama. Students will form teams that will work with Panamanian institutions (NGO, governmental or research).

There is one week of transition and 12 weeks of course attendance in Panama. Field trips will be integrated into each of the courses offered.

Offered: Winter Term
Location: Smithsonian Tropical Research Institute (STRI) in Panama
Enrolment Limit: 25 students
Fees: Students will be required to pay the additional costs associated with delivering the courses in the field. The cost of the program is approximately $4,300 CDN. This amount does not include airfare, tuition, insurance, or food. A $1000 deposit is required and is non-refundable.

• Quebec residents may be eligible for a financial subsidy from the Ministère de l’Éducation, du Loisir et du Sport (MELS), see section 15.3.3.2 “Quebec Ministère de l’Éducation, du Loisir et du Sport (MELS) Travel Awards for Quebec Residents”.

Application Details: Students must submit a letter of intent, CV, and copy of their transcript to: Susan Gabe, Biology Undergraduate Office, Stewart Biology Building, Room W4/8. E-mail: susan.gabe@mcgill.ca. Telephone: (514) 398-7045.
Prerequisites: HISP 218 Spanish Language Elementary or equivalent proficiency, and MATH 203 Principles of Statistics 1 or equivalent. A GPA of 3.00 and higher is recommended. The program is aimed at undergraduate students in their final year.

PANAMA FIELD STUDY SEMESTER
(15 credits)
Required Courses (9 credits)
BIOL 553 (3) Neotropical Environments
ENVR 451 (6) Research in Panama
Complementary Courses (6 credits)
One of the following sets:
Offered in Winter 2008 –
AGRI 550 (3) Sustained Tropical Agriculture
GEOG 498 (3) Humans in Tropical Environments
Offered in Winter 2009 –
GEOG 404 (3) Environmental Management 2
SOCL 565 (3) Social Change in Panama

15.3 Exchange Programs

15.3.1 Eligibility
Student exchange programs are open to McGill students of all nationalities. To participate, applicants must be currently registered as full-time, degree-seeking McGill students, meet the criteria of their faculty at McGill, and have a minimum CGPA of 3.0. Applicants must have completed at least one year of full-time study by the start of the exchange. Students can participate in exchanges for one term or for a full academic year (two terms).

The annual Study Abroad Fair will be held on Wednesday, October 3, 2007 in the Stephen Leacock Building, Ground Floor Corridor. Please check www.mcgill.ca/studyabroad for up-to-date information on the Study Abroad Fair.

15.3.2 Applying for an Exchange
Complete application details are found in the Student Exchanges and Study Abroad how-to guide, “Steps to a Successful Exchange”, available on the Web at www.mcgill.ca/studyabroad.

15.3.2.1 Deadlines
The deadline to submit an application to participate in a student exchange for one or two terms of the 2008-2009 academic year is Monday, February 4, 2008. Your Faculty Approval deadline to participate in an exchange is at least five (5) business days prior to this deadline.

Applications are submitted in person at the Student Exchanges and Study Abroad Office.

15.3.2.2 Bilateral or CREPUQ
If a university appears on both the Bilateral and CRÉPUQ listings of exchange partners, you must apply under the bilateral agreement. Your two exchange destination choices must be from the same type of agreement, either bilateral or CRÉPUQ.

15.3.3 Awards and Financial Assistance

15.3.3.1 Travel Awards
A number of travel awards are available for eligible candidates. Complete information on available travel awards can be found in the how-to guide, Steps to a Successful Exchange. Questions may be directed to studentexchanges@mccgill.ca.

15.3.3.2 Quebec Ministère de l’Éducation, du Loisir et du Sport (MELS) Travel Awards for Quebec Residents
The Quebec Government has made awards available for Quebec residents (as defined by the rules established by the Ministère de l’Éducation, du Loisir et du Sport (MELS)) pursuing an Exchange or Study Abroad Program outside of the province of Quebec. Undergraduate students must have completed 24 McGill credits with a minimum CGPA of 2.7 prior to the start of their Exchange or Study Abroad Program to be eligible to apply for the Award.

15.3.3.3 Universitas 21 Travel Awards
A limited number of Universitas 21 Travel Awards are available for McGill students who apply and are accepted to participate in a student exchange with one of McGill University’s Universitas 21 partners.

15.3.3.4 McGill Scholarships and Awards
For students who are pursuing an approved program of study, renewable scholarships and awards may be retained for up to one year while on exchange. However, they will not be eligible for McGill’s yearly in-course awards.

15.3.3.5 Financial Assistance
Students participating in an official McGill University exchange program are eligible to apply for government student assistance as a McGill student, but are not eligible for McGill Student Aid.

For students who “study away on their own” are not eligible to receive government student loans through McGill because they are not registered at McGill. Students should verify with the institution they will be attending whether or not they will be eligible to receive government student assistance.

15.3.4 Transfer of Credits from Host Institution
Grades received from the host institution do not appear on the McGill transcript nor are they calculated in the McGill CGPA. The McGill transcript includes a notation of participation in an exchange, the number of transfer credits granted by McGill, and where applicable, McGill course exemptions.

The transfer of credits process must be initiated by the student immediately upon return from exchange with the faculty Student Affairs office, and be completed no later than four months after the return.

Before leaving the host institution, students should order two (2) copies of the official transcript for their files, and ensure that the institution sends an official version of the transcript to the Student Exchanges and Study Abroad Office at McGill.

McGill University, Undergraduate Programs 2007-2008
15.3.5 Universitas 21

The Universitas 21 Consortium is an international network of leading research-intensive universities whose objective is to assist members’ plans for internationalisation, particularly in facilitating student exchanges and short-term research visits. McGill University currently has bilateral student exchange agreements with the following institutions within the U21 Consortium: National University of Singapore, Lund University, University of Birmingham, University of Auckland, University of Edinburgh, University of British Columbia, University of Hong Kong, University of Glasgow, University of New South Wales, University of Melbourne, University of Queensland, University of Nottingham, and University of Virginia.

15.3.6 The Killam Fellowships Program

McGill University participates in The Killam Fellowships Program which provides exceptional undergraduate students from universities in Canada and the United States with the opportunity to study in the neighbouring country for either one semester or for a full academic year. Established in 2002 through a partnership between the Foundation for Educational Exchange between Canada and the United States of America and the American Killam Trusts, the goal of the program is to increase mutual understanding between Canada and the United States through academic exchanges.

15.3.7 Canadian University Study Abroad Program (CUSAP)

The opportunity for international study is also available to McGill students through the Canadian University Study Abroad Program (CUSAP). CUSAP offers programs of study at Herstmonceux, a 15th-century castle in East Sussex, England, housing the International Study Centre. Classes in CUSAP are offered in a seminar setting, and provide students with an enriched academic experience through daily interaction with other students and instructors. CUSAP is open to both first-year and upper-year students.

15.3.8 Further Information and the Student Exchanges and Study Abroad (SESA) Service Desk

Additional details regarding study abroad, including application procedures, application forms, eligibility criteria, travel awards, etc., are contained in the must-have document, “Steps to a Successful Exchange”, on the Web at www.mcgill.ca/studyabroad, or from the Student Exchanges and Study Abroad (SESA) Service Desk located in:

James Administration Building, Room 206
845 Sherbrooke Street West
Montreal, Quebec H3A 2T5
Telephone: (514) 398-8342
Fax: (514) 398-8544
E-mail: studentexchanges@mcgill.ca
In person: Student Exchanges and Study Abroad Service Desk located in the James Administration Building, Room 206.

15.4 Internships and Co-op Programs

For information on Internships and Co-op Programs, see section 3.7.1 “Internships and Co-op Programs”.

15.5 Off-Campus Summer Programs

15.5.1 Chinese Summer School

Contact the Department of East Asian Studies for Chinese Summer School abroad at (514) 398-6742.

15.5.2 McGill Summer Courses in Italy

The Department of Italian Studies at McGill University offers up to 12 credits of courses given at the Centro Linguistico Dante Alighieri in Florence, Italy, during the months of May, June and July, 2007.

Location: Florence, Italy

Application Deadline: April 6, 2007

Application Details: Students must fill out the application form and speak to either of the program coordinators, Ms. Vanna Fonsato or Dr. Enrica Quaroni, before registering. Applications are available at www.mcgill.ca/Italian.

15.5.3 Desautels Faculty of Management

Courses are given abroad in the summer session and cover essentially the same ground as the equivalent courses given in Montreal. They will, however, be heavily influenced by the local business environment. Courses are offered in various locations.

For the most up-to-date information concerning Summer Abroad courses, please visit the Minerva class schedule at www.mcgill.ca/minerva-students.

Application Details: For registration and/or advising, please contact the Department at (514) 398-4068.

15.6 Off-Campus Courses

15.6.1 Architecture

Course:

</thead>
<tbody>
<tr>
<td>ARCH 379</td>
<td>3</td>
<td>Summer Course Abroad Study of a distinct urban environment and its key buildings; graphic recording and analysis of physical configuration, constructional peculiarities and present use. Excursions to neighbouring sites of special architectural interest. In Summer 2007, the course will be taught in Aegina, Greece, with frequent excursions to Athens. Two weeks of the course will be dedicated to visit archaeological sites and museums in central Greece (Meteora, Delphi), the Peloponnesus (Olympia, Argos, Sparta, Mystras, Nauplion, Corinth, Mycenae, Mani) and the Island of Santorini.</td>
</tr>
</tbody>
</table>

Professor: Ricardo L. Castro, MRAIC

Offered: Section 001 06-Jun-2007/01-Jul-2007

Location: Aegina, Greece, with frequent excursions to Athens

Enrolment Limit: 20-24 students

Fees: Tuition fees, travel expenses, compulsory health insurance paid by students

Application Details: Interested students are requested to contact Professor Ricardo L. Castro (514 398 6718) or ricardo.castro@mcgill.ca

Prerequisite: ARCH 202 or permission of instructor

Restriction: Departmental permission required
15.6.2 Art History & Communication Studies

Urban growth, new religious and political institutions, powerful families, factionalism and civic identity provided new patrons and uses for artwork between 1300-1600. This course compares the function of visual imagery and artistic practices in Florence with developments in other centres in Italy during study abroad. For specific details about the course content, please consult Prof. B. Wilson, Dept. of Art History and Communication.

Course:
ARTH 367 (3) Italian Renaissance Art 2

Offered: This course will not be offered in Summer 2007, Fall 2007, and Winter 2008.

15.6.3 Biology

The Faculty of Science offers the following biology courses off-campus.
BIOL 240 (3) Monteregian Flora
BIOL 331 (3) Ecology/Behaviour Field Course
BIOL 334 (3) Applied Tropical Ecology
BIOL 335 (3) Marine Mammals
BIOL 573 (5) Vertebrate Palaeontology Field Course

15.6.4 Earth & Planetary Sciences

Two-week field studies (May) in selected branches of the geosciences to examine processes in geology.
EPSC 231 (3) Field School 1
EPSC 331 (3) Field School 2
EPSC 341 (3) Field School 3

15.6.5 East Asian Studies

Contact the Department for Chinese Summer School abroad at 398-6742.

15.6.6 Geography

The Faculty of Science offers the following geography courses off-campus.
GEOG 290 (1) Local Geographical Excursion
GEOG 495 (3) Marine Mammals
GEOG 496 (3) Geographical Excursion
GEOG 499 (3) Subarctic Field Studies

15.6.7 History

Course:
HIST 407 (3) Topics in Ancient History

Prerequisite: HIST 205, HIST 209 or HIST 214, or permission of the instructor

Topic for Summer 2007: “Soothsayers and Gladiators: Etruscan Influences on Ancient Rome”

From military clashes in the Roman Republic to the religious rites and gladiatorial games of the Roman Empire, Etruscans shaped the Roman imagination. The importance of Etruria and Etruscan culture in Roman history and society, in such areas as architecture, urban planning, political structures, and religion will be examined through visits to Rome and important archaeological sites such as Veii (Veio), Caere (Cerveteri), and Poggio Civitate (Murlo). For specific details about course content, please see Prof. M. Fronda, Department of History.

Offered: Section 001 07-May-2007/01-June-2007
Location: Florence, Italy
Application Deadline: April 6, 2007
Application Details: Prior to registration, students must contact E. Quaroni or V. Fonsato at (514) 398-3956. Applications are available at www.mcgill.ca/Italian.

15.6.8 Italian Studies

The Department of Italian Studies at McGill University offers up to 12 credits of courses given at the Centro Linguistico Dante Alighieri in Florence, Italy.

Location: Florence, Italy
Application Deadline: April 6, 2007
Application Details: Students must fill out the application form and speak to either of the program coordinators, Ms. Vanna Fon- sato or Dr. Enrica Quaroni, before registering. Applications are available at www.mcgill.ca/Italian.

Courses:
ITAL 206 (6) Beginners’ Italian Intensive
ITAL 216 (6) Intermediate Italian Intensive
ITAL 306 (6) Advanced Reading and Composition
ITAL 307* (3) Topics in Italian Culture
ITAL 308 (3) Business Italian 1
ITAL 309** (3) Perspectives on Italy
* Topic May 2007: The Music of Architecture in Renaissance Italy. For specific details on course content, please consult Prof. R. Zuk, School of Architecture.
** Topic 2007: Florence: Building the Modern Imagination. For specific details on course content, please consult Prof. R. Castro, School of Architecture.

15.6.9 Political Science

Course:
POLI 339 (3) Comparative Developed: Topics 1

Prerequisite: A basic course in Comparative Politics or written permission of the instructor

Topic for Summer 2007: “The European Welfare State: a costly utopia?” This seminar will explore the welfare state in Europe: its origins, evolution, and recent challenges. Is the welfare state still a viable exercise for European governments? The course will also seek to place the Italian experience in comparative context as we look at the emergence and retrenchment of the welfare state, the role of the European Union, and new demographic and fiscal challenges. Field trips to Rome, Milan and Pisa are proposed. For specific details about the course content, please consult Prof. A. Maioni, Department of Political Science.

Offered: Section 001 02-July-2007/27-July-2007
Location: Florence, Italy
Application Deadline: April 6, 2007
Application Details: Prior to registration, students must contact E. Quaroni or V. Fonsato at (514) 398-3956. Applications are available at www.mcgill.ca/Italian.

1.1 Applying to McGill

Scope of this Guide
These instructions can be used to apply to programs in:
- Agricultural and Environmental Sciences (including the School of Dietetics and Human Nutrition)
- Arts (including the School of Social Work)
- Education
- Engineering (including the School of Architecture)
- Environment
- Management
- Music
- Nursing
- Physical and Occupational Therapy
- Religious Studies
- Science

Faculties, Centres and Students not covered in this Guide
This guide does not cover the faculties of Dentistry, Law, and Medicine and the Centre for Continuing Education. It likewise does not cover students coming to McGill University on exchange or former McGill University students seeking readmission. Please consult the relevant McGill Website below or section 1.1.1 “Important Notice for Current and Former McGill Students” for more information.

www.mcgill.ca/dentistry
www.law.mcgill.ca
www.medicine.mcgill.ca
www.mcgill.ca/conted
www.mcgill.ca/studyabroad

1.1.1 Important Notice for Current and Former McGill Students

- If you are currently registered in a degree program at McGill University and you will not be graduating in the current year, you should not complete an entirely new admission application if you wish to transfer to a different faculty or degree program. Instead, please contact the faculty you wish to transfer into for more instructions, or visit www.mcgill.ca/student-records/inter-faculty-transfers.
- If you are a former McGill University student and wish to return to complete your degree, and you have not completed a degree at another university, please contact your former faculty for more information about its readmission process.
- If you are registered with the Centre for Continuing Education in the Certificate in Management program and wish to transfer to the B.Com degree, please apply directly to the Faculty of Management.
- All other students can use this guide.
1.2 Application Procedures

McGill’s online application form is available on the Web at www.mcgill.ca/applying. Please see the “Step-by-Step Guide to Applying to McGill Online” for instructions.

The application for admission is the first step in the process of becoming a student at McGill. Please check the section relevant to your academic background for deadlines and to determine whether you meet the entrance requirements of the program you are applying to. Admission is competitive and depends on the space available; applicants possessing the minimum requirements are not guaranteed acceptance.

Application Fee

A non-refundable application fee payable by Visa or MasterCard, is required. The fee for applicants for September 2007 is $60* for applicants from Quebec CEGEPs, and $80* for all other applicants. Music applicants must pay an additional audition fee of $60.

McGill’s highly secured e-payment service minimizes cardholder risk. Your credit card information is passed instantly to the Moneris payment gateway and is not stored at McGill. Moneris handles 80% of all credit card transactions processed in Canada.

McGill University cannot process online applications without a valid credit card. If you cannot pay by credit card, please contact us at admissions@mcgill.ca.

* Unless otherwise specified, all dollar figures quoted in this guide are in Canadian funds.

Tracking the Status of Your Application

A notice acknowledging receipt of your application to McGill University will be sent to the email address indicated on your application.

This acknowledgement notice will contain a McGill identification number and a PIN which you can subsequently use to log on to Minerva. McGill’s self-service Web-based administrative system, at www.mcgill.ca/minerva/applicants. You will be able to check the status of your application, including the receipt of supporting documents, on Minerva.

Fall 2007 Term (begins September 2007)

The majority of students enter McGill University in September. Admission availability in January is limited.

Applications must be submitted on or before the deadlines for admission to the Fall 2007 term given for each applicant pool.

Supporting documents may be submitted later, as noted in each category.

- Late applications will not be considered for scholarships.
- Late applications will not be considered for limited enrolment programs, unless written permission to apply late is obtained in advance from the Admissions Office concerned.
- For non-limited enrolment programs, late applications will be considered only as time permits.

Priority is given to applications received on time. McGill University reserves the right to cancel, or transfer to a subsequent term, any application submitted after the deadline dates listed, without prior notice.

Supporting documents should be sent as soon as they are available. If received before the application, they will be kept on file for one year.

Winter 2008 Term (begins January 2008)

Most McGill University undergraduate programs do not admit students in January. To find out which programs will be open for January admission, please visit www.mcgill.ca/applying or call (514) 398-3910 in early October.

Note 1: All programs in the Faculty of Agricultural and Environmental Sciences admit students in January, except for Freshman programs and the Farm Management Technology Program.

Note 2: If you are applying to Music, please visit www.mcgill.ca/music/prospective/undergraduate in early November to determine program availability for January. Although most Music programs are closed in January, some exceptions may apply.

Note 3: The Faculty of Religious Studies admits students to the Bachelor of Theology (B.Th.) program in January.

Special Bachelor of Social Work Session – begins May (under review)

This is an intensive 14-month program for students with an approved bachelor’s degree, substantial paid and volunteer work experience relevant to social work, and demonstrable personal suitability for the profession. The program is currently under review.

Deadline for application and submission of all supporting materials is December 1 for the session beginning the following May. THIS DEADLINE IS STRICTLY ENFORCED.

1.3 General Admission and Documentation Requirements for all Applicants

This information regarding entrance requirements was accurate at the time of publication. For further information and updates, please visit www.mcgill.ca/applying. The University reserves the right to make changes to admissions policies without prior notice.

McGill University accepts students from a wide variety of academic backgrounds, including Quebec CEGEPs, high schools in other Canadian provinces, the U.S. and internationally, as well as applicants from other universities and colleges.

1.3.1 McGill’s Competitive Admission Process

Your entrance requirements are determined by your educational background and the category of admission requested. Detailed information on additional requirements for specific programs, including Architecture, Education, Music, Occupational Therapy, Physical Therapy, Religious Studies (B.Th.), and Social Work is provided in this guide.

Admission decisions are based on your academic record, as well as performance in prerequisite courses, depending on the program. All marks are taken into consideration in determining admission, including those for failed or repeated courses. In addition, many programs take other information into consideration in making admission decisions (for example, the audition for Music or the portfolio for Architecture). Generally speaking, extracurricular activities are not significant in the admission decision, although they are an important factor in the awarding of certain entrance scholarships.
Admission to McGill University is competitive and students who present the minimum requirements are not guaranteed acceptance. Admission decisions are frequently based on official interim academic results available at the time of review. If admitted, you are expected to maintain your level of academic performance through to the completion of your pre-McGill studies. Due to constraints of space and timing, it is not normally possible to consider applicants on the basis of repeated or supplemental course work completed after the normal file review period. Admission is always subject to the availability of places in a particular program.

1.3.2 Proof of Proficiency in English

The language of instruction for most courses at McGill University is English; however, you may make arrangements to write term papers, examinations and theses in English or in French, except in courses where knowledge of the language is one of the objectives of the course. You must demonstrate an adequate level of English proficiency prior to admission to McGill, regardless of citizenship status or country of origin.

If you answer "yes" to any of the following six statements, you do NOT need to provide proof of English proficiency.

• Have you lived and attended school, for at least five years, in a country where English is the acknowledged primary language?
• Have you completed both Secondary V and a DEC at a French CEGEP in Quebec?
• Have you completed a DEC at an English CEGEP in Quebec, during or later than 2003?
• Have you or will you complete a French Baccalaureate - Option Internationale (British or American section)?
• Have you or will you complete International Baccalaureate English A with a final result of 5 or better?
• Have you or will you complete the British Curriculum A-Level English (other than English as a Second Language) with a final grade of C or better?

If you answered "no" to all of the above, but answer "yes" to either of the following two questions, you may be asked to provide proof of English language proficiency.

• Do you consider English to be your first language?
• Have you been attending school at an accredited institution (in a non-English country) where English is the main language of instruction?

All other applicants must demonstrate proficiency in English, using one of the following five options:

McGill Certificate of Proficiency in English
Certificate Awarded
For further information about the program, contact:
Department of Languages and Translation Centre for Continuing Education
688 Sherbrooke Street West, Suite 1199
Montreal, Quebec, H3A 3R1 Canada
Tel.: (514) 398-6160
Fax: (514) 398-2690
Website: www.mcgill.ca/conted

IELTS (International English Language Testing System)
A band score of 6.5 or better.
For further information about IELTS, contact:
The British Council
Medlock Street

TOEFL Services
Educational Testing Services (ETS)
P.O. Box 6151
Princeton, New Jersey, 08541-6151 U.S.A
Website: www.toefl.org

Please note: Institutional versions of these tests are not acceptable. It is your responsibility to ensure official test results are sent to McGill. The TOEFL and APIEL institutional code at McGill University is 0935-00.

1.3.3 Placement Tests in Mathematics and Basic Sciences

If you are applying from outside Quebec and believe you have taken the equivalent of one or more introductory university-level science course (algebra, calculus, biology, chemistry, physics) but do not have acceptable certification to that effect,
you may be eligible to take placement tests at McGill. These are formal examinations held on campus during the last two weeks of August. For more information, refer to www.mcgill.ca/student-records/exam/placement.

Each faculty’s policy will determine whether credit for, and/or exemption from, certain courses will be granted for successful completion of placement tests.

1.3.4 Advanced Standing or Transfer Credits

You must complete a minimum of four years of study in order to be eligible for a degree from McGill University. If you have completed a Quebec CEGEP degree, you are required to complete a minimum of three years of study, as the CEGEP degree is equivalent to the first year of university. If you have advanced standing in the form of Advanced Placement (AP), Advanced Subsidiary (AS), Advanced Level (A-Level), International Baccalaureate (IB) Higher level Examinations, as well as the French Baccalaureate, European Baccalaureate, Abitur or Bagrut, you may be awarded up to 30 credits of advanced standing, subject to faculty and program requirements (up to 24 in Music). Students transferring from another university or college may also be awarded transfer credits for their coursework, which must be supported by calendar course descriptions. A minimum of 60 credits must be completed while in residence at McGill University in order to be eligible for a degree. For some faculties and programs, you may be required to exceed the minimum in order to meet the specific requirements for their programs.

In most cases, the Admissions Office will calculate and assign advanced standing credit only after receipt of confirmation of the program you will enter at McGill University, and after you have paid your required deposit. Furthermore, credits and exemptions will not be awarded on your McGill record until the Admissions Office receives final official results of prior work and/or external examination, which is often not until July or August. Once you’ve confirmed and paid your deposit and official results have been received, your transfer credits will be recorded on your McGill transcript by October 2007, though in most cases the information will be showing on your record during the summer and prior to starting classes. Any credits or exemptions outstanding after October will normally be handled by the Student Affairs Office of your Faculty or School.

After you receive your initial offer of admission to McGill, you will not receive an official letter outlining the transfer credits and exemptions that have been awarded; however, you will be able to see this information on your advising transcript on Minerva, once the information has been entered. You can refer to www.mcgill.ca/student-records/transfercredits to check what exemptions you might receive for courses you are currently completing.

You have the option of declaring or not declaring results of Advanced Placement (AP) exams at the time of application. Accordingly, the admission decision may take AP results into consideration. In any event, AP Examination results with a score of 4 of better must be declared at the time of initial registration. Each faculty’s policy will determine whether advanced standing credit and/or exemption from certain courses will be granted on the basis of AP results.

1.3.5 Supporting Documentation Requirements

In addition to the application and application fee, you may need to forward other materials in order to be considered for admission to McGill. All supporting materials should be sent to the McGill University mailing addresses listed in section 1.15 “Mailing Addresses for Supporting Documents” of this guide. See the section relevant to your academic background for deadlines. It is your responsibility to ensure that all required transcripts and documents are submitted by the applicable deadline to the appropriate admissions office.

It is in the interest of all applicants to complete their files as quickly as possible. When program space is limited, preference may be given to applicants who have provided all required supporting documents earlier on. Should a program reach its capacity prior to the deadline for submission of documents, incomplete applications may be cancelled.

In addition to the general admission and documentation requirements, you must fulfill specific admission and documentation requirements according to your educational background and the program(s) to which you seek admission.

1.3.5.1 Official Transcripts

Quebec CEGEP students, Ontario high school students with OUAC numbers, and current and former McGill University students are not required to send transcripts by mail. McGill’s admitting office obtains these directly.

All other applicants must make arrangements with their high school, college and/or university to send official transcripts to McGill.

Note: To be considered official, transcripts must be forwarded directly from your high school, college and/or university to McGill. Unofficial transcripts submitted by you will not be accepted or used for admission. Additionally, McGill University does not accept electronically scanned transcripts.

Transcripts in languages other than English or French must be sent to McGill, accompanied by an English or French translation prepared by your school. In the event that the school cannot provide a translation, a certified translator should send the translation to McGill.

If you have attended more than one high school, you should ask your previous high school(s) to forward transcripts of your grades directly to McGill, or you may have your current high school forward a certified photocopy of a complete official transcript received from a previous school.

If you are an Advanced Level or International Baccalaureate student, you must arrange for final results to be sent by the appropriate Examination Board to McGill. Advanced Placement (AP) results must be sent directly to McGill University from the College Board. Copies sent by the school will not be accepted.

Important: Transcripts sent to McGill University become the property of the University and will not be returned or forwarded to other institutions.

1.3.5.2 External Test Results

Please note that McGill University receives TOEFL, SAT, ACT and AP test results electronically. Please ensure that the personal information you provide to the examination board matches the information you give to McGill. If there is a discrepancy in personal information, we will not be able to load your electronic results.

For further information or assistance, you may send an e-mail to admissions@mcgill.ca. Please include your McGill ID number and indicate “Test Discrepancy” in the subject line of your e-mail.

1.3.5.3 Letters of Reference or Evaluation

Except for the specific programs noted in section 1.3.6 “Additional Materials Required by Specific Programs” and applicants applying as Mature students, letters of reference are not mandatory. In most cases, an admission decision can be reached on the basis of the transcript.

When required, letters of reference or evaluation must be submitted in envelopes sealed and signed across the flap by the author of the letter. Whenever possible, letters should be typed on letterhead stationery.
1.3.5.4 Extenuating Circumstances
If you have checked “Yes” in the Extenuating Circumstances box, you must compose and sign your own detailed letter (maximum two pages) indicating the nature and chronology of the circumstances. This letter must be accompanied by supporting documentation, which may include a medical or death certificate, or a letter from a school counsellor, psychologist or social worker, as appropriate. If you are an applicant claiming extenuating circumstances, please be advised that an admission decision may be delayed considerably.

1.3.6 Additional Materials Required by Specific Programs
If applying to the following programs, you must submit letters of reference and/or other supporting materials as outlined below:

- **Architecture**
- **Education**
- **Music**
- **Physical Therapy and Occupational Therapy**
- **Religious Studies (B.Th.)**
- **Social Work**

When required, letters of reference or evaluation must be submitted in sealed envelopes, signed across the flap by the author of the letter. Whenever possible, letters should be typed on letterhead stationery.

1.3.6.1 Architecture
If applying to the School of Architecture, you must submit a portfolio of your work to McGill University by no later than March 15.

Your portfolio must be in 8-1/2” x 11” or A4 format, bound, and submitted in an envelope marked “ARCHITECTURE PORTFOLIO”. It must include a minimum of ten (10) good quality photocopies or photographs of your original work, representing your creative and design skills.

Work appropriate to the portfolio might include, but is not limited to: freehand drawings, paintings, sculpture, photography, computer graphics, technical drawings and model-making. Include work done in a variety of media.

Do not submit originals, rolled work, photographic slides, audio or video tapes, CDs or DVDs.

Your portfolio should include a detailed list of the contents, indicating the size of each work and the medium used.

If you are sending your portfolio from outside Canada, please indicate that the portfolio has “no commercial value” on the outside packaging. Otherwise, customs clearance charges may delay receipt. Please enclose a self-addressed envelope with sufficient Canadian postage (or international postal reply coupons) if you want your portfolio returned. Portfolios will be returned after September 30.

**Note:** If you have previously studied in an architecture or design program, you must arrange for the submission of a letter of reference from the director of that program.

1.3.6.2 Education
If applying to the Second Languages programs (English or French), you are required to pass a language proficiency test.

After submitting your application, you should call the Department of Integrated Studies in the Faculty of Education at (514) 398-4527 to make testing arrangements. If you live outside the Montreal area, you may complete the test through correspondence.

**Note:** The language proficiency test must be completed before an admission decision can be made.

Mature applicants to any Education program, whose applications pass initial review, will be contacted for an interview.

1.3.6.3 Music
- **You must arrange to have the necessary evaluation form completed by your music teacher and submitted directly to McGill. The form can be downloaded from [www.mcgill.ca/music/prospective/undergraduate/](http://www.mcgill.ca/music/prospective/undergraduate/)**
- **You must perform an entrance audition.**
- **Composition applicants, including those who have indicated Composition as a second program: You must submit two or three samples of your written work.**
- **Music Education applicants, including those who have indicated Music Education as a second program: You must request that a letter of reference attesting to your suitability for teaching be sent to McGill.**

If applying to piano, female voices and/or any jazz instruments, you must submit an audio or video recording (on audio tape, VHS, CD or DVD) for pre-selection by **January 15**. Following a review of these recordings, if selected, you will be invited to attend a live audition.

**Note:** No live auditions will be scheduled in piano, female voices and jazz instruments until an audio or video recording has been received and reviewed.

- **Music degree and diploma program applicants: You must perform an entrance audition in your principal instrument or in voice. Audition requirements and specific dates for each instrument and for voice can be found at [www.mcgill.ca/music/prospective/undergraduate](http://www.mcgill.ca/music/prospective/undergraduate).**
- **Audition material should be chosen to display your musicianship and technical proficiency to your best advantage. At the time of the audition, you will be required to sit a rudiments/musicianship test. For a description of the test, please visit [www.mcgill.ca/music/prospective/undergraduate/exams](http://www.mcgill.ca/music/prospective/undergraduate/exams).**
- **Auditions for the Bachelor of Music and Licentiate programs are approximately 10-15 minutes long, except for organ.**
- **Artist Diploma program applicants: You must prepare a recital program of approximately 60-minutes duration. The panel will select the excerpts it wishes to hear.**
- **The School of Music will provide accompanists free of charge for the audition time only. Rehearsal costs are your responsibility and vary depending on the accompanist. However, you may bring your own accompanist, if you wish, at your own expense.**

**Recorded Auditions**
- **Live auditions are always preferred. Audio or video recordings (on audio tape, VHS, CD or DVD) are acceptable only when distance prevents you from auditioning in Montreal in person. Due to the inherent limitations of recorded performances, it is very much to your advantage to play a live audition.**
- **Recordings should be approximately 30 minutes in length, and must include the requirements listed for the instrument or for voice. Recordings must be submitted with a repertoire list.**
- **In the areas of Jazz, Strings and Voice, video is preferred and, in some cases, required.**
- **Videos must be submitted on DVD or VHS tape in NTSC (North American) format, recorded in short play mode. DVDs or tapes that cannot be played on North American video players will not be viewed.**
- **Recordings must be of very good technical quality and should be less than six months old.**
- **Recordings must be sent to McGill University and received no later than **January 15**.**

1.3.6.4 Occupational Therapy and Physical Therapy
A letter (or letters) must be submitted by **August 1** of the entering year attesting to 50 hours of volunteer or paid therapeutic work in a physical therapy or occupational therapy...
department or equivalent, in a health care facility, or other appropriate setting.

If entering Occupational or Physical Therapy, you are strongly encouraged to have a current CPR certification, otherwise you will be required to obtain one by the end of the Fall semester and prior to consideration for a hospital clinical placement.

1.3.6.5 Religious Studies (B.Th.)

If applying to the B.Th. program, you must submit two letters of reference, at least one of which should be from an instructor at an academic institution previously attended. The referee form is available at www.mcgill.ca/religiousstudies/theological/bth.

1.3.6.6 Social Work

B.S.W. and Special BSW (program under review)

It is the policy of the School of Social Work to support diversity. The School encourages applications from a wide variety of people, including members of minority groups and individuals with low income.

1.4 Applicants from Quebec CEGEPs

Students admitted on the basis of the CEGEP Diplôme d'études collégiales (DEC) are normally granted 30 credits of advanced standing, reducing a 120-credit requirement to 90 credits or six semesters. Some programs are longer, including B.Eng (Bioresource), Dietetics, Engineering, Music, Nursing, Physical and Occupational Therapy, and most programs in Education. For more information about the length of programs at McGill, refer to the University Calendar or the website at www.mcgill.ca.

Note: Advanced standing credits for Music applicants vary, depending on the results of placement exams that typically take place in August before the term begins. Quebec high school graduates are not eligible for admission to McGill University directly from Secondary V. To be eligible you must attend and graduate from CEGEP. Quebec high school graduates who attend one full year of university study outside Quebec may be admissible as Transfer students. Please consult the appropriate McGill University admissions office prior to applying.

* It is in the interest of all applicants to complete their files as quickly as possible. When program space is limited, preference may be given to applicants who have provided all required supporting documents earlier on. Should a program reach its capacity prior to the deadline for submission of documents, incomplete applications may be cancelled.

1.4.2 Admission Requirements

If you have obtained a DEC prior to the start of classes, you are eligible to apply to McGill University. If you are graduating with a professional CEGEP diploma, you are eligible for admission to certain programs at McGill, including the Bachelor of Nursing Integrated. Applicants with professional DECs are evaluated on a case-by-case basis.

Cote R

McGill University uses the “cote de rendement au collégial” (CRC), commonly known as the Cote R, rather than CEGEP percentage grades in making admission decisions for most programs. The Cote R is a method of comparing and ranking students from CEGEP; it measures how far above or below the class average you place, with adjustments based on the relative strength of the group. Please note that Music does not use the Cote R in its evaluation. Instead, auditions and the academic record determine admissibility.

CEGEP applicants to McGill University must complete the prerequisites outlined below to be eligible for consideration.

Note: If you intend to enrol in a Summer CEGEP course in the semester before university entry, please inform the appropriate McGill University admissions office in writing, no later than June 10. Please state the name and code of the Summer course and the reasons the course is being taken. Students admitted to McGill University are required to complete their DEC, otherwise admission might be revoked.

Agricultural and Environmental Sciences, School of Dietetics and Human Nutrition

A DEC in an appropriate Science program, and the following prerequisites:

B.Eng (Bioresource)

- Biology - NYA (OOUK)
- Chemistry - NYA, NBY (OOUL, OOLUM)
B.Sc./B.Ed.
B.Mus./B.Ed.

If applying to the B.Sc.(Ag.Env.Sc.) Major in Agricultural Economics only, you will be considered with a DEC in Social Science if it includes Mathematics 103 and 203. An overall Cote R of 24 is required with 24 or better in each of the mathematics prerequisites. If accepted, you will then be required to complete one course each of biology, chemistry, and physics.

B.Sc.(F.Sc)

• Biology - NYA (00UK)
• Chemistry - NYA, NYB (00UL, 00UM)
• Mathematics - NYA, NYB (00UN, 00UP)
• Physics - NYA, NYB, NYC (00UR, 00US, 00UT)

B.Sc.(Nutr.Sc.) (Dietetics and Human Nutrition)

• Biology - NYA, General Biology II (00UK, 00XU)
• Chemistry - NYA, NYB, Organic Chemistry I (00UL, 00UM, 00XV)
• Mathematics - NYA, NYB, NYC (00UN, 00UP)
• Physics - NYA, NYB, NYC (00UR, 00US, 00UT)

Architecture

• Chemistry - NYA, NYB (00UL, 00UM)
• Mathematics - NYA, NYB, NYC (00UN, 00UP, 00UQ)
• Physics - NYA, NYB, NYC (00UR, 00US, 00UT)
• Portfolio by March 15

Arts

• No specific prerequisite courses. However, the following applies:
  • Courses in statistics and biology are recommended for applicants to Psychology.
  • Mathematics - NYA, NYB, NYC (00UN, 00UP, 00UQ) are recommended for applicants to Computer Science or Mathematics.
  • Mathematics - NYA (00UN) and one of Biology, Chemistry or Physics NYA (00UK, 00UL, 00UR) are recommended for applicants to the School of Environment program.

Arts and Science (B.A. & Sc.)

• Mathematics - NYA, NYB, (00UN, 00UP) (Applicants with Social Science Mathematics - 103, 203 will be considered on a case-by-case basis.)
• Minimum of four of the following:
  • Biology - NYA, General Biology II (00UK, 00XU)
  • Chemistry - NYA, NYB, Organic Chemistry I (00UL, 00UM, 00XV)
  • Mathematics - NYA, NYB, NYC (00UN, 00UP, 00UQ)
  • Courses in statistics and biology are recommended for applicants to Psychology.
  • Mathematics NYC (00UQ) is recommended for applicants to Computer Science or Mathematics.

Education

• No specific prerequisite courses

B.Mus./B.Ed. applicants must also meet Music requirements.

B.Sc./B.Ed. applicants must also meet Science requirements.

Engineering

• Chemistry - NYA, NYB, (00UL, 00UM)
• Mathematics - NYA, NYB, NYC (00UN, 00UP, 00UQ)
• Physics - NYA, NYB, NYC (00UR, 00US, 00UT)

Kinesiology

• Biology - NYA, General Biology II (00UK, 00XU)
• Chemistry - NYA, NYB, Organic Chemistry I (00UL, 00UM, 00XV)
• Mathematics - NYA, NYB (00UN, 00UP)
• Physics - NYA, NYB, NYC (00UR, 00US, 00UT)

Management

• Mathematics - NYA, NYB, NYC (00UN, 00UP, 00UQ) or 103, 203, 105 (022X, 022Y, 022Z)

Music

A DEC in Music or equivalent. If you have a DEC in a field other than music, you must have the equivalent music prerequisites. No additional prerequisite courses are required. Audition and academic record determine admissibility. (Music does not use the Cote R). B.Mus./B.Ed. applicants must also meet Education requirements.

Nursing (B.Sc.(N))

• Biology - NYA, General Biology II (00UK, 00XU)
• Chemistry - NYA, NYB, Organic Chemistry I (00UL, 00UM, 00XV)
• Mathematics - NYA, NYB, NYC (00UN, 00UP)
• Physics - NYA, NYB, NYC (00UR, 00US, 00UT)

Nursing (B.N.)(Integrated Program)

If you are enrolled in the five-year Integrated Nursing Program (180.AO) at Dawson, Heritage, John Abbott, or Vanier, you will be considered for admission to the B.N. Int. If you are from another CEGEP, you will be considered on an individual basis. Eligible CEGEP candidates are required to meet set academic standards in their program in order to gain promotion to the 4th year (i.e., the McGill University segment). For more information on the content, requirements and means of entry into the McGill Integrated Nursing Program, please visit the School of Nursing Website at www.nursing.mcgill.ca, or contact Dr. Marcia Beaulieu, Coordinator, McGill B.N. Program, at (514) 398-3309.

Registered Nurses

For information on programs for registered nurses qualified outside Quebec, but holding current OIIQ licensure, or who have graduated with the 180.01 DEC, please contact Dr. Marcia Beaulieu, Coordinator, McGill B.N. program, at (514) 398-3309.

Occupational Therapy, Physical Therapy

• Biology - NYA, General Biology II (00UK, 00XU)
• Chemistry - NYA, NYB, Organic Chemistry I (00UL, 00UM, 00XV)
• Mathematics - NYA, NYB (00UN, 00UP)
• Physics - NYA, NYB, NYC (00UR, 00US, 00UT)

Science

• Biology - NYA (00UK)
• Chemistry - NYA, NYB, (00UL, 00UM)
• Mathematics - NYA, NYB, NYC (00UN, 00UP, 00UQ)
• Physics - NYA, NYB, NYC (00UR, 00US, 00UT)

General Biology II (00XU) and Organic Chemistry I (00XV) are recommended for applicants to biological and pre-medical science programs.

B.Sc./B.Ed. applicants must also meet Education requirements.

Social Work

• No specific prerequisite courses

Religious Studies (B.Th.)

Applicants with a CEGEP DEC with a minimum average of 75% may be considered. For further information please visit www.mcgill.ca/religiousstudies/theological/bth.
1.4.3 Documentation
If you are a CEGEP student, you are not required to submit official transcripts. However, you must enter your Permanent Code during the application process. Applications from CEGEP students submitted without a valid Permanent Code will not be processed until a valid Permanent Code is provided. McGill University will obtain an official transcript electronically from the Quebec Ministry of Education. If, for any reason, McGill University cannot obtain an electronic copy of your marks, an official copy may be requested from your CEGEP.

</tbody>
</table>

* It is in the interest of all applicants to complete their files as quickly as possible. When program space is limited, preference may be given to applicants who have provided all required supporting documents earlier on. Should a program reach its capacity prior to the deadline for submission of documents, incomplete applications may be cancelled.

1.5.2 Admission Requirements

If you are an applicant from Ontario, you must have completed the Ontario Secondary School Diploma (OSSD) by the time you commence your university studies. McGill University reviews Ontario high school applications for admission based on its own calculation of the "top six" pre-university (4U, 4M, OAC) course average. A minimum of six 4U and/or 4M (or OAC) courses are required for admission. At least four of the six required courses, as well as all prerequisite courses, must be taken at the 4U (or OAC) level.

All grades for required 4U and 4M (or OAC) courses are taken into consideration, including any grades for failed or repeated courses. In addition, depending on the program, certain prerequisite courses are included. The McGill calculated average excludes most applied courses. However, all types of performing arts courses at the 4M level (allowing only a maximum of two) will be eligible for inclusion in the top-six average. This may vary from the calculation used at other institutions.

If you come from a school where the language of instruction is English, then 4U level English (or OAC English) must be included in the six courses. If you come from a school where the language of instruction is French, then 4U level French (or OAC French) must be included in the six courses. English Second Language and French Second Language courses are not accepted as prerequisites.

Every attempt has been made to report accurately on admission requirements in effect at the time of printing. It should be noted that McGill University reserves the right to revise its admission requirements without prior notice.

High school students are not eligible for direct admission to Physical Therapy, Occupational Therapy, or Social Work.

Agricultural and Environmental Sciences, School of Dietetics and Human Nutrition

- Calculus MCB4U (or OAC) or Geometry MGA4U (or OAC)
- At least two of: Biology SBI4U (or OAC), Chemistry SCH4U (or OAC), Physics SPH4U (or OAC)
- 4U (or OAC) English or French

Architecture

- Calculus MCB4U (or OAC) or Geometry MGA4U (or OAC)
- Chemistry SCH4U (or OAC)
- Physics SPH4U (or OAC)
- 4U (or OAC) English or French
- Portfolio by March 15

Arts

- 4U (or OAC) English or French

Arts and Science (B.A. & Sc.)

- Calculus MCB4U (or OAC) or Geometry MGA4U (or OAC)
- At least one of: Biology SBI4U (or OAC), Chemistry SCH4U (or OAC), Physics SPH4U (or OAC)
- 4U (or OAC) English or French

Education

- 4U (or OAC) English or French

B.Mus./B.Ed. applicants must also meet Music requirements.

B.Sc./B.Ed. applicants must also meet Science requirements.

Engineering

- Calculus MCB4U (or OAC) or Geometry MGA4U (or OAC)
- Chemistry SCH4U (or OAC)
- Physics SPH4U (or OAC)
- 4U (or OAC) English or French

Kinesiology

- Calculus MCB4U (or OAC) or Geometry MGA4U (or OAC)
- At least two of: Biology SBI4U (or OAC), Chemistry SCH4U (or OAC), Physics SPH4U (or OAC)
- 4U (or OAC) English or French

Management

- Calculus MCB4U (or OAC) or Geometry MGA4U (or OAC)
- 4U (or OAC) English or French

Music

- 4U (or OAC) English or French

Audition and academic record determine admissibility.

B.Mus./B.Ed. applicants must also meet Education requirements.

Nursing (B.Sc.(N.))

- Calculus MCB4U (or OAC) or Geometry MGA4U (or OAC)
- At least two of: Biology SBI4U (or OAC), Chemistry SCH4U (or OAC), Physics SPH4U (or OAC)
- 4U (or OAC) English or French
Occupational Therapy, Physical Therapy
Not eligible for direct admission.
Minimum one year of university studies with completion of all prerequisite courses.

Religious Studies (B.Th.)
Applicants with an Ontario Secondary School Diploma (OSSD) with a minimum average of 75% may be considered. For further information please visit www.mcgill.ca/religionsstudies/theological/bth.

Science
- Calculus MCB4U (or OAC) or Geometry MGA4U (or OAC)
- At least two of: Biology SBI4U (or OAC), Chemistry SCH4U (or OAC), Physics SPH4U (or OAC)
- 4U (or OAC) English or French
B.Sc./B.Ed. applicants must also meet Education requirements.

Social Work
Not eligible for direct admission.
Minimum one year of university studies.

1.5.3 Documentation
If you are currently studying at an Ontario high school and are registered with the Ontario Universities Application Centre (OUAC), you must provide your correct OUAC number so that McGill University can electronically access your transcripts. Please verify the accuracy of your OUAC number carefully; an incorrect number will delay the admission process. If your number is not available at the time of application, you can submit it at a later date via Minerva.

If, for any reason, your electronic transcripts cannot be obtained from OUAC, the University may require an official copy from your high school.

Note: If you are an Ontario high school student who will graduate before April 2007, who has taken or will take any distance, night or correspondence courses or who will take Summer school courses in 2007, it is very likely that some of your grades will not show on the electronic transcript we get from OUAC. Therefore, you must arrange for these grades to be sent separately by mail to the appropriate admissions office.

If you are not registered with OUAC, you must arrange to have your school(s) send official transcripts directly to McGill.

Transcripts should show interim grades for the current year for courses in progress. Interim grades means one of the following:

<table>
<thead>
<tr>
<th>Terms per year</th>
<th>Interim Grades</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two terms</td>
<td>First term</td>
</tr>
<tr>
<td>Three terms</td>
<td>First two terms</td>
</tr>
<tr>
<td>Four terms</td>
<td>First two terms</td>
</tr>
<tr>
<td>Two semesters</td>
<td>First term finals and second semester mid-terms</td>
</tr>
</tbody>
</table>

If you are in a combined high school/ International Baccalaureate Diploma program, please arrange for your estimated IB results to be sent directly from your school to McGill.

1.6 Applicants from Canadian High Schools Outside Quebec and Ontario

When program space is limited, preference may be given to applicants who have provided all required supporting documents earlier on. Should a program reach its capacity prior to the deadline for submission of documents, incomplete applications may be cancelled.

1.6.2 Admission Requirements
If you are applying to McGill University from Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland, the Northwest Territories, Nova Scotia, Nunavut, Prince Edward Island, Saskatchewan or Yukon, you must have a high school diploma that gives you access to university education in your home province or territory.

Admission to McGill University is based on an average of the results of five academic Grade 12 level courses (regardless of the calendar year in which they were taken), including all the required prerequisites. (For British Columbia students, normally four of the five courses, including all prerequisites, must be provincially examinable or at a higher level. All courses must be academic.) Generally speaking, all marks are taken into consideration in determining admission, including those of failed or repeated courses.

For students applying on the basis of a Grade 12 diploma issued by the Nunavut Department of Education, the language course, Inuktitut, and the social science course, Aulajaaqtut, are regarded as academic courses and may be included in the top-five course average.

If you come from a school where the language of instruction is English, then Grade 12 English must be included in the academic record. If you come from a school where the language of instruction is French, then Grade 12 French is required. English and French Second Language courses are not accepted as prerequisites.

High school students are not eligible for direct admission to Occupational Therapy, Physical Therapy or Social Work.

Agricultural and Environmental Sciences, Dietetics and Human Nutrition
- Grade 12 Mathematics (pre-calculus)
- At least two of Grade 12 Biology, Chemistry or Physics
- Grade 12 English or French

Architecture
- Grade 12 Mathematics (pre-calculus)
- Grade 12 Chemistry
- Grade 12 Physics
- Grade 12 English or French
- Portfolio by March 15
Applicants from U.S. High School Programs (in the U.S.A. and other countries)

Arts
- Grade 12 English or French

Arts and Science (B.A. & Sc.)
- Grade 12 Mathematics (pre-calculus)
- At least one of Grade 12 Biology, Chemistry or Physics
- Grade 12 English or French

Education
- Grade 12 English or French

B.Mus./B.Ed. applicants must also meet Music requirements.
B.Sc./B.Ed. applicants must also meet Science requirements.

Engineering
- Grade 12 Mathematics (pre-calculus)
- Grade 12 Chemistry
- Grade 12 Physics
- Grade 12 English or French

Kinesiology
- Grade 12 Mathematics (pre-calculus)
- At least two of Grade 12 Biology, Chemistry or Physics
- Grade 12 English or French

B.Sc. (Kin.) applicants must also meet Education requirements.

Management
- Grade 12 Mathematics (pre-calculus)
- Grade 12 English or French

Music
- Grade 12 English or French

Audition and academic record determine admissibility.
B.Mus./B.Ed. applicants must also meet Education requirements.

Nursing (B.Sc.(N.))
- Grade 12 Mathematics (pre-calculus)
- At least two of Grade 12 Biology, Chemistry or Physics
- Grade 12 English or French

Occupational Therapy, Physical Therapy
Not eligible for direct admission.
Minimum one year of university studies with completion of all prerequisite courses.

Religious Studies
Applicants with a high school diploma with a minimum average of 75% may be considered. For further information please visit www.mcgill.ca/religiousstudies/theological/bth.

Science
- Grade 12 Mathematics (pre-calculus)
- At least two of Grade 12 Biology, Chemistry or Physics
- Grade 12 English or French

B.Sc./B.Ed. applicants must also meet Education requirements.

Social Work
Not eligible for direct admission.
Minimum one year of university studies.

1.6.3 Documentation
You must arrange for your school to send an official transcript of your complete high school record to date. Transcripts should show interim grades for the current year for courses in progress. Interim grades means one of the following:

<table>
<thead>
<tr>
<th>Terms per year</th>
<th>Interim Grades</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two terms</td>
<td>First term</td>
</tr>
<tr>
<td>Three terms</td>
<td>First two terms</td>
</tr>
<tr>
<td>Four terms</td>
<td>First two terms</td>
</tr>
<tr>
<td>Two semesters</td>
<td>First term finals and second semester mid-terms</td>
</tr>
</tbody>
</table>

If you are in a combined high school/ International Baccalaureate Diploma program, please arrange for your estimated IB results to be sent directly from your school to McGill.

1.7 Applicants from U.S. High School Programs (in the U.S.A. and other countries)

1.7.1 Deadlines

<table>
<thead>
<tr>
<th>Application</th>
<th>Deadline</th>

<tr>
<td>Application to Religious Studies (B.Th.) and submission of supporting documents</td>
<td>May 1</td>
</tr>
</tbody>
</table>

* It is in the interest of all applicants to complete their files as quickly as possible. When program space is limited, preference may be given to applicants who have provided all required supporting documents earlier on. Should a program reach its capacity prior to the deadline for submission of documents, incomplete applications may be cancelled.

1.7.2 Admission Requirements

To be eligible for admission to McGill, you must hold a high school diploma and must have followed an academic program leading to university entrance. Grade 10, 11 and 12 academic results will be considered, but special attention will be paid to results from those courses most relevant to the intended program of study.

McGill University does not require letters of recommendation. In most cases, admission decisions are made on the basis of the transcripts. However, should a school counsellor or principal wish to furnish important additional insight on a particular applicant, this must be submitted in a sealed envelope, signed across the flap by the author.

You must have taken the following (unless applying only to Music):
- either the ACT or
- the old SAT I plus at least three SAT IIs or
- the new SAT I plus at least two SAT IIs

See individual faculty requirements for SAT II subjects.

For a list of approximate minimum acceptable scores for most undergraduate programs at McGill, refer to the following page or consult the Web at www.mcgill.ca/applying.

It is your responsibility to ensure official test results are sent directly to McGill. McGill’s institutional code for SAT is 0935-00 and, for ACT, 5231.
Applicants from U.S. High School Programs (in the U.S.A. and other countries)

High school students are not eligible for direct admission to Occupational Therapy, Physical Therapy or Social Work.

**Agricultural and Environmental Sciences, Dietetics and Human Nutrition**
- Pre-calculus (functions)
- At least two of biology, chemistry, or physics
- SAT IIs must include at least one mathematics and one science.

**Architecture**
- Pre-calculus (functions)
- Chemistry
- Physics
- Portfolio by March 15
- SAT IIs must include one mathematics AND one chemistry or physics.

**Arts**
- Strong grades in all Grade 10, 11 and 12 English courses
- SAT IIs may be in any subject.

**Arts and Science (B.A. & Sc.)**
- Pre-calculus (functions)
- At least one of biology, chemistry or physics in Grade 11 or 12
- Strong grades in all Grade 10, 11, and 12 English courses
- SAT IIs must include at least one mathematics.

**Education**
- Strong grades in all Grade 10, 11 and 12 English courses
- SAT IIs may be in any subject.

**B.Mus./B.Ed.** applicants must also meet Music requirements.

**B.Sc./B.Ed.** applicants must also meet Science requirements.

**Engineering**
- Pre-calculus (functions)
- Chemistry
- Physics
- SAT IIs must include at least one mathematics AND one chemistry or physics.

**Kinesiology**
- Pre-calculus (functions)
- At least two of biology, chemistry or physics
- SAT IIs must include at least two different subjects from the following list: biology, chemistry, mathematics, physics.

**Management**
- Pre-calculus (functions)
- Strong grades in all Grade 10, 11, and 12 English courses
- SAT IIs must include at least one mathematics.

**Music**
- No specific prerequisite courses.
Audition and academic record determine admissibility.

**B.Mus./B.Ed.** applicants must also meet Education requirements.

**Nursing (B.Sc.(N.))**
- Pre-calculus (functions)
- At least two of biology, chemistry or physics
- SAT IIs must include at least two different subjects from the following list: biology, chemistry, mathematics, physics.

**Occupational Therapy, Physical Therapy**
Not eligible for direct admission.
Minimum one year of university studies with completion of all prerequisite courses.

**Religious Studies**
Applicants with a high school diploma with a minimum average of 75% may be considered. For further information please visit www.mcgill.ca/religiousstudies/theological/bth.

**Science**
- Pre-calculus (functions)
- At least two of biology, chemistry or physics
- SAT IIs must include at least two different subjects from the following list: biology, chemistry, mathematics, physics.

**B.Sc./B.Ed.** applicants must also meet Education requirements.

**Social Work**
Not eligible for direct admission.
Minimum one year of university studies.

**1.7.3 Documentation**
You must arrange for your school to send to McGill University an official transcript of your complete high school record to date. Transcripts should show interim grades for the current year for courses in progress.

If you are in a combined high school/International Baccalaureate Diploma program, please arrange for your estimated IB results to be sent directly from your school to McGill.

SAT I, SAT II, ACT, and Advanced Placement test results must be sent directly by the testing board or ACT reporting services to McGill. Institutional versions of these tests are not acceptable. It is your responsibility to ensure official test results are sent. For SAT and AP, the institutional code at McGill University is 0935-00, and for ACT, 5231.

**High School Profile**
Most U.S. high schools publish a school profile; i.e., a list documenting important information about the school, including the regional accrediting body (e.g., New England Association of Colleges and Schools), among other things. If your school profile is available, please ask your school to send it to McGill University along with your transcript.
SAT AND ACT MINIMUM SCORE REQUIREMENTS
(www.mcgill.ca/applying)

In addition to school results, students applying with a U.S. high school diploma must have taken the following (unless applying only to Music):

- either the ACT OR
- the old SAT I plus at least three SAT IIs OR
- the new SAT I plus at least two SAT IIs

(see individual faculty requirements for required SAT II subjects.)

The scores listed below approximate the minimum acceptable test score ranges for the last few years for most undergraduate programs. These scores and the list of tests accepted are subject to change by McGill University without prior notice. All test results are required to be reported to McGill University, including those of retaken tests. Normally, the best score will be considered.

* It is in the interest of all applicants to complete their files as quickly as possible. When program space is limited, preference may be given to applicants who have provided all required supporting documents earlier on. Should a program reach its capacity prior to the deadline for submission of documents, incomplete applications may be cancelled.

1.8.2 Admission Requirements

The normal basis for admission is completion of the credentials that lead to university admission in your country of study. Consideration is given to the complete high school record with emphasis on grades obtained in courses most relevant to the intended program of study. All grades are taken into consideration, including those of failed or repeated courses.

ADVANCED LEVEL AND ADVANCED SUBSIDIARY EXAMINATIONS

The minimum requirements are: three A-Levels with predicted and final grades of B, B, C or better, or two A-level and two AS subjects with grades of B, B, C, C, or better, or B, C, B, B, or better. However, many programs are more competitive and require higher grades for GCSEs, AS and A-levels. A maximum of 30 credits of advanced standing may be granted for final official AL/AS results.

If completing Upper Form VI, you will be considered on: GCSEs, Form VI grades, AS 1 results (or modular results) and predicted AL results. If you have completed only lower Form VI with AS and have a minimum of five appropriate GCSE examinations with clearly superior marks, you can be considered for admission on an individual basis.

If you have one or two mathematics, chemistry or physics at the GCSE level, you will be considered for longer programs on an individual basis for some science-related programs.

If you are attending a school where it is not the policy to sit for modular examinations in stages and claim AS qualifications at the end of the first year, but rather to continue to sit all
Applicants from High Schools Outside Canada and the U.S.A.

examinations at the end of the second year, you must ensure that your school communicates this information clearly to McGill University either by letter or in its school profile. If completed, AS 1 results must be submitted.

Agricultural and Environmental Sciences,
Dietetics and Human Nutrition

- Subjects must include: one A-Level subject in mathematics and at least one A-Level subject in biology, chemistry or physics.
- Sciences not taken at A-Level must be taken at the GCSE level.

Architecture

- At least one Advanced Level must be in mathematics, physics or chemistry.
- Mathematics, physics and chemistry must all have been taken at the GCSE level.
- Portfolio by March 15.

Arts

- No specific subject prerequisites.

Arts and Science (B.A. & Sc.)

- Subjects must normally include Advanced Level mathematics and at least one Advanced Level subject in biology, chemistry or physics.
- Biology, chemistry, mathematics, and physics must all have been taken at the GCSE level.

Education

- No specific subject prerequisites.

B.Mus./B.Ed. applicants must also meet Music requirements.
B.Sc./B.Ed. applicants must also meet Science requirements.

Engineering

- Subjects must include Advanced Level mathematics and at least one Advanced Level in chemistry or physics.
- Mathematics, physics, and chemistry must all have been taken at the GCSE level.
- Biology cannot be used as a prerequisite.

Kinesiology

- Subjects must include Advanced Level mathematics and at least one Advanced Level in biology, chemistry or physics.
- Mathematics, physics, and chemistry must all have been taken at the GCSE level.

Management

- Subjects must include Advanced Level mathematics with a grade of B or better.

Music

- No specific subject prerequisites

Audition and academic record determine admissibility.
B.Mus./B.Ed. applicants must also meet Education requirements.

Nursing (B.Sc.(N.))

- Subjects must normally include Advanced Level mathematics and two Advanced Level subjects in biology, chemistry or physics.
- Science subjects not taken at A-Level must be taken at the GCSE level.

Physical and Occupational Therapy

- Four Advanced Level subjects in mathematics, biology, chemistry and physics with at least two final grades of B and two final grades of C or better
- A one-semester course at university level in organic chemistry with lab.

Religious Studies

- No specific subject prerequisites.

Academic record determines admissibility.
For further information please visit www.mcgill.ca/religiousstudies/theological/bth.

Science

- Subjects must include one Advanced Level in mathematics and at least one Advanced Level in biology, chemistry or physics.
- Science subjects not taken at A-Level must be taken at the GCSE level.

B.Sc./B.Ed. applicants must also meet Education requirements.

Social Work

Not eligible for direct admission.
Minimum of one year of university studies.

FRENCH BACCALAUREATE

A diploma in “premier groupe” with “mention assez bien” (i.e. 12/20) is the minimum expected for most programs.

Note: Admission is competitive. Applicants who present the minimum requirements are not guaranteed admission.

A maximum of 30 credits advanced standing can be granted for the French Baccalaureate.

Agricultural and Environmental Sciences,
Dietetics and Human Nutrition

- Diploma in Series S
- Minimum grade of 10/20 in each prerequisite course.

Architecture

- Series S
- Minimum of 11/20 in each mathematics and physical sciences course
- Portfolio by March 15.

Arts

- Series L, ES, or S.

Arts and Science (B.A. & Sc.)

- Series S
- Minimum of 10/20 in each mathematics, biological and physical sciences course.

Education

- Series L, ES, or S.

B.Mus./B.Ed. applicants must also meet Music requirements.
B.Sc./B.Ed. applicants must also meet Science requirements.

Engineering

- Series S
- Minimum of 10/20 in each mathematics and physical sciences course.

Kinesiology

- Series S
- Minimum of 10/20 in each mathematics, biological and physical sciences course
- You may be required to complete additional courses in organic chemistry prior to admission.

Management

- Series S
- Minimum of 12/20 in mathematics
- Minimum of 12/20 in mathematics
- Minimum ES with a minimum overall average of 13/20 and a minimum of 13/20 in mathematics.
Music
• Series L, ES, or S
Audition and academic record determine admissibility.
B.Mus./B.Ed. applicants must also meet Education requirements.

Nursing (B.Sc.(N.))
• Series S
• Minimum of 10/20 in each mathematics, biological and physical sciences course.

Occupational Therapy, Physical Therapy
• Series S
• Minimum of 10/20 in each mathematics, biological and physical sciences course
• You might be required to complete additional courses in organic chemistry prior to admission.

Religious Studies
• No specific subject prerequisites.
Academic record determines admissibility.
For further information please visit www.mcgill.ca/religiousstudies/theological/bth.

Science
• Series S
• Minimum of 10/20 in each mathematics, biological and physical sciences course.
B.Sc./B.Ed. applicants must also meet Education requirements.

Social Work
• Series L, ES, or S.

INTERNATIONAL BACCALAUREATE DIPLOMA
The International Baccalaureate Diploma with grades of 5 or better on all Higher and Standard Level examinations is the expected minimum for most programs. Some programs are more competitive and require higher grades. If you have an overall score equal to or better than 32 points, and have one grade below 5, you may be considered if you have several grades of 6 or better to compensate.

A maximum of 30 credits of advanced standing may be granted for the International Baccalaureate Diploma. If you complete the IB diploma or certificates concurrently with a regular high school program, you may be considered for admission based on your high school record and subsequently awarded advanced standing based on IB results.

Note: Standard Level Math Studies is not acceptable for programs where math is a requirement.

Agricultural and Environmental Sciences, Dietetics and Human Nutrition
• Higher or Standard Level Mathematics and normally two of biology, chemistry, or physics

Architecture
• Mathematics, chemistry and physics at Higher or Standard Levels with at least one of them at Higher Level
• Portfolio by March 15

Arts
• No specific prerequisite courses.

Arts and Science (B.A. & Sc.)
• Mathematics and at least one of biology, chemistry or physics at Higher or Standard Level

Education
• No specific prerequisite courses.

B.Mus./B.Ed. applicants must also meet Music requirements.
B.Sc./B.Ed. applicants must also meet Science requirements.

Engineering
• Mathematics, chemistry, and physics at Higher or Standard Levels

Kinesiology
• Mathematics and two of biology, chemistry or physics at Higher or Standard Level

Management
• Mathematics at Higher Level, or
• Standard Level Mathematics with predicted or final results of 6 or 7

Music
• No specific prerequisite courses
Audition and academic record determine admissibility.
B.Mus./B.Ed. applicants must also meet Education requirements.

Nursing (B.Sc.(N.))
• Mathematics and two of biology, chemistry or physics at Higher or Standard Level.

Occupational Therapy, Physical Therapy
• Biology, chemistry, mathematics, and physics at Higher Level
• Calculus II and one semester of college/university level organic chemistry

Religious Studies
• No specific subject prerequisites.
Academic record determines admissibility.
For further information please visit www.mcgill.ca/religiousstudies/theological/bth.

Science
• Mathematics and two of biology, chemistry or physics at Higher or Standard Level.
B.Sc./B.Ed. applicants must also meet Education requirements.

Social Work
• No specific prerequisite courses.

OTHER INTERNATIONAL ADMISSIONS CREDENTIALS
McGill University receives applications from more than 120 countries each year. Below, is a list of some of the most frequently seen international secondary school diplomas. Students who have completed or are completing these and other recognized pre-university diplomas with strong grades in all required courses are eligible to apply to McGill.

Admission is competitive and depends on the space available; applicants with the minimum requirements are not guaranteed acceptance.

The Bologna Declaration, issued following a meeting of the European Ministers of Education in 1999, set into motion a wide-ranging process of educational reform aimed at improving the mobility and employability of graduates in Europe. By the year 2010, every higher education institution in Bologna signatory countries will need to conform with the standards of the declaration. McGill University, like most internationally renowned institutions, is monitoring the Bologna Process with interest and has undertaken ongoing study of the changing face of European academic credentials. During the transition from a varied to a uniform European education system, it is our objective to make admission decisions and (where appropriate) offer advanced standing in the context of the most current information on European reforms.

Applicants from High Schools Outside Canada and the U.S.A.
1.8.3 Documentation

You must arrange for your school to send McGill University an official transcript of your complete high school record to date. Transcripts should show interim grades for the current year for courses in progress.

If you have completed Advanced Level, Advanced Subsidiary, CAPE, Ordinary Level, GCSE, HKCEE, or CSEC, you must arrange for your school to forward a certified photocopy of the transcript(s) and/or Candidate Statement(s) of Results to McGill.

If you will be writing, or have already written, Advanced Level, Advanced Subsidiary, or CAPE examinations, you or your school must clearly indicate the name of the Examination Board(s) through which your examination will be, or were, taken, the subject specification numbers, and the particular modules or units taken towards these qualifications (i.e. Edexcel GCE Advanced Level Mathematics 9371 with modules CM1, 2, 3, 4, M1, 2).

If you are completing the International Baccalaureate Diploma program, you must arrange for estimated IB results to be sent directly by your school to McGill.

* It is in the interest of all applicants to complete their files as quickly as possible. When program space is limited, preference may be given to applicants who have provided all required supporting documents earlier on. Should a program reach its capacity prior to the deadline for submission of documents, incomplete applications may be cancelled.

Note: Supporting documents should be sent as soon as they are available. If received before the application, they will be kept on file for one year.

1.9.2 Admission Requirements

The University welcomes applications from well-qualified students who wish to transfer to McGill. Please note that for many programs (including Arts) applications for transfer are often considered exceptionally and on the basis of space available. Admission standards may vary significantly from year to year depending on demand for the program. Transfer applicants are considered on the basis of university/college work and previous studies. You should have well-above average academic records and prerequisites appropriate to the program you wish to pursue at McGill. Particular attention will be paid to results of courses relevant to the proposed program of study.

In order to form a basis for admission for a science-based program or to be considered for credit or exemption, science and mathematics courses normally must have been completed within the last five years.

If you are an accepted transfer student, your advanced standing credit can only be determined after you have confirmed your program at McGill, paid the required deposit, and provided all necessary supporting documents (including detailed course descriptions). In addition to course descriptions of mathematics and science courses, you are asked to specify the names and editions of textbooks used.

Quebec high school (Secondary V) graduates are expected to complete a Quebec CEGEP DEC prior to admission to McGill. A Quebec high school graduate who did not proceed to CEGEP but undertook one full year of university study outside Quebec may be admissible as a transfer student. If you fall into...
Applicants from Other Universities or Colleges and Second Bachelor Degree Applicants ("Transfers")

Minimum Admission Requirements by Program – Transfer Students

Agricultural and Environmental Sciences, Dietetics and Human Nutrition

- One semester of calculus for science
- One semester each of two of biology, chemistry or physics, each with labs

Architecture, Engineering

- One semester of differential calculus
- One semester of integral calculus
- Two semesters of physics (mechanics, electricity and magnetism, waves and optics) with labs
- Two semesters of general chemistry with labs
- Architecture portfolio by March 15

It is possible to be admitted to certain departments in Engineering with a minimum of two semesters of calculus plus two semesters of chemistry or physics. Admission to Architecture and Mechanical Engineering is highly competitive, and therefore you should present all the prerequisites.

Arts

- No specific prerequisite courses

Arts and Science (B.A. & Sc.)

- One semester of differential calculus
- One semester of integral calculus
- Two semesters of biology, chemistry, and/or physics, with labs

If admitted with the above minimum prerequisites, you must complete the remaining science prerequisite course requirements in your program at McGill.

Education

- No specific prerequisite courses

B.Mus./B.Ed. applicants must also meet Music requirements. B.Sc./B.Ed. applicants must also meet Science requirements.

Kinesiology

- One semester of differential calculus
- One semester of integral calculus
- Two semesters of biology, chemistry, and/or physics, with labs

If admitted with the above minimum prerequisites, you must complete the remaining science prerequisite course requirements within the first year of the program.

Management

- One semester of differential calculus
- One semester of integral calculus
- Applicants from Quebec universities must also have a one-semester course in linear algebra.

Music

- No specific prerequisite courses

Audition and academic record determine admissibility. B.Mus./B.Ed. applicants must also meet Education requirements.

Nursing (B.N.) (for Registered Nurses)

For information on programs for registered nurses qualified outside Quebec, but holding current OIIQ licensure, please contact Dr. Marcia Beaulieu, Coordinator, McGill B.N. program, at (514) 398-3309.

Nursing (B.Sc.(N))

- One semester of differential calculus
- One semester of integral calculus
- Two semesters of biology, chemistry and/or physics, with labs

If admitted with the above minimum prerequisites, you must complete the remaining science prerequisite course requirements in your program at McGill.

Occupational Therapy, Physical Therapy

- One semester of differential calculus
- One semester of integral calculus
- Two semesters of biology with labs
- Two semesters of general chemistry with labs
- One semester of organic chemistry with lab
- Two semesters of physics (mechanics, electricity and magnetism, waves and optics) with labs

Religious Studies

- No specific prerequisite courses

Science

- One semester of differential calculus
- One semester of integral calculus
- Two semesters of biology, chemistry and/or physics, with labs

If admitted with the above minimum prerequisites, you must complete the remaining science prerequisite course requirements in your program at McGill. B.Sc./B.Ed. applicants must also meet Education requirements.

Social Work

- No specific prerequisite courses

Special BSW applicants please refer to section 1.9.3 "Programs for Students with a Previous University Degree".

1.9.3 Programs for Students with a Previous University Degree

You must hold an appropriate university degree to be eligible for admission to the following programs. (Note to our francophone applicants: the English word “Diploma” has a different meaning than the French “Diplôme”. At McGill, a Diploma is usually a short, specialised program, which follows a Bachelor’s degree.)

Diploma in Environment

The Diploma in Environment is a 30-credit program, two semesters in duration if taken full-time. You must hold a B.Sc. or B.A. degree equivalent to 16 years of schooling, with a minimum CGPA of 2.7 on a 4.0 scale.

Diploma in Meteorology

The Diploma in Meteorology is a 30-credit program, two semesters in duration if taken full-time. You must hold a B.Sc. or B.Eng. degree equivalent to 16 years of schooling, with a good standing.

* It is in the interest of all applicants to complete their files as quickly as possible. When program space is limited, preference may be given to applicants who have provided all required supporting documents earlier on. Should a program reach its capacity prior to the deadline for submission of documents, incomplete applications may be cancelled.

1.10.2 Admission Requirements

You may be considered for admission as a mature student if you meet all the conditions for eligibility outlined below. Many supporting documents are required for Mature Student applications.

1.9.4 Documentation

You must arrange for your college/university to send McGill University an official transcript of your complete record to date. Official transcripts for courses in progress and confirmation of graduation should be sent to McGill University as soon as the results become available.

Unless applying only to Music, you must submit descriptions of graduation requirements and course descriptions for each college/university course taken. Mathematics and science course descriptions must specify the names and editions of textbooks used.

You are required to submit a copy of your high school record unless you have completed two or more years of university study. All applicants who have completed any Advanced Level, Advanced Subsidiary, Advanced Placement, International Baccalaureate examinations or the French Baccalaureate, European Baccalaureate, Abitur, or Bagnut must submit at least a copy of these results. Official copies will be required in order to process advanced standing credit and/or exemption. If you completed high school and CEGEP, you are not required to submit your high school transcript.

If applying to the Diploma in Environment or the Diploma in Meteorology, you must arrange for official transcripts of all college and/or university studies to be sent by the Registrar of each college and university attended to McGill.

If applying to the Special Bachelor of Social Work (program under review), you must arrange for official transcripts of all college and/or university studies to date to be sent to McGill University by the Registrar of each college and university attended. Official transcripts for courses in progress and confirmation of graduation should be sent as soon as results become available and not later than June 30.
Religious Studies
• A qualifying year of designated Religious Studies and Arts courses before being admitted to the B.Th. program
• 23 years of age at time of registration

Additional Admission Requirements by Program
Agricultural and Environmental Sciences, Dietetics and Human Nutrition
A minimum of:
• One course in differential calculus (CEGEP Mathematics N YA or university equivalent)
• Two of the following: biology (CEGEP Biology N YA or university equivalent), chemistry (CEGEP Chemistry N YA or university equivalent), or physics (CEGEP Physics N YA or university equivalent), each with a minimum grade of 70%

Architecture
• Two semesters of differential and integral calculus
• One semester of linear algebra
• Two semesters of physics (mechanics, electricity and magnetism, waves and optics) with labs
• Two semesters of general chemistry with labs
• Portfolio by March 15
• If you have exceptional grades, you may be considered with a minimum of two terms of calculus and any two of the above chemistry and physics courses.
• Prerequisites may be completed at CEGEP or university.

Arts
• Two courses appropriate to the proposed area of study, each with a minimum grade of B

Arts and Science (B.A. & Sc.)
• Minimum of at least one semester of calculus
• Minimum of one semester of biology, chemistry or physics, with labs
• Each of the above courses must have been completed at the CEGEP or university level, with a minimum grade of B.

Education
• Two courses, one in English (not English as a Second Language) and one in the proposed teaching area, each with a minimum grade of B
• Candidates whose applications pass the initial review will be contacted for an interview.

B.Mus./B.Ed. applicants must also meet Music requirements.
B.Sc./B.Ed. applicants must also meet Science requirements.

Engineering
• Minimum of three CEGEP or university level courses including differential calculus, physics (mechanics) with lab and one term of general chemistry with lab, each with 75% or better

Kinesiology
• A minimum of three college or university level courses including one pre-calculus course in functions, and at least two semesters of biology, chemistry or physics, with labs, each with a minimum grade of 75% or better

Management
If you possess a university degree or a CEGEP DEC with competitive results overall and in mathematics course work (completed in the last five years), you should apply as a "university transfer" or "CEGEP" applicant. If you do not have the required mathematics within the last five years, you are advised to complete or refresh the mathematics course work and then apply as a "university transfer" or "CEGEP" applicant.

If you lack the appropriate academic background, or have non-competitive results, and have been out of school for three years and are at least 21 years of age at the time of admission, you must initially complete the coursework outlined below at the McGill Centre for Continuing Education (CCE). Upon successful completion of these requirements, you may apply directly to the Faculty of Management to be evaluated for transfer into the B.Com. Program.

You must have completed the following two courses at the McGill CCE within five years of the date of admission with a minimum average of 70%:
• CMSC 203 Survey of Basic Mathematics I
• CMSC 204 Survey of Basic Mathematics II

Either or both mathematics courses may be redone once at CCE without penalty, after which time you will be permanently refused. CEGEP Math N YA, NYB, NYC or 201-103, 201-105, 201-203 or university equivalents with minimum "B" average are acceptable in lieu of CMSC 203 and 204.

Additionally, you must do a minimum of six (18 credits) of the courses listed below with an average of "B". The following three courses are required:
• MGCR 211 Intro to Financial Accounting
• MGCR 271 Statistics I or MGCR 273
• MGCR 293 Managerial Economics

A minimum of three of the following seven courses are also required:
• MGCR 213 Intro to Management Accounting
• MGCR 222 Organizational Behaviour
• MGCR 272 Statistics II or MGCR 274
• MGCR 331 Information Systems
• MGCR 341 Finance I
• MGCR 352 Marketing Management
• ECON 295 Macroeconomic Policy

You may take up to four more of the above courses (12 credits), to get a "B" average, after which time you are permanently refused.

If you fail one core course, it may be retaken without penalty. If you fail more than one course, all results will be used to calculate an admission average.

Should you take more management courses at CCE without penalty, after which time you will be permanently refused.

You must initially complete the coursework outlined below

Occupational Therapy, Physical Therapy
• Two semesters of biology with labs
• Two semesters of general chemistry with labs
• One semester of organic chemistry with lab

Mature Applicants

For information on programs for registered nurses qualified outside Quebec, but holding current OIIQ licensure, or who have graduated with the 180.01 DEC, please contact Dr. Marcia Beaulieu, Coordinator, McGill B.N. program, at (514) 398-3309.

* It is in the interest of all applicants to complete their files as quickly as possible. When program space is limited, preference may be given to applicants who have provided all required supporting documents earlier on. Should a program reach its capacity prior to the deadline for submission of documents, incomplete applications may be cancelled.

1.11.2 Admission Requirements

Successful applicants to McGill University as Special or Visiting Students are generally required to have a minimum overall “B” average. In addition, grades obtained in courses relevant to the proposed program of study will be considered.

The admission of Special or Visiting Students is subject to the availability of places in a particular program. Students who present the minimum requirements are not guaranteed acceptance. Entrance to courses with enrolment limits, or that require permission of the instructor, cannot be guaranteed. Applicants are expected to possess the same prerequisite courses as those applying as transfer students.

Completion of courses as a Special or Visiting Student at McGill University does not guarantee or improve the chances of entrance into a McGill University degree program in a future year. Normally, special and visiting students remain at McGill University for no more than one semester or two consecutive semesters per academic career.

1.11.3 Admission Requirements for Special Students

To qualify as a Special Student, you must:

- Have received an undergraduate degree, or be in the final year of a course of study, at a recognized college or university leading to an undergraduate degree consisting of 120 credits over eight semesters following completion of high school. If you have received a CEGEP DEC in the Province of Quebec, you must have completed 90 credits (six semesters) in a Quebec university to obtain the required degree.
- Have a plan of study that is acceptable to the faculty you wish to enter. Some faculties stipulate prerequisite course work.

In addition:

- Music applicants do not require a university degree but must have the necessary Music prerequisites for certain courses. Special students in Music are not entitled to instrument or voice lessons and, therefore, are not required to audition.
- The maximum course load is 15 credits per term for a maximum of two terms (with the exception of Architecture where the maximum course load is six credits per term).
- If you wish to hold Special Student status in Engineering or Architecture, you must provide a referral from the Order of Engineers or the Order of Architects, as appropriate.
- To take courses in English or French as a Second Language, you must obtain written permission from the Department and will be permitted entry only if there is space, after degree students have registered. A plan of study cannot consist only of E.S.L. or F.S.L. courses.
1.11.4 Documentation for Special Students

You must arrange for official transcripts of all college/university studies, including courses in progress, to be sent to McGill. Final official transcripts and confirmation of graduation should be sent as soon as the results become available.

You may submit photocopies of Advanced Levels, Advanced Placement Exams, French Baccalaureate, International Baccalaureate and/or high school transcripts to complete your application.

1.11.5 Admission Requirements for Visiting Students

If you are currently registered in a degree program at another university and have completed at least two semesters of study there, you may apply to take courses at McGill University as a Visiting Student. Course credits can be applied toward the program of study at your home university. Admission decisions on visiting applications are final and there is no appeal process.

1.11.6 Documentation for Visiting Students

You must submit a letter of permission from the appropriate officer of your home university, approving the proposed program of study (and, if admitted, you must bring a copy of the letter to your advising session at the first advising session at McGill). Official transcripts of your university studies, including courses in progress, must also be sent to McGill.

You may submit photocopies of A-Levels, Advanced Placement Exams, French Baccalaureate, International Baccalaureate and/or high school transcripts to complete your application.

1.12 Home Schooled Applicants

McGill University will consider applications from home schooled applicants. Each case will be treated on its own merits. As a home schooled candidate, you must send McGill University a description of the home schooling curriculum followed and measures of your academic acquisition in the program, including a comprehensive list of all texts (and editions) studied; a personal statement from you and a separate statement from your home educator explaining the basis of the university application and estimation of your readiness to handle university level subject matter; and an additional confidential letter of recommendation from an impartial source indicating your readiness for university level study. In some cases, further information and/or interview(s) with an Admissions Officer, Associate Dean, or Program Director may be required.

1.13 Entrance Scholarships

McGill University has an extensive program of entrance awards to recognize and honour academic excellence. These awards are available to students entering any full-time undergraduate degree program and entering university for the first time.

1.13.1 Value

Entrance scholarships range in value from $3,000 to $10,000 renewable. McGill University offers two types of entrance scholarships:

- **Basic scholarships**: Eligibility is based solely on academic achievement.
- **Major scholarships**: Eligibility is based on a combination of academic achievement and leadership qualities. Consideration will be given to academic achievement and leadership in school and/or community activities. Please note that leadership constitutes more than simple participation in extracurricular activities.

1.13.2 Eligibility

**First time in university**: To be eligible for consideration for either a basic or major entrance scholarship, you must be entering university for the first time. Transfer, Mature, Diploma, Exchange, Special, and Visiting Students are not eligible.

**Minimum academic requirements**: Competition for basic and major scholarships is intense because of the large number of applications that we receive and the high overall quality of our applicants. Please review carefully the minimum academic requirements set out below to determine whether you are eligible to be considered for an entrance scholarship.

Even if you do meet the minimum requirements, you are not guaranteed an entrance scholarship because the number of awards granted varies from year to year.

### 1.13.3 Basic Scholarships Valued at $3,000

<table>
<thead>
<tr>
<th>Academic Background</th>

<td>MINIMUM overall average of 15, with minimum score of 14 in each course</td>
</tr>
</tbody>
</table>

1.11.6 Basic Scholarships Valued at $3,000

By applying to McGill, all eligible applicants are automatically considered for a basic scholarship. No separate application is required. In order to be considered for a basic scholarship, all supporting documents must be submitted by the application deadline. This includes all grades and interim grades granted up to the application deadline date. In order to complete the
application file, subsequent grades (interim or final) must be forwarded to the admissions office as soon as they are issued. If you apply after the admission deadline, you will not be considered for a scholarship, even if you have been granted permission to submit a late admission application.

1.13.4 Major Scholarships Valued at $5,000 and Above

If you meet the minimum academic requirements listed above, and also demonstrate significant leadership qualities, you may apply for a major scholarship on the web after your application for admission has been submitted. You will receive an e-mail acknowledgement of your admission application, which will provide you with your McGill ID number as well as a PIN that you can use to log on to Minerva. On Minerva, you can check the status of your admission application and submit your application for a major scholarship. On Minerva, select the "Apply for a Major Scholarship" link on the "Applicant" menu. You will be prompted to provide the following:

- a factual list of principal interests and activities while in school or CEGEP;
- a list of up to a maximum of six books or major articles read during the past year (exclude selections which were required for school or CEGEP courses), from which you must choose one and explain in a maximum of 200 words why you read it and why it was significant;
- an essay of no more than 500 words explaining what and where you expect to be 20 years from now, and what will have been the role of your education.

Finalists for the scholarships valued at $5,000 or more may be interviewed.

Students who apply for, but do not receive, a major scholarship will automatically be considered for a basic scholarship.

1.13.5 Supporting Documents and Deadlines for Major Scholarships

All required supporting documents must be postmarked no later than the deadlines listed below.

<table>
<thead>
<tr>
<th>Applicants from Quebec CEGEPs</th>

¹Signed statement from your school indicating the size of your class and your class rank. If your school does not rank students, a statement to that effect from the school should be provided, if possible. All documents should be provided on school letterhead and placed in a sealed envelope, signed across the flap by the sender.

²Two letters of reference, one academic and one activity-related. Letters of reference must be submitted in envelopes sealed and signed across the flap by the author of the letter. It would be appreciated if letters could be typed and, whenever possible, prepared on letterhead stationery.

Please send supporting documents to McGill University at the addresses listed in section 1.15 “Mailing Addresses for Supporting Documents”.

1.13.6 Applicants to Dentistry, Law or Medicine

Please note that the entrance scholarships referred to in this section are for students entering a university for the first time to undertake a full-time undergraduate degree program. University students who are applying for admission to the faculties of Dentistry, Law or Medicine should inquire at the respective faculty’s admissions office regarding available funds.

1.13.7 Applicants to Music

Applicants wishing to be considered for a Music entrance scholarship must also meet the earlier audition deadline. Check the Schulich School of Music Website for relevant deadline dates.

1.13.8 Financial Aid

McGill University offers financial assistance to students from modest-income families who have been accepted for undergraduate studies. You must apply for government student aid to be considered for need-based assistance. You may apply for Entrance Financial Aid through the Financial Aid menu on Minerva.

For more information about our financial aid programs, please visit the Student Aid Website at www.mcgill.ca/studentaid.

1.15 Mailing Addresses for Supporting Documents

Please send supporting documents for applications to the Faculties of Agricultural and Environmental Sciences, Arts, Education, Engineering, Management, Music, Religious Studies and Science, and the Schools of Architecture, Nursing, Physical and Occupational Therapy, and Social Work to the following addresses:

Mailing Address:
ARR Documentation Centre
McGill University
688 Sherbrooke Street West, Room 1460
Montreal, Quebec H3A 3R1 Canada

In–Person Delivery and Courier Address:
Admissions, Recruitment and Registrar’s Office
McGill University
James Administration Building, Room 205
845 Sherbrooke Street West
Montreal, Quebec H3A 2T5 Canada

Please consult the appropriate Websites or admission guides for instructions on submitting supporting documents to other faculties, including Dentistry, Law and Medicine.

*Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at [www.mcgill.ca/courses](http://www.mcgill.ca/courses) for the most up-to-date information on whether a course is offered.*

† Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
‡ Indicates that departmental approval/permission must be obtained by a student prior to registration.
▲ Denotes courses not available to students in alternate years.
▲ Denotes courses not available as Education electives.
❖ Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.
❖ Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

— Denotes courses taught only in alternate years.
† Professional Practice (Stage) in Dietetics involving special prerequisites indicated that departmental approval/permission must be obtained by a student prior to registration.
✦ Indicates courses not available as Education electives.
❑ Denotes courses with limited enrolment.
• Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
● Denotes courses offered by the Faculty of Education which, if appropriate to the student's program, may be included in the academic concentration.
▲ Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
1 Course Information and Regulations

Students are advised to refer also to the General Information and Regulations section of this Calendar, in particular "Registration", section 3.3 and "Student Records", section 3.5. The University reserves the right to make changes without prior notice to the information contained in this publication, including the revision or cancellation of particular courses or programs.

At the time this Calendar went to press, new courses and modifications to some existing courses were under consideration. Students preparing to register are advised to consult Class Schedule on the Web at www.mcgill.ca/courses for the most up-to-date information on courses to be offered in 2007-08.

Not all courses listed are offered every year.

1.1 Course Numbering

Each McGill course is assigned a unique seven-character course "number".

The first four characters (Subject Code) refer to the unit offering the course.

These codes were implemented in September 2002, replacing the three-number Teaching Unit Codes previously used. A complete list of Teaching Unit Codes and their Subject Code equivalents can be found on the Web at www.mcgill.ca/student-records/transcripts.

The three numbers following the Subject Code refer to the course itself, with the first of these indicating the level of the course.

- Courses numbered at the 600 and 700 level are intended for graduate students. Most courses at McGill are single term (Fall or Winter or Summer) courses. The seminars endeavor to teach the latest scholarly developments and expose participants to advanced research work. Yearlong courses are taught over two terms and/or in one or more multi-term versions. Under such circumstances, courses are identified by a two-character extension of the course number. These are not to be confused with 600 and 700 level courses.

The three numbers following the Subject Code refer to the multi-term course. Students must ensure that they are registered in the same section in each term of the multi-term course.

Courses numbered at the 100, 200, 300, and 400 levels are normally taken in the student's last two years.

- Courses numbered at the 500 level are intended for graduate students, but may also be open to qualified senior undergraduate students.

Two additional characters (D1, D2, N1, N2, J1, J2, J3) at the end of the seven-character course number identifies multi-term courses.

1.2 Multi-term Courses

Most courses at McGill are single term (Fall or Winter or Summer) courses with final grades issued and any credits earned recorded at the end of that term. Single term courses are identified by a seven-character course number.

A unit may, however, decide that the material to be presented cannot be divided into single term courses or it is preferable that the work to be done is carried out over two or three terms. Under such circumstances, courses are identified by a two-character extension of the subject code.

In some cases, the same course may be offered in various ways: as a single term and/or in one or more multi-term versions. The course content and credit weight is equivalent in all modes, the only difference being the scheduling, and students cannot obtain credit for more than one version.

Courses with numbers ending in D1 and D2 are taught in two consecutive terms (most commonly Fall and Winter). Students must register for the same section of both the D1 and D2 components. When registering for a Fall term D1 course on Minerva, the student will automatically be registered for the Winter term D2 portion. No credit will be given unless both components (D1 and D2) are successfully completed in consecutive terms, e.g., Fall 2007 and Winter 2008.

Courses with numbers ending in N1 and N2 are taught in two non-consecutive terms (Winter and Fall). Students must register for the same section of both the N1 and N2 components. No credit will be given unless both components (N1 and N2) are successfully completed within a twelve (12) month period.

Courses with numbers ending in J1, J2 and J3 are taught over three consecutive terms. Students must register for the same section of all three components (J1, J2, J3). No credit will be given unless all three components are successfully completed.

IMPORTANT CONDITIONS FOR MULTI-TERM COURSES

1. Students must be registered for each component of the multi-term course. Students must ensure that they are registered in the same section in each term of the multi-term course.

2. Students must successfully complete each component in sequence as set out in the multi-term course. Credit is granted only at the end of the multi-term course; no credit is given for partial completion.

1.3 Course Terminology

Prerequisite: Course A is prerequisite to course B if a satisfactory pass in course A is required for admission to course B.

Corequisite: Course A is corequisite to course B if course A must be taken concurrently with (or may have been taken prior to) course B.

Credits: The credit weight of each course is indicated in parentheses beside the course title. For D1 and D2 courses the credit weight is indicated after the course number. For further information refer to section 3.5.2 "Credit System".

1.4 First-Year Seminars

First-Year Seminars (FYS) are limited-enrolment credit courses offered by the Faculties of Arts and Science to students in their first year of undergraduate study at McGill, i.e., newly admitted students in U0 or U1. Students in any faculty can enrol in an FYS, subject to the conditions and/or restrictions of the program in which they are registered. Students may take only one FYS.

FYS classes are limited to a maximum of 25 students and are designed to provide closer interaction with the professor and better working relations with peers than are available in large introductory courses. The seminars endeavour to teach the latest scholarly developments and expose participants to advanced research methods. Registration is on a first-come, first-served basis.
For a listing of First-Year Seminars, see Faculty of Arts, section 5.12.1 "First-Year Seminars", and Faculty of Science, section 12.5.2.1 "Registration for First-Year Seminars".

1.5 Faculty/School-Specific Information

All students must comply with the regulations and requirements contained in their Faculty section of this Calendar.

Agricultural and Environmental Sciences

Students should note that there are no supplemental examinations in Agricultural and Environmental Sciences, and that the final examination period timetable for the term is posted before the commencement of classes.

Arts

All Arts courses have limited enrolment.

Term(s) offered (Fall, Winter, Summer) may appear after the course credit weight to indicate when a course would normally be taught.

For Faculty specific program and course Information, refer to:
section 5.3.5 "Program Requirements",
section 5.3.6 "Course Requirements",
section 5.5.2 "Course Registration"

Education

Some courses will be available in the evenings only, through the Centre for Continuing Education, or will be offered during the Summer term.

Students should give particular notice prerequisite and corequisite courses and registration for Field Experience courses.

Engineering

Most courses offered by the Faculty of Engineering are limited to Engineering students only. Non-Engineering students should obtain permission from the Associate Dean of their Faculty, and the Faculty Student Adviser in the Faculty of Engineering Student Affairs Office, to register for Engineering courses.

A limited number of School of Architecture (ARCH) courses are open to students not registered in the School. Please refer to individual course descriptions.

The average division of time for a course is indicated in hours in the course listing after the course credit. For example, (3) (3-0-6) indicates a three-credit course consisting of three lecture hours per week, no other contact hours and six hours of personal study per week.

Management

Management students should give particular notice to: section 9.4 “BCom Degree Requirements”, section 9.5 “BCom Program Credit Structure” and, especially for students new to the program, section 9.7 “Management Core”.

Science

All Science courses have limited enrolment.

Term(s) offered (Fall, Winter, Summer) may appear after the course credit weight to indicate when a course would normally be taught.

For Faculty specific program and course Information, refer to:
section 12.3.5 “Program Requirements”,
section 12.3.6 “Course Requirements”,
section 12.5.2 “Course Registration”.

1.6 Course Symbols

The symbols listed below may appear in front of courses described in this Calendar. When used, they represent the following information:

★ Denotes courses taught only in alternate years.

♦ Indicates that departmental approval/permission must be obtained by a student prior to registration.

□ Denotes courses with limited enrolment.

Faculties of Arts and Science symbol:

● Denotes courses not offered in 2007-08.

Faculty of Education symbols:

✝ Denotes courses not available as Education electives.

▲ Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.

◎ Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

School of Dietetics and Human Nutrition symbol:

‡ Professional Practice (Stage) in Dietetics involving special prerequisites.

Please consult the Class Schedule on the Web at www.mcgill.ca/minerva for the most up-to-date information about courses that are being offered in a given term.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at [www.mcgill.ca/courses](http://www.mcgill.ca/courses) for the most up-to-date information on whether a course is offered.

- Denotes courses taught only in alternate years.
- Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
- Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.
- Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

- Professional Practice (Stage) in Dietetics involving special prerequisites
- Indicates that departmental approval/permission must be obtained by a student prior to registration.
- Denotes courses not available as Education electives.
- Denotes courses with limited enrolment.
Agricultural and Environmental Sciences

AEBI-Biology
Offered by: Natural Resource Sciences, Parasitology, Plant Science

AEBI 120 General Biology.
(3) (Fall) (2 lectures and one 3-hour lab) (Restriction: Not open to students who have passed CEGEP objective 00UK or equivalent (formerly Biology 301)) An introduction to the structure, function and adaptation of plants and animals in the biosphere.

AEBI 202 Cellular Biology.

AEBI 306 Experiments in Biotechnology.
(3) (One lecture and one 5-hour lab.) (Prerequisites: AEBI 202 and CELL 204 or permission of the instructor.) Practical laboratory-based research experience. Techniques in cellular and molecular biology, designing experiments and developing skills in interpretation and communication of experimental results.

AEHM-English
Offered by: Agricultural & Env.Sc.-Dean

AEHM 300 ESL: High Intermediate 1.
(3) (3 hours) (Prerequisite: placement test) (Restrictions: open to full-time, non-anglophone students. Not eligible for ESL courses are: 1. non-anglophone students who, for a period of more than four years, have attended secondary institutions (high school and CEGEP) where the primary language of instruction was English, and 2. students who have taken university-level courses judged to be equivalent to the McGill courses AEHM 300 and ESLN 300; AEHM 301 and ESLN 301. These courses are equivalent and mutually exclusive.) (Students too weak in English for AEBI 300 should inquire about the ESLN 200 and ESLN 201 courses offered on the Downtown Campus by the Faculty of Arts.) Improves proficiency of general writing skills while developing reading, oral and aural skills. Focuses on the structure of the English language and the process required to produce coherent short papers. Emphasis on the English of food, agriculture, and the environment.

AEHM 301 ESL: High Intermediate 2.
(3) (3 hours) (Prerequisite: AEBM 300 or placement test) (Restrictions: open to full-time, non-anglophone students. Not eligible for ESL courses are: 1. non-anglophone students who, for a period of more than four years, have attended secondary institutions (high school and CEGEP) where the primary language of instruction was English, and 2. students who have taken university-level courses judged to be equivalent to the McGill courses AEHM 300 and ESLN 300; AEHM 301 and ESLN 301. These courses are equivalent and mutually exclusive.) (Students too weak in English for AEBI 300 should inquire about the ESLN 200 and ESLN 201 courses offered on the Downtown Campus by the Faculty of Arts.) A continuation of AEBI 300. Further improves proficiency of general writing skills while developing reading, oral and aural skills. Focuses on the structure of the English language and the process required to produce coherent short papers. Emphasis on

AEHM 330 Academic and Scientific Writing.
(3) (3 hours) (Prerequisite: entrance test.) The object of the course is to enable students who have previously mastered the basic elements of written English to produce well-written, well-researched, and well-documented scientific papers for an academic audience.

AEMA-Mathematics
Offered by: Animal Science, Bioresource Engineering, Parasitology, Plant Science

AEMA 101 Calculus 1.

AEMA 102 Calculus 2.
(4) (3 lectures) (Prerequisite: Calculus 1 or equivalent) Integration, the indefinite and definite integral. Trapezoidal and Simpson’s Rule approximations for the integral. Applications to areas between curves, distance, volume, length of a curve, work, area of a surface of revolution, average values, moments, etc. Improper integrals and in CII series.

AEMA 202 Intermediate Calculus.
(3) (Fall) (3 lectures and 1 conference) (Restrictions: Not open to students who have taken MATH 222) Partial differentiation; multiple integrals; vector calculus; infinite series; applications.

AEMA 305 Differential Equations.
(3) (Winter) (Restrictions: Not open to students who have taken AEMA 205 or MATH 315) Techniques for solution of ordinary 1st and 2nd order equations; power series solutions; systems of equations; introduction to partial differential equations; numerical techniques for solutions; applications to biological, chemical and engineering systems.

(3) (Winter) (3 hours of lectures per week) (Prerequisite: WILD 205 (formerly AEBI 205) or permission.) (Corequisite: AEMA 310 or permission.) An introduction to mathematical and graphical tools for use in ecology. Representation and interpretation of data and associated statistics in graphs and tables; theoretical modelling in plant and animal ecology, including difference and differential equation models. Introduction to stability analysis and probability theory. Emphasis is placed on graphical techniques.

AEMA 310 Statistical Methods 1.
(3) (Two 1.5-hour lectures and one 2-hour lab) Measures of central tendency and dispersion; binomial and Poisson distributions; normal, chi-square, Student’s t and Fisher-Snedecor F distributions; estimation and hypothesis testing; simple linear regression and correlation; analysis of variance for simple experimental designs.

AEMA 403 Environmetrics Stage.
(3) (Limited enrolment: Registration by application - Deadline December 15; the first seven applications received will have priority) (Prerequisite: Permission of the instructor based on satisfactory completion of the U2 year of the Environmetrics Domain in the McGill School of Environment) Summer stage of at least four weeks, including a report. Provides students with professional experience in statistical analyses of environmental data. Can be undertaken at federal or provincial research stations and university research laboratories.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

† Professional Practice (Stage) in Dietetics involving special precautions
‡ Indicates that departmental approval/permission must be obtained by a student prior to registration.
¶ Denotes courses not available as Education electives.
∥ Denotes courses taught only in alternate years.
△ Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
❉ Denotes courses taught only in alternate years.
▲ Denotes courses not offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.
• Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
AGEC 414 Experimental Economics.
(3) (2 1.5-hour lectures) (Prerequisite: AEMA 310 or equivalent) (Offered in alternate years with AEMA 414) (You may not be able to receive credit for this course and other statistic courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) General principles of experimental design, split-plot designs, spatial heterogeneity and experimental design, incomplete block designs and unbalanced designs, analysis of repeated measures, multivariate and modified univariate analyses of variance, central composite designs.

AEMA 414 Temporal and Spatial Statistics.
(3) (2 1.5-hour lectures) (Prerequisite: AEMA 310 or equivalent) (Offered in alternate years with AEMA 411) Temporal statistics: analysis in the time domain. Box-Jenkins forecasting methodology, analysis in the frequency domain, periodogram analysis. Spatial statistics: mapping, autocorrelogram analysis, geostatistics. Statistical inference with autocorrelated sample data.

AEPH-Agricultural Physics
Offered by: Bioresource Engineering

AEPH 112 Introductory Physics 1.
AEPH 114 Introductory Physics 2.
(4) (Winter) (3 lectures and one 2-hour lab) Electric and magnetic properties of matter: electrostatics, electric currents, the link between electric and magnetic phenomena, geometrical optics, interference diffraction.

AGEC-Agricultural Economics
Offered by: Agricultural Economics

AGEC 200 Principles of Microeconomics.
(3) (Fall) (3 lectures) The field of economics as it relates to the activities of individual consumers, firms and organizations. Emphasis is on the application of economic principles and concepts to everyday decision making and to the analysis of current economic issues.

AGEC 201 Principles of Macroeconomics.
(3) (Winter) (3 lectures) (Prerequisite: AGEC 200 or equivalent) The overall economic system, how it works, and the instruments used to solve social problems. Emphasis will be on decision-making involving the entire economic system and segments of it.

AGEC 230 Agricultural and Food Marketing.
(3) (Winter) (3 lectures) (Prerequisite: AGEC 200 or equivalent) Marketing principles and practices, their relationship to the agriculture-food system, and the economic impact on all segments of the system. Emphasis on the application of marketing principles in problem-solving and in developing marketing and communication skills of the individual.

AGEC 231 Economic Systems of Agriculture.
(3) (Winter) (3 lectures) (Prerequisite: AGEC 200 or equivalent) The structure and organization of Canada's agriculture-food system, the operation, financing, linkages, and functions of its components. Focus is to be on management of the various components and the entire system, types of problems confronted now and in the future.

AGEC 242 Management Theories and Practices.
(3) (Fall) (3 lectures) An introduction to contemporary management theories and practices in organizations of the food sector.

AGEC 320 Economics of Agricultural Production.
(3) (Winter) (3 lectures) (Prerequisite: AGEC 200 or equivalent) An intermediate theory course in agricultural economics, dealing with economic concepts as applied to agricultural production and cost functions. Includes theory and application of linear programming as related to production decisions.

AGEC 331 Farm Business Management.
(3) (Fall) (3 lectures) (Prerequisite: AGEC 200 or equivalent) Managing a farm business. Topics include: the decision making process, farm business centre and farm records, farm management and economic concepts, farm planning and budgeting, input management (land, capital, labour and time), tax management (farm organization, estate planning, etc.).

AGEC 333 Resource Economics.
(3) (Fall) (Prerequisites: AGEC 200 or equivalent) The role of resources in the environment, use of resources, and management of economic resources within the firm or organization. Problem-solving, case studies involving private and public decision-making in organizations are utilized.

AGEC 343 Accounting and Cost Control.
(3) (Fall) (3 lectures) An introduction to the basic principles and concepts of responsibility accounting and cost control, analysis and utilization of financial statements and control system data for decision making.

AGEC 344 Entrepreneurial Leadership.
(3) (Fall) (3 lectures) Leadership concepts and theory, with applications in the context of small and medium-sized organizations. An examination of behaviour models and their relationship to various leadership functions, such as how to set objectives, give praise and instructions, mentor, resolve conflicts, and negotiate.

AGEC 350 Agricultural Finance.
(3) (Winter) (3 lectures) (Prerequisite: AGEC 331) The economic study of acquisition and use of capital in agriculture. Topics include: the analysis of financial statements; farm appraisal; investment analysis; risk in financial management; the cost of capital and the role of financial intermediaries serving agriculture; aggregate financing in agriculture.

AGEC 423 Agricultural Econometrics.
(3) (Fall) (3 lectures) (Prerequisites: AEMA 310, AGEC 200 and AGEC 201 or equivalents) Concepts and procedures used in defining and estimating econometric models applied in agriculture. Emphasis on application and estimation of single equation models and solutions to problems such as autocorrelation, heteroscedasticity and multicollinearity. Use of dummy variable technique.

AGEC 430 Agriculture, Food and Resource Policy.
(3) (Winter) (3 lectures) (Prerequisites: AGEC 200 or equivalent) Examination of North American and international agriculture, food and resource policies, policy instruments, programs and their implications. Economic analysis applied to the principles, procedures and objectives of various policy actions affecting agriculture, and the environment.

AGEC 440 Advanced Agriculture and Food Marketing.
(3) (Fall) (3 lectures) (Prerequisites: AGEC 201 or equivalent, and AGEC 320) The nature and the economic organization of agricultural and food marketing including the application of economic concepts to problems and procedures, and their impact on Canadian and North American agriculture. Pricing and marketing of principal agricultural products in Canada is examined.

AGEC 442 Economics of International Agricultural Development.
(3) (Winter) (3 lectures) (Prerequisites: AGEC 200 or AGEC 201 or equivalent) The course deals with economic aspects of international development with emphasis on the role of food, agriculture and the resource sector in the economy of developing countries. Topics will include, world food analysis, development project analysis and policies for sustainable development. Development case studies will be used.

AGEC 450 Agriculture Business Management.
(3) (Winter) (3 lectures) (Prerequisites: AGEC 230 and AEMA 310) Management of operations in agribusiness firms. The use of computer models to make decisions on output mix, facility location, expansion, inventory management and production and strategy.

AGEC 453 Venture Capital Opportunities.
(3) (Winter) (3 lectures) (Prerequisite: AGEC 343) A course for students in non-business programs to assist them to assist in navigating local financial markets and to obtain financing. The course examines financing for new business, expansion, and specific needs such as seasonal fluctuations, working capital,
expanding sales, new product development, management buyouts, and succession planning.

AGEC 491 Research Seminar in Agricultural Economics. (3) (Fall) (3 lectures) (Prerequisites: AGEC 201 or equivalent, and AGEC 320) The nature, methods, and objectives of agricultural economics research concerned with the economic problems affecting the agriculture and food system. Emphasis is on problem identification, and the collection, analysis, and presentation of evidence. Students will present one or more seminars on a research project in agricultural economics.

AGEC 492 Special Topics in Agricultural Economics. (3) (Fall, Winter) (Prerequisite: AGEC 201 or equivalent) Students will pursue topics that are not otherwise available in formal courses. An individual course of study will be followed under the supervision of a member of the staff qualified in the appropriate discipline or area.

AGEC 493D1 (1.5), AGEC 493D2 (1.5) Special Topics in Agricultural Economics. (Fall) (Students must register for both AGEC 493D1 and AGEC 493D2.) (No credit will be given for this course unless both AGEC 493D1 and AGEC 493D2 are successfully completed in consecutive terms) Presentation and discussion of current problems in agricultural economics by staff and/or special guests. This course is offered on an irregular basis under special circumstances.

AGEC 493N1 (1.5), AGEC 493N2 (1.5) Special Topics in Agricultural Economics. (Winter) (Students must also register for AGEC 493N2) (No credit will be given for this course unless both AGEC 493N1 and AGEC 493N2 are successfully completed in a twelve month period) Presentation and discussion of current problems in agricultural economics by staff and/or special guests. This course is offered on an irregular basis under special circumstances.

AGEC 495D1 (1.5), AGEC 495D2 (1.5) Project. (Fall) (Students must register for both AGEC 495D1 and AGEC 495D2.) (No credit will be given for this course unless both AGEC 495D1 and AGEC 495D2 are successfully completed in consecutive terms) Under the supervision of a staff member of the Department of Agricultural Economics, Project topics will concern the economics of agriculture, food, or resource development. An agreement between the students and involved staff members must be reached prior to registration.

AGEC 495N1 (1.5), AGEC 495N2 (1.5) Project. (Winter) (Students must also register for AGEC 495N2) (No credit will be given for this course unless both AGEC 495N1 and AGEC 495N2 are successfully completed in a twelve month period) Under the supervision of a staff member of the Department of Agricultural Economics, Project topics will concern the economics of agriculture, food, or resource development. An agreement between the students and involved staff members must be reached prior to registration.

AGEC 503 Location & Spatial Development. (3) (Winter) (Prerequisite: GEOG 216 and GEO 202, or one course in each of microeconomics and macroeconomics, or permission of instructor) (Not open to students who have taken GEOG 503) Patterns of regional economic growth or decline explained in terms of the competitive behaviour of profit-maximizing firms and utility-maximizing households. Ideas, models and evidence developed in competitive location theory.
marketing systems.

AGRI 341 Ecological Agriculture Systems.
(3) (2 lectures and 1 conference) (Restriction: Not open to students who have taken AGRI 430) An overview and presentation of alternative agricultural production systems including low-input, organic, biodynamic, community supported agriculture, the agroecosystem concept, historical overview, ecological basis, key characteristics and functioning, impact of policies, and the transition process.

AGRI 411 International Agriculture.
(3) (Winter) (3 lectures and 1 conference) A study of the climate, soils and major economic plant and animal species in tropical and sub-tropical regions; cropping and agro-forestry systems; pest and disease problems; soil and water management; environmental, health and nutrition, and economic issues in rural development; energy and technology for developing countries; the role of international aid and development agencies; case studies on various aspects of food and agricultural systems in developing countries will be presented.

AGRI 420 Professional Practice Seminar 5.
(0.5) Experiences and responsibilities of Agrologists; legal and ethical aspects of the profession.

AGRI 421 Professional Practice Seminar 6.
(0.5) Experiences and responsibilities of Agrologists; legal and ethical aspects of the profession.

AGRI 435 Soil and Water Quality Management.
(3) (Fall) (3 lectures and one 3-hour lab) Management of soil and water systems for sustainability. Cause of soil degradation, surface and groundwater contamination by agricultural chemicals and toxic pollutants. Human health and safety concerns. Water-table management. Soil and water conservation techniques will be examined with an emphasis on methods of prediction and best management practices.

AGRI 452 Water Resources in Barbados.
(3) (Corequisites: Enrolment in full "Barbados Field Study Semester"; AGRI 413, AGRI 519 or CIVE 519 or URBP 519, URBP 507.) (Restrictions: Not open to students who have taken CIVE 452.) Physical environment challenges, centered on water, being faced by an island nation. Guest speakers, field study tours and laboratory tests. Private, government and NGO institutional context of conservation strategies, and water quantity and quality analyses for water management specific to Barbados.

AGRI 480 Special Topics 1.
(1)

AGRI 481 Special Topics 2.
(2)

AGRI 482 Special Topics 3.
(3)

AGRI 490 Agri-Food Industry Project.
(3) Interdisciplinary team project in the agri-food industry.

AGRI 491D1 (1.5), AGRI 491D2 (1.5) Co-op Experience.
(Students must register for both AGRI 491D1 and AGRI 491D2.) (No credit will be given for this course unless both AGRI 491D1 and AGRI 491D2 are successfully completed in consecutive terms) A co-op experience program of at least 12 weeks duration. Students will be exposed to the main areas of operation of their employer. The cooperating employer and the Instructor (or designate) will develop an individualized co-op experience for each student. Students will be supervised by staff of their employer who will be in contact with the instructor (or designate). A site visit by the Instructor (or designate), a report by the student's employer and a final written and oral report by the student will form the basis for evaluation.

AGRI 495 Seminar and Assignment 1.
(1) (Restriction: Not open to students registered in, or who have taken AGRI 495D1, AGRI 495D2, AGRI 495N1 or AGRI 495N2) Preparation, presentation and discussion of reports upon approved agricultural subjects chosen in consultation with staff members involved in the subject concerned.

AGRI 496 Seminar and Assignment 2.
(1) (Restriction: Not open to students registered in, or who have taken AGRI 495D1, AGRI 495D2, AGRI 495N1 or AGRI 495N2) Preparation, presentation and discussion of reports upon approved agricultural subjects chosen in consultation with staff members involved in the subject concerned.

AGRI 510 Professional Practice.
(3) (Restriction: Course restricted to senior undergraduate and graduate students.) The ethical issues that face a professional in the workplace; professional ethics and deontology; professional responsibilities as related to the laws of labour, health, safety and risks to the environment, risk management and communication.

AGRI 519 Sustainable Development Plans.
(6) (Corequisites: Enrolment in full "Barbados Field Study Semester"; AGRI 413, AGRI 452 or CIVE 452, URBP 507) (Restrictions: Not open to students who have taken CIVE 519 or URBP 519.) Geared for solving real-world environmental problems related to water at the local, regional and international scale in Barbados. Projects to be designed by instructors in consultation with university, government and NGO partners and to be conducted by teams of 2 to 4 students in collaboration with them.

AGRI 550 Sustained Tropical Agriculture.
(3) (Prerequisites: HISP 218 or equivalent; MATH 203 or AEMA 310 or equivalent) (Restriction: Restricted Enrolment. Location in Panama. Student must be registered for a full semester of studies in Panama) Contrast theory and practice in defining agricultural environmental "challenges" in the Neotropics. Indigenous and appropriate technological means of mitigation. Soil management and erosion, water scarcity, water over-abundance, and water quality. Explore agro-ecosystem protection via field trips and project designs. Institutional context of conservation strategies, NGO links, and public participation.

ANSC-Animal Science
Offered by: Animal Science

ANSC 234 Biochemistry 2.
(3) (Winter) (3 lectures and one 3-hour lab) (Prerequisite: FDSC 211) Metabolism in humans and domestic animals. The chemistry of alimentary digestion, absorption, transport, intermediary metabolism and excretion.

ANSC 250 Principles of Animal Science.
(3) (Fall) (3 lectures and one 2-hour lab) Introduction to the scientific principles underlying the livestock and poultry industries. Emphasis will be placed on the breeding, physiology and nutrition of animals raised for the production of food and fibre.

ANSC 251 Comparative Anatomy.
(3) (Winter) (3 lectures and one 3-hour lab) Study of the macroscopic anatomy of mammals based on detailed dissection of the dog. Comparison with other domestic species will be emphasized.

ANSC 301 Principles of Animal Breeding.
(3) (Winter) (3 lectures and one 2-hour lab) (Prerequisite: AEMA 310 or equivalent) The qualitative and quantitative aspects of genetics as they apply to the economic improvement of domestic mammals and birds. Topics include: animal domestication, animal cytology, Mendelian traits of economic importance, principles of population genetics, statistical tools to describe populations, environmental effects, selection and mating systems.

ANSC 303 Farm Livestock Internship.
(2) (Prerequisite: ANSC 250 (or equivalent, or permission).) Practical experience in the day-to-day management of a major livestock species (dairy, swine, poultry, or specific combination) on the Macdonald Campus Farm. Interaction with personnel and training in the operations of a farm-animal enterprise.
ANSC 312 Animal Health and Disease.
(3) (Winter) (3 lectures and one 2-hour conference) An introduction to the pathogenesis and control of diseases in farm animals. Immune response and other protective mechanisms. Implications of animal diseases and drug therapy for product safety and public health.

ANSC 323 Mammalian Physiology.
(4) (Fall) (3 lectures and one 3-hour lab) (Prerequisite: FDSC 211 and one of the following: ANSC 250 or AEBI 202 or equivalent) A study of the organization, functions and regulation of various organ systems in mammals. The nervous, endocrine, muscular, cardiovascular, respiratory, urinary, digestive and reproductive systems are discussed.

ANSC 324 Animal Reproduction.
(3) (Fall) (3 lectures and one 3-hour lab) (Prerequisites: ANSC 250, FDSC 211 and ANSC 323) Reproduction in domestic animals integrated with management techniques to improve reproductive efficiency. Laboratory training includes anatomy, semen collection and evaluation, oestrus detection and control, artificial insemination and embryo transfer.

ANSC 330 Fundamentals of Nutrition.
(3) (Fall) (3 lectures) (Prerequisite: FDSC 211, ANSC 234 (ANSC 234 pre-req applies to students in B.Sc. Nutritional Sciences only).) A discussion of the nutrients; water, carbohydrates, lipids, proteins, minerals and vitamins, with particular emphasis on their functions in and essentially for the animal organism.

ANSC 400 Eukaryotic Cells and Viruses.
(3) (Winter) (Prerequisite: CELL 204) (Restrictions: Not open to students who have taken PARA 400) The basic principles of molecular biology and the underlying molecular basis for various methodologies in molecular biology are covered. The molecular genetic basis for viral infections and tumorigenesis will be covered as examples of the use of molecular genetic approaches to address biological problems.

ANSC 420 Animal Biotechnology.
(3) (Fall) (Prerequisites: AEBI 202, MICR 230) Applications of animal biotechnology in agriculture, biomedicine and environmental preservation, including culture, manipulation and transformation of somatic cells, isolation of stem cells, reproductive biotechnologies, animal cloning by nuclear transplantation, production of transgenic animals, and cell and gene therapies.

ANSC 424 Metabolic Endocrinology.
(3) (Winter) (3 lectures and one 3-hour lab) (Prerequisite: ANSC 323) A detailed study of the endocrine system and its role in the maintenance of homeostasis in higher vertebrates, including the endocrine regulation of energy balance.

ANSC 433 Animal Nutrition.
(3) (Winter) (3 lectures and one 1-hour lab) (Prerequisites: ANSC 250 and ANSC 330) Critical discussion of nutrient utilization by farm animals, an assessment of nutritive value of feeds. Recent developments in nutritional manipulation are discussed.

ANSC 450 Dairy Cattle Production.
(3) (Fall) (3 lectures and one 2-hour lab) (Prerequisite: ANSC 250) The application and integration of biological principles of genetics, physiology, nutrition and pathology and of economics and engineering for the maximum production efficiency of milk and meat by dairy cattle. Emphasis on recent developments. Trips to dairy farms and related enterprises will comprise part of the laboratory work.

ANSC 454 Swine Production.
(3) (Winter) (3 lectures and one 2-hour lab) (Prerequisite: ANSC 250) The application and integration of biological principles of genetics, physiology, nutrition and pathology and of economics and engineering for the maximum production efficiency of swine. Trips to swine farms and related enterprises will comprise part of the laboratory work.

ANSC 455 Special Topics: Animal Science.
(3) (Fall or Winter) Topics that are not otherwise available in formal courses. Investigation of a particular topic will be carried out under the supervision of a staff member who has expertise in the area of study chosen by the student.

ANSC 456 Poultry Production.
(3) (Fall) (3 lectures and one 2-hour lab) (Prerequisite: ANSC 250) The application and integration of biological principles of genetics, physiology, nutrition and pathology, and of economics and engineering for the maximum production efficiency of poultry meat and eggs. Trips to poultry farms and related enterprises will comprise part of the laboratory work.

ANSC 457 Special Topics 2.
(3) Special topics in animal science.

ANSC 490 Project.
(3) A project to be completed under the supervision of a staff member of the Department of Animal Science. An agreement between student and the involved staff member must be reached prior to registration.

ANSC 490N1 (1.5), ANSC 490N2 (1.5) Project.
(Students must also register for ANSC 490N1) (No credit will be given for this course unless both ANSC 490N1 and ANSC 490N2 are successfully completed in a twelve month period) A project to be completed under the supervision of a staff member of the Department of Animal Science. An agreement between student and the involved staff member must be reached prior to registration.

ANSC 495 Seminar 1.
(1) (Restriction: Not open to students who have taken ANSC 495D1/D2 or ANSC N1/N2.) Preparation, presentation and discussion of critical reviews.

ANSC 496 Seminar 2.
(1) (Restriction: Not open to students who have taken ANSC 495D1/D2 or ANSC N1/N2.) Preparation, presentation and discussion of critical reviews.

ANSC 504 Population Genetics.
(3) (Fall) (3 lectures) Considerations of the basic principles of Mendelian genetics dealing with the genetic properties of populations and extension to the simultaneous segregation of genes at many loci, polygenic inheritance and an introduction to quantitative genetics, including mechanisms of transmission, segregation, linkages between genes and the effect of natural and artificial selection.

ANSC 506 Advanced Animal Biotechnology.
(3) (Prerequisites: AEBI 202, ANSC 400.) New concepts and applications of animal biotechnology in agriculture, biomedicine, environmental preservation.

ANSC 508 Tools in Animal Biotechnology.
(3) (Fall) (Restriction: Permission of instructor.) Essential laboratory techniques in animal biotechnology: extraction of nucleic acids, PCR technology, gel electrophoresis, construction of gene expression vectors, transformation of bacterial and mammalian cells and monitoring gene expression using reporter genes.
ANSC 551 Carbohydrate and Lipid Metabolism.
(3) (Winter) (3 lectures) Comparative aspects of nutrition and metabolism of carbohydrate and lipid from the cellular level through to the whole organism. Main topics will include biothermodynamics, calorimetry, cellular metabolism and functions of carbohydrate and lipid, digestion, absorption and utilization of dietary carbohydrate and lipid.

ANSC 552 Protein Metabolism and Nutrition.
(3) (Fall) (3 lectures) Comparative aspects of nutrition and metabolism of amino acids and proteins from the cellular level through to the multisystem operation of the whole organism. Main topics include cellular metabolism and functions of amino acids and proteins, digestion, absorption and utilization of dietary protein. Comparison between farmed animals and humans.

ANSC 560 Biology of Lactation.
(3) (Restriction: Not open to students who have taken ANSC 460.) An interdisciplinary approach to the study of mammary development, the onset of lactation and its cessation, comparing the differences in mammalian species in mammary development from embryological, pre- and post-partum and pre- and post-partum aspects. Lactation at the cellular and biochemical levels.

ANSC 565 Applied Information Systems.
(3) (Winter) (3 lectures and one 2-hour lab) (Prerequisite: ABEN 251 or demonstrated equivalency) Introduction to concepts of an Information System and subsequent application to various scenarios in agriculture. Industry analysis in terms of users, goals, available information, communication, delivery, structure, decision making, feedback, exploitation of technology and possible improvements using the Internet. Individual case studies and familiarisation with cutting-edge computer applications.

BINF-Bioinformatics
Offered by: Plant Science

BINF 511 Bioinformatics for Genomics.
(3) (Prerequisite: Understanding of cell and molecular biology (equivalent to a cell or molecular biology course) or permission from instructor.) Bioinformatics methods and reasoning in relation to genomics, proteomics and metabolomics strategies with an emphasis on functional genomics data. The course will cover introduction to UNIX, Perl programming, data processing and integration, file parsing, relational database design and implementation, angled towards solutions relevant for genomics.

BREE-Bioresource Engineering
Offered by: Bioresource Engineering

BREE 103 Linear Algebra.
(3) (3 lectures and 1 conference) (Restriction: Not open to students who have taken ABEN 103.) Vectors: equality and inequality, geometric representation, polar form, addition and subtraction, unit vectors, dot product, cross product, triple scalar and vector products, use of vectors in 3-D geometry. Matrices: definition, equality and inequality, addition and subtraction, multiplication, null matrix, identity matrix, triangular and diagonal matrices, determinants, matrix inverse, matrix application.

BREE 187 Freshman Seminar 1.
(0.5) (Restrictions: Open to Freshman intending to enrol in B.Eng. Bioresources Engineering Major.) (Not open to students who have taken ABEN 187.) Departmental seminar series.

BREE 188 Freshman Seminar 2.
(0.5) (Restrictions: Open to Freshman intending to enrol in B.Eng. Bioresources Engineering Major. Not open to students who have taken ABEN 188.) Departmental seminar series.

BREE 205 Engineering Design 1.
(3) (Restriction: Not open to students who have taken ABEN 205.) Engineering data handling and the role of the bioresources engineer in society; introduction to engineering analysis and design; the role of the engineer in the design, construction, and operation of bio-based facilities and industries and the environment.

BREE 210 Mechanical Analysis & Design.
(3) (3 lectures and 2 hours lab or problems) (Restriction: Not open to students who have taken ABEN 210.) Non-concurrent force systems; analysis of simple trusses and multforce frames; friction, shearing forces and bending moments in beams and frames; centres of gravity; solution of problems by energy methods.

BREE 214 Geomatics.
(3) (2 lectures and one 3-hour lab) (Restriction: Not open to students who have taken ABEN 214.) The engineer's level and the theodolite are used to perform benchmark circuits, profile levelling, topographic maps and straight line extensions. A total station, computer programs and use of GPS are introduced.

(3) (2 lectures and one 2-hour lab) Introduction to the composition and mechanical constitution of materials used in bioresources engineering, including metals, plastics, concrete, wood, composite, plant and food materials. Crystal structure, alloys, phase diagrams, stresses and strains, elasticity, plasticity, yield, fracture, ductility, heat treatments, cold work, corrosion, composite materials, concrete chemistry, polymers.

BREE 217 Hydrology and Water Resources.
(3) (3 lectures, one 2 hour lab) (Restriction: Not open to students who have taken ABEN 217.) Measurements and analysis of components of the water cycle. Precipitation, evaporation, infiltration and groundwater. Analysis of hydrologic data. Hydrograph theory. Hydrologic estimations for design of water control projects; flood control and reservoir routing. Integrated watershed management and water conservation. Water management systems for environmental protection.

BREE 252 Computing for Engineers.
(3) (3 lectures and one 2-hour lab) (Restriction: Not open to students who have taken ABEN 252.) A user level computer programming course in Fortran-90 language. The pros and cons of computerization, differences between mainframe and microcomputers, network basics, discussion of the use of Fortran-90 and C languages to solve engineering problems, electronic spreadsheet analysis and the use of other software packages will be studied from an engineering point of view.

BREE 301 Biothermodynamics.
(3) (3 lectures and one 2-hour lab) (Restriction: Not open to students who have taken ABEN 301.) Classical thermodynamic analysis of pure and simple compressible systems. The course covers the first and second laws of thermodynamics. It deals with basic concepts of thermodynamics and thermochemistry in biological systems.

BREE 305 Fluid Mechanics.
(3) (3 lectures and one 2-hour lab or problems) (Prerequisites: BREE 210, AEMA 202) (Restriction: Not open to students who have taken ABEN 305.) Properties of fluids; fluid statics; principles of flow of incompressible and compressible fluids; dimensional analysis boundary layers; conduit and open channel systems; simple applications to turbo machinery.

BREE 312 Electric Circuits and Machines.
(3) (3 lectures and one 2-hour lab or problems) (Prerequisite: AEMA 305 (formerly AEMA 205).) (Restriction: Not open to students who have taken ABEN 312.) General circuit laws and d.c. circuits; electromagnetic circuits; inductance and capacitance, natural and forced response of circuits; analysis of single phase and three phase networks; transformers, AC and DC motors/generators.

BREE 314 Agri-Food Buildings.
(3) (3 lectures and 2-hour lab) (Restriction: Not open to students who have taken ABEN 314.) Analysis and design of structures to house animals and plants and to process and store animal and plant products. Introduction to environmental control systems and animal waste management.

BREE 315 Design of Machines.
(3) (3 lectures, 2 hours problems) (Prerequisite: BREE 341 (formerly ABEN 341)) (Restriction: Not open to students who have taken ABEN 315.) Design of shafting, bearings, gear, belt and chain drives, clutches, brakes, vibrations, fasteners, welded joints, frames. Principles and practices of Engineering Drawing will be adhered to in laboratory submissions.
BREE 319 Engineering Mathematics.
(3) (1 lecture, two 2-hour labs) (Prerequisite: BREE 252 (formerly ABEN 252)) (Restriction: Not open to students who have taken ABEN 322.) This is a computer-based course taught via personal computer technology. The objectives of the course are to familiarize students with a number of computer-based mathematical engineering tools and to teach them how to effectively do mathematics with these. Subjects covered are: data conversion; data modelling and curve fitting; 3D geometry; vector and matrix algebra; filtering and filter design. A number of commercial software products will be used; these will be updated as the technology evolves.

BREE 322 Organic Waste Management.
(3) (2 lectures and one 2-hour lab) (Restriction: Not open to students who have taken ABEN 322.) An introduction to engineering aspects of handling, storage and treatment of all biological and food industry wastes. Design criteria will be elaborated and related to characteristics of wastes. Physical, chemical and biological treatment systems.

BREE 323 Properties of Biological Materials.
(3) (2 lectures and one 2-hour lab) (Prerequisite: BREE 341 (formerly ABEN 341)) (Restriction: Not open to students who have taken ABEN 323.) An engineering analysis of the structure, physical attributes, mechanical and rheological properties of biological materials, emphasizing the relationship of these properties to production and processing of agricultural products and food. Mathematical models considering size, shape, volume, surface area, density, quasistatic and dynamic viscoelastic behaviour; non-Newtonian fluid models; optical properties; behaviour of granular materials.

BREE 324 Elements of Food Engineering.
(3) (3 lectures) (Pre/Co-requisite: FDSC 330) (Restriction: Not open to students in the B.Eng.(Bioresource) program) (Restriction: Not open to students who have taken ABEN 324.) A course in basic food engineering for non-engineering students, covering heat transfer, mass and energy balances, food process unit operations, material transport/steam/refrigeration systems.

BREE 325 Food Process Engineering.
(3) (3 lectures and one 3-hour lab) (Restriction: Not open to students who have taken ABEN 325.) Heat and mass transfer, enthalpy and mass balances, sterilizing, freezing, fluid flow, pipes, steam, refrigeration, pumps and valves.

BREE 327 Bio-Environmental Engineering.
(3) (Restrictions: U2 students and above. Not open to students who have taken ABEN 305.) Introduction to principles of bio-engineering in solving environmental problems related to the domains of water, soil and air; the capability of each domain to absorb, recycle or treat contaminants.

(3) (3 lectures and one 3-hour lab) (Prerequisite: BREE 210 (formerly ABEN 210)) (Restriction: Not open to students who have taken ABEN 341.) Stress, strain, resilience, elastic and plastic properties of materials; bending moment and shear force diagrams; bending and shear stress; deflections; simple, fixed and continuous beams, torsion and helical springs, reinforced concrete beams; columns, bending and direct stress; general case of plane stress; Mohr’s circle.

BREE 412 Machinery Systems Engineering.
(3) (3 lectures and one 3-hour lab) (Restriction: Not open to students who have taken ABEN 412.) Study and analysis of machines for tillage, harvesting, crop processing and handling. Field tests, load studies, design requirements; design of machines and components for agricultural applications.

BREE 416 Engineering for Land Development.
(3) (3 lectures and one 2-hour lab of design problems) (Prerequisite: BREE 217 (formerly ABEN 217)) (Restriction: Not open to students who have taken ABEN 416.) The engineering aspects of soil and water conservation, irrigation, water conveyance structures and canals, use of geosynthetics for soil protection, seepage and uplift. Students will produce an integrated development project.

BREE 418 Soil Mechanics and Foundations.
(3) (3 lectures and one 3-hour lab) (Prerequisite: BREE 341 (formerly ABEN 341)) (Restriction: Not open to students who have taken ABEN 418.) The exploration of subsoils, strength theories, granular and cohesive soils, foundation design, settlement calculation, consolidation, slope stability, Atterberg limits, triaxial testing, direct shear testing, compaction, soil freezing, frost heaving.

BREE 419 Structural Design.
(3) (3 lectures and one 3-hour lab or design problems) (Prerequisite: BREE 341 (formerly ABEN 341)) (Restriction: Not open to students who have taken ABEN 419.) Structural Design in steel and timber; application of complete design procedures to working stress design; plastic design for ultimate loading.

BREE 481 Undergraduate Seminar 1.
(0.5) (Restrictions: Not open to students who have taken ABEN 491D/N or ABEN 481.) Attendance and participation in departmental seminars.

BREE 482 Undergraduate Seminar 2.
(0.5) (Restrictions: Not open to students who have taken ABEN 492D/N or ABEN 482.) Attendance and participation in departmental seminars.

BREE 483 Undergraduate Seminar 3.
(0.5) (Restrictions: Not open to students who have taken ABEN 493D/N or ABEN 483.) Attendance and participation in departmental seminars.

BREE 484 Undergraduate Seminar 4.
(0.5) (Restrictions: Not open to students who have taken ABEN 494.) Attendance and participation in departmental seminars.

BREE 485 Undergraduate Seminar 5.
(0.5) (Restrictions: Not open to students who have taken ABEN 495.) Attendance and participation in departmental seminars.

BREE 486 Undergraduate Seminar 6.
(0.5) (Restrictions: Not open to students who have taken ABEN 486.) Attendance and participation in departmental seminars.

BREE 490 Engineering Design 2.
(3) (1 lecture) (Prerequisites: CHEE 315 or MECH 346, BREE 205.) (Restriction: Not open to students who have taken ABEN 490.) The student is expected to develop a professional design project proposal with due considerations to executive summary, synthesis, methodology, milestones, budget, etc.

BREE 495 Engineering Design 3.
(3) (1 lecture) (Prerequisite: BREE 490 (formerly ABEN 490)) (Restriction: Not open to students who have taken ABEN 490.) The student is expected to implement, physically or virtually, the project proposed in the Design 1 course. The student is expected to present project outcome, in both written and oral forms and learn to be critical about their own work and those of others.

BREE 501 Simulation and Modelling.
(3) (Restrictions: U3 students and above. Not open to students who have taken ABEN 612 or ABEN 501.) Modelling, physical and virtual models of linear, chaotic and stochastic systems, simulation techniques and methods for static and dynamic models, steady and unsteady state. Examples from various areas such as machine design, population dynamics, food processing, biological control, farm management, ecological...
system design. Mathematics and computer oriented - students must be familiar with microcomputer operation.

**BREE 502 Drainage/Irrigation Engineering.**
(3) (Prerequisite: BREE 217 (formerly ABEN 217)) (Restrictions: U3 students and above. Not open to students who have taken ABEN 611 or ABEN 502.) Benefits and importance of drainage; types of drainage systems; design and construction of main, surface and subsurface drainage systems; drainage materials. Crop water requirements; evapotranspiration models; design and layout of surface, sprinkler and drip irrigation systems; pipe hydraulics; pumps.

**BREE 504 Instrumentation and Control.**
(3) (3 lectures and one 2-hour lab) (Prerequisite (Undergraduate): BREE 312 (formerly ABEN 312) or ECSE 281) (Restriction: Not open to students who have taken ABEN 504.) Principles and operation of instrument systems used for measurement and control in agricultural processes and research.

**BREE 506 Advances in Drainage Management.**

**BREE 509 Hydrologic Systems and Modelling.**
(3) (3 hour lectures) (Restriction: Not open to students who have taken ABEN 509.) Use of deterministic and stochastic models to analyze components of the hydrologic cycle on agricultural and forested watersheds, floods frequency analysis, hydrograph analysis, infiltration, runoff, overland flow, flood routing, erosion and sediment transport. Effects of land-use changes and farm and recreational water management systems on the hydrologic regime.

**BREE 510 Watershed Systems Engineering.**
(3) (3-1-5) (Restrictions: U3 students or above.) (Note: Case studies and a project.) An examination and application of methodologies, tools and algorithms used in environmental systems engineering with an emphasis on allocation of resources within a watershed. Skills addressed include systematic evaluation of alternatives, identification of trade-offs and assessment of the degree of optimality of design or alternatives.

**BREE 512 Soil Cutting and Tillage.**
(3) (2 lectures and one 2-hour lab) (Prerequisite (Undergraduate): BREE 341 (formerly ABEN 341)) (Restriction: Not open to students who have taken ABEN 512.) Soil mechanics applied to cutting, tillage and drain installation tools. Soil cutting forces for two and three dimensional implements. Soil loosening, inversion, sorting and manipulation. Selection of traction machines to match soil cutting and tillage requirements. Depth and grade control systems. Analysis of drainage machines, wheel trenchers, chain trenchers and trenchless plows.

**BREE 515 Soil Hydrologic Modelling.**
(3) (3 lectures and one 3-hour lab) (Restriction: Not open to students who have taken ABEN 515.) A review of computer simulation models for designing subsurface drainage systems. Use of CAD systems for designing and drafting drainage plans.

**BREE 518 Bio-Treatment of Wastes.**
(3) (One 3 hour lecture) (Restriction: Not open to students who have taken ABEN 518.) Special topics concerning control of pollution agents from the agricultural industry; odour control, agricultural waste treatment including biological digestion, flocculants, land disposal and sedimentation, pesticide transport.

**BREE 519 Advanced Food Engineering.**
(3) (3 lectures and one 2-hour lab) (Prerequisites: BREE 325 (formerly ABEN 325) and MECH 426, or permission of instructor) (Restriction: Not open to students who have taken ABEN 519.) Advanced topics in food engineering. Concepts of mathematical modeling and research methodologies in food engineering. Topics include heat and mass transfer in food systems, packaging and distribution of food products, thermal and non-thermal processing, rheology and kinetics of food transformations.

**BREE 525 Climate Control for Buildings.**
(3) (3 lectures and one 3-hour lab) (Prerequisite: BREE 301 (formerly ABEN 301)) (Restriction: U3 students or above. Not open to students who have taken ABEN 525.) The analyses of heat and water vapour transfer through the structure of buildings are used to design heating, ventilation and refrigeration systems. Heat conduction and convection as well as radiation are included in the analysis of heat transfer. Ventilation systems are designed for livestock shelters, produce storages and greenhouses.

**BREE 530 Fermentation Engineering.**
(3) (3 lectures and one 3-hour lab) (Prerequisite (Undergraduate): BREE 325 (formerly ABEN 325) or equivalent) (Graduate courses available to senior undergraduates with permission of the instructor) (Restriction: Not open to students who have taken ABEN 530.) Advanced topics in food and fermentation engineering are covered, including brewing, bioreactor design and control and microbial kinetics.

**BREE 531 Post-Harvest Drying.**
(3) (Restrictions: U3 students or above. Not open to students who have taken ABEN 621 or ABEN 531.) Heat and moisture transfer with respect to drying of agricultural commodities; techniques of enhancement of heat and mass transfer; drying efficiency and scale-up problems.

**BREE 532 Post-Harvest Storage.**
(3) (Restrictions: Not open to students who have taken ABEN 622 or ABEN 532.) Active, semi-passive and passive storage systems; environmental control systems; post-harvest physiology and pathogenicity; quality assessment and control methodology; economic aspects of long-term storage.

**BREE 533 Water Quality Management.**
(3) (Restriction: Not open to students who have taken BREE 625 (formerly ABEN 625.) Management of water quality for sustainability. Cause of soil degradation, surface and groundwater contamination by agricultural chemicals and toxic pollutants. Screening and mechanistic models. Human health and safety concerns. Water table management. Soil and water conservation techniques will be examined with an emphasis on methods of prediction and best management practices.

---

**BTEC-Biotechnology**

**Offered by:** Parasitology

**BTEC 501 Bioinformatics.**
(3) (2 lectures and 1 tutorial per week) This course introduces the application of computer software for analysis of biological sequence information. An emphasis is placed on the biological theory behind analytical techniques, the algorithms used and methods of developing a statistical framework for various types of analysis.

**BTEC 502 Biotechnology Ethics and Society.**
(3) (Restriction: U3 and over.) Examination of particular social and ethical challenges posed by modern biotechnology such as benefit sharing, informed consent in the research setting, access to medical care worldwide, environmental safety and biodiversity and the ethical challenges posed by patenting life.

**BTEC 535 Functional Genomics in Model Organisms.**
(3) (Prerequisite: 300-level course in genetics, molecular biology, biochemistry or permission of instructor.) (Restriction: Limited to 30 students.) An overview of strategies used to understand the function of genes, especially those identified through genome sequencing and bioinformatics. Use of model organisms that have proved particularly valuable for this purpose.

---

**CELL-Genetics**

**Offered by:** Plant Science

**CELL 204 Genetics.**
(4) (3 lectures, one 3-hour lab, one 1-hour tutorial) The course integrates classical, molecular and population genetics of animals, plants, bacteria and viruses. The aim is to understand the flow of genetic information within a cell, within families and in populations. Emphasis will be placed on problem solving.
based learning. The laboratory exercises will emphasize the interpretation of genetic experimental data.

**CELL 500 Techniques Plant Molecular Genetics.**
(3) Plant biotechnology, recombinant DNA techniques, transgenic plant generation (genetically modified plants) as well as gene and gene product analysis.

**CELL 501 Plant Molecular Biology and Genetics.**
(3) Photosynthesis, plant development, plant genome mutagenesis and analysis, and plant stress are discussed. Journal articles and reviews on all aspects of plant molecular biology and genetics.

**ENTO-Entomology**
Offered by: Natural Resource Sciences

**ENTO 330 Insect Biology.**
(3) (Fall) (2 lectures and one 2-hour lab) (Restriction: Not open to students who have taken NRSC 330) Insect structure and function, development and specialization, ecology, behaviour, diversity, evolution, classification and management.

**ENTO 330 Economic Entomology.**
(3) (Fall) (Prerequisites: WILD 200 (formerly AEBI 200) or ENSO 330 (formerly NRSC 330) or permission of instructor.) Comparison of the economic impact of insect pests in agricultural crops and forests with the social and economic value of insects. Principles of pest management theory, emphasizing insect monitoring, sampling, and economic decision levels.

**ENTO 350 Insect Biology and Control.**
(3) (Winter) (3 hours lecture) (Prerequisite: BIOL 205 or permission of instructor) (Restriction: Not open to students who have taken or are taking ENTO 330 or BIOL 350.) (Note: This course is also offered as BIOL 350 in the fall term.) Introduction to insect structure, physiology, biochemistry, development, systematics, evolution, ecology and control. Stress on interrelationships and integrated pest control.

**ENTO 352 Control of Insect Pests.**
(3) (Winter) (Restriction: Not open to students who have previously taken ENTO 452) (3 lectures) Modern concepts of integrated control techniques and principles of insect pest management, with emphasis on biological control (use of predators, parasites and pathogens against pest insects), population monitoring, and manipulation of environmental, behavioral and physiological factors in the pest's way of life. Physical, cultural, and genetic controls and an introduction to the use of non-toxic biochemical controls (attractants, repellents, pheromones, antimetabolites).

**ENTO 425 Insect Ecology.**
(3) (Winter) (Restriction: Not open to students who have taken ENTO 452) (3 lectures) Modern concepts of integrated control techniques and principles of insect pest management, with emphasis on biological control (use of predators, parasites and pathogens against pest insects), population monitoring, and manipulation of environmental, behavioral and physiological factors in the pest's way of life. Physical, cultural, and genetic controls and an introduction to the use of non-toxic biochemical controls (attractants, repellents, pheromones, antimetabolites).

**ENTO 440 Systematic Entomology.**
(3) (Winter) (1 lecture, 1 lab and project) (Prerequisite: ENTO 330 (formerly NRSC 330)). Classification of principal orders, suborders and superfamilies of insects; use of keys; collecting methods.

**ENTO 446 Apiculture.**
(3) Theory and practice of beekeeping. Social insects; development of social behaviour; co-evolution of flowering plants and social insects; life and behaviour of honeybees; insect pollination; honey production; properties of honey; practical beekeeping. Demonstrations and written assignments essential.

**ENTO 515 Parasitoid Behavioural Ecology.**
(3) (Winter) (Prerequisite: ENTO 330 (formerly NRSC 330) or equivalent) (Restriction: Not open to students who have taken NRSC 515) The origin and diversity of parasitoid species will be presented. Aspects of behavioural ecology that pertain to host selection, optimal allocation of progeny and sex and host-parasitoid interactions are examined. The importance of these processes is discussed in a biological control perspective.

**ENTO 520 Insect Physiology.**
(3) (Winter) (Prerequisite: Permission of instructor) (Restriction: Not open to students who have taken NRSC 520) Organismal approach to insects, emphasizing the physiology and development, and the physiological relations of insects to their environment.

**ENTO 535 Aquatic Entomology.**
(3) (Winter) Diversity, biology, ecology and recognition of the main groups of aquatic insects.

**ENTO 550 Veterinary and Medical Entomology.**
(3) (Winter) (Prerequisite: Permission of instructor) (Restriction: Not open to students who have taken NRSC 550) Environmental aspects of veterinary and medical entomology. An advanced course dealing with the biology and ecology of insects and acarines as aetiologic agents and vectors of disease, and their control. Integrated approaches to problem solving.

**FDSC-Food Science**
Offered by: Food Science & Agr-Chemistry, Parasitology

**FDSC 110 Inorganic Chemistry.**
(4) (Winter) (3 lectures and one 3-hour lab) The course will be a study of the fundamental principles of atomic structure, valence theory and the periodic table.

**FDSC 200 Introduction to Food Science.**
(3) (Fall) (3 lectures) (This course is scheduled for video-conferencing.) This course enables one to gain an appreciation of the scope of food science as a discipline. Topics include introductions to chemistry, processing, packaging, analysis, microbiology, product development, sensory evaluation and quality control as they relate to food science.

**FDSC 211 Biochemistry 1.**
(3) (Fall) (3 lectures) (Corequisite: FDSC 230) Biochemistry of carbohydrates, lipids, proteins, nucleic acids; enzymes and coenzymes. Introduction to intermediary metabolism.

**FDSC 212 Bioseparation Techniques.**
(3) (Fall) (1 lecture, 1 lab) (Prerequisite: FDSC 211 or permission of instructor) (Corequisite: FDSC 211 or permission of instructor) Techniques for isolating, purifying and characterizing the major classes of biomolecules; proteins, enzymes, carbohydrates and lipids in agricultural produce are explored. Experimental techniques include the preparation of buffer solutions, salt and solvent fractionations, centrifugation, chromatographic separations, electrophoresis, spectrophotometry, iodometric titrations, and thin layer chromatography.

**FDSC 213 Analytical Chemistry 1.**
(3) (Fall) (3 lectures and one 3-hour lab) Theoretical aspects of wet chemical techniques including gravimetric and volumetric analyses, redoximetry, and separation techniques.
FDSC 230 Organic Chemistry.
(4) (Fall) (3 lectures and one 3-hour lab) Atomic and molecular structure, modern concepts of bonding, overview of functional groups, conformational analysis, stereochemistry, mechanisms and reactions of aliphatic compounds.

FDSC 233 Physical Chemistry.
(3) (Winter) (3 lectures) Introduction to kinetic theory, thermodynamics, properties of liquids and solids, chemical equilibrium and the law of mass action, phase rule, properties of solutions, chemical kinetics.

FDSC 251 Food Chemistry 1.
(3) (Winter) (3 lectures and one 3-hour lab) (Prerequisite: FDSC 211) A study of the chemistry and functionality of the major components comprising food systems, such as water, proteins, carbohydrates and lipids. The relationship of these components to food stability will be studied in terms of degradative reactions and processing.

FDSC 300 Principles of Food Analysis 1.
(3) (Fall) (3 lectures and one 3-hour lab) (Prerequisite: FDSC 251 or permission of instructor.) (Corequisite: FDSC 251 or permission of instructor.) The fundamentals of food analysis are presented with the emphasis on the major components of foods. Topics include: food components, sampling, method selection, official methods, proximate analysis, moisture, protein, fat, ash, fiber, carbohydrates, and vitamins and nutraceutical compounds.

FDSC 305 Food Chemistry 2.
(3) (Fall) (3 lectures and one 3-hour lab) (Prerequisite: FDSC 251) A study of the chemistry and functionality of the minor components comprising food systems, such as enzymes, anthocyanins, carotenoids, additives, vitamins and essential oils. The relationship of these components to food stability in terms of degradative reactions and processing.

FDSC 310 Post Harvest Fruit and Vegetable Technology.
(3) (Fall) (3 lectures and one 3-hour lab) The post harvest chemistry and physiology of horticultural crops as they affect quality and marketability, handling methods pre and post harvest, principles and practices in cooling, storage, transportation and packaging.

FDSC 315 Separation Techniques in Food Analysis 1.
(3) (Winter) (3 lectures and one 3-hour lab) (Prerequisite: FDSC 300 or permission of instructor.) A detailed treatment on the principal chromatographic and electrophoretic techniques that are associated with the analysis of carbohydrate, lipid, protein constituents of food.

FDSC 319 Food Commodities.
(3) (Winter) (2 lectures and one 3-hour lab) (Prerequisite: FDSC 251 or permission of instructor.) The relationship between the chemistry of food constituents present in common commodities, such as milk, meat, eggs, cereals, oilseeds etc. and the common processing technologies associated with their transformation into stable food products.

FDSC 330 Food Processing.
(3) (Winter) (3 lectures and one 3-hour lab) (Prerequisite: FDSC 251) The principles and practices of food processing with an emphasis on canning, freezing, and dehydration. A survey of the newer methods of food preservation such as irradiation, reverse osmosis etc.

FDSC 334 Analysis of Food Toxins and Toxicants.
(3) (Winter) (3 lectures and one 3-hour lab) (Prerequisite: FDSC 213 or permission of instructor.) Toxins and toxicant residues in food including heavy metals, persistent organic pollutants (POPs) and microbial toxins are explored from an analytical perspective; new methods and strategies of analysis are emphasized.

FDSC 400 Food Packaging.
(3) (Fall) (3 lectures and one 3-hour lab) (Prerequisite: FDSC 305) An integrated approach to the materials used for the packaging of food products, considering the physical, chemical and functional characteristics of such materials and their utility, relative to the chemistry of the food system they are designed to enclose and preserve.

FDSC 405 Product Development.
(3) (Fall or Winter) (3 lectures and one 3-hour lab) (Pre-Course: FDSC 305) The chemical, technological and procedural aspects of product development. An understanding of the role and functionality of food ingredients such as acidulants, phosphates, modified starches, gums, emulsifiers, food additives and other functional components in relation to the formulation of food products.

FDSC 410 Flavour Chemistry.
(3) (Winter) (3 lectures) (Prerequisite: FDSC 305) The chemistry of the flavour constituents of foods, synthesis, modification, extraction and use.

FDSC 425 Principles of Quality Assurance.
(3) (Winter) (3 lectures) (Prerequisite: AEMA 310) The principles and practices required for the development, maintenance and monitoring of systems for food quality and food safety. The concepts and practices of Hazard Analysis Critical Control Point: ISO 9000; Total Quality Management; Statistical Sampling Plans, Statistical Process Control; Tools of Quality; Government Regulations.

FDSC 442 Food Microbiology.
(3) (Fall) (Prerequisite: MICR 230 or permission of instructor.) (Restriction: Not open to students who have completed MICR 442.) Topics in Food Microbiology including an overview of the natural flora and microbiological spoilage of food products, methods of control and shelf-life extension, methods of detection and control of food-borne pathogens and the use of suitable microorganisms in the production of a variety of food products.

FDSC 490 Research Project 1.
(3) (Fall or Winter) A course designed to give final year undergraduate students research experience.

FDSC 491 Research Project 2.
(3) (Fall or Winter) (Pre-/Co-requisite: FDSC 490.) (Restriction: Registration by Department permission only.) A laboratory research project.

FDSC 495D1 (1.5), FDSC 495D2 (1.5) Food Science Seminar.
(Fall) (2 lectures) (Students must register for both FDSC 495D1 and FDSC 495D2.) (No credit will be given for this course unless both FDSC 495D1 and FDSC 495D2 are successfully completed in consecutive terms) Two 20-minute presentations (1 per term) on an assigned or selected topic. The purpose is to research a subject and present to a peer audience the essence of the subject investigated. Development of presentation and communication skills at a professional level is stressed and rapport with the industry will be established through guest speakers.

FDSC 495N1 (1.5), FDSC 495N2 (1.5) Food Science Seminar.
(Winter) (Students must also register for FDSC 495N2) (No credit will be given for this course unless both FDSC 495N1 and FDSC 495N2 are successfully completed in a twelve month period) Two 20-minute presentations (1 per term) on an assigned or selected topic. The purpose is to research a subject and present to a peer audience the essence of the subject investigated. Development of presentation and communication skills at a professional level is stressed and rapport with the industry will be established through guest speakers.

FDSC 510 Food Hydrocolloid Chemistry.
(3) (Winter) (3 lectures) (Prerequisite: FDSC 319.) (Corequisite: FDSC 305) (Course offered in even years (check with Graduate Advisor)) The concepts of colloid chemistry as it applies to food systems. Components such as proteins, gums, carbohydrates, and emulsions are studied in terms of their chemical and physical properties (i.e., rheology, optical characteristics, etc.) and how they can be used to advantage in food systems.

FDSC 515 Enzyme Thermodynamics/Kinetics.
(3) (Winter) (Prerequisites: FDSC 211 and FDSC 233 or instructor's permission) (Course offered in odd years. Check with Graduate advisor.) Selected advanced topics on the biophysical and kinetic aspects of enzymatic reactions, particularly the fundamentals and applications of laws of biothermodynamics, biochemical equilibrium, electrochemistry and biochemical kinetics as related to the enzymatic reactions.
**FDSC 519 Advanced Food Processing.**
(3) (Winter) (3 lectures) (Prerequisite: FDSC 330) (Course offered in even years (check with Graduate Advisor)) Advanced technologies associated with food processing studied in more detail. Topics include food irradiation, reverse osmosis, super critical fluid extraction and extrusion.

**FDSC 520 Biophysical Chemistry of Food.**
(3) (Fall) (3 lectures) (Prerequisite: FDSC 233) (Course offered in even years. Check with Graduate Advisor.) This course will cover recent advances in the application of spectroscopic techniques, including infrared, Raman, near-infrared, circular dichroism, and fluorescence spectroscopy, to the study of biomolecules of relevance to food. Particular emphasis will be placed on the molecular basis of structure-function and structure-functionality relationships.

**FDSC 530 Advanced Analytical Chemistry.**
(3) (Fall) (3 lectures) (Prerequisite: FDSC 213) (Course offered in odd years (check with Graduate Advisor)) Selected instrumental methodologies including advances in automated chromatography, wide band NMR, chemical sensors, and the application of other spectroscopic techniques to the analysis of food constituents.

**FDSC 535 Food Biotechnology.**
(3) (Fall) (3 lectures) (Prerequisite: MICR 230) Developments in biotechnology as it relates to food production and processing concerning traditional food fermentations as well as novel food biotechnology enzymes, ingredients, genetic engineering, plant tissue culture and developments for microbiological and food analysis.

**FDSC 536 Food Traceability.**
(3) (Winter) (Prerequisite: FDSC 425 or by Instructor’s permission.) Concepts and processes associated with the identification, tracking and tracing food forward and backward through the food continuum.

**FDSC 537 Nutraceutical Chemistry.**
(3) (Fall) (Prerequisites: FDSC 230, FDSC 233, FDSC 211 or by Instructor’s permission.) The origin, classification, mechanism of action and chemical properties of potential and established nutraceutical compounds and their applications in functional foods.

**MICR-Microbiology**

**MICR 230 Introductory Microbiology.**
(3) (Winter) (3 lectures and one 3-hour lab) The occurrence and importance of microorganisms (especially bacteria) in the biosphere. Principles governing growth, death and metabolic activities of microorganisms. An introduction to the microbiology of soil, water, plants, food, man and animals.

**MICR 300 Microbial Physiology Laboratory.**
(3) (Fall) (Prerequisite: MICR 230.) (Restriction: Not open to students who have taken MICR 200.) Application of microbiological techniques relating to physiology, culturing, and characterization of microorganisms. Topics include bacterial growth curves, bacterial metabolic requirements, enzymatic assays.

**MICR 311 Microbiology Seminar 1.**
(1) (Fall and Winter) (Prerequisite: MICR 230.) Introductory seminar on a selected topic in microbiology.

**MICR 331 Microbial Ecology.**
(3) (Winter) (Restriction: Not open to students who have successfully completed NRSC 331) The ecology of microorganisms, primarily bacteria and archaea, and their roles in biogeochemical cycles will be discussed. Microbial interactions with the environment, plants, animals and other microbes emphasizing the underlying genetics and physiology. Diversity, evolution (microbial phylogenetics) and the application of molecular biology in microbial ecology.

**MICR 338 Bacterial Molecular Genetics.**
(3) (Fall) (Prerequisites: FDSC 211 and CELL 204) (Restriction: Not open to students who have successfully completed NRSC 338.) Basic bacterial genetics, DNA damage and repair, mutagenesis, gene cloning, mapping and regulation, molecular biology. Laboratory sessions will provide the student with practical experience in the genetic manipulation of microbes and in molecular biology techniques.

**MICR 341 Mechanisms of Pathogenicity.**
(3) (Fall) (3 lectures, one 3-hour lab) (Prerequisite: MICR 230) A study of the means by which bacteria cause disease in animals and humans. Includes response of host to invading bacteria, bacterial attachment and penetration processes, and modes of actions of exotoxins and endotoxins.

**MICR 412 Microbiology Seminar 2.**
(1) (Fall and Winter) (Prerequisite: MICR 311.) Advanced seminar on a selected topic in microbiology.

**MICR 450 Environmental Microbiology.**
(3) (Winter) (Prerequisite: MICR 230.) (Pre/Corequisite: MICR 331.) Focus on microbes in the environment. Topics include extreme environments, polar microbiology, biotechnology and bioremediation. Emphasis will be on population studies based upon molecular biological methods.

**MICR 481 Microbiology Project 1.**
(3) (Fall and Winter) (Pre/Corequisite: MICR 300 (formerly MICR 200).) (Restriction: Enrolment in Microbiology Major program or permission of instructor.) A research project on a topic relevant to the field of microbiology.

**MICR 482 Microbiology Project 2.**
(3) (Fall and Winter) (Prerequisite: MICR 481.) (Restriction: Enrolment in Microbiology Major program or permission of instructor.) Continuation of the project begun in MICR 481 on a topic relevant to the field of microbiology.

**MICR 492 Research Project 1.**
(2) (Fall and Winter) (Restrictions: Not open to students who have successfully completed MICRO 492D. N. Instructor’s approval required.) A research project involving laboratory work. Preparation of a project progress report and a literature review pertinent to the research area.

**MICR 493 Research Project 2.**
(3) (Fall and Winter) (Restrictions: Not open to students who have successfully completed MICRO 492D. N. Instructor’s approval required.) A continuation of the project begun in MICR 492. Laboratory work, preparation of a project report and journal article, and an oral presentation.

**MICR 495 Seminar 1.**
(1) (Fall and Winter) (Restriction: Instructor’s approval required.) Presentation on a selected topic.

**MICR 496 Seminar 2.**
(2) (Fall and Winter) (Restrictions: Not open to students who have successfully completed MICR 495, D. N. Instructor’s approval required) Advanced presentation on a selected topic.

---

**NRSC-Natural Resource Sciences**

**NRSC 201 Introductory Meteorology.**
(3) (Fall) (3 lectures) (Restriction: Not open to students who have taken AEPH 201) The atmosphere - its properties (structure and motion), and thermodynamics (stability, dry and moist). Clouds and precipitation. Air masses and fronts. Radiation and the global radiation budget. Interactions between the atmosphere and the biosphere.

---

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

† Professional Practice (Stage) in Dietetics involving special prerequisites
‡ Indicates that departmental approval/permission must be obtained by a student prior to registration.
▲ Denotes courses not available as Education electives.
● Denotes courses with limited enrolment.
NRSC 221 Environment and Health.
(3) (Restriction: Not open to students who are taking or have taken GEOG 221.) (Note: This course is also offered as GEOG 221. Students enrolled in main campus programs register as GEOG 221; students enrolled in Macdonald campus programs register as NRSC 221.) Introduction to physical and social environments as factors contributing to the production of human health, with emphasis on the physical properties of the atmospheric environment as they interact with diverse human populations in urban settings.

NRSC 300 Natural History of East Africa.
(3) (Winter) (Restriction: Limited to students in AFSS) (Corequisite: ANTH 315) Introduction to natural features and ecological interactions involving flora and fauna of East Africa. A science context course taking advantage of the biological opportunities presented by habitats at various locations, examining conservation issues related to these situations.

NRSC 315 Science of Inland Waters.
(3) (Fall) (2 lectures and one 3-hour lab) (Restriction: Not open to students who have taken ZOOL 315) Nature and history of limnology; divisions of inland waters; properties of fresh water; habitats; zones; nutrient cycles; biota; adaptations; seasonal variations; distributions; pollution; succession and evolution of fresh water environments. Includes field excursions.

NRSC 333 Physical and Biological Aspects of Pollution.
(3) (Fall) (3 lectures) (Restriction: Not open to students who have taken WILD 333) The environmental contaminants which cause pollution; sources, amounts and transport of pollutants in water, air and soil; waste management.

NRSC 340 Global Perspectives on Food.
(3) (Winter) (3 lectures) (Prerequisite: A 200-level course in food science, food resources or dietetics, or permission of instructor.) Issues of community and global change in relation to environment and the production of food. Contrasts between developed and developing countries will highlight impacts of colonialism, political structures, and cultural systems related to gender, class and ethnicity.

NRSC 370 Special Topics.
(1) (Fall and Winter) (Restriction: Departmental approval required.) Students will pursue topics that are not otherwise available in formal courses. An individualized course of studies will be followed under the supervision of a member of staff qualified in the appropriate discipline or area.

NRSC 371 Special Topics.
(1) (Fall and Winter) (Restriction: Departmental approval required.) Students will pursue topics that are not otherwise available in formal courses. An individualized course of studies will be followed under the supervision of a member of staff qualified in the appropriate discipline or area.

NRSC 372 Special Topics.
(2) (Fall and Winter) (Restriction: Departmental approval required.) Students will pursue topics that are not otherwise available in formal courses. An individualized course of studies will be followed under the supervision of a member of staff qualified in the appropriate discipline or area.

NRSC 373 Special Topics.
(2) (Fall and Winter) (Restriction: Departmental approval required.) Students will pursue topics that are not otherwise available in formal courses. An individualized course of studies will be followed under the supervision of a member of staff qualified in the appropriate discipline or area.

NRSC 374 Special Topics.
(3) (Fall and Winter) (Restriction: Departmental approval required.) Students will pursue topics that are not otherwise available in formal courses. An individualized course of studies will be followed under the supervision of a member of staff qualified in the appropriate discipline or area.

NRSC 375 Special Topics.
(3) (Fall and Winter) (Restriction: Departmental approval required.) Students will pursue topics that are not otherwise available in formal courses. An individualized course of studies will be followed under the supervision of a member of staff qualified in the appropriate discipline or area.

NRSC 382 Ecological Monitoring and Analysis.
(3) (Summer) Students use a variety of methods to sample physical, biological and human systems, to analyse and interpret these data to assess ecosystem health. Methods include GIS, population sampling, land use, resource and biodiversity mapping.

NRSC 383 Land Use: Redesign and Planning.
(3) (Summer) (Prerequisite: 24 credits of university training in a field relating to the environment, including one course in statistics, AEMA 310, or equivalent, or permission of instructor) Issues related to historical and modern land use, environmental impacts, current structures of governance. Needs assessment, and the redesign of human systems of organization and decision making according to ecological principles. Land use in peri-urban and rural settings, and the use of participatory action research.

NRSC 384 Field Research Project.
(3) (Summer) (Prerequisite: 24 credits of university training in a field relating to the environment, including one course in statistics, AEMA 310, or equivalent, or permission of instructor) Small group field research project.

NRSC 430 GIS for Natural Resource Management.
(3) (Prerequisites: At least one environmental science course and one ecology course or permission of instructor.) (Restriction: U2 students and above. Not open to students who have taken GEOG 201, 306 or 307 or BREE/ABEN 430. Limited to 32 students.) Applications of Geographic Information Systems (GIS) and spatial analysis techniques to the presentation and analysis of ecological information, including sources and capture of spatial data; characterizing, transforming, displaying spatial data; and spatial analysis to solve resource management problems.

NRSC 437 Assessing Environmental Impact.
(3) (Winter) (2 lectures) (Restriction: Not open to students who have taken WILD 437) (Restrictions: U2 students and above) Theories and procedures of assessing environmental impact. An examination of the environmental impact of existing programs and projects to examine their accuracy in predicting consequences and attenuating undesirable effects.

NRSC 491 Scientific Communication 1.
(1) (Fall) (Restriction: Not open to students who have taken WILD 491,D,N or AEIB 495D,N.) Synthesis and interpretation of multifaceted subjects and scientific writing. Preparation of scientific documents such as grant proposals and manuscripts. Participation in oral presentations of technical subjects.

NRSC 492 Scientific Communication 2.
(1) (Winter) (Prerequisite: NRSC 491) (Restriction: Not open to students who have taken WILD 491,D,N or AEIB 495D,N.) Advanced synthesis and interpretation of multifaceted subjects and scientific writing. Preparation of scientific documents such as grant proposals and manuscripts. Participation in oral presentations of technical subjects.

NRSC 497 Research Project 1.
(2) (Restriction: Not open to students who have taken NRSC 496 D,N or NRSC 497 D,N) (Fall and Winter) Independent research project in consultation with a faculty supervisor. Selection of a research problem, formulation of hypotheses and objectives, research design and a comprehensive review of the pertinent literature.

NRSC 498 Research Project 2.
(3) (Fall and Winter) (Prerequisite: Not open to students who have taken NRSC 496 D,N or NRSC 497 D,N) (Prerequisite: NRSC 497) Continuation of the independent research project begun in NRSC 497. Data collection and analysis, testing of hypotheses, discussion of results.

NRSC 510 Agricultural Micrometeorology.
(3) (Fall) (3 lectures) (Restriction: Not open to students who have taken AEPH 510) Interaction between plant communities and the atmosphere. The physical processes governing the transfer of heat, mass and momentum as they relate to research and production in agricultural and environmental systems. Experimental techniques for measuring fluxes of heat, water-vapour, CO2 and natural and man-made pollutants.
NRSC 512 Water: Ethics, Law and Policy.
(3) (Fall) The various legal expressions of the relationship between humanity and water such as those grounded in markets, basic rights, First Nations traditions, utilitarianism and cost/benefit analysis. Public, private and international law, and intergovernmental institutions relevant to the protection and management of water resources.

NRSC 514 Freshwater Ecosystems.
(3) (Fall) Origin, diversity, structure, function and evolution of freshwater ecosystems; fauna, flora and biotic communities of freshwater habitats; indicator organisms; biotic indices; human impact on freshwater ecosystems.

NRSC 540 Socio-Cultural Issues in Water.
(3) (Winter) (Prerequisite: A 300- or 400-level course in water or permission of instructor.) (3-hour seminar) Discussion of current debates and problems related to water, especially in developing countries. Topics include: gender relations and health in the context of cultural and economic systems, and the impacts of new technologies, market structures and population growth.

NUTR-Nutrition and Dietetics
Offered by: Dietetics & Human Nutrition

NUTR 200 Contemporary Nutrition.
(3) (Summer) (Restriction: Not open for credit to students with a biology or chemistry course in their program, or to students registered in the School of Dietetics and Human Nutrition, or to students who take NUTR 207) Provides students without a biology/chemistry background with the fundamental tools to critically assess nutrition related information, to evaluate their own diets, and to implement healthy changes. Emphasis is on current issues and maximizing health and disease prevention at different stages of the lifecycle.

NUTR 207 Nutrition and Health.
(3) (Fall) (3 lectures) (Corequisites: BIOL 401 or FDSC 230) (Restriction: Not open to students who take NUTR 200 or NUTR 307 or who have taken PHGY 311 or BIOC 311) (Restriction: Science students in physical science and psychology programs who wish to take this course should see the Arts and Science Student Affairs Office for permission to register.) Provides students who have a basic biology/chemistry background with the fundamental information on how macronutrients, vitamins and minerals are metabolized in the body, followed by application to evaluate current issues of maximizing health and disease prevention at different stages of the lifecycle.

‡ NUTR 208 Stage in Dietetics 1.
(1) (Winter) (Prerequisite: all Required courses in Term 1 of the Dietetics Major.) (Corequisites: All Required courses in Term 2 of the Dietetics Major) (Restriction: Dietetics Major or Special Students (professional credentialing)) Introduction to the dietetics profession; principles and policies in food and nutrition essential to entry-level dietetics experiences; practice in dietetic interviewing, problem solving and report writing related to Level 1 Professional Practice placements.

‡ NUTR 209 Professional Practice Stage 1B.
(3) Directed, supervised experiences in nutrition services and food service operations management; integration into the professional team.

NUTR 214 Food Fundamentals.
(3) (Fall) (2 lectures and one 4-hour lab) (Prerequisite: FDSC 230 or corequisite with instructor's permission.) (Corequisite FDSC 211.) Study of composition, structure and chemical and physical properties of foods. To understand the scientific principals underlying chemical and physical phenomena that occur during the preparation of food. Laboratory emphasis on developing skills in handling and preparing food, and food assessment by sensory evaluation.

NUTR 217 Application: Food Fundamentals.
(3) (Winter) (2 lectures and one 4-hour lab) (Prerequisite: NUTR 214) A more intensive study of food and complex food mixtures, including their chemical and physical properties. Learning how to control the changes that take place during the preparation of food to obtain palatable, nutritious and safe food. An introduction to culturally determined food habits. Laboratory emphasis on acquiring new knowledge and application to basic food preparation and cooking principles.

NUTR 301 Psychology.
(3) (Fall) (2 lectures and 1 conference) A study of the general characteristics of physical, social, emotional and intellectual development, the psychology of learning, and the growth and development of personality.

NUTR 307 Human Nutrition.
(3) (Fall) (Prerequisites: BIOL 201 or AEBI 202, CHEM 212 or FDSC 230 or permission of the instructor.) (Restriction: Not open to students who have taken ANSC 330) (3 lecture hours) Cellular and organismal aspects of nutrition with emphases on biochemical and physiological roles of carbohydrates, lipids, proteins, minerals and vitamins in disease prevention and promotion of optimal health.

‡ NUTR 310 Stage in Dietetics 2A.
(1) (Winter) (One 2-hour conference/week) Human food intake assessment and evaluation will be practiced including modules on dietary interviewing, nutrition education teaching plans and documentation for the medical record. Practical aspects of health and food service administration will be addressed.

‡ NUTR 311 Stage in Dietetics 2B.
(5) (Summer: 7 weeks) Two interrelated modules of directed experience in normal and clinical nutrition and foodservice management, in health care settings and the private sector.

NUTR 322 Applied Sciences Communication.
(2) (Fall) (2 lectures, 1 lab) (Prerequisite: Completion of 15 credits in a B.Sc. program) The principles and techniques of communicating applied sciences to individuals and groups in both the professional and public milieu. Effective public speaking and group interaction techniques. Communication materials selection, development, use, and evaluation. Writing for the media. Balancing risk and reason in communicating scientific findings.

NUTR 337 Nutrition Through Life.
(3) (Winter) (3 lectures, 1 conference) (Prerequisite: ANSC 330 or NUTR 307) Emphasis on applied quantitative aspects of human nutrition. Nutrient utilization, evaluation and requirements, as related to dietary standards.

NUTR 344 Clinical Nutrition 1.
(4) (Winter) (Two 2-hour lectures) (Prerequisite: ANSC 323.) (Corequisite: NUTR 337.) Clinical nutrition assessment and dietary modification of pathological conditions including hypertension, lipid disorders and cardiovascular disease, obesity, diverticulosis, cancer, COPD, anorexia nervosa and bulimia.

NUTR 345 Food Service Systems Management.
(2) (Fall) (Prerequisite: NUTR 209.) An introductory course applying the principles of organizational management within the healthcare foodservice industry. Emphasis on understanding professional standards of quality control, customer relations and sanitation. Budget preparation, scheduling and cost control as well as menu preparation, recipe standardization and costing.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

 Denotes courses taught only in alternate years.
‡ Professional Practice (Stage) in Dietetics involving special prerequisites
● Indicates that departmental approval/permission must be obtained by a student prior to registration.
† Denotes courses not available as Education electives.
批示 Denotes courses with limited enrolment.

2007-2008 Undergraduate Programs Calendar, McGill University C-19
NUTR 420 Toxicology and Health Risks.
(3) (Fall) (3 lectures) (Prerequisite: FDSC 211, BIOL 201 or BIOC 212) (Restriction: This course is not open to students who have taken NUTR 361) Basic principles of toxicology, health effects of exposure to environmental contaminants such as heavy metals, pesticides and radionuclides and ingestion of food toxicants such as food additives and preservatives; natural toxins in plants and marine foods, human health, ecosystem health, safety evaluation, risk assessment, and current Canadian regulations.

NUTR 430 Directed Studies: Dietetics and Nutrition 1.
(3) (Fall and Winter) An individualized course of study in dietetics/human nutrition under the supervision of a staff member with expertise on a topic not otherwise available in a formal course. A written agreement between student and staff member must be made before registration and filed with the Program Coordinator.

NUTR 431 Directed Studies: Dietetics and Nutrition 2.
(3) (Fall or Winter) An individualized course of study in dietetics/human nutrition under the supervision of a staff member with expertise on a topic not otherwise available in a formal course. A written agreement between student and staff member must be made before registration and filed with the Program Coordinator.

NUTR 431D1 (1.5), NUTR 431D2 (1.5) Directed Studies: Dietetics and Nutrition 2.
(Students must register for both NUTR 431D1 and NUTR 431D2.) (No credit will be given for this course unless both NUTR 431D1 and NUTR 431D2 are successfully completed in consecutive terms) (NUTR 431D1 and NUTR 431D2 together are equivalent to NUTR 431) An individualized course of study in dietetics/human nutrition under the supervision of a staff member with expertise on a topic not otherwise available in a formal course. A written agreement between student and staff member must be made before registration and filed with the Program Coordinator.

NUTR 432 Directed Studies: Dietetics and Nutrition 3.
(3) (Fall and Winter) An individualized course of study in dietetics/human nutrition under the supervision of a staff member with expertise on a topic not otherwise available in a formal course. A written agreement between student and staff member must be made before registration and filed with the Program Coordinator.

NUTR 433 Directed Studies: Dietetics and Nutrition 4.
(5) (Fall or Winter or Summer) (Limited enrolment) (Prerequisite: registration in NUTR 409 or equivalent.) (Restriction: students in the Dietetics Major or documentation of requirement for professional registration) An individualized course of study in dietetics and human nutrition not available through other courses in the School. Emphasis will be placed on application of foods and nutrition knowledge, analytic and synthesis skills, and time management. A written agreement between student and instructor must be made before registration. A "C" grade is required to pass the course.

NUTR 436 Nutritional Assessment.
(2) (Winter) (Prerequisite: NUTR 337) (2 lectures) An intense 4-week course focused on resolving clinically based case studies. The objectives: to develop skills in clinical problem solving, learn principles and methods for assessing the nutritional status of patients and to become skilled at interpreting clinical data relevant to assessing nutritional status and prognosis of hospitalized patients.

NUTR 438 Interviewing and Counselling.
(2) (Winter) (Two 2-hour conferences) (Prerequisite: NUTR 344 and NUTR 311) Theories of behaviour change. Techniques and skills as applicable to the dietitian’s role as communicator, interviewer, counsellor, educator, motivator and nutrition behaviour change specialist.

NUTR 445 Clinical Nutrition 2.
(5) (Fall) (Two 2.5-hour lectures) (Prerequisite: NUTR 344 and ANSC 424) Clinical nutrition intervention for gastrointestinal and liver disease, hypermetabolic states, diabetes mellitus, renal disease and inborn errors of metabolism, enteral/parenteral nutrition management.

NUTR 446 Applied Human Resources.
(3) (Fall) (3 lectures, 1 conference) (Prerequisite: AGEC 242) The management of people at work. Employee development and the leadership role. The nature of collective bargaining, the role of unions and management.

NUTR 450 Research Methods: Human Nutrition.
(3) (Fall) (2 lectures, 3 hours research, 4 hours other) (Prerequisite: NUTR 337, AEMA 310 or BIOL 373) Introduction to methods of clinical, community, international, and laboratory-based nutrition research. Lectures, readings and assignments will cover basic research concepts. Students undertake a computer directed literature search and analysis.

NUTR 451 Analysis of Nutrition Data.
(3) (Fall) (Prerequisite: NUTR 337.) (Corequisite: NUTR 450) An applied course in analysis and interpretation of nutrition data sets. Introduction to specialized dietary and anthropometric computer programs. Written and oral presentation of results.

NUTR 501 Nutrition in Developing Countries.
(3) (Fall) (2 lectures and one seminar) (Prerequisite: For undergraduate students or consent of instructor required) This course will cover the major nutritional problems in developing countries. The focus will be on nutrition and health and emphasize young children and other vulnerable groups. The role of diet and disease for each major nutritional problem will be discussed.

NUTR 503 Bioenergetics and the Lifespan.
(3) (Fall) (Prerequisites: Undergraduate Basic Biochemistry (3 credits). Undergraduate Human Development (3 credits). Undergraduate Human Nutrition (3 credits) Undergraduate Mammalian Physiology (EDKP 331 or PHGY 202 or PHGY 210 or ANSC 323). Undergraduate Introductory Nutrition (EDKP 392 or NUTR 207 or NUTR 307).) Multidisciplinary approach that integrates principles of bioenergetics with nutrition through the lifespan.

NUTR 510 Professional Practice - Stage 4.
(14) (Fall: 16 weeks) (Prerequisite: NUTR 409) (Restriction: Undergraduate registration is restricted to students in the Dietetics Major, CGPA greater than, or equal to 2.50) Interrelated modules of directed experience in clinical nutrition, foodservice management, nutrition education and community nutrition, in health care setting and in the private sector.

NUTR 511 Nutrition and Behaviour.
(3) (2 lectures and one seminar) (Prerequisite: NUTR 445 for undergraduate students or consent of instructor) Discussion of knowledge in the area of nutrition and behaviour through lectures and critical review of recent literature; to discuss the theories and controversies associated with relevant topics; to understand the limitations of our knowledge. Topics such as diet and brain biochemistry, stress, feeding behaviour and affective disorders will be included.

NUTR 512 Herbs, Foods and Phytochemicals.
(3) (3 lectures and a project) (Prerequisite: Undergraduate): FDSC 211 or BIOL 201 or BIOC 212) An overview of the use of herbal medicines and food phytochemicals and the benefits and risks of their consumption. The physiological basis for activity and the assessment of toxicity will be presented. Current practices relating to the regulation, commercialization and promotion of herbs and phytochemicals will be considered.
PARA-Parasitology
Offered by: Parasitology

PARA 410 Environment and Infection.
(3) (2 lectures per week) (Prerequisite: BIOL 111 or AEBI 120 or equivalent) Infectious pathogens of humans and animals and their impact on the global environment are considered. The central tenet is that infectious pathogens are environmental risk factors. The course considers their impact on the human condition and juxtaposes the impact of control and treatment measures and environmental change.

PARA 438 Immunology.
(3) (3 lectures per week) (Prerequisite: AEBI 202 or permission of instructor) An in-depth analysis of the principles of cellular and molecular immunology. The emphasis of the course is on host defense against infection and on diseases caused by abnormal immune responses.

PARA 515 Water, Health and Sanitation.
(3) The origin and types of water contaminants including live organisms, infectious agents and chemicals of agricultural and industrial origins. Conventional and new technological developments to eliminate water pollutants. Comparisons of water, health and sanitation between industrialized and developing countries.

PLNT-Plant Science
Offered by: Plant Science

PLNT 201 Comparative Plant Biology.
(3) (3 lectures plus 1-hour conference) Comparative study of the ways in which photosynthetic organisms acquire resources, develop and grow, reproduce, and interact with various groups of fungi and herbivores. Comparisons will be made among the following major groups: cyanobacteria, algae, liverworts, mosses, seedless vascular plants, gymnosperms, and angiosperms.

PLNT 211 Principles of Plant Science.
(3) (3 lectures and one 2-hour lab) A study of major world crop species with emphasis on their adaptation and distribution in relation to the economic botany of the plants.

PLNT 215 Agricultural Enterprise Visits.
(1) (Notes: Grading: Pass/Fail) Field trips will be held Friday afternoons and a few Saturdays.) Examination of selected themes and problems that challenge modern agriculture such as biodiversity, biotechnology, food transformation, and crop and animal production.

PLNT 221 Introduction to Fungi.
(1) (Four 4-hour field labs, given during the second 4 weeks of semester) (Second 4 weeks of term only) Field and laboratory survey of local representatives of the major groups of fungi, including edible and poisonous mushrooms. The role of each group in terrestrial and aquatic ecological niches will be studied with respect to saprophytism, parasitism and symbiosis. Economic importance of fungi in medicine and biotechnology will be introduced.

PLNT 300 Cropping Systems.
(3) (3 lectures and one 3-hour lab) (Prerequisite: PLNT 211) Application of plant science and soil science to production of agronomic and horticultural crops. Use and sustainability of fertilization, weed control, crop rotation, tillage, drainage and irrigation practices.

PLNT 304 Biology of Fungi.
(3) (3 lectures and one 3-hour lab) This course describes the various groups of fungi and explores in depth their biology and physiology, their ecological niches and the role in various ecosystems and their benefits and uses in industry and biotechnology.

PLNT 305 Plant Pathology.
(3) (3 lectures and one 3-hour lab) The theory and concepts of plant pathology, including the disease cycle, infection, symptoms, resistance, epidemiology and control. The biology and taxonomy of pathogens will be studied, including fungi, bacteria, viruses and nematodes. Techniques of inoculation, isolation of pathogens from diseased plants, disease diagnosis and pathogen identification will be demonstrated.

PLNT 310 Plant Propagation.
(3) (3 lectures and one 3-hour lab) Principles and practical aspects of plant propagation are examined. The course consists of two parts. The first third deals with sexual propagation; the production, processing storage certification and analysis of seeds. The remaining two-thirds deals with vegetative propagation; cutting, budding, grafting, layering, and tissue culture.

PLNT 321 Fruit Production.
(3) (3 credits; 3 lectures and 1 3-hr lab) (Prerequisite: AEBI 201 or PLNT 211) Botany, physiology and management practices of the major temperate-zone fruit crops. Includes field work, laboratory experimentation and field trips.

PLNT 322 Greenhouse Management.
(3) (3 lectures and one 3-hour lab) Greenhouse design and operation, including environmental regulation, fertilization and pest management. Focus will be on the production of major floricultural and vegetable crops.

PLNT 341 Horticulture - the Alliums.
(1) (Prerequisite: PLNT 211 or PLNT 201 or permission of instructor) An independent study course in CD-ROM format. Modules contain an introductory section on crop establishment and a section dealing with the botany, physiology and management of the Alliums. Students make use of the Internet, Electronic discussion groups are used for tutorials. Grading is through the submission of written assignments.

PLNT 342 Horticulture - Cole Crops.
(1) (Prerequisite: PLNT 211 or PLNT 201 or permission of instructor) An independent study course in CD-ROM format. Modules contain an introductory section on crop establishment and a section dealing with the botany, physiology and management of perennial vegetable crops. Students make use of the Internet. Electronic discussion groups are used for tutorials. Grading is through the submission of written assignments.

PLNT 343 Horticulture - Root Crops.
(1) (Prerequisite: PLNT 211 or PLNT 201 or permission of instructor) An independent study course in CD-ROM format. Modules contain an introductory section on crop establishment and a section dealing with the botany, physiology and management of root crops. Students make use of the Internet. Electronic discussion groups are used for tutorials. Grading is through the submission of written assignments.

PLNT 344 Horticulture - Salad Crops.
(1) (Prerequisite: PLNT 211 or PLNT 201 or permission of instructor) An independent study course in CD-ROM format. Modules contain an introductory section on crop establishment and a section dealing with the botany, physiology and management of

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses taught only in alternate years.
Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
Indicates that departmental approval/permission must be obtained by a student prior to registration.
Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
Denotes courses with limited enrolment.
of salad crops. Students make use of the Internet. Electronic discussion groups are used for tutorials. Grading is through the submission of written assignments.

**PLNT 345 Horticulture: Solanaceous Crops.**
(1) (Prerequisite: PLNT 211 or PLNT 201 or permission of instructor) An independent study course in CD-ROM format. Modules contain an introductory section on crop establishment and a section dealing with the botany, physiology and management of the solanaceous crops. Students make use of the Internet. Electronic discussion groups are used for tutorials. Grading is through the submission of written assignments.

**PLNT 348 The Brassicas.**
(1) (Prerequisite: PLNT 211 or PLNT 201 or permission of instructor) An independent study course in CD-ROM format. Modules contain an introductory section on crop establishment and a section dealing with the botany, physiology and management of the Brassicas. Students make use of the Internet. Electronic discussion groups are used for tutorials. Grading is through the submission of written assignments.

**PLNT 353 Plant Structure and Function.**
(4) (3 lectures and one 3-hour lab) (Prerequisite: PLNT 211 or PLNT 201) The general anatomy and physiology of vascular plants with emphasis on the cells, tissues, organs, chemical components of plants and the physiological processes associated with their function.

**PLNT 358 Flowering Plant Diversity.**
(3) (2 lectures, one 3-hour lab, plus a 4-day field week held the week preceding the start of classes) (Prerequisites: PLNT 201 or PLNT 211 or ENVIR 202 or permission of instructor) Principles of classification and identification of flowering plants and ferns, with emphasis on 35 major families of flowering plants and the habitats in which they grow.

**PLNT 361 Pest Management and the Environment.**
(3) (3 lectures) Pests, pest impacts on the global food system and strategies for pest management. Pest management methods, models and programs, and how to reduce pest management impacts on the environment.

**PLNT 421 Landscape Plant Materials.**
(3) (2 lectures and one 3-hour lab) (Prerequisites: PLNT 211 or PLNT 201) A study of the major types of woody and herbaceous ornamental plants used in landscaping and how the landscaping industry uses plants to improve the environment. Laboratory includes a specimen collection of landscape plants widely used in Québec.

**PLNT 424 Cellular Regulation.**
(3) (Prerequisites: FDSC 211, AEBI 202 or permission of the instructor.) An overview of the cellular mechanisms used by prokaryotes and eukaryotes to regulate biosynthetic pathways. Topics covered range from control of gene transcription to the regulation of enzyme activity to the role of signal transduction pathways in the control of metabolic flux through cellular pathways.

**PLNT 434 Weed Biology and Control.**
(3) (3 lectures and one 3-hour lab) (Prerequisite: PLNT 211 or PLNT 201) A study of the biology of undesirable vegetation as related to the principles of prevention and physical, biological, managerial and chemical control. Emphasis on the environmental impact of the different methods of weed control.

**PLNT 450 Special Topics: Plant Science.**
(2) A course of independent study by the student with the guidance of a professor of recognized competence in the area of the chosen topic.

**PLNT 451 Special Topics: Plant Science 2.**
(3) A course of independent study by the student with the guidance of a professor of recognized competence in the area of the chosen topic.

**PLNT 458 Flowering Plant Systematics.**
(1) (1 lecture plus one 3-hour lab plus required summer plant collection) (Prerequisite: PLNT 358 or BIOL 358 or permission of instructor) Principles and methods of phylogenetic analysis of flowering plants with emphasis on new classification systems resulting from analysis of DNA sequence data. Laboratory sessions will focus on 40 temperate and tropical families not covered in PLNT 358 as well as on identification techniques for difficult plant families.

**PLNT 460 Plant Ecology.**
(3) (3 lectures and one 3-hour lab) (Prerequisite: AEMA 310 or permission of instructor.) Theory and practice of plant ecology with an emphasis on the interaction between patterns and ecological processes and the dynamics, conservation and management of plant populations and communities over a range of temporal and spatial scales.

**PLNT 489 Project Planning and Proposal.**
(1) (Restriction: Not open to students who have taken PLNT 490D1, PLNT 490D2, PLNT 490N1 or PLNT 490N2.) Preparation of a literature review and research plan for the project course (PLNT 490).

**PLNT 490 Research Project.**
(2) (Prerequisite: PLNT 489) (Restriction: Not open to students who have taken PLNT 490D1, PLNT 490D2, PLNT 490N1 or PLNT 490N2.) Directed study on approved research project requiring both oral and written presentation.

**PLNT 495 Seminar 1.**
(1) (Restriction: Not open to students registered in, or who have taken PLNT 495D1, PLNT 495D2, PLNT 495N1 or PLNT 495N2).

**PLNT 496 Seminar 2.**
(1).

**PLNT 525 Advanced Micropropogation.**
(3) (One 3-hour lecture) A detailed study of the principles and techniques of plant micro propagation. Includes lectures, laboratories, discussion sessions and visits to local laboratories. Evaluation is based on contribution to discussions, laboratory reports and an individualized project.

**PLNT 535 Plant Breeding.**
(3) (Prerequisite (Undergraduate): CELL 204, PLNT 201 or PLNT 211) (Given in alternate years) Principles and practices of plant breeding, including reproduction of of crop plants; plant hybridization; sources of genetic variation; selection methods used for self- and cross-pollinated crops and for clonally reproduced crops; breeding for diseases and pest resistance; applications of biotechnology in plant breeding.

**SOIL-Soil Science**

*Offered by: Natural Resource Sciences*

**SOIL 200 Introduction to Earth Science.**
(3) (Winter) (3 lectures, one 3-hour lab) Introductory concepts of geology and geomorphology will be presented including: rocks and minerals, surface deposits, history and structure of the earth.

**SOIL 210 Principles of Soil Science.**
(3) (Fall) (3 lectures and one 3-hour lab) Soil formation; examination of chemical, physical and biological properties of soils, interaction between soils, plants and the environment; function of soils in ecosystems with an emphasis on soil nutrients and fertility, and water quality.

**SOIL 315 Soil Fertility and Fertilizer Use.**
(3) (Winter) (3 lectures and one lab) (Prerequisite: SOIL 210 or permission of instructor) Plant nutrients in the soil, influence of soil properties on nutrient absorption and plant growth, use of organic and inorganic fertilizers.

**SOIL 326 Soil Genesis and Classification.**
(3) (Fall) (3 lectures and one 3-hour lab) (Prerequisite: SOIL 200 or equivalent) Theories and processes of soil genesis. Canadian classification system and effect of pedogenesis on soil properties.

**SOIL 331 Soil Physics.**
(3) (Winter) (3 lectures and one 3-hour lab) Soil structure; fluxes of water, heat, gases and solids in soils; physical properties and plant growth; applications to soil dynamics.

**SOIL 335 Soil Ecology and Management.**
(3) (Winter) (3 lectures and one 3-hour lab) (Prerequisites: SOIL 210 and WILD 205 (formerly AEIB 205).) The physical and chemical environment of soil organisms; survey of soil microflora and fauna; processes and optimal agronomic systems of management consistent with the goals of ecological agriculture.
**SOIL 410 Soil Chemistry.** (3) (Winter) (1 lecture, 1 tutorial, problem sets) (Prerequisite: SOIL 210 or GEOG 305 or permission of instructor) Soil chemical principles are presented in a series of problem sets covering basic concepts as well as applications to environmental and agricultural situations.

**SOIL 445 Agroenvironmental Fertilizer Use.** (3) (Fall) (Prerequisite: SOIL 315) A sustainable, agroenvironmental approach to nutrient management planning at the farm scale, consistent with guidelines and laws governing fertilizer use in Quebec and other jurisdictions.

**SOIL 521 Soil Microbiology and Biochemistry.** (3) (Winter) (Restriction: Not open to students who have taken NRSC 521) Soil environments, soil microorganisms and their function in the biogeochemical cycles of C, N, P and S. Basics of soil bioremediation.

### WILD-Resource Development

**WILD 200 Comparative Zoology.** (3) (Fall) (3 lectures and 1 lab) (Restriction: Not open to students who have taken AEBI 200) Animal diversity from an evolutionary/phylogenetic perspective. Classification, biology and evolution of animals; morphology and recognition of animals.

**WILD 205 Principles of Ecology.** (3) (Winter) (2 lectures and 1 conference) (Restriction: Not open to students who have taken AEBI 205) The interactions of organisms and the physical environment. Ecological principles will be discussed at the level of the individual, the population and the community.

**WILD 212 Evolution and Systematics.** (3) (Fall) (3 lectures, and assignments) (Restriction: Not open to students who have taken ZOOL 312) Evolution by natural selection; Neo-Darwinism and alternatives. Myths and misconceptions in evolution. Species and speciation, patterns in phylogenetic trees. Taxonomic hierarchy, principles of classification. Schools of taxonomy, cladistic methods. Character analysis in phylogenetic systematics. Predictive power of phylogenetic hypotheses; applications of systematics to comparative biology.

**WILD 307 Natural History of Vertebrates.** (3) (Fall) (Lectures and modules) (Restriction: Not open to students who have taken ZOOL 307) Review of higher taxonomic groups of vertebrates and prochordates, emphasizing diagnostic characters evolution and distribution.

**WILD 311 Ethology.** (3) (Winter) (2 lectures, one 3-hour lab) (Restriction: Not open to students who have taken ZOOL 311) Invertebrate and vertebrate behaviour; innate behaviour, learning, motivation, agonistic behaviour, rhythms, social organization, mating systems and communication.

**WILD 313 Phylogeny and Zoogeography.** (3) (Winter) (2 lectures, 1 conference and project) (Restriction: Not open to students who have taken ZOOL 313) Patterns of animal diversity in time and space; use of present patterns to reconstruct past events. Major milestones in animal evolution and diversification. Overview of biogeographic realms. Abiotic and biotic events affecting global distribution patterns. Hypothesis testing and analysis in historical biogeography. Applications to ecology, conservation.

**WILD 350 Mammalogy.** (3) (Winter) (2 lectures and one 3-hour lab) (Prerequisites: WILD 200 (formerly AEBI 200) and WILD 307 (formerly ZOOL 307)) This course focuses on the evolution, classification, ecology and behaviour of mammals and relations between humans and mammals. Also structure, systematics and identification of local and world mammals, as well as field methods will be emphasized.

**WILD 375 Issues: Environmental Sciences.** (3) (Winter) (3 lectures) Principles and trends in global ecology as they pertain to agricultural and natural ecosystems and the impact of environmental change on food production.

**WILD 382 Fish and Wildlife Propagation.** (3) (Fall) (2 lectures and field trips) (Enrollment limited to 20) An overview of the care and reproduction of wildlife species in captivity for commercial, scientific, conservation, and educational purposes through field trips, lectures, and class discussions.

**WILD 401 Fisheries and Wildlife Management.** (4) (Fall) (3 lectures, one 2-hour lab and one week field laboratory prior to fall term) (Prerequisite: PLNT 358) Principles of fisheries and wildlife management are considered and current practices of research and management are discussed.

**WILD 410 Wildlife Ecology.** (3) (Winter) (3 hours of lectures per week) (Prerequisite: WILD 205 (formerly AEBI 205) or permission.) Ecological processes and theories; their application to animal populations. Interrelationships among biological processes, biotic and abiotic factors, and life history strategies. Topics include population dynamics, optimization strategies, predation, habitat selection, risks and decision making, and social behaviour. Application of problem-solving approach to wildlife ecology through individual and group work.

**WILD 415 Conservation Law.** (2) (Fall) (2 lectures) A study of the various federal, provincial and municipal laws affecting wildlife habitat. Topics include: laws to protect wild birds and animals; the regulation of hunting; legal protection of trees and flowers, sanctuaries, reserves, parks; techniques of acquiring and financing desirable land, property owner rights.

**WILD 420 Ornithology.** (3) (Fall and Winter) (3 lectures and occasional field trips) (Prerequisite: WILD 307 (formerly ZOOL 307) or permission of instructor) (This course is scheduled for video-conferencing.) Taxonomic relationships and evolution of birds are outlined. Reproduction, migration and population processes of North American birds are examined.

**WILD 421 Wildlife Conservation.** (3) (Winter) (3 lectures) (Restriction: Not open to students who have taken NRSC 421) Study of current controversial issues focusing on wildlife conservation. Topics include: animal rights, exotic species, ecotourism, urban wildlife, multi-use of national parks, harvesting of wildlife, biological controls, and endangered species.

**WILD 424 Parasitology.** (3) (Winter) (2 lectures and one 3-hour lab) (Restriction: Not open to students who have taken WILD 424 (formerly ZOOL 424)) Systematics, morphology, biology and ecology of parasitic protozoa, flatworms, roundworms and arthropods with emphasis on economically and medically important species.

**WILD 475 Desert Ecology.** (3) (Winter) (Field course) (Prerequisites: PLNT 460, WILD 382 (formerly ZOOL 382), WILD 420) (Enrollment limited to 20) This course deals with adaptations to heat and drought. Representative areas of Coastal Bend, Chihuahuan and Sonoran deserts are visited over a two-week period. In the third week, emphasis is on the high desert and historical and cultural aspects of desert life observed in at the Mesa Verde cliff dwellings. A pre-trip analysis of an area to be visited and field notes are the principal bases of evaluation. Students must
bear transportation costs.

WOOD-Woodland Resources
Offered by: Natural Resource Sciences

WOOD 300 Urban Forests and Trees.
(3) (Fall) (3 lectures and one 3-hour lab) (Prerequisites: PLNT 201 and SOIL 210) The effects of environmental factors such as soil fertility, soil contamination and compaction, extremes of temperature and air pollutants on trees and forests growing in an urban environment, and means to increase their tolerance will be discussed. Emphasis in the laboratory will be on diagnosis and solving of tree problems in urban environments.

WOOD 410 The Forest Ecosystem.
(3) (Fall) (3 lectures and one 3-hour lab) (Prerequisites: PLNT 201 and SOIL 210 or permission of instructor) Interactions among biotic and abiotic components of forests, and their direct and indirect control of productivity and nutrient cycling in forest ecosystems. The laboratory involves a series of 3-hour field trips to local forests during September and October, followed by analysis of data collected.

WOOD 420 Environmental Issues: Forestry.
(3) (Winter) (3 lectures and one 2-hour tutorial) (Prerequisites: PLNT 201 and SOIL 210 or permission of instructor) The science behind current environmental issues relating to forests including the effects of management on productivity and biodiversity, conservation of old-growth forests and endangered species, pesticide use, and industrial pollution. The role of scientific knowledge, relative to social and economic forces, in forest resource decision-making is discussed.

WOOD 441 Integrated Forest Management.
(3) (Winter) (3 lectures and one 3-hour lab) (Prerequisite: WILD 205 (formerly AEBI 205) or permission of instructor) The study of silviculture and silvics and their application to forest management to sustain the production of wood and other resources such as wildlife, water and landscape in natural forests and rural environments (agroforestry). Acquisition of practical skills in forest survey and computer simulation of forest growth.
Faculty of Arts

AFRI-African Studies
Offered by: Arts - Dean's Office

AFRI 480 Special Topics.
(3) (Prerequisite: the completion of all available courses relevant to the topic, and permission of the instructor and Program Coordinator prior to registration) Supervised reading in advanced special topics in African Studies under the direction of a member of staff.

AFRI 481 Special Topics.
(3) (Prerequisite: the completion of all available courses relevant to the topic, and permission of the instructor and Program Coordinator prior to registration) Supervised reading in advanced special topics in African Studies under the direction of a member of staff.

AFRI 598 Research Seminar in African Studies.
(3) (Prerequisite: an introductory course in any of the disciplines studying Africa) (Restriction: Open to final year Program students, and to others by permission of Program Coordinator) An interdisciplinary research seminar on topics of common interest to staff and students of the African Studies Program. As part of their contribution, students will prepare a research paper under the supervision of one or more members of staff.

ANTH-Anthropology
Offered by: Anthropology

ANTH 201 Prehistoric Archaeology.
(3) (Fall) Examination of the origin of cultural behaviour and culture as an adaptive mechanism from the earliest times to the rise of the first civilizations in the Old and New Worlds. The implications of these data concerning the nature of humans and their future development will be considered.

ANTH 202 Comparative Cultures.
(3) (Fall) An introduction to cultures and societies around the world. Aspects of social life, such as generation and gender, family and kinship, economics, politics, and religion, are explored. Different ways of life, such as those centered on hunting and gathering, horticulture, pastoralism, agriculture, urbanism, and industrialism, are illustrated and compared.

ANTH 203 Human Evolution.
(3) (Winter) An examination of evolutionary theory and the fossil and archaeological record for human origins, emphasizing the interaction between physical and cultural evolution. The use of primate behaviour in reconstructing early human behaviour. The origin and meaning of human variation.

ANTH 204 Anthropology of Meaning.
(3) (Winter) Through the analysis of language, symbols and cultural constructions of meaning, this course explores how people in different societies make sense of their world, and the ways in which they organise that knowledge, and how ideologies represent the different interests present in a society.

ANTH 206 Environment and Culture.
(3) (Fall) Introduction to ecological anthropology, focusing on social and cultural adaptations to different environments, human impact on the environment, cultural constructions of the environment, management of common resources, and conflict over the use of resources.

ANTH 207 Ethnography Through Film.
(3) This course will investigate and discuss cultural systems, patterns, and differences, and the ways in which they are observed, visually represented, and communicated by anthropologists using film and video. The visual representation of cultures will be critically evaluated by asking questions about perspective, authenticity, ethnographic authority and ethics.

ANTH 208 Evolutionary Anthropology.
(3) (Winter) The basic elements and mechanisms of evolutionary theory; the place of evolutionary theory in anthropology, including social anthropology, archaeology, physical anthropology and anthropological linguistics. Emphasis on the debates in each sub-discipline in which evolutionary theory has played an important role.

ANTH 209 Anthropology of Religion.
(3) (Fall) Nature and function of religion in culture. Systems of belief, the interpretation of ritual. Religion and symbolism. The relationship of religion to social organization. Religious change and social movements.

ANTH 212 Anthropology of Development.
(3) (Winter) Processes of developmental change, as they affect small communities in the Third World and in unindustrialized parts of developed countries. Problems of technological change, political integration, population growth, industrialization, urban growth, social services, infrastructure and economic dependency.

ANTH 222 Legal Anthropology.
(3) (Winter) Exploration of dispute resolutions and means of social cohesion in various societies of the world. Themes: dichotomy between law and custom, local definitions of justice and rights, forms of conflict resolution, access to justice, gender and law, universality of human rights, legal pluralism.

ANTH 227 Medical Anthropology.
(3) (Fall) Beliefs and practices concerning sickness and healing are examined in a variety of Western and non-Western settings. Special attention is given to cultural constructions of the body and to theories of disease causation and healing efficacy. Topics include international health, medical pluralism, transcultural psychiatry, and demography.

ANTH 301 Nomadic Pastoralists.
(3) (Winter) (Prerequisite: ANTH 202, or ANTH 205, or ANTH 212) Variations in herding systems over a wide range of habitats and involving a variety of species of domestic livestock. Comparative perspectives on the prehistory of pastoral systems, on the ideologies, cultures, and social and economic systems of nomadic pastoralists. Relations with non-pastoralists and the effects of change and development will also be examined.

ANTH 302 New Horizons in Medical Anthropology.
(3) (Winter) (Prerequisite: ANTH 227) (Restriction: Anthropology program students.) Using recent ethnographies as textual material, this course will cover theoretical and methodological developments in medical anthropology since the early 1990's. Topics include a reconsideration of the relationship between culture and biology, medical pluralism revisited, globalization and health and disease, and social implications of new biomedical technologies.

ANTH 303 Ethnographies of Post-socialism.
(3) (Fall) (Prerequisites: ANTH 202 and one other 200-level anthropology course, U2 standing or above, or permission of instructor.) Understanding postsocialism through engagement with ethnography that explores how markets interact with political rule, social forms, and the production of cultural values across different geographies and histories. This course focuses primarily on the former Soviet Union, East Germany, and China.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
专业技术课程涉及特定的特殊情况
† Indicates that departmental approval/permission must be obtained by a student prior to registration.
‡ Denotes courses taught only in alternate years.
§ Denotes courses offered by the Faculty of Education which, if appropriate to the student's program, may be included in the academic concentration.
¶ Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
ANTH 305 Arctic Prehistory.  
(3) (Prerequisite: ANTH 201.) (Restriction: Not open to students who have taken ANTH 319.) Comparative study of prehistoric Arctic hunter-gatherer cultures in Northern Canada, Alaska, Greenland, and eastern Siberia. Emphasis will be placed on interpretation of cultural continuity and change in the context of contemporary hunter-gatherer theory.

ANTH 306 Native Peoples’ History in Canada.  
(3) (Prerequisites: HIST 202 or HIST 203 or ANTH 202 or ANTH 205 or ANTH 206, or permission of instructor) A survey of the Canadian policies that impinged on native societies from the fur trade to W.W. II, and the native peoples’ responses, looking at their involvement in the fur trade, the emergence of the Métis, types of resistance, economic diversification, development of associations, and cultural distinctiveness.

ANTH 308 Political Anthropology.  
(3) (Prerequisite: ANTH 202, or ANTH 205, or ANTH 206, or ANTH 212, or permission of instructor) The study of political systems and political processes. Conflict and its resolution. The emphasis of the course will be on local-level politics and non-industrial societies.

ANTH 309 Prehistory of Northern Europe.  
(3) (Fall) (Prerequisite: ANTH 201.) Survey of the prehistory of northern Europe from the end of the last glaciation to the early iron age.

ANTH 311 Primate Behaviour and Ecology.  
(3) (Fall) (Prerequisite: Any 200 level course in a social or biological science.) Critical evaluation of theories concerning primate behaviour with emphasis on the importance of ecological factors in framing behaviour, including mating behaviour, parental care, social structures, communication, as well as various forms of social interaction such as dominance, territoriality and aggressive expression.

ANTH 312 Zooarchaeology.  
(3) (Winter) (Prerequisites: ANTH 201 and Honours/Major status in Anthropology) A systematic investigation into current methodological and theoretical concerns in zooarchaeological analysis. Topics to be examined include sampling and quantification, butchery, seasonality, subsistence, taphonomy, and paleoecology.

ANTH 313 Early Civilizations.  
(3) (Winter) (Prerequisite: ANTH 201 or ANTH 202) Comparison of similarities and differences in the economic, social, political institutions and the religious beliefs and values of the ancient Egyptians, Sumerians, Shang Chinese, Aztecs, Classic Mayas, Inkas, and precolonial Yorubas. Extent to which cross-cultural regularities and historically-specific factors have shaped their development.

ANTH 314 Psychological Anthropology.  
(3) (Winter) (Prerequisite: ANTH 204 or permission of instructor) (Restriction: Not open to students who have taken ANTH 214) A survey of current theories and methods employed in psychological anthropology. Some areas considered are: cross-cultural studies of socialization and personality development; cultural factors in mental illness; individual adaptations to rapid socio-cultural change.

ANTH 315 Society/Culture: East Africa.  
(3) (Winter) (Restriction: Open only to students in the Study in Africa program, a full-term field study program in East Africa) Overview of the history, languages and cultures of the region. Examination of the social institutions, cultural patterns, subsistence practices and environmental settings of major social groups, including hunter-gatherers, clients, pastoralists, agro-pastoralists, and cultivators. Discussion of current theoretical and ethnological issues in the study of culture and social change.

ANTH 319 Inka Archaeology & Ethnohistory.  
(3) (Winter) (Prerequisite: ANTH 201 or ANTH 202 or HISP 225 or permission of instructor) In-depth study of material and symbolic manifestations of power and identity in the Pre-Columbian Inka state, drawing on both archaeological and ethnohistoric sources.

ANTH 320 Social Evolution.  
(3) (Fall) (Prerequisites: ANTH 202, or ANTH 205, or ANTH 206, or ANTH 208, and Honours/Major status in Anthropology, or permission of instructor) The evolution of human social organization, with a focus on pre-industrial societies (hunter-gatherers, small-scale sedentary societies, complex chiefdoms and small state societies).

ANTH 322 Social Change in Modern Africa.  
(3) (Winter) (Prerequisite: ANTH 202, or ANTH 204, or ANTH 205, or ANTH 206, or ANTH 209, or ANTH 212, or ANTH 227 or permission of instructor) The impact of colonialism on African societies; changing families, religions, arts; political and economic transformation; migration, urbanization, new social categories; social stratification; the social setting of independence and neo-colonialism; continuity, stagnation, and progressive change.

ANTH 327 Peoples of South Asia.  
(3) (Fall) (Prerequisite: ANTH 202, or ANTH 205, or ANTH 206, or ANTH 212, or permission of instructor) An exploration of the dominant social institutions, cultural themes and perspectives, and psychological patterns found in India and greater South Asia.

ANTH 329 Modern Chinese Society and Change.  
(3) (Fall) (Prerequisites: ANTH 202, or ANTH 205, or ANTH 206, or ANTH 212, or East Asian Studies Honours/Major, or permission of instructor) A study of 20th Century Chinese economic, social and cultural institutions, their transformations and continuities. Topics include village economic development and social change; gender, family and kinship organization, regional differences and minority groups; urban-industrial change; and the effects of revolution and reform.

ANTH 331 Prehistory of East Asia.  
(3) (Fall) (Prerequisite: ANTH 201 or permission of instructor) Comparative study of prehistoric hunting and gathering cultures in China, Japan, Korea, Mongolia and Eastern Siberia; origins and dispersal of food production; cultural processes leading to the rise of literate civilizations in certain regions of East Asia.

ANTH 333 Class and Ethnicity.  
(3) (Prerequisite: ANTH 202, or ANTH 205, or ANTH 206, or ANTH 212, or permission of instructor) Social, economic, political, symbolic and ideological aspects of ethnicity. Development of ethnic groups. Interplay between social class and ethnicity.

ANTH 335 Ancient Egyptian Civilization.  
(3) (Winter) (Prerequisite: ANTH 201, or ANTH 202, or permission of instructor) A study of changing ecological, economic, social, political, and religious factors influencing the development of ancient Egyptian civilization from prehistoric times to the early Christian era. The unique characteristics of Egyptian civilization are compared to the structural features common to all early civilizations.

ANTH 337 Mediterranean Society and Culture.  
(3) (Fall) (Prerequisite: ANTH 202, or ANTH 204, or ANTH 205, or ANTH 206, or ANTH 209, or ANTH 212, or ANTH 227) (Restriction: U2 or U3 standing only) An exploration of Mediterranean ethnography, with special attention to southern Europe. Cultural patterns, such as “honour and shame”, social patterns such as “patron/client relations”, and current issues, such as “development”, shall be explored.

ANTH 338 Native Peoples of North America.  
(3) (Winter) (Prerequisite: ANTH 202, or ANTH 204, or ANTH 205, or ANTH 206, or ANTH 209, or ANTH 212, or GEOG 336, or permission of instructor) Ethnographic survey of Native cultures in North America. Conditions arising from European colonization and their social, economic and political impact. Contemporary situation of Indigenous peoples.

ANTH 339 Ecological Anthropology.  
(3) (Winter) (Prerequisite: ANTH 204, or ANTH 206, or SOCI 328, or GEOG 300 or permission of instructor) Intensive study of theories and cases in ecological anthropology. Theories are examined and tested through comparative case-study analysis. Cultural constructions of "nature" and "environment" are compared and analyzed. Systems of...
resource management and conflicts over the use of resources are studied in depth.

ANTH 340 Middle Eastern Society and Culture.
(3) (Fall) (Prerequisite: U2 or U3 standing; and ANTH 202, or ANTH 204, or ANTH 205, or ANTH 206, or ANTH 209, or ANTH 212, or ANTH 227, or permission of instructor.) Exploration of daily life, culture and society in the Middle East, through examination of ethnographic accounts.

ANTH 341 Women in Cross-cultural Perspective.
(3) (Fall) (Prerequisites: ANTH 202 or ANTH 205, or ANTH 206, or ANTH 342, or Women's Studies Minor, or permission of instructor) The comparative study of women in foraging and horticultural societies. A wide range of anthropological studies are examined along with theoretical models regarding changes in women's position. The impact of colonialism, women and social change, and problems of women in developing society are examined.

ANTH 342 Gender, Inequality and the State.
(3) (Winter) (Prerequisite: ANTH 202, or ANTH 205, or ANTH 206, or ANTH 341, or Women's Studies Minor, or permission of instructor) Comparative studies of gender in stratified societies: Asia, the Mid-East, Latin and North America. Economic, political and social manifestations of gender inequality. Oppressive and egalitarian ideologies. State and institutional policies on gender, and male-female strategies. Sexual apartheid and integration.

ANTH 344 Quantitative Approaches to Anthropology.
(3) (Fall) (Prerequisite: ANTH 201 or ANTH 202 or ANTH 205 or permission of instructor.) (Restriction: Limited to students in Anthropology programs.) A non-statistics course designed to understand and critically evaluate quantitatively based arguments encountered in the literature of all branches of Anthropology.

ANTH 345 Prehistory of Africa.
(3) (Winter) (Restriction: Open only to students in the Study of Africa program, a full-term study program in East Africa.) This course will investigate the archaeological evidence for the evolution of culture in Africa from the beginning of the Paleolithic through the Iron Age. The emphasis will be upon changes in economic, social and political organization as reflected in selected archaeological sites.

ANTH 346 Early Prehistory: New World.
(3) (Winter) (Prerequisite: ANTH 201 or ANTH 202, or ANTH 205, or permission of instructor) Consideration of major issues regarding the initial arrival(s) of human groups in the New World, and their subsequent adaptation to the changing environmental conditions at the end of the Ice Age.

ANTH 352 History of Anthropological Theory.
(3) (Fall) (Prerequisites: one 200-level anthropology course and one other anthropology course at any level) (Restriction: Honours, Joint Honours, Major and Minor students in Anthropology, U2 standing or above) Exploration in the history of anthropological theory; schools, controversies, intellectual history, sociology of knowledge.

ANTH 355 Theories of Culture and Society.
(3) (Winter) (Prerequisites: one 200-level anthropology course and one other anthropology course at any level) (Restriction: Honours, Joint Honours and Major students in Anthropology, U2 standing or above) Exploration of daily life, culture and society in the Middle East, through examination of ethnographic accounts.

ANTH 357 Archaeological Methods.
(3) (Winter) (Prerequisite: ANTH 201 and one other course in archaeology) (Restriction: Honours, Joint Honours and Major students in Anthropology, U2 standing or above) The collection of materials in field investigations and their analysis to yield cultural information. The processes of inference and reconstruction in archaeological interpretation.

ANTH 358 The Process of Anthropological Research.
(3) (Fall) (Prerequisites: one 200-level anthropology course and one other anthropology course at any level) (Restriction: Honours, Joint Honours, Major and Minor students in Anthropology, U2 standing or above) The nature of anthropological research as evidenced in monographs and articles; processes of concept formation and interpretation of data; the problem of objectivity.

ANTH 359 History of Archaeological Theory.
(3) (Winter) (Prerequisite: ANTH 201 or ANTH 203, and one additional course in archaeology, or permission of instructor) A systematic investigation of the theories that have guided the interpretation of prehistoric archaeological data since the Middle Ages; the relationship between these theories and theoretical developments in the other social sciences.

ANTH 380 Special Topic 1.
(3) (Fall) (Prerequisite: Permission of instructor) Supervised reading in special topics under the direction of a member of the staff.

ANTH 381 Special Topic 2.
(3) (Winter) (Prerequisite: Permission of instructor) Supervised reading in special topics under the direction of a member of the staff.

ANTH 382 Special Topic 3.
(3) (Fall) (Prerequisite: Permission of instructor) Supervised reading in special topics under the direction of a member of the staff.

ANTH 383 Special Topic 4.
(3) (Winter) (Prerequisite: Permission of instructor) Supervised reading in special topics under the direction of a member of the staff.

ANTH 402 Topics in Ethnography 1.
(3) (Fall) (Restriction: U3 students in Anthropology or permission of instructor) An exploration of selected ethnographic case material. Investigation of a regional literature or survey of significant contributions to ethnography or examination of an ethnological issue.

ANTH 403 Current Issues in Archaeology.
(3) (Winter) (Prerequisite: ANTH 357 or preferably ANTH 359, or permission of instructor) Current issues in archaeological interpretation, in particular, those relating to processual and postprocessual archaeology.

ANTH 405 Topics in Ethnography 2.
(3) (Fall) (Prerequisite: One 300-Level Anthropology course) (Restriction: U3 students in Anthropology or permission of instructor) An exploration of selected ethnographic case material. Investigation of a regional literature, or survey of significant recent contributions to ethnography, or examination of a current ethnological issue.

ANTH 407 Anthropology of the Body.
(3) (Winter) (Prerequisite: ANTH 227 and Honours/Major/Minor status in Anthropology or permission of instructor) This course will survey theoretical approaches used over the past 100 years, and then focus on contemporary debates using case studies. The nature/culture mind/body, subject/object, self/other dichotomies central to most work of the body will be problematized.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.

Denotes courses taught only in alternate years.

Denotes courses not available as Education electives.

Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

2007-2008 Undergraduate Programs Calendar, McGill University  C-27
ANTH 411 Primate Studies & Conservation.
(3) (Winter) (Prerequisite: One course in Anthropology, Geography or Environmental Studies, Introductory Biology, or permission of the instructor.) A concentration of selected advanced special topics under direction of a member of staff. Critical evaluation of theories in primate behaviour, ecology, and conservation that emphasizes direct observations, research design, and developing field methods.

● ANTH 412 Topics: Anthropological Theory.
(3) (Winter) (Restriction: U3 students in Anthropology and ANTH 355 or permission of instructor) A concentrated examination of selected theoretical literature. A current theoretical issue will be examined, or the work of a major anthropological theorist or school will be explored and assessed.

ANTH 413 Gender in Archaeology.
(3) (Fall) (Prerequisite: ANTH 201 or ANTH 331 or ANTH 345 or ANTH 347 or ANTH 348 or permission of instructor) Relationship between the structure of the archaeological record and society. Construction of gender roles in past human societies; division of tasks between men and women in subsistence activities, organization of the household and kin groups; and creation of power and prestige in a larger community.

ANTH 416 Environment/Development: Africa.
(3) (Winter) (Restriction: Open only to students in the Study in Africa program, a full-term field study program in East Africa) (Prerequisite: One prior course in Anthropology, Geography or Environmental Studies) Study of environmental effects of development in East Africa, especially due to changes in traditional land tenure and resource use across diverse ecosystems. Models, policies and cases of pastoralist, agricultural, fishing, wildlife and tourist development will be examined, across savanna, desert, forest, highland and coastal environments.

● ANTH 418 Environment and Development.
(3) (Fall) (Prerequisite: ANTH 339, or ANTH 349, or SOCI 328, or GEOG 300, or GEOG 302, or permission of instructor) Advanced study of the environmental crisis in developing and advanced industrial nations, with emphasis on the social and cultural dimensions of natural resource management and environmental change. Each year the seminar will focus on a particular set of issues, delineated by type of resource, geographic region, or analytical problem.

ANTH 419 Archaeology of Hunter-Gatherers.
(3) (Winter) (Prerequisite: ANTH 357 or permission of instructor) A systematic investigation into current theoretical and methodological concerns in hunter-gatherer archaeology. Examples will be drawn from around the world.

● ANTH 420 Lithic Technology and Analysis.
(3) (Winter) A survey of current literature on the analysis of stone tools and laboratory sessions illustrating how they were produced and used. Topics to be covered include: fracture mechanics; manufacturing techniques; typological systems; experimental replication; identification of tool functions through microscopic analysis of use-wear.

● ANTH 422 Contemporary Latin American Culture & Society.
(3) (Fall) (Prerequisites: ANTH 355, or ANTH 352, or HISP 226, or permission of the instructor.) (Restriction: U3 students.) Themes central to the culture and society of contemporary Latin America and the Caribbean, including globalization, questions of race and ethnicity, (post)modernity, social movements, constructions of gender and sexuality, and national and diasporic identities.

● ANTH 430 Symbolic Anthropology.
(3) (Fall) (Prerequisite: ANTH 204, or ANTH 355, or permission of instructor) Advanced topics in the use of symbolic theory within anthropology, including culturology and structuralism; the use of semiotic models of society, the relation of structure to process, culture to praxis, and ideology to society; the relevance of epistemology, phenomenology and linguistic philosophy for the study of socio-cultural phenomena.

● ANTH 431 Problems in East Asian Archaeology.
(3) (Prerequisite: ANTH 331 or permission of instructor) Critical examination of major issues in East Asian archaeology. Focus may change from year to year. Possible topics include: origins and evolution of Asian population; processes of plant domestication; development of complex societies based on hunting-gathering-fishing; and rise of civilizations and state formation in China, Japan, and Korea.

ANTH 436 North American Native Peoples.
(3) (Winter) (Prerequisite: ANTH 338, or ANTH 336, or permission of instructor) A detailed examination of selected contemporary problems.

ANTH 438 Topics in Medical Anthropology.
(3) (Fall) (Prerequisite: ANTH 227 or permission of instructor) Conceptions of health and illness and the form and meaning that illness take are reflections of a particular social and cultural context. Examination of the metaphorical use of the body, comparative approaches to healing, and the relationship of healing systems to the political and economic order and to development.

ANTH 440 Cognitive Anthropology.
(3) (Fall) (Prerequisite, two of the following: ANTH 204, ANTH 314, ANTH 352, ANTH 355, or ANTH 430, or permission of instructor.) The problem of knowledge; the nature of perception; the concept of mind; the relation between thought and language. The concept of meaning: communication, interpretation and symbolism. Social aspects of cognition; ideology.

ANTH 443 Medical Anthropological Theory.
(3) (Winter) (Prerequisites: ANTH 227 and Honours/Major status in Anthropology or permission of instructor.) This course is intended to provide a comprehensive survey of the literature that constitutes the theoretical and conceptual core of medical anthropology. Emphasis is given to (1) the ethnographic sources of these ideas, (2) their epistemology, and (3) their methodological implications.

ANTH 461 Research Techniques.
(3) (Winter) (Prerequisite: U3 student only) Field techniques, interviewing, participant observation, projective, and other testing techniques such as genealogies and life histories, problems of field work, rapport, contact, role definition, culture shock, etc.

ANTH 480 Special Topic 5.
(3) (Fall) (Prerequisite: Completion of all available courses relevant to the topic and consent of the instructor) Supervised reading in advanced special topics under direction of a member of staff.

ANTH 481 Special Topic 6.
(3) (Winter) (Prerequisite: Completion of all available courses relevant to the topic and consent of the instructor) Supervised reading in advanced special topics under direction of a member of staff.

ANTH 482 Special Topic 7.
(3) (Fall) (Prerequisite: Completion of all available courses relevant to the topic and consent of the instructor) Supervised reading in advanced special topics under direction of a member of staff.

ANTH 483 Special Topic 8.
(3) (Winter) (Prerequisite: Completion of all available courses relevant to the topic and consent of the instructor) Supervised reading in advanced special topics under direction of a member of staff.

ANTH 484 Special Topic 9.
(3) (Fall) (Prerequisite: Completion of all available courses relevant to the topic and consent of the instructor) Supervised reading in advanced special topics under direction of a member of staff.

ANTH 485 Special Topic 10.
(3) (Winter) (Prerequisite: Completion of all available courses relevant to the topic and consent of the instructor) Supervised reading in advanced special topics under direction of a member of staff.
ANTH 490 Honours Thesis 1.  
(6) (Fall) (Prerequisites: U3 Honours status and permission of instructor) Supervised reading and preparation of a research report under the direction of a member of staff.

ANTH 491 Honours Thesis 2.  
(6) (Winter) (Prerequisites: U3 Honours status and permission of instructor) Supervised reading and preparation of a research report under the direction of a member of staff.

● ANTH 492 Honours Thesis.  
(6) (Prerequisites: U3 Honours status and permission of instructor) Supervised reading and preparation of a research report under the direction of a member of staff.

ANTH 492D1 (3), ANTH 492D2 (3) Honours Thesis.  
(Fall) (Students must register for both ANTH 492D1 and ANTH 492D2.) No credit will be given for this course unless both ANTH 492D1 and ANTH 492D2 are successfully completed in consecutive terms (ANTH 492D1 and ANTH 492D2 together are equivalent to ANTH 492) Supervised reading and preparation of a research report under the direction of a member of staff.

ANTH 492N1 (3), ANTH 492N2 (3) Honours Thesis.  
(Winter) (Students must also register for ANTH 492N2) (No credit will be given for this course unless both ANTH 492N1 and ANTH 492N2 are successfully completed in a twelve month period) (ANTH 492N1 and ANTH 492N2 together are equivalent to ANTH 492) Supervised reading and preparation of a research report under the direction of a member of staff.

ANTH 499 Internship: Anthropology.  
(3) (Fall and Winter) (Prerequisite: Permission of the departmental Internship Advisor.) (Restriction: Open to U2 and U3 students normally after completing 30 credits of a 90 credit degree program or 45 credits of a 120 credit program, a minimum CGPA of 2.7, and permission of the departmental Internship Advisor. This course will normally not fulfill program requirements for seminar or 400- level courses.) Internship with an approved host institution or organization.

● ANTH 500 Chinese Diversity and Diaspora.  
(6) (Prerequisites: ANTH 357 or ANTH 359.) (Restriction: Restricted to U3 Anthropology undergraduate students or graduate students, any other students by permission of instructor.) Enrolment Limit: 25 students.) Explores ethnic diversity within mainland China, as well as the diversity of Chinese cultures of diaspora, living outside the mainland, often as minorities subject to other dominant cultures.

ANTH 511 Computational Approaches to Prehistory.  
(3) (Winter) (Prerequisites: ANTH 357 or ANTH 359.) (Restriction: Restricted to U3 and graduate students in the Anthropology Department.) Covers the application of computational methods to archaeological problems and the modeling and simulation of prehistoric populations.

● ANTH 512 Political Ecology.  
(3) (Prerequisite: U3 Standing or above and permission of instructor.) Historical, theoretical and methodological development of political ecology as a field of inquiry on the interactions between society and environment, in the context of conflicts over natural resources.

ANTH 540 Topics in Anthropological Theory.  
(3) (Winter) (Restriction: Honours status at the U3 level in Anthropology Department with permission of instructor) Examination and discussion of topics of current theoretical or methodological interest in anthropology. Topics will be announced at the beginning of term.

ANTH 555 Advanced Topics in Ethnology.  
(3) (Winter) (Restriction: Honours students at the U3 level in the Anthropology Department with permission of instructor) Examination and discussion of topics of current theoretical or methodological interest in ethnology. Topics will be announced at the beginning of term.

● ANTH 575 Concepts of Race.  
(3) (Prerequisites: ANTH 201, or ANTH 202, or ANTH 203, and ANTH 352 or ANTH 359.) (Restriction: U3 students and graduate students in Anthropology programs.) Examination of the evolution of the idea of race within anthropology, and the impact which the discipline’s debates have had on society.

ARLE-Arts Legacy
Offered by: Arts - Dean's Office

ARLE 101 Ancient Worlds.  
(6) (Corequisite: ARLE 102.) (Restriction: Freshmen with U0 status.) Study of the ancient worlds, emphasizing social, political, intellectual, scientific and aesthetic innovations in ancient Greek, Roman and Chinese civilizations. Key texts are examined through lectures, seminars and tutorials, complemented by a performance module in literary, artistic, musical and architectural creativity.

ARLE 102 Medieval Mediterranean Worlds.  
(6) (Corequisite: ARLE 101.) (Restriction: Freshmen with U0 status. Freshmen who have passed ARLE 101.) Study of the distinct yet interacting Christian, Judaic and Islamic cultures of the “Middle” Ages. Emphasis on social, political, intellectual, scientific and aesthetic innovations in the worlds surrounding the Mediterranean Sea. Key texts are examined, complemented by a performance module in literary, artistic, musical and architectural creativity.

ARLE 103 Early Modern Atlantic Worlds.  
(6) (Corequisites: ARLE 101, ARLE 102.) (Corequisite: ARLE 104.) (Restriction: Freshmen with U0 status. Students who have passed ARLE 101 & ARLE 102.) Study of social, political, intellectual, scientific and aesthetic innovations, examining the transatlantic worlds of Early modern Europe and the Americas. Key texts are examined through lectures, seminars and tutorials, complemented by a performance module in literary, artistic, musical and architectural creativity.

ARLE 104 Global Modern Worlds.  
(6) (Prerequisites: ARLE 102, ARLE 102.) (Corequisite: ARLE 103.) (Restriction: Freshmen with U0 status. Freshmen who have passed ARLE 101, ARLE 102 & ARLE 103.) Study of the emergence and multiple forms of modernity, emphasizing social, political, intellectual, scientific and aesthetic innovations in Europe and North America, and the developing world of Africa, Asia and America. Key texts are examined, complemented by a performance module in literary, artistic, musical and architectural creativity.

ARTH-Art History
Offered by: Art History & Communication St

● ARTH 201 Introduction to Art History 2.  
(3) (Restriction: Not open to students in Art History programs; or students who have taken ARTH 200 prior to Fall 1991.) An introductory survey of the major figures, monuments and movements in Western painting, sculpture and architecture from the 15th century to the present. The underlying goal of course is to develop the student’s awareness of the relation of form to content in a work of art.
• ARTH 204 Introduction to Medieval Art and Architecture.
  (3) Surveys the arts from late Antiquity to the fourteenth century in Western Europe. Focuses on the body and space to introduce artistic and architectural concepts, practices, and styles from the late Roman, Byzantine and Carolingian empires to monastic and royal patronage of the French Kings.
• ARTH 205 Introduction to Modern Art.
  (3) (Restriction: Not open to students who have taken ARTH 337 or ARTH 338) The course is an introduction to the modern period in art history which begins around 1750. It examines the development in both painting and sculpture and relates to changes in the social and political climate of the times.
• ARTH 207 Early Modern Art (1400-1700).
  (3) Survey of the visual culture of early modern Europe (1400-1700), including selected works in their historical context and explore the uses of visual forms in the formation of identities across various social spheres and geographical locations.
• ARTH 209 Introduction to Ancient Art and Architecture.
  (3) Survey of ancient art and architecture: pre-historic Europe, ancient Egypt, Greece and Rome. Focus is on issues of political power, gender, sexuality, race, the formation of individual and group identities, and the relation between the body and social space.
• ARTH 215 Introduction to Chinese Art.
  (3) (Restriction: Not open to students taking or who have taken EAST 215.) Introductory survey of some of the major developments in Chinese art from the Bronze Age to the modern period. Emphasis will be placed on the diversity of artistic traditions in China.
• ARTH 223 Introduction to Italian Renaissance Art.
  (3) Surveys artistic production in Italy from the new urban institutions of the communes to the demise of the Florentine republic (c. 1250-1512). Introduces art historical concepts through an exploration of the uses if visual imagery to forge civic, religious, political, and social identities.
• ARTH 300 Canadian Art to 1914.
  (3) Canadian art from the pre-contact period through the colonial and nation-building centuries until the onset of the First World War. Emphasis will be placed on the diverse cultural influences that have been brought into contact in Canada.
• ARTH 301 Canadian Art 1914 - Present.
  (3) (Restriction: Not open to students who have taken 123-225) Canadian art from early 20th century formulations of national identity through the regional, national, and international movements that define Canadian Modernism, Postmodernism, to new trends emerging in the 21st century.
• ARTH 302 Aspects of Canadian Art.
  (3) An examination of selected subjects relevant to a specific period of art in Canada.
• ARTH 305 Methods in Art History.
  (3) (Prerequisite: Any 200-level Art History course, or by permission of the instructor.) (Restriction: Not open to students who have taken ARTH 203.) An introduction to the main methodologies used in the analysis of the work of art: formalism, iconography/iconology, sémiotics, structuralism, post-structuralism, deconstruction, psychoanalysis, Marxism, feminism and postcolonialism.
• ARTH 310 Postcolonialism.
  (3) Examines selected art historians who respond to postcolonial theorists and analyse how paintings, sculpture, buildings, and visual culture participated in or resisted European imperialism in the nineteenth and twentieth centuries.
• ARTH 314 The Medieval City.
  (3) Towns and cities in the Middle Ages as architectural entities, their urban planning and development; main building types, profane and ecclesiastical; castle, defence works, town halls, houses, cathedrals, churches and monasteries; the role architecture played in forming a society.
• ARTH 320 Seventeenth Century Art of Court and Church.
  (3) (Restriction: Not open to students who have taken 123-334D) Seventeenth century Italian, Spanish, French, Flemish and British art in connection with aristocratic and courtly interests, monarchical power and the aims of the post-Reformation church.
• ARTH 321 Visual Culture of the Dutch Republic.
  (3) (Restriction: Not open to students who have taken 123-334D) Examination of the functions of visual culture in merchant capitalist society, and the changing status of art, artists and patrons after the Protestant reformation. A wide range of visual imagery (from Rembrandt and Vermeer to popular culture) will be linked with 17th-century economic, historic, religious, colonial, scientific and literary developments.
• ARTH 323 Realism and Impressionism.
  (3) The course is an investigation into Realism and Impressionism, the principal artistic movements between ca. 1840 - 1880.
• ARTH 324 High Renaissance Art in Italy.
  (3) (Restriction: Not open to students who have taken 123-224) The work of the masters of the Italian High Renaissance will be treated in depth. Emphasis will also be placed on the intricate relationship of the art of the period to contemporary religious and intellectual issues and political controversies.
• ARTH 325 Visual Culture Renaissance Venice.
  (3) (Prerequisite: one 200-level Art History course recommended, or by permission of the instructor.) Distinctive visual culture in the context of Venice's singular topography and reputation for licentiousness and toleration.
• ARTH 326 Print Culture and the City.
  (3) (Prerequisite: one 200-level Art History course or by permission of the instructor.) Positing a dynamic relationship between print culture and social experience, the course focuses on new forms and uses for printed imagery in the context of urban life before the electronic age.
• ARTH 332 Italian Renaissance Architecture.
  (3) The Italian architecture of the 15th and 16th centuries witnessed a revival of architectural forms from Roman antiquity. According to their different social as well as political status, the centres of Italy - Florence, Rome, Venice, Mantua etc. - developed individual approaches in dealing with the reception of classical forms which was to influence the architecture of Europe.
• ARTH 333 Italian Baroque Architecture.
  (3) (Restriction: Not open to students who have taken 123-333D) Italian architecture in the 17th and 18th centuries. While the development of ecclesiastical architecture will form the main focus of this course, palace building and urban planning will also receive their due attention. One additional aspect will be the reception of Italian Baroque Architecture in Central and Western Europe. Architectural design is studied in the context of contemporary painting, sculpture and theories of art.
• ARTH 334 Eighteenth Century European Art.
  (3) A study of European painting and sculpture within the climate of social, economic, philosophical and political change in 18th-century Europe. The focus is on France, Italy, Germany and England from the last days of the Baroque to the Age of Revolution.
• ARTH 335 Art in the Age of Revolution.
  (3) The course deals primarily with European painting from the late 18th to the middle of the 19th century. Emphasis is placed on the relation of art to the political, social and intellectual transformations of the time. Major figures, such as David, Goya, Canova, Friedrich and Delacroix are considered.
• ARTH 336 Art Now.
  (3) (Prerequisite: One 200-level Art History course or by permission of the instructor.) Manga Recent art practices from the 1980's to the present - installation art, new media arts (video, digital and internet art), recent developments in performance, photography, and painting. Introduces students to the key fields of research of current art: postmodernism, representation, visuality, identity, embodiment, sexuality, memory, (bio)technology, intermedia, and globalization.
• ARTH 337 Modern Painting and Sculpture, Post-Impress to WWI.
  (3) (Restriction: Not open to students who have taken 123-337D) The beginnings of modern art in Europe. Major figures and movements from Cézanne to Picasso are considered.
ARTh 338 Modern Art and Theory: WWI - WWII.
(3) (Prerequisite: one 200-level Art History course recommended, or by permission of the instructor.) (Restriction: Not open to students who have taken 123-337D) An examination of the historical avant-garde (dada, soviet constructionism, and surrealism), Duchamp, and abstraction up to Abstract Expressionism. Examines how post-WWI art practices negotiate the intertwining of aesthetics and revolution, art and mass culture, modernism and modernity, imagined and material space, gender and sexuality, horizontality and verticality.

● ARTh 339 Critical Issues - Contemporary Art.
(3) (Prerequisite: one 200-level Art History course recommended, or by permission of the instructor.) A critical examination of contemporary art from Abstract Expressionism to Pop art, Minimalism, Conceptual art, Land art, and Body art. Focuses on the development and critique of modernism, the dematerialization or art, the blurring of art and popular culture, the artist as shaman, temporality, and aesthetic redefinitions of subjectivity.

● ARTh 340 The Gothic Cathedral.
(3) (Prerequisite: reading knowledge of French.) An introduction to the Gothic cathedral: architecture, sculpture, and stained glass. Also considered is its genesis, its construction and its historical environment. Although main emphasis will be on French cathedrals of the 12th and 13th centuries, their development in England, Germany and Spain will also be represented.

● ARTh 347 19th Century Architecture.
(3) The historicism of the 19th century in Europe and North America gives with its reception of several different styles - medieval as well as classical - an important insight into the meaning of architectural form, the creation of an architectural language and its use in a politically and economically rapidly changing society.

● ARTh 352 Feminism in Art and Art History.
(3) A consideration of the impact of feminism on recent art history, focusing on the examination of gender constructions in art and theory.

ARTh 353 Selected Topics in Art History 1.
(3) (Fall) RACE-ing Sexuality Study of a special field in the History of Art and Architecture taught by a visiting scholar.

ARTh 354 Selected Topics Art History 2.
(3) (Fall) Fall: Aspects of the 19th Century Art Winter: Visual Culture and Crime Study of a special field in the History of Art and Communications.

ARTh 356 Modern & Contemporary Chinese Art.
(3) (Restrictions: Not open to students taking or who have taken EAST 356) Examination of modern Chinese art and visual culture from the 1920's to the present. Emphasis will be placed on the formation of the artistic avant-garde in the 20th century and its relation to socialist and post-socialist mass culture.

● ARTh 360 Photography and Art.
(3) The course provides an introduction to the history of photography while considering its relation to major movements in the history of painting from the time of the invention of photography, in 1839, to the present day.

● ARTh 365 Studies in Later Medieval Art.
(3)

● ARTh 367 Italian Renaissance Art 2.
(3) (Summer) (This course will be given in Florence, Italy, as part of McGill's Summer Study in Italy Program. For specific details about the course content, please consult Prof. B. Wilson, Dept. of Art History and Communication.) Urban growth, new religious and political institutions, powerful families, factionalism and civic identity provided new patrons and uses for artworks between 1300-1600. This course compares the function of visual imagery and artistic practices in Florence with developments in other centres in Italy during study abroad. Taught in Florence.

● ARTh 379 Studies: Modern Art and Theoretical Problems.
(3)

ARTh 400 Selected Methods in Art History.
(3) (Prerequisites: ARTH 208, ARTH 305,) (Required for Honours students, students must have completed ARTH 208 and ARTH 305 before taking ARTH 400, or with special permission of the department.) (Restriction: Not open to students who have taken ARTH 500) A seminar course dealing with methodological issues in Art History.

ARTh 401 Honours Research Paper.
(3) (Prerequisite: At least 6 credits in Art History at the 300 level.) (Corequisite: ARTH 400) (Restrictions: For Honours and Joint Honours Art History students only.) An Honours research paper written in consultation with an academic advisor.

● ARTh 406 German Architecture.
(3) (Prerequisite: At least one 300-level course in architectural history.) (Restriction: Not open to students who have taken ARTH 345) The German architectural tradition from the early Middle Ages to the present, the impact neighbouring countries had on its development, and the influence it exercised on them. The construction of an imperial tradition, and its use (and abuse) by different political systems.

● ARTh 415 Late Medieval & Renaissance Architecture in Northern Europe.
(3) This course is to show the diversity of architectural practice in France, England, Germany and Central Europe from 1400 to 1600, covering ecclesiastical and secular architecture. The stylistic spectrum ranges from late Gothic over the reception of forms of the Italian Renaissance, to the revival of late Gothic forms, reaching its climax around 1600.

ARTh 420 Selected Topics in Art and Architecture 1.
(3) (Fall) Canadian Studies and Race An advanced study of selected topics in the History of Art and Architecture.

ARTh 421 Selected Topics in Art and Architecture 2.
(3) (Fall) Fall: TBA Winter: Art and Cosmology in China.

ARTh 422 Selected Topics in Art and Architecture 3.
(3) (Winter) Art and Cosmology in China Modern and Contemporary Art

ARTh 447 Independent Research Course.
(3) (Prerequisite: permission of instructor)

● ARTh 457 Brushwork in Chinese Painting.
(3) (Prerequisite: At least one EAST or ARTH course or permission of instructor) (Restriction: Not open to students taking or who have taken EAST 457) The seminar takes an in-depth look at the function and meaning of the brushwork in traditional Chinese painting. Analysis of paintings will be combined to close readings of theoretical texts in translation.

● ARTh 473 Studies in 17th and Early 18th Century Art.
(3) (Winter)

ARTh 474 Studies in Late 18th and 19th Century Art.
(3)

ARTh 490 Museum Internship.
(3) (Restrictions: Not open to students who have taken ARTH 500) A seminar course dealing with museum collections and practical experience in the museum setting for students interested in museum professions. Individually designed in consultation with the professor in charge of internships and the appropriate personnel at one of the Montreal museums.
CANS-Canadian Studies

Offered by: Institute for Study of Canada

CANS 200 Introduction to the Study of Canada.
(3) (3 lecture hours and 1 conference hour) An overview of approaches to the study of Canada, including economic, political, historical and cultural dimensions.

CANS 202 Canadian Cultures: Context and Issues.
(3) (Prerequisite: ability to read French) A survey course which traces the history of Canadian cultures from the middle of the 19th century to the present. It surveys the diversity of Canadian cultural identities through literature, drama, art and the mass media. The course features guest lecturers. Some course material will be in French.

CANS 300 Topics in Canadian Studies 1.
(3) (Prerequisite: CANS 200 or permission of instructor) This course will examine Canada’s film and television industries. Emphasis will be placed on the development and evolution of Canadian film and television, the way these cultural industries intersect with historical moments and social debates, and the significance of media studies to notions of Canadian identity. An interdisciplinary course on a Canadian Studies topic.

CANS 301 Topics in Canadian Studies 2.
(3) (Prerequisite: CANS 200 or permission of instructor) An interdisciplinary course on a Canadian Studies topic.

CANS 303 Topics in Canadian Studies 3.
(3) (Prerequisite: CANS 200 or permission of instructor) An introduction to the social, economic, political and built environments of Canadian cities. Theories of the internal structure of cities, and relationships between urban places of various sizes. The course situates Canadian urbanism in the North American context, and emphasizes social and economic processes distinctive to Montreal. An interdisciplinary course on a Canadian Studies topic.

CANS 401 Canadian Studies Seminar 1.
(3) (Topic will vary from year to year depending on staff interests.) (Prerequisite: CANS 200 or permission of instructor) There is a set of labour market outcomes and factors that may have influenced the. The outcomes include labour force participation, employment, unemployment, precarious employment, wage rates, and wage differentials. Explanatory factors may include the industrial structure, institutions (e.g., unionization rates, the education system, the tax and transfer system), technological change, and globalization. We examine these outcomes and potential explanatory factors in aggregate. We also examine outcomes and causes for different age groups, genders, and by immigrant/immigrant status. An interdisciplinary seminar on a Canadian Studies topic.

CANS 402 Canadian Studies Seminar 2.
(3) (Prerequisite: CANS 200 or permission of instructor) An interdisciplinary seminar on a Canadian Studies topic.

CANS 403 Canadian Material Culture.
(3) (Restriction: U2 and U3 students.) Exhibitions that address Canadian history and contemporary identities through material culture, art, and other media, including the place of material culture in everyday life, through personal collections, and unconventional exhibition spaces.

CANS 404 Canadian Studies Seminar 4.
(3) (Topic will vary from year to year depending on staff interests.) (Prerequisite: CANS 200 or permission of instructor) An interdisciplinary seminar on a Canadian Studies topic.

CANS 405 Canadian Studies Seminar 5.
(3) (Prerequisite: CANS 200 or permission of instructor) An interdisciplinary seminar on a Canadian Studies topic.

CANS 406 Canadian Studies Seminar 6.
(3) (Topic will vary from year to year depending on staff interests.) (Prerequisite: CANS 200 or permission of instructor) An interdisciplinary seminar on a Canadian Studies topic.

CANS 407 Regions of Canada.
(3) (Prerequisite: CANS 200 or permission of instructor) Canadian regionalism and its manifestations in literature and the media, as well as in social and public policy, focusing on one region in Canada.

CANS 408 Individual Reading Course.
(3) (Restrictions: Reserved for final-year students enrolled in the Canadian Studies major or minor concentration. Permission must be obtained from the Canadian Studies advisor and from the supervising professor before registration.) Supervised reading on an explicitly multidisciplinary topic under the direction of a professor working in the field of Canadian Studies.

CATH-Catholic Studies

Offered by: Arts - Dean's Office

CATH 200 Introduction to Catholicism.
(3) (Fall) An interdisciplinary study of the Roman Catholic tradition in its changing contexts. Traces major themes in the Catholic tradition. Emphasis will vary from year to year on spiritual, intellectual, institutional, cultural and historical dimensions.

CATH 310 Catholic Intellectual Traditions.
(3) (Prerequisites: CATH 200, RELG 320, or permission of instructor) This course examines Catholic intellectual perspectives, schools of thought, and major thinkers, with focus on topics such as God, faith and reason, the human person, history, culture and community. Will also examine the interaction between Catholicism and other perspectives and traditions.

CATH 315 Catholicism and Moral Culture.
(3) (Prerequisite: CATH 200, or permission of instructor) A critical examination of the philosophical perspectives which inform contemporary Catholic moral thinking. This course explores the interplay of the evolving body of Catholic moral teaching with other developments and debates in ethics.

CATH 325 The Religious Sense.
(3) (Restriction: Not open to those who have taken 190-370A in 2001-02 or CATH 370 in 2002-03.) An inquiry into what constitutes the religious sense, from a Catholic perspective; the relationship between reason, moral certainty and the
religious sense; reasonable and unreasonable positions and concrete strategies before the ultimate questions concerning existence; freedom and responsibility, using literature, music and film.

CATH 340 Catholic Social Thought.
(3) (Prerequisite: CATH 200, or permission of instructor)
Explores Catholic social and political thought from a comparative perspective. Topics may include the Church-State distinction, subsidiarity, the common good, pluralism, the Catholic human rights revolution, natural law and the international order, Christian Democracy and the relationship between Catholicism, liberalism and communitarianism.

CATH 370 Topics in Catholic Studies.
(3)

CATH 460 Catholic Studies Seminar.
(3) (Prerequisite: CATH 200, or permission of instructor) A research seminar on a major theme and/or thinker. The seminar will evolve around primary source materials.

---

**CLAS-Classics**

Offered by: History

(3) (Winter) (Prerequisite: EAST 211 or permission of instructor) (Restriction: Departmental approval required) Consideration of selected topics and aspects of Chinese literature and/or language. The content of the course may vary from year to year.

EAST 313 Current Topics: Korean Studies 1.
(3) (Fall) (Restriction: Departmental approval required) Consideration of important issues in Korean Studies. Content of the course will vary from year to year.

EAST 314 Current Topics: Korean Studies 2.
(3) (Winter) (Restriction: Departmental approval required) Korean Film Consideration of important issues in Korean Studies. Content of the course will vary from year to year.

• EAST 320 Second Level Korean.
(9) (Summer) (Prerequisite: EAST 220 or equivalent) The aim of this course is to give students a fluent speaking ability in daily conversation, advanced grammar knowledge, improved reading and writing skills. Special emphasis is put on the efficient use of grammar, enrichment of vocabulary, and mastering useful expressions encountered in everyday life.

• EAST 320D Korean Studies 2. (4.5), EAST 320D2 (4.5) Second Level Korean.
(Prerequisite: EAST 220 or equivalent) (Students must register for both EAST 320D1 and EAST 320D2.) (No credit will be given for this course unless both EAST 320D1 and EAST 320D2 are completed in consecutive terms) The aim of this course is to give students a fluent speaking ability in daily conversation, advanced grammar knowledge, improved reading and writing skills. Special emphasis is put on the efficient use of grammar, enrichment of vocabulary, and mastering useful expressions encountered in everyday life.

• EAST 330 Second Level Chinese.
(9) (Summer) (Prerequisite: Chinese EAST 230 or equivalent or permission of the instructor) The same communicative approach as in EAST 230 is used to develop aural and oral skills on daily topics. In addition to textbooks, Chinese films on videotapes will be incorporated as teaching materials.

(Prerequisite: EAST 230 or equivalent or permission of the instructor) (Students must register for both EAST 330D1 and EAST 330D2.) (No credit will be given for this course unless both EAST 330D1 and EAST 330D2 are successfully completed in consecutive terms) The same communicative approach as in EAST 230 is used to develop aural and oral skills on daily topics. In addition to textbooks, Chinese films on videotapes will be incorporated as teaching materials.

• EAST 340 Second Level Japanese.
(9) (Summer) (Prerequisite: Japanese EAST 240 or equivalent or permission of instructor) Continuation of the study of oral and written Japanese.

(Prerequisite: EAST 240 or equivalent or permission of instructor) (Restriction: Departmental approval required) (Students must register for both EAST 340D1 and EAST 340D2.) (No credit will be given for this course unless both EAST 340D1 and EAST 340D2 are successfully completed in consecutive terms) Continuation of the study of oral and written Japanese.

• EAST 350 Gender and Sexuality in Japanese Literature.
(3) (Prerequisite: EAST 211 or permission of instructor) (Note: Readings in English translation) Gender and sexuality in modern and/or premodern Japanese literature with emphasis on representation of gender relations, notions of masculinity and femininity, morality and sexuality. Readings from fiction, drama, poetry, and/or other genres are approached from a variety of critical perspectives.

• EAST 351 Women Writers of China.
(3) (Core course for the Women's Studies program) (Prerequisite: EAST 211 or permission of instructor) A study of fiction, drama, and poetry by women writers in imperial, modern, and/or contemporary China.

• EAST 352 Critical Approaches to Chinese Literature.
(3) (Prerequisite: EAST 211) This course will examine traditional and/or modern genres of Chinese literature with a focus on different forms of Chinese and Western literary analysis.

• EAST 353 Approaches to Chinese Cinema.
(3) (Prerequisite: EAST 211) Development of Chinese film in the 20th century, with an emphasis on both critical approaches to film as well as film history.

• EAST 354 Taoist and Buddhist Apocalypses.
(3) Visions of the end of the world in Medieval Chinese Buddhist and Taoist literature will be contrasted with Western apocalyptic materials. The course will trace the development of Buddhism and Taoism in China, focusing on millenarian movements, soteriology, public worship, and ritual.

• EAST 356 Modern & Contemporary Chinese Art.
(3) (Restriction: Not open to students taking or who have taken ARTH 356) Examination of modern Chinese art and visual culture from the 1920's to the present. Emphasis will be placed on the formation of the artistic avant-garde in the 20th century and its relation to socialist and post-socialist mass culture.

• EAST 362 Japanese Cinema.
(3) This course will study the development of film in Japan during the 20th century with a particular focus on the analysis of film form, genres and history.

• EAST 363 Aesthetics and Politics of Vision Premodern Japan.
(3) (Prerequisite: EAST 212 or permission of instructor) This course examines cultural production in early and medieval Japan, focusing on calligraphy, painting, picture scrolls, gestures and their relation to textual production. Readings explore various classic texts, taboos against seeing and narrative modes of cognition.

• EAST 364 Mass Culture and Postwar Japan.
(3) (Prerequisite: Any introductory course in literature or cultural studies, or permission of instructor) This course addresses a number of analytic approaches to mass culture in order to examine the culture industry of post-war Japan. Emphasis on narrative strategies in popular or consumer fiction and on the problems of marginalized writers.

• EAST 370 History of Sexuality in Japan.
(3) Social and cultural history of sexuality in Japan. Possible topics include pre-modern sexuality and relations to court, religion and anthropology; pre-modern sex and gender relations; modern sexuality and gender identities; sexuality and the rise of science; relation to nationalism; feminism and queer movements.

• EAST 390 The Chinese Family in History.
(3) (Prerequisite: EAST 211 or HIST 208 or HIST 218 or permission of the instructor) Exploration of the Chinese family in history both as an institution - in its religious, legal, economic, political aspects - and as a lived reality.

• EAST 420D Korean Studies 2. (3), EAST 420D2 (3) Third Level Korean.
(Prerequisite: EAST 320 or permission of instructor) (Students must register for both EAST 420D1 and EAST 420D2) (No credit will be given for this course unless both EAST 420D1 and EAST 420D2 are successfully completed in consecutive terms) This course aims at increasing knowledge of grammar, enhancing written and oral comprehension and improving
writing and speaking skills.

• **EAST 430 Third Level Chinese.** (6) (Summer) (Prerequisite: EAST 330 or equivalent or permission of instructor) A communicative approach will be used to provide students with skills to communicate in various situations, express their ideas and feelings, and discuss various aspects of culture and life in China and in Canada. Teaching materials include Chinese movies on videotape and slides depicting Chinese life and culture.

**EAST 430D1 (3), EAST 430D2 (3) Third Level Chinese.** (Prerequisite: EAST 330 or equivalent or permission of instructor) Students must register for both EAST 430D1 and EAST 430D2. (No credit will be given for this course unless both EAST 430D1 and EAST 430D2 are successfully completed in consecutive terms) (EAST 430D1 and EAST 430D2 together are equivalent to EAST 430) A communicative approach will be used to provide students with skills to communicate in various situations, express their ideas and feelings, and discuss various aspects of culture and life in China and in Canada. Teaching materials include Chinese movies on videotape and slides depicting Chinese life and culture.

**EAST 440D1 (3), EAST 440D2 (3) Third Level Japanese.** (Prerequisite: EAST 340 or equivalent or permission of instructor) Students must register for both EAST 440D1 and EAST 440D2. (No credit will be given for this course unless both EAST 440D1 and EAST 440D2 are successfully completed in consecutive terms) More advanced study of the Japanese language. Emphasis will be placed on reading.

**EAST 453 Topics: Chinese Literature.** (3) (Prerequisite: A 300-level course in any literature.) Advanced seminar in selected genres, themes and issues in Chinese literature.

**EAST 454 Topics: Chinese Cinema.** (3) (Prerequisites: EAST 353, a 300-level film studies course, or permission of the instructor.) Advanced seminar in selected themes and issues in Chinese film.

**EAST 456 Chinese Drama and Popular Culture.** (3) (Prerequisite: EAST 211 or permission of instructor) This course will examine the regional background of popular culture in Late Imperial China, focusing on the development of distinct traditions of regional drama. The levels of texts and audiences and the social and ritual contexts of theatrical performance in pre-modern China will also be considered.

**EAST 457 Brushwork in Chinese Painting.** (3) (Prerequisite: At least one EAST or ARTH course or permission of instructor.) (Restriction: Not open to students taking or who have taken ARTH 457.) The seminar takes an in-depth look at the function and meaning of the brushwork in traditional Chinese painting. Analysis of paintings will be combined to close readings of theoretical texts in translation.

**EAST 461 Inventing Modern Japanese Novel.** (3) (Prerequisite: Any course in literature or cultural studies above the introductory level, or permission of the instructor) An examination of the modern Japanese novel as a form which both affirms and resists the form of the European novel. Readings explore the particular problems of the Japanese novel in the context of modernization, westernization, and colonialism.

**EAST 462 Japan in Asia.** (3) (Prerequisite: Any East Asian Studies course above the introductory level, or permission of the instructor) This course introduces theoretical frameworks, and intertextuality in order to reconsider Japanese modes of reception and selection of Chinese texts and technologies. Readings range from early Japanese to 20th century texts. Readings in translation.
• EAST 530 Classical Chinese 1. 
  (3) (Prerequisite: EAST 330 or equivalent.) Restriction: Not open to students who have taken EAST 433.) 
  Continuation of EAST 530 at a more advanced level.

• EAST 535 Classical Chinese 2. 
  (3) (Prerequisite: EAST 330 or equivalent.) Restriction: Not open to students who have taken EAST 434.)

• EAST 536 Chinese for Business 1. 
  (3) (Prerequisite: EAST 330 or equivalent or permission of instructor) 
  This course aims to provide advanced students of Chinese with training in the terminology and syntax necessary 
  for business communications. Topics will include many different aspects of business negotiations, 
  such as price negotiation, methods of payment, etc.

• EAST 537 Chinese for Business 2. 
  (3) (Prerequisite: EAST 535 or equivalent or permission of instructor) 
  This course is a continuation of EAST 535. It is designed to further develop students' linguistic competence 
  for business communication, and to provide students with some knowledge on China's trade policies as well 
  as on different methods of trading with China.

EAST 537D1 (3), EAST 537D2 (3) China Today Through Translation. 
(Prerequisite (Undergraduate): students with native or near native proficiency may register directly, 
other students require permission of instructor) Restriction: Not open to students who 
have taken EAST 437) (Students must register for both EAST 537D1 and EAST 537D2.) 
(No credit will be given for this course unless both EAST 537D1 and EAST 537D2 are 
successfully completed in consecutive terms) A course to develop 
practical translation skills and understanding of contemporary 
China, focusing on Sino-Canadian and multi-lateral political, 
cultural and trade issues. Interpretive skills will be enhanced 
through translation exercises and discussion in class. Course 
materials include original documents and videos from the 
business communications and other fields.

EAST 540D1 (3), EAST 540D2 (3) Fourth Level Japanese. 
(Prerequisite (Undergraduate): EAST 440 or equivalent or 
permission of instructor) (Students must register for both EAST 
540D1 and EAST 540D2.) (No credit will be given for this 
course unless both EAST 540D1 and EAST 540D2 are 
successfully completed in consecutive terms) A course to develop 
practical translation skills and understanding of contemporary 
Japan, with emphasis on reading Japanese newspapers. Classes 
will be conducted entirely in Japanese.

EAST 543 Classical Japanese 1. 
(3) (Prerequisite (Undergraduate): EAST 440 or permission of 
instructor) The course will offer an introduction to the grammar 

EAST 544 Classical Japanese 2. 
(3) (Prerequisite (Undergraduate): EAST 543 or permission of 
Readings in well-known writings of pre-modern Japan.

EAST 547 Advanced Reading and Translation in Japanese. 
(3) (Prerequisite (Undergraduate): EAST 440 or permission of 
instructor) (Restriction: Departmental approval required) 
This course is designed to improve students' skills in reading 
and translating Japanese. Readings will be taken from various 
short stories and articles. Translation from Japanese to 
English or French.

EAST 550 Classical Chinese Poetry Themes and Genres. 
(3) (Prerequisite (Undergraduate): EAST 433 or permission of 
instructor) A study of major themes and genres of classical 
Chinese poetry from its beginnings to the Yuan dynasty (14th 
century), with emphasis on critical analysis of text and 
context. Readings of poems in the original.

EAST 551 Technologies of Self in Early China. 
(3) (Prerequisite (Undergraduate): One advanced course in 
EAS or permission of the instructor) Readings on 
sel-cultivation drawn from Confucian, Legalist, and Taoist 
philosophic texts of early China (5th-2nd centuries B.C.) in 
translation will be compared with historical and archaeological 
materials on the evolving construction of the "individual" in 
Chinese social structure, military organization, political and 
rutual codes.
● EAST 552 The Yijing (Book of Changes).  
(3) (Prerequisite: Any 300-level or above EAST course or permission of instructor.) (Note: No prior knowledge of Chinese required.) In-depth examination of the Yijing, known in the West as the Book of Changes. The course will combine a close reading of this pivotal text and its numerous commentaries with a social and cultural analysis of the diverse functions it fulfilled through Chinese history - philosophical, political, religious, aesthetic and cosmological.

● EAST 559 Advanced Topics: Chinese Literature.  
(3) (Prerequisite (Undergraduate): one advanced course in EAST or permission of instructor) (Restriction: Departmental approval required) Consideration of selected topics and aspects of Chinese literature. The content of the course may vary from year to year, ranging from contemporary to modern to pre-modern literature.

● EAST 562 Japanese Literary Theory and Practice.  
(3) (Prerequisite (Undergraduate): Any course in EAS above the 200-level and at least a year of an East Asian Language, or permission of instructor) This course examines Japanese theories of literary production and practice with an emphasis on 20th century thought.

● EAST 563 Images, Ideograms, Aesthetics.  
(3) (Prerequisite (Undergraduate): EAST 320 or EAST 330 or EAST 340 or equivalent, or permission of instructor) This course explores theories and usage of ideograms and images in Asian texts, both modern and premodern.

EAST 564 Structures of Modernity: Japan.  
(3) (Prerequisite (Undergraduate): Any East Asian Studies course above the introductory level, or permission of the instructor) This course explores relations between some of the principal sites which structure the experience of "modernity" in Japan (and elsewhere) - from bodies and cities, to the urban context in general. Along with general approaches (e.g. the idea of everyday life; questions of time), specific topics may include speed, music, architecture, crime, etc.

EAST 569 Advanced Topics: Japanese Literature.  
(3) (Prerequisite: one advanced course in EAS or permission of instructor) (Restriction: Departmental approval required) Consideration of selected topics and aspects of Japanese literature. The content of the course may vary from year to year from contemporary to modern to pre-modern literature.

● EAST 582 Japanese Culture and Society.  
(3)

ECON-Economics

Offered by: Economics

ECON 199 FYS: Aspects of Globalization.  
(3) (Restriction: Open only to newly admitted students in U0 or U1, who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.) (Maximum 25) A guided discussion of the many and varied aspects of economic globalization.

ECON 205 An Introduction to Political Economy.  
(3) (Restriction: Not open to students who have taken 154-205D) (Restriction: This course does not count for credit toward the Major or Honours degree in Economics) A critical study of the insights to be gained through economic analysis of a number of problems of broad interest. The focus will be on the application of economics to issues of public policy.

ECON 208 Microeconomic Analysis and Applications.  
(3) (Restriction: Not open to students who have taken or are taking ECON 230 or ECON 250) A university-level introduction to demand and supply, consumer behaviour, production theory, market structures and income distribution theory.

ECON 209 Macroeconomic Analysis and Applications.  
(3) (Prerequisites: ECON 208 or permission of the instructor) (Restriction: Not open to students who have taken or are taking ECON 330 or ECON 352) A university-level introduction to national income determination, money and banking, inflation, unemployment and economic policy.

ECON 219 Current Economic Problems: Topics.  
(3) (This course will also be of interest to students outside of Economics) This course will deal with topical issues of importance to the Canadian economy.

ECON 221 Economic History.  
(3) (Corequisites: ECON 208 and ECON 209 or ECON 230D1/D2 or ECON 250D1/D2.) (Restrictions: Not open to students who have taken ECON 201 or ECON 221D1/D2.) Survey of economic development. The evolution of economic institutions and the process of economic growth. Topics include demographic change, agrarian institutions, financial and industrial organization, technological change and the expansion of trade and markets.

ECON 223 Political Economy of Trade Policy.  
(3) (Prerequisite: ECON 208) The course introduces students to the economics of international trade, what constitutes good trade policy, and how trade policy is decided. The course examines Canadian trade policy since 1945, including the GATT, Auto Pact, the FTA and NAFTA, and concludes with special topics in trade policy.

ECON 225 Economics of the Environment.  
(3) (Restriction: Not open to students who have taken 154-325 or 154-425) A study of the application of economic theory to questions of environmental policy. Particular attention will be given to the measurement and regulation of pollution, congestion and waste and other environmental aspects of specific economies.

ECON 227 Economic Statistics.  
(6) (Summer) (You may not be able to receive credit for this course and other statistic courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) Distributions, averages, dispersions, sampling, testing, estimation, correlation, regression, index numbers, trends and seasonals.

ECON 227D1 (3), ECON 227D2 (3) Economic Statistics.  
(Students must register for both ECON 227D1 and ECON 227D2.) (No credit will be given for this course unless both ECON 227D1 and ECON 227D2 are successfully completed in consecutive terms) (ECON 227D1 and ECON 227D2 together are equivalent to ECON 227) (You may not be able to receive credit for this course and other statistic courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) Distributions, averages, dispersions, sampling, testing, estimation, correlation, regression, index numbers, trends and seasonals.

ECON 230D1 (3), ECON 230D2 (3) Microeconomic Theory.  
(Students must register for both ECON 230D1 and ECON 230D2.) (No credit will be given for this course unless both ECON 230D1 and ECON 230D2 are successfully completed in consecutive terms) The introductory course for Economics students in microeconomic theory. In depth and critical presentation of the theory of consumer behaviour, theory of production and cost curves, theory of the firm, theory of distribution, welfare economics and the theory of general equilibrium.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses taught only in alternate years.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.

Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

Denotes courses taught only in alternate years.

Denotes that departmental approval/permission must be obtained by a student prior to registration.

Denotes courses not available as Education electives.

Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.

Denotes courses taught only in alternate years.
ECON 208 Governmental Policy Towards Business. (3) (Prerequisites: ECON 208 and ECON 209 or those listed under Prerequisites above) (Restriction: Not open to students who have taken 154-305D) Covers the major public policies toward business in Canada, such as competition policy, regulation, public ownership and privatization, industrial policies, and trade policies. Includes comparison with policies of other countries, especially the U.S. Readings will include some legal decisions.

ECON 310 Introduction to Behavioural Economics. (3) (Prerequisites: ECON 208 and a statistics course or permission of the instructor.) An introduction to economic decision-making in markets and strategic environments, including bounded rationality, individual decision-making under uncertainty, and behavioural game theory.

ECON 311 United States Economic Development. (3) (Prerequisites: ECON 208 and ECON 209 or those listed under Prerequisites above) A course in which subjects discussed include the nature of economic growth and institutional change in the United States. Emphasis will be placed on the use of analytical methods and categories and theories economists have developed for such studies.

ECON 313 Economic Development 1. (3) (Prerequisite: ECON 208 and either ECON 301 or one development course.) (Restriction: Not open to students who have taken 154-313D.) Microeconomic theories of economic development and empirical evidence on population, labour, firms, poverty, inequality and environment.

ECON 314 Economic Development 2. (3) (Prerequisite: ECON 313) (Restriction: Not open to students who have taken 154-313D) Macroeconomic development issues, including theories of growth, public finance, debt, currency crises, corruption, structural adjustment, democracy and global economic organization.

ECON 316 The Underground Economy. (3) (Prerequisites: ECON 208 and ECON 209 or those listed under Prerequisites above) A survey of the underground sectors of modern economies around the world. Topics include the causes of black marketeering in Western economies; international contraband trade in guns and drugs; money laundering through the world financial system.

ECON 318 The Criminal Economy. (3) (Prerequisite: ECON 316.) (Restriction: Departmental approval required) A seminar course focusing on the nature and operation of criminal enterprise in markets for goods, services and factors of production within advanced industrial economies. Topics include the debate over "organized" crime; the structure of the criminal firm; labour racketeering; and crime in the money and capital markets.

ECON 321 The Quebec Economy. (3) (Prerequisites: ECON 208 and ECON 209 or those listed under Prerequisites above) A study of the economic development of Quebec and contemporary economic problems in the province. Topics include: economic history since 1900; industrial structure, trade and foreign ownership; unemployment, poverty, and the labour market; government finance and federal-provincial economic relations; independence and the economic program of the Parti Quebecois.

ECON 326 Ecological Economics. (3) (Prerequisites: ECON 208 and ECON 209 or consent of instructor) Macroeconomic and structural aspects of the ecological crisis. A course in which subjects discussed include the conflict between economic growth and the laws of thermodynamics; the search for alternative economic indicators;
the fossil fuels crisis; and “green” fiscal policy.

ECO 330D1 (2), ECON 330D2 (3) Macroeconomic Theory.
(Prerequisite: ECON 230 or ECON 250. If a student has already taken 154-200 or 154-203 and 154-204 or ECON 208 and ECON 209, it may be concurrently taken with ECON 230 with the permission of the instructor) (Students must register for both ECON 330D1 and ECON 330D2) (No credit will be given for this course unless both ECON 330D1 and ECON 330D2 are successfully completed in consecutive terms) A review of basic economic concepts and tools with an in depth and critical presentation of the fundamental areas of macroeconomic theory. Topics include: the determination of output, employment and price level; money and banking and business cycles; stabilization policy; international finance and growth theory.

- ECON 331 Economic Development: Russia and USSR.
  (3) (Prerequisites: ECON 208 and ECON 209 or those listed under Prerequisites above) Introduction to Russian and former Soviet economic development, structure, planning, management and performance. The former Soviet economy, attempted reforms, and the collapse of the U.S.S.R.

- ECON 334 History of Economic Doctrines.
  (3) (Prerequisites: ECON 208 and ECON 209 or those listed under Prerequisites above) The course surveys the development of economics, how the discipline and the thinking of economists evolved, and the significance of some of the analytical tools used.

- ECON 335 The Japanese Economy.
  (3) (Prerequisites: ECON 208 and ECON 209 or those listed under Prerequisites above) The first part of the course covers the economic institutions in, changing structure of, and public policies employed by the Japanese economy. The second part probes the economic “logic” of the Japanese capitalist system, explores its relationship to the ideas of Joseph Schumpeter, and makes comparisons with the American economy.

- ECON 336 The Chinese Economy.
  (3) (Prerequisites: ECON 208 and ECON 209 or (or ECON 230D1/D2 or 250D1/D2).) Examination of the growth and transformation of the Chinese economy and the domestic and international implications.

- ECON 337 Introductory Econometrics 1.
  (3) (Prerequisite: a grade of 65% or better in ECON 227 or ECON 257 or ECON 317 or ECON 357 or an equivalent qualification in statistics. Familiarity with matrix algebra is highly recommended) The practical application of quantitative methods in statistical investigations.

- ECON 338 Introductory Econometrics 2.
  (3) (Prerequisite: ECON 337) Estimation and forecasting using simultaneous equation systems, dynamic simulation, time series analysis.

- ECON 344 The International Economy 1830-1914.
  (3) (Prerequisites: ECON 208 and ECON 209 or those listed under Prerequisites above) Examines the processes of economic growth and industrialization in Europe and their effect on the development of the world economy. Particular emphasis is placed on the economic history of major European nations and their overseas extensions. Topics include technological change, the demographic transition and the gold standard.

- ECON 345 The International Economy since 1914.
  (3) (Prerequisites: (ECON 208 and ECON 209), (or MGCR 293 and ECON 295), or ECON 230D1/D2, or ECON 250D1/D2) Studies the history of economic adjustments in the 20th century, with particular reference to the industrialized countries. Topics include: the economic impact of WWI, the attempts to revive the international economy in the 1920s, the causes and consequences of the Great Depression of the 1930s, and the economic problems and subsequent economic boom following WWII.

- ECON 347 Economics of Climate Change.
  (3) (Prerequisites: ECON 208 and ECON 209 or those listed under Prerequisites above) The course focuses on the economic implications of, and problems posed by, predictions of global warming due to anthropogenic emissions of greenhouse gases. Attention is given to economic policies such as carbon taxes and tradable emission permits and to the problems of displacing fossil fuels with new energy technologies.

- ECON 348 Urban Economics.
  (3) (Prerequisite: ECON 208.) (Restriction: For U2 or U3 students only.) Economic explanations for the rise of cities; their economic benefits and externalities. Economic challenges to cities in the modern context. Examination of municipal policies and of economic, legal and political constraints on cities.

- ECON 352D1, ECON 352D2 (3) Macroeconomics-Honours.
  (Prerequisite: ECON 250D1/ECON 250D2.) (Corequisite ECON 257D1.) (Students must register for both ECON 352D1 and ECON 352D2) (No credit will be given for this course unless both ECON 352D1 and ECON 352D2 are successfully completed in consecutive terms) Basic macroeconomic theory, emphasizing the Classical and Keynesian ideas for the short-run determination of output, employment, interest rates and prices in the economy. Elements of international economics, money and banking and growth theory. The structure of the Canadian economy.

- ECON 399 Internship: Economics.
  (3) (Restriction: Open to U2 and U3 students with a minimum CGPA of 3.0 and permission of the departmental Internship Advisor. This course will not normally fulfill program requirements for honours, major or minor programs. A letter from a supervisor at the institution must attest to the successful completion of the student's tenure. The topic must fall within the student's program in economics and have the prior approval of a faculty member in the department.) Internship with an approved host institution or organization.

- ECON 405 Natural Resource Economics.
  (3) (Prerequisite: ECON 230 or ECON 250) Topics include: Malthusian and Ricardian Scarcity; optimal depletion of renewable and non-renewable resources; exploration, risk and industry structure, and current resources, rent and taxation. Current public policies applied to the resource industries, particularly those of a regulatory nature.

- ECON 406 Topics in Economic Policy.
  (3) (Prerequisites: ECON 230 or ECON 250 and one of ECON 227, ECON 257) Selected policy issues are investigated using economic theory. For details on topics covered in the current year, consult the instructor.

- ECON 408D1, ECON 408D2 (3) Public Sector Economics.
  (Prerequisite: ECON 230D1/ECON 230D2 or ECON 250D1/ECON 250D2.) Students must register for both ECON 408D1 and ECON 408D2.) (No credit will be given for this course unless both ECON 408D1 and ECON 408D2 are successfully completed in consecutive terms) A survey of the economists' view of government activity. The theory of public spending and various modes of taxation is emphasized. Canadian institutions are viewed in an analytical perspective.

  (3) (Prerequisites: ECON 230 or ECON 250 and one semester of economic development) An advanced course in the economic development of this region with emphasis on the legacy of history and the interaction of political and economic factors in the analysis of the crisis of the 1980s.
(3) (Prerequisites: ECON 230 or ECON 250 and one semester of economic development) An advanced course in the economic development of a pre-designated underdeveloped country or a group of countries. 

ECON 416 Topics in Economic Development 2.  
(3) (Prerequisite: ECON 230 or ECON 250 or permission of the instructor) This course gives students a broad overview of the economics of developing countries. The course covers micro and macro topics, with particular emphasis on the economic analysis at the micro level. 

ECON 420 Topics in Economic Theory.  
(3) (Prerequisite: ECON 230 or ECON 250) The course discusses selected topics in micro or macroeconomic theory at an advanced level. Possible topics include welfare economics, general equilibrium, theories of firms, consumer behaviour, intertemporal choice, uncertainty, game theory, etc. 

ECON 423D1 (3), ECON 423D2 (3) International Trade and Finance.  
(Prerequisite: ECON 230D1/ECON 230D2 or ECON 250D1/ECON 250D2.) (Corequisite: ECON 330D1 or ECON 352D1) (Students must register for both ECON 423D1 and ECON 423D2.) (No credit will be given for this course unless both ECON 423D1 and ECON 423D2 are successfully completed in consecutive terms) Theoretical and policy approach to the study of international economic relations. Topics examined include: trade theory; tariff theory; trade and growth; balance of payments; adjustment; international monetary system. 

ECON 426 Labour Economics.  
(3) (Prerequisite: ECON 230D1/D2 or ECON 250D1/D2 or ECON 306D1/D2.) The determinants of labour supply, demand and the structure of earnings are considered. The economic effects of government policies, such as minimum wage laws, unemployment insurance, welfare and training programs and subsidies to higher education are analyzed. A rigorous theoretical and "hands on" empirical approach is emphasized. 

ECON 434 Current Economic Problems.  
(3) (Prerequisite: ECON 230 or ECON 250.) (Corequisite: ECON 330 or ECON 352) A discussion of contemporary economic problems. Topics will reflect economic issues of current interest. 

ECON 440 Health Economics.  
(3) (Prerequisites: ECON 208 and ECON 227 or comparable courses or consent of the instructor) The organization and performance of Canada's health care system are examined from an economist's perspective. The system is described and its special features analyzed. Much attention is given to the role of government in the system and to financing arrangements for hospital and medical services. Current financial problems are discussed. 

ECON 447 Economics of Information and Uncertainty.  
(3) (Prerequisite: ECON 230 or ECON 250) This course considers how uncertainty can be incorporated into the standard model of consumer and producer choice central to explaining or analyzing a number of different economic phenomena. Topics include the information approach to explaining unemployment and problems in controlling health care costs. 

ECON 450D1 (3), ECON 450D2 (3) Advanced Economic Theory - Honours.  
(Prerequisites: ECON 250D1/ECON 250D2 and ECON 352D1/ECON 352D2) (Students must register for both ECON 450D1 and ECON 450D2.) (No credit will be given for this course unless both ECON 450D1 and ECON 450D2 are successfully completed in consecutive terms) Selected topics in economic theory from recent periodical and monograph literature. 

ECON 451 Seminar in Economic History.  
(3) (Prerequisites: one of ECON 227, ECON 317, ECON 257 or ECON 357 and either ECON 330 or ECON 352) In this course economic history is explicitly employed to elucidate issues in economic history. The topics will be announced at the beginning of the academic year. 

(Prerequisites: ECON 250D1/ECON 250D2 and ECON 352D1/ECON 352D2) (Students must register for both ECON 453D1 and ECON 453D2.) (No credit will be given for this course unless both ECON 453D1 and ECON 453D2 are successfully completed in consecutive terms) The pure theory of trade; Ricardian, Heckscher-Ohlin-Samuelson models; tariff theory and policy; the Canadian balance of payments; balance of payments disequilibrium analysis and policy; the exchange rate, international monetary economics, international policy coordination. 

ECON 459 Topics in Monetary Economics - Honours.  
(3) (Prerequisite: ECON 230 or ECON 250, and knowledge of calculus.) (Restriction: For Honours in Economics) (Restriction: Not open to students who have taken ECON 458) An advanced treatment of selected topics in monetary economics, including the theory and practice of monetary policy. 

ECON 460 History of Thought 1 - Honours.  
(3) (Prerequisite: ECON 250.) (Corequisite: ECON 352) The evolution of economic thought prior to the close of the 19th century, as reflected in the writings of prominent economists from the time of Adam Smith to the emergence of marginalism and neoclassical economics. 

ECON 461 History of Thought 2 - Honours.  
(3) (Prerequisite: ECON 250.) (Corequisite: ECON 352) The evolution of economic thought in the 20th century, as reflected in the writings of prominent economists on equilibrium, dynamics, games, expectations, econometrics, industrial structure, economic policy and other primary areas of interest. 

ECON 467D1 (3), ECON 467D2 (3) Econometrics - Honours.  
(Prerequisites: MATH 222 and ECON 257D1/ECON 257D2 or consent of instructor. MATH 223 is recommended, but not required as a prerequisite.) (Students must register for both ECON 467D1 and ECON 467D2.) (No credit will be given for this course unless both ECON 467D1 and ECON 467D2 are successfully completed in consecutive terms) Special emphasis on statistical tests of economic theories, the construction of econometric models, and problems in estimation methods. 

ECON 473 Income Distribution.  
(3) (Prerequisite: ECON 230 or ECON 250. Equivalent of a full year course in statistics as the requirement applicable to Majors and Honours in economics, and calculus 1 and 2) Theory and measurement of income distribution, disparities and poverty. The course examines intertemporal dynamics affecting individuals and socioeconomic groups. The incidence of (costs and benefits from) fiscal and restrictive programmes, inflation and unemployment is evaluated. 

ECON 480 Research Project.  
(3) (Restrictions: Open to U3 students only. Students must complete a Research Project Registration Form, have it countersigned by the professor who has agreed to supervise the research project and submit it to the Departmental Administrative Office in Leacock 442 prior to registering in this course. A student cannot take this course more than once for credit.) In this course students must undertake a research project under close supervision. They must also do such special reading and research as their advisers direct. 

ECON 481 Research Project.  
(3) (Restrictions: Open to U3 students only. Students must complete a Research Project Registration Form, have it countersigned by the professor who has agreed to supervise the research project and submit it to the Departmental Administrative Officer in Leacock 442 prior to registering in this course. A student cannot take this course more than once for credit.) In this course students must undertake a research project under close supervision. They must also do such special reading and research as their advisers direct. 

ECON 510 Experimental Economics.  
(3) (Prerequisites: ECON 230 or ECON 250 or permission of the instructor.) (Restrictions: For U3 students.) Experimental methodology, current topics in experimental economics, and market design. 

ECON 525 Project Analysis.  
(3) (Restriction: Open to advanced undergraduate students. Prerequisite: ECON 250, ECON 352 or equivalent) A course in cost benefit analysis for graduate and advanced undergraduate students.
ENGL-English
Offered by: English

ENGL 100 English Literature and Composition.
(3) (Restriction: Course is open to Frukt students only.)
ENGL 100D1 (3), ENGL 100D2 (3) English Literature and Composition.
(Students must register for both ENGL 100D1 and ENGL 100D2.) No credit will be given for this course unless both ENGL 100D1 and ENGL 100D2 are successfully completed in consecutive terms.) ENGL 100D1 and ENGL 100D2 together are equivalent to ENGL 100.

ENGL 199 FYS: Literature and Democracy.
(3) (Restriction: Open only to newly admitted students in U0 or U1. Students may take only one First Year Seminar. Students who register for more than one will be removed from all but one of them.) (Maximum 25)

ENGL 200 Survey of English Literature 1.
(3) (Restriction: Not open to students in English programs)

ENGL 201 Survey of English Literature 2.
(3) (Prerequisite: ENGL 200 or permission of instructor) (Restriction: Not open to students in English programs)
ENGL 202 Departmental Survey of English Literature 1.
(3) (Fall) (Restriction: Limited to students in English programs only) (Restriction: Not open to students who have taken ENGL 200)

ENGL 203 Departmental Survey of English Literature 2.
(3) (Winter) (Prerequisite: ENGL 202 or permission of instructor) (Restriction: Limited to students in English programs only) (Restriction: Not open to students who have taken ENGL 201)

(3)

• ENGL 421 African Literature.
(3)

ENGL 422 Studies in 19th Century American Literature.
(3) (In 2007/08: Short Fiction of Poe, Hawthorne, and Melville.)

ENGL 423 Studies in 19th Century Literature.
(3) (In 2007/08: Whitman, Dickinson, Melville’s ‘Moby Dick’ and others.)

ENGL 424 Irish Literature.
(3) (In 2007/08: James Joyce.)

• ENGL 430 Studies in Drama.
(3)

ENGL 431 Studies in Drama.
(3)

ENGL 434 Independent Theatre Project.
(3) (This course will allow students to undertake special projects, frequently involving background readings, performances, and essays. This course is normally open only to Major or Honours students in the Department. Permission must be obtained from the Department before registration)

• ENGL 437 Studies in Literary Form.
(3)

• ENGL 438 Studies in Literary Form.
(3) Study of a specific literary form.

• ENGL 443 Contemporary Women’s Fiction.
(3) Study of a theme or author in contemporary women’s fiction.

ENGL 447 Crosscurrents/English Literature and European Literature 1.
(3) (In 2007/08: Earlier English Renaissance.)

• ENGL 449 Studies in the Gothic.
(3) Study of aspects of the Gothic in a variety of periods and media.

ENGL 452 Studies in Old English.
(3) (Prerequisite: ENGL 351 or equivalent, or permission of the instructor) Study of an aspect of Old English literature which presupposes a grounding in the language.

ENGL 456 Middle English.
(3)

ENGL 458 Theories of Text and Performance 1.
(3) (Prerequisites: ENGL 230 and ENGL 269 or permission of instructor) This course provides an historical perspective on advanced theoretical problems affecting both dramatic texts and theatrical performance up to the 19th Century. The historical periods covered in this course may vary from year to year.

• ENGL 459 Theories of Text and Performance 2.
(3) (Prerequisites: ENGL 230 and ENGL 269 or permission of instructor) This course provides an historical perspective on advanced theoretical problems affecting both dramatic texts and theatrical performance starting from the 19th Century to the present. The historical periods covered in this course may vary from year to year.

ENGL 464 Creative Writing: Poetry.
(3) (Prerequisite: permission of instructor.)

ENGL 465D1 (4.5), ENGL 465D2 (4.5) Theatre Laboratory.
(Prerequisites: ENGL 230, ENGL 269 and ENGL 367 or sufficient relevant experience in related drama courses or permission of the instructor.) (Students must register for both ENGL 465D1 and ENGL 465D2.) (No credit will be given for this course unless both ENGL 465D1 and ENGL 465D2 are successfully completed in consecutive terms)

• ENGL 466D1 (3), ENGL 466D2 (3) Directing for the Theatre.
(Prerequisites: ENGL 230, ENGL 269 and permission of instructor.) (Students must register for both ENGL 466D1 and ENGL 466D2.) (No credit will be given for this course unless both ENGL 466D1 and ENGL 466D2 are successfully completed in consecutive terms) The direction of a theatrical performance: preparation, casting, rehearsal, and performance are the areas of concentration.

• ENGL 467 History of the Theatre 3.
(3) Advanced study focused on a period or issue in Theatre history.
ENGL 469 Acting 3.
(3) (Prerequisite: ENGL 269 and permission of instructor.)
(Restriction: Not open to students who have taken 110-469D.)
Advanced training in acting involving some of the major European and North American acting theories and practices.

ENGL 473 Advanced Practical Work Theatre 1.
(3) (Restriction: Permission of instructor required)

ENGL 474 Advanced Practical Work Theatre 2.
(3)

ENGL 476 Alternative Approaches to Media 1.
(3) (Workshop course. Departmental permission required) Study of alternative uses of contemporary media with particular emphasis on the forms of independent video and community television and their relationship to mainstream television and film.

ENGL 480 Studies in History of Film 1.
(3) (In 2007/08: The War Film.)

ENGL 481 Studies in History of Film 2.
(3) (Restriction: Permission of instructor required) (In 2007/08: A Year in Film: 1950.)

2007-2008 Undergraduate Programs Calendar, McGill University
C-53
307D1/GERM 307D2 in one term.

GERM 307D1 (2), GERM 307D2 (3) German Language - Intermediate. (Fall, Winter) (Prerequisite: GERM 200 or GERM 202, 202D1/D2, or equivalent, or permission of the Department.) (Students must register for both GERM 307D1 and GERM 307D2.) (No credit will be given for this course unless both GERM 307D1 and GERM 307D2 are successfully completed in consecutive terms.) Review of grammar, further development of basic skills; literary and cultural readings.

GERM 325 German Literature - Intensive Advanced. (6) (Fall or Winter) (6 hours) (Prerequisite: GERM 300 or GERM 307D1/D2, or equivalent, or permission of the Department.) (Required for program students.) This course aims at developing post-intermediate proficiency in listening, speaking, reading, and writing skills, with emphasis on oral and written expression. Special attention is given to word formation and to the proper choice of grammatical structures, vocabulary, and phraseology.

GERM 330 Landeskunde. (3) (Winter) (Given in German) (Prerequisite: GERM 325 or equivalent, or permission of Department.) Introduction to images of modern Germany, perceptions and conceptions of Germany since the Second World War.

• GERM 331 Germany after Reunification. (3) (Winter) (Given in German) (Prerequisite: GERM 325 or equivalent, or permission of the Department.) The events which led to the fall of the Berlin Wall, the reunification of Germany in 1990 and the changing cultural, social, political and economic landscape of the 'New Germany.' Highlighting issues of cultural and social politics, texts discussed include historical, literary and film material.

GERM 336 German Grammar Review. (3) (Winter) (Given in German) This advanced-level course offers a comprehensive review of basic German grammar. The course can be taken concurrently with a language course at the third level.

• GERM 341 Essay Writing. (3) (Fall) (Given in German) (Prerequisite: GERM 325 or equivalent, or permission of Department.) This course is designed to further develop the writing skills of students having attained the 325-level. The rhetorical strategies of writing will be studied and analyzed with different text genres: letters, curriculum vitae, summaries, book reviews, expository and argumentative essays, minutes, feature stories, term papers, etc. Particular attention will be paid to argumentation, vocabulary, and style.

• GERM 342 Translation. (3) (Fall) (Given in German) (Prerequisite: GERM 325 or equivalent, or permission of Department) An introductory course, emphasizing practice more than theory. It covers mainly written translation (from German into English, i.e. reading and writing, and to manipulate, grammatical/syntactical structures and to get a sense of semantic accuracy. The course is designed to familiarize students with basic technical terminology and to enable them to observe, analyze and produce accurate and appropriate translations. Vocabulary building is not a main issue.

GERM 345 Business German 1. (3) (Fall) (Given in German) (Prerequisite: GERM 325 or equivalent, or permission of Department) This course introduces students to the terminology and syntax of Business German in contrast with English to ensure a sound basis for business communication.

GERM 346 Business German 2. (3) (Winter) (Given in German) (Prerequisite: GERM 345 or equivalent, or permission of the Department) This course is designed to develop oral and written skills for competence in German for business communication as well as cross-cultural awareness by discussing current materials from various sources.

GERM 352 German Literature - 19th Century 3. (3) (Fall)

• GERM 353 19th Century Literary Topics. (3) (Winter) (Given in German) (Prerequisite: GERM 325, or equivalent, or permission of the Department) Varying topics of 19th century literature.

• GERM 354 Literary Approach to Song. (3) (Fall) (Prerequisite(s): No official prerequisite, but students should have GERM 307D1/D2 or equivalent.) (Given in English.) Examination of the original cultural/historical background of texts and their settings by composers such as Schubert, Schumann, Wagner, Mahler and the New Vienna School.

GERM 355 Nietzsche and Wagner. (3) (Fall) (Given in English) This course examines the relationship between the philosopher Friedrich Nietzsche and the composer Richard Wagner. It explores their intellectual kinship, their view of art, music, and philosophy in the context of Nietzsche's critique of modernity and decadence and analyzes the Third Reich's and Hollywood's appropriation of Nietzsche and Wagner.

• GERM 358 Franz Kafka. (3) (Fall) (Given in English) This course will look at the works on Franz Kafka, a "classic" modernist author, in three characteristic genres: the story, the novel, and the short prose piece. A selection of Kafka's letters and diary entries as well as critical approaches to his work will also be studied.

• GERM 359 Bertolt Brecht. (3) (Fall) (Given in English) This course provides an overview of Brecht's development as a dramatist and as a theorist, advocate and practitioner of a new form of theater. Attention will also be given to Brecht as a poet and to film versions of Brecht's works.

• GERM 360 German Literature 1890 to 1918. (3) (Fall) (Given in German) (Prerequisite: GERM 325 or equivalent) The course deals with various genres of literature and forms of culture associated with Naturalism and Expressionism from the turn of the century to the Weimar Republic. Writers studied may include: Hauptmann, Wedekind, Schnitzler, Heinrich Mann, Sternheim, Kaiser, Thomas Mann, Kafka, Rosa Luxemburg.

• GERM 361 German Literature 1918 to 1945. (3) (Winter) (Given in German) (Prerequisite: GERM 325 or equivalent) The course deals with the culture, literature and society of the Weimar Republic and the period of the Third Reich and the Holocaust. Writers studied will include: Brecht, Seghers, Fleisser, Kästner, Tucholsky, Benn, Kolmar, and Lasker-Schüler.

GERM 362 20th Century Literature Topics. (3) (Winter) (Given in German) (Prerequisite: GERM 325 or equivalent) Introduction to selected topics and genres in twentieth century literature and culture.

GERM 363 German Postwar Literature. (3) (Fall) (Given in German) (Prerequisite: GERM 325 or equivalent) The course deals with the literature and culture of the Federal Republic of Germany, the former German Democratic Republic and unified Germany since 1945. It treats major authors and trends. Topics addressed include issues of nationalism and gender, multiculturalism, and other concerns of contemporary German society.

• GERM 364 German Culture: Gender and Society. (3) (Fall) (Given in English) In connection with notions of identity, nationhood, political change, and cultural difference, this course investigates concepts and issues of gender in contemporary German Society. The readings include critical essays and literary texts by writers, scholars, philosophers, journalists, politicians, and political activists.

• GERM 365 Language of Media from Manuscript to Hypertext. (3) (Winter) (Given in English) The history of communications media and their impact on our language and thought discussions of literary works in a variety of media (book, radio, film, television, hypertext) by authors such as Goethe, Kafka, Borges, Brecht, Beckett, Sontag and DeLillo.

• GERM 366 Postwar German Literature/Film. (3) (Fall) (Given in English) The course is a study of postwar German literature and film, focusing on the cinematic representation of literary texts. The emphasis is on the representation of German history in both media, on historical memory and gender relations.
GERM 367 Topics in German Thought. 
(3) (Winter) (Given in English) A variety of issues significant to the development of German cultural and intellectual life.

- GERM 380 18th Century German Literature. 
(3) (Winter) (Given in German) (Restriction: Not open to students who have taken GERM 380 and/or GERM 381) (Prerequisite: GERM 325 or equivalent) An introduction to German literature of the 18th century: Enlightenment and Sturm und Drang. The course will follow a socio-historical approach, i.e. it will attempt to delineate some of the relations that exist between the texts and their social, political, and cultural context.

- GERM 382 Faust: Chapbook to Horror Film. 
(3) (Winter) (Given in English) This course will explore why the story of a mathematician who sold his soul to the devil has remained one of the most enduring myths in western culture. Works discussed will include plays by Marlowe, Goethe, and Valery and films by Murnau, Kurosawa, and others.

- GERM 397 Individual Reading Course. 
(3) (Fall) Given solely at the discretion of the instructor.

- GERM 398 Individual Reading Course. 
(3) (Winter) Given solely at the discretion of the instructor.

- GERM 400 Interdisciplinary Seminar: Contemporary German Studies. 
(3) (Winter) (Given in English) An interdisciplinary, team-taught seminar, for third-year students on a single topic or theme. Topics may vary from year to year.

- GERM 412 Heroes, Lovers and Crusaders. 
(3) Representations of the hero in medieval German literature, his socio-political, cultural, and religious roles.

- GERM 450 Classical Period in German Literature. 
(3) (Winter) (Given in German) (Prerequisite: GERM 325 or equivalent) For the most part, the works of Goethe and Schiller are discussed.

- GERM 451 German Romanticism. 
(3) (Fall) (Given in German) (Prerequisite: GERM 325 or equivalent) This course deals with German literary texts of the Romantic period scrutinized in their literary, historical, cultural and sociological context. References will be made to the other arts, in particular to music. Writers studied will include: Hoffmann, Eichendorff, Novalis, Hoffmann, Kleist, and Tieck.

- GERM 455 Women of the Romantic Era. 
(3) (Prerequisite: GERM 325 or equivalent.) (Course is given in German for advanced undergraduate program students.) This course places at its centre the life-worlds, biographies, and forms of self-expression by German women of the Romantic Era.

- GERM 479 Individual Reading Course. 
(3) (Fall) Given solely at the discretion of the instructor.

- GERM 489 Individual Reading Course. 
(3) (Winter) Given solely at the discretion of the instructor.

- GERM 499 Internship: German Studies. 
(3) (Fall or Winter) (Prerequisite: Permission of the departmental Internship Advisor.) (Open to U2 and U3 students after completing 30 credits of a 90 credit degree program or 45 credits of a 69-120 credit program, a minimum CGPA of 2.7, and permission of the departmental Internship Advisor.) This course can only be taken as an elective course. German language proficiency required. Internship with an approved host institution or organization.

- GERM 511 Middle High German Literature. 
(3) (Fall) (Given in German) (Prerequisite: GERM 325 or equivalent) This seminar course will acquaint students with the German courtly literature of the 12th and 13th century, its concepts, concerns and its sociology. The knightly romances of Hartmann von Aue (Erec), Wolfram von Eschenbach (Parzival), Gottfried von Strassburg (Tristan), and the heroic epic (Nibelungenlied) will be read and discussed in class, Hartmann's Erec in the original MHG language as well as in translation, to give students a basic acquaintance with the Middle High German literary language. Writers studied will include: Hartmann von Aue, Gottfried von Strassburg, Wolfram von Eschenbach.

- GERM 570 Joint Honours Thesis. 
(3) (Fall or Winter) (Restriction: For students in the Joint Honours Program only.)

- GERM 575 Honours Thesis. 
(3) (Fall or Winter) (Restriction: For students in the Honours Program only.)

- GERM 580 Topics in 18th Century Literature. 
(3) (Prerequisite: GERM 325 or equivalent.) Topics in eighteenth-century German literature.

HIST 211 American History to 1865.
(3) (Fall) Introduction to the history of colonial North America and the United States up to the Civil War, in their Atlantic context.

HIST 212 Science and Medicine in Canada.
(3) The social and intellectual history of science and medicine in Canada, from early exploration, through the rise of learned societies, universities and professional organizations, to the present age of big science and biotechnology.

HIST 213 World History, 1300-2000.
(3) A thematic and comparative approach to world history, beginning with the rise of the Mongols in the thirteenth century, and ending with globalization in the late twentieth century. Trade diasporas, technology, disease and imperialism are the major themes addressed.

HIST 214 Introduction to European History.
(3) (Restriction: Not open to students who have taken 101-215D) The course covers European History from the Ancient Greeks to the first part of the seventeenth century. The object of the course is two-fold, to provide students with: 1) a number of essential canons of western history; 2) hands-on experience in the reading, interpretation and writing of history.

HIST 215 Modern European History.
(3) (Restriction: Not open to students who have taken 101-215D) A social, economic, political and cultural survey of European History from the early seventeenth century to the present.

HIST 216 History of Russia to 1801.
(3) A survey of Russian history, from the origin of the Slavs to the establishment of the Kievan State, the coming of the Mongols, the emergence of Muscovy, and the rise of the Russian Empire.

HIST 218 Modern East Asian History.
(3) (Winter) An introduction to the history of China and Japan from the seventeenth century to the present, including modernization, nationalism, and the interaction of the two countries.

HIST 219 Jewish History: 1000-2000.
(3) The Jewish experience from the rise of the European centres to the present.

HIST 221 United States since 1865.
(3) (Winter) Examines the defining moments and movements in the U.S. since Reconstruction, including populism, progressivism, the World Wars, the New Deal, the Cold War, the sixties and its consequences. Emphasis on the political, social and ideological transformations that ensued.

HIST 222 Britain Since 1688.
(3) (Prerequisites: HIST 204 or consent of instructor) A survey of the development of Britain from the Glorious Revolution to the present day. Emphasis on political, social, economic and intellectual change against a background of Britain's evolving imperial and world role.

HIST 225 History of France to 1789.
(3) Survey of French society from the fall of the Roman Empire to the outbreak of the French Revolution. Emphasis on the construction of the French state in the medieval period, religious conflicts of the 16th century, social and economic structures under absolutism, intellectual and economic changes in the 18th century.

HIST 226 Eastern Europe in 20th Century.
(3) Introductory survey of the region's history from the twilight of imperialism in the 1980s to the post-Communist 1990s. Consideration will be given to Russia and the Soviet Union, the Balkans, Austria-Hungary and its successors; the impacts of two World Wars, communism, nationalism, and fascism; and the revolutions of 1989/91.

HIST 231 Archaeology of the Ancient World.
(3) A survey of the history of classical archaeology in the Graeco-Roman Mediterranean through the study of material evidence and literary texts.

HIST 236 Russia from 1801 to 1991.
(3)

HIST 240 Modern History of Islamic Movements.
(3) Islamic revival in the Middle East which led to the rise of different versions of Islamic traditions and beliefs. Emphasis on the nature and character of leading nationalist and Islamic movements and their ideologues since the late 19th century.

HIST 249 Health and the Healer in Western History.
(3) (Restriction: Not open to students who took HIST 349 prior to Winter 2006.) (Note: Also available to first-year medical students in their options program.) The natural history of health and disease and the development of the healing arts, from antiquity to the beginning of modern times. The rise of "western" medicine. Health and healing as gradually evolving aspects of society and culture.

HIST 292 History and the Environment.
(3) Sketch of the history of the material aspects of human interaction with the rest of nature. Included will be a historian's view of the social, technical, and ecological implications of the great variety of activities devised by our species. Though global in outlook, this course will emphasize the relevant historiography of France, England and North America.

HIST 300 Nationalisms in Canada.
(3) (Prerequisite: HIST 203 or permission of instructor.) (Restriction: Not open to students who took CANS 300 before September 2002.) An historical explanation of the Canadian experience of nationalism from the Patriots to the First Nation, with reference to politics, economics, iconography, ideology and multicultural experience.

HIST 301 U.S. Presidential Campaigning.
(3) (Prerequisite: any course in U.S. history or consent of instructor) The history of presidential campaigning in the U.S. will be considered against the backdrop of party change, technological development and the growth of American democracy.

HIST 302 International Relations History 1: 1750-1950.
(3) (Prerequisite: one course in post-1800 History or permission of instructor.) The history of international relations during the era of the four global wars, the expansion of the West in world affairs, the changes in the balance of power in Europe,
the rise and fall of the colonial empires, and the ascendency of the
flank powers, Russia and the United States.

HIST 303 History of Quebec.
(3) (Prerequisite: HIST 202/203) (The ability to
read French is helpful but not mandatory) Covering Quebec
history from New France to contemporary times, this course will
include themes like ethnic relations, citizenship, gender and
material culture. It is of particular interest to students in
Education who foresee teaching about Quebec.

HIST 304 International Relations History 2: Cold War.
(3) (Prerequisite: HIST 302 or HIST 215 or a 20th C
history course or permission of instructor.) The history of the
Cold War. Special attention will be paid to the different
viewpoints and experiences of the Cold War participants by
studying the historiography and archival materials released in
the Eastern Block and Western World.

HIST 305 Ancient Warfare and Imperialism.
(3) (Prerequisite: HIST 205 or HIST 231 or permission of
instructor.) (Restriction: Not open to students who have taken
101-305D. Not open to U0 students) Comparative study of ancient
military history, warfare and imperial strategies.

● HIST 306 East Central Europe Since 1944.
(3) (Prerequisite: HIST 226) The motives and methods of the
Soviet take-over of East Central Europe from 1944. The
introduction of Stalinist models (collectivization,
industrialization, purges, etc.) and their effectiveness;
Yugoslavia's deviation; de-Stalinization; the rebellions of 1956
in Poland and Hungary; the Dubcek experiment; COMECON
and other institutions; the background to contemporary events in
Poland.

● HIST 307 Jews in Poland.
(3) (Prerequisite: any course in Jewish history or East European
History) (Restriction: Not open to students who have taken
101-307D) Analyses of primary sources (in translation) related
to the social, economic and institutional history of the Jews in
Poland and their place in the East European Jewish community.
Topics include: the Jews during "The Flood" (1648 - 1667), the
communal crisis of the late 17th century, the Frankist movement,
and Hasidism.

HIST 308 Formation of Chinese Tradition.
(3) (Restriction: Not open to students who have taken 101-308D)
An examination of the multiple sources of the Chinese imperial
system from the period of the neolithic culture interaction
sphere to the fall of the Han dynasty in 220 C.E. Special
attention is paid to socio-economic developments as well as to
the evolution of philosophy, ideology, and social practice. The
sequel to this course is HIST 358.

HIST 309 History of Latin America to 1825.
(3) (Fall) The social, cultural, and economic aspects of Latin
America and the Caribbean in the colonial period. Topics
include: pre-Columbian and hispanic cultures in conflict,
plantation empires, and the transition to independence. The
sequel to this course is HIST 360.

● HIST 310 Knowledge and Atlantic Empire.
(3) (Prerequisites: HIST 211 or permission of instructor.)
The role of knowledge in British colonization and imperialism in
the early modern Atlantic world. Explores the notion of an
Atlantic "information order" (and its problems) by examining the
polics of knowedge from England and Ireland to British America,
and ultimately the early United States and British India.

● HIST 311 The Gilded Age and The Progressive Era.
(3) (Prerequisite: any course in U.S. history or consent of
instructor) The social, economic, and political consequences of
industrialization in the history of the United States between
1877 and 1914. Emphasis on the rise of mass production,
urbanization, immigration, rural protest, the labour movement,
social and political reform.

● HIST 312 East-Central Europe: 1453-1740.
(3) Developments from the fall of Constantinople to the
accession of Maria Theresa; the Ottoman impact; the Renaissance
in Hungary and Poland; the emergence of the Hapsburg Empire; the
Reformation and Counter-Reformation; the Thirty Years' War;
the imposition of serfdom; the decline of Poland-Lithuania and
the collapse of the Ottoman system; East Central Europe as a
frontier region between Catholicism, Orthodoxy and Islam.

● HIST 313 East-Central Europe: 1740-1914.
(3) History of the Austro-Hungarian Empire, Poland and the
Balkans from the Age of Enlightenment to the outbreak of WW II.
Special consideration will be given to the implications of
serfdom and emancipation; the Romantic movement and rise of
nationalism; modernization and the struggle to maintain
stability.

● HIST 314 Tudor England.
(3) (Prerequisite: HIST 204 or HIST 214 or HIST 215
or permission of instructor.) Survey of British and Irish
history from c. 1450 to 1660. Focus will be on the origins
and consequences of the Protestant and Catholic Reformation of
the Tudor and early Stuart dynasties. These religious changes will
be approached from a variety of perspectives including
political, social, intellectual, economic and religious
history.

HIST 315 Themes in World History.
(3) (Prerequisite: HIST 213 or Permission of Instructor.)
Historical phenomena that transcend the boundaries of
nation-status and contributed to the long-term development of
globalization.

HIST 316 Russia: Revolutions 1905 and 1917.
(3) (Prerequisite: A course in Russian, Soviet or European
history) Reform and Revolutions: a comparison of the collapse of
the Soviet Union in 1991 and of the Tsarist Empire and
Provisional Government in 1917, with some discussion of the
reforms that anticipated each cataclysm.

● HIST 317 War and Society 2.
(3) (Prerequisite: one general course in European history or
HIST 305) (Restriction: Not open to students who have taken
101-305D. Not open to U0 students) The rise of permanent armies
and navies, military institutions of Eastern Europe; Warfare
from Wallenstein to Napoleon; emergence of the national army in
Russia; the Western military tradition after Clausewitz, total
War in the twentieth century.

● HIST 318 History of Japan 1.
(3) (Restriction: Not open to students who have taken 101-318D
or 101-293A) A survey of Japanese history and culture from
earliest times to the 17th century, this course aims to provide
students with a broad understanding of important themes in
Japanese history.

● HIST 319 The Scientific Revolution.
(3) (Prerequisite: a 200-level course in early modern history,
or a survey course in philosophy, or permission of the
instructor) The shift from the medieval to the modern view
of man's place in the universe that took place between Copernicus
and Newton and its intellectual and social implications.

● HIST 320 European Thought and Culture 1.
(3) (Prerequisite: HIST 214 or HIST 215) (Restriction:
Not open to students who have taken
101-320D) The cultural
and intellectual history of Europe from the late Middle Ages to the
to the 18th century traces the origins of the modern sense
of self in popular culture and in the texts of Erasmus, Luther,
Calvin, Descartes, Pascal, Voltaire and Rousseau.

(3) (Prerequisite: A course in U.S. history or permission of instructor.) The history of the United States from the Great War to the end of the 1940s. Social change and conflict, political conservatism, economic prosperity and the culture of consumption during the 1920s; the consequences of the Great Depression and the New Deal.

HIST 332 Constitutional History: Canada - 1867.
(3) (Prerequisite: one course in Canadian history or consent of instructor) A survey course of the development of constitutional arrangement in Canada from the Royal Proclamation of 1763 until Confederation.

(3) (Prerequisite: HIST 202 or consent of instructor) The development of the French Empire in North America, with particular emphasis on French-Native encounters arising through missions, trade, and military alliances.

(3) (Prerequisite: HIST 202 or consent of instructor) Social and cultural history of France's ancien régime settlement colonies in North America. Topics include the links between the absolutist colonial state and society; family history; the Church, gender, and popular religion.

(3) (Restriction: Not open to students who have taken 101-337D) An overview of the history of Japanese thought and mentality from earliest times to 1700. By examining not only texts of representative thinkers but also other (especially literary) materials, it aims at elucidating changing and continuing characteristics of the Japanese intellectual history. The sequel to this course is HIST 352.

(3) (Prerequisite: one previous course in Chinese or Asian history or permission of instructor) The history of China from the establishment of the Chinese Communist Party to the present. Contents: origins and development of the Chinese Communist movement; the War of Resistance against Japan; The People's Republic, the Cultural Revolution, Deng era reforms.

HIST 339 Arab-Israeli Conflict.
(3) (Restriction: Open to U2 or U3 students only or permission of instructor.) The political, military, and diplomatic history of the Arab-Israeli conflict, with a focus on a number of historiographical debates over specific issues, such as the 1948 and 1967 wars, and the failures of the various peace initiatives.

HIST 342 Canada: External Relations since 1867.
(3) (Prerequisite: HIST 202 and HIST 203) This course will examine the historical development of Canadian external relations before WW II. Particular emphasis will be placed on Canadian-American relations, Canadian-Imperial relations, the growth of Canadian diplomatic autonomy and participation in the League of Nations.

HIST 343 Women in Post-Confederation Canada.
(3) (Prerequisite: HIST 203) This course examines women's contribution to the economic and social development of Canada as well as the changes in the image and status of women. Special emphasis will be on the relationship between women's roles in the private sphere and the public domain.

HIST 344 Police Institutions.
(3) (Prerequisite: One course in British, Canadian or American history) The origins of law enforcement from Saxon juries through Norman justices of the peace, to Scotland Yard and the London Metropolitan police. Focus on the Royal Irish Constabulary and its influence on the growth of rural police in Commonwealth countries.

HIST 345 History of Italian Renaissance.
(3) (Prerequisite: HIST 214 or consent of instructor) An introduction to the economy, society, politics and intellectual developments in Italy from approximately 1300 to the early 16th century.

HIST 346 France, 1914 to the Present.
(3) (Prerequisite: HIST 214 and HIST 215 or written consent of instructor) A study of the history of France from World War I to the present.

HIST 347 History and Sexuality 2.
(3) 1700 to the present, with a particular focus on Europe and North America. Possible topics include: patterns of fertility and sexual practice; prostitution; religion and sexuality; the medical and legal construction of sexualities; the rise of sexology; gay liberation movements; queer politics.

(3) (Prerequisite: HIST 208 or HIST 218 or permission of instructor) An introduction to traditional Chinese ideas about human beings and their relationship with heaven and earth. Special emphasis on the history of medicine and the body, alchemy, geomancy and divination techniques, agriculture and sericulture, astronomy, and engineering and their relation to changing social and cultural formations.

HIST 350 Science and the Enlightenment.
(3) (Prerequisite: HIST 215 or permission of instructor.) Explores the relationship between the natural sciences and the eighteenth-century Enlightenment. Examination of works in
post-Newtonian science as well as their broader cultural meaning, the history of material practices, the origins of social science, and the role of geography and international context beyond Western Europe.

HIST 351 Themes in U.S. History since 1865.
(3) (Prerequisite: any course in U.S. history or consent of instructor) Aspects of American history from the gilded Age through the Cold War era.

HIST 352 Japanese Intellectual History 2.
(3) (Prerequisite: one previous course in East Asian history, including Japanese history and Chinese history, or permission of instructor) (Restriction: Not open to students who have taken 101-337D) An overview of the history of Japanese thought and mentality from 1700 to the present. By examining not only texts of representative thinkers but also other (especially literary) materials, it aims at elucidating changing and continuing characteristics of the Japanese intellectual history.

HIST 353 History of Montreal.
(3) (Prerequisite: HIST 202 or HIST 203 or permission of the instructor.) The history of Montreal from its beginnings to the present day. Montreal’s economic, social, cultural and political role within the French and British empires, North America, Canada, and Quebec; the city’s linguistic and ethnic diversity.

HIST 355 Topics in German History.
(3) (Prerequisite: HIST 249 and HIST 235 or a European survey course of the instructor) (Restriction: Not open to students who have taken HIST 354 and HIST 355 prior to 200609.) Topics in German history from the confederation of two German Great Powers through revolution, confrontation, separation and consolidation to the destruction of the Dual Monarchy.

HIST 356 Medicine in the Medieval West.
(3) (Winter) (Prerequisites: HIST 214 or HIST 249 or HIST 380 or permission of instructor.) The history of ideas about the human body, disease and therapeutics and the diverse practices of medicine in western Europe in the Middle Ages (ca. AD 300-1500), with particular attention to their social, intellectual, cultural and religious context.

HIST 357 Religion and Canadian Society in Historical Perspective.
(3) (Prerequisite: HIST 202 and HIST 203) (Restriction: Not open to students who have taken 101-469) This course will examine the religious history of Canada and Canadian society between 1870 and 1914. Topics covered will include aboriginal peoples, European settlement of the West, provincial rights, the national policy, social reform movements, industrialization, immigration and the rise of cities.

HIST 360 Latin America since 1825.
(3) (Prerequisite: HIST 202 and HIST 203) The development of what is now the Canadian West from the 17th century to the entry of Saskatchewan and Manitoba into confederation. Topics include: culture contact between native and European, the fur trade, entry of the West into confederation and its evolution from colonial to provincial status.

HIST 361 The Canadian West to 1905.
(3) (Prerequisite: HIST 202 and HIST 203) The growth of what is now the Canadian West from the 17th century to the entry of Saskatchewan and Manitoba into confederation. Topics include: culture contact between native and European, the fur trade, entry of the West into confederation and its evolution from colonial to provincial status.

HIST 362 The Canadian West since 1905.
(3) (Prerequisite: HIST 203 or consent of instructor) An examination of significant themes in the history of British Columbia and the Prairie Provinces since 1905. Topics include immigration, economic development, regional protest movements and class conflict within the West itself.

HIST 363 Canada 1870-1914.
(3) (Prerequisite: HIST 202 and HIST 203 or permission of instructor) This course will examine social, economic, political and cultural aspects of Canadian society between 1870 and 1914. Topics covered will include aboriginal peoples, European settlement of the West, provincial rights, the national policy, social reform movements, industrialization, immigration and the rise of cities.

HIST 364 Canada 1914-1945.
(3) (Prerequisite: HIST 202 and HIST 203 or permission of instructor) This course will examine Canada and Canadian society between 1914 and 1945. It will focus on the social, political, economic and cultural impact of the two World Wars and the economic crisis of the 1930s. Among the topics will be Canadian external relations, political and social protest, popular culture, demographic changes and prohibition.

HIST 365 17th - 18th C. Western Europe.
(3) (Prerequisite: HIST 214 or consent of instructor) (Restriction: Not open to students who have taken 101-325D) A comparative analysis of the major states of Western Europe: Absolutism and its alternatives; religious and scientific thought; classical and enlightenment cultures; international and colonial rivalries. Special attention will be placed on social and economic changes between the 1630s and the late 18th century.

HIST 366 Themes in Latin American History 1.
(3) (Prerequisite: HIST 309 or HIST 360 or permission of the instructor.) (Note: Topics will vary from year to year.) Exploration of a specific topic in the history of Latin America and the Caribbean, 1492 to the present.

HIST 367 Canada since 1945.
(3) (Prerequisite: HIST 202, HIST 203) Elements of Canada’s political, social, economic, and cultural history since World War II. Topics will include constitutional questions, gender and class issues, the role of the state, regionalism, consumer society, the Quiet Revolution, and nationalism in Canada.

HIST 368 Greek History: Classical Period.
(3) (Prerequisite: HIST 205 or HIST 231 or permission of instructor.) The Classical period of Greek history, from the end of the Persian wars to the death of Alexander the Great (479-323 B.C.).

HIST 369 Greek History: Early Greece.
(3) (Prerequisite: HIST 205 or HIST 231 or permission of instructor.) Historical study of the period from the Mycenean Age to the end of the Archaic Age.

(3) (Prerequisite: HIST 203 or consent of the instructor) An examination of how politics evolved in Canada’s parliamentary system from campaigns to media management, including party systems, ideology, the role of leadership and the growing role of the state.
HIST 371 American Civil Rights 1877-1940.
(3) (Prerequisite: any course in U.S. history or consent of instructor) The social, economic, political, and constitutional history of civil rights in the United States from the end of Reconstruction through the 1930s. Emphasis on segregation and disfranchisement; immigration restrictions, Americanization and national identities; civil rights movements and organizations; women's suffrage; voting rights and representation.

HIST 373 Canadian Labour History.
(3) (Prerequisite: HIST 203 or equivalent or consent of instructor) (Restriction: Not open to students who have taken HIST 353) This course explores themes in labour and working class history in Canada.

● HIST 375 Roman History: Early Empire.
(3) (Prerequisite: HIST 205 or HIST 231 or permission of instructor.) The history of the Roman Empire from Augustus to Marcus Aurelius.

HIST 376 Roman History: Later Empire.
(3) (Prerequisite: HIST 205 or HIST 231 or permission of instructor.) The history of the Roman Empire from Marcus Aurelius to Justinian.

HIST 377 The United States, 1940-1965.
(3) (Prerequisite: any course in U.S. history or consent of instructor) Major events in politics and international affairs, culture and society, and the economy in the U.S. during and after World War II. Topics include: The War and American society; the first years of the Cold War; economic prosperity and social change; the civil rights movement; Vietnam to 1965.

● HIST 378 Roman & Greek Social History.
(3) (Prerequisite: HIST 205 or HIST 231 or permission of instructor.) Roman and Greek social history including the family and domestic space, economic structures, and religious beliefs.

HIST 380 Western Europe: The Middle Ages.
(3) (Restriction: Not open to students who have taken 101-380D) History of Western Europe from the later Roman Empire through the 15th century: sub-roman and Carolingian civilization, feudal monarchy; the Church and the laity; domestic life and social institutions; cultural developments.

HIST 381 Colonial Africa: Health/Disease.
(3) (Prerequisite: HIST 200 or HIST 201 or HIST 349 or permission of the instructor) A study of the impact of disease on African societies over the last three centuries. Topics include: the efforts of Africans to control their ecology, and to maintain their own medical traditions; the wider African responses to Western bio-medicine, and the relationship of disease to nutrition, demography, and public health.

● HIST 382 History of South Africa.
(3) (Prerequisite: HIST 200 and HIST 201) History of South Africa from precolonial times to the present. Topics include: precolonial societies; British and Dutch colonialism; slavery in colonial South Africa; the Zulu kingdom; mining capitalism; the Boer War; Afrikaner nationalism; apartheid; the anti-apartheid struggle; music, religion, and art; challenges of the post-apartheid state.

● HIST 383 Eighteenth-Century Britain.
(3) (Prerequisite: HIST 215 or permission of instructor.) (Restriction: Not open to students who have taken HIST 383 and HIST 384 prior to 2005.) Cultural, intellectual, political, economic and social history of Britain and Ireland in the eighteenth century; the era of the creation of the United Kingdom and the rise of a great commercial and imperial power.

HIST 384 Nineteenth-Century Britain.
(3) (Prerequisite: HIST 215 or permission of instructor) (Restriction: Not open to students who have taken HIST 384 prior to 2005.) Cultural, intellectual, political, economic and social history of Britain and Ireland in an era of unprecedented economic and cultural change as the United Kingdom became the world's first industrial nation and leading imperial power.

HIST 386 Twentieth-Century Britain.
(3) (Prerequisite: HIST 215 or permission of instructor) (Restriction: Not open to students who have taken HIST 385 and HIST 386 prior to 2003.) From a range of perspectives, including cultural, intellectual, political, economic and social history, this course examines Britain from the height of its power, through two world wars, the building of a welfare state, the dissolution of Empire and entry into Europe, to the start of the 21st century: consensus, decolonisation, immigration, culture and society, Northern Ireland, Scottish and Welsh nationalism, Thatcherism, the European Union.

HIST 387 The First World War.
(3) A world-wide political, social, economic, cultural and military survey, from the origins of the Great War to the Treaty of Versailles.

HIST 388 The Second World War.
(3) A world-wide political, social, economic, cultural and military survey, from the Treaty of Versailles to the first years of the Cold War.

HIST 390 France in the Ancien Régime.
(3) (Prerequisite: HIST 214 or HIST 225 or permission of instructor) (Restriction: Not open to students who have taken 101-425D) The history of France from the end of the Thirty Year's War to the eve of the French Revolution. A reading knowledge of French is recommended.

● HIST 391 Roman History: Republic.
(3) (Prerequisite: HIST 205 or HIST 231 or permission of instructor) The history of the Roman Republic from its foundation through the death of Julius Caesar.

● HIST 392 The United States since 1965.
(3) (Prerequisite: any course in U.S. history or consent of the instructor) Major events in politics and international affairs, culture and society, and economy in the U.S. since 1965. Topics include: social and political upheaval 1965-1975; Vietnam to 1975; conservative politics; Nixon and Watergate; economic change in the 1970s and 1980s; presidential leadership from Carter on.

HIST 393 Civil War and Reconstruction.
(3) (Prerequisite: any course in U.S. history or permission of instructor) (Restriction: Not open to students who have taken 101-431) The causes of the American Civil War; the social, economic, political and military forces that shaped the conflict, attempts to restructure race relations, Southern and American societies after the war.

● HIST 394 Stuart Britain and Ireland.
(3) (Prerequisite: HIST 204 or HIST 214 or permission of instructor) A study of Britain and Ireland during the seventeenth and early eighteenth centuries; topics include the nature of early British society, the outbreak of the civil wars of the 1640s, the Restoration of the monarchy, and the changes in political ideas over the period.

HIST 395 Canadian Military Experience.
(3) (Prerequisite: CANS 200 or HIST 203 or permission of instructor.) (Restriction: Not open to students who have taken 106-406) Canada's military experience since European contact. The course explores social, economic, technological and political themes as well as more traditional themes of military history.

HIST 396 Disease in Africa Since 1960.
(3) (Prerequisite: HIST 200 and HIST 201 or HIST 349 or permission of the instructor) This course examines the negatives and positives of African health since independence: the rise of new pathogens, especially HIV/AIDS, and the revitalization of old ones, such as drug resistant tuberculosis and malaria. Also examined are the growth of health infrastructure, and international successes such as the eradication of smallpox.

HIST 397 Canada: Ethnicity, Migration.
(3) (Prerequisite: HIST 202 and HIST 203 or permission of the instructor) (Restriction: Not open to students who have taken HIST 423) Immigration, ethnicity and race in Canada in the nineteenth and twentieth centuries. Topics will include the migration process, government policy and legislation, urban and rural migration, acculturation, nativism and multiculturalism.

HIST 398 Topics in Italian History.
(3) (Prerequisite: HIST 214)

HIST 399 History and Historical Methods.
(3) (Prerequisite: 6 credits of History) The nature and functions of history; changing conceptions of time and of the past; techniques historians use to find and appraise evidence;
methods of reconstructing the past. Emphasis will be given not only to documentary sources but also to the range of techniques used by historians to find and appraise evidence.

- **HIST 399D1 (1.5), HIST 399D2 (1.5) History and Historical Methods.**
  (Students must register for both HIST 399D1 and HIST 399D2.) (No credit will be given for this course unless both HIST 399D1 and HIST 399D2 are successfully completed in consecutive terms.) (HIST 399D1 and HIST 399D2 together are equivalent to HIST 399) The nature and functions of history; changing conceptions of time and of the past; techniques historians use to find and appraise evidence; methods of reconstructing the past. Emphasis will be given not only to documentary sources but also to the range of techniques used by historians to find and appraise evidence.

- **HIST 401 Topics: Medieval Culture and Society.**
  (3) (Prerequisite: HIST 214 or HIST 210 or consent of instructor) Selected topics in the intellectual and cultural history of the Middle Ages. Emphasis on modern critical approaches to medieval culture, including literature, the supernatural, religious experience.

- **HIST 403 History of Quebec Institutions.**
  (3) (Prerequisite: HIST 203 or consent of instructor) Analysis of institutional structures in Quebec with emphasis on the 19th century. Particular attention will be given to legal and property institutions in transition.

- **HIST 406 Petrine and Catherinean Russia.**
  (3) (Prerequisite: A prior course in Russian or European history) The transformation of Russian society by Peter the Great and the problems and achievements of Russia's Golden Age under the enlightened despotism of Catherine II and of her son.

- **HIST 407 Topics in Ancient History.**
  (3) (Prerequisite: 3 credits in Ancient history at the 300-level or permission of instructor.) (Restriction: Not open to Honours students in History.) An in-depth look at various topics in ancient history.

- **HIST 408 Colonialism and Native Peoples.**
  (3) (Prerequisite: HIST 202) (Restriction: Not open to students who have taken 101-580D) The nature and consequences of encounters between American native peoples and Europeans.

- **HIST 412 Women and Gender in Modern Britain.**
  (3) (Prerequisite: HIST 215 or a course in British history or permission of instructor) Women and gender in modern Britain (1850 on). Topics include early feminist political agitation, including the suffrage movement; working-class women; changing notions of gender, sexuality and women's role; women and empire.

- **HIST 413 Independent Reading.**
  (3) (Prerequisite: Written permission) (Restriction: Open to History Major Concentration students only. Students may register in this course only once) Exceptionally, and under the direction of a member of staff, advanced and highly qualified students who have an extensive background in the proposed area of study, may pursue this independent study.

- **HIST 414 Canadian Cultural History.**
  (3) (Prerequisite: HIST 202 or HIST 203 or permission of the instructor.) A cultural history of Canada, with culture defined in both the anthropological sense as comprising an entire way of life, material, intellectual and spiritual; and in the familiar sense of embodying the life of the intellect and the arts.

- **HIST 415 European Cultural History 2.**
  (3) (Prerequisite: HIST 214 and HIST 215 or a course in European intellectual history or written consent of instructor) A survey of 20th century French and European cultural/intellectual history.

- **HIST 416 British and French Identity.**
  (3) (Prerequisite: A 300-level course in British or French History or permission of instructor.) Examines the close yet conflictual histories of Britain and France through the way each formed and projected national identities, the way in which those identities changed over time, and the wider impact these various identities have had.

- **HIST 417 The Celtic Fringe.**
  (3) (Prerequisite: At least one course in Modern British History) Social, economic, political and cultural topics in the modern history of Wales, Scotland and Ireland.

- **HIST 418 Topics: Atlantic World.**
  (3) (Prerequisites: any two of the following: HIST 200, HIST 202, HIST 211, HIST 214, HIST 309 or permission of instructor.) (Restriction: Enrollment limit 25.) Exploration of a specific theme in Atlantic history, 1500 to 1850.

- **HIST 419 Central America.**
  (3) (Prerequisite: HIST 309, HIST 360 or permission of instructor) (Restriction: Not open to students who have taken 101-419D) The study of historical roots of the regional crisis of the 1980s, with particular attention to Nicaragua, El Salvador and Guatemala.

- **HIST 420 Gender and Sexuality in Modern China.**
  (3) (Prerequisite: A 300-level course in the History of China or Gender/Sexuality or permission of instructor.) The history of gender and sexuality in modern China. Topics include Chinese femininities and Chinese masculinities, theories of sexuality, and changing conceptions of gender identity under Confucianism, Western Imperialism, and socialism.

- **HIST 421 Topics in Early Modern Europe.**
  (3) (Prerequisite: a course in Early Modern Europe) Varying subjects of topical interest regarding early-modern Europe.

- **HIST 422 Topics: Migration and Ethnicity.**
  (3) (Prerequisite: HIST 397 or permission of instructor) The study of various topics and themes in the area of migration, ethnicity and race in Canada. Topics vary from year to year.

- **HIST 424 Gender, Sexuality & Medicine.**
  (3) (Prerequisite: A 300-level course History course in gender, sexuality or medicine or permission of instructor.) Gender, sexuality, and medicine since the colonial era, with a focus on North American experience. Topics will include reproductive medicine (puberty, childbirth, fertility control, menopause), changing perceptions of men’s and women’s health needs and risks, and ideas about sexual behaviour and identity.

- **HIST 425 European Food History.**
  (3) (Prerequisite: HIST 215 or permission of instructor.) A history of food and drink in European history. Topics include: feasts and famines; the introduction of new foods and drinks from Asia and the Americas; table manners and the origins of the restaurant.

- **HIST 426 Topics: British Cultural History.**
  (3) (Prerequisite: HIST 215 or a course in British history or permission of instructor) Selected topics in intellectual and cultural history of Britain and Ireland, focusing on discussion of primary texts.

- **HIST 427 The Hasidic Movement.**
  (3) (Prerequisite: HIST 307 or a course in East-European history or consent of instructor) A historical examination of the history of the Hasidic Movement from its beginnings in 18th-century Poland to the present. Although emphasis will be placed on the social history of the movement, doctrinal developments will be examined as well.

- **HIST 428 History of the Book in Britain.**
  (3) (Prerequisite: HIST 215 or permission of instructor.) The theory and the practice of using books, manuscripts and periodicals in Early Modern British
history. Topics include literacy and orality; the print revolution; censorship; readers and reading practices; newspapers and journalism; the origins of scientific persuasion and intellectual property rights.

**HIST 429 Topics: Canadian Family History.**
(3) (Prerequisite: HIST 202 or HIST 203 or permission of instructor) This course will examine themes in the history of the Canadian family from 1850. Historical study reveals the family as a diverse, changing, social institution. Marriage, childhood, sexuality, and the state will come under examination and the Canadian experience will be compared to that of the U.S.

- **HIST 430 Topics in Modern Medicine.**
  (3) (Prerequisites: HIST 249 (or HIST 349 prior to Winter 2006) or permission of the instructor.) Selected topics in the history of medicine in the 19th, 20th and/or 21st centuries will be explored through discussion of primary and secondary historical sources.

**HIST 431 Topics in U.S.History.**
(3) (Prerequisite: By permission of instructor.) Various topics in United States history.

**HIST 432 The Atlantic Provinces.**
(3) (Prerequisite: HIST 202 and HIST 203 or consent of the instructor) Themes and topics in the history of the Canadian Atlantic Provinces from the European settlement to Present.

- **HIST 433 British Queer History.**
  (3) (Prerequisites: HIST 215 or a course in British History or permission of instructor.) (Restrictions: Not open to students who have taken HIST 426 in 2002/03.) An investigation of the changing historical construction of “deviant” and “normal” sexualities in Britain since 1700, and how queer women and men discovered ways of surviving and perhaps even flourishing in the face of persecution and hostility from the state, the churches and the medical profession.

**HIST 434 British North America 1760-1867.**
(3) (Prerequisite: An introductory course in history or consent of instructor) This course will study the social-cultural and political development of British North American colonies.

- **HIST 435D1 (3), HIST 435D2 (3) Germany in the 20th Century.**
  (Prerequisites: HIST 234 and HIST 235 or a European survey course or consent of instructor) (Students must register for both HIST 435D1 and HIST 435D2.) (No credit will be given for this course unless both HIST 435D1 and HIST 435D2 are successfully completed in consecutive terms) First World War: national and international aspects; Weimar: economic crisis, and nationalism; rise of Hitler; structure of the National Socialist state; blue-print for World Power: Second World War: attempts to overthrow Hitler; the revolt of conscience; defeat; the Cold War and German unity; the post-War era.

**HIST 436 Topics: European History.**
(3) (Prerequisite: Permission of instructor.) An in-depth look at particular aspects of European history.

**HIST 438 The Vietnam Wars 1945-1975.**
(3) (Prerequisite: one course in 20th Century history or permission of instructor.) The history of the Vietnam Wars stands at the intersection of classical diplomatic-military history and multi-national, social history. The viewpoints of all participants in the conflict will be considered.

**HIST 439 History of Women in China.**
(3) (Prerequisite: a previous course in Chinese history) This course examines the changing roles of women in traditional and modern China. Topics include political, social, and legal status, sexuality and medicine, religion and culture.

- **HIST 440 Fiction and History.**
  (3) (Prerequisite: 6 credits at the 300 level in either history or literature) This course examines why and how books are classified as fiction or history. Topics include: social expectations and uses of literature; evidence and verification; the author as authority. Readings include history and fiction from various historical periods, and relevant scholarship.

- **HIST 441 Topics: Culture and Ritual in China.**
  (3) (Prerequisite: HIST 208 and HIST 218 and permission of instructor) An examination of selected aspects of the cultural and intellectual life of China. Topics vary from year to year, but include the history of popular religion, Chinese science and medicine, the esoteric arts including divination practices, law, and the influence of ideas in the production of Chinese culture.

**HIST 442 Asian Diaspora: Chinese Overseas.**
(3) (Prerequisite: One previous course in Chinese or Asian history or permission of instructor) The contexts and causes of Chinese emigration; historical patterns of migration; Overseas Chinese communities on five continents, with emphasis on Southeast Asia, Japan, North America, China; roles of migration in the history of the Chinese community in Chinatown; relations between the Overseas Chinese and China.

- **HIST 445 Late Imperial China.**
  (3) (Prerequisite: HIST 208 or HIST 218) An introduction to the social and economic history of Late Imperial China, focusing on the Ming and early to mid Qing Dynasties (1368 - 1800), and current interpretations thereof. Was this a discrete period in Chinese history? If so, why.

**HIST 447 The Natural History of America.**
(3) (Prerequisites: HIST 211 or permission of the instructor.) Examinations of the ways in which interpretations of the natural world in the Americas were constructed by European travellers, colonial settlers and others. Emphasis primarily on natural histories of colonial British America, but coverage includes comparison across national and regional boundaries within the early modern Atlantic world.

**HIST 448 Women, Gender and Sexuality in the Middle East.**
(3) (Prerequisite: A course on women, gender or sexuality or permission of instructor.) A focus on women in the history of the late-19th- and 20th-Century Middle East, and on the ways in which gender analysis and sexuality illuminate the history of national and religious communities. Topics such as: education, masculinity, sexuality, Western representations of Middle Eastern women, and gender and the nation.

**HIST 449 Medicine in the Ancient World.**
(3) (Prerequisite: HIST 349 or an introductory course in Ancient Greek or Roman history) (Restriction: Not open to students who have taken HIST 452 and HIST 453) The evolution of ideas about the human body, disease, and therapeutics, and the diverse practices of medicine in Graeco-Roman antiquity (ca 800BC - ca 600CE), with particular attention given to their social, political, cultural and religious context.

**HIST 450 Ancient History Methods.**
(3) (Prerequisite: 3 credits at the 300-level in Ancient history or permission of instructor.) Different methods and strategies employed by Ancient historians, including numismatics, epigraphy, and papyrology.

**HIST 451 The Ancient Mediterranean City.**
(3) (Prerequisite: 3 credits at the 300-level in Ancient history or permission of instructor.) Advanced study of ancient Mediterranean city-states, focusing on their urban setting and political, social, economic, and cultural institutions.

- **HIST 452 Russian Intellectual History 1825-1917.**
  (3) (Prerequisite: HIST 236 or a course in European intellectual history, or consent of instructor) Sequel to HIST 446, from the year of the Decemberist insurrection to the Bolshevik Revolution. Discussion of the Russian influence on European and American intellectuals in the 19th century.

**HIST 457 Topics in Medical History.**
(3) (Prerequisite: HIST 349 or HIST 356 or permission of instructor) This course explores different topics in medical history. Topics to be explored include the role of medicine from ancient to modern times.

**HIST 458 Modern Medicine: Seminar.**
(3) (Restriction: Not open to students who have taken 101-459D) The emergence of scientific medicine, medical professionalization, the development of public health and the process of medical specialization since 1700.

**HIST 459 Modern Medicine: Research.**
(3) (Prerequisite: HIST 458) (Restriction: Not open to students who have taken 101-459D) (Priority given to students in Honours History and students registered for the Minor in Social Studies of Medicine.) Supervised design, research, writing, and discussion of a major research paper on a theme in the history of modern medicine since 1700.
HIST 460 Milton in Myth and History.
(3) (Prerequisite: a 200-level course on modern English or European history or literature, or permission of instructor) The great poet-revolutionary as construed or caricatured by contemporaries, and posthumous fans and foes such as Voltaire, Dr Johnson, the Romantics, Whigs, Unitarians, Victorian feminists, Marxists, Bolsheviks, and ex-Marxists.

HIST 461D1 (3), HIST 461D2 (3) Topics in Modern U.S. History.
(Prerequisite: any course in American History or consent of instructor) (Students must register for both HIST 461D1 and HIST 461D2.) (No credit will be given for this course unless both HIST 461D1 and HIST 461D2 are successfully completed in consecutive terms)

HIST 462D1 (3), HIST 462D2 (3) Topics: Canadian Conservatism.
(Prerequisite: HIST 202 and HIST 203. Reading knowledge of French is required) (Students must register for both HIST 462D1 and HIST 462D2.) (No credit will be given for this course unless both HIST 462D1 and HIST 462D2 are successfully completed in consecutive terms) A critical examination of political, intellectual and institutional manifestations of conservatism in Canada from New France to Reform Party.

HIST 463D1 (3), HIST 463D2 (3) Topics: History of Women in Canada.
(Prerequisite: HIST 203 or consent of instructor) (Restriction: Not open to students who have taken HIST 493) (Students must register for both HIST 463D1 and HIST 463D2.) (No credit will be given for this course unless both HIST 463D1 and HIST 463D2 are successfully completed in consecutive terms) A research seminar on the history of women in Canada since Confederation. Students will get familiar with primary sources and are expected to produce a major research paper in the second term.

HIST 464D1 (3), HIST 464D2 (3) Topics: Latin American History.
(Prerequisite: HIST 309 or consent of instructor) (Restriction: Not open to students who have taken HIST 360 or HIST 419.) (Students must register for both HIST 464D1 and HIST 464D2.) (No credit will be given for this course unless both HIST 464D1 and HIST 464D2 are successfully completed in consecutive terms) This seminar counts as part of the North American concentration for Honours students.

HIST 465D1 (3), HIST 465D2 (3) Seminar: Italian Renaissance.
(Prerequisite: HIST 214 or consent of instructor) (Students must register for both HIST 465D1 and HIST 465D2.) (No credit will be given for this course unless both HIST 465D1 and HIST 465D2 are successfully completed in consecutive terms)

HIST 466 Seminar: Medieval Medicine
(3) Models of the body, disease and medical intervention current in western Europe between 400 and 1500 AD will be examined through analysis of primary sources in translation, and modern historical scholarship. The sequel to this course is HIST 466.

HIST 467 Indian Ocean World Slave Trade.
(3) (Prerequisites: HIST 200 or HIST 206 or HIST 213 or permission of instructor.) The origins, structure and impact of the Indian Ocean World slave trade from early times to the present day. Enslavement, the trading structure, slave functions, reactions to slavery, emancipation and ‘slave’ diaspora. Comparisons will be made to the Atlantic slave system.

HIST 469D1 (3), HIST 469D2 (3) Topics in Canadian Religious History.
(Prerequisite: HIST 202 and HIST 203, plus HIST 357. A reading knowledge of French is highly recommended) (Students must register for both HIST 469D1 and HIST 469D2.) (No credit will be given for this course unless both HIST 469D1 and HIST 469D2 are successfully completed in consecutive terms)

HIST 470D1 (3), HIST 470D2 (3) Topics: Historical Interpretation.
(Students must register for both HIST 470D1 and HIST 470D2.) (No credit will be given for this course unless both HIST 470D1 and HIST 470D2 are successfully completed in consecutive terms)

HIST 476D1 (3), HIST 476D2 (3) Seminar: Topics in Russian History.
(Students must register for both HIST 476D1 and HIST 476D2.) (No credit will be given for this course unless both HIST 476D1 and HIST 476D2 are successfully completed in consecutive terms)

HIST 477D1 (3), HIST 477D2 (3) Seminar in Jewish History.
(Students must register for both HIST 477D1 and HIST 477D2.) (No credit will be given for this course unless both HIST 477D1 and HIST 477D2 are successfully completed in consecutive terms)

HIST 478 Pre-modern Chinese Law and Society.
(3) (Prerequisite: Any 300-level course in Chinese history or permission of the instructor.) The history of Chinese law and society from early pre-imperial to late imperial times. Themes include the philosophical basis of Chinese law; development of different forms of legislation; practice of pre-modern law; law and social and political change; military law; legal cases translated from primary sources.

HIST 482D1 (3), HIST 482D2 (3) Seminar: Antiquity to Reformation.
(Prerequisite: Students must register for both HIST 482D1 and HIST 482D2.) (No credit will be given for this course unless both HIST 482D1 and HIST 482D2 are successfully completed in consecutive terms)

HIST 483D1 (3), HIST 483D2 (3) History of Montreal.
(Prerequisite: HIST 202 and HIST 203 and other courses on French Canada or consent of instructor) (Students must register for both HIST 483D1 and HIST 483D2.) (No credit will be given for this course unless both HIST 483D1 and HIST 483D2 are successfully completed in consecutive terms)

HIST 485D1 (3), HIST 485D2 (3) Seminar in Japanese History.
(Prerequisite: HIST 208 or HIST 218 or consent of instructor) (Students must register for both HIST 485D1 and HIST 485D2.) (No credit will be given for this course unless both HIST 485D1 and HIST 485D2 are successfully completed in consecutive terms) Particular attention will be paid to Japanese responses to the impact of Western culture from the sixteenth century, and to aspects of Japanese intellectual history.

HIST 486D1 (3), HIST 486D2 (3) Topics: African Social History.
(Prerequisite: HIST 200 or consent of instructor) (Students must register for both HIST 486D1 and HIST 486D2.) (No credit will be given for this course unless both HIST 486D1 and HIST 486D2 are successfully completed in consecutive terms)

HIST 489D1 (3), HIST 489D2 (3) Topics: Germany.
(Students must register for both HIST 489D1 and HIST 489D2.) (No credit will be given for this course unless both HIST 489D1 and HIST 489D2 are successfully completed in consecutive terms)

HIST 490D1 (3), HIST 490D2 (3) Honours Tutorial 1.
(Students must register for both HIST 490D1 and HIST 490D2.) (No credit will be given for this course unless both HIST 490D1 and HIST 490D2 are successfully completed in consecutive terms)

HIST 491D1 (3), HIST 491D2 (3) Honours Tutorial 2.
(Students must register for both HIST 491D1 and HIST 491D2.) (No credit will be given for this course unless both HIST 491D1 and HIST 491D2 are successfully completed in consecutive terms)
consecutive terms) (HIST 491D1 and HIST 491D2 together are equivalent to HIST 491)

HIST 493D1 (3), HIST 493D2 (3) Topics: Canadian Social History.
(Students must register for both HIST 493D1 and HIST 493D2.) (No credit will be given for this course unless both HIST 493D1 and HIST 493D2 are successfully completed in consecutive terms)

● HIST 496 Research: Medieval Medicine.
(3) (Restriction: Open only to students who have taken HIST 466) Supervised design, research, writing, and discussion of a theme in the history of western European medicine, 400 - 1500 AD.

HIST 497D1 (3), HIST 497D2 (3) Topics in Chinese History.
(Prerequisite: HIST 208 and HIST 218 and a 300-level course in Chinese History or permission of instructor) (Students must register for both HIST 497D1 and HIST 497D2.) (No credit will be given for this course unless both HIST 497D1 and HIST 497D2 are successfully completed in consecutive terms) A research seminar on aspects of Chinese history from early time to the present, with emphasis on social history.

HIST 499 Internship: History.
(3) (Prerequisite: Permission of the departmental Internship Advisor.) (Restriction: Open to U2 and U3 students with a minimum CGPA of 2.7, and permission of the departmental Internship Advisor.) Internship with an approved host institution or organization.

HIST 525 Women, Work and Family in Global History.
(3) (Prerequisite: A 300 or 400-level course in women's history or labour history or permission of instructor) (Restriction: Restricted to students in History and Women's Studies.) The shifting historical context of female labour and family in selected western and non-western countries; the interaction between labour and gender relations with special focus on women's experiences on the shop floor and in the family.

● HIST 530 U.S. Foreign Relations.
(3) (Prerequisite: one course in U.S. history or permission of instructor.) (Restriction: Enrollment limit 25.) The history and historiography, approaches and interpretations, of American foreign relations from the pre-Revolutionary era to the present.

HIST 550 Ancient History: Seminar.
(3) (Fall) (Prerequisite: Undergraduate: 6 credits at the 300 or 400-level in Ancient History or permission of instructor.) (Restriction: Honours students or advanced undergraduates who have permission of the instructor. Also open to graduate students.) Topics in ancient Mediterranean History, focusing on Greek and/or Roman society.

HIST 551 Ancient History: Research.
(3) (Winter) (Prerequisite: HIST 550) (Restriction: Honours students or advanced undergraduates who have permission of the instructor. Also open to graduate students.) Research paper on a theme in ancient Mediterranean history.

HIST 552 International Relations: Seminar.
(3) (Prerequisite: Permission of instructor.) (Restrictions: Restricted to Graduate students and Honours students or advanced students who have permission of the instructor.) Readings on and discussion of a theme in the history of international relations.

HIST 553 International Relations: Research.
(3) (Prerequisite: HIST 552) (Restrictions: Open only to students who have taken HIST 552 in the previous semester.) Supervised design of, research for and writing of a substantial research paper on a theme in international relations.

● HIST 556 Colonial America: Seminar 1.
(3) (Prerequisite: Permission of instructor.) (Restrictions: Restricted to Honours students or advanced undergraduates who have permission of the instructor. Not open to students who have taken HIST 481D1/D2.) Readings in and discussion of a theme in the history of Colonial America. Topics will change from year to year.

● HIST 557 Colonial America: Seminar 2.
(3) (Prerequisite: HIST 556) (Restrictions: Open only to students who have taken HIST 556 in the previous semester. Not open to students who have taken HIST 481D1/D2.) Supervised design, research and writing of a substantial research paper on a theme in the history of Colonial America.
European history during the period from the Italian Renaissance to the French Revolution.

**HMST-Humanistic Studies**
Offered by: Arts - Dean's Office

**HMST 206 Western Humanistic Tradition 1.**
(3) (Restriction: students registering in Humanistic Studies.) (Restriction: Not open to students who have taken HMST 200.) Implicit and explicit responses in selected texts (philosophical, literary, theological, historical) in the western tradition from 750 BCE to 1600 to the question, "What is it to be human?"

**HMST 207 Western Humanistic Tradition 2.**
(3) (Prerequisite: HMST 206) (Restriction: students registering in Humanistic Studies.) (Restriction: Not open to students who have taken HMST 200.) Implicit and explicit responses in selected texts (philosophical, literary, theological, historical) in the western tradition from 1600 to the present to the question, "What is it to be human?"

**HPSC-Hist & Phil of Science**
Offered by: Arts - Dean's Office

**HPSC 300 Independent Studies: History and Philosophy of Science.**
(3) (Restriction: Permission of Director and History & Philosophy of Science Committee) Offered by special arrangement between students in Arts or Science and a professor in either a Science or a Social Science Department. The purpose is to enable a student to undertake for credit the study of a special topic in the History or the Philosophy of Science.

**HPSC 500 Interdisciplinary Seminar: History & Philosophy of Science.**
(3) (Restriction: Permission of Instructor) At least one topic will be chosen from each of the four major areas: the mathematical, the physical, the biological, the social sciences.

**HSEL-Health Science Electives**
Offered by: Nursing

**HSEL 308 Issues in Women's Health.**
(3) (Fall) (Prerequisite: Introductory Psychology or Sociology or permission of the instructor) (Complementary course for the Women's Studies and Social Studies of Medicine Concentrations) Exploration of a wide range of topics on the health of women. Topics include use of health care system, poverty, roles, immigration, body image, lesbian health, and violence against women. Additional topics vary by year. A Health Science elective open to students in the Faculties of Arts, Science, and Medicine.

**HSEL 309 Women's Reproductive Health.**
(3) (Winter) (Prerequisite: Introductory Psychology or Sociology or permission of the instructor) (Restriction: not open for credit to students who have taken HSEL 308 prior to September 1997) (Complementary course for the Women's Studies and Social Studies of Medicine Concentrations) Concepts of health and reproduction. Canadian and international perspectives. Topics include contraception, abortion, infertility, menstruation, menopause, new reproductive technologies, prenatal care, childbirth. Additional topics vary by year. A Health Science elective open to students in the Faculties of Arts, Science, and Medicine.

**INTD-International Development**
Offered by: Arts - Dean's Office

**INTD 200 Introduction to International Development.**
(3) An interdisciplinary introduction to the field of International Development Studies focusing on the theory and practice of development. It examines various approaches to international development, including past and present relationships between developed and underdeveloped societies, and pays particular attention to power and resource distribution globally and within nations.

**INTD 400 Development Field Research.**
(3) (Prerequisite: completion of ECON 313 and 3 credits of IDS Group A Complementary Courses) (Restriction: Open only to students enrolled in International Development Studies Concentrations with prior approval of IDS program advisor and project supervisor) Supervised reading, field work and research project in international development. Requirements consist of previously approved project proposal, field component (usually carried out during the summer), and research report based on field work to be completed upon return.

**INTD 491 Research Project.**
(3) (Restriction: Open only to U3 Honours and Joint Honours students.) Supervised reading and preparation of a research project under the direction of a member of staff.

**INTD 492 Honours Thesis.**
(6) (Restriction: Open only to U3 Honours and Joint Honours students.) (Restriction: Permission of an appropriate supervising instructor and program adviser required.) Supervised reading and preparation of a research report under the direction of a member of staff.

**INTD 492D1 (3), INTD 492D2 (3) Honours Thesis.**
(Students must register for both INTD 492D1 and INTD 492D2.) (No credit will be given for this course unless both INTD 492D1 and INTD 492D2 are successfully completed in consecutive terms) (INTD 492D1 and INTD 492D2 together are equivalent to INTD 492) Supervised reading and preparation of a research report under the direction of a member of staff.

**INTD 492N1 (3), INTD 492N2 (3) Honours Thesis.**
(Students must also register for INTD 492N2) (No credit will be given for this course unless both INTD 492N1 and INTD 492N2 are successfully completed in a twelve month period) (INTD 492N1 and INTD 492N2 together are equivalent to INTD 492) Supervised reading and preparation of a research report under the direction of a member of staff.

**INTD 497 Research Seminar on International Development.**
(3) (Restriction: Open only to students in final year of an IDS Concentration) An interdisciplinary research seminar on topics of common interest to staff and students of the International Development Studies programs. See http://www.mcgill.ca/ids/courseinfo/INTD497

**INTD 499 Internship: International Development Studies.**
(3) (Restriction: Open to U2 and U3 students with a minimum CGPA of 2.7, and permission of the departmental Internship Advisor. This course will not normally fulfill program requirements for seminar or 400-level courses. A letter from a supervisor at the institution must attest to successful completion of the student's tenure.) Internship with an approved host institution or organization.
ISLA-Islamic Studies
Offered by: Islamic Studies

ISLA 200 Islamic Civilization.
(3) (Note: All readings are in English.) An introduction to, and survey of, the religious, literary, artistic, legal, philosophical and scientific traditions that constituted Islamic civilization from the 7th Century until the mid-19th Century.

• ISLA 388 Persian Literature.
(3) (Prerequisite: ISLA 200 or permission of instructor.) (Note: Readings in English.) Examination of literature produces in the Persian-speaking world from the mid 10th to the late 20th century C.E. A broad selection of texts (prose and poetry) will be studied in translation.

• ISLA 392 Arabic Literature as World Literature.
(3) (Prerequisite: ISLA 210 or permission of instructor.) Consideration of Arabic literature as part of world literature, including exploration of tensions between reading Arabic literature as local, discrete and self-contained and as part of larger global phenomena.

• ISLA 410 History: Middle-East 1798-1918.
(3) (Fall) (3 hours) A study of the Middle East from Napoleon’s invasion of Egypt to the end of WW I. Emphasis will be on the emergence of nationalism in the context of European imperialism; political, social, and economic transformation; religion and ideology; and changing patterns of alliances.

• ISLA 411 History: Middle-East 1918-1945.
(3) (Fall) (3 hours) The impact of WW I on Middle Eastern society and politics; the British and French mandates; the growth of nationalism, revolutions and the formation of national states; WW II and the clash of political interests within the region.

• ISLA 415 Modern Iran: Anthropological Approach.
(3) (Prerequisite: ISLA 210 or permission of instructor.) The modern history, social, and cultural anthropology of contemporary Iran.

• ISLA 420 Indo-Islamic Civilization: Medieval.
(3) (Prerequisite: ISLA 200 or permission of instructor.) The rise of Islam in South Asia in the 8th Century and its subsequent expansion; evolution of Indo-Islamic civilization and its apogee during Mughal rule up to 1707. Themes include state and religion; ruling institutions; political theory, Sufism and the process of conversion, as well as the formation of a composite culture.

• ISLA 501 The Qur’an: Text and History.
(3) A study of the Qur’an’s teachings, structures, style, and history in the light of early and modern scholarship.

• ISLA 505 Islam: Origin and Early Development.
(3) (3 hours) The Qur’an, Hadith, the Shari’a and their major themes. The early development of law, theology and Sufism. The development and formation of an Islamic “orthodoxy”, the development and nature of competing interpretations of Islam during the Classical Period. Topics: God, revelation, prophecy, the community and the individual and the meaning of history.

• ISLA 506 Islam: Later Developments.
(3) (3 hours) How the basic elements of Islam have been understood in the course of later Islamic history up to the present day. The nature and development of Shi’ism, Sufi brotherhoods, major intellectual trends, Islam in a world of nation states, diaspora. The challenges of modernity and the contemporary world.

• ISLA 510D1 (3), ISLA 510D2 (3) History: Islamic Civilization - Classical.
(Fall) (3 hours) (Students must register for both ISLA 510D1 and ISLA 510D2.) No credit will be given for this course unless both ISLA 510D1 and ISLA 510D2 are successfully completed in consecutive terms. The origins of the early Islamic state in Arabia and the Umayyad Caliphate. The growth of an Islamic civilization, and the “Abbasid Empire” until the Seljuk period. The rise of the Fatimids. The Caliphate of Cordoba.

• ISLA 511D1 (3), ISLA 511D2 (3) History: Islamic Civilization - Mediaeval Era.
(Fall) (3 hours) (Students must register for both ISLA 511D1 and ISLA 511D2.) (No credit will be given for this course unless both ISLA 511D1 and ISLA 511D2 are successfully completed in consecutive terms.) The Seljuks, and the medieval synthesis. The Moors in Spain and North Africa. The Crusades. The Mongols and the destruction of the Baghdad Caliphate. The Mamluk, Persian, Turkish and Indian Empires until 1700.

• ISLA 521D1 (4.5), ISLA 521D2 (4.5) Introductory Arabic.
(Fall and Winter) (5 lecture hours and laboratory) (Students must register for both ISLA 521D1 and ISLA 521D2.) (No credit will be given for this course unless both ISLA 521D1 and ISLA 521D2 are successfully completed in consecutive terms) Modern Standard Literary Arabic (non-spoken).
 ISLA 522D1 (3), ISLA 522D2 (3) Lower Intermediate Arabic. (Fall) (3 hours and laboratory) (Prerequisite: ISLA 521 or equivalent) (Formerly 397-622) (Students must register for both ISLA 522D1 and ISLA 522D2.) (No credit will be given for this course unless both ISLA 522D1 and ISLA 522D2 are successfully completed in consecutive terms) (ISLA 522D1 and ISLA 522D2 together are equivalent to ISLA 522).

 ISLA 523D1 (3), ISLA 523D2 (3) Higher Intermediate Arabic. (Fall and Winter) (3 hours) (Prerequisite: ISLA 522 or equivalent) (Students must register for both ISLA 523D1 and ISLA 523D2.) (No credit will be given for this course unless both ISLA 523D1 and ISLA 523D2 are successfully completed in consecutive terms)

 ISLA 531D1 (3), ISLA 531D2 (3) Survey Development of Islamic Thought. (Fall) (3 hours) (Prerequisite: ISLA 531D1 and ISLA 531D2.) (No credit will be given for this course unless both ISLA 531D1 and ISLA 531D2 are successfully completed in consecutive terms) (ISLA 531D1 and ISLA 531D2 together are equivalent to ISLA 531).

 ISLA 532D1 (3), ISLA 532D2 (3) Introductory Turkish. (Fall and Winter) (3 lecture hours plus conference and laboratory) (Students must register for both ISLA 532D1 and ISLA 532D2.) (No credit will be given for this course unless both ISLA 532D1 and ISLA 532D2 are successfully completed in consecutive terms)

 ISLA 533D1 (3), ISLA 533D2 (3) Lower Intermediate Turkish. (Fall and Winter) (3 lecture hours plus conference and laboratory) (Prerequisite: ISLA 532 or equivalent) (Students must register for both ISLA 533D1 and ISLA 533D2.) (No credit will be given for this course unless both ISLA 533D1 and ISLA 533D2 are successfully completed in consecutive terms)

 ISLA 541D1 (3), ISLA 541D2 (3) Introductory Persian. (Fall and Winter) (3 hours) (Students must register for both ISLA 541D1 and ISLA 541D2.) (No credit will be given for this course unless both ISLA 541D1 and ISLA 541D2 are successfully completed in consecutive terms)

 ISLA 542D1 (3), ISLA 542D2 (3) Lower Intermediate Persian. (Fall and Winter) (3 hours) (Prerequisite: ISLA 541 or equivalent) (Students must register for both ISLA 542D1 and ISLA 542D2.) (No credit will be given for this course unless both ISLA 542D1 and ISLA 542D2 are successfully completed in consecutive terms)

 ISLA 551D1 (3), ISLA 551D2 (3) Introductory Urdu. (Fall and Winter) (3 hours) (Students must register for both ISLA 551D1 and ISLA 551D2.) (No credit will be given for this course unless both ISLA 551D1 and ISLA 551D2 are successfully completed in consecutive terms) (ISLA 551D1 and ISLA 551D2 together are equivalent to ISLA 551).

 ISLA 552D1 (3), ISLA 552D2 (3) Intermediate Urdu. (Fall and Winter) (3 hours) (Prerequisite: ISLA 551 or equivalent) (Students must register for both ISLA 552D1 and ISLA 552D2.) (No credit will be given for this course unless both ISLA 552D1 and ISLA 552D2 are successfully completed in consecutive terms) Assuming a knowledge of basic grammar and vocabulary, this course continues with the study of more complex grammatical structures. Reading and composition exercises in Urdu script are designed to give intermediate competency in the language.

 ISLA 553 Advanced Urdu 1. (3)

 ISLA 581 Special Topics 1. (3) (Note: Subject matter will vary year to year, according to the instructor. Topic will be announced at the beginning of the term.) Selected topics in Islamic studies.

 ISLA 585 Arab Women’s Literature. (Fall) (3) (Prerequisite: ISLA 392 or permission of instructor.) (Note: Readings in English translation.) Explorations of writings by Arab women. Issues include: translation/reception, gender and genre, categories of knowledge about Arab women, feminist and post-colonial theories/methodologies.

ITAL-Italian

Offered by: Italian Studies

ITAL 199 FYS: Italy’s Literature in Context. (3) (Fall or Winter) (Restriction: Open only to newly admitted students in U0 or U1, who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.) (Maximum 25) (Given in English) The purpose of this seminar is to re-visit, problematically, the commonsense notion that literature "reflects" reality (or society). Classics of twentieth-century Italian writing shall be analyzed as the response of that nation’s literary imagination to the contradictions of its turbulent political and social history.

ITAL 205D1 (3), ITAL 205D2 (3) Italian for Beginners’. (Fall, Winter) (3 hours and laboratory) (Students must register for both ITAL 205D1 and ITAL 205D2.) (No credit will be given for this course unless both ITAL 205D1 and ITAL 205D2 are successfully completed in consecutive terms)

ITAL 206 Beginners’ Italian Intensive. (6) (Fall or Winter) (6 hours and 1 hour laboratory) (Restriction: Not open to students who have taken ITAL 205D1/ITAL 205D2) Designed to cover in one term the same material as ITAL 205D1/ITAL 205D2. The Summer term will also be given in Florence, Italy, as part of McGill’s Summer courses in Italy program.

ITAL 210D1 (3), ITAL 210D2 (3) Elementary Italian. (Fall, Winter) (3 hours and laboratory) (Restriction: Not open to students who have taken ITAL 205D1/ITAL 205D2 or ITAL 206) (Students must register for both ITAL 210D1 and ITAL 210D2.) (No credit will be given for this course unless both ITAL 210D1 and ITAL 210D2 are successfully completed in consecutive terms) The course is intended for students who have never studied Italian but who have had some informal exposure to the language. Grammar, reading, dictation. Intensive practice in speech patterns and written structures. Conversation and composition. Visual material and selected readings will be used in describing the making of contemporary Italy.

ITAL 215D1 (3), ITAL 215D2 (3) Intermediate Italian. (Fall, Winter) (3 hours and laboratory) (Prerequisite: ITAL 210D1 and ITAL 210D2) Designed to cover in one term the same material as ITAL 210D1/ITAL 210D2) The Summer term will also be given in Florence, Italy, as part of McGill’s Summer courses in Italy program.

ITAL 299-623 Professional Practice (Stage) in Dietetics involving special prerequisites. (Fall, Winter) (3 hours and laboratory) (Prerequisite: ITAL 215D1 and ITAL 215D2) (Formerly 397-623) (Students must register for both ITAL 215D1 and ITAL 215D2.) (No credit will be given for this course unless both ITAL 215D1 and ITAL 215D2 are successfully completed in consecutive terms)

ITAL 405FYS: Italy’s Literature in Context.

ITAL 522 Lower Intermediate Arabic. (6) (3 hours and laboratory) (Prerequisite: ISLA 521 or equivalent)
ITAL 216 Intermediate Italian Intensive.
(6) (Fall or Winter) (6 hours) (Prerequisite: ITAL 205D1/ITAL 205D2 or ITAL 206 or permission of the Department) (Restriction: Not open to students who have taken ITAL 210) Course designed to cover in one term the same material as ITAL 215D1/ITAL 215D2. Direct continuation of ITAL 206. The Summer term will be given in Florence, Italy, as part of McGill's Summer courses in Italy program.

ITAL 300 Italian Literary Composition.
(3) (Fall or Winter) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent) Analysis and discussion of selected 19th and 20th century literary texts with a view to improving language and composition skills. Review of major grammatical difficulties.

ITAL 306 Advanced Reading and Composition.
(6) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent) Course is only given in Florence, Italy, as part of McGill's Summer Study in Italy program. The understanding of grammatical structures through a variety of exercises: paraphrasing, translating, composition and discussion. Particular emphasis will be placed on syntax through the study of contemporary texts.

ITAL 307 Topics in Italian Culture.
(3) (Prerequisite: ITAL 215D1/ITAL 215D2 or ITAL 216, or equivalent) Selected topics in Italian culture (topics may vary and may concentrate on one or more of the following areas: geography, history, music, art history, political science and/or literature).

ITAL 308 Business Italian 1.
(3) (Prerequisite: ITAL 215D1/ITAL 215D2 or ITAL 216 or equivalent) Course is given in Florence, Italy, as part of McGill's Summer Study in Italy program. It focuses on the terminology, idiomatic expressions and syntax of Italian business language. Topics, such as workplace in Italy, credit institutions, chamber of commerce and its role, industrial associations, will be used to help develop and improve written and oral communication skills as they relate to the business world.

ITAL 309 Perspectives on Italy.
(3) Course is given in Florence, Italy, as part of McGill's Summer Study in Italy program. A study of various topics relating to the perception of Italy, the country, its people and their culture as seen by foreign and/or Italian writers. Course to be taught in English.

ITAL 311 Twentieth Century Texts.
(3) (Winter) A selection of narrative and theatrical works by 20th century authors, illustrating different facets of this century's social and literary experience.

ITAL 320 Manzoni: Novel and Nationhood.
(3) (Winter) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent) An analysis of the historical novel "I promessi sposi", by Alessandro Manzoni: its political, social and intellectual role in the evolution of Italy towards nationhood (Risorgimento).

ITAL 325 Masterpieces of Italian Literature 1.
(3) (Fall) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216 or equivalent). A survey of Italian literature focused on the Middle Ages and the Renaissance. Interdisciplinary approach.

ITAL 326 Masterpieces of Italian Literature 2.
(3) (Winter) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent) A survey of Italian literature from Renaissance to the 20th century. Interdisciplinary approach.

ITAL 327 A Literary Map of Italy.
(3) (Winter) (Prerequisite: ITAL 215 or 216) An introduction to Italian literary and cultural history. Sicily, Florence, Rome, Naples, Venice and Milan, studied as centres of cultural innovation at critical moments from the late Middle Ages to the Enlightenment.

ITAL 328 Contemporary Italy.
(3) (Fall) (Prerequisite: ITAL 215 or 216) A cultural studies approach to contemporary Italian society. Focus on distinctive traits of Italian popular culture through literature, film, television and other media.

ITAL 330 Commedia Dell’Arte.
(3) (Fall) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent) A study of the Commedia Dell’Arte: its historical and social background; the actors, stage techniques, masks and scenarios of the “Commedia dell’Arte”.

ITAL 331 The Art of Essay Writing.
(3) (Winter) (Prerequisites: ITAL 300 or permission of the Department) Word formation in the Italian language. Syntax and stylistic aspects of texts by Italian essayists.

ITAL 355 Dante and the Middle Ages.
(3) (Winter) (Given in English) An introduction to the work of Dante Alighieri, a pillar of medieval European literature. The times in which he lived, the institutions and cultural shifts of that era, the influence exercised by Dante's work, as well as how it has been perceived in our time.

ITAL 356 Medieval Discourses on Love.
(3) (Winter) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent) Medieval ideas, attitudes and behaviour surrounding love as represented in literature: readings will include excerpts from early Italian love lyrics, Dante's Vita Nuova, Petrarch's Canzoniere, Boccaccio's Decameron.

ITAL 360 Contemporary Italian Prose.
(3) (Winter) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent) Italian novelists, playwrights, diarists, and essayists from 1945 to the present.

ITAL 361 Italian Prose after 1945.
(3) (Winter) (Given in English) Major prose works of Italian literature as they reflect the reactions of writers to the social, cultural and political dilemmas facing Italian society in the second half of the 20th century.

ITAL 363 Gender, Literature and Society.
(3) (Winter) (Given in English) (Course for the Women's Studies Concentrations) Questions of gender identity and literary representation as they emerge from women's texts or from comparisons of women's and men's texts, in relation to specific social and historical conditions. May focus on any time period in Italian history, from medieval to contemporary.

ITAL 365 The Italian Renaissance.
(3) (Winter) (Given in English) A presentation of the main ideas and literary masterpieces of the Italian Renaissance (13th-17thC), in the context of Italy's social, political, religious and cultural climate. Reading and discussion of selected literary texts and visual material.

ITAL 368 Literature of the Renaissance.
(3) (Fall) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent) Reading and discussion of selected literary texts (Poliziano, Lorenzo, Alberti, Sannazzaro, Castiglione among others) will provide an opportunity to become familiar with the social and political conditions of literary production, the ideas and debates about language and literature, and the literary genres which emerged during the Renaissance.

ITAL 370 Italian Poetry and Music.
(3) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent) A study of the texts of Italian madrigals, canzoni, motetti and librettos in relation to their musical setting from the Renaissance to the 19th century. Emphasis on the transformation of literary texts for their adaptation to music, and on the language of Italian Opera. No specialized knowledge of music is required.

ITAL 375 Cinema and Society in Modern Italy.
(3) (Fall) (Given in English) A survey of the most important trends in post-war Italian cinema seen in the context of the rapidly and dramatically evolving society of modern Italy.

ITAL 380 Neorealism: Roots and Development.
(3) (Fall) (Prerequisite: ITAL 215D1/ITAL 215D2) Focus on pivotal narrative and cinematic works that illustrate the evolution of Italian realism from the late 19th century naturalism to post-WWII neorealism.

ITAL 385 Italian Futurist Movement.
(3) (Given in English) Futurism is essentially a multidisciplinary movement. Using textual and visual material, its various manifestations - in literature, "paraliterature", painting, photography, theatre, film, sculpture, architecture, music, dance and performance - will be examined from a double perspective: the futurist theory/practice relationships on the one hand and, on the other, the multiple links between Italian
futurism, the "historical" avant-garde outside Italy and the neo-avant garde movements of the 60s and 70s.

- **ITAL 395 Interdisciplinary Seminar.**
  
  (3) (Winter).

- **ITAL 410 Modern Italian Literature.**
  
  (3) (Winter) A study of representative works of major Italian authors from the fin-de-siècle to WW II.

- **ITAL 411 Pirandello.**
  
  (3) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent) Selected readings from Pirandello's essays, short stories, novels and plays in the light of his ideological rejection of the literature and society of his time.

- **ITAL 416 The Twentieth Century.**
  
  (3) (Given in English) Topics in twentieth-century Italian literary and cultural history. The focus may be on a movement, a theme, a genre, a specific writer, or a specific period.

- **ITAL 420 Leopardi and Italian Romanticism.**
  
  (3) (Fall) (Prerequisite: ITAL 215, ITAL 216, or equivalent) The major early 19th century poets in the context of Italian and European Romanticism.

- **ITAL 435 Ariosto's "Orlando Furioso".**
  
  (3) (Fall) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent) Ariosto's chivalresque poem in the context of the Italian Renaissance.

- **ITAL 436 Tasso's "Gerusalemme Liberata".**
  
  (3) (Fall) (Prerequisite: ITAL 215D1/ITAL 215D2) A study of Tasso’s poem in the context of the Counter Reformation.

- **ITAL 444 Individual Reading Course.**
  
  (3) (Fall and Winter) (Prerequisite: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent) In exceptional circumstances, this course may be used to meet special interests of students or to assist them in meeting the standard requirements of the Department.

- **ITAL 464 Machiavelli.**
  
  (3) (Fall) (Given in English) Machiavelli, the political thinker and man of letters. A portrait of Machiavelli as political strategist, playwright and observer of his times. Reading of The Prince as well as selected plays, letters and other writings.

- **ITAL 470 Honours Thesis.**
  
  (3) (Fall or Winter) (Restriction: Compulsory for Honours and Joint Honours students.)

- **ITAL 477 Italian Cinema and Video.**
  
  (3) (Winter) (Restriction: Not open to students who have taken ITAL 377) Different Italian film maker or videomaker every year, presenting a selection of his/her significant works. Discussions will include script analysis, interviews, articles and books by the director in focus, in addition to theoretical and critical statements by scholars. Established and new directors will be considered alternately.

- **ITAL 499 Internship: Italian Studies.**
  
  (3) (Fall or Winter) (Prerequisite: Permission of the departmental Internship Advisor.) (Restriction: Open to U2 and U3 students after completing 30 credits of a 90 credit degree program or 45 credits of a 69-120 credit program, a minimum CGPA of 2.7, and permission of the departmental Internship Advisor.) This course will not normally fulfill program requirements for seminar or 400-level courses. Internship with an approved host institution or organization.

- **ITAL 530 17th-18th Century Culture.**
  
  (3)

- **ITAL 542 History of Italian Language.**
  
  (3) (Prerequisite for Undergraduate students: permission of the Department.) A historical survey of the intense debate on the problem of literary language in Italy, from Dante to the present time, as caused by the variance between spoken and literary languages; followed by an in-depth examination of the theoretical and literary texts of one particular period.

- **ITAL 551 Boccaccio and the Italian Novella.**
  
  (3) (Winter) (Prerequisites for Undergraduate students: ITAL 215D1/ITAL 215D2, ITAL 216, or equivalent.) A study of Boccaccio’s “Decameron” and of Italian narrative prose up to the 16th century.

- **ITAL 560 Topics in 19th & 20th Century Literature.**
  
  (3) (Fall) (Prerequisite for Undergraduate students: permission of the Department.) Exploration of individual authors, genres, and literary or cultural movements that have marked Italian culture in the 19th and 20th century.

- **ITAL 563 13th-16th Century Literature.**
  
  (3) (Fall) (Prerequisite (Undergraduate): permission of the Department) Topics in the literature of the 13th to the 16th Centuries.

---

**JWST-Jewish Studies**

**Offered by:** Jewish Studies

- **JWST 199 FYS: Images - Jewish Identities.**
  
  (3) (Restriction: Open only to newly admitted students in U0 or U1, who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.) JWST 487 Tutorial in Yiddish Literature.
(3)

JWST 488 Tutorial in Yiddish Literature.
(3)

JWST 491 Honours Thesis 1.
(3) (Restriction: Open only to Honours and Joint Honours students.) A tutorial for the preparation of an Honours Thesis.

JWST 492 Honours Thesis 2.
(3) (Restriction: Open only to Honours and Joint Honours Students.) A tutorial for the preparation of an Honours Thesis.

JWST 499 Internship: Jewish Studies.
(3) (Restriction: Open to U2 and U3 students pursuing a Majors or Honours program in Jewish Studies with a minimum CGPA of 2.7; and permission of the departmental Internship Advisor. This course will not normally fulfill program requirements for seminar or 400-level courses. A letter from a supervisor at the institution must attest to successful completion of the student's tenure.) Internship with an approved host institution or organization.

• JWST 510 Jewish Bible Interpretation 1.
  (3) (Restriction: Not open to students who have taken JWST 512) The issues, approaches, and texts of Jewish Bible interpretation between the Biblical and talmudic eras: Bible interpretation in the Bible; in Greco-Roman Jewish literature; in the Mishnah, Tosefta, Targumim, and Talmudim; early Samaritan interpretation, Bible interpretation in ancient synagogue art, and in the massoretic literature.

• JWST 511 Jewish Bible Interpretation 2.
  (3) (Restriction: Not open to students who have taken JWST 512) The issues, problems, approaches, and texts of Jewish Bible interpretation in medieval, renaissance, early modern, and modern times. Interpretation in the Geonic, Ashkenazi, Sefardic, North African, Italian, European, Yemenite, North American and Israeli centres of Jewish Learning.

• JWST 523 Ancient Bible Interpretation.
  (3) Advanced level work in one aspect of Jewish Bible interpretation in ancient times.

JWST 530 Topics in Yiddish Literature.
(3) Supervised research in Yiddish literature. Work will focus on one genre, literary school or author.

JWST 531 Topics in Yiddish Literature.
(3) Supervised research in Yiddish literature. Work will focus on one genre, literary school or author.

JWST 539 Biblical Interpretation 1.
(3) Close readings in one or more texts of early rabbinic Bible interpretation: Mishnah, Tosefta, Hatakhic and Agгадic Midrashim, Talmud.

• JWST 540 Biblical Interpretation 2.
  (3) Close reading of medieval rabbinic bible interpretation: Ashkenazi and Sefaradi exegetes, commentators, philologists, philosophers and jurists.

• JWST 548 Medieval Parshanut.
  (3) Advanced level work in one aspect of Jewish Bible interpretation in medieval times.

JWST 550 The Bible in Hebrew Literature.
(3) (Readings in Hebrew) Biblical themes, issues, and characters as they emerge from a comparison of Scripture and various Hebrew essays, poems, plays, short stories and novels of the 18th, 19th, and 20th centuries.

JWST 551 20th Century Parshanut.
(3)

• JWST 552 Judaism and Poverty.
  (3) (Prerequisite: One course in Jewish Studies, Sociology or Social Work.) An introduction to the subject of poverty in Jewish literature and its influence on religions such as Christianity and Islam, and on modern, secular ideologies, especially socialism, and creative literature.

JWST 555 Topics: Modern Jewish Thought.
(3) Topic 2007-08: The Thought of Rabbi Joseph Soloveitchik.

JWST 562 Medieval Islamic and Jewish Philosophy.
(3) (Prerequisite: one course in Greek, Islamic or Jewish Philosophy; or permission of instructor.) Deals with the manifold points of contact between medieval Muslim and Jewish intellectual history. Muslim and Jewish philosophers, theologians and mystics belonged to the same currents of thought, used the same language and studied the same sources in translation, proposing similar answers to questions that arose in the context of their respective religious traditions.

JWST 575 Topics in Parshanut.
(3) Advanced level work in one aspect of Jewish Bible Interpretation that cuts across all periods of Jewish Bible interpretation.

• JWST 581 Aramaic Language.
  (3) (Requires Departmental approval) (Restriction: Not open to students who have taken JWST 506)

JWST 585 Tutorial: Eastern European Studies 1.
(3)

JWST 586 Tutorial: Eastern European Studies 2.
(3)

JWST 587 Tutorial in Yiddish Literature.
(3)

JWST 588 Tutorial in Yiddish Literature.
(3)

JWST 589 Tutorial in Jewish Literature.
(3) Supervised research in Modern Jewish history.

JWST 590 Tutorial in Jewish Literature.
(3) Supervised research in Modern Jewish history.

LACS-Latin American & Caribbean St
Offered by: Arts - Dean's Office

LACS 497 Research Seminar: Latin America and the Caribbean.
(3) (Restriction: Open to Program students and to others with permission of the Program Advisor.) (Ordinarly offered in alternate years) An interdisciplinary research seminar on topics of common interest to staff and students of the Latin-American and Caribbean Studies Program.

LACS 498 Independent Research Project.
(3) (Prerequisite: LACS 497 and permission of the Program Adviser) This course is designed to allow students to pursue interdisciplinary research projects under close supervision.
LING 200 Introduction to the Study of Language. (3) (Fall and Winter) (No prerequisite) General interest course; intended for students in all fields. Topics include: linguistic competence vs performance, language and the brain, language acquisition, sociolinguistics, historical linguistics, language universals, pragmatics.

LING 201 Introduction to Linguistics. (3) (No prerequisite.) (Note: This course is a prerequisite for all other courses in Linguistics except LING 200, LING 301 and LING 350) Primarily for students intending to take further courses in linguistics. Topics include: phonetics, phonology, morphology, syntax, and semantics. Students will be introduced to techniques of linguistic analysis.

LING 230 Phonetics. (3) (Winter) (Prerequisite: LING 201.) (Restriction: Not open to students who have taken LING 250.) Intensive training in the identification and production of speech sounds. Phenomenal analysis. The investigation of how sounds function within a system.

LING 301 Structure of English. (3) (Winter) (Prerequisite: LING 200 or LING 201) (Students who have taken LING 371 are strongly encouraged not to take LING 301) A linguistic investigation of the grammar of Modern English, focusing on the structural characteristics of English sentence types, words and sounds.

LING 320 Sociolinguistics 1. (3) (Winter) (Prerequisite: LING 201.) (Restriction: Not open to students who have taken LING 325.) A survey of language in its social context. The main focus will be on the influence of social factors like age, gender, social class and speech style on linguistic variation and change. Contact amongst languages (e.g. in Montreal) and the birth and death of languages will also be discussed.

LING 331 Phonology 1. (3) (Fall) (Prerequisite: LING 230.) (Restriction: Not open to students who have taken LING 351.) Introduction to phonological theory and analysis.

LING 350 Linguistic Aspects of Bilingualism. (3) (Winter) (Prerequisite: LING 200 or LING 201) Linguistic competence and performance in bilinguals: the organization of the bilingual's grammar. Syntactic constraints on code mixing; How many grammars are involved? Unidirectional and bidirectional grammatical interference. Structural distance between genetically related and unrelated languages and its effect on the organization of the bilingual's grammar.

LING 355 Language Acquisition 1. (3) (Fall) (Prerequisite: LING 230.) (Restriction: Not open to students who have taken LING 321.) A critical study of the application of linguistic theory and description to first and second language learning. Topics include: the acquisition of sounds, syntax and word meanings; acquisition strategies; properties of the input; theories of first and second language acquisition.

LING 370 Introduction to Semantics. (3) (Winter) (Prerequisite: PHIL 210) Introduction to the rudiments of semantics, focusing on those aspects of meaning that are invariant across contexts and the ways in which the meaning of a complex expression is determined by the meanings of its constituents.
LING 480D1 and LING 480D2 are successfully completed in consecutive terms (LING 480D1 and LING 480D2 together are equivalent to LING 480.) Honours thesis.

LING 480N1 (3), LING 480N2 (3)
(Students must also register for LING 480N2.) (No credit will be given for this course unless both LING 480N1 and LING 480N2 are successfully completed in the same calendar year.) Honours thesis.

LING 481D1 (1.5), LING 481D2 (1.5) Joint Honours Thesis.
(Students must register for both LING 481D1 and LING 481D2.) (No credit will be given for this course unless both LING 481D1 and LING 481D2 are successfully completed in consecutive terms).

LING 483 Special Topics 1.
(3) (Fall or Winter) (Restriction: Permission of instructor.)
(Restriction: Not open to students who have taken LING 460.)
Intensive study of a selected field or topic.

LING 484 Proseminar 2.
(3) (Fall or Winter) (Restriction: Permission of instructor.)
(Restriction: Not open to students who have taken LING 462.)
Intensive study of a selected field or topic.

LING 485 Special Topics 3.
(3) (Prerequisite: LING 331 or LING 370 or LING 371 or permission of instructor.)
Intensive study of a selected field or topic.

LING 486 Special Topics 4.
(3) (Prerequisite: LING 331 or LING 370 or LING 371 or permission of instructor.)
Intensive study of a selected field or topic.

LING 488 Independent Study 1.
(3) (Fall or Winter) (Restriction: Permission of instructor.)
Independent study of a selected field or topic.

LING 489 Independent Study 2.
(3) (Fall or Winter) (Restriction: Permission of instructor.)
Independent study of a selected field or topic.

LING 499 Internship: Linguistics.
(3) (Restrictions: Limited to U-2 and U-3 students, with a minimum CGPA of 2.7, and permission of the department.)
Internship with a host institution or organization.

LING 520 Sociolinguistics 2.
(3) (Fall) (Prerequisite: LING 320 or permission of instructor.)
A seminar on variationist "micro-sociolinguistics", including a survey of the most important primary literature on sociolinguistic variation and introduction to sociolinguistic fieldwork.

LING 521 Dialectology.
(3) (Fall) (Prerequisite: LING 230 and LING 320) An introduction to the theory and methods of dialectology (the study of regional variation in language) with an emphasis on connections with linguistic theory. Students will also acquire a practical knowledge of major differences among dialects of English, and will gain hands-on experience in the planning, implementation and analysis of a dialect survey.

LING 525 Topics in Historical Linguistics.
(3) (Fall) (Restriction: Not open to students who have taken LING 541.) (Prerequisites: LING 371, LING 425 and LING 571, which can be taken concurrently, or permission of the instructor.)
Investigation of language change in terms of the implications for a theory of grammar and its relationship to language acquisition; review of some recent research in the area of morphological and syntactic change.

LING 531 Phonology 2.
(3) (Winter) (Restriction: Not open to students who have taken LING 530.) (Prerequisites: LING 331 and permission of instructor.)
Exploration of current issues in phonology.

LING 555 Language Acquisition 2.
(3) (Winter) (Prerequisites: LING 355 and LING 371 and permission of instructor) A detailed overview of recent experimental work on first language acquisition of syntax within the principles and parameters framework, concentrating on both theoretical and methodological issues.

(3) (Fall) (Prerequisite: LING 370 and permission of instructor) (Restriction: Not open to students who have taken MATH 240.) This course presents the formal methods used in the study of language (namely, the theories of sets, relations, functions, partial orders, and lattices, as well as the principle of mathematical induction).

LING 565 Pragmatics.
(3) (Winter) (Prerequisites: LING 370 and PHIL 210 or permission of the instructor) Study of the relationship between language and its contexts of use. Topics to be examined include deixis, presupposition and implicature.

LING 571 Syntax 2.
(3) (Fall) (Prerequisite: LING 371) This course extends and refines the theory of grammar developed in LING 371, while introducing some primary literature and developments (in certain modules of the grammar such as phrase structure, wh-movement, and binding).

LING 590 Language Acquisition and Breakdown.
(3) (Prerequisites: LING 371 and either LING 355 or LING 390.) Theoretical and experimental perspectives on an imperfect language faculty, in the context of current linguistic theory and state-of-the-art experimental methods and techniques. Comparison of linguistic abilities of normally developing children, children with language disorders (e.g., SLI), and adults with disrupted linguistic abilities (e.g., aphasic patients).

MEST-Middle East Studies

Offered by: Arts - Dean's Office

MEST 496 Independent Reading and Research.
(3)

MUAR-Music-Arts Faculty

Offered by: Theory

MUAR 201 Basic Materials: Western Music.
(3) (3 hours) A combination of elementary theory and ear training (sightsinging and aural recognition), and basic piano skills. Topics include: notation of pitch and rhythm, intervals, scales and modes, concept of key, triads and seventh chords, introductory melody and accompaniment writing.

MUAR 202 Basic Materials: Western Music 2.
(3) (3 hours) (Prerequisite: MUAR 201 or permission of instructor) Integrated course in music theory with creative applications of acquired skills. Analysis and writing: concepts of melodic organization, elementary harmonic progressions, two-part contrapuntal techniques, fundamental formal procedures, examination of popular song and jazz. Development of individual skills: intermediate sightsinging, aural recognition, keyboard techniques, small group performance in class.

MUAR 211 The Art of Listening.
(3) (3 hours) An introduction to the major forms and styles in Western music from the baroque to the present, with emphasis on guided listening in the classroom. The ability to read music is not a prerequisite.

MUAR 260 Basic Materials of Jazz.
(3) Study of contemporary and traditional jazz improvisation. Exploration of harmonic framework of music from the jazz repertoire (melody, voice leading, traditional jazz writing). Characteristic sounds of predominant scales and modes and their potential uses. Common song forms and their harmonic devices.

MUAR 374 Special Topics in Music.
(3) (3 hours) A course whose topics will correspond to special historical events and their associated musical, political, and cultural contexts.

MUAR 381 Music in Gothic and Renaissance Culture.
(3) In introduction to European music in late Medieval and Renaissance society: the Crusades, the age of Columbus, the Reformation, Shakespeare's England. Music in the daily lives of courtiers, clergy and commoners - music as courtly pastime, music for devotion in cathedrals, domestic music in towns and cities. Selected masterworks will be studied.

MUAR 384 Romanticism and the Piano.
(3) (3 hours) (Prerequisite: MUAR 201 or MUAR 211 or permission of instructor) A survey of nineteenth-century European piano music: the piano virtuoso as cult figure, the
social functions of the piano, women and the piano, and developing Romantic sensibilities as expressed in piano music throughout the century. Repertoire may include works by Beethoven, Chopin, Liszt, and Rachmaninoff, among others.

● MUAR 385 Music of the Avant-Garde. (3) (Prerequisite: MUAR 201 or MUAR 211) Explorations into post-1945 sound environments; new timbres (Berio and Crumb); "technological" music (electronic and computer music); minimalism (Glass); new aesthetics (Cage); the World Soundscape Project (Schafer); global trends (cross-cultural influences; the New Romanticism; multi-media; protest music).

MUAR 387 The Opera. (3) (3 hours) (Prerequisite: MUAR 201 or MUAR 211) A survey of opera from c.1600 to the present. Opera as ritual, opera as spectacle, opera as catharsis, opera as business, opera and its literary models. The continuing relevance of the operatic experience today.

MUAR 389 The Symphony and Concerto. (3) (3 hours) (Prerequisite: MUAR 201 or MUAR 211) An historical overview of two major genres in the current concert repertoire: baroque foundations, the Viennese achievement, Beethoven's influence, visionaries and nationalists after 1850, cross-currents in the twentieth century.

MUAR 392 Popular Music after 1945. (3) (3 hours) (Prerequisite: MUAR 201 or MUAR 211 or permission of instructor) An historical survey of major artists, genres, and styles in the most widespread traditions of postwar commercial music. The course will include practice in techniques of listening, discussion of the shaping institutions of commercial music, and consideration of the interaction of musical style and culture.

MUAR 393 Introduction to Jazz. (3) (3 hours) (Prerequisite: MUAR 201 or MUAR 211 or permission of instructor.) (Restriction: Open only to non-Music majors) A survey of the development of jazz from its late 19th-century origins in America to the present day, with an introduction to musical concepts relevant to the genre and consideration of sociocultural issues.

● MUAR 399 Music and Queer Identity. (3) (Prerequisite: MUAR 201 or MUAR 211 or permission of instructor.) (Restriction: Open only to non-music majors.) A survey of notable lesbian, gay, bisexual, transgender, queer composers and musicians in both art music and popular music, and an exploration of musical meaning from queer perspectives, covering topics such as coded expression, subcultural music-making, the value of mainstream visibility, and minority versus 'universal' aesthetics.

NAST-North American Studies
Offered by: Arts - Dean's Office

NAST 471 Topics in North American Studies 1. (3) (See Adviser)

PHIL-Philosophy

PHIL 200 Introduction to Philosophy 1. (3) (Philosophy students may use either PHIL 200 or PHIL 201 towards their program requirements, but not both. Students may, however, take both for credit (using the second as an elective), as the content in PHIL 201 does not overlap with PHIL 200) A course treating some of the central problems of philosophy: the mind-body problem, freedom, scepticism and certainty, fate, time, and the existence of God.

PHIL 201 Introduction to Philosophy 2. (3) (Philosophy students may use either PHIL 200 or PHIL 201 towards their program requirements, but not both. Students may, however, take both for credit (using the second as an elective), as the content in PHIL 201 does not overlap with PHIL 200) An introduction to some of the major problems of philosophy. This course does not duplicate PHIL 200.

PHIL 210 Introduction to Deductive Logic 1. (3) (Restriction: Not open to students who are taking or have taken MATH 318) An introduction to propositional and predicate logic; formalization of arguments, truth tables, systems of deduction, elementary metareasons, and related topics.

● PHIL 220 Introduction to History and Philosophy of Science 1. (3) A survey of the rise of the scientific outlook from the ancient Greeks to the Scientific Revolution in the Seventeenth Century.

PHIL 221 Introduction to History and Philosophy of Science 2. (3) A survey of the development of modern science since the Eighteenth Century.

PHIL 230 Introduction to Moral Philosophy 1. (3) A survey of a number of historically important and influential theories. Philosophers to be discussed may include Aristotle, Hume, Kant, Bentham, Mill, and Moore.

PHIL 237 Contemporary Moral Issues. (3) An introductory discussion of central ethical questions (the value of persons, or the relationship of rights and utilities, for example) through the investigation of currently disputed social and political issues. Specific issues to be discussed may include pornography and censorship, affirmative action, civil disobedience, punishment, abortion, and euthanasia.

PHIL 240 Political Philosophy 1. (3) An introduction to contemporary philosophy of politics by concentrating on a number of contested concepts, such as freedom, justice and equality, in contemporary political philosophy and practice.

PHIL 242 Introduction to Feminist Theory. (3) An introduction to feminist theory as political theory. Emphasis is placed on the plurality of analyses and proposals that constitute contemporary feminist thought. Some of the following are considered: liberal feminism, marxist and socialist feminism, radical feminism, postmodern feminism, francophone feminism, and the contributions to feminist theory by women of colour and lesbians.

PHIL 301 Philosophical Fundamentals. (3) (Prerequisites: two previous courses in philosophy, one of which must be PHIL 210 or written consent of the Department) (Restriction: Open only to and required of Philosophy Honours and Joint Honours students) An intensive study of basic philosophical skills; reading, writing, analysis, and argumentation.

PHIL 304 Chomsky. (3) Philosophical aspects of Chomsky's contribution to psychology, linguistic theory, theories of human nature, and to politics.

PHIL 306 Philosophy of Mind. (3) A survey of major positions of the mind-body problem, focusing on such questions as: Do we have minds and bodies? Can minds affect bodies? Is mind identical to body? If so, in what sense "identical"? Can physical bodies be conscious.

PHIL 310 Intermediate Logic. (3) (Prerequisite: PHIL 210 or equivalent) A second course in Logic. NB. The course will be technical in nature, and some mathematical aptitude is essential. The emphasis is on the expressive properties of standard logical systems, including implications for the philosophy of mathematics. We will study
the Completeness of First-Order Logic, then the 'limitative' theorems of Tarski and Gödel.

● PHIL 332 Philosophy of Religion 1.
(3)

PHIL 334 Ethics 1.
(3) (Prerequisite: one of PHIL 230, PHIL 237, PHIL 242, or written permission of the instructor) A course focusing on such central questions of ethical theory as: Why be moral? Are moral judgments subjective? On what is morality based? What is the nature of the good.

● PHIL 336 Aesthetics.
(3) An introduction to issues central to aesthetic theory; the nature of aesthetic judgment, perception of the aesthetic object, the nature of the art object.

● PHIL 340 Philosophy of the Social Sciences 1.
(3) An introduction to foundational issues in the social sciences and to the broader implications of these issues for both philosophy and science. Topics to be discussed may include methodology in natural and social science, objectivity in the social sciences, and cultural relativism.

● PHIL 341 Philosophy of Science 1.
(3) A discussion of philosophical problems as they arise in the context of scientific practice and enquiry. Such issues as the philosophical presuppositions of the physical and social sciences, the nature of scientific method and its epistemological implications will be addressed.

PHIL 343 Biomedical Ethics.
(3) An investigation of ethical issues as they arise in the practice of medicine (informed consent, e.g.) or in the application of medical technology (in vitro fertilization, euthanasia, e.g.).

● PHIL 345 Greek Political Theory.
(3) (Restriction: Not open to students who have taken POLI 333) An examination of the ethical and political theories of ancient Greece, especially those of Plato and Aristotle.

PHIL 348 Philosophy of Law 1.
(3) (Restriction: This course is intended for students with a non-professional interest in law, as well as for those considering law as a profession) A discussion of the nature of justice and law, and of the relationship between them.

PHIL 350 History and Philosophy of Ancient Science.
(3) Topics in ancient pure mathematics (geometry and number theory), "mixed mathematics" (astronomy, music theory, optics, mechanics), and/or natural science (including medicine), studied with a view to philosophical issues raised by the content of ancient science and/or by the logic of scientific argument.

PHIL 353 The Presocratic Philosophers.
(3) An examination of the surviving fragments of the presocratic philosophers and schools of philosophy, as well as later reports of their views.

PHIL 354 Plato.
(3) An examination of some of the philosophical problems (those in logic, epistemology, metaphysics, and ethics, e.g.) found in a selection of Plato's dialogues.

PHIL 355 Aristotle.
(3) An examination of selected works by Aristotle. The course considers issues in moral philosophy as well as those found in the logical treatises, the Physics and Metaphysics, and in the philosophy of mind.

● PHIL 356 Early Medieval Philosophy.
(3) An examination of selected works in the Christian, Islamic and Jewish traditions. Topics in moral and political philosophy, logic and metaphysics, philosophical psychology and epistemology, philosophy of science, and philosophical theology may be discussed.

PHIL 360 17th Century Philosophy.
(3) An examination of the work of such seventeenth-century philosophers as Descartes, Hobbes, Gassendi, Malebranche, Leibniz, and the Cambridge Platonists.

PHIL 361 18th Century Philosophy.
(3) A survey of eighteenth century philosophy, especially British philosophy. Attention is given to fundamental metaphysical, epistemological, and moral issues as reflected in the work of such philosophers as Locke, Shaftesbury, Berkeley, Hutcheson, Butler, Hume and Reid.

PHIL 366 18th and Early 19th Century German Philosophy.
(3) (Prerequisite: PHIL 360 or PHIL 361 is recommended) An examination of the works of such philosophers as Kant, Fichte, Jacobi, Schelling, and Hegel.

PHIL 367 19th Century Philosophy.
(3) (Prerequisite: A previous course in philosophy is recommended) An examination of the works of such 19th century philosophers as Mach, Helmholtz, Dedekind, Frege, Marx, Kierkegaard, Schopenhauer, Nietzsche, Mill and Bradley.

PHIL 370 Problems in Analytic Philosophy.
(3) An introduction to the central questions in the analytic tradition, through the works of important early figures in that tradition. Philosophers to be discussed may include: Frege, Russell, Wittgenstein, Ramsay, Carnap and the "logical positivists".

PHIL 375 Existentialism.
(3) (Prerequisite: one course in philosophy) This course will examine the nature of existentialist thought as represented in various philosophical and literary texts. Particular themes to be examined include freedom, alienation, responsibility and choice, and the nature of self.

PHIL 397 Tutorial.
(3) (Restriction: Open to second year Full Honours students in Philosophy and to other students, with consent of the Department)

PHIL 398 Tutorials.
(3) (Restriction: Open to second year Full Honours students in Philosophy and to other students, with consent of the Department)

● PHIL 410 Advanced Topics in Logic 1.
(3) (Prerequisite: PHIL 310 or equivalent) A course focusing on central results in logic that are of philosophical significance.

PHIL 411 Topics in Philosophy of Logic and Mathematics.
(3) (Prerequisites: PHIL 210 or the equivalent, and one intermediate course in philosophy) A course focusing on some philosophical issue (e.g., the nature of numbers or the relation of truth to provability) as it arises in the study of mathematics and logic.

PHIL 415 Philosophy of Language.
(3) (Prerequisites: PHIL 210 or equivalent and one intermediate course in philosophy) An examination of central topics in the philosophy of language (reference, meaning, and truth, e.g.), the puzzles these notions give rise to, and the relevance of these notions to such questions as: What is language? How is communication possible? What is understanding? Is language rule-governed?

PHIL 419 Epistemology.
(3) (Prerequisite: PHIL 210 or equivalent and one intermediate course in philosophy) A discussion of central topics in the theory of knowledge. The questions addressed in the course may include: What is knowledge? Do we have any knowledge? What is the relation between knowledge and belief? When is belief justified? Is all knowledge conscious knowledge?

PHIL 421 Metaphysics.
(3) (Prerequisites: PHIL 210 or equivalent and one intermediate course in philosophy) An examination of central questions in metaphysics in their historical and contemporary forms. Topics may be chosen from such issues as: personal identity, the nature of space and time, the nature of events and properties, possible worlds, and the problem of realism.

● PHIL 432 Philosophy of Religion 2.
(3)

PHIL 434 Ethics 2.
(3) (Prerequisite: PHIL 334 or written permission of the instructor) Advanced discussion of one or more themes in ethics. Topics will vary from year to year but may include such issues as the nature of rights and duties, moral realism and anti-realism, or the place of reason in morality.

PHIL 436 Aesthetics 2.
(3) (Prerequisite: PHIL 336 or written permission of the instructor) An advanced discussion of issues in aesthetics.
PHIL 440 Philosophy of Social Sciences 2.
(3) (Prerequisite: PHIL 340 or written permission of the instructor) An advanced course on such topics as methodology of, or explanation in, the social sciences or models of rationality. Topics will vary from year to year.

PHIL 441 Philosophy of Science 2.
(3) (Prerequisite: PHIL 341 or written permission of the instructor) An analysis of some key philosophical ideas in science and technology, e.g., problem, explanation, forecast, testability and truth.

PHIL 442 Topics in Feminist Theory.
(3) (Prerequisite: PHIL 242 and one intermediate course in philosophy) Advanced discussion of topical and central themes in feminist theory.

● PHIL 444 Early Modern Political Theory.
(3) (Prerequisite: at least one course in political philosophy) A survey of political and moral theory from the Reformation to the French Revolution including Luther, Montaigne, Descartes, Hobbes, Locke, Rousseau and Smith.

● PHIL 445 19th Century Political Theory.
(3) (Prerequisite: at least one course in political philosophy) An examination of various strands of political theory since Rousseau, concentrating on such themes as the understanding of modernity and theories of liberal society.

PHIL 450 Major Philosophers 1.
(3) (Prerequisite: one intermediate course in philosophy) This seminar will give detailed attention to the work of one philosopher or to a single philosophical theme addressed by several philosophers. Emphasis will be placed on understanding how the metaphysical, epistemological, and moral views of a figure or figures are internally related. Topic will vary from year to year.

● PHIL 452 Later Greek Philosophy.
(3) (Prerequisite: PHIL 354 or PHIL 355) (Restriction: Not open to students who have taken POLI 434) An examination of some of the major post-Aristotelian schools of philosophy. Texts from the Peripatetic, Stoic, Epicurean, Sceptical, Platonist, and medical traditions may be considered. Problems in logic, ethics, physics, epistemology, and metaphysics will be addressed.

● PHIL 453 Ancient Metaphysics and Natural Philosophy.
(3) (Prerequisite: one intermediate course in philosophy and/or natural philosophy as treated by two or more contrasting philosophers or philosophical traditions - probably including Plato and/or Aristotle, and possibly including some Hellenistic or post-Hellenistic schools.

PHIL 454 Ancient Moral Theory.
(3) (Prerequisite: one intermediate course in philosophy as treated by two or more contrasting philosophers or philosophical traditions - probably including Plato and/or Aristotle, and possibly some Hellenistic or post-Hellenistic schools.

PHIL 460 Major Philosophers 2.
(3) This seminar will give detailed attention to the work of one philosopher or to a single philosophical theme addressed by several philosophers. Emphasis will be placed on understanding how the metaphysical, epistemological, and moral views of a figure or figures are internally related.

PHIL 470 Topics in Contemporary Analytic Philosophy.
(3) (Prerequisite: PHIL 370, PHIL 415 or written permission of instructor) An advanced discussion of major themes in the analytic tradition.

PHIL 474 Phenomenology.
(3) (Prerequisite: one intermediate course in philosophy) A study of phenomenology from a historical and thematic perspective. The course will typically involve the study of central thinkers such as Husserl, Heidegger, or Merleau-Ponty, with an examination of the nature and development of the phenomenological movement.

PHIL 475 Topics in Contemporary European Philosophy.
(3) (Prerequisite: one intermediate course in philosophy) Advanced discussion of selected themes in contemporary European philosophy.

● PHIL 480 Topics in the History of Philosophy.
(3) (Prerequisite: one intermediate course in philosophy) An advanced discussion of some theme and/or problem in the history of philosophy.

PHIL 481 Topics in Philosophy.
(3)

PHIL 497 Tutorial.
(3) Open to third year Full Honours students in Philosophy, and to other students, with consent of the Department.

● PHIL 497N1 (1.5), PHIL 497N2 (1.5) Tutorial.
(Students must also register for PHIL 497N2) (No credit will be given for this course unless both PHIL 497N1 and PHIL 497N2 are successfully completed in a twelve month period) (PHIL 497N1 and PHIL 497N2 together are equivalent to PHIL 497) Open to third year Full Honours students in Philosophy, and to students in Philosophy, and to Department.

PHIL 498 Tutorials.
(3) Open to third year Joint Honours students in Philosophy, and to other students, with consent of the Department.

● PHIL 498N1 (1.5), PHIL 498N2 (1.5) Tutorials.
(Students must also register for PHIL 498N2) (No credit will be given for this course unless both PHIL 498N1 and PHIL 498N2 are successfully completed in a twelve month period) (PHIL 498N1 and PHIL 498N2 together are equivalent to PHIL 498) Open to third year Joint Honours students in Philosophy, and to other students, with consent of the Department.

● PHIL 499 Tutorials.
(6) Open to third year Full Honours students in Philosophy, and to other students, with consent of the Department.

PHIL 499D1 (3), PHIL 499D2 (3) Tutorials.
(Students must register for both PHIL 499D1 and PHIL 499D2) (No credit will be given for this course unless both PHIL 499D1 and PHIL 499D2 are successfully completed in consecutive terms) (PHIL 499D1 and PHIL 499D2 together are equivalent to PHIL 499) Open to third year Full Honours students in Philosophy, and to other students, with consent of the Department.

PHIL 499N1 (3), PHIL 499N2 (3) Tutorials.
(Students must also register for PHIL 499N2) (No credit will be given for this course unless both PHIL 499N1 and PHIL 499N2 are successfully completed in a twelve month period) (PHIL 499N1 and PHIL 499N2 together are equivalent to PHIL 499) Open to third year Full Honours students in Philosophy, and to other students, with consent of the Department.

PHIL 506 Seminar: Philosophy of Mind.
(3) (Prerequisite: PHIL 306.) (Restriction: Open only to students as indicated above and to Cognitive Science Minors) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department.) An advanced course devoted to specific topics in the philosophy of mind.

(3) (Prerequisites: PHIL 306, PHIL 415 or written permission of the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors,
Honours and Joint Honours students, except by written permission of the Department) An advanced discussion of a topic of philosophical interest arising from contemporary empirical work in cognitive science.

PHIL 511 Seminar: Philosophy of Logic and Mathematics.
(3) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department)
• PHIL 515 Seminar: Philosophy of Language.
(3) (Prerequisite: PHIL 415 or written permission of the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course devoted to a topic in the philosophy of language.

PHIL 519 Seminar: Epistemology.
(3) (Prerequisite: PHIL 420 or written permission of the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course devoted to a particular topic in epistemology.

PHIL 521 Seminar: Metaphysics.
(3) (Prerequisite: PHIL 421 or written permission of the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course devoted to a topic in metaphysics.

PHIL 534 Seminar: Ethics.
(3) (Prerequisite: PHIL 334 or written permission of the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course devoted to a specific topic in the area of aesthetics and/or the philosophy of art.

PHIL 540 Seminar: Philosophy and Social Sciences.
(3)

PHIL 541 Seminar: Philosophy of Science.
(3) (Prerequisite: PHIL 441 or other requirements specified by the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course devoted to a topic in the philosophy of science.

PHIL 543 Seminar: Medical Ethics.
(3) (Prerequisite: PHIL 343 or written permission of the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course devoted to a particular philosophical problem as it arises in the context of medical practice or the application of medical technology.

PHIL 544 Political Theory.
(3) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department)

PHIL 545 Seminar: Philosophy of Law.
(3) (Prerequisite: PHIL 348 or written permission of the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course devoted to a particular topic in the philosophy of law. Subject varies from year to year.

PHIL 551 Seminar: Ancient Philosophy 2.
(3) (Prerequisite: at least one course in ancient philosophy and the specific requirements of individual instructors) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course on a philosopher or philosophical issue articulated in antiquity.

PHIL 555 Seminar: Medieval Philosophy.
(3) (Prerequisite: PHIL 345 or PHIL 357 or written permission of the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course devoted to a particular topic in medieval philosophy. Subject varies from year to year.

PHIL 561 Seminar: 18th Century Philosophy.
(3) (Prerequisite: PHIL 361 or written permission of the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course on an eighteenth-century philosopher or philosophical issue.

PHIL 567 Seminar: 19th Century Philosophy.
(3) (Prerequisite: PHIL 366 or PHIL 367 or written permission of the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course on 19th-century philosophy or philosophical issue.

PHIL 570 Seminar: Contemporary Analytic Philosophy.
(3) (Prerequisite: PHIL 370 or PHIL 415 or written permission of the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course on contemporary European philosophy. Subject varies from year to year.

PHIL 575 Seminar: Contemporary European Philosophy.
(3) (Prerequisite: PHIL 470 or written permission of the instructor) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course on contemporary European philosophy or some important issue in the Continental tradition.

(3) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department)

PHIL 581 Seminar: Problems of Philosophy.
(3) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department)

PHIL 590 Seminar: Special Topics in Philosophy.
(3) (Prerequisites: one course in philosophy) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department) An advanced course on a particular philosopher or philosophical issue. Depending on the interests of the class, areas covered would include: psychoanalytic epistemology, psychoanalysis and the pre-socratics, psychoanalysis and tragedy, reasons versus causes in psychoanalysis, hermeneutics, psychoanalytic truth, self-deception, irrationality, paradox, creativity, internal object world and its relation to external objects.

PHIL 595 Seminar: Medieval Philosophy.
(3) (Restriction: Seminars are open only to graduate students and final year Philosophy Majors, Honours and Joint Honours students, except by written permission of the Department)

PHIL 600 Philosophy & Western Religions
Offered by: Arts - Dean's Office

PHIL 300 Philosophy & Western Religions 1.
(3) (Restrictions: Open to students in Philosophy & Western Religions, Islamic Studies, Jewish Studies, Philosophy, Religious Studies, and to students of other units with permission of the instructor.) Introduction to the encounter between philosophy and the Abrahamic religions, Judaism, Christianity, and Islam, from Antiquity to the 12th Century, covering the philosophical sources (Plato to Neoplatonism), the religious sources (Bible to Qu'ran), and their manifold syntheses in the thought of theologians, philosophers and mystics within the three religious traditions.
PHWR 301 Philosophy & Western Religions 2.
(3) (Prerequisite: PHWR 300 or permission of the instructor.) (Restrictions: Open to students in Philosophy & Western Religions, Islamic Studies, Jewish Studies, Philosophy, Religious Studies, and to students of other units with permission of the instructor.) Introduction to the encounter between philosophy and the three Abrahamic religions, Judaism, Christianity, and Islam, from the 13th Century to the Enlightenment, covering the manifold synthesises of philosophical and religious ideas in thinkers from the Later Middle Ages, the Renaissance, the 17th Century and the Enlightenment.

PHWR 400 Joint Honours/Honours Tutorial.
(3) (Restrictions: Open to Joint Honours and Honours students in Philosophy & Western Religions in their final year.) Guided reading and research for Joint Honours and Honours students in their final year.

PHWR 401 Honours Thesis Tutorial 1.
(3) (Restrictions: Open to Honours students in Philosophy & Western Religions in their final year.) Initial guided reading and research for Honours students in their final year.

(3) (Prerequisite: PHWR 401) (Restrictions: Open to Honours students in Philosophy & Western Religions in their final year.) Final guided reading and research for Honours students in their final year.

POLI-Political Science
Offered by: Political Science

POLI 211 Comparative Government and Politics.
(3) (Fall) (Note: The area in the field of Comparative Politics is Developed Areas.) Introduction to the study of comparative politics as it applies both to the developed world and developing countries. The course presents the basic concepts and approaches used in the field of comparative politics and it focuses on patterns of similarity and difference in a way political institutions and processes are structured in a wide variety of national contexts.

POLI 212 Government and Politics - Developed World.
(3) (Winter) (Note: The area in the field of Comparative Politics is Developed Areas.) The nature of politics in a few selected nations of the industrialized world, applying the concepts introduced in POLI 211 to specific national contexts. Courses studied will be drawn principally from Europe and North America.

POLI 221 Government of Canada.
(3) (Fall) (Note: The field is Canadian Politics.) An examination of the central governmental institutions, including parliament, federalism, and the judiciary.

POLI 222 Political Process and Behaviour in Canada.
(3) (Winter) (Note: The field is Canadian Politics.) An introduction to contemporary political life in Canada that examines how demands are identified and transmitted through the political systems. Emphasis will be placed on: the Canadian political culture; socialization and political participation; the electoral system; elections and voting; the role and structure of political parties; and the influence of organized interest.

POLI 226 La vie politique québécoise.
(3) (Restriction: An ability to understand and read French is required; writing and speaking ability are not.) (This course is offered in English and French in alternate years. For 2007-08 it will be offered in English.) (Note: The field is Canadian Politics.) Une introduction à la vie politique québécoise à travers l’étude des institutions, des idéologies et des comportements politiques. Une attention particulière sera accordée à la structure et aux changements dans le système politique québécoise.

POLI 227 Developing Areas/Introduction.
(3) (Note: The area in the field of Comparative Politics is Developing Areas.) An introduction to Third World politics. A comparative examination of the legacies of colonialism, the achievement of independence, and contemporary dynamics of political and socio-economic development in Africa, Asia and Latin America. Topics include modernization, dependency, state-building and national integration, revolution, the role of the military, and democratization.

POLI 231 Introduction to Political Theory.
(3) (Fall) (Note: The field is Political Theory.) The course introduces students to political theory through critical examination of classic texts in the history of political thought. In addition to gaining an understanding of several different traditions of political thought, students are encouraged to develop their skills in textual interpretation, critical reasoning, and essay-writing.

POLI 232 Modern Political Thought.
(3) (Winter) (Note: The field is Political Theory.) The course introduces students to modern political thought through a critical examination of some of the key political ideologies and concepts of contemporary political discourse. Themes vary from year to year, and may include liberalism, conservatism, socialism, feminism, democracy, power, justice, and freedom.

POLI 243 International Politics of Economic Relations.
(3) (Winter) (Note: The field is International Politics.) An introduction to international relations, through examples drawn from international political economy. The emphasis will be on the politics of trade and international monetary relations.

POLI 244 International Politics: State Behaviour.
(3) (Note: The field is International Politics.) Offers a comprehensive introduction to the behaviour of nation states. Explores how states make foreign policy decisions and what motivates their behaviour. Other covered topics include the military and economic dimensions of state behaviour, conflict, cooperation, interdependence, integration, globalisation, and change in the international system.

POLI 300D1 (3), POLI 300D2 (3) Developing Areas/Revolution.
(Prerequisite: A basic course in Comparative Politics or written permission of the instructor) (Note: The area in the field of Comparative Politics is Developing Areas.) (Students must register for both POLI 300D1 and POLI 300D2.) (No credit will be given for this course unless both POLI 300D1 and POLI 300D2 are successfully completed in consecutive terms) The post WW II revolutionary process in the third world. Attention to the nature of the revolutionary process in the struggle for national liberation both where this approach succeeded and failed. Examples drawn from Asia, Africa and Latin America. Students will be required to do a thorough case study.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.

† Denotes courses not offered as Education electives.
‡ Denotes courses taught only in alternate years.
△ Denotes courses not available in 2007-08.
● Denotes courses offered only to Bachelor of Education students.
POLI 311 Techniques of Empirical Research.
(3) (Summer - Section 001 (01-May-2007/31-May-2007)) An introduction to empirical political research. Among the topics considered are the formulation of research problems, the selection of samples, interviewing, questionnaire construction, and the analysis and interpretation of data.

★ POLI 315 Approaches to Political Economy.
(3) (Prerequisite: POLI 211 or POLI 212 and one preferably university-level economics course) (Note: The area in the field of Comparative Politics is Developed Areas.) Influential traditions in political economy. Focus on how these attempted to integrate the economic and political. Application of economic analysis to social and political phenomena ("social choice"). Recent efforts to combine the deductive logic of economics with comparative empirical analysis of actors in different institutional settings. Extension to the international political economy.

★ POLI 318 Comparative Local Government.
(3) (Prerequisite: POLI 211 or POLI 212 or written permission of instructor) (Note: The area in the field of Comparative Politics is Developed Areas; also in the field of Canadian Politics.) An examination of the organization and conduct of local government in Canada, the United States, and selected European countries. Attention to theories of local government, the criteria for comparative analysis, the provision of public goods and services, urban political patterns and the constitution of new institutional arrangements to deal with "urban crises" in North America.

POLI 319 Politics of Latin America.
(3) (Prerequisite: A basic course in Comparative Politics or a course on the region or written permission of the instructor) (Note: The area in the field of Comparative Politics is Developing Areas.) This course will deal with the dynamics of political change in Latin America today.

POLI 320 Issues in Canadian Democracy.
(3) (Prerequisite: At least one other course in Canadian or Comparative Government and Politics or permission of instructor) (Note: The field is Canadian Politics.) Critical analysis of selected issues and debates in Canadian politics, including citizen participation, electoral system effects, party financing, office-seeking, approaches to representation, and direct democracy and party alternatives. Topics are examined from both the perspective of the general population and the specific experience of women and ethno-racial minorities.

POLI 321 Issues: Canadian Public Policy.
(3) (Prerequisite: at least one other course in Canadian or Comparative Politics) (Note: The field is Canadian Politics.) The Canadian political process through an analysis of critical policy issues in community development, welfare state, education, and institutional reforms in public service delivery systems. Diagnostic and prescriptive interpretations of public choices in a federal-parliamentary regime.

POLI 322 Political Change in South Asia.
(3) (Prerequisite: A basic course in Comparative Politics or a course on the region or written permission of the instructor) (Note: The area in the field of Comparative Politics is Developing Areas.) Political change in South Asia in late colonial and post-colonial periods. Issues covered include social and cultural history; colonial rule, nationalism and state formation; democratic and authoritarian tendencies; economic policies and consequences; challenges to patterns of dominance and national boundaries; prospects for democracy, prosperity and equality.

POLI 323 Developing Areas/China and Japan.
(3) (Winter) (Prerequisite: A basic course in Comparative Politics or a course on the region or written permission of the instructor) (Note: The area in the field of Comparative Politics is Developing Areas.) A survey of traditional and modern political society in China and Japan. Special emphasis is placed on governmental policy and institutions in relation to ideology in the Peoples’ Republic of China and post-1945 Japan.

POLI 324 Developing Areas/Africa.
(3) (Prerequisite: A basic course in Comparative Politics or a course on the region or written permission of the instructor) (Note: The area in the field of Comparative Politics is Developing Areas.) The government and politics of African states south of the Sahara with reference to the ideological and institutional setting as influenced by the forces of tradition and the impact of Western colonialism.

POLI 325D1 (3), POLI 325D2 (3) Government and Politics: United States.
(Prerequisite: POLI 211 or POLI 212 or written permission of the instructor) (Note: The area in the field of Comparative Politics is Developed Areas.) (Students must register for both POLI 325D1 and POLI 325D2.) (No credit will be given for this course unless both POLI 325D1 and POLI 325D2 are successfully completed in consecutive terms) A survey of the American political system, with emphasis on the constitutional and philosophical setting, the institutions and their interactions, the political process, public policy issues, and political change.

★ POLI 326 Provincial Politics.
(3) (Prerequisite: A basic course in Canadian Government or Politics or permission of the instructor) (Note: The field is Canadian Politics.) The effect of regional and provincial culture on the operation of political parties and the institutions of government; the effect of institutional modernization on provincial governments; the role of provincial sub-systems within the Canadian political system.

★ POLI 328 Modern Politics in Western Europe.
(3) (Prerequisites: POLI 211 or POLI 212, or POLI 227) (Note: The area in the field of Comparative Politics is Developing Areas.) This course seeks an understanding of the similarities and differences between the political systems of contemporary Western Europe by examining the different ways in which these systems have taken shape over time. The political development of Western Europe will be conceptualized as a series of critical phases beginning with the formation of the modern dynastic state in the 15th Century and concluding with the "postwar settlement" of the late 1940s.

★ POLI 329 Russian and Soviet Politics.
(3) (Prerequisite: POLI 211, POLI 212, or written consent of instructor; Soviet history helpful but not required) (Note: The area in the field of Comparative Politics is Developing Areas.) This course explores the institutions of the Soviet system and pressures to reform this system. Examines specific changes made to the system through democratization and market reform. Compares these changes to similar transitions in other countries to assess possible twists in Russian's political future.

POLI 333 Western Political Theory 1.
(3) (Prerequisite: POLI 211 or written permission of the instructor) (Note: The field is Political Theory.) The major themes and writers in the political theory of classical antiquity. The political ideas of Thucydides, Plato, Aristotle, and the Hellenistic philosophers will be explored through the significant texts of this period.

POLI 334 Western Political Theory 2.
(3) (Prerequisite: POLI 333 or written permission of the instructor. POLI 333 should be taken before this course and POLI 433 after it) (Note: The field is Political Theory.) Medieval and renaissance political philosophy, from Saint Augustine to Sir Thomas More. Scholastic and neo-scholastic political thought, natural law and natural rights, as well as civic and northern humanism, republicanism and liberty. Twentieth century work on similar concepts will be used.

★ POLI 337 Canadian Public Administration.
(3) (Prerequisite: at least one other course in Canadian government or politics) (Note: The field is Canadian Politics.) Organization and practice of public administration at the federal provincial and local level in Canada. Contrasting theories/techniques of public administration and policy, organization of field offices for delivery of essential public services, governments as employers, and institutional and policy changes to resolve crisis inherent in "the paradoxical view of bureaucracy".

POLI 339 Comparative Developed: Topics 1.
(3) (Prerequisite: a basic course in Comparative Politics or written permission of the instructor) (Note: The area in the field of Comparative Politics is Developed Areas.) Topic for
2007-2008: Law and Courts in Europe. Selected aspects of politics in developed countries.

POLI 340 Developing Areas/Middle East.
(3) (Prerequisite: A basic course in Comparative Politics or a course on the region or written permission of the instructor) (Note: The area in the field of Comparative Politics is Developing Areas.) An examination of the societies, political forces and regimes of selected countries of the Eastern Arab world (Egypt, Syria, Lebanon, Jordan, Palestine, Saudi Arabia).

POLI 341 Foreign Policy: The Middle East.
(3) (Prerequisite: A 200- or 300-level course in International Relations or Middle East politics or permission of the instructor) (Note: The field is International Politics.) An examination of the changing regional security environment and the evolving foreign policies and relationships of Arab states in three areas - relations with non-Arab regional powers (Israel, Iran), inter-Arab relations, Great Power relations. The course will focus particularly on Egypt, Syria, Iraq and Saudi Arabia.

POLI 342 Canadian Foreign Policy.

POLI 344 Foreign Policy: Europe.
(3) (Prerequisite: A basic course in International or European Politics or written consent of instructor) (Note: The field is International Politics.) An examination of the evolution of the European system since 1945.

POLI 345 International Organizations.
(3) (Prerequisite: A basic course in International Politics or written consent of instructor) (Note: The field is International Politics.) Examination of significant organizations in world politics such as the United Nations, the European Union, and the World Trade Organization.

POLI 346 American Foreign Policy.
(3) (Prerequisite: POLI 244 or a course in American history) (Note: The field is International Politics.) An exploration of American foreign policy from 1945 to the present. Topics to be addressed are the origins of the Cold War, deterrence, strategy and arms control, American intervention in Latin America and Vietnam, U.S. policy in the Post Cold War era - Gulf War, Haiti, Somalia, Yugoslavia and relations with Japan.

POLI 347 Arab-Israel Conflict, Crisis, Peace.
(3) (Fall) (Prerequisite: POLI 244 or POLI 246, or permission of the instructor) (Note: The field is International Politics.) An exploration of the Arab-Israel conflict. Concepts - protracted conflict, crisis, war, peace; system, subsystem; Conflict-levels of analysis; historical context; images and issues; attitudes, policies, role of major powers; Crises-Wars - configuration of power; crisis models; decision-making in 1956, 1967, 1973, 1982 crisis-wars; conflict - crisis management; Peace-Making - pre-1977: Egypt-Israel peace treaty; Madrid, Oslo, Israel-Jordan peace; prospects for conflict resolution.

POLI 348 Foreign Policy-Asia Pacific.
(3) (Prerequisite: POLI 243 or 244, or permission of the instructor) (Note: The field is International Politics.) A study of the international relations of the Asia Pacific region, including China, Korea, Japan, and Southeast Asia, as well as Australia and New Zealand. Focuses on security and economic issues, foreign policy, and regional institutions.

POLI 351 The Causes of Major Wars.
(3) (Prerequisite: POLI 243, POLI 244 or permission of the instructor) (Note: The field is International Politics.) Examination of the competing theoretical explanations for major wars; application of the theories to the outbreak of World War I.

POLI 354 Approaches to International Political Economy.
(3) (Prerequisite: A basic course in International Relations and an introductory course in Macroeconomics) (Note: The field is International Politics.) The course presents theoretical approaches to understanding change in the international political economy.

POLI 357 Politics: Contemporary Europe.
(3) (Prerequisite: POLI 212 or written permission of the instructor) (Note: The area in the field of Comparative Politics is Developed Areas.) An examination of political institutions and processes in today's Europe, concentrating on the member-states of the European Union and on the Union itself. The course is organized thematically rather than on a country-by-country basis.

POLI 359 Topics in International Politics.
(3) (Prerequisites: A basic course in International Relations) (Note: The field is International Politics.) A specific problem area in International Relations.

POLI 360 Security: War and Peace.
(3) (Prerequisite: A basic course in International Relations or written permission of the instructor) (Note: The field is International Politics.) Focuses on international security and strategies of war and peace in historical and comparative frameworks. Topics include case studies of 20th century wars, conventional and nuclear strategy, and various approaches to peace.

POLI 361 Political Participation in Comparative Perspective.
(3) (Prerequisite: POLI 211 or POLI 212) (Note: The area in the field of Comparative Politics is Developed Areas.) Exploration of how citizens engage in politics. Theories and examples of current forms of political participation and mobilization will be introduced, including voting, party membership, transnational movements, political consumerism, culture jamming and internet activism. Examples are drawn from Europe and North America and sometimes from the developing world.

POLI 362 Political Theory and International Relations.
(3) (Prerequisites: POLI 231, or POLI 232 and POLI 243 or POLI 244) (Note: The fields are International Politics and Political Theory.) Key contributions of political theory to the study and practice of international relations. Three prevailing theoretical traditions will be examined: realism, 'international society', and cosmopolitanism. Key practical issues to be explored from these perspectives include war, humanitarian intervention, economic globalization, environment, and gender.

POLI 363 Contemporary Political Theory.
(3) (Prerequisite: POLI 231 or POLI 232) (Note: The field is Political Theory.) This course explores fundamental currents of thought in political philosophy. Topics will vary from year to year, and may include issues such as classical liberalism and its opponents, the foundations of socialism and Marxism, rational choice theory and its critics.

POLI 364 Radical Political Thought.
(3) (Prerequisite: POLI 231 or POLI 232 or written permission of instructor) Radical themes in contemporary political thought and action.
POLI 356 Democratic Theory.
(3) (Prerequisite: POLI 231 or POLI 232 or written permission of instructor) (Note: The field is Political Theory.) A series of lectures and seminars on democratic theory.

POLI 366 Topics in Political Theory.
(3) (Prerequisites: A basic course in Political Theory) (Note: The field is Political Theory.) A specific problem area in Political Theory.

• POLI 371 Challenge of Canadian Federalism.
(3) (Prerequisite: at least one course in Canadian politics) (Note: The field is Canadian Politics.) An analysis of the origins, evolution and nature of federalism in Canada. Topics and themes will include the impact of federalism on political institutions, the effect of different regional perspectives, and the issues and conflicts that currently confront Canadian federalism.

• POLI 372 Aboriginal Politics in Canada.
(3) (Prerequisite: At least one course in Canadian politics such as, POLI 221 or POLI 222 OR Permission of the instructor.) (Restriction: Not open to students who have taken POLI 372 prior to W06.) The relationship of aboriginal politics to larger debates and literatures within political science, such as citizenship theory, federalism, and collective action. Subjects covered include Canada's treaty history, constitutional changes, and aboriginal political development.

POLI 376 The Canadian Judicial Process.
(3) (Fall) (Prerequisite: POLI 221 or POLI 222 or permission of the instructor) (Restriction: Not open to students who took 160-376 (1990-91) or 160-427 (1989-90)) (Note: The field is Canadian Politics.) An examination of the structure of the judiciary and its role in the Canadian political process. Topics include the nature of judicial power and its constitutional framework in Canada, the structure and function of courts, judicial recruitment and personnel, judicial policy-making and the political role of the Supreme Court under the Charter of Rights and Freedoms.

• POLI 379 Topics in Canadian Politics.
(3) (Prerequisite: A basic course in Canadian Government and Politics) (Note: The field is Canadian Politics.) Topics in Canadian politics.

POLI 410 Canadian Political Parties.
(3) (Prerequisite: At least one other course in Canadian Politics) (Note: The field is Canadian Politics.) This course examines Canadian political parties and party systems, stressing patterns of historical development, party organization and finance, relationships with social movement, and the impact of Canadian federalism.

POLI 411 Immigration and Multiculturalism in Canada.
(3) (Prerequisite: at least one course in Canadian politics, preferably at the 300 or 400 level, or permission of the instructor) (Note: The field is Canadian Politics.) An examination of various aspects of Canadian politics that stems from the country's experience with immigration and ethnic and racial diversity.

• POLI 412 Canadian Voting/Public Opinion.
(3) (Prerequisite: at least one course in Canadian politics, preferably at the 300 or 400 level, or permission of the instructor) (Note: The field is Canadian Politics.) A critical examination of major debates within the literature on Canadian voting behaviour and public opinion.

• POLI 414 Society and Politics in Italy.
(3) (Prerequisite: a basic course in Comparative Politics and preferably an upper level course or written permission of the Instructor) (Note: The area in the field of Comparative Politics is Developed Areas.) Analysis of modern Italian political development in comparison to other Western and Mediterranean countries. What makes Italian politics unique, what makes it resemble that of other countries.

• POLI 417 Health Care in Canada.
(3) (Prerequisites: POLI 221 or POLI 221) (Note: The field is Canadian Politics.) This course analyzes the theory and politics of health policy and institutions, comparing provincial models and contextualizing Canadian systems with international perspectives from the U.S. and Europe. Current health reform debates will be explored, particularly those involving federal-provincial relations, sustainable financing and the role of the state in social protection.

POLI 419 Transitions from Communism.
(3) (Prerequisites: A previous History or Political Science course on the USSR, or Eastern Europe after WW II, or written permission of the instructor) (Note: The area in the field of Comparative Politics is Developed Areas.) Selected problems facing the Post-Soviet world. Themes include: new political institutions, parties, and groups; economic reform; social problems; ideological changes; the rise of ethnonationalism; linkages with the West.

POLI 423 Politics of Ethno-Nationalism.
(3) (Prerequisites: one 300 or 400-level course in comparative politics; and one 300 or 400-level course on developing areas (any discipline.) The same course can fulfill both requirements) (Note: The area in the field of Comparative Politics is Developed Areas.) Theories of ethno-nationalism examined in light of experience in Asia, Middle East and Africa. Topics include formation and mobilization of national, ethnic and religious identities in colonial and post-colonial societies; impact of ethno-nationalism on pluralism, democracy, class and gender relations; means to preserve tolerance in multicultural societies.

POLI 424 Media and Politics.
(3) (Prerequisites: POLI 211 or POLI 212; and at least 3 credits in Political Science at the 300 level) (Note: The area in the field of Comparative Politics is Developed Areas; also in the field of Canadian Politics.) The role of media in domestic and international politics, with reference to recent studies in political science. Themes in the study of mass media and politics in developed democracies.

POLI 425 Topics in American Politics.
(3) (Prerequisite: POLI 325) (Note: The area in the field of Comparative Politics is Developed Areas.) This course involves a detailed analysis of a limited area of American politics and government.

• POLI 427 Selected Topics: Canadian Politics.
(3) (Prerequisite: A basic course and preferably an upper level course as well in Canadian Government and Politics or permission of the instructor) (Note: The field is Canadian Politics.) Selected problem areas in Canada's political process, political culture, constitutional development, and machinery of government.

POLI 431 Nations and States/Developed World.
(3) (Prerequisite: POLI 211 or POLI 212 or POLI 328) (Note: The area in the field of Comparative Politics is Developed Areas.) The role of nationalism in European and North American political development. Topics include: nationalism and state-formation, succession and sub-state nationalism, war and nationalism, federal and consociational arrangements in multi-national societies.

POLI 432 Selected Topics: Comparative Politics.
(3) (Note: The field is Comparative Politics in Developed Areas.)

POLI 433 History of Political/Social Theory 3.
(3) (Prerequisite: POLI 231 or written permission of instructor) (Restriction: POLI 334 should be taken before this course) (Note: The field is Political Theory.) Early modern political philosophy, from Luther to Rousseau and Burke. Resistance theories of the 16th century, Hobbes and Locke, the Enlightenment and the French Revolution. Twentieth century work on concepts developed in this period such as rights, revolution, legitimacy, democracy, authority and liberty.

POLI 434 History of Political/Social Theory 4.
(3) (Recommended: POLI 231 or POLI 232 or written permission of instructor) (Note: The field is Political Theory.) A consideration of selected writers and themes of late 19th and 20th century political theory. Writers include Hegel, Clausewitz, Marx, Mill, Nietzsche, Lenin, Rowis, Foucault, and Habermas. The rise of industrial society, scientism, the romantic revolt, revolutionary movements, socialism and liberal-democracy.
● POLI 438 British Politics. (3)

POLI 44I IPE: North-North Relations. (3) (Prerequisite: At least one course in international politics) (Note: The field is International Politics.) A political economy course on political and economic changes which have blurred the domestic/international distinction, making domestic issues the subject of negotiation among states. The development of the EU which reinforces this as well as the politics of firms and states, trade, money, and regulation are studied.

● POLI 444 Topics in International Politics. (3) (Prerequisite: An upper level course in International Politics or written permission of the instructor) (Note: The field is International Politics.) A specific problem area in International Politics.

POLI 445 International Political Economy: Monetary Relations. (3) (Prerequisites: Poli 243 or permission of the instructor.) (Note: The field is International Politics.) Advanced course in international political economy; the politics of international monetary relations, such as international rules governing international finance, the reasons for and consequences of financial flows, and the functioning of international financial bodies such as the IMF and World Bank.

POLI 450 Peacebuilding. (3) (Prerequisites: previous courses in comparative politics/developing areas and international relations. Internet research skills are strongly recommended) (Note: The area in the field of Comparative Politics is Developing Areas; also in the field of International Politics.) An examination of transitions from civil war to peace, and the role of external actors (international organizations, bilateral donors, non-governmental organizations) in support of such transitions. Topics will include the dilemmas of humanitarian relief, peacekeeping operations, refugees, the demobilization of ex-combatants, transitional elections, and the politics of socio-economic reconstruction.

POLI 451 The European Union. (3) (Prerequisite: one course each in International Relations and Comparative Politics) (Note: The area in the field of Comparative Politics is Developing Areas; also in the field of International Politics.) The emergence of the EU and its innovative institutions and policies will be studied through lectures, discussions, and a simulation (of a European Council or Parliament session). Emphasis upon current debates about the EU's developing identity, its internal political economy, its institutions of 'multi-level' governance, and its external relation.

POLI 459 Topics in Political Theory. (3) (Prerequisite: An upper level course in Political theory or written permission of the instructor) (Note: The field is Political Theory.) This course will deal with a specific problem area in Political theory.

● POLI 469 Politics of Regulation. (3) (Prerequisite: POLI 221 or POLI 222 and at least one 300-level course or above in Canadian politics, or permission of instructor) (Note: The field is Canadian Politics.) Issues arising from the use of regulation as a governing instrument including origins of regulation, costs and benefits, political accountability and regulatory change including deregulation. Issues will be explored through examination of broadcasting and telecommunications regulation and their convergence in the "Information Highway".

● POLI 473 Democracy and the Market. (3) (Prerequisite: A course in Comparative Politics or written permission of the instructor) (Note: The area in the field of Comparative Politics is Developing Areas.) The course examines the relationship between economic and political change by focusing on dual processes of economic reform and democratization. The inter-play of societal, state-level and international actors, and the possible trade-offs involved, are explored using examples from Latin America, the former Soviet bloc, and other developing areas.

POLI 474 Inequality and Development. (3) (Prerequisite: A basic course in Comparative Politics or a course on the region or written permission of the instructor.) (Note: The area in the field of Comparative Politics is Developing Areas.) The political structures and social forces underlying poverty and inequality in the developing world; the historical roots of inequality in different regions, varying manifestations of inequality (class, region, ethnicity, gender), and selected contemporary problems.

● POLI 475 Social Capital in Comparative Perspective. (3) (Prerequisite: POLI 211 or POLI 212.) (Note: The area in the field of Comparative Politics is Developing Areas.) The course examines the political structures and social forces underlying poverty and inequality in the developing world; the historical roots of inequality in different regions, varying manifestations of inequality (class, region, ethnicity, gender), and selected contemporary problems.

POLI 478 The Canadian Constitution. (3) (Winter) (Prerequisites: POLI 378 or an upper level course in Canadian Politics or permission of the instructor) (Restriction: Not open to students who took 160-427 in 1989-90 or 1991) (Note: The field is Canadian Politics.) An examination of legislative and judicial protection of rights and liberties in Canada. Topics to be covered include civil rights and the division of powers; the implied bill of rights theory; the 1960 Bill of Rights; establishment and enforcement of human rights legislation; and the Charter of Rights and Freedoms.

POLI 490 Independent Reading and Research. (3) (Fall and Winter) Final year Honours students wishing to pursue a specialized interest will be allowed to undertake a program of independent reading and/or research in that area under the supervision of a member of staff. Such programs may be undertaken by students either individually or in small groups. It is the responsibility of the student to obtain the instructor's consent prior to registration.

POLI 499 Honours Essay. (3) (Fall and Winter) (Restriction: Open to Honours students only) Regular meetings between students and professors, the writing of a well researched essay and its oral defense. The essay should demonstrate some experience with primary sources, the ability to explore various theoretical perspectives as well as to organize and present a set of arguments in a systematic and thorough manner.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses taught only in alternate years.
‡ Indicates that departmental approval/permission must be obtained by a student prior to registration.
† Professional Practice (Stage) in Dietetics involving special prerequisites
Denotes courses not available as Education electives.
Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.
Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

2007-2008 Undergraduate Programs Calendar, McGill University
POLI 521 Seminar: Canadian Politics and Government.
(3) (Restriction: Open to graduate students, final year Honours students, and other advanced undergraduates with the permission of the instructor) (Note: At least one 300 or 400-level course in Canadian Politics) (Note: The field is Canadian Politics.) Topic for 2007-2008: Canadian Democracy in Crisis. Selected problems of Canadian socio-economic and political structures; political culture; constitutional development, and governmental structure.

POLI 522 Seminar: Developing Areas.
(3) (Prerequisite: At least one upper level course in the politics of developed areas) (Restriction: Open to graduate students, final year Honours students, and other advanced undergraduates with the permission of the instructor) (Note: The area in the field of Comparative Politics is Developing Areas.) Topic for 2007-2008: Theories of the State. A research seminar dealing with experiences of various developing countries. Examines the intersections of visions of gender and community; the interactions between mobilization along gender and community lines; the gendered nature and cultural coding of various policy initiatives. Greater emphasis given to concerns and actions of women, and to visions of community based on religion and race. Students are expected to undertake a research project.

POLI 524 Seminar: Developed Areas.
(3) (Prerequisite: At least one upper-level course in the politics of developed areas) (Restriction: Open to graduate students, final year Honours students, and other advanced undergraduates with the permission of the instructor) (Note: The field is Political Theory.) Topic for 2007-08: Faith, Reason & Democratic Transformations.

POLI 561 Seminar: Political Theory.
(3) (Prerequisite: At least one upper level course in political philosophy) (Restriction: Open to graduate students, final year Honours students, and other advanced undergraduates with the permission of the instructor) (Note: The field is Political Theory.) A topic in political philosophy such as democracy, liberty, property or nationalism, or a political philosopher, is studied to enable students to research a topic in depth, to present their papers to the seminar, and to engage in and profit from discussion and debate.

POLI 575 Seminar: International Politics.
(3) (Restriction: Open to graduate students and final year Honours students only) (Note: The field is International Politics.) A research seminar dealing with topics in the field of international politics.

POLI 599 Internship: Political Science.
(3) (Fall and Winter) (Restriction: Open, with permission, to final year Honours and Joint Honours students, and graduate students. This course does not count as a 500-level seminar under the Honours requirements) The internship shall consist of a minimum of 150 hours of work over a period of 12 weeks, plus a major research project based on the internship. The major project will ordinarily consist of a major research paper, plus a substantial written record of the work conducted during the internship.

QCST 440 Aspects du Québec contemporain/Aspects of Contemp. Quebec.
(3) (Cours obligatoire pour tous les étudiants(es) inscrits(es) au concentration majeur en Études sur le Québec.) (Required course for all students in Quebec Studies. Open also to U2 and U3 students who have a basic knowledge of Quebec society) (Instruction, discussions, oral presentations and papers can be in French or English) L'enseignement, les discussions, les exposés et les travaux en groupes peuvent se faire en français ou anglais. Le thème du séminaire change à chaque année, mais porte toujours sur une facette de la société québécoise moderne. Cours interdisciplinaire, on y étudie différents aspects: historique, sociologique, économique, politique, culturel, etc. An interdisciplinary approach from a political science angle is comparing the topic's various dimensions: historical, sociological, economical, political, cultural, etc. This seminar has a different topic each year it is given, but all topics are directly related to some important problems or phenomena in modern Quebec politics and society.

QCST 472D1 (3), QCST 472D2 (3) Tutorial/Travaux dirigés.
(Obligatoire pour les étudiants(es) inscrits(es) au concentration majeur en Études sur le Québec.) (Restriction: Designed for non-Quebec and non-francophone students. This course does not count as a 500-level course in Quebec Studies.) (Students must register for both QCST 472D1 and QCST 472D2.) (No credit will be given for this course unless both QCST 472D1 and QCST 472D2 are successfully completed in consecutive terms) Sous la direction du Directeur du Programme d'études sur le Québec ou d'un professeur, l'étudiant(e) choisit un sujet sur lequel il (elle) travaille pendant une année et rédige un essai d'une cinquantaine de pages. Under the supervision of either the Director of Quebec Studies Program or a professor, the student chooses a topic on which he/she works for a year and then submits an essay of approximately 50 pages.

**RUSS-Russian**
Offered by: Russian & Slavic Studies

- **RUSS 199 FYS: Patterns - Russian Culture.**
  (3) (Fall or Winter) (Prerequisite: None) (Restriction: Open only to newly admitted students in U0 or U1, who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.) (Maximum 25) Exploration of cultural archetypes defining continuity and change from Peter the Great to the present; the Russian national identity, double-faith, Western and Slavophile influences, Mother Russia, superfluous men and the Eternal Feminine, anarchism, Stalinism. Interdisciplinary (literature, art, film, music, pop culture, applied arts, journalism). Research- and conference-technique seminar.

- **RUSS 210 Elementary Russian Language 1.**
  (3) (Fall) Reading, grammar, translation, oral practice.

- **RUSS 211 Elementary Russian Language 2.**
  (3) (Winter) (Prerequisite: RUSS 210 or equivalent) Russian Language; continuation of RUSS 210.

- **RUSS 215 Elementary Russian Language Intensive 1.**
  (6) (Restriction: Departmental approval required) An intensive introduction to the Russian language which covers the first year of the normal level, i.e. RUSS 210/RUSS 211 in one semester. The basic grammatical structures are covered.

- **RUSS 217 Russia's Eternal Questions.**
  (3) (Winter) (Restriction: Permission of the instructor) Exploration of cultural archetypes defining continuity and change from Peter the Great to the present; the Russian national identity, double-faith, Western and Slavophile influences, Mother Russia, superfluous men and the Eternal Feminine, anarchism, the avant-garde, Stalinism. Recurring themes traced in literature, art, film, music, pop culture and the applied arts.
RUSS 218 Russian Literature in Revolution.
(3) (Fall) (Prerequisite: None, but some background in Russian 20C history is helpful) (Given in English) The Russian twentieth-century literary dynamic up to the watershed of Stalin's death (1953). Carving out cultural territory against ideological polemics, revolutionary versus traditional values, the explosion of avant-garde experimentation under mounting critical conformism as reflected in major works and authors (Mayakovsky, Babel, Bulgakov, Platonov and others).

RUSS 219 Russian Literature in Recovery.
(3) (Fall) (Prerequisite: None, but some background in Russian 20C history is helpful) (Given in English) Rediscovering the Russian literary heritage, both traditional and avant-garde, after Stalin's death (1953). The Thaw, Soviet beatniks, Solzhenitsyn-style dissidents against cultural iconoclasts, the challenge and decline of perestroika, raising the literary Iron Curtain to include women writers, emigres, Western influence and the angst of pluralism.

RUSS 223 Russian Writers - 19th Century.
(3) (Fall) (Given in English) Designed for students interested in Russian literature and its authors. A broad overview acquainting them with the main Russian literary currents of the 19th century and with the lives and destinies of its writers.

RUSS 224 From War to Revolution.
(3) (Winter) (Given in English) Russian literature from the Crimean War (1856) to the revolutions of 1917. The classical novel through Symbolism to the end of the Empire. Literature in an age of uncertainty. There will be an examination of the works of Tolstoy, Dostoevsky, Chekhov, Bely, Gorky and other selected authors.

RUSS 255D1 (3), RUSS 255D2 (3) Introduction to Polish.
(Fall, Winter) (Students must register for both RUSS 255D1 and RUSS 255D2.) (No credit will be given for this course unless both RUSS 255D1 and RUSS 255D2 are successfully completed in consecutive terms) An introduction to the study of Polish with emphasis on basic Polish grammar, conversation, reading and writing. Please consult Department prior to registration.

RUSS 300 Russian for Heritage Speakers.
(3) (Fall) (Restriction: Not open to students who have taken RUSS 210, RUSS 211, RUSS 215, RUSS 310, RUSS 311 and RUSS 316.) For native speakers of Russian who have not had full academic instruction in the language. Focus on grammatical structure and syntax, the formalities of written Russian and appreciation of the language's stylistic diversity. Multi-media approach including excerpts from literary works, current newspapers, television news broadcasts, films and cartoons.

RUSS 310 Intermediate Russian Language 1.
(3) (Fall) (Prerequisite: RUSS 210 and RUSS 211 or equivalent) (Restriction: Not open to students who are taking RUSS 316) Reading, translation, conversation.

RUSS 311 Intermediate Russian Language 2.
(3) (Winter) (Prerequisite: RUSS 310 or equivalent) (Restriction: Not open to students who are taking or have taken RUSS 316) Reading, translation, conversation.

(6) (Winter) (Prerequisite: RUSS 215) (Restriction: Requires departmental approval) Continuing the intensive program of RUSS 215 this course covers the second year of the normal level, i.e. RUSS 310/311, in one semester. The basic grammatical structures are covered.

(6) (Winter) (Prerequisite: RUSS 316 or equivalent) (Restriction: Requires departmental approval) Continuing the intensive program of RUSS 215/311 this course covers the second year of the normal level, i.e. RUSS 310/311, in one semester. The basic grammatical structures are covered.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

2007-2008 Undergraduate Programs Calendar, McGill University
RUSS 422 Advanced Russian Language and Syntax 1. (3) (Fall) (Prerequisite: RUSS 415 and RUSS 416 or equivalent or permission of the Department) Prose composition, translation, essay writing. An introduction to Russian stylistics.

RUSS 453 Advanced Russian Language and Syntax 2. (3) (Winter) (Prerequisite: RUSS 452 or equivalent) Prose composition, translation, essay writing. An introduction to Russian stylistics.

• RUSS 455 History of the Russian Language 1. (3) (Fall) (Prerequisite: RUSS 415 and RUSS 416 or equivalent or permission of the Department) Course given principally in Russian) An examination of the structure of modern Russian using a historical, comparative approach. Each student will prepare one original discussion paper.

• RUSS 456 History of the Russian Language 2. (3) (Winter) (Prerequisite: RUSS 455 or equivalent) Course given principally in Russian) An examination of the structure of modern Russian using a historical, comparative approach. Each student will prepare one original discussion paper.

RUSS 471 Independent Research. (3) (Fall or Winter) (Prerequisite: Permission of the departmental Internship Advisor) (Restriction: Open to U2 and U3 students after completing 30 credits of a 90 credit degree program or 45 credits of a 69-120 credit program, a minimum CGPA of 2.7, and permission of the departmental Internship Advisor. This course will not normally fulfill program requirements for seminar or 400-level courses.) Internship with an approved host institution or organization.

• RUSS 500 Special Topics. (3) (Prerequisite: Permission of Department.) Focus on a critical theme, author or work, as determined by the current research interests of faculty and visiting faculty.

RUSS 510 High Stalinist Culture. (3) (Winter) (Given in English) Novels, films, art, architecture, pageantry, rhetoric and routine of the Stalinist 1930s-40s, including socialist realism as an aesthetic doctrine, utopian blueprint, target of parody, amalgam of a submerged avantgarde and state-controlled pop culture, precursor of the postmodernist simulacrum, self-proclaimed international style and/or uniquely Russian 20th-century project.

SDST-Sexual Diversity Studies Offered by: Arts - Dean's Office

SDST 250 Introduction: Sexual Diversity Studies. (3) A general introduction to the study of sexual and gender diversity and sexuality from a range of perspectives and across a variety of disciplines.

SDST 450 Independent Reading & Research. (3) (Prerequisite: SDST 250.) (Restriction: Program students in Sexual Diversity Studies. Program and advisor approval required.) Advanced reading course and independent research project under the supervision of an instructor on aspects of Sexual Diversity Studies.

SOCI-Sociology Offered by: Sociology

SOCI 199 FYS: Transition from School to Work. (3) (Restriction: Open only to newly admitted students in U0 or U1, who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.) Maximum 25) An examination of the vocational preparation provided by various levels of the educational system (including adult education); the relationship between the preparation and subsequent labour market experience; and the organization of training with particular reference to government training policy. International comparisons are central to the content of this course.

SOCI 210 Sociological Perspectives. (3) Major theoretical perspectives and research methods in sociology. The linkages of theory and method in various substantive areas including: the family, community and urban life, religion, ethnicity, occupations and stratification, education, and social change.

SOCI 211 Sociological Inquiry. (3) (Prerequisite or Corequisite: SOCI 210) An introductory review of methods of sociological research including research design, elementary quantitative data analysis, observation, and use of official statistics. Detailed examination of published examples of the use of each of the major techniques of data analysis and collection.

• SOCI 216 Social Psychology. (3) (Restriction: Not open to students who have taken PSYC 215, PSYC 330, or MGCR 221) Introduction to significant elements of theory and research related to
micro-level social interactional processes involved in the
development of self, perceptions, and behaviour. Topics will
include socialization, attitudes, persuasion, social cognition,
the behaviour of groups, emotion, prejudice and discrimination,
and violence and aggression.

- **SOCI 217 Canadian Mass Communications.**
  (3) An introduction to the history, structure and functions of
  the mass media in Canada and the way ownership patterns affect
  message content. The focus is comparative, stressing differences
  between the U.S. and Canada and policy interrelationships
  resulting from overflow programming.

- **SOCI 219 Sociology of Culture.**
  (3) A survey of theoretical approaches and substantive topics in
  the culture. Topics include: norms and values in national
  cultures; negotiation of cross-cultural interpersonal exchanges;
  structural codes and cultural classifications; production
  context and consumption of cultural objects; the differential reception of
  cultural products.

- **SOCI 222 Urban Sociology.**
  (3) Comparative analysis of the process of urbanization in
  Europe, North America and the Third World; effects of
  urbanization upon social institutions and individuals; theories
  of urbanization and urbanism; urban problems in comparative view.

- **SOCI 225 Medicine and Health in Modern Society.**
  (3) Socio-medical problems and ways in which sociological
  analysis and research are being used to understand and deal with
  them. Canadian and Québec problems include: poverty and health;
  mental illness; aging; death and dying; professionalism; health
  service organization.

- **SOCI 230 Sociology of Ethnic Relations.**
  (3) (Prerequisite: SOCI 210 or permission of instructor) An
  introduction to the sociological study of minority groups in
  Canada. The course will explore the themes of racism, prejudice,
  and discrimination, ethnic and racial inequalities, cultural
  identities, multiculturalism, immigration. Theoretical,
  empirical, and policy issues will be discussed. While the focus
  will be primarily on Canada, comparisons will be made with the
  United States.

- **SOCI 234 Population and Society.**
  (3) Introduction to the reciprocal linkages in the social world
  between population size, structure and dynamics on the one hand,
  social structure, action and change on the other. An examination
  of population processes and their relation to the social world.

- **SOCI 235 Technology and Society.**
  (3) An examination of the extent to which technological
  developments impose constraints on ways of arranging social
  relationships in bureaucratic organizations and in the wider
  society: the compatibility of current social structures with the
  effective utilization of technology.

- **SOCI 247 Family and Modern Society.**
  (3) (Course for the Women's Studies Concentrations) Contrasting
  family in Canada and in the United States for the recent past.
  Examination of theories on family; changes and diversity of
  family life; complex relationships among marriage, work, and
  family; domestic violence; various types of family experience;
  and the future of the family.

- **SOCI 250 Social Problems.**
  (3) Contrasting theoretical approaches to social problems.

- **SOCI 254 Development and Underdevelopment.**
  (3) Competing theories about the causes of underdevelopment in
  the poor countries. Topics include the impact of geography,
  the population explosion, culture and national character,
  economic and sexual inequalities, democracy and dictatorship.
  Western imperialism and multi-national corporations, reliance on
  the market, and development through local participation,
include: housework; the relationship(s) between gender, organizations and bureaucracy; emotional labour; occupational segregation and stratification; sexual harassment; and work-family policy.

SOCI 322 Sociology of Literature. (3) (Prerequisite: SOCI 219.) A review of sociological research on the production, readership, and broader social implications of literature. Topics will include: the issue of whether literature "reflects" society, the use of literature in establishing collective identities, and reading as a social practice.

SOCI 326 Political Sociology. (3) An examination of the social changes that underly the emergence of modern politics. An outline and empirical critique of the principal alternative models of political functioning in industrial societies. Empirical analysis of elite and mass political behaviour.

SOCI 327 Jews in North America. (3) Understanding of contemporary North American Jewry using findings of sociology and other social sciences. Social, cultural, and political issues of concern to the Jewish community. Specific characteristics of Jewish life in Canada, and Québec in particular, in comparison to the American Jewish experience.

SOCI 330 Classical Sociological Theory. (3) (Prerequisite: SOCI 210 or permission of instructor) Major sociological theoretical traditions are seen in their historical contexts, as the background to current theoretical issues. Emphasis on Smith, Tocqueville, Marx, Durkheim, Weber and Parsons.

SOCI 333 Social Stratification. (3) The pattern, causes and consequences of social inequality. Among the inequalities considered are those of economic class, sex (gender), race, ethnicity and age. Competing theories of the causes of social inequalities are compared and assessed.

SOCI 338 Introduction to Biomedical Knowledge. (3) The dynamics of biomedical disciplines and specialties. Social, scientific, political and commercial aspects of biomedical research. The organization of work in clinical and fundamental research and its consequences on the choice of research topics.

SOCI 340 Current Problems in Sociology. (3) (Prerequisite: permission of instructor.) (Restriction: Open to U2 and U3 students only) Intended for students who are adequately prepared to undertake advanced work and have an explicit proposal to submit.

SOCI 341 Current Problems in Sociology. (3) (Prerequisite: permission of instructor.) (Restriction: Open to U2 and U3 students only) Intended for students who are adequately prepared to undertake advanced work and have an explicit proposal to submit.

SOCI 342 Independent Study 1. (3) (Prerequisite: permission of instructor.) (Restriction: Open to U2 and U3 students only) Intended for students who are adequately prepared to undertake advanced work and have an explicit proposal to submit.

SOCI 343 Independent Study 2. (3) (Prerequisite: permission of instructor.) (Restriction: Open to U2 and U3 students only) Intended for students who are adequately prepared to undertake advanced work and have an explicit proposal to submit.

SOCI 350 Statistics in Social Research. (3) (Prerequisite: SOCI 211) (Restriction: Not open to students who have taken PSYC 204, PSYC 305 or ECON 227) (You may not be able to receive credit for this course and other statistics courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) This is an introductory course in descriptive and inferential statistics. The course is designed to help students develop a critical attitude toward statistical arguments. It serves as a background for further statistics courses, helping to provide the intuition which can sometimes be lost amid the formulas.

SOCI 354 Dynamics of Industrial Societies. (3) (Prerequisite: SOCI 210 or any other introductory course in the social sciences) Theories of social, economic, and political change in the industrialized societies. Causes of cycles in economic growth; imperialism and war; and in ethnic, religious, and industrial conflict. Causes of long run trends in social inequality, crime, family stability, and the position of women. Comparison of North America, Europe, Russia, and Japan.

SOCI 370 Sociology; Gender and Development. (3) (Prerequisite: SOCI 210) Exploration of the main development theories and discussion of how gender is placed within them, analysis of the practical application of development projects and discussion of how they affect gender dynamics, and examination of power relations between development agencies and developing countries. Examples from Sub-Saharan Africa and Latin America are used.

SOCI 377 Deviance. (3) Introduction to the sociological study of deviance. Emphasis on the "societal reaction" or "interactionist" approach to deviance. The correctional and causal approach towards deviance, its limitations and alternative ways to address the subject of deviance.

SOCI 386 Contemporary Social Movements. (3) This course will focus on contemporary social movements in Canada, the U.S., and Western Europe, such as the civil rights movement, the women's movement, and the environmental movement. Empirical studies of movements will be used to explore such general issues as how social movements emerge, grow, and decline.

SOCI 388 Crime. (3) Introductory course on methods and theories in criminology. Exploration of the nature and distribution of crime; and critical evaluation of definitions and the measurement of crime; review of theoretical approaches used to understand such a phenomenon; a comparative overview of the criminal justice system.

SOCI 390 Gender and Health. (3) Key conceptual and substantive issues in gender and health since c1950: stratified medicalization of women's and men's health; social movements in health including the women's health movement; gender inequality in morbidity and mortality; gender, power and control in patient/physician interactions; embodied experience; politics and policies of gender and health.

SOCI 420 Organizations. (3) (Prerequisites: SOCI 210 or SOCI 235) A survey of theories of organization with particular reference to problems of growth, technology, centralization and decentralization, and organizational environments.

• SOCI 422 Health Care Providers. (3) Current trends and issues in health and illness. The role of occupations and organizations which define health and illness, and organize and provide health care. Topics include: the impact of interprofessional relationships; legitimation of approaches to health and illness; knowledge and belief systems, and the role of power; challenges to traditional providers, and the impact of the consumers' and women's movements.

• SOCI 424 Networks and Social Structures. (3) The study of relations and networks. Concepts and techniques of network analysis. Issues include: interlocking directorates, social relationships among individuals in heterogeneous communities and organizations, and relations among elites. Students will be required to design an inquiry into one of these substantive domains.

• SOCI 425 Sociology of the Body. (3) (Prerequisite: SOCI 225 or Permission of Instructor.) Sociological examination of the human body as a cultural phenomenon that intersects with identity, health, illness, disability and medicine. Exploration of meanings attributed to human bodies as well as the body as a site of social interaction.

• SOCI 435 Popular Culture. (3) A seminar exploring the nature of popular culture, tracing historical beginnings and contemporary changes in film, TV, comics, magazines, and rock music content. Emphasis on developing theoretical perspectives and methodologies for analysing genres and themes, and for making distinctions between
so-called folk and popular art.

**SOCI 440 Current Problems.**
(3) (Prerequisite: permission of instructor.) (Restriction: Open to U2 and U3 students only) Intended for students who are adequately prepared to undertake advanced work and have an explicit proposal to submit.

**SOCI 441 Current Problems in Sociology.**
(3) (Prerequisite: permission of instructor.) (Restriction: Open to U2 and U3 students only) Intended for students who are adequately prepared to undertake advanced work and have an explicit proposal to submit.

**SOCI 442 Independent Reading and Research.**
(3) (Prerequisite: permission of instructor.) (Restriction: Open to U2 and U3 students only) Intended for students who are adequately prepared to undertake advanced work and have an explicit proposal to submit.

**SOCI 443 Independent Reading and Research.**
(3) (Prerequisite: permission of instructor.) (Restriction: Open to U2 and U3 students only) Intended for students who are adequately prepared to undertake advanced work and have an explicit proposal to submit.

**SOCI 455 Post-Socialist Societies.**
(3) (Prerequisite: SOCI 210.) The demise of Communist Party rule between 1989 - 1991 throughout Eastern Europe and the Soviet Union. The societal implications (e.g. class formation, gender relations, nationalism, corruption, religious freedom) of these dramatic economic and political changes.

**SOCI 460 Responses to Social Problems.**
(3) (Prerequisite: permission of instructor.) This seminar focuses on attempts to resolve social problems. There will be discussion and debate concerning policies suggested and critical examination of their potential successes and failures. The course presupposes knowledge of social problems issues obtained in 166-250. Topics include: crime and prisons; discrimination and inequality; poverty; and drug use.

**SOCI 461 Quantitative Data Analysis.**
(3) (Prerequisite: SOCI 350) (You may not be able to get credit for this course and other statistic courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) This course blends theory and applications in regression analysis. It focuses on fitting a straight line regression using matrix algebra, extending models for multivariate analysis and discusses problems in the use of regression analysis, providing criteria for model building and selection, and using statistical software to apply statistics efficiently.

**SOCI 470 Topics in Economic Sociology.**
(3)

**SOCI 475 Canadian Ethnic Studies Seminar.**
(3) (Restriction: Open to students following the Minor Concentration in Canadian Ethnic Studies; or to students with at least nine credits, three at the 300 level, in the social sciences; or with permission of instructor. Not open to students taking CANS 404 in 2007-08.) An interdisciplinary seminar focusing on current social sciences research and public policies in areas relating to Canadian ethnic studies. Topics will include ethnic and racial inequalities, prejudice and discrimination, ethnic identities and cultural expressions, the structure and organization of minority groups.

**SOCI 480 Honours Project.**
(3) (Restriction: For Sociology U3 Honours and Joint Honours students only) The Honours Project, normally in the form of a paper, provides every Honours student with the opportunity to work independently on a topic of special interest. The student works out the topic for the Honours Project through discussions with appropriate potential supervisors (aided by the Honours Adviser when necessary).

**SOCI 484 Emerging Democratic States.**
(3) (Prerequisite: SOCI 210) Focus on the sociological aspects of recent transitions to democracy within developing countries - particularly within Sub-Saharan Africa and Latin America. Exploration of why democratization has taken place, to what extent it has been successful and the implications of democratization.

**SOCI 489 Gender, Deviance and Social Control.**
(3) (Course for Women's Studies Concentrations) (Prerequisite: Permission of instructor) (Restriction: open to U3 students concentrating on social problems.) This seminar examines how the definition of deviance, reactions to deviance and explanations deviance are gendered. Specific topics vary from year to year.

**SOCI 495 Social Problems and Conflicts.**
(3) (Prerequisite: permission of instructor) This course explores the social construction of "social problems". It focuses on the social conflicts involved in the definition of social issues and on how and why "problems" change over time. Issues such as drinking, smoking, drug use, pornography, abortion, and homosexuality will be discussed.

**SOCI 499 Internship: Sociology.**
(3) (Restriction: Open to U2 and U3 students with a minimum CGPA of 2.7, and permission of the departmental Internship Advisor. This course will normally not fulfill program requirements for seminar or 400-level courses. A letter from a supervisor at the institution must attest to successful completion of the student's tenure.) Internship with an approved host institution or organization.

**SOCI 504 Quantitative Methods 1.**
(3) (Prerequisites: SOCI 350 and SOCI 461 or equivalents) Analysis of quantitative information, especially in large, survey-type, data sets. Use of computer programs such as SPSS and SAS. Topics include: cross tabulations with an emphasis on multi-dimensional tables, multiple correlation and regression, and, the relationship between individual and aggregate level statistical analyses. Special reference to demographic techniques.

**SOCI 505 Quantitative Methods 2.**
(3) (Prerequisite: SOCI 504) Topics include: problems - and solutions - in regression analysis, models for categorical dependent variables, including logit, log-linear, and linear probability models, measurement models, structural equation models with latent variables (LISREL), and time series and panel analysis.

**SOCI 506 Quantitative Methods 3.**
(3) (Prerequisite: SOCI 504 or equivalent or permission of instructor.) Advanced statistical analyses focusing on advanced methods such as event history analysis and analysis of contingency tables.

**SOCI 507 Social Change.**
(3) (Restrictions: Not open to students who have taken SOCI 672. Undergraduates by permission of instructor only.) An examination of the major sociological theories of long term macro social change. Topics include why industrialization began in Europe instead of Asia, the divergence among societies in systems of class, gender, ethnic and racial inequality, and whether industrial society has entered a new post-industrial or post-modern phase.

**SOCI 508 Medical Sociology and Social Psychiatry.**
(3) (Prerequisite: SOCI 309 or SOCI 310 or Permission of the Instructor.) (Note: Open to Social Studies of Medicine students.) The social construction of mental illness and disease, the personal and professional definition and recognition of illness, the distribution and determinants of

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

- Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
- Denotes courses taught only in alternate years.
- Denotes courses not available as Education electives.
- Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
- Denotes courses not offered by the Faculty of Education which, if appropriate to the student's program, may be included in the academic concentration.
- Indicates that departmental approval/permission must be obtained by a student prior to registration.
- Denotes courses not available as Education electives.
- Denotes courses not available as Education electives.

2007-2008 Undergraduate Programs Calendar, McGill University
illness, disease, sickness in the population, and the politics of medical research.

● SOCI 510 Seminar in Social Stratification.
(3) (Prerequisites: SOCI 333 and SOCI 350 or equivalents) Recent theoretical and empirical developments in social stratification and inequality. The study of social class, with attention to the anomalous findings on heterogeneity in labour markets and the labour process, status attainment processes, and the socio-political and industrial attitudes of the working class. Students will prepare quantitative analysis of Canadian survey material as well as critical qualitative reviews.

SOCI 511 Movements/Collective Action.
(3) A critical examination of classical and more recent approaches to the study of social movements and collective action. Discussion of: the role of grievances and interests, incentives and beliefs, conditions of breakdown and solidarity, mobilization and social control, the dynamics of collective action.

SOCI 512 Ethnicity & Public Policy.
(3) (Prerequisite: SOCI 230 or permission from the instructor.) (Restriction: Not open to students who have taken SOCI 629.) Major themes in the theoretical literature on ethnicity. Public policies with direct and indirect implications for inter-ethnic relations will be studied. Policies affecting areas such as language, education, immigration, employment and promotion, multiculturalism and welfare. Examples drawn from several multi-ethnic societies. Political, constitutional, and economic problems associated with these policy initiatives.

SOCI 515 Medicine and Society.
(3) (Prerequisite: Undergraduate students require permission of instructor) The sociology of health and illness. Reading in areas of interest, such as: the sociology of illness, health services occupations, organizational settings of health care, the politics of change in national health service systems, and contemporary ethical issues in medical care and research.

SOCI 519 Gender and Globalization.
(3) (Prerequisite: SOCI 270 or permission of instructor.) Focus on the diverse forces of globalization that impact the lives of men and women. Critical analysis of key theories and concepts implicated in the intersection of globalization processes with gender dynamics.

● SOCI 520 Migration and Immigrant Groups.
(3) (Prerequisite: 15 credits in the Social Sciences) Review of the major demographic, economic and sociological theories of internal and international migration. The main emphasis will be on empirical research on migration and immigrant groups.

SOCI 525 Health Care Systems in Comparative Perspective.
(3) (Prerequisite: Permission of instructor.) (Restriction: Not open to students who are taking or have taken EPIB 525.) (Note: This course is cross-listed in Epidemiology, Biostatistics and Occupational Health and in Sociology.) Comparative perspective to illustrate processes involved in the development and evolution of health care systems around the world. Countries examined will represent different welfare state regimes, health care system typologies, levels of development and wealth.

SOCI 530 Sex and Gender.
(3) (Restriction: Open to Honours Sociology students and to Sociology Majors with the permission of the instructor) This seminar critically reviews theoretical perspectives and research on sex and gender in various domains of social life. It gives special emphasis to work which considers the meaning of gender and how it differs across time and place.

SOCI 535 Sociology of the Family.
(3) (Undergraduate students require permission of instructor) This seminar reviews current research literature on major research areas in family. The course examines families in the past, the study of family using a life course approach, and considers selective areas which may have had significant influences on contemporary family such as work and family, family violence, and cultural variation in families.

SOCI 538 Selected Topics in Sociology of Biomedical Knowledge.
(3) The seminar will examine recent work in the sociology of biomedical knowledge. It will focus on the technological shaping of biomedical knowledge, i.e. on the impact of new technologies and equipments on the development of biomedical knowledge.

SOCI 540 Qualitative Research Methods.
(3) (Restrictions: open to Sociology Honours students, and Sociology Major Concentration students with the instructor's permission) Qualitative methodology, mainly participant observation, structured and unstructured interviewing. Students begin a research project using these techniques and submit field notes once a week.

SOCI 545 Sociology of Population.
(3) (Prerequisites: SOCI 234 or equivalent.) The classic literature of sociology of population. Drawing reciprocal linkages between social and population processes: Historical, family and labour force demography, demographic and fertility transitions, mortality, ethnic and race relations, gender, macro-structural interaction theory, and the relation of population and the environment.

SOCI 550 Developing Societies.
(3) Comparison of alternative explanations of underdevelopment: the impact of social stratification, relations of domination and subordination between countries, state interference with the market. Alternative strategies of change: revolution, structural adjustment, community development and cooperatives. Students will write and present a research paper, and participate extensively in class discussion.

SOCI 555 Comparative Historical Sociology.
(3) (Restriction: Undergraduate students require permission of instructor) The analysis of patterns of state and nation-building in historical and comparative perspectives with particular attention being given to methodology.

● SOCI 565 Social Change in Panama.
(3) (Prerequisites: SOCI 210 and SOCI 350 or equivalents.) (Restriction: Students must register for a full term in the Panama Field Studies Semester.) (Note: Four field trips.) Analysis of social change in Panama, particularly during the 20th century: demography, social and economic structures, rural and urban activities and landscapes, indigenous peoples, the effects of the Canal and the Free Trade Zone. Focus throughout on the interaction of human society and the environment.

SOCI 571 Deviance and Social Control.
(3) This seminar focuses on how social groups enforce rules (and maintain social order) through coercion and socialization. It reviews current research and critiques key theoretical approaches to social control. Included are discussions of regulating institutions such as prisons and mental asylums, and the roles of gossip, manners and etiquettes.

SOCI 580 Social Research Design and Practice.
(3) (Restriction: Open to U3 and graduate students) Asking researchable sociological questions and evaluation of different research designs used to answer such questions. Development of cogent research proposals, including data collection procedures. Principles, dynamics, strengths and practical limitations of research designs. Examples from recent publications.

SOCI 588 Sociology of Knowledge.
(3) (Restriction: Not open to students who have taken SOCI 661.) A review of the current research in the sociology of knowledge. The focus will be on sociological studies of the formation, circulation and reception of scientific and artistic ideas, beliefs and practices, and the configuration and social organization of the collectives involved in these processes.

SSMD-Social Studies of Medicine
Offered by: Social Studies of Medicine

SSMD 199 FYS: Mind-Body Medicine.
(3) (Restriction: Open only to newly admitted students in U0 or U1, who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.) (Limit 25 students) Health is influenced by biological, psychological and social factors. The interaction between these determinants in the onset, course and recovery from a variety of
across a range of practice settings. Knowledge and skills required for assessment and treatment culture, ability and diverse family forms are integrated. Social context. Sexual orientation, race, class, gender,SWRK 320D1 and SWRK 320D2 are successfully completed in 320D2. (No credit will be given for this course unless both (Students must register for both SWRK 320D1 and SWRK credit program.) (Restrictions: Limited to BSW students. Not open to students who have taken or are taking SWRK 376.) Theories and models that inform practice with groups and communities. Emphasis on understanding community and group dynamics including power and conflict, organizing strategies, leadership development, the development of community and group assessment skills, and modes of community and group intervention. Knowledge used to develop group and community-based skills.

SWRK 322 Field Practice 1. (3) (Restrictions: Limited to BSW students. Not open to students who have taken SWRK 355.) Supervised educational experiences in social work practice designed to integrate practice and theory.

SWRK 323 Field Practice 2. (3) (Prerequisite: SWRK 322.) (Restrictions: Limited to BSW students. Not open to students who have taken SWRK 356.) Supervised educational experiences in social work practice designed to integrate practice with theoretical knowledge.

SWRK 324 (3) (Prerequisite: SWRK 323.) (Restriction: Limited to students in the 60-credit BSW program.) Supervised educational experiences in social work practice designed to integrate practice and theory.

SWRK 325 Anti-Oppression Social Work Practice. (3) (Prerequisite: SWRK 223.) (Restrictions: Limited to BSW students. Not open to students who have taken SWRK 344.) Social work policy and practice, including an examination of discrimination and oppressions, identity and social location, reflexivity, intersectionality, contemporary anti-oppression movements, access and equity in human services and their implications.

SWRK 341 Introduction: Practice with Families. (3) (Winter) An introduction to theories and techniques of family assessment and intervention using genograms, family systems and eco-systemic approaches and family life cycle theory. The effects of class, gender, race, culture; also diverse family forms (nuclear, extended, divorcing, reconstituted, substitute, lone parent, gay/lesbian) are considered. Illustrations using simulations and tapes.

SWRK 342 Practice with Gay, Lesbian, Bisexual & Two-Spirit People. (3) (Restrictions: Social Work BSWU2, BSWU3, Special BSW students and U2, U3 Minor in Sexual Diversity Studies students.) Issues facing gay, lesbian, bisexual and two-spirit people. Addresses how social workers can support the development of health and social services informed by principles of social justice and equity. Topics include self-esteem, youth at risk, families, and aging.

SWRK 350 Social Work Skills Laboratory. (3) (Summer) (Restriction: Limited to Special B.S.W. Students) A Compulsory Skills laboratory for all Special B.S.W. students which focuses on developing basic group and community-based skills. Not open to students who have taken or are taking SWRK 376.) Theories and models that inform practice with groups and communities. Emphasis on understanding community and group dynamics including power and conflict, organizing strategies, leadership development, the development of community and group assessment skills, and modes of community and group intervention. Knowledge used to develop group and community-based skills.

SWRK 351 Children’s Needs and Social Services. (3)

SWRK 352 Practice with Gay, Lesbian, Bisexual & Two-Spirit People. (3) (Restrictions: Social Work BSWU2, BSWU3, Special BSW students and U2, U3 Minor in Sexual Diversity Studies students.) Issues facing gay, lesbian, bisexual and two-spirit people. Addresses how social workers can support the development of health and social services informed by principles of social justice and equity. Topics include self-esteem, youth at risk, families, and aging.

SWRK 353 Introduction to Practice. (6) (Summer) (Corequisite: SWRK 350) (Restriction: Limited to Special B.S.W. students only) Introduction to the principles and practice of social work. Examination of social legislation, social policy, and social services.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.

Denotes courses not offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.

Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
SWRK 354 Social Work in the Health Field.
(3) (Winter) (Restriction: Limited to Social Work students)
(Restriction: Not open to B.S.W. U1 students). An introduction to health and health institutions in the context of service delivery. Major themes will include: multidisciplinary teamwork in the hospital; crisis intervention; legal ethical issues; and emerging issues for social workers in health.

SWRK 374 Community Development/Social Action.
(3) (Fall) (Restriction: Not open To U1 Level Students.) The organizing process and development of direct organizing skills. Emphasis on organizational entities, community power and conflict, organizing strategies and their application, urban community development.

SWRK 376 Social Work Practice with Groups.
(3) (Fall) (Prerequisite: U1 required Social Work course) (Restriction: Limited to B.S.W. students only) Theory and practice of work with groups. Emphasis on understanding group concepts and group dynamics and learning about various theoretical models of social group practice. Focus on group development theory and the skills of the worker in a small group context. Small group participation, role playing and simulations will be utilized.

● SWRK 377 Women’s Issues in Practice.
(3) (Winter) (Restriction: Limited to B.S.W. U2, B.S.W. U3, Special B.S.W. and U3 Women’s Studies Major/Minor Concentration students) Social work practice with women based on recent advances in understanding women’s relationships to the structures and institutions of society. Issues which arise in the provision of social services: women and the family, mental and physical health, poverty and the welfare system, feminist counselling.

SWRK 400 Policy and Practice for Refugees.
(3) (Fall and Summer) (Restriction: Limited to B.S.W. U3 level students, and U3 non-Social Work students) Refugee-generating conflicts, international and national responses are considered. Canadian policy, history and response to refugees are analyzed. Theory-grounded practice with refugees is examined, including community organizing and direct service delivery to individuals and families.

● SWRK 402 Developmental Disabilities.
(3) (Winter) (Restriction: Limited to U2 and U3 level students) This course provides an in-depth analysis of social work's response to persons with a developmental disability. Students will review both the practice and the policy considerations that pertain to the field of developmental disabilities with a special emphasis on the effects of deinstitutionalization and the community response.

● SWRK 403 Assessment - Clinical and Community.
(3) (Winter) (Restriction: Limited to B.S.W. U2, B.S.W. U3 and Special B.S.W. students only.) (Prerequisite: SWRK 240) Social work assessment is the crucial professional activity on which all interventions, clinical and community, are based. This course will address relevant factors involved in the situations faced by social work practitioners and their clients as they attempt to collaboratively solve problems.

SWRK 420 Advanced Field Practice 1.
(3) (Prerequisite: SWRK 323.) (Restriction: Limited to BSW students.) Supervised educational experience in social work practice at an advanced level.

SWRK 421 Advanced Field Practice 2.
(3) (Prerequisite: SWRK 420) (Restriction: Limited to BSW students completing their last practicum.) Supervised educational experience in social work practice at an advanced level.

● SWRK 422D1 (1.5), SWRK 422D2 (1.5) Integrative Seminar.
(Prerequisite: SWRK 323.) (Restrictions: Limited to BSW students. Not open to students who have taken SWRK 340D1/D2.) (No credit will be given for this course unless both SWRK 422D1 and SWRK 422D2 are successfully completed in consecutive terms.) Analyzing field experiences operationalizing the link between scholarship and practice. Dimensions of equity will be integrated.

● SWRK 423 Social Work Research.
(3) (Prerequisites: SWRK 320D1/D2, SWRK 321D1/D2.) (Restrictions: Limited to BSW students. Not open to students who have taken SWRK 401.) Appraising and analyzing social work practice research, including the perspectives of the authors, the literature reviewed, the practice questions, the research methodology and analysis and the implications of the findings for practice.

SWRK 424 Mental Health and Illness.
(3) (Prerequisite: SWRK 320 is a prerequisite for the students in the 90-credit program.) (Corequisite: SWRK 320) is a corequisite for the students in the 60-credit program.) (Restrictions: Limited to BSW students. Not open to students who have taken SWRK 482.) Symptoms of mental illness and approaches to the delivery of services and programs within various sites of care. Impact of stigma and the place of psychosocial rehabilitation. Biopsychosocial framework and effective practice models examined with an emphasis on policy and its implications for the delivery of services and programs.

SWRK 428 Social Policy and Administration.
(3) (Prerequisites: SWRK 320D1/D2, SWRK 321D1/D2.) (Restrictions: Limited to BSW students. Not open to students who have taken SWRK 458.) An analysis of the administrative structures and dynamics of social service organizations, with special attention to Québec policies and to the role of social workers. Examples are drawn from current field experiences of students.

SWRK 434 Practice with Involuntary Clients.
(3) (Winter) (Restriction: Limited to B.S.W. U3 and Special B.S.W. students) Issues and practice problems encountered with involuntary clients in settings such as courts, youth protection agencies and total institutions. Topics include: reaction of the client and worker to the "involuntary" situation, the ethics and efficacy of "coerced treatment" and practice interventions with involuntary clients. Students draw on their own experience with these issues.

● SWRK 438 Drug Addiction and Society.
(3) (Fall or Winter) (Restriction: Limited to B.S.W. U3 and Special B.S.W. Students) This course examines primarily the abuse in our society of illegal drugs e.g. heroin, cocaine and marijuana, and the abuse of prescription drugs, e.g. tranquilizers and narcotics. Topics include: assessment and treatment; I.V. drug use and the spread of the HIV virus; Canada's policy on illegal drugs.

● SWRK 459 Adult/Child Sexual Relations.
(3) (Restriction: Limited to B.S.W. U3 and Special B.S.W. students) An examination of intra/ extra-familial child sexual abuse with a focus on the individual and family psychodynamics, the legal systems that respond to the problem and on assessment and treatment skills.

SWRK 463 Practice with the Elderly.
(3) (Winter) (Restriction: Limited to B.S.W. U2, B.S.W. U3, Special B.S.W. and U3 non-B.S.W. students) An introduction to social services to the aged. The involvement of the social worker with respect to: institutionalizing the elderly, community care, economics and aging, widowhood, separation and loss, the family situation of the elderly, and the strengths of older people.

● SWRK 465 School Social Services.
(3) (Winter) (Restriction: Limited to B.S.W. students) (Restriction: Not open to U1 students) Introduction to models of school social work practice. Diagnostic and practice approaches places emphasis on the relationships between the school, family, community and the pupil. Problems which affect the school social worker include: youth protection, children with special needs, drop-outs, conduct-disordered behaviour, integration of immigrants and violence.

SWRK 471 Tutorial in Social Work Research.
(3) (Fall and Winter and Summer) (Prerequisite: SWRK 401 or equivalent.) (Restriction: Limited to B.S.W. U3 and Special B.S.W. students) Opportunity for interested students to conduct a small-scale practical research project, either individually or in a small group, with tutorial assistance from staff members.
● SWRK 472 Family Assessment.
(3) (Fall) (Restriction: Limited to B.S.W. U3 and Special B.S.W. students) An opportunity to participate in a seminar focusing on an integrative model of work with families. Concurrent field practice with families required.

● SWRK 473 Individuals and Families in Crisis.
(3) (Restriction: Limited to B.S.W. U3 and Special B.S.W. students) Theory and practice of work with individuals and families under stress. Topics include: categories of hazardous events; affective, behavioural and role disorganization; phases in the crisis cycle; techniques of crisis intervention and abatement.

● SWRK 481 Goal Directed Time Limited Practice.
(3) (Fall) (Restriction: Limited to B.S.W. U3 and Special B.S.W. students) Principles of goal directed time limited casework with individuals, couples and families. Relevant theory will be examined and applied to practice drawing upon examples from the students’ field experiences. Emphasis on goal setting, contracting, use of tasks, evaluation of practice.

(3) (Fall and Winter and Summer) (Restriction: Limited to B.S.W. U3 and Special B.S.W. students) An individual or small group tutorial in which students will work independently in conjunction with the instructor. The student will undertake a project related to the area of specialization.

SWRK 486 Tutorial in Social Policy.
(3) (Fall and Winter and Summer) (Restriction: Limited to B.S.W. U3 and Special B.S.W. students) An individual or small group tutorial in which students will work independently in conjunction with the instructor. The student will undertake a project related to the area of specialization.

SWRK 492 Violence against Women and Children.
(3) (Winter) (Restriction: Limited to B.S.W. U3, Special B.S.W., and Women's Studies Major/Minor Concentration students) Through a feminist theoretical lens, this course examines a range of male-perpetrated sexual and physical abuses of women and children. Such an examination includes critical appraisals of "common knowledge", research findings, dominant modes of intervention, and social welfare policies and legislation.

SWRK 493 Seminar on Child Protection.
(3) (Fall) (Restriction: Limited to B.S.W. U3 and Special B.S.W. students) The field of child protection and the problems of physical and sexual abuse and neglect of children. The general characteristics of this vulnerable population group and their families as well as some models of intervention.

● SWRK 497 Clinical Practice Seminar 1.
(3) (Restriction: Limited to B.S.W. U3 and Special B.S.W. students) Practice competence with various population groups: physically and mentally handicapped, terminal-ill, multi-problem families. Topics may change from year to year.

SWRK 498 Clinical Practice Seminar 2.
(3) (Fall) (Restriction: Limited to B.S.W. U2, B.S.W. U3, Special B.S.W. and U3 non-B.S.W. students) Practice competence with various population groups. Topics may change from year to year.

● SWRK 525 Critical Thought and Ethics in Social Work.
(3) (Prerequisite: SWRK 325.) (Restriction: Limited to BSW and MSW students.) Use of theory and reflexivity to challenge the various ways knowing and practicing within social work. Critically engage and assess the theoretical basis of social work theories and knowledge acquired over the course of the program. Application of this knowledge to ethical dilemmas that arise in practice.

● SWRK 531 Social Perspectives on Aging 2.
(3) (Summer) (Restriction: School of Social Work: Limited to U3 and M.S.W. students) Instructors and students from various disciplines will focus on certain aspects of aging related to issues of independence in later life. The provision of services and their impact on the recipients will be evaluated. Senior citizens will participate in the course as Senior Consultants.

SWRK 532 International Social Work.
(3) (Winter) (Restriction: Limited to B.S.W. U3, Special B.S.W. and M.S.W. students) Discussion based upon intensive study and reports on problems in selected countries. Emphasis on identifying major social problems, understanding the social forces bearing on those problems and considering appropriate professional approaches to aid in their solution.

● SWRK 539 Chronic and Terminal Illness.
(3) (Winter) (Restriction: Limited to B.S.W. U3, Special B.S.W. and M.S.W. students) A seminar to examine practice with persons living with chronic and terminal illnesses. Needs of families, caretakers, health care workers and the gay community are studied.

WMST-Women's Studies

Offered by: Arts - Dean's Office

WMST 200 Introduction to Women's Studies.
(3) (Summer - Section 001 (04-Jun-2007/04-Jul-2007)) An introduction to the interdisciplinary field of Women's Studies from historical and contemporary perspectives, this course will explore key concepts, issues and modes of analysis based on the intersection of gender with factors such as race, ethnicity, class, religion, and sexuality.

WMST 301 Women's Studies Current Topics 1.
(3) (Prerequisite: WMST 200 or PHIL 242 or permission of instructor) Topic for Fall 2007: Women of Colour in Canada Consideration of contemporary issues in Women's Studies. Topic and approach will vary from year to year.

WMST 302 Women's Studies Current Topics 2.
(3) (Prerequisite: WMST 200 or PHIL 242 or permission of instructor) Consideration of contemporary issues in Women's Studies. Topic and approach will vary from year to year.

WMST 303 Feminist Theory and Research.
(3) (Prerequisite: WMST 200) (Restriction: Open to Women's Studies students only) This course explores contemporary feminist theories and critiques of approaches to knowledge developed in the humanities, social, natural, and applied sciences. Feminist contributions to research and critical practices will be examined in relation to course projects.

WMST 401 Women's Studies Special Topics 1.
(3) (Prerequisite: WMST 200 or PHIL 242 or permission of instructor) Advanced seminar in selected themes and issues in Women's Studies. Topics and theoretical or disciplinary approach will vary from year to year.

WMST 402 Women's Studies Special Topics 2.
(3) (Prerequisite: WMST 200 or PHIL 242 or permission of instructor) Advanced seminar in selected themes and issues in Women's Studies. Topics and theoretical or disciplinary approach will vary from year to year.

WMST 461 Tutorial in Women's Studies 1.
(3) (Prerequisite: WMST 303 or permission of instructor) (Restrictions: Majors, Honours and Joint Honours students in Women's Studies. Program and advisor approval required.) Advanced reading course and independent research project under the supervision of an instructor on aspects of Women's Studies.
WMST 462 Tutorial in Women's Studies 2.
(3) (Prerequisite: WMST 303 and permission of instructor)
(Restriction: Majors, Honours and Joint Honours students in Women's Studies.) Advanced reading course and independent research project under the supervision of an instructor on aspects of Women's Studies.

WMST 494 Internship: Women's Studies.
(3) (Restrictions: Open to U-2 and U-3 students after completing 30 credits of a 90 credit program or 45 credits of a 96-120 credit program. A minimum CGPA of 2.7, and permission of the Women's Studies Internship Program Coordinator required. This course will not normally fulfill program requirements for seminar or 400-level courses.) Internship with an approved host institution or organization.

WMST 495D1 (1.5), WMST 495D2 (1.5) Honours/Joint Honours Colloquium.
(Prerequisite: WMST 303.) (Corequisite: WMST 497D1.)
(Restriction: Honours/Joint Honours students in Women's Studies)
(Students must register for both WMST 495D1 and WMST 495D2.) (No credit will be given for this course unless both WMST 495D1 and WMST 495D2 are successfully completed in consecutive terms.) Students will research, discuss, and present their thesis topics.

WMST 497D1 (1.5), WMST 497D2 (1.5) Honours/Joint Honours Thesis.
(Prerequisite: WMST 303) (Corequisite: WMST 495D1)
(Students must register for both WMST 497D1 and WMST 497D2.) (No credit will be given for this course unless both WMST 497D1 and WMST 497D2 are successfully completed in consecutive terms) Supervised reading and preparation of a Joint Honours thesis under the direction of a member of staff.

WMST 501 Advanced Topics 1.
(3) (Prerequisite: WMST 303 or permission of instructor)
Advanced topics in theory and methodology related to Women's Studies. Topics will vary from year to year.

WMST 502 Advanced Topics 2.
(3) (Prerequisite: WMST 303 or permission of instructor)
Advanced topics in theory and methodology related to Women's Studies. Topics will vary from year to year.

WMST 513 Gender, Race and Science.
(3) This course is a philosophical exploration of the nature of science concerning sex, gender, race and racial stereotypes, and the construction of "womanhood". The social history/biography of women and minorities in science will be studied to develop a critique of biological determinism and explore the meaning and possibility of a "feminist science".
Interfaculty, B.A. & Sc.

BASC-Arts & Science

Offered by: Science

BASC 201 Arts & Science Integrative Topics.
(3) (Restriction: Open only to students registered in the B.A.& Sc.) Topics that integrate information from Arts & Science (e.g. biomedical ethics; history of science; scientific reasoning; military conflict and geography; philosophy of mind, etc.) to exemplify the benefits of applying scholarship from diverse areas to a problem.

COGS-Cognitive Science

Offered by:

COGS 396 Undergraduate Research Project.
(3) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.) (Note: Enrollment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects will be suggested each term which may have project-specific prerequisites. Some projects may be accessible to students in other disciplines. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.) Independent research project.

(6) (Prerequisites: 30 credits of Cognitive Science program. Approval of program Coordinator. CGPA >3.00.) (Note: The student must find a Faculty research advisor in the Department of Linguistics, Philosophy, Physiology or Psychology, or the School of Computer Science. A research proposal worked out with the research advisor requires approval of the Coordinator of the Cognitive Science Program. The research will be reported in a scholarly paper to be evaluated by the research advisor and a second reader appointed by the Coordinator of the Cognitive Science Program. Please see regulations concerning Project Courses, COGS 401 is not a prerequisite to COGS 402. Thus the 2 courses can be done in either order, or either of the courses can be done if a student is to take only one of them.) Research project supervised by a McGill Faculty member.

(6) (Prerequisites: 30 credits of Cognitive Science program. Approval of program Coordinator. CGPA >3.00.) (Note: The student must find a Faculty research advisor in the Department of Linguistics, Philosophy, Physiology or Psychology, or the School of Computer Science. A research proposal worked out with the research advisor requires approval of the Coordinator of the Cognitive Science Program. Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

● Denotes courses offered only by the Faculty of Arts or Faculty of Science in 2007-08.
‡ Professional Practice (Stage) in Dietetics involving special prerequisites
✦ Indicates that departmental approval/permission must be obtained by a student prior to registration.
♦ Denotes courses not available as Education electives.
❑ Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
▲ Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.
† Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
†‡ Denotes courses with limited enrolment.
Faculty of Education

EDEA-Arts Education

Offered by: Integrated Studies in Ed

▲ EDEA 201 Basic Musicianship Teaching 1.
(3) (Offered through Distance Education) Introduction to the elements of music theory through techniques of aural training, sight singing and keyboard. Lab work at the keyboard.

▲ EDEA 204 Drawing.
(3) Development of sound drafting skills through the study of organic forms and the human figure in various media.

▲ EDEA 205 Painting 2.
(3) (Prerequisite: EDEA 204) Investigation of color, media, tools, techniques. Studies of natural forms, the human figure.

EDEA 206 1st Year Professional Seminar.
(1) (Corequisite: EDFE 205) This seminar along with First Year Field Experience Music serves as an orientation to the culture of the school and to teaching as a profession. Emphasis is on the general functioning of elementary and secondary schools. Topics include the role of the arts in the curriculum.

EDEA 207 2nd Year Professional Seminar.
(1) (Prerequisites: EDEA 206 and EDFE 205.) (Corequisite: EDFE 206) This seminar continues the process of developing a professional identity. Topics include strategies for accommodating individual differences, coaching and tutoring individuals and small groups, peer teaching and tutoring, role of the arts in the curriculum, differences and similarities in teaching music and teaching other subjects.

▲ EDEA 241 Basic Art Media for Classroom.
(3) An introduction to media that can be easily adapted to elementary classroom studio exploration.

▲ EDEA 242 Cultural Skills 1.
(3) Development of First Nations and Inuit skills and knowledge in art, music, handicrafts or other areas both modern and traditional. Topics will vary and be chosen from a range identified by classroom teachers. Course may continue over several training sessions.

EDEA 243 Cultural Skills 2.
(3) (Note: Topics will vary and will cover different cultural skills than EDEA 242. Course content is seasonably based.) Development of First Nations and Inuit skills and knowledge in art, music, handicrafts and other areas both modern and traditional.

▲ EDEA 296 Basic Design.
(3) Exploration of the basic elements of visual art through two dimensional composition and three-dimensional constructions. Investigation of materials and tools and the processes of manipulating and relating materials.

▲ EDEA 302 Special Topics.
(3) Selected topics and contemporary issues in education in the arts. The content will vary from year to year and will be announced prior to registration.

▲ EDEA 304 Painting 3.
(3) (Prerequisite: EDEA 205) Continuation of course EDEA 205 with emphasis on advanced composition.

▲ EDEA 305 Painting 4.
(3) Continuation of course EDEA 304 with emphasis on advanced composition.

▲ EDEA 307 Drawing 2.
(3) (Prerequisite: EDEA 204) A course designed to further the individual's natural drawing ability, and to develop a keen, perceptive approach to varied subject matter, including figure drawing.

▲ EDEA 314 Instruments in the Classroom.
(3) (The ability to read notation is not a prerequisite) Rhythmic and melodic instruments are introduced and their potential to enhance songs, poems, stories and movement is explored through students' active participation.

▲ EDEA 332 Art Curriculum and Instruction - Elementary.
(3) An introduction to theories on children's visual expression and perception, lesson planning, and classroom-oriented studio practice.

▲ EDEA 341 Listening for Learning.
(3) (The ability to read notation is not a prerequisite) Musical knowledge is developed and articulated through a structured approach to listening. Using recorded examples, students learn how to recognize, identify and discuss musical elements, devices, styles and genres.

▲ EDEA 342 Curriculum and Instruction in Drama Education.
(3) Pedagogical theory and practical applications in the teaching of developmental drama, dramatic forms, improvisation and theatre arts.

▲ EDEA 345 Music Curriculum and Instruction for Generalists.
(3) Study of materials and instructional techniques grounded in an understanding of basic musical concepts and contemporary theories of music teaching and learning. Definition of musical objectives and rationales, selection and development of materials, review of MEQ guidelines. Participation through singing, movement, listening, discussion and lesson planning and implementation.

▲ EDEA 352 Music Listening in Education.
(3) A perceptual development approach to music listening focusing on the relationship between the affective response and the musical stimulus. Designed to enhance the listening experience and to facilitate meaningful discourse about music. No formal music training is required.

▲ EDEA 394 Creative Dramatics for Classroom.
(3) (Offered through Continuing Education) A participatory course in creative drama and the use of improvisational techniques in the pursuit of student development.

▲ EDEA 396 Speech in Drama Education.
(3) (Offered through Continuing Education) A study of the elements of voice production in teaching public speaking and drama, including training activities to develop the voice in speech and drama. Theoretical aspects of the structure and functioning of the voice and speech mechanism are included.

▲ EDEA 404 Painting 5.
(3) (Prerequisite: EDEA 305) Major problems in graphic expression. A tutorial course where the student selects the instructor. Individual conferences and criticism leads the student to an independent approach to painting.

▲ EDEA 405 Painting 6.
(3) (Prerequisite: EDEA 404) The student will be required to work in a variety of sizes up to mural painting. Exploration of selected media and new dimensions of design.

EDEA 406 4th Year Professional Seminar.
(2) (Prerequisites: EDEA 306 and EDFE 405) (Corequisite: EDFE 405) Continuation of topics from Third Year Professional Seminar Music with emphasis on philosophical issues of music teaching at the secondary level.

EDEA 407 Final Year Professional Seminar Music.
(3) (Corequisite: EDEA 407) (Restriction: Students in B.Ed./B.Mus.) Summary of philosophical, theoretical and practical issues related to the profession of teaching.

▲ EDEA 410 Aesthetics and Art for the Classroom.
(3) (Offered through Summer Studies) The course is designed to address the need for teachers to be able to lead students to increased perceptual awareness and critical thinking in relation to their visual environment. Museum visits are a regular component of this course.

▲ EDEA 442 Elementary Music Curriculum and Instruction.
(3) Preparation for Third Year Field Experience. Includes the study of curriculum content and instructional approaches, classroom management issues, lesson planning and program development for elementary schools.
Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses taught only in alternate years.

† Professional Practice (Stage) in Dietetics involving special prerequisites

✦ Indicates that departmental approval/permission must be obtained by a student prior to registration.

▲ Denotes courses not available as Education electives.

❖ Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.

ция courses taught only in alternate years.

† Professional Practice (Stage) in Dietetics involving special prerequisites

✦ Indicates that departmental approval/permission must be obtained by a student prior to registration.

❖ Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

(EDUCATION) EDEC-CURRICULUM AND INSTRUCTION

EDEC 472 Secondary Music Curriculum and Instruction.
(3) Preparation for Fourth Year Field Experience. Includes the study of curriculum content and instructional approaches, classroom management issues, lesson planning and program development for secondary schools.

▲ EDEC 496 Sculpture 1.
(3) (Offered through Continuing Education) An investigation of basic sculpture methods and concepts with a view toward developing personal aptitudes. Development of three-dimensional thinking through direct experience with processes using new and traditional materials.

▲ EDEC 497 Sculpture 2.
(3) (Prerequisite: EDEC 496) Further exploration of processes introduced in Sculpture 2 plus an introduction to constructive sculpture.

EDEC-Curriculum and Instruction
Offered by: Integrated Studies in Ed

▲ EDEC 200 Introduction to Inuit Studies.
(3) An introductory survey of Inuit history, language and culture, and of the social and political issues affecting contemporary Inuit life.

EDEC 201 First Year Professional Seminar.
(1) (Corequisite: EDFE 200) (Restriction: Open to B.Ed. Secondary and B.Ed. K/Elem. students only) Orientation to the culture of the school and to teaching as a profession, focusing on the general functioning of schools. Professional portfolios will be introduced.

▲ EDEC 202 Effective Communication.
(3) (Restriction: Not open to students who have taken EDES 201, EDEC 203, EDEC 204, EDEC 205 or EDEC 206) (Offered through Continuing Education) (Note that Arts students are allowed 6 credits in writing courses and may only take an EC course before EAPR 250.) A course designed to help students develop the quality and effectiveness of their writing and speaking (in English) in a variety of academic disciplines and professional situations. Emphasis is on identifying, analyzing, and solving writing and speaking problems.

▲ EDEC 203 Communication in Education.
(3) (Restriction: Education students who have not taken EDES 201 or EDEC 202) (Because this course uses a workshop format, attendance at first class is desirable.) Written and oral communication in Education (in English): emphasis on strategies for identifying, analyzing and solving writing and speaking problems. Course work based on academic and professional communication in education, with a particular focus on classroom communication.

EDEC 204 Communication in Social Work.
(3) (Restriction: Social Work students who have not taken EDES 201 or EDEC 202) (Because this course uses a workshop format, attendance at first class is desirable.) Written and oral communication in Social Work (in English): emphasis on strategies for identifying, analyzing and solving writing and speaking problems. Course work based on academic and professional communication in social work.

EDEC 205 Communication in Management 1.
(3) (Restriction: Placement test required) (Restriction: B.Com. students who have not taken EDES 201 or EDEC 202) (Because this course uses a workshop format, attendance at first class is desirable.) (Continuing Education: Requirement for for the EA, AAC, and the Canadian Institute of Management) Written and oral communication in Management (in English): emphasis on strategies for identifying, analyzing and solving writing and speaking problems. Course work based on academic and professional communication in management.

EDEC 206 Communication in Engineering.
(3) (Limited enrolment) (Restriction: B.Eng. students who have not taken EDES 201 or EDEC 202) (Because this course uses a workshop format, attendance at first class is desirable.) Written and oral communication in Engineering (in English): strategies for generating, developing, organizing, and presenting ideas in a technical setting; problem-solving; communicating to different audiences, editing and revising; and public speaking. Course work based on academic, technical, and professional writing in engineering.

EDEC 207 Communication in Public Relations.
(3) (Restriction: Students in Public Relations Management Certificate only.) Identifying, analyzing, and solving communication problems in a variety of public relations contexts. Emphasis on news releases, media kits, informational and promotional materials, and oral presentations.

EDEC 208 Expressive Writing.
(3) The focus is on strategies for writing authentic, authoritative texts as well as achieving correct grammar and appropriate style as well as the drafting and revising of a collection of short non-fiction pieces in a collaborative setting.

EDEC 215 English Language Requirement.
(3) The English language proficiency test is a program requirement that must be completed in the first term. Anyone who fails the test must re-take and pass it prior to the third-year field experience. Anyone who is unsuccessful after two attempts must withdraw from the program.

EDEC 216 Aboriginal Language Requirement.
(3) The Aboriginal Language Proficiency test is a program requirement. Anyone who fails the test must re-take and pass it prior to the third year field experience. Anyone who is unsuccessful after two attempts must withdraw from the program.

EDEC 220 Curriculum Development.
(3) This course, introducing Aboriginal educators to the principles and processes of curriculum development, emphasizes the impact of language and culture on the development of materials. Features of the process of curriculum and materials design, which are strategically important in meeting the needs of Aboriginal students, are highlighted.

EDEC 221 Leadership and Group Skills.
(3) (Restriction: Normally for students registered within Certificate in First Nations and Inuit Educational Leadership) Management, effective team leadership, group dynamics, and communications skills crucial to First Nations and Inuit community-based educational leaders. Differences between traditional and mainstream institutional practices and leadership skills.

EDEC 222 Personnel Management and Support.
(3) (Restriction: Normally for students registered within Certificate in First Nations and Inuit Educational Leadership) Methods of appropriate and supportive supervision in a First Nations and Inuit educational milieu. Techniques of developing staff members' potential through staff development and quality performance. A compulsory practicum component will demonstrate students' transfer of theory to practice.

EDEC 233 First Nations and Inuit Education.
(3) (Restriction: Not open to students who have taken EDEC 441. Not for credit if EDEC 410 or EDER 464 has been or is being taken.) Study of First Nations and Inuit schools as diverse social, cultural, linguistic, political and pedagogical settings. Considers school and community minority-majority interactions and their influence on teaching and learning in educational settings. Examines how a teacher's personal practice can be influenced by an understanding of these factors.
EDEC 236 Mohawk Second Language 2.
(3) (Prerequisite: EDEC 235) Students will continue their study of Mohawk syntax and morphology and improve their literacy. Oral skills will focus on basic interactions and classroom commands. Students will discuss the difficulties encountered in learning a second language and consider implications for their students’ language learning.

EDEC 239 Mi’kmaq Language 1.
(3) Students will learn the phonological system and develop their literacy skills. They will also begin to explore Mi’kmaq syntax and morphology. Word generation conventions will be introduced and Mi’kmaq labels developed to describe how the language functions.

EDEC 241 Cree Language 1.
(3) Students will learn their own phonology and see how the phonological system is reflected in dialects. They will learn the spelling rules and develop their literacy skills in syllabics. Finally, they will derive Cree grammatical terms and begin to study Cree morphology and syntax.

EDEC 242 Cree Language 2.
(3) (Prerequisite: EDEC 241) Students will study the morphology and syntax analysis of Cree at a more advanced level and begin the study of word generation conventions. In addition, features of Cree that are difficult in first language acquisition will be highlighted and implications for classroom practice discussed.

EDEC 243 Teaching: Multigrade Classrooms.
(3) This course introduces students to concepts and strategies for organizing, teaching, and evaluating learning in classes in which there are students from 2, 3 or 4 grade levels.

EDEC 244 Issues in Aboriginal Education.
(3) The content of this course changes depending on the needs and interests of the students and the educational communities participating in programs administered by the Office of First Nations and Inuit Education. It always addresses issues related to Aboriginal education, e.g., local control, development of linguistic and cultural policies.

EDEC 245 Middle School Teaching.
(3) Explores the philosophy of middle school teaching and how this impacts on the institutional, curricula and instructional decisions made in meeting the specialized needs of Aboriginal adolescents. Particular attention will be paid to how middle school philosophy can be integrated with Aboriginal values.

EDEC 246 Middle School Curriculum.
(3) (Prerequisite: EDEC 245) Curriculum principles underlying an integrated approach to learning in the middle school level; surveys various curricula looking at program structures; explores teaching and learning methodologies appropriate for this age level when implementing an integrated curriculum, with particular attention to integrating indigenous language and culture.

EDEC 247 Policy Issues in Quebec Education.
(3) (Restriction: Not open to students who have taken EDEM 405.) This course examines the organization of education in Quebec from various perspectives, including historical, political, social and legal. It aims to provide students with sufficient knowledge that they can begin the life-long learning process of a professional educator, aware of, and contributing to, the policy talk on school.

EDEC 248 Multicultural Education.
(3) (Restriction: Not open to students who have taken EDEC 410 and EDER 464.) Introduction to theories about intercultural and multicultural education in Quebec and Canadian schools.

EDEC 260 Philosophical Foundations.
(3) (Restriction: Not open to students who have taken EDER 400.) Ideas essential for the development of a coherent educational theory and sound professional practice. Reflections on: the nature of the person, of reality, of knowledge, and of value; the aims of education, the nature of the school and the curriculum, the roles and responsibilities of professional educators.

EDEC 261 Philosophy of Catholic Education.
(3) (Restriction: Not open to students who have taken EDER 398.) An exploration of the philosophy of Catholic education, and its relevance in the world today.

EDEC 262 Media, Technology and Education.
(3) (Restriction: Not open to students who have taken EDEC 402.) Orientation to the equipment and systems of educational technology. Examination of theories of educational technology, media education and technology education and the exploration and development of possible applications in school settings.

EDEC 300 Special Topics 1.
(3) (Offered through Continuing Education) Selected topics and contemporary developments in the areas of elementary and/or secondary education. The content will vary from year to year and will be announced prior to registration.

EDEC 301 Special Topics 2.
(3) Selected topics and contemporary developments in the areas of elementary and/or secondary education. The content will vary from year to year and will be announced prior to registration.

EDEC 305 Communication in Management 2.
(3) (Restriction: B.Com. students. Prerequisite: EDEC 205 or based on the results of Placement Test.) (Because this course uses a workshop format, attendance at first class is desirable.) Advanced course (in English) in professional written and oral communication in Management. Assignments include résumés, business proposals, public relations documents and oral presentations. Students use a wide variety of communication technologies such as presentation software, video equipment, e-mail and the Internet.

EDEC 306 Third Year Professional Seminar (Sec).
(3) (Prerequisites: EDFE 252 and EDFE 251.) (Corequisite: EDFE 351.) (Restriction: Open to B.Ed. Secondary students only) Preparation for the third field experience through engaging in the full spectrum of unit/lesson planning, micro-teaching, critical analysis and self-reflection. Professional portfolios will be addressed.

EDEC 307 Third Year Professional Seminar (K/Elem).
(3) (Prerequisites: EDFE 252 and EDFE 251.) (Corequisite: EDFE 303) (Restriction: Open to B.Ed. K/Elem. students only) The seminar focuses on planning classroom teaching and puts into practice the students' knowledge of subject methodologies. Specific topics will include: the use of visual aids, music and video; the use of computers; classroom management; commonalities among subjects/grade levels; cooperative and collaborative learning strategies.

EDEC 308 Learning to Write Fiction.
(3) Course focuses on basic story elements: character development, plot structure, setting, description, dialogue, point of view and the drafting and revising of stories through a shared experience within a community of supportive readers.

EDEC 309 Learning to Write Poetry.
(3) Basic poetic techniques such as freewriting, lineation, metaphor, simile, and scansion. Collaborative development and oral readings.

EDEC 403 The Dialects of Inuktitut.
(3) (Prerequisite: EDEE 344) Study of the main Eskimo-Aleut dialects from Siberia to Greenland, looking at the effect of Inuit migrations across the Arctic on the development of dialectical differences. The main phonological, grammatical and lexical differences between the dialects and the patterns underlying these differences will be examined.

EDEC 404 Fourth Year Professional Seminar (Sec).
(3) (Prerequisites: EDEC 306, EDEC 351) (Corequisite: EDEE 451) (Restriction: Open to B.Ed. Secondary students only) Preparation for the final field experience and entry into the teaching profession. Emphasis will be placed on developing the ability to demonstrate ethical and responsible professional behaviour in the performance of duties. Final preparation of professional portfolios will be addressed.

EDEC 405 Fourth Year Professional Seminar (K/Elem).
(3) (Prerequisites: EDEC 303, EDEC 350, EDEC 352 and EDEC 355.) (Corequisite: EDEE 405) (Restriction: Open to B.Ed. K/Elem. students only) Preparation for the final field experience and entry into the teaching profession. Emphasis will
be placed on developing the ability to demonstrate ethical and responsible professional behaviour in the performance of duties. Final preparation of professional portfolios will be addressed.

**EDEC 500 Tutoring Writing.**
(3) Theory and practice of teaching writing through one-on-one conferencing. Focus on composition theory and research, rules of English usage, and tutorial teaching strategies. Practical experience offered through work in Writing Tutorial Service. Relevant for anyone who teaches or will teach in English at any level in any subject.

**EDEE-Elementary Education**
Offered by: Integrated Studies in Ed

**EDEE 223 Language Arts.**
(3) This course will explore the current research and theory of language learning and the practices which provide meaningful language experiences in the context of the pre-school and elementary classroom.

**EDEE 224 Language Arts Part 2.**
(3) (Prerequisite: EDEE 223) This course will explore the current research and theory of language learning and the practices which provide integrated and meaningful language experiences in the context of the pre-school and elementary classroom.

**EDEE 230 Elementary School Mathematics.**
(3) A course specially designed for elementary school teachers to provide the basic foundations, insight and understanding of the Quebec modern elementary mathematics programs.

**EDEE 234 Elementary School Geometry.**
(3) A course specially designed for elementary school teachers to provide the basic foundations, insight and understanding of the geometry found in the Quebec modern elementary mathematics programs.

**EDEE 240 Use and Adaptation of Curricula.**
(3) Provincial or Nunavut curricula as a basis for planning, materials production and evaluation. Methods of adapting curricula to local needs and of developing local courses of study in First Nations and Inuit community schools.

**EDEE 241 Teaching Language Arts.**
(3) (Prerequisite: Fluency in Inuktitut or another Aboriginal language) Organization and planning of Language Arts programs in Inuktitut or another Aboriginal language. Preparation and presentation of lesson sequences. Use of various techniques to improve language skills in listening, speaking, reading and writing.

**EDEE 242 Teaching Mathematics.**
(3) An introduction to mathematical concepts and approaches to teaching First Nations or Inuit students at the elementary level. Emphasis on the preparation and use of materials directly related to First Nations or Inuit students.

**EDEE 243 Reading Methods in Inuktitut/Cree.**
(3) (Prerequisite: Fluency in Inuktitut/Cree syllabics) Overview of reading theories and their application to Inuktitut/Cree; processes used by proficient readers. Methods of teaching reading.

**EDEE 245 Orientation to Education.**
(3) The First Nations or Inuit classroom as a unique pedagogical setting. Introduction to planning and maintaining a learning environment for First Nations or Inuit children. Study and application of differential learning styles.

**EDEE 246 Cultivating Language and Thought.**
(3) Study and observation of spoken language development and its maturation in First Nations or Inuit children. Application of observed data to the selection and devising of appropriate materials and methods for pre-school and elementary levels.

**EDEE 248 Reading and Writing Inuktitut/Cree.**
(3) (Prerequisite: Fluency in Inuktitut/Cree syllabics) Methods of teaching syllabic reading and writing. Understanding the principles of sight word reading instruction, child observation, material development and guided instruction.

**EDEE 249 Inuktitut Orthography and Grammar.**
(3) (Prerequisite: Fluency in Inuktitut) Structure and morphology of Inuktitut for teachers working in that language. Use of orthography, both qalluuaqpatl (Roman script) and qaniujaqpatl (syllabics) as established by the Inuit Cultural Association.

**EDEE 250 The Kindergarten Classroom.**
(2) (Restriction: Not open to students who have taken EDEC 310) An orientation to the Kindergarten curriculum. Integration of the school subject areas (language arts, second language, mathematics, social sciences, science, expressive arts, moral and religious education, and physical education) in a manner appropriate to the developmental level of the pre-school child.

**EDEE 261 Reading Clinic - Early Childhood.**
(3) Reading problems at a readiness and basic decoding level presented in a clinic format covering classroom diagnosis and remediation.

**EDEE 270 Elementary School Science.**
(3) Science as a means of exploring and explaining our environment. A study of some of the fundamental concepts and process skills common to most elementary programs.

**EDEE 275 Science Teaching.**
(2) (Prerequisite: EDEE 270) (Restriction: Not open to students who have taken EDEE 372 (Teaching Science)) A study of science programs and teaching strategies appropriate for providing elementary school children with an appreciation of the nature and method of science inquiry.

**EDEE 280 Geography, History and Citizenship Education.**
(3) (Restriction: Faculty of Education students.) Designed for elementary school teachers. A multi-disciplinary and cross-curricular investigation of various citizenship education themes, geographical regions and historical periods as outlined in the Quebec Education Program.

**EDEE 282 Teaching Social Sciences.**
(2) (Prerequisite: EDEE 280) (Restriction: Not open to students who have taken EDEE 382) Programs, materials and strategies for social studies from Kindergarten through grade six.

**EDEE 291 Cultural Values and Socialization.**
(3) An introduction to the educational implications of cultural values and patterns of socialization of children. Topics will include a description of the cultural values of Aboriginal peoples, home styles of communication, learning and discipline and intercultural education.

**EDEE 292 Using Instructional Resources.**
(3) Students will learn to find, assess, and use a variety of instructional resources. Specifically, they will learn how to evaluate the instructional value of software packages and other established audio-visual materials; how to make and use simple audio-visual materials; and how to find additional resource material in the library.

**EDEE 294 Algonquin Language 1.**
(3) Students will learn the Algonquin phonological system. They will focus on animates/innimates and inflections for agreement, aspect, tense and number. They will analyze word generation conventions and derive Algonquin labels to describe how Algonquin operates.

---

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at [www.mcgill.ca/courses](http://www.mcgill.ca/courses) for the most up-to-date information on whether a course is offered.

| Denotes courses taught only in alternate years. |
| Denotes courses not offered only by the Faculty of Arts or Faculty of Science in 2007-08. |
| Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration. |
| Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students. |
▲ EDEE 296 Mohawk Second Language 1.  
(3) Students will develop a basic knowledge of the Mohawk phonological system and have some understanding of the morphological and syntactic rules, the stress and intonation patterns which control the language, and how Mohawk culture is reflected in the language.

▲ EDEE 297 Mohawk Language 1.  
(3) Students will learn the Mohawk phonological system (including glottal stop, length mark, up and down stress). Syntactically and morphologically, they will focus on the pronoun system (tense included). Word generation conventions will be analyzed and Mohawk labels developed to describe how the language functions.

▲ EDEE 298 Mohawk Language 2.  
(3) (Prerequisite: EDEE 297) Students will complete their earlier study of the predictable items in the language, and then will focus on the non-predictable items in Mohawk: irregular verbs, reflexive and semi-reflexive verbs, purposive stem, translocative, etc. Importance will be placed on developing reading and writing skills.

▲ EDEE 325 Children’s Literature.  
(3) (Restriction: Not open to students who have taken ENGL 240, ENGL 341) (Limited enrollment) Selection and use of literature suitable for children in the elementary school.

EDEE 332 Teaching Mathematics 1.  
(3) (Prerequisite: EDEE 230.) Curriculum trends in teaching mathematics to children. Programs, methods, materials and evaluation procedures appropriate for the elementary school. Please check timetable information for labs schedule.

▲ EDEE 340 Special Topics: Cultural Issues.  
(3) Seminars on Inuit culture or on selected aspects of the culture of First Nations peoples. Topics will include historical cultural contacts, native oral tradition, religious beliefs and cultural change. Preparation of a project on an aspect of First Nations or Inuit life will be required.

▲ EDEE 341 Inuktitut for Beginners.  
(3) An introduction to the basic structures of Inuktitut, with intensive drill and classroom practice in the use of the language.

▲ EDEE 342 Intermediate Inuktitut/Amerindian Language.  
(3) (Prerequisite(s): EDEE 249 or equivalent, e.g., EDEE 295, EDEE 298 or permission of Director) A study for Inuktitut/Amerindian language speakers, of Inuktitut/Amerindian language phonology and structure, emphasizing the connection between the two, demonstrating the orderliness of many dialectic differences.

▲ EDEE 344 Advanced Inuktitut/Amerindian Language.  
(3) (Prerequisite(s): EDEE 342 or permission of Director) The final course in a set dealing with Inuktitut/Amerindian Language phonology and structure. An understanding of basic Inuktitut/Amerindian Language syntax in particular, rules governing verb and possessive endings.

▲ EDEE 345 Literature and Creative Writing 1.  
(3) A study of the development of oral and written poetry and prose in the various dialects of Inuktitut or of another Aboriginal Language from pre-European contact to the present day. Emphasis on themes and structures in contemporary writings. Original production of poetry, narrative, drama and journalism in the selected language is required of each student.

▲ EDEE 346 Literature and Creative Writing 2.  
(3) (Prerequisite: EDEE 345) A continuation of course EDEE 345.  

EDEE 350 Integrating the Curriculum.  
(2) (Corequisites: EDEE 352, EDEE 355 and EDFE 303.) (Restriction: B.Ed. (K/Elem) students) Strategies and methods for integrating the individual subject areas in the elementary school curriculum, using the Québécois curriculum as the primary example.

EDEE 352 Classroom Practices.  
(2) (Corequisites: EDEE 350, EDEE 355 and EDFE 303.) (Restriction: B.Ed. (K/Elem) students) Theory-based strategies for setting up, managing and teaching in the elementary school classroom.

EDEE 355 Classroom-based Evaluation.  
(3) (Corequisites: EDEE 350, EDEE 352 and EDFE 303.) (Restriction: B.Ed. (K/Elem) students) The role of evaluation within kindergarten/elementary school programs. Topics include the kinds of information needed, different techniques for collecting that information, and ways of interpreting it to make educational decisions. Principles and a variety of methods for evaluation are discussed and practiced.

EDEE 435 Mathematics Topics.  
(3) (Restriction: Permission of instructor) (Offered through Continuing Education) Seminars and workshops on specific topics in mathematics education. One to three topics will be chosen, from such areas as construction of teaching materials, evaluation, audio-visual techniques, use of calculating instruments, readiness for mathematics concepts, and curriculum development. This course will make significant use of microcomputers in mathematics education.

EDEE 444 First Nations and Inuit Curriculum.  
(3) An introduction to First Nations and Inuit curriculum: how curriculum needs in Aboriginal communities are similar to and different from mainstream ones, the range of ways in which First Nations and Inuit have responded to curriculum needs based on language, culture, and community perceptions.

▲ EDEE 473 Ecological Studies.  
(3) (Offered through Summer Studies) A lecture, laboratory and field course to train elementary school teachers in the principles and practices of field biology and nature tours. The observation and identification of various organisms and a study of their ecological relationships in the web of life.

▲ EDEE 474 Problems of the Environment.  
(3) (Offered through Summer Studies) A modern study of environmental problems designed for elementary school teachers. The role of humanity in the web of life in relation to conservation, the population explosion, waste disposal, sewage treatment, air and water pollution, chemical and radiation pollution.

EDEM-Admin & Policy Studies in Ed  
Offered by: Integrated Studies in Ed

EDEM 202 Educational and Administrative Institutions.  
(3) (Restriction: Limited to students enrolled in off-campus programs delivered through the Office of First Nations and Inuit Education) A study of the inter-dependency of the various institutions affecting the education of Inuit or First Nations children. Relationships of non-education institutions, such as Co-ops, Health and Social Services, and other government services, to educational services.

EDEM 220 Contemporary Issues in Education.  
(3) An introduction to contemporary issues in education in local, national and international contexts, including a critical perspective on educational issues by drawing on a variety of analytical frameworks.

EDEM 450 Curriculum Alternatives.  
(3) (Offered through Summer Studies) An examination of various curriculum designs which cross boundaries of subject, method and culture, and the applications to programs for different populations of students.

EDER-Religious Studies  
Offered by: Integrated Studies in Ed

▲ EDER 207 “Who is Christ?”  
(3) (Offered through Continuing Education) An open search for the authentic person of Christ - from Scriptures and present day manifestations.

▲ EDER 209 Search for Authenticity.  
(3) (Offered through Continuing Education) A search for meaning in contemporary living as reflected in selected authors.

▲ EDER 252 Understanding and Teaching Jewish Life.  
(3) An exploration of Jewish holidays and life cycle rituals. Emphasis is placed on their historical development and philosophical meaning. Curriculum developed for teaching this material in various Jewish educational frameworks is examined and evaluated.
EDER 309 The Religious Quest.
(3) (Offered through Continuing Education) An approach to the study of religious experience as expressed in humanity’s major religious traditions, especially Christianity, Judaism, Islam, Hinduism and Buddhism.

EDER 318 Teaching the Jewish Liturgy.
(3) (Restriction: Not open to students who have taken EDER 407.) An examination of curriculum developed for teaching prayer and fostering spirituality within Jewish educational frameworks. Excerpts from the liturgy of the Jewish people are studied with an emphasis on the theological, moral, and philosophical issues that they raise.

EDER 319 Teaching the Holocaust.
(3) (Restriction: Not open to students who have taken EDER 421.) An examination of approaches, strategies, and techniques of teaching the Holocaust, including methodologies for using the Holocaust as a basis for teaching about prejudice, cultural identity, racism, human rights and moral responsibility.

EDER 320 Visions and Realities of Jewish Education.
(3) A course in the philosophy of Jewish education. Various perspectives on the purpose of Jewish education are explored, and consideration is given to how contemporary Jewish ideologies can be translated into educational forms. Challenges facing Jewish education as it approaches the millennium are examined. Research in Jewish education is evaluated.

EDER 360 Ethics and Religious Culture (K/Elementary).
(2) (Restriction: Not open to students who have taken EDER 333) Teaching methods and pedagogical resources for programs in moral education, ethics, and religious culture in the k/elementary school curriculum.

EDER 372 Ethics and Religious Culture (Secondary).
(3) (Prerequisite: A course in World Religion with a RELG or EDER prefix and a course in Ethics with a PHIL or EDER prefix - refer to B.Ed., Secondary Program advising information.) Teaching methods and pedagogical resources for programs in moral education, ethics, and religious culture in the secondary school.

EDER 392 Guiding Religious Response - Secondary.
(3) A study of developmental religious and moral life of the secondary school student, and of the programs and procedures designed to meet this development.

EDER 394 Philosophy of God.
(3) (Offered through Continuing Education) A critical study of the concept of God from a variety of religious, philosophic and mystical perspectives.

EDER 395 Moral Values and Human Action.
(3) A philosophical critical inquiry into the relationship between belief and conduct oriented toward the teacher and his/her role in education.

EDER 401 Teaching Biblical Literature - Jewish School 1.
(3) Examination of Biblical passages raising theological, moral, historical, literary, or linguistic challenges, and their interpretation within the rabbinic tradition and modern scholarship. Methodologies for teaching such passages in Jewish studies classrooms are discussed. Some familiarity with Biblical and Rabbinic Hebrew is essential, but most texts are available in English.

EDER 451 Tutorial in Jewish Education.
(3) A reading course for students who wish to explore intensively the literature in a particular area related to teaching Jewish studies.

EDER 461 Society and Change.
(3) Factors influencing patterns of stability and change in major social institutions and the implications for formal and non-formal education.

EDER 473 Living with Insight.
(3) An examination of the moral and spiritual challenges of the modern and post-modern world. Emphasis will also be placed on the role and responsibility of education in meeting these challenges.

EDER 494 Ethics in Practice.
(3) Fundamental principles of ethics as applied to current moral issues such as abortion, drugs, nuclear war, and discrimination.

EDER 505 Education and Social Issues.
(3) A study of the philosophical aspects of major social issues to education, and of selected approaches to fostering critical thinking concerning such issues.

EDER 520 Issues in Jewish Education.
(3) (Restriction: Not open to students who have taken 422-320 / EDER 320) An exploration of dissenting and complementary perspectives on the purpose of Jewish education. Challenges facing the field of Jewish education are examined. Developments in general education of relevance to Jewish education are considered.

EDER 523 Teaching Judaism: Bible.
(3) (Restriction: Not open to students who have taken 422-401 / EDER 401) (Prerequisite: Knowledge of Hebrew, with permission of instructor) A study of selected narrative, poetic and legal portions of the Pentateuch with a view to teaching this material in Jewish schools. An examination of some of the techniques presently used in the teaching of Bible.

EDER 525 Teaching Judaism: Holidays.
(3) (Restriction: Not open to students who have taken 422-250 / EDER 252) An exploration of the rituals, customs, values and historical development of Jewish holidays. Methods of applying this material to the Jewish studies classroom are examined.

EDER 526 Teaching Judaism: Liturgy.
(3) (Restriction: Not open to students who have taken 422-400 / EDER 407) (Prerequisite: Knowledge of Hebrew, with permission of instructor) An exploration of curriculum developed for teaching prayer and fostering spirituality within Jewish educational frameworks. Selected portions of the High Holy Day liturgy are examined with a view to teaching this material in Jewish settings.

EDER 527 Teaching Judaism: Special Topics.
(3) In-depth examination of topics in Jewish education. Content will vary from year to year.

EDER 528 Teaching Judaism: The Holocaust.
(3) (Restriction: Not open to students who have taken 422-421 / EDER 421) An exploration of approaches and techniques for the teaching of the Holocaust. Strategies for using Holocaust education as a basis for discussing prejudice and moral responsibility are examined.

EDER 610D1 (7.5), EDER 610D2 (7.5) Internship.
(3) (Restriction: Only open to students in M.A. Culture and Values Non-Thesis [Jewish Education Option]) (Students must register for both EDER 610D1 and EDER 610D2) (No credit will be given for this course unless both EDER 610D1 and EDER 610D2 are successfully completed in consecutive terms) Supervised fieldwork in a Jewish school or educational institution.

EDES-Secondary Education
Offered by: Integrated Studies in Ed

EDES 201 Effective Written Communication.
(3) (Offered through Distance Education) Designed to help develop the quality of academic and professional communication (in English). Emphasis on the writing process: problem solving strategies; ways of generating, developing and organizing ideas; designing written and oral communications for different

EDETS 334 Teaching Secondary Social Studies 1.
(3) (Restriction: Not open to students who have taken EDEC 334.) An examination of Quebec and other secondary school social studies curricula: Objectives; theoretical orientation; course structures; curriculum resources. Teaching and learning methodologies both common to the social studies and specific to the disciplines of history, geography, and economics.

EDETS 335 Teaching Secondary Science 1.
(3) (Restriction: Not open to students who have taken EDEC 335.) A survey of the philosophy and curriculum principles behind modern high school courses in the physical and life sciences, especially related to the Quebec context. An examination of teaching methods for junior and senior high school science.

EDETS 350 Classroom Practices (Secondary).
(3) Competency-based discipline skills and methods of classroom management, emphasizing the relationship between theory and practice; the rationale for various approaches to classroom management; strategies for developing instruction that focus attention and reduce off-task behaviour.

EDETS 353 Teaching Secondary Mathematics 1.
(3) (Prerequisites: 18 credits in post-secondary mathematics) Directed observations in secondary schools and the study of the general objectives and curriculum trends. The learning problems, teaching strategies and mathematical concepts encountered in the High School curriculum.

EDETS 361 Teaching Secondary English 1.
(3) Examination of appropriate materials related to the high school English programs; exploration of various techniques of teaching language, literature, writing and drama in the secondary school.

EDETS 365 Experiences in Communications.
(3) (Offered through Continuing Education) Personal development of students as communicators; involvement of the imagination in individual and group projects in language and in an other chosen medium of communication; analysis of experiences in projects in relation to general problems of communication.

EDETS 366 Literature for Young Adults.
(3) Selection and use of literature for the differing abilities and interests of high school students.

EDETS 434 Teaching Secondary Social Studies 2.
(3) (Prerequisite: EDES 334.) (Restriction: Not open to students who have taken EDES 389.) This course will examine the nature, content, and methodology of social studies education in the secondary school.

(3) (Prerequisite: EDES 335.) (Restriction: Not open to students who have taken EDES 370.) Principles and procedures for implementation of the general science curriculum in the secondary schools of Quebec. A survey of teaching methods and laboratory management appropriate to the junior and senior high school level.

EDETS 453 Teaching Secondary Mathematics 2.
(3) (Prerequisite: EDES 353.) (Restriction: Not open to students who have taken EDES 338.) This course supplements EDES 353 for students who select Mathematics as a single teachable subject. Evaluation of learning in Mathematics, obstacles to learning, technological aids to learning.

EDETS 461 Teaching Secondary English 2.
(3) (Restriction: Open to B.Ed Secondary students having English as a teaching option.) (Prerequisite: EDES 361) Special interest areas in the teaching of English in the light of contemporary theories and research.

EDETS-Vocational Education
Offered by: Integrated Studies in Ed

EDETS 360 Teaching Business Subjects.
(3) (Offered through Continuing Education) A course in general teaching principles which will include the teaching and learning process, lesson planning, unit planning, and techniques of instruction specific to: a) Accounting and Business Machines b) Typewriting and Shorthand.

EDETS 373 Teaching Technical Subjects.
(3) (Offered through Continuing Education) Methods and techniques of instruction in vocational education subjects.

EDETS 376 Evaluation: Vocational Education.
(3) (Offered through Continuing Education) Emphasis on student growth and progress in public education; appraisal of specialized techniques of evaluation, teacher made tests, and data analysis as specifically related to Technical-Vocational Education.

EDETS 395 Principles and Foundations.
(3) (Offered through Distance Education) A study of leaders, movements, legislation, events, and institutions that have contributed to the formation and development of vocational education. Special attention given to economic, social and philosophical factors.

EDETS 398 Special Project.
(3) (Offered through Continuing Education) A project related to the student's teaching concentration will be investigated, developed, produced, implemented, and/or evaluated, depending on the nature of the project. Students must identify the problem or topic to be investigated and obtain approval of the instructor. Includes preparation and submission of a written report.
EDFE 254 Second Field Experience (Secondary).  
(3) (Prerequisite: EDEC 201 and EDFE 200) (Note: Expectations for this field experience, according to your program, can be found at www.mcgill.ca/ost.) A minimum of 15 days of supervised student teaching in a school.

EDFE 255 Second Field Experience (TESL).  
(3) (Prerequisites: EDSL 210, EDFE 209.) (Restrictions: Open only to B.Ed. TESL students. Not open to students who have taken or are taking EDFE 259.) (Note: Expectations for this field experience, according to your program, can be found at www.mcgill.ca/ost.) A minimum of 15 days of supervised student teaching in a school.

EDFE 260 Stage de familiarisation.  
(1) (Restriction: Not open to students who have taken UdE: EDU 1060.) Stage de familiarisation, à l'école en milieu pluriethnique et d'introduction à la fonction enseignante. Observation des élèves à l'école. Contacts avec des intervenants. Étude du projet éducatif.

EDFE 261 Stage d'assistant - 2e année.  
(3) (Prerequisites: EDFE 260.) Corequisites: EDSL 260) Interventions progressives par tutorat auprès d'un élève ou de petits groupes d'élèves au primaire en immersion sous la supervision de l'enseignement. Assistant auprès d'un enseignant associé.

EDFE 303 Third Field Experience (K/Elem).  
(7) (Prerequisites: EDEE 275, EDEE 223, EDEE 250, EDEE 282, EDEE 332, EDEE 215, EDFE 253.) (Corequisites: EDEE 350, EDEE 352 and EDEE 355.) (Restriction: Open to B.Ed. K/Elem. students only) 35 to 40 days of student teaching in a host school.

EDFE 305 3rd Field Experience Music.  
(7) (Prerequisites: EDFE 215, EDFE 207.) 35 to 40 days of student teaching in a host school.

EDFE 325 Aboriginal Education Practicum 2.  
(3) (Restrictions: Not open to students who have taken EDFE 422. Open to students registered in the Certificate in Education for First Nations and Inuit.) Supervised teaching of designated subject areas in an elementary school.

EDFE 326 Aboriginal Education Practicum 3.  
(3) (Restrictions: Not open to students who have taken EDFE 423. Open to students registered in the Certificate in Education for First Nations and Inuit.) Supervised teaching of designated subject areas for a specific number of weeks in an elementary school, including assuming more responsibility for student learning, classroom management and formative and summative evaluation.

EDFE 391 Third Field Experience (Secondary).  
(8) (Prerequisites: EDFE 254, EDEC 215.) (Corequisite: EDEC 306) (Restrictions: Students must have completed, with a grade of C or higher, a minimum of 24 credits in a teachable subject and have taken the corresponding Methods courses as a co-requisite.) (Note: Expectations for this field experience, according to your program, can be found at www.mcgill.ca/ost.) A minimum of 40 days of supervised student teaching in a school.

EDFE 399 Third Field Experience (TESL).  
(8) (Prerequisites: EDEE 215, EDSL 259, EDFE 259.) (Corequisites: EDSL 309 and EDSL 447) (Note: Expectations for this field experience, according to your program, can be found at www.mcgill.ca/ost.) A minimum of 40 days of supervised student teaching in a school.

EDFE 361 Stage d'enseignement 1.  
(7) (Prerequisites: EDSL 260, EDSL 261.) (Corequisites: EDSL 391, EDSL 394.) (Restriction: Not open to students who have taken UdE: EDU 3060.) Enseignement au secondaire en milieu pluriethnique. Gestion de classe, intervention et réflexion sur les pratiques. Réalisation de projets.

EDFE 362 Stage d'enseignement en Français langue seconde.  
(7) Enseignement accompagné d'un enseignant associé, avec prise en charge d'une classe.

EDFE 373 Second Field Experience (Physical Education).  
(3) (Prerequisite: EDFE 246) (Note: Expectations for this field experience, according to your program, can be found at www.mcgill.ca/ost.) A minimum of 15 days of supervised student teaching in Physical Education in a secondary school.

EDFE 374 Field Experience Secondary School One Subject.  
(3) (1 subject)

EDFE 374D1 (1.5), EDFE 374D2 (1.5) Field Experience Secondary School One Subject.  
(Students must register for both EDFE 374D1 and EDFE 374D2.) (Note: Expectations for this field experience, according to your program, can be found at www.mcgill.ca/ost.) A minimum of 40 days of supervised student teaching Physical Education in a school.

EDFE 406 Fourth Field Experience (K/Elem).  
(7) (Prerequisites: EDFE 303, EDEE 223, EDEE 332, EDEE 275, EDEE 282.) (Corequisite: EDEC 405) (Restriction: Not open to students who have taken EDFE 403) (Note: Expectations for this field experience, according to your program, can be found at www.mcgill.ca/ost.) A minimum of 35 days of supervised student teaching in a school. Students will be expected to assume an increasing responsibility for students' learning, classroom management and formative and summative evaluations.

EDFE 407 Fourth Field Experience (Music).  
(7) (Prerequisite: EDFE 305.) (Corequisite: EDEA 407.) (Restriction: Students in B.Ed. in Music and the Concurrent B.Ed./B.Mus.) (Note: Expectations for this field experience, according to your program, can be found at www.mcgill.ca/ost.) Thirty-five days of teaching in a secondary school under the supervision of a cooperating music teacher. Students will gradually assume more responsibility for student learning, formative and summative evaluation, and will be expected to experience a full teaching load.

EDFE 425 Aboriginal Education Practicum 4.  
(3) (Restrictions: Not open to students who have taken EDFE 394. Open to students registered in the Certificate in Education for First Nation and Inuit.) Supervised teaching of classroom management and formative and summative evaluation.

EDFE 451 Fourth Field Experience (Secondary).  
(7) (Prerequisites: EDFE 351.) (Corequisite: EDEC 404.) (Restriction: Open to B.Ed. Secondary students only) (Note: Expectations for this field experience, according to your program, can be found at www.mcgill.ca/ost.) A minimum of 35 days of supervised student teaching in a school. Students will be expected to assume an increased responsibility for students' learning, classroom management and formative and summative evaluations.

EDFE 459 Fourth Field Experience (TESL).  
(7) (Prerequisites: EDSL 309 and EDFE 359.) (Corequisites: EDSL 409 and EDSL 458) (Note: Expectations for this field experience, according to your program, can be found at www.mcgill.ca/ost.) A minimum of 35 days of supervised student teaching in a school.
EDKP 460 Enseignement en milieu pluriethnique. Gestion
(9) (Prerequisite: EDSL 402, EDFE 361.) (Corequisite: EDSL 498, EDSL 499.) (Restriction: Not open to students who have taken UdeM: EDU 4060) de classe, intervention et réflexion sur les pratiques. Réalisation de projets.

EDFE 461 Stage d'enseignement - immersion.
(9) Enseignement accompagné d'un enseignant associé, avec prise en charge d'une classe en immersion.

EDFE 478 Field Experience (One Subject) - Secondary Level.
(6) (1 subject)

EDFE 478D1 (3), EDFE 478D2 (3) Field Experience (One Subject) - Secondary Level.
(Students must register for both EDFE 478D1 and EDFE 478D2.) (No credit will be given for this course unless both EDFE 478D1 and EDFE 478D2 are successfully completed in consecutive terms) (EDFE 478D1 and EDFE 478D2 are equivalent to EDFE 478)

EDFE 479 Fourth Year Field Experience Physical Education.
(6) (Prerequisite: EDKP 442) This second major field experience consists of six weeks of supervised student teaching in physical education under the tutelage of school personnel.

EDFE 480 Fourth Field Experience (Physical Education).
(7) (Prerequisite: EDKP 380) (Corequisite: EDKP 494.)
(Restriction: Only open to B.Ed. Physical Education students)
(Note: Expectations for this field experience, according to your program, can be found at www.mcgill.ca/ost.) A minimum of 35 days of supervised teaching Physical Education in a school.

EDKP-Kinesiology&Physical Education
Offered by: Kinesiology and Physical Ed

☐ EDKP 200 Weight Training.
(1)

☐ EDKP 201 Physical Activity Leadership.
(3) The methods of active lifestyle leadership from establishment of appropriate fitness objectives through the means of helping clients achieve their goals. Included are individual and group program designs and exercise precautions in various forms of exercise programs.

☐ EDKP 202 Rhythmic Activities.
(1)

▲ EDKP 204 Health Education.
(3) A study of the teacher's role in the total school health program at both elementary and high school levels; current issues in contemporary health education.

▲ EDKP 205 Structural Anatomy.
(3) Skeletal, muscular and nervous system are examined anatomically and physiologically within the realm of how they interact to generate and apply the forces which permit man's mobility.

▲ EDKP 206 Biomechanics of Human Movement.
(3) Analysis of fundamental human movement and the kinematic concepts which underlie each: Stability, agility, walking, running, jumping, throwing, absorbing forces, striking, kicking, spinning, twisting, aquatics and work positions.

☐ EDKP 208 Applied Biomechanics.
(3) (Prerequisite: EDKP 293.) (Restriction: Not open to students who have taken EDKP 206.) Nature and mechanical function of human movement in sport, dance, physical recreation and adapted movement activities.

☐ EDKP 210 Educational Gymnastics.
(1)

☐ EDKP 212 Folk Dance.
(1)

☐ EDKP 213 Aquatics 1.
(1)

☐ EDKP 214 Basketball 1.
(1)

☐ EDKP 216 Gymnastics 1.
(1)

☐ EDKP 217 Track & Field / Cross Country.
(2) Skills and techniques of the various disciplines in track and field/cross country and the teaching and evaluation strategies for the elementary and secondary school levels.

EDKP 218 Volleyball 1.
(1)

EDKP 220 Creative Dance.
(1)

EDKP 221 Wrestling 1.
(1)

EDKP 223 Basic Games.
(2) Content and methodology of games teaching in elementary and secondary school settings.

▲ EDKP 224 Foundations of Movement Education.
(3) (Restriction: Not open to P.E. Majors) This course is designed for the elementary school classroom teacher. It will include the study of basic movement education concepts, principles of movement and the role of movement education in the life of the developing child.

EDKP 225 Archery/Golf.
(1)

EDKP 226 Badminton.
(1)

EDKP 227 Rugby.
(1)

EDKP 228 Football 1.
(1)

EDKP 229 Ice Hockey 1.
(1)

EDKP 231 Martial Arts.
(1) (Summer)

EDKP 233 Soccer.
(1)

EDKP 234 Team Handball.
(1)

EDKP 235 Tennis.
(1)

EDKP 236 Softball.
(1)

EDKP 238 Field Hockey 1.
(1)

EDKP 240 Winter Activities.
(1)

EDKP 243 Dance.
(1) (Prerequisite: EDKP 202)

☐ EDKP 244 Dance and Fitness.
(1)

EDKP 245 Special Topics 1.
(1)

EDKP 249 Physical Activity Appraisal.
(1)

† EDKP 250 Practicum 1.
(3) A practical work-study experience with a focus on instruction and leadership in fitness. Work will be in a community placement under a qualified sponsor selected with the approval of the Department.

EDKP 250D1 (1.5), EDKP 250D2 (1.5) Practicum 1.
(Students must register for both EDKP 250D1 and EDKP 250D2.) (No credit will be given for this course unless both EDKP 250D1 and EDKP 250D2 are successfully completed in consecutive terms) (EDKP 250D1 and EDKP 250D2 together are equivalent to EDKP 250) A practical work-study experience with a focus on instruction and leadership in fitness. Work will be in a community placement under a qualified sponsor selected with the approval of the Department.

EDKP 252 Racquet Sports.
(2) (Restriction: Not open to students who have taken EDKP 226 and EDKP 235) Basic stroke techniques, rules and strategies, and teaching skills appropriate for various types of racquet sports.

EDKP 253 Gymnastics.
(2) (Restriction: Not open to students who have taken EDKP 216 and EDKP 210) Gymnastics skills, risk and safety concerns, discovery and direct teaching techniques, and evaluation strategies for the elementary and secondary school curricula.
EDKP 254 Principles of Dance.
(2) (Restriction: Not open to students who have taken EDKP 202 and EDKP 243) Basic dance skills, dance as a movement form, dance curriculum content and dance teaching skills, and resources to support dance instructional programs.

▲ EDKP 261 Motor Development.
(3) Changes apparent in motor behaviour from conception to old age. Two perspectives are emphasized: 1) contemporary and historical theories of human development, 2) development of motor behaviour and influences of physical growth, sensori-perceptual development, information processing and socio-cultural factors.

EDKP 292 Nutrition and Wellness.
(3) (Restriction: Not open to students who have taken EDKP 392) This course will examine the role of carbohydrates, fats, proteins, vitamins, minerals and water in a balanced diet. Students will be introduced to the affects of nutrition on exercise, sport performance and wellness. The validity of claims concerning nutrient supplements will be studied.

EDKP 293 Anatomy and Physiology.
(3) (Restriction: Not open to students who have taken EDKP 295 and EDKP 331) Basic foundations of structural, neuromuscular and visceral anatomy extending to the basic principles of the neuromuscular, circulatory and respiratory systems with emphasis on applications in instructional and coaching settings.

EDKP 300 Special Topics.
(3) Content will vary from year to year and will be announced prior to registration. The course will be given by a single instructor or by a group, as the occasion warrants.

EDKP 303 Advanced Biomechanics.
(3) (Prerequisites: EDKP 205, EDKP 206.) Functional anatomy of the human musculoskeletal system with emphasis on mechanics, electromyography (EMG), and motor control strategies.

EDKP 307 Evaluation in Physical Education.
(3) (Prerequisite: EDPE 246) (Restriction: Not open to students who have taken EDKP 207) Measurement and evaluation techniques designed to assess progress in physical education settings.

EDKP 311 Athletic Injuries.
(3) (Prerequisite: EDKP 205) This course is designed to educate students about the prevention, immediate care, and minor rehabilitation of athletic injuries. The course will focus on specific situations encountered in elementary, high school and fitness centers. An intensive academic program is coupled with practical lab sessions and field experience.

EDKP 314 Basketball 2.
(1)

EDKP 318 Volleyball 2.
(1)

EDKP 330 Physical Activity and Health.
(3) This course introduces students to literature on the role of physical activity and general health and well-being. Students will examine issues of exercise adherence, exercise prescription and the economic impact of physical fitness programs in the workplace.

EDKP 332 Physical Education Curriculum and Instruction.
(3) (Restriction: Not open to P.E. Majors) Principles, programs and procedures that an elementary teacher may use to promote the designing and teaching of elementary school P.E.

EDKP 336 Lacrosse.
(1)

† EDKP 342 Physical Education Methods.
(3) (Prerequisite: EDKP 223.) This course is a prerequisite for all field experience and practice.) Designed to prepare students for a teaching/leadership role in physical education. They will examine teaching/leadership effectiveness as it relates to organization and observation techniques, planning, instruction and evaluation of physical activity.

† EDKP 350 Physical Fitness Evaluation Methods.
(3) (Restriction: Open to BSc (Kinesiology) students only.) Protocols to evaluate physical fitness, including interpretation and evaluation of results, and prescription of exercise training programs for healthy populations.

▲ EDKP 391 Physiology in Sport and Exercise.
(3) (Prerequisite: EDKP 293 or equivalent.) Examination of the responses of the human body during and following acute and chronic exercise with practical applications for a school setting.

EDKP 393 Skill Learning and Expertise.
(3) (Restriction: Not open to students who have taken EDKP 492) Cognitive perspective on sport skill learning and the development of expertise, and the roles of innate talent, practice and instruction.

EDKP 394 Historical Perspectives.
(3) A historical survey of the form and function of organized sport and physical activity.

EDKP 395 Exercise Physiology.
(3) (Prerequisites: PHGY 201 or PHGY 209 and PHGY 202 or PHGY 210.) (Prerequisites: PHGY 201 and PHGY 202.) Examination of the physiological responses of the neuromuscular, metabolic, endocrine, and circulatory and respiratory systems to acute and chronic exercise.

EDKP 396 Adapted Physical Activity.
(3) (Restriction: Not open to students who have taken EDKP 496) Assessment, instruction and evaluation in physical activity for special populations. Emphasis on inclusion of people labelled intellectually disabled, learning disabled, physically awkward, autistic, visually or hearing impaired and physically disabled. Weekly lectures plus practical teaching lab.

EDKP 400 Special Topics.
(3)

EDKP 442 Physical Education Pedagogy.
(3) (Prerequisites: EDKP 342, EDPE 246 and EDPE 373) This pedagogy course builds on physical education methods and field experiences. It focuses on the developing teacher, the establishment of the learning environment, and the implementation of the varied teaching strategies. Principles of research on teaching in physical education are translated into practical techniques for application in the field.

EDKP 443 Research Methods.
(3) (Prerequisites: PSYC 204 or equivalent.) How to conduct and understand research in physical activity, including a complete overview of the research process, statistical and measurement concepts in research, the various types of research including both quantitative and qualitative aspects, as well as ways of presenting research.

EDKP 444 Ergonomics.
(3) (Prerequisites: EDKP 205, EDKP 206.) An examination of ergonomic issues including: injury mechanisms, evaluation and assessment techniques, occupational health and safety legislation, and ergonomic inventions.

EDKP 445 Exercise Metabolism.
(3) (Prerequisite: EDKP 395.) The biochemical structure and regulation of major biochemical pathways related to exercise. Examine the hormonal regulation of lipid, carbohydrate and protein metabolism during short and prolonged exercise as well as the influence of physical training. Examine gender-related differences and exercise metabolism.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.
EDKP 446 Physical Activity and Ageing.
(3) (Prerequisite: EDKP 395.) Review of age-related changes in circulatory, respiratory, neuromuscular, hormonal, metabolic and immune systems as they relate to functional limitations and the physiological responses to acute and chronic exercise. Examination of the role of exercise in mitigating ageing response.

EDKP 447 Motor Development 2.
(3) (Prerequisites: ANAT 316, EDKP 205, PHGY 201, PHGY 202, EDKP 261.) An examination of the basic concepts and processes of biological growth, maturation and ageing and a consideration of the outcome of these processes for physical performance and exercise responses across the lifespan.

EDKP 448 Exercise and Health Psychology.
(3) (Prerequisites: EDKP 261, EDKP 393.) The psychological aspects of health and participation in exercise and physical activity. The application of psychological knowledge and methodology within exercise and health. Theory and evidence on selected topics in this area of study.

EDKP 449 Exercise Pathophysiology 2.
(3) (Prerequisite: EDKP 395.) Review of the physiological bases of selected disorders of the immune, renal, neurological and muscular-skeletal systems and an examination of the particularities of exercise responses and the effects of exercise conditioning in these populations. A special emphasis on the scientific bases for exercise prescription.

† EDKP 450 Practicum 3.
(3) (Prerequisites: EDKP 250 and EDKP 350.) A work-study experience with a focus on administration and program development in fitness. Work will be in a community placement under a qualified sponsor selected with the approval of the Department.

EDKP 450D1 (1.5), EDKP 450D2 (1.5) Practicum 3.
(Students must register for both EDKP 450D1 and EDKP 450D2.) (No credit will be given for this course unless both EDKP 450D1 and EDKP 450D2 are successfully completed in consecutive terms) (EDKP 450D1 and EDKP 450D2 together are equivalent to EDKP 450). A work-study experience with a focus on administration and program development in fitness. Work will be in a community placement under a qualified sponsor selected with the approval of the Department.

EDKP 451 Personal Trainer Practicum.
(3)

EDKP 451D1 (1.5), EDKP 451D2 (1.5) Personal Trainer Practicum.
(Students must register for both EDKP 451D1 and EDKP 451D2.) (No credit will be given for this course unless both EDKP 451D1 and EDKP 451D2 are successfully completed in consecutive terms) (EDKP 451D1 and EDKP 451D2 together are equivalent to EDKP 451)

EDKP 452 Fitness & Lifestyle Consulting.
(3) (Prerequisites: EDKP 201, EDKP 249 and EDKP 350D1/D2.) This course prepares Kinesiology and Physical Education students for Professional Fitness and Lifestyle Consultant Certification from the Canadian Society of Exercise Physiology. Core competencies in ten subject domains as outlined in the certification guide will be reviewed. The certification process includes both theoretical and practical examinations.

EDKP 452D1 (1.5), EDKP 452D2 (1.5) Fitness & Lifestyle Consulting.
(Students must register for both EDKP 452D1 and EDKP 452D2.)

EDKP 453 Research Practicum in Kinesiology.
(3) (Prerequisites: EDKP 206, EDKP 395, EDKP 393 (formerly EDKP 492.) (Restriction: Open to Kinesiology students only.) Research project in kinesiology. Independent work under the supervision of the thesis advisor(s) leading to the finalization of procedures for data collection.

EDKP 453D1 (1.5), EDKP 453D2 (1.5) Research Practicum in Kinesiology.
(Prerequisites: EDKP 206, EDKP 395, EDKP 393 (formerly EDKP 492.) (Restriction: Open to Kinesiology students only.) (Students must register for both EDKP 453D1 and EDKP 453D2.) (No credit will be given for this course unless both EDKP 453D1 and EDKP 453D2 are successfully completed in consecutive terms) (EDKP 453D1 and EDKP 453D2 together are equivalent to EDKP 453) Research project in kinesiology. Independent work under the supervision of the thesis advisor(s) leading to the finalization of procedures for data collection.

▲ EDKP 485 Exercise Pathophysiology 1.
(3) (Prerequisite: EDKP 395.) The physiological bases of selected cardiovascular, respiratory and metabolic disorders and an examination of the particularities of exercise responses and the effects of exercise conditioning in these populations. A special emphasis on the scientific bases for exercise prescription.

EDKP 493 Administration.
(3) Organization and administration of physical education programs in various settings with emphasis on common problems relating to management practices of centres offering physical activity. Topics include facilities and equipment, fiscal considerations, liability and program planning.

† EDKP 494 Physical Education Curriculum Development.
(3) (Prerequisite: EDKP 442) Analysis of important philosophies, principles, and personal, educational, and societal issues that influence current physical and health education curricula with particular emphasis on the Québec curriculum for Physical Education and Health.

▲ EDKP 495 Scientific Principles of Training.
(3) (Prerequisite: EDKP 395.) Application of physiological and kinesiological principles in the selection and evaluation of athletic and physical fitness programs. Specific topics studied will include aerobic and anaerobic training, interval training, circuit training, weight training for muscular strength and endurance, flexibility, motor ability, obesity and energy balance.

▲ EDKP 498 Sport Psychology.
(3) (Prerequisite: EDKP 393.) The psychological aspects of participation in sport and physical activity relative to performance enhancement.

EDKP 504 Health & Lifestyle Education.
(3) This course will focus on content development and implementation of Health and Lifestyle concepts within the elementary and secondary physical education curriculum. Emphasis through lectures and labs will allow students’ participation and experimentation of activities that could be taught in classroom and/or physical education settings.

EDKP 505 Sport in Society.
(3) (Prerequisites: EDKP 261, EDKP 393. ) (Corequisite: EDKP 498) An examination of the cultural, social, political and economic factors that influence sport in society. Special attention to the effects of gender, financial constraints and political policies on involvement in physical activity and sports programs.

EDKP 542 Environmental Exercise Physiology.
(3) (Prerequisite: EDKP 395.) Environmental Exercise Physiology will examine human physiological responses to acute and chronic exercise in the following environments: thermal stress (hot and cold), hypobaric (medium and high altitude), hyperbaric (diving and chambers), and microgravity.

EDKP 550 Analyzing Instructional Behaviours.
(3) Students will investigate generic and specialized data collection instruments used in the supervision of and research into teaching and coaching. Practical experience will include the selection and use of appropriate tools, establishment of observer reliability, critical analysis of observational systems, and application of systematic observation to pertinent research questions.

EDKP 553 Physical Activity Assessments.
(3) (Prerequisite: EDKP 395.) Measurement techniques used to assess physical activity of sedentary and active persons, including heart rate monitors, accelerometry-based activity monitors, pedometers, direct observation, self-report instruments, doubly labeled water, and indirect calorimetry.

EDKP 566 Muscle Mechanics.
(3) (Prerequisite: EDKP 206) Theoretical basis of muscle activity measurement in the context of biomechanical studies, including muscle-related topics such as fatigue, injury and control.
EDKP 568 Biomechanics Instrumentation.
(3) (Restriction: Not open to students who have taken EDKP 688.) Instrumentation and technical knowledge to assist in the acquisition and processing of data used in biomechanics.

EDPC 201 Introduction to Student Advising.
(3) Introduction to student advising and guidance including personal, vocational, and educational aspects of services normally found in Aboriginal school settings. Role of the student personnel advisor at both the elementary and secondary levels.

EDPC 202 Helping Skills Practicum 1.
(3) (Prerequisite: EDPC 201) Basic interviewing and helping skills relevant to the helping profession in Aboriginal settings. Interpersonal skills which facilitate the prevention and amelioration of problems.

EDPC 206 Group Leadership Skills.
(3) (Prerequisite: EDPC 203) Animation and practice of group leadership skills. Students learn to organize and lead groups, how and when to use groups for particular settings and topics.

EDPC 207 Aboriginal Adolescent Development.
(3) (Prerequisite: EDPC 201) Adolescent development including physical, intellectual and social-emotional growth from the viewpoint of northern society. A social behaviour and psychopathology within the context of Aboriginal cultural and behavioral norms.

EDPC 208 Native Families’ Social Problems.
(3) (Prerequisite: EDPC 203) Adolescent sexuality and concurrent problems, substance addictions, physical abuse and violence, and suicide within the milieu of the native family, with a review of possible basic interventions for remediation. The roles of teachers, counsellors, social workers, physicians and legal authorities.

EDPC 209 Basic Crisis Intervention Skills.
(3) (Prerequisite: EDPC 208) Models and methods of crisis intervention as well as the development of skills in working with individuals experiencing emotional trauma, and identifying referral sources for individuals who require medical or psychiatric consultation.

EDPC 210 Field Experience.
(3) (Prerequisite: EDPC 202) An extended practicum experience which commences at the beginning of formal academic training. On-going development of student personnel services training experience at the individual and group level. “progress file” and evaluation of performance over the course of training, organization and administration of student personnel services. This comprises site visits, workshops and seminars interwoven with the other courses.

EDPC 501 Helping Relationships.
(3) (Offered through Continuing Education.) A course in the basic principles of human relationships and communication skills, approached from a theoretical and experimental viewpoint. An emphasis will be given to training in basic listening skills, interviewing techniques, and the interpretation of non-verbal behaviour and communication.

EDPC 502 Group Processes and Individuals.
(3) (Offered through Continuing Education.) A laboratory course in which participants observe individual dynamics within a group setting as well as understand the developmental phases of the group. Participants will be encouraged to experiment with their own behaviour, in order to increase their own awareness of functioning.

EDPC 503 Human Sexuality: Professionals.
(3) (Offered through Summer Studies) Historical, biological, anthropological, psychological and sociological perspectives of human sexual development. Sexual dysfunctions and approaches to sex therapy. Attitudes toward sexuality held by professional helpers relative to their implications for the learning and teaching of human sexuality and sex therapy.

EDPC 504 Practicum: Interviewing Skills.
(3) (Offered through Continuing Education.) (Prerequisite: EDPC 501) This course will enable students to become practitioners in the field of Applied Social Sciences. Theoretical principles of the helping relationship will be applied in particular situations. Demonstration, lecture, role-playing and psychodrama techniques will be used.

EDPC 505 Crisis Intervention Processes.
(3) (Offered through Continuing Education.) Instruction in the skills of working with crisis situations involving persons emotionally disturbed, suicidal, or alcoholic, and those who are on drugs or experiencing emotional trauma, as well as other problems. Attention will be given to identification of referral sources and the writing of reports.

EDPC 507 Practicum: Group Leadership Skills.
(3) (Offered through Continuing Education.) (Prerequisite: EDPC 502) The practical aspects of group leadership, group design and planning. Candidates will set up groups, conduct such groups over a number of sessions, and assess these groups according to the theoretical models covered in the prerequisite course.

EDPC 508 Seminar in Special Topics.
(3) (Offered through Summer Studies.) Content will vary from year to year and will be announced prior to registration. The seminar may be given by a single instructor or by a group, as the occasion warrants.

EDPC 509 Individual Reading Course.
(3) (Restriction: Permission of Program Director required) (By arrangement with individual instructor.)

EDPC 510 Family Life Education and Marriage.
(3) (Offered through Continuing Education.) The contribution of central concepts of psychological theories and therapeutic systems to the understanding of marriage and relationships. Special attention will be given to gender and ethnicity issues in order to increase the sensitivity of students to the issues typically confronted in the modern marriage and family.

EDPC 511 Demystifying Death & Dying.
(3) (Restriction: Open to US students or higher. Priority will be given to Educational and Psychology graduate, diploma and certificate students.) The impact of death and dying on individuals, the family, the community and society.

EDPC 540 Foundation of Family Life Education.
(3) (Restriction: Not open to students who have taken EDPC 640) (Offered through Continuing Education.) An examination of the psychological and sociological foundations of family life education tracing the evolution of theory, research and practice within this domain.

EDPC 542 Counselling Role of the Teacher.
(3) (Offered through Continuing Education or Summer Studies.) Theory and practice in interpersonal communication, interviewing, group dynamics, group leadership management, and referral criteria and procedures for students with developmental problems who experience trauma or crisis. Addressed primarily to elementary and secondary teachers who combine instructional responsibilities with a supportive role in school guidance and counselling activities.

EDPC 562 Career Education and Guidance.
(3) (Offered through Continuing Education or Summer Studies.) A review of career education and guidance programs that refer to the subject matter and related methods and

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

- Indicates courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
- Denotes courses taught only in alternate years.
- Denotes courses not offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.
- Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
techniques designed to foster the intellectual development of career awareness, career planning, career decision-making, and the necessary career-resilient employability skills for the school-to-work transition.

**EDPE-Ed Psych & Couns (Psychology)**
Offered by: Educational & Counselling Psychology

**EDPE 208 Personality and Social Development.**
(3) (Restriction: Not available for Psychology Major students or any student who has taken or is required to take PSYC 304 in the Psychology Department) Personality, social behavior, and moral development from nursery school up to, but not including, adolescence. Emphasis on aspects of personality and social development that are related to the process of schooling.

**EDPE 250 Second Year Professional Seminar.**
(1) (Prerequisites: EDEC 201 and EDFE 200.) (Corequisite: EDPE 251) (Restriction: Open to B.Ed. students only) Individual differences in teaching and learning, learning styles, strategies for accommodating individual differences, coaching and tutoring individuals and small groups, peer teaching and tutoring.

**EDPE 251 Second Year Professional Seminar (K/Elem).**
(1) (Prerequisites: EDPE 200 and EDEC 201.) (Corequisite: EDPE 252) (Restriction: Open to B.Ed. K/Elem. students only) The seminar, which accompanies the early childhood teaching experience, will focus on individual differences in teaching and learning, learning styles, strategies for accommodating individual differences in an early childhood setting.

**EDPE 300 Educational Psychology.**
(3) Selected theories, models, and concepts relevant to planning and reflecting upon educational practice and improvement. Overview of development, learning, thinking, motivation, individual difference, etc. In relation to applications in classroom teaching and learning, the complementary role of counsellors and psychologists, educational computing and technology. The Youth Protection Act.

**EDPE 304 Measurement and Evaluation.**

**EDPE 320 Adult Learning and Teaching.**
(3) (Offered through Continuing Education or Summer Studies) (Also offered as part of the Business and Industrial Trainer Development Program) The application of theories of learning to adult learners. Developing effective teaching strategies for use with adult learners. Managing adult learning systems. Special characteristics of the adult learners.

**EDPE 335 Instructional Psychology.**
(3) (Prerequisites: An introductory course in psychology or EDPE 300) Psychological processes in instruction and learning, assessment, and curriculum design, based on theories of cognition, motivation, and the social context of instruction.

**EDPE 355 Cognition and Education.**
(3) (Prerequisites: PSYC 213 or permission of the instructor) Cognition and learning in educational domains and contexts. Contributions of cognitive science to issues in education including domain-specific and general knowledge and expertise, situated cognition and learning, cognitive apprenticeship, and uses of computers and networks as cognitive tools in educational settings.

**EDPE 377 Adolescence and Education.**
(3) (Offered through Continuing Education or Summer Studies) Development of personality and social behavior in adolescence. Problems relating to self-concept, academic achievement, relationships with others, and development of values in a changing culture. Some attention to current criticisms of the school as an agency involved in adolescent development.

**EDPE 495 Individual Reading Course.**
(3) (By arrangement with individual instructor. Permission must be obtained from the Department before registration)
EDPI-Ed Psych & Couns (Inclusive)

Offered by: Educational&Counselling Psych

EDPI 211 Social and Emotional Development.
(3) (Offered through Continuing Education. Limited to students enrolled in programs offered by the Office of First Nations and Inuit Education) Intensive training in observation of the development and behaviour of children as individuals and as members of modern First Nations or Inuit society. Study of educational implications of both common and divergent behaviour. Development of relevant teaching practices.

EDPI 212 Perceptual Motor Development.
(3) (Offered through Continuing Education. Limited to students enrolled in programs offered by the Office of First Nations and Inuit Education) Observation of perceptual-motor aspects of child development at the pre-school and elementary levels. Application of observations to teaching methods and materials, curriculum, classroom management and evaluation.

EDPI 309 Exceptional Students.
(3) (Restriction: Open to B.Ed. and Concurrent students only.) Also offered through Continuing Education or Summer Studies.) Evolution of special education to inclusive education; changing roles and needs of students with exceptionality, including students with intellectual, emotional, behavioral, sensory, physical and learning differences.

EDPI 341 Instruction in Inclusive Schools.
(3) (Restriction: Open to B.Ed. students only) (Also offered through Continuing Education.) Planning, implementing and evaluating curriculum and instruction for students with exceptionalities. Using technology and adapting curriculum and instruction for learners with varying abilities, learning styles, and needs. Collaboration with students, families, and other educators in the instructional process. Application component: application of instructional modifications for exceptional students in inclusive schools.

EDPI 344 Assessment for Instruction.
(3) (Offered through Summer Studies.) Assessing student strengths, problems and needs; functions and use of different types of student assessment (traditional and alternative assessments); assessing the classroom environment; issues in assessment. Application component: application of assessment process with exceptional students, and use of results for planning and adapting instruction.

EDPI 440 Managing the Inclusive Classroom.
(3) (Offered through Continuing Education.) Comprehensive approach to classroom management, including management of student learning and behavior, classroom environment, material and human resources, and teacher growth. Focus on research-based practices, including behavioral approaches, for effectively managing a classroom with diversity of students. Application component: application of classroom management principles in the field.

EDPI 441 Students with Behavior Difficulties.
(3) (Offered through Continuing Education.) Theoretical approaches and specific teaching methods appropriate to the needs of students with emotional or behavior problems, including students with attention deficit hyperactivity disorder. Multimodal team intervention approaches are emphasized. Application component: application of teaching methods with students experiencing behavior difficulties.

EDPI 442 Students with Learning Difficulties.
(3) (Offered through Continuing Education.) Commonalities and differences between students with specific learning disabilities, and related teaching approaches. Emphasis on methods, materials, and technology for teaching academic content as well as social skills. Application component: modifying and teaching content areas to students experiencing learning difficulties.

EDPI 446 Special Topics.
(3) Selected topics in the field of educing students with exceptionalities.

EDPI 450 Computers and Special Needs.
(3) (May be offered through Continuing Education. ) Overview of the role and contribution of computers in relation to students with exceptionalities. Review of instructional uses of computers, applications for modifying and teaching curriculum applications for specific learning needs, assistive devices for students with sensory and physical disabilities, and resources for students and teachers.

EDPI 526 Talented and Gifted Students.
(3) (Offered through Continuing Education.) The psychology and education of exceptionally able children. Definitions, assessment, classroom adaptations, technology, educational programs and educational issues. The course combines theoretical background and practical concerns. Application component: application of teaching methods with exceptionally able students.

EDPI 527 Creativity and its Cultivation.
(3) (Offered through Continuing Education.) Recent research, theory, and educational practice concerning creativity, with special attention to creativity in students and educational settings.

EDPI 536 Practicum Gifted Education 1.
(3) (Prerequisite: EDPI 526) (Normally available in July only during the Explorations Gifted Summer School) (Restriction: Permission to register is required from Explorations) Supervised practice in demonstration classrooms for gifted and talented children, with supporting seminars.

EDPI 537 Practicum Gifted Education 2.
(3) (Prerequisite: EDPI 526) (Restriction: Normally taken with EDPI 536.) (Normally available in July only during the Explorations Gifted Summer School) (Restriction: Permission to register is required from Explorations.) Supervised practice in demonstration classrooms for gifted and talented children, with supporting seminars.

EDPI 539 Field Work 1: Exceptional Students.
(3) (Restriction: Permission of Program Director required.) Supervised experience with exceptional students in an approved educational setting.

EDPI 540 Field Work 2: Exceptional Students.
(3) (Prerequisite: EDPI 539) (Restriction: Permission of Program Director required.) Supervised experience with exceptional students in an approved educational setting.

EDPI 543 Family, School and Community.
(3) (Offered through Summer Studies.) Examination of family, school, community and societal influences on student growth, development and adjustment. Emphasis on family perspectives, school orientation, community services, and community collaboration. Application component: using knowledge and skills in the field.
EDPT-Ed Psych & Couns (Media)
Offered by: Educational& Counselling Psych

▲ EDPT 200 Integrating Educational Technology in Classrooms.
(3) (Also offered through Continuing Education and Summer Studies.) Applications Software is the "gateway" course to educational computing. It introduces novices to basic computing skills, using a printer, word processing, data bases and spreadsheets. Assignments and projects focus on educational applications by teachers and students.

▲ EDPT 204 Educational Media 1.
(3) (Offered through Continuing Education) Educational Media 1 is the "gateway course for educational media. It reviews audio-visual education and emphasizes the rationale for audio-visual materials in education, and the underlying principles in their design, production and effective use.

▲ EDPT 300 Spreadsheets and Charting.
(3) (Prerequisite: EDPT 200) (Offered only through Distance Education) This course explores the techniques and educational applications of spreadsheets and simple charting.

EDPT 315 Instructional Design.
(3) (Offered only through Distance Education) The examination and application of the systematic planning techniques necessary in the design, development and validation of effective instructional materials.

▲ EDPT 320 Desktop Publishing for Schools 1.
(3) (Prerequisite: EDPT 200) (Offered only through Distance Education) The course develops a knowledge of, and practical skills in, graphic design for producing audio-visual and printed instructional materials. It covers typography fundamentals, layout techniques, graphic design and production. Word processing and graphics files are used to create educational page designs and related student desktop activities.

▲ EDPT 321 Desktop Publishing for Schools 2.
(3) (Prerequisite: EDPT 220 or EDPT 320) (Offered only through Distance Education) (Prerequisite (Continuing Education): EDPT 200) The course elaborates further on graphic design fundamentals and explores the capabilities of desktop publishing software for creating a professional appearance for yearbooks, brochures and school newspapers.

EDPT 340 Databases in Education.
(3) (Prerequisite: EDPT 200) (Offered only through Distance Education) This course explores the design and applications of databases in classroom learning and administration.

EDPT 341 Instructional Programming 1.
(3) (Offered only through Distance Education) This course introduces the principles and classroom applications of a computer programming language commonly found in schools. Programming language will be Visual BASIC.

EDPT 347 Multi-Media Tools.
(3) (Prerequisite: EDPT 200 or equivalent) (Offered only through Distance Education.) The course examines theoretical concepts for, and provides a practical training in, the creation of multi-media presentations for the classroom and Web sites.

▲ EDPT 348 Educational Software.
(3) (Prerequisites: EDPT 200 and EDPT 315) (Offered only through Distance Education) This course explores the approaches taken by different software packages, their educational applications and the management of multi-media based learning resources. Students develop and apply evaluation criteria for software selection, design teaching units incorporating educational software, and devise plans for integrating multi-media into the school curriculum.

▲ EDPT 408 Internet Resources.
(3) (Prerequisite: EDPT 200 or equivalent) (Offered only through Continuing Education and/or Distance Education) This practical course introduces teachers to the vast resources of the Internet and World Wide Web, and explores their educational applications.

▲ EDPT 415 Managing Computer Resources.
(3) (Prerequisite: EDPT 200) (Offered only through Distance Education) This course covers topics such as determining school policy for computer use, equipment selection, classroom computer management, developing in-school workshops, network management, basic computer maintenance, resource budgeting, software copyright, and support through bulletin boards, public on-line services and publications.

▲ EDPT 420 Media Literacy for Education.
(3) (Prerequisite: EDPT 204) (Offered only through Distance Education) The course explores the pedagogical use of media and multi-media in the classroom, and focuses in particular on the text, audience and production of media in a media literacy and integrated language arts program.

EDPT 441 Graphics Software in Education.
(3) (Prerequisite: EDPT 200 or equivalent) (Offered only through Distance Education) This course focuses on the creation, manipulation and presentation of graphics produced by scanned images and graphics software in the context of classroom applications, desktop publishing and video production.

EDPT 450 Designing for the Web.
(3) (Prerequisite: EDPT 408) This course stresses the relationship between theories of learning and cognitive development, teaching strategies and the use of the Web as a tool for classroom support and extended studies. The course refers to, and offers experience with Web-based resources and includes a structure for collaborative learning through computer-mediated communication.

EDSL-Education in Second Languages
Offered by: Integrated Studies in Ed

EDSL 209 First Year Professional Seminar.
(1) (Corequisite: EDFE 209) The first-year professional seminar is concerned with how to observe in second language classrooms. Students will be introduced to ways of observing instructional practices and procedures and will begin to reflect on various interactional patterns between teachers and students as observed in the First Year Field Experience.

EDSL 210 First Professional Seminar.
(1) (Corequisite: EDFE 209) (Restriction: Not open to students who have taken EDSL 209 (First Year Professional Seminar)) How to observe in second language classrooms. Students will be introduced to ways of observing instructional practices and procedures and will begin to reflect on various interactional patterns between teachers and students as observed in the First Year Field Experience.

▲ EDSL 247 Second Language Education in Aboriginal Communities.
(3) (Restriction: Limited to students enrolled in off-campus programs delivered through the Office of First Nations and Inuit Education) Issues and considerations in the learning of English or French in Aboriginal Communities, Emphasis on teaching a second language to Aboriginal children.

EDSL 255 Second Professional Seminar.
(2) (Restrictions: Open to B.Ed (TSEL) students. Not open to students who have taken EDSL 259 (Second Year Professional Seminar).) (Prerequisites: EDSL 210, EDFE 209 and EDSL 330.) The course aims to develop basic practices in planning and teaching in ESL classrooms, including microteaching and reflective analysis.

EDSL 260 Séminaire professionnel-2e
(1) (Prerequisite: EDFE 260) (Corequisite: EDFE 261, EDSL 444) Analyse réflexive des pratiques d'enseignement propres à l'assistantat.

EDSL 262 Système éducatif - profession enseignante.
(3) (Restriction: Not open to students who have taken UdeM: ETA 1900, McGill: EDEC 247 (formerly EDEM 405)) Initiation aux institutions scolaires du Québec et, au premier chef, à l'école. Initiation au rôle professionnel des enseignants. Perspectives historique et contemporaine.

EDSL 263 Apprentissage et développement.
(3) (Restriction: Not open to students who have taken UdeM: PPA 1100.) Théories de l'apprentissage scolaire. L'enseignant comme médiateur des apprentissages. Milieu scolaire et croissance de 4 à 12 ans. Entrée à l'école. Facteurs d'adaptation scolaire et sociale. Élèves à besoins particuliers.

EDSL 264 Phonétique et phonologie.
(3) (Restriction: Not open to students who have taken UdeM: LNP 1400.) Introduction à la phonétique et à la phonologie. Techniques d'analyse et de description.
EDSL 265 Acquisition-apprentissage-langues seconde.
(3) (Restriction: Not open to students who have taken UdeM: DID 2102. McGill: EDSL 305.) Connaissance des facteurs qui influent sur l'apprentissage et l'acquisition d'une langue seconde. Historique des méthodes d'enseignement. Approche communicative. Caractéristiques des clientèles de français langue seconde.

EDSL 266 Mathématiques au primaire.
(3) (Restriction: Not open to students who have taken UdeM: DID 1500.) Les mathématiques enseignées: histoire, savoirs, rapport au savoir et transposition. Arrimage entre les différents ordres d'enseignement.

EDSL 267 Didactique des arts plastiques 1.
(3) (Restriction: Not open to students who have taken UdeM: DID 2910.) Expérience des arts plastiques, médias plastiques, éléments du langage plastique. Programme des arts plastiques au primaire. Élaboration, animation d'activités et évaluation des apprentissages.

EDSL 268 Intégration des TIC.
(3) (Restriction: Not open to students who have taken UdeM: PPA 2100) Développement, mise à l'essai et analyse de situations pédagogiques intégrant stratégiquement les TIC. Réflexion critique et participation à une communauté apprenante dans une perspective de développement professionnel.

EDSL 269 École et environnement social.
(3) (Restriction: Not open to students who have taken UdeM: ETA 2200.) L'école comme milieu de vie et lieu d'exercice de la citoyenneté. Impacts sur les acteurs éducatifs et les disparités économiques, sociales et culturelles. Critique des politiques et pratiques pédagogiques.

EDSL 270 Morphologie et syntaxe.
(3) (Restriction: Not open to students who have taken UdeM: LNG 1540.) Principaux concepts et méthodes de l'analyse morphologique et syntaxique en grammaire générative transformationnelle. Application à la structure du mot et de la phrase en français contemporain et analyse de constructions problématiques.

EDSL 271 Lexique et sémantique.
(3) (Restriction: Not open to students who have taken UdeM: LNG 1080) Types de sens: prédicats et objets sémantiques. Sens lexicaux vs grammaticaux; notion d'unité lexicale; lexique vs grammaire. Relations sémantiques de base (synonymie, antonymie...).

▲ EDSL 300 Foundations of L2 Education.
(3) This introduction to the field of second language education provides an overview of the supporting disciplines (e.g., linguistics, psychology, sociology and education) and includes historical and analytical perspectives on the development of L2 teaching through an examination of approaches to L2 instruction and specific teaching methods.

EDSL 301 Étude de la langue.
(3) (Restriction: Not for credit if EDSL 311 or EDEC 302 has been or is being taken) Notions de base pour l'enseignement des composantes linguistique (lexique, morphologie, syntaxe et sémantique) et discursive (de la phrase aux types de textes et de discours); la relation de la grammaire nouvelle; composante langue des programmes d'études.

▲ EDSL 304 Sociolinguistics and L2 Education.
(3) (Prerequisite: LING 200 or LING 201.) (May be offered in English or French) This course introduces students to various social aspects of language, language use, and language learning by examining second language education from three interrelated perspectives: sociolinguistics, discourse, and culture. Issues range from language variation and social attitudes to conversational analysis and cross-cultural communication.

▲ EDSL 305 L2 Learning: Classroom Settings.
(3) (Prerequisite: EDSL 300 or LING 200 or LING 201.) This course provides an introduction to theory and research in second language acquisition (SLA). It is designed to help students understand the processes, developmental patterns and factors contributing to SLA so that the students will be prepared to evaluate and develop teaching procedures in light of this understanding.

EDSL 310 Third Professional Seminar.
(3) (Prerequisite: EDSL 255.) (Corequisite: EDFE 359) (Restriction: Not open to students who have taken EDSL 309) Focus is on classroom processes such as teaching and learning strategies, lesson planning and implementation, classroom organization and management, and on developing a reflective teaching and learning practice.

EDSL 311 Pedagogical Grammar.
(3) (Prerequisite: EDSL 350) (Restriction: Not for credit if EDSL 301 or EDEC 302 has been or is being taken) The course focuses on how the English language works as a system, examining it from the levels of phonology, morphology, syntax, semantics, and discourse. These aspects will be considered in relation to second language teaching and learning.

EDSL 315 Third Year Professional Seminar.
(2) (Prerequisites: EDSL 255 and EDFE 255.) (Restrictions: Open only to B.Ed. TESL students who have taken EDFE 255. Not open to students who have taken or are taking EDFE 259, EDSL 309 or EDSL 310.) Classroom processes such as teaching and learning strategies, lesson planning and implementation, classroom organization and management, and developing a reflective teaching and learning practice.

EDSL 320 Séminaire 3 professionnel.
(1) Ce séminaire professionnel porte sur l'analyse réflexive des pratiques stratégiques d'enseignement propres aux divers contextes scolaires au primaire. Ce séminaire vise également l'expérimentation de divers matériel pédagogiques et la simulation de techniques d'animation et de gestion de classe.

EDSL 330 L2 Literacy Development.
(3) (Prerequisite: EDSL 350.) This course examines current theories of second language literacy development and their implications for teaching, including the use of the literature as a tool for language learning. Key issues include the nature of literacy development, reading and writing processes, and appropriate pedagogical approaches.

EDSL 334 Teaching Oral Skills in ESL.
(3) (Prerequisite: LING 200 or LING 201.) Application of the English sound system to practical ESL teaching situations, planning and integrating pronunciation (as well as other oral skills, such as fluency) into activities and projects, developing materials, and assessing progress.

▲ EDSL 341 Littérature et Littérature Jeunesse en FLS.
(3) (Prerequisite: LING 200 or LING 201.) Développement de la littérature en langue seconde; les stratégies d'enseignement et d'apprentissage de la lecture et de l'écriture; l'exploration et l'utilisation de la littérature enfantine et de jeunesse propre à la francophonie dans divers contextes scolaires.

EDSL 345 Enseignement du FLS-immersion.
(3) (Prerequisite: EDSL 350 or EDEC 302) Course examines various practical approaches to second language immersion teaching and learning practice. Focus is on classroom processes such as teaching and learning strategies, lesson planning and implementation, classroom organization and management, and developing a reflective teaching and learning practice.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

* Denotes courses taught only in alternate years.
† Professional Practice (Stage) in Dietetics involving special prerequisites
‡ Indicates that departmental approval/permission must be obtained by a student prior to registration.
▲ Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
◆ Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
❉ Denotes courses offered by the Faculty of Education which, if appropriate to the student's program, may be included in the academic concentration.

2007-2008 Undergraduate Programs Calendar, McGill University
EDSL 350 Essentials of English Grammar.
(3) (Restriction: Restricted to B.Ed. (TESL) students) (Restriction: This is a required course for B.Ed. TESL students. Students from other programs may be admitted at the discretion of the instructor.) Analysis of English phrases, clauses and sentences up to discourse level in connected text. Emphasis on distinguishing between grammatical form, meaning, and function. Identification, analysis and correction of common errors made by ESL learners.

EDSL 360 TESL/TFSL Practicum - Elementary.
(3) (Corequisites: EDSL 444 for TFSL students; EDSL 447 for TESL students) (Offered through Continuing Education) Supervised practice in the application of language teaching and learning theories: focus on the design and use of teaching units, the organization of communication activities, the selection and use of diagnostic and remedial materials.

EDSL 361 TESL/TFSL Practicum - Secondary.
(3) (Corequisites: EDSL 472 for TESL students; EDSL 458 for TESL students) (Offered through Continuing Education) Supervised practice in the application of language teaching and learning theories: focus on curriculum development, and on the production of instructional, diagnostic and remedial materials.

EDSL 390 Teaching English as a Second Language in the Community.
(3) Introduction to pedagogical, program and policy contexts of teaching ESL outside the formal K - 11 school setting, including teaching children, adolescents and adults, in the private and community sectors in Canada and abroad.

EDSL 391 Didactique du français en accueil 1.
(3) (Prerequisite: EDSL 301.) Contenus et démarches en didactique de l'oral et de l'écrit au secondaire en classe d'accueil au niveau 1er, autres formes de services d'aide à la francisation. Conception d'activités et de séquences d'apprentissage. Programmes d'étude.

EDSL 392 Gestion de classe en langues secones.

EDSL 393 Adolescent et expérience scolaire.
(3) (Restriction: Not open to students who have taken UdeM: PPA 1210.) Développement psychosocial des élèves; influence des environnements sociaux; problématiques contemporaines de l'adolescence (anxiété, suicide, abandon scolaire). Relations entre enseignants - élèves et entre pairs. Aperçu de la recherche récente.

EDSL 394 Séminaire de stage 3e.
(1) (Prerequisites: EDSL 260, EDFE 261.) (Corequisite: EDFE 361.) (Restriction: Not open to students who have taken UdeM: EDU 3080.) Analyse réflexive des pratiques d'enseignement propres au secondaire.

EDSL 402 Évaluation en français langue seconde.
(3) Évaluation des compétences en enseignement du FLS: fonctions de l'évaluation; approches normative et critérielle; planification de situations d'évaluation authentiques; élaboration d'instruments; interprétation des résultats; modalités de consignation.

EDSL 412 Assessment in TESL.
(3) (Prerequisites: EDSL 447 and EDFE 359) This course deals with the role of assessment in TESL. Students will explore the kinds of information needed to make educational decisions in second language courses, different techniques for collecting that information, and ways for interpreting it. Principles and methods for assessment with and without tests are discussed and practiced.

EDSL 415 Fourth Professional Seminar.
(3) (Prerequisite: EDSL 310.) (Corequisite: EDFE 459) (Restriction: Not open to students who have taken EDSL 409) Focus is on development as a TESL professional, preparation for the workplace, and analysis, reflection, problem solving and support of actual teaching practice.

EDSL 420 Séminaire 4 professionnel.
(2) Ce séminaire professionnel porte sur l'analyse réflexive des pratiques stratégiques d'enseignement propres aux divers contextes scolaires au secondaire. Ce séminaire vise également l'expérimentation de divers matériels pédagogiques et la simulation de techniques d'animation et de gestion de classe.

EDSL 444 Laboratoire d'enseignement en français langue seconde.
(3) Entraînement à l'observation et à l'analyse de situations d'enseignement du français langue seconde au primaire. Pratiques d'habilités en situation microenseignement. Vidéoscopie et entraînement à la pratique réfléchie.

EDSL 447 Third-Year Methods in TESL.
(3) (Prerequisite: EDSL 350.) (Corequisites: EDSL 310 and EDFE 359) Intermediate-level skills in planning and teaching appropriate lessons, activities, and projects for ESL learners in a variety of programs at the elementary and secondary school levels.

EDSL 449 Special Topics in Second Language Teaching.
(3) (Restriction: Not open to students who have taken UdeM: PPA 1205.) (Corequisite: EDSL 441) (Prerequisite: EDSL 449) Advanced-level skills in planning appropriate lessons, activities, units and projects for ESL learners in a variety of programs at the elementary and secondary levels.

EDSL 452 Évaluation du français langue seconde-secondaire.
(3) (Restriction: Not open to students who have taken UdeM: DID 3506.) Évaluation critique de logiciels et sites Internet relatifs à l'univers social. Production et diffusion de documents multimédias. Scénario d'intégration pédagogique des TIC.

EDSL 453 Sciences humaines au primaire.
(3) Études des grands courants de la recherche actuelle en éducation, en fonction des programmes d'études: FLS, biologie, histoire, géographie, mathématiques et géométriques enseignés au primaire. Évaluation des apprentissages et du curriculum.

EDSL 454 Fourth-Year Methods in TESL.
(3) (Prerequisites: EDSL 444, EDSL 311) Intermediate-level skills in planning and teaching appropriate lessons, activities, units and projects for ESL learners in a variety of programs at the elementary and secondary levels.

EDSL 493 Sciences humaines au primaire.
(3) Élaboration d'un projet permettant de faire la synthèse des connaissances et de les mettre en pratique dans le cadre d'une intervention planifiée en collaboration avec les divers intervenants du milieu scolaire.

EDSL 494 Didactique de l'univers social et TIC.
(3) Évaluation critique de logiciels et sites Internet relatifs à l'univers social. Production et diffusion de documents multimédias. Scénario d'intégration pédagogique des TIC.

EDSL 495 Recherche-résolution de problèmes.
(3) Études des grands courants de la recherche scientifique en éducation, en fonction des programmes d'études: FLS, biologie, histoire, géographie, mathématiques et géométriques enseignés au primaire. Évaluation des apprentissages et du curriculum.

EDSL 496 Laboratoire de formation professionnelle.
(3) Élaboration d'un projet permettant de faire la synthèse des connaissances et de les mettre en pratique dans le cadre d'une intervention planifiée en collaboration avec les divers intervenants du milieu scolaire.

EDSL 497 Problématique en éducation préscolaire.
(3) Élaboration d'un projet permettant de faire la synthèse des connaissances et de les mettre en pratique dans le cadre d'une intervention planifiée en collaboration avec les divers intervenants du milieu scolaire.
EDSL 498 Didactique du français en accueil 2.
(3) (Prerequisite: EDSL 391.) (Restriction: Not open to students who have taken UdeM: DID 4214.) Contenus et démarches en didactique du français L2 au primaire en classe d’accueil et autres services d'aide à la francisation. Intégration des TIC. Élèves à besoins particuliers. Conception de projets d'enseignement. Programmes d'étude.

EDSL 499 Séminaire de stage-4e.
(2) (Prerequisites: EDSL 394, EDFE 361.) (Corequisite: EDFE 460.) (Restriction: Not open to students who have taken UdeM: EDU 4061.) Analyse réflexive des pratiques d'enseignement dans une perspective d'insertion professionnelle.

EDSL 500 Foundations and Issues in Second Language Education.
(3) (Restriction: Restricted to students in the Graduate Certificate in TESL.) Introduction of second language (L2) education; an overview of contributing disciplines (e.g., linguistics, psychology, sociology and education). A history of theory and various methodological approaches to L2 teaching and learning is used to promote an understanding of current theory and practice.

EDSL 505 Second Language Acquisition Applied to Classroom Contexts.
(3) (Prerequisite: EDSL 500.) (Restriction: Restricted to students in the Graduate Certificate in TESL.) An overview of theory and research in second language acquisition, including developmental patterns, factors affecting how second languages are learned, and relevance for teachers in terms of applications to the classroom context.

EDSL 512 Grammar in Teaching English as a Second Language.
(3) (Prerequisite: EDSL 505.) (Restriction: Restricted to students in the Graduate Certificate in TESL.) Analysis of English grammar at phonological, morphological, syntactic, semantic, and discourse levels. Applications are made to second language teaching and learning, focusing on integrating grammar into communicative language approaches.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Faculty of Engineering

ARCH-Architecture

Offered by: Architecture

A limited number of courses are open to students not registered in the School of Architecture. Please consult Class Schedule for further information.

ARCH 201 Communication, Behaviour and Architecture. (6) (2-10-6) Introduction to design; development of design judgement and communication skills in a series of exercises addressing light, scale, space, form and colour in the built environment; introduction to techniques of oral and graphic presentation, including model making, photography, sketching and architectural drawing. The course is based in the studio and includes lectures, seminars and field trips.

ARCH 202 Architectural Graphics and Elements of Design. (6) (2-10-6) (Prerequisite: ARCH 201) Introduction to architectural design; consideration of building form in relation to program, structural system, material selection, site and climate; further development of skills in model making, conventional architectural drawing, and visual design techniques. Discussion, readings, field trips and practical exercises. The course is based in the studio and includes lectures, seminars and field trips.

ARCH 217 Freehand Drawing 1. (1) (0-2-1) Development of skills in drawing and observation through a series of exercises based on the study of the human figure in a studio setting. Media include pencil, charcoal, conte crayon, and pen and ink.

ARCH 218 Freehand Drawing 2. (1) (0-2-1) (Prerequisite: ARCH 217) Continuation of ARCH 217. Development of graphic skills and visual literacy through exercises in life drawing. Introduction to basic colour theory: hue, intensity/dilution, temperature and emotional power. Additional media include coloured chalk and gouache.

ARCH 240 Organization of Materials in Buildings. (3) (2-0-7) 360 (Prerequisite: ARCH 241 or permission of instructor) Geometry in the formal structure of design. Grids, lattices, polygons and polyhedra; proportional systems. Evidence in instructor) (Restriction: Departmental permission required) 379 Summer Course Abroad.

ARCH 321 Freehand Drawing 3. (1) (0-2-1) (Prerequisite: ARCH 218) Continuation of ARCH 218. Refinement of graphic skills and visual literacy through exercises in life drawing. Introduction to the materials and methods of watercolour painting.

ARCH 322 Freehand Drawing 4. (1) (0-2-1) (Prerequisite: ARCH 321) Synthesis of ARCH 217, 218 and ARCH 321. Further refinement of graphic skills and visual literacy through exercises in life drawing. Students select and combine various media and apply them to diverse drawing and painting surfaces.

ARCH 324 Sketching School 1. (1) (0-0-3) (Prerequisite: ARCH 218) An eight-day supervised field trip in the late summer to sketch places or things having specific visual characteristics. Students are required to include Sketching School I in the B.Sc.(Arch.) program.

ARCH 352 Art and Theory of House Design. (3) (2-2-5) (Prerequisite: ARCH 202 or permission of instructor) An examination of the art and theory of the design of houses by architects who developed the form to perfection. Lectures and field trips will focus on the work of selected house architects from antiquity to the present.

ARCH 354 Architectural History 3. (3) (3-0-6) (Prerequisite: ARCH 250 and ARCH 251) General introduction to Modern Architecture in Western Europe from the Renaissance to the end of the 19th century. The course uses a thematic approach and sources on specific ideas and works drawn particularly from Italy, France, England and Germany.

ARCH 355 Architectural History 4. (3) (3-0-6) (Prerequisite: ARCH 250 and ARCH 251) The study of architecture and cities in the postwar period. Emphasis placed on themes and approaches to architectural history, as opposed to traditional survey.

ARCH 372 History of Architecture in Canada. (2) (2-0-4) (Prerequisite: ARCH 202) (Given alternate years, alternating with ARCH 388) French, British and American influences in the Maritime Provinces, Quebec and Ontario.

ARCH 375 Landscape. (2) (2-2-2) (Prerequisite: ARCH 202) Land form, plant life, microclimate; land use and land preservation; elements and methods of landscape design.

ARCH 377 Energy, Environment and Buildings. (3) (3-0-6) (Prerequisite: ARCH 202 or permission of instructor) Exploration of the interrelationship between energy, environment and building. Topics include sustainability, assessment tools, the integrated design process, water conservation, energy conservation, renewable energy, materials and embodied energy, indoor environmental quality, environmental acoustics, and advanced building technology.

ARCH 378 Site Usage. (3) (2-0-7) (Prerequisite: ARCH 202 or permission of instructor) The study of the creation, form and usage of the exterior space generated in various patterns of low-rise housing. Socio-cultural aspects of patterns; exterior space as a logical extension of the living unit; social control of the use of urban and suburban land; comparative model for low-rise housing patterns.

ARCH 379 Summer Course Abroad. (3) (0-0-9) (Prerequisite: ARCH 202 or permission of instructor) (Restriction: Departmental permission required) Study of a distinct urban environment and its key buildings; graphic recording and analysis of physical configuration, constructional peculiarities and present use. Excursions to neighbouring sites of special architectural interest.

ARCH 383 Geometry and Architecture. (3) (2-0-7) (Prerequisite: ARCH 202 or permission of instructor) Geometry in the formal structure of design. Grids, lattices, polygons and polyhedra; proportional systems. Evidence of these figures and structures in natural objects and phenomena. Graphical and physical models. Application to architecture and the human environment. Case studies.
ARCH 388 Introduction to Historic Preservation.
(2) (2-2-2) (Prerequisite: ARCH 303) (Given alternate years, alternating with ARCH 372) Historic attitudes and terminologies of conservation; historic research techniques. Restoration technology of building materials and principles of interior design in the 19th and 20th centuries; current preservation planning.

ARCH 405 Design and Construction 3.
(6) (2-10-6) (Prerequisite: ARCH 304) A structured investigation of architectural concepts; program interpretation with respect to relevant cultural, social and environmental contexts; applications of appropriate formal languages and building technologies in integrated proposals for a variety of building forms.

(6) (2-10-6) (Prerequisite: ARCH 405) A detailed study and comprehensive development of architectural proposals for complex building types and site conditions; the exploration of coherent initial concepts with respect to programmatic requirements, image and form; subsequent elaboration leading to meaningful and technologically viable designs for the built environment.

ARCH 447 Lighting.
(2) (2-2-2) (Prerequisite: ARCH 304) Concepts of natural and artificial lighting in architecture and urban design.

ARCH 451 Building Regulations and Safety.
(2) (2-2-2) (Prerequisite: ARCH 405) The study of building codes with specific emphasis on the National Building and National Fire Codes of Canada. Examples of existing buildings with assignments to illustrate regulations. Development of a systematic approach to the implementation of codes during the preliminary design stage of an architectural project.

ARCH 461 Freehand Drawing and Sketching.
(1) (0-3-0) (Prerequisite: ARCH 324) Drawing and sketching in pencil, charcoal and other media both in the studio and out-of-doors.

ARCH 471 Computer-Aided Building Design.
(2) (2-2-2) (Prerequisite: ARCH 202 or equivalent) An introduction to selected applications of interactive computing in architecture; emphasis on development of simple algorithms in graphic, as well as non-graphic, modes in hands-on situations in the lab; field trips to several in use installations.

ARCH 490 Selected Topics in Design.
(2) (2-0-4) (Prerequisite: ARCH 202 or permission of instructor) A course to allow the introduction of special topics in related areas of design.

ARCH 512 Architectural Modelling.
(3) (2-1-6) (Prerequisite: ARCH 304 and ARCH 471 or equivalent.) (Restrictions: Not open to students who have taken ARCH 384.) Architectural modelling using advanced applications in digital media. Topics include: 3-D modelling and rendering; manipulation; hypermedia; hypertext and the World Wide Web: issues of representation and methodology; comparison of publishing applications. Projects complement design studio courses and independent studies that are student or instructor initiated.

ARCH 514 Community Design Workshop.
(4) (4-20-15) (Prerequisite: ARCH 202) A design-build studio that engages community-based projects with identified needs and a requirement for intervention on real sites. Exploration of selected problems in architectural design and develop solutions from first concept to implementation on-site.

ARCH 515 Sustainable Design.
(3) (3-0-6) (Prerequisite: ARCH 377 or permission of instructor.) This course will address sustainable design theory and applications in the built environment with students from a variety of fields (architecture, urban planning, engineering, sociology, environmental studies, economics, international studies). Architecture will provide the focus for environmental, socio-cultural and economic issues.

ARCH 520 Montreal: Urban Morphology.
(3) (2-1-6) (Prerequisite: ARCH 251) Historical, geographical, demographical, and regional evolution of the metropolis of Montreal. Topics include: important quarters, the Montreal urban grid, industrialization, reform movements, geographical diversity, urban culture, local building techniques and materials. Basic concepts of urban morphology and their relationships to the contemporary urban context will be explored.

ARCH 521 Structure of Cities.
(3) (2-0-7) (Prerequisite: ARCH 202 or permission of instructor) Nature, pattern and life of modern cities. Urban networks, special areas, problems and prospects.

ARCH 522 History of Domestic Architecture in Quebec.
(3) (2-0-7) (Prerequisite: ARCH 251) (Restriction: Departmental permission required) The architecture of houses in Quebec from 1650 to the present. Distinguished buildings are reviewed from the point of view of form, style, siting and material, as influenced by climate, culture and architectural antecedents in France, England and the United States. The course material is presented through alternating bi-weekly lectures and seminars.

ARCH 523 Significant Texts and Buildings.
(3) (2-0-7) (Prerequisite: ARCH 251) (Alternating with ARCH 524) Critical study of significant architectural thought since 1750 as it has been expressed in buildings and texts (treatises, manifestos, criticisms). A specific theme will be addressed every year to allow in-depth interpretations of the material presented and discussed.

ARCH 524 Seminar on Architectural Criticism.
(3) (2-0-7) (Prerequisite: ARCH 202 or permission of instructor) (Restriction: Departmental permission required) The development and current role of architectural criticism with particular reference to its affinities with art and literary criticism.

ARCH 525 Seminar on Analysis and Theory.
(3) (2-0-7) (Prerequisite: ARCH 202 or permission of instructor) (Restriction: Departmental permission required) Analysis and evaluation of significant architectural projects with reference to contemporary architectural theories.

ARCH 526 Philosophy of Structure.
(3) (2-0-7) (Prerequisite: ARCH 202 or permission of Instructor) (Restriction: Not open to students who have taken ARCH 374) Philosophy of Structure aims to investigate structure in its broadest sense. The course is divided in two halves; the first one gives an overview of the development of theoretical structural frameworks such as mathematics and geometry, while the second one highlights physical structures constructed by nature (geology, turbulence), man or animals.

ARCH 527 Civic Design.
(3) (2-0-7) (Prerequisite: ARCH 378) The elements of form in buildings and their siting design in the urban setting.

ARCH 528 History of Housing.
(3) (2-0-7) (Prerequisite: ARCH 251 or permission of instructor) Indigenous housing both transient and permanent, from the standpoint of individual structure and pattern of settlements. The principal historic examples of houses including housing in the age of industrial revolution and contemporary housing.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses taught only in alternate years.
† Professional Practice (Stage) in Dietetics involving special prerequisites
▲ Indicates that departmental approval/permission must be obtained by a student prior to registration.
‡ Denotes courses not available as Education electives.
▲ Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.
▲ Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

2007-2008 Undergraduate Programs Calendar, McGill University
ARCH 529 Housing Theory.  
(3) (2-0-7) (Prerequisite: ARCH 528 or permission of instructor) A review of environmental alternatives in housing; contemporary housing and the physical and sociological determinants that shape it; Canadian housing.

ARCH 531 Architectural Intentions Vitruvius - Renaissance.  
(3) (2-0-7) (Prerequisite: ARCH 251) Examination of architectural intentions (theory and practice) in the European context (especially France, Italy and England), during the crucial period that marks the beginning of the modern era.

ARCH 532 Origins of Modern Architecture.  
(3) (2-0-7) (Prerequisite: ARCH 251) Examination of architectural intentions embodied in buildings and writings of architects from antiquity to the Renaissance. Special emphasis is placed on the cultural connections of architecture to science and philosophy.

ARCH 533 Comparative Housing.  
(3) (1-0-6) (Prerequisite: ARCH 250) Examination of architectural intentions embodied in buildings and writings of architects from antiquity to the Renaissance. Special emphasis is placed on the cultural connections of architecture to science and philosophy.

ARCH 534 Architectural Archives.  
(3) (3-0-6) (Prerequisites: ARCH 250 and ARCH 251 or equivalent.) Role of archives in architectural culture. Methods of development, documentation and communication. Formats of architectural representation. Problems inherent in the creation and preservation of architectural records, and access to them. Case studies based on 19th and 20th century archives in the John Bland Canadian Architecture Collection, and other collections.

ARCH 540 Selected Topics in Architecture 1.  
(3) (2-0-7) A course to allow the introduction of new topics in Architecture as needs arise, by regular and visiting staff.

ARCH 541 Selected Topics in Architecture 2.  
(3) (2-0-7) A course to allow the introduction of new topics in Architecture as needs arise, by regular and visiting staff.

ARCH 550 Urban Planning and Development.  
(4) (3-1-8) (Prerequisite: B.Sc. (Arch.) or permission of instructor) A survey of municipal, regional and provincial actions to guide urban development in Canada, with a particular emphasis on Montreal and Quebec. It also introduces students to concepts in real-estate development and highlights the relationship between developers and planners.

ARCH 554 Mechanical Services.  
(2) (2-0-4) (Prerequisite: ARCH 405 or permission of instructor) Problems encountered in providing mechanical services in buildings. Physiological and environmental aspects of heat, ventilation and air conditions, estimation of heating and cooling loads and selection and specification of equipment. Sprinkler systems and plumbing. Construction problems produced by installation of this equipment.

ARCH 555 Environmental Acoustics.  
(2) (2-0-4) (Prerequisite: ARCH 405 or permission of instructor) Acoustical systems in architectural design, and in environmental control of buildings. Acoustical requirements in the design of auditoria such as theatres, lecture halls, opera houses, concert halls, churches, motion picture theatres, studios. Principles of noise and vibration control, sound insulating in building construction. Practical noise control in various types of buildings.

BMDE 502 BME Modelling and Identification.  
(3) (3-0-6) (Prerequisites: Undergraduate basic statistics and: either BMDE 519, or Signals and Systems (e.g., ECSE 303 & ECSE 304) or equivalent) Methodologies in systems or distributed multidimensional processes. System themes include parametric vs non-parametric system representations; linear/non-linear; noise, transients and time variation; mapping from continuous to discrete models; and relevant identification approaches in continuous and discrete time formulations.

BMDE 503 Biomedical Instrumentation.  
(3) (3-0-6) The principles and practice of making biological measurements in the laboratory, including theory of linear systems, data sampling, computer interfaces, basic electronic circuit design and machining.

BMDE 504 Biomaterials and Bioperformance.  
(3) (3-0-6) (Restriction: graduate and final-year undergraduate students from physical, biological and medical science, and engineering.) Biological and synthetic biomaterials, medical devices, and the issues related to their performance. The physicochemical characteristics of biomaterials in relation to their biocompatibility and sterilization.

BMDE 505 Cell and Tissue Engineering.  
(3) (3-0-6) ((1.5 hours lecture/1.5 hours seminar per week)) Application of the principles of engineering, physical, and biological sciences to modify and control cells and tissues for therapeutic applications will be discussed, as well as the industrial perspective and related ethical issues.

BMDE 506 Molecular Biology Techniques.  
(3) (1-5-3) (Prerequisites: MATH 222, BIOL 200 or BIOL 201, CHEM 212 or CHEM 213 or PHYS 253.) (Restrictions: Limited to 18 students. Calculus required, physics or physical chemistry (thermodynamics, statistical mechanics) preferred. Primarily for graduate students or advanced undergraduate students in the physical sciences who are interested in learning molecular biology techniques. Preference given to graduate students in Biomedical Engineering and Physics. Students who have completed BIOG 300 or MIMM 366 are not eligible.) (Grades: 15% midterm and final, 40% lab notebook, 30% written final project.) Introduction to major techniques of molecular biology for physical scientists.

BMDE 519 Biomedical Signals and Systems.  
(3) (3-0-6) (Prerequisites: Satisfactory standing in U3 Honours Physiology; or U3 Major in Physics-Physiology; or U3 Major Physiology-Mathematics; or permission of instructor.) An introduction to the theoretical framework, experimental techniques and analysis procedures available for the quantitative analysis of physiological systems and signals. Lectures plus laboratory work using the Biomedical Engineering computer system. Topics include: amplitude and frequency structure of signals, filtering, sampling, correlation functions, time and frequency-domain descriptions of systems.

CHEE-Chemical Engineering  
Offered by: Chemical Engineering

CHEE 200 Introduction to Chemical Engineering.  
(4) (3-1-8) (Restrictions: students with DCS in PAS, HS or equivalent) Introduction to the design of industrial processes. Survey of unit operations, and systems of units. Elementary material balances, first and second laws of thermodynamics, use of property tables and charts, steady flow processes, heat engines, refrigeration cycles. Relationships between thermodynamic properties, property estimation techniques, laboratory and design exercise.

CHEE 204 Chemical Manufacturing Processes.  
(3) (3-2-4) (Prerequisite: CHEE 200) Material and energy balances in chemical processes. Problem solving in the design of separation processes (evaporation, crystallization), reactor design, process control, and environmental applications.

CHEE 220 Chemical Engineering Thermodynamics.  
(3) (3-1-5) (Prerequisite: CHEE 200) Application of thermodynamic equilibrium; free energy and equilibrium; phase rule; chemical reaction equilibrium for homogenous and
multicomponent/multiphase systems. Application to the design of binary distillation. Laboratory exercise.

**CHEE 230 Environmental Aspects of Technology.**
(3) (3-0-6) The impact of urbanization and technology on the environment. Topics include urbanization: causes, effects, land use regulations; transportation technology and environmental implications; environmental impact of energy conversions; energy policy alternatives; formulation of energy and environmental policy; air pollution: sources, effects, control; water pollution: sources, effects, control.

**CHEE 291 Instrumental Measurement Laboratory.**
(4) (2-5-5) Elements of statistical analysis associated with instrumental measurements. Principles of operation and calibration of selected measuring instruments. Principles of modern data acquisition and processing. Introduction to instrument system selection in chemical engineering.

**CHEE 310 Physical Chemistry for Engineers.**
(3) (3-1-5) (Prerequisite: CHEE 220 or MIME 212.)
(Restriction: Not open to students having taken CHEM 233.)
Introduction to statistical thermodynamics, chemical kinetics, surface and colloid chemistry, spectroscopy, and electrochemistry from an engineering viewpoint. Topics emphasize applications of physical chemistry for chemical engineers.

**CHEE 314 Fluid Mechanics.**
(4) (3-3-6) (Prerequisite: CHEE 204.) (Corequisite: MATH 265 or MATH 264.) Fluid properties; dimensional analysis; drag; packed-fluidized beds; macroscopic energy balances, Bernoulli's equation and linear momentum theorem; flowmeters, pipeline systems, non-Newtonian fluids, microscopic balances leading to continuity and Navier-Stokes equations; boundary layer approximation; turbulence. Laboratory exercises.

**CHEE 315 Heat and Mass Transfer.**
(4) (3-2-7) (Prerequisite: CHEE 314) Transport of heat and mass by diffusion and convection; transport of heat by radiation; diffusion; convective mass transfer; drying; absorption; mathematical formulation of problems and equipment design for heat and mass transfer; laboratory exercises.

**CHEE 340 Process Modelling.**
(3) (3-1-5) (Prerequisites: MATH 261 or MATH 263; MATH 264 or MATH 265; CHEE 314) Principles of mathematical modelling in chemical engineering: problem formulation, solution, discrete systems; difference and difference-differential equations, methods of solution; understanding system behaviour, optimization.

**CHEE 351 Separation Processes.**
(3) (3-0-6) (Prerequisites: CHEE 204, CHEE 220.

**CHEE 360 Technical Paper 1.**
(1) (0-0-3) A technical paper prepared according to instructions issued by the Department.

**CHEE 363 Projects Chemical Engineering 1.**
(2) (1-0-5) (Prerequisite: CHEE 200 (A D grade is acceptable for prerequisite purposes only)) Projects on social or technical aspects of chemical engineering practice. Students must suggest their own projects to be approved and supervised by a member of the staff. Students may work in groups.

**CHEE 370 Elements of Biotechnology.**
(3) (3-0-6) (Prerequisite: CHEM 234) Enzyme kinetics; proteins, carbohydrates and other biochemicals; industrially significant microbes; introduction to genetic engineering, cell structure and metabolism; laboratory exercises.

**CHEE 380 Materials Science.**
(3) (3-1-5) Structure/property relationship for metals, ceramics, polymers and composite materials. Atomic and molecular structure, bonds, electronic band structure and semi-conductors. Order in solids: crystal structure, disorders, solid phases. Mechanical properties and fracture, physico-chemical properties, design. Laboratory exercises.

**CHEE 392 Project Laboratory 1.**
(4) (3-6-3) (Prerequisite: CHEE 291) Planning for the solution of experimental problems; design of experiments for logical and statistical interpretation; statistical analysis of experimental data; effective work in groups; selected laboratory exercises.

**CHEE 393 Project Laboratory 2.**
(5) (2-10-3) (Prerequisite: CHEE 392) Student groups execute and report on experimental projects.

**CHEE 423 Chemical Reaction Engineering.**

**CHEE 430 Technology Impact Assessment.**
(3) (3-1-5) (Restriction: final year students by permission of instructor) The power of technology to shape man's physical, economic and social environment: effects of technological transitions on culture and ecology; (TIA) methodologies, public participation, engineering contributions, regulations; implications of TIA on social and economic development.

**CHEE 438 Engineering Principles in Pulp and Paper Processes.**
(3) (3-0-6) (Corequisite: CHEE 423) Characterization of wood, pulp and paper. Flowsheets of basic pulping processes. Applications of thermodynamics, fluid mechanics, heat and mass transfer, and reaction engineering principles in the pulp and paper processes.

**CHEE 452 Particulate Systems.**
(3) (3-0-6) (Prerequisites: CHEE 200, CHEE 314. A D grade is acceptable for prerequisite purposes only) Study of operations involving multiphase systems with one of the phases finely sub-divided as bubbles, drops or particles. Applications in environmental engineering, grinding, agglomeration, settling, fluidization.

**CHEE 453 Process Design.**
(4) (4-1-7) (Prerequisites: CHEE 315; MIME 310.

**CHEE 455 Process Control.**
(4) (3-2-7) (Prerequisites: CHEE 315; CHEE 351; CHEE 423) Dynamic modelling of processes, transfer functions, first and higher-order systems, dead-time, open and closed loop responses, empirical models, stability, feedback control, controller tuning, transient response, frequency response, feedforward and ratio control, introduction to computer control, sampling, discrete models, Z-transform, introduction to multivariable control. Laboratory exercises.

**CHEE 456 Design Project 1.**
(1) (1-0-2) (Corequisites: CHEE 393 and CHEE 453.)
(Restriction: Must be taken in the semester preceding CHEE 457.) Introduction to a process design and economic evaluation project, including environmental and safety aspects, for a major industrial operation. Students work in small groups.
CHEE 484 Materials Engineering.
(3) (3-0-6) (Prerequisite: CHEE 315 or CHEE 380.) The application of engineering fundamentals to the preparation and processing of polymers emphasizing the relationship between polymer structure and properties. Topics include: polymer synthesis techniques, characterization of molecular weight, crystallinity, glass transition, phase behaviour, mechanical properties, visco-elasticity and rheology, and polymer processing for use in blends and composite materials.

CHEE 487 Chemical Processing: Electronics Industry.
(3) (3-0-6) (Prerequisite: CHEE 310.) Chemical processes and unit operations in the manufacture of microelectronic components and their supports. Fabrication of silicon wafers, purification, crystal growth, imaging processes, deposition of semiconducting materials, plasma and chemical etching. Reclamation of reagents from waste streams. Safety and environmental concerns.

CHEE 494 Research Project and Seminar 1.
(3) (1-6-2) (Prerequisite: CHEE 393) Independent study and experimental work on a topic chosen by consultation between the student and Departmental Staff. CHEE 494D1 (1.5), CHEE 494D2 (1.5) Research Project and Seminar 1. (Students must register for both CHEE 494D1 and CHEE 494D2.) (Restriction: No credit will be given for this course unless both CHEE 494D1 and CHEE 494D2 are successfully completed in consecutive terms) CHEE 494D1 and CHEE 494D2 together are equivalent to CHEE 494) Independent study and experimental work on a topic chosen by consultation between the student and Departmental Staff.

CHEE 495 Research Project and Seminar 2.
(4) (1-9-2) (Prerequisite: CHEE 393) Independent study and experimental work on a topic chosen by consultation between the student and the Departmental Staff.

CHEE 496 Environmental Research Project.
(Students must register for both CHEE 496D1 and CHEE 496D2.) (Restriction: Not open to students who have taken CHEE 489.) Independent study and experimental work on an environmental topic chosen by consultation between the student and Departmental Staff.

CHEE 496D1 (1.5), CHEE 496D2 (1.5) Environmental Research Project.
(Students must register for both CHEE 496D1 and CHEE 496D2.) (Restriction: Not open to students who have taken CHEE 489.) Independent study and experimental work on an environmental topic chosen by consultation between the student and Departmental Staff.

CHEE 541 Electrochemical Engineering.
(3) (3-0-6) (Prerequisite: CHEE 310 or permission of instructor.) (Restriction: Not open to students who have taken CHEE 489.) Independent study and experimental work on an environmental topic chosen by consultation between the student and Departmental Staff.

CHEE 543 Plasma Engineering.
(3) (3-1-5) (Prerequisite: CHEE 220 and CHEE 314 or equivalent.) Description of the plasma state and parameters, plasma generation mechanisms and the relationship between control and instrumentation. Electrical breakdown in gases and a series of discharge modes are covered. Plasma processing applications such as PVD, PECVD, plasma polymerisation and etching, environmental applications, nanoparticle synthesis, spraying and sterilization are treated.

CHEE 563 Biofluids and Cardiovascular Mechanics.
(3) (3-0-6) (Prerequisite: CHEE 314 or MECH 351 or permission of instructor.) (Restriction: Not open to students who have taken MECH 563s.) Basic principles of circulation including vascular fluid and solid mechanics, modeling techniques, clinical and experimental methods and the design of cardiovascular devices.

CHEE 571 Small Computer Applications: Chemical Engineering.
(3) (3-0-6) (Prerequisite: CHEE 458 or permission of the instructor.) The use of small computers employing a high level language for data acquisition and the control of chemical processes. Real-time system characteristics and requirements, analog to digital, digital to analog conversions and computer control loops are examined. Block level simulation.

CHEE 582 Polymer Science & Engineering.
(3) (3-0-6) (Prerequisite: CHEE 314 or equivalent.) Application of engineering fundamentals to the preparation and processing of polymers emphasizing the relationship between polymer structure and properties. Topics include: polymer synthesis techniques, characterization of molecular weight, crystallinity, glass transition, phase behaviour, mechanical properties, visco-elasticity, rheology, and polymer processing for use in blends and composite materials.

CHEE 584 Polymer Processing.
(3) (3-0-6) (Corequisite: CHEE 315 or MME 356 or equivalent.) Survey of polymer processing operations with emphasis on the application of polymer rheology and transport phenomena to predict performance, including polymer rheology and constitutive equations, mixing, extrusion, injection molding, coating flows, fiber spinning, film blowing, blow molding, compression molding, thermoforming and composites processing.
CHEE 591 Environmental Bioremediation.
(3) (3-0-6) The presence and role of microorganisms in the environment, the role of microbes in environmental remediation either through natural or human-mediated processes, the application of microbes in pollution control and the monitoring of environmental pollutants.

CHEE 592 Industrial Air Pollution Control.
(3) (3-0-6) (Prerequisite: CHEE 314 or permission of instructor.) (Restriction: Not open to students who have taken CHEE 472.) Air pollution effects, control laws and regulations, measurements; emission estimates, meteorology for air pollution control engineers, dispersion models, nature of particulate pollutants, control of primary particulates, control of volatile organic compounds, sulfur oxides and nitrogen oxides; air pollutants and global climate.

CHEE 593 Indus Water Pollution Control.
(3) (3-0-6) (Prerequisite: CHEE 314 or equivalent.) (Restriction: Not open to students who have taken CHEE 471.) Wastewater constituents of concern; legislation pertinent to wastewater treatment; wastewater sampling and analysis techniques; process analysis and selection; physical, chemical and biological processes; advanced wastewater treatment methods; integration of sciences and engineering principles to design wastewater treatment processes.

CHEE 594 Biocolloids in Environmental Systems.
(3) (3-0-6) (Prerequisite: CHEE 315 or equivalent.) Principles of colloid chemistry for solid-liquid separations of environmental interest: (i) transport and fate of biocolloids and colloid-associated contaminants in waters and solids, and (ii) membrane-based water and wastewater filtration. Topics include: biocolloid-surface interactions, membrane process design, fouling and biofouling, experimental techniques, novel research developments.

CHEE 595 Energy Recovery, Use, & Impact.
(3) (3-0-6) (Prerequisite: CHEE 423 or permission of instructor.) Application of chemical engineering fundamentals to energy recovery, conversion, and environmental impact. Topics include thermodynamics of fossil fuel deposits, reaction engineering of fuel upgrading, power generation, operation of power sources, production/use of alternative fuels, environmental impact and pollution mitigation technologies dealing with energy use.

CIVE-Civil Engineering
Offered by: Civil Engineering

CIVE 202 Construction Materials.
(4) (4-2-6) (Prerequisite: CIVE 290) Classification of materials; atomic bonds; phase diagrams; elementary crystallography, imperfections and their relationship to mechanical behaviour; engineering properties and uses of ferrous and non-ferrous metals, ceramics, cement, concrete, timber and timber products, polymers, composites; smart materials and systems; electrochemical reactions and corrosion, prevention and protection; environmental influences; group laboratory projects.

CIVE 203 Solid Mechanics Laboratory.
(1)

CIVE 205 Statics.
(3) (3-2-4) Systems of forces and couples, resultants, equilibrium. Trusses, frames and beams, reactions, shear forces, bending moments. Centroids, centres of gravity, distributed forces, moments of inertia. Friction, limiting equilibrium, screws, belts.

CIVE 206 Dynamics.
(3) (3-2-4) (Prerequisite: CIVE 205) (Corequisites: MATH 262 or MATH 260 and MATH 263 or MATH 261.) Kinematics and kinetics of particles, systems, and rigid bodies; mass-acceleration, work-energy, impulse-momentum. Moving coordinate systems. Lagrange's equations. Vibrations and waves.

CIVE 207 Solid Mechanics.
(4) (3-2-7) (Prerequisites: CIVE 205 (a D grade is acceptable for prerequisite purposes) or MECH 210 (under special circumstances, the Department may permit this course to be taken as a corequisite) or equivalent) (Four laboratory sessions and weekly tutorials) Stress-strain relationships; elastic and inelastic behaviour; performance criteria. Elementary and compound stress states, Mohr's circle. Shear strains, torsion. Bending and shear stresses in flexural members. Deflections of beams. Statically indeterminate systems under flexural and axial loads. Columns. Dynamic loading.

CIVE 208 Civil Engineering System Analysis.
(3) (3-1-5) (Prerequisite: COMP 208) (Corequisite: MATH 264 or MATH 265.) Introduction to civil engineering systems; system modelling process; systems approach and optimization techniques; application of linear programming; simplex method; duality theory; sensitivity analysis; transportation problem; assignment problem; network analysis including critical path method; integer linear programming method.

CIVE 210 Surveying.
(2) (Prerequisite: MECH 289 (formerly MECH 290).) The construction and use of modern survey instruments; transit, level, etc.; linear and angular measurements and errors; horizontal and vertical curves; error analysis, significance of figures; use of computers and software; recent developments.

CIVE 225 Environmental Engineering.
(4) (4-2-6) (Prerequisite: CIVE 280.) (Corequisite: MATH 261 or MATH 263.) Instructior.) Application of chemical engineering fundamentals to environmental chemistry; mass balance analyses in engineered and natural systems; water, soil and air pollution characterization and control; water quality parameters; drinking water and wastewater treatment technologies; global climate change: possible causes and effects; risk assessment for pollutant exposure; solid- and hazardous-waste management.

CIVE 281 Analytical Mechanics.
(3) (3-1-5) (Corequisites: MATH 260 or MATH 262, MATH 261 or MATH 263.) Kinematics of particles, dynamics of particles. Work, conservative forces, potential energy. Relative motion and general moving frames of reference. Central force fields and orbits. Dynamics of a system of particles. General motion of rigid bodies, angular momentum and kinetic energy of rigid bodies. Generalized coordinates and forces, Lagrange's equations.

CIVE 284 Structural Engineering Basics.
(4) (3-3-6) (Restriction: Not open to students who have taken CIVE 205 and CIVE 283.) Basic principles of statics; force systems; trusses; centroids and second moment of areas; stress and strain; beams; shearing and bending stresses; deflections; combined stresses; columns.

CIVE 290 Thermodynamics and Heat Transfer.
(3) (3-2-4) Macroscopic vs. microscopic viewpoint; states and processes; energy conservation and transformation. Phase equilibrium; equations of state; thermodynamic properties; work; heat; First Law of thermodynamics; internal energy; enthalpy; specific heat; thermodynamic processes: reversibility, polytrophic processes, applications of First Law; Second Law; entropy; introduction to heat transfer.
CIVE 302 Probabilistic Systems.
(3) (3-1-5) (Prerequisites: MATH 260 or MATH 262, COMP 208 (a D grade is acceptable for prerequisite purposes)) An introduction to probability and statistics with applications to Civil Engineering design. Descriptive statistics, common probability models, statistical estimation, regression and correlation, acceptance sampling.

CIVE 311 Geotechnical Mechanics.
(4) (3-3-6) (Prerequisite: CIVE 207) Identification and classification of soils; physical and engineering properties; principle of effective stress; permeability, compressibility, shear strength, stress-strain characteristics, groundwater flow and seepage; earth pressure and retaining structures; stress distributions in soils; settlement; bearing capacity of shallow foundations.

CIVE 317 Structural Engineering 1.
(3) (3-1-5) (Prerequisites: CIVE 202, CIVE 207 and MECH 289 (formerly MECH 290).) The design process; loads, sources, classifications, load factors, combinations; limits states design; structural systems and foundations; choice of materials; virtual work and energy methods; statical and kinematic indeterminacy; slope deflection method, introduction to matrix methods; analysis of indeterminate systems; force envelopes.

CIVE 318 Structural Engineering 2.
(3) (3-1-5) (Prerequisite: CIVE 317) Durability and service life; fire resistance and protection; steel, reinforced concrete and timber; behaviour and design of components in tension, compression, bending and shear; slenderness, global and local instability; axial load and moment interaction; curvature, deflection, ductility; connections; bond and anchorage of reinforcement; simple footings.

CIVE 319 Transportation Engineering.
(3) (3-1-5) (Prerequisites: CIVE 208 and COMP 208.) (Corequisite: CIVE 302) Introduction to design and operating principles and procedures for surface transportation systems, including vehicle motion and performance, pavements, geometric design of roadbeds, vehicle flow and capacity, traffic control, demand, supply and cost concepts.

CIVE 320 Numerical Methods.
(4) (3-3-6) (Prerequisites: COMP 208, MATH 264 or MATH 265.) Numerical procedures applicable to civil engineering problems: integration, differentiation, solution of initial-value problems, solving linear and non-linear systems of equations, boundary-value problems for ordinary-differential equations, and for partial-differential equations.

CIVE 323 Hydrology and Water Resources.

CIVE 324 Construction Project Management.
(3) (3-1-5) (Prerequisites: MIME 310 and CIVE 208) Construction fundamentals; procedures and responsibilities; tender documents, specifications, proposals, contracts; construction project organization, estimating, planning, scheduling, control, liability, claims procedures, arbitration; job safety; security and loss control; case histories, site visits.

CIVE 326 Fluids & Hydraulics Laboratory.
(1) (0-0-3) (Restriction: Not open to students who have take or have taken CIVE 327.) (Prerequisite: Course equivalent to CIVE 327 without laboratory component.) Laboratory experiments in fluid mechanics and hydraulics.

CIVE 327 Fluid Mechanics and Hydraulics.
(4) (3-6-3) (Prerequisites: CIVE 206, MATH 264 or MATH 265.) Fluid properties; hydrostatics; dimensional analysis and similitude, flow of mass, momentum and energy; Bemoulli's equation; method of control volume; streamline curvature; potential flow and boundary layers; pipe flow, hydraulic machinery and introduction to open-channel flow.

CIVE 382 Partial Differential Equations in Engineering.
(3) (3-1-5) (Prerequisites: MATH 261 or MATH 263, MATH 264 or MATH 265, CIVE 281 (a D grade is acceptable for prerequisite purposes)) Classifications of PDEs; Laplace's Equation, steady fluid flow. Diffusion Equation; pressure transients in porous media, moisture and chemical diffusion, heat conduction; Wave Equation; waves and vibrations in strings, membranes and bars. Uniqueness of solution; variables separable solutions in rectangular and cylindrical coordinates; product solutions, elementary applications of integral transforms.

CIVE 385 Structural Steel and Timber Design.
(3) (3-1-5) (Prerequisite: CIVE 284.) (Corequisite: ARCH 240) Structural loadings, load factors, code requirements and design procedures. Characteristics of structural steel and structural timber in building construction. Structural design of axially loaded tension and compression members, joists, beams, girders, trusses and framing systems.

CIVE 388 Foundation and Concrete Design.
(3) (3-1-5) (Prerequisite: CIVE 284.) Physical properties of concrete; behaviour and design of reinforced concrete members in compression, tension, bending, shear and combined loadings; bond and anchorage; soil properties, soil testing, footings; pile foundation; shorting; retaining walls.

CIVE 416 Geotechnical Engineering.
(3) (3-2-4) (Prerequisite: CIVE 311) Earth pressure theory, retaining walls, sheet pile walls, braced excavations. Slope stability analysis. 2D flow through isotropic and anisotropic soils. Bearing capacity and settlement of shallow foundations, stress distribution. Deep foundations, single pile, pile groups. Geotechnical investigation and reports.

CIVE 418 Design Project.
(3) (1-2-6) (Prerequisite: Completion of an approved set of required and complementary courses; normally restricted to final semester.) Capstone design project.

CIVE 421 Municipal Systems.
(3) (3-2-4) (Prerequisite: CIVE 327) Design of water-related municipal services; sources of water and intake design; estimation of water demand and wastewater production rates; design, construction and maintenance of water distribution, wastewater and stormwater collection systems; pumps and pumping stations; pipe materials, network analysis and optimization; storage; treatment objectives for water and wastewater.

CIVE 428 Water Resources and Hydraulic Engineering.
(3) (3-3-3) (Prerequisite: CIVE 327) Application of continuity, energy and momentum concepts to open-channel flow; design of channels considering uniform flow and flow resistance, non-uniform flow and longitudinal profiles; design of channel controls and transitions; unsteady flow and flood routing; river ice engineering.

CIVE 430 Water Treatment and Pollution Control.
(3) (3-3-3) (Prerequisites: CIVE 225 and CIVE 327) Principles of water and sewage treatment. Water and sewage characteristics; design of conventional unit operations and processes; laboratory analyses of potable and waste waters.

CIVE 432 Technical Paper.
(1) (0-0-3) (Prerequisite: EDEC 206) A technical paper, on a suitable topic, is to be prepared in accordance with detailed instructions which are provided by the Department. This paper will normally be written in the U3 year and may be submitted in September or January.

CIVE 433 Urban Planning.
(3) (3-1-5) (Prerequisite: MIME 310.) (Corequisite: CIVE 319) The City in History. The planning profession, evolution of planning in North America, Canada and Quebec. Planning theories, the general or master plan, planning processes and techniques, planning and design of residential subdivisions. Local planning issues, housing policies, planning laws.

CIVE 440 Traffic Engineering.
(3) (3-1-5) (Prerequisite: CIVE 319 (a D grade is acceptable for prerequisite purposes)) Driver, vehicle and traffic flow characteristics; origin-destination studies, traffic studies and analysis, accident studies, queuing theory applications, gap acceptance, simulation, highway capacity, traffic regulations and control measures, intersection control.
CIVE 446 Construction Engineering.
(3) (Prerequisite: CIVE 208 and MIME 310.)
Project management principles; construction equipment economics, selection, operation; characteristics of building, heavy, marine, underground and route construction projects; international projects.

CIVE 451 Geoenvironmental Engineering.
(3) (1-5-4.5) (Prerequisites: CIVE 225 and CIVE 311)
Geoenvironmental hazards; land management of waste; regulatory overview, waste characterization; soil-waste interaction; geosynthetics; low permeability clay barriers; contaminant transport; containment systems; collection and removal systems; design aspects; strategies for remediation; rehabilitation technologies.

CIVE 452 Water Resources in Barbados.
(3) (Corequisites: Enrolment in full "Barbados Field Study Semester"; AGRI 413, AGRI 519 or CIVE 519 or URBP 519, URBP 507.) (Restrictions: Not open to students who have taken AGRI 452. Permission of the Coordinator of the Field Semester required.) Physical environment challenges, centered on water, being faced by an island nation. Guest speakers, field study tours and laboratory tests. Private, government and NGO institutional context of conservation strategies, and water quantity and quality analyses for water management specific to Barbados.

CIVE 480 Matrix Structural Analysis.
(3) (3-2-4) (Prerequisites: CIVE 206 and CIVE 317)
Computer structural analysis, direct stiffness applied to two and three dimensional frames and trusses, matrix force method, nonlinear problems, buckling of trusses and frames, introduction to finite element analysis.

CIVE 482 Design of Steel Structures.
(3) (3-3-3) (Prerequisite: CIVE 318) Design of structural steel elements: plate girders, members under combined loadings, eccentrically loaded connections, structural systems. Design of structural steel systems: composite floor systems, braced frames, moment resisting frames.

CIVE 483 Design of Concrete Structures.
(3) (3-3-3) (Prerequisite: CIVE 318) Review of flexural behaviour and design concepts. Design of flexural members, columns, two-way slab systems, retaining walls, disturbed regions, and shear walls. Introduction to prestressed concrete design.

CIVE 489 Infrastructure and Society.
(3) (3-2-4) (Prerequisite: MIME 310) Infrastructure systems, historical background and socio-economic impact; planning, organization, communication and decision support systems; budgeting and management; operations, maintenance, rehabilitation and replacement issues; public and private sectors, privatization and governments; infrastructure crisis and new technologies; legal, environmental, socio-economic and political aspects of infrastructure issues; professional ethics and responsibilities; case studies.

CIVE 470 Undergraduate Research Project.
(0-1-8) (Prerequisite: 60 credits in the Civil Engineering and Applied Mechanics program) Open to students with a high CGPA. A research project must be carried out and a technical paper prepared under the supervision of a member of staff. The project must be established with the consent of the Staff Supervisor, and must be approved by the Department before registration. May be taken in conjunction with the required course CIVE 418 and the project therefore can be carried out through two semesters.

CIVE 492 Structures.
(2) (2-2-2) (Prerequisites: CIVE 385 and CIVE 388) A study of structural systems in concrete, steel, timber; a philosophy of structure; choice of structure; economic factors in design; recent developments and trends in structure; lateral stability by frame action, bracing shear walls; mechanics of certain structural forms.

CIVE 512 Advanced Civil Engineering Materials.
(3) (3-3-3) (Prerequisite: CIVE 202) Production, structure and properties of engineering materials; ferrous alloys, treatments, welding, special steels, cast iron; ceramic materials; polymers; composite materials; concrete, admixtures, structure, creep, shrinkage; asphalt and asphaltic materials; clay materials and bricks; impact of environment on material response, durability, quality assessment and control, industrial specifications; recent advances.

CIVE 519 Sustainable Development Plans.
(6) (1-9-0) (Corequisites: Enrolment in full "Barbados Field Study Semester"; AGRI 413, AGRI 452 or CIVE 452, URBP 507) (Restrictions: Not open to students who have taken AGRI 519 or URBP 519. Permission of the Coordinator of the Field Semester required.) Geared for solving real-world environmental problems related to water at the local, regional and international scale in Barbados. Projects to be designed by instructors in consultation with university, government and NGO partners and to be conducted by teams of 2 to 4 students in collaboration with them.

CIVE 526 Solid Waste Management.
(3) (3-2-4) (Prerequisite: CIVE 225) Characterization of municipal and industrial solid wastes. Review of solid and hazardous waste impacts, regulations and treatment options. Collection and transportation of solid wastes. Methods of remediation and disposal. Introduction to the design of landfill sites and incinerators.

CIVE 527 Renovation and Preservation: Infrastructure.
(3) (3-2-4) (Prerequisite (Undergraduate): CIVE 202 and CIVE 318) Maintenance, rehabilitation, renovation and preservation of infrastructure; infrastructure degradation mechanisms; mechanical, chemical and biological degradation; corrosion of steel; condition surveys and evaluation of buildings and bridges; repair and preservation materials, techniques and strategies; codes and guidelines; case studies.

CIVE 540 Urban Transportation Planning.
(3) (3-1-5) (Prerequisite: CIVE 319 or permission of instructor.) Process and techniques of urban transportation engineering and planning, including demand analysis framework, data collection procedures, travel demand modelling and forecasting, and cost-effectiveness framework for evaluation of project and system alternatives.

CIVE 546 Selected Topics in Civil Engineering 1.
(3) (3-0-6) (Prerequisite (Undergraduate): Permission of instructor) Special topics related to Civil Engineering will be presented by staff and visiting lecturers.

CIVE 550 Water Resources Management.
(3) (3-0-6) (Prerequisite (Undergraduate): CIVE 323 or equivalent) State-of-the-art water resources management techniques; case studies of their application to Canadian situations; identification of major issues and problem areas; interprovincial and international river basins; implications of development alternatives; institutional arrangements for planning and development of water resources; and, legal and economic aspects.

CIVE 551 Environmental Transport Processes.
(3) (3-2-4) (Prerequisite: CIVE 225 or Permission of instructor.) Equilibrium partitioning of pollutants in multiphase systems, sorption isotherms, diffusive mass transport; containment systems; collection and removal systems; geosynthetics; low permeability clay barriers; contaminant transport; containment systems; collection and removal systems; design aspects; strategies for remediation; rehabilitation technologies.

---

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

♦ Denotes courses taught only in alternate years.
† Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
● Denotes courses taught only in the Faculty of Education.
▲ Denotes courses taught only in the Faculty of Education students.
• Denotes courses not available as Education electives.
❉ Denotes courses taught only in the Faculty of Education.
◆ Denotes courses taught only in the Faculty of Education.

2007-2008 Undergraduate Programs Calendar, McGill University
transport, inter-phase mass transfer kinetics, contaminant transport processes in the subsurface porous media and in natural aquatic systems, mass transport in water and wastewater treatment systems.

**CIVE 553 Stream Pollution and Control.**
(3) (3-2-4) (Prerequisite (Undergraduate): CIVE 225) Water quality standards. Physical and chemical pollution, and bacterial contamination of surface waters. Effects of specific types of pollution on thermal, phytoplankton, and non-point sources. Stream self purification. Effects on lake eutrophication. Pollution surveys and methods of control.

**CIVE 555 Environmental Data Analysis.**

✱ **CIVE 572 Computational Hydraulics.**
(3) (3-0-6) (Prerequisite: CIVE 327 or equivalent) Computation of unsteady flows in open channels; abrupt waves, flood waves, tidal propagations; method of characteristics; mathematical modelling of river and coastal currents.

**CIVE 573 Hydraulic Structures.**
(3) (3-0-6) (Prerequisites: CIVE 323 and CIVE 327) Hydraulic aspects of the theory and design of hydraulic structures: Storage dams, spillways, outlet works, diversion works, drop structures, stone structures, conveyance and control structures, flow measurement and culverts.

**CIVE 574 Fluid Mechanics of Water Pollution.**
(3) (3-0-6) (Prerequisite: CIVE 327 or equivalent.) Mixing, dilution and dispersion of pollutants discharged into lakes, rivers, estuaries and oceans; salinity intrusion in estuaries and its effects on dispersion; biochemical oxygen demand and dissolved oxygen as water quality indicators; thermal pollution; oil pollution.

**CIVE 577 River Engineering.**
(3) (3-0-6) (Prerequisite (Undergraduate): CIVE 428 or permission of the instructor.) (Corequisite (Graduate): CIVE 428) Hydraulic geomorphology; sediment properties; river turbulence; mechanics of the entrainment, transportation and deposition of solids by fluids; threshold of movement; bed forms; suspended load, bed load and total load equations; stable channel design and regime rivers; river modeling; river engineering and river management.

**CIVE 585 Groundwater Hydrology.**
(3) (3-0-6) (Prerequisite: Permission of instructor) Groundwater geology; steady-state and transient-state regional groundwater; infiltration and recharge; hydrological cycle; chemical constituents; adsorption/desorption processes; Groundwater exploration techniques; pumping tests; groundwater pollution; diffusion and dispersion; thermal processes; groundwater resource management.

**ECSE-Electrical Engineering**
Offered by: Electrical & Computer Engr

**ECSE 200 Fundamentals of Electrical Engineering.**
(3) (3-0-6) (Prerequisite: PHYS 142 or CEGEP equivalent.) (Corequisite: MATH 261 or MATH 263 or MATH 325.) (Tutorials assigned by instructor.) An introduction to part of the broad scope of electrical engineering: electrostatics, capacitance, conduction, magnetic fields, inductance, circuits and components, sine waves in time and space, electrical machines and transformers, signal amplification.

**ECSE 210 Circuit Analysis.**
(3) (3-2-4) (Prerequisite: ECSE 200) (For Fall Term: Limited to Electrical Honours and Computer Engineering students only.) (For Winter Term: Limited to Regular Electrical Engineering students only.) (Tutorials assigned by instructor.) Circuit models, KCL and KVL, branch relations, resistive circuit analysis, network theorems, one- and two-port networks, networks in sinusoidal steady-state, power considerations, transient analysis of first- and second-order networks, response to exponential driving functions, frequency response of networks.

**ECSE 211 Design Principles and Methods.**
(3) (3-3-3) (Prerequisites: ECSE 200 and COMP 202.) (Corequisite: ECSE 291 (Electrical Measurements Lab.)) Engineering process: design specifications, parameters, optimization, implementation, troubleshooting and refinement; project management: scheduling, risk analysis, project control; case studies; design examples and project.

**ECSE 212 Properties of Materials in Electrical Engineering.**
(3) (3-1-5) (Restriction: Not open to students who have taken or are taking MIME 262.) Properties of a material continuum and crystalline state; properties of atoms in materials; conduction electrons in materials; electronic properties of semiconductors and metals; magnetic and thermal properties of materials; applications of electronics in semiconductor technology, recording media and transducers.

**ECSE 221 Introduction to Computer Engineering.**

**ECSE 291 Electrical Measurements Laboratory.**
(2) (1-4-1) (Corequisite: ECSE 210) (Lab hours assigned by instructor.) Experiments with fundamental electric circuits are used to illustrate the principles and limitations of basic electrical and electronic instrumentation in typical measurement applications. Basic electrical laboratory practice and safety procedures are introduced. Introduction to error analysis and application to laboratory measurements.

**ECSE 303 Signals and Systems 1.**
(3) (3-2-4) (Prerequisites: ECSE 210, MATH 247 or MATH 270 or MATH 271.) (Corequisite: MATH 249 or MATH 381) (Tutorials assigned by instructor.) Elementary continuous and discrete-time signals, impulse functions, basic properties of discrete and continuous linear time-invariant (LTI) systems, Fourier representation of continuous-time periodic and aperiodic signals, the Laplace transform, time and frequency analysis of continuous-time LTI systems, application of transform techniques to electric circuit analysis.

**ECSE 304 Signals and Systems 2.**
(3) (3-2-4) (Prerequisite: ECSE 303) (Tutorials assigned by instructor.) Application of transforms to the analysis of LTI single-loop feedback systems, the discrete-time Fourier series, the discrete-time Fourier transform, the Z transform, time and frequency analysis of discrete-time LTI systems, sampling systems, application of continuous and discrete-time signal theory to communications LTI systems.

**ECSE 305 Probability and Random Sig. 1.**
(3) (3-0-6) (Prerequisite: ECSE 303 or ECSE 306.) (Tutorials assigned by instructor.) The basic probability model, the heuristics of model-building and the additivity of probability; classical models; conditional probability and Bayes rule; random variables and vectors, distribution and density functions, expectation; statistical independence, laws of large numbers, central limit theorem; introduction to random processes and random signal analysis.

**ECSE 306 Fundamentals of Signals and Systems.**
(3) (3-2-4) (Prerequisites: ECSE 210 and MATH 270 or MATH 271.) Review of complex functions. Discrete-and continuous-time signals, basic system properties. Linear time-invariant systems, convolution, Fourier series and Fourier transforms, frequency domain analysis, filtering, sampling. Laplace transforms and inversion, transfer functions, poles and zeros, solutions of linear constant-coefficient differential equations, transient and steady state response. Z-transforms

**ECSE 321 Introduction to Software Engineering.**
(3) (3-1-5) (Prerequisite: COMP 202 or COMP 208) (Tutorials assigned by instructor.) Design, development and testing of software systems. Software life cycle: requirements analysis, software architecture and design, implementation,
integration, test planning, and maintenance. The course involves a group project.

ECSE 322 Computer Engineering.
(3) (3-2-4) (Prerequisites: ECSE 200 or MECH 383, and ECSE 221) (Tutorials assigned by instructor.) Data structures (arrays, lists, stacks, queues, deques and trees) and their machine representation and simple algorithms. Peripheral devices: printers, keyboards, magnetic type drives, magnetic disc drives, Peripheral interfacing and bus systems. Introduction to operating systems. System integration. Computer systems and networks.

ECSE 323 Digital System Design.
(5) (3-6-6) (Prerequisites: ECSE 221, ECSE 291, and EDEC 206) (Tutorials and lab hours assigned by instructor.) Minimization and synthesis of combinational logic and finite state machines. Synthesis of synchronous and asynchronous sequential circuits. Principles of control design. Basic concepts in design for testability. The laboratory experiments involve the design and testing of digital systems using small and medium scale integrated circuits. CAD software is used in the design process.

ECSE 330 Introduction to Electronics.
(3) (3-2-4) (Prerequisite: ECSE 210) (Tutorials assigned by instructor.) Introduction to electronic circuits using operational amplifiers, PN junction diodes, bipolar junction transistors (BJTs), and MOS field-effect transistors (MOSFETs), including: terminal characteristics, large- and small-signal models; configuration and frequency response of single-stage amplifiers with discrete biasing. Introduction to SPICE. Simulation experiments.

ECSE 334 Introduction to Microelectronics.
(3) (3-2-4) (Prerequisites: ECSE 291, ECSE 303 or ECSE 306, ECSE 330.) (Tutorials assigned by instructor.) Single-stage integrated-circuit amplifiers; differential and multistage amplifiers, integrated-circuit biasing techniques; non-ideal characteristics, frequency response; feedback amplifiers, output stages; digital CMOS logic circuits.

ECSE 351 Electromagnetic Fields.
(3) (3-1-5) (Prerequisites: ECSE 200, MATH 264 or MATH 265.) (Tutorials assigned by instructor.) Maxwell’s equations, electrostatics, magnetostatics and induction for power-frequency electrical engineering problems.

ECSE 352 Electromagnetic Waves.
(3) (3-2-4) (Prerequisite: ECSE 351) (Tutorials assigned by instructor.) Transient and steady state wave propagation in transmission lines. Telephone and radio frequency lines. Smith’s chart and impedance matching. Maxwell’s equations, Helmholtz’s equations, Poynting’s theorem. Plane waves, polarization, Snell’s law, critical and Brewster’s angle. Rectangular waveguides, optical fibres, dispersion. Radiation and antennas. S-parameters.

ECSE 353 Electromagnetic Fields and Waves.
(3) (3-1-5) (Prerequisites: ECSE 210, MATH 264 or MATH 265.) (Tutorials assigned by instructor.) Maxwell’s equations. Waves in free space and on transmission lines. Electric and magnetic force and energy. Magnetic materials. Faraday’s law. Applications to engineering problems. S-parameters.

ECSE 361 Power Engineering.

ECSE 404 Control Systems.
(3) (3-0-6) (Corequisite: ECSE 304 or ECSE 306.) Modelling and simulation of control systems; Basic concepts of linear systems; open and closed loop control; classical design of controllers - specifications in the step response and the frequency domain; State space design of controllers - pole placement and LQR; Sampled data systems.

ECSE 405 Antennas.
(3) (3-0-6) (Prerequisites: ECSE 303 and ECSE 352.) (Restriction: Not open to students who have taken ECSE 593.) Fundamentals of antenna theory; sources, radiation pattern and gain. Classification of antennas. Main antenna types and their characteristics. Antenna temperature, remote sensing and radar cross-section. Self and mutual impedances. Special topics include adaptive antennas, very large array (VLA) used in radio astronomy and biomedical applications.

ECSE 411 Communications Systems 1.
(3) (3-1-5) (Prerequisites: ECSE 305, ECSE 304 or ECSE 306.) (Tutorials assigned by instructor.) Communication system models; AM and FM modulation, performance of AM and FM systems in noise; sampling, PCM and DPCM techniques; FDM and TDM multiplexing systems; baseband digital transmission over bandlimited channels, digital modulation and detection techniques; illustrative examples of subscriber loop telephone systems, cable TV systems and broadcasting systems.

ECSE 412 Discrete Time Signal Processing.
(3) (3-1-5) (Prerequisite: ECSE 304 or ECSE 306.) (Tutorials assigned by instructor.) Discrete-time signals and systems; Fourier and Z-transform analysis techniques, the discrete Fourier transform; elements of FIR and IIR filter design, filter structures; FFT techniques for high speed convolution; quantization effects.

ECSE 413 Communications Systems 2.
(3) (3-0-6) (Prerequisite: ECSE 411) (Tutorials assigned by instructor.) Introduction to radio communications; satellite communication systems; the cellular concept; fading channel models, digital modulation techniques over fading channels, diversity systems, spread spectrum techniques; fixed assignment multiple access (FDMA, TDMA, CDMA), duplexing methods (FDD, TDD); illustrative examples of terrestrial mobile systems, fixed wireless systems, LEOs, etc.; overview of standardization activities.

ECSE 414 Introduction to Telecommunication Networks.
(3) (3-0-6) (Prerequisites: ECSE 322, and ECSE 304 or ECSE 306.) Introduction to the physical and software architecture of modern networks; transport configurations, multiplexing, the digital hierarchy; wired and wireless access systems; circuit and packet switching systems, signaling, addressing and routing; protocol stacks; local area networking; introduction to network engineering; examples include: ATM, ISDN, IP, Frame Relay, Ethernet.

ECSE 420 Parallel Computing.
(3) (3-2-4) (Prerequisite: ECSE 427) Modern parallel computing architectures for shared memory, message passing and data parallel programming models. The design of cache coherent shared memory multiprocessors. Programming techniques for multithreaded, message passing and distributed systems. Use of modern programming languages and parallel programming libraries.

ECSE 421 Embedded Systems.
(3) (3-0-6) (Prerequisites: ECSE 322, ECSE 323.) Definition, structure and properties of embedded systems. Real-time programming: interrupts, latency, context re-entry; hardware and software platforms. Microcontroller and DSP architectures, I/O systems, timing and event management. Real-time kernels and services. Techniques for development,
debugging and verification. Techniques for limited resource environments. Networking for distributed systems.

**ECSE 422 Fault Tolerant Computing.**
(3) (3-0-6) (Prerequisite: ECSE 322.) Introduction to fault-tolerant systems. Fault-tolerance techniques through hardware, software, information and time redundancy. Failure classification, failure semantics, failure masking. Exception handling; detection, recovery, masking and propagation, termination. Reliability, storage, communication, Process groups, asynchronous and asynchronus group membership and broadcast services. Automatic redundancy management. Case studies.

**ECSE 423 Fundamentals of Photonics.**
(3) (3-2-4) (Prerequisites: ECSE 352 and PHYS 271.) Introduction to the fundamentals of modern optics and photonics. Geometric optics, wave optics, Gaussian beam optics and resonators, electromagnetic optical, polarization, Fourier optics. Attenuation and dispersion, interference, coherence, diffraction. Classical description of optical amplifiers, introduction to lasers. Experiments on physical and geometric optics.

**ECSE 424 Human-Computer Interaction.**

**ECSE 426 Microprocessor Systems.**
(3) (3-0-6) (Prerequisites: ECSE 322 and EDEC 206) (This course may be counted as a technical complementary or as a lab complementary.) Trends in technology. CISC vs. RISC architectures. Pipelineing. Instruction level parallelism. Data and Control Hazards. Static prediction. Exceptions. Dependencies. Loop level parallelism. Dynamic scheduling, branch prediction. Branch target buffers. Superscalar and N-issue machines. VLIW. ILP techniques. Cache analysis and design. Interleaved and virtual memory. TLB translations and caches.

**ECSE 427 Operating Systems.**
(3) (3-3-3) (Prerequisite: ECSE 322 or COMP 273) (Tutorials assigned by instructor.) Operating system services, file system organization, disk and cpu scheduling, virtual memory management, concurrent processing and distributed systems, protection and security. Aspects of the DOS and UNIX operating systems and the C programming language. Programs that communicate between workstations across a network.

**ECSE 428 Software Engineering Practice.**
(3) (3-4-2) (Prerequisite: ECSE 321 or COMP 335) Software engineering practice in industry, related to the design and commissioning of large software systems. Ethical, social, economic, safety and legal issues. Metrics, project management, costing, marketing, control, standards, CASE tools and bugs. The course involves a large team project.

**ECSE 429 Software Validation.**
(3) (3-0-6) (Prerequisite: ECSE 321) Correct and complete implementation of software requirements. Verification and validation lifecycle. Requirements analysis, model based analysis, and design analysis. Unit and system testing, performance, risk management, software reuse. Ubiquitous computing.

**ECSE 430 Photonic Devices and Systems.**
(3) (3-2-4) (Prerequisites: ECSE 352, PHYS 271.) Introduction to photonic devices and applications. Semiconductor lasers, optical amplifiers, optical modulators, photodetectors and optical receivers, optical fibers and waveguides, fiber and waveguide devices. Photonic systems (communications, sensing, biomedical). Experiments on characterizing photonic devices and systems. Optical test-and-measurement instrumentation.

**ECSE 431 Introduction to VLSI CAD.**
(3) (3-4-2) (Prerequisites: ECSE 323 and ECSE 330) (Limited enrolment - 30. Departmental permission required.) (Note: This course may be counted as a technical complementary or as a lab complementary.) The computer-aided design of digital VLSI circuits. Hardware description languages, automatic synthesis, design for testability, technology mapping, simulation, timing analysis, generation of test vectors and fault coverage analysis.

**ECSE 432 Physical Basis: Transistor Devices.**
(3) (3-0-6) (Prerequisites: ECSE 212, ECSE 330, ECSE 351 and PHYS 271) Quantitative analysis of diodes and transistors. Semiconductor fundamentals, equilibrium and non-equilibrium carrier transport, and Fermi levels. PN junction diodes, the ideal diode, and diode switching. Bipolar Junction Transistors (BJT), physics of the ideal BJT, the Ebers-Moll model. Field effect transistors, metal-oxide semiconductor structures, static and dynamic behaviour, small-signal models.

**ECSE 434 Microelectronics Laboratory.**
(2) (1-3-2) (Prerequisites: ECSE 304 and ECSE 334) (Corequisite: For CE students only: ECSE 351 or ECSE 353.) Symbolic vs. numerical computation. Number representation and numerical error; curve fitting and interpolation; numerical differentiation and integration; solutions of systems of linear equations and nonlinear equations; solutions of ordinary and partial differential equations; optimization. Applications in electrical engineering analysis and design. Evaluation of numerical software packages.

**ECSE 435 Mixed-Signal Test Techniques.**
(3) (3-0-6) (Prerequisite: ECSE 304 and ECSE 334) (Note: This course may be counted as a technical complementary or as a lab complementary.) Purpose and economics of mixed-signal test, DC measurements. Accuracy and repeatability. DSP-based theory and its applications to parametric testing of analog filters, DACs, and ADC. Timing and PLL measurements. Design for Testability.

**ECSE 436 Signal Processing Hardware.**
(3) (3-2-4) (Prerequisites: ECSE 221, ECSE 330, ECSE 351 or ECSE 353.) (Corequisite: For CE students only: ECSE 353.) Symbolic vs. numerical computation. Number representation and numerical error; curve fitting and interpolation; numerical differentiation and integration; solutions of systems of linear equations and nonlinear equations; solutions of ordinary and partial differential equations; optimization. Applications in electrical engineering analysis and design. Evaluation of numerical software packages.

**ECSE 437 Design for Testability.**
(3) (3-0-6) (Prerequisites: ECSE 221, ECSE 334, ECSE 352 or ECSE 353.) (Corequisite: For CE students only: ECSE 353.) Symbolic vs. numerical computation. Number representation and numerical error; curve fitting and interpolation; numerical differentiation and integration; solutions of systems of linear equations and nonlinear equations; solutions of ordinary and partial differential equations; optimization. Applications in electrical engineering analysis and design. Evaluation of numerical software packages.

**ECSE 438 Electromagnetic Compatibility (EMC).**
(3) (2-4-3) (Prerequisites: ECSE 221, ECSE 334, ECSE 352 or ECSE 353.) Electromagnetic Compatibility (EMC). Regulations and EMC requirements of electronic systems, non-ideal behaviour of circuit components, signal spectra, radiated emission and susceptibility, conducted noise, crosstalk, differential mode and common mode, shielding, and system design for EMC.

**ECSE 439 EM Transmission and Radiation.**
(3) (3-0-6) (Prerequisite: ECSE 352) Microwave transmission through waveguides: impedance matching, microwave devices, filters and resonators; microwave transmission though free space; near and far field behaviour of electromagnetic waves.
radiator, simple antennas, antenna arrays, practical antenna parameters; the physics of the radio communication channel: reflection, diffraction and scattering and their macroscopic impact (multipath, fading).

**ECSE 460 Appareillage électrique (Electric Power Equipment).** (3) (3-2-4) (Prerequisite: ECSE 361.) (Taught in French.) (This course is offered by the Power Engineering Institute.) Éléments d'un réseau de transport. Linéaires: modélisation et paramètres. Transformateurs: circuits équivalents, pertes, enclenchement, protection. Disjoncteurs: fonctionnement et dimensionnement. Équipements de compensation: condensateurs, branchement série et shunt, inductances. Coordination d'isolement.

**ECSE 461 Electric Machinery.** (3) (3-0-6) (Restriction: Not open to students in Electrical Engineering.) (Note: Tutorials assigned by instructor.) Electric and magnetic circuits. Notions of electromechanical energy conversion applied to electrical machines. Basic electrical machines - transformers, direct-current motors, synchronous motors and generators, three phase and single phase induction machines. Elements of modern electronically controlled electric drive systems.

**ECSE 463 Matériaux de l'électrotechnique.** (3) (3-0-6) (Prerequisite: ECSE 361.) (Note: Taught in French. This course is offered by the Power Engineering Institute.) Applications de matériaux en électrotechnique; appareillage, transformateurs, machines électriques. Matériaux conducteurs: propriétés, pertes, isolation. Matériaux magnétiques: propriétés thermiques / mécaniques, pertes, types, aimants. Matériaux isolants: conduction, pertes, claquage et performances des isolants, contraintes. Caractérisation et diagnostic: essais et analyses, mécanismes de vieillissement et de défaillance, maintenance prédicitive. Considérations et équipements typiques.

**ECSE 464 Power Systems Analysis 1.** (3) (3-0-6) (Prerequisite: ECSE 361) (This course is offered by the Power Engineering Institute.) Basic principles of planning and operating interconnected power systems with emphasis on Canadian conditions. Mathematical models for system. Steady-state analysis of power systems, load flow formulation and solution algorithms. Operating strategies, economic dispatch, voltage reactive power regulation, frequency and tie-line power control.

**ECSE 465 Power Electronic Systems.** (3) (3-2-4) (Prerequisites: ECSE 334, ECSE 361.) (This course is offered by the Power Engineering Institute.) Introduction to power electronics: definition, applications and classification of converters. Review of analytical techniques. Overview of power semiconductor switches. Line comunicated rectifiers and inverters. Switch mode power converters and modulation techniques. Choppers, inverters and rectifiers. Resonant mode converters. Application to power systems and energy conversion.

**ECSE 468 Electricité industrielle (Industrial Power Systems).** (3) (3-2-4) (Prerequisite: ECSE 361.) (This course is offered by the Power Engineering Institute.) (Taught in French.) Structure des réseaux électriques industriels. Niveau de tension. Installations électriques. Codes et normes. Court-circuits, protection et coordination. Mise à la terre. Qualité de l'onde. Facteur de puissance, tarification et gestion de l'énergie électrique.

**ECSE 469 Protection des réseaux électriques.** (3) (3-0-6) (Prerequisite: ECSE 361.) (Note: Taught in French. This course is offered by the Power Engineering Institute.) Généralités sur les systèmes de protection. Calculs de défauts symétriques et asymétriques. Transformateurs de mesure. Système de mise à la terre. Types de relais de protection. Protection de transformateur, de barres, de ligne de transport : philosophie et application. Conception des systèmes de protection. Homologation et essais de relais.

**ECSE 474 Design Project 1.** (1) (3-2-1) (Prerequisites: ECSE 211, EDEC 206 and at least 42 departmental credits.) A laboratory design project undertaken with close supervision by a staff member. The project consists of defining an engineering problem, reviewing relevant background and literature, and seeking the solution through numerical simulation and/or experimental investigation. A literature review, written project proposal, and seminar presentation are required.

**ECSE 475 Design Project 2.** (2) (0-5-1) (Prerequisite: ECSE 474.) A laboratory design project undertaken with close supervision by a staff member. A continuation of ECSE 474 Design Project 1. The work consists of carrying out the project plan developed in ECSE 474 Design Project 1 producing a report summarizing the results, and a seminar presentation.

**ECSE 483 Multidisciplinary Project 1.** (3) (0-3-6) (Prerequisites: EDEC 206 and at least 42 Departmental credits from Electrical and Computer Eng. and Computer Science) (Restriction: Open only to later year students who can find a professor within the Department prepared to supervise a 2-semester, multidisciplinary project.) The first part of a 6-credit team project requiring collaboration with non-electrical/computer engineers.

**ECSE 484 Multidisciplinary Project 2.** (3) (0-3-6) (Prerequisite: ECSE 483) The second part of a 6-credit team project requiring collaboration with non-electrical/computer engineers.

**ECSE 485 IC Fabrication Laboratory.** (2) (1-3-2) (Prerequisites: ECSE 334, EDEC 206.) (Corequisite: ECSE 432 or ECSE 533) (Limited Enrolment - 12) (Lab hours assigned by instructor.) Essential processes for silicon semiconductor device fabrication: etching, diffusion, photolithography. Fabrication of large area PN junctions, selective area PN junctions and MOSFETs. Design and fabrication of simple MOS circuits. Electrical characterization of devices and circuits.

**ECSE 486 Power Laboratory.** (2) (1-3-2) (Prerequisites: ECSE 334, ECSE 361 and EDEC 206) (Limited Enrolment - 14) (Lab hours assigned by instructor.) Techniques of electric power, efficiency, torque, speed measurements. Starting, running and control of electric machines: dc, synchronous, induction types. Power electronic controllers. Each group of students has access to a compact experiment bench containing a set of micro-machines and all the necessary components.

---

**Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.**

- Professional Practice (Stage) in Dietetics involving special prerequisites
- Indicates that departmental approval/permission must be obtained by a departmental instructor before registration
- Denotes courses offered by the Faculty of Ed which, if appropriate to the student’s program, may be included in the academic concentration
- Denotes courses not offered only in the Faculty of Arts or Faculty of Science in 2007-08
- Denotes courses not available as Education electives
- Denotes courses not offered only inAlternate years
- Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
necessary equipment.

ECSE 487 Computer Architecture Laboratory.
(2) (1-3-2) (Prerequisite: EDEC 206.) (Corequisite: ECSE 425 or ECSE 525) (Limited enrollment - 50) (Requires Permit to Register. See Department web site.) (Lab hours assigned by instructor.) Basic software tools used in the design, synthesis and analysis of computer and communications systems such as data-paths, switching circuits, and arithmetic and logic circuits. Behavioral and structural modeling of hardware designs in the IEEE standard hardware description language VHDL. Synthesis and implementation of hardware designs using Programmable Logic Devices.

ECSE 488 High Frequency Laboratory.
(2) (1-3-2) (Prerequisites: ECSE 291, EDEC 206.) (Corequisite: ECSE 451.) (Limited Enrolment - 20) (Lab hours assigned by instructor.) High frequency measurement techniques. Vector network analyzer and spectrum analyzers. Radars, oscillators, capacitors and inductors at high frequencies. High-level signal handling of a high-frequency bandpass amplifier. Electromagnetic interference (EMI) and spectrum coordination. Cavity resonators. Standing waves in waveguides. Reciprocity of microwave networks. Scattering parameters of a microstrip network.

ECSE 489 Telecommunication Network Laboratory.
(2) (0-3-3) (Prerequisite: EDEC 206) (Corequisite: ECSE 414 or ECSE 529 or COMP 555) (Lab hours assigned by instructor.) Experiments involving the configuration and operation of telecommunication network technologies, and the modeling of telecommunication networks. Configuration of transport facility (SONET), bandwidth management with permanent virtual connections (ATM), implementation of a routing plan in a packet switched network (IP), configuration of end-to-end service (telephony over IP).

ECSE 490 Digital Signal Processing Laboratory.
(2) (0-3-3) (Prerequisites: ECSE 291 and EDEC 206.) (Corequisite: ECSE 412 or ECSE 512) (Limited Enrolment - 30) (Restriction: Departmental approval required) (Requires Permit to Register. See Department web site.) (Lab hours assigned by instructor.) Experiments involving the digital processing of signals using computer-aided design tools for design, processing and visualization and real-time processing using DSP chips. Filter structures and design, multi-rate signal processing, filter banks, fast transforms, adaptive filtering, signal coding and quantization.

ECSE 491 Communication Systems Laboratory.
(2) (0-3-3) (Prerequisites: ECSE 291 and EDEC 206.) (Corequisite: ECSE 411 or ECSE 511) (Limited Enrolment - 30) (Lab hours assigned by instructor.) Experimental studies and simulation of analog and digital transmission techniques. Performance of AM and FM systems. FSK and PSK modulation techniques and spectra. Sampling of analog signals, PCM and TDM techniques.

ECSE 492 Optical Communications Laboratory.
(2) (0-3-3) (Prerequisite: EDEC 206.) (Corequisite: ECSE 423 or ECSE 527.) (Lab hours assigned by instructor.) Hands-on experience of the physical layer of optical communications systems. Experiments involving optical fiber link characterization, laser measurements, beam divergence, coupling efficiency. Use of lasers, optical spectrum analyzer, data generator, beam profiler, photodetectors, optical filters. Experiments are supported with simulation and analysis software.

ECSE 493 Control and Robotics Laboratory.
(2) (1-3-2) (Prerequisites: ECSE 291 and EDEC 206.) (Corequisite: ECSE 404 or ECSE 501) (Limited Enrolment - 20) (Lab hours assigned by instructor.) Experimental studies for the design of control systems, with particular emphasis on motion control as applicable to robotics. Modeling of DC motors and electro-mechanical systems. Controller design in the time and frequency domain as well as state space. Experimental examples of PID, lead-lag, full state feedback and LQR controllers.

ECSE 494 Electrical Engineering Design Project.
(3) (0-5-4) (Prerequisite: EDEC 206 and at least 42 Departmental credits) (Limited Enrolment - 50) A laboratory design project undertaken with close supervision by a staff member. The project consists of defining an engineering problem and seeking the solution through experimental investigation. Results are reported in a seminar at the end of term and in a technical paper.

ECSE 495 Software Engineering Design Project.
(3) (0-5-4) (Prerequisites: ECSE 321 and at least 42 Departmental credits from Electrical and Computer Eng. and Computer Science) Self-managed design and implementation of a complex software system according to a set or prescribed specifications.

ECSE 496 Telecommunications Systems and Services.
(3) (3-3-3) (Prerequisites: ECSE 411 and ECSE 414) Case studies of several end-to-end telecommunications systems used for the delivery of various service application scenarios. Issues in network and systems architecture, technology, operations management, regulation and competition. Examples from conventional telephony, internet service delivery, wireless services and cable TV distribution.

ECSE 498 Honours Thesis 1.
(3) (0-3-6) (Prerequisites: EDEC 206 and at least 42 Departmental credits) A research project undertaken with close supervision by a staff member. The work consists of defining an engineering problem, reviewing the associated literature, and seeking the solution through experimental investigation. A literature review and a written thesis proposal are required along with a seminar presentation at end of term.

ECSE 499 Honours Thesis 2.
(3) (0-3-6) (Prerequisite: ECSE 498) A research project undertaken with close supervision by a staff member. A continuation of ECSE 498. The work consists of carrying out the research plan developed in ECSE 498 along with a seminar presentation at end of term.

ECSE 500 Mathematical Foundations of Systems.
(3) (3-0-6) (Restriction: Open only to graduate students within the Faculty of Engineering.) Basic set theories and algebraic structures, linear spaces, linear mapping, topological and metric spaces, separable spaces, continuity, compactness, Lebesgue measure on Euclidean spaces, measurability, Banach spaces, Hilbert spaces, linear bounded operators in Banach spaces, dual spaces, adjoint operators, the Orthogonal Projection Theorem, properties of the Fourier series, convergence in probability.

ECSE 501 Linear Systems.
(3) (3-0-6) (Corequisite: ECSE 500 or permission of instructor.) Mathematical models of linear systems, fundamental solution and transition matrices, non-homogeneous linear equations, controllability and observability of linear systems, reachable subspaces, Cayley-Hamilton's Theorem, Kalman's controllability and observability rank conditions, minimal realizations, frequency response, invariant subspaces, finite and infinite horizon linear regulator problems, uniform, exponential, and input-output stability, the Lyapunov equation.

ECSE 504 Sampled Data Control.
(3) (3-0-6) (Prerequisite: ECSE 304 or ECSE 306.) (Corequisite: ECSE 404.) Sampling and aliasing. Conversion of continuous-time controllers using s-to-z transformations; pre-and post-filtering. Discrete time state representation and z-transfer function of sampled linear, time-invariant systems. Correspondence between system theoretic results for continuous- and discrete-time systems. Sampled-data design, including pole placement, LQR control and model predictive control.

ECSE 505 Nonlinear Control Systems.
(3) (3-0-6) (Prerequisite: ECSE 501) Basic ODE formulation of non-linear systems; structural properties; Lyapunov and LaSalle stability theory and nonlinear and multivariable controller design; input-output stability; small gain theorem, conservation, passivity, system linearization, zero and inverse dynamics and regulator design; discontinuous and sliding mode control; applications to deterministic adaptive control.

ECSE 506 Stochastic Control & Decision Theory.
(3) (3-0-6) (Prerequisites: ECSE 509 and ECSE 500.) Gaussian processes and tail bounds; Bandit problems and optimal policies; Markov decision processes; Dynamic programming and optimal control in discrete time; learning models control from data; the ODE method and stochastic approximation;

(ENGINEERING) ECSE-ELECTRICAL ENGINEERING
Q-learning: Approximate dynamic programming, linear stochastic systems; linear Gaussian systems; system identification and stochastic adaptive control.

ECSE 507 Optimization and Optimal Control.
(3) (3-0-6) (Prerequisites: MATH 264 or MATH 265 or MATH 248, MATH 270 or MATH 247) General Introduction to optimization methods including steepest descent, conjugate gradient, Newton algorithms. Generalized matrix inverses and the least squared error problem. Introduction to constrained optimality; convexity and duality; interior point methods. Introduction to dynamic optimization; existence theory, relaxed controls, the Pontryagin Maximum Principle. Sufficiency of the Maximum Principle.

ECSE 508 Multi-Agent Systems.
(3) (3-0-6) (Prerequisite: ECSE 305 or equivalent.) Introduction to game theory, strategic games, extensive form games with perfect and imperfect information, repeated games and folk theorems, cooperative game theory, introduction to mechanism design, markets and market equilibrium, pricing and resource allocation, application in telecommunication networks, applications in communication networks, stochastic games.

ECSE 509 Probability and Random Sig. 2.
(3) (3-0-6) (Prerequisites: ECSE 304 and ECSE 305) Multivariate Gaussian distributions; finite-dimensional mean-square estimation (multivariate case); principal components; introduction to random processes; weak stationarity: correlation functions, spectra, linear processing and estimation; Poisson processes and Markov chains: state processes, invariant distributions; stochastic simulation.

ECSE 510 Stochastic Processes and Systems.
(3) (3-0-6) (Prerequisite: ECSE 500 and ECSE 509 or equivalent.) Basic notions. Linear state space (SS) systems. Least squares estimation and prediction: conditional expectations; Orthogonal Projection Theorem, Kalman filtering; innovations; Riccati equation. ARMA and SS systems. Stationary processes; Wold decomposition; spectral factorization; Weiner filtering. The Weiner process; linear stochastic differential equations; continuous time filtering. Chapman-Kolmogorov, Fokker-Plank equations. Applications.

ECSE 511 Introduction to Digital Communication.
(3) (3-0-6) (Prerequisite: ECSE 304) (Corequisite: ECSE 509) (An advanced version of ECSE 411) (Tutorials assigned by instructor.) Amplitude and angle modulation including AM, FM, FDM and television systems; introduction to random processes; sampling and quantization, PCM systems, TDM; digital modulation techniques, Maximum-Likelihood receivers, synchronization issues; elements of information theory including information sources, source coding and channel capacity.

ECSE 512 Digital Signal Processing 1.
(3) (3-1-5) (Prerequisites: ECSE 304 and ECSE 305) Review of discrete-time transforms, sampling and quantization, frequency analysis. Structures for IIR and FIR filters, coefficient quantization, roundoff noise. The DFT, its properties, frequency analysis and filtering using DFT methods, the FFT and its implementation. Multirate processing, subsampling and interpolation, oversampling techniques.

ECSE 513 Robust Control Systems.
(3) (3-0-6) (Prerequisites: ECSE 304 and ECSE 500.) Feedback interconnections of LTI systems; Nominal stability and performance of feedback control systems; Norms of signals and systems; H2-optimal control; H-infinity-optimal control; Uncertainty modeling for robust control; Robust closed-loop stability and performance; Robust H-infinity control; Robustness check using mu-analysis; Robust controller design via mu-synthesis.

ECSE 514 Probabilistic Reasoning and Artificial Intelligence.
(3) (3-0-6) (Prerequisites: COMP 206, COMP 360, COMP 424 or ECSE 526, and MATH 323 or ECSE 305.) (Restriction: Not open to students who have taken COMP 526.) Belief networks, utility theory, Markov decision processes, learning algorithms.

ECSE 520 Parallel Computing Systems.
(3) (3-2-4) (Prerequisite: ECSE 427.) (Restriction: Credit will only be given for one of ECSE 420 and ECSE 520.) Parallel computing models: shared memory, message passing and data parallel. Single-chip multiprocessors. Techniques for designing scalable cache coherent shared memory multiprocessors. Programming shared memory and message passing systems. Multithreading and synchronization; interpret between parallel programming and architecture.

ECSE 521 Digital Communications 1.

ECSE 523 Speech Communications.
(3) (3-0-6) (Prerequisite: ECSE 412 or ECSE 512) Articulatory and acoustic descriptions of speech production, speech production models, speech perception, digital processing of speech signals, vocoders using formant, linear predictive and cepstral techniques, overview of automatic speech recognition systems, speech synthesis systems and speaker verification systems.

ECSE 524 Interconnects and Signal Integrity.
(3) (3-0-6) (Prerequisites: ECSE 334 and ECSE 352 or ECSE 353.) Interconnect structures, signal integrity issues: reflection, crosstalk, noise, electromagnetic interference, Lossy transmission lines, RLGC matrix representations, wave propagation in multilayered substrates, periodically loaded lines, Floquet’s theorem, power distribution network, simultaneous switching noise, packaging structures, chip interconnection technologies, substrate integrated waveguides, methods for experimental characterization of interconnects, signal integrity CAD tools.

ECSE 526 Artificial Intelligence.
(3) (3-0-6) (Prerequisite: ECSE 322) Design principles of autonomous agents, agent architectures, machine learning, neural networks, genetic algorithms, and multi-agent collaboration. The course includes a term project that consists of designing and implementing software agents that collaborate and compete in a simulated environment.

ECSE 527 Optical Engineering.
(3) (3-0-6) (Prerequisites: ECSE 304 and ECSE 352) A structure introduction to modern optical engineering. Topics covered include the propagation of light through space, refraction, diffraction, polarization, lens systems, ray-tracing, aberrations, computer-aided design and optimization techniques, Gaussian beam analysis, micro-optics and computer generated diffractions optical elements. Systems and applications will be stressed throughout.

ECSE 528 Telecommunication Network Architecture.
(3) (3-0-6) (Prerequisite: ECSE 411 or ECSE 511.) (Corequisite: ECSE 509) Organization of large, highspeed, multiservice telecommunication networks. Connection hierarchies,

**ECSE 529 Image Processing and Communication.**

(3) (3-0-6) (Prerequisite: ECSE 304 or ECSE 306.) Introduction to vision in man and machine; computer vision systems: biological vision systems; biological signal processing; edge detection; spatial- and frequency-domain processing; color. Low-level visual processing in computer vision, psychophysics, and neurobiology, and their similarities and differences.

**ECSE 530 Logic Synthesis.**

**ECSE 532 Computer Graphics.**

(3) (3-3-3) (Prerequisite: ECSE 322) Introduction to computer graphics systems and display devices: raster scan, scan conversion, graphical input and interactive techniques - window environments; display files: graphics languages and data structures: 2D transformations; 3D computer graphics, hidden line removal and shading; graphics system design; applications. Laboratory project involving the preparation and running of graphics programs.

**ECSE 533 Physical Basis of Semiconductor Devices.**

(3) (3-0-6) (Prerequisites: ECSE 330, ECSE 351 and PHYS 271) Quantitative analysis of diodes and transistors. Semiconductor fundamentals, equilibrium and non-equilibrium carrier transport, and Fermi levels. PN junction diodes, the ideal diode, and diode switching. Bipolar Junction Transistors (BJT), physics of the ideal BJT; the Ebers-Moll model. Field effect transistors, metal-oxide semiconductor structures, static and dynamic behaviour, small-signal models.

**ECSE 534 Analog Microelectronics.**

(3) (3-0-6) (Prerequisite: ECSE 334) Design of analog ICs using specialized analog CAD tools such as SPICE. Voltage and current amplifier design which encompasses the study of biasing circuits, current sources and mirrors, input and output stages, and frequency compensation; precision reference sources; analog multipliers; oscillators; waveform generators and shaping circuits, and analog switches.

**ECSE 536 RF Microelectronics.**

(3) (3-3-3) (Prerequisite: ECSE 334.) (Restriction: Instructor's permission required.) Introduction to Radio Frequency Integrated Circuits and wireless transceiver architectures. Modeling of passive/active integrated devices. Design of monolithic bipolar and CMOS LNAs, mixers, filters, broadband amplifiers, RF power amplifiers, VCOs, and frequency synthesizers. Analysis of noise and non-linearity in RFICs. Project using modern RFIC simulation/layout CAD tools.

**ECSE 543 Numerical Methods in Electrical Engineering.**

**ECSE 545 Microelectronics Technology.**

(3) (3-0-6) (Prerequisite: ECSE 432 or ECSE 533) Basic techniques in the fabrication of microelectronic circuits. Four-point probe, alloyed contacts, diffusion processes, ion implantation epitaxy, silicon dioxide, photolithography, selected diffusion and metallization, transistor fabrication, dry etching, monolithic integrated circuits, isolation, mask making, thin and thick film components, MOS gate voltage and integrated circuits.

**ECSE 547 Finite Elements in Electrical Engineering.**

**ECSE 548 Introduction to VLSI Systems.**

(3) (2-2-5) (Prerequisites: ECSE 334 and ECSE 323) (Restriction: Instructor's permission required.) An interdisciplinary course for electrical engineering and computer science students. A structured design methodology for managing the complexity of VLSI systems. Sufficient information on integrated devices, circuits, digital subsystems and system architecture is presented to enable students to span the range of abstractions from device physics to VLSI digital systems.

**ECSE 549 Expert Systems in Electrical Design.**

**ECSE 559 Flexible AC Transmission Systems.**

(3) (3-0-6) (Prerequisite: ECSE 334 and ECSE 361) Operating principles of controllers of flexible AC transmission systems (FACTS). Transformer, thyristor and gate- turn-off thyristor (GTO) technologies. Modulation methods: harmonic elimination, pulse width modulation. Applications in: shunt and series advanced static VAR Controllers (ASVC), phase shifters, unified power flow controllers (UPFC).

**ECSE 563 Power Systems Operation and Planning.**

**ECSE 565 Introduction to Power Electronics.**

(3) (3-0-6) (Prerequisite: ECSE 334) Semiconductor power switches - thyristors, GTO's, bipolar transistors, MOSFET's. Switch mode power amplifiers. Buck and boost principles. Modulation methods -PWM, delta, hysteresis current control. Rectifiers, inverters, choppers.

**ECSE 570 Automatic Speech Recognition.**

(3) (3-0-6) (Prerequisites: ECSE 305 and ECSE 322.) Acoustic phonetics and signal representations. Pattern classification, stochastic modeling, language modeling and search algorithms as applied to speech recognition. Techniques for robustness, integration of speech recognition with other user interface modalities, and the role of automatic speech recognition in speech understanding.

**ECSE 571 Optoelectronic Devices.**

(3) (3-0-6) (Prerequisites: ECSE 304, ECSE 305, ECSE 352.) (Corequisite: ECSE 533) Physical basis of optoelectronic devices including Light Emitting Diodes, semiconductor optical amplifiers, semiconductor lasers, quantum well devices, and solid state lasers. Quantitative description of detectors, optical modulation, optical logic devices, optical interconnects, and optomechanical hardware. Throughout the course, photonic systems applications will be addressed.

**ECSE 573 Microwave Electrons.**

(3) (3-0-6) (Prerequisite: ECSE 432 or ECSE 533) Physical basis of modern microwave devices and circuits. Microwave transistors and tunnel diodes, transferred electron devices, transit time devices and infra red devices. Microwave generation and amplification, microwave FET circuits. Noise and power amplification.
ECSE 593 Antennas and Propagation.
(3) (3-0-6) (Prerequisites: ECSE 303 and ECSE 352.) Fundamentals of antenna theory; sources, radiation pattern and gain. Classification of antennas. Main antenna types and their characteristics. Antenna temperature, remote sensing and radar cross-section. Self and mutual impedances. Special topics include adaptive antennas, very large array (VLA) used in radio astronomy and biomedical applications.

ECSE 596 Optical Waveguides.
(3) (3-0-6) (Prerequisite: ECSE 352) An in-depth analysis to guided-wave propagation. Dielectric waveguides (slab, 2D, nonlinear, spatial solitons), optical fibers (modes, dispersion relations, propagation in dispersive, nonlinear fibers, temporal solitons), beam propagation method, coupled mode theory, waveguide devices (couplers, gratings, etc.). Selection of current research topics of interest (e.g. photonic crystals, optical signal processing, etc.)

ECSE 597 Circuit Simulators.

FACC-Faculty Course
Offered by: Engineering - Dean's Office

FACC 200 Industrial Practicum.
(0) The purpose of this course is to expose engineering students to engineering practice in industry. It consists of a minimum of three months of full-time remunerated work in industry, typically done during the summer. The course is administered by the McGill Engineering Career Centre.

FACC 220 Law for Architects and Engineers.
(3) (3-0-6) Aspects of the law which affect architects and engineers. Definition and branches of law; Federal and Provincial jurisdiction, civil and criminal law and civil and common law; relevance of statutes; partnerships and companies; agreements; types of property, rights of ownership; successions and wills; expropriation; responsibility for negligence; servitudes/easements, privileges/liens, hypothec/ mortgages; statutes of limitations; strict liability of architect, engineer and builder; patents, trade marks, industrial design and copyright; bankruptcy; labour law; general and expert evidence; court procedure and arbitration.

FACC 500 Technology Business Plan Design.
(3) (3-0-6) (Prerequisite: MIME 310 or permission of Instructor.) (Recommended to be taken in combination with FACC 501.) This course combines several management functional areas such as marketing, financial, operations and strategy with the skills of creativity, engineering innovation, leadership and communications. Students learn how to design an effective and winning business plan around a technology or engineering project in small, medium or large enterprises.

FACC 501 Technology Business Plan Project.
(3) (1-0-8) (Prerequisite: FACC 500 or Permission of Instructor.) (Restrictions: Not open to students who have taken FACC 480.) (Recommended to be taken in combination with FACC 500.) Students work in teams to develop a comprehensive business plan project based on a technological or engineering innovation while utilizing site visits.
MECH 314 Dynamics of Mechanisms. (3) (3-1-5) (Prerequisite: MECH 220.) First principles of analysis; motion; position; displacement; velocity; acceleration; force; inertia and its effects. Kinematic and dynamic analysis of rigid bodies in pure rotation and in pin-connected systems; dynamic balance. Rigid bodies in rolling contact; planetary gear-trains. Bodies in sliding contact; lower and higher sliding pairs.

MECH 331 Fluid Mechanics 1. (3) (3-1-5) (Prerequisites: MECH 210. Pre-/Co-requisites: MECH 220, MECH 240 and (MATH 266 or MATH 271.)) Physical properties of fluids. Kinematics and dynamics of fluid flow: stress in a continuum, rates of strain, rotation. Control volume analysis; conservation of mass, linear momentum and energy; Euler and Bernoulli equations; Flow measurement. Dimensional analysis and dynamical similarity. Laminar and turbulent flow in pipes and boundary layers.

MECH 346 Heat Transfer. (3) (3-1-5) (Prerequisites: MECH 240 or BREE 301, MECH 331 or BREE 305, MATH 266 or MATH 271 or AEMA 305.) Basic concepts and overview. Steady and unsteady heat conduction. Fin Theory. Convective heat transfer; governing equations; dimensionless parameters; analogy between momentum and heat transfer. Design correlations for forced, natural, and mixed convection. Heat exchangers. Radiative heat transfer: black- and gray-body radiation; shape factors; enclosure theory. Thermal engineering design project.

MECH 362 Mechanical Laboratory 1. (2) (0-3-3) (Prerequisite: MECH 261 or MECH 262 or BREE 216) Experiments will be performed in four areas: MECH 240 Thermodynamics, MECH 315 Vibrations, MECH 331 Fluid Mechanics 1, and MECH 346 Heat Transfer. Students should sign up to do experiments in one or more areas the term following the completion of one or more of the above courses. Students will not formally register for this course until the term in which they will complete all of the experiments.

MECH 383 Applied Electronics and Instrumentation. (3) (3-2-4) (Prerequisites: MECH 261 or MECH 262, and (MATH 261 or MATH 263.)) Discrete and integrated components, both analogue and digital. Characteristics of passive elements. Semiconductors, amplifiers, filters, oscillators, modulators, power supplies and nonlinear devices. Introduction to digital electronics. Transducer/signal conditioner interfacing considerations.

MECH 393 Machine Element Design. (3) (3-1-5) (Prerequisites: MECH 260 and (MECH 289 or MECH 291) and CIVE 207 and EDEC 206. Pre-/co-requisites: MECH 292 and MECH 314 and MIME 260.) The design of machine elements for strength requirements in consideration of various methods of manufacture. Synthesis of mechanical systems to fulfill performance requirements, following the engineering design process. Static and fatigue failure prevention. Students form groups to work on a design project.

MECH 403D1 (3), MECH 403D2 (3) Thesis (Honours). (0-6-12) (Prerequisite: Candidates must have completed courses in the Mechanical Engineering Program weighted at a minimum of 60 credits.) (Students must register for both MECH 403D1 and MECH 403D2.) (No credit will be given for this course unless both MECH 403D1 and MECH 403D2 are successfully completed in consecutive terms) This course, together with course MECH 404 involves a research project containing an explicit component of design, encompassing interrelated aspects of engineering theory and requiring a theoretical and/or experimental investigation. Students will work under the supervision of one or more staff members; completed work will be submitted in the form of a thesis.

MECH 403N1 (3), MECH 403N2 (3) Thesis (Honours). (Students must also register for MECH 403N2) (No credit will be given for this course unless both MECH 403N1 and MECH 403N2 are successfully completed in a twelve month period) This course, together with course MECH 404 involves a research project containing an explicit component of design, encompassing interrelated aspects of engineering theory and requiring a theoretical and/or experimental investigation. Students will work under the supervision of one or more staff members; completed work will be submitted in the form of a thesis.

MECH 404 Honours Thesis 2. (3) (3-6-3) (Corequisite: MECH 403) This course is part of the same thesis project as course MECH 403.

MECH 434 Turbomachinery. (3) (3-0-6) (Prerequisite: MECH 331) A broad general treatment of energy transfer between a fluid and a rotor, velocity vector diagrams, and non-dimensional characteristics. Applications to hydraulic pumps and turbines. Two dimensional cascade theory leading to study of axial gas compressors and turbine stages. Three dimensional free and forced vortex configurations. Centrifugal compressors and radial inflow turbines.
**MECH 447 Combustion.**
(3) (3-0-6) (Prerequisite: MECH 240) Equilibrium analysis of reacting systems, Hypothesis analysis, flame propagation mechanisms, introduction to chemical kinetics, models for laminar flame propagation, ignition, quenching, flammability limits, turbulent flames, flame instability mechanisms, detonations, solid and liquid combustion.

**MECH 463D1 (3), MECH 463D2 (3) Mechanical Engineering Project.**
(1-3-5) (Prerequisite: MECH 393) Students must register for both MECH 463D1 and MECH 463D2. (No credit will be given for this course unless both MECH 463D1 and MECH 463D2 are successfully completed in consecutive terms) Team project work typically involving the design, fabrication, verification, and application of a mechanical device/system, or experimental facility. The project work is complemented with lectures in the Fall term on topics related to design and management of design projects. Emphasis is on the completion of a project of professional quality.

**MECH 474 Selected Topics in Operations Research.**
(3) (3-0-6) (Prerequisites: MATH 266 or MATH 271) and COMP 208) Introduction to the general mathematical programming problem in the context of engineering design; linear programming, queuing theory, Monte Carlo simulation. The above techniques will be used to study the optimization of engineering systems.

**MECH 494 Honours Design Project.**
(3) (0-6-3) (Prerequisite: MECH 292) (Restriction: Mechanical Engineering Honours students.) An advanced design project course with emphasis on analytical solutions, performance prediction and validation, and planning for production.

**MECH 497 Value Engineering.**
(3) (0-8-1) (Prerequisites: MECH 393 and completion of 45 credits) Value Engineering is an in-depth analysis of an industrial product or process with a view to improving its design and/or performance to increase its worth. This is a workshop type of course. Projects will be supplied by industrial firms and students will work in teams with industrial personnel.

**MECH 498 Interdisciplinary Design Project 1.**
(3) (1-2-6) Completion of an individual project on an interdisciplinary theme with emphasis on a balanced combination on analysis and synthesis.

**MECH 499 Interdisciplinary Design Project 2.**
(3) (1-2-6) (Corequisite: MECH 498) The individual project initiated in MECH 498 is continued and finalized in this course.

**MECH 500 Selected Topics in Mechanical Engineering.**
(3) (3-0-6) A course to allow the introduction of new topics in Mechanical Engineering as needs arise, by regular and visiting staff.

**MECH 501 Special Topics: Mechanical Engineering.**
(3) (3-0-6) A course to allow the introduction of new topics in Mechanical Engineering as needs arise, by regular and visiting staff.

**MECH 513 Control Systems.**
(3) (3-1-5) (Prerequisite: MECH 412.) (Restriction: Not open to students who have taken MECH 413.) Stability: Lyapunov, Routh-Hurwitz and Nyquist criteria. Root-locus design of feedback control systems. Controller design based on polynomial methods and internal model principle. Frequency-response controller design. State feedback control. Controllability, observability, LQR, full- and reduced-order observer design. Robust control design. Optimization problems in control.

**MECH 515 Unsteady Gasdynamics 1.**
(3) (3-1-5) (Prerequisites: MECH 341, MECH 430.) (Restriction: Not open to students who have taken MECH 615) Fundamentals of unsteady gasdynamics. Shock and detonation waves in gases and condensed material. Condensed explosives: hydrodynamic theory, equations of state, initiation, Shock interactions. Blast wave theory, similarity methods, blast scaling.

**MECH 522 Production Systems.**

**MECH 524 Computer Integrated Manufacturing.**
(3) (3-0-6) (Prerequisite: Permission of the instructor) A study of the present impact of computers and automation on manufacturing. Computer-aided systems. Information modelling. Information system structures. Study of several types of production systems. Integration issues: inter- and intra-enterprise. Laboratory experience with manufacturing software systems.

**MECH 526 Manufacturing and the Environment.**
(3) (3-0-6) (Prerequisite (Undergraduate): Permission of the instructor) Course topics include: clean manufacturing, product and process design for minimizing materials and energy use, the product life cycle, impact of technology on the environment, environmental impact assessment, regulatory process, and managing the "political" process.

**MECH 528 Product Design.**

**MECH 529 Discrete Manufacturing Systems.**
(3) (3-0-6) (Prerequisite (Undergraduate): Permission of the instructor) An overview of present day production machines and systems with special emphasis on automation, computer control and integration techniques. Material handling, automatic inspection, process monitoring, maintenance. Socio-economic and environmental issues. Laboratory experience with factory simulation.

**MECH 530 Mechanics of Composite Materials.**

**MECH 531 Aeroelasticity.**
(3) (3-1-5) (Prerequisite (Undergraduate): MECH 419 or MECH 315 and MECH 533) (Prerequisite (Graduate): MECH 533) Wing divergence using strip-theory aerodynamics. Effect of aircraft flexibility on the control and stability. Flutter calculations for two-dimensional wings with discussion of three-dimensional effects. Some examples of aerelastic instability, and the relevant analysis of non-aeronautical problems.

**MECH 532 Aircraft Performance, Stability and Control.**
(3) (3-1-5) (Prerequisite (Undergraduate): MECH 412 or MECH 419, MECH 533) (Prerequisite (Graduate): MECH 533) Aircraft performance criteria such as range, endurance, rate of climb, maximum ceiling for steady and accelerated flight. Landing and take-off distances. Static and dynamic stability in
the longitudinal (stick-fixed and stick-free) and coupled lateral and directional modes. Control response for all three modes.

**MECH 533 Subsonic Aerodynamics.**
(3) (3-1-5) (Prerequisite (Undergraduate): MECH 331) Kinematics: equations of motion; vorticity and circulation, conformal mapping and flow round simple bodies. Two-dimensional flow round aerfoils. Three-dimensional flows; high and low aspect-ratio wings; airfoils. Wind tunnel interference. Similarity rules for subsonic irrotational flows.

**MECH 534 Air Pollution Engineering.**
(3) (3-0-6) (Prerequisite (Undergraduate): MECH 331, MECH 341) Pollutants from power production and their effects on the environment. Mechanisms of pollutant formation in combustion. Photochemical pollutants and smog, atmospheric dispersion. Pollutant generation from internal combustion engines and stationary power plants. Methods of pollution control (exhaust gas treatment, absorption, filtration, scrubbers, etc.).

**MECH 537 High-Speed Aerodynamics.**

**MECH 538 Unsteady Aerodynamics.**
(3) (3-0-6) (Prerequisite (Undergraduate): MECH 533) Fundamental equations of unsteady compressible flows in fixed or moving reference frames. Unsteady flows past bodies in translation and having oscillatory motions. Oscillations of cylindrical pipes or shells subjected to internal flows. Vortex theory of oscillating aerfoils in incompressible flows. Theodorsen's method. Unsteady compressible flow past oscillating aerfoils.

**MECH 539 Computational Aerodynamics.**

**MECH 541 Kinematic Synthesis.**
(3) (3-0-6) (Prerequisite: MECH 309 or MATH 317 or permission of the instructor.) The role of kinematic synthesis within the design process. Degree of freedom. Kinematic groups and bonds. Groups and subgroups of displacements. Applications to the qualitative synthesis of parallel-kinematics machines with three and four degrees of freedom. Function, motion and path generation problems in planar, spherical and spatial four-bar linkages. Extensions to six-bar linkages. Cam mechanisms.

**MECH 542 Spacecraft Dynamics.**
(3) (3-0-6) (Prerequisite (Undergraduate): MECH 220, MECH 412 or MECH 419) Review of central force motion; Hohmann and other coplanar transfers, rotation of the orbital plane, patched conic method. Orbital perturbations due to the earth's oblateness, solar-lunar attraction, solar radiation pressure and atmospheric drag. Attitude dynamics of a rigid spacecraft; attitude stabilization and control; attitude manoeuvres; large space structures.

**MECH 543 Design with Composite Materials.**

**MECH 544 Processing of Composite Materials.**
(3) (3-0-6) (Prerequisite: MECH 530 or permission of instructor.) (Restriction: This course requires the use of a finite element software, so experience with finite elements is recommended.) Composite processing science basic principles. Reinforcement properties; permeability, compaction. Resin properties; curing, viscosity, shrinkage. Heat transfer and cure kinetics; cure cycle optimization. Resin flow; infusion, thickness variations, fiber volume fraction distribution. Residual stresses; tool-part interaction, warpage control, spring-back, tool design. Thermoplastic composites: crystallization control, melting and consolidation.

**MECH 545 Advanced Stress Analysis.**

**MECH 546 Finite Element Methods in Solid Mechanics.**
(3) (3-0-6) (Prerequisites: MECH 315 or MECH 419, and MECH 321, or Instructor's permission.) (Restriction: Not open to students who have taken MECH 645.) Discrete systems; variational formulation and approximation for continuous systems; direct and variational methods of element formulation in 1-2-3 dimensions; formulation of isoparametric finite elements; plate and shell elements; finite element method for static analysis, vibration analysis and structural dynamics; introduction to nonlinear problems.

**MECH 553 Design and Manufacture of Microdevices.**

**MECH 554 Microprocessors for Mechanical Systems.**
(3) (2-3-4) (Prerequisite (Undergraduate): MECH 383 and COMP 208) Digital logic and circuits - asynchronous and synchronous design. Microcontroller architectures, organization and programming - assembly and high-level. Analog/digital/hybrid sensors and actuators. Sensing and conditioning subsystems. Interfacing issues. Real-time issues. Operator interfaces. Laboratory exercises on digital logic design, interfacing and control of peripherals with a final team project.

**MECH 557 Mechatronic Design.**
(3) (3-1-5) (Prerequisite (Undergraduate): ECSE 461, MECH 383 and (MECH 412 or MECH 419)) Team project course on the design, modelling, model validation, and control of complete mechatronic systems, constructed with modern sensors, actuators, real-time operating systems, embedded controllers, and intelligent control.

**MECH 561 Biomechanics of Musculoskeletal Systems.**
(3) (3-0-6) (Prerequisite (Undergraduate): MECH 521 and (MECH 315 or MECH 419)) The musculoskeletal system; general characteristics and classification of tissues and joints. Biomechanics and clinical problems in orthopaedics. Modelling and force analysis of musculoskeletal systems. Passive and active kinematics. Load-deformation properties of passive connective tissue, passive and stimulated muscle response. Experimental approaches, case studies.

**MECH 562 Advanced Fluid Mechanics.**
(3) (3-0-6) (Prerequisite: MATH 271 or permission of instructor.) Conservation laws, control volume analysis. Navier Stokes equations, dimensional analysis and limiting forms of N-S equation, laminar viscous flows, boundary layer theory, inviscid potential flows, lift and drag, introduction to turbulence.
MECH 563 Biofluids and Cardiovascular Mechanics.
(3) (3-0-6) (Prerequisites: CHEE 314 or MECH 331 (or permission of instructor).) (Restriction: Not open to students who have taken CHEE 563.) Basic principles of blood circulation including vascular fluid and solid mechanics, modeling techniques, clinical and experimental methods and the design of cardiovascular devices.

MECH 565 Fluid Flow and Heat Transfer Equipment.
(3) (3-1-5) (Prerequisite (Undergraduate): MECH 240, MECH 309 or MATH 317, MECH 331, MECH 341 or MECH 346 or permission of the instructor.) Pipes and piping systems, pumps, and valves. Fans and building air distribution systems. Basic thermal design methods for fins and heat exchangers. Thermal design of shell-and-tube and compact heat exchangers.

MECH 566 Fluid-Structure Interactions.
(3) (3-0-6) (Prerequisite: MECH 515 or MECH 419 or equivalent.) Pipes and cylindrical shells containing flow: fundamentals and applications in ocean mining, Coriolis mass-flow meters, heat exchangers, nuclear reactors and aircraft engines; chaos. Cyclinders in axial flow and in cross-flow; vortex-shedding and galloping. Cylinder arrays in cross-flow; fluidelastic instabilities. Ovaling of chimneys.

MECH 572 Introduction to Robotics.
(3) (3-0-6) (Prerequisite (Undergraduate): MATH 266 or MATH 271) and MECH 220 or permission of the instructor.) (Restriction: Not open to students who have taken MECH 573) Overview of the field of robotics. Kinematics, statics, singularity analysis and workspace of serial robots with decoupled architecture. Direct and inverse kinematics and dynamics. Algorithms for manipulator kinematics and dynamics.

MECH 573 Mechanics of Robotic Systems.
(3) (3-0-6) (Prerequisite: MECH 309 or MATH 317, and MECH 572 or permission of the instructor.) (Since the course is open to both undergraduate and graduate students, the minimum passing mark for graduate students, this minimum mark will be relaxed for undergraduates. The regulations applicable to undergraduates will apply accordingly.) Manipulator performance and design. Pick-and-place and continuous-path operations. Computation of rigid-body angular velocity and acceleration from point-data measurements. Inverse kinematics of serial manipulators with coupled architectures; kinetostatics of multifingered hands and walking machines. Kinematics and dynamics of parallel manipulators and wheeled mobile robots.

(3) (2-3-4) (Prerequisite (Undergraduate): MATH 266 or MATH 271) and (MECH 309 or MATH 317) and (MECH 289 or MECH 290 or MECH 291) or permission of the instructor.) Review of pertinent linear algebra and projective geometry. Explicit, implicit and parametric polynomial forms. Splines; curves and surfaces. Properties: curvature, twist, continuity. Ruled surfaces and other quad patches. Constructive solid models; Octree/Voxel, sweep wire frame, Boolean, boundary representation. Mechanical Engineering applications.

MECH 577 Optimum Design.
(3) (2-3-4) (Prerequisite: MECH 309 or MATH 317 or permission of the instructor.) The role of optimization within the design process: Design methodology and philosophy. Constrained optimization: The Kuhn-Tucker conditions. Techniques of linear and non-linear programming. The simplex and the complex methods. Sensitivity of the design to manufacturing errors. Robustness of the design to manufacturing and operation errors.

MECH 578 Advanced Thermodynamics.
(3) (3-0-6) Review of classical mechanics; Boltzmann statistics, thermodynamics of ideal gases; Fermi-Dirac and Bose-Einstein statistics, Gibbssian ensembles; elementary kinetic theory of transport processes, Boltzmann equation, Boltzmann H-theorem and entropy, KBG approximation, discussion on the solution of Boltzmann equation; Maxwell transport equations, derivation of Navier Stokes equations.

MECH 593 Design Theory and Methodology.
(3) (3-0-6) (Prerequisite: Permission of instructor.) The overall design process is scrutinized within a discipline-independent framework. The nature of design as a creative engineering activity. The polarity of design. The role of knowledge in design. Design representation. History of design and design schools. Design trends in the 21st century. Design engineering schools. Design models.

MIME-Mining, Metals, Materials Engr
Offered by: Mining, Metals & Materials Engr

MIME 200 Introduction to the Minerals Industry.
(3) (3-3-3) Economic importance of the minerals industry. Mining: legislation, regulations, criteria for exploiting an ore: mining methods, equipment. Extractive metallurgy: mineral processing, hydrometallurgy, pyrometallurgy. Environmental protection.

MIME 202 Engineering Communication Skills.
(2) (1-2-3) Basic forms of engineering communication: memoranda, executive summaries, letters, presentations, evaluations, oral presentations and presentation graphics, email, groupware, workflow, internet, graphics and presentation tools. Adaptation into engineering. Short assignments and oral presentations.

MIME 203 Mine Surveying.
(2) (3-3-0) (Prerequisite: MIME 200 or permission of instructor) Introduction to surveying. Definitions & mathematics. Measurement of levels, angles and distances. Fundamentals of control surveying. Underground mine surveying. GPS and laser applications.

MIME 209 Mathematical Applications.
(3) (3-2-4) Introduction to stochastic modelling of mining and metallurgical engineering processes. Description and analysis of data distributions observed in mineral engineering applications. Modelling with linear regression analysis. Taylor series application to error and uncertainty propagation. Metallurgical mass balance adjustments.

MIME 212 Engineering Thermodynamics.

MIME 221 Engineering Professional Practice.

MIME 250 Introduction to Extractive Metallurgy.
(3) (3-2-4) (Corequisite: MIME 202.) Introduction to physical, hydrochemical, electrochemical and thermochemical processing in the production of metals and materials.
MIME 260 Materials Science and Engineering.
(3) (2-2-5) Structure properties and fabrication of metals, polymers, ceramics, composites; engineering properties: tensile, fracture, creep, oxidation, corrosion, friction, wear; fabrication and joining methods; principles of materials selection.

MIME 261 Structure of Materials.
(3) (3-2-4) Classification of materials, electrons in atoms, molecules and solids, bonding in solids, elements of crystallography, common crystal structures, atoms positions, directions and planes in crystal structures, defects in crystalline solids, point defects, dislocations, structure of polycrystalline materials, grains, grain boundaries, non-crystalline solids.

MIME 262 Properties of Materials in Electrical Engineering.
(3) (3-1-5) (Restriction: Not open to students who have taken or are taking ECSE 212.) Properties of a material continuum and crystalline state; properties of atoms in materials; conduction electrons in materials; electronic properties of semiconductors and metals; magnetic and thermal properties of materials; applications of electronic materials in semiconductor technology, recording media and transducers.

MIME 280 Industrial Training 1.
(2) (Prerequisites: MIME 202. Department permission required. Must also have obtained a minimum of 40 credits of the core program.) Four-month training period in a materials engineering industrial or research environment.

MIME 290 Industrial Work Period 1.
(2) (Prerequisites: MIME 200 or MIME 203) A four-month work period in the mineral industry, to expose the student to an industrial environment. Candidates will receive basic industrial training. A complete report must be submitted at the end of the term.

MIME 291 Industrial Work Period 2.
(2) (Prerequisite: MIME 290) A four-month industrial work period in a mining company, research laboratory or government agency. The student will receive formal industrial training in a technical position. A complete report must be submitted at the end of the term.

MIME 308 Social Impact of Technology.
(3) (3-0-6) (Enrolment encouraged by students outside the Faculty of Engineering) Critical examination of the socio-economic costs and benefits of technology, case studies of old engineering works and new technologies. The integration of applied ethics and engineering practice, analysis of basic concepts of technology assessment, the inter-connected processes of risk assessment, management, and communication.

MIME 310 Engineering Economy.
(3) (3-1-5) Introduction to the basic concepts required for the economic assessment of engineering projects. Topics include: accounting methods, marginal analysis, cash flow and time value of money, taxation and depreciation, discounted cash flow analysis techniques, cost of capital, inflation, sensitivity and risk analysis, analysis of R and D, ongoing as well as new investment opportunities.

MIME 311 Modelling and Automatic Control.
(3) (3-2-4) (Prerequisite: MIME 356) Mass and energy conservation laws. Dynamic versus steady state models, dynamic behaviour of first and higher order metallurgical systems, linear and nonlinear models, interacting and noninteracting systems. Laplace domain dynamics and transfer functions. Feedback control, control valves and controllers, transducers. Feedback-feedforward control, introduction to cascade, adaptive and statistical control strategies. Digital computer control, instruments and interfaces.

MIME 313 Mining Science and Technology Seminar.
(1) (1-0-2) (Prerequisites: MIME 322 and MIME 333.) Review of mining-related technological advances in fragmentation, materials handling, processing, ventilation and ground control.

MIME 317 Analytical and Characterization Techniques.
(3) (2-3-4) (Prerequisite: MIME 261) Bulk, surface and microanalytical techniques for materials characterization. Bulk analysis: spectrophotometry using UV, visible, flame and atomic absorption, x-ray diffraction and x-ray fluorescence. Surface and microanalysis: infrared spectroscopy, scanning and transmission electron microscopy, Auger electron and x-ray photoelectron spectroscopy.

MIME 320 Extraction of Energy Resources.
(3) (3-0-6) The extraction of energy resources, i.e. coal, gas, oil and tar sands. After a brief geological review, different extraction techniques for these substances will be discussed. Emphasis on problems such as northern mining and offshore oil extraction with reference to Canadian operations. Transportation and marketing.

MIME 322 Rock Fragmentation.

MIME 323 Rock and Soil Mass Characterization.
(3) (3-3-3) (Prerequisite (Undergraduate): EPSC 221 and MIME 200) Characteristics of soil and rock masses and the stability of mine workings. Mechanical properties of rocks and soils related to physical/chemical properties. Characterization of rock mass discontinuities. Laboratory and in-situ techniques to define mechanical properties of soils, rocks and discontinuities. Permeability and groundwater flow principles. In-situ stresses and their measurement. Rock mass quality and classification systems.

MIME 325 Mineral Industry Economics.
(3) (3-2-4) (Prerequisite: MIME 310) Geographical distribution of mineral resources. Production, consumption and prices of minerals. Market structure of selected minerals. Economic evaluation aspects: grade-tonnage considerations; capital and operating cost estimation; assessment of market conditions; estimation of revenue; taxation; sensitivity and risk analyses; economic optimization of mine development and extraction.

MIME 333 Materials Handling.
(3) (3-3-3) (Prerequisite: MIME 200) Physical and mechanical characteristics of materials related to loading, transport and storage. Dynamics of particles, systems and rigid bodies, mass-acceleration, work-energy, impulse-momentum. Types and selection of excavation and handling equipment. Layout of haul roads. Rail transport. Conveyor belts and chain conveyors. Mine hoists. Layout of mine shafts.

MIME 337 Electrotechnology.
(2) (3-1-2) Emphasize role of electrical equipment in the mining, metals and materials industry sectors. Operating theory and technical standards of prime electrical equipment, transformers, motors, generators, rectifiers, variable speed drives, circuit breakers, starters. DC and AC theory for circuit components, resistance, capacitance, inductance and impedance. Distribution system single line diagrams.

MIME 340 Applied Fluid Dynamics.

MIME 341 Introduction to Mineral Processing.
(3) (2-3-4) (Prerequisite (Undergraduate): MIME 200 or MIME 250) Theory and practice of unit operations including: size reduction-crushing and grinding; size separation-screening and classification; mineral separation-flotation, magnetic and gravity separation. Equipment and circuit design and selection.
Mass balancing. Laboratory procedures: grindability, liberation, magnetic and gravity separation, flotation and solid-liquid separation.

**MIME 345 Applications of Polymers.**
(3) (3-3-3) (Prerequisite: MIME 261 or permission of instructor.) Applications of synthetic and natural polymers and composites as engineering materials e.g. in biomedical, automotive and aerospace applications. Thermoplastics, thermosets and elastomers. Animal and plant origin, degradable and non-degradable polymers. Particulate and fibre reinforced polymer matrix composites. Manufacturing routes, and characterization tools for their physical, thermal, mechanical and chemical properties.

**MIME 350 Extractive Metallurgical Engineering.**
(3) (2-3-4) (Prerequisites: MIME 200 or MIME 250, MIME 212) Principle non-ferrous base-metal pyrometallurgical extraction processes, relevant thermodynamics, heat and mass balances, transport phenomena (copper, nickel, lead, zinc, aluminum, magnesium). Ores, gangue, fuels, slags, fluxes, recovery, refining, minor elements, byproducts and the environment. Roasting, drying, smelting, converting, reverberatory furnaces, flash furnaces, continuous and batch operations, injection practices and oxygen enrichment. Simulation, modelling, control and optimization.

**MIME 352 Hydrochemical Processing.**
(3) (3-2-4) (Prerequisites: CHEM 233, MIME 212, MIME 200 or MIME 250) (Corequisite: MIME 356) Analysis and description of dissolution (leaching), solute separation (solvent extraction, ion exchange, carbon adsorption) and deposition operations (precipitation, crystallization, electrolysis) in aqueous reaction media as these apply to: (i) the hydrometallurgical extraction of metals from primary/secondary sources; (ii) the treatment of effluents and (iii) the production of inorganic materials.

**MIME 356 Heat, Mass and Fluid Flow.**

**MIME 360 Phase Transformations: Solids.**
(3) (2-3-4) (Pre/Corequisite:MIME 212,) (Prerequisite: MIME 260 or MIME 261.) Free energy (equilibrium) and kinetic (non-equilibrium) considerations, phase diagrams and TTT diagrams, solid state diffusion, diffusion (nucleation and growth) and shear (martensitic) transformations.

**MIME 362 Mechanical Properties.**

**MIME 367 Electronic Properties of Materials.**
(3) (3-3-3) (Prerequisite: MIME 261) Structure of materials, electronic structure, electrical and thermal conductivity, semiconducting materials, fundamentals of magnetism, hard and soft magnetic materials, superconductivity and superconductive materials, dielectric materials, optical properties of materials, thermoelectricity. Advanced materials and their technological applications.

**MIME 380 Industrial Training 2.**
(2) (Prerequisite: MIME 280) 2 Four-month work period in industry. Work term report required upon completion.

**MIME 392 Industrial Work Period 3.**
(2) (Prerequisite: 75 credits including MIME 291) A four-month industrial work period in a mining company, research laboratory or government agency. Based on the experience gained during the first two work periods, the student may be asked to undertake more challenging technical tasks. A complete report must be submitted at the end of the term.

**MIME 410 Research Project.**
(3) (0-6-3) (Prerequisite: Recommendation of Instructor) A research project will be carried out, usually in groups, under the guidance of a staff member. A technical report will be prepared at the end and a formal presentation will be made on the research topic.

**MIME 412 Corrosion and Degradation.**
(3) (2-3-4) (Prerequisites: MIME 261; MIME 352) Electrochemical principles of metal oxidation in aqueous environments. Use of polarization diagrams for corrosion rate prediction. Characteristics of stress corrosion and related phenomena. High temperature, non-aqueous degradation; growth kinetics and structure of oxide films. Corrosion prevention in aqueous systems; fundamentals and applications of cathodic and anodic protection, inhibitors, metallic coatings and industrial priming paints. Use of non-metallics and their degradation; glasses, cement, plastics. Corrosion as a factor in selection of materials; use of iso-corrosion charts.

**MIME 419 Surface Mining.**

**MIME 420 Feasibility Study.**
(3) (1-2-6) (Prerequisite: Undergraduate): MIME 333, MIME 419, MPMC 421) This course consists of a case study exercise in the application of the specialist skills which the student has developed in the mining engineering program. The objective is to combine these skills in carrying out a professional appraisal of the technical feasibility and economic viability of developing a mineral deposit. Students are required to prepare a professional level report and present seminars on particular aspects of the feasibility analysis.

**MIME 422 Mine Ventilation.**
(3) (3-3-3) (Prerequisite: MIME 340.) (Restriction: Not open to students who have taken MPMC 422.) Statutory regulations and engineering design criteria. Occupational health hazards of mine gasses, dusts, etc. Ventilation system design. Natural and mechanical ventilation. Measuring and modelling air flow in ventilation networks. Calculation of head losses. Selection of mine ventilation fans. Air heating and cooling. Aspects of economics.

**MIME 426 Development and Services.**
(3) (3-3-3) (Prerequisite (Undergraduate): MIME 324 and MIME 333) Selection and design of the facilities required to start production at both surface and underground mines, based on design criteria dictated by mining plans, geography, geology and government regulations. Scheduling of development and construction. Staffing and health and safety considerations during development, construction and operations.
MIME 442 Modelling and Control: Mineral Processing.
(3) (3-3-3) (Prerequisite: MIME 341) Basic kinetic modelling: perfect mixers, plug-flow, zero and first-order kinetics, residence time distributions. Breakage and selection functions. Overview of the modelling of flotation and gravity separation. Introduction to control: economic incentives, basic PI control, applications to grinding and flotation circuits.

MIME 452 Process and Materials Design.
(4) (4-2-6) Design of new metallurgical plants, processes, materials and products based on 3 previous core courses; materials and heat balances, metal economics, design and optimization; materials selection, design and failure problems in various materials systems.

MIME 455 Advanced Process Engineering.

MIME 456 Steelmaking and Steel Processing.
(3) (2-2-5) (Prerequisite: MIME 360. Pre/corequisite: MIME 455) The production and refining of liquid iron in the iron blast furnace, the production and refining of liquid steel, secondary refining operations, continuous casting and thermomechanical processing (hot rolling). Specialty steels and newly emerging technologies (e.g. thin slab casting, direct ironmaking) are also discussed in terms of process/environment and productivity. "Downstream" topics include cold rolling, batch and continuous annealing, and coating operations.

MIME 465 Ceramic Engineering.

MIME 480 Industrial Training 3.
(2) (See details listed under MIME 481) (Prerequisite: MIME 380) Four-month work period in industry. Work term report due upon completion of MIME 481.

MIME 481 Industrial Training 4.
(2) (Prerequisite: MIME 480) Four-month work period in industry. This course is intended to be taken immediately after MIME 480 and 481. One work term report and one seminar are required upon completion of this course. If MIME 480 and MIME 481 are in different work locations, the work term report should be in two parts following the co-op handbook guidelines.

MIME 484 Mining Project.
(3) (0-0-9) (Corequisites: MIME 419, MIME 426, MPMC 328 and MPMC 421) A mining research project to be completed during one semester. The project must be approved by an academic advisor. A comprehensive report and a seminar presentation are required for the project.

MIME 494 Industrial Work Period 4.
(2) (Prerequisites: MIME 419, MIME 426, MPMC 328 and MPMC 421) A four-month industrial work period after which the student must submit a report.

MIME 512 Corrosion and Degradation of Materials.
(3) (3-3-3) (Prerequisites: MIME 261 and MIME 352 or permission of instructor.) (Restriction: Not open to students who have taken MIME 412.) Electrochemical theory of metal corrosion, Evans Diagrams, corrosion rate controlling mechanisms, mixed corrodents, alloying effects, passivation. Discussion and analysis of the various forms of corrosion. Corrosion prevention methods. Oxidation of alloys—mechanisms and kinetics. Degradation of ceramics and polymers. Case studies.

MIME 513 Mine Planning Optimization Under Uncertainty.
(3) (3-3-3) (Prerequisite: Permission of instructor.) Strategic mine planning and optimization under uncertain demand and supply. Modern optimization techniques in mine design and production scheduling. Metal supply and orebody modelling. Market forecasting and planning with flexibility. Valuing information. Stochastic mine optimization and applications in open pit and underground metal mines.

MIME 520 Stability of Rock Slopes.
(3) (3-0-6) (Prerequisite: permission of instructor.) The properties of rock masses and of structural discontinuities. Influence of geological structure on stability. Linear, non-linear, and wedge failures. Site investigations. Methods of slope stabilization.

MIME 521 Stability of Underground Openings.
(3) (3-3-3) (Prerequisite: permission of instructor) The properties of rock masses and stability classification systems. The influence and properties of geological structural features. Stability related to the design of underground openings and mining systems. Site investigations. Methods of stabilization.

MIME 525 Stochastic Orebody Modelling.
(3) (3-2-5) (Prerequisite: MIME 310 or equivalent) Mineral project evaluation techniques and applications. Topics covered include grade-tonnage relationships, capital and operating cost estimation techniques, assessment of mineral market conditions, taxation, discounted cash flow analysis, risk analysis, and optimization of project specifications with respect to capacity and cutoff grade.

MIME 526 Mineral Economics.
(3) (3-2-5) (Prerequisite: MIME 426) System analysis and design in the frequency domain. Review of optimization methods. Mining system modelling applied to rock cutting, materials transport, and bunkerage, pitch, yaw and roll steering of mining machines. Control and robotics: digitization, discrete systems, sensors, actuators and real time algorithms. Data communication in mines. Simulation exercises.

(3) (2-3-4) (Prerequisite (Undergraduate): MIME 341) The course covers three main topics: principles of separation, including data presentation, properties of recovery/ yield plots, technical and economic efficiency and identification of limits to separation; column flotation, hydrodynamics of collection and froth zones, mixing, scale-up and design, measurements and control; surface and electrochemistry, including absorption, surface charge, coagulation, electron transfer reactions, electrochemistry in plant practice.

(3) (4-2-3) (Prerequisite: Undergraduate): MIME 341) Gold recovery (as a Professional Development Seminar): methods of recovery (gravity, flotation, cyanidation), refractory gold (roasting, pressure oxidation, bacterial leaching), dissolved gold recovery (Merrill-Crowe) and activated carbon methods. Sampling: definition of errors, sample extraction, size, and processing. Mass balancing: basic considerations, definition of networks, software. Blending: auto-correlation functions, transfer functions, blending systems. Effect of feed variability.

MIME 551 Electrochemical Processing.
(3) (3-2-4) (Prerequisite: MIME 352) Characterization of aqueous, fused salt and molten metal electrolytes; labors of electrolysis; ion transport mechanisms; interfacial phenomena (electrolyte-electrolyte, electrode-electrolyte); reversible cells and potentials; electrode kinetics, overpotential and potential-current laws; industrial applications; electrolytic winning and refining, electroplating, surface cleaning and coating, electrodialysis and electrochemical sensors.
MPMC-McGill/Poly Mining Coop
Offered by: Mining, Metals & Materials Engr

MPMC 320 CAO et informatique pour les mines.
(3) (2-3-4) Présentation de techniques informatisées et de logiciels permettant d'apporter l'informatique dans le cadre des diverses opérations liées à l'exploitation des mines. Utilisation de logiciels de support: chiffrer électronique, traitement de texte, éditeur graphique, utilitaires de DOS. Utilisation de graphisme, de traceurs à plumes, de tablettes numérisantes, d'interfaces pour capteurs analogique/numérique et numérique/analogue. Notions de géométrie descriptive appliquées à des problèmes miniers.

MPMC 321 Mécanique des roches et contrôle des terrains.

MPMC 326 Recherche opérationnelle I.

MPMC 328 Environnement et gestion des rejets miniers.
(3) (3-3-3) (Prérequis: MIME 200 et MIME 291) Effets du milieu de travail sur l’homme (hygiène du travail); législation; contraintes thermiques, problèmes de bruit, de contaminants gazeux et de poussières; techniques de mesures. Effets de l’exploitation d’une mine sur le milieu (environnement et écologie); législation; études d’impacts; effluents miniers: origine, nature et traitement des effluents; entreposage des résidus; restauration des sites.

MPMC 329 Géologie minière.
(2) (2-2-2) (Prérequis: EPSC 221, MIME 200 et MIME 209) Méthodes de cartographie minière, de sondages et d’échantillonnage. Notion de teneur de coupeure, calcul des réserves par les méthodes conventionnelles. Évaluation des réserves par les méthodes géostatistiques.

MPMC 330 Géotechnique minière.
(3) (3-3-3) (Prérequis: MIME 323) Propriétés mécaniques des matériaux meubles. Conception d’emplacements et de digues de rétention pour les matériaux miniers. Conception de structures enfouies. Problèmes particuliers avec les résidus miniers: liquéfaction, déposition, etc. Écoulement gravitaire des matériaux meubles.

MPMC 421 Exploitation en souterrain.

URBP-Urban Planning
Offered by: Urban Planning

URBP 201 Planning the 21st Century City.
(3) (3-1-5) The study of how urban planners respond to the challenges posed by contemporary cities world-wide. Urban problems related to the environment, shelter, transport, human health, livelihoods and governance are addressed; innovative plans to improve cities and city life are analyzed.
McGill School of Environment

ENVR-Environment

Offered by: McGill School of Environment

ENVR 202 The Global Environment.
(3) (Fall) (Section 001: Downtown Campus) (Section 051: Macdonald Campus) A systems approach to study the different components of the environment involved in global climate change: the atmosphere, biosphere, hydrosphere, and lithosphere. The interactions among these components. Their role in global climate change. The human dimension to global change.

ENVR 201 Society and Environment.
(3) (Fall) (Section 001: Downtown Campus) (Section 051: Macdonald Campus) An introduction to human societies and their relations with the biophysical environment, focusing on how economy, technology, and institutions interact to give rise to environmental problems. Analytical treatment of key concepts from distinct disciplinary perspectives in the social and life sciences, including "carrying capacity", "renewable resources", "environmental equity", and "sustainability".

ENVR 202 The Evolving Earth.
(3) (Winter) (Section 001: Downtown Campus) (Section 051: Macdonald Campus) Formation of the Earth and the evolution of life. How geological and biological change are the consequence of history, chance, and necessity acting over different scales of space and time. General principles governing the formation of modern landscapes and biotas. Effects of human activities on natural systems.

ENVR 203 Knowledge, Ethics and Environment.
(3) (Fall - Macdonald Campus; Winter - Downtown) (Section 001: Downtown Campus) (Section 051: Macdonald Campus) Introduction to intellectual perspectives on the environment: the influence of culture and cognition on perceptions of the natural world; conflicts in orders of knowledge (models, taxonomies, paradigms, theories, cosmologies), ethics (moral values, frameworks, dilemmas), and law (formal and customary, rights and obligations) regarding political dimensions of critical environments, resource use, and technologies.

ENVR 301 Environmental Research Design.
(3) (Winter) (Restrictions: Restricted to U2 or higher. Not open to students who have taken ENVR 380 in 200209 or 200301.) (Section 001: Downtown Campus) (Section 051: Macdonald Campus) Techniques used in design and completion of environmental research projects. Problem definition, data sources and use of appropriate strategies and methodologies. Principles underlying research design are emphasized, including critical thinking, recognizing causal relationships, ideologies and bias in research, and when and where to seek expertise.

ENVR 380 Topics in Environment 1.
(3) (Restriction: Normally open only to students who have completed MSE U1 core courses) Lectures and discussion of interdisciplinary aspects of current problems in environment led by staff and/or special guests. This course is offered on an irregular basis.

ENVR 396 Undergraduate Research Project.
(3) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses.) (Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects will be suggested each term which may have project-specific prerequisites. Some projects may be accessible to students in other disciplines. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.) Independent research project with a final written report.

ENVR 400 Environmental Thought.
(3) (Fall - Macdonald Campus; Fall and Winter - Downtown) (Section 001: Downtown Campus) (Section 051: Macdonald Campus) Students work in interdisciplinary seminar groups on challenging philosophical, ethical, scientific and practical issues. They will explore cutting-edge ideas and grapple with the reconciliation of environmental imperatives and social, political and economic pragmatics. Activities include meeting practitioners, attending guest lectures, following directed readings, and organizing, leading and participating in seminars.

ENVR 401 Environmental Research.
(3) (Fall) (Prerequisite: ENVR 301) (Restriction: B.A. Faculty Program in Environment, B.A.Sc Faculty Program in Environment, B.Sc.(Ag.Env.Sc.) and B.Sc. Major in Environment, and Diploma in Environment.) (Downtown Campus only) Students work in an interdisciplinary team on a real-world research project involving problem definition, methodology development, social, ethical and environmental impact assessment, execution of the study, and dissemination of results to the research community and to the people affected. Teams begin defining their projects during the preceding spring.

ENVR 451 Research in Panama.
(6) (Winter) (Restriction: students in the Panama Field Semester program. Offered in Panama only) Research projects will be developed by instructors in consultation with Panamanian universities, government agencies and non-governmental organizations. Project groups will consist of four to six students working with a Panamanian institution. Topics will be relevant to Panama: e.g., protection of the Canal watershed, economical alternatives to deforestation, etc.

ENVR 480 Topics in Environment 2.
(3) (Restriction: Normally open only to U3 MSE students) Intermediate-level seminars and discussion of interdisciplinary aspects of current problems in environment led by staff and/or special guests. This course is offered on an irregular basis.

ENVR 485 Readings in Environment 1.
(3) (Restriction: Normally open only to U3 MSE students) Interdisciplinary literature project/essays related to environment, enabling independent study under guidance of qualified MSE staff in areas outside the scope of individual departments. Proposed topic and method of evaluation must be approved by the Associate Director one month before the beginning of term. Contact the Program Coordinator for information.

ENVR 490 Independent Study in Environment.
(3) (Prerequisite: Permission of instructor.) (Restrictions: Normally open only to U3 MSE students. Proposed topic and method of evaluation must be approved by the Director one month before the beginning of term. Contact the Program Coordinator for information.) Interdisciplinary research projects related to environment, enabling independent study under guidance of qualified MSE staff in areas outside the scope of individual departments.

ENVR 491 Independent Project in Environment.
(1) (Prerequisite: Permission of instructor.) (Restrictions: Normally open only to U3 MSE students. Proposed topic and method of evaluation must be approved by the Director one month before the beginning of term. Contact the Program Coordinator for information.) Interdisciplinary research projects related to environment, enabling independent study under guidance of qualified MSE staff in areas outside the scope of individual departments.
ENVR 495D1 (3), ENVR 495D2 (3) Honours Research.
(Prerequisites: ENVR 301. Acceptance to Honours Program in Environment.) (Restrictions: For U3 B.A., B.Sc., and B.A&Sc Honours Program in Environment students. Not open to students in the BSc (AgEnvSc) Honours in Environment program.) (Students must register for both ENVR 495D1 and ENVR 495D2.) (No credit will be given for this course unless both ENVR 495D1 and ENVR 495D2 are successfully completed in consecutive terms.) Preparation of an honours thesis.

ENVR 495N1 (3), ENVR 495N2 (3) Honours Research.
(Prerequisites: ENVR 301. Acceptance to Honours Program in Environment.) (Restrictions: For U3 B.A., B.Sc., and B.A&Sc Honours Program in Environment students. Not open to students in the BSc (AgEnvSc) Honours in Environment program.) (Students must register for both ENVR 495N1 and ENVR 495N2.) (No credit will be given for this course unless both ENVR 495N1 and ENVR 495N2 are successfully completed in a twelve month period.) Preparation of an honours thesis.

(3) (Prerequisite: ENVR 301. Acceptance to Honours Program in Environment.) (Restrictions: For U3 B.Sc.(Ag.Env.Sc.) Honours Program in Environment students. Normally, credit for ENVR 496 will not be given unless ENVR 497 is completed; the courses may be evaluated together and the same mark will be given for both ENVR 496 and ENVR 497; ENVR 496 and ENVR 497 must be taken in consecutive semesters. Not open to students in the BA Honours, BSc Honours, or BA&Sc Honours programs in Environment.) Preparation of an honours thesis.

ENVR 497 Honours Research Part 2.
(3) (Prerequisite: ENVR 496. Acceptance to Honours Program in Environment.) (Restrictions: For U3 B.Sc.(Ag.Env.Sc.) Honours Program in Environment students. Normally, credit for ENVR 496 will not be given unless ENVR 497 is completed; the courses may be evaluated together and the same mark will be given for both ENVR 496 and ENVR 497; ENVR 496 and ENVR 497 must be taken in consecutive semesters. Not open to students in the BA Honours, BSc Honours, or BA&Sc Honours programs in Environment.) Continuation of the preparation of an honours thesis.

ENVR 540 Ecology of Species Invasions.
(3) (Winter) (3 hours lecture) (Prerequisite: BIOL 308 or permission of instructor.) (Restrictions: Not open to U1 or U2 students. Not open to students who are taking or have taken BIOL 540.) Causes and consequences of biological invasion, as well as risk assessment methods and management strategies for dealing with invasive species.

ENVR 580 Topics in Environment 3.
(3) (Prerequisite: Permission of instructor) Advanced-level seminars and discussion of interdisciplinary aspects of current problems in environment led by staff and/or special guests. This course is offered on an irregular basis.

ENVR 585 Readings in Environment 2.
(3) (Prerequisites: ENVR 400 and ENVR 401, or permission of instructor) Interdisciplinary literature project/essays related to environment, enabling advanced-level study under guidance of qualified MSE staff in areas outside the scope of individual departments. Proposed topic and method of evaluation must be approved by the Associate Director one month before the beginning of term. Contact the Program Coordinator for information.
Desautels Faculty of Management

ACCT-Accounting

Offered by: Management

(3) (Prerequisite: MGCR 211.) An examination of the theoretical foundation for financial reporting and revenue recognition. The tools of accounting, including a review of the accounting process and compound interest concepts. Asset recognition, measurement and disclosure. Partnership accounting.

(3) (Prerequisites: ACCT 351 and MGCR 341 or ACCT 311 and MGCR 341.) A continuation of Intermediate Financial Accounting 1. An examination of liability recognition, measurement and disclosure, including leases, pension costs and corporate income tax. Shareholders’ equity, dilutive securities and earnings per share. The statement of changes in financial position, basic financial statement analysis and full disclosure in financial reporting.

ACCT 354 Financial Statement Analysis.
(3) (Prerequisite: MGCR 211.) Interpretative nature of the conceptual framework underlying a multitude of financial reporting standards, including the impact of alternative accounting methods, management biases and stakeholder interests in the analysis and valuation of the firm.

ACCT 356 International Accounting.
(3) (Prerequisites: ACCT 351 and ACCT 361) (Restriction: Open only to Accounting Honours students) Current international issues in financial and management accounting including different reporting models and standards, the International Accounting Standards Committee, international transfer pricing and control systems in multinationals.

ACCT 361 Intermediate Management Accounting 1.
(3) (Prerequisite: MGCR 211) The role of management accounting information to support internal management decisions and to provide performance incentives.

ACCT 362 Intermediate Management Accounting 2.
(3) (Prerequisites: ACCT 361 or ACCT 313) An examination of a number of recurring issues in the area of decision-making and control, including cost allocation, alternative costing systems, and innovations in costing and performance measurement.

ACCT 385 Principles of Taxation.
(3) (Prerequisite: MGCR 211) An introduction to the concepts underlying the Canadian tax system and how they are applied in relation to the taxation of individuals and businesses.

ACCT 434 Topics in Accounting.
(3) (Restriction: Open to advanced students only) Topics will be selected from current issues in the Accounting Area.

ACCT 452 Financial Reporting Valuation.
(3) (Prerequisite: ACCT 354.) Models to determine firm value from accounting information and a broader perspective on key sources of information, key value drivers, in a setting where evaluating firm value is the ultimate purpose.

(3) (Prerequisites: ACCT 352 or ACCT 312, ACCT 362 or ACCT 415 & ACCT 385 or ACCT 412.) Reporting relevant financial information subsequent to long term intercorporate investments. The preparation of consolidated financial statements with emphasis on their economic substance rather than legal form.

ACCT 454 Financial Reporting.
(3) (Prerequisites: ACCT 352 or ACCT 312, ACCT 362 or ACCT 415 & ACCT 385 or ACCT 412.) An in-depth study of Canadian accounting standards and how Canadian corporations apply them in their financial reporting.

ACCT 455 Development of Accounting Thought.
(3) (Prerequisites: ACCT 352, ACCT 362 and ACCT 385) The conceptual underpinning of accounting thought, including its historical development and the modifications that have occurred over time. A review of accounting literature and its relevance to practice.

ACCT 463 Advanced Management Accounting.
(3) (Prerequisites: ACCT 352 or ACCT 312, ACCT 362 or ACCT 415 & ACCT 385 or ACCT 412.) The theoretical frameworks for the examination and evaluation of management accounting and control systems. The technical aspects of accounting along with behavioural issues of management control.

ACCT 471 Non-Profit Accounting.
(3) (Prerequisites: ACCT 352, ACCT 362 and ACCT 385) (Restriction: Open only to Accounting Honours students) The foundations and practices of non-profit accounting for organizations including government, volunteer, charitable, health care and educational. The framework to evaluate and understand emerging issues.

ACCT 475 Principles of Auditing.
(3) (Prerequisites: ACCT 352 or ACCT 312.) An introduction to basic auditing concepts and internal controls of an accounting system. Topics include current auditing standards, ethical conduct, legal liability, planning of an audit, sampling techniques, non-audit engagements, the study and evaluation of internal controls in an accounting system.

ACCT 476 Internal Auditing.
(3) (Prerequisites: ACCT 362, ACCT 385 and ACCT 475) The modern internal audit approach including operational and management audit practices within the internal audit framework. Topics include objectives of an internal audit, communication by internal auditors, planning audit projects, audit of EDP systems, audit testing, operational areas.

ACCT 477 External Auditing.
(3) (Prerequisites: ACCT 362, ACCT 385 and ACCT 475) The theory of auditing financial statements and the various complexities encountered in these audit environments. A thorough study of auditing standards, ethical conduct, communication by auditors, auditing in an EDP environment, audit of a small business, other reports and services provided by auditors and public accountants.

ACCT 486 Business Taxation 2.
(3) (Prerequisite: ACCT 385.) A study of the Income Tax Act as it applies to the taxation of individuals and corporations, including capital cost allowances, capital gains, corporate reorganisations, trusts and partnerships and administrative regulations. A review of a consumption taxes.

BUSA-Business Admin

Offered by: Management

BUSA 364 Business Law 1.
(3) (Restriction: This course cannot be double-counted from the Certificate in Management.) An introduction to the legal system and basic legal principles affecting business. Tort negligence, contracts, forms of business organization, creditors’ rights and bankruptcy.

BUSA 368 Business Law 2.
(3) (Prerequisite: BUSA 364) An outline of the application of law to professional negligence, product liability, competition, corporate governance and employment. Review of particular contracts; sale, agency, mortgages, lease, insurance.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
Denotes courses taught only in alternate years.
Denotes courses not available as Education electives.
Denotes courses with limited enrolment.

C-143
2007-2008 Undergraduate Programs Calendar, McGill University (MANAGEMENT) BUSA-BUSINESS ADMIN
**BUSA 391 International Business Law.**
(3) (Prerequisite: MGCR 382) Introduction to the legal aspects of foreign trade and investment transactions. Forms and documentation of types of foreign trade contracts. Conflict avoidance, arbitration, and litigation arising from international transactions. Government regulation of foreign trade. Legal aspects of the international transfer of investments and technology. Conventions and institutions of international economic cooperation (e.g. GATT, ICC, IMF, etc.).

**BUSA 395 European Economy and Business.**
(3) (Prerequisite: MGCR 382) An overview of current social, economic and trade developments in the rapidly-evolving European arena. Focus on both the integrating economies of the EU and the emerging market economies and central and eastern Europe. Emphasis on the expanded opportunities and the challenges facing international managers.

**BUSA 399 Internship Project.**
(1) Upon completion of the internship, students must submit a paper on the integration of the applied and academic aspects of their BCom courses and the Internship experience.

**BUSA 400 Independent Studies in Management.**
(3) (Prerequisite: U3 students only. CGPA of at least 3.00 required.) Research reading or field projects, permitting independent study under the guidance of a Faculty member. Projects to be arranged individually with instructors. A detailed student proposal must be submitted to the instructor and the Director during the first week of term.

**BUSA 462 Management of New Enterprises.**
(3) (Prerequisite: MGCR 341) Evaluation of new business ventures, recognition and treatment of associated risks. Detailed consideration is given to sources of risk funds in the form of venture capital, public, private and government programs. Emphasis on the critical importance of the entrepreneur, the demands and the risks faced as well as the rewards and satisfactions.

**BUSA 464 Management of Small Enterprises.**
(3) (Prerequisite: MGCR 341) The distinctive characteristics, risks, opportunities and rewards inherent in the ownership and management of a small enterprise. It will assist students in judging the appropriateness of an entrepreneurial career and in selecting and timing a specific venture.

**BUSA 465 Technological Entrepreneurship.**
(3) (Prerequisite: MIME 310 or MGCR 341) Concentrating on entrepreneurship and enterprise development, particular attention is given to the start-up, purchasing and management of small to medium-sized industrial firms in an environment that would appeal to Engineering students. The focal point is in understanding the dilemmas faced by entrepreneurs, resolving them, developing a business plan and the maximum utilization of the financial, marketing and human resources that make for a successful operation.

**BUSA 466 Technological Entrepreneurship Project.**
(3) (Restriction: students registered in Minor in Technological Entrepreneurship program) (Prerequisite: 12 credits in the MTE program and BUSA 465) Project involving a small to medium company in the high technology field.

**BUSA 481 North America: Global Markets.**
(3) (Restriction: U2 and U3 students.) (Prerequisite: MGCR 382 or permission of instructor) Analysis of corporate strategies in the Canada-United States context. Emphasis on public policy impact of corporate decision-making and implications of alternative public policy options. Bilateral experience by major industrial sectors examined and compared with global corporate strategies. Theoretical and empirical literature combined with industrial histories and policy case studies.

**BUSA 493 Global Economic Competitiveness.**
(3) (Prerequisite: MGCR 382.) How nations achieve and maintain competitiveness in the rapidly globalizing world economy. Studies the stages of evolution of world competitiveness in 46 nations, incorporating incorporating the latest practical business theories and case studies on the dynamics of effective globalization ventures.

**BUSA 499 Case Analysis and Presentation.**
(3) (Prerequisite: BCom Core and 3.0 CGPA or better.) Integration of core knowledge and practice for preparing and presenting case studies, including professor coaching, preparation and presentation feedback, presentation skills, leadership skills, team building skills, analytical skills, logical thinking, debating, persuasive communications and cross discipline work.

**FINE-Finance**
Offered by: Management

**FINE 342 Finance 2.**
(3) (Restriction: For Finance Concentration/Major/Honours) (Prerequisite: MGCR 341) (Restriction: Only one of FINE 342 or FINE 343 can be counted for credit) A second course in Finance for students pursuing the Finance Concentration. In depth study of corporate finance, risk, diversification, portfolio analysis, and capital market theory.

**FINE 434 Topics in Finance.**
(3) Topics will be selected from current issues in the Finance Area.

**FINE 441 Investments and Portfolio Management.**
(3) (Prerequisites: FINE 342, MGSC 272 (formerly MGCR 272).) Application of investment principles and security analysis to the selection and comparison of equity and fixed income securities in the current economic and financial environment. Also covered are: determinants of stock prices, growth models and portfolio diversification.

**FINE 442 Capital Markets and Institutions.**
(3) (Prerequisite: MGCR 341) (Restriction: Only one of FINE 442 or ECON 302 can be counted for credit.) Functions of the capital market through flow of funds analysis and an examination of portfolio activities of financial intermediaries. Also covered are: securities regulations and ethical considerations, the term structure of interest rates and risk and rates of return in debt and equity markets.

**FINE 443 Applied Corporate Finance.**
(3) (Prerequisite: FINE 342) Concepts and techniques are applied to problems faced by managers in Corporate Finance, such as working capital management, capital budgeting, capital structure, dividend policy, cost of capital, and mergers and acquisition. Application of theory and techniques through case studies.

**FINE 444 Risk Management and Insurance.**
(3) (Prerequisite: MGCR 341) Risk exposures of the individual and the firm. A wide variety of techniques for reducing risk exposure are studied including Life, Property and Casualty Insurance. In addition, the course treats the problems faced by insurers such as re-insurance and investment policy.

**FINE 445 Real Estate Finance.**
(3) (Prerequisite: MGCR 341) Fundamentals of mortgages from the viewpoint of both consumer and the firm. Emphasis on legal, mathematical and financial structure, provides a micro basis for analysis of the functions and performance of the mortgage market, in conjunction with the housing market. A weekly series of one-hour tutorials are mandatory for the first six weeks of class.

**FINE 448 Derivatives and Risk Management.**
(3) (Prerequisites: FINE 342 and FINE 441 or consent of instructor) The course will concentrate on both the analytical and practical aspects of investments in options and futures. The first part of the course concentrates on option and futures valuation, considering both discrete and continuous time models. The second part of the course concentrates on the practical aspects of options and futures trading.

**FINE 449 Market Risk Models.**
(3) (Prerequisite: FINE 448) Dynamic market risk models including GARCH volatility models, dynamic conditional correlation models, non-normal return distributions, option pricing allowing for skewness and kurtosis, and option risk management using, delta, delta-gamma and full-valuation.
FINE 451 Fixed Income Analysis.
(3) (Prerequisite: FINE 441.) Fixed income financial instruments and their uses for both financial engineering and risk management (at the trading desk and aggregate firm level). This will involve coverage of fixed income mathematics, risk management concepts, term structure modeling, derivatives valuation and credit risk analysis.

FINE 480 Global Investments.
(3) (Prerequisite: FINE 441, FINE 482, or consent of instructor) The theoretical foundations of international investments theory and empirical evidence in a real world setting. This course will focus on portfolio investment decisions of investment banks. It will span the Developed Markets (DMs) of Europe and Japan, Newly Industrialized Nations (NICs) of the Pacific rim, Emerging Markets (EMs) of Asia, Latin America, Eastern Europe and Africa.

FINE 482 International Finance 1.
(3) (Prerequisite: FINE 342) The international financial environment as it affects the multinational manager. Balance of payments concepts, adjustment process of the external imbalances and the international monetary system. In depth study of the institutional and theoretical aspects of foreign exchange markets; International capital markets, including Eurobonds and eurocurrency markets.

FINE 492 International Finance 2.
(3) (Prerequisite: FINE 482) Focus on the operational problems of financial management in the multinational enterprise: Financing of international trade, international capital budgeting, multinational cost of capital, working capital management; International banking and recent developments in international capital markets.

FINE 541 Applied Investments.
(3) (Prerequisite (Undergraduate): FINE 441. U3 students only) (Prerequisite (Graduate): Permission of the instructor.) Students are exposed to practical aspects of managing investment portfolios. A principal activity of students is participation in the management of a substantial investment fund.

FINE 541D1 (1.5), FINE 541D2 (1.5) Applied Investments.
(Prerequisite (Undergraduate): FINE 441. U3 students only) (Prerequisite (Graduate): Permission of the instructor.) (Students must register for both FINE 541D1 and FINE 541D2.) (No credit will be given for this course unless both FINE 541D1 and FINE 541D2 are successfully completed in consecutive terms) (FINE 541D1 and FINE 541D2 together are equivalent to FINE 541) Students are exposed to practical aspects of managing investment portfolios. A principal activity of students is participation in the management of a substantial investment fund.

FINE 547 Advanced Finance Seminar.
(3) (Prerequisite (Undergraduate): FINE 441 and FINE 443, or FINE 646.) (Prerequisite (Graduate): must have completed at least two and/or taking last course in concentration concurrently.) (Restriction: Not open to students who have taken FINE 647.) (Note: Lectures for this course span both the fall and winter semesters.) Selected topics will be discussed by Faculty members, invited guest speakers, and the students. Each student is required to select a topic for study and prepare a written report for presentation.

INDR-Industrial Relations

INDR 294 Introduction to Labour-Management Relations.
(3) An introduction to labour-management relations, the structure, function and government of labour unions, labour legislation, the collective bargaining process, and the public interest in industrial relations.

INDR 449 Occupational Health and Safety.
(3) (Prerequisite: INDR 294) Examines the public policy of occupational health and safety in Canada as well as the dynamics of contemporary occupational health and safety management. Topics include occupational safety and health, human rights and workers' compensation legislation, accident prevention and investigation, ergonomics, safety training, and workers' compensation claims management.

INDR 459 International Labour Relations.
(3) (Prerequisite: INDR 294) Examines industrial relations systems of other nations, including those of the EEC and the Pacific rim. Includes a discussion of the existing institutional structure, the historical and recent developments in these systems, the role of multi-national corporations, as well as the current economic and political context.

INDR 492 Public Policy in Industrial Relations.
(3) (Prerequisite: INDR 294) Development and structure of legislative framework governing labour-management relations. Court cases, arbitration precedents, labour relations board activities, and public attitudes; the formation of a public policy for labour relations. Major issues in shaping labour policy, and the linkages between policy and experience in labour management relations. The federal and Quebec jurisdictions.

INDR 494 Labour Law.
(3) (Prerequisite: INDR 294) (Restriction: Management: Open to Labour-Management Relations Major students in U3) Introduction to the basic concepts of labour law relevant to the practice of industrial relations. Historical development of labour law in certain social and legal systems and the culmination in the legislative enactments and jurisprudence of Canadian jurisdictions and certain comparative foreign models.

INDR 495 Labour Relations: Public Sector.
(3) (Prerequisite: INDR 294) Labour relations in federal, provincial, municipal, and quasi-public services such as hospitals, schools, government agencies and boards. Contentious current issues in public service labour relations and compare and analyze the alternative methods that have been evolved to deal with them.

INDR 496 Collective Bargaining.
(3) (Prerequisite: INDR 294) Principles of collective bargaining in Canada and abroad. Problem oriented. Mock collective bargaining sessions provide an opportunity for students to apply knowledge gained.

INDR 497 Contract Administration.
(3) (Prerequisite: INDR 294) The processes of grievance handling and arbitration under the terms of collective bargaining agreements. Substantive and procedural issues as well as behavioral and policy aspects of contract administration.

INDR 499 Internship in Industrial Relations.
(3) (Restriction: Open only to U-2 and U-3 students after completing 30 credits of a 90 credits program or 45 credits of a 96-120 credit program, a minimum CGPA of 2.7, and permission of the departmental Internship Advisor. This course will normally not fulfill program requirements for seminar or 400-level courses. A letter from a supervisor at the institution must attest to successful completion of the student's tenure.) Internship with an approved host institution or organization.

INSY-Information Systems

INSY 331 Managing Information Technology.
(3) (Prerequisite: MGR 331) Tools and concepts necessary to manage information systems in an organization: hardware/software/telecom administration, knowledge

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.
discovery/management, web-technologies, and computer security. Focuses on both mechanical aspects of IT and conceptual understanding with regard to impact on business organizations.

**INSY 332 Accounting Information Systems.**
(3) (Prerequisites: MGCR 331 and MGCR 211) Accounting cycles and information flows and the systems that manage those flows. Principals of systems development and data management as relates to accounting information. Relationship between accounting applications and transaction processing systems. Practical experience with accounting packages.

**INSY 333 Systems Analysis and Modelling.**
(3) (Prerequisite: MGCR 331) First two phases of the software development life cycle. Techniques used to conduct system requirement analysis, practical application of the analyst role in identifying operational problems, defining information system requirements, working with technical and non-technical staff, and making recommendations for system improvement.

**INSY 341 Developing Business Applications.**
(3) (Prerequisite: MGCR 331) Fundamental programming techniques, concepts, and data structures. Discusses modularization and maintainability. Emphasis on facilitating communication and understanding between systems analysts and programmers to support decision-making.

**INSY 342 Advanced Application Development.**
(3) (Prerequisite: INSY 341) Object oriented design, modeling (UML), and programming techniques, including the creation of classes, the use of objects, inheritance, and other object oriented principles. Strong focus on problem solving techniques and ways in which programmers can support decision-making within an organization.

**INSY 422 Object Oriented Design.**
(3) (Prerequisite: INSY 342) (Restriction: Not open to students having taken COMP 202, COMP 203) Principals of the object oriented paradigm. Object technology, data management, and design principals related to business application development.

**INSY 431 System Design and Implementation.**
(3) (Prerequisites: INSY 333, INSY 437, and INSY 341) Latter phases of the software development life cycle. Techniques used to design and implement the results of the systems analysis. Practical application of IS team roles.

**INSY 432 Information Technology in Business.**
(3) (Prerequisite: INSY 333) Discusses the role of the information systems department within an organization, information systems resource management, staff organization and leadership, strategic systems, planning, and end-user computing. Focuses on key IT trends in industries such as banking, insurance, manufacturing, retailing & distribution, and health.

**INSY 434 Advanced Topics.**
(3) (Prerequisite: MGCR 331) Current topics in the area of information systems.

**INSY 436 Telecommunications Management.**
(3) (Prerequisites: MGCR 331 and INSY 333) This course addresses the challenges and issues managers face in delivering telecommunications and data networking services to their organizations. Using case studies and lectures, it explores technical and managerial aspects of data communications; local, wide-area and wireless networks; network protocols; Internet/intranets; client/server computing; network security and management.

**INSY 437 Managing Data & Databases.**
(3) (Prerequisite: INSY 333) (Management: students are encouraged to take this course as early as possible in their program.) Management of organizational data, implementation of database management systems, and the roles and responsibilities of data management personnel. Explores different models of data representation with an emphasis on the relational model; simple and complex SQL queries.

**INSY 438 Interface Design & Prototyping.**
(3) (Prerequisites: INSY 333 & INSY 341) (Corequisite: INSY 342) Practical and theoretical interface design & prototyping principles and tools. Practical application of principles in an event-driven development environment.

**INSY 440 Information Technology Challenges in Electronic Business.**
(3) (Prerequisite: MGCR 331) Build the knowledge base and skills needed to face today's electronic business challenges, opportunities, and issues. Explore important concepts, models, tools and applications related to e-business.

**INSY 444 Managing Knowledge with Information Technology.**
(3) (Prerequisite: MGCR 331) Types of organizational knowledge and their value for organizations, analyzing knowledge processes, and assessing tools and technologies for managing knowledge.

**INSY 450 Information Systems Project Management.**
(3) (Prerequisite: MGCR 331) Practical principles of project management essential to successful IS development projects or other complex undertakings within an organization; includes methods for defining, planning, and scheduling activities and resources. Discusses managerial and behavioural issues.

**INSY 454 Technological Foundation for E-Commerce.**
(3) (Prerequisite: MGCR 331) (Restriction: A basic understanding of HTML is necessary.) Technology trends and vocabulary pertaining to current technology developments in E-Commerce. Practical IT skills in web application design, including ASP, XML, etc. Discusses business issues affected by the introduction of e-technologies.

**INSY 533 Information Systems Auditing and Security.**
(3) (Prerequisite: INSY 332 or CCCS 300) (Requirement for the Institute of Internal Auditors) This course considers problems and methods of establishing effective controls of computer systems at an advanced level. The student will learn how to review, and evaluate controls in a computer environment through the use of case studies. The student will also learn how to use computer assisted audit techniques to test computer controls.

**MGCR-Management Core**
Offered by: Management

**MGCR 211 Introduction to Financial Accounting.**
(3) The role of financial accounting in the reporting of the financial performance of a business. The principles, components and uses of financial accounting and reporting from a user's perspective, including the recording of accounting transactions and events, the examination of the elements of financial statements, the preparation of financial statements and the analysis of financial results.

**MGCR 222 Introduction to Organizational Behaviour.**
(3) Individual motivation and communication style; group dynamics as related to problem solving and decision making, leadership style, work structuring and the larger environment. Interdependence of individual, group and organization task and structure.

**MGCR 271 Business Statistics.**
(3) (Prerequisite: MATH 123 or equivalent.) (Restriction: Not open to students who have taken or are taking MATH 203, MATH 323, PSYC 204, ECON 227, ECON 257.) You may not be able to receive credit for this course and other statistics courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar. Statistical concepts and methodology, their application to management problems. Topics include: descriptive statistics; probability theory, important distributions, sampling and sampling distributions, hypothesis testing, simple linear and multiple regression.

**MGCR 293 Managerial Economics.**
(3) The course focuses on the application of economic theory to management problems and the economic foundations of marketing, finance, and production. Attention is given to the following topics: price and cost analysis; demand and supply analysis, conditions of competition.

**MGCR 331 Information Systems.**
(3) (Restriction: Fall sections restricted to BCom students.) (A special seminar will be available to those students who do not possess the above basic computer skills, at the students’ own expense.) Introduction to principles and
Using case studies.

Multinational relationships. Emphasis on pragmatic analysis, transfer, location and ownership strategies: competitive involvement (exporting, licensing, contractual arrangements, policy and strategy formulation in multinational business application of conceptual approaches to general management.

MGPO 383 International Business Policy. (3) (Prerequisites: MGCR 271 or equivalent.) An introduction to the principles, issues, and institutions of Finance. Topics include valuation, risk, capital investment, financial structure, cost of capital, working capital management, financial markets, and securities.

MGCR 352 Marketing Management 1. (3) Introduction to marketing principles, focusing on problem solving and decision making. Topics include: the marketing concept; marketing strategies; buyer behavior; Canadian demographics; internal and external constraints; product; promotion; distribution; price. Lectures, text material and case studies.

MGCR 360 Social Context of Business. (3) This course examines how business interacts with the larger society. It explores the development of modern capitalist society, and the dilemmas that organizations face in acting in a socially responsible manner. Students will examine these issues with reference to sustainable development, business ethics, globalization and developing countries, and political activity.

MGCR 382 International Business. (3) An introduction to the world of international business. Economic foundations of international trade and investment. The international trade, finance, and regulatory frameworks. Relations between international companies and nation-states, including costs and benefits of foreign investment and alternative controls and responses. Effects of local environmental characteristics on the operations of multi-national enterprises.

MGCR 423 Organizational Policy. (3) (Restriction: Open to U2, U3 students only.) Focus on the primary functions of general management: the formation of a corporate strategy that relates the company's opportunities to its resources, competence, and leadership style. Measures to improve organization effectiveness.

MGCR 472 Operations Management. (3) (Prerequisite: MGCR 271 or equivalent.) (Corequisite: MGSC 373) (Requirement for the Canadian Institute of Management) Introduction to decisions and trade-offs associated with production of goods and services. Topics include technology planning (production process), control issues (production planning and inventory control, MRP/JIT, scheduling, quality and reliability and distribution planning), design for manufacturability, management of new technology (FMS, group technology and robotics) and management of service operations.

MGPO-Management Policy

Offered by: Management

MGPO 383 International Business Policy. (3) (Prerequisites: MGCR 382 or permission of instructor.) (Restriction: Open to U2, U3 students only.) Development and application of conceptual approaches to general management policy and strategy formulation in multinational business involvement (exporting, licensing, contractual arrangements, turnkey projects, joint ventures, consortia); technology transfer, localization, and ownership strategies: competitive multinational relationships. Emphasis on pragmatic analysis, using case studies.

MGPO 434 Topics in Policy. (3) (Restriction: Open to U2, U3 students only.) This is a specialized course covering an advanced topic in strategy and organization.

MGPO 440 Strategies for Sustainability. (3) (Restriction: Open to U2, U3 students only.) This course explores the relationship between economic activity, management, and the natural environment. Using readings, discussions and cases, the course will explore the challenges that the goal of sustainable development poses for our existing notions of economic goals, production and consumption practices and the management of organizations.

MGPO 445 Industry Analysis & Competitive Strategy. (3) (Restriction: Open to U3 students only.) Analysis of industry structure, macro-environment, and evolution. Evaluation of strategic position, behaviour, and intent of organizations within industry context. Development of strategic recommendations for these firms.

MGPO 450 Ethics in Management. (3) (Restriction: U2 and U3 students only.) An examination of the economic, legal and ethical responsibilities of managers in both private and public organizations. Through readings, case studies, discussions and projects the class evaluates alternative ethical systems and norms of behaviour and draws conclusions as to the right, proper and just decisions and actions in the face of moral dilemmas. The focus of this course is on the decision process, values and consistency of values of the individual and on the impact of systems control and incentives on managerial morality.

MGPO 460 Managing Innovation. (3) (Restriction: Open to U2, U3 students only.) Firms face difficulties in developing new products. This course examines the new product development process to understand why problems occur and what managers can do. Topics include the creative synthesis of market and technology; the coordination of functions; and the strategic connection between the project and the strategy.

MGPO 468 Managing Organizational Politics. (3) (Restriction: Open to U2, U3 students only.) Power and politics can be mechanisms of control that maintain the status quo or they can be used as a force for change. Students learn how to recognize politics and use power. There is also a strong focus on the ethical management of power.

MGPO 469 Managing Globalization. (3) (Recommended: MGCR 423) (Restriction: Open to U2, U3 students only.) This course exposes students to global competition. Many critical questions will be explored, such as: why do industries globalize? how do firms expand and grow internationally? what are strategies that firms can use to compete internationally? Many industries will be covered, such as: telecommunications, airlines, footwear, and automobiles.

MGPO 470 Strategy and Organization. (3) (Restriction: Open to U2, U3 students only.) This course explores how strategic change affects the organization and how the organization can be designed to realize its strategy more effectively. It will examine how strategic choices affect organizational structures, processes, culture, human resource policies, leadership styles, etc. and how the organization can be aligned with the organizational mission.

MGPO 475 Strategies for Developing Countries. (3) (Restriction: Open to U2, U3 students only.) Strategic management challenges in developing and emerging economies. Focus on strategies that foster both firm competitiveness and economic development, including: technological capabilities, new forms of organization, small and large firms, global production, social impact, global standards and governance.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.

Denotes courses taught only in alternate years.

Denotes courses offered only in alternate years.
MGSC-Management Science

Offered by: Management

MGSC 272 Advanced Business Statistics.
(3) (Prerequisite: MGCR 271) (Restriction: Not open to students who have taken MGCR 272. Not open to students who have taken or are taking MATH 204, MATH 324, PSYC 307, ECON 227, ECON 257.) Advanced multiple regression analysis, experimental design and factorial analysis, time series and forecasting.

MGSC 373 Operations Research 1.
(3) (Prerequisite: MGCR 271.) (Prerequisite (CE): MGCR 273.) (Restriction: Not open to students who have taken MGCR 373.) (Note: Continuing Education; CMA Requirement.) Topics include: introduction to decision analysis and risk attitudes, inventory control, linear programming and simulation. Emphasis on the formulation of problems and their solution by standard methods or by computer packages.

MGSC 402 Operations Strategy.
(3) (Restriction: Not open to U0 and U1 students.) Effective management at the operating unit level, including the concept of “operations strategy”, action-oriented tools and frameworks for designing and managing operations innovation, effective use of operations-related technologies and supply chain strategy.

MGSC 403 Introduction to Logistics Management.
(3) (Prerequisite: MGCR 472.) Managing logistics systems, including transportation management, facility location, procurement, distribution management, and supply chain management.

MGSC 405 Quality Management.
(3) (Restriction: Not open to U0 and U1 students and other faculties.) Integrated view of quality management, quality systems and improvement techniques including tools and methodologies for quality improvement, six-sigma methodology.

MGSC 415 Supplier Management.
(3) (Restriction: Not open to U0 and U1 students.) Strategic role of purchasing, supplier selection, supplier relationship management, international sourcing, E-procurement, price determination, purchasing services, and auctions.

MGSC 431 Operations Analysis.
(3) (Prerequisite: MGCR 472.) Optimizing cycle-time, throughput and inventory performance of operations, including analytical modeling as well as simulation.

MGSC 434 Topics in Management Science.
(3) Topics will be selected from current issues in the Management Science Area.

MGSC 479 Applied Optimization.
(3) (Prerequisite: MGSC 373.) Applications of optimization models to management problems, including Linear Programming, Integer Programming and Nonlinear Programming.

MGSC 575 Applied Time Series Analysis Managerial Forecasting.
(3) (Prerequisite: (Undergraduate) MGCR 271.) (Restriction: Not open to students who have taken MGSC 675.) Management applications of time series analysis. Starting with ratio-to-moving average methods, the course deals successively with Census 2, exponential smoothing methods, the methodology introduced by Box and Jenkins, spectral analysis and time-series regression techniques. Computational aspects and applications of the methodology are emphasized.

MGSC 578 Simulation of Management Systems.
(3) (Prerequisite: (Undergraduate) MGCR 271.) (Restriction: Not open to students who have taken MGSC 678.) Building simulation models of management systems. Design of simulation experiments and the analysis and implementation of results. Students are expected to design a complete simulation of a real problem using a standard simulation language.

MRKT-Marketing

Offered by: Management

MRKT 354 Marketing Management 2.
(3) (Prerequisite: MGCR 352) The decision areas in marketing. Emphasis on the use of marketing theory and concepts in the solution of realistic marketing problems. Decision making in a marketing context using cases, some of which will be computer assisted, and readings.

MRKT 355 Services Marketing.
(3) (Prerequisite: MGCR 352) Services are fleeting and involve direct contact between the supplier and the buyer. Inventories disappear every time an aircraft takes off or the right passes for an hotel. For services, however, the largest sector in modern Western economy and their importance shows every sign of continuing to grow. This course focuses on the key differences between product and services marketing and the skills that are necessary for the services sector.

MRKT 357 Marketing Planning 1.
(3) (Prerequisites: MRKT 354, MRKT 451, and MRKT 452) (Restriction: Management: U3 students only) Marketing Planning is designed as a capstone to previous marketing courses; it provides a structured approach to developing a marketing plan, proceeding from corporate mission and objectives through to detailed marketing mix programs. Lectures, discussions and cases. A field project provides marketing planning experience.

MRKT 360 Marketing of Technology.
(3) (Restriction: non-Management students) The analysis, planning, and control of marketing activities in a high technology business environment through the application of a good conceptual framework that is useful in addressing marketing management problems.

MRKT 365 New Products.
(3) (Prerequisite: MGCR 352) New products will follow the new product introduction process from idea generation to post introduction. It will use ideas developed in marketing, production and policy. It will use cases and projects and will involve a real life new product project. In the average firm today, 40% of sales come from products not being sold five years ago. The ability of the firm to innovate is at the heart of long term success.

MRKT 434 Topics in Marketing 1.
(3) (Prerequisite: MGRC 352.) (Corequisite Current topics in marketing.

MRKT 438 Brand Management.
(3) (Prerequisite: MGCR 352) Looks at the decisions a brand manager in a major consumer goods company takes. It examines, in particular, the breakdown of advertising and sales promotion expenditures. It looks at the short term nature of the decisions taken. It will concentrate on the vast amount of new information available to brand managers today, especially in the form of scanner data.

MRKT 451 Marketing Research.
(3) (Prerequisites: MGCR 352 and MGCR 271.) Theoretical techniques and procedures common in marketing research. Topics include: research design, sampling, questionnaire design, coding, tabulating, data analysis (including statistical techniques). Specialized topics may encompass advertising, motivation and product research; forecasting and location theory.

MRKT 452 Consumer Behaviour.
(3) (Prerequisite: MGRC 352) A study of basic factors influencing consumer behaviour. Attention is focused on psychological, sociological and economic variables including motivation, learning, attitude, personality, small groups, social class, demographic factors and culture, to analyze their effects on purchasing behaviour.

MRKT 453 Advertising Management.
(3) (Prerequisite: MRKT 452) Surveys advertising and promotion in Canadian context. Examines activities as they relate to advertisers, the advertising agency and media. Stresses advertising by objectives as the approach to developing strategy and tactics. Real examples from current campaigns are the focal point of class discussions.
MRKT 455 Sales Management.
(3) (Prerequisite: MGCR 352) Responsibilities of the sales manager as they relate to the sales force. These include the selection of processes, training alternatives, compensation and incentive plans, supervision and evaluation and budgeting and forecasting. Case studies and discussions of sales force models are used.

MRKT 456 Business to Business Marketing.
(3) (Prerequisite: MGCR 352) Decision-making and management of the marketing effort in a business to business (b-to-b) context, including the b-to-b marketing system; b-to-b purchasing; researching the b-to-b market; product, price, distribution, selling and advertising decisions; strategies for business markets.

MRKT 459 Retail Management.
(3) (Prerequisite: MGCR 352) Principles and methods of marketing management as applied to retailing, including strategy and tactics: market structure; consumer behaviour; competition; financial management; human resources planning; promotion; presentation; merchandising; operations; pricing; planning and attaining retail profits. Lectures, text material, outside reading, planned retail visiting, cases.

MRKT 461 Advertising Practice.
(3) (Corequisite: MRKT 453) Primarily designed as a practical course in measuring advertising effectiveness. Emphasis on understanding the dynamics of persuasion in an advertising context and developing projects focused on specific aspects of campaign strategies. Knowledge of basic techniques of statistical hypothesis testing is essential.

MRKT 483 International Marketing Management.
(3) (Prerequisites: MGCR 382 and MGCR 352, or permission of instructor) (Formerly MGMT 483) Marketing management considerations of a company seeking to extend beyond its domestic market. Required changes in product, pricing, channel, and communications policies. Attention to international trade and export marketing in the Canadian context.

ORGB-Organizational Behaviour
Offered by: Management

ORGB 321 Leadership.
(3) (Prerequisite: for B Com students only, MGCR 222) Leadership theories provide students with opportunities to assess and work on improving their leadership skills. Topics include: the ability to know oneself as a leader, to formulate a vision, to have the courage to lead, to lead creatively, and to lead effectively with others.

ORGB 325 Negotiations and Conflict Resolution.
(3) A conceptual framework to guide participants through negotiation and conflict resolution process.

ORGB 380 Cross Cultural Management.
(3) Cross-cultural awareness and communication skills necessary to manage in multicultural organizations. Focus on the relationship between cultural values and communication style as they affect inter and intra cultural communication of managers, personnel and clients of multinational and multicultural organizations.

ORGB 409 Organizational Research Methods.
(3) (Prerequisite: MGCR 222 or MGCR 320.) Field research in organizational behaviour.

ORGB 420 Managing Organizational Teams.
(3) (Prerequisite: MGCR 222 or permission of Instructor) Theory, research, and applications Principles of team processes and effectiveness in organizational settings, specifically the theoretical developments and empirical findings of group dynamics and team effectiveness, and practical strategies and skills for successful management of organizational teams.

ORGB 421 Managing Organizational Change.
(3) (Prerequisite: MGCR 222 or permission of Instructor) Organizational change theory and techniques are examined with an emphasis on techno-structural interventions such as Quality-of-Work-Life approaches. Through simulations and case-studies, the course explores initiatives in organizational change, primarily in contemporary Canadian organizations. It also includes opportunities for “hands-on” experience in work and organization redesign.

ORGB 423 Human Resources Management.
(3) (Prerequisite: MGCR 222) (Requirement for the Institute of Internal Auditors) Issues involved in personnel administration. Topics include: human resource planning, job analysis, recruitment and selection, training and development, performance appraisal, organization development and change, issues in compensation and benefits, and labour-management relations.

ORGB 424 Employment.
(3) (Prerequisites: MGCR 320, MGCR 271) Reviews in sequence all aspects of the hiring of employees. Topics covered will include manpower planning, recruiting, selection, placement orientation, retirement and dehiring. Each area will be covered from legal, technical and theoretical perspectives.

ORGB 426 Human Resource Training and Development.
(3) (Prerequisite: MGCR 320) Planning, conceptualization, design, implementation and evaluation of training and career development programs. Review of the major techniques in each area. Training and development approached from a systems point of view.

ORGB 429D1, 429D2 (3) Organizational Behaviour for Course Counsellors.
(Prerequisite: MGCR 222) (Students must register for both ORGB 429D1 and ORGB 429D2.) (No credit for this course unless both ORGB 429D1 and ORGB 429D2 are successfully completed in consecutive terms) Examination of behaviour in organizations, coupled with training in teaching methods, to prepare students to team teach a section of MGCR 222. Selection of course counsellors is made toward the end of the preceding winter term. Only students thus selected will be permitted to register for this course.

ORGB 434 Advanced Topics in Organizational Behaviour.
(3) (Prerequisite: MGCR 222) This is an advanced course for students with a special interest in Organizational Behaviour. Topics will be selected from current issues or themes in literature.

ORGB 435 Women as Global Leaders and Managers.
(3) (Prerequisite: MGCR 222) Women are assuming leadership roles in many fields heretofore almost exclusively led by men. Yet even in the 1990s, less than 5% of international managers are women and less than 5% of international business cases portray women in leadership roles. This seminar will review the major trends affecting women’s power and influence in society in general and in organizations in particular. Participants will develop the vision, skills, and competencies needed for global leadership.

ORGB 525 Compensation Management.
(3) (Prerequisite: Undergraduate): MGCR 320) Compensation policies and practices, consistent with motivational theories, are examined. Topics include: design and evaluation of job evaluation systems, salary structures, and performance-based pay; compensation of special employee groups; and current pay equity laws. Projects and simulations provide “hands-on” experience in the use of compensation techniques.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses taught only in alternate years.
‡ Professional Practice (Stage) in Dietetics involving special prerequisites
◆ Indicates that departmental approval/permission must be obtained by a student prior to registration.
¶ Denotes courses not available as Education electives.
❖ Denotes courses with limited enrolment.

2007-2008 Undergraduate Programs Calendar, McGill University C-149
Schulich School of Music

MUCO-Composition
Offered by: Music, Theory

MUCO 240D1 (3), MUCO 240D2 (3) Tonal Composition.
(3 hours) (Prerequisites: MUTH 110 and MUTH 111 OR their equivalent.) (Corequisites: MUSP 229 and MUSP 231 AND MUSP 170 and MUSP 171.) (Restriction: Open only to students in Composition) (Students must register for both MUCO 240D1 and MUCO 240D2.) (No credit will be given for this course unless both MUCO 240D1 and MUCO 240D2 are successfully completed in consecutive terms) (Students must register for both MUCO 245D1 and MUCO 245D2.) (No credit will be given for this course unless both MUCO 245D1 and MUCO 245D2 are successfully completed in consecutive terms) Free composition.

MUCO 245D1 (2), MUCO 245D2 (2) Composition.
(2 hours) (Prerequisites: MUTH 110 and MUTH 111.) (Corequisites: MUSP 229 and MUSP 231 AND MUSP 170 and MUSP 171.) (Restriction: Open only to students in Composition) (Students must register for both MUCO 245D1 and MUCO 245D2.) (No credit will be given for this course unless both MUCO 245D1 and MUCO 245D2 are successfully completed in consecutive terms) 20th Century techniques and approaches. Basic dimensions such as pitch, rhythm and timbre, and their inter-relationship at all structural levels. Notation and score preparation. Performance practice. Analysis of selected 20th Century scores. Writing of short pieces for solo instruments and small ensembles, including voice.

MUCO 260 Instruments of the Orchestra.
(2) (2 hours) (Prerequisite: MUTH 111 or equivalent) An introductory study of the instruments of string, woodwind and brass families, elementary acoustics of the instruments. Techniques of playing including embouchure, fingering, bowing, hand-stopping, transposing instruments. Evolution of the instruments, their technique and their music from the 18th century to the present.

MUCO 261 Elementary Orchestration.
(2) (Prerequisite: MUCO 260) Study of traditional orchestration through analysis. Transcription of piano works for small ensembles (string quartet, woodwind quintet, brass quintet). Reduction of orchestral scores for piano.

MUCO 340D1 (3), MUCO 340D2 (3) Composition.
(3 hours) (Prerequisites: MUCO 240 AND MUCO 245 with "B" standing in each.) (Corequisites: MUSP 229 and MUSP 331) (Students must register for both MUCO 240D1 and MUCO 340D2.) (No credit will be given for this course unless both MUCO 240D1 and MUCO 340D2 are successfully completed in consecutive terms) Free composition.

MUCO 341 Digital Studio Composition 1.
(3) (3 hours lecture-demonstration and 3 hours studio time) (Prerequisites: MUCO 240D1/D2 and MUCO 245D1/D2.) Composition with MIDI, audio recording, digital audio signal processing software and hardware. Creation of small-scale composition studies using technological resources in the context of electroacoustic music. The hands-on activities will include critical listening and evaluation of electronic and computer music repertoire.

MUCO 342 Digital Studio Composition 2.
(3) (3 hours lecture-demonstration and 3 hours studio time) (Prerequisite: MUCO 341) Advanced composition with MIDI, audio recording, digital audio signal processing software and hardware. Creation of complete electroacoustic pieces and/or production of audio media materials.

MUCO 373 Special Topic in Composition 1.
(3) (Prerequisites: MUHL 184, MUHL 185, MUTH 211 or MUCO 240, MUSP 231.) Special topic in composition.

MUCO 374 Special Topic in Composition 2.
(3) (Prerequisites: MUHL 184, MUHL 185, MUTH 211 or MUCO 240, MUSP 231.) Special topic in composition.

MUCO 440D1 (3), MUCO 440D2 (3) Composition.
(2 hours) (Prerequisite: MUCO 340) (Students must register for both MUCO 440D1 and MUCO 440D2.) (No credit will be given for this course unless both MUCO 440D1 and MUCO 440D2 are successfully completed in consecutive terms) Free composition.

MUCO 441 Special Projects: Composition.
(6) (2 hours) (Prerequisite: MUCO 440)

MUCO 441D1 (3), MUCO 441D2 (3) Special Projects: Composition.
(Students must register for both MUCO 441D1 and MUCO 441D2.) (No credit will be given for this course unless both MUCO 441D1 and MUCO 441D2 are successfully completed in consecutive terms) (MUCO 441D1 and MUCO 441D2 together are equivalent to MUCO 441)

MUCO 460D1 (2), MUCO 460D2 (2) Advanced Orchestration.
(2 hours) (Prerequisites: MUCO 240 and MUCO 261) (Students must register for both MUCO 460D1 and MUCO 460D2.) (No credit will be given for this course unless both MUCO 460D1 and MUCO 460D2 are successfully completed in consecutive terms) Free composition.

MUCO 514 Advanced Orchestration.
(3) (Prerequisite: MUCO 440) (Students must register for both MUCO 440D1 and MUCO 440D2.) (No credit will be given for this course unless both MUCO 440D1 and MUCO 440D2 are successfully completed in consecutive terms) Free composition.

MUCO 541 Advanced Orchestration.
(2) (Prerequisite: MUCO 541) Further advanced topics in orchestration. Includes study of music of the 19th and 20th centuries, including Romantic, Impressionist, and 20th Century styles. Emphasis on practical composition and practical experience in the use of new technologies. Aesthetic and technical considerations will be emphasized.

MUCO 542 Advanced Orchestration.
(3) (Prerequisite: MUCO 541) Further advanced topics in orchestration. Includes study of music of the 19th and 20th centuries, including Romantic, Impressionist, and 20th Century styles. Emphasis on practical composition and practical experience in the use of new technologies. Aesthetic and technical considerations will be emphasized.

MUCT-Choral Techniques
Offered by: Theory

MUCT 235 Vocal Techniques.
(3) (3 hours and 2 hours lab) (Corequisites: MUTH 110 or MUTH 111 AND MUSP 129 or MUSP 131 AND MUHL 184 or MUHL 185.) Development of basic singing skills through group voice lessons. Lectures, and Choral Lab performances. Emphasis will be on: text production, breathing, projection, clarity of vowels and consonants, the International Phonetic Alphabet, and definition of voice categories. Simple diagnostic teaching skills will be developed through observation of group voice lessons.

MUCT 315 Choral Conducting 1.
(3) (3 hours and 2 hours lab) (Prerequisites: MUTH 221, MUSP 229, MUCT 235 AND MUCT 215 or permission of instructor.) The fundamental skills of choral conducting, including baton technique, score reading, and rehearsal procedures. Conducting materials will be selected from representative choral works.

MUCT 315 Choral Conducting 2.
(3) (3 hours and 2 hours lab) (Prerequisites: MUTH 221, MUSP 229, MUCT 235 AND MUCT 215 or permission of instructor.) The fundamental skills of choral conducting, including baton technique, score reading, and rehearsal procedures. Conducting materials will be selected from representative choral works.

MUCT 315 Choral Conducting 3.
(3) (3 hours and 2 hours lab) (Prerequisites: MUTH 221, MUSP 229, MUCT 235 AND MUCT 215 or permission of instructor.) The fundamental skills of choral conducting, including baton technique, score reading, and rehearsal procedures. Conducting materials will be selected from representative choral works.

MUCT 315 Choral Conducting 4.
(3) (3 hours and 2 hours lab) (Prerequisites: MUTH 221, MUSP 229, MUCT 235 AND MUCT 215 or permission of instructor.) The fundamental skills of choral conducting, including baton technique, score reading, and rehearsal procedures. Conducting materials will be selected from representative choral works.
MUEN-Ensemble

Offered by: Performance

MUEN 496 Opera Studio.
(4) (3-6 hours) (Prerequisites for B.Mus. (Majors & Honours) & L.Mus.; MUHL 184, MUHL 185, MUTH 110, MUTH 111, MUSP 129, MUSP 131. Other prerequisites for B.Mus. (Majors & Honours) only: MUHL 210, MUHL 211, MUSP 229. Open to Voice Performance students by audition and with practical teacher's approval; open to others by special permission; may be repeated for credit.) .

MUEN 560 Chamber Music Ensemble.
(1).

MUEN 561 2nd Chamber Music Ensemble.
(1) (1 hour) (Prerequisite: Audition.) (Restriction: Not open to students who have taken MUEN 561.) Chamber music of the Medieval, Renaissance and Baroque periods.

MUEN 563 Jazz Vocal Workshop.
(2) (Restriction: Not open to students who have taken MUEN 463.) .

MUEN 567 Beethoven Orchestra.
(1) (Prerequisite: Audition.) (Note: Open to all students registered at McGill.) A reading orchestra that also functions as a conductor's workshop orchestra. Repertoire includes the complete Beethoven Symphonies.

MUEN 568 Multiple Ensemble 1.
(1) (Restriction: Not open to students who have taken MUEN 468.) .

MUEN 570 Jazz Combo.
(1) (1 hour) (Prerequisite: Audition.) (Restriction: Open only to Jazz Performance Majors. Not open to students who have taken MUEN 470.) A Jazz Improvisation Ensemble of approximately 4 to 9 players.

MUEN 571 Contemporary Improvisation Ensemble.
(1) (Prerequisite: Audition.) (Restriction: Open to advanced performance majors.) Ensembles of 4-6 players will explore the creative performance practice of improvisatory contemporary music.

MUEN 572 Cappella Antica.
(2) (4 hours) (Prerequisite: Audition.) (Restriction: Not open to students who have taken MUEN 472.) An ensemble of 8 to 12 voices specializing in early music. N.B. This ensemble may substitute as a Basic Ensemble in programs that specify Choral Ensemble, with Departmental approval.

MUEN 573 Baroque Orchestra.
(2) (4 hours) (Prerequisites: Audition AND MUEN 480 AND a prerequisite or corequisite of MUPP 281. Additional prerequisite for keyboard players: MUPP 372 with a grade of A-) (Restriction: Not open to students who have taken MUEN 473.) Open to singers and instrumentalists, this ensemble specializes in chamber music primarily of the Baroque era.

MUEN 578 Song Interpretation 1.
(1) (2 hours) (Prerequisite: Audition.) (Restriction: Not open to students who have taken MUEN 479.) Normally open only to Voice and Piano Performance students. Study of the standard song repertoire with emphasis on the singer and pianist as partners. A public recital will be given at the end of each term.

MUEN 579 Song Interpretation 2.
(1).

MUEN 580 Early Music Ensemble.
(1) (Prerequisite: Audition. Prerequisite or corequisite for keyboard players: MUPG 272.) (Restriction: Not open to students who have taken MUEN 480.) An ensemble of 4-6 vocalists and instrumentalists which performs music of the Medieval, Renaissance and Baroque periods.

MUEN 581 Early Piano Ensemble Seminar 1.
(1) (1 hour) (Prerequisite: Piano Concentration 1 Examination or Audition.) (Restriction: Not open to students who have taken MUEN 481.) Concentration on interpretation and performance of piano duet and two piano repertoire.

MUEN 582 Piano Ensemble Seminar 2.
(1) (Prerequisite: MUEN 581 or permission of the instructor.) Ensemble playing in two-piano and piano 4-hand repertoire.

MUEN 583 Introduction to Collaborative Piano.
(1) (2 hours) (Prerequisite: Audition.) (Restriction: Not open to students who have taken MUEN 483.) A limited number of qualified students will be accepted for intensive work in this field. Singers and other instrumentalists will be admitted.

MUEN 584
(1) (4 hours) (Prerequisite: MUEN 583 (formerly MUEN 483.)) (Restriction: Not open to students who have taken MUEN 484.) Highly qualified accompanists will be assigned to work independently with studio teachers and their students.

MUEN 585 Sonata Masterclass.
(1) (Prerequisite: MUEN 583, or permission of the instructor.) (Restriction: Limited to 4 advanced pianists and 4 instrumentalists.) Exploration of the vast literature for sonatas with piano and instrument, including multiple issues of ensemble preparation and performing.

MUEN 587
(2) (4 hours) (Prerequisite: Audition.) (Restriction: Not open to students who have taken MUEN 487.) (Note: May be taken instead of Choral Ensemble.) An ensemble of 16 voices performing challenging repertoire from the Renaissance to the present day. Since the expectation is a level of performance equivalent to a professional chamber ensemble, singers wishing to join this group should have had considerable ensemble experience, and advanced vocal and sight-reading skills.

MUEN 588 Multiple Ensemble 2.
(1) (Restriction: Not open to students who have taken MUEN 488.) .

MUEN 589 Woodwind Ensembles.
(1) (2-3 hours) (Prerequisite: Audition.) (Restriction: Not open to students who have taken MUEN 489.) .

MUEN 590 McGill Winds.
(2) (4-6 hours) (Prerequisite: Audition.) (Restriction: Not open to students who have taken MUEN 490.) .

MUEN 591 Brass Ensembles.
(1) (2-3 hours) (Prerequisite: Audition.) (Restriction: Not open to students who have taken MUEN 491.) .

MUEN 592 Chamber Jazz Ensemble.
(2) (Restriction: Open to Jazz Performance students only. Not open to students who have taken MUEN 492.) This ensemble will deal with the extensive repertoire of music which exists for small jazz orchestra (9-13 instruments).

MUEN 593 Choral Ensembles.
(2) (4 hours) (Prerequisite: Audition. (Section 001 Chamber Singers: a group of approximately 24 mixed voices which explores the a capella repertoire of all periods as well as works with chamber accompaniment. (Section 002 Concert Choir: an ensemble of approximately 60 voices (S.A.T.B.) which performs the repertoire from all periods appropriate to a group of this size.) (Section 003 University Chorus: a mixed chorus of approximately 100 which performs a variety of choral material including both traditional and popular selections. (Section 004 Women's Chorale: an ensemble of approximately 40 women stressing the fundamentals of singing and ensemble participation.) (Restriction: Not open to students who have taken MUEN 493.) Students enrolling in Choral Ensembles will be assigned to one of the above groups.)
MUEN 594 Contemporary Music Ensemble.  
(2) (4 hours) (Prerequisite: Audition.) (Restriction: Not open to students who have taken MUEN 494.)

MUEN 595 Jazz Ensembles.  
(2) (3-4 hours) (Prerequisite: Audition.) (Restriction: Not open to students who have taken MUEN 495.)

MUEN 596 Opera Repetiteur.  
(2) (6 hours) (Restriction: Open by audition to advanced pianists, and to students in conducting, who are interested in training as operatic coaches. Students enrolled for piano instruction at McGill must also have their practical teacher's approval) Supervised coaching of singers, and playing of scenes and productions; rehearsal pianists and backstage conducting responsibilities.

MUEN 597 Orchestral Ensembles.  
(2) (6-7 hours) (Prerequisite: Audition.) (Restriction: Not open to students who have taken MUEN 497.)

MUEN 598 Percussion Ensembles.  
(1) (2-3 hours) (Restriction: Not open to students who have taken MUEN 498.)

MUGT-General Music Techniques

Offered by: Theory

MUGT 205 Psychology of Music.  
(3)

MUGT 215 Basic Conducting Techniques.  
(1) (1 hour) (Prerequisites: MUTH 110, MUTH 111, MUSP 129.) Development of basic manual dexterity and rehearsal skills. Topics include: preparatory posture, establishing tempo, releases, simple duple and triple metre beat patterns, cueing, dynamics, fermata, transposition, terminology, score preparation, and listening.

MUGT 301 Technology and Media for Music Education.  
(3) (3 hours) Introduction to the use of microcomputers and electronic music instruments in the music classroom and in individualized instruction. Topics include: computer-assisted instruction, MIDI, sequencing and notation software, hard disk recording, NICT, and object-oriented authoring software.

MUGT 305 Introduction to Music Therapy.  
(3) (3 hours) (Prerequisites: MUTH 210 and MUSP 229) Introduction to basic principles and techniques of music therapy. Topics will include: definitions of music therapy; identifying and developing an understanding of the individual's special needs; simple social, emotional, and physiological therapeutic applications; and music as a motivational tool. Will include limited field observation.

MUGT 355 Music in Early Childhood.  
(3) (3 hours) Organized as a laboratory, this course will explore the musical growth and development of children from birth to age six, with topics including heredity and environment, music skills and concept development, affective development, creativity, and musical activities.

(3) (3 hours) (Prerequisite: none) Introduction to techniques for cultivating musical understanding and creativity in children from age 6 to 12. Traditional and contemporary approaches such as Orff, Kodaly, Dalcroze, Montessori, Gordon, and Carabo-Cone, plus relevant research will be examined for underlying principles of musical development. Will include guided field observation.

MUGT 357 Music for Children 2: Philosophy and Techniques.  
(3) (3 hours) (Prerequisite: MUGT 356) Continued exploration of techniques for cultivating musical understanding, with emphasis on music and musical development of older children, and creativity begin in MUGT 356. Will include guided field observation and planning of activity sequences.

MUGT 401 Issues in Music Education.  
(3)

MUGT 475 Special Project.  
(3) (Restriction: Open only to honours students in School Music) A student may engage in an individual research project with the approval of the Departmental Chair and under appropriate supervision.

MUGT 475D1 (1.5), MUGT 475D2 (1.5) Special Project.  
(Students must register for both MUGT 475D1 and MUGT 475D2.) (No credit will be given for this course unless both MUGT 475D1 and MUGT 475D2 are successfully completed in consecutive terms) (MUGT 475D1 and MUGT 475D2 together are equivalent to MUGT 475) A student may engage in an individual research project with the approval of the Departmental Chair and under appropriate supervision.

MUHL-Music History and Literature

Offered by: Theory

MUHL 184 History Survey - Medieval, Renaissance, Baroque.  
(3) (Corequisites: MUTH 110 and MUSP 129 OR permission of instructor) Representative works from the Carolingian Renaissance to 1750 and their relation to the social and cultural milieu. Basic reference works. Developments in notation, instruments, and performance practice.

MUHL 185 History Survey - Classical, Romantic, 20th-C.  
(3) (4 hours) (Corequisites: MUTH 111 and MUSP 131 OR permission of instructor) Historical and stylistic investigation of music and musical life from circa 1750 to the present, i.e., the transition to the Classical period, the period of C.P.E. Bach and the Mannheim, Berlin, and Viennese symphonists, to recent developments, including electronic and music technology.

MUHL 220 Women in Music.  
(3) (3 hours) (Prerequisites: MUAR 201 and/or MUAR 211 and/or MUHL 184/185 or permission of the instructor.) Case studies in contributions of selected women to various areas of music (including composition, teaching, performance, and patronage), in Europe and the Americas, chosen mainly from 19th and 20th centuries. Topics include: women as amateurs and professionals; past restrictions; movement for full acceptance into "musical mainstream" especially during twentieth century.

MUHL 330 Music and Film.  
(3) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231.) The modern genre of music for films, and its changing styles (symphonic, jazz, pop compilation) from the silent era to today. Includes study of major film composers in North America and other traditions; analysis of the role of music in cinematic narrative, expression and symbolism.

MUHL 342 History of Electroacoustic Music.  
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) The historical development of electroacoustic music and the historical developments at important centers for research and creative activities. The roles of electronic and computer technologies in commercial and concert music are examined.

MUHL 362 Popular Music.  
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) History, criticism, and analysis of twentieth-century repertoires of popular music. Detailed examination of special topics. These include genre and style in 1970s rock and soul, history of the Broadway musical, approaches to the transcription of pop music, and/or constructions of race and gender in music video.

MUHL 366 The Era of the Fortepiano.  
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) Survey of the repertoire for keyboard 1750-1850: the instruments, Embfindsamkeit, galant style, London, Paris, Vienna, the Czech school, Haydn, Mozart, Beethoven, sonatas, variations, character pieces, "high" and "low" salon music, virtuosos and the virtuoso repertoire, Schubert, Chopin, Schumann, Mendelssohn, early Liszt.

MUHL 372 Solo Song Outside Germany and Austria.  
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) Topics in American and European non-German song repertoire from the eighteenth century to the present. Issues discussed may include the role of song in national music culture, art song and folk
song, national styles and poetic traditions, text-music relationships, and performance practice.

MUHL 373 Special Topic.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231)

MUHL 374 Special Topic.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231)

MUHL 377 Baroque Opera.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) History of opera from its origins in the musical, literary, and philosophical models available to the Florentine Camerata to the end of the baroque. The development of opera will be studied from the perspective of artistic style and in the light of historical, political, social, and economic conditions.

MUHL 381 Renaissance Music.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) (Corequisites: MUTH 210 and MUSP 229) (Normally alternates with MUHL 380) Sacred and secular musical genres of the 15th and 16th Centuries. Various phases of imitative practice, cantus firmus and parody techniques. The emergence of homophonic textures in peripheral areas of the repertoire. Selected problems in the fields of theory, bibliography and aesthetics.

MUHL 382 Baroque Music.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) (Normally offered in alternate years) A detailed examination of several selected areas of Baroque music. Topics will be drawn from different geographical regions (e.g., Italy, France, Germany, etc.) and encompass church, chamber and theatre music, as well as performance practice. Each topic will be related to general musical developments of the period.

MUHL 383 Classical Music.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) (Normally offered in alternate years) The period covered will be from approximately 1740-1828, from the schools of the Italian keyboard composers, opera buffa and seria, and composers centered at Mannheim, Paris, London, Berlin and Vienna, through the Viennese Classic period of Haydn, Mozart and Beethoven, to the death of Schubert.

MUHL 384 Romantic Music.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) (Normally offered in alternate years) The Romantic style as traced by an analysis of works by the major composers of Lied, symphony, symphonic poem, chamber music, and opera.

MUHL 385 Early Twentieth-Century Music.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) Development of European, Russian, and American music from the 1890s until the early 1940s, tracing its roots in late 19th-century Romanticism and following its evolution in central Europe, France, and the United States. The music of major innovators such as Debussy, Stravinsky, Schoenberg, Ives, and Varèse will be discussed.

MUHL 386 Chamber Music Literature.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) The course will concentrate on the forms and media for chamber ensembles during the 18th, 19th and 20th centuries: accompanied sonatas, duos, trios, quartet, quintet, sextet, divertimento, and works for small chamber orchestra. Major works of the most representative composers will be discussed.

MUHL 387 Opera from Mozart to Puccini.

MUHL 388 Twentieth-Century Opera.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) Major early twentieth-century works by Debussy, Strauss, Schreker, Bartók, Stravinsky and Schoenberg. Opera in Europe between the Wars including operas of Berg, Milhaud, Krenek, Hindemith and Weill. Politics, sociology, and literature in relationship to musical style. Approaches since 1945 in selected works by Britten, Henze, Zimmermann, Ligeti, Somers and Glass.

MUHL 389 Orchestral Literature.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) Study of the literature for orchestra alone, composed since the early 18th Century. The material will be divided as follows: 1) orchestral music to the time of Beethoven; 2) orchestral music from 1800 to 1880; 3) orchestral music from 1890 to 1900; 4) orchestral music of the 20th Century.

MUHL 390 The German Lied.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) Survey of the German Lied from the late eighteenth to the early twentieth century, focusing on songs and song cycles by Schubert, Schumann, Brahms, Wolf, Mahler, Schoenberg, Berg, and Webern. Topics include text, musical form and text-music relationships, melodic style and harmonic organization, accompaniment, and performance practice.

MUHL 391 Canadian Music.
(3) (3 hour) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) Survey of music in Canada from the 16th Century to the present. Current musical organizations and institutions, and contemporary Canadian music will be stressed. Time permitting, brief reference will be made to the folk music of indigenous and immigrant groups.

MUHL 392 Music since 1945.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) Appearance and evolution of such post-war phenomena as total serialism, “chance” music of various kinds, and electronic music as seen in major figures such as Boulez, Stockhausen, Cage and others in Europe and the United States. Important developments during the 1960. Rise of “minimalism” and “neo-Romanticism” during the 1970s and 80s.

MUHL 393 History of Jazz.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) (Prerequisite for Jazz Performance Majors: permission of instructor) The evolution of jazz from its origins to the present day. The course centers upon musical issues and will include careful analysis of style based upon recordings, live performances and transcriptions. Ragtime, blues, the Twenties, big-band, swing, bebop, cool, third stream, hard bop and free jazz will be explored.

MUHL 395 Keyboard Literature before 1750.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) The solo repertoire for organ, harpsichord, and clavichord from 1400 to 1750: intabulation, cantus firmus treatment, indigenous keyboard repertoire for organ, harpsichord and clavichord from 1400 to 1540.
MUIN 396 Era of the Modern Piano.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) Survey of keyboard repertoire from 1850 to the present; instruments, the crisis at mid-century, character pieces, Brahms, late Liszt, national schools, commercialization - the concert hall, music for the bourgeois - salon music, Scriabin, the Second Viennese School, Impressionism, Neo-Classicism, Neo-Romanticism, serialism, the sonata in the 20th-century, North American composers.

MUIN 397 Choral Literature after 1750.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) The development of sacred and secular choral music from 1750 to the present. Selected liturgical and secular works will be included; the Mass, the cantata, the oratorio and other genres. Form and stylistic considerations will be examined in representative works.

MUIN 398 Wind Ensemble Literature after 1750.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) Study of wind ensemble music from Handel to Xenakis as it evolved under the influences of changing musical taste and technological advance. Topics include wind chamber music, music of the French Revolution, the 19th-century military band and the development of school, college and professional bands since 1900.

MUHL 475 Special Project.
(3) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) For details contact the Department of Theory.

MUHL 475D1 (1.5), MUHL 475D2 (1.5) Special Project.
(Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) (Students must register for both MUHL 475D1 and MUHL 475D2.) (No credit will be given for this course unless both MUHL 475D1 and MUHL 475D2 are successfully completed in consecutive terms) (MUHL 475D1 and MUHL 475D2 together are equivalent to MUHL 475) For details contact the Department of Theory.

MUHL 475N1 (1.5), MUHL 475N2 (1.5) Special Project.
(Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) (Students must also register for MUHL 475N1 and MUHL 475N2) (No credit will be given for this course unless both MUHL 475N1 and MUHL 475N2 are successfully completed in the same calendar year) (MUHL 475N1 and MUHL 475N2 together are equivalent to MUHL 475) For details contact the Department of Theory.

MUHL 529 Proseminar in Musicology.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) (Prerequisite: open to all students in a Major or Honours program in Music History, and to students in other programs by permission of instructor) (Normally alternates with MUHL 591D1) Study of selected methodologies in musicology through critical examination of significant texts. Topics may include approaches to historiography, biography, editing and source studies, as well as aesthetics, literary criticism, semiotics, feminist musicology, and ideology critique. Works by Adler, Adorno, Dahlhaus, Kerman, McClary, Meyer, Nattiez, and Subotnik, among others, will be addressed.

MUHL 570 Research Methods in Music.
(3) (3 hours) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) (Restriction: one MUHL or MUPP course at the 300 level or higher, or permission of instructor) Survey and critical evaluation of research- and performance-related tools: composers' collected editions, monuments of music, bibliographies of music and music literature, discographies, directories, and databases. Topics will include: developing bibliographies, structuring written arguments, assessing academic and popular writings about music, and understanding the task of the music editor.

MUHL 591D1 (1.5), MUHL 591D2 (1.5) Paleography.
(1 hour) (Prerequisites: MUHL 184 and MUHL 185 and MUTH 211 OR MUCO 240 and MUSP 231) (Restriction: U3 honours students in History) (Normally alternates with MUHL 592D1 and MUHL 592D2) (No credit will be given for this course unless both MUHL 591D1 and MUHL 591D2 are successfully completed in consecutive terms) The theory and practice of musical transcription for the period 1100 to 1600. Black modal notation, Franconian notation, French and Italian Ars Nova notation, Mannherism, white mensural notation, proportions, and lute and keyboard tablatures will be studied.

MUIN-PRACTICAL INSTRUMENT

MUIN 110 Elective Practical Instruction 1.
(2)

MUIN 111 Elective Practical Instruction 2.
(2)

MUIN 120 Practical Instruction 1.
(2) (1 hour) (Prerequisite: Admission to the B.Mus. program by audition) (Restriction: Open to students entering directly from High Schools outside Quebec.)

MUIN 121 Practical Instruction 2.
(2) (1 hour) (Prerequisite: MUIN 120) (Restriction: Open to transfer students and high school students entering directly from outside Quebec.)

MUIN 130 Performance Practical Instruction 1.
(4) (1 hour) (Prerequisite: Admission to the B.Mus.) (Performance program by audition) (Restriction: Open to students entering directly from high school outside Quebec.)

MUIN 131 Performance Practical Instruction 2.
(4) (1 hour) (Prerequisite: MUIN 130) (Restriction: Open to transfer students and high school students entering directly from outside Quebec.)

MUIN 180 Flute Doubling Proficiency Test.
(0)

MUIN 181 Clarinet Doubling Proficiency Test.
(0)

MUIN 210 Elective Practical Instruction 3.
(2)

MUIN 211 Elective Practical Instruction 4.
(2)

MUIN 220 Practical Instruction 3.
(2) (1 hour) (Prerequisite: MUIN 121)

MUIN 221 Practical Instruction 4.
(2) (1 hour) (Prerequisite: MUIN 220)

MUIN 222 Concentration 1 Examination.
(0)

MUIN 230 Performance Practical Instruction 3.
(4) (1 hour) (Prerequisite: MUIN 131)

MUIN 231 Performance Practical Instruction 4.
(4) (1 hour) (Prerequisite: MUIN 230)

MUIN 232 Performance 1 Examination.
(0) (Note: Complete descriptions are to be found under Examinations and Goals in Practical Subjects in the Music Chapter of the University Calendar.)

MUIN 250 L.Mus. Practical Instruction 1.
(8) (1 hour) (Prerequisite: Admission to the L.Mus. program by audition)

MUIN 251 L.Mus. Practical Instruction 2.
(8) (1 hour) (Prerequisite: MUIN 250)

MUIN 252 L.Mus. Performance 1 Examination.
(0) (Note: Complete descriptions are to be found under Examinations and Goals in Practical Subjects in the Music Chapter of the University Calendar.)

MUIN 300 Voice Coaching 1.
(2)

MUIN 301 Voice Coaching 2.
(2)

MUIN 310 Elective Practical Instruction 5.
(2)

MUIN 311 Elective Practical Instruction 6.
(2)

MUIN 320 Practical Instruction 5.
(2) (1 hour) (Prerequisite: MUIN 221)
MUIN 321 Practical Instruction 6.
(2) (1 hour) (Prerequisite: MUIN 320).
MUIN 322 Concentration 2 Examination.
(0) (Note: Complete descriptions are to be found under Examinations and Goals in Practical Subjects in the Music Chapter of the University Calendar.)
MUIN 330 Performance Practical Instruction 5.
(4) (1 hour) (Prerequisite: MUIN 231)
MUIN 331 Performance Practical Instruction 6.
(4) (1 hour) (Prerequisite: MUIN 330).
MUIN 332 Performance 2 Examination.
(0) (Note: Complete descriptions are to be found under Examinations and Goals in Practical Subjects in the Music Chapter of the University Calendar.)
MUIN 333 Piano Techniques 2.
(0) (pass/fail) (Mandatory test for pianists to be taken prior to the Performance 2 Exam.)
MUIN 340 Honours Practical Instruction 5.
(4) (1 hour) (Prerequisite: MUIN 231)
MUIN 341 Honours Practical Instruction 6.
(4) (1 hour) (Prerequisite: MUIN 340).
MUIN 342 Honours Performance 2 Examination.
(0) (Note: Complete descriptions are to be found under Examinations and Goals in Practical Subjects in the Music Chapter of the University Calendar.)
MUIN 350 L.Mus. Practical Instruction 3.
(8) (1 hour) (Prerequisite: MUIN 251)
MUIN 351 L.Mus Practical Instruction 4.
(8) (1 hour) (Prerequisite: MUIN 350).
MUIN 352 L.Mus. Performance 2 Examination.
(0) (Note: Complete descriptions are to be found under Examinations and Goals in Practical Subjects in the Music Chapter of the University Calendar.)
MUIN 369 Concerto.
(0) (pass/fail) (Mandatory test for pianists)
MUIN 400 Voice Coaching 3.
(2) (Restriction: Open only to students in the Artist Diploma in Voice program.) A course in which the student will have individual coaching sessions on repertoire, with emphasis in musical and linguistic nuance.
MUIN 401 Voice Coaching 4.
(2) (Restriction: Open only to students in the Artist Diploma in Voice program.) Continued individual coaching sessions on repertoire, with emphasis in musical and linguistic nuance.
MUIN 430 Performance Practical Instruction 7.
(4) (1 hour) (Prerequisite: MUIN 331)
MUIN 431 Performance Practical Instruction 8.
(4) (1 hour) (Prerequisite: MUIN 430).
MUIN 432 Performance 3 Examination.
(0) (Note: Complete descriptions are to be found under Examinations and Goals in Practical Subjects in the Music Chapter of the University Calendar.)
MUIN 433 Piano Techniques 3.
(0) (pass/fail) (Mandatory test for pianists to be taken prior to the Performance 3 Exam.)
MUIN 440 Honours Practical Instruction 7.
(4) (1 hour) (Prerequisite: MUIN 341)
MUIN 441 Honours Practical Instruction 8.
(4) (1 hour) (Prerequisite: MUIN 440).
MUIN 442 Honours Performance 3 Examination.
(0) (Note: Complete descriptions are to be found under Examinations and Goals in Practical Subjects in the Music Chapter of the University Calendar.)
MUIN 450 L.Mus. Practical Instruction 5.
(8) (1 hour) (Prerequisite: MUIN 351)
MUIN 451 L.Mus Practical Instruction 6.
(8) (1 hour) (Prerequisite: MUIN 450).
MUIN 452 L.Mus. Performance 3 Examination.
(0) (Note: Complete descriptions are to be found under Examinations and Goals in Practical Subjects in the Music Chapter of the University Calendar.)
MUIN 460 Artist Diploma Practical Instruction 1.
(8) (1.5 hours) (Prerequisite: admission to the Artist Diploma program by audition.)
MUIN 461 Artist Diploma Practical Instruction 2.
(8) (1.5 hours) (Prerequisite: MUIN 460).
MUIN 462 Artist Diploma Recital 1.
(0) (Note: Complete descriptions are to be found under Examinations and Goals in Practical Subjects in the Music Chapter of the University Calendar.)
MUIN 469 Artist Diploma Concerto 1.
(1) (Prerequisite: MUIN 460)
MUIN 560 Artist Diploma Practical Instruction 3.
(8) (1.5 hours) (Prerequisite: MUIN 461)
MUIN 561 Artist Diploma Practical Instruction 4.
(8) (1.5 hours) (Prerequisite: MUIN 560).
MUIN 562 Artist Diploma Recital 2.
(0) (Complete descriptions are to be found under Examinations and Goals in Practical Subjects in the Music Chapter of the University Calendar.)
MUIN 563 Artist Diploma Recital 3.
(0) (Complete descriptions are to be found under Examinations and Goals in Practical Subjects in the Music Chapter of the University Calendar.) (Restriction: Not open to students who have taken MUIN 562 prior to 200509.)
MUIN 569 Artist Diploma Concerto 2.
(1) (Prerequisite: MUIN 469)

**MUIT-Instrumental Techniques**

Offered by: **Theory**

- **MUIT 201 String Techniques.**
  (3) (3 hours and 2 hours lab) (Corequisites: MUTH 110 or MUTH 111 AND MUSP 129 or MUSP 131 AND MUHL 184 or MUHL 185.) The fundamental techniques in performance of four common stringed instruments, i.e., violin, viola, cello, and bass. Principles of sound production on stringed instruments, historical development of the strings, purchase of new and used instruments, maintenance and repairs, teaching procedures and reference materials.

- **MUIT 202 Woodwind Techniques.**
  (3) (3 hours and 2 hours lab) (Corequisites: MUTH 110 or MUTH 111 AND MUSP 129 or MUSP 131 AND MUHL 184 or MUHL 185.) The fundamental techniques in performance of five common woodwind instruments, i.e., clarinet, flute, oboe, bassoon, and saxophone. Principles of sound production, historical development of the woodwinds, purchase of new and used instruments, maintenance and repairs, teaching procedures and reference materials.

- **MUIT 203 Brass Techniques.**
  (3) (3 hours and 2 hours lab) (Corequisites: MUTH 110 or MUTH 111 AND MUSP 129 or MUSP 131 AND MUHL 184 or MUHL 185.) The fundamental techniques in performance of five common brass instruments, i.e., trumpet, horn, trombone, baritone, and tuba. Principles of sound production, historical development of the brass, purchase of new and used instruments, maintenance and repairs, teaching procedures and reference materials.

---

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

† Professional Practice (Stage) in Dietetics involving special prerequisites.
✦ Indicates that departmental approval/permission must be obtained by a student prior to registration.
‡ Denotes courses not available as Education electives.
❉ Denotes courses taught only in alternate years.
▲ Indicates courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
• Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
MUJT 204 Percussion Techniques.  
(3) (3 hours and 2 hours lab) (Corequisites: MUTH 110 or MUTH 111 AND MUSP 129 or MUSP 131 AND MUHL 184 or MUHL 185.) The fundamental techniques in performance of percussion instruments commonly in use in symphonic bands and orchestras. Principles of sound production, historical development of the percussion, purchase of new and used instruments, maintenance and repairs, teaching procedures and reference materials.

MUJT 250 Guitar Techniques.  
(3) (3 hours) (Corequisites: MUTH 110 or MUTH 111 AND MUSP 129 or MUSP 131 AND MUHL 184 or MUHL 185.) The fundamental techniques in guitar performance.

MUJT 302 Advanced Wind Techniques.  
(3) (3 hours and 2 hours lab) (Prerequisites: MUJT 202, MUJT 203.) Continued exploration of brass and woodwind pedagogy. Methods for developing technique and musical sensitivity in beginning and intermediate performers will be explored through in-depth study of heterogeneous and homogeneous instrumental methods. Skill on secondary instruments and diagnostic and prescriptive technical abilities will be extended through Lab performances and individual coaching projects.

MUJT 315 Instrumental Conducting.  
(3) (3 hours and 2 hours lab) (Prerequisites: MUTH 211, MUSP 229, MUGT 215, MUJT 201 or MUJT 250, MUJT 202, MUJT 203, MUJT 204.) (Restriction: Open to non-music education students with permission of instructor.) The fundamental skills of instrumental conducting, including baton technique, score analysis, and rehearsal procedures; conducting materials are selected from representative orchestral works.

MUJT 356 Jazz Instruction: Philosophy and Techniques.  
(3) (3 hours) (Prerequisites: MUJT 202, MUJT 203, MUJT 204. May be taken by Jazz Performance students with approval of instructor.) Introduction to techniques for the development of school and community-based jazz programs. Topics will include: philosophy of jazz instruction, rhythm section, musical materials, techniques to develop improvisation and aural skills, jazz styles, score preparation, rehearsal techniques, and administration of jazz programs. Will include observation of rehearsals and coaching opportunities.

MUJZ-Jazz Studies  
Offered by: Performance

MUJZ 160 Jazz Materials 1.  
(3) (4 hours) (Prerequisite: none. Open to non-jazz majors, space permitting, but not for elective credit in B.Mus. or Artist Diploma programs) Fundamental aural and theoretical skills associated with the jazz idiom. Nomenclature, chord construction, chord relationship, harmonic progression, circle of 5ths, simple turnarounds, simple substitution, symmetrical scales and chord relationships, voice leading.

MUJZ 161 Jazz Materials 2.  
(3) (4 hours) (Prerequisite: MUJZ 160. Open to non-jazz majors, space permitting, but not for elective credit in B.Mus. or Artist Diploma programs) Simple and advanced substitution, borrowed chords, reharmonisation, modes of harmonic minor and melodic minor dominant resolutions, odd and infrequent modulations, mixed two-five-ones, introduction to polychords, slashchords and non-functional harmony.

MUJZ 170 Jazz Keyboard Proficiency 1.  
(1) (1 hour) (Prerequisite: none. Open only to Jazz Performance Majors. May not be taken for elective credit in B.Mus. or Artist Diploma programs) Basic piano skills, basic comping techniques, standard 3 note rootless voicings in 7, 3 and 7 position with one extension, two-five-ones in major and minor - limited keys. Simple substitution and reharmonisation.

MUJZ 171 Jazz Keyboard Proficiency 2.  
(1) (1 hour) (Prerequisite: MUJZ 170. Open only to Jazz Performance Majors. May not be taken for elective credit in B.Mus. or Artist Diploma programs) Continuation of previous semester. Two-five-ones and mixed two-five-ones using 4 note close position voicings and 4 and 5 note spreads, in all keys, diminished passing chords, half step shifts, voice leading extensions, quartal and modal voicing, sight reading of standard jazz repertoire.

MUJZ 223 Jazz Improvisation/Musicianship 1.  
(3) (3 hours) (Prerequisite: none.) (Restriction: Open only to Jazz Performance Majors) Basic improvisational concepts with emphasis on time feel, phrasing, articulation, melodic development, voice leading, harmonic control and stylistic nuance. Memorization and aural recognition of standard jazz repertoire also stressed. The aural tradition of the music is emphasized through rhythmic/melodic dictation.

MUJZ 224 Jazz Improvisation/Musicianship 2.  
(3) (3 hours) (Prerequisite: MUJZ 223.) (Restriction: Open only to Jazz Performance Majors) Continuation of Jazz Improvisation/Musicianship MUJZ 223.

MUJZ 260 Jazz Arranging 1.  
(3) (Corequisite: MUJZ 223.) (Restriction: Open only to Jazz Performance Majors) Not open to students who have taken MUJZ 261D1/D2.) Introduction to concepts and techniques commonly used in jazz arranging. Notation, calligraphy and score preparation are discussed; including study of classical and contemporary scores by prominent jazz arrangers.

MUJZ 261 Jazz Arranging 2.  
(3) (Prerequisite: MUJZ 260.) (Corequisite: MUJZ 224.) (Restriction: Open only to Jazz Performance Majors. Not open to students who have taken MUJZ 261D1/D2.) Consolidation of knowledge of basic concepts and techniques used in jazz arranging.

MUJZ 261D1 (3), MUJZ 261D2 (3) Jazz Arranging.  
(Students must register for both MUJZ 261D1 and MUJZ 261D2.) (No credit will be given for this course unless both MUJZ 261D1 and MUJZ 261D2 are successfully completed in consecutive terms) (MUJZ 261D1 and MUJZ 261D2 together are equivalent to MUJZ 261) Introduction to concepts and techniques commonly used in jazz arranging. Notation, calligraphy and score preparation are discussed; class lectures include study of classic and contemporary scores by prominent jazz arrangers. Student writing projects for ensembles ranging from two horns to full jazz ensemble are recorded and discussed in class.

MUJZ 340 Jazz Composition 1.  
(3) (Prerequisites: MUJZ 224, MUJZ 260, MUJZ 261.) (Restriction: Open only to Jazz Performance Majors. Not open to students who have taken MUJZ 340D1/D2.) Jazz composition based on the stylistic concepts of leading jazz composers, Development of a personal and creative compositional style and of control of factors such as: rhythmic, harmonic, and melodic continuity, vertical modal, and linear modal harmony, polychordal techniques, and non-functional harmonic concepts.

MUJZ 340D1 (3), MUJZ 340D2 (3) Jazz Composition.  
(Students must register for both MUJZ 340D1 and MUJZ 340D2.) (No credit will be given for this course unless both MUJZ 340D1 and MUJZ 340D2 are successfully completed in consecutive terms) (MUJZ 340D1 and MUJZ 340D2 together are equivalent to MUJZ 340) A writing course based on the stylistic concepts of leading jazz composers. Development of a personal and creative compositional style and of control of factors such as: rhythm, harmonic, and melodic continuity, vertical modal, and linear modal harmony, polychordal techniques, and non-functional harmonic concepts. Analysis and discussion of selected compositions.

MUJZ 341 Jazz Composition 2.  
(3) (Prerequisites: MUJZ 260, MUJZ 261, MUJZ 340.) (Restriction: Open only to Jazz Performance Majors. Not open to students who have taken MUJZ 340D1/D2.) A continuation of development of a personal and creative jazz compositional style.
MUJZ 356 Jazz Pedagogy. 
(3) (3 hours) (Prerequisites: MUHL 393 and MUJZ 224.)
(Restriction: Open only to Jazz Performance Majors) Techniques for development of school, community-based and post-secondary jazz programs. Topics include: philosophy of jazz instruction, curriculum development, rhythm section, musical materials, techniques to develop improvisation and aural skills, jazz styles, idiomatic instrumental techniques, score preparation, rehearsal techniques and administration of jazz programs. May include coaching opportunities.

MUJZ 423 Jazz Improvisation/Musicianship 3. 
(3) (3 hours) (Prerequisite: MUJZ 224.) (Corequisite: MUJZ 340.) (Restriction: Open only to Jazz Performance Majors) Refinement of improvisational concepts in conjunction with ear training, leading towards the establishment of a personal style of playing. Complex forms and harmonies, and contemporary techniques. Memorization of large and varied repertoire is stressed. The ability to identify, transcribe and perform various melodies, rhythms, and complex harmonies by ear will be stressed.

MUJZ 424 Jazz Improvisation/Musicianship 4. 
(3) (3 hours) (Prerequisite: MUJZ 423.) (Restriction: Open only to Jazz Performance Majors) Continuation of Jazz Improvisation/Musicianship MUJZ 423.

MUJZ 440 Advanced Jazz Composition. 
(4) (2 hours) (Prerequisite: MUJZ 340.) (Corequisite: MUJZ 423.) (Restriction: Open only to Jazz Performance Majors) A continuation of MUJZ 340. This course will emphasize and facilitate the development of a personal and creative compositional style. Jazz aesthetics will be emphasized and explored in greater depth.

MUJZ 440D1 (2), MUJZ 440D2 (2) Advanced Jazz Composition. 
(Students must register for both MUJZ 440D1 and MUJZ 440D2.) (No credit will be given for this course unless both MUJZ 440D1 and MUJZ 440D2 are successfully completed in consecutive terms.) (MUJZ 440D1 and MUJZ 440D2 together are equivalent to MUJZ 440) A continuation of MUJZ 340. This course will emphasize and facilitate the development of a personal and creative compositional style. Jazz aesthetics will be emphasized and explored in greater depth.

MUJZ 461D1 (2), MUJZ 461D2 (2) Advanced Jazz Arranging. 
(2 hours) (Prerequisites: MUJZ 261 and MUJZ 340 OR permission of instructor.) (Corequisite: MUJZ 423.) (Restriction: Open only to Jazz Performance Majors) (Students must register for both MUJZ 461D1 and MUJZ 461D2.) (No credit will be given for this course unless both MUJZ 461D1 and MUJZ 461D2 are successfully completed in consecutive terms) This course introduces advanced concepts in jazz writing by examining scores by historically-important jazz composers/arrangers as contemporary masters. Student writing, including expanded combo, big band, and small group string projects, is geared toward public performance by McGill jazz ensembles and combos.

MUJZ 493 Jazz Performance Practice. 
(3) (3 hours) (Prerequisites: MUHL 393, MUJZ 224.)
(Restriction: Open only to Jazz Performance Majors) An in-depth exploration of the performance practice of leading jazz figures, primarily through the study of solo transcriptions. Comparative study of stylistic, technical, and aural differences in time feel, ornamentation, tone quality, articulation and harmonic and melodic approach. Detailed study of major rhythm sections and their interaction with soloists.

MUJZ 493 Jazz Performance Practice. 
(3) (3 hours) (Prerequisites: MUHL 393, MUJZ 224.)
(Restriction: Open only to Jazz Performance Majors) An in-depth exploration of the performance practice of leading jazz figures, primarily through the study of solo transcriptions. Comparative study of stylistic, technical, and aural differences in time feel, ornamentation, tone quality, articulation and harmonic and melodic approach. Detailed study of major rhythm sections and their interaction with soloists.

MUMT-Music Technology
Offered by: Theory

MUMT 201 Introduction to Music Technologies. 
(3) (3 hours) (Prerequisite: none) (Restriction: Not open to students in the following programs: B.Mus. Honours in Music Technology; B.Mus. Minor in Music Technology; B.A. Minor Concentration in Music Technology; B.Sc., Minor in Music (Technology) A general introduction to the history and techniques of music technology to include: synthesis, MIDI, sequencing, sampling, digital audio, music and audio for the Internet, sound recording, interactive music systems, and notation systems.

MUMT 202 Fundamentals of New Media. 
(3) (3 hours) (Prerequisites: none) (Restriction: Open only to students in Music Technology, including those in Minor Programs, and students in Sound Recording, and Composition) Combining theory and practice, the course covers the areas of MIDI, sound/image/MIDI sequencing, sampling, mixing, soundfile processing and editing, elementary music systems programming, and use of the Internet for sound/music/image.

MUMT 203 Introduction to Digital Audio. 
(3) (3 hours) (Prerequisite: MUMT 202) An introduction to the theory and practice of digital audio. Topics include: sampling theory; digital sound synthesis methods (additive, subtractive, summation series); sound processing (digital mixing, delay, filters, reverberation, sound localization); software-based samplers; real-time sound processing; interactive audio systems. Hands-on exercises are included.

MUMT 250 Music Perception and Cognition. 
(3) (3 hours) (Prerequisite: MUMT 202) An introduction to the theory and practice of digital audio. Topics include: sampling theory; digital sound synthesis methods (additive, subtractive, summation series); sound processing (digital mixing, delay, filters, reverberation, sound localization); software-based samplers; real-time sound processing; interactive audio systems. Hands-on exercises are included.

MUMT 301 Music and the Internet. 
(3) (3 hours) (Prerequisite: MUMT 201 OR MUMT 202) Technologies and resources of the Internet (access tools, data formats and media) and Web authoring (HTML) for musicians; locating, retrieving and working with information; putting information online; tools for music research, music skills development, technology-enhanced learning, music productivity, and promotion of music and musicians. Evaluation of Internet music resources.

MUMT 302 New Media Production 1. 
(3) (3 hours) (Prerequisite: MUMT 201 OR MUMT 202) (Restriction: Not open to students in B.Mus. Honours in Music Technology) Methods and techniques for producing and modifying musical and audiovisual content in new media applications. Media formats: audiovisual sequences (QuickTime), CD-ROMs and interactive CD-ROMs, DVD, surround sound audio. Also covered: software-based synthesis and sampling, techniques for image scanning, audio capture, content manipulation, media compression and format conversion.

MUMT 303 New Media Production 2. 
(3) (3 hours) (Prerequisite: MUMT 301) (Restriction: Not open to students in B.Mus. Honours in Music Technology) A continuation of MUMT 302. Students produce new media objects of increasing complexity and scope, integrating several types of content.

(3) (3 hours) (Prerequisites: MUMT 202 and MUMT 203) Pre-/Co-requisite: COMP 251) Concepts, algorithms, data structures, and programming techniques for the development of music and audio software, ranging from musical instrument design to interactive music performance systems. Student projects will involve the development of various music and audio software...
MUPG-Performance

Offered by: Performance

MUPG 100 Life as Professional Musician.
(1) (1 hour) (Prerequisite: none. May not be taken for elective credit in B.Mus. or Artist Diploma programs) An introduction to the responsibilities and skills required of a professional musician; job options, stage presence, rehearsal etiquette, contracts, professional organizations, freelancing, auditions, special health problems, etc.

MUPG 201 Basic Lyric Diction.
(1) (2 hours.) (Restriction(s): for voice concentration students, and others with permission of instructor. Not available to vocal performance students.) Practical application of the fundamentals of English, Italian and Latin pronunciation in singing, utilizing the International Phonetic Alphabet in song, opera, oratorio and choral texts.

MUPG 202 Basic Lyric Diction.
(1) (2 hours) (Restriction(s): for voice concentration students, and others with permission of instructor. Not available to vocal performance students.) Practical application of the fundamentals of German, French and Spanish pronunciation in singing, utilizing the International Phonetic Alphabet in song, opera, oratorio and choral texts.

MUPG 210 Italian Diction.
(2) (2 hours) (Prerequisite: none) Study of International Phonetic Alphabet. Study of Italian pronunciation in singing using song and opera texts.

MUPG 211 French Diction.
(2) (2 hours) (Prerequisite: MUPG 210) Study of French pronunciation in singing using song and opera texts.

MUPG 212 English Diction.
(2) (2 hours) (Prerequisite: none) Study of International Phonetic Alphabet. Study of Standard English pronunciation in singing using song and opera texts with a special emphasis on problematic vowels, diphthongs and consonants.

MUPG 213 German Diction.
(2) (2 hours) (Prerequisite: MUPG 212) Study of German pronunciation in singing using song and opera texts.

MUPG 272D1, MUPG 272D2 (2) Continuo.
(2 hours) (Prerequisites: MUTH 111 AND permission of instructor. Enrolment limited to 6) (Students must register for both MUPG 272D1 and MUPG 272D2) (No credit will be given for this course unless both MUPG 272D1 and MUPG 272D2 are successfully completed in consecutive terms) An historically-oriented study of the principles of figured-bass. The student will realize at sight elementary bass patterns. Standard idioms from historical treatises will be introduced.

MUPG 315D1, MUPG 315D2 (2) Introduction to Orchestral Conducting.
(2 hours) (Prerequisites: MUTH 211, MUSP 229, MUCO 261, MUGT 215, and permission of instructor) (Students must register for both MUPG 315D1 and MUPG 315D2) (No credit will be given for this course unless both MUPG 315D1 and MUPG 315D2 are successfully completed in consecutive terms) Emphasis on classical repertoire (Haydn, Mozart, Beethoven). Practical analysis and score preparation, style, and interpretation. Development of a clear and expressive technique. Some practical experience.

MUPG 370 Keyboard Improvisation.
(2) (2 hours) (Prerequisites: audition and Piano Major Performance 1 Examination or audition for students in programs other than Performance. Open to all keyboard instruments except Jazz) Development of harmonic skills necessary for simple improvised accompaniment, using classical folk and popular music examples. Left-hand accompaniment in varied metres. Different forms of arpeggiation and left-hand accompaniment. Modal materials. Pedal-point. Free improvisation within simple formal structures. Recordings and published materials used to support individual development.

MUPG 372D1 (1), MUPG 372D2 (1) Continuo.
(1) (hour) (Prerequisites: MUPG 272 AND permission of instructor. Enrolment limited to 4) (Students must register for both MUPG 372D1 and MUPG 372D2) (No credit will be given for this course unless both MUPG 372D1 and MUPG 372D2 are successfully completed in consecutive terms) A study of 17th and 18th Century styles of figured-bass accompaniment as revealed in contemporary sources. The emphasis will be on the realization at the keyboard of representative works using original sources.

MUPG 473 Special Project in Performance.
(1) For details, contact the Department of Performance.

MUPG 474 Special Project in Performance.
(2) For details, contact the Department of Performance.

MUPG 475 Special Project in Performance.
(3) For details, contact the Department of Performance.

MUPG 541 Senior Piano Seminar.
(2) (3 hours) (Prerequisites: MUPG 315D1 and 3 semesters of MUEN 331 and 4 semesters of MUEN 493) (Restriction: Only open to Faculty of Music Piano Performance students) In-class performance and analysis of solo and ensemble repertoire, including historical and modern recordings.

MUPG 542 Senior Piano Seminar.
(2) (3 hours) (Prerequisite: MUPG 541) (Restriction: Only open to Faculty of Music Piano Performance students.) Issues of piano pedagogy and preparation for competitions.

MUPG 590 Vocal Styles and Conventions.
(3) (3 hours) (Restriction: Not open to students who have taken MUPG 690.) Emphasis on vocal performance practices through practical application: text, language, inflection, pronunciation and interpretation considered with individuality of each student's voice and technical development. After examining historical treatises, students will discuss and present musical selections utilizing modern performance standards yet remaining true to stylistic demands of each period.

MUPP-Performance Practice

Offered by: Theory

MUPP 381 Topics: Performance Practice before 1800.
(3) (Restriction: Enrolment limited to 20. May not be taken by students who have had MUPP 381, MUPP 382, or MUPP 384, except by permission of instructor) Issues in performance practice of prenineteenth-century music. Topics may include rhythmic interpretation, voices and instruments in Medieval and Renaissance polyphony, ornamentation, improvisation, performance venues and context. Sources include original notation and modern editions, treatises, iconography, organology, analysis, criticism, and recordings.
MUSP-Musicianship
Offered by: Theory

MUSP 129 Musicianship 1.
(2) (2 hours, plus 2 hours Choral Solfège Lab) (Prerequisite: Admission to the B.Mus. or L.Mus., or L.Mus. program through audition and placement tests in Musicianship (including Keyboard Proficiency) and Theory. Open to students from other Faculties with permission of Musicianship Co-ordinator; McGill Conservatory Secondary V or equivalent level in Ear Training. Corequisites: MUTH 110 and MUSP 170) Rhythm (basic duplet-triple divisions); Isolated Sonorities (intervals, triads, tonal-modal collections); non-modulating Tonal Melodic Structures; Score Reading with treble-bass-alto clefs; Atonal Structures (cells with intervals to fifth excluding tritone); species-counterpoint-like Multipart Structures; Repertoire Building (MUTH 110).

MUSP 129D1 (1), MUSP 129D2 (1) Musicianship 1.
(Students must register for both MUSP 129D1 and MUSP 129D2.) (No credit will be given for this course unless both MUSP 129D1 and MUSP 129D2 are successfully completed in consecutive terms) (MUSP 129D1 and MUSP 129D2 together are equivalent to MUSP 129) Rhythm (basic duplet-triple divisions); Isolated Sonorities (intervals, triads, tonal-modal collections); non-modulating Tonal Melodic Structures; Score Reading with treble-bass-alto clefs; Atonal Structures (cells with intervals to fifth excluding tritone); species-counterpoint-like Multipart Structures; Repertoire Building (MUTH 110).

MUSP 170 Keyboard Proficiency.
(1) (1 hour) (Prerequisite: Admission to the B.Mus. or L.Mus. program through audition and placement tests in Musicianship and Theory) A remedial piano skills course for students who have been admitted to the B.Mus. or L.Mus. program but who were unable to pass the basic Keyboard Proficiency Test administered to all incoming students (with the exception of those students whose principal instrument is keyboard who are automatically exempt from MUSP 170). The course focuses on preparing students to retake the Test (see Keyboard Proficiency Test).

MUSP 171 Keyboard Lab 1.
(1) (1 hour) (Prerequisite: completion of, or concurrent re-enrolment in, MUSP 170.) (Corequisites: MUTH 111 and MUSP 171.) (Restriction: All students admitted to B.Mus and L.Mus. programs, including those with keyboard or guitar as their principal instrument, are required to take MUSP 171 Keyboard Lab, unless exempt on the basis of a placement test. Students who are exempt from MUTH 111 through placement tests must still take MUSP 171 (unless exempt) since this course forms the foundation of keyboard-based musicianship tasks at upper levels. (All Majors in Jazz Performance substitute MUJZ 171 for MUSP 171. Students in Jazz Performance who have completed MUSP 170 and MUJZ 171, and who transfer to a Department of Theory program, will be required to complete MUSP 171.) Students who do not achieve a continuation pass in MUSP 171 must reregister for the course in the semester immediately following. Students who do not achieve a continuation pass after repeating the course will not be allowed to proceed with further Musicianship or Theory studies until a continuation pass is achieved. Tests for MUSP 171 are held in August-September, December-January, and April-May (as well as during the Summer Session when offered), the exact dates determined by the Department of Theory.) Course contents parallel those of MUTH 111 with emphasis on memorization of diatonic paradigmatic harmonic progressions (prolongational and cadential) and on their combination in phrases; realization of elementary figured bass; additional tasks include harmonization of simple melodies and elementary score reading using treble, bass, and alto clefs (also some tenor clef).

MUSP 172 Keyboard Lab 2.
(1) (Prerequisites: MUSP 171 and MUSP 171.) (Corequisites: MUSP 172, MUSP 210.) (Course contents parallel those of MUTH 210, MUSP 229.) Keyboard studies with emphasis on memorization and transcription of diatonic sequences; use of seventh chords in diatonic and chromatic contests; augmented sixth and Neapolitan sixth chords, pivot chords, enharmonic and common-tone modulation; practical command of orchestral score analysis at the keyboard.

MUSP 229 Musicianship 3.
(2) (2 hours) (Prerequisites: MUSP 129.) (Corequisite: MUTH 210 and MUSP 210.) Rhythm (six-, five- and seven-part subdivisions); Isolated Sonorities (triads, dominant, supertonic, leading-tone sevenths); Tonal Melodic Structures tonicizing V, III (also vi, vi); Score Reading with treble-bass-alto-tenor clefs; Atonal Structures (basic cell combinations); dance-suite Multipart Structures; Harmonic Progressions including sequential paradigms; Repertoire Building (MUTH 210).

MUSP 231 Musicianship 4.
(2) (2 hours, plus Keyboard lab) (Prerequisite: MUSP 210 and MUSP 210.) (Corequisite: MUTH 211.) Rhythm (eight-part subdivisions, smaller note values); Isolated Sonorities (applied, neapolitan, augmented sixth chords); Tonal Melodic Structures tonicizing related scale-steps; Score Reading with treble-bass-alto-tenor-soprano clefs; Atonal Structures (basic cell combinations); instrumental-texture Multipart Structures; applied chords and tonal collections; non-modulating Tonal Melodic Structures tonicizing related scale-steps; Score Reading with treble-bass-alto-tenor-soprano clefs; Atonal Structures (basic cell combinations); instrumental-texture Multipart Structures; Harmonic Progression with early-19th-century uses of chromatic chords; Score Reading (19th-century repertoire).

MUSP 329 Musicianship 5.
(2) (2 hours) (Prerequisite: MUSP 231.) (Corequisite: MUTH 310 or MUTH 327) Rhythm (mixed divisions, basic polyrhythms); Isolated Sonorities (dominant ninths, thirteenth with early-19th-century uses of chromatic chords; Harmony Progression with early-19th-century textures of chromatic chords; Score Reading (19th-century repertoire).

MUSP 331 Musicianship 6.
(2) (2 hours) (Prerequisite: MUSP 329.) (Corequisite: MUTH 310 or MUTH 427) Rhythm (20th-century practices); Isolated Sonorities (trichordal set-classes); chromatically-complex shorter or longer common-practice Tonal Melodic Structures; Atonal Structures (20th-century repertoire items); two-part 20th-century Multipart Structures; Harmonic Progression with late-19th-century chromatic and extended-motulatory paradigms; Score Reading (20th-century repertoire).

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
† Professional Practice (Stage) in Dietetics involving special prerequisites
✦ Indicates that departmental approval/permission must be obtained by a student prior to registration.
▲ Denotes courses not available as Education electives.
‡ Denotes courses taught only in alternate years.
 Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.
 Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

2007-2008 Undergraduate Programs Calendar, McGill University
C-159
(MUSIC) MUTH-MUSIC THEORY AND ANALYSIS

MUSR-Sound Recording
Offered by: Theory

MUSR 232 Introduction to Electronics.
(3) (2 hours lecture plus 2 hours laboratory.) (Prerequisite or corequisite: MATH 112. Available as Arts/Science elective in B.Mus. programs.) (Restriction: Not open to students who have taken MUMT 232.) Basics of electricity including: Ohm's law, electronic components, DC circuits, block diagram, amplifiers, filters, power supplies, electrical measurements (frequency levels, distortion). Emphasis will be placed on electronics applied to audio.

MUSR 300D1 (3), MUSR 300D2. Introduction to Music Recording.
(3) (3 hours lecture plus 4 hours studio time.) (Prerequisite: MUCO 242 or MUCO 341. Prerequisites or corequisites: MUTH 211 and permission of instructor.) (It is recommended that all students taking this course register concurrently for PHYS 224 Physics and Psychophysics of Music if they do not already have a background in this subject.) (Students must register for both MUSR 300D1 and MUSR 300D2.) (No credit will be given for this course unless both MUSR 300D1 and MUSR 300D2 are successfully completed in consecutive terms.) (Restriction: Not open to students who have taken MUMT 300D1/D2.) The theory and practice of music recording including a study of recording environments, equipment and studio techniques. The analysis of music scores and recordings with respect to the requirements and possibilities of the recording studio. Studio work will include recording sessions, recording of live concerts, editing, mixing and music p.a.

MUSR 339 Introduction to Electroacoustics.
(3) (2 hours lecture plus 2 hours laboratory.) (Prerequisite: MUSR 232 (previously MUMT 232). Available as Arts/Science elective in B.Mus. programs.) (Restriction: Not open to students who have taken MUMT 339.) Basic principles of operation and design of electroacoustical devices and systems; transducers and signal processing devices; magnetic tape sound recording - reproducing systems; disc recording, motion picture sound recording and reproducing systems; practical demonstration of some of these devices and associated measuring, testing and analyzing equipment and techniques.

MUTH-Music Theory and Analysis
Offered by: Theory

MUTH 110 Melody and Counterpoint.
(3) (4 hours) (Prerequisite: Matriculation Music or McGill Conservatory Theory Secondary V or its equivalent. Corequisites: MUSP 129 and MUSP 170 or permission of co-ordinator or instructor) Introduction to principles of melodic and contrapuntal structure through the traditional species of counterpoint: first through fifth species in two parts; first species in three parts. Analysis and compositional modelling of repertoire in medieval-renaissance and 20th-century idioms. Notation, elementary acoustics, review of rudiments.

MUTH 111 Elementary Harmony and Analysis.
(3) (4 hours) (Prerequisite: MUTH 110.) (Corequisites: MUSP 131 and MUSP 171) Diatonic chords, harmonic progression, the concept and practice of tonality, simple modulation, seventh chords and secondary dominants. Small forms from c.1700 to the early 19th Century will be analyzed. Written four-part exercises will be required.

MUTH 210 Tonal Theory and Analysis 1.
(3) (3 hours) (Prerequisites: MUTH 110 and MUTH 111.) (Corequisite: MUSP 229.) (Prerequisite or corequisite: MUSP 171.) Compositional resources of early and mid-18th Century music. Thorough review of elementary harmonic procedure. Introduction to chromatic alteration and linear chords, and to analysis of imitative and invertible counterpoint. Analysis of common forms of the period c.1700 - 1770, including principal Baroque forms, but not including the Classical sonata.

MUTH 211 Tonal Theory and Analysis 2.
(3) (3 hours) (Prerequisite: MUTH 210.) (Corequisite: MUSP 231) Compositional resources of late 18th and early 19th Century music. Analysis of forms common to the period c.1770 - 1830, including Classical sonata forms in several media. Writing of short pieces for keyboard, piano and voice, and string quartet.

MUTH 301 Modal Counterpoint 1.
(3) (3 hours) (Prerequisites: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171) Polyphonic techniques of the Renaissance period studied through analysis of works by Palestrina and others and through written exercises in two to three voices.

MUTH 302 Modal Counterpoint 2.
(3) (3 hours) (Prerequisite: MUTH 301) Continuation of Modal Counterpoint 1. Study of more advanced techniques through further analysis and written exercises in three or more voices.

MUTH 303 Tonal Counterpoint 1.
(3) (3 hours) (Prerequisites: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171) The contrapuntal techniques of J.S. Bach studied through detailed technical analysis of his work and through written exercises in two to three parts.

MUTH 304 Tonal Counterpoint 2.
(3) (3 hours) (Prerequisite: MUTH 303) Continuation of Tonal Counterpoint 1. Further analysis and written exercises in three to four parts with special emphasis on fugal techniques.

MUTH 310 Mid and Late 19th-Century Theory and Analysis.
(3) (3 hours) (Prerequisites: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171) Expanded harmonic resources of the late 19th Century (e.g., foreign modulation, chromatic harmony). Analysis of characteristic small and large forms. Development of writing and analytical skills with a goal toward perceiving how levels of musical structure interact.

MUTH 311 20th-Century Theory and Analysis.
(3) (3 hours) (Prerequisite: MUTH 310) Exploration of 20th-Century systems of pitch organization and attitudes toward counterpoint (e.g., polytonality, modal systems, neo-classical tonality, serialism, linear counterpoint, etc.). Examination of the relationship of these systems to earlier practices. Development of written and analytical skills for the purpose of gaining insight into 20th-Century principles and techniques.

MUTH 312 19th-Century Theory and Analysis/Jazz Majors.
(3) (3 hours) (Prerequisites: MUTH 211 or MUCO 261 AND MUIZ 161.) (Restriction: Open only to Jazz Performance Majors) Expanded harmonic resources of the late 19th-Century (e.g., foreign modulation, chromatic harmony). Analysis of characteristic small and large forms. Development of writing and analytical skills with a goal toward perceiving how levels of musical structure interact. This course is oriented towards students with Jazz theoretical background.

MUTH 313 20th-Century Theory and Analysis/Jazz Majors.
(3) (3 hours) (Prerequisite: MUTH 312.) (Restriction: Open only to Jazz Performance Majors) 20th-Century systems of musical organization (e.g., polytonality, modal systems, neo-classical tonality, serialism, linear counterpoint) and their relationship to earlier practices. Development of writing and analytical skills to gain insight into 20th-Century principles and techniques. This course is oriented towards students with Jazz theoretical background. Unless otherwise indicated the following courses are prerequisites to 300-, 400- and 500- level theory courses: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171.

MUTH 327 19th-Century Analysis.
(4) (2 hours) (Prerequisites: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171) The analysis of representative works of the 19th Century, selected from various genres of the period encompassed by late Beethoven, Schubert, and Berlioz to Mahler and Wolf. Some preliminary work in Schenkerian analysis will be undertaken.

MUTH 327D1 (2), MUTH 327D2 (2) 19th-Century Analysis.
(Students must register for both MUTH 327D1 and MUTH 327D2) (No credit will be given for this course unless both MUTH 327D1 and MUTH 327D2 are successfully completed in consecutive terms) (MUTH 327D1 and MUTH 327D2 together are equivalent to MUTH 327) (Prerequisites: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171) The analysis of representative works of the 19th Century, selected from various genres of the period encompassed by late Beethoven, Schubert, and Berlioz to Mahler and Wolf. Some preliminary work in Schenkerian analysis will be undertaken.
MUTH 426 Analysis of Early Music.
(3) (3 hours) (Prerequisites: MUTH 211, MUHL 184) Music from before 1700 is analyzed using recently developed techniques as well as materials gathered from treatises contemporaneous with the music. The implications of analysis for performance are considered.

MUTH 427D (2), MUTH 427D2 (2) 20th-Century Analysis.
(2 hours) (Students must register for both MUTH 427D1 and MUTH 427D2.) No credit will be given for this course unless both MUTH 427D1 and MUTH 427D2 are successfully completed in consecutive terms (Prerequisites: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171) Analysis of a cross-section of 20th Century music from Debussy and Mahler to the present: 1) provide analytical tools necessary for the understanding of pitch organization, form, rhythm, timbre, etc., in individual works; 2) introduce salient theoretical approaches pertaining to 20th Century music.

MUTH 461 Choral and Keyboard Arranging.
(2) (2 hours) (Prerequisite: MUTH 311 OR permission of instructor) An introduction to arranging techniques, and their application in settings for keyboard and choral resources. Materials include folksongs, carols, popular and original composed melodies. The emphasis is on creative arrangement as opposed to transcription.

MUTH 462 Instrumental Arranging.
(3) (2 hours) (Prerequisites: MUTH 461 AND MUIT 201, MUIT 202, MUIT 203 and MUIT 204 OR permission of instructor) The application of the general techniques studied in MUTH 461 to woodwind, brass and string ensembles, to various of which may be added keyboard, chorus, and percussion. Major assignments are prepared and recorded in workshops, and are subsequently discussed in class.

MUTH 475 Special Project.
(3) (3 hours) (Prerequisites: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171) For details contact the Department of Theory.

MUTH 475D1 (1.5), MUTH 475D2 (1.5) Special Project.
(Students must register for both MUTH 475D1 and MUTH 475D2.) No credit will be given for this course unless both MUTH 475D1 and MUTH 475D2 are successfully completed in consecutive terms (Prerequisites: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171) For details contact the Department of Theory.

MUTH 476 Special Project.
(6) (For details contact the Department of Theory.

MUTH 502 Theory Review 2.
(3) (3 hours) (For incoming graduate students who, on the basis of placement tests, are deemed deficient in tonal theory and analysis; may not be taken by students enrolled in B.Mus. programs; may not be taken as elective in M.Mus. and M.A. programs) (Prerequisites: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171) Analytical approaches to larger forms in solo, chamber, and orchestral genres. Various analytical methods are applied to the study of advanced chromatic vocabulary and syntax, and to large-scale tonal and formal design.

MUTH 503 Theory Review 3.
(3) (3 hours) (For incoming graduate students who, on the basis of placement tests, are deemed deficient in post-tonal theory and analysis; may not be taken by students enrolled in B.Mus. programs; may not be taken as elective in M.Mus. and M.A. programs) (Prerequisites: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171) Analytical approaches to 20th-century repertoire in extended tonal, atonal, twelve-tone, and later idioms. Analysis of pitch and pitch-class structure, and of rhythmic, timbral, and formal developments in 20th-century compositions.

MUTH 528 Schenkerian Techniques.
(3) (3 hours) (Prerequisite: MUTH 310 or MUCO 240 OR Corequisite: MUTH 327 OR permission of instructor.) (Restriction: Limited enrolment with preference given to students in Honours Theory) Introduction to the principles and techniques of Schenkerian analysis. Interpretation and construction of reductive graphs through the analysis of a diversified repertoire of tonal works. Comparison with traditional methods of harmonic analysis (Rameau, Riemann, etc.).

MUTH 529 Proseminar in Music Theory 1.
(3) (3 hours) (Prerequisites: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171) (Corequisites: MUTH 327 and MUHL 570 OR permission of instructor. Preference given to students in Honours Theory) A survey of various topics in contemporary music theory, including experimental aesthetics, indeterminacy, information theory, linguistics, microtonality, music technology, psycho-acoustics, and rhythmic theory.

MUTH 538 Mathematical Models/Musical Analysis.
(3) (3 hours) (Prerequisites: MUTH 211 or MUCO 240 and MUSP 231 and MUSP 171) A survey of the theoretical and analytical writings from 1955 to the present, with emphasis on the following topics: a) atonal music (the works of Forte, Lewin, Rahn, Clough, Benjamin); b) twelve-tone music (Babbitt, Lewin, Mead); c) contour theory (Friedmann, West Marvin, Morris); and d) mathematical groups and transformational models (Lewin, Morris, Starr).
Faculty of Religious Studies

RELG-Religious Studies

RELG 201 Religions of the Ancient Near East.
(3) (Fall) Introduction to the religions of Mesopotamia, Egypt and Syria-Palestine (excluding Israelite religion) from the fourth to first millennium B.C.E. Themes that will be discussed include: gods and goddesses, divine kingship, deification of kings, temple cult, death and afterlife, magic, piety, oracles, prayer, lament, myth and epic.

RELG 202 Religion of Ancient Israel.
(3) (Winter) An examination of the religion of Ancient Israel by a study of selected texts (narratives, laws, prophetic sayings, wisdom traditions, and psalms) from the Hebrew Scriptures/Old Testament in translation.

RELG 203 Bible and Western Culture.
(3) (Fall and Winter) To provide students of the humanities with knowledge of the Bible as a tool for interpreting religious references in Western literature, art and music. Biblical stories (e.g. Creation, Exodus), key figures (e.g. David, Job, Mary), and common motifs (e.g. Holy City, Pilgrimage, Bride) are explored, then illustrated by later cultural forms.

RELG 204 Judaism, Christianity and Islam.
(3) (Winter) An introduction to the beliefs, practices, and religious institutions of these three world religions.

RELG 207 The Study of World Religions 1.
(3) (Fall and Winter) An introduction to the study of Hinduism, Buddhism, Confucianism, Taoism, Judaism, Christianity, Islam and Primal Religions.

RELG 210 Jesus of Nazareth.
(3) (Fall) A critical study of ancient and modern accounts of the aims and person of Jesus. Attention will be given also to the question of the historical sources and to the relationship between faith and history.

RELG 232 Eastern Orthodox Mysticism and Contemporary Literature.
(3) (Winter) A survey of Eastern Orthodox mystical thought in 19th - 20th century authors studied against the background of early texts (in translation) of the Syro-Byzantine and Russian spiritual tradition and examined in light of modern literary-religious trends.

RELG 252 Hinduism and Buddhism.
(3) (Fall) The interaction of Hinduism and Buddhism in India with special reference to the law of Karma, caste, women, ritual, death, yoga, and liberation. Determination of interpretative principles for understanding the religious psychology of Hindus and Buddhists.

RELG 253 Religions of East Asia.
(3) (Winter) Harmony with nature, society, and cosmos to be explored through the religions of the Far East (Confucianism, Taoism, Buddhism and Shinto).

RELG 254 Introduction to Sikhism.
(3) (Winter) An introduction to the historical and religious context in which the Sikh religion developed, its principal doctrines, practices and institutions and its evolution from its origins to the present, both inside and outside India.

RELG 256 Women in Judaism and Islam.
(3) (Winter) The role of women in Judaism and Islam from the point of view of institutionalized religious traditions and of women's religious subjectivity; how women's spiritual and social roles within their religious traditions are shaped by Revealed Law, Holy Text and the Authority of Interpretation. Comparative sociology of religion approach.

RELG 257 Sanskrit.
(3) (Fall and Winter) An introduction to the language of Classical Tibetan, specifically Tibetan script and basic grammar.

RELG 258D1 and RELG 258D2 are successfully completed in 258D2.) (No credit will be given for this course unless both RELG 257D1 (3), RELG 257D2 Introductory Sanskrit.

RELG 261 Tibet.
(3) (Winter) An introduction to the language of Classical Tibetan, specifically Tibetan script and basic grammar.

RELG 262 Lower Intermediate Tibetan 1.
(3) (Fall) An introduction to the language of Classical Tibetan, specifically Tibetan script and basic grammar.

RELG 264 Introductory Tibetan 1.
(3) (Fall) An introduction to the language of Classical Tibetan, specifically Tibetan script and basic grammar.

RELG 265 Introductory Tibetan 2.
(3) (Winter) (Prerequisite: RELG 264) A continuation of the introduction to the language of Classical Tibetan, specifically Tibetan script and basic grammar.

RELG 270 Religious Ethics and the Environment.
(3) (Fall: Macdonald Campus [Ste. Anne-de-Beauvoir]. Winter: Downtown Campus.) Survey of issues and debates in environmental ethics. The challenge posed to human and religious values by the present ecological crisis and some ethical and religious responses to this challenge, Native American spirituality, Eastern and African religions, ecofeminism and liberation theology will be discussed, as will recent environmental debates concerning technology and large scale development projects. Lectures supplemented by guest speakers and audiovisual presentations.

RELG 271 Sexual Ethics.
(3) (Fall, Winter and Summer) A study of the social construction of sexual identity and of selected issues regarding sexual behaviour.

(6) (Summer) (Open to students in the Honours and Major programs in Religious Studies. Other Arts and Science students may take the course as an elective outside their faculty, in accordance with Arts and Science regulations) An introduction to the grammar and syntax of New Testament Greek.

RELG 280D1, 280D2 are successfully completed in consecutive terms) (RELG 280D1 and RELG 280D2 are equivalent to RELG 280) An introduction to the grammar and syntax of New Testament Greek.

RELG 281 The Gnostic Worldview.
(3) (Summer) On the basis of newly-discovered gnostic writings, forms of gnosticism will be studied in their relationship to Platonists, Jewish and Christian circles in the Graeco-Roman world. Attention to Manicheism, Mandeism and some medieval and modern representatives of the gnostic worldview.

RELG 300 Second Temple Judaism.
(3) (Fall) A survey of Jewish history and thought from Ezra to the Mishnah; religious developments and groups, e.g., apocalypticism, Hellenistic Judaism, Essenes, Pharisees, Early Christianity and Rabbinic Judaism; and Biblical Interpretation in the Dead Sea Scrolls, Philo, Paul, Mishnah and Midrashim.

RELG 301 Jewish Thought 200 B.C.E - 200 C.E.
(3) (Prerequisite: RELG 300 or the consent of the instructor) The religion and literature of sectarian groupings; Apocalyptic thought; Wisdom; Dead Sea Scrolls; Josephus.

RELG 302 Old Testament Studies 1.
(3) (Fall) An introduction to the literature of Ancient Israel in English translation. Reading and interpreting representative selections.

RELG 303 Literature of Ancient Israel 2.
(3) (Winter) Approaches to historical-critical scholarship and to the historical background of the Old Testament. Part of the course will be an examination of methods of biblical analysis through the use of learning cells.

RELG 306 Rabbinic Judaism.
(3) (Fall) (Prerequisite: RELG 202 or RELG 204 or permission of instructor) (Restriction: Not open to students who have taken RELG 206) The beliefs, practices and religious institutions of the Jews from ancient times to the present.

RELG 307 Bible, Quran & Interpretations.
(3) (Winter) Jewish, Christian and Muslim scriptures as responses to earlier sacred texts and in the light of post-scripural interpretations. The debates, polemics, interpretative strategies, and intellectual and spiritual sharing produced by these three religions in accepting, explaining, amplifying, modifying, and selectively rejecting their and other sacred scriptures.
RELG 308 Ancient Bible Translations.
(3) (Prerequisites: One of RELG 202, 302 or JWST 211, 327, 328, 329, 330.) Canonical changes, literary alterations, translation techniques, hermeneutical strategies, variant readings, and textual histories of the books of the Hebrew Bible as evidenced in the ancient versions, primarily the Septuagint. (No knowledge of Greek or Hebrew is required.)

(3) (Fall) An introduction to the interpretation of the New Testament.

(3) (Winter) An introduction to the critical study of the Gospels.

RELG 313 Topics in Biblical Studies 1.
(3) (Fall, Winter and Summer).

RELG 314 Topics in Biblical Studies 2.
(3) (Fall, Winter and Summer) Topics of current interest in or between world religions.

RELG 315 Special Topics in Religion 1.
(3) (Prerequisites: RELG 204 or RELG 252 or RELG 253) (Restriction: Not open to students who have taken RELG 496) Topics of current interest in or between world religions.

RELG 316 New Religious Movements.
(3) (Prerequisites: RELG 204 or RELG 252 or RELG 253) A critical analysis of the origins, character and influence of one or more religious movements of the 19th C. and beyond, with special attention to their religious principles and social function.

RELG 317 Special Topics in Religion 2.
(3) (Summer) (Prerequisites: RELG 204 or RELG 252 or RELG 253.) (Restriction: Not open to students who have taken RELG 496.) Topics of current interest in, or between, world religions.

RELG 318 Special Topics in Religion 3.
(3) (Summer) (Prerequisites: RELG 204 or RELG 252 or RELG 253.) (Restriction: Not open to students who have taken RELG 496.) Topics of current interest in, or between, world religions.

RELG 319 Special Topics in Religion 4.
(3) (Summer) (Prerequisites: RELG 204 or RELG 252 or RELG 253.) (Restriction: Not open to students who have taken RELG 496.) Topics of current interest in, or between, world religions.

RELG 322 The Church in History 1.
(3) (Fall) A survey of major developments in the history of Christianity from the end of the apostolic age to 1500. Selected readings from primary and secondary sources will be used.

RELG 323 The Church in History 2.
(3) (Winter) Significant events and persons in the history of western Christianity from 1500 - 1948 will be studied. Attention is focused on mainline denominations in Britain and continental Europe.

RELG 324 Armenian Apostolic Tradition.
(3) (Prerequisite: RELG 322) History of the Armenian Orthodox Apostolic Church from its foundation to the present: apostolic beginnings; St Gregory the Illuminator and the establishment of Christianity in Armenia in the fourth century; development of doctrine, ecumenical discussions; theology, mystical thought, liturgy, sacred art and architecture.

RELG 325 Varieties Religious Experience in Christianity.
(3) (Summer)

RELG 326 Ancient Christian Church ADS4 - AD604.
(3) (Fall) (Restriction: Not open to students who have taken RELG 322 or RELG 323) Significant persons and events from Nero's reign to the papacy of Gregory I. Attention to major Christian centres within the Roman Empire before Constantine, to the development of the Eastern Byzantine Church, and to the growth of the papacy in the West. Leading Christian theologians and thinkers will be studied.

RELG 330 Reformed Theology.
(3) (Fall) Selected topics illustrating the Reformers' theological agenda, with special reference to Luther, Zwingli and Calvin.

RELG 333 Principles of Christian Theology 1.
(3) (Winter) An introduction to the central categories of Christian theology. The course will include discussion of the nature of theology, and of all the primary areas of doctrine (Theology, Christology, Pneumatology, Anthropology, Ecclesiology, Eschatology). Throughout, a conscious attempt will be made to reflect on the Christian faith in the light of the contemporary apologetic situation.

RELG 334 The Christian Faith.
(3) (Fall) (Prerequisites: One of RELG 202, 204, 210, 302, 311, 312 or the equivalent.) A study of core Christian ideas and their relation to doxology, morality, history and culture.

RELG 336 Contemporary Theological Issues.
(3) (Fall) (Prerequisites: RELG 320 or RELG 338 or permission of instructor)

RELG 337 Themes in Buddhist Studies.
(3) (Winter) (Prerequisite: RELG 252 or RELG 253 or permission of instructor) A focussed examination of major themes within a branch of Theravada, Mahayana or Vajrayana Buddhism. Emphasis will be placed on both the close study of primary texts (in translation) in historical context and the application of recent methods to fundamental Buddhist concepts, ritual practices and community institutions.

RELG 338 Women and the Christian Tradition.
(3) (Core course for the Women's Studies Minor program) Survey of women's involvement in the Christian tradition. Topics include feminist interpretation of scripture, ideas of virginity, marriage and motherhood, mysticism, asceticisms, European witchhunts, contemporary women's liberation theories.

RELG 339 Gender & Sexuality in Buddhism.
(3) (Fall and Summer) (Core course for the Women's Studies Minor program) (Prerequisite: RELG 252 or permission of the instructor.) Religious perspectives on the body, gender and sexual activity in Buddhist cultures.

RELG 340 Religion and the Sciences.
(3) (Fall and Summer) Philosophies of science and of religion have created a more positive dialogue on questions of method, symbolism and rationality. Examines key issues (e.g. creation and evolution; objectivity and involvement; determinism and freedom) raised by natural and social sciences, and various possible solutions.

RELG 341 Introduction: Philosophy of Religion.
(3) (Fall) Introduction to the subject. Faith and reason, theistic arguments, values and destiny, the problem of evil, religious language.

RELG 342 Theravada Buddhist Literature.
(3) (Fall) (Prerequisite: RELG 252 or permission of instructor) The evolution of doctrines, practices and institutions explored through critical survey of Pali Canon (in translation), focusing on the dialogues of Gotama Buddha and his community during its first five centuries and on the historical accounts contained in the codes of monastic discipline.

RELG 343 Topics: Philosophy of Religion.
(3) (Fall and Summer)

RELG 344 Mahayana Buddhism.
(3) (Fall) The development of Buddhist sects examined through accounts of the first pan-Buddhist councils in India and an investigation of Mahayana through key sutras (in translation).
RELG 345 Religion and the Arts 1.
(3) (Fall, Winter and Summer) Topics of current interest in Religion and the Arts.

RELG 346 Myth and Symbol in Hindu and Buddhist Art.
(3)

RELG 347 Topics in Religion and the Arts.
(3) (Winter)

*RELG 348 Classical Hinduism.
(3) (Fall) (Prerequisite: RELG 252 or permission of the instructor) The study of classical Hindu values in historical context with reference to the goals and stages of life, traditional Hindu laws, ethics (including biomedical ethics), axiology and moral dilemmas in the Epics, gender differences, notions of orthodoxy, and the expansion of Hinduism.

RELG 350 Bhakti Hinduism.
(3) (Fall) (Prerequisite: RELG 252 or permission of the instructor) Foundation of theism in the Upanisads, Epics, Gita and puranas; image worship and temple religion in the Agamas; Vaisnavism, Saivism, Sakjism, and competition with Buddhism and Jainism; the relation of Bhakti and Tantra; interaction of Hinduism, Islam, and Sikhism.

*RELG 352 Japanese Religions.
(3) (Winter) (Prerequisite: RELG 253 or permission of instructor) A study of early Shinto mythology, Shinto-Buddhist syncretism, Neo-Confucianism and its influence upon the resurgence of Shinto during the Tokugawa period, folk religion and the New Religions.

RELG 353 Gandhi: His Life and Thought.
(3) (Summer)

RELG 354 Chinese Religions.
(3) (Fall) This course studies the Confucian classics, philosophical and religious Taoism, and Neo-Confucianism and also examines the syncretism between the Chinese religions and Indian Buddhism.

RELG 355 Religion and the Arts 2.
(3) (Summer) Topics of current interest in Religion and the Arts.

RELG 356 Gender & Sexuality in Hinduism.
(3) (Fall and Summer) (Prerequisite: RELG 252 or Permission of the instructor.) Religious perspectives on the body, gender and sexual activity in Hindu cultures. Topics include: dharma and sexual practice; female sexuality; Bhakti and Tantra; same-sex relations; hijras; eroticism in the literary, visual, and performing arts; colonialism, Hindu nationalism, and the politics of gender.

RELG 357D1, RELG 357D2 (3) Sanskrit 2.
(Prerequisite: RELG 257 or permission of the instructor) (Students must register for both RELG 357D1 and RELG 357D2.) (No credit will be given for this course unless both RELG 357D1 and RELG 357D2 are successfully completed in consecutive terms) Advanced grammar and vocabulary with readings in epic and similar texts.

RELG 361 Religious Behaviour.
(3) (Winter) A study of the psychological origins of religion, of some aspects of the religious life (e.g. prayer, conversion, mystical experiences), and of some contemporary religious phenomena (e.g. marginal religious groups, the charismatic movement, glossoalalia). The views of Freud and Jung are also considered.

RELG 363 Religion and the Arts in India.
(3) (Winter) Aspects of the arts in India (dance, music, drama, novels, film, sculpture and/or painting) as they relate to Hinduism.

RELG 364 Intermediate Tibetan 1.
(3) (Fall) (Prerequisite: RELG 265 or permission of the instructor.) Advanced Tibetan grammar, and translation of selected Tibetan texts.

RELG 365 Intermediate Tibetan 2.
(3) (Winter) (Prerequisite: RELG 364 or permission of the instructor.) Continuation of advanced Tibetan grammar and translation of selected Tibetan texts.

RELG 370 Human Condition.
(3) (Winter) Explores social justice as a key aspect of religious reforms in the 20th century; social justice, liberation theology and the human rights movement; human rights in the scriptures of the major world religions; perspectives on religious liberty and conscientious objection; religious critiques of the human rights movement.

RELG 371 Ethics of Violence/Non-Violence.
(3) (Winter) Forms of violence and the reaction of religious groups are assessed both for their effectiveness and for their fidelity to their professed beliefs. Different traditions, ranging from the wholesale adoption of violent methods (e.g. the Crusades) to repudiation (e.g. Gandhi; the Peace Churches).

RELG 372 Hindu Goddesses.
(3) (Fall) The mythology, theology, soteriology, history, ritual, and texts of the goddess-centred (Sakta) branches of Hinduism.

RELG 374 Topics: Philosophy of Religion.
(3)

RELG 375 Religion and Society.
(3) (Restriction: U2 and U3 students) A study of the sociology of religion in the light of the contemporary debates regarding secularization, the relation of religion and politics, and the emergence of new religious movements.

RELG 376 Religious Ethics.
(3) (Winter) A discussion of ethical theory will provide the background for an analysis of the relationship between religious world views and moral reason. Attention will be given to the way in which the dominant religious traditions view the exemplars of religious virtue, and to how the virtues exemplified are related to and justified by the faith traditions in which they operate.

RELG 377 Religious Controversies.
(3) (Fall) A comparative survey of types and topics of argumentation developed in the literature of controversy. Texts discussed include disputations, missionary sermons and polemical treatises.

RELG 381 Advanced New Testament Greek.
(3) (Fall) (Prerequisite: RELG 280 or equivalent, with a minimum grade of 70%) A review of grammar and syntax with an emphasis on rapid reading of sections chosen from different parts of the New Testament.

RELG 385 Religious Change.
(3) (Summer) A study of the Bahá’í Faith with an emphasis on its sacred practices, philosophical principles, practical ethics, history (including historical precedents), administrative structure, sacred texts, and theology of other regions.

RELG 389 Introduction to the Bahai Faith.
(3) (Summer) A study of the Bahá’í Faith with an emphasis on its sacred practices, philosophical principles, practical ethics, history (including historical precedents), administrative structure, sacred texts, and theology of other regions.

RELG 390 Elementary Biblical Hebrew.
(6) (Summer) An introduction to the grammar and syntax of Biblical Hebrew. Emphasis is placed on both the oral and the written language.

RELG 390D1, RELG 390D2 (3) Elementary Biblical Hebrew.
(Students must register for both RELG 390D1 and RELG 390D2.) (No credit will be given for this course unless both RELG 390D1 and RELG 390D2 are successfully completed in consecutive terms) An introduction to the grammar and syntax of Biblical Hebrew. Emphasis is placed on both the oral and the written language.

*RELG 399 Christian Spirituality.
(3) (Winter) Seminar exploring the phenomenon of internal religious experience in their relation to received formularies of Christian thought and practice.

RELG 404 Post Exilic Biblical Literature.
(3) (Fall)

*RELG 407 The Writings.
(3) (Prerequisites: RELG 202, or RELG 302 and RELG 303, or equivalent) A study of Job with some attention to Proverbs and Ecclesiastes (in English translation).

RELG 408 The Prophets.
(3) (Fall) (Prerequisites: RELG 202, or RELG 302 and RELG 303) A study of significant texts selected from the prophetic tradition in the Old Testament.
(3) (Winter) (Prerequisites: RELG 311 and RELG 312) A seminar in exegesis on the basis of representative passages chosen from different parts of the New Testament in English.

RELG 420 Canadian Church History.
(3) (Winter) (Prerequisite: RELG 323) A survey of the major Christian traditions in Canada from the settlement of New France to the present. Lectures and seminars with use, where possible, of primary source materials.

RELG 423 Reformation Thought.
(3) (Fall) An examination of issues and persons in Europe and the British Isles that contributed to ecclesiastical and social change during the 16th and early 17th centuries.

RELG 434 Principles of Christian Theology 2.
(3) (Fall) (Prerequisite: RELG 333) This course is a continuation of RELG 333.

RELG 438 Topics in Jewish Theology.
(3) (Winter) A topic in Jewish Theology will be studied from a variety of approaches, including historical sociological and phenomenological.

RELG 439 Religious Dialogues.
(3) (Winter) (Prerequisite: RELG 204 or RELG 207.) A comparative survey of the literature of Western religious dialogues, addressing the history and diversity of debates concerning religion. Texts to be discussed include dialogues by Plato, Cicero, Augustine, Boethius, Anselm, Cusanus, Leo Hebraeus, Erasmus, Thomas More, Jean Bodin, Leibniz and Hume.

RELG 442 Pure Land Buddhism.
(3) (Fall) (Prerequisite: RELG 252 and RELG 253, or RELG 342 or RELG 344, or permission of instructor) The concept of Buddha Countries and Pure Lands in Buddhism, the Western Pure Land of Amida (Jodokyo) and its basic scriptures, the Chinese Buddhist schools, the introduction to Japan and the foundation of the Pure Land school by Honen, the Pure Land School of Shinran and its development, and the other Pure Land related schools.

RELG 451 Zen: Maxims and Methods.
(3) (Fall) (Prerequisites: RELG 252, RELG 342 or RELG 344, or permission of instructor) Through the reading of such key Zen writings as The Platform Sutra and selections from Zen Masters Chinul of Korea and Dogen of Japan, an attempt will be made to relate Zen ancestry to meditational practice.

RELG 452 East Asian Buddhism.
(3) (Winter) (Prerequisite: RELG 253 or RELG 344) Topic for 2000: Precept and Ritual in East Asian Buddhism and Confucianism.

RELG 453 Vajrayana Buddhism.
(3) (Prerequisite: RELG 344.) A study of the history, philosophy and practices of Vajrayana Buddhism.

RELG 454 Modern Hindu Thought.
(3) (Prerequisite: RELG 252) A study of the developments in religious thought with special reference to such thinkers as Ram Mohan Roy, Dayananda Saraswati, Ramkrishna, Vivekananda, Gandhi, Tilak, Aurobindo, and Radhakrishnan.

RELG 456 Theories of Religion.
(3) (Fall and Winter) (Restriction: For Religious Studies Majors and Honours students or with permission of the Chair of the Religious Studies B.A. Committee) The history of the academic study of religion from its beginnings in the 19th century until the present. Key texts by figures such as Max Muller, Sigmund Freud, Emile Durkheim, Max Weber, Mircea Eliade, Claude Levi-Strauss and Clifford Geertz will be studied.

RELG 457D1 (3), RELG 457D2 (3) Advanced Sanskrit.
(Prerequisite: RELG 357 or permission of instructor) Students must register for both RELG 457D1 and RELG 457D2.) (No credit will be given for this course unless both RELG 457D1 and RELG 457D2 are successfully completed in consecutive terms) Critical reading of selected Sanskrit texts.

RELG 464 Advanced Tibetan 1.
(3) (Fall) (Prerequisite: RELG 365 or permission of instructor) Translation of specially selected Tibetan texts.

RELG 465 Advanced Tibetan 2.
(3) (Winter) (Prerequisite: RELG 464 or permission of the instructor.) Continuation of translation of specially selected Tibetan texts.

RELG 470 Theological Ethics.
(3) (Fall) (Prerequisite: RELG 341 or RELG 333) A study of the biblical and theological foundations of Christian ethics, and the nature, application and relevance of the Christian norm.

RELG 479 Christianity in Global Perspective.
(3) (Winter) (Prerequisites: RELG 333 and RELG 334.) This course examines traditional Western Christianity, aiming at theological integration in light of religious and cultural pluralism and with reference to issues of world wide concern (e.g. gender, ethnicity, poverty, work, environment).

RELG 482 Exegesis of Greek New Testament.
(3) (Winter) (Prerequisite: RELG 381 or equivalent, and RELG 311, RELG 312) An intensive seminar in exegesis on the basis of representative passages chosen from different parts of the New Testament.

RELG 491 Hebrew Texts.
(3) (Fall) Translation and exegesis of selected texts.

RELG 492 Hebrew Texts.
(3) (Winter) Translation and exegesis of selected texts.

(3) (Fall) (Prerequisite: permission of the Chair of the B.Th. Committee) Open to students in the final year of B.Th. Honours. Provides opportunity for advanced development of research interests and methods in the student's area of Honours specialization.

RELG 495 B.Th. Honours Seminar 2.
(3) (Winter) (Prerequisite: RELG 494 and permission of the Chair of the B.Th. Committee) Open to students in the final year of B.Th. Honours. Provides further opportunity for advanced development of research interests and methods in the student's area of Honours specialization.

RELG 496 Special Studies.
(3) (Fall and Winter)

RELG 497 Research Seminar.
(3) (Fall and Winter) (Students wishing to take this course must have the permission of the Religious Studies Adviser)

RELG 498 Special Studies.
(3) (Fall and Winter) (Prerequisite: permission of the Chair of the B.Th. Committee)

RELG 501 Honours Seminar.
(3) (Summer)

RELG 502 Greco-Roman Judaism.
(3) (Prerequisite: Permission of instructor.) The religion and literature of wisdom and apocalyptic traditions, the Dead Sea Scrolls, Philo and Josephus, with special attention to the Jewish matrix of Early Christianity.

RELG 520 Biblical Theology.
(3) (Fall and Winter) (Restriction: Limited to S.T.M. students.) Tutorials and guided reading in the field of Biblical Theology.

RELG 530 Church History.
(3) (Fall and Winter) Limited to S.T.M. students. Tutorials and guided reading in the field of church history.

RELG 531 Christian Theology.
(3) (Fall and Winter) Limited to S.T.M. studies. Tutorials and guided reading in the field of Christian Theology.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.

Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.

Denotes courses taught only in alternate years.

Denotes courses not available as Education electives.

Denotes courses available to Bachelor of Education students.

Denotes courses taught by the Faculty of Education which, if appropriate to the student's program, may be included in the academic concentration.
REL 532 History of Christian Thought 1.
(3) (Prerequisite: At least six (6) credits at the 300-level in Christianity or the Christian Bible.) (Restriction: Not open to students who have taken RELG 320) The development of Christian theology in the Patristic and Medieval periods. Focus on the controversial development of Christian doctrines and disciplines through intensive exposure to primary texts.

REL 533 History of Christian Thought 2.
(3) (Prerequisite: At least six (6) credits at the 300-level in Christianity or the Christian Bible.) (Restriction: Not open to students who have taken RELG 327) The development of Christian theology in the Reformation, Post Reformation and Modern periods through intensive exposure to primary texts.

REL 540 Philosophy of Religion.
(3) (Winter) (Restriction: Limited to S.T.M. students.) Tutorials and guided reading in the field of Philosophy of Religion.

REL 541 Theological Ethics.
(3) (Fall and Winter) (Restriction: Limited to S.T.M. students.) Tutorials and guided reading in the field of Theological Ethics.

REL 546 Indian Philosophy.
(3) (Fall) (Prerequisites: 6 credits in Indian religions, philosophy of religion, philosophy, or permission of the instructor) Introduction to the orthodox systems of Hindu Philosophy leading up to Vedanta i.e. Nyaya, Vaisesika, Sankhya, Yoga and Mimamsa, which will include discussion of such topics as: grounds for belief and disbelief in God, the nature of revelation, means of knowledge, etc.

REL 547 Special Topics in Hinduism.
(3) (Prerequisites: 6 credits in Indian religions, philosophy of religion, philosophy, or permission of the instructor) A research-oriented seminar dealing with topics in Hindu studies.

REL 548 Indian Buddhist Philosophy.
(3) (Prerequisites: RELG 252 or RELG 342 or permission of instructor) The rise of buddhist schools of philosophy, especially the Theravada and Sauntrantika, as an attempt to systematize the canonical teachings and defend Buddhism against its critics.

REL 549 Japanese Buddhist Philosophy.
(3) (Prerequisites: RELG 344, or RELG 451, or permission of the instructor.) (Note: Taught in alternate years.) Major figures of the Kyoto School of Buddhist philosophy (Nishida, Tanabe, Nishitani), emphasizing their intellectual debts to both modern European philosophy (Hegel, Nietzsche, Heidegger) and Mahayana Buddhism (Zen and Pure Land Buddhism).

REL 550 Comparative Religion.
(3) (Fall) (Prerequisite: RELG 252 or RELG 342 or permission of instructor) The rise of buddhist schools of philosophy, especially the Theravada and Sauntrantika, as an attempt to systematize the canonical teachings and defend Buddhism against its critics.

REL 551 Special Topics in Buddhism.
(3) (Prerequisite: RELG 344 or Permission of Instructor.) A research-oriented seminar dealing with topics in Buddhist studies.

REL 552 Advaita Vedanta.
(3) (Fall) (Prerequisites: 6 credits in Indian religions) The relation of Nyaya-Vaisesika and Mimamsa to Kevadavata with concentration on Sankara's Brahmastraabhasya, Pada 1 and 2.

REL 553 Religions of South India 1.
(3) (Winter) (Prerequisite: 6 credits in Indian religions) Topics include: definitions of Tamil identity, the relation of akam to bhakti poetry, the theology of the Alvars and Nayanmars, inter-religious and sectarian competition, the motif of pilgrimage, questions of caste and women.

REL 554 Religions of South India 2.
(3) (Winter) (Prerequisite: RELG 553) Analysis of the following: sampradaya; ubhayavedanta; comparison of Visistadavata and Saiva Siddhanta with reference to selected themes that illustrate the Tamil contribution; the relationship of theology to the sociology of knowledge in Tamilnad.

REL 555 Honours Seminar.
(3) (Winter) (Restriction: For Religious Studies Honours students or with permission of the Chair of the Religious Studies B.A. Committee) Current trends in the study of religion, including the approaches of critical theory, feminism, post-modernism, and post-colonialism.
Faculty of Science

ANAT-Anatomy & Histology

Offered by: Anatomy and Cell Biology

ANAT 205 Astrobiology.
(3) (Winter) (3 hours lecture) (Restriction: Not open to students who have taken or are taking EPSC 205) Astrobiology is the search for the origin, evolution and destiny of life in the universe. The course will provide insight into the formation and evolution of habitable worlds, the evolution of life and the biogeochemical cycles in the Earth’s oceans and atmosphere, and the potential for biological evolution beyond an organism’s planet of origin.

ANAT 212 Molecular Mechanisms of Cell Function.
(3) (Winter) (Prerequisite: BIOL 200) (Restriction: This course is also listed as BIOC 212. Not open to students who have taken or are taking BIOC 212 or BIOL 201) An introductory course describing the biochemistry and molecular biology of selected key functions of animal cells, including: gene expression; mitochondrial production of metabolic energy; cellular communication with the extra-cellular environment; and regulation of cell division.

ANAT 214 Systemic Human Anatomy.
(3) (Fall) (2 hours lectures, 2 hours practical tutorial) (Restriction: Open to students in biological sciences) Introduction to the gross anatomy of the various organ systems of the body, including the head, neck and trunk regions of the human body. Practical tutorials include studies of prepared specimens, use of the anatomical museum and audio-visual materials. This course is limited in size. Selection of students (other than those requiring the course as part of their program) will be made after the first lecture. (Admission is guaranteed for all students enrolled in programs in the Department of Anatomy and Cell Biology for which ANAT 214 is a required course.

ANAT 261 Introduction to Dynamic Histology.
(4) (Fall) (3 hours lectures, 2 hours laboratory) (Must be taken in U1 by students in Anatomy and Cell Biology programs) (Restriction: Open to students in biological sciences and others by special permission) An introduction to light and electron microscopic anatomy in which cell and tissue dynamics will be explored in the principal tissues and organs of the body.

ANAT 262 Introductory Molecular and Cell Biology.
(3) (Winter) (3 hours lecture) (Corequisites: ANAT 212 or BIOC 212 or BIOL 201) (Restriction: Open to students in biological sciences and others by special permission) An introduction to light and electron microscopic anatomy in which cell and tissue dynamics will be explored in the principal tissues and organs of the body.

ANAT 315 Anatomy/Limbs and Back.
(4) (Fall) (2 hours lectures, 4 hours laboratory) (Restriction: Open to students in Physical and Occupational Therapy; and to Honours students in Anatomy and Cell Biology, with permission of instructor.) The regional human gross anatomy of the skeleton, joints, muscles and neurovascular structures of the limbs and back.

ANAT 316 Human Visceral Anatomy.
(2) (Winter) (2 hour lecture, 2 hours laboratory) (Prerequisite: ANAT 315) (Restriction: Open to students in Physical and Occupational Therapy, and to others by special permission) The gross anatomy of the various organ systems of the human body, with emphasis on those aspects of greatest relevance to physical and occupational therapists. Laboratories include studies of prepared specimens, use of the anatomical museum and audiovisual materials.

ANAT 321 Circuitry of the Human Brain.
(3) (Fall) (2 hour lectures, 2 hours laboratory/tutorial) (Prerequisite: at least one 3-credit university level course in biology or psychology) (Restriction: Open to U3 students only, except for P&OT students.) This course explores the functional organization of the human brain and spinal cord. The course focuses on how neuronal systems are designed to subserve specific motor, sensory, and cognitive operations.

ANAT 322 Neuroendocrinology.
(3) (Winter) (2 hours lectures, 1 hour conference) (Prerequisite: ANAT 261.) A lecture course describing brain-endocrine relationships. Emphasis on modern experimental evidence and conceptual developments within the field.

ANAT 365 Cellular Trafficking.
(3) (Fall) (2 hours lectures, 2 hours conference) (Prerequisites: ANAT 261, BIOL 200, BIOL 201 or by special permission.) An intensive study of the processes of protein secretion and cell membrane biogenesis. Emphasis on morphological aspects of the above processes, and on the major techniques which have provided experimental evidence, namely, subcellular fractionation, cytochemistry and quantitative electron microscope radioautography.

ANAT 381 Basis of Embryology.
(4) (Fall) (2 hours lectures, 2 hours laboratory or conference) (Prerequisites: ANAT 261, or permission of instructor.) The basic processes of reproduction and embryonic development, such as molecular signaling; cell-cell interaction; differentiation; cell fate determination; genetic and epigenetic control of embryonic development.

ANAT 396 Undergraduate Research Project.
(3) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.) (Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects will be suggested each term which may have project-specific prerequisites. Some projects may be accessible to students in other disciplines. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.) Independent research project with a final written report.

ANAT 432 Honours Research Project.
(9) (Summer) (Restriction: For students in the Honours program.) Supervised honours research project in biological sciences.

ANAT 432D1 (4.5), ANAT 432D2 (4.5) Honours Research Project.
(Prerequisite: ANAT 365.) A lecture course describing brain-endocrine relationships. Emphasis on modern experimental evidence and conceptual developments within the field.

ANAT 432D1 (4.5), ANAT 432D2 (4.5) Honours Research Project.
(Prerequisite: ANAT 316.) An intensive study of the processes of protein secretion and cell membrane biogenesis. Emphasis on morphological aspects of the above processes, and on the major techniques which have provided experimental evidence, namely, subcellular fractionation, cytochemistry and quantitative electron microscope radioautography.

ANAT 432D1 (4.5), ANAT 432D2 (4.5) Honours Research Project.
(Prerequisite: ANAT 261.) A lecture course describing brain-endocrine relationships. Emphasis on modern experimental evidence and conceptual developments within the field.

ANAT 432D1 (4.5), ANAT 432D2 (4.5) Honours Research Project.
(Prerequisite: ANAT 261.) A lecture course describing brain-endocrine relationships. Emphasis on modern experimental evidence and conceptual developments within the field.

ANAT 458 Membranes and Cellular Signaling.
(3) (Winter) (3 hours lectures) (Prerequisites: BIOC 212 or ANAT 212 or BIOL 201, ANAT 262, one of PHGY 201, PHGY 209 or BIOL 205; one of BIOC 312 or ANAT 365; BIOC 311 recommended) (Restriction: This course is also listed as BIOC 458. Not open to students who are taking or who have taken BIOC 458.) An integrated treatment of the
properties of biological membranes and of intracellular signaling, including the major role that membranes play in transducing and integrating cellular regulatory signals. Biological membrane organization and dynamics; membrane transport; membrane receptors and their associated effectors; mechanisms of regulation of cell growth, morphology, differentiation and death.

ANAT 499 Supervised Library Research.
(1) (Prerequisite: ANAT 262, BIOL 202, or by permission of the instructor.) Supervised exploration of the current scientific literature as it pertains to the advanced field of anatomy and cell biology.

ANAT 541 Cell and Molecular Biology of Aging.
(3) (Winter) (2 hours lecture, 2 hours conference) (Prerequisites: ANAT 212 or (BIOC 212 or BIOL 201), ANAT 261, ANAT 262, or permission of instructor.) (Corequisite: BIOL 301.) Complex aging process, including theories and mechanisms of aging, animal model systems used to study aging, age-dependent diseases, for example, Alzheimer's, osteoporosis, and cancer, and age-related diseases, for example, Werner's syndrome and dyskeratosis congenita.

ATOC-Atmospheric & Oceanic Sciences
Offered by: Atmospheric & Oceanic Sciences

ATOC 104 The Earth System.
(3) (Winter) (Restriction: Not open to students who are taking or have taken EPSC 104 or GEOG 104.) Earth system science examines the complex interactions among the atmosphere, biosphere, geosphere and hydrosphere. It focuses on physical, chemical, and biological processes that extend over spatial scales ranging from microns to the size of planetary orbits, and spans time scales from fractions of a second to billions of years.

ATOC 210 Introduction to Atmospheric Science.
(3) (Fall and Winter) (3 hours lectures) (Prerequisite: CHEM 263 or CHEM 213 and CHEM 273, MATH 222 (Corequisite: CHEM 243, BIOL 201, ANAT 212 (or BIOC 212 or BIOL 201), ANAT 261, ANAT 262, or permission of instructor.) Simple notions of radiative transfer and applications of satellite and radar data to mesoscale and synoptic-scale systems are discussed. Emphasis will be put on the contribution of remote sensing to atmospheric and oceanic sciences.

(3) (Fall) (3 hours lectures) (Prerequisite: CEGEP Physics) An introduction to physical meteorology designed for students in the physical sciences. Topics include: composition of the atmosphere; heat transfer; the upper atmosphere; atmospheric optics; formation of clouds and precipitation; instability; adiabatic charts.

ATOC 215 Oceans, Weather and Climate.
(3) (Winter) (3 hours lectures) (Prerequisite: CEGEP Physics or permission of the instructor) Laws of motion, geostrophic wind, gradient wind. General circulation of the atmosphere and oceans, local circulation features. Air-sea interaction, including hurricanes and sea-ice formation, extra-tropical weather systems and fronts, role of the atmosphere and oceans in climate.

ATOC 219 Introduction to Atmospheric Chemistry.
(3) (Winter) (3 hours lectures) (Prerequisite: CEGEP DEC in Science or permission of instructor) (Restriction: Not open to students who have taken CHEM 219, CHEM 419 or ATOC 419) (Offered in odd years. Students should register in CHEM 219 in even years) An introduction to the basic topics in atmospheric chemistry. The fundamentals of the chemical composition of the atmosphere and its chemical reactions. Selected topics such as smog chamber, acid rain, and ozone hole will be examined.

ATOC 220 Introduction to Oceanic Sciences.
(3) (Fall and Winter) (3 hours lectures) (Restriction: Not open to students who have taken EPSC 360 or EPSC 560) Air-sea interaction; oceanic properties; global climate change, carbon cycle; polar oceans, sea ice, polynyas; El Niño; remote sensing of oceans; physical control of biological processes in the sea.

ATOC 230 Climate and Climate Change.
(3) (3 hours lectures) The atmosphere, ocean and sea-ice distribution characteristic of the current climate, as seen through observational data and computer model results. Physics of naturally occurring variability on time scales of months to years, such as El Niño. Global circulation models of the atmosphere, ocean and coupled atmosphere-ocean system, and global warming simulations.

ATOC 240 Science of Storms.
(3) (Winter) Physical processes associated with severe and hazardous weather affecting the Earth. Topics are taught at a fundamental level, without equations, to provide a complete and up-to-date understanding of such extreme events as blizzards, ice storms, tornadoes, hurricanes, floods and droughts.

ATOC 250 Natural Disasters.
(3) (Fall) (3 hours lectures) (Restriction: Not open to students who have taken or are taking EPSC 250) This course examines the science behind different types of disasters and our ability or inability to control and predict such events. From this course the student will gain an appreciation of natural disasters beyond the newspaper headlines, and will better understand how the effects of disasters can be reduced.

ATOC 308 Principles of Remote Sensing.
(3) (Fall) (3 hours lectures) (Restriction: Not open to students who have taken or are taking GEOG 308) A conceptual view of remote sensing and the underlying physical principles are presented. Ground-based and satellite systems and various components of the acoustic and electromagnetic spectrum - from visible to microwave - are discussed. Substantial emphasis is devoted to the application of remote sensed data in geography and atmospheric sciences.

ATOC 309 Weather Radars and Satellites.
(3) (Winter) (3 hours lecture) (Prerequisite: ATOC 215) Basic notions of radiative transfer and applications of satellite and radar data to mesoscale and synoptic-scale systems are discussed. Emphasis will be put on the contribution of remote sensing to atmospheric and oceanic sciences.

ATOC 315 Water in the Atmosphere.
(3) (Fall) (3 hours lectures) (Prerequisite: ATOC 214) Global distribution of water in the atmosphere. Moist processes. Global and mesoscale precipitation systems. Quantitative forecasting of precipitation. Extreme precipitation events. Large-scale influences. Precipitation modification.

ATOC 396 Undergraduate Research Project.
(3) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.) (Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects will be suggested each term which may have project-specific prerequisites. Some projects may be accessible to students in other disciplines. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.) Independent research project with a final written report.

ATOC 400 Indep Study of an Env Problem.
(3) (Restriction: students taking a joint program in Atmospheric and Environmental Science or with permission of Department.) A reading or research project, conducted under the guidance of an instructor, on the meteorological processes related to an environmental problem. A written report will be required. Students should consult the departmental undergraduate student adviser for the names of available supervisors.

ATOC 412 Atmospheric Dynamics.
(3) (Prerequisites: MATH 314, MATH 315.) Equations of motion in rotating coordinates, elementary applications, circulation and vorticity, the planetary boundary layer, synoptic scale motions, Rossby waves and inertial oscillations.

ATOC 419 Advances in Chemistry of Atmosphere.
(3) (Winter) (3 hours lectures) (Prerequisites: CHEM 243, CHEM 263 or CHEM 213 and CHEM 273, MATH 222 and MATH 315 (or equivalents) or permission of instructor.)
BIOL 300D1 (3), BIOL 300D2 (3) Laboratory in Biochemistry. (Fall/Winter) (1 lecture and one 6-hour lab per week) (Prerequisites: BIOL 200 and BIOL 201 or BIOL 212, CHEM 222; CHEM 257D1/CHM 257D2 recommended.) (Corequisites: BIOL 311 and BIOL 312.) (Restriction: Not open to students who have taken or are taking BIOL 301.) (For students in Biochemistry programs, others with permission of instructor) (Students must register for both BIOL 300D1 and BIOL 300D2.) (No credit will be given for this course unless both BIOL 300D1 and BIOL 300D2 are successfully completed in consecutive terms) A comprehensive course in modern biochemical techniques involving properties of enzymes, metabolism, fractionation of organelles from mammalian cells and molecular biology.

BIOL 311 Metabolic Biochemistry. (3) (Fall) (Prerequisites: BIOL 200, BIOL 201 or BIOL 212, CHEM 222) The generation of metabolic energy in higher organisms with an emphasis on its regulation at the molecular, cellular and organ level. Chemical concepts and mechanisms of enzymatic catalysis are also emphasized. Included: selected topics in carbohydrate, lipid and nitrogen metabolism; complex lipids and biological membranes; hormonal signal transduction.

BIOL 312 Biochemistry of Macromolecules. (3) (Winter) (Prerequisites: BIOL 311, BIOL 200, BIOL 201 or BIOL 212, CHEM 222) Gene expression from the start of transcription to the synthesis of proteins, their modifications and degradation. Topics covered: purine and pyrimidine metabolism; transcription and its regulation; mRNA processing; translation; targeting of proteins to specific cellular sites; protein glycosylation; protein phosphorylation; protein turn-over; programmed cell death (apoptosis).

BIOL 404 Biophysical Chemistry. (3) (Winter) (Prerequisites: CHEM 204, CHEM 214 or equivalent) (Restriction: Not open to students who have taken or are taking CHEM 404.) Hydrodynamic and electrophoretic methods for separation and characterization of macromolecules. Optical and magnetic resonance spectroscopy of biopolymers, and applications to biological systems.

BIOL 450 Protein Structure and Function. (3) (Fall) (Prerequisites: BIOL 311, BIOL 312 and/or sufficient organic chemistry.) (Restriction: Intended primarily for students at the U3 level) Primary, secondary, tertiary and quaternary structure of enzymes. Active site mapping and site-specific mutagenesis of enzymes. Enzyme kinetics and mechanisms of catalysis. Multienzyme complexes.

BIOL 454 Nucleic Acids. (3) (Fall) (Prerequisites: BIOL 311, BIOL 312 or permission of instructor) Chemistry of RNA and DNA, transcription and splicing of RNA and their control; enzymology of DNA replication. Special topics on transgenics, genetic diseases and cancer.

BIOL 455 Neurochemistry. (3) (Winter) (Prerequisites: BIOL 311, BIOL 312 or permission of instructor) Covers biochemical mechanisms underlying central nervous system function. Introduces basic neuroanatomy, CNS cell types and morphology, neuronal excitability, chemically mediated transmission, glial function. Biochemistry of specific neurotransmitters, endocrine effects on brain, brain energy metabolism and cerebral ischemia (stroke). With examples, where relevant, of biochemical processes disrupted in human CNS disease.

BIOL 458 Membranes and Cellular Signaling. (3) (Winter) (Prerequisites: BIOL 212, ANAT 262; one of PHGY 201, PHGY 209 or BIOL 205; one of BIOL 312 or ANAT 365; and BIOL 311 or permission of instructors) (Restriction: This course is also listed as ANAT 458. Not open to students who have taken or are taking ANAT 458 or BIOL 456) An integrated treatment of the properties of biological membranes and of intracellular signaling, including the major role that membranes play in transducing and integrating cellular regulatory signals. Biological membrane organization and dynamics; membrane transport: membrane receptors and their associated effectors; mechanisms of regulation of cell growth, morphology, differentiation and death.

BIOL 460 Advanced Lab in Biochemistry. (6) (Fall) Students will select one project, employing advanced as well as standard biochemical techniques, to be performed in a research laboratory in the Department. Each student will also write a research-review paper with the advice of a professor and perform student projects in the teaching laboratory.

BIOL 481 Independent Research. (6) (Winter) (Restriction: Registration by departmental permission only) (Prerequisite: BIOL 460) Individual work on a project to be performed in a research laboratory.

BIOL 503 Immunochemistry. (3) (Winter) (Prerequisites: BIOL 311, BIOL 312) This course, presented in lecture format, emphasizes the molecular, genetic and structure function events that occur in the humoral immune response. Interleukins and other mediators of inflammation, a field in which rapid changes are occurring, are discussed. The clinical significance of fundamental biochemical findings is described.

BIOL-Biology

Offered by: Biology

BIOL 101 Organismal Biology Laboratory. (1) (Fall) (3 hours laboratory) (Prerequisite: Permission of the Associate Dean (Student Affairs), Faculty of Science.) (Restriction: Not open to students who have taken, or are taking BIOL 111.) Laboratory component of BIOL 111. May be taken only by transfer students who have completed elsewhere the lecture component but not the laboratory of BIOL 111 and only with permission of the Associate Dean (Student Affairs) of Science.

BIOL 102 Cell and Molecular Biology Methods. (1) (Winter) (3.5 hours laboratory) (Prerequisite: Permission of the Associate Dean (Student Affairs), Faculty of Science.) (Restriction: Not open to students who are taken, or have taken BIOL 112.) The laboratory component of BIOL 112. May be taken only by transfer students who have completed elsewhere the lecture component but not the laboratory of BIOL 112 and only with permission of the Associate Dean (Student Affairs) of Science.

BIOL 111 Principles: Organismal Biology. (3) (Fall) (2 hours lecture and 3 hours laboratory) (Prerequisite: none.) (Restriction: Not open to students who have taken CEGEP objective 00UK or equivalent; or BIOL 113.) (Restriction: Not open to students who are taking CEGEP objective code 00UK) (May require departmental approval.) (Open to all students wishing introductory biology.) (Attendance at first lab is mandatory to confirm registration in the course.) An introduction to the structure, function and adaptation of plants and animals in the biosphere.

BIOL 112 Cell and Molecular Biology. (3) (Winter) (2 hours lecture and 3.5 hours laboratory/seminar) (Prerequisite: none.) (Restriction: Not open to students who have taken or are taking CEGEP objective 00UX or equivalent; or BIOL 115) (May require departmental approval.) (Attendance at first lab is mandatory to confirm registration in the course.) The cell: ultrastructure, division, chemical constituents and reactions. Bioenergetics: photosynthesis and respiration. Principles of genetics, the molecular basis of inheritance and biotechnology.

BIOL 115 Essential Biology. (3) (Fall) (3 hours lecture) (Prerequisites: none.) (Restrictions: Open only to non-Science students; not open to students who have had BIOL 111, BIOL 112, or equivalents.) An introduction to biological science that emphasizes the manner in which scientific understanding is achieved and evolves and the influence of biological science on society. Topics will include cell structure and function, genetics, evolution, organ physiology, ecology and certain special topics that change from year to year.

BIOL 200 Molecular Biology. (3) (Fall) (3 hours lecture, 1 hour optional tutorial) (Prerequisite: BIOL 112 or equivalent.) (Corequisite: CHEM 212 or equivalent) The physical and chemical properties of
the cell and its components in relation to their structure and function. Topics include: protein structure, enzymes and enzyme kinetics; nucleic acid replication, transcription and translation; the genetic code, mutation, recombination, and regulation of gene expression.

**BIOL 201 Cell Biology and Metabolism.**
(3) (Winter) (3 hours lecture, 1 hour optional tutorial) (Prerequisite: BIOL 200.) (Restriction: Not open to students who have taken or are taking BIOL 212 or ANAT 212) This course introduces the student to our modern understanding of cells and how they work. Major topics to be covered include: photosynthesis energy metabolism and metabolic integration; plasma membrane including secretion, endocytosis and contact mediated interactions between cells; cytoskeleton including cell and organelle movement; the nervous system; hormone signalling; the cell cycle.

**BIOL 202 Basic Genetics.**
(3) (Winter) (3 hours lecture, 1 hour optional tutorial) (Prerequisite: BIOL 200.) (Restriction: Not open to students who have taken or are taking CELL 204.) Introduction to basic principles, and to modern advances, problems and applications in the genetics of higher and lower organisms with examples representative of the biological sciences.

**BIOL 205 Biology of Organisms.**
(3) (Winter, optional conference hour) (Prerequisites: BIOL 200 or permission.) (Corequisite: BIOL 201 or BIOL 212/ANAT 212) (Restriction: Not open to students who are taking or have taken PLNT 201.) Unified view of form and function in organisms from all five kingdoms. Focus on the principal functions that all organisms must achieve to ensure their survival.

**BIOL 206 Methods in Biology of Organisms.**
(3) (Fall) (3 hours laboratory and local field trip in week 2.) (Prerequisite: BIOL 111 or equivalent) Introduction of modern methods used in organismal biology, including ecological sampling, experimental methods and statistics, taxonomic and phylogenetic analysis of biodiversity, experimental behavioural ecology, microbiological methods, and library search procedures.

**BIOL 210 Perspectives of Science.**
(3) (Fall) (3 hours lecture) Introduction to the thinking, language and practices of scientists. Its objective is to bridge the gap between science and the humanities, and in particular to allow students enrolled in the Minor Concentration in Science for Arts to pursue their interests in specific scientific disciplines.

**BIOL 215 Introduction to Ecology and Evolution.**
(3) (Fall) (3 hours lecture) (Prerequisite: BIOL 111) (Restrictions: Not open to students who have taken BIOL 208, BIOL 304 or BIOL 305. Not open to students who have taken ENVIR 202.) An introduction to the fundamental processes of ecology and evolution that bear on the nature and diversity of organisms and the processes that govern their assembly into ecological communities and their roles in ecosystem function.

**BIOL 240 Monteregian Flora.**
(3) (Summer) (Prerequisite: BIOL 111 or permission) (Restriction: Not open to students who have taken BIOL 358 or PLNT 358) (Note: Taught at the Gault Nature Reserve. Contact instructor for specific dates, logistics: martin.zechowicz@mcgill.ca) Field studies of ferns, fern allies, conifers and flowering plants; the use of keys for species identification.

**BIOL 300 Molecular Biology of the Gene.**
(3) (Fall) (3 hours lecture, optional tutorials) (Prerequisites: BIOL 200, BIOL 212) A survey of current knowledge and approaches in the area of gene structure and function. Topics include: gene isolation and characterisation, gene structure and replication, mechanism of gene expression and its regulation in pro- and eukaryotes.

**BIOL 301 Cell and Molecular Laboratory.**
(4) (Fall or Winter) (1 hour lecture and 1 hour laboratory) (Prerequisites: BIOL 200, BIOL 201, BIOL 202. BIOL 206 recommended.) (Restrictions: Not open to students who have taken or are taking BIOL 300. Requires departmental approval.) A practical introduction to laboratory techniques. Focus is on the experimental methods used to develop fundamental biological principles. Techniques involving enzyme characterization, DNA isolation and manipulation and genetic analysis are covered. Metabolism and regulation of cell systems are analyzed and by which biological macro-molecules are purified and characterized.

**BIOL 303 Developmental Biology.**
(3) (Winter) (3 hours lecture and 1 hour optional tutorial) (Prerequisites: BIOL 200 and BIOL 201. Corequisite: BIOL 202) A consideration of the fundamental processes and principles operating during embryogenesis. Experimental analyses at the molecular, cellular and organismal levels will be presented and analyzed to provide an overall appreciation of developmental phenomena.

**BIOL 304 Evolution.**
(3) (Fall) (3 hours lecture) (Prerequisite: BIOL 205 and BIOL 215 or ENVIR 202) This course will show how the theory of evolution by natural selection provides the basis for understanding the whole of biology. The first half of the course describes the process of selection, while the second deals with evolution in the long term.

**BIOL 305 Animal Diversity.**
(3) (Winter) (2 hours lecture and 1 three-hour laboratory) (Prerequisite: BIOL 215 or both ENVIR 200 and ENVIR 202) The characteristics of the major groups of animals, their ancestry, history and relationship to one another. The processes of speciation, adaptive radiation and extinction responsible for diversity. Methods for constructing of phylogenies, for comparing phenotypes, and for estimating and analyzing diversity.

**BIOL 306 Neurobiology.**
(3) (Fall) (3 hours lecture) (Prerequisite: BIOL 201 or BIOL 212 or ANAT 212.) (Restriction: Not open to students who are taking or have taken PSYC 308.) Neural mechanisms of animal behaviour; neuroethology; cellular neurophysiology, integrative networks within nervous systems; neural control of movement; processing of sensory information.

**BIOL 307 Behavioural Ecology/Sociobiology.**
(3) (Winter) (2 hours lecture and 1 hour conference) (Prerequisites: BIOL 205 and BIOL 215 or permission) The relationship between animal behaviour and the natural environment in which it occurs. This course introduces the subject of ecology at the level of the individual organism. Emphasis on general principles which relate to feeding, predator avoidance, aggression, reproduction and parental care of animals including humans.

**BIOL 308 Ecological Dynamics.**
(3) (Fall) (3 hours lecture, 1 hour tutorial) (Prerequisite: BIOL 215 or both ENVIR 200 and ENVIR 202) (Restriction: Not open to students who have taken BIOL 208.) Principles of population, community, and ecosystem dynamics; population growth and regulation, species interactions, dynamics of competitive interactions and of predator/prey systems.

---

**Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.**

- Denotes courses taught only in alternate years.
- Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
- Denotes courses taught only in alternate years.
- Indicates that departmental approval/permission must be obtained by a student prior to registration.
- Denotes courses not available as Education electives.
- Denotes courses with limited enrolment.
evolutionary dynamics.

**BIOl 308 Mathematical Models in Biology.**
(3) (Fall) (3 hours lecture) (Prerequisite: Elementary calculus.) An additional course in calculus is recommended. Application of finite difference and differential equations to problems in cell and developmental biology, ecology and physiology. Qualitative, quantitative and graphical techniques are used to analyze mathematical models and to compare theoretical predictions with experimental data.

**BIOl 310 Large-scale Ecology.**
(3) (Winter) (Prerequisite: BIOL 215; or ENVR 200 and ENVR 202 and MATH 112 or equivalent.) Ecology of spaces larger than a population or community, including exploration of the variation in life between regions (biomes), the effect of human destruction of habitat (landscapes), patterns across many species and of biodiversity (macroecology), and of changes in biodiversity and climate over time (including global warming).

**BIOl 313 Eukaryotic Cell Biology.**
(3) (Winter) (3 hours lecture and 1 hour tutorial) (Prerequisites: BIOL 200 and BIOL 201 (or ANAT/BIOC 212) and BIOL 202.) Cell biology of eukaryotes focusing on the assembly and function of cellular structures, the regulation of transcription; the dynamics of the cytoskeleton and its motors; mechanics of cell division; cell cycle and checkpoints; nuclear dynamics; chromosome structure and behaviour and experimental techniques.

**BIOl 314 Molecular Biology of Oncogenes.**
(3) (Fall) (3 hours lecture) (Prerequisites: BIOL 200; BIOL 201 or BIOL 212/ANAT 212) The genes that cause cancer are altered versions of genes present in normal cells. The origins of these oncogenes, their genetic structure, regulation, and the biochemical properties of the oncogene-encoded proteins will be analyzed in an attempt to understand the origins of human and animal cancers.

**BIOl 324 Ecological Genetics.**
(3) (Fall) (2 hours lecture, 1 hour seminar) (Prerequisite: BIOL 202) This course presents evolutionary genetics within an ecological context. The course covers theoretical topics together with relevant data from natural populations of plants and animals.

**BIOl 328 Biological Diversity in Africa.**
(3) (Winter) (7 hours lecture, 5 hours project.) (Prerequisite: BIOL 205 or permission of instructor.) (Corequisite: NRSC 300.) (Restriction: Students must be enrolled in the African Field Study Semester.) Biological diversity as exemplified by a particular taxonomic group chosen by the instructor, using field setting in East Africa to impart training in species identification, field research, and principles embodied in the phylogeny, systematics, biogeography, ecology, physiology and/or behaviour of the organisms concerned.

**BIOl 329 East African Ecology.**
(3) (Winter) (Prerequisite: BIOL 215 or equivalent.) (Corequisite: NRSC 300) The course is to be taught in Africa as a component of the Africa Field Study Semester. Students must register for the Africa Field Study Semester. Marine, terrestrial, conservation, or restoration ecology in East Africa.

**BIOl 331 Ecology/Behaviour Field Course.**
(3) (Fall) (Prerequisites: BIOL 206 and BIOL 215) (Note: Preregistration in March and April. See Course web page: http://ww2mcgill.ca/biology/undergrad/C331A/index.htm. Meets 12-days just before the fall term, with a project report early in the fall term.) Methods of sampling natural populations. Testing hypotheses in nature.

**BIOl 334D1 (1.5), BIOl 334D2 (1.5) Applied Tropical Ecology.**
(Winter, Summer) (Students must register for both BIOl 334D1 and BIOl 334D2.) (No credit will be given for this course unless both BIOl 334D1 and BIOl 334D2 are successfully completed in consecutive terms) (BIOl 334D1 and BIOl 334D2 together are equivalent to BIOl 334) (Prerequisites: BIOL 206 and BIOL 215 and permission) Relevant to agriculture, forestry, fisheries and conservation of natural resources. Field component taught at the University’s Bellairs Research Institute in Barbados, for two weeks in early May. The course is organized in a series of small-group field projects of 2-3 days each. Interested students should contact the Undergraduate Office and fill out an application form.

**BIOl 335 Marine Mammals.**
(3) (Summer) (Prerequisite: BIOl 205) Biology of marine mammals with special emphasis on seals and whales of the Bay of Fundy. Taught at the Huntsman Marine Science Centre, St. Andrews, N.B., for three weeks in August. The course combines lectures, laboratory exercises, field trips, and individual projects. See S. Gabe. [Winter]

**BIOl 350 Insect Biology and Control.**
(3) (Fall) (3 hours lecture) (Prerequisite: BIOL 205 or permission of instructor.) (Restriction: Not open to students who have taken or are taking ENTO 330 or ENTO 350.) (Note: This course is also offered as ENTO 350 in the winter term.) Introduction to insect structure, physiology, biochemistry, development, systematics, evolution, ecology and control. Stress on interrelationships and integrated pest control.

**BIOl 352 Vertebrate Evolution.**
(3) (Winter) (2 hours lecture, 3 hours laboratory) (Prerequisites: BIOL 304 and permission) The origin and evolution of the major groups of vertebrates; their anatomy, phylogeny and zoogeography.

**BIOl 355 Trees: Ecology & Evolution.**
(3) (Fall) (3 hours lecture) (Prerequisites: BIOL 205 and BIOL 215 or permission of instructor.) (Restriction: Not open to students who have taken or are taking BIOL 555.) Functional ecology and evolution of trees; patterns in the diversity of tree form and function, the nature of tree adaptation to environment from the scale of habitat to global biogeography.

**BIOl 370 Human Genetics Applied.**
(3) (Fall) (3 hours lecture; 1 hour conference optional) (Prerequisites: BIOL 200 and BIOL 201, BIOL 202) A contemporary view of what genetics can do when applied to human beings.

**BIOl 373 Biometry.**
(3) (Fall) (2 hours lecture and 2 hours laboratory) (Prerequisite: MATH 112 or equivalent) (You may not be able to receive credit for this course and other statistic courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) Elementary statistical methods in biology. The aim of this course is to introduce students to the analysis of biological data. Emphasis is placed on the assumptions behind statistical tests and models. The course is designed to give a student the ability to intelligently use the statistical techniques typically available on computer packages such as SYSTAT or SPSS. Preference given to Biology students; laboratory sections assigned at term’s start.

**BIOl 377 Independent Reading Project.**
(3) (Fall, Winter or Summer) (Prerequisite: BIOL 200 and BIOL 201; or BIOL 215; or permission.) (Restriction: Open to U2 or U3 Biology students only) (Note: Before registration, projects must be arranged individually with a staff member in the Biology Department and a form from Ms. A.Comeau, Room W4/13, Stewart Building, must be completed. Please see regulations concerning Project Courses, under “Project Courses” in the Faculty Degree Requirements section.) Independent reading project.

**BIOl 385 Plant Growth and Development.**
(3) (Fall) (3 hours lecture) (Prerequisite: BIOL 205.) (Restriction: Not open to students who have taken BIOL 357 or BIOL 485.) Processes involved in growth and development of the plant body; formation of new tissues and organs, photosynthesis; fruit growth and ripening, programmed cell death and senescence, plant responses to environmental stresses, biotechnology of crop improvement.

**BIOl 389 Laboratory in Neurobiology.**
(3) (Winter) (1 hour lecture; 5 hours laboratory) (Prerequisites: BIOL 306 or PHGY 311 or PSYC 308 or NEUR 310 or permission) Methods of neurobiological research, including extracellular and intracellular recordings, electrical stimulation, and the study of neuro-behavioural problems.
Biol 396 Undergraduate Research Project.  
(3) (Fall, Winter or Summer) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.) (Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects will be suggested each term which may have project-specific prerequisites. Some projects may be accessible to students in other disciplines. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.) Independent research project with a final written report.

Biol 413 Directed Reading.  
(1) (Fall, Winter or Summer) (3 hours independent work) (Prerequisites: BIOL 201, BIOL 202, BIOL 205, BIOL 215.) (Note: Special topics paper in conjunction with an upper-level biology course, under the guidance of a staff member of the Biology Department. A form required from Ms. A. Comeau in W4/13 of the Stewart Building prior to registration.) Directed reading.

Biol 416 Genetics of Mammalian Development.  
(3) (Winter) (3 hours lecture) (Prerequisites: BIOL 202, BIOL 300, BIOL 303 or permission of instructor.) (Restriction: Not open to students who have taken BIOL 516.) This course aims to examine problems, theories, and experimental evidence on several concepts of mammalian developmental processes at molecular to organogenesis levels. Most topics are in the mouse model system, where various techniques for genetic manipulation are available.

Biol 427 Herpetology.  
(3) (Fall) (2 hours lecture; 3 hours laboratory) (Prerequisite: BIOL 205 and BIOL 305 or permission of instructor.) (Restriction: Not open to students who have taken BIOL 327.) Principles of biology as exemplified by amphibians and reptiles. Topics include: adaptation, social behaviour, reproductive strategies, physiology, biomechanics, ecology, biogeography and evolution. Laboratories will emphasize structure, systematics and identification of local and world herpetofauna as well as field methods.

Biol 432 Limnology.  
(3) (Fall) (2 hours lecture; 2 weekends at field station equivalent to 3 hours laboratory per week) (Prerequisites: BIOL 206 and BIOL 215 or permission of instructor.) A study of the physical, chemical and biological properties of inland waters, with emphasis on their functioning as systems.

Biol 434  
(3) (Winter) (Prerequisites: BIOL 308 or BIOL 309 or permission of instructor.) (Restriction: Not open to students who have taken BIOL 534.) Study of theoretical ecology and of mathematical tools available to explore the dynamical behaviour of model populations, communities and ecosystems. Models addressing major ecological theories including population stability, community dynamics and ecosystem functioning, epidemic and disturbance dynamics, spatial models, game theory.

Biol 435 Natural Selection.  
(3) (Fall) (3 hours lecture) (Prerequisite: BIOL 304 or permission of instructor.) Explains how the selection of unidirected variation accounts for some of the leading features of the natural world. Its main focus is evolutionary change and adaptation, but it will also include material from ecological, economic, biochemical and computer systems. It emphasizes experimental studies of evolution.

*Biol 441 Biological Oceanography.  
(3) (Winter) (2 hours lecture, 3 hours laboratory/conference) (Prerequisites: BIOL 206 and BIOL 215.) An introduction to how the ocean functions biologically: biology and ecology of marine plankton; regulation, extent and fate of production in the sea.

*Biol 442 Marine Biology.  
(3) (Winter) (2 hours lecture, 1 hour laboratory or conference) (Prerequisites: BIOL 205 and BIOL 215.) An introduction to marine benthic communities. Topics include structure and dynamics of hard and soft bottom communities; bioturbation, feeding strategies and trophodynamics; ecology of seagrass, mangrove and coral reef ecosystems; marine pollution.

(3) (Fall) (3 hours lecture) (Prerequisite: BIOL 215) Discussion of relevant theoretical and applied issues in conservation biology. Topics: biodiversity, population viability analysis, community dynamics, biology of rarity, extinction, habitat fragmentation, social issues.

Biol 466 Independent Research Project 1.  
(3) (Fall, Winter or Summer) (Prerequisite: BIOL 206 or BIOL 301 or other suitable laboratory course.) (Restrictions: Open only to Biology students. Not open to students who have taken BIOL 477.) (Note: Before registration, projects must be arranged individually with a staff member of the Biology Department and a form from Ms. Comeau, Room W4/13, Stewart Building, must be completed.) Independent research project.

Biol 467 Independent Research Project 2.  
(3) (Fall, Winter or Summer) (Prerequisite: BIOL 206 or BIOL 301 or other suitable laboratory course.) (Restrictions: Open only to Biology students. Not open to students who have taken BIOL 471 or BIOL 471D1/D2.) (Note: Before registration, projects must be arranged individually with a staff member of the Biology Department and a form from Ms. Comeau, Room W4/13, Stewart Building, must be completed.) Independent research project.

Biol 468 Independent Research Project 3.  
(3) (Fall, Winter or Summer) (Prerequisite: BIOL 206 or BIOL 301 or other suitable laboratory course) (Restriction: Open only to Biology students. Not open to students who have taken BIOL 471 or BIOL 471D1/D2.) (Projects must be arranged individually with a staff member of the Biology Department and a form from Ms. A. Comeau, Room W4/8, Stewart Building, must be completed to receive credit for the course.) Independent research project.

Biol 468D1 (3), BIOL 468D2 (3) Independent Research Project 3.  
(Fall and Winter) (Prerequisite: BIOL 206 or BIOL 301 or other suitable laboratory course) (Projects must be arranged individually with a staff member of the Biology Department and a form from Ms. A. Comeau, Room W4/8, Stewart Building, must be completed to receive credit for the course.) Students must register for both BIOL 468D1 and BIOL 468D2. (No credit will be given for this course unless both BIOL 468D1 and BIOL 468D2 are successfully completed in consecutive terms.) Independent research project.

(Fall and Winter) (13.5 hours per week research) (Prerequisites: BIOL 206 or BIOL 301 or other suitable 300-level biology course.) (Restrictions: Restricted to Biology students. Projects must be arranged privately with a professor in the Biology department and a form from the undergraduate office (STBIO W4/8) must be completed.) (Students must register for both

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

2007-2008 Undergraduate Programs Calendar, McGill University  C-173
BIOL 469D1 and BIOL 469D2.) (No credit will be given for this course unless both BIOL 469D1 and BIOL 469D2 are successfully completed in consecutive terms.) (Note: Before registration, projects must be arranged individually with a staff member in the Biology Department and a form from Ms. A. Comeau, Room W4/13, Stewart Building, must be completed.) Independent research project.

BIOL 479D1 (4.5), BIOL 479D2 (4.5) Honours Research Project 1. (Fall, Winter) (8-12 hours per week research project and related seminars) (Restriction: Biology Honours students. Projects must be arranged individually with, and accepted by a staff member of the Biology Department) (Students must register for both BIOL 479D1 and BIOL 479D2.) (No credit will be given for this course unless both BIOL 479D1 and BIOL 479D2 are successfully completed in consecutive terms) The major objective of the course is to provide an introduction to the design, execution and reporting of research. The quality of projects is examined by at least two members of the Biology Department.

BIOL 480D1 (6), BIOL 480D2 (6) Honours Research Project 2. (Fall and Winter) (10-15 hours per week research project and related seminars) (Restriction: course description: as for BIOL 479) (Students must register for both BIOL 480D1 and BIOL 480D2.) (No credit will be given for this course unless both BIOL 480D1 and BIOL 480D2 are successfully completed in consecutive terms) Honours students in Biology attend a selected series of guest speaker seminars of general interest and prepare reports. In addition, students give a seminar on their research.

* BIOL 505 Diversity and Systematics Seminar. (3) (Winter) (3 hours seminar) (Prerequisites: BIOL 215 and BIOL 304 or permission) A course dealing in depth with a particular aspect of biological diversity and/or systematics. Topics may include the systematics of a particular taxon, issues in biodiversity, systematics theory and practice, etc. The class will discuss aspects of the chosen topic and prepare individual seminar reports.

* • BIOL 507 Animal Communication. (3) (Fall) (3 hours lecture) (Corequisites: BIOL 307 or equivalent and one of BIOL 306 or NEUR 310 or PHGY 311 or PSYC 308 or permission of instructor.) Since all corequisites may not be offered in the same term, students are advised that they may have to plan their schedules so that they may register in these courses in the term prior to BIOL 507. Introduction to communication between animals, including humans. Physical and phylogenetic constraints on the evolution of communication systems will be discussed. The approach to communication will draw from behavioural ecology, psychology, physiology and physics.

BIOL 510 Advances in Community Ecology. (3) (Fall) (3 hours lecture/seminar) (Prerequisites: BIOL 308 or GEOG 350 or permission of instructor.) The origin, maintenance and consequences of biological diversity within ecological communities.

BIOL 518 Advanced Topics in Cell Biology. (3) (Winter) (2 hours seminar) (Prerequisite: BIOL 313 and permission) Conserved processes in Eukaryotic organisms, including the cytoskeleton, the cell cycle, complex traits/disease, global analysis/bioinformatics, and innovative studies/techniques in cell biology.

BIOL 520 Gene Activity in Development. (3) (Winter) (3 hours lecture and discussion) (Prerequisites: BIOL 300 and BIOL 303 or permission) An analysis of the role and regulation of gene expression in several models of eukaryotic development. The emphasis will be on critical evaluation of recent literature concerned with molecular or genetic approaches to the problems of cellular differentiation and determination. Recent research reports will be discussed in conferences and analyzed in written critiques.

BIOL 524 Topics in Molecular Biology. (3) (Fall) (Prerequisites: BIOL 300 and BIOL 303 or permission.) Molecular genetics and molecular, cellular and developmental biology, including signal transduction, cell differentiation and function, genetic diseases in eukaryotes.

BIOL 530 Neural Basis of Behaviour. (3) (Winter) (3 hours seminar) (Prerequisite: BIOL 306 or PHGY 311 or PSYC 308 or permission of instructor.) Neural mechanisms underlying behaviour in vertebrate and invertebrate organisms.

BIOL 531 Neurobiology Learning Memory. (3) (Fall) (3 hours lecture and discussion) (Prerequisite: BIOL 306 or PHGY 311 or PSYC 308 or NEUR 310 or permission of instructor.) Properties of nerve cells that are responsible for learning and memory. Recent advances in the understanding of neurophysiological, biochemical and structural processes relevant to neural plasticity. Emphasis on a few selected model systems involving both vertebrate and invertebrate animals.

BIOL 532 Developmental Neurobiology Seminar. (3) (Winter) (1 hour lecture, 2 hours seminar) (Prerequisites: BIOL 303 and BIOL 306 or permission) Discussions of all aspects of nervous system development including pattern formation, cell lineage, pathfinding and targeting by growing axons, and neuronal regeneration. The basis for these discussions will be recent research papers and other assigned readings.

BIOL 540 Ecology of Species Invasions. (3) (Winter) (3 hours lecture) (Prerequisite: BIOL 308 or permission of instructor) (Restriction: Not open to U1 or U2 students) (Restriction: Not open to students who are taking or have taken ENVR 540.) Causes and consequences of biological invasion, as well as risk assessment methods and management strategies for dealing with invasive species.

BIOL 544 Genetic Basis of Life Span. (3) (Fall) (1 hour lecture, 2 seminar hours) (Prerequisites: BIOL 202, BIOL 300, BIOL 303 recommended or permission) The course will consider how gene action is determining the duration of life in various organisms focusing on the strengths and limitations of the genetic approach. The course will focus particularly on model organisms such as yeast, Caenorhabditis, Drosophila and mouse, as well as on the characterization of long-lived mutants.

BIOL 553 Neotropical Environments. (3) (Winter) (24 hours lecture and 36 hours field work over a 4-week period) (Prerequisites: HISP 218, MATH 203, or equivalents, and permission of Program Coordinator.) (Corequisites: ENVR 451, GEOG 498 and AGRI 550.) (Restriction: location in Panama. Students must register for a full semester of studies in Panama) Ecology revisited in view of tropical conditions. Exploring species richness. Sampling and measuring biodiversity. Conservation status of ecosystems, communities and species. Indigenous knowledge.

* • BIOL 555D1 (1.5), BIOL 555D2 (1.5) Functional Ecology of Trees. (Fall and Winter) (Prerequisites: BIOL 304, BIOL 308 or permission.) (Students must register for both BIOL 555D1 and BIOL 555D2.) (No credit will be given for this course unless both BIOL 555D1 and BIOL 555D2 are successfully completed in consecutive terms) BIOL 555D1 and BIOL 555D2 together are equivalent to BIOL 555.) Discussion of the interactions among traits that underpin the survival of woody plants in diverse environments: physiology, anatomy, architecture, seasonality and phenology, reproductive ecology, life history trade-offs, and the phylogenetic basis of functional diversification.

BIOL 568 Topics on the Human Genome. (3) (Winter) (3 hours lecture) (Prerequisites BIOL 202, BIOL 300, BIOL 370, or permission.) Cellular and molecular approaches to characterization of the human genome.

* • BIOL 569 Developmental Evolution. (3) (Winter) (3 hours lecture) (Prerequisites: BIOL 303 and BIOL 304; or permission of instructor.) The influence of developmental mechanisms on evolution. This course draws on recent examples from plants and invertebrate and vertebrate animals. Topics include homology, modularity, dissociation,
co-option, evolutionary novelty, evolution of genetic cis-regulation, developmental constraint and evolvability, heterochrony, phenotypic plasticity, and canalization.

BIOL 570 Advanced Seminar in Evolution.
(3) (Winter) (3 hours seminar) (Restriction: Open to undergraduates by permission) Detailed analysis of a topic in evolutionary biology, involving substantial original research.

* ● BIOL 571 Experimental Evolution/Ecology.
(3) (Winter) (1 hour lecture, 4 hours laboratory) (Prerequisite: BIOL 435 or equivalent) (Restriction: Restricted to U3 and Graduate students.) Basic principles and processes of evolution and ecology will be demonstrated using microbial model systems. Topics include mutation, fitness, selection, adaptive radiation, properties of mixtures and community assembly.

* ● BIOL 572 Molecular Evolution.
(3) (Fall) (3 hours lecture/seminar) (Prerequisite: BIOL 300) Evolutionary change in DNA and proteins and its implications for cellular, organismal, and population/species evolution.

BIOL 573 Vertebrate Palaeontology Field Course.
(3) (Summer) (Prerequisites: BIOL 304 amd BIOL 352 or permission of instructor.) (Notes: Field course with completed project and presentation in the early Fall. Given in a selected early Cretaceous Alberta site. Enrolment limited to 10 students.) Terrestrial vertebrate fossils (i.e. dinosaurs, crocodiles and other reptiles) and palaeocommunity analysis, including practical training with fossil identification, mapping, collecting, and stratigraphic interpretation.

BIOL 575 Human Biochemical Genetics.
(3) (Winter) (3 hours lecture) (Prerequisites: BIOL 202 and BIOL 300.) Topics on the study of human systems that have led to advances in basic biology.

BIOL 583 Advanced Biometry.
(3) (Winter) (Prerequisite: BIOL 373 or permission of instructor.) (Note: You may not be able to receive credit for this course and other statistic courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) Advanced techniques in biometry surveying a broad number of statistical tools including: philosophy of scientific inference, experimental design and advanced linear models, generalized linear models (esp. logistic regression), modern regression techniques (quantile, local, etc), temporal and spatial statistics, and multivariate techniques.

* ● BIOL 588 Molecular/Cellular Neurobiology.
(3) (Fall) (1 1/2 hours lecture, 1 1/2 hours seminar) (Prerequisite: BIOL 300 and BIOL 306 or permission) Discussion of fundamental molecular mechanisms underlying the general features of cellular neurobiology. An advanced course based on lectures and on a critical review of primary research papers.

* ● BIOL 590 Linking Community and Ecosystem Ecology.
(3) (Winter) (1.5 hours lecture, 1.5 hours seminar) (Prerequisite: BIOL 434 or permission of instructor.) Theoretical foundations for a new ecological synthesis that merges the perspectives of population, community, evolutionary and ecosystem ecology. Focus on theory in interaction with experimental and empirical work, and covers current topics at the interface between community and ecosystem ecology.

BIOL 592 Integrated Bioinformatics.
(3) (Fall) (3 hours lecture) (Prerequisite: BIOL 301 or permission of instructor.) (Restriction: Not open to students who have taken or are taking BINF 511.) 'Post-genomic' bioinformatics. Concepts behind large-scale computational analysis and comparison of genomes/proteomes (and beyond), and the implications for our understanding of the basic processes of molecular and cell biology and the evolution of those processes.

* ● BIOL 594 Advanced Evolutionary Ecology.
(3) (Fall) (Prerequisite: BIOL 304 and BIOL 308) (Restriction: U3 or permission.) Evolutionary ecology is the study of evolutionary change in natural populations. General predictive approaches in evolutionary ecology, including population genetics, quantitative genetics, optimality, and game theory will be examined. Emphasis will be placed on the mathematical underpinnings of each approach, particularly as they relate to classic and contemporary problems.

BIOT-Biotechnology
Offered by: Biology

BIOT 505 Selected Topics in Biotechnology.
(3) (Fall) (Restriction: U3 students) Current methods and recent advances in biological, medical, agricultural and engineering aspects of biotechnology will be described and discussed. An extensive reading list will complement the lecture material.

CHEM-Chemistry
Offered by: Chemistry

CHEM 110 General Chemistry 1.
(4) (Fall) (3 lectures and laboratory) (Prerequisites/corequisites: College level mathematics and physics or permission of instructor; CHEM 120 is not a prerequisite) (Each lab section is limited enrolment) A study of the fundamental principles of atomic structure, valence theory and the periodic table.

CHEM 120 General Chemistry 2.
(4) (Winter) (3 lectures and laboratory) (Prerequisites/corequisites: College level mathematics and physics; or permission of instructor: CHEM 110 is not a prerequisite) (Each lab section is limited enrolment) A study of the fundamental principles of physical chemistry.

CHEM 122 General Chemistry Laboratory.
(1) (Winter) (2 1/2 hours laboratory) (Open only to entering students who have the lecture equivalent of CHEM 110) (Each lab section is limited enrolment) Illustrative experiments. Laboratory section of CHEM 110. New students will be issued lab sections in OM 1 on the first day of classes.

CHEM 150 World of Chemistry: Food.
(3) (Winter) (3 lecture hours/week) (No prerequisites) (Restriction: Science and B.A. & Sc. students may take for credit only two of: CHEM 150, CHEM 160, CHEM 170, CHEM 180. These courses can be taken independently of each other.) A series of lectures on the historical, practical, and simple chemical aspects of: food, food additives; vitamins; minerals, diet and cancer; dieting; water.

CHEM 160 World of Chemistry: Technology.
(3) (Fall) (3 lecture hours/week) (No prerequisites) (Restriction: Science and B.A. & Sc. students may take for credit only two of: CHEM 150, CHEM 160, CHEM 170, CHEM 180. These courses can be taken independently of each other.) Aspects of chemical technology including publishing of scientific articles, rocketery, chemistry of space travel, materials (metals, ceramics, wood, plastic), genetic engineering chemistry, forensic science, art and money.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses taught only in alternate years.
† Professional Practice (Stage) in Dietetics involving special prerequisites
▲ Indicates that departmental approval/permission must be obtained by a student prior to registration.
‡ Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
" Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.

Denotes courses which, if appropriate to the student’s program, may be included in the academic concentration.

C-175
CHEM 170 World of Chemistry: Drugs.
(3) (Fall) (3 lecture hours/week) (No prerequisites) (Restriction: Science and B.A. & Sc. students may take for credit only two of: CHEM 150, CHEM 160, CHEM 170, CHEM 180. These courses can be taken independently of each other.) Aspects of drugs including drug history, over the counter drugs (e.g. aspirin, cough remedies, allergy preparations), and street drugs. Significant attention will be paid to prescription drugs such as heart remedies and antibiotics.

CHEM 180 World of Chemistry: Environment.
(3) (Winter) (3 lecture hours/week) (No prerequisites) (Restriction: Science and B.A. & Sc. students may take for credit only two of: CHEM 150, CHEM 160, CHEM 170, CHEM 180. These courses can be taken independently of each other.) Water, air pollution, sick-building syndrome, the chemistry of the car, energy (fossil fuel, nuclear), household products, quackery (18th century to the internet), computers and cosmetics.

CHEM 199 FYS: Why Chemistry?
(3) (Fall) (2 lectures and 1 seminar) (Restriction: Open only to newly admitted students in U0 or U1, who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.) A lecture/seminar course which is expected to deal with a) colour, from gemstones to lasers; b) microscopes that see atoms - with demonstrations; c) the atmosphere: the greenhouse effect, and acid rain, and d) scientific ethics in research and publication.

CHEM 201 Modern Inorganic Chemistry 1.
(3) (Fall) (3 lectures) (Prerequisites: CHEM 110 and CHEM 120 or equivalent.) (Restriction: Not open to Honours or Majors in chemistry) (Restriction: Not open to students who have taken or plan to take CHEM 281) Systematic survey of the chemistry of the main group elements and their compounds. Basic concepts of electronic structure, bonding and structure will be developed and applied to the understanding of common materials. Emphasis on elements such as oxygen, nitrogen, silicon and others in order to understand their role in our everyday lives.

CHEM 203 Survey of Physical Chemistry.
(3) (Fall and Summer) (3 lectures) (Prerequisites: CHEM 110 and CHEM 120 or equivalent.) (Restriction: Intended for students in biological science programs requiring only one course in physical chemistry) (Restriction: Not open to students who have taken or are taking CHEM 204 or CHEM 213) A survey of the principles and methods of physical chemistry with emphasis on the use of biological examples. Topics will include thermodynamics, transport properties, kinetics, molecular structure and interactions, and spectroscopy.

CHEM 204 Physical Chemistry/Biological Sciences 1.
(3) (Fall and Winter) (3 lectures) (Prerequisites: CHEM 110 and CHEM 120 or equivalent and one full course in calculus) (Restriction: Not open to students who have taken or are taking CHEM 203 or CHEM 213 or CHEM 223 and CHEM 243.) Similar to CHEM 223/CHM 243. Emphasis on the use of biological examples to illustrate the principles of physical chemistry. The relevance of physical chemistry to biology is stressed.

CHEM 211 Organic Chemistry 1 Lectures.
(3) (Fall and Winter and Summer) (3 lectures) (Prerequisite: CHEM 110 or equivalent.) (Corequisite: CHEM 120 or equivalent.) (Restrictions: Not open to students who are taking or have taken CHEM 212. Permission of the Department of Chemistry is required.) (Note: Some CEGEP programs provide equivalency for this course. For more information, please see the Department of Chemistry's Webpage (http://www.chemistry.mcgill.ca/advising/outside/equivalent.html).) A survey of reactions of aliphatic and aromatic compounds including modern concepts of bonding, mechanisms, conformational analysis, and stereochemistry.

CHEM 212 Introductory Organic Chemistry 1.
(4) (Fall and Winter and Summer) (3 lectures and a laboratory) (Prerequisite: CHEM 110 or equivalent.) (Corequisite: CHEM 120 or equivalent.) (Restriction: Not open to students who are taking or have taken CHEM 211) (Each lab section is limited enrolment) (Note: Some CEGEP programs provide equivalency for this course. For more information, please see the Department of Chemistry's Webpage (http://www.chemistry.mcgill.ca/advising/outside/equivalent.html).) A survey of reactions of aliphatic and aromatic compounds including modern concepts of bonding, mechanisms, conformational analysis, and stereochemistry.

CHEM 214 Physical Chemistry/Biological Sciences 2.
(3) (Winter) (3 lectures) (Prerequisites: CHEM 204 or CHEM 222/CHEM 243.) Emphasis is placed on the use of biological examples to illustrate the principles of physical chemistry. The relevance of physical chemistry to biology is stressed.

CHEM 217 General Analytical Chemistry Lab 1.
(1) (Fall) (3 hours) (Prerequisites: CHEM 110 and CHEM 120 or equivalent) Laboratory portion of an individualized program in analytical chemistry.

CHEM 219 Introduction to Atmospheric Chemistry.
(3) (Winter) (3 lectures) (Prerequisite: CEGEP DEC in Science or permission of instructor) (Restriction: Not open to students who have taken ATOC 219, CHEM 419, or ATOC 419) (Offered in even years. Students should register in ATOC 219 in odd years) An introduction to the basic topics in atmospheric chemistry. The fundamentals of the chemical composition of the atmosphere and its chemical reactions. Selected topics such as: a smog chamber, acid rain, and the ozone hole, will be examined.

CHEM 222 Introductory Organic Chemistry 2.
(4) (Fall and Winter and Summer) (Prerequisite: CHEM 212 or equivalent.) (Restriction: Not open to students who have taken Chemistry 302 or equivalent at CEGEP.) Modern spectroscopic techniques for structure determination. The chemistry of alkyl halides, alcohols, ethers, carbonyl compounds, and amines, with special attention to mechanistic aspects. Special topics.

CHEM 223 Introductory Physical Chemistry 1.
(2) (Prerequisite: CHEM 110, CHEM 120 or equivalent.) (Corequisite: MATH 222 or equivalent.) (Restrictions: Not open to students who have taken or are taking CHEM 203 or CHEM 204. Permission of instructor.) (Note: Chemistry Honours and Majors must take CHEM 223 and CHEM 253 simultaneously.) Kinetics 1: Gas laws, kinetic theory of collisions. Thermodynamics: Zeroth law of thermodynamics. First law of thermodynamics, heat capacity, enthalpy, thermochemistry, bond energies. Second law of thermodynamics; the entropy and free energy functions. Third law of thermodynamics, absolute entropies, free energies, Maxwell relations and chemical and thermodynamic equilibrium states.

CHEM 224 Organic Chemistry Laboratory 1.
(1) (Fall and Winter and Summer) (4 hours laboratory) (Open only to students who have the lecture equivalent of CHEM 212) Illustrative experiments in organic chemistry. Laboratory section of CHEM 212.

CHEM 232 Organic Chemistry Principles.
(4) (Restriction: Only open to students in the BN Program) (Restriction: Not open to students in the B.Sc. Program) Concepts of modern organic chemistry, its application to biological processes and everyday life, principles of bonding, structure/stereochemistry, and reaction mechanisms will be presented. Their application to reaction of all of the main functional groups and to biologically important substances will be described.

CHEM 233 Topics in Physical Chemistry.
(3) (Winter) (3-0-6) (Restriction: For Engineers only.) Introduction to chemical kinetics, surface and colloid chemistry and electrochemistry. The topics to be discussed will be of particular interest to students in chemical engineering.

CHEM 234 Topics in Organic Chemistry.
(3) (Fall and Winter and Summer) (3-0-6) (Prerequisite: CHEM 212 or equivalent) (Restriction: For Chemical Engineers only or Permission of Department.) Modern spectroscopic techniques for structure determination. The chemistry of alkyl halides, alcohols, ethers, carbonyl compounds, and amines, with special attention to mechanistic aspects. Special topics.
CHEM 237 General Analytical Chemistry Lab 2.
(1) (Fall) (3 hours) (Prerequisite: CHEM 217) Laboratory portion of an individualized program in analytical chemistry.

CHEM 243 Introductory Physical Chemistry 2.
(2) (Prerequisites: CHEM 223 and CHEM 253.)
(Restrictions: Not open to students who have taken or are taking CHEM 203 or CHEM 204. Permission of instructor.) (Note: Chemistry Honours and Majors must take CHEM 243 and CHEM 263 simultaneously.)

CHEM 244 Organic Chemistry Laboratory 2.
(1) (Fall and Winter) (4 hours laboratory)
(Prerequisite: CHEM 234 or equivalent) Laboratory section of CHEM 222.

CHEM 253 Introductory Physical Chemistry 1 Laboratory.
(1) (Prerequisite: CHEM 110, CHEM 120 or equivalent.)
(Corequisite: CHEM 223 or equivalent.) (Restrictions: Not open to students who have taken or are taking CHEM 203 or CHEM 204. Permission of instructor.) (Note: Chemistry Honours and Majors must take CHEM 223 and CHEM 253 simultaneously.) Illustrative experiments in physical chemistry.

CHEM 257D1 (2), CHEM 257D2 (2) Introductory Analytical Chemistry.
(Not: Not offered in 2007-08: students entering in Sept. 2007 will take CHEM 363 in U2 or U3.)
(1 lecture, 1 homework tutorial and 4 hours laboratory) (Prerequisites: CHEM 110 and CHEM 120 or equivalent.) (Restriction: Not open to students who have taken or are taking CHEM 277D1/D2) A survey of analytical chemistry including the theory and practice of representative gravimetric, volumetric and instrumental methods.

CHEM 263 Introductory Physical Chemistry 2 Laboratory.
(1) (Prerequisites: CHEM 223 and CHEM 253.)
(Corequisite: CHEM 243 or equivalent.) (Restrictions: Not open to students who have taken or are taking CHEM 203 or CHEM 204. Permission of instructor.) (Note: Chemistry Honours and Majors must take CHEM 243 and CHEM 263 simultaneously.) Illustrative experiments in physical chemistry.

CHEM 277D1 (1.5), CHEM 277D2 (1.5) Analytical Chemistry.
(Not: Not offered in 2007-08: students entering in Sept. 2007 will take CHEM 363 in U2 or U3.)
(2 lectures and 4 h laboratory) (Prerequisites: CHEM 110 and CHEM 120 or equivalent.) (Restriction: For Chemistry Honours and Majors studying only) (Restriction: Not open to students who have taken or are taking CHEM 257D1/D2) Qualitative and quantitative analysis. A survey of methods of analysis including theory and practice of semi-micro gravimetric, volumetric and representative gravimetric, volumetric and instrumental methods.

CHEM 281 Inorganic Chemistry 1.
(3) (Fall) (3 lectures) (Prerequisites: CHEM 110 and CHEM 120 or equivalent.) (Restriction: For Honours and Major Chemistry students) (Restriction: Not open to students who have taken or are taking CHEM 201) Basic concepts of electronic structure and molecular bonding will be developed and applied to the understanding of common materials. Survey of the chemistry of the main group elements. Introduction to coordination and organometallic chemistry.

(3) (Fall and Winter) (3 lectures) (Prerequisite: CHEM 222) Topics covered may include the following: aromatics and heterocyclics, carbanions, rearrangements, molecular orbital considerations, polymers and biomolecules.

CHEM 307 Analytical Chemistry of Pollutants.
(3) (2 lectures and laboratory with field trips) (Prerequisites: One course in analytical chemistry) Description of current analytical practices in air and water pollution; critical evaluation of the reliability of the methods, with particular emphasis on interfering substances; rudiments of automated instrumentation; toxicological analysis as it relates to pollution.

CHEM 334 Advanced Materials.
(3) (Fall) (Prerequisites: CHEM 110/CHEM 120 and PHYS 101/PHYS 102 or PHYS 131/PHYS 142, or CEGEP Physics and Chemistry, or equivalent. Prerequisite or Corequisite: one of CHEM 203, CHEM 204, CHEM 223 and CHEM 243, CHEM 214 or equivalent; or one of PHYS 230 and PHYS 232, or equivalent; or permission of instructor.) (Restriction: Not open to students who have taken or are taking PHYS 334.) The physicochemical properties of advanced materials. Topics discussed include photonics, information storage, 'smart' materials, biomaterials, clean energy materials, porous materials, and polymers.

CHEM 345 Molecular Properties and Structure 1.
(3) (Fall) (3 lectures) (Prerequisites: CHEM 243 and CHEM 263 or CHEM 213, MATH 315.) (Restriction: For Chemistry Honours and Majors only) An introduction to quantum chemistry covering the historical development, wave theory, methods of quantum mechanics, and applications of quantum chemistry.

CHEM 352 Structural Organic Chemistry.
(3) (Winter) (3 lectures) (Prerequisite: CHEM 302) Modern methods of structure determination employing spectroscopic techniques; stereochemistry.

CHEM 355 Molecular Properties and Structure 2.
(3) (Winter) (3 lectures) (Prerequisite: CHEM 345) A survey of the principles of electronic, vibrational and rotational spectroscopy. Magnetic resonance methods.

CHEM 362 Advanced Organic Chemistry Laboratory.
(2) (Fall and Winter) (4 hours) (Prerequisite or corequisite: CHEM 302. Not open to Honours or Majors in Chemistry) An advanced laboratory with experiments related to the theoretical principles and synthetic methods of modern organic chemistry.

CHEM 363 Physical Chemistry Laboratory 1.
(2) (Fall and Winter) (4 hours) (Prerequisites: CHEM 213 and CHEM 273) (Each lab section is limited enrolment) Selected experiments to illustrate physico-chemical principles.

CHEM 365 Statistical Thermodynamics.
(2) (Winter) (2 lectures) (Prerequisite: CHEM 345) Molecular basis of thermodynamics with applications to ideal gases and simple solids. Topics to be covered will include: calculation of thermodynamic functions, chemical equilibrium constants, Einstein and Debye models of solids, absolute reaction rate theory, Debye-Hückel theory of strong electrolytes.

CHEM 367 Instrumental Analysis 1.
(3) (Fall) (2 lectures and 4 hours of laboratory) (Prerequisite: CHEM 257 or CHEM 277) (Each lab section is limited enrolment) An introduction to modern methods of instrumental analysis emphasizing chromatography and electrochemical methods. Analytical methods to be examined in detail include gas liquid chromatography, high performance liquid chromatography, flow injection analysis, and electrochemical methods. Laboratory exercises give the student practical exposure to these techniques.

CHEM 371 Inorganic Chemistry Laboratory.
(2) (Fall and Winter) (4 hours) (Prerequisite: CHEM 362; prerequisite/corequisite: CHEM 381.) (Restriction: Not open to students who have taken CHEM 392) Modular format
incorporating self-paced and self-guided instructions. In consultation with the instructors, a program of experimental modules is chosen covering projects related to theoretical principles, synthetic techniques and those instrumental methods used in modern inorganic and organometallic chemistry.

CHEM 371D1 (1), CHEM 371D2 (1) Inorganic Chemistry Laboratory.
(Fall) (Prerequisite: CHEM 362; prerequisite/corequisite: CHEM 381.) (Restriction: Not open to students who have taken CHEM 352.) (Students must register for both CHEM 371D1 and CHEM 371D2.) (No credit will be given for this course unless both CHEM 371D1 and CHEM 371D2 are successfully completed in consecutive terms) (CHEM 371D1 and CHEM 371D2 together are equivalent to CHEM 371) Modular format incorporating self-paced and self-guided instructions. In consultation with the instructors, a program of experimental modules is chosen covering projects related to theoretical principles, synthetic techniques and those instrumental methods used in modern inorganic and organometallic chemistry.

CHEM 377 Instrumental Analysis 2.
(3) (Winter) (2 lectures and 4 hours of laboratory) (Prerequisite: CHEM 367) (Each lab section is limited enrolment) Spectroscopic methods of analysis will be studied with respect to fundamentals, operational aspects and instrument design. Topics will range from UV-visible to x-ray spectrometry. Methodologies will be evaluated with respect to their application in spectrometric systems. Laboratory automation will be studied and applied in the laboratory.

CHEM 381 Inorganic Chemistry 2.
(3) (Fall) (3 lectures) (Prerequisite: CHEM 281.) (Restriction: For Honours and Major Chemistry students) (Restriction: Not open to students who have taken or plan to take CHEM 301) Introduction to transition metal chemistry, coordination numbers and geometry, and nonmenclenture will be followed by a discussion of crystal field theory and its applications to problems in spectroscopy, magnetochemistry, thermodynamics and kinetics. Several aspects related to applications of organometallic compounds in catalysis and bioinorganic systems will be discussed.

CHEM 392 Organic Chemistry: Natural Products.
(3) (Winter) (3 lectures) (Prerequisite/corequisite: CHEM 302) Structure, synthesis, stereochemistry and biosynthesis.

CHEM 392D1 (1.5), CHEM 392D2 (1.5) Integrated Inorganic/Organic Laboratory.
(Fall) (Prerequisite/corequisites: CHEM 381 and CHEM 302. Advanced laboratory for Chemistry Honours and Major students. Students enrolled in CHEM 392 are strongly advised to choose the D option.) (Restriction: Not open to students who have taken CHEM 362.) Modular format of self-paced and self-guided instruction. A program of modules is selected in consultation with the laboratory staff. The experimental modules consist of projects related to the theoretical principles, synthetic techniques and instrumental methods used in modern organic, inorganic and organometallic chemistry.

CHEM 396 Undergraduate Research Project.
(3) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.) (Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects will be suggested each term which may have project-specific prerequisites. Some projects may be accessible to students in other disciplines. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.) Independent research project with a final written report.

CHEM 400 Independent Study in Chemistry.
(1) (Prerequisites: CHEM 213, CHEM 222, CHEM 277D1/D2, CHEM 281, plus at least one course in Chemistry at 300 level or higher.) (Restrictions: Registration is restricted to Honours and Major students in Chemistry and requires the approval of the Director of the Undergraduate Studies in the Department of Chemistry.) Supervised research.

CHEM 419 Advances in Chemistry of Atmosphere.
(3) (Winter) (3 lectures) (Prerequisites: CHEM 243, and CHEM 263 or CHEM 213 and CHEM 273, MATH 222 and MATH 315 (or equivalents) or permission of instructor.) (Restriction: Not open to students who have taken ATOC 419, CHEM 619, or ATOC 619) (Offered in even years. Students should register in ATOC 419 in odd years.) Selected areas of atmospheric chemistry from field and laboratory to theoretical modelling are examined. The principles of atmospheric reactions (gas, liquid and heterogeneous phases in aerosols and clouds) and issues related to chemical global change will be explored.

CHEM 455 Introductory Polymer Chemistry.
(3) (Fall) (Prerequisites: CHEM 243 and CHEM 263 or CHEM 213 and CHEM 273, or CHEM 233 (For engineering students only.) A survey course on the structure of polymers, kinetics and mechanisms of polymer and copolymer synthesis; characterization and molecular weight distributions; polymer microstructure, the thermodynamics of polymer solutions; the crystalline and amorphous states, rubber elasticity and structure-property relationships.

CHEM 462 Green Chemistry.
(3) (Fall) (3 lectures) (Prerequisites: CHEM 302 and CHEM 381) New reactions and methods which can be used for the production of chemicals from renewable feedstocks; the use of new environmentally benign solvents, catalysts and reagents; organic reactions in aqueous media and in supercritical carbon dioxide; bio-catalysis and bio-processes.

CHEM 470 Research Project.
(6) (Fall and Winter) (Prerequisite: registration by Departmental permission only) (Please see regulations concerning Project Courses, under “Project Courses” in the Faculty Degree Requirements section) A course designed to give students research experience. The student will be assigned a project supervisor and a research project at the beginning of the session. The project will consist of a literature survey, experimental and /or theoretical work, a written research report and an oral examination.

CHEM 470D1 (3), CHEM 470D2 (3) Research Project.
(Fall) (Students must register for both CHEM 470D1 and CHEM 470D2.) (Students must also register for CHEM 470D2) (No credit will be given for this course unless both CHEM 470D1 and CHEM 470D2 are successfully completed in consecutive terms) (CHEM 470D1 and CHEM 470D2 together are equivalent to CHEM 470) A course designed to give students research experience. The student will be assigned a project supervisor and a research project at the beginning of the session. The project will consist of a literature survey, experimental and/or theoretical work, a written research report and an oral examination.
CHEM 480 Research Project.  
(3) (Fall) (Prerequisite or Corequisite: CHEM 490. Registration by Departmental permission only.) (Please see regulations concerning Project Courses, under "Project Courses" in the Faculty Degree Requirements section) A course designed to give Honours students research experience. The student will be assigned a project supervisor and a research project at the beginning of the session. The project will consist of a literature survey, experimental or theoretical work, a written research report and an oral examination.

CHEM 480D1 (1.5), CHEM 480D2 (1.5) Research Project.  
(Fall) (Students must register for both CHEM 480D1 and CHEM 480D2.) (No credit will be given for this course unless both CHEM 480D1 and CHEM 480D2 are successfully completed in consecutive terms) (CHEM 480D1 and CHEM 480D2 together are equivalent to CHEM 480) A course designed to give Honours students research experience. The student will be assigned a project supervisor and a research project at the beginning of the session. The project will consist of a literature survey, experimental or theoretical work, a written research report and an oral examination.

CHEM 490D1 (1.5), CHEM 490D2 (1.5) Research Project.  
(Fall) (Prerequisite or Corequisite: CHEM 480. Registration by Departmental permission only) (Please see regulations concerning Project Courses, under "Project Courses" in the Faculty Degree Requirements section) (Students must register for both CHEM 490D1 and CHEM 490D2.) A course designed to give Honours students research experience. The student will be assigned a project supervisor and a research project at the beginning of the session. The project will consist of a literature survey, experimental or theoretical work, a written research report and an oral examination.

(3) (Prerequisite: CHEM 302) (Restriction: Not open to students who have taken CHEM 402.) This course will cover biologically relevant molecules, particularly nucleic acids, proteins, and their building blocks. In each case, synthesis and biological functions will be discussed. The topics include synthesis of oligonucleotides and peptides; chemistry of phosphates; enzyme structure and function; coenzymes, and enzyme catalysis; polypeptides; antiviral and anticancer agents.

CHEM 503 Drug Design and Development 1.  
(3) (Fall) (Prerequisites: CHEM 302, BIOL 200, BIOL 201 or BIOC 212, PHAR 300 or PHAR 301 or PHAR 303 or permission of instructor) (Restriction: U3 and graduate students. Students can register only with permission of coordinators. Prior to students registered in the Minor in Pharmacology) (Restriction: Not open to students who are taking or have taken PHAR 503) Interdisciplinary course in drug design and development covering chemistry, mechanisms of action and steps in drug development, principles and problems in drug design.

CHEM 504 Drug Design and Development 2.  
(3) (Winter) (Prerequisite: CHEM 503 and permission of instructor) (Restriction: U3 and graduate students. Students can register only with permission of coordinators) (Restriction: Not open to students who are taking or have taken PHAR 504) Groups of 2-4 students with different backgrounds will form a team. Each team will select a lead compound, design the analogues, propose the preclinical and clinical studies, present possible untoward effects, and reasons for drug (dis)approval.

CHEM 514 Biophysical Chemistry.  
(3) (Winter) (Prerequisite: CHEM 203 or CHEM 204 or CHEM 223 and CHEM 243, or permission of instructor.) (Restriction: Not open to students who have taken CHEM 404.) Physical chemistry concepts needed to understand the function of biological systems at the molecular level, including the structure, stability, transport, and interactions of biological macromolecules.

CHEM 531 Chemistry of Inorganic Materials.  
(3) (Winter) (3 lectures) (Prerequisite: CHEM 381) Structure, bonding, synthesis, properties and applications of covalent, ionic, metallic crystals, and amorphous solids. Defect structures and their use in synthesis of specialty materials such as electronic conductors, semiconductors, and superconductors, and solid electrolytes. Basic principles of composite materials and applications of chemistry to materials processing.

CHEM 533 Small Molecule Crystallography.  
(3) (Fall) (Prerequisite: CHEM 355 or permission of instructor.) Fundamentals of x-ray diffraction related to small molecule structure resolution, space groups, diffraction theory, strategies for structure solution, and refinement will be covered.

CHEM 534 Nanoscience and Nanotechnology.  
(3) (Fall) (Prerequisites: CHEM 334 or PHYS 334 or permission of instructor) (Corequisites: one of CHEM 345, PHYS 357, or PHYS 414 or PHYS 416 or permission of instructor) (Restriction: Not open to students who have taken or are taking PHYS 534) Topics discussed include scanning probe microscopy, chemical self-assembly, computer modelling, and microfabrication/micromachining.

CHEM 535 Chemistry of Pulp and Paper.  
(3) (Fall) (2 lectures plus a reading/research project.) (Prerequisite: CHEM 302 or permission of instructor.) The industrial processes for converting wood to paper are described with emphasis on the relevant organic, physical, surface chemistry and colloid chemistry. The structure and organization of the polymeric constituents of wood are related to the mechanical, optical and other requisite properties of paper.

CHEM 547 Laboratory Automation.  
(3) (Winter) (Two 1.5 hour lectures, lab) (Prerequisite: CHEM 377, equivalent or permission of instructor) Automation and data handling with respect to modern chemical laboratory instrumentation. Basic electronics, data acquisition, evaluation of laboratory needs, data processing methodologies.

CHEM 552 Physical Organic Chemistry.  
(3) (Fall) (Prerequisite: CHEM 302) The correlation of theory with physical measurements on organic systems; an introduction to photochemistry; solvent and substituent effects on organic reaction rates, etc.; reaction mechanisms.

CHEM 555 NMR Spectroscopy.  
(3) (Fall) (3 lectures) (Prerequisite: CHEM 355 or equivalent) Interpretation of proton and carbon-13 nuclear magnetic resonance spectroscopy in one dimension for structural identification.

CHEM 556 Advanced Quantum Mechanics.  
(3) (Fall) (3 lectures) (Prerequisites: CHEM 345 and PHYS 242) Quantum mechanical treatment of species of chemical interest. Introduction to perturbation theory, both time-dependent and time-independent. Treatment of the variational principle. Introduction to atomic spectra. Chemical bonding in terms of both the valence bond and molecular orbital theory. Elementary collision theory. Interaction of radiation with molecules.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses taught only in alternate years.

Denote courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
CHEM 567 Chemometrics: Data Analysis.
(3) (Winter) (2 lectures and 3 hours of laboratory)
(Prerequisite: Linear Algebra and experience in some computer programming language.) Topics covered include: factorial analysis of chemical spectra, pattern recognition from multisensor data, linear and nonlinear optimization for the determination of optimal reaction conditions, molecular modeling, multisensor calibration, etc.

CHEM 571 Polymer Synthesis.
(3) (Winter) (3 lectures) (Prerequisite: CHEM 302 or equivalent, or permission of instructor.) A survey of polymer preparation and characterization. Mechanisms of chain growth, including free radical, cationic, anionic, condensation and transition metal-mediated polymerization, and the effects of these mechanisms on polymer architecture; preparation of alternating, block, graft and stereoblock copolymers; novel macromolecular structures including dendrimers and other nanostructures.

CHEM 572 Synthetic Organic Chemistry.
(3) (3 lectures) (Prerequisite: CHEM 382) Synthetic methods in organic chemistry and their application to the synthesis of complex molecules.

CHEM 575 Chemical Kinetics.
(3) (Winter) (3 lectures) (Prerequisites: CHEM 273 and CHEM 223/CHEM 243 (formerly CHEM 213).) Kinetic laws, measurement of reaction rates, transition state and collision theory. Elementary reactions in gas, solution and solid phases and on solid surfaces. Reaction mechanisms, laser techniques, molecular beams, chemiluminescence, explosions. Extensive use of computers to simulate the kinetic behaviour of chemical systems.

CHEM 581 Inorganic Topics 1.
(3) (Winter) (Prerequisite: CHEM 381) An introduction to some areas of current interest in inorganic chemistry. Each year a selection of several particularly active areas will be chosen.

CHEM 582 Supramolecular Chemistry.
(3) (Prerequisites: CHEM 222, CHEM 381) Introduction to supramolecular organization will be followed by discussions on the nature of interactions and methodologies to create ordered aggregates of high complexity. Potential of supramolecular chemistry in fabricating smart materials will be explored using specific topics including inclusion chemistry, dendrimers, molecular self-assembly and crystal engineering.

CHEM 585 Colloid Chemistry.
(3) (Winter) (Prerequisites: CHEM 345, MATH 233 and MATH 315, PHYS 241 and PHYS 242. Students who haven’t taken CHEM 223 and CHEM 243 must have taken CHEM 273 or permission of instructor.) Principles of the physical chemistry of phase boundaries. Electrical double layer theory; van der Waals forces; Brownian motion; kinetics of coagulation; electrophoresis; light scattering; solid/liquid interactions; adsorption; surfactants; hydrodynamic interactions; rheology of dispersions.

CHEM 587 Topics in Modern Analytical Chemistry.
(3) (Fall) (Prerequisites: CHEM 367 and CHEM 377) Current theories of aqueous and nonaqueous solutions, with application to analytical chemistry; recent advances in analytical techniques. Topics may include: chromatography; applications of kinetics, solvent extraction and thermal analysis, with emphasis on their theoretical basis.

CHEM 591 Bioinorganic Chemistry.
(3) (Winter) (3 hours) (Prerequisite: CHEM 381) (Restriction: For Honours and Major Chemistry students or with permission) The roles of transition and main group elements in biology and medicine will be examined with an emphasis on using tools for structure and genome searching as well as becoming acquainted with experimental spectroscopic methods useful for bioinorganic chemistry such as macroscopic X-ray diffraction, EPR and EXAFS.

CHEM 593 Statistical Mechanics.
(3) (Winter) (3 lectures) (Research project) (Prerequisite: CHEM 345. Recommended: CHEM 365) Basic hypotheses of statistical thermodynamics; ideal monatomic, diatomic and polyatomic gases; Einstein and Debye models of solids; statistical theory of black-body radiation; Debye-Hückel theory of electrolyte solutions; absolute reaction rate theory of rate processes; theories of solutions.

CHEM 597 Analytical Spectroscopy.
(3) (Fall) (2 lectures; 3 hours lab) (Prerequisites: CHEM 367 and CHEM 377) The design and analytical use of spectroscopic instrumentation with respect to fundamental and practical limitations. Classical emission, fluorescence, absorption and chemical luminescence. Topics may include photo-acoustic spectroscopy, multielement detector systems.

COMP-Computer Science

COMP 102 Computers and Computing.
(3) (2 lectures; 2 hours laboratory) (Prerequisite: high school level mathematics course on functions.) (Restrictions: Credit will not be given for COMP 102 if it is taken concurrently with, or after, any of: COMP 202, COMP 203, COMP 208, COMP 250. Management students cannot receive credit for COMP 102.) A course for students with no previous knowledge of computer science. The impact of computers on society. Web design and dynamic content. The inner workings of computers (hardware). Networking principles. Algorithm design and programming. A look at how computers store data (image, sound, and video). Software distribution policies and mechanisms.

COMP 199 FYS: Excursions in Computer Science.
(3) (3 hours) (Prerequisite: high school mathematics) (Restriction: Open only to newly admitted students in U0 or U1, who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.) (Maximum 25) This is a seminar format course intended for freshman and other beginning students. The topics are chosen to encourage critical discussion of fundamental ideas. Possible topics are computability, complexity, geometry, vision, AI, pattern recognition, machine models, cryptography and security and social implications of computing.

COMP 202 Introduction to Computing 1.
(3) (Fall and Winter) (3 hours) (Prerequisite: a CEGEP level mathematics course) (Restrictions: COMP 202 and COMP 208 cannot both be taken for credit. COMP 202 is intended as a general introductory course, while COMP 208 is intended for students interested in scientific computation. Credits for either of these courses will not count towards the 60-credit Major in Computer Science. COMP 202 cannot be taken for credit with or after COMP 250.) Overview of components of microcomputers, the internet design and implementation of programs using a modern high-level language, an introduction to modular software design and debugging. Programming concepts are illustrated using a variety of application areas.

COMP 203 Introduction to Computing 2.
(3) (Fall and Winter) (3 hours) (Prerequisites: MATH 133 and COMP 202) (Restrictions: COMP 203 and COMP 250 are considered to be equivalent from a prerequisite point of view, and cannot both be taken for credit. Students who are registered in the following programs: Major or Honours in Computer Science, Major in Software Engineering, any of the joint major programs offered through the Faculty of Science and the Major Concentration in Foundations of Computing, in the Faculty of Arts, may not take this course.) Basic data structures. Representation of arrays, stacks, and queues. Linked lists and their applications to binary trees. Internal sorting. Graph representation. Elementary graph algorithms.

COMP 206 Introduction to Software Systems.
(3) (Fall and Winter) (3 hours) (Prerequisite: COMP 202 or COMP 250) Comprehensive overview of programming in C, use of system calls and libraries, debugging and testing of code; use of development tools like make, version control systems.

COMP 208 Computers in Engineering.
(3) (Fall and Winter) (3 hours) (Prerequisite: differential and integral calculus.) (Corequisite: linear algebra: determinants, vectors, matrix operations.) (Restrictions: COMP 202 and COMP 208 cannot both be taken for credit. COMP 202 is intended as a general introductory course, while COMP 208 is intended for students interested in scientific computations.)
Credits for either of these courses will not count towards the 60-credit Major in Computer Science. COMP 208 cannot be taken for credit with or after COMP 250. Introduction to computer systems. Concepts and structures for high level programming. Elements of structured programming using FORTRAN 90 and C. Numerical algorithms such as root finding, numerical integration and differential equations. Non-numerical algorithms for sorting and searching.

COMP 230 Logic and Computability.
(3) (Prerequisite: CEGEP level mathematics.) Propositional Logic, predicate calculus, proof systems, computability Turing machines, Church-Turing thesis, unsolvable problems, completeness, incompleteness, Tarski semantics, uses and misuses of Gödel's theorem.

COMP 250 Introduction to Computer Science.
(3) (Fall and Winter) (Prerequisites: Familiarly with a high level programming language and CEGEP level Math.) (Restrictions: COMP 203 and COMP 250 are considered to be equivalent from a prerequisite point of view, and cannot both be taken for credit.) An introduction to the design of computer algorithms, including basic data structures, analysis of algorithms, and establishing correctness of programs. Overview of topics in computer science.

COMP 251 Data Structures and Algorithms.
(3) (Fall and Winter) (Prerequisite: COMP 250 or COMP 203.) (Restrictions: Not open to students who have taken or are taking COMP 252. For students in the B.Eng. Program, credit will be given for only one of: COMP 431, COMP 251, COMP 360.) Design and analysis of algorithms. Complexity of algorithms. Data structures. Introduction to graph algorithms and their analysis.

COMP 252 Algorithms and Data Structures.
(3) (Winter) (Prerequisite: COMP 250 and MATH 240) (Restrictions: Open only to students registered in following programs: Honours in Computer Science, Joint Honours in Mathematics and Computer Science, Honours in Applied Mathematics, Honours in Mathematics. Not open to students who have taken or are taking COMP 251.) (Note: COMP 252 can be used instead of COMP 251 to satisfy prerequisites.) The design and analysis of data structures and algorithms. The description of various computational problems and the algorithms that can be used to solve them, along with their associated data structures. Proving the correctness of algorithms and determining their computational complexity.

COMP 273 Introduction to Computer Systems.
(3) (Fall and Winter) (Corequisite: COMP 260.) Number representations, combinational and sequential digital circuits, MIPS instructions and architecture datapath and control, caches, virtual memory, interrupts and exceptions, pipelining.

COMP 280 History and Philosophy of Computing.

COMP 302 Programming Languages and Paradigms.
(3) (Fall and Winter) (Prerequisite: COMP 250 or COMP 203) Programming language design issues and programming paradigms. Binding and scoping, parameter passing, lambda abstraction, data abstraction, type checking, Functional and logic programming.

COMP 303 Software Development.
(3) (Winter) (3 hours, 3 lab hours) (Prerequisites: COMP 206, COMP 250.) (Corequisite: COMP 302.) Software architecture, design patterns, object-oriented programming concepts, profiling and optimization. Students will implement a significant programming project.

COMP 304 Object-Oriented Design.
(3) (Prerequisites: COMP 206, COMP 251, COMP 303.) The object model, objects and classes, verification and testing, object-oriented analysis, unified modeling language and design patterns.

COMP 310 Operating Systems.
(3) (Fall and Winter) (Prerequisite: COMP 273) Control and scheduling of large information processing systems. Operating system software - resource allocation, dispatching, processors, access methods, job control languages, main storage management. Batch processing, multiprogramming, multiprocessing, time sharing.

COMP 321 Programming Challenges.
(1) (Prerequisites: COMP 250 or COMP 206 or COMP 203, MATH 223 and MATH 240.) (Note: At the end of the class, interested students are encouraged to join the McGill team to participate in the annual ACM International Collegiate Programming Competition.) Development of programming skills on tricky challenges, games and puzzles by means of programming competitions.

COMP 322 Introduction to C++.
(1) (Prerequisites: COMP 202 or COMP 250 or COMP 206 or COMP 208. Ability to program in general is presumed. Some familiarity with the C language is assumed.) Basics and advanced features of the C++ language. Syntax, memory management, class structure, method and operator overloading, multiple inheritance, access control, stream I/O, templates, exception handling.

COMP 330 Theoretical Aspects: Computer Science.
(3) (Fall) (Prerequisite: COMP 251.) Mathematical models of computers, finite automata, Turing machines, counter machines, push-down machines, computational complexity.

COMP 335 Software Engineering Methods.
(3) (Winter) (Corequisite: COMP 302) This course in software engineering teaches basic concepts and methods for software development. The focus is on engineering and analysing requirements, design and code. Small software development exercises will be given where students would learn how to apply different methods.

COMP 350 Numerical Computing.

COMP 360 Algorithm Design Techniques.
(3) (Fall and Winter) (Prerequisite: Either COMP 251 or COMP 252, and either MATH 240 or MATH 241, or MATH 363.) (Restriction: Not open to students who have taken or are taking COMP 362.) A study of techniques for the design and analysis of algorithms.

COMP 361 Systems Development Project.
(3) (Winter) (Prerequisite: ECSE 321 or COMP 335 or COMP 303.) Practical issues in systems programming including: inter-process communication, task scheduling, special purpose systems, multi-processor systems. Implementation of a large body of software to illustrate core concepts and provide substantial hands-on experience.

COMP 362 Honours Algorithm Design.
(3) (Fall) (Prerequisite: COMP 252) (Restriction: Not open to students who have taken or are taking COMP 360.) (Note: COMP 362 can be used instead of COMP 360 to satisfy requirements for the 60-credit Major in Computer Science. COMP 208 cannot be taken for credit with or after COMP 250.) Introduction to computer systems. Concepts and structures for high level programming. Elements of structured programming using FORTRAN 90 and C. Numerical algorithms such as root finding, numerical integration and differential equations. Non-numerical algorithms for sorting and searching.

COMP 362 can be used instead of COMP 360 to satisfy requirements for the 60-credit Major in Computer Science. COMP 208 cannot be taken for credit with or after COMP 250.) Introduction to computer systems. Concepts and structures for high level programming. Elements of structured programming using FORTRAN 90 and C. Numerical algorithms such as root finding, numerical integration and differential equations. Non-numerical algorithms for sorting and searching.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses taught only in alternate years.
Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
Denotes courses not available as Education electives.
Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

2007-2008 Undergraduate Programs Calendar, McGill University

C-181
COMP 364 Computer Tools for Life Sciences.
(3) (Prerequisite: BIOL 200.) (Restrictions: Not available to students in Computer Science or Joint Computer Science programs. Not available to students who have taken Comp 208 or Comp 250, or who are taking either of these at the same time.) (Note: It is recommended that students have already taken a laboratory course (e.g., BIOL 301 Cell and Molecular Laboratory). Topics motivated by biological questions.) Basic concepts and tools for storing, retrieving, and analyzing large biological data sets: relational databases, on-line databases, structured query language, scripting for automating interaction with databases and data analysis, digital images and movies, advanced topics.

COMP 396 Undergraduate Research Project.
(3) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.) (Note: Enrollment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects will be suggested each term which may have project-specific prerequisites. Some projects may be accessible to students in other disciplines. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.) Independent research project with a final written report.

COMP 400 Technical Project and Report.
(3) (Fall and Winter) (Prerequisites: 15 Computer Science credits.) (Restriction: For Honours students) A computer related project, typically a programming effort, along with a report will be carried out in cooperation with a staff member in the School of Computer Science.

COMP 409 Concurrent Programming.
(3) (Prerequisites: COMP 251, COMP 302, and COMP 310 or ECSE 427) Characteristics and utility of concurrent programs; formal methods for specification, verification and development of concurrent programs; communications, synchronization, resource allocation and management, coherency and integrity.

• COMP 417 Introduction Robotics and Intelligent Systems.

COMP 420 Secondary Storage Algorithms and Data Structures.
(3) (Fall) (Prerequisites: COMP 251 or COMP 252) Data structures and algorithms for persistent or very extensive data: sequential, logarithmic and direct-access files. Activity, volatility, and symmetry requirements of applications. Efficiency and cost analyses. Systems design. Programming language for secondary storage: basics of relational databases.

COMP 421 Database Systems.
(3) (Winter) (3 hours) (Prerequisites: COMP 206, COMP 251, COMP 302) Database Design: conceptual design of databases (e.g., entity-relationship model), relational data model, functional dependencies, Database Manipulation: relational algebra, SQL, database application programming, triggers, access control. Database Implementation: transactions, concurrency control, recovery, query execution and query optimization.

COMP 423 Data Compression.
(3) (Winter) (3 hours) (Prerequisites: COMP 251, MATH 223, MATH 323) Information Theory. Huffman, arithmetic and dictionary codes. Context Modeling, Lossy compression and quantization. Signal processing. Applications to text, image, speech, audio and video data.

COMP 424 Topics: Artificial Intelligence 1.
(3) (Restrictions: COMP 206, COMP 251, COMP 302) Introduction to search methods in AI problems. Mechanical theorem-proving techniques, game playing by computers, the minimax and alpha-beta algorithms, and heuristic approaches to state space search problems.

COMP 426 Automated Reasoning.
(3) (Prerequisite: COMP 302.) Logic provides computer science with both a unifying foundational framework and a tool for modeling. Introduction to modern constructive logic, its mathematical properties, and its numerous applications in computer science.

• COMP 431 Algorithms for Engineers.
(3) (Prerequisites: ECSE 222 and MATH 363) (Restrictions: COMP 431 is open only to B.Eng. students in Electrical and Computer Engineering. Credit will be given for only one of: COMP 431, COMP 251, COMP 360.) Advanced data structures: heaps, binary search trees, graphs, algorithmic analysis: space-time analysis, worst-case and expected complexity. Examples of searching sorting and merging. Algorithm design: divide-and-conquer, dynamic programming, greedy methods, backtracking. Algorithms: set manipulation, tree traversals. Memory management: hashing, dynamic storage allocation and garbage collection.

• COMP 435 Basics of Computer Networks.
(3) (Winter) (Prerequisite: COMP 310) (COMP 435 and COMP 535 cannot both be taken for credit.) Exposition of the first four layers of the ISO model for computer network protocols. Socket programming. Network administration and configuration and security issues.

COMP 462 Computational Biology Methods.
(3) (Prerequisites: COMP 360 and MATH 323.) (Restriction: Not open to students who have taken COMP 562.) Application of computer science techniques to problems arising in biology and medicine, techniques for modeling evolution, aligning molecular sequences, predicting structure of a molecule and other problems from computational biology.

COMP 490 Introduction to Probabilistic Analysis of Algorithms.
(3) (Prerequisites: COMP 251 and MATH 323) Fundamental tools from probability are used to analyze algorithms. Notions covered included independence, generating functions, probability inequalities, random walks and Markov chains. Analysis of probabilistic recurrences, Las Vegas algorithms, randomized approximation algorithms, random sampling methods, Monte Carlo techniques and algorithms for combinatorial search and graph theoretic problems.

COMP 506 Advanced Analysis of Algorithms.
(3) (Winter) (Prerequisite: COMP 330 or COMP 360 or COMP 431.) The study of computational complexity and intractability: Cook's Theorem, NP-completeness, oracles, the polynomial hierarchy, lower bounds, heuristics, approximation problems.

• COMP 507 Computational Geometry.
(3) (Fall) (3 hours) (Prerequisites: COMP 360 or COMP 362 or permission of instructor or corequisite COMP 506.) Problems in computational geometry; worst-case complexity of geometric algorithms; expected complexity of geometric algorithms and geometric probability; geometric intersection problems; nearest neighbour searching; point inclusion problems; distance between sets; diameter and convex hull of a set; polygon decomposition; the Voronoi diagram and other planar graphs; updating and deleting from geometric structures.

• COMP 512 Distributed Systems.
(4) (Fall) (Prerequisites: COMP 310, COMP 251 or equivalent.) Models and Architectures. Application-oriented communication paradigms (e.g. remote method invocation, group communication). Naming services. Synchronization (e.g. mutual exclusion, concurrency control). Fault-tolerance (e.g. process and replication, agreement protocols). Distributed file systems. Security. Examples of distributed systems (e.g. Web, CORBA). Advanced Topics.

COMP 520 Compiler Designer.
(4) (Fall) (3 hours, 1 hour consultation) (Prerequisites: COMP 273 and COMP 302) The structure of a compiler. Lexical analysis. Parsing techniques. Syntax directed translation.
Run-time implementation of various programming language constructs. Introduction to code generation for an idealized machine. Students will implement parts of a compiler.

**COMP 521 Modern Computer Games.**
(4) (Prerequisite: COMP 303 or COMP 361.) (Corequisite: COMP 557.) Genre and history of games, basic game design, storytelling and narrative analysis, game engines, design of virtual worlds, real-time 2D graphics, game physics and physical simulation, pathfinding and game AI, content generation, 3D game concerns, multiplayer and distributed games, social issues.

**COMP 522 Modelling and Simulation.**
(4) (Fall) (Prerequisites: COMP 251, COMP 302, COMP 350) Simulation and modeling processes, state automata, Petri Nets, state charts, discrete event systems, continuous-time models, hybrid models, system dynamics and object-oriented modeling.

**COMP 523 Language-based Security.**
(3) (Winter) (Prerequisites: COMP 302, COMP 330.) State-of-the-art language-based techniques for enforcing security policies in distributed computing environments. Static techniques (such as type- and proof-checking technology), verification of security policies and applications such as proof-carrying code, certifying compilers, and proof-carrying authentication.

**COMP 524 Theoretical Foundations of Programming Languages.**
(3) (Fall) (Prerequisites: COMP 302 and COMP 330.) Operational and denotational semantics of programming languages. Equivalence theorems for first-order languages. Lambda calculus. Type-inference, typed lambda calculus. Polymorphism. Elements of domain theory and fixed-point induction.

**COMP 525 Formal Verification.**
(3) (Fall) (Prerequisites: COMP 251 and COMP 330.) Propositional logic - syntax and semantics, temporal logic, other modal logics, model checking, symbolic model checking, binary decision diagrams, other approaches to formal verification.

**COMP 526 Probabilistic Reasoning and AI.**
(3) (Winter) (Prerequisites: COMP 206, COMP 360, COMP 424 and MATH 323) Belief networks, Utility theory, Markov Decision Processes and Learning Algorithms.

**COMP 529 Software Architecture.**
(4) (Fall) (Prerequisites: COMP 303 or COMP 304.) Development, analysis, and maintenance of software architectures, with special focus on modular decomposition and reverse engineering.

**COMP 531 Theory of Computation.**

**COMP 533 Object-Oriented Software Development.**
(3) (Fall) (Prerequisites: COMP 335 or ECSE 321) Object-oriented software development; requirements engineering based on use cases; using UML and industry standards as models; the construction and design of software systems; tool-specific design patterns for implementation.

**COMP 535 Computer Networks 1.**
(3) (Fall) (Prerequisite: COMP 310) (Restriction: Students may not take both COMP 435 and COMP 535 for credit) Exposition of the first four layers of the ISO model for computer network protocols, i.e., the physical, data, network, and transport layers. Basic hardware and software issues with examples drawn from existing networks, notably SNA, DECnet, and ARPAnet.

**COMP 537 Internet Programming.**
(3) (3 hours) (Prerequisites: COMP 251 and COMP 302, and any one of COMP 310, COMP 420, COMP 424, or COMP 433) Sockets, User Datagram Protocol (UDP), Transmission utility protocols; Remote Terminal Protocol (Telnet), Simple Mail Transfer Protocol (SMTP), File Transfer Protocol (FTP), Hypertext Transfer Protocol (HTTP), Internet resource database and search engines. Remote File Systems. Distributed objects, Common Object Request Broker Architecture (CORBA).

**COMP 540 Matrix Computations.**
(3) (Fall) (Prerequisite: MATH 327 or COMP 350) Designing and programming reliable numerical algorithms. Stability of algorithms and condition of problems. Reliable and efficient algorithms for solution of equations, linear least squares problems, the singular value decomposition, the eigenproblem and related problems. Perturbation analysis of problems. Algorithms for structured matrices.

**COMP 547 Cryptography and Data Security.**
(4) (Fall) (Prerequisites: COMP 360 or COMP 362, MATH 323.) This course presents an in-depth study of modern cryptography and data security. The basic information theoretic and computational properties of classical and modern cryptographic systems are presented, followed by a cryptanalytic examination of several important systems. We will study the applications of cryptography to the security of systems.

**COMP 552 Combinatorial Optimization.**
(4) (Prerequisite: Math 350 or COMP 362 (or equivalent).) (Restriction: This course is reserved for undergraduate honours students and graduate students. Not open to students who have taken or are taking MATH 552.) Algorithmic and structural approaches in combinatorial optimization with a focus upon theory and applications. Topics include: polyhedral methods, network optimization, the ellipsoid method, graph algorithms, matroid theory and submodular functions.

**COMP 555 Fundamentals of Computer Graphics.**
(3) (Fall) (Prerequisite: COMP 251, COMP 253) The study of fundamental mathematical, algorithmic and representational issues in computer graphics. The topics to be covered are: overview of graphics process, projective geometry, homogeneous coordinates, projective transformations, quadtrees and tensors, line-drawing, surface modeling and object modeling reflectance models and rendering, texture mapping, polyhedral representations, procedural modeling, and animation.

**COMP 559 Fundamentals of Computer Vision.**
(3) (Winter) (Prerequisites: COMP 206, COMP 360, MATH 222, MATH 223) (Restriction: not open to students who have taken 308-766 before January 2001) Biological vision, edge detection, projective geometry and camera modeling, shape from shading and texture, stereo vision, optical flow, motion analysis, object representation, object recognition, graph theoretic methods, high level vision, applications.

**COMP 560 Graph Algorithms and Applications.**
(3) (3 hours) (Prerequisites: COMP 360 or COMP 431 or MATH 343) Algorithms for connectivity, partitioning, clustering, colouring and matching, Isomorphism testing, Algorithms for special classes of graphs. Layout and embedding algorithms for graphs and networks.

**COMP 563 Molecular Evolution Theory.**
(3) (Prerequisites: COMP 251 or COMP 252, MATH 323 or equivalent; or by permission of instructor.) Population genetics; statistical inference from sequence data; phylogenetics, coalescent theory; models of mutation and selection.

---

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses taught only in alternate years.

‡ Professional Practice (Stage) in Dietetics involving special prerequisites

♭ Indicates that departmental approval/permission must be obtained by a student prior to registration.

† Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.

Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.

Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
COMP 564 Computational Gene Regulation.  
(3) (Prerequisite: COMP 462.) This course examines computational problems related to gene regulation at the mRNA and protein levels. With respect to mRNA expression, topics include microarray analysis, SNP detection, and the inference of genetic networks. With respect to protein expression, topics include peptide sequencing, peptide identification, and the interpretation of interaction maps.

COMP 566 Discrete Optimization 1.  
(3) (Fall) (3 hours) (Prerequisites: COMP 360 and MATH 223) Use of computer in solving problems in discrete optimization. Linear programming and extensions. Network simplex method. Applications of linear programming. Vertex enumeration. Geometry of linear programming. Implementation issues and robustness. Students will do a project on an application of their choice.

COMP 567 Discrete Optimization 2.  
(3) (Winter) (3 hours) (Prerequisites: COMP 566 or MATH 417) Formulation, solution and applications of integer programs. Branch and bound, cutting plane, and column generation algorithms. Combinatorial optimization. Polyhedral methods. A large emphasis will be placed on modeling. Students will select and present a case study of an application of integer programming in an area of their choice.

COMP 575 Fundamentals of Distributed Algorithms.  
(3) (Winter) (3 hours) (Prerequisite: COMP 310) Study of a collection of algorithms that are basic to the world of concurrent programming. Discussion of algorithms from the following areas: termination detection, deadlock detection, global snapshots, clock synchronization, fault tolerance (byzantine and self-stabilizing systems). Students will implement algorithms on the BBN butterfly and will present papers on topics in these areas.

COMP 577 Distributed Database Systems.  
(3) (Fall) (3 hours) (Prerequisites: COMP 421 and COMP 310) High-level communication paradigms (e.g. client/server, publish/subscribe). Architecture of distributed information systems. Distributed transactions: concurrency control, recovery, distributed agreement. Data Replication. Data Distribution. Distributed queries. Advanced topics.

COMP 598 Topics in Computer Science 1.  
(3) (Prerequisite: Permission of instructor.) Topics in computer science.

COMP 599 Topics in Computer Science 2.  
(3) (Prerequisite: Permission of instructor.) Topics in computer science.

EPSC-Earth & Planetary Sciences

Offered by: Earth & Planetary Sciences

EPSC 104 The Earth System.  
(3) (Winter) (3 hours lectures) (Restriction: Not open to students who are taking or have taken ATOC 104 or GEGQ 104.) Earth system science examines the complex interactions among the atmosphere, biosphere, geosphere and hydrosphere. It focuses on physical, chemical, and biological processes that extend over spatial scales ranging from microns to the size of planetary orbits, and spans time scales from fractions of a second to billions of years.

EPSC 200 The Terrestrial Planets.  
(3) (Winter) (3 hours lectures) A comparative survey of the planets of our solar system with an emphasis on the terrestrial planets and their implications for the Earth as a planet. Topics include: structure and origin of the solar system, meteorites, and comparisons of the terrestrial planets in terms of their rotational properties, magnetic fields, atmospheres, surface histories, internal structure, chemical composition, volcanism, and tectonics.

EPSC 201 Understanding Planet Earth.  
(3) (Fall or Winter) (3 hours lectures; afternoon field trips) Learn about Earth's origin, its place in the solar system, its internal structure, rocks and minerals, the formation of metal and fossil fuel deposits, and the extinction of dinosaurs. Discover the impact of the volcanic eruptions, earthquakes and mountain chains on Earth's past, present and future. Explore 125 million-year-old Mount Royal.

EPSC 203 Structural Geology 1.  
(3) (Winter) (2 hours lectures, 3 hours laboratory) Primary igneous and sedimentary structures, attitudes of planes and lines, stress and strain, fracturing of rocks, faulting, homogeneous strain, description and classification of folds, foliation and lineation, orthographic and stereographic projections.

EPSC 205 Astrobiology.  
(3) (Winter) (3 hours lectures) (Restriction: Not open to students who have taken or are taking ANAT 205) Astrobiology is the search for the origin, evolution and destiny of life in the universe. The course will provide insight into the formation and evolution of habitable worlds, the evolution of life and the biogeochemical cycles in the Earth's oceans and atmosphere, and the potential for biological evolution beyond an organism's planet of origin.

EPSC 210 Introductory Mineralogy.  
(3) (Fall) (2 hours lectures, 3 hours laboratory) Crystal chemistry and identification of the principal rock-forming and ore minerals. Elementary crystallography. Optional 2-day field trip.

EPSC 212 Introductory Petrology.  
(3) (Winter) (2 hours lectures, 3 hours laboratory) (Prerequisite: EPSC 210) A survey of igneous, sedimentary and metamorphic rocks and the processes responsible for their formation. The laboratory will emphasize the recognition of rocks in both hand-specimen and thin section using optical microscopes.

EPSC 220 Principles of Geochemistry.  
(3) (Fall) (2 hours lecture, 3 hours laboratory) (Prerequisites: EPSC 201, EPSC 210) Basic concepts in geochemistry and the application of geochemical principles of chemistry to geological subsdisciplines. Particular emphasis on origin of elements, controls on their distribution in Earth and cosmos, isotopes, organic geochemistry and water chemistry. Application of phase diagrams to geology.

EPSC 221 General Geology.  
(3) (Fall) (2 hours lectures, 3 hours laboratory) (2-3-4) (Restriction: Open to Engineering students only.) An introductory course in physical geology designed for majors in civil and mining engineering. Properties of rocks and minerals, major geological processes, together with natural hazards and their effects on engineered structures are emphasized. The laboratory is an integral part of the course which includes rock and mineral identification, basic techniques of airphoto and geological map interpretation, and structural geology.

EPSC 225 Properties of Minerals.  
(1) (Fall) (1 hour lecture, 1 hour laboratory) (Restriction: Open to Engineering students only) (Restriction: Not open to students who have taken EPSC 210) Survey of the physical and chemical properties of the main mineral groups. Discussion of their relationships to the chemical composition and structure of minerals. The practical exercises emphasize the physical and chemical properties that relate to industrial uses and environmental issues, and the identification of hand specimens.

EPSC 231 Field School 1.  
(3) (Summer: Two-week field school in May) (Prerequisite: EPSC 203, EPSC 212, or equivalent) Geological mapping of selected areas, preparation of maps, reports from field notes, aerial photographs, etc.

EPSC 233 Earth and Life History.  
(3) (Fall) (3 hours lectures) Interpretation of stratified rocks; history of Earth with special emphasis on the regions of North America; outline of the history of life recorded in fossils.

EPSC 243 Environmental Geology.  
(3) (Fall or Winter) (3 hours lectures) Introduction to the relationship of geological processes and materials to the human environment; geologic hazards; hydrogeology; impacts of waste disposal, energy use, land resource development.

EPSC 250 Natural Disasters.  
(3) (Fall) (3 hours lectures) (Restriction: Not open to students who have taken or are taking ATOC 250) This course examines the science behind different types of disasters and our ability
or inability to control and predict such events. From this course the student will gain an appreciation of natural disasters beyond the newspaper headlines, and will better understand how the effects of disasters can be reduced.

**EPSC 312 Spectroscopy of Minerals.**
(3) (Winter) (6 hours laboratory and relevant in-lab lectures) (Prerequisites: MATH 314, EPSC 320.) (Corequisites: MATH 319) Demonstration of spectroscopic techniques applied to the identification of minerals and to the analysis of their composition and structure.

**EPSC 320 Elementary Earth Physics.**
(3) (Fall) (3 hours lectures) (Prerequisite: MATH 222) Physical properties of Earth and the processes associated with its existence as inferred from astronomy, geodesy, seismology, geology, terrestrial magnetism and thermal evolution.

**EPSC 330 Earthquakes and Earth Structure.**
(3) (Winter) (3 hours lectures, tutorial as required) (Prerequisites: MATH 314, EPSC 320.) (Corequisites: MATH 319) Seismic wave theory: body waves, surface waves and free oscillations; seismicity and earthquakes; seismology and Earth's internal structure.

**EPSC 331 Field School 2.**
(3) (Winter or Summer) (Two-week intensive field school to a range of national and international locations.) (Prerequisites: enrollment in U2 or U3 EPS program and permission of the instructor.) (Alternates years with EPSC 341.) Two week field studies in selected branches of the geosciences.

**EPSC 334 Invertebrate Paleontology.**
(3) (Winter) (2 lectures and one laboratory period) Preservation of fossils; the fossil record of invertebrates; use of fossils in stratigraphy and paleoecology; fossils in evolutionary studies. Fossils of invertebrates are studied in the laboratory.

**EPSC 341 Field School 3.**
(3) (Winter or Summer) (Two week intensive field school to a range of national and international locations.) (Prerequisites: enrollment in U2 or U3 EPS program and permission of the instructor.) (Alternates years with EPSC 331.) Two week field studies in selected branches of the geosciences to examine processes in geology.

**EPSC 350 Tectonics.**
(3) (Winter) (3 hours lectures) (Prerequisites: EPSC 320, Calculus 3 or equivalent) Rheology of the Earth, mechanics of the crust and mantle and core, convection in the mantle, evolution and kinematics and deformations of the oceanic and continental plates, thermal evolution of the Earth, the unifying theory of plate tectonics.

**EPSC 396 Undergraduate Research Project.**
(3) (Fall or Winter) (Restriction: For Honours students in 3rd year) (Students must register for both EPSC 480D1 and EPSC 480D2.) A systematic review of the nature and origin of the major types of metallic and non-metallic mineral deposits; typical occurrences; geographic distribution; applications to exploration. Emphasis on magmatic ores, massive sulfides, iron formations.

**EPSC 425 Sediments to Sequences.**
(3) (Fall or Winter) (6 hours laboratory) (Prerequisites: EPSC 210, EPSC 212) Processes and products of modern and ancient carbonate and siliciclastic depositional environments. Sequence stratigraphy as a tool for studying the fundamental controls (sea level, tectonics, sediment supply, etc.) on stratigraphic architecture.

**EPSC 435 Geophysical Applications.**
(3) (Winter) (3 hours lectures) (Prerequisites: Calculus 3, Linear Algebra and EPSC 320 or equivalents) Methods in geophysical surveying including gravity, magnetism, electromagnetism, resistivity and induced polarisation, seismology and radioactivity; applications to oil and mineral exploration and near surface environmental and hydrological targets.

**EPSC 445 Metamorphic Petrology.**
(3) (Winter) (2 hours lectures, 3 hours laboratory) (Prerequisites: EPSC 210, EPSC 303, EPSC 312) The origin, classification and petrological significance of metamorphic rocks, from the point of view of theory, experiment and field observations.

**EPSC 452 Mineral Deposits 2.**
(3) (Fall) (2 hours lectures, 3 hours laboratory) (Prerequisite: EPSC 312, EPSC 220) A systematic review of the nature and origin of the major types of metallic and non-metallic mineral deposits; typical occurrences; geographic distribution; applications to exploration. Emphasis on magmatic ores, massive sulfides, iron formations.

**EPSC 455 Sedimentary Geology.**
(3) (Fall) (2 hours lectures, 3 hours laboratory) (Prerequisites: EPSC 210, EPSC 212) This course discusses the origin, diagenesis, classification and economic importance of sedimentary rocks. Students will learn about the physical properties of sedimentary rocks, including porosity and permeability, different techniques for analyzing those rocks (thin sections, hand specimens, wireline logs) and the types of sedimentary basins within which sediments accumulate.

**EPSC 478 Short Research Project.**
(1) (Fall or Winter) (Restrictions: Open only to U3 students. Students are expected to find an appropriate instructor for their project.) Supervised research project in earth and planetary sciences.

**EPSC 480D1 (3), EPSC 480D2 (3) Honours Research Project.**
(Fall) (Restriction: For Honours students in 3rd year) (Students must register for both EPSC 480D1 and EPSC 480D2.) (No credit will be given for this course unless both EPSC 480D1 and EPSC 480D2 are successfully completed in consecutive terms) A written proposal outlining the studies to be undertaken must be submitted to the undergraduate Student Adviser by May 1st of the U-2 year. The proposal will be reviewed by a committee and a decision forwarded by mail. If approved the investigation will be supervised by a staff member, and the results must be presented in the form of an undergraduate thesis.

**EPSC 482 Independent Studies 1.**
(3) (Fall or Winter) (May not be taken concurrently with EPSC 480) Research and/or reading project in Earth and Planetary Sciences. Projects may be selected from those proposed by the student in consultation with a Faculty supervisor. A statement of the proposed project and the method of evaluation must be approved by the Director of Undergraduate studies before October 15. This statement will be included in the student's file.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

- Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
- Indicates that departmental approval/permission must be obtained by a student prior to registration.
- Denotes courses not available as Education electives.
- Denotes courses with limited enrolment.
- Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
EPSC 482D1 (1.5), EPSC 482D2 (1.5) Independent Studies 1.
(Fall) (Students must register for both EPSC 482D1 and EPSC 482D2.) (No credit will be given for this course unless both EPSC 482D1 and EPSC 482D2 are successfully completed in consecutive terms) (EPSC 482D1 and EPSC 482D2 together are equivalent to EPSC 482) Research and/or reading project in Earth and Planetary Sciences, designed by the student in consultation with a Faculty supervisor. A statement of the proposed project and the method of evaluation must be approved by the Director of Undergraduate Studies by October 15. This statement will be included in the student's file.

EPSC 483D1 (1.5), EPSC 483D2 (1.5) Independent Studies 2.
(Fall) (Students must register for both EPSC 483D1 and EPSC 483D2.) (No credit will be given for this course unless both EPSC 483D1 and EPSC 483D2 are successfully completed in consecutive terms) Research and/or reading project on an environmental topic, designed by the student in consultation with a faculty supervisor. A statement of the proposed project and the method of evaluation must be approved by the Director of Undergraduate Studies by October 15. This statement will be included in the student's file.

EPSC 501 Crystal Chemistry.
(3) (Winter) (2 hours lectures, 1 hour seminar) (Prerequisites: CHEM 203 or CHEM 213.) Discussion of crystal structures and compositions of important mineral groups, especially oxides, sulphides and silicates. Solid solution. Relation of structure to morphology and to chemical and physical properties of the rock-forming minerals.

EPSC 510 Geodynamics and Geomagnetism.
(3) (Fall) (3 hours lectures) (Prerequisites: EPSC 320, MATH 319, or equivalent, or permission of the instructor.) (Corequisite: EPSC 350) The gravity field of the Earth and planets, body and orbital dynamics of the Earth, moon and planets, tidal interactions of the Earth-moon-sun system, deformation of the Earth under static and dynamic loads, the magnetic field of the Earth and planets: the magnetosphere, the external radiation belts, magnetohydrodynamic models of the core dynamo, geochronological convection in the core, fluid dynamic motions of the outer core, dynamics of the inner core.

EPSC 519 Isotope Geology.
(3) (Fall) (3 hours lectures) (Prerequisites: equivalent of the U2 core program.) Geochronology, the fractionation of the stable isotopes, and applications to petrology and mineral deposits.

EPSC 525 Subsurface Mapping.
(3) (Winter) (2 hours lectures, 3 hours laboratory) (Prerequisites: EPSC 455 or equivalent, or permission of instructor.) This course will provide participants the opportunity to learn how different types of data (wireline logs, seismic, etc.) are employed to map geological features in the subsurface. Lectures will teach participants about the physical basis of each of the data types, and the basic mapping and analytical techniques (e.g., geostatistics, gridding) that are employed in subsurface mapping. The principal focus will be on applying these techniques and concepts to real-world data sets.

EPSC 530 Volcanology.
(3) (Winter) (2 hours lectures, 3 hours laboratory) (Prerequisites: EPSC 212 and EPSC 312, or equivalent, or permission of instructor.) The physical mechanisms which drive volcanoes and their activity are presented. Descriptive, practical and theoretical approaches to the study of volcanoes are discussed.

EPSC 542 Chemical Oceanography.

EPSC 547 High-Temperature Geochemistry.
(3) (Fall) (2 hours lectures, 3 hours laboratory) (Prerequisites: CHEM 203, CHEM 204 or CHEM 213, or equivalents, or permission of instructor.) The application of thermodynamic principles to igneous and metamorphic petrology and economic geology. Topics include but are not restricted to: solid solutions in minerals, behaviour of geological fluids, phase equilibria, flow processes, estimation of thermodynamic data.

EPSC 548 Processes of Igneous Petrology.
(3) (Fall) (2 hours lectures, 1 hour seminar) (Prerequisite: EPSC 423) Investigation of the primary mechanisms causing the diversity of igneous rock compositions on the Earth, other planets, asteroids, and meteorite parent bodies.

EPSC 549 Hydrogeology.

EPSC 550 Selected Topics 1.
(3) (Fall or Winter) (2 hours seminar, permission of department undergraduate advisor) Research seminar and/or lecture with readings in topics concerning aspects of current interests in Earth & Planetary Sciences.

EPSC 551 Selected Topics 2.
(3) (Fall or Winter) (2 hours seminar, permission of department undergraduate advisor) Research seminar and/or lecture with readings in topics concerning aspects of current interest in Earth & Planetary Sciences.

EPSC 552 Selected Topics 3.
(3) (Fall or Winter) (2 hours seminar, permission of department undergraduate advisor) Research seminar and/or lecture with readings in topics concerning aspects of current interest in Earth & Planetary Sciences.

EPSC 554 Process 1.
(3) (Fall) (3 hours seminar) (Prerequisite: One course in ore petrology (EPSC 451 or EPSC 452) or equivalent, or permission of the instructor.) Physicochemical controls of hydrothermal mineral deposition. Discussion of fluid inclusion theory and application; stable isotope systematics, wall-rock alteration, ore mineral solubility and speciation; and mechanisms of mineral deposition.

EPSC 556 Process 2.
(3) (Winter) (3 hours seminar) (Prerequisite: One course in mineral deposits (EPSC 451 or EPSC 452) or equivalent, or permission of the instructor.) Genesis of hydrothermal mineral deposits. Discussion of geological setting, fluid and metal sources, method of metal transport, and factors controlling metal concentration for a selection of hydrothermal mineral deposit types.

EPSC 570 Cosmochemistry.
(3) (Fall) (3 hours lecture) (Prerequisites: EPSC 220, EPSC 210, or equivalent, or permission of instructor.) Examines the implications of phase equilibria and the compositions of meteorites and the solar system for the formation and internal differentiation of the terrestrial planets and the nature of chemical fractionation processes in both planetary interiors and the solar system as a whole.

EPSC 580 Aqueous Geochemistry.
(3) (Fall) (3 hours lectures) (Prerequisites: EPSC 210, EPSC 212, or equivalent, or permission of instructor.) The use of chemical thermodynamics to study fluid-rock interactions with an emphasis on the aqueous phase. The course will introduce basic concepts and will discuss aqueous complexation, mineral surface adsorption, and other controls on crustal fluid compositions. Applications will range from considering contaminated groundwater systems to metamorphic reactions.

EPSC 590 Applied Geochemistry Seminar.
(3) (Winter) (3 hours seminar) (Prerequisite: permission of instructor) Seminar course devoted to field case studies that illustrate the applications of geochemical principles to solving geologic problems. Each student will prepare and lead a class devoted to a geochemical subject of their own choosing.
ESYS- Earth System Science
Offered by: Atmospheric & Oceanic Sciences

ESYS 200 Earth System Processes.
(3) (Winter) (3 hours lecture) Complex interactions among the atmosphere, biosphere, geosphere and hydrosphere. Biological, chemical and physical processes within and between each "sphere" that extend over spatial scales ranging from microns to the size of planetary orbits and that span time scales from fractions of a second to billions of years.

ESYS 300 Investigating the Earth System.
(3) (Fall) (3 hours lecture) (Prerequisite: ESYS 200 or equivalent.) An understanding of the biological, chemical and physical fundamentals of the Earth system and how the different components interact. The mechanisms controlling interactions between reservoirs are quantitatively investigated. Special emphasis on the development and response of the Earth system to perturbations.

ESYS 301 Earth System Modelling.
(3) (Winter) (3 hours lecture) (Prerequisite: ESYS 200 or ENVR 200 or equivalent.) Principal concepts of systems modelling related to earth system science and environmental science. Students explore the ideas of state, stability, equilibria, feedbacks, and complexity using simple models.

ESYS 500 Earth System Applications.
(3) (Fall) (3 hours seminar) Individual research projects that contribute to a group project that addresses one of the six scientific "Grand Challenges" crucial to humanity: global cycles (water and biogeochemical); climate variability and change; land use and land cover change; energy and resources; earth hazards; earth-atmosphere observation, monitoring, analysis and prediction.

EXMD- Experimental Medicine
Offered by: Medicine

EXMD 401 Physiology and Biochemistry Endocrine Systems.
(3) (Winter) (Prerequisite: BIOL 200 and BIOL 201) Offered in conjunction with the Department of Physiology. The course provides a basic knowledge of endocrine systems encompassing biosynthesis, metabolism and physiological actions of hormones. Specific topics covered are hormones of the hypothalamus, pituitary, adrenals, thyroids, parathyroids, pancreas, gut and the gonads. The role of hormones and growth factors in pregnancy and fetal development are also discussed.

EXMD 502 Advanced Endocrinology.
(3) (Fall) (Prerequisite: Undergraduate): EXMD 301 or an equivalent course This course is designed for U3 students who are in a major or honors program in anatomy, biology, biochemistry or physiology and for graduate students. A multidisciplinary approach will be used to teach biosynthesis and processing of hormones, their regulation, function and mechanism of action. The material will cover hypothalamic, pituitary, thyroid, atrial and adrenal hormones as well as prostaglandins and related substances.

EXMD 503 Advanced Endocrinology.
(3) (Winter) Study of the parathyroids, gut and pancreatic hormones and growth factors. In addition, the role of hormones and growth factors in reproduction and fetal maturation will be discussed.

EXMD 504 Biology of Cancer.
(3) (Fall) (Prerequisite: Undergraduate): A good knowledge of biology at the cellular and molecular level. Open to U3 and graduate students only) An introduction to the biology of malignancy. A multidisciplinary approach dealing with the etiology of cancer, the biological properties of malignant cells, the host response to tumour cell growth and the principles of cancer therapy.

EXMD 506 Advanced Applied Cardiovascular Physiology.
(3) (Winter) (Prerequisite: Undergraduate): PHGY 313 or by permission of Instructors) Offered in conjunction with the Department of Physiology. Current topics, methods and techniques for studying the cardiovascular system. Basic and applied cardiac electrophysiology, mechanisms of pacemaker activity, arrhythmias, the effects of drugs on cardiac functions. Fetal circulation, coronary circulation, mechanics of blood flow, cardiovascular diseases, renal and neural control of the circulation, and cardiac assist devices.

EXMD 507 Advanced Applied Respiratory Physiology.
(3) (Fall) (Prerequisite: PHGY 313) Offered in conjunction with the Department of Physiology. In depth coverage of respiratory biology including: functional anatomy of the respiratory system, pulmonary statics and dynamics, chest wall and respiratory muscles, ventilation and perfusion, control of breathing, and defense mechanisms. This course is aimed at providing a solid grounding in pulmonary biology and its research applications.

EXMD 508 Advanced Topics in Respiration.
(3) (Winter) (Prerequisite: EXMD 507) Offered in conjunction with the Department of Physiology. In depth coverage of developmental physiology, pulmonary vascular physiology, biology of airway smooth muscle, respiratory epithelium and molecular biology of respiratory muscles. Dyspnea, mechanical ventilation and respiratory failure will also be covered. This course emphasizes application of respiratory biology to basic and applied research and touches on pulmonary pathophysiology.

EXMD 509 Gastrointestinal Physiology and Pathology.
(3) (Winter) (Offered in conjunction with the Centre for Continuing Education) Using problem-based learning, the course examines the various business interactions between researchers and their business partners in support and development of research into commercial endeavours using models such as venture capital, business partnerships, or grants-in-aid.

EXMD 510 Bioanalytical Separation Methods.
(3) (Fall) The student will be taught the capabilities and limitations of modern separation methods (gas and high-performance liquid chromatography, capillary electrophoresis, hyphenated techniques). Application of these techniques to solve analytical problems relevant to biomedical research will be emphasized, with special attention being paid to the processing of biological samples.

EXMD 511 Joint Venturing with Industry.
(3) (Winter) (Offered in conjunction with the Centre for Continuing Education) Using problem-based learning, the course examines the various business interactions between researchers and their business partners in support and development of research into commercial endeavours using models such as venture capital, business partnerships, or grants-in-aid.

FIGS-Freshman Interest Groups
Offered by: Science
For more information, please see "Freshman Interest Groups" in the Faculty of Science section of the Undergraduate Programs calendar.

FIGS 196
(0) (Fall)

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
GEOG-Geography
Offered by: Geography

GEOG 104 The Earth System.
(3) (Winter) (Restriction: Not open to students who are taking or have taken ATOC 104 or EPSC 104.) Earth system science examines the complex interactions among the atmosphere, biosphere, geosphere and hydrosphere. It focuses on physical, chemical, and biological processes that extend over spatial scales ranging from microns to the size of planetary orbits, and spans time scales from fractions of a second to billions of years.

GEOG 199 FYS: Geo-Environments.
(3) (Fall) (Restriction: Open only to newly admitted students in U0 or U1, who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.) (Maximum 25. Closed to Geography Majors) Geography studies the complex but crucial relationships between people and their physical and socio-cultural environments. The course is constructed around field trips and preparatory seminars which provide an opportunity for students to learn about a variety of physical environments and their utilisation.

GEOG 200 Geographical Perspectives: World Environmental Problems.
(3) (Fall and Summer) (3 hours) Introduction to geography as the study of nature and human beings in a spatial context. An integrated approach to environmental systems and the human organization of them from the viewpoint of spatial relationships and processes. Special attention to environmental problems as a constraint upon Third World development.

GEOG 201 Introductory Geo-Information Science.
(3) (Fall) (3 hours and lab) An introduction to Geographic Information Systems. The systematic management of spatial data. The use and construction of maps. The use of microcomputers and software for mapping and statistical work. Air photo and topographic map analyses.

GEOG 202 Statistics and Spatial Analysis.
(3) (Winter) (2.5 hours and lab) (You may not be able to receive credit for this course and other statistic courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) Exploratory data analysis, univariate descriptive and inferential statistics, non-parametric statistics, correlation and simple regression. Problems associated with analysing spatial data such as the ‘modifiable areal unit problem’ and spatial autocorrelation. Statistics measuring spatial pattern in point, line and polygon data.

GEOG 203 Environmental Systems.
(3) (Fall) (3 hours) (Restriction: Because of quantitative science content of course, not recommended for B.A. and B.Ed. students in their U0 year.) An introduction to system-level interactions among climate, hydrology, soils and vegetation at the scale of drainage basins, including the study of the global geographical variability in these land-surface systems. The knowledge acquired is used to study the impact on the environment of various human activities such as deforestation and urbanisation.

GEOG 205 Global Change: Past, Present and Future.
(3) (Winter) (3 hours) An examination of global change, from the Quaternary Period to the present day involving changes in the physical geography of specific areas. Issues such as climatic change and land degradation will be discussed, with speculations on future environments.

GEOG 210 Global Places and Peoples.

GEOG 216 Geography of the World Economy.
(3) (Fall) (3 hours) The course introduces the geography of the world economic system. It describes the spatial distribution of economic activities and examines the factors which influence their changing location. Case studies from both “developed” and “developing” countries will test the different geographical theories presented in lectures.

GEOG 217 The Canadian City.
(3) (Winter) (3 hours) An introduction to the social, economic, political and built environments of Canadian cities. Theories of the internal structure of cities, and relationships between urban places of various sizes. The course situates Canadian urbanism in the North American context, and emphasizes social and economic processes distinctive to Montreal.

GEOG 221 Environment and Health.
(3) (Fall) (3 hours) (Restriction: Not open to students who have taken or are taking NRSC 221.) (Note: This course is also offered as NRSC 221. Students enrolled in downtown campus programs register in GEOG 221; students enrolled in Macdonald campus programs register in NRSC 221. In Fall 2007, GEOG221/NRSC 221 will be taught on the Macdonald campus.) (Note: Offered at Macdonald campus in alternate years.) This course introduced physical and social environments as factors in human health, with emphasis on the physical properties of the atmospheric environment as they interact with diverse human populations in urban settings.

GEOG 272 Earth’s Changing Surface.
(3) (Fall) (3 hours) Introduction to the study of landforms as products of geomorphic and geologic systems acting at and near the Earth’s surface. The process geomorphology approach will be used to demonstrate how landforms of different geomorphic settings represent a dynamic balance between forces acting in the environment and the physical properties of materials present.

GEOG 290 Local Geographical Excursion.
(1) (Fall) (1 credit) (Restriction: Open to first-year Geography Major and Honours students only. Not open to students who have taken GEOG 199) (Excursion Dates: September 28-30, 2007.) Introduction to landscape interpretation and geographical site analysis in physical and human geography. A three-day fall excursion with preparatory and concluding seminars.

GEOG 300 Human Ecology in Geography.
(3) (Winter) (3 hours) (Prerequisite: GEOG 203 or ANTH 202 or BIOL 111) The course will examine research approaches in human ecology since its inception early in this century. Emphasis will be placed on the theoretical shifts that have led to its emergence as an important social science perspective. The course will also involve case studies to evaluate the methodological utility of the approach.

GEOG 301 Geography of Nunavut.
(3) (Fall) (3 hours) An introduction to the physical and cultural geography of Canada’s newest territory. The course will emphasize the bio-physical heterogeneity of the natural environment and the cultural and political ecology of the human population.

GEOG 302 Environmental Management 1.
(3) (Fall and Summer) (3 hours) (Prerequisite: Any 200-level course in Geography or MSEE or BIOL 208 or permission of instructor.) An ecological analysis of the physical and biotic components of natural resource systems. Emphasis on scientific, technological and institutional aspects of environmental management. Study of the use of biological resources and of the impact of individual processes.

GEOG 303 Health Geography.
(3) (Winter) (Prerequisite: One of the following: GEOG 201, GEOG 203, GEOG 210, GEOG 216, GEOG 217; or permission of instructor) Discussion of the research questions and methods of health geography. Particular emphasis on health inequalities at multiple geographic scales and the theoretical links between characteristics of places and the health of people.

GEOG 305 Soils and Environment.
(3) (Fall) (3 hours and laboratory) (Prerequisite: GEOG 203 or introductory course in biology or geology) Discussion of the major properties of soils; soil formation, classification and mapping; land capability assessment; the role and response of soils in natural and disturbed environments (e.g. global change, ecosystem disturbance).
GEOG 306 Raster Geo-Information Science.
(3) (Winter) (2 hours and laboratory) (Prerequisite: GEOG 201) Formal introduction to a computer-based Geographical Information System (GIS). Topics will focus on map analysis and on transforming and displaying spatial data. GIS will be used by students to solve problems in both physical and human geography.

GEOG 307 Socioeconomic Applications of GIS.
(3) (Winter) (2 hours and laboratory) (Prerequisites: GEOG 201, MATH 203 or equivalent) GIS applied to the spatial analysis of socioeconomic and market data. Topics include geographic market segmentation, geodemographics, spatial support-systems and modelling applications of GIS. Empirical focus is on analysing spatial patterns of population and consumption characteristics in cities and on facility location problems. Emphasis on visualization and problem solving.

GEOG 308 Principles of Remote Sensing.
(3) (Fall) (3 hours and laboratory periods) (Restriction: Not open to students who have taken or are taking ATOC 308) A conceptual view of remote sensing and the underlying physical principles are presented. Ground-based and satellite systems and the various components of the acoustic and electromagnetic spectrum - from visible to microwave - are discussed. Substantial emphasis is devoted to the application of remote sensed data in geography and atmospheric sciences.

GEOG 309 Geography of Canada.
(3) (Fall) (3 hours) An introduction to the geography of Canada. A comprehensive geographical interpretation of Canada’s salient physical and human characteristics, including landscapes and their evolution, climate, vegetation, society/land relationships and socio-economic attributes of the population.

GEOG 311 Canada - A Geo-Economic Perspective.
(3) (Fall) (3 hours) (Prerequisite: GEOG 216 or permission of instructor) A geographic interpretation of the Canadian economy and its regional and sectoral elements. The course provides an overview of the key theories and approaches to understanding Canada’s economic geography, focusing on the specific geo-economic features of Canada’s regions and their interaction with the global economy.

GEOG 315 Urban Transportation Geography.
(3) (Winter) (3 hours) (Prerequisite: GEOG 216 or permission of instructor) Discusses the urban transportation problem and proposed solutions from a geographic perspective. Specific topics include an analysis of the land use-transportation system in North American cities; its social environmental impacts; the analysis of urban travel behaviour; and the geographical implications of various policy alternatives.

GEOG 316 Political Geography.
(3) (Fall) (3 hours) The study of the spatial dimensions of political activities and developments at the regional, national and global levels in historical and contemporary perspective. Presentation of case studies relating to the theoretical framework of political geography.

GEOG 321 Climatic Environments.
(3) (Winter) (3 hours) (Prerequisite: GEOG 203 or ATOC 210 or permission of instructor) Scope of climatology, physical, dynamic and applied. The Earth/atmosphere system, radiation and energy balances, governing meteorological processes. Movement and circulation of the atmosphere on a local and global scale. Resulting weather systems.

GEOG 322 Environmental Hydrology.
(3) (Winter) (3 hours) (Prerequisite: GEOG 203 or equivalent) Quantitative, experimental study of the principles governing the movement of water at or near the Earth’s surface and how the research relates to the chemistry and biology of ecosystems.

GEOG 331 Urban Social Geography.
(3) (Fall) (3 hours) (Prerequisites: GEOG 216 or GEOG 217 or permission of instructor) Social space and social time. The reflection of social structure in the spatial organization of the city. Historical perspective on changing personal mobility, life cycle, family structure and work organization. The appropriation and alienation of urban spaces.

GEOG 350 Ecological Biogeography.
(3) (Fall) (3 hours) (Prerequisites: GEOG 203 or ENVR 200 or ENVR 202) (Note: Offered at Macdonald campus in alternate years.) The study of the patterns of distribution of organisms in space and time with emphasis on plant communities. Ecological, geographical, historical and anthropological factors affecting these distribution patterns will be discussed. Particular consideration is given to methods for description and classification of plant communities.

GEOG 351 Quantitative Methods.
(3) (Winter) (3 hours) (Prerequisite: MATH 203 or permission of instructor) (You may not be able to get credit for this course and other statistic courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) Multiple regression and correlation, logit models, discrete choice models, gravity models, facility location algorithms, survey design, population projection.

GEOG 370 Protected Areas.
(3) (Winter) (3 hours) (Prerequisite: BIOL 208 or GEOG 203 or AEBI 205) Discussion of the goals of protected areas, focusing on the potential conflict between biodiversity conservation and use for recreation, education and sustainable extraction of resources. Principles and current issues in protected area design and management are reviewed. Examples are taken from developed and developing countries.

GEOG 372 Running Water Environments.
(3) (Fall) (3 hours) (Prerequisites: GEOG 203 and GEOG 272, or ENVR 200 and ENVR 202) The course focuses on the physical habitat conditions found in streams, rivers, estuaries and deltas. Based on the laws governing flow of water and sediment transport, it emphasizes differences among these environments, in terms of channel form, flow patterns, substrate composition and mode of evolution. Flooding, damming, channelisation, forestry impacts.

GEOG 380 Adaptive Environmental Management.
(3) (Winter) (3 hours) (Pre/Core-requirements: GEOG 202 or equivalent, GEOG 203, ENVR 200, BIOL 215, or equivalent.) Articulates and evaluates competing hypotheses about the functioning of human-dominated ecosystems. Introduces the use of statistics, ecological modeling, and management in an integrated ecological management context. Case studies examine factors that impede and enhance adaptive management.

GEOG 381 Geographic Thought and Practice.
(3) (Winter) (3 hours) An overview of the philosophy of geography and its emergence as a discipline nationally and internationally with emphasis on current concepts and their application to geographical studies in local field work analyzing the impact of human environmental interactions.

GEOG 382 Principles Earth Citizenship.
(3) (Winter) (Restrictions: Not open to students who have taken or are taking NRSC 374. Restricted to U2 or U3 students. Enrolment limited to 50.) Foundations and applications of earth citizenship. Foundations: sustainability, tragedy of the commons, dominion, privatization and public welfare, resilience, precautionary principle, and land ethic are critically considered. Applications: implications for relationship between human and natural economies; human population size and control; and morality of modern agricultural and forestry practices.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.

Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.

Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
GEOG 390 Managing Field Research.
(3) (Fall) (Restrictions: Open to U2 or U3 students planning field research or internship as part of their university experience. Not open to U0 or U1 students except with permission of instructor.) Skills for making field research successful, especially where human communities are involved and/or where risk management is important. Topics: characteristics of field-based research, ethical issues, researcher bias, logistics and risk management, research planning, field methods, adapting in the field.

GEOG 396 Undergraduate Research Project.
(3) (Fall and Winter) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.) (Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects will be suggested each term which may have project-specific prerequisites. Some projects may be accessible to students in other disciplines. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.) Independent research project with a final written report.

GEOG 404 Environmental Management 2.
(3) (Winter) (3 hours) (Prerequisite: GEOG 302 or permission of instructor) Practical application of environmental planning, analysis and management techniques with reference to the needs and problems of developing areas. Special challenges posed by cultural differences and traditional resource systems are discussed. This course involves practical field work in a developing area (Kenya or Panama).

GEOG 407 Issues in Geography.
(3) (Fall) (3 hours) Treatment of contemporary issues in geographical research focusing on human-environmental relations and interactions. Instructor(s) and topics will be announced each term the course is given.

GEOG 408 Geography of Development.
(3) (Fall) (3 hours) (Prerequisite: GEOG 210 or GEOG 216 or permission of instructor) Examines the geographical dimensions of development policy, specifically the relationships between the process of development and human-induced environmental change. Focuses on environmental sustainability, struggles over resource control, population and poverty, and levels of governance (the role of the state, non-governmental organizations, and local communities).

GEOG 410 Geography of Underdevelopment: Current Problems.
(3) (Winter) (3 hours) (Prerequisite: GEOG 216 or permission of instructor) An examination of the cultural, political, and economic mechanisms and manifestations of contemporary underdevelopment and the response to it from different regional and national peripheral societies within the dominant world economic system.

GEOG 416 Africa South of the Sahara.
(3) (Winter) (Offered in Kenya as part of the African Field Studies semester.) A synthetic overview of physical and cultural geography examining particularly the relation of African peoples to their landscapes, the causes and consequences of environmental changes, and the idea of sustainable development as it applies to African landscapes, resource systems and economies.

GEOG 424 Europe: Places and Peoples.
(3) (Fall) (3 hours) (Prerequisite: At least one 300-level course in geography, anthropology, history, political science, sociology or permission of instructor.) The dynamics of change in distinct European landscapes, peoples and their cultures during the modern era with emphasis upon divergence/convergence of regional identities, emergent nationalism and their implications for contemporary issues of international cooperation.

GEOG 470 Wetlands.
(3) (Fall) (3 hours) (Restriction: Permission of instructor.) An examination of the structure, function and utility of wetlands. Topics include the fluxes of energy and water, wetland biogeochemistry, plant ecology in freshwater and coastal wetlands and wetlands use, conservation and restoration. Field trip(s) are envisaged to illustrate issues covered in class.

GEOG 490 Geography: Independent Studies.
(3) (Fall and Winter) (Prerequisites: Permission of instructor and completion of 30 credits of courses at the 200-level or above.) (Note: Please see regulations concerning "Project Courses" in the Faculty Degree Requirements section. Before registration a project must be arranged with an instructor and a plan for the independent studies approved by the Department.) Research project permitting independent study under the guidance of a staff member specializing in the field of interest.

GEOG 490D1 (1.5), GEOG 490D2 (1.5) Geography: Independent Studies.
(Fall) (Prerequisites: Permission of instructor and completion of 30 credits of courses at the 200-level or above.) (Students must register for both GEOG 490D1 and GEOG 490D2.) (No credit will be given for this course unless both GEOG 490D1 and GEOG 490D2 are successfully completed in consecutive terms) (GEOG 490D1 and GEOG 490D2 together are equivalent to GEOG 490) (Note: Please see regulations concerning "Project Courses" in the Faculty Degree Requirements section. Before registration a project must be arranged with an instructor and a plan for the independent studies approved by the Department.) Research project permitting independent study under the guidance of a staff member specializing in the field of interest.

GEOG 491D1 (3), GEOG 491D2 (3) Honours Research.
(Fall) (Prerequisite: 183-381) (Restriction: For U3 B.A. and B.Sc. Honours and Joint Honours Geography students) (Students must register for both GEOG 491D1 and GEOG 491D2.) (No credit will be given for this course unless both GEOG 491D1 and GEOG 491D2 are successfully completed in consecutive terms) Supervised reading, research and preparation of an undergraduate thesis under the direction of a member of staff.

GEOG 491N1 (3), GEOG 491N2 (3) Honours Research.
(Winter) (Restriction: For U3 B.A. and B.Sc. Honours and Joint Honours Geography students) (Students must also register for GEOG 491N2) (No credit will be given for this course unless both GEOG 491N1 and GEOG 491N2 are successfully completed in a twelve month period) Supervised reading, research and preparation of an undergraduate thesis under the direction of a member of staff.

GEOG 492D1 (1.5), GEOG 492D2 (1.5) Joint Honours Research.
(Fall) (Restriction: Only for those U3 Joint Honours students in Geography who opt to enrol in a parallel course in another department) (Students must register for both GEOG 492D1 and GEOG 492D2.) (No credit will be given for this course unless both GEOG 492D1 and GEOG 492D2 are successfully completed in consecutive terms) Supervised reading, research and preparation of an undergraduate thesis under the direction of a member of staff.

GEOG 492N1 (1.5), GEOG 492N2 (1.5) Joint Honours Research.
(Winter, Fall) (Students must also register for GEOG 492N2) (No credit will be given for this course unless both GEOG 492N1 and GEOG 492N2 are successfully completed in a twelve month period) Supervised reading, research and preparation of an undergraduate thesis under the direction of a member of staff.

GEOG 494 Urban Field Studies.
(3) (Fall) (Prerequisites: One of the following: GEOG 201, GEOG 203, GEOG 210, GEOG 216, GEOG 217, GEOG 272, or permission of instructor.) Geographical research in urban public and semi-public spaces. Demonstration of techniques of mapping, sampling, measurement, photography, interviewing. Attention to research design.

GEOG 495 Field Studies - Physical Geography.
(3) (Summer) (2-week field school) (Prerequisites: 6 credits from the following list of Systematic Physical Geography courses: GEOG 305, GEOG 321, GEOG 322, GEOG 350, GEOG 372) Field research projects in physical geography. Held locally in Montereogian or Eastern Township regions. The course is organised around field projects designed to formulate and test scientific hypotheses in a physical geography discipline. May summer session. Preregistration in Department
required by March 14.

GEOG 496 Geographical Excursion. (3) (Winter) (Prerequisites: GEOG 290 and permission of instructor) (Note: Barbados Field Trip Dates: Feb. 22-Mar. 2, 2008.) Lecture course on the geography of a region and excursion through the selected country or region including landscape interpretation and field study projects.

GEOG 498 Humans in Tropical Environments. (3) (Winter) (6 hours lecture for 4 weeks, 3 hours seminar, 2 hours laboratory, 8 hours conference) (Restriction: Location in Panama. Student must register for a full semester of studies in Panama) (Prerequisites: HISP 218, MATH 203 or equivalents) Focus on understanding of inter-relations between humans and neotropical environments represented in Panama. Study of contemporary rural landscapes, their origins, development and change. Impacts of economic growth and inequality, social organization, and politics on natural resource use and environmental degradation. Site visits and field exercises in peasant/colonist, Amerindian, and plantation communities.

GEOG 499 Subarctic Field Studies. (3) (Fall) (Prerequisite: GEOG 203 or GEOG 301) An introduction to the geography of the subarctic with emphasis on the application of field methods in physical and/or human geography.

GEOG 500 Geography of Regional Identity. (3) (Fall) (3 hours) (Restriction: Graduate students and final year undergraduates and/or those who have taken GEOG 408) The response of diverse regional groups in Europe to the centripetal tendencies of national institutions. The course draws upon examples from a variety of European regions. Contemporary regional issues will be contextualized within a spatial framework of historical geography.

GEOG 501 Modelling Environmental Systems. (3) (Fall) (1.15 hours lecture, 0.58 hours seminar, 0.69 hours project, 0.58 hours laboratory) (Restriction: open only to U2 or U3 students who have completed six or more credits from courses at the 300 level of Atmospheric and Oceanic Sciences, Biology, Chemistry, Earth and Planetary Sciences, Geography, Natural Resource Sciences, or a McGill School of Environment domain, or permission of the instructor) (Prerequisites: MATH 139 or MATH 140, MATH 141, and MATH 203, or equivalent) (Enrolment limited to 20 students by availability of workstations) Most problems in environmental science deal with weak relationships and poorly defined systems. Model development and simulation will be used in this course to help improve understanding of environmental systems. Simulation of environmental systems is examined, focusing on problem definition, model development and model validation.

GEOG 502 Geography of Northern Development. (3) (Fall) (3 hours) (Prerequisite (Undergraduate): GEOG 301 or GEOG 436, or permission of instructor) Analysis of the evolution of development policies and their spatial implications in circumpolar areas with an emphasis on the application of geographical concepts. Special attention is given to indigenous peoples and new immigrant populations in northern North America.

GEOG 503 Location & Spatial Development. (3) (Winter) (3 hours) (Prerequisites: GEOG 216 and GEOG 202, OR one course in each of microeconomics and macroeconomics, OR permission of instructor.) Patterns of regional economic growth or decline explained in terms of the competitive behaviour of profit-maximizing firms and utility-maximizing households. Ideas, models and evidence developed in competitive location theory.

GEOG 505 Global Biogeochemistry. (3) (Winter) (2 hours and research) (Prerequisite: GEOG 305 or GEOG 322 and permission of instructor) An examination of the storage, transfers and cycling of major elements and substances, with an emphasis on the global scale and the linkages between the atmosphere, hydrosphere, lithosphere and biosphere.

GEOG 506 Advanced Geographic Information Science. (3) (Winter) (2 hours and laboratory) (Prerequisite (Undergraduate): GEOG 201 and GEOG 307 and permission of instructor.) Critically analyse major themes in geographic information science and draw out the practical ramifications for spatial technologies and research. Topics such as spatial interoperability, data quality, scale, visualization, location-based services and ontologies are covered.

GEOG 507 Advanced Social Geography. (3) (Prerequisite: GEOG 331 or equivalent, and permission of instructor.) Current theories and themes in social geography, such as relations between society and space, social and spatial relations of inequality, difference and diversity, situated and embodied identities, social issues and problems, connections between society and nature, all within a spatial framework.

GEOG 508 Resources, People and Power. (3) (Fall) (Prerequisite: GEOG 408 or GEOG 410 or permission of instructor) Addresses how different groups of people struggle over natural resources and environmental change. Politics of conservation in resource-dependent local communities, struggles over resource access and character, questions of power, resistance, class, and gender, and to “nature” as a socially-constructed yet active player.

GEOG 509 Qualitative Methods. (3) (Winter) (Prerequisite: Permission of instructor.) Qualitative methods that geographers use and the debates surrounding their use; epistemological underpinnings of methodological choices.

GEOG 510 Humid Tropical Environments. (3) (Winter) (Prerequisite: GEOG 203 or equivalent and written permission of the instructor) Focus on the environmental and human spatial relationships in tropical rain forest and savanna landscapes. Human adaptation to variations within these landscapes through time and space. Biophysical constraints upon “development” in the modern era.

GEOG 513 Behavioural Geography. (3) (3 hours) (Prerequisite (Undergraduate): a course in introductory statistics) The development of behavioural approaches in geography. A survey of methods and findings in the area of environmental and spatial cognition, preference and choice behaviour. Models of aggregate and aggregate travel demand.

GEOG 522 Advanced Environmental Hydrology. (3) (2 hours and 1 tutorial) (Prerequisite: GEOG 322, or permission of instructor) (Cross-listed with CASN 300) Surface and shallow ground water determine the availability of moisture and many chemical elements at the Earth’s surface. This course discusses the link between surface water and ground water flow systems and the role this link plays in stream flow production and biogeochemical cycling in lake, riparian and terrestrial ecosystems.

GEOG 523 Advanced Climatology. (3) (Fall) (3 hours) (Prerequisite: a previous course in climatology or meteorology, and written permission of the instructor) Principles of physical climatology involving a detailed examination of energy and mass exchange at or near the Earth’s surface, emphasizing radiative heat, moisture and momentum transfers. Methods of measurement based on energy balance, water balance, and turbulent transport theory. Models

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

† Professional Practice (Stage) in Dietetics involving special prerequisites
† Indicates that departmental approval/permission must be obtained by a student prior to registration.
† Denotes courses not available as Education electives.
‡ Denotes courses taught only in alternate years.
∗ Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
>< Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

2007-2008 Undergraduate Programs Calendar, McGill University C-191
of potential and actual evaporation and their use in predicting soil moisture and plant productivity. Examples drawn from natural, agricultural, and urban environments.

- **GEOG 535 Remote Sensing and Interpretation.**
  (3) (Winter) (3 hours) (Prerequisite: GEOG 308 and written permission of instructor) Basic photogrammetry and interpretation procedures for aircraft and space craft photography and imagery.

- **GEOG 536 Geocryology.**
  (3) (Fall) (3 hours) (Prerequisite: GEOG 272 and any 300-level geomorphology course approved by instructor) Study of the unique geomorphic aspects of periglacial and permafrost environments. The focus will be on processes in cold climates, the impact of human activity on permafrost landscapes and potential impacts of climatic change.

- **GEOG 537 Advanced Fluvial Geomorphology.**
  (3) (Winter) (Prerequisite: Undergraduate; permission of instructor) An examination of current advances in fluvial geomorphology: sediment entrainment and transport, alluviation and river channel evolution.

- **GEOG 540 Topics in Geography 1.**
  (3) (Fall) (Prerequisite: Permission of instructor.) (Note: This course is offered on an irregular basis. See Geography website (www.geog.mcgill.ca) for current status.) In-depth review of a current topic in physical geography.

- **GEOG 541 Topics in Geography 2.**
  (3) (Prerequisite: Permission of instructor.) (Note: This course is offered on an irregular basis. See Geography website (www.geog.mcgill.ca) for current status.) Intensive review of a current topic or technique in physical geography.

- **GEOG 542 Advanced Studies in Geography 1.**
  (1) (Prerequisite: Permission of instructor.) (Note: This course is offered on an irregular basis. See Geography website (www.geog.mcgill.ca) for current status.) Intensive review of a current topic or technique in human geography.

- **GEOG 543 Advanced Studies in Geography 2.**
  (1) (Prerequisite: Permission of instructor.) (Note: This course is offered on an irregular basis. See Geography website (www.geog.mcgill.ca) for current status.) Intensive review of a current topic or technique in human geography.

- **GEOG 550 Historical Ecology Techniques.**
  (3) (Winter) (2 hours, laboratory and seminar) (Prerequisite: GEOG 350 or BIOL 215 or PLNT 460 or permission of instructor.) Principles and methods of Quaternary paleoecology and vegetation reconstruction. Examination of ecosystem response to human disturbance and environmental change.

- **GEOG 551 Environmental Decisions.**
  (3) (Winter) (2 hours, seminar, 1 hour tutorial) (Prerequisites: GEOG 302; GEOG 306 or equivalents) This course deals with the role of geographic information, paradigms and modes of analysis - including but not restricted to GIS - in environmental impact assessment and decision making. The focus will be on community-based decision making, particularly where conservation issues are involved. Cross-cultural situations, developing areas and the role of non-government organizations.

- **GEOG 555 Ecological Restoration.**
  (3) (Prerequisites: GEOG 350 or BIOL 308 or PLNT 460 and permission of instructor.) (Note: Requires participation in a field trip over reading week. Offered in alternate years.) A broad overview of ecological restoration. Considers causes of environmental degradation, why and what we restore, how restoration goals are set, and standards in restoration practice, as well as critiques and philosophies of ecological restoration, such as "ecocultural" restoration.

**MATH-Mathematics & Statistics**

Offered by: Mathematics and Statistics

**MATH 111 Mathematics for Education Students.**
(3) (Winter) (Restriction: Open only to students in the B.Ed. program, not open to students who have successfully completed CEGEP course 201-101 or an equivalent. Not available for credit with MATH 112) (Offered by the Faculty of Science. Note: all Science courses have limited enrolment) An overview of the nature of mathematics and its applications. Manipulative algebra, inequalities, linear and quadratic equations. Transformational geometry and symmetry. An intuitive discussion of area and volume. Sets and functions. A brief introduction to probability and statistics.

**MATH 112 Fundamentals of Mathematics.**
(3) (Fall) (Restriction: Not open to students who have taken CEGEP course 201-101) (Restriction: Open only to those students who are deficient in a pre-calculus background) Equations and inequalities, graphs, relations and functions, exponential and logarithmic functions, trigonometric functions and their use, mathematical induction, binomial theorem, complex numbers.

**MATH 122 Calculus for Management.**
(3) (3 hours lecture, 1 hour tutorial.) (Prerequisite: A course in functions.) (Restrictions: Not open to students who have taken or are taking MATH 130, MATH 131, MATH 139, MATH 140, MATH 150, MATH 139, MATH 140, MATH 141, MATH 150 and MATH 151 are not open to students who have taken or are taking MATH 122, except by special permission of the Department of Mathematics and Statistics. Open to Faculty of Management students only. Offered by the Faculty of Science. Students intending to pursue one of the major or minor concentrations in Mathematics and Statistics in the Faculty of Management should take MATH 140 or [MATH 139 and MATH 141 instead.) Review of functions, exponents and radicals, exponential and logarithm. Examples of functions in business applications. Limits, continuity and derivatives. Differentiation of elementary functions. Antiderivatives. The definite integral. Techniques of integration. Applications of differentiation and integration including differential equations. Trigonometric functions are not discussed in this course.

**MATH 123 Linear Algebra and Probability.**
(3) (3 hours lecture, 1 hour tutorial.) (Restrictions: Not open to students who have taken or are taking MATH 223, or MATH 133 or CEGEP objective 00UQ or equivalent. Open to Faculty of Management students only. Offered by the Faculty of Science. Students intending to pursue one of the major or minor concentrations in Mathematics and Statistics in the Faculty of Management should take MATH 133 instead.) Review of functions, exponents and radicals, exponential and logarithm. Examples of functions in business applications. Limits, continuity and derivatives. Differentiation of elementary functions. Antiderivatives. The definite integral. Techniques of integration. Applications of differentiation and integration including differential equations. Trigonometric functions are not discussed in this course.

**MATH 124 Linear Algebra and Probability.**
(3) (Fall and Winter and Summer) (Prerequisite: a course in functions) (Restriction: Not open to students who have taken MATH 221 or CEGEP objective 00UQ or equivalent. (Restriction Note B: Not open to students who have taken or are taking MATH 123, MATH 130 or MATH 131, except by permission of the Department of Mathematics and Statistics.) Systems of linear equations, matrices, inverses, determinants; geometric vectors in three dimensions, dot product, cross product, lines and planes; introduction to vector spaces, linear dependence and independence, bases; quadratic loci in two and three dimensions.

**MATH 133 Vectors, Matrices and Geometry.**
(3) (Fall and Winter) (Prerequisite: a course in functions) (Restriction: Not open to students who have taken MATH 133 or CEGEP objective 00UQ or equivalent.) (Restriction Note B: Not open to students who have taken or are taking MATH 123, MATH 130 or MATH 131, except by permission of the Department of Mathematics and Statistics.) Systems of linear equations, matrices, inverses, determinants; geometric vectors in three dimensions, dot product, cross product, lines and planes; introduction to vector spaces, linear dependence and independence, bases; quadratic loci in two and three dimensions.

**MATH 139 Calculus.**
(4) (Fall and Winter) (3 hours lecture; 2 hours tutorial) (Prerequisite: a course in functions) (Requires Departmental Approval) (Restriction: Not open to students who have taken MATH 120 or CEGEP objective 00UN or equivalent. This course is intended for students with no previous knowledge of Calculus; it is not open to students who have had one term of College level Calculus) (Restriction Note B: Not open to students who have taken or are taking MATH 122 or MATH 130 or MATH 131, except by permission of the Department of Mathematics and Statistics.) (Students continue in MATH 141) (Each Tutorial section is enrolment limited) Review of functions and graphs. Limits, continuity, derivative. Differentiation of elementary functions. Antidifferentiation. Applications.
MATH 140 Calculus 1.
(3) (Fall and Winter and Summer) (3 hours lecture, 1 hour tutorial) (Prerequisite: High School Calculus) (Restriction: Not open to students who have taken MATH 122 or MATH 129 or CEGEP objective 00UN or equivalent) (Restriction Note B: Not open to students who have taken or are taking MATH 122 or MATH 130 or MATH 131, except by permission of the Department of Mathematics and Statistics) (Each Tutorial section is enrolment limited) Review of functions and graphs. Limits, continuity, derivative. Differentiation of elementary functions. Antidifferentiation. Applications.

MATH 141 Calculus 2.
(4) (Fall and Winter and Summer) (Prerequisites: MATH 139 or MATH 140 or MATH 150.) (Restriction: Not open to students who have taken MATH 121 or CEGEP objective 00UP or equivalent) (Restriction Note B: Not open to students who have taken or are taking MATH 122 or MATH 130 or MATH 131, except by permission of the Department of Mathematics and Statistics) (MATH 150 and MATH 151 cover the material of MATH 139, MATH 140, MATH 141, MATH 222) Functions, limits and continuity, differentiation, L'Hospital's rule, applications, Taylor polynomials, parametric curves, functions of several variables.

MATH 150 Calculus A.
(4) (Fall) (3 hours lecture, 2 hours tutorial) (Students with no prior exposure to vector geometry are advised to take MATH 133 concurrently. Intended for students with high school calculus who have not received six advanced placement credits) (Restriction: Not open to students who have taken CEGEP objective 00UN or equivalent) (Restriction Note B: Not open to students who have taken or are taking MATH 122 or MATH 130 or MATH 131, except by permission of the Department of Mathematics and Statistics) (Each Tutorial section is enrolment limited) The definite integral. Techniques of integration. Applications. Introduction to sequences and series.

MATH 151 Calculus B.
(4) (Winter) (3 hours lecture, 2 hours tutorial) (Prerequisite: MATH 150) (Restriction: Not open to students who have taken CEGEP objective 00UP or equivalent) (Restriction: Not open to students in the Faculty of Engineering) (Restriction: Not open to students who have taken MATH 122 or MATH 130 or MATH 131, except by permission of the Department of Mathematics and Statistics) (Restriction: Not open to students who have taken MATH 152) (Each Tutorial section is enrolment limited) Integration, methods and applications, infinite sequences and series, power series, arc length and curvature, multiple integration.

MATH 152 Calculus E.
(4) (Winter) (Prerequisite: MATH 150.) (Restrictions: Open only to students in the Faculty of Engineering. Not open to students who have taken CEGEP objective 00UP or equivalent. Not open to students who have taken or are taking MATH 122 or MATH 130 or MATH 131, except by permission of the Department of Mathematics and Statistics. Not open to students who have taken MATH 151.) Integration, methods and applications, Laplace and wave equations, implicit functions, infinite sequences and series, power series and applications to ODE, arc length and curvature, tangent, normal and conformal applications.

MATH 203 Principles of Statistics 1.
(3) (Fall, Winter and Summer) (No calculus prerequisites) (Restriction: This course is intended for students in all disciplines. For extensive course restrictions covering statistics courses see Section 3.6.1 of the Arts and Science sections of the calendar regarding course overlaps.) (You may not be able to receive credit for this course and other statistics courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar. Students should consult http://www.mcgill.ca/student-records/transfercredits/ for information regarding transfer credits for this course.) Examples of statistical data and the use of graphical means to summarize the data. Basic distributions arising in the natural and behavioural sciences. The logical meaning of a test of significance and a confidence interval. Tests of significance and confidence intervals in the one and two sample setting (means, variances and proportions).

MATH 204 Principles of Statistics 2.
(3) (Winter) (Prerequisite: MATH 203 or equivalent. No calculus prerequisites) (Restriction: This course is intended for students in all disciplines. For extensive course restrictions covering statistics courses see Section 3.6.1 of the Arts and of the Science sections of the calendar regarding course overlaps.) (You may not be able to receive credit for this course and other statistics courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) The concept of degrees of freedom and the analysis of variability. Planning of experiments. Experimental designs. Polynomial and multiple regressions. Statistical computer packages (no previous computing experience is needed). General statistical procedures requiring few assumptions about the probability model.

MATH 222 Calculus 3.
(3) (Fall and Winter and Summer) (Prerequisite: MATH 141. Familiarity with vector geometry or Corequisite: MATH 133) (Restriction: Not open to students who have taken CEGEP course 201-303 or MATH 150, MATH 151 or MATH 227) Taylor series, Taylor's theorem in one and several variables. Review of vector geometry. Partial differentiation, directional derivative. Extreme of functions of 2 or 3 variables. Parametric curves and arc length. Polar and spherical coordinates. Multiple integrals.

MATH 223 Linear Algebra.
(3) (Fall and Winter and Summer) (Prerequisite: MATH 133 or equivalent) (Restriction: Not open to students in Mathematics programs nor to students who have taken or are taking MATH 236, MATH 247 or MATH 251. It is open to students in Faculty Programs) Review of matrix algebra, determinants and systems of linear equations. Vector spaces, linear operators and their matrix representations, orthogonality. Eigenvalues and eigenvectors, diagonalization of Hermitian matrices. Applications.

MATH 235 Algebra 1.
(3) (Fall) (3 hours lecture; 1 hour tutorial) (Prerequisite: MATH 133 or equivalent) Sets, functions and relations. Methods of proof. Complex numbers. Divisibility theory for integers and modular arithmetic. Divisibility theory for polynomials. Rings, ideals and quotient rings. Fields and construction of fields from polynomial rings. Groups, subgroups and cosets; group actions on sets.

MATH 236 Algebra 2.

MATH 240 Discrete Structures 1.
(3) (Fall) (Corequisites: MATH 133 and MATH 222. For Major and Honours students in Computer Science only. Others only with the instructor's permission. Not open to students who have

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses taught only in alternate years.
Denotes courses taugh only by the Faculty of Arts, or Faculty of Science in 2007-08.
Denotes courses not offered by the Faculty of Education which, if appropriate to the student's program, may be included in the academic concentration.
Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

MATH 242 Analysis 1.
(3) (Fall) (Prerequisite: MATH 141) A rigorous presentation of sequences and of real numbers and basic properties of continuous and differentiable functions on the real line.

MATH 243 Analysis 2.
(3) (Winter) (Prerequisite: MATH 242) Infinite series; series of functions; power series. The Riemann integral in one variable. A rigorous development of the elementary functions.

MATH 247 Honours Applied Linear Algebra.
(3) (Winter) (Prerequisite: MATH 133 or equivalent.) (Restriction: Intended for Honours Physics and Engineering students) (Restriction: Not open to students who have taken or are taking MATH 236, MATH 223 or MATH 251) Matrix algebra, determinants, systems of linear equations. Abstract vector spaces, inner product spaces, Fourier series. Linear transformations and their matrix representations. Eigenvalues and eigenvectors, diagonalizable and defective matrices, positive definite and semidefinite matrices. Quadratic and Hermitian forms, generalized eigenvalue problems, simultaneous reduction of quadratic forms. Applications.

MATH 248 Honours Advanced Calculus.
(3) (Fall and Winter and Summer) (Prerequisites: MATH 133 and MATH 222 or consent of Department.) (Restriction: Intended for Honours Mathematics, Physics and Engineering students) (Restriction: Not open to students who have taken or are taking MATH 236) Partial derivatives, implicit functions; Jacobians; maxima and minima; Lagrange multipliers. Scalar and vector fields; orthogonal curvilinear coordinates. Multiple integrals; arc length, volume and surface area. Line integrals; Green's theorem; the divergence theorem. Stokes' theorem; irrational and solenoidal fields; applications.

MATH 249 Honours Complex Variables.
(3) (Winter) (Prerequisite: MATH 248.) (Restriction: Intended for Honours Physics and Engineering students) (Restriction: Not open to students who have taken or are taking MATH 316) Functions of a complex variable; Cauchy-Riemann equations; Cauchy's theorem and consequences. Taylor and Laurent expansions. Residue calculus; evaluation of real integrals; integral representation of special functions; the complex inversion integral. Conformal mapping; Schwarz-Christoffel transformation; Poisson's integral formulas; applications.

MATH 251 Honours Algebra 2.
(3) (Winter) (Prerequisites: MATH 235 or permission of the Department) (Restriction: Not open to students who are taking or have taken MATH 247) Linear equations over a field. Introduction to vector spaces. Linear maps and their matrix representation. Determinants. Canonical forms. Duality. Bilinear and quadratic forms. Real and complex inner product spaces. Diagonalization of self-adjoint operators.

MATH 255 Honours Analysis 2.
(3) (Winter) (Prerequisites: MATH 242 or permission of the Department) Series of functions including power series. Riemann integration in one variable. Elementary functions.

MATH 262 Intermediate Calculus.
(3) (Fall, Winter and Summer) (3-1-5) (Prerequisites: MATH 141, MATH 133 or equivalent.) (Restrictions: Open only to students in the Faculty of Engineering. Not open to students taking or having taken MATH 151, MATH 152, MATH 222 OR MATH 260.) Series and power series, including series solutions to ODEs at ordinary points. Brief review of vector geometry. Vector functions and curves. Partial differentiation and differential calculus for vector valued functions. Unconstrained and constrained extremal problems.

MATH 263 Ordinary Differential Equations and Linear Algebra.
(3) (Fall, Winter and Summer) (3-1-5) (Corequisite: MATH 262 or MATH 260.) (Restrictions: Open only to students in the Faculty of Engineering. Not open to students taking or having taken MATH 281, MATH 315, or MATH 225.) First Order ODEs. Second and higher order linear ODEs. Laplace Transforms. Linear Algebra: introduction to vector spaces, linear transformations, diagonalization of matrices. Application to linear systems of differential equations.

MATH 264 Advanced Calculus.
(3) (Fall, Winter and Summer) (3-1-5) (Prerequisites: MATH 260 or MATH 262 or MATH 151 or MATH 152 or equivalent.) (Restrictions: Open only to students in the Faculty of Engineering. Not open to students taking or having taken MATH 248, MATH 265 or MATH 314.) Multiple integration. Vector fields. Vector calculus. Introduction to partial differential equations and Fourier Series.

MATH 270 Applied Linear Algebra.

MATH 271 Linear Algebra and Partial Differential Equations.

MATH 272 Advanced Calculus.
(3) (Fall and Winter and Summer) (Prerequisites: MATH 133, MATH 222) (Restriction: Not open to students who have taken or are taking MATH 248) Derivative as a matrix. Chain rule. Implicit functions. Constrained maxima and minima. Jacobians. Multiple integration. Line and surface integrals. Theorems of Green, Stokes and Gauss.

MATH 315 Ordinary Differential Equations.
(3) (Fall and Winter and Summer) (Prerequisite: MATH 222.) (Corequisite MATH 133) (Restriction: Not open to students who have taken or are taking MATH 325) First order ordinary differential equations including elementary numerical methods. Linear differential equations. Laplace transforms. Series solutions.

MATH 316 Complex Variables.
(3) (Fall) (Prerequisites: MATH 314 and MATH 243) (Restriction: Not open to students who have taken or are taking MATH 249, MATH 381 or MATH 486.) Algebra of complex numbers. Cauchy-Riemann equations, complex integral, Cauchy's theorems. Taylor and Laurent series, residue theory and applications.

MATH 317 Numerical Analysis.
(3) (Fall) (Prerequisites: MATH 315 or MATH 325 or MATH 261 or MATH 263 and COMP 202 or equivalent.) Error analysis. Interpolation. Numerical solutions of equations by iteration. Numerical integration. Introduction to numerical solutions of differential equations. Programming assumed. Some lab work necessary.

MATH 318 Mathematical Logic.
(3) (Fall) (Restriction: Not open to students who are taking or have taken PHIL 210) Propositional calculus, truth-tables, switching circuits, natural deduction, first order predicate calculus, axiomatic theories, set theory.

MATH 319 Partial Differential Equations.
(3) (Winter) (Prerequisites: MATH 223 or MATH 236, MATH 314, MATH 315) First order equations, geometric theory; second order equations, classification; Laplace, wave and heat equations, Sturm-Liouville theory, Fourier series, boundary and initial value problems.
Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.

Denotes courses taught only in alternate years.

Indicates that departmental approval/permission must be obtained by a student prior to registration.

Denotes courses not available as Education electives.

Denotes courses with limited enrolment.

### MATH 323 Probability.
(3) (Fall and Winter and Summer) (Prerequisites: MATH 141 or equivalent.) (Restriction: Intended for students in Science, Engineering and related disciplines, who have had differential and integral calculus) (Restriction: Not open to students who have taken or are taking MATH 356) Sample space, events, probability, independence, Bayes' Theorem. Basic combinatorial probability, random variables, introductory univariate and discrete multivariate distributions. Independence. Moment generating functions. Expectation, conditional expectation. Inequalities, the weak law of large numbers, central limit theorem. Information theory. Markov chains.

### MATH 324 Statistics.
(3) (Fall and Winter) (Prerequisite: MATH 323 or equivalent) (Restriction: Not open to students who have taken or are taking MATH 357) (You may not be able to receive credit for this course and other statistic courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) Multivariate continuous distributions, sampling distributions, point and interval estimation, hypothesis testing, analysis of variance, contingency tables, nonparametric inference, regression, Bayesian inference.

### MATH 325 Honours Ordinary Differential Equations.
(3) (Fall and Winter) (3-0-6) (Prerequisite: MATH 222.) (Restriction: Intended for Honours Mathematics, Physics and Engineering programs.) (Restriction: Not open to students who have taken MATH 253 (formerly MATH 261), MATH 315) First and second order equations, linear equations, series solutions, Frobenius method, introduction to numerical methods and to linear systems, Laplace transforms, applications.

### MATH 326 Nonlinear Dynamics and Chaos.
(3) (Fall) (Prerequisites: MATH 222, MATH 223) (Restriction: Not open to students who have taken or are taking MATH 376) Linear systems of differential equations, linear stability theory. Nonlinear systems: existence and uniqueness, numerical methods, one and two dimensional flows, phase space, limit cycles, Poincare-Bendixon theorem, bifurcations, Hopf bifurcation, the Lorenz equations and chaos.

### MATH 327 Matrix Numerical Analysis.
(3) (Winter) (Prerequisites: MATH 223 or MATH 236 or MATH 247 or MATH 251, COMP 202 or consent of instructor.) An overview of numerical methods for linear algebra applications and their analysis. Problem classes include linear systems, least squares problems and eigenvalue problems.

### MATH 329 Theory of Interest.
(3) (Winter) (Prerequisite: MATH 141) Simple and compound interest, annuities certain, amortization schedules, bonds, depreciation.

### MATH 335 Computational Algebra.
(3) (Prerequisites: MATH 235 and MATH 236.) (Note: This course is intended primarily for students in the Major Program in Mathematics and the Joint Major Program in Mathematics and Computer Science.) Computational aspects of modern algebra. Computing in groups: algorithms, algorithmic problems in groups, finitely generated abelian groups, free groups and automata, finitely presented groups. Computing in rings: elementary notions of ring theory, ideals of polynomial rings in several variables, Groebner bases, elements of field theory.

### MATH 338 History and Philosophy of Mathematics.
(3) (Fall) Egyptian, Babylonian, Greek, Indian and Arab contributions to mathematics are studied together with some modern developments they give rise to, for example, the problem of trisecting the angle. European mathematics from the Renaissance to the 18th century is discussed in some detail.

### MATH 339 Foundations of Mathematics.
(3) (Winter) (Prerequisites: MATH 235, MATH 318) A continuation of MATH 338. Topics are chosen mainly from 19th and 20th century mathematics, with some emphasis on philosophical and foundational problems. Sample topics are: progress in number theory, construction of the number system, infinity according to Cantor, logic and foundations from Aristotle to Cohen, Gödel's incompleteness theorem, calculability and programs, formalism versus intuitionism, abstract mathematics and categories.

### MATH 340 Discrete Structures 2.
(3) (Winter) (Prerequisites: MATH 235 or MATH 240.) (Corequisites: MATH 223 or MATH 236.) (Restriction: Not open to students who have taken or are taking MATH 343 or MATH 350.) Review of formal writing, proof techniques, graph theory and counting. Mathematical logic. Graph connectivity, planar graphs and colouring. Probability and graphs. Introductory group theory, isomorphisms and automorphisms of graphs. Enumeration and listing.

### MATH 346 Number Theory.
(3) (Winter) (Prerequisite: MATH 235 or consent of instructor) (Restriction: Not open to students who have taken or are taking MATH 377.) Divisibility. Congruences. Quadratic reciprocity. Diophantine equations. Arithmetical functions.

### MATH 348 Topics in Geometry.
(3) (Fall and Summer) (Prerequisite: MATH 133 or equivalent or permission of instructor) Selected topics - the particular selection may vary from year to year. Topics include: isometries in the plane, symmetry groups of frieze and ornamental patterns, equidecomposibility, non-Euclidean geometry and problems in discrete geometry.

### MATH 350 Graph Theory and Combinatorics.
(3) (Prerequisites: MATH 235 or MATH 240 and MATH 251 or MATH 223.) (Restrictions: Not open to students who have taken or are taking MATH 343 or MATH 340.) (Intended for students in mathematics or computer science honours programs.) Graph models. Graph connectivity, planarity and colouring. Extremal graph theory. Matroids. Enumerative combinatorics and listing.

### MATH 352 Problem Seminar.
(1) (Prerequisite: Enrollment in a math related program or permission of the instructor. Requires departmental approval.) (Prerequisite: Enrollment in a math related program or permission of the instructor.) Seminar in Mathematical Problem Solving. The problems considered will be of the type that occur in the Putnam competition and in other similar mathematical competitions.

### MATH 354 Honours Analysis 3.
(3) (Prerequisite: MATH 222 or MATH 236 or MATH 247 or MATH 251, COMP 202 or consent of instructor.) An overview of numerical methods for linear algebra applications and their analysis. Problem classes include linear systems, least squares problems and eigenvalue problems.

### MATH 355 Honours Analysis 4.
(3) (Winter) (Prerequisite: MATH 354 or equivalent.) Introduction to metric spaces. Multivariable differential calculus, implicit and inverse function theorems.

### MATH 356 Honours Analysis 5.
(3) (Fall) (Prerequisite: MATH 223 or MATH 236) Introduction to metric spaces. Multivariable differential calculus, implicit and inverse function theorems.

Denotes courses offered by the Faculty of Education which, if appropriate to the student’s program, may be included in the academic concentration.

Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.
MATH 357 Honours Statistics.
(3) (Winter) (Prerequisite: MATH 356 or equivalent) (Restriction: Not open to students who have taken or are taking MATH 324) Data analysis. Estimation and hypothesis testing. Power of tests. Likelihood ratio criterion. The chi-squared goodness of fit test. Introduction to regression analysis and analysis of variance.

MATH 363 Discrete Mathematics.
(3) (3-0-6) (Prerequisites: MATH 264 or MATH 265 and MATH 263.) (Restriction: Open only to students in the Faculty of Engineering.) Logic and combinatorics. Mathematical reasoning and methods of proof. Sets, relations, functions, partially ordered sets, lattices, Boolean algebra. Propositional and predicate calculi. Recurrences and graph theory.

*MATH 366 Honours Complex Analysis.
(3) (Prerequisite: MATH 248.) (Corequisite: MATH 354.) (Restriction: Not open to students who have taken or are taking MATH 466, MATH 249, MATH 316, MATH 381.) Functions of a complex variable, Cauchy-Riemann equations, Cauchy's theorem and its consequences. Uniform convergence on compacta. Taylor and Laurent series, open mapping theorem, Rouche's theorem and the argument principle. Calculus of residues. Fractional linear transformations and conformal mappings.

MATH 370 Honours Algebra 3.
(3) (Fall) (Prerequisite: MATH 251) Introduction to monoids, groups, permutation groups; the isomorphism theorems for groups; the theorems of Cayley, Lagrange and Sylow; structure of groups of low order. Introduction to ring theory: integral domains, fields, quotient field of an integral domain; polynomial rings; unique factorization domains.

MATH 371 Honours Algebra 4.
(3) (Winter) (Prerequisite: MATH 370) Introduction to modules and algebras; finitely generated modules over a principal ideal domain. Field extensions; finite fields; Galois groups; the fundamental theorem of Galois theory; application to the classical problem of solvability by radicals.

MATH 375 Honours Partial Differential Equations.
(3) (Fall) (Prerequisites: MATH 247 or MATH 251 or equivalent, MATH 248 or equivalent, MATH 252) First order partial differential equations, geometric theory, classification of second order linear equations, Sturm-Liouville problems, orthogonal functions and Fourier series, eigenfunction expansions, separation of variables for heat, wave and Laplace equations, Green's function methods, uniqueness theorems.

MATH 376 Honours Nonlinear Dynamics.
(3) (Fall) (Prerequisites: MATH 222, MATH 223) (Restrictions: Intended primarily for Honours students. Not open to students who have taken or are taking MATH 326.) (Note: Additionally, a special project or projects may be assigned.) This course consists of the lectures of MATH 326, but will be assessed at the honours level.

*MATH 377 Honours Number Theory.
(3) (Winter) (Prerequisite: Enrolment in Mathematics Honours program or consent of instructor) (Restriction: Not open to students who have taken or are taking MATH 346.) (Note: Additionally, a special project or projects may be assigned.) This course consists of the lectures of MATH 346, but will be assessed at the honours level.

MATH 380 Honours Differential Geometry.
(3) (Winter) (Prerequisites: MATH 251 or MATH 247, and MATH 248 or MATH 314) in addition to the topics of MATH 320, topics in the global theory of plane and space curves, and in the global theory of surfaces are presented. These include: total curvature and the Fary-Milnor theorem on knotted curves, abstract surfaces as 2-d manifolds, the Euler characteristic, the Gauss-Bonnet theorem for surfaces.

MATH 381 Complex Variables and Transforms.
(3) (Fall and Winter) (3-1-5) (Prerequisite: MATH 264 or MATH 265) (Restriction: Open only to students in the Faculty of Engineering.) Analytic functions, Cauchy-Riemann equations, simple mappings, Cauchy's theorem, Cauchy's integral formula, Taylor and Laurent expansions, residue calculus. Properties of one and two-sided Fourier and Laplace transforms, the complex inversion integral, relation between the Fourier and Laplace transforms, application of transform techniques to the solution of differential equations. The Z-transform and applications to difference equations.

*MATH 387 Honours Numerical Analysis.
(3) (Fall) (Prerequisites: MATH 325 or 315, COMP 202 or COMP 250.) (Corequisites: MATH 255 or MATH 243.) (Restriction: Intended primarily for Honours students.) Error analysis. Interpolation. Nonlinear equations. Numerical integration. Introduction to numerical solutions of differential equations.

MATH 396 Undergraduate Research Project.
(3) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.) (Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects will be suggested each term which may have project-specific prerequisites. Some projects may be accessible to students in other disciplines. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.) Independent research project with a final written report.

*M * MATH 397 Honours Matrix Numerical Analysis.
(3) (Winter) (Prerequisites: MATH 251 or MATH 247, COMP 202 or permission of the instructor.) The course consists of the lectures of MATH 327 plus additional work involving theoretical assignments and/or a project. The final examination for this course may be different from that of MATH 327.

*MATH 407 Dynamic Programming.
(3) (Winter) (Prerequisites: COMP 202; MATH 223 or MATH 236, MATH 314, MATH 315 and MATH 323) Sequential decision problems, resource allocation, transportation problems, equipment replacement, integer programming, network analysis, inventory systems, project scheduling, queueing theory calculus of variations, markovian decision processes, stochastic optimization problems, reliability, discrete and continuous control processes.

*MATH 410 Majors Project.
(3) (Prerequisite: Students must have 21 completed credits of the required mathematics courses in their program, including all required 200 level mathematics courses.) (Requires departmental approval.) A supervised project.

MATH 417 Mathematical Programming.
(3) (Fall) (Prerequisites: COMP 202, and MATH 223 or MATH 236, and MATH 314 or equivalent) (Restriction: Not open to students who have taken or are taking MATH 487.) An introductory course in optimization by linear algebra, and calculus methods. Linear programming (convex polyhedra, simplex method, duality, multi-criteria problems), integer programming, and some topics in nonlinear programming (convex functions, optimality conditions, numerical methods). Representative applications to various disciplines.

MATH 420 Independent Study.
(3) (Fall and Winter and Summer) (Requires Departmental Approval) (Please see regulations concerning Project Courses under Faculty Degree Requirements) Reading projects permitting independent study under the guidance of a staff member specializing in a subject where no appropriate course is available. Arrangements must be made with an instructor and the Chair before registration.

MATH 423 Regression and Analysis of Variance.
(3) (Fall) (Prerequisites: MATH 234, and MATH 223 or MATH 236) (Restriction: Not open to students who have taken or are taking MATH 533.) Least-squares estimators and their properties. Analysis of variance. Linear models with general covariance. Multivariate normal and chi-squared distributions; quadratic forms. General linear hypothesis: F-test and t-test. Prediction and confidence intervals. Transformations and residual plot. Balanced designs.
MATH 430 Mathematical Finance.
(3) (Restrictions: Not open to students who have taken MATH 330. Not open to students who have taken or are taking MATH 490.) Introduction to concepts of price and hedge derivative securities. The following concepts will be studied in both concrete and continuous time: filtrations, martingales, the change of measure technique, hedging, pricing, absence of arbitrage opportunities and the Fundamental Theorem of Asset Pricing.

MATH 437 Mathematical Methods in Biology.
(3) (Fall) (Prerequisites: MATH 315 or MATH 325, and MATH 323 or MATH 356, a CEGEP or higher level computer programming course) The formulation and treatment of realistic mathematical models describing biological phenomena through such qualitative and quantitative mathematical techniques as local and global stability theory, bifurcation analysis and phase plane analysis. Numerical simulation. Concrete and detailed examples will be drawn from molecular, cellular and population biology and mammalian physiology.

MATH 447 Stochastic Processes.
(3) (Winter) (Prerequisite: MATH 323) Random walk on the integers and gambler's ruin problem; the Galton-Watson branching process; Markov chains and their applications in the physical and social sciences; birth and death processes and their applications to biological growth problems and queueing systems.

MATH 470 Honours Project.
(3) (Fall and Winter) (Summer) (Requires Departmental Approval) (Prerequisites: appropriate second year honours courses with approval of coordinator) (Please see regulations concerning Project Courses under Faculty Degree Requirements) The student will be assigned a project supervisor and a project topic at the beginning of the semester. The project will consist of a written report including a literature survey and will be tested by an oral examination.

MATH 470D1 (1.5), MATH 470D2 (1.5) Honours Project. (Restriction: Requires departmental approval.) (Students must register for both MATH 470D1 and MATH 470D2.) (No credit will be given for this course unless both MATH 470D1 and MATH 470D2 are successfully completed in consecutive terms) (MATH 470D1 and MATH 470D2 together are equivalent to MATH 470). The student will be assigned a project supervisor and a project topic at the beginning of the semester. The project will consist of a written report including a literature survey and will be tested by an oral examination.

MATH 480 Honours Independent Study.
(3) (Fall and Winter) (Summer) (Please see regulations concerning Project Courses under Faculty Degree Requirements) (Requires Departmental Approval) Reading projects permitting independent study under the guidance of a staff member specializing in a subject where no appropriate course is available. Arrangements must be made with an instructor and the Chair before registration.

MATH 487 Honours Mathematical Programming.
(3) (Fall) (Prerequisites: MATH 248, MATH 251 and COMP 250 or COMP 251, permission of instructor.) (Restriction: Intended primarily for honours students. Not open to students who have taken or are taking MATH 417.) (Note: Additionally, a special project or projects may be assigned.) The course consists of the lectures of MATH 423, but will be assessed at the honours level.

MATH 488 Honours Set Theory.
(3) (Fall) (Prerequisites: MATH 251 or MATH 255 or permission of instructor) Axioms of set theory. Operations on sets. Ordinal and cardinal numbers. Well-orderings, transfinite induction and recursion. Consequences of the axiom of choice. Boolean algebras. Cardinal arithmetic.

MATH 490 Honours Mathematics of Finance.
(3) (Prerequisites: MATH 222, MATH 323 or equivalent. (Intended primarily for honours students.) (Restrictions: Not open to students who have taken MATH 330. Not open to students who have taken or are taking MATH 430.) (Note: Additionally, a special project or projects may be assigned.) This course consists of the lectures of MATH 430, but will be assessed at the honours level.

MATH 523 Generalized Linear Models.

MATH 524 Nonparametric Statistics.

MATH 525 Sampling Theory and Applications.
(4) (Winter) (Prerequisite: MATH 324 or equivalent) (Restriction: Not open to students who have taken MATH 425) Simple random sampling, domains, ratio and regression estimators, superpopulation models, stratified sampling, optimal stratification, cluster sampling, sampling with unequal probabilities, multistage sampling, complex surveys, nonresponse.

MATH 533 Honours Regression and Analysis of Variance.
(4) (Prerequisites: MATH 357, MATH 247 or MATH 251) (Restriction: Not open to have taken or are taking MATH 423) (Note: An additional project or projects assigned by the instructor that require a more detailed treatment of the major results and concepts covered in MATH 423) This course consists of the lectures of MATH 423 but will be assessed at the 500 level.

MATH 550 Combinatorics.
(4) (Intended primarily for honours and graduate students in mathematics.) (Restriction: Permission of instructor.) Enumerative combinatorics: inclusion-exclusion, generating functions, partitions, lattices and Moebius inversion. Extremal combinatorics: Ramsey theory, Turan's theorem, Dilworth's theorem and extremal set theory. Graph theory: planarity and colouring. Applications of combinatorics.

MATH 552 Combinatorial Optimization.
(4) (Prerequisite: MATH 350 or COMP 362 (or equivalent.) (Restriction: Not open to students who have taken or are taking COMP 552.) Algorithmic and structural approaches in combinatorial optimization with a focus upon theory and applications. Topics include: polyhedral methods, network optimization, the ellipsoid method, graph algorithms, matroid theory and submodular functions.

MATH 555 Fluid Dynamics.
(4) (Fall) (Prerequisite (Undergraduate): MATH 315 and MATH 319 or equivalent) Kinematics. Dynamics of general fluids. Inviscid fluids, Navier-Stokes equations. Exact solutions of Navier-Stokes equations. Low and high Reynolds number flow.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.
MATH 556 Mathematical Statistics 1.
(4) (Fall) (Prerequisite: MATH 357 or equivalent)

MATH 557 Mathematical Statistics 2.
(4) (Winter) (Prerequisite: MATH 556) Sampling theory (including large-sample theory). Likelihood functions and information matrices. Hypothesis testing, estimation theory. Regression and correlation theory.

MATH 560 Optimization.

MATH 564 Advanced Real Analysis 1.
(4) (Fall) (Prerequisites: MATH 354, MATH 355 or equivalents) Review of theory of measure and integration; product measures, Fubini's theorem; Lp spaces; basic principles of Banach spaces; Riesz representation theorem for C(X); Hilbert spaces; part of the material of MATH 565 may be covered as well.

MATH 565 Advanced Real Analysis 2.
(4) (Winter) (Prerequisite: MATH 564) Continuation of topics from MATH 564. Signed measures, Hahn and Jordan decompositions. Radon-Nikodým theorems, complex measures, differentiation in R^n, Fourier series and integrals, additional topics.

MATH 566 Advanced Complex Analysis.
(4) (Winter) (Prerequisites: MATH 366 (formerly MATH 466), MATH 564.) Simple connectivity, use of logarithms; argument, conservation of domain and maximum principles; analytic continuation, monodromy theorem; conformal mapping; normal families, Riemann mapping theorem; harmonic functions, Dirichlet problem; introduction to functions of several complex variables.

MATH 570 Higher Algebra 1.
(4) (Fall) (Prerequisite: MATH 371 or equivalent) Review of group theory; free groups and free products of groups. Sylow theorems. The category of R-modules; chain conditions, tensor products, flat, projective and injective modules. Basic commutative algebra; prime ideals and localization, Hilbert Nullstellensatz, integral extensions. Dedekind domains. Part of the material of MATH 571 may be covered as well.

MATH 571 Higher Algebra 2.
(4) (Winter) (Prerequisites: MATH 570 or consent of instructor) Completion of the topics of MATH 570. Rudiments of algebraic number theory. A deeper study of field extensions; Galois theory, separable and regular extensions. Semi-simple rings and modules. Representations of finite groups.

MATH 574 Dynamical Systems.

MATH 575 Partial Differential Equations.
(4) (Winter) (Prerequisite: MATH 375) A continuation of topics introduced in MATH 375.

MATH 576 Geometry and Topology 1.
(4) (Fall) (Prerequisite: MATH 354) Basic point-set topology, including connectedness, compactness, product spaces, separation axioms, metric spaces. The fundamental group and covering spaces. Simplicial complexes. Singular and simplicial homology. Part of the material of MATH 577 may be covered as well.

MATH 577 Geometry and Topology 2.

MATH 578 Numerical Analysis 1.
(4) (Fall) (Prerequisites: MATH 247 or MATH 251; and MATH 387; or permission of the instructor.) Development, analysis and effective use of numerical methods to solve problems arising in applications. Topics include direct and iterative methods for the solution of linear equations (including preconditioning), eigenvalue problems, interpolation, approximation, quadrature, solution of nonlinear systems.

MATH 579 Numerical Differential Equations.
(4) (Winter) (Prerequisites: MATH 375 and MATH 387 or permission of the instructor.) Numerical solution of initial and boundary value problems in science and engineering; ordinary differential equations; partial differential equations of elliptic, parabolic and hyperbolic type. Topics include Runge Kutta and linear multistep methods, adaptivity, finite elements, finite differences, finite volumes, spectral methods.

(4) (Fall) (Prerequisites: MATH 316, MATH 375 or equivalent.) (Restrictions: Not open to students who have taken MATH 586.) Linear and nonlinear partial differential equations of applied mathematics. Uniqueness, regularity, well posedness and classification for elliptic, parabolic and hyperbolic equations. Method of characteristics, conservation laws, shocks. Fundamental solutions, weak and strong maximum principles. Representation formulae. Green's functions.

(4) (Winter) (Prerequisite: MATH 580.) Continuation of topics from MATH 580. Transform methods. Weak solutions. Advanced topics in partial differential equations.

MATH 587 Advanced Probability Theory 1.
(4) (Fall) (Prerequisite: MATH 356 or equivalent and approval of instructor) Probability spaces. Random variables and their expectations. Convergence of random variables in Lp. Independence and conditional expectation. Introduction to Martingales. Limit theorems including Kolmogorov's Strong Law of Large Numbers.

MATH 589 Advanced Probability Theory 2.
(4) (Winter) (Prerequisites: MATH 587 or equivalent) Characteristic functions: elementary properties, inversion formula, uniqueness, convolution and continuity theorems. Weak convergence. Central limit theorem. Additional topic(s) chosen (at discretion of instructor) from: Martingale Theory; Brownian motion, stochastic calculus.

MATH 590 Advanced Set Theory.
(4) (Winter) (Prerequisites: MATH 318, either MATH 355 or MATH 371, or permission of the instructor.) (Restriction: Not open to students who have taken or are taking MATH 488.) Students will attend the lectures and fulfill all the requirements of MATH 488. In addition, they will study an advanced topic agreed on with the instructor. Topics may be chosen from combinatorial set theory, Goedel's constructible sets, forcing, large cardinals.

MATH 591 Mathematical Logic 1.
(4) (Winter) (Prerequisites: MATH 488 or equivalent or consent of instructor) Propositional logic and first order logic, completeness, compactness and Lowenheim-Skolem theorems. Introduction to axiomatic set theory. Some of the following topics: introduction to model theory, Herbrand's and Gentzen's theories, Lindström's characterization of first order logic.

MATH 592 Mathematical Logic 2.
(4) (Winter) (Prerequisites: MATH 488 or equivalent or consent of instructor) Introduction to recursion theory; recursively enumerable sets, relative recursiveness. Incompleteness, undecidability and undefinability theorems of Gödel, Church, Rosser and Tarski. Some of the following topics: Turing degrees, Friedberg-Muchnik theorem, decidable and undecidable theories.
MIMM-Microbiology and Immunology

Offered by: Microbiology & Immunology

MIMM 211 Introductory Microbiology.
(3) (Fall) (3 hours of lecture) (Corequisite: BIOL 200) A general treatment of microbiology bearing specifically on the biological properties of microorganisms. Emphasis will be on procaryotic cells. Basic principles of immunology and microbial genetics are also introduced.

MIMM 212 Laboratory in Microbiology.
(2) (Fall) (3 hours laboratory, 0.5 hour lecture, 1 hour follow-up) (Corequisite: MIMM 211) This laboratory course is designed to complement MIMM 211. Sessions introduce general techniques peculiar to the handling of microorganisms.

MIMM 314 Immunology.
(3) (Winter) (3 hours of lecture) (Prerequisite: BIOL 200 and BIOL 201 or BIOL 212) An introduction to the immune system, antigens, antibodies and lymphocytes. The course will cover the cellular and molecular basis of lymphocyte development and mechanisms of lymphocyte activation in immune responses.

MIMM 324 Fundamental Virology.
(3) (Fall) (3 hours of lecture) (Prerequisites: MIMM 211, BIOL 200, BIOL 201 or BIOL 212) A study of the fundamental properties of viruses and their interactions with host cells. Bacteriophages, DNA- and RNA-containing animal viruses, and retroviruses are covered. Emphasis will be on phenomena occurring at the molecular level and on the regulated control of gene expression in virus-infected cells.

MIMM 386D1 (3), MIMM 386D2 (3) Laboratory in Microbiology and Immunology.
(Fall) (1 hour lecture, 4 hours laboratory, 1 hour follow-up) (Prerequisites: MIMM 211, MIMM 212. Corequisites: MIMM 323, MIMM 324) (Students must register for both MIMM 386D1 and MIMM 386D2.) (No credit will be given for this course unless both MIMM 386D1 and MIMM 386D2 are successfully completed in consecutive terms) A series of illustrative exercises in bacterial classification, bacterial and viral molecular genetics and immunological techniques. The objective is to provide a practical introduction to microbiological and immunological research and technology.

MIMM 387 Applied Microbiology and Immunology.
(3) (Winter) (Prerequisite: MIMM 211) The ability to select and manipulate genetic material has led to unprecedented interest in the industrial applications of procaryotic and eucaryotic cells. Beginning in the 1970s the introduction of and subsequent refinements to recombinant DNA technology and hybridoma technology transformed the horizons of the biopharmaceutical world. This course will highlight the subsequent refinements to recombinant DNA technology and interest in the industrial applications of procaryotic and eucaryotic cells. Basic principles of immunology and microbial genetics are also introduced.

MIMM 386D1 (3), MIMM 386D2 (3) Laboratory in Microbiology and Immunology.
(Fall) (1 hour lecture, 4 hours laboratory, 1 hour follow-up) (Prerequisites: MIMM 211, MIMM 212. Corequisites: MIMM 323, MIMM 324) (Students must register for both MIMM 386D1 and MIMM 386D2.) (No credit will be given for this course unless both MIMM 386D1 and MIMM 386D2 are successfully completed in consecutive terms) A series of illustrative exercises in bacterial classification, bacterial and viral molecular genetics and immunological techniques. The objective is to provide a practical introduction to microbiological and immunological research and technology.

MIMM 387 Applied Microbiology and Immunology.
(3) (Winter) (Prerequisite: MIMM 211) The ability to select and manipulate genetic material has led to unprecedented interest in the industrial applications of procaryotic and eucaryotic cells. Beginning in the 1970s the introduction of and subsequent refinements to recombinant DNA technology and hybridoma technology transformed the horizons of the biopharmaceutical world. This course will highlight the important events that link basic research to clinical/commercial application of new drugs and chemicals.

MIMM 396 Undergraduate Research Project.
(3) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.) (Note: Enrollment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects will be suggested each term which may have project-specific prerequisites. Some projects may be accessible to students in other disciplines. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.) Independent research project with a final written report.

MIMM 413 Parasitology.
(3) (Winter) (Prerequisite: MIMM 314 or equivalent - ANAT 261 is strongly recommended) A study of the biology, immunological aspects of host-parasite interactions, pathogenicity, epidemiology and molecular biological aspects of selected parasites of medical importance. Laboratory will consist of a lecture on techniques, demonstrations and practical work.

MIMM 414 Advanced Immunology.
(3) (Fall) (3 hour lecture) (Prerequisite: MIMM 314) An advanced course serving as a logical extension of MIMM 314. The course will integrate molecular, cellular and biochemical events involved in the ontogeny of the lymphoid system and its activation in the immune response. The course will provide the student with an up-to-date understanding of a rapidly moving field.

MIMM 465 Bacterial Pathogenesis.
(3) (Fall) (3 hours of lecture) (Prerequisites: MIMM 211, MIMM 314, MIMM 323, or the permission of the instructor) Organized by the McGill Centre for the Study of Host Resistance. This course focuses on the interplay of the host and the pathogen. The cellular and molecular basis of the host defense mechanism against infections will be considered in relationship to the virulence factors and evasion strategies used by bacteria to cause disease.

MIMM 466 Viral Pathogenesis.
(3) (Winter) (3 hours of lecture) (Prerequisites: MIMM 211, MIMM 314, MIMM 324) A study of the biological and molecular aspects of viral pathogenesis with emphasis on the human pathogenic viruses including the retroviruses HIV and HTLV-1; herpes viruses; papilloma viruses; hepatitis viruses; and new emerging human viral diseases. These viruses will be discussed in terms of virus multiplication, gene expression virus-induced cytopathic effects and host immune response to infection.

MIMM 499 Library Research Project.
(1) (Prerequisites: MIMM 314, MIMM 323, MIMM 324 and MIMM 386.) (Restriction: This course is intended for final year Microbiology students only. Students taking MIMM 502 are not eligible to take this course. (See section 3.6.2, “Project Courses” in the Science “Faculty Degree Requirements”).) Supervised exploration of the current scientific literature on an assigned topic of an advanced nature within the general areas of Bacteriology, Virology, Immunology or Parasitology.

MIMM 502D1 (6), MIMM 502D2 (6) Honours Research Project.
(Fall) (More than 18 hours per week for an independent research project) (Restriction: U3 Honours students and Majors students are eligible. Required CGPA: 3.50 or higher) (Please see regulations concerning Project Courses) (Students must register for both MIMM 502D1 and MIMM 502D2.) (No credit will be given for this course unless both MIMM 502D1 and MIMM 502D2 are successfully completed in consecutive terms) An information meeting about the course is held annually in January for students who intend to apply for registration. Subject to the availability of space and resources, professors in the Department of Microbiology and Immunology provide research opportunities for registrants in this course. Students present their research findings in a seminar and a final written report.
is required. Because this is a 12 credit course, students are expected to devote at least 40% of their academic effort towards their research.

**MIMM 509 Inflammatory Processes.**

(3) (Winter) (3 hours of seminar) (Prerequisite: MIMM 314.)
(Corequisite: PHGY 513 or MIMM 414) (This course will be given in conjunction with the Division of Experimental Medicine)
This course concentrates on the non-specific aspects of the immune response, an area which is not adequately covered by the other immunology courses presented at the university. Interactions between guest researchers (from McGill and other universities) and students will be furthered.

**NEUR-Neurology and Neurosurgery**
Offered by: Neurology And Neurosurgery

**NEUR 310 Cellular Neurobiology.**

(3) (Winter) (2 lectures each week) (Prerequisite or corequisite: BIOL 200 and BIOL 201, or PHGY 209, or PHGY 210) A survey of the functional organization of nerve cells, signaling in the nervous system, and principles of neural development. Topics include cell polarity, neurotransmitters, neurotrophins, receptors and second messengers, cell lineage, guidance of axon outgrowth, and nerve regeneration. Emphasis will be placed on analysis of neurons at the molecular level.

**NEUR 550 Free Radical Biomedicine.**
(3) (Prerequisite: BIOL 200, BIOL 201, BIOC 311, BIOC 312, PHGY 209, PHGY 210 or Permission of Instructor.) An interdisciplinary course on the biochemistry and cellular/molecular biology of free radicals, transition metals, oxidative stress and antioxidants and their roles in health and disease.

**NUTR-Nutrition and Dietetics**
Offered by: Dietetics & Human Nutrition

**NUTR 307 Human Nutrition.**
(3) (Fall) (Prerequisites: BIOL 201 or AEBI 202, CHEM 212 or FDSC 230 or permission of the instructor.)
(Restriction: Not open to students who have taken ANSC 330) (3 lecture hours) Cellular and organismal aspects of nutrition with emphases on biochemical and physiological roles of carbohydrates, lipids, proteins, minerals and vitamins in disease prevention and promotion of optimal health.

**PATH-Pathology**
Offered by: Pathology

**PATH 300 Human Disease.**
(3) (Winter) (Prerequisites: BIOL 200, BIOL 201 or BIOC 212, PHGY 209. Pre-/co-requisite: PHGY 210) Provides a fundamental understanding of the diseases prevalent in North America, for upper level students in the biological sciences. Includes: general responses of cells and organ systems to injury; assessment of individual diseases by relating the causes, symptoms, diagnosis, treatment and prevention to the primary biological abnormalities in each disorder.

**PHAR-Pharmacology and Therapeutics**
Offered by: Pharmacology And Therapeutics

**PHAR 300 Drug Action.**
(3) (Fall) (Prerequisites: BIOL 200 and BIOL 201 or BIOL 212, PHGY 209 and PHGY 210 or permission of instructor) This course covers the fundamental principles of pharmacology and toxicology. Frequently encountered drugs are used as a focus to illustrate sites and mechanisms of action, distribution, metabolism, elimination and adverse effects.

**PHAR 301 Drugs and Disease.**
(3) (Winter) (Prerequisites: BIOL 200, BIOL 201 or BIOC 212, PHGY 209 and PHGY 210 and PHAR 300 or permission of instructor) This course further explores the basic principles of pharmacology as illustrated by drugs used in the treatment of disease. Emphasis is placed on drugs used for diseases prevalent in North America.

**PHAR 303 Principles of Toxicology.**
(3) (Winter) (Prerequisites: BIOL 200, BIOL 201 or BIOC 212, PHGY 209 and PHGY 210) Fundamental mechanisms by which toxic compounds damage a biological system (organelle, cell, organ, organism, ecosystem). Detection and quantification of toxicity and risk/benefit analysis are considered. Selected agents of current risk to human health or the environment are evaluated in depth.

**PHAR 503 Drug Design and Development 1.**
(3) (Fall) (Prerequisites: CHEM 302, BIOL 200, BIOL 201, BIOC 212, PHAR 300, PHAR 301, PHAR 303 or permission of coordinator) (Restriction: Not open to students who are taking or have taken CHEM 503) (Priority: students registered in the Minor in Pharmacology) Interdisciplinary course in drug design and development covering chemistry, mechanisms of drug action and steps in drug development, principles and problems in drug design.

**PHAR 504 Drug Design and Development 2.**
(3) (Winter) (Prerequisite: PHAR 503/CHEM 503 or permission of the instructor.) (Restriction: U3 and graduate students. Students can register only with permission of coordinators) (Restriction: Not open to students who are taking or have taken CHEM 504) Interdisciplinary course in drug design and development in which teams of 2-4 students select a lead chemical compound, design the analogues, propose the preclinical and clinical studies, present possible untoward effects, and reasons for drug (dis)approval.

**PHAR 558 Pharmacology Research Topics.**
(3) Selected drug targets in their native cellular milieu, in the context of intact tissues, organs and whole animals, highlighting conceptual advances in pharmacological theory.

**PHAR 562 General Pharmacology 1.**
(3) (Fall) (Prerequisite: PHAR 301.) (Restrictions: Open to U3 students with permission of instructors, and students registered in the Minor Pharmacology Program) Principles of pharmacology as illustrated by current issues with an emphasis on the nervous system will be discussed. Drugs classified by their molecular target of action, their mechanism of action, and possibly a rationale for therapeutic use will be presented. Students will be required to examine and interpret scientific data, to write a paper and/or participate in small group discussions.

**PHAR 563 General Pharmacology 2.**
(3) (Winter) (Prerequisite: PHAR 301.) (Restrictions: Open to U3 students with permission of instructors, and students registered in the Minor Pharmacology Program) Selected topics of basic interactions between chemicals and biological systems. Actions of drugs at the molecular and cellular levels. Principles of drug development. Chemotherapy of infections and of cancer. Toxicology and pharmacokinetics/dynamics. Drug metabolism.

**PHAR 599 Research Projects in Pharmacology.**
(6) (Minimum of 12 hours per week to be spent in the lab and/or library.) (Pre-/co-requisite PHAR 562 and PHAR 563 or PHAR 300 and PHAR 301) (Restrictions: Open to U3 students with permission of instructors, and students registered in the Minor Pharmacology Program) Students should consult instructors 3 - 4 weeks before registration. Students may not register without prior approval of the course co-ordinator(s) (Please see regulations concerning Project Courses) This course involves individual research work. Students select a project under the supervision of a staff member. Areas of interest include toxicology, endocrine, developmental, cardiovascular, reproductive and neuropharmacology. This course requires a minimum of 6 hours per week for the full year course (PHAR 599D1/PHAR 599D2), and a minimum of 12 hours per week for the half year course (PHAR 599) course to be spent in the laboratory and/or library.

**PHAR 599D1 (3), PHAR 599D2 (3) Research Projects in Pharmacology.**
(Fall) (Minimum of 6 hours per week to be spent in the lab and/or library.) (Students must register for both PHAR 599D1 and PHAR 599D2.) (No credit will be given for this course unless both PHAR 599D1 and PHAR 599D2 are successfully completed in consecutive terms) (PHAR 599D1 and PHAR
PHGY-Physiology
Offered by: Physiology

PHGY 199 FYS: History of Genetic Engineering.
(3) (Winter) (3 hours seminar per week) (Restriction: Open only to newly admitted students in U0 or U1, who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.) (Maximum 20) The history of molecular biology and genetic engineering will be surveyed through a series of essays and reviews written by historic figures and prominent scientists of today. The course will trace key players and principal advances in our understanding of the gene, its manipulation, and the future of genetic engineering.

PHGY 201 Human Physiology: Control Systems.
(3) (Fall) (3 hours lecture weekly) (Prerequisites: collegial courses in biology or anatomy, and in chemistry and physics; with CHEM 212 equivalent, as a pre- or co-requisite) (Restriction: For students in Physical and Occupational Therapy, Nursing, and others with permission of the course coordinator) (Restriction: Not open to students who have taken PHGY 209) Physiology of body fluids, blood, nerve and muscle, peripheral nerves, central nervous system, special senses, autonomic nervous system, defense mechanisms.

PHGY 202 Human Physiology: Body Functions.
(3) (Winter) (3 hours lecture weekly) (Prerequisites: collegial courses in biology or anatomy and in chemistry and physics; with CHEM 212 or equivalent, as a pre- or co-requisite) (Restriction: For students in Physical and Occupational Therapy, Nursing, Education, and others with permission of the course coordinator) (Restriction: Not open to students who took 552-201 in 1976-77 or earlier, or PHGY 210) Physiology of the cardiovascular, respiratory, excretory, endocrine, and digestive systems; organic and energy metabolism; nutrition; exercise and environmental stress.

PHGY 209 Mammalian Physiology 1.
(3) (Fall) (3 hours lectures weekly) (Prerequisites: as for PHGY 201 and PHGY 202. Pre-/co-requisites: BIOL 200, BIOL 201 or BIOG 212) (Restriction: Not open to students who have taken PHGY 201 or PHGY 201) Physiology of the cardiovascular, respiratory, excretory, endocrine, and digestive systems; organic and energy metabolism; nutrition; exercise and environmental stress.

PHGY 210 Mammalian Physiology 2.
(3) (Winter) (3 hours lectures weekly) (Prerequisites: as for PHGY 201 and PHGY 202. Pre-/co-requisite: BIOL 200, BIOL 201 or BIOG 212) (Restriction: Not open to students who have taken PHGY 211 or PHGY 202) (Restriction: For students in the Faculty of Science, and other students by permission of the instructor) The course covers the physiology of body fluids, blood, body defense mechanisms, peripheral and central nervous system, muscle. Students must be prepared to attend evening (19:00 - 20:00) class tests.

PHGY 213 Introductory Physiology Laboratory 1.
(1) (One 3-hour lab and one 1-hour lecture every second week) (Corequisite: PHGY 209.) (Restrictions: Required for students enrolled in PHGY 209. Open to BA &Sc. students and to others by permission of the instructor. Not open to students who have taken PHGY 212D1/D2.) (Note: For students enrolled in the Physiology program, PHGY 213 should be taken concurrently with PHGY 209.) Exercises illustrating fundamental principles in physiology: Biological Signals Acquisitions, Blood, Immunology, Neurophysiology, Neuromuscular Physiology.

PHGY 214 Introductory Physiology Laboratory 2.
(1) (One 3-hour lab and one 1-hour lecture every second week) (Corequisite: PHGY 210.) (Restrictions: Required for students enrolled in PHGY 210. Open to BA &Sc. students and to others by permission of the instructor. Not open to students who have taken PHGY 212D1/D2.) (Note: For students enrolled in the Physiology program, PHGY 214 should be taken concurrently with PHGY 210.) Exercises illustrating fundamental principles in physiology: Central Nervous System, Cardiovascular, Respiration, Exercise Physiology, Molecular Endocrinology.

PHGY 311 Intermediate Physiology 1.
(3) (Fall) (3 hours of lectures per week: 1-3 hours optional lab/demonstration/tutorial arranged for a maximum of 3 afternoons per term) (Prerequisites: PHGY 209 and PHGY 210 or equivalent, or permission of the instructor) In-depth presentation of experimental results and hypotheses on cellular communication in the nervous system and the endocrine system.

PHGY 312 Intermediate Physiology 2.
(3) (Winter) (3 hours of lectures per week: 1-3 hours optional lab/demonstration/tutorial arranged for a maximum of 3 Wednesday afternoons per term) (Prerequisites: PHGY 209 and PHGY 210 or equivalent, PHGY 311 or permission of the instructor) In-depth presentation of experimental results and hypotheses underlying our current understanding of topics in immunology, kidney function and respiration explored beyond the introductory level.

PHGY 313 Intermediate Physiology 3.
(3) (Winter) (3 hours of lectures per week: 1-3 hours optional lab/demonstration/tutorial arranged for a maximum of 3 Wednesday afternoons per term) (Prerequisites: PHGY 209 and PHGY 210 or equivalent, PHGY 311 or permission of the instructor) In-depth presentation of experimental results and hypotheses underlying our current understanding of the physiology of the cardiovascular system; blood physiology including hemostasis and thrombosis; transport of fluids and cells; general cell kinetics and regulation, and gastrointestinal physiology.

PHGY 314 Integrative Neuroscience.
(3) (Fall) (3 hours of lectures per week) (Prerequisites: PHGY 209 and PHGY 210) (Restriction: Not open to students who have taken or are taking PSYC 308.) In depth presentation of experimental results and hypotheses underlying our current understanding of how single neurons and ensembles of neurons encode sensory information, generate movement, and control cognitive functions such as emotion, learning, and memory, during voluntary behaviours.

PHGY 351 Research Techniques: Physiology.
(3) (Winter) (2 hour lecture and 3 hour lab weekly) (Prerequisites: PHGY 209, PHGY 210 and PHGY 311.) (Corequisite: PHGY 312 and PHGY 313) (Restriction: Honours Physiology students) Provides an overview of common research methods in Physiology, including critical analysis and
practical experience with some of the methods. Topics include research ethics of animal experimentation, data analysis, membrane biophysics, radioimmunoassay, ion sensitive dyes, immunocytochemistry, localization techniques, protein transport, cell sorting and molecular biology.

PHGY 359D1 (0.5), PHGY 359D2 (0.5) Tutorial in Physiology. (Fall) (Prerequisites: PHGY 209 and PHGY 210 or equivalent.) (Corequisites: PHGY 311, PHGY 312 and PHGY 313.) (Restriction: Open only to Honours Physiology students) (Students must register for both PHGY 359D1 and PHGY 359D2.) No credit will be given for this course unless both PHGY 359D1 and PHGY 359D2 are successfully completed in consecutive terms. The course consists of regularly scheduled meetings between each individual student and a chosen staff member, to consider current problems in biomedical research and to develop background for a research project to be carried out in U3. Brief written summaries of each meeting are required.

PHGY 396 Undergraduate Research Project. (3) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.) (Note: Enrolment restricted to U3 Honours Physiology students) (Students must register for both PHGY 459D1 and PHGY 459D2.) No credit will be given for this course unless both PHGY 459D1 and PHGY 459D2 are successfully completed in consecutive terms. Individual research projects in immunology under the guidance of staff members in the three participating departments: Physiology, Biochemistry, and Microbiology and Immunology.

PHGY 451 Advanced Neurophysiology. (3) (Fall) (3 hours lecture) (Prerequisite: PHGY 311 or equivalent and BIOL 301) (Restriction: Departmental approval required) Topics of current interest in neurophysiology including the development of neurons and synapses, physiology of ionic channels, presynaptic and postsynaptic events in synaptic transmission and neuronal interactions in CNS function.

PHGY 459D1 (3), PHGY 459D2 (3) Physiology Seminar. (Fall) (2 hours seminar) (Prerequisite: permission of instructors) (Required course for U3 Honours Physiology students) (Students must register for both PHGY 459D1 and PHGY 459D2.) No credit will be given for this course unless both PHGY 459D1 and PHGY 459D2 are successfully completed in consecutive terms. Discussion of topics in mammalian, cellular and molecular physiology. Students will be required to write one essay consisting of at least 2000 words per term. A final course essay is required.

PHGY 461D1 (4.5), PHGY 461D2 (4.5) Experimental Physiology. (Fall) (Restriction: Departmental approval required) (Restriction: This course is a requirement for U3 students in the Honours Physiology program, the Major Program in Physiology and Mathematics, and the Major program in Physiology and Physics, and is open to a limited number of other U3 Physiology students) (Students must register for both PHGY 461D1 and PHGY 461D2.) No credit will be given for this course unless both PHGY 461D1 and PHGY 461D2 are successfully completed in consecutive terms. Individual project work under the supervision of Departmental Staff members.
PHYS 101 Introductory Physics - Mechanics.
(4) (Fall) (3 hours lectures; 2 hours laboratory; tutorial sessions) (Prerequisite: PHYS 101 or equivalent) (Corequisite: MATH 139 or higher level calculus course.) (Restriction: Not open to students taking or having taken PHYS 131, CEGEP objective 00UR or equivalent) (Laboratory sections have limited enrolment) The object of this course is to give the students a basic understanding of the principles of physics, illustrating these, where possible, with current examples of their use in biology and medicine.

PHYS 102 Introductory Physics - Electromagnetism.
(4) (Winter) (3 hours lectures; 2 hours laboratory; tutorial sessions) (Prerequisite: PHYS 101.) (Corequisite: MATH 139 or higher level calculus course.) (Restriction: Not open to students taking or having taken PHYS 142, CEGEP objective 00UR or equivalent) (Laboratory sections have limited enrolment) The basic laws of electricity and magnetism; geometrical and physical optics.

PHYS 103 Experiments in Physics.
(3) (Winter) (1 hour lecture, 2 hours laboratory; tutorial sessions) (Prerequisite: PHYS 101 or equivalent) (Corequisite: MATH 139 or higher level calculus course.) (Restriction: Not open to students taking or having taken PHYS 102, CEGEP objective 00UR or equivalent) (Laboratory sections have limited enrolment) (Corequisite: MATH 141 or higher level calculus course.) (Restriction: Not open to students taking or having taken PHYS 102, CEGEP objective 00UR or equivalent) (Laboratory sections have limited enrolment) The basic laws of electricity and magnetism; geometrical and physical optics.

PHYS 104 Introduction to Quantum Physics.
(3) (Fall) (3 hours lectures; 3 hours laboratory in alternate weeks; tutorial sessions) (Prerequisite: PHYS 131.) (Corequisite: PHYS 101, CEGEP objective 00UR or equivalent) (Laboratory sections have limited enrolment) (Corequisite: MATH 139 or higher level calculus course.) (Restriction: Not open to students taking or having taken PHYS 102, CEGEP objective 00UR or equivalent) (Laboratory sections have limited enrolment) The basic laws of electricity and magnetism; geometrical and physical optics.
characteristics of sound sources. Room acoustics.

PHYS 228 Energy and the Environment.
(3) Energy fundamentals, generation of electricity, heat engines, fossil fuel production and consumption, local and global effects, economic impact, transportation, and pollution and environmental impact of energy use. Non-renewable energy sources (fossil fuels, nuclear) and renewable sources (solar, wind, hydro, geothermal).

PHYS 230 Dynamics of Simple Systems.
(3) (Fall) (3 hours lectures) (Prerequisite: CEGEP physics.)
(Corequisite: MATH 222) (Restriction: Not open to students taking or having passed PHYS 251) Translational motion under Newton's laws; forces, momentum, work/energy theorem. Special relativity; Lorentz transforms, relativistic mechanics, mass/energy equivalence. Topics in rotational dynamics. Noninertial frames.

PHYS 232 Heat and Waves.
(3) (Winter) (3 hours lectures) (Prerequisite: PHYS 230)
(Restriction: Not open to students taking or having passed PHYS 253) First and second laws of thermodynamics, kinetic theory of gases, optical interference, polarization, electro-optics, physics of microscopic systems.

PHYS 241 Signal Processing.
(3) (Winter) (2 hours lectures; 3 hours laboratory alternate weeks) (Prerequisite: CEGEP physics) Linear circuit elements, resonance, network theorems, diodes, transistors, amplifiers, feedback circuits.

PHYS 242 Electricity and Magnetism.
(2) (Winter) (2 hours lectures) (Prerequisites: CEGEP Physics, MATH 222) Properties of electromagnetic fields, dipole and quadrupole fields and their interactions, chemical binding of molecules, electromagnetic properties of materials, Maxwell's equations and properties of electromagnetic waves, propagation of waves in media.

PHYS 251 Classical Mechanics 1.
(3) (Fall) (3 hours lectures) (Prerequisite: CEGEP physics.)
(Corequisite: MATH 222) (Restriction: Not open to students taking or having taken PHYS 230.) Newton's laws, work energy, angular momentum. Harmonic oscillator, forced oscillations, inertial forces, rotating frames. Central forces, centre of mass, planetary orbits, Kepler's laws.

PHYS 253 Thermal Physics.
(3) (Fall) (3 hours lectures) (Prerequisite: CEGEP physics.)
(Corequisite: MATH 222) (Restriction: Not open to students taking or having taken PHYS 232.) Energy, work, heat, first law. Temperature, entropy; second law. Absolute zero; third law. Equilibrium, equations of state, gases, liquids, solids, magnets; phase transitions.

PHYS 257 Experimental Methods 1.
(3) (Fall) (6 hours of laboratory and classroom work)
(Corequisite: PHYS 230 or PHYS 251) Introductory laboratory work and data analysis as related to mechanics, optics and thermodynamics. Introduction to computers as they are employed for laboratory work, for data analysis and for numerical computation. Previous experience with computers is an asset, but is not required.

PHYS 258 Experimental Methods 2.
(3) (Winter) (6 hours of laboratory and classroom work)
(Prerequisite: PHYS 257) Advanced laboratory work and data analysis as related to mechanics, optics and thermodynamics. Computers will be employed routinely for data analysis and for numerical computation, and, particularly, to facilitate the use of Fourier methods.

PHYS 260 Modern Physics and Relativity.
(3) (Fall) (3 hours lectures) (Corequisite: MATH 222)
History of special relativity; Lorentz transformations; kinematics and dynamics; transformation of electric and magnetic forces; introduction to topics in modern physics.

PHYS 271 Introduction to Quantum Physics.
(3) (Winter) (1-0-6) (Prerequisite: PHYS 251 or CIVE 281) (Restriction: This course is not available to any student enrolled in any Majors or Honours program involving Physics.) The observed properties of atoms and radiation from atoms. Electron waves. The Schroedinger Equation in one dimension. Quantum mechanics of the hydrogen atom. Angular momentum and spin. Quantum mechanics of many electron systems. Basic ideas of electrons in solids and solid state physics.

PHYS 328 Electronics.
(3) (Fall) (2 hours lectures; 3 hours laboratory) (Prerequisite: PHYS 241 or permission of instructor) Semiconductor devices, basic transistor circuits, operational amplifiers, combinatorial and sequential logic, integrated circuits, analogue to digital converters. The laboratory component covers design, construction and testing of basic electronic circuits.

PHYS 331 Topics in Classical Mechanics.
(3) (Winter) (3 hours lectures) (Prerequisite: PHYS 230.)
(Corequisite: MATH 315) (Restriction: Not open to students having passed PHYS 451) Forced and damped oscillators, Newtonian mechanics in three dimensions, rotational motion, Lagrangian mechanics, small vibrations, normal modes. Introduction to Hamiltonian mechanics.

PHYS 332 Physics of Fluids.
(3) (Winter) (3 hours lectures) (Prerequisites: PHYS 230, MATH 223, MATH 314, MATH 315) The physical properties of fluids. The kinematics and dynamics of flow. The effects of viscosity and turbulence. Applications of fluid mechanics in biophysics, geophysics and engineering.

PHYS 333 Thermal and Statistical Physics.
(3) (Winter) (3 hours lectures) (Prerequisite: PHYS 232)
(Restriction: Not open to students taking or having passed PHYS 362) Introductory equilibrium statistical mechanics. Quantum states, probabilities, ensemble averages. Entropy, temperature, Boltzmann factor, chemical potential. Photons and phonons. Fermi-Dirac and Bose-Einstein distributions; applications.

PHYS 334 Advanced Materials.
(3) (Fall) (3 hours lectures) (Prerequisites: CHEM 110, CHEM 120 or CHEM 111, CHEM 121 and PHYS 101, PHYS 102 or PHYS 131, PHYS 142, or CEGEP Physics and Chemistry, or equivalent. Pre- or Co-requisite: one of CHEM 203, CHEM 204, CHEM 213, CHEM 214 or equivalent; or one of PHYS 230 and PHYS 232, or equivalent; or permission of instructor) (Restriction: Not open to students who have taken or are taking CHEM 334) The physicochemical properties of advanced materials. Topics discussed include photonics, information storage, 'smart' materials, biomaterials, clean energy materials, porous materials, and polymers.

PHYS 339 Measurements Laboratory in General Physics.
(3) (Winter) (6 hours) (Prerequisite: PHYS 241) Introduction to modern techniques of measurement. The use of computers in performing and analysing experiments. Data reduction, statistical methods, report writing. Extensive use of computers is made in this laboratory; therefore some familiarity with computers and computing is an advantage.

PHYS 340 Electricity and Magnetism.

PHYS 342 Electromagnetic Waves.
(3) (Winter) (3 hours lectures) (Prerequisites: PHYS 340 or PHYS 242, Mathematics MATH 314, MATH 315) (Restriction: Not open to students having passed ECSE 357) Maxwell's equations. The wave equation. The electromagnetic wave, reflection, refraction, polarization. Guided waves. Transmission lines and wave guides. Vector potential, Radiation. The elemental dipole; the half-wave dipole; vertical dipole; folded dipoles; Yagi antennas. Accelerating charged particles.

PHYS 350 Electromagnetism.
(3) (Fall) (3 hours lectures) (Prerequisites: MATH 248, MATH 325.) (Restriction: Honours students or permission of the instructor) (Restriction: Not open to students having taken PHYS 340) Fundamental laws of electric and magnetic fields in both integral and differential form.
PHYS 357 Quantum Physics 1.
(3) (Fall) (3 hours lectures) (Restriction: Honours students or permission of the instructor) (Restriction: Not open to students taking or having passed PHYS 446 Experimental basis for quantum mechanics: wave-packets; uncertainty principle. Hilbert space formalism. Schroedinger equation: eigenvalues and eigenvectors: applications to 1-d problems including the infinite and finite potential wells and the harmonic oscillator. Tunneling. Time independent perturbation theory.

PHYS 359 Laboratory in Modern Physics.
(3) (Winter) (6 hours) (Corequisite: PHYS 457. Honours students or permission of instructor) Advanced level experiments in modern physics stressing quantum effects and some properties of condensed matter.

PHYS 362 Statistical Mechanics.
(3) (Winter) (3 hours lectures) (Prerequisites: MATH 248 or equivalents, PHYS 253.) (Restriction: Honours students, or permission of the instructor) (Restriction: Not open to students taking or having passed PHYS 333) Quantum states and ensemble averages. Fermi-Dirac, Bose-Einstein and Boltzmann distribution functions and their applications.

PHYS 396 Undergraduate Research Project.
(3) (Summer - Section 001 (01-May-2007/31-Aug-2007)) (Summer - Section 002 (02-Jul-2007/31-Aug-2007)) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.) (Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects will be suggested each term which may have project-specific prerequisites. Some projects may be accessible to students in other disciplines. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.) Independent research project with a final written report.

PHYS 413 Physical Basis of Physiology.
(3) (Fall) (3 hours lectures) (Prerequisite: MATH 315, or MATH 325, and permission of the instructor) (Intended for Major or Honours students in Physics, Physiology, Physiology and Physics, or Mathematics and others with permission) Analytic and computer simulation techniques are used to examine the role of nonlinearities and time delays in determining the dynamic behaviour of physiological control systems and their relation to normal and pathophysiological states. Examples drawn from the control of respiration, cellular proliferation and differentiation, biochemical feedback networks, thermoregulatory mechanisms, and neural feedback.

PHYS 434 Optics.
(3) (Winter) (3 hours lectures) Geometrical optics, wave optics, lasers, Fourier transform spectroscopy, holography, optical data processing, stellar interferometry.

PHYS 435 Modern Physics.
(3) (Fall) (3 hours lectures) (Prerequisite: PHYS 446) (Restriction: Not open to students in Honours Physics or in Joint Honours in Mathematics and Physics) One electron atoms, radiation, multielectron atoms, molecular bonds. Selected topics from condensed matter, nuclear and elementary particle physics.

PHYS 439 Laboratory in Modern Physics.
(3) (Fall) (6 hours) (Prerequisite: PHYS 339.) (Corequisite: PHYS 446) (Restriction: Not open to students with credit in PHYS 359 except with permission of instructor) Advanced level experiments in modern physics stressing quantum effects and some properties of condensed matter.

PHYS 446 Quantum Physics.
(3) (Fall) (3 hours lectures) (Prerequisite: PHYS 230 and PHYS 232, or PHYS 251) (Restriction: Not open to students taking or having taken PHYS 357 or PHYS 457) De Broglie waves, Bohr atom. Schroedinger equation, wave functions, observables. One dimensional potentials. Schroedinger equation in three dimensions. Angular momentum, hydrogen atom. Spin, experimental consequences.

PHYS 449 Majors Research Project.
(3) (Winter or Summer) (6 hours) (Prerequisite: PHYS 328, PHYS 439) A supervised research project.

PHYS 451 Classical Mechanics.
(3) (Winter) (3 hours lectures) (Prerequisite: PHYS 251.) (Restriction: Honours students, or permission of instructor) (Restriction: Not open to students having taken PHYS 446) Angular momentum and spin operators. Operator methods in quantum mechanics. Coupling of spin and angular momenta. Variational principles and elements of time dependent perturbation theory (the Golden Rule). Solution of the Schroedinger equation in three dimensions. Applications to the hydrogen and helium atoms and to simple problems in atomic and molecular physics.

(Fall) (6 hours) (Restriction: Honours students or permission of instructor) (Students must register for both PHYS 459D1 and PHYS 459D2.) (No credit will be given for this course unless both PHYS 459D1 and PHYS 459D2 are successfully completed in consecutive terms) Honours supervised research project and thesis.

PHYS 469 Laboratory in Modern Physics 2.
(3) (Fall) (3 hours lectures) (Restriction: Honours students or permission of instructor) (Prerequisite: PHYS 359) Advanced level experiments in modern physics stressing quantum effects and some properties of condensed matter. Continuation of PHYS 359.

PHYS 478 Short Research Project.
(1) (Note: Students are expected to find an appropriate instructor for their project.) Supervised research project in physics.

PHYS 479 Honours Research Project.
(3) (Winter or Summer) (6 hours) (Restriction: Honours students or permission of instructor) (Prerequisite: PHYS 359) (Restriction: Not open to students taking PHYS 459) Advanced level experiments in modern physics stressing quantum effects and some properties of condensed matter. Continuation of PHYS 359.

PHYS 489 Special Project.
(3) (Winter) (6 hours) (Restriction: Open only to students in their final year of the Joint Major in Physics and Computer Science after consultation with the adviser(s) for the program) A project incorporating aspects of both physics and computer science, under the joint supervision of the two departments. The

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.

Denotes courses taught only in alternate years.

Denotes courses not available as Education electives.

Denotes courses with limited enrolment.
Physics aspect may be either laboratory-based or theoretical in nature. The Computational aspect will involve the development and implementation of algorithms arising from the investigation.

**PHYS 514 General Relativity.**
(3) (Winter) (3 hours lectures) (Restriction: Honours students, or permission of the instructor) Transition from special to general relativity. Non-Euclidian geometry. The basic laws of Physics in co-variant form, Einstein's equations. Gravitational waves; neutron stars; black holes; cosmology.

**PHYS 521 Astrophysics.**
(3) (Fall) (3 hours) A quantitative course in galactic and extragalactic astrophysics. Topics include observational techniques, stars and stellar evolution, compact objects, galaxy structure, kinematics, evolution and cosmology.

**PHYS 534 Nanoscience and Nanotechnology.**
(3) (Fall) Topics include scanning probe microscopy, chemical selfassembly, computer modeling, and microfabrication/micromachining.

**PHYS 551 Quantum Theory.**
(3) (Fall) (3 hours lectures) (Restriction: Honours students, or permission of the instructor) General formulation, scattering theory, WKBJ approximation, time-dependent perturbation, theory and applications, angular momentum, relativistic wave equations.

**PHYS 557 Nuclear Physics.**
(3) (Fall) (3 hours lectures) (Restriction: Honours students, or permission of the instructor) General nuclear properties, nucleon-nucleon interaction and scattering theory, radioactivity, nuclear models, nuclear reactions.

**PHYS 558 Solid State Physics.**
(3) (Fall) (3 hours lectures) (Restriction: Honours students, or permission of the instructor) Properties of crystals, lattice vibrations and thermal properties of insulators, free electron model and band structure, semi-conductors, metals, optical properties.

**PHYS 559 Advanced Statistical Mechanics.**
(3) (Fall) (3 hours lectures) (Restriction: Honours students, or permission of the instructor) Self averaging and central-limit theorem; thermodynamic fluctuations; ensemble theory; surface roughening; broken symmetry and Goldstone's theorem; phase transitions; mean-field, Landau and Ornstein-Zernicke theory; Monte Carlo method; molecular dynamics; scaling; renormalization group; epsilon expansion; non-equilibrium theory.

**PHYS 562 Electromagnetic Theory.**
(3) (Winter) (3 hours lectures) (Restriction: Honours students, or permission of the instructor) General formulation, scattering theory, WKBJ approximation, time-dependent perturbation, theory and applications, angular momentum, relativistic wave equations.

**PHYS 567 Particle Physics.**
(3) (Winter) (3 hours lectures) (Restriction: Honours students, or permission of the instructor) Survey of elementary particles; hadrons, leptons and hadrons’ constituents (quarks). Invariance principles and conservation laws. Detectors and accelerators. Phenomenology of strong, electromagnetic and weak interactions.

**PHYS 580 Introduction to String Theory.**
(3) (Prerequisite: Permission of instructor.) (Restriction: Honours students.) Introduction to bosonic string theory, with application to fundamental theories of particle physics. Gravity and electromagnetism in extra dimensions, dynamics of classical and quantum strings, worldsheet parametrization, conserved currents, light-cone gauge, string thermodynamics and black holes, D-branes.

**PSYC-Psychology**

**Offered by:** Psychology

**PSYC 215 Social Psychology.**
(3) (Fall) (3 lectures) (Restriction: Not open to students who have taken PSYC 330, MGCR 221 or SOCI 216) The course offers students an overview of the major topics in social psychology. Three levels of analysis are explored beginning with individual processes (e.g., attitudes, attribution), then interpersonal processes (e.g., attraction, communication, love) and finally social influence processes (e.g., conformity, norms, roles, reference groups).

**PSYC 301 Animal Learning & Theory.**
(3) (Fall) (Prerequisite(s): PSYC 211 or PSYC 213 or PSYC 301 Animal Learning & Theory. (3) (Fall) (2 lectures; 1 conference) (Restriction: Not open to students who have passed a CEGEP statistics course(s) with a minimum grade of 75%: Mathematics 201-307 or 201-337 or equivalent or the combination of Quantitative Methods 300 with Mathematics 300) (This course is a prerequisite for PSYC 305, PSYC 406, PSYC 310, PSYC 336) (You may not be able to receive credit for this course and other statistic courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) The statistical analysis of research data; frequency distributions; graphic representation; measures of central tendency and variability; elementary sampling theory and tests of significance.

**PSYC 212 Perception.**
(3) (Fall) (2 lectures; 1 conference) Perception is the organization of sensory input into a representation of the environment. Topics include: survey of sensory coding mechanisms (visual, auditory, tactile, olfactory, gustatory), object recognition, spatial localization, perceptual constancies and higher level influences.

**PSYC 213 Cognition.**
(3) (Winter) (2 lectures, 1 conference) (Prerequisite: One previous course in Psychology.) Where do thoughts come from? What is the nature of thought, and how does it arise in the mind and the brain? Cognition is the study of human information processing, and we will explore topics such as memory, attention, categorization, decision making, intelligence, philosophy of mind, and the mind-as-computer metaphor.

**PSYC 215 Social Psychology.**
(3) (Fall) (3 lectures) (Restriction: Not open to students who have taken PSYC 330, MGCR 221 or SOCI 216) The course offers students an overview of the major topics in social psychology. Three levels of analysis are explored beginning with individual processes (e.g., attitudes, attribution), then interpersonal processes (e.g., attraction, communication, love) and finally social influence processes (e.g., conformity, norms, roles, reference groups).

**PSYC 301 Animal Learning & Theory.**
(3) (Fall) (Prerequisite(s): PSYC 211 or PSYC 213 or permission of instructor.) (Restriction: Not open to students who have taken PSYC 211 prior to the 2000-01 academic year) Contemporary and historical research and theory on animal learning approached from a behavioural, cognitive and biological perspective. Classical and instrumental conditioning, cognitive learning, and biological constraints. The status and history of North American behaviourism will be discussed and compared with cognitive and other approaches.

**PSYC 304 Child Development.**
(3) (Fall) (2 lectures, 1 conference) (Prerequisites: two courses from PSYC 211, PSYC 212, PSYC 213, and PSYC 215 or permission of the instructor) (This course is a prerequisite for PSYC 412, PSYC 413, PSYC 414, PSYC 416) Psychology of children, covering critical issues, theories, biological underpinnings, experimental methods, and findings in perceptual, cognitive, language, emotional, and social development.

**PSYC 305 Statistics for Experimental Design.**
(3) (Fall and Winter) (Prerequisite: PSYC 204 or equivalent) (This course is required of all students who propose to enter an Honours or Major program in Psychology) You may not be able to receive credit for this course and other statistic courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.) An
introduction to the design and analysis of experiments, including analysis of variance, planned and post hoc tests and a comparison of anova to correlational analysis.

PSYC 308 Behavioural Neuroscience 1.
(3) (Fall) (2 lectures, 1 conference) (Prerequisite: BIOL 111 or BIOL 112 or BIOL 115 or equivalent)
(Restriction: Not open to students who have taken or are taking: ANAT 321 or PHGY 314.) The neural basis of mammalian behavior. Basic neuroanatomy, neurophysiology and neurochemistry. Sensory and motor systems. How the nervous system acquires and integrates information and uses it to produce behavior.

PSYC 311 Human Cognition and the Brain.
(3) (Fall) (2 lectures; 1 conference) The course is an introduction to the field studying how human cognitive processes, such as perception, attention, language, learning and memory, planning and organization, are related to brain processes. The material covered is primarily based on studies of the effects of different brain lesions on cognition and studies of brain activity in relation to cognitive processes with modern functional neuroimaging methods.

PSYC 315 Computational Psychology.
(3) (Winter) (Prerequisite: Permission of instructor.) (Restriction: Not open to U0 or U1 students.) Application of computational methods to the simulation of psychological phenomena. Comparison of natural and artificial intelligence. Symbolic and neural network techniques. Methods for evaluating simulations.

● PSYC 316 Psychology of Deafness.
(3) (Fall) (2 lectures; 1 conference) (Prerequisite: PSYC 100 or equivalent or permission of instructor) Basic introduction to the field of deafness from a psychological perspective. Topics include effect of deafness on sensory, perceptual, cognitive, intellectual and linguistic processes, impact of deafness on children and families. Opportunity to learn basic concepts in American Sign Language (ASL) in the context of deaf culture.

PSYC 317 Genes and Behaviour.
(3) (Fall) (Pre-requisite: PSYC 211 or PSYC 308 or BIOL 306 or PHGY 314 or permission of instructor.) Focuses on current techniques employed to study which genes influence behaviour, and how they do so.

PSYC 318 Behavioural Neuroscience 2.
(3) (Winter) (2 lectures, 1 conference) (Prerequisite: PSYC 308 or PSYC 311 or BIOL 306 or PHGY 314) Physiological bases of motivation including feeding and drinking, sexual and parental behaviour. Physiological processes in reinforcement and learning.

● PSYC 329 Introduction to Auditory Cognition.
(3) (3 lecture hours per week.) (Prerequisites: PSYC 212 or PSYC 213 or permission of instructor.) Listener’s response to sound. Higher-level mental principles including perception, attention, memory, motor control, and emotion. Sensation and perceptual organization of sound. Perception/production of speech, music, and other auditory events.

PSYC 331 Inter-Group Relations.
(3) (Winter) (2 lectures) (Prerequisite: PSYC 215) The course focuses on the social psychology of societal groups such as racial minorities, aboriginal groups and women. The ideological biases of current theories is first established. This is followed by a review of current theories and finally current controversies are explored including new forms of racism and affirmative action.

PSYC 332 Introduction to Personality.
(3) (Winter) (3 lectures) (Prerequisite: PSYC 100) This course examines some of the major theories of personality, e.g., those of Freud, Rogers, and Bandura. Empirical research inspired by these theories will also be examined. Topics include the nature of human motivation, the role of the self-concept, and the consistency and stability of personality.

PSYC 333 Personality and Social Psychology.
(3) (Fall) (2 lectures) (Prerequisite: PSYC 215) The course will consider traditional approaches to person-situation interactions and a more dynamic approach based on recent research on goals and social cognition.

PSYC 337 Introduction: Abnormal Psychology 1.
(3) (Fall) (2 lectures, 1 conference) (This course is prerequisite for PSYC 338) A survey of the genetic, physiological and environmental origins of intellectual and emotional disorders.

(3) (Winter) (2 lectures; 1 conference) (Prerequisite: PSYC 337) This course is prerequisite for PSYC 491 An introduction to psychotic behaviour problems, character disorders and behaviour modification.

PSYC 340 Psychology of Language.
(3) (Winter) (Prerequisite: PSYC 212 or PSYC 213.) A survey of issues in psycholinguistics, focusing on the nature and processing of language (e.g., how we understand speech sounds, words, sentences, and discourse). Also surveyed: language and thought, the biological foundations of language, and first language acquisition.

PSYC 341 The Psychology of Bilingualism.
(3) (Winter) (2 lectures) (Prerequisites: Introductory Psychology, and PSYC 340 or introduction to linguistics; or permission of instructor) This course will examine issues in bilingualism, including second language acquisition in children and adults, critical period hypothesis, cognitive consequences and correlates of bilingualism, social psychological aspects of bilingualism, and bilingual education.

PSYC 342 Hormones and Behaviour.
(3) (Winter) (2 lectures) (Prerequisite: BIOL 111, BIOL 112, BIOL 115 or equivalent) The role of hormones in organization of CNS function, as effectors of behaviour, in expression of behaviours and in mental illness.

PSYC 351 Research Methods in Social Psychology.
(3) (Fall) (1 hour lecture, 6 hour lab and/or field work) (Prerequisite: PSYC 215. Pre-/Co-requisite: PSYC 305.) (Restriction: U2 level and above. Requires departmental approval.) (Students will be admitted on the basis of a written application on forms available from the Department (Room N7/9). Applications must be submitted by August 15) Designed to introduce students to the issues, strategies, and applications of various research methodologies in social psychology. Through demonstrations, exercises, and pilot studies, students will gain experience with lab and field methods using both correlational and experimental procedures. Classic and contemporary approaches will be examined.

PSYC 352 Cognitive Psychology Laboratory.
(3) (Fall) (1 hour lecture, weekly lab) (Prerequisite: PSYC 213 and PSYC 305.) (Corequisite: PSYC 305 or equivalent.) (Restriction: Requires departmental approval.) (Students will be admitted on the basis of a written application on forms available from the Department (Room N7/9). Applications must be submitted by August 15) Introduction to research methods and experimental techniques in cognitive psychology for exploring topics such as attention, memory, categorization, reasoning, and language processing.

Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.

† Denotes courses offered only in alternate years.
❖ Professional Practice (Stage) in Dietetics involving special prerequisites ‡ Indicates that departmental approval/permission must be obtained by a student prior to registration.
❧ Denotes courses not available as Education electives. denotes courses not offered only in the Faculty of Arts or Faculty of Science in 2007-08.
◆ Denotes courses which, because they are scheduled around practice teaching, are open only to Bachelor of Education students.

2007-2008 Undergraduate Programs Calendar, McGill University C-207
• PSYC 353 Laboratory in Human Perception.  
  (3) (Winter) (1 hour lecture plus 3 hour lab) (Prerequisites: PSYC 212, U2 level or above. Requires departmental approval.) (Students will be admitted on the basis of a written application on forms available from the Department (Room N7/9). Applications must be submitted by August 15) Students will be introduced to standard psychophysical procedures and data analysis techniques, and will have the opportunity to design and carry out their own experiments. Research topics include: visual acuity, form and motion perception, and visual search. Evaluation based on individually written reports on lab experiments.

PSYC 380D1 (4.5), PSYC 380D2 (4.5) Honours Research Project Seminar.  
  (3 hour seminar) (Restriction: For U2 honours students only. Requires departmental approval.) (Students must register for both PSYC 380D1 and PSYC 380D2.) (No credit will be given for this course unless both PSYC 380D1 and PSYC 380D2 are successfully completed in consecutive terms) First laboratory research project.

PSYC 395 Psychology Research Project 1.  
  (6) (Fall or Winter) (Prerequisites: 24 credits of the psychology program, PSYC 305 or equivalent and CGPA above 3.00.) (Restriction: Requires departmental approval.) (Restriction: Registration is by special arrangement with Psychology staff, and project proposals must be approved by the Department before registration.) (For more information see the Psychology Department website.) Supervised research project.

PSYC 396 Undergraduate Research Project.  
  (3) (Restrictions: This course cannot be taken under the S/U option. Departmental permission required.) Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.) (Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects will be suggested each term which may have project-specific prerequisites. Some projects may be accessible to students in other disciplines. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.) Independent research project with a final written report.

PSYC 403 Modern Psychology in Historical Perspective.  
  (3) (Fall) (2 lectures) A survey of the scientific and ideological influences on psychology from its philosophical beginnings through the period of the schools to its modern situation.

• PSYC 406 Psychological Tests.  
  (3) (Winter) (2 lectures) (Prerequisite: PSYC 204 or equivalent) An introduction to the theory and practice of psychological measurement in health, educational, clinical and industrial/organizational settings. Attention to procedures for developing and validating tests and questionnaires. Techniques include: intelligence tests, projective tests, questionnaires, structured interviews, rating scales, and behavioural/performance tests.

PSYC 408 Principles of Cognitive Behaviour Therapy.  
  (3) (Fall) (2 lectures) (Prerequisites: PSYC 337 and PSYC 211 or permission of instructor) An introduction to the theory, research and practice of cognitive behaviour therapy. The experimental approach to understanding human behaviour is used to follow basic principles of learning and their clinical application. Certain psychiatric disorders such as alcoholism and depression are highlighted to illustrate how a behaviour therapist conceptuates problems and formulates treatments.

PSYC 410 Special Topics in Neuropsychology.  
  (3) (Winter) (2 lectures) (Prerequisites: PSYC 311 or PSYC 308. Knowledge of basic neuropsychology at the level covered in PSYC 311 is assumed) Developments in cognitive neuroscience and cognitive neuropsychiatry via readings from primary sources. Topics include the neural bases of memory, emotion, social cognition and neuropsychiatric diseases. Integrating knowledge from studies in clinical populations and functional neuroimaging studies.

PSYC 412 Deviations: Child Development.  
  (3) (Fall) (2 lectures; 1 conference) (Prerequisite: PSYC 304 or PSYC 337 or permission of instructor) Students will also require a basic knowledge of research design) This course focuses on deviations in the perceptual, cognitive, social, and emotional development of children. Emphasis is placed on research exploring constitutional and environmental causes and symptoms associated with such disorders as depressive spectrum disorders, anxiety disorders, conduct disorder, autism, schizophrenia, attention deficit hyperactivity disorder, eating disorders, and substance abuse.

PSYC 413 Cognitive Development.  
  (3) (Winter) (3 hours) (Prerequisite: PSYC 304 or PSYC 213 or equivalent) In-depth exploration of cognitive development in infants and children including knowledge representation and processing, conceptual development, language development, and theories and principles of cognitive development.

PSYC 414 Social Development.  
  (3) (Fall) (Prerequisites: PSYC 304 and PSYC 305) Advanced study of the development of social behaviour and social cognition in children. Topics include: socialization, attachment, aggression, exploration, role taking, communication, family and peer relations, self and person perception. The development of these social processes within the framework of three general theories of development: behaviour genetics, learning, and cognitive-developmental.

• PSYC 427 Sensorimotor Behaviour.  
  (3) (Winter) (2 lectures) (Prerequisite: PSYC 308 or permission of instructor) A systematic examination of the sensorimotor system, drawing on models and data from both behavioural and physiological studies. Topics include: cortical motor areas, cerebellum, basal ganglia, spinal mechanisms, motor unit properties and force production, proprioception, muscle properties.

PSYC 429 Health Psychology.  
  (3) (Winter) (2 lectures; 1 conference) A survey of major issues in the developing field of health psychology: historical perspective; health effects of stress; pain mechanisms and management; prevention and management of chronic diseases, hypertension, coronary heart disease, cancer, and immunological disorders. Behaviour change strategies for smoking, overeating, physical inactivity, and sexual risk behaviour.

PSYC 436 Human Sexuality and its Problems.  
  (3) (Fall) (Prerequisite: either PSYC 337 or permission of the instructor) This course will deal with typical sexual behavior and its variations. Topics will include the history of sex research, the sexual response cycle, sexual dysfunction, gender identity, sexual orientation, etc. Current research and theory will be emphasized.

PSYC 450D1 (4.5), PSYC 450D2 (4.5) Research Project and Seminar. (Prerequisites: PSYC 204, PSYC 305.) (Restriction: Requires departmental approval.) (Restriction: Only for Major or special students in U3 who intend to proceed to graduate school) (Students will be admitted on the basis of a written application on forms available from the Department (Room N7/9). Applications must be submitted by August 15) (Students must register for both PSYC 450D1 and PSYC 450D2.) (No credit will be given for this course unless both PSYC 450D1 and PSYC 450D2 are successfully completed in consecutive terms) Under supervision of an adviser approved by the Department, students design and carry out a research project. Students report their research in seminars throughout the year and in a final written report.

• PSYC 451 Human Factors Research and Techniques.  
  (3) (Fall) (2 lectures; 1 lab) (Prerequisites: PSYC 204, PSYC 211, PSYC 212, PSYC 213, PSYC 215 and PSYC 305 or permission of instructor) The application of psychology to the analysis and design of systems and products to increase efficiency and reduce the probability and risk of human error. Topics include: workload and vigilance, control-display relationships, task analysis, and workstation design.

PSYC 470 Memory and Brain.  
  (3) (Winter) (3 hour lecture) (Prerequisites: PSYC 308 and PSYC 318 or PHGY 311 or BIOL 306) Memory systems are studied with an emphasis on the neural computations that occur...
at various stages of the processing stream, focusing on the hippocampus, amygdala, basal ganglia, cerebellum and cortex. The data reviewed is obtained from human, non-human primates and rodents, with single unit recording, neuroimaging and brain damaged subjects.

**PSYC 471 Human Motivation.**
(3) (Winter) (3 hours lectures) (Prerequisite: PSYC 215) The course is designed to explore questions such as “Why do people often fail to reach their personal goals?” Current goal-based and need-based theories of human motivation will be reviewed. The instructor will highlight the relevance of motivation research to the domains of education, sports and management.

● **PSYC 473 Social Cognition and the Self.**
(3) (2 lectures) (Prerequisites: PSYC 215 and PSYC 333 or PSYC 331 or PSYC 474) (Restriction: Not open to students who have taken PSYC 411) This course examines the social psychological literature emphasizing a) social cognition - how people think about and make sense of their social experiences; and b) self theory - how people create and maintain a sense of identity. These frameworks will be applied to social psychological topics including close relationships, attitudes and self-esteem.

**PSYC 474 Interpersonal Relationships.**
(3) (Winter) (Prerequisite: PSYC 215, PSYC 204, and PSYC 333 or permission of instructor) Psychological science approach to interpersonal relationships. Organized in terms of the development of relationships, focusing first on impression formation as a platform for the development of relationships. Then we focus on close relationships, examining interpersonal constructs (intimacy, trust, commitment) and reconsidering social cognitive constructs (attributions, schemas) in an interpersonal context.

**PSYC 482 Advanced Honours Seminar.**
(3) (Fall) (2 lectures, plus student presentations, debates, and discussions.) (Restrictions: Not open to students who have taken 204-480D. For Honours students only.) Ethical issues in scientific and clinical psychology, scientific psychology and social policy; and other issues.

**PSYC 483 Seminar in Experimental Psychopathology.**
(3) (Winter) (Restriction: For U3 students only.) (2 lectures) (Prerequisite: PSYC 305 or equivalent.) (Note: Students will be admitted based on written application. Forms available from the Department (Room N7/9). Applications must be submitted by August 15th.) Design of experiments in psychopathology, interviewing techniques and clinical diagnosis.

**PSYC 488D1 (1.5), PSYC 488D2 (1.5) Special Topics Seminar.**
(Restriction: Requires departmental approval.) (Students must register for both PSYC 488D1 and PSYC 488D2.) (No credit will be given for this course unless both PSYC 488D1 and PSYC 488D2 are successfully completed in consecutive terms) (Note: A written proposal detailing the plans for the seminar must be prepared by the student and the professor and must be approved by the Department before registration.) (For more information see the Psychology Department website.) (Students must register for both PSYC 484D1 and PSYC 484D2.) Supervised research project.

**PSYC 491D1 (3), PSYC 491D2 (3) Advanced Study: Behavioural Disorders.**
(1-2 hours lecture or tutorial per week plus a field experience requirement) (Prerequisites: PSYC 337 and PSYC 338. Departmental permission required.) (Students will be admitted on the basis of a written application on forms available from the Department (Room N7/9). Applications must be submitted by August 15) (Students must register for both PSYC 491D1 and PSYC 491D2.) (No credit will be given for this course unless both PSYC 491D1 and PSYC 491D2 are successfully completed in consecutive terms) A critical examination of topics in abnormal and clinical psychology. Emphasis will be on analysis of theoretical positions and empirical findings as they relate to both etiology and treatment.

**PSYC 492 Special Topics Seminar 1.**
(3) (Fall or Winter) (Restriction: U3 students. Requires departmental approval.) These seminars are offered by special arrangement between interested Psychology staff and students. Note: A written proposal detailing the plans for the seminar must be approved by the Department Curriculum Committee before the student is permitted to register for this course. This proposal must be received by the Departmental Curriculum Committee well before the beginning of the term for which the seminar is proposed. Consult the Department Handbook for additional information.

**PSYC 493 Special Topics Seminar 2.**
(3) (Fall or Winter) (Restriction: U3 students. Requires departmental approval.) These seminars are offered by special arrangement between interested Psychology staff and students. Note: A written proposal detailing the plans for the seminar must be approved by the Department Curriculum Committee before the student is permitted to register for this course. This proposal must be received by the Departmental Curriculum Committee well before the beginning of the term for which the seminar is proposed. Consult the Department Handbook for additional information.

**PSYC 494D1 (4.5), PSYC 494D2 (4.5) Psychology Research Project.**
(Prerequisites: 30 credits of the psychology program, PSYC 305 or equivalent and CGPA above 3.00.) (Restrictions: Requires departmental approval. Registration is by special arrangement with Psychology staff, and project proposals must be approved by the Department before registration.) (For more information see the Psychology Department website.) (Students must register for both PSYC 494D1 and PSYC 494D2.) (No credit will be given for this course unless both PSYC 494D1 and PSYC 494D2 are successfully completed in consecutive terms.) Supervised research project.

**PSYC 495 Psychology Research Project 2.**
(6) (Fall or Winter) (Prerequisite: PSYC 395 or equivalent.) (Restriction: Registration is by special arrangement with Psychology staff, and project proposals must be approved by the Department before registration.) (Registration is by special arrangement with Psychology staff, and project proposals must be approved by the Department before registration.) (For more information see the Psychology Department website.) Supervised research project.

**PSYC 496 Senior Honours Research 1.**
(6) (Prerequisite: PSYC 380D1/PSYC 380D2) Second laboratory research project.

**PSYC 497 Senior Honours Research 2.**
(6) (Prerequisite: PSYC 380D1/PSYC 380D2) (Corequisite: PSYC 496) Third laboratory research project.

**PSYC 498D1 (4.5), PSYC 498D2 (4.5) Senior Honours Research.**
(Students must register for both PSYC 498D1 and PSYC 498D2.) (No credit will be given for this course unless both PSYC 498D1 and PSYC 498D2 are successfully completed in consecutive terms) (Prerequisite: PSYC 380D1/PSYC 380D2) Second two-term laboratory research project.

**PSYC 499 Reading Project.**
(1) (Prerequisites: PSYC 211, 212, 214, 215 and 305.) (Restriction: Open only to U3 students.) Under the guidance of an instructor with the relevant expertise, the student explores the literature on a special topic.
PSYC 502 Psychoneuroendocrinology.
(3) (Prerequisite: One of PSYC 308, PSYC 311, PSYC 318, PSYC 342, or permission of the instructor.)
Neuroendocrinological mechanisms of action that underlie specific behaviors and their disorders. Hormones and cognitive functioning, sexual functioning, aggression, mood and stress in humans and will focus on methods of hypothesis-testing in these areas.

PSYC 505 The Psychology of Pain.
(3) (Fall) (2 lectures; 1 conference) (Prerequisites: any two of the following: PSYC 308, PSYC 311, PSYC 318, PSYC 522, ANAT 321, BIOL 306, PSYG 314 or permission of instructor.) An introduction to pain research and theory, with emphasis on the interactions of psychological, cultural and physiological factors in pain perception. The role of these factors in clinical pain and its management by pharmacological and non-pharmacological means will be discussed.

PSYC 507 Emotions, Stress, and Illness.
(3) (Fall) (Prerequisites: PSYC 337, PSYC 429 and permission of the instructor.) Emotional effects on peripheral physiology and the development, course, and outcome of physical disorders such as high blood pressure, coronary artery disease, ulcers, asthma, and cancer.

PSYC 512 Advanced Personality Seminar.
(3) (Prerequisite: PSYC 332 or permission of instructor.)
(Restrictions: Open to psychology students. Enrollment limited. Students must be in U3 or above. Departmental permission required.) Advanced topics in personality. Focus on power, status, and dominance and how these are manifested in social behavior. Dominance in nonhuman species, biological substrates of dominance, relations of status and dominance to social cognition, affect, and health; gender, role and cultural influences on dominance.

PSYC 526 Advances in Visual Perception.
(3) (Fall) (2 lectures) We examine in detail the structure of the visual system, and its function as reflected in the perceptual abilities and behavior of the organism. Parallels are also drawn with other sensory systems to demonstrate general principles of sensory coding.

PSYC 528 Vulnerability to Depression.
(3) (Prerequisite: PSYC 337 or PSYC 412 or permission of instructor. Requires departmental approval.) This course will examine in depth cognitive, behavioral, psychodynamic, biological, and developmental psychopathology models of the etiology of depression. Within each theoretical perspective, core issues, theoretical and methodological underpinnings, and research data will be examined.

PSYC 529 Music Cognition.
(3) (Fall) (Prerequisites: PSYC 212, PSYC 213, PSYC 204 (or equivalent)) Interdisciplinary study of music cognition and perception, with an emphasis on cognitive and experimental approaches. Topics include: psychoacoustics, music memory, neurophysiology of music, performance, talent and expertise, and developmental aspects.

PSYC 530 Applied Topics in Deafness.
(3) (Fall) (Prerequisite: PSYC 340 or PSYC 316 or equivalent. Permission of instructor) Covers fundamental topics in deafness (sensory, perceptual, cognitive, social, linguistic, education and health issues) from an applied psychological perspective. Lectures and seminar presentations plus field work involving ASL/LSQ.

PSYC 531 Structural Equation Models.
(3) (Fall) (one 2-hour lecture plus one lab) (Prerequisite: PSYC 536, PSYC 651, or equivalent, or permission of instructor.) The course introduces basic concepts underlying structural equation models (SEM). SEM, which combine regression analysis and factor analysis, are quite useful and are currently very popular in analyzing data that arise in social, developmental and clinical psychology. The students are expected to get first-hand experiences in fitting SEM, and learn how to interpret and report the results from SEM.

PSYC 532 Cognitive Science.
(3) (Fall) (Prerequisites: Admission to the Cognitive Science Minor or permission of instructor. Students should ideally have some cognitive science background in at least two disciplines) The multi-disciplinary study of intelligent systems. Problems in vision, memory, categorization, choice, problem solving, cognitive development, syntax, language acquisition, and rationality. Rule-based and connectionist approaches.

PSYC 533 International Health Psychology.
(3) (Fall) (Prerequisite: PSYC 305 and PSYC 215 or PSYC 429 or PSYC 304 or ANTH 227.) (Restriction: Departmental permission required.) The focus will be on health and illness in developing countries, in particular, on health problems (malnutrition, alcohol abuse, mental illness, family planning, and HIV) where psychosocial factors play a large role in the problem and the solution. Attempted solutions based on community participation, health education, non-governmental and international agencies will be discussed.

PSYC 535 Advanced Topics in Social Psychology.
(3) (Winter) (Prerequisites: PSYC 215; and PSYC 333 or PSYC 351 or PSYC 380.) (Restriction: Departmental permission required.) (Restriction: Graduate Students, enrollment limited) Classic and contemporary readings in a specific content area within social psychology will be assigned in order to examine the sub-area in depth. The focus will vary depending upon the specialty area of the instructor. These areas include interpersonal relationships, intergroup relations, the self, and social cognition.

PSYC 536 Correlational Techniques.
(3) (Winter) (Prerequisites: PSYC 204 and PSYC 305 or their equivalents, and MATH 133 or equivalent.)
(Restriction: Requires departmental approval.) The statistical analysis of relations among a number of variables in situations common in psychology, ecology, and other fields. Methods include regression analysis, principal components analysis, and other techniques for modelling the structure of correlation matrices.

PSYC 537 Advanced Seminar in Psychology of Language.
(3) (Prerequisites: PSYC 313 and one of: PSYC 340, LING 200, or LING 300.) (Note: Prior background in the psychology of language, cognitive psychology, or linguistics is essential.) The neural basis of language, evolutionary approaches to language, pragmatics and figurative language processing, disordered language processing, models of spoken word recognition.

PSYC 545 Topics in Language Acquisition.
(3) (Fall) Psychological mechanisms and theories of first language acquisition in infancy and early childhood. Topics such as: infant speech perception, acquisition of grammar, word learning, pidgin and Creole languages, critical and sensitive periods, genetic and evolutionary bases of language.

PSYC 561 Methods: Developmental Psycholinguistics.
(3) (Winter) (3 hour lectures) (Prerequisites: any two of PSYC 200, LING 355 or equivalent or permission of instructor.) Approaches and methods used in investigations of the development of language and communication. A case study approach, observational-correlational approach versus experimental-manipulative approach, cross sectional design versus longitudinal design.

PSYC 562 Measurement of Psychological Processes.
(3) (Restriction: Not open to students who have taken PSYC 336.) The properties of measurements and techniques for the measurement of psychophysical variables such as brightness and loudness and of attitudinal variables such as similarity, preference, and utility. Data analysis tools of value to experimenters. Emphasis on current problems in experimental psychology.

PSYT-Psychiatry
Offered by: Psychiatry
PSYT 199 FYS: Mental Illness and the Brain.
(3) (1 hour lecture and 2 hours seminar weekly) (Restriction: Open only to newly admitted students in U0 or U1, who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.) (Maximum 25. No prerequisites) This course will introduce the student to the fundamentals of neuroscience, and then use these principles to illustrate recent advances made on the biological causes of, and treatments for, mental disorders with a strong emphasis on the implications for psychological understanding and intervention.
biological component: schizophrenia, depression, mania, anxiety disorders, obsessive-compulsive disorder, Alzheimer's and Parkinson's diseases and alcohol and drug abuse.

**PSYT 301 Issues in Drug Dependence.**
(3) (Winter) (3 hours) (Prerequisites: PHGY 201 or PHGY 209 or PHGY 210 or PSYC 100 or BIOL 201 or permission of instructor) The phenomenology and epidemiology of the use and abuse of alcohol, nicotine, opiates, stimulants, sedatives and psychotomimetic agents are discussed in relation to current theoretical and experimental issues. The perspective is multidisciplinary and the intention is to develop an understanding of the nature of the issues surrounding drug dependence.

**PSYT 302 Psychiatry - ICM.**
(0.5) Principles of the introductions to Psychiatry. Will provide students with the basic components of clinical psychiatry.

**PSYT 401 Psychiatry - Clerkships.**
(8) Eight-week block training to acquaint all students (Core program) with the examination of patients and understanding of some of the major factors involved in abnormal behaviour. Diagnostic procedures, psychotherapeutic and physical methods of treatment will be among the aspects covered. Students will be provided with tutors on an individual and group basis and will also have an opportunity to become conversant with certain more specialized areas of the field of psychiatry. An attempt will be made to provide a comprehensive exposure to current theoretical models and treatment approaches in psychiatry, to indicate the relevance of certain concepts and attitudes to non-psychiatric medical practice, and to supply well-supervised clinical experience which is patient-oriented and responsibility-centered.

**PSYT 401D1 (4), PSYT 401D2 (4) Psychiatry - Clerkships.**
(Students must register for both PSYT 401D1 and PSYT 401D2.) (No credit will be given for this course unless both PSYT 401D1 and PSYT 401D2 are successfully completed in consecutive terms) (PSYT 401D1 and PSYT 401D2 together are equivalent to PSYT 401) Eight-week block training to acquaint all students (Core program) with the examination of patients and understanding of some of the major factors involved in abnormal behaviour. Diagnostic procedures, psychotherapeutic and physical methods of treatment will be among the aspects covered. Students will be provided with tutors on an individual and group basis and will also have an opportunity to become conversant with certain more specialized areas of the field of psychiatry. An attempt will be made to provide a comprehensive exposure to current theoretical models and treatment approaches in psychiatry, to indicate the relevance of certain concepts and attitudes to non-psychiatric medical practice, and to supply well-supervised clinical experience which is patient-oriented and responsibility-centered.

**PSYT 500 Advances: Neurobiology of Mental Disorders.**
(3) (Winter) (3 hours) (Prerequisite (Undergraduate): BIOC 212 and BIOC 311, or BIOC 311, or BIOL 200 and BIOC 212, or PHGY 311, or PSYC 308 and an upper-level biological science course with permission of the instructors, or equivalent. Basic knowledge of cellular and molecular biology is required.) (Restriction: Open to U3 and graduate students only.) (Restriction: Graduate Studies: strongly recommended for M.Sc. students in Psychiatry.) Current theories on the neurobiological basis of most well known mental disorders (e.g. schizophrenia, depression, anxiety, dementia). Methods and strategies in research on genetic, physiological and biochemical factors in mental illness will be discussed. Discussion will also focus on the rationale for present treatment approaches and on promising new approaches.

**PSYT 502 Brain Evolution and Psychiatry.**
(3) (Fall) (Prerequisites: BIOL 115 or equivalent as authorized by instructor) The course will focus on the transcendental importance of evolution of nervous systems for normal and pathological behavior. Studies of allomorphic brain growth and recent evolutionary theories of brain organization as they relate to normal and abnormal behavior will be emphasized.

---

**Not all courses are offered every year, and changes are made after the printing of this calendar. Always check the Class Schedule at www.mcgill.ca/courses for the most up-to-date information on whether a course is offered.**

- Denotes courses not offered by the Faculty of Arts or Faculty of Science in 2007-08.
- Denotes courses taught only in alternate years.
- Denotes courses not available as Education electives.
- Denotes courses offered by the Faculty of Education which, if appropriate to the student's program, may be included in the academic concentration.
