### 3.11.52.6 Bachelor of Arts (B.A.) - Honours Women's Studies (57 credits)

Until further notice, registration in the Honours Women's Studies program is not offered.
The Honours program offers a degree of analysis and depth of contemporary and historical critical issues centered on women, gender, and/or feminism beyond that of the Major concentration. The Honours culminates in the completion of an Honours thesis, supervised by a faculty member. Students secure the approval of a potential thesis adviser during the year before undertaking the thesis. Three credits are accorded to the thesis (graded by the thesis adviser), and 3 credits are accorded to work undertaken in the Colloquium which requires supplemental reading and writing assignments, training in research and thesis writing methods, presentation to the group of theses in progress, and response to the work of others.

Honours students must maintain an annual GPA of 3.30 in all required and complementary courses that fulfill the requirements of an Honours Component in Women's Studies, and a CGPA of 3.00.

**Required Courses (12 credits)**

**Complementary Courses (45 credits)**

Overview of the specifications for the 45 complementary credits:
- 6 credits from a list of Women's Studies (WMST) courses and
- 12 credits selected from Group A courses and
- 27 credits selected from Group B courses

Over the entire 45 credits,
- 9 credits minimum must be at the 400 or 500 level and
- 18 credits maximum may be at the 200 level.

Maximum 18 transfer credits will be accepted from approved exchange programs by arrangement with the Chair of WSAC and subject to University approval.

**Women's Studies (WMST)**

6 credits from:

- WMST 301 (3) Women's Studies Current Topics 1
- WMST 302 (3) Women's Studies Current Topics 2
- WMST 401 (3) Women's Studies Special Topics 1
- WMST 402 (3) Women's Studies Special Topics 2
- WMST 501 (3) Advanced Topics 1
- WMST 502 (3) Advanced Topics 2
- WMST 513 (3) Gender, Race and Science

**Complementary Course Group A**

12 credits from Group A

Group A courses are divided into eight sub-groups. Students may take only one course from any particular grouping. Any additional credits taken above the 12 credits from Complementary Course Group A may count as credits toward Complementary Course Group B.

**Group A-1**

### Complementary Course Group B

27 credits from Group B

Students select 27 credits from the Group B lists in consultation with an adviser and identify an individual focus of study comprised of 15 credits.

Reminder: A minimum of 9 credits at the 400 or 500 level must be taken in the 45 credits of Complementary Courses. Students will find more possible choices to meet this requirement in Group B.

Group B includes courses that are centrally focused on women and/or gender and/or feminism. They are offered by a range of faculties and disciplines. Additions may be made during a particular calendar year depending on the central focus of the course. For final updates, see http://www.mcgill.ca/igsf/.

Please note that not all courses are offered every year.

3.11.52.7 Bachelor of Arts (B.A.) - Joint Honours Component Women's Studies (36 credits)

Until further notice, registration in this Joint Honours Component in Women's Studies is not offered.

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

The Joint Honours component in Women's Studies offers a degree of analysis and depth of contemporary and historical critical issues centered on women, gender, and/or feminism beyond that of the Major concentration. It culminates in the completion of an Honours thesis, supervised by a faculty member. Students secure the approval of a potential thesis adviser during the year before undertaking the thesis. Three credits are accorded to the thesis (graded by the thesis adviser), and 3 credits are accorded to work undertaken in the Colloquium which requires supplemental reading and writing assignments, training in research and thesis writing methods, presentation to the group of theses in progress, and response to the work of others.

Joint Honours students must maintain an annual GPA of 3.30 in all required and complementary courses that fulfill the requirements of a Joint Honours Component in Women's Studies, and a CGPA of 3.00.

Required Courses (12 credits)

WMST 200 (3) Introduction to Women's Studies
WMST 303 (3) Feminist Theory and Research
WMST 495D1 (1.5) Honours/Joint Honours Colloquium
WMST 495D2 (1.5) Honours/Joint Honours Colloquium
WMST 497D1 (1.5) Honours/Joint Honours Thesis
Complementary Courses (24 credits)

Overview of the specifications for the 24 complementary credits:
3 credits from a list of Women's Studies (WMST) courses and
9 credits selected from Group A courses and
12 credits selected from Group B courses.

Over the entire 24 credits,
6 credits minimum must be at the 400 or 500 level and
12 credits maximum may be at the 200 level.

Maximum 12 transfer credits will be accepted from approved exchange programs by arrangement with the Chair of WSAC and subject to University approval.

Women's Studies (WMST)

3 credits from:

- WMST 301 (3) Women's Studies Current Topics 1
- WMST 302 (3) Women's Studies Current Topics 2
- WMST 401 (3) Women's Studies Special Topics 1
- WMST 402 (3) Women's Studies Special Topics 2
- WMST 501 (3) Advanced Topics 1
- WMST 502 (3) Advanced Topics 2
- WMST 513 (3) Gender, Race and Science

3.11.53 World Cinemas (FILM)

3.11.53.1 Location

Interdisciplinary Programs Office, Faculty of Arts
Dawson Hall, Room 112B
853 Sherbrooke Street West
Montreal, Quebec H3A 2T6

Telephone: 514-398-4400 ext. 09557
Fax: 514-398-7185
Email: interdisciplinary.arts@mcgill.ca

Adviser: Karin Bourgeois

3.11.53.2 About World Cinemas Minor Concentration

The World Cinemas program was established to coordinate faculty expertise and student interest in different national and international cinematic traditions. It offers courses across various departments, primarily in Arts, in order to train students to approach film studies from a variety of traditions and locations, while introducing them to different modes of cinematic practice and production from around the world.

3.11.53.3 World Cinemas (FILM) Faculty

Program Committee Chair

Derek Nystrom (English)

Program Committee

Eugenio Bolongaro (Italian Studies)
Michael Cowan (German Studies)
Yuriko Furuhata (East Asian Studies)
Thomas LaMarre (East Asian Studies)
Ned Schantz (English)
Will Straw (Art History and Communication Studies)
Alanna Thain (English)
Bachelor of Arts (B.A.) - Minor Concentration World Cinemas (18 credits)

The Minor Concentration World Cinemas instructs students in film aesthetics, history, and theory by acquainting them with cinematic practices from different national and international traditions. This interdisciplinary program draws on the already existing teaching and research activities in several departments within the Faculty of Arts and will serve as an institutional context for future teaching and research endeavors in film studies.

Complementary Courses (12 credits)

12 credits selected from the course list below with the following specifications:
- a minimum of 6 credits in non-U.S. cinemas;
- a maximum of 6 credits from any one department.

No more than 6 credits may be taken from the same discipline as the student's other major or minor concentrations.

### 4 Bachelor of Arts and Science

#### 4.1 About the Faculties

The B.A. & Sc. is an interdisciplinary degree intended for students who want to pursue simultaneously a program offered by Arts and one offered by Science. The B.A. & Sc. is intended for students with well-defined interdisciplinary interests, and is not meant as a "compromise" between a B.A. and a B.Sc. degree. If you are more interested in Arts, but would like to study some Science, you can do so within the B.A. degree. Similarly, if you are more interested in Science, but would like to study some Arts, you can do so within the B.Sc. degree.

To learn more about the Faculty of Arts, see Faculty of Arts > About the Faculty of Arts. To learn more about the Faculty of Science, see Faculty of Science > About the Faculty of Science.

#### 4.2 Programs and Teaching in Arts and in Science

Programs and teaching in Arts are described under Faculty of Arts > Programs and Teaching in Arts. Those in Science are described under Faculty of Science > Programs and Teaching in Science. The two faculties jointly offer the B.A. & Sc., so students pursuing that degree are at home in both Arts and Science.

#### 4.3 Revisions – Bachelor of Arts & Science

**Biology**

*section 4.11.2.3: Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Biology - Cell/Molecular (36 credits)*

*section 4.11.2.4: Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Biology - Organismal (37 credits)*

**Geography**

*section 4.11.9.1: Bachelor of Arts and Science (B.A. & Sc.) – Interfaculty Program in Sustainability, Science and Society (54 credits)*

#### 4.4 About the Bachelor of Arts and Science (Undergraduate)

The B.A. & Sc. is an interdisciplinary degree intended for students who want to pursue simultaneously a program offered by Arts and one offered by Science. The B.A. & Sc. is intended for students with well-defined interdisciplinary interests, and is not meant as a "compromise" between a B.A. and a B.Sc. degree. If you are more interested in Arts, but would like to study some Science, you can do so within the B.A. degree. Similarly, if you are more interested in Science, but would like to study some Arts, you can do so within the B.Sc. degree.
4.4.1 **Location**

853 Sherbrooke Street West  
Montreal, Quebec H3A 2T6  
Canada  

Telephone: 514-398-5442  
Faculty websites: [www.mcgill.ca/arts](http://www.mcgill.ca/arts) and [www.mcgill.ca/science](http://www.mcgill.ca/science)  
Degree website: [www.mcgill.ca/science/sousa/new_students](http://www.mcgill.ca/science/sousa/new_students)  
Science Office for Undergraduate Student Advising (SOUSA)  
Website: [www.mcgill.ca/science/sousa](http://www.mcgill.ca/science/sousa)

The Science Office for Undergraduate Student Advising (SOUSA) of the Faculty of Science and the Office of the Director of Advising Services of the Faculty of Science are located in Dawson Hall. SOUSA serves students in the B.A. & Sc. and B.Sc. degrees.

4.4.2 **Administrative Officers**

For a listing of administrative officers in the Faculty of Arts, refer to [Faculty of Arts > Administrative Officers](http://www.mcgill.ca/arts/administrative-officers) and for those in the Faculty of Science, refer to [Faculty of Science > Administrative Officers](http://www.mcgill.ca/science/administrative-officers). Note that the Director of Advising Services, Science, is responsible for students pursuing a B.A. & Sc.

The B.A. & Sc. Program Administration Committee (PAC), which oversees the curriculum and regulations for the degree, consists of the following members:

<table>
<thead>
<tr>
<th>B.A. &amp; Sc. Program Administration Committee (PAC)</th>
<th>(valid to August 31, 2011; the PAC membership for the 2011-2012 academic year is not yet determined)</th>

</tr>
<tr>
<td>TBA</td>
<td>Associate Dean (Academic), Faculty of Arts</td>
</tr>
</tbody>
</table>

4.4.3 **Science Office for Undergraduate Student Advising (SOUSA)**

The Science Office for Undergraduate Student Advising (SOUSA) provides ongoing advice and guidance on academic issues related to programs, degree requirements, registration, course change, withdrawal, deferred exams, supplemental exams, academic standing, inter- and intra-faculty transfer, year or term away, transfer credits, second programs, second degrees, and graduation.

Every student in the B.A. & Sc. degree is assigned an adviser in SOUSA. The adviser’s name appears near the top of your Advising Transcript on Minerva. You can contact your adviser directly, or if you do not yet have a SOUSA adviser, email adviser.science@mcgill.ca.

SOUSA advisers provide assistance with degree planning and are a valuable referral source. They are a good place to start if you are not sure where to address your question. They also offer help managing academic situations during periods of personal, financial, or medical problems, by working with you to identify various possibilities and strategies for making informed decisions.

Special requests can be made, in writing, to the Director of Advising Services, Science, who is responsible for students pursuing a B.A. & Sc.

The Committee on Student Standing (CSS) of the Faculty of Science will consider appeals of the Director of Advising Services’ decisions. For information about CSS, see the Director of Advising Services’ assistant.

4.5 **Degree Admission Requirements**

For information about inter-faculty or inter-degree transfers, refer to [University Regulations and Information > Inter-Faculty Transfer](http://www.mcgill.ca/science/sousa/general), as well as to the relevant information posted on the Science Office for Undergraduate Student Advising (SOUSA) website at [www.mcgill.ca/science/sousa/general](http://www.mcgill.ca/science/sousa/general).
4.6 Degree Requirements

Each student pursuing a B.A. & Sc. must be aware of the regulations as stated in this section of this publication and on the McGill and Science Office for Undergraduate Student Advising (SOUA) websites.

While departmental and Faculty advisers and staff are always available to give advice and guidance, the ultimate responsibility for completeness and correctness of course selection and registration, for compliance with, and completion of, program and degree requirements, and for the observance of regulations and deadlines rests with you. It is your responsibility to seek guidance from the SOUA Office if in any doubt; misunderstanding or misapprehension will not be accepted as cause for dispensation from any regulation, deadline, program, or degree requirement.

To be eligible for a B.A. & Sc., you must fulfil all Faculty degree and program requirements as indicated below:

section 4.6.1: Minimum Credit Requirement
section 4.6.2: Residency Requirement
section 4.6.3: Time and Credit Limit for Completion of the Degree
section 4.6.6: Course Requirements

4.6.1 Minimum Credit Requirement

You must complete the minimum credit requirement for the degree as specified in your letter of admission.

Students are normally admitted to a four-year degree requiring the completion of 120 credits, but advanced standing of up to 30 credits may be granted if you obtain satisfactory results in the Diploma of Collegial Studies, International Baccalaureate, French Baccalaureate, Advanced Levels, and Advanced Placement tests.

If you are readmitted after interrupting your studies for a period of five consecutive years or more, you may be required to complete a minimum of 60 credits and satisfy the requirements of a program. In this case, a new GPA will be calculated. The Director of Advising Services, Science, in consultation with the appropriate department, may approve a lower minimum for students who had completed 60 credits or more before interrupting their studies. If you are readmitted after a period of absence, you are normally subject to the program and degree requirements in effect at the time of readmission.

4.6.2 Residency Requirement

To obtain a B.A. & Sc., you must satisfy the following residency requirements: a minimum of 60 credits of courses used to satisfy the B.A. & Sc. requirements must be taken and passed at McGill, exclusive of any courses completed as part of the math and science requirements of the B.A. & Sc. Freshman Program. At least two-thirds of all departmental program requirements (Multi-track, Honours, Interfaculty) must normally be completed at McGill, not including courses completed in a prior McGill degree. Exceptionally, students in major concentrations or interfaculty or honours programs who pursue an approved Study Away or Exchange program may, with prior approval from both their department and the Director of Advising Services, Faculty of Science, be exempted from the two-thirds rule. In addition, some departments may require that their students complete specific components of their program at McGill.

4.6.3 Time and Credit Limit for Completion of the Degree

If you need 96 or fewer credits to complete your degree requirements, you are expected to complete your degree in no more than eight terms after your initial registration. If you are a student in the Freshman program, you become subject to these regulations one year after your initial registration. If you need or want to exceed this time limit, you must receive permission from the Director of Advising Services, Science, to continue your studies.

If you are registered in the B.A. & Sc., you are expected to complete the requirements of your program and your degree within 120 credits. You will receive credit for all courses (subject to degree regulations) taken up to and including the semester in which you obtain 120 credits. If you want to remain at McGill beyond that semester, you must also seek permission of the Director of Advising Services, Science. Permission for exceeding the time and/or credit limits will normally be granted only for valid academic reasons, such as a change of program (subject to departmental approval) and part-time status. If permission is granted, you will receive credit only for required and complementary courses necessary to complete program requirements.

4.6.4 Bachelor of Arts and Science (B.A. & Sc.) - Freshman Program (30 credits)

Students who need to complete 97-120 credits to fulfill their degree requirements are admitted to the Freshman Program. Students with specific career goals should consult an academic adviser about their choice of program within the B.A. & Sc. However, students intending to pursue further studies following the B.A. & Sc. should refer to the admissions requirements of particular programs for the appropriate prerequisite courses.

In particular, students should note the following:

- The minimum freshman science requirements in the B.A. & Sc. may not satisfy the introductory science requirements of all medical/dental schools.
- The Major Concentration in Psychology may not provide a sufficiently focused background for admission to many graduate programs in Psychology.
- The Major Concentration Chemistry is not certified by the Ordre des Chimistes du Québec. Students interested in pursuing a career in Chemistry in Quebec are advised to take an appropriate B.Sc. program in Chemistry.

Foundational Courses

The Freshman Program requirements include foundational courses in both Science and Arts which must be selected as follows:

MATH

At least two mathematics courses:

One of a first Calculus:

- MATH 139 (4) Calculus 1 with Precalculus
- MATH 140 (3) Calculus 1
- MATH 150 (4) Calculus A

One of a second Calculus:

- MATH 141 (4) Calculus 2
- MATH 151 (4) Calculus B

A Linear Algebra course:

- MATH 133 (3) Linear Algebra and Geometry

SCIENCE

At least three foundational science courses:

One or more of Biology or Chemistry:

* Note: CHEM 120 is not open to students who have taken CHEM 115.

- BIOL 111 (3) Principles: Organismal Biology
- BIOL 112 (3) Cell and Molecular Biology
- CHEM 120* (4) General Chemistry 2

One of General Chemistry:

- CHEM 110 (4) General Chemistry 1
- CHEM 115 (4) Accelerated General Chemistry: Giants in Science

One of Mechanics:

- PHYS 101 (4) Introductory Physics - Mechanics
- PHYS 131 (4) Mechanics and Waves

One of Electromagnetism:

Note: PHYS 101 is a prerequisite for PHYS 102; and PHYS 131 is a prerequisite for PHYS 142.

- PHYS 102 (4) Introductory Physics - Electromagnetism
- PHYS 142 (4) Electromagnetism and Optics

ARTS

At least three Arts courses (or 9 credits) to be chosen in two of the following three categories: Humanities, Languages and Social Sciences.

A maximum of two courses (or 6 credits) may be chosen from one category, and no more than two courses (or 6 credits) can be taken in any one department.
Note: No course may fulfill the requirements for more than one program, including the B.A. & Sc. Freshman Program.

**Humanities (Literature and Civilization):**
Courses selected from the following subjects:
- Art History and Communications Studies (ARTH and COMS)
- Classics (CLAS)
- East Asian Studies (EAST)
- English (ENGL)
- French Language and Literature (FREN)
- German Studies (GERM)
- Hispanic Studies (HISP)
- Islamic Studies (ISLA)
- Italian studies (ITAL)
- Jewish Studies (JWST)
- Philosophy (PHIL)
- Religious Studies (RELG)
- Russian Studies (RUSS)

**Languages:**
Courses may be taken in this category to improve language skills.
Languages include:
- Classics (Latin, Ancient Greek or Modern Greek) (CLAS)
- East Asian Studies (Chinese, Japanese, Korean) (EAST)
- English as a Second Language (CEAP, CESL)
- French as a Second Language (FRSL)
- French Language and Literature (FREN)
- German Studies (GERM)
- Hispanic Studies (Spanish) (HISP)
- Islamic Studies (Arabic, Persian, Turkish, Urdu) (ISLA)
- Italian (ITAL)
- Jewish Studies (Hebrew, Yiddish) (JWST)
- Russian and Slavic Studies (Polish, Russian, Armenian, Czech) (RUSS)

**Social Sciences:**
Courses selected from the following subjects:
- Anthropology (ANTH)
- Economics (ECON)
- History (HIST)
- Linguistics (LING)
- Political Science (POLI)
- Sociology (SOCL)

**Advanced Standing/Transfer Credits**
Students who have completed the Diploma of Collegial Studies, Advanced Placement exams, Advanced Levels, the International Baccalaureate, the French Baccalaureate, or McGill placement examinations may receive exemption and/or credit for all or part of the Mathematics and foundational science courses as well as exemption from all or part of the Arts courses requirement of the Freshman Program. Similarly, students who have completed courses at other universities or colleges may receive exemptions and/or credits.

Advanced Placement Examination results with a score of 4 or 5 must be declared by the student at the time of initial registration at the University.
For more information about advanced standing, please consult: http://www.mcgill.ca/students/transfercredit/. Students must carefully select their mathematics and science Freshman courses so that they have all the required prerequisites for their intended departmental programs.

### 4.6.5 Departmental Programs

If you are pursuing a B.A. & Sc., other than those registered in the Freshman Program, you are required to have an approved program (Multi-track, Honours, Joint Honours, Interfaculty), and to select your courses in each term with a view to timely completion of your degree and program requirements. You must complete one of the program streams described below.

Previously the degree included a **required integrative course** (BASC 201; 3 credits). However, as of January 2011 this is no longer the case, and the course is currently under review. Students must still select a **complementary integrative course** (3 credits) within or outside a student's programs selected from the list of complementary Integrative Courses (see section 4.10.6: Integrative Courses), plus electives (10-15 credits)

#### 4.6.5.1 Multi-Track System

To recognize the diversity of student backgrounds and interests and the multiple routes to understanding provided by a modern university, the Faculties of Arts and of Science offer a 90-credit multi-track system that includes a major concentration in one faculty complemented by either a major concentration or two minors/minor concentrations in the other faculty and that may be completed in one of the following ways:

**Options**

- Arts Major Concentration (36 credits) + Science Major Concentration (36-38 credits) (see section 4.10: Overview of Programs Offered for a list of programs open to students in the B.A. & Sc.)
- Major Concentration in Arts or Science (36-38 credits) + two minors/minor concentrations in the other faculty (2 x 18 credits = 36 credits.)

**Regulations**

- Programs offered by Computer Science, Mathematics and Statistics, and Psychology are considered Science programs for the purpose of the B.A. & Sc.
- Within both options, all concentrations must be in different academic units. Thus, you may take a Geography program either in Arts or in Science, but not in both.
- Students will include within the 36 or 18 credits of their major concentrations or minors or minor concentrations any university-level (200- or above) prerequisites to required courses within their programs.
- No course may fulfill the requirements for more than one program.

**Definitions**

- **Units**: academic departments or administrative equivalents.
- **Programs**: lists of required and complementary courses (including university-level prerequisites for required courses) prepared and maintained by units.
- **Major Concentration**: a program of 36-38 credits taken from a unit's course offerings.
- **Minor Concentration**: a program of 18 credits taken from a unit's course offerings. Expandable minor concentrations are those that can, on the completion of 18 additional approved credits, be expanded into a major concentration within the appropriate unit.

#### 4.6.5.2 Honours Program

Honours programs demand a high degree of specialization, and require you to satisfy specific departmental and Faculty Honours requirements while maintaining good academic standing. They are designed to prepare you for graduate study. Students in the B.A. & Sc. who complete an approved Honours program must also complete an approved minor concentration or a minor in the Faculties of Arts or of Science. You must complete at least 30 credits in the Faculty of Arts and at least 30 in the Faculty of Science as part of your Honours program and your Minor concentration or Minor program. See section 4.10.3: Honours Programs for a list of available programs.

To choose the Honours option, you must meet the GPA/CGPA requirements set out in University Regulations and Information > Graduation Honours: Honours and First-Class Honours.

#### 4.6.5.3 Joint Honours Program

If you want to study at the Honours level in two disciplines, you can combine a Joint Honours program component from an Arts discipline with one from a Science discipline; see section 4.10.4: Joint Honours Programs for a list of available programs. Each Joint Honours component consists of a maximum of 36-38 required and complementary credits (not including program prerequisites). In cases where a minimum of 24 credits are in courses normally restricted to Honours students, the total of required and complementary credits may be as few as 30.

To choose the Joint Honours option, you must meet the GPA/CGPA requirements set out in University Regulations and Information > Graduation Honours: Honours and First-Class Honours.
4.6.5.4 Interfaculty Program

An Interfaculty program is an approved selection of courses constituting a concentration in an intellectually coherent and inter-faculty field of studies. These courses must include approved selections from the Faculties of Arts and of Science and possibly other faculties. See section 4.10.2: Interfaculty Programs for a list of approved programs. Students in the B.A. & Sc. who complete an approved Interfaculty program must also complete an approved minor concentration or a minor in the Faculties of Arts or of Science. You must complete at least 30 credits in the Faculty of Arts and at least 30 in the Faculty of Science as part of your Interfaculty program and your Minor concentration or Minor program.

4.6.6 Course Requirements

All required and complementary courses used to fulfill program requirements, including the Freshman Program, must be completed with a grade of C or better. If you fail to obtain a satisfactory grade in a required course, you must either pass the supplemental examination in the course or do additional work for a supplemental grade, if these options are available, or repeat the course. Course substitution will be allowed only in special cases; students should consult their academic adviser.

Normally, you are permitted to repeat a failed course only once. (Failure is considered to be a grade of less than C or the administrative failures of J and KP.) If a required course is failed a second time, you must appeal to the Director of Advising Services, Science, for permission to take the course a third time. If permission is denied by the Director of Advising Services and/or by the Committee on Student Standing of the Faculty of Science, on appeal, you must withdraw from the program. If the failed course is a complementary course required by the program, you may choose to replace it with another appropriate complementary course. If you choose to substitute another complementary course for a complementary course in which a D was received, credit for the first course will still be given, but as an elective. If you repeat a required course in which a D was received, credit will be given only once.

Full details of the course requirements for all programs as well as the locations of departmental advisory offices, program directors, and telephone numbers for further information are available as follows:

For a list of all programs available to B.A. & Sc. students, see section 4.10: Overview of Programs Offered.

For a list of complementary integrative courses, see section 4.10.6: Integrative Courses.

4.6.6.1 Course Overlap

You will not receive additional credit toward your degree for any course for which you have already received credit at McGill, CEGEP, at another university, or as a result of Advanced Placement, Advanced Level, International Baccalaureate, or French Baccalaureate exams. It is your responsibility to consult the Science Office for Undergraduate Student Advising (SUSA) or the department offering the course as to whether or not credit can be obtained and to be aware of exclusion clauses specified in the course description in this publication.

Please refer to the following website for specific information about advanced standing credits and McGill course exemptions:

www.mcgill.ca/students/transfercredit.

Sometimes two different departments offer the same course. Such courses are called “double-prefix” courses. When such courses are offered simultaneously, you should take the course offered by the department in which you are obtaining your degree. For example, in the case of double-prefix courses CHEM XYZ and PHYS XYZ, Chemistry students take CHEM XYZ and Physics students take PHYS XYZ. If different departments offer a double-prefix course in alternate years, you may take whichever course best fits your schedule.

Credit for computer science and statistics courses will be given with the stipulations specified under Faculty of Science > Course Overlap.

4.6.6.2 Courses Outside the Faculties of Arts and of Science

The following regulations apply to students in the B.A. & Sc. who want to take courses outside the Faculties of Arts and of Science:

- Regardless of your minimum credit requirement towards your B.A. & Sc., you are allowed a maximum of 12 credits in ELECTIVE and/or COMPLEMENTARY courses taken in faculties other than the Faculties of Arts and of Science.
- Students in certain designated programs that include a number of REQUIRED and COMPLEMENTARY courses in other faculties are permitted a maximum of 30 credits outside the Faculties of Arts and of Science. These programs are the Interfaculty and Honours programs in Environment, the Minor concentration in Environment, the Interfaculty program in Sustainability, Science and Society, and the Major concentration in Geography (Urban Systems).
- Any courses taught at McGill University may be used toward the maximum allowed, except for courses in Continuing Education, for which you receive credits only in Continuing Education. Courses taught by the McGill Writing Centre are excluded from this rule and can count for credit in your degree (see the Sousa website for a list of approved courses: www.mcgill.ca/science/student/continuingstudentsbase/conted).
- For the purpose of this policy, courses taught in other faculties and specifically listed under the Faculty of Arts or Faculty of Science section of this publication are considered as courses taught in the Faculties of Arts and of Science.
- The maximum number of credits allowed will be strictly enforced.

4.6.6.3 Distance Education Courses

- A maximum of 6 credits of courses taught through distance education may be used as electives toward the B.A. & Sc. degree at McGill.
- Courses taught through distance education from institutions other than McGill will be approved as transfer credits under the following conditions:
  - the course is given by a government-accredited, degree-granting institution acceptable to McGill;
  - the course counts for credit toward degrees granted at the institution giving the course;
UNDERGRADUATE PROGRAMS, COURSES AND UNIVERSITY REGULATIONS

- prior approval for the course is obtained from the Science Office for Undergraduate Student Advising (SOUSA).
- The combined total of regular course credits and distance education course credits may not exceed the permitted maximum number of credits per term according to the regulations for the B.A. & Sc. (see University Regulations and Information > Course Load).
- Courses taught through distance education may not be used to complete program requirements, except on an individual basis when serious, documented circumstances warrant it. In such cases, prior approval must be obtained from your program adviser and the Director of Advising Services, Science.

4.6.6.4 Courses in English as a Second Language (ESL)

ESL courses are only open to students whose primary language is not English and who have studied for fewer than five years in English-language secondary institutions. As a student in the B.A. & Sc., you may take a maximum of 12 credits, including academic writing courses for non-anglophones, from the list of ESL courses published at www.mcgill.ca/science/student/continuingstudents/basc/content.

4.6.6.5 Registration for First-Year Seminars

Registration for First-Year Seminars is limited to students in their first year of study at McGill, i.e., newly admitted students in U0 or U1. These courses are designed to provide a closer interaction with professors and better working relations with peers than is available in large introductory courses. These seminars endeavour to teach the latest scholarly developments and expose participants to advanced research methods. Registration is on a first-come, first-served basis. The maximum number of students in any seminar is 25, although some are limited to even fewer than that.

You may take only one First-Year Seminar during your first year at McGill. If you register for more than one, you will be obliged to withdraw from all but one of them.

A list of First-Year Seminars is available in the Arts section (see Faculty of Arts > First-Year Seminar Courses) and the Science section (see Faculty of Science > Registration for First-Year Seminars) of this publication.

4.7 Advising

If you need 96 or fewer credits to complete your degree requirements, you must consult an academic adviser in your proposed department of study to obtain advice and approval of your course selection (please see Departmental Programs). To facilitate program planning, you must present your transcript(s) and letter of admission. If you have not fulfilled the B.A. & Sc. Freshman Program requirements, you should also seek advice from an adviser in the Science Office for Undergraduate Student Advising (SOUSA). For a detailed description of advising and registration procedures, you should refer to University Regulations and Information > Registration, to University Regulations and Information > Undergraduate Advising, and to the website for newly admitted undergraduate students at www.mcgill.ca/newstudents, as well as to the information posted on the SOUSA website at www.mcgill.ca/science/sousa, and the departmental websites.

If you need 97-120 credits to complete your degree requirements, you will normally be registered in a Freshman program until you complete your first year. You must consult an adviser in the Science Office for Undergraduate Student Advising (SOUSA) to obtain advice and approval of your course selection.

For a detailed description of advising and registration procedures, you should refer to the website for newly admitted undergraduate students at www.mcgill.ca/newstudents, and to the information on the SOUSA website, www.mcgill.ca/science/sousa.

Advising for all returning students takes place in March for the upcoming academic year. For more information, you should refer to the SOUSA website, www.mcgill.ca/science/sousa.

4.7.1 Choosing a B.A. & Sc. Program

The B.A. & Sc. is intended for students with well-defined interdisciplinary interests. There are several options for the main program, all of which specify 75-80 of the 90 credits, leaving only 10-15 credits for electives. Since there are relatively few electives, students entering a program in the B.A. & Sc. degree should have a clear idea of their objectives, goals, and intended areas of study, so that they can plan their curriculum carefully.

It should be noted that there also exists considerable flexibility within the B.A. (Faculty of Arts) and B.Sc. (Faculty of Science) programs. If you are more interested in Arts, but would like to study some Science, you can do so within the B.A. degree. Similarly, if you are more interested in Science, but would like to study some Arts, you can do so within the B.Sc. degree. For example, B.Sc. students may complete minor concentrations in Arts and vice versa.

There are four ways to complete programs in the B.A. & Sc. degree:

**Multi-track System**

The multi-track system is intended for students who want a program that includes significant components from both Arts and from Science.

You complete 36 credits of Arts, 36-38 credits of Science, and 3 credits of integrative courses. You can either combine an Arts major concentration with a Science major concentration (36-38 credits) or you can select a major concentration from one faculty and two 18-credit minor concentrations from the other. Additional guidelines for the multi-track system can be found in section 4.6.5: Departmental Programs. You will find the program descriptions for the major and minor concentrations in Science which are unique to the B.A. & Sc. within this section of this publication.

Descriptions of programs offered in Arts are located under the Faculty of Arts section of this publication.
Interfaculty Programs

Interfaculty programs are interdisciplinary in nature. There are currently three such programs: Environment, Cognitive Science as well as Sustainability, Science and Society. In these programs, you complete 54 credits of the Interfaculty program, a minor of 18 credits, and 3 credits of integrative courses. You must complete at least 30 credits in the Faculty of Arts and at least 30 credits in the Faculty of Science as part of your interfaculty program and your minor concentration or program.

Environment

The growth of technology, globalization of economies, and rapid increases in population and per capita consumption have all had dramatic environmental impacts. The Faculty Program in Environment for the Bachelor of Arts and Science is designed to provide students with a broad “Liberal Arts/Science” training. In combination with careful mentoring, this program offers a great degree of flexibility, allowing students to develop the skills and knowledge base required to face the myriad of environmental problems that currently need to be addressed. Further information about Environment programs and academic advising can be found at www.mcgill.ca/nse.

Cognitive Science

The Interfaculty program in Cognitive Science offered within the B.A. & Sc. degree is the only major program currently offered at McGill for students interested in this discipline. The requirements encourage you to choose courses in two of the five subject areas in Cognitive Science (Computer Science, Linguistics, Neuroscience, Philosophy, Psychology) as the focus of your program. In addition, if you are interested in research in this field, you may include up to 12 credits of research courses within your program. Further information can be found at www.mcgill.ca/cogsci.

Sustainability, Science and Society

Food security, access to clean water, poverty, climate change, biodiversity loss, sustainable energy production -- a long list of challenges face human societies in the 21st century. In the face of these multiple challenges, the grand imperative of the 21st century is Sustainable Well-being -- in other words, how can we provide for a world population that could stabilize at 9-10 billion, while also maintaining the Earth’s life support systems. Find out more about this interdisciplinary program on the website www.geog.mcgill.ca/sss/index.html.

Joint Honours

The Joint Honours option is similar to the multi-track system except that you complete two joint honours components, one in Arts and one in Science. Currently, the choice of Science component is restricted to either Math or Psychology. However, there is a great range of choices for the Arts component.

To choose the Joint Honours option, you must meet the GPA/CGPA requirements set out in University Regulations and Information > Graduation Honours: Honours and First-Class Honours.

Honours

There are two B.A. & Sc. Honours programs. The Honours program in Environment is similar to the Interfaculty program in Environment but has additional GPA requirements and an additional 6-credit required research course. Likewise, the Honours program in Cognitive Science is similar to the Interfaculty program in Cognitive Science with additional GPA requirements and an additional 6-credit research course requirement. If you are completing an honours program, you must also complete a minor concentration or program, and 6 credits of integrative courses. You must complete at least 30 credits in the Faculty of Arts and at least 30 credits in the Faculty of Science as part of your honours program and your minor concentration or program.

To choose the Honours option, you must meet the GPA/CGPA requirements set out in University Regulations and Information > Graduation Honours: Honours and First-Class Honours.

4.7.2 Preparation for Graduate School

Any choice of undergraduate degree and program constrains options for graduate school. The B.A. & Sc. provides good preparation for graduate degrees in integrated disciplines such as Cognitive or Environmental Science as well as in the new Sustainability, Science and Society program. Depending on the Arts or Science specific program you want to enter in graduate school, the B.A. & Sc. may or may not be adequate preparation. If you intend to pursue an Arts or Science specific program at the graduate level, you should consult academic advisors in that discipline at McGill and at universities where you intend to apply in order to find out whether the B.A. & Sc. will prepare you adequately. If you are considering continuing on in a specific Science graduate program, you should examine the difference between the preparation provided by the 36-credit major concentrations in the B.A. & Sc. program versus the significantly more specialized major and honours programs offered in the B.Sc. programs.

4.8 Freshman Interest Groups

Freshman Interest Groups (FIGs) are groups of approximately 15 U0 students in the B.Sc. or B.A. & Sc., led by a professor in the Faculty of Science or Faculty of Medicine and an upper-year undergraduate student. They meet once every two weeks in the Fall semester to discuss a wide range of topics, such as science in the news, program choices, undergraduate research opportunities, or just aspects of life in Montreal. The purpose of a FIG is to ease the transition to McGill and Montreal and to provide you an opportunity to interact with a professor and with other U0 students in a small group. FIGs carry no credit and there is no charge. For more information and to see how to register refer to www.mcgill.ca/science/student/fig.
4.9 Examinations

You should see University Regulations and Resources > Examinations: General Information for information about final examinations and deferred examinations.

The exam schedules are posted on the McGill website, www.mcgill.ca/students/exams, normally one month after the start of classes for the tentative Examination Schedule, and two months after the start of classes for the final Examination Schedule.

Students are warned not to make travel arrangements to leave Montreal prior to the scheduled end of any examination period.

4.10 Overview of Programs Offered

- Major Concentrations; see section 4.10.1: Major Concentrations
- Interfaculty Programs; see section 4.10.2: Interfaculty Programs
- Honours Programs; see section 4.10.3: Honours Programs
- Joint Honours Programs; see section 4.10.4: Joint Honours Programs
- Minor Concentrations or Minors; see section 4.10.5: Minor Concentrations or Minors
- Integrative Courses; see section 4.10.6: Integrative Courses

4.10.1 Major Concentrations

4.10.1.1 Faculty of Arts

The Arts major concentrations available to B.A. & Sc. students are listed here and are described in detail under the Faculty of Arts section of this publication. Since the B.A. & Sc. degree requires a certain number of credits in the Arts and in the Sciences, there are special requirements for B.A. & Sc. students. To be counted as an Arts major concentration, the program must include at least 30 credits of Arts courses. Similarly, to be counted as a Science major concentration, the program must include at least 30 credits of Science courses.

For example, a student completing the 36-credit African Studies Major concentration in Arts must complete at least 30 of those credits in Arts courses and at most 6 credits in Science courses.

- African Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration African Studies (36 credits)
- Anthropology; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Anthropology (36 credits)
- Art History; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Art History (36 credits)
- Canadian Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Canadian Studies (36 credits)
- Classics; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Classics (36 credits)
- East Asian Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration East Asian Studies (36 credits)
- Economics; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Economics (36 credits)
- English – Cultural Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration English – Cultural Studies (36 credits)
- English – Drama and Theatre; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration English – Drama and Theatre (36 credits)
- English – Literature; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration English – Literature (36 credits)
- Geography; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Geography (36 credits)
- Geography (Urban Systems); see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Geography - Urban Systems (36 credits)
- German Language and Literature; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration German Studies - Language and Literature (36 credits)
- German Literature and Culture; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration German Studies - Literature and Culture (36 credits)
- German Studies, Contemporary; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Contemporary German Studies (36 credits)
- Hispanic Languages; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Hispanic Studies - Languages (36 credits)
- Hispanic Literature and Culture; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Hispanic Studies - Literature and Culture (36 credits)
- History; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration History (36 credits)
International Development Studies; see Faculty of Arts > Bachelor of Arts (B.A. - Major Concentration International Development Studies (36 credits)

Italian Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Italian Studies (36 credits)

Jewish Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Jewish Studies (36 credits)

Langue et littérature françaises – Études et pratiques littéraires; see Faculty of Arts > Bachelor of Arts (B.A.) - Concentration majeure langue et littérature françaises - Études et pratiques littéraires (36 crédits)

Langue et littérature françaises – Traduction; see Faculty of Arts > Bachelor of Arts (B.A.) - Concentration majeure langue et littérature françaises - Traduction (36 crédits)

Latin-American Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Latin-American Studies (36 credits)

Linguistics; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Linguistics (36 credits)

Middle East Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Middle East Studies (36 credits)

North American Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration North American Studies (36 credits)

Philosophy; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Philosophy (36 credits)

Philosophy and Western Religions; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Philosophy and Western Religions (36 credits)

Political Science; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Political Science (36 credits)

Quebec Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Quebec Studies / La concentration Majeure en Études sur le Québec (36 crédits)

Russian; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Russian (36 credits)

Scriptures and Interpretations; see Faculty of Arts > Religious Studies (RELG) > Bachelor of Arts (B.A.) - Major Concentration Scriptures and Interpretations (36 credits)

Sociology; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Sociology (36 credits)

Women's Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Women's Studies (36 credits)

World Religions; see Faculty of Arts > Religious Studies (RELG) > Bachelor of Arts (B.A.) - Major Concentration World Religions (36 credits)

4.10.2 Faculty of Science

The Science major concentrations available to B.A. & Sc. students are listed here and are described in detail either below under the Bachelor of Arts & Science (AS) section or under the Faculty of Arts (A) section of this publication as indicated.

Biology – Cell/Molecular Option (AS); see Bachelor of Arts & Science > Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Biology – Cell/Molecular (36 credits)

Biology – Organismal Option (AS); see Bachelor of Arts & Science > Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Biology – Organismal (37 credits)

Chemistry (AS); see Bachelor of Arts & Science > Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Chemistry (36 credits)

Computer Science (A); see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration in Computer Science (36 credits)

Earth, Atmosphere and Ocean Sciences (AS); see Bachelor of Arts & Science > Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Earth, Atmosphere and Ocean Science (36 credits)

Geography – Physical Geography Option (AS); see Bachelor of Arts & Science > Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Geography – Physical Geography (36 credits)

Mathematics (A); see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Mathematics (36 credits)

Physics (AS); see Bachelor of Arts & Science > Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Physics (36 credits)

Psychology (A); see Faculty of Arts > Bachelor of Arts (B.A.) - Major Concentration Psychology (36 credits)

Software Engineering (AS); see Bachelor of Arts & Science > Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration in Software Engineering (37 credits)

4.10.2 Interfaculty Programs

The Interfaculty programs available to B.A. & Sc. students are listed here and are described in detail either under the Bachelor of Arts & Science (AS) section or under the McGill School of Environment (E) section of this publication as indicated.
4.10.3 Honours Programs

There are two Honours programs available to B.A. & Sc. students:

- The Honours Program in Environment is described in detail in this publication under McGill School of Environment > Honours Program in Environment.
- The Honours Program in Cognitive Science is described in detail in section 4.11.5: Cognitive Science.

Students interested in an Honours degree should also consider the Joint Honours programs; see section 4.10.4: Joint Honours Programs.

4.10.4 Joint Honours Programs

Joint Honours programs in the B.A. & Sc. are created by combining a Joint Honours program component from an Arts discipline with one from a Science discipline. Students must register for both Joint Honours program components. Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

4.10.4.1 Faculty of Arts

The Arts Joint Honours components available to B.A. & Sc. students are listed here and are described in detail under the Faculty of Arts section of this publication.

Anthropology; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Anthropology (36 credits)

Art History; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Art History (36 credits)

Canadian Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Canadian Studies (36 credits)

Classics; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Classics (36 credits)

East Asian Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component East Asian Studies (36 credits)

Economics; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Economics (30 credits)

English – Drama and Theatre; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component English – Drama and Theatre (36 credits)

English – Literature; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component English – Literature (36 credits)

Geography; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Geography (36 credits)

German Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component German (36 credits)

Hispanic Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Hispanic Studies (36 credits)

History; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component History (36 credits)

International Development Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component International Development Studies (36 credits)

Italian Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Italian Studies (36 credits)

Jewish Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Jewish Studies (36 credits)

Langue et littérature françaises – Études et pratiques littéraires; see Faculty of Arts > Bachelor of Arts (B.A.) - Double Spécialisation en langue et littérature françaises - Études et pratiques littéraires (36 credits)

Langue et littérature françaises – Traduction; see Faculty of Arts > Bachelor of Arts (B.A.) - Double Spécialisation en langue et littérature françaises - Traduction (36 credits)

Linguistics; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Linguistics (36 credits)

Middle East Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Middle East Studies (36 credits)

Philosophy; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Philosophy (36 credits)
Philosophy and Western Religions; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Philosophy and Western Religions (36 credits)

Political Science; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Political Science (36 credits)

Religious Studies - Asian Religions; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Religious Studies - Asian Religions (36 credits)

Religious Studies - Western Religions; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Religious Studies - Western Religions (36 credits)

Russian; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Russian (36 credits)

Sociology; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Sociology (36 credits)

Women's Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Women's Studies (36 credits)

4.10.4.2 Faculty of Science

There are currently only two Science Joint Honours components available to B.A. & Sc. students, which are listed here and are described in detail under the Faculty of Arts section of this publication.

Mathematics; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Mathematics (36 credits)

Psychology; see Faculty of Arts > Bachelor of Arts (B.A.) - Joint Honours Component Psychology (36 credits)

4.10.5 Minor Concentrations or Minors

4.10.5.1 Faculty of Arts

The Arts minor concentrations available to B.A. & Sc. students are listed here and are described in detail under the Faculty of Arts section of this publication. Since the B.A. & Sc. degree requires a certain number of credits in the Arts and in the Sciences, there are special requirements for B.A. & Sc. students. To be counted as an Arts minor or minor concentration, the program must include at least 15 credits of Arts courses. Similarly, to be counted as a Science minor or minor concentration, the program must include at least 15 credits of Science courses.

For example, a student completing the 18-credit African Studies Minor Concentration in Arts must complete at least 15 of those credits in Arts courses and at most 3 credits in Science courses. As another example, a student completing a 24-credit Science Minor in Interdisciplinary Life Sciences must complete at least 15 credits in Science courses and at most 9 credits in Arts courses.

African Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration African Studies (18 credits)

Anthropology; see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration Anthropology (18 credits)

Art History; see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration Art History (18 credits)

Canadian Ethnic and Racial Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration Canadian Ethnic and Racial Studies (18 credits)

Canadian Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration Canadian Studies (18 credits)

Catholic Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration Catholic Studies (18 credits)

Classics; see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration Classics (18 credits)

Communication Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration Communication Studies (18 credits)

Comparative Politics; see Faculty of Arts > Political Science (POLI) > Bachelor of Arts (B.A.) - Minor Concentration Comparative Politics (18 credits)

East Asian Language and Literature; see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration East Asian Language and Literature (18 credits)

East Asian Cultural Studies; see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration East Asian Cultural Studies (18 credits)

East Asian Studies, Supplementary; see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration Advanced East Asian Studies (18 credits)

4.10.5.2 Faculty of Science

The Science minors (M) or minor concentrations (MC) available to B.A. & Sc. students are listed here and are described in detail either under the Faculty of Science (S), Faculty of Arts (A), Bachelor of Arts & Science (AS), or McGill School of Environment (E) section of this publication as indicated.

Atmospheric Science (M-S); see Faculty of Science > Bachelor of Science (B.Sc.) - Minor Atmospheric Science (18 credits)

Biology – Cell/Molecular (MC-AS); see Bachelor of Arts & Science > Bachelor of Arts and Science (B.A. & Sc.) - Minor Concentration Biology - Cell/Molecular (19 credits)

Biology – Organismal (MC-AS); see Bachelor of Arts & Science > Bachelor of Arts and Science (B.A. & Sc.) - Minor Concentration Biology - Organismal (19 credits)

Chemistry (M-S); see Faculty of Science > Bachelor of Science (B.Sc.) - Minor Chemistry (18 credits)

Computer Science (MC-A); see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration in Computer Science (18 credits)

Environment (M-E); see McGill School of Environment > Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) - Minor Environment (18 credits)

Geographic Information Systems (M-S); see Faculty of Science > Bachelor of Science (B.Sc.) - Minor Geographic Information Systems (18 credits)

Geography (M-S); see Faculty of Science > Bachelor of Science (B.Sc.) - Minor Geography (18 credits)

Geology (M-S); see Faculty of Science > Bachelor of Science (B.Sc.) - Minor Geology (18 credits) (previously named Earth and Planetary Sciences)

Interdisciplinary Life Sciences (M-S); see Faculty of Science > Bachelor of Science (B.Sc.) - Minor Interdisciplinary Life Sciences (24 credits)

Mathematics (MC-A); see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration Mathematics (18 credits)

Physics (M-S); see Faculty of Science > Bachelor of Science (B.Sc.) - Minor Physics (18 credits)

Psychology (MC-A); see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration Psychology (18 credits)

Statistics (MC-A see Mathematics & Statistics); see Faculty of Arts > Bachelor of Arts (B.A.) - Minor Concentration Statistics (18 credits)

4.10.6 Integrative Courses

4.10.6.1 Complementary Integrative Courses

Students in the B.A. & Sc. are required to complete at least one integrative course (at least 3 credits), possibly within one of their programs, chosen from the following list:

ANTh 201 (3) Prehistoric Archaeology
ANTh 203 (3) Human Evolution
ANTh 208 (3) Evolutionary Anthropology
ANTh 227 (3) Medical Anthropology
ANTh 302 (3) New Horizons in Medical Anthropology
ANTh 311 (3) Primate Behaviour and Ecology
ANTh 312 (3) Zooarchaeology
ANTh 411 (3) Primate Studies & Conservation
ANTh 418 (3) Environment and Development
ANTh 423 (3) Mind, Brain and Psychopathology
ANTh 443 (3) Medical Anthropological Theory
ANTh 511 (3) Computational Approaches to Prehistory
BASc 201 (3) Arts & Science Integrative Topics
BASc 396 (3) Undergraduate Research Project

As a substitute, students can fulfill the requirement for a complementary integrative course by conducting library or empirical research that integrates the components of their program as a 3- or 6-credit independent study course, thesis course, or research course, with approval of the Director of Advising Services, Science.

4.11 Academic Programs

The B.A. & Sc. is an interdisciplinary degree intended for students who want to pursue simultaneously a program offered by Arts and one offered by Science. The overall objective is to provide a broad, liberal education spanning substantive areas in the two faculties so that students can learn diverse content and varied methods of inquiry.

4.11.1 Programs in Arts or in Science

All B.A. & Sc. Arts programs are described in detail under the Faculty of Arts section of this publication. B.A. & Sc. Science programs that are open to B.A. students (i.e., programs in Computer Science, Mathematics and Statistics, and Psychology as well as some in Geography) are described under the Faculty of Arts section. Science Minors that are open to B.A. & Sc. students are described under the Faculty of Science section. B.A. & Sc. Science programs that are open only to B.A. & Sc. students are described under Bachelor of Arts and Science.

For information about where each B.A. & Sc. program is listed, see section 4.10: Overview of Programs Offered.

4.11.2 Biology (BIOL)

The Department of Biology, the discipline, and specific courses are described under the Faculty of Science section of this publication.

The minimum freshman science requirements in the B.A. & Sc. may not satisfy the introductory science requirements of all medical/dental schools. Please see your departmental adviser for more information.

4.11.2.1 Bachelor of Arts and Science (B.A. & Sc.) - Minor Concentration Biology - Cell/Molecular (19 credits)

The Minor Concentration Biology - Cell/Molecular, is restricted to students in the B.A. & Sc. It is a sequence of courses designed to yield a broad introduction to cell/molecular biology.

Advising Note: Students interested in a Biology minor concentration must choose either the Cell/Molecular option or the Organismal option, but may not take both. Students interested in a more in-depth program in Biology should consider the Major concentration.

Students may complete this program with a minimum of 18 credits or a maximum of 19 credits depending if they are exempt from taking CHEM 212 and their choice of complementary courses.

Required Courses* (13 credits)

* Required courses taken at CEGEP or elsewhere that are not credited toward the B.A. & Sc. must be replaced by approved complementary courses. Regardless of the substitution, students must take at least 18 credits in this program.

** Students who have already taken CHEM 212 or its equivalent will choose another appropriate complementary course, to be approved by the Adviser.

Complementary Courses (6 credits)

Any 6 credits of biology courses at the 300 level or higher approved by the Adviser.
Bachelor of Arts and Science (B.A. & Sc.) - Minor Concentration Biology - Organismal (19 credits)

The Minor Concentration Biology - Organismal, is restricted to students in the B.A. & Sc. It is a sequence of courses designed to yield a broad introduction to organismal biology.

Advising Note: Students interested in a Biology minor concentration must choose either the Cell/Molecular option or the Organismal option, but may not take both. Students interested in a more in-depth program in Biology should consider the Major concentration.

Students may complete this program with a minimum of 18 credits or a maximum of 19 credits depending if they are exempt from taking CHEM 212 and their choice of complementary course.

Required Courses* (16 credits)

* Required courses taken at CEGEP or elsewhere that are not credited toward the B.A. & Sc. must be replaced by approved complementary courses. Regardless of the substitution, students must take at least 18 credits in this program.

** Students who have already taken CHEM 212 or its equivalent will choose another appropriate complementary course, to be approved by the adviser.

- BIOL 200 (3) Molecular Biology
- BIOL 201 (3) Cell Biology and Metabolism
- BIOL 205 (3) Biology of Organisms
- BIOL 215 (3) Introduction to Ecology and Evolution
- CHEM 212** (4) Introductory Organic Chemistry 1

Complementary Course (3 credits)

Any 3-credit biology course at the 300 level or higher approved by the adviser.

Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Biology - Cell/Molecular (36 credits)

Revision, August 2011. Start of revision.

The Major Concentration Biology - Cell/Molecular is a planned sequence of courses designed to permit a degree of specialization in cell/molecular biology.

Advising Note: Freshman students should be aware that PHYS 101 and/or PHYS 102 are required for some of the courses in the major and minor concentrations in Biology.

Required Courses* (29 credits)

* Required courses taken at CEGEP or elsewhere that are not credited toward the B.A. & Sc. or B.Sc./B.Ed. must be replaced by 3-credit courses from the Complementary Courses list. Regardless of the substitution, students must take at least 36 credits in this program.

** Students who have already taken CHEM 212 or its equivalent will choose another appropriate complementary course, to be approved by the Adviser.

- BIOL 200 (3) Molecular Biology
- BIOL 201 (3) Cell Biology and Metabolism
- BIOL 202 (3) Basic Genetics
- BIOL 205 (3) Biology of Organisms
- BIOL 215 (3) Introduction to Ecology and Evolution
- BIOL 300 (3) Molecular Biology of the Gene
- BIOL 301 (4) Cell and Molecular Laboratory
- BIOL 303 (3) Developmental Biology
- CHEM 212** (4) Introductory Organic Chemistry 1

Complementary Courses (7 credits)

at least 7 credits selected from:

- BIOL 306 (3) Neural Basis of Behaviour
- BIOL 313 (3) Eukaryotic Cell Biology
- BIOL 314 (3) Molecular Biology of Oncogenes
The Major Concentration Biology - Organismal is a planned sequence of courses designed to permit a degree of specialization in organismal biology. Students may complete this program with a minimum of 36 credits or a maximum of 37 credits depending if they have already taken CHEM 212 or its equivalent, and on their choice of complementary courses.

Advising Note: Freshman students should be aware that PHYS 101 and/or PHYS 102 are required for some of the courses in the major and minor concentrations in Biology.

**Required Courses\(^*\) (28 credits)**

* Required courses taken at CEGEP or elsewhere that are not credited toward the B.A. & Sc. or B.Sc./B.Ed. must be replaced by 3-credit courses from the Complementary Courses list. Regardless of the substitution, students must take at least 36 credits in this program.

** Students who have already taken CHEM 212 or its equivalent will choose another appropriate complementary course, to be approved by the Adviser.

or other appropriate course at the 300 level or higher with permission of the Adviser.

Revision, August 2011. End of revision.

4.11.3 Biomedical Sciences

4.11.3.1 Location

Program Adviser:
Ms. Sonia Viselli
Student Affairs Officer, Department of Physiology
McIntyre Medical Sciences Building, Room 1022
3655 Promenade Sir-William-Osler
Montreal, Quebec H3G 1Y6

Telephone: 514-398-3689
Email: sonia.viselli@mcgill.ca

4.11.3.2 About Biomedical Sciences

The Major Concentration in Biomedical Sciences has been retired. Students completing the program should refer to the Calendar (www.mcgill.ca/students/courses/calendars) at their time of entrance to the program for the program requirements and consult with their academic adviser.

4.11.4 Chemistry (CHEM)

The Department of Chemistry, the discipline, and specific courses are described under the Faculty of Science section of this publication.

The Major Concentration Chemistry is not certified by the Ordre des Chimistes du Québec. Students interested in pursuing a career in Chemistry in Quebec are advised to take an appropriate B.Sc. program in Chemistry. The minimum freshman science requirements in the B.A. & Sc. may not satisfy the introductory science requirements of all medical/dental schools (see section 4.6.4: Bachelor of Arts and Science (B.A. & Sc.) - Freshman Program (30 credits)).

4.11.4.1 Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Chemistry (36 credits)

The Major Concentration Chemistry is not certified by the Ordre des Chimistes du Québec. Students interested in pursuing a career in Chemistry in Quebec are advised to take an appropriate B.Sc. program in Chemistry.

The Major Concentration Chemistry, which is restricted to students in the B.A. & Sc. or B.Sc./B.Ed., is a planned sequence of courses designed to permit a degree of specialization in this discipline.

Required Courses* (18 credits)

* Required courses taken at CEGEP or elsewhere that are not credited toward the B.A. & Sc. or B.Sc./B.Ed. must be replaced by courses from the Complementary Course List equal to or exceeding their credit value. Regardless of the substitution, students must take at least 36 credits in this program.

CHEM 203 (3) Survey of Physical Chemistry
CHEM 212 (4) Introductory Organic Chemistry 1
CHEM 222 (4) Introductory Organic Chemistry 2
CHEM 253 (1) Introductory Physical Chemistry 1 Laboratory
CHEM 281 (3) Inorganic Chemistry 1
CHEM 287 (2) Introductory Analytical Chemistry
CHEM 297 (1) Introductory Analytical Chemistry Laboratory

Complementary Courses (18 credits)

18 credits selected from:
Cognitive Science

About Cognitive Science

Cognitive Science is the multidisciplinary study of cognition in humans and machines. The goal is to understand the principles of intelligence and thought with the hope that this will lead to a better understanding of the mind and of learning, and to the development of intelligent devices that constructively extend human abilities.

An Interfaculty Program in Cognitive Science (54 credits) is offered by the following departments:

Computer Science (COMP) (Science)
Linguistics (LING) (Arts)
Philosophy (PHIL) (Arts)
Psychology (PSYC) (Science)

Cognitive Science Committee Members:

Brendan Gillon (Linguistics)
Stephen McAdams (Music)
Doina Precup (Computer Science)
David Ragsdale (Neuroscience)
Debra Titone (Psychology)

Please note: New students are required to attend an information session held at the end of August. Please consult the cognitive science website in early August for the date and location.
4.11.5.3 Bachelor of Arts and Science (B.A. & Sc.) - Interfaculty Program Cognitive Science (54 credits)

The Interfaculty Program Cognitive Science, which is restricted to students in the B.A. & Sc., is a planned sequence of courses designed to permit students to focus on at least two relevant areas of study.

Note: B.A. & Sc. students who take interfaculty programs must take at least 30 credits in Arts and 30 credits in Science across their interfaculty program and their minor or minor concentration.

**Required Course (3 credits)**

PSYC 532  (3)  Cognitive Science

**Complementary Courses (51 credits)**

Credits are selected as follows:

3 credits from the following:

- COMP 230  (3)  Logic and Computability
- MATH 318  (3)  Mathematical Logic
- PHIL 210  (3)  Introduction to Deductive Logic 1

18 credits from List A in one of the following five units: Computer Science, Linguistics, Neuroscience, Philosophy, or Psychology.

12 credits from List A in one of the four remaining units.

18 credits chosen from Lists A and/or B in Computer Science, Linguistics, Neuroscience, Philosophy, Psychology and/or Research Courses of which at least 12 credits must be at the 400 level or higher.

Note 1: Students are responsible for ensuring that they meet all pre- and corequisites for all their courses.

Note 2: With the permission of the Director of the Cognitive Science program, students may be able to substitute up to 6 credits in cognate departments, such as Anatomy and Cell Biology, Biology, Neurology, or Physiology. For further information, consult the Cognitive Science website: http://www.mcgill.ca/cogsci.

**Computer Science**

**4.11.5.4 Bachelor of Arts and Science (B.A. & Sc.) - Honours Cognitive Science (60 credits)**

The Honours Cognitive Science, which is restricted to students in the B.A. & Sc., is an extension of the Interfaculty program and offers students an opportunity to undertake a research project in close association with professors in their main Arts and Science focus areas. Prior to selecting the Honours program, students should meet with the Interdisciplinary Program Adviser and review the B.A. & Sc. academic requirements for Honours and First Class Honours, which can also be found under "University Regulations and Information", "Graduation" and "Graduation Honours".
To receive an Honours degree, students are required to achieve a minimum overall program GPA of 3.3 at graduation, and attain a grade of B+ (3.3) or better in COGS 444. Students must complete both the 60 credit Honours program, plus an approved minor concentration or a minor in the Faculties of Arts or of Science.

Note: B.A. & Sc. students who take interfaculty programs, including the Honours in Cognitive Science, must take at least 30 credits in Arts and 30 in Science across their interfaculty program and their minor or minor concentration.

**Required Courses (9 credits)**

**Complementary Courses (51 credits)**

Credits are selected as follows:

- 3 credits, one of:
  - COMP 230 (3) Logic and Computability
  - MATH 318 (3) Mathematical Logic
  - PHIL 210 (3) Introduction to Deductive Logic 1

- 18 credits from List A in one of Computer Science, Linguistics, Neuroscience, Philosophy, or Psychology.
- 12 credits from List A in one of the four remaining units.
- 18 credits chosen from Lists A and/or B in Computer Science, Linguistics, Neuroscience, Philosophy, Psychology and/or Research Courses of which at least 12 credits must be at the 400 level or higher.

Note 1: Students are responsible for ensuring that they meet all pre- and corequisites for all their courses.

Note 2: With the permission of the Director of the Cognitive Science program, students may be able to substitute courses in cognate departments, such as Anatomy and Cell Biology, Biology, Neurology, or Physiology. For further information, consult the Cognitive Science website: http://www.mcgill.ca/cogsci.

### 4.11.6 Computer Science

The School of Computer Science and the discipline are described under Faculty of Science > Computer Science (COMP).

The following are considered Science programs in the B.A. & Sc.:

- Minor Concentration in Computer Science
- Major Concentration in Computer Science
- Major Concentration in Software Engineering

The requirements of the Software Engineering program are described under the Bachelor of Arts and Science section while the requirements of the Computer Science programs are described under Faculty of Arts > Computer Science (COMP).
4.11.6.1 Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Software Engineering (37 credits)

This Major concentration provides a program of study that covers the subject commonly known as "Software Engineering". This program may be used to satisfy part of the requirements for a B.A. & Sc. degree. This program does not lead to certification as a Professional Engineer.

Students may complete this program with a minimum of 36 credits or a maximum of 37 credits depending on their choice of complementary courses.

Required Courses (30 credits)

* Students who have sufficient knowledge in a programming language do not need to take COMP 202 and can replace it with additional computer science complementary course credits.

4.11.7 Earth, Atmosphere and Ocean Sciences

The following departments jointly offer a B.A. & Sc. program:

- Atmospheric and Oceanic Sciences (ATOC)
- Earth and Planetary Sciences (EPSC)

The departments, the disciplines, and specific courses are described in their respective sections under Faculty of Science.

4.11.7.1 Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Earth, Atmosphere and Ocean Sciences (36 credits)

The Major Concentration Earth, Atmosphere and Ocean Sciences, which is restricted to students in the B.A. & Sc., is a sequence of courses designed to permit a degree of specialization in these disciplines.

Required Courses (18 credits)

EPSC 210 (3) Introductory Mineralogy
EPSC 212 (3) Introductory Petrology

**Complementary Courses (18 credits)**
A minimum of 18 credits, at least 6 of which must be at the 300 level or higher, distributed as follows:

3 credits from:
- EPSC 201 (3) Understanding Planet Earth
- EPSC 233 (3) Earth and Life History

9 credits from:
- EPSC 203 (3) Structural Geology
- EPSC 220 (3) Principles of Geochemistry
- EPSC 231 (3) Field School 1
- EPSC 320 (3) Elementary Earth Physics
- EPSC 331 (3) Field School 2
- EPSC 341 (3) Field School 3
- EPSC 425 (3) Sediments to Sequences
- EPSC 455 (3) Sedimentary Geology
- EPSC 542 (3) Chemical Oceanography
- EPSC 549 (3) Hydrogeology

6 credits from:
- ATOC 219 (3) Introduction to Atmospheric Chemistry
- ATOC 412 (3) Atmospheric Dynamics
- GEOG 308 (3) Principles of Remote Sensing

---

**4.11.8 Environment**
The requirements for the B.A. & Sc. Interfaculty Program and the Honours Program in Environment are described in detail under McGill School of Environment. See McGill School of Environment > Bachelor of Arts and Science (B.A. & Sc.) - Interfaculty Program in Environment or see McGill School of Environment > Honours Program in Environment.

**4.11.9 Geography (GEOG)**
The Department of Geography, the discipline, and specific courses are described under the Faculty of Science section of this publication.

Note: students may take a Geography program either in Arts or in Science, but not in both.

The following are considered Arts programs in the B.A. & Sc. and are described under the Faculty of Arts section of this publication:
- Major Concentration in Geography
- Major Concentration in Geography (Urban Systems)
- Minor Concentration in Geography
- Minor Concentration in Geography (Urban Systems)

The following are considered Science programs in the B.A. & Sc. (Major Concentration) and are described either under the Bachelor of Arts and Science section or under the Faculty of Science section (Minors) of this publication:
Major Concentration in Geography (Physical Geography)
Minor in Geographical Information Systems
Minor in Geography

4.11.9.1 Bachelor of Arts and Science (B.A. & Sc.) – Interfaculty Program in Sustainability, Science and Society (54 credits)

Revision, August 2011. Start of revision.

The grand challenge of the 21st century is Sustainable Well-being; that is, to improve human well-being while maintaining the Earth's life-support systems. This B.A. & Sc. program provides the inter-disciplinary and integrative knowledge and skills required to effectively understand and address this challenge in its multiple dimensions - scientific-technological, socio-economic, political-institutional, ethical, and human behavioural - and to chart a transition to sustainability. It is built upon three pillars: 1) Science and Technology, to provide an in-depth understanding of the underpinnings of the problems of concern along these dimensions; 2) Economics, Policy, and Governance, to understand how we can make the Sustainability transition; and 3) Ethics, Equity, and Justice, to discuss why we need change, and the issues of equity and justice associated with taking action. This program is a partnership between Geography and the MSE and will be administered through Geography.

Required Courses (27 credits)

27 credits selected as follows:

Foundations of Sustainability

9 credits selected from Foundations of Sustainability as follows:

- ENVR 201 (3) Society, Environment and Sustainability
- GEOG 360 (3) Analyzing Sustainability
- GEOG 460 (3) Research in Sustainability

Biophysical, Societal, Cultural, Institutional, and Ethical

18 credits from introduction to biophysical, societal, cultural, institutional, and ethical dimensions of sustainability.

- ENVR 200 (3) The Global Environment
- ENVR 202 (3) The Evolving Earth
- ENVR 203 (3) Knowledge, Ethics and Environment
- GEOG 203 (3) Environmental Systems
- GEOG 310 (3) Development and Livelihoods
- MGPO 440 (3) Strategies for Sustainability

Complementary Courses (27 credits)

27 credits selected as follows:

- 3 credits of Statistics
- 3 credits of System Modelling tools
- 3 credits of Economics
- 18 credits selected from 3 areas

Statistics

3 credits of Statistics from the following:

- AEMA 310 (3) Statistical Methods 1
- BIOL 373 (3) Biometry
- GEOG 202 (3) Statistics and Spatial Analysis
- PSYC 204 (3) Introduction to Psychological Statistics

System Modelling

3 credits of System Modelling tools from the following:
ESYS 301 (3) Earth System Modelling
GEOG 501 (3) Modelling Environmental Systems

Economics
3 credits of Economics from the following:
AGEC 333 (3) Resource Economics
ECON 225 (3) Economics of the Environment
ECON 326 (3) Ecological Economics

18 additional credits of complementary courses chosen from 3 areas listed below:
Students must choose at least two courses from each area, and in total complete at least 9 credits at the 300 level or higher.

AREA 1: Methods: Observation, Analysis, Modelling, and Management
AGRI 435 (3) Soil and Water Quality Management
ENVB 437 (3) Assessing Environmental Impact
ENVR 544 (3) Environmental Measurement and Modelling
ESYS 500 (3) Earth System Applications
GEOG 201 (3) Introductory Geo-Information Science
GEOG 302 (3) Environmental Management 1
GEOG 306 (3) Raster Geo-Information Science
GEOG 308 (3) Principles of Remote Sensing
GEOG 351 (3) Quantitative Methods
GEOG 404 (3) Environmental Management 2
GEOG 509 (3) Qualitative Methods
GEOG 523 (3) Global Ecosystems and Climate
URBP 506 (3) Environmental Policy and Planning

AREA 2: Society, Economics, Policy, Ethics, and Equity
Take at least one course from each subsection (2A and 2B) below:

2A: Society, Economics, and Policy
Note:
* Students select either AGEC 200 or ECON 208, but not both.
** Students may select either AGEC 201 or ECON 209, but not both.
AGEC 200* (3) Principles of Microeconomics
AGEC 201** (3) Principles of Macroeconomics
AGEC 430 (3) Agriculture, Food and Resource Policy
AGEC 442 (3) Economics of International Agricultural Development
ANTH 206 (3) Environment and Culture
ANTH 212 (3) Anthropology of Development
ANTH 339 (3) Ecological Anthropology
ECON 208* (3) Microeconomic Analysis and Applications
ECON 209** (3) Macroeconomic Analysis and Applications

4.11.10  Mathematics

The requirements for the B.A. & Sc. Major Concentration in Mathematics are described in detail under Faculty of Arts > Mathematics and Statistics (MATH).

4.11.11  Physics (PHYS)

The Department of Physics, the discipline, and specific courses are described under the Faculty of Science section of this publication.

4.11.1.1  Bachelor of Arts and Science (B.A. & Sc.) - Major Concentration Physics (36 credits)

The Major Concentration Physics, which is restricted to students in the B.A. & Sc. or B.Sc./B.Ed., is a planned sequence of courses designed to permit a degree of specialization in this discipline. This program is insufficient to prepare a student for professional or graduate work in physics; students interested in pursuing a career in physics are advised to take the appropriate B.Sc. program in physics.

Required Courses* (30 credits)

* Required courses taken at CEGEP or elsewhere that are not credited toward the B.A. & Sc. or B.Sc./B.Ed. must be replaced by courses from the Complementary Course List.

MATH 222 (3)  Calculus 3
MATH 223 (3)  Linear Algebra
MATH 314 (3)  Advanced Calculus
MATH 315 (3)  Ordinary Differential Equations
PHYS 230 (3)  Dynamics of Simple Systems
PHYS 232 (3)  Heat and Waves
PHYS 257 (3)  Experimental Methods 1
PHYS 333 (3)  Thermal and Statistical Physics
PHYS 340 (3)  Majors Electricity and Magnetism
PHYS 446 (3)  Majors Quantum Physics

Complementary Courses (6 credits)

6 credits selected from:

PHYS 214 (3)  Introductory Astrophysics
PHYS 224 (3)  Physics of Music
or any 300- or 400-level course approved by an adviser.

4.11.12 Psychology

The requirements for the B.A. & Sc. Major Concentration in Psychology, Joint Honours Component in Psychology and Minor Concentration in Psychology are described in detail under Faculty of Arts > Psychology (PSYC).

5 Faculty of Education

5.1 About the Faculty

The Faculty serves approximately 2,000 students enrolled in undergraduate, graduate, and professional development programs. The Faculty is organized into three departments and the School of Information Studies. In addition, the Faculty has a number of research and service centres, including several of an interdisciplinary nature.

Like other faculties of education in Quebec and Canada, the Faculty has had a traditional role in the initial training of teachers and leaders in education-allied occupations. It is also concerned with constructing knowledge through research and scholarship, and with providing professional development services to the wider educational community.

In recent years, a number of links have been established with counterparts in other countries for teaching, research, and development purposes. Current active projects, some of which involve students as well as staff, include those in Japan, Indonesia, South Africa, and Mexico.

5.2 History

The Faculty of Education traces its beginnings back to 1857, when the McGill Normal School was established at McGill by agreement between the University and the Government of Quebec. In 1907, it was renamed the School for Teachers and was moved to Sainte-Anne-de-Bellevue, where it became part of Macdonald College. At this time also, the Macdonald Chair of Education was endowed at McGill University and a Department of Education was created in the Faculty of Arts and Science for the purpose of preparing candidates for the High School Diploma. The first graduate program was inaugurated in 1930, and in 1953, the University established the B.Ed. degree.

In 1955, the School for Teachers and the Department of Education were combined to become the Institute of Education within the Faculty of Arts and Science. To these was joined, in 1957, the McGill School of Physical Education (founded in 1912). The Institute was reconstituted as the Faculty of Education in 1965 and the work continued on both the McGill and Macdonald campuses. The St. Joseph Teachers College and the Faculty of Education were amalgamated in 1970 and relocated in a new building on the McGill campus. In 1996, the School of Information Studies became affiliated with the Faculty.

5.3 Faculty of Education Facilities

5.3.1 Education Library and Curriculum Resources Centre

The Education Library and Curriculum Resources Centre, located on the first floor of the Education Building, provides materials and services to support the teaching and research programs of the Faculty. The Library collection includes over 122,000 monograph volumes, 500 periodical titles, microforms, government publications, and access to a vast range of full-text electronic journals.

The Curriculum Resources Centre collection includes elementary and secondary school textbooks, teachers' resource guides, videos, DVDs, CDs, games, kits, puppets, big books, and equipment for viewing and listening. A Children's Literature Collection of fiction, non-fiction, poetry, folklore, and picture books is located on the left as you enter the Library.

Tours and instructional workshops are offered at the beginning of each term to individual students and to classes. These provide an introduction to library resources and information skills that will help in preparing course assignments and writing research papers. They cover topics such as searching the Library...

McGill University, Undergraduate Programs, Courses and University Regulations, 2011-2012 (Published August 17, 2011)
Catalogue (MUSE), finding course materials on reserve, and locating articles and other materials via databases such as ERIC; PsychINFO; Education Full Text, and others. EndNote workshops will provide help on how to easily create footnotes and reference lists for term papers.

The Education Library provides computers for student use, tables, and carrels to connect laptops, wireless access, as well as photocopiers, printers, and scanners. You may select to work in the quiet study area of the E-Zone, prefer group study in the Curriculum Resources Centre or in one of the two group study rooms, or just relax on a lounge chair in an informal seating area.

Lending Services for laptops, digital and video cameras, digital voice recorders, and tripods are now handled by the Education Library. These services are available during regular Library operating hours, as indicated on the Library’s website at www.mcgill.ca/library/library-using/branches/education-library.

Visit the Education Library website to learn more about library loans, hours, reserve readings, and links to important education sites. We look forward to seeing you in the Library.

Head Librarian: Sara Holder
Telephone: 514-398-4689
Website: www.mcgill.ca/education-library

5.3.2 Education Undergraduate Society (EDUS)

The Society is the undergraduate students’ voice of undergraduates within the Faculty and its primary purpose is to serve and to inform the students. It also attempts to unify students through sponsorship of activities such as career placement, student orientation, participation in teachers’ conventions, library donations, and the organization of an Education Career Fair. Other activities include the assignment of lockers for students, selling merchandise in the Spirit Store, the coordination of the Graduation Ball, as well as fundraising and events throughout the academic year. Students are encouraged to participate and to make their opinions known. The Society Office is located in Room B179 of the Education Building.

Telephone: 514-398-7048
Fax: 514-398-2476
Email: president.edus@mail.mcgill.ca
Website: www.mcgilledus.ca

5.3.3 Computer Facilities

The Faculty has a large computer complex located in Room 328 of the Education Building. It houses a lab with Windows computers, a second lab with Apple Macintosh computers, and a smaller work area with additional computers. Colour and black-and-white laser printing and scanning facilities are available. Consultants are available for help. This facility is available for courses, workshops, and individual use by Education students and staff.

Closed Sundays, holidays, and during August.

<table>

5.3.4 McGill Career Planning Service (CaPS)

Refer to University Regulations and Resources for further information on this service.

For Information, contact:

Career Adviser: Andrea Taylor
Telephone: 514-398-2484
Email: andrea.taylor@mcgill.ca
Website: www.mcgill.ca/edu-sao/careerplanningservices

5.3.5 McGill Journal of Education

The McGill Journal of Education is an open-access, online journal that is posted at least three times a year: Winter, Spring, and Fall. It includes work in English and French from local, national, and international sources. The Journal publishes peer-reviewed research articles, essays, reports from the field, and book reviews. It is concerned with major issues in education from a variety of perspectives, practical and theoretical, personal and collective. Its policy is to bring new ideas and research into a context open to teacher educators and scholars, as well as to parents, teachers, and administrators.

Editor: TBA
Assistant Editor: Dr. Annie Savard
5.3.6 A.S. Lamb Learning Centre

The A.S. Lamb Learning Centre, consisting of the Computer Laboratory, the multimedia unit, and the reading room, is located on the second floor of the Sir Arthur Currie Memorial Gymnasium. The computer lab houses 25 computers connected to the McGill network and is available for courses, workshops, and individual use by students and staff. Laser printing is also available at a cost. Access to the McGill wireless network is available for laptops equipped with a wireless card.

The multimedia unit features two iMac computers with "Final Cut" DV and HDV video editing software, one VHS & DVD recorder, and a Flatbed Duplex high-speed scanner. This facility is used for video editing, transfer of VHS, DV to DVD, and high-speed scanning.

LAN Tech.: Mr. Sanjeev Panigrahy
Location: McGill Sports Complex, Room 207A
475 Pine Avenue West
Website: www.mcgill.ca/edu-kpe/facilities/asllc

Hours
Monday to Friday 09:00 - 16:00

5.3.7 Evolution Education Research Centre (EERC)

Mission: “To advance the teaching and learning of biological evolution through research”. It opened its doors at McGill in 2001 with four McGill professors and four Harvard professors who have expertise in anthropology, biological evolution, educational psychology, geology, molecular biology, palaeontology, philosophy of science/education, and science education.

Director: Dr. Brian Alters
Manager: Jason Wiles
Office: Education Building, Room 355
Telephone: 514-398-5469

5.3.8 Office of Student Teaching (OST)

The Office of Student Teaching is responsible for the planning and implementation of field experiences and arranging with school boards and schools for the placement of student teachers in the Bachelor of Education programs. The Office coordinates student teaching among Departments within the Faculty, and develops partnerships with the education community. The Office offers training to colleagues in schools.

Office Hours
Monday to Friday 08:30 - 17:00

Director: Professor Fiona J. Benson
Office: Education Building, Room 431A
Telephone: 514-398-7046
Fax: 514-398-3179
Website: www.mcgill.ca/ost

5.3.9 Student Affairs Office (SAO)

The Student Affairs Office is responsible for student records and registration as well as general academic information and advice on undergraduate program and degree requirements, course change, withdrawal, supplemental and deferred exams, rereads, academic standing, inter-faculty transfer, readmission, study away, scholarships and awards, graduation, and teacher certification.

Special requests can be made, in writing, to Ronald Morris, Executive Director (Student Affairs).

5.5 About the Faculty of Education (Undergraduate)

5.5.1 Department of Integrated Studies in Education

The Department of Integrated Studies in Education offers undergraduate programs that are committed to the preparation of exceptional teachers for work in elementary and secondary schools. We have four-year Bachelor of Education programs for CEGEP graduates, and five-year programs for out-of-province students. In addition, we can accommodate students with completed or partly completed degrees in other disciplines.

- Bachelor of Education Kindergarten and Elementary Education
- Bachelor of Education Kindergarten and Elementary Education (Jewish Studies)
- Bachelor of Education Secondary Program
- Concurrent Bachelor of Science/Bachelor of Education (Secondary)
- Concurrent Bachelor of Music/Bachelor of Education in Music (Music Education)
- Bachelor of Education Teaching French as a Second Language – No admission for 2011-2012
- Bachelor of Education Teaching English as a Second Language

5.5.2 Department of Educational and Counselling Psychology

The Department of Educational and Counselling Psychology (ECP) is committed to the advancement of scientific knowledge through research and practice in education and psychology. ECP addresses cognition and development in typical and atypical populations across the lifespan. Broadly speaking, researchers examine issues pertaining to assessment and intervention; cognitive processes and developmental neuroscience; and the design and evaluation of learning environments and instructional practices.

The Department offers:

- Undergraduate Minor concentrations
- Teacher certification (online courses)

5.5.3 Department of Kinesiology and Physical Education

The mission of the Department of Kinesiology and Physical Education is to generate, advance, and disseminate knowledge about human health and physical activity, and to prepare professionals to engage in related employment.

- Bachelor of Education majoring in Physical and Health Education
- Bachelor of Science (Kinesiology) with Major General, Major Applied, and Honours
- Bachelor of Science students also have the opportunity to receive a Minor in Kinesiology.

5.6 Overview of Faculty Programs

The Faculty of Education offers three different kinds of programs.

Undergraduate Programs: The Faculty offers programs leading to the Bachelor of Education (B.Ed.) degree for those wishing to become teachers, and a B.Sc.(Kinesiology). Advanced Standing may be given to those already holding a university degree.

Programs of Professional Development: For qualified teachers wishing to enhance their knowledge and skills, the Faculty offers programs of professional development leading to specialized certificates and diplomas. Most courses that are required to complete these programs are offered in the evenings and in the summer.

Graduate Programs: The Faculty offers graduate programs for those already holding a university degree who wish to pursue advanced study and research leading to master’s and doctoral degrees in various fields of education and psychology, and library and information studies. A new Master's of Arts in Teaching and Learning, which leads to teacher certification on the Secondary level is also offered, more information is available at www.mcgill.ca/edu-dise/prospective/matl.

Undergraduate programs of initial teacher education are described in this publication, programs of professional development are described in the most current School of Continuing Studies Programs, Courses and University Regulations publication, and graduate programs are described in the most current Graduate and Postdoctoral Studies Programs, Courses and University Regulations publication, both available at www.mcgill.ca/study.

5.6.1 Undergraduate Education Programs

The Faculty of Education offers the following undergraduate programs. Details of each program may be found in this publication under the headings of the appropriate department.

All Bachelor of Education programs have been accredited by the Comité d’agrément des programmes de formation à l’enseignement (CAPFE).

The credit weights given are for students who have completed a Quebec CEGEP degree, or have been granted 30 credits of advanced standing. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Freshman courses (in addition to the 120-credit program) for a total of 150 credits.

section 5.10.4.1: Bachelor of Education: Secondary Program (120 credits), offered by the Department of Integrated Studies in Education.
section 5.10.4.4: Bachelor of Education (Kindergarten and Elementary) (120 credits), offered by the Department of Integrated Studies in Education.

section 5.10.21: Bachelor of Education (B.Ed.) - Kindergarten and Elementary Education - First Nations and Inuit Studies (120 credits), offered by the Department of Integrated Studies in Education.

section 5.10.22.1: Bachelor of Education Kindergarten and Elementary Program (Jewish Studies Option); students following this option take 126 credits, offered by the Department of Integrated Studies in Education.

section 5.10.4.5: Baccalauréat en enseignement du français langue seconde (120 credits) (B.Ed. TFSL), offered by the Department of Integrated Studies in Education jointly with the Université de Montréal. (No Admissions for 2011-2012)

section 5.10.4.6: Bachelor of Education in Teaching English as a Second Language (120 credits), offered by the Department of Integrated Studies in Education.

section 5.12.4: Bachelor of Education (B.Ed.) - Physical and Health Education (120 credits), offered by the Department of Kinesiology and Physical Education.

section 5.10.4.2: Concurrent Bachelor of Music (Music Education)/Bachelor of Education in Music program (137 credits), offered jointly by the Department of Integrated Studies in Education and the Schulich School of Music. See also section 10.9.3.1: Concurrent Bachelor of Music (B.Mus.) - Major Music Education and Bachelor of Education (B.Ed.) - Music Elementary and Secondary (137 credits) under Schulich School of Music.

section 5.10.4.3: Concurrent Bachelor of Science/Bachelor of Education (Secondary) (135 credits), offered jointly by the Department of Integrated Studies in Education and the Faculty of Science.

A student who successfully completes any of the above programs, (and meets other requirements set out by the MELS (Ministère de l’Éducation, du Loisir et du Sport) is recommended for certification as a teacher in the province of Quebec; see section 5.6.1.3: Quebec Teacher Certification.

section 5.12.5: Bachelor of Science (Kinesiology) (B.Sc.(Kinesiology)) - Kinesiology (90 credits), offered by the Department of Kinesiology and Physical Education.

The program entails a comprehensive understanding of human movement. Kinesiology is a multidisciplinary field viewing human movement from social, historical, psychological, or biological perspectives. The program provides students with a breadth of theoretical knowledge as well as an opportunity to explore related areas in greater depth, including minor programs available elsewhere within the University. An Honours program is available for particularly strong students.

5.6.1.1 General Admission Requirements

For information about admission requirements to the B.Ed., B.Sc.(Kinesiology), or the Concurrent B.Sc. and B.Ed., or B.Mus. and B.Ed. programs, refer to the Undergraduate Admissions Guide, found at www.mcgill.ca/apply. Applicants to the Concurrent B.Sc. and B.Ed. apply through the Faculty of Science, and applicants to the Concurrent B.Mus. and B.Ed. apply through the Faculty of Music.

For information about Inter-Faculty Transfer or Readmission, see Inter-Faculty Transfer or Readmission under University Regulations and Resources in this publication, as well as information posted on the Student Affairs Office website, www.mcgill.ca/edu-sao.

Although no additional prerequisite courses are required, the Faculty recommends that applicants to the B.Ed. Secondary, Science & Technology, Mathematics, and B.Ed. Physical & Health Education programs have appropriate background in Science and Mathematics courses, i.e., biology, chemistry, physics and mathematics. Students having other backgrounds will be considered for admission but will be required to complete prerequisite courses in mathematics and science that may increase the number of credits required for the degree.

5.6.1.1.1 Language Requirement for Applicants to B.Ed. TESL Program

The application process for the B.Ed. TESL program involves several steps. Students first apply to the University indicating their program choice. Those whose academic record meets minimum program requirements will be informed by the University that they are being considered for admission to the B.Ed. TESL program. Students being considered will need to pass written and oral English language proficiency tests as a further admission requirement, and will be contacted by email with information about how to make arrangements to take the test.

5.6.1.2 Credit Requirements

The Bachelor of Education (B.Ed.) requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Freshman courses (in addition to the 120-credit program) for a total of 150 credits. The B.Sc. is a 90-credit program. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies are normally enrolled in a four-year B.Sc.(Kinesiology) program, which includes a 30-credit Freshman year for a total of 120 credits.

Students entering the five-year B.Ed., or four-year B.Sc.(Kinesiology) degree are in Year 0 and are required to complete the Freshman requirements applicable to their program.

Students who have completed previous university studies may be awarded transfer credits for their course work. This can only be determined after the formal application and all necessary supporting documents have been received by Enrolment Services. A minimum of 60 credits must be completed while in residence at McGill University in order to be eligible for a degree. Transfer credits for courses taken more than five (5) years before the time of admission are not permitted in subjects where there have been substantial content changes, nor in any pedagogy courses specific to the Quebec K-11 curriculum. Courses more than five (5) years old in other subject areas may be considered on an individual subject basis by the Program Director. For more details, see the Undergraduate Admissions Guide, found at www.mcgill.ca/apply.
5.6.1.3 Quebec Teacher Certification

Teacher Certification in Quebec is the responsibility of the Ministère de l’Éducation, du Loisir et du Sport (MELS). Students who complete requirements for the Bachelor of Education degree and who meet the MELS requirements (specified below) are recommended by the University for certification.

Language Proficiency

Fluency (oral and written) in the language of instruction is a requirement for all those seeking certification.

Confidential declaration concerning judicial record

In June 2005, the National Assembly of Quebec adopted an Act amending the Education Act and the Act respective of private education. The amendments concern the verification of judicial antecedents of persons holding or applying for a permit to teach in the youth, adult, and vocational sectors. Anyone seeking teacher certification in the Province of Quebec is required to submit a confidential declaration concerning their judicial record to the Minister of Education. This document is available on the MELS website at www.mels.gouv.qc.ca/dftps/interieur/PDF/Antecedents_judiciaires_f.pdf.

Teaching Diploma

All graduates of the Bachelor of Education Teacher Education programs who are Canadian citizens or permanent residents may apply for a permanent Teaching Diploma (Brevet) immediately upon graduation.

Permit

Holders of a temporary permit or of a permanent diploma wishing to teach in another province or in another country must apply directly to the Teacher Certification Agency in the relevant province or country.

Teachers from other provinces or countries who wish to teach in Quebec must apply to:

Ministère de l’Éducation du Loisir et du Sport
600 Fullum, 10e étage
Montréal, Québec H2K 4L1
Telephone: 514-873-4630

Please refer to the following website for further information on obtaining a Quebec Teaching Licence: www.mels.gouv.qc.ca.

It is recommended that applicants intending to teach outside of Quebec obtain information beforehand concerning the requirements for certification.

5.6.1.3.1 International Students

In addition to the CAQ and Study Permit, international students in Bachelor of Education programs must obtain a Work Permit (Internship) issued by Citizenship and Immigration Canada as a requirement for the mandatory Field Experiences. Consult the International Students website for more information www.mcgill.ca/internationalstudents/predeparture/documents.

5.6.2 Programs of Professional Development

The Faculty of Education offers programs of professional development in several fields. All such programs are 30 credits, unless otherwise indicated, and may be completed through part-time study. They are intended to provide an opportunity for teachers and other educators to enhance their existing knowledge and skills or to develop new ones, and thus are normally available only to those who are already certified as teachers.

Detailed information regarding general regulations, admission requirements, and program profiles for the following certificates and diplomas may be found in the section for offering departments.

5.6.2.1 Department of Educational and Counselling Psychology

Certificate in Inclusive Education
Diploma in Human Relations and Family Life Education
Graduate Certificate in Counselling Applied to Teaching

Further information is available from the Program Coordinator:

Dean Thomson
Office: Education Building, Room 614
Telephone: 514-398-4248
Fax: 514-398-6968
Email: dean.thomson@mcgill.ca

5.6.2.2 Department of Integrated Studies in Education

First Nations and Inuit Education (FNIE): The Faculty of Education collaborates with various Indigenous communities and institutions offering programs whose courses are given either at McGill or off campus. In collaboration with the Kativik School Board, the Cree School Board, the Kahnawake Education...
Centre, and various other Indigenous communities in Quebec, FNIE delivers field-based teacher education programs leading to initial teacher certification and to the B.Ed.Cert.Teach. degree. FNIE also works with departments to meet other educational needs of Indigenous peoples.

Director of Programs in First Nations and Inuit Education: Professor Donna-Lee Smith  
Office: Education Building, Room 244  
Telephone: 514-398-4533  
Fax: 514-398-2553  
Email: donnelle.smith@mcgill.ca  
Website: www.mcgill.ca/edu-integrated

Centre for Educational Leadership (CEL): CEL, a unit of the Department of Integrated Studies in Education, is committed to the development of leadership for all educational stakeholders through teacher preparation, graduate studies, research, and varied approaches to professional development. The Centre seeks to promote dialogue, partnerships, and projects among teachers, policy makers, and other educational leaders in the local community and beyond through credit and non-credit work, research, and development activities.

Director: Dr. Lynn Butler-Kisber  
Office: Education Building, Room 442  
Telephone: 514-398-7149  
Fax: 514-398-7436  
Email: lynn.butlerkisber@mcgill.ca  
Website: www.mcgill.ca/edu-integrated

Courses offered through Continuing Studies and Summer Studies: A wide range of courses, enabling students either to acquire prerequisite credits or to earn credit towards their degree, is offered through Continuing Studies and Summer Studies. For courses offered, please check Minerva.

5.6.3 Programs for First Nations and Inuit

The following programs are offered for First Nations and Inuit teachers by the Faculty of Education. Information can be obtained by contacting:

First Nations and Inuit Education (FNIE)  
3700 McTavish Street, Room 244  
Montreal, Quebec H3A 1Y2  
Telephone: 514-398-4533  
Fax: 514-398-2553  
Website: www.mcgill.ca/edu-integrated/fnie

Bachelor of Education – Kindergarten and Elementary First Nations and Inuit Studies Option:

Detailed information about this program may be found in section 5.10.21: Bachelor of Education (B.Ed.) - Kindergarten and Elementary Education - First Nations and Inuit Studies (120 credits).

Detailed information about the following programs may be found in section 5.11: Programs for First Nations and Inuit:

Bachelor of Education for Certified Teachers Elementary Education  
Certificate in Education for First Nations and Inuit  
Certificate in First Nations and Inuit Student Personnel Services (This program is offered by the Department of Educational Psychology and Counselling through First Nations and Inuit Education. Restrictions apply to enrolment.)  
Certificate in Middle School Education in Aboriginal Communities  
Certificate in First Nations and Inuit Educational Leadership  
Certificate in Aboriginal Education for Certified Teachers  
Certificate in Aboriginal Literacy Education

5.7 Faculty Regulations for Undergraduate Programs

Please consult the University Regulations and Resources section of this publication for regulations and procedures regarding registration, fees, course load, course change (drop/add), withdrawal, verification, examinations, inter-university transfer, and graduation. In addition, the following section provides regulations specific to Faculty of Education students.
Note: Each student in the Faculty of Education must be aware of and comply with the Faculty regulations as stated in this publication. While departmental and Faculty advisers and staff are always available to give advice and guidance, the ultimate responsibility for complete and correct course selection and registration, for compliance with, and completion of, program and degree requirements, for the observance of regulations and deadlines, and for academic records, rests with the student. It is the student’s responsibility to seek guidance. Misunderstanding will not be accepted as cause for dispensation from any regulation, deadline, program, or degree requirement.

5.7.1 Advising

Refer to the University Regulations and Resources > Undergraduate Advising section of this publication, and the Student Affairs website, www.mcgill.ca/edu-sao, for further information. Assistance is also available by emailing: sao.education@mcgill.ca.

All newly admitted students are required to attend the academic advising sessions scheduled during August prior to the beginning of the Fall term. For a detailed description of advising and registration procedures, students should refer to Welcome to McGill at www.mcgill.ca/newstudents. Additional advising material is also available on the Student Affairs website, www.mcgill.ca/edu-sao/new/advising.

Academic advising for all returning students takes place in March for the upcoming academic year. Detailed advising and registration information is posted on the Student Affairs website: www.mcgill.ca/edu-sao/current/advising. Students entering their graduating year are encouraged to meet with their adviser during this Advising period.

All students admitted into the Freshman year (Year 0) are required to meet with an adviser during the Advising period in August.

A list of courses for Freshman (Year 0) students is available as part of the advising material for each program at www.mcgill.ca/edu-sao/new/advising.

5.7.2 Code of Professional Conduct (Faculty Regulations for Undergraduate Programs)

Faculty of Education programs have professional components and field placements. In all aspects of any program, on campus and off, students are expected to demonstrate ethical, responsible, and professional behaviour in the performance of their duties, to conduct themselves in accordance with the law (e.g., Youth Protection), and to meet the expectations of schools, boards, and other host institutions receiving them for field placements. This applies to all aspects of professional conduct, including but not limited to respect for persons, property, and confidentiality, appropriate dress, and punctuality. Failure to meet these expectations, regardless of performance in courses or other formal program requirements will be taken into account in the assessment of the students’ overall academic standing in the program and, in the most serious instance, may result in a requirement to withdraw from the program.

5.7.3 English Language Requirement

The Quebec Ministère de l’Éducation, du Loisir et du Sport (MELS) requires that all students in teacher education programs demonstrate their proficiency in the language of instruction. To fulfill this obligation, B.Ed. students are required to write the English Examination for Teacher Certification (EETC) before the end of their first semester in the program, except for Year 0 (Freshman) students who will write the examination in their second year (Year 1). Students must pass the examination prior to their Third Field Experience.

The examination is coordinated by an independent body, the Centre for the English Exam for Teacher Certification. McGill assists with the administration and scheduling of the examination. To write this examination, students must first register on Minerva for a section of EDEC 215 in the Fall term, then register with the Centre www.ceetc.ca and pay a $70 fee before writing the test. Students are permitted four opportunities to write and pass the examination.

Students who do not pass the examination the first time are expected to take EDEC 202 in the Winter term of their first year. After successful completion of EDEC 202, students are required to take the EETC again. A fee is charged each time the examination is written. Students who do not pass the examination on their fourth attempt will be placed in Unsatisfactory Standing and must withdraw from the program.

Note: This requirement does not apply to students in the B.Ed. TFSL or the Certificate in Education for First Nations and Inuit programs.

5.7.4 Additional Requirements for Students in the B.Ed. TFSL program

No admissions for 2011-12.

For students currently enrolled in the B.Ed. TFSL program, there is a compulsory French language test coordinated by an independent body, which must be passed prior to the Third Field Experience. Students are permitted four opportunities to write and pass this test. Students who do not pass the examination on their fourth attempt will be placed in Unsatisfactory Standing and must withdraw from the program.

5.7.5 Judicial Record Verification for Students in the Bachelor of Education Programs

Quebec’s Education Act, section 261.0.2, grants school boards the right to verify the judicial record of any person regularly in contact with minors, and this includes student teachers. Each school board or private school may have its own administrative procedures for verification. Students are responsible for complying with their request. Anyone unable to obtain the required security clearance will not be permitted to undertake their Field Experiences, which is a mandatory requirement of the program, and consequently would have to withdraw from the program.
5.7.6 Course and Program Regulations

5.7.6.1 Course Load

Undergraduate Education programs can normally only be followed on a full-time basis. Students must take a minimum of twelve (12) credits per term unless the Executive Director, Student Affairs gives them special permission. Special permission must be requested prior to the end of Course Add/Drop period.

Any absence or reduction in course load that may impact the regular progression of a student’s program must have written approval by the Executive Director, Student Affairs.

The normal course load per term is 15 credits. Students in Satisfactory Standing may take up to 17 credits per term. Students whose CGPA is above 3.00 may request permission to take an overload. Overloads are not allowed in major Field Experience terms for students in the B.Ed. programs. Students in Probationary Standing take a maximum of 12 credits.

5.7.6.2 Time Limit and Credits for Completion of Degrees

Students are expected to complete their program no more than five (5) years after their initial registration for the B.Ed. degree and after four (4) years for the B.Sc. (Kinesiology) degree. Students who enter into a Freshman year become subject to these regulations one year after their initial registration. Students who exceed these limits must apply to the Faculty for permission to continue.

Students registered in the B.Ed. or B.Sc. are expected to complete the requirements of their programs and their degree within 150 or 120 credits respectively. Students will receive credits for all courses (subject to degree regulations) taken up to and including the semester in which they obtain the full degree credit requirements. Students who wish to remain at McGill beyond that semester must seek permission of the Executive Director, Student Affairs. Students who wish to exceed the specified minimum number of credits required for their degree must also seek permission of the Executive Director, Student Affairs. If permission is granted, credits over the limit will be flagged for no credit and the grades will not count in the CGPA.

Permission for exceeding the time and/or credit limits will normally be granted only for valid academic reasons, such as change of program or approved part-time status. If permission is granted, students will receive credit only for required and complementary courses necessary to complete their program requirements.

5.7.6.3 Course Requirements

All required and complementary courses used to fulfill program requirements must be completed with a grade of C or better. Students who fail to obtain a satisfactory grade in a required course must either pass the supplemental examination if available, or repeat the course. If the failed course is a complementary course required by the program, a student may choose to replace it with another complementary course. If a student repeats a required course in which a D was received, credit will only be given once. A failure (F, J, KF, WF) in any level of Field Experience or in the English Examination for Teacher Certification, fourth attempt, places a student in Unsatisfactory Standing requiring withdrawal from the program. Further details on requirements for Field Experience are listed in section 5.8: Student Teaching/Field Experience.

5.7.6.4 Courses Taken as Transfer Credit

Students wishing to study away at a university outside of Quebec must obtain approval from their academic adviser and the Student Affairs Office prior to taking a transfer course. Students will only be permitted to take courses required to complete their program. Students are not permitted to take transfer courses during their graduating term. Please refer to University Regulations and Resources > Transfer Credits for further information.

5.7.6.5 Inter-University Transfer Credit

Students may, with the permission of their academic adviser, register at any university in the province of Quebec for three (3), or exceptionally six (6) credits per term in addition to their registration at McGill. Students will only be permitted to take courses required to complete their program. Students are not permitted to take transfer courses during their graduating term. Please refer to University Regulations and Resources > Quebec Inter-University Transfer Agreement (IUT) in this publication for further information.

Note: This restriction does not apply to students in the Joint B.Ed. TFSL program.

5.7.6.6 Distance Education (online) Courses

A maximum of 6 credits of elective courses taught as distance education/online courses may be used toward the B.Ed. or B.Sc.(Kinesiology) degree at McGill. Courses taught through distance education/online may not be used to complete program requirements, including subject area courses for B.Ed. students, except on an individual basis when serious documented circumstances warrant it. In such cases, prior approval must be obtained from the student's program adviser and the Associate Dean.

5.7.6.7 Courses Taken under Satisfactory/Unsatisfactory Option

Required or complementary courses, including subject area courses for B.Ed. students, cannot be taken under this option. Please consult University Regulations and Resources > Courses Taken under the Satisfactory/Unsatisfactory (S/U) Option in this publication.
5.7.6.8 Course Equivalencies and Overlap

Students will not receive additional credit toward their degree for any course that is considered equivalent or that overlaps in content with a course for which they have already received credit at McGill, or any other institution. It is the student's responsibility to be aware of exclusion clauses specified in the course description in this publication and Minerva. Students should also refer to the following website for specific information about advanced standing credits and McGill course exemptions: www.mcgill.ca/students/courses/plan/transfer; as well as the following website for Faculty-specific information: www.mcgill.ca/edu-sao.

5.7.6.9 Dress Regulations

All students enrolled in teacher certification programs are advised that school boards and individual schools may have regulations concerning acceptable attire. Students must adhere to any such regulations.

Students in Kinesiology and Physical Education programs are required to wear appropriate clothing for activity courses as approved by the instructor(s). Students may also be responsible for providing some items of personal equipment.

5.7.7 Registration

All students register by Minerva, McGill’s web-based registration system. For detailed information about registration, refer to the University Regulations and Resources > Registration section of this publication, Welcome to McGill at www.mcgill.ca/newstudents, the Student Affairs website, www.mcgill.ca/edu-sao, and to the Student Records website, www.mcgill.ca/student-records.

Students who fall into Unsatisfactory Standing at the end of the academic year will have their registration cancelled. They may not re-register in the Faculty. Students who can provide proof of extenuating circumstances may appeal to the Executive Director, Student Affairs. Please refer to University Regulations and Resources > Re-admission in this publication and to www.mcgill.ca/edu-sao for Faculty-specific information.

Students who have an outstanding fee balance from a previous term or outstanding fines will not be permitted to register. Students with financial problems should consult the Student Aid Office, Brown Student Services Building.

Students who decide not to return to McGill must withdraw from all of their courses on Minerva or inform the Student Affairs Office in writing. For further information, refer to University Regulations and Resources > Regulations Concerning Course Withdrawal and University Regulations and Resources > Regulations Concerning University Withdrawal in this publication.

5.7.7.1 Course Registration

Students in Faculty of Education programs should register for the courses as outlined in the individual program overviews and advising material posted on the Student Affairs Office website, www.mcgill.ca/edu-sao/new/advising and www.mcgill.ca/edu-sao/current/advising. For more information on registration, see University Regulations and Resources > Registration in this publication.

Students in the B.Ed. programs who are required to be registered for Field Experience should consult section 5.8: Student Teaching/Field Experience for more information.

Some courses may require special permission. Students should consult the Undergraduate Programs, Courses and University Regulations publication and/or the Class Schedule on Minerva well in advance of the Course Change period to determine if permission is required of the instructor, the department, or the Faculty for any course they wish to take.

A number of courses have prerequisites that must be completed prior to course registration. Permission to waive a prerequisite requirement must be given in writing by an academic adviser.

5.7.7.2 Withdrawals

There are three course withdrawal periods, published on the University website, www.mcgill.ca/importantdates, and in this publication under University Regulations and Resources > Regulations Concerning Course Withdrawal. Students may, under exceptional circumstances, be granted permission to withdraw after the published deadlines. Such students should contact the Student Affairs Office for further information.

Students withdrawing from a Field Experience should refer to section 5.8: Student Teaching/Field Experience.

5.7.8 Attendance

The class attendance necessary to satisfy course requirements varies from course to course. All students are expected to apprise themselves of and meet course-specific requirements.

Attendance is particularly critical in B.Ed. programs, as these are designed to develop required professional competencies, which prepare students for the demands of the teaching profession. Students must therefore inform themselves of, and adhere to, the attendance requirements for all Education courses. Special attention should be paid to the requirements of intensive courses and professional seminars scheduled around Field Experiences. Unexcused absences may result in exclusion from a course, course failure, and/or removal from any associated Field Experience.

For Field Experiences, punctual attendance is required throughout. Absences are only excused in exceptional circumstances. Please refer to section 5.8: Student Teaching/Field Experience.

Students in B.Ed. programs should be aware that some Field Experiences may begin in August, some are held in the Spring, and some may overlap with the official exam period. In addition, some professional seminars follow unique schedules. It is the student's responsibility to consult the Class Schedule on Minerva. In the case of a conflict with a final exam, students will be excused from the Field Experience or professional seminar on the exam date.
5.7.9 Grading

During the first week of lectures, each instructor will provide students with a written course outline that should include a description of the means of evaluation to be used in the course.

For further information on Grading, see University Regulations and Resources > Grading and Grade Point Averages (GPA).

5.7.10 Incomplete Grades

An instructor who believes that there is justification for a student to delay submitting term work may extend the deadline until after the end of the course. In this case, the instructor will submit a grade of "K" (Incomplete), indicating the date by which the work is to be completed. The maximum extensions for the submission of grades to the Student Affairs Office are as follows: April 30 for Fall term courses; July 30 for Winter term courses; and November 30 for Summer courses. It is important to note that instructors may impose earlier deadlines than those listed. Please refer to University Regulations and Resources > Incomplete Courses for more information.

5.7.11 Examinations

Students should see Examinations in the University Regulations and Information section of this publication for more information about final examinations and deferred examinations. The exam schedules are posted on the McGill website, www.mcgill.ca/students/exams, normally one month after the start of classes for the Tentative Exam Schedule, and two months after the start of classes for the Final Examination Schedule.

Students are warned not to make travel arrangements to leave Montreal prior to the scheduled end of any examination period.

5.7.11.1 Supplemental Examinations

Students who wish to write a supplemental examination for a course in which a supplemental examination is available must apply on Minerva within the published deadline. Please refer to the Student Information website, www.mcgill.ca/students/exams, for important information.

Students must be in Satisfactory or Probationary Standing and have received a final grade of D, J, F, or U in the course.

5.7.11.2 Reassessment and Rereads

In accordance with the Charter of Student Rights, and subject to the conditions stated therein, students have the right to consult any written submission for which they have received a mark and the right to discuss this submission with the examiner (see Reassessments and Rereads in the University Regulations and Information section of this publication).

The Faculty recognizes two types of reassessments or rereads:

1. Reassessment of course work (term papers, mid-terms, assignments, quizzes, etc.);
2. Reread of a final exam.

5.7.11.3 Reassessment of Course Work

Reassessment of course work is administered by the course instructor or the offering department. Requests, made by students, must be made within 10 working days of the date of return of the graded materials. The reviewer will assess the fairness of the original grade rather than remark the assignment as he or she would have graded it. Reassessments should normally be completed within 20 working days of the request. Grades may be lowered or raised, or they may remain the same, as a result of the reassessment. The grade obtained on the reassessment takes precedence over the original grade.

5.7.11.4 Rereads of Final Exams or Final Term Papers or Projects

These rereads are administered by the Student Affairs Office, but conducted by the units involved. Students must apply in writing to the Student Affairs Office by March 31 for courses in the Fall term, June 30 for courses in the Winter, and by September 30 for Summer term courses (these deadlines are strictly enforced and no requests will be accepted past them). Students are assessed a fee of $35.00 for such rereads. It is strongly recommended, but not required, that students consult with the instructor of the course before requesting an official reread. The reviewer will assess the fairness of the original grade rather than remark the assignment as he or she would have graded it. Grades may be lowered or raised, or they may remain the same, as a result of the reread. The grade obtained on the reread takes precedence over the original grade.

Reassessments and rereads in courses not in the Faculty of Education are subject to the deadlines, rules, and regulations of the particular faculty.

5.7.12 Academic Standing

Academic Standing is based primarily on students’ Cumulative Grade Point Average (CGPA), but may also be affected by their Term Grade Point Average (TGPA). For students in the B.Ed. programs, it is also based on their performance in the Field Experience courses, and the English Examination for Teacher Certification (EETC). Academic Standing, which is assessed after the end of term, determines if students will be allowed to continue their studies in the next term and if any conditions will be attached to their registration.

Decisions about Academic Standing in the Fall term are based only on grades that are available in January. Grades for courses in which students have deferred examinations and Fall term grades for courses that span the Fall and Winter terms do not affect Academic Standing for the Fall term, even though they will ultimately affect students’ Fall TGPA. Therefore, Academic Standing for the Fall term is designated as "Interim" and should be interpreted as advisory.
Interim Standing decisions are mentioned below only if the rules for them differ from those for regular Standing decisions. Students who do not receive a Pass grade for a Fall term EDFE (Field Experience course), or who do not pass the English Examination for Teacher Certification (EETC) after four attempts prior to their third field experience, are placed in Unsatisfactory Standing.

5.7.12.1 Satisfactory/Interim Satisfactory Standing

Students in Interim Satisfactory or Satisfactory Standing:

- may continue in their program;
- have a CGPA of 2.00 or greater.

5.7.12.2 Probationary/Interim Probationary Standing

5.7.12.2.1 Interim Probationary Standing at the end of the Fall term

Students in Interim Probationary Standing at the end of the Fall term:

- may continue in their program;
- should evaluate their course load and reduce it;
- should consult with their program adviser before the withdrawal deadlines;
- are permitted to proceed with the next scheduled Field Experience course, i.e., Winter or Spring, for First- or Second-Year Field Experiences only.

5.7.12.2.2 Probationary Standing at the end of the Winter term

Students in Probationary Standing at the end of the Winter term:

- may continue in their program;
- must carry a reduced load (maximum of 12 credits per term);
- are not permitted to take student teaching/Field Experience courses of any level during the next academic year;
- must raise their TGPA and CGPA to return to Satisfactory;
- should see their departmental adviser to discuss their course selection.

5.7.12.2.3 Students will be placed in Probationary Standing

- if their CGPA falls between 1.50 and 1.99, and if they were previously in Satisfactory Standing;
- if they receive a grade of D for a Field Experience course of any level and were previously in Satisfactory Standing;
- if their CGPA falls between 1.50 and 1.99 and their TGPA in Fall or Winter is 2.50 or higher, and if they were previously in Probationary or Interim Unsatisfactory Standing;
- if their CGPA is between 1.50 and 1.99 and their TGPA is 2.50 or higher, they were previously in Unsatisfactory Readmitted Standing, and have satisfied the relevant conditions specified in their letter of readmission.

5.7.12.3 Unsatisfactory/Interim Unsatisfactory Standing

5.7.12.3.1 Interim Unsatisfactory standing at the end of the Fall term

Students in Interim Unsatisfactory standing at the end of the Fall term:

- may continue in their program;
- should evaluate their course load and reduce it as appropriate;
- should consult a departmental adviser, before the withdrawal deadlines, about their course selection for the Winter term;
- will not be permitted to proceed with the next normally scheduled Field Experience.

5.7.12.3.2 Unsatisfactory Standing at the end of the Winter term

Students in Unsatisfactory Standing at the end of the Winter term:

- have failed to meet the minimum standards set by the Faculty;
- may not continue in their program.

5.7.12.3.3 Readmitted Unsatisfactory Standing

Students who were previously in Unsatisfactory Standing and who were readmitted to the Faculty by the Executive Director, Student Affairs or the Committee on Student Standing will have their standing changed to Readmitted Unsatisfactory Standing. Their course load is specified in their letter of readmission, as are the conditions they must meet to be allowed to continue in their program. They should see their departmental adviser to discuss their course selection.

5.7.12.3.4 Students will be placed in Unsatisfactory Standing (Winter or Summer term) or Interim Unsatisfactory Standing (Fall term)

- if their CGPA falls or remains below 1.50;
The designation Dean's Honour List may be awarded to graduating students under the following conditions:

- if their TGPA falls below 2.50 and their CGPA is below 2.00 and they were previously in Probationary, Unsatisfactory Readmitted, or Interim Unsatisfactory Standing;
- if they receive a failure (F, J, KF, WF) in a student teaching/Field Experience course of any level;
- if they receive a failure in the English Examination for Teacher Certification (EETC) for the fourth time;
- if they were previously in Unsatisfactory Standing and were readmitted to the Faculty by the Executive Director, Student Affairs or the Committee on Student Standing and have not at least satisfied the conditions to attain Probationary Standing that were specified in the letter of readmission.

Note: Students in either the Concurrent B.Sc. and B.Ed. or the B.Mus. and B.Ed. program who receive an F or J in any Education Field Experience course, or fail the English Examination for Teacher Certification (EETC) for the fourth time, are placed in Unsatisfactory Standing. Although they may complete their term, they are required to withdraw from the Concurrent program. They may, however, contact the Faculties of Science or Music regarding application to a Bachelor of Science or a Bachelor of Music degree.

5.7.12.3.5 Readmission

Students should apply on Minerva by July 1 for readmission to the Fall term. Appeals for readmission by students in Unsatisfactory Standing should be addressed to the Executive Director, Student Affairs. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation).

Students in Unsatisfactory Standing for the second time must withdraw permanently. Students who were placed in Unsatisfactory Standing due to a failure in student teaching/Field Experience cannot apply for readmission for at least one full year and are advised to apply for readmission by April 15. Please refer to the Student Affairs Office website for further information: www.mcgill.ca/edu-sao/current/transfers.

5.7.12.3.6 Incomplete Standings

- Must clear K's, L's, or Supplementals
- To Be Determined
- Incomplete

Students with Incomplete Standings in the Winter or Summer term may register for the Fall term, but their Standing must be resolved by the end of the Course Change period for that term. Students whose Incomplete Standing changes to Satisfactory, Probationary, or Interim Unsatisfactory Standing may continue in the program. Students whose Standing changes to Unsatisfactory may not continue in their program.

Students whose Standing changes to Unsatisfactory and who wish to ask for permission to continue in their program must make a request to the Associate Dean of Student Affairs as soon as they are placed in Unsatisfactory Standing. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation).

Students whose Standing is still Incomplete by the end of the Course Change period should immediately consult with the Student Affairs Office.

5.7.13 Graduation Requirements

To be eligible for a B.Ed. or the B.Sc. (Kinesiology) degree, students must fulfill all Faculty and program requirements. This includes completing the minimum credit requirements for the degree as stipulated in the letter of acceptance; obtaining a grade of C or better in all required and complementary courses; and achieving a minimum cumulative grade point average (CGPA) of 2.00. Students must satisfactorily complete a minimum of 60 credits at McGill University toward the fulfillment of the degree requirements. In addition, students must complete specific components of their program at McGill.

Students enrolled in Kinesiology and Physical Education programs are required, before the end of their final year of study, to show proof of certification in Standard Level Safety Oriented First Aid, and Level C in Cardiopulmonary Resuscitation, or equivalencies.

Students must complete their degree requirements within five (5) years after their initial registration for the B.Ed. degree and within four (4) years after their initial registration for the B.Sc.(Kinesiology) degree. Students in the part-time B.Ed. for Certified Teachers and B.Ed.(Vocational) programs are allowed a maximum of 12 years to complete the requirements for the degree.

It is the student's responsibility to ensure that all Faculty requirements are met before graduation.

Early in their graduating year, all students should check with their adviser to make sure that they will meet all program requirements in time for graduation. It is essential that students in their final year indicate the expected date of graduation by applying for graduation on Minerva; see University Regulations and Resources > Graduation in this publication for more information. During the graduation approval process, students can query their graduation record on Minerva to verify that the Faculty has approved their graduation. When a final-year student changes the expected date of graduation, the student must notify the Student Affairs Office immediately. It is also the student's responsibility to complete the required forms for teacher certification, and to check that his/her name appears on the graduation list. Further information is available on the Student Affairs Office website: www.mcgill.ca/edu-sao.

Students are not permitted to take courses outside McGill University during the last term prior to graduation. Students who fail to graduate as expected and who do not re-register must apply to the Executive Director, Student Affairs to graduate. Application to graduate must be made sufficiently in advance of the expected graduation date to allow the Faculty to verify the student's record.

Information pertaining to the convocation ceremonies can be obtained on the McGill website: www.mcgill.ca/convocations.

5.7.14 Undergraduate Program Awards

5.7.14.1 Dean's Honour List Designation for Graduating Students

The designation Dean's Honour List may be awarded to graduating students under the following conditions:
• students must be among the top 10% of the Faculty's graduating students;
• students must have completed a minimum of 60 McGill credits to be considered;
• the designation is based on the cumulative academic record (CGPA).

5.7.14.2 Dean's Honour List Designation for In-course Students

The designation Dean's Honour List may be awarded to in-course students under the following conditions:
• students must be among the top 10% of the Faculty's students;
• students must have completed at least 27 graded credits during the academic year;
• the designation is based on the sessional (Fall and Winter) GPA.

5.7.14.3 Scholarships and Awards

Various scholarships and awards are open to both graduating and in-course students. Full details may be found in the Undergraduate Scholarships and Awards Calendar available at www.mcgill.ca/students/courses/calendars.

5.8 Student Teaching/Field Experience

The Office of Student Teaching (OST), www.mcgill.ca/ost, is responsible for arranging the placement and evaluation of all student teachers in supervised Field Experiences.

5.8.1 Field Experiences

Field Experiences:
• are required courses (with the subject code EDFE) for all students in B.Ed. programs from first through fourth year;
• are the sole responsibility of the Faculty of Education and are organized by the Office of Student Teaching. Under no circumstances should students make their own placement arrangements;
• must be taken in the required sequence;
• require that newly admitted and returning students follow registration procedures (see section 5.7.7: Registration) or risk not being placed in a host school;
• are completed in schools within anglophone school boards in the province of Quebec in the majority of cases, with the exception of the B.Ed. TESL program Field Experiences, which take place in schools within francophone school boards in the province of Quebec;
• can be specialized in some circumstances. Refer to the OST website for information regarding such opportunities (distance, special needs, resource room, adult education, etc.);
• could require that students travel some distance to their host school and students should therefore budget time and money for this purpose;
• require that students be placed at host schools for specific periods of time ranging from 10 to 40 days;
• may begin before the first day of lectures or end after the last day of lectures;
• may continue during the University-scheduled Study Break in the Winter term;
• may continue through May into the Summer term (refer to the OST website or Minerva for exact dates).

5.8.2 Registration

5.8.2.1 Newly Admitted Students

Newly admitted students:
• in B.Ed. K/Elementary, B.Ed. TESL, B.Ed. Secondary programs must be registered for Field Experience 1 by the end of August (see www.mcgill.ca/importantdates for deadline);
• in B.Ed. Secondary Science and Math program should consult an adviser during the August advising sessions prior to registering for Field Experience courses;
• in B.Ed. Music, and B.Ed. Physical and Health Education programs must register in February for Field Experience 1 (Summer term);
• who are registered for a Field Experience will receive instructions for accessing the online Student Teaching Placement Form at their official @mail.mcgill.ca email address. Forms must be submitted by the date indicated in the email;
• who have acquired formal teaching experience prior to admission to the Bachelor of Education program may be granted exemption for Field Experience 1. See section 5.8.4.3: Exemption and Transfer Credit.
5.8.2.2 Returning Students

Returning students:

- must register for Field Experience 3 on Minerva by mid-April of the preceding academic year (see www.mcgill.ca/importantdates for deadline). Field Experience 3 begins in late August before the start of lectures. (See Minerva or OST website for details.)
- must register for Field Experience 4 on Minerva by the beginning of November (see www.mcgill.ca/importantdates for deadline);
- who are registered for a Field Experience will receive instructions for accessing the online Student Teaching Placement Form at their official @mail.mcgill.ca email address. Forms must be submitted by the date indicated in the email;
- must be in Satisfactory Standing and have satisfied all prerequisite and corequisite course requirements (refer to www.mcgill.ca/edu-sao/current). Minerva does not necessarily prevent students from registering for courses that they should not take. It is the student’s responsibility to be aware of prerequisites, corequisites, restrictions, and Faculty regulations that apply to the courses in which they register. Students should consult an academic adviser for assistance;
- in B.Ed programs who wish to transfer from one program to another will not be required to repeat Field Experience 1.

5.8.3 Student Responsibilities

Students are responsible for familiarizing themselves with the policies and rules governing all aspects of Field Experience, including pedagogical and professional behaviour, available at www.mcgill.ca/ost.

Students should not engage in any type of employment during Field Experience, nor register for any course that might interfere with the successful outcome of a Field Experience.

5.8.3.1 Guidelines (Syllabus)

Detailed guidelines and evaluation forms for every Field Experience are posted on the OST website, arranged by program and year. Students are responsible for familiarizing themselves with the objectives, evaluation criteria, and forms for each level of Field Experience, and must submit all completed evaluation forms to the OST on the first business day following the end of the Field Experience in order to receive a grade.

5.8.3.2 Attendance and Absences

Punctual attendance is required at the assigned school for the entire Field Experience. Alternate dates cannot be arranged at the request of the student. Unexcused absences from intensive courses and professional seminars may result in exclusion from the course, course failure, and/or removal from any associated Field Experience.

Days absent due to illness or McGill exams must be made up at the end of the Field Experience. Absences due to illness longer than a few days require a valid medical note (see www.mcgill.ca/studenthealth/notes) to be submitted to the OST, and the outcome of the Field Experience will be evaluated on an individual basis. Student teachers must contact the following people as soon as possible on the morning of the day of their absence:

- School office
- Cooperating teacher
- Office of Student Teaching, telephone 514-398-7046
- Field supervisor

Student teachers are permitted to be absent for religious holy days, as outlined in McGill's Policy for the Accommodation of Religious Holy Days; see www.mcgill.ca/student-records/holidays. Students must notify the OST, cooperating teacher, and field supervisor before the Field Experience begins if possible, or at least two weeks before the planned absence. The missed days must be made up, usually at the end of the Field Experience.

Absences related to McGill Intercollegiate Sport events are evaluated by the director of the OST on a case-by-case basis. Student teachers must submit a signed copy of the Intercollegiate Sport Event Accommodation form (see www.mcgill.ca/deanofstudents/intercollegiateaccommodation) to the OST at least two weeks in advance of each conflict.

Absences for any other reason, including but not limited to: marriage, family parties, vacation, university extracurricular activities, employment, or conflicting courses, are not permitted during Field Experience under any circumstances. Students should consult an academic adviser if they need to rearrange their course schedule.

5.8.3.3 Judicial Record Verification

See section 5.7: Faculty Regulations for Undergraduate Programs > section 5.7.5: Judicial Record Verification for Students in the Bachelor of Education Programs for information on the requirement to obtain this security clearance. Additional information can be found on the OST website.

5.8.3.4 Work Permit for International Students

International students (students who are not Permanent Residents or citizens of Canada) must apply for an internship/co-op work permit issued by Citizenship and Immigration Canada as a requirement for their mandatory Field Experiences. This is not the same as an off-campus work permit. The internship/co-op work permit is free of charge, but takes time to obtain and may require a medical exam. Detailed instructions are available on the OST website. For assistance with the application students should contact International Student Services, www.mcgill.ca/internationalstudents. Students must submit a copy of their valid permit to the OST before the Field Experience starts.
5.8.4 Grading and Credit

Field Experiences are graded "Pass/Fail". Students must submit all completed evaluation forms to the OST immediately following their Field Experience in order to receive a grade.

Where a student is experiencing serious difficulties in a Field Experience but has demonstrated some potential to successfully reach the required standard, the student will be granted a "D" grade. In this case, the director of the OST has the authority to grant special permission for a student to repeat a Field Experience during the next term in which the course is offered. This special permission will be granted once only in a student's program. Students receiving a "D" grade are also required to repeat the corequisite seminar or other corequisite course as specified by the director. The original grade for the corequisite seminar or course will be excluded from the GPA and credits; only the second grade will be retained.

Students must receive a Pass grade in order to proceed in the B.Ed. program. Failure (F, J, KF, WF) in any Field Experience places a student in Unsatisfactory Standing, requiring withdrawal from the Teacher Education Program. Students who fail in a Fall term Field Experience may be allowed to continue taking courses in the program to enable transfer to another faculty.

A student may appeal a failing grade or termination of a Field Experience by making a formal application to the Executive Director, Student Affairs.

5.8.4.1 Termination of Field Experience

At any time, students may be removed from their Field Experience placement at the request of the host school administrator and cooperating teacher, or at the request of the Director of Student Teaching. Students who are removed from a Field Experience placement will be informed of the reason for the termination and will meet with the Director. Circumstances that could lead to termination include, but are not limited to:

- Prerequisite courses not successfully completed.
- Exceeding the number of permissible unexcused absences for corequisite courses (consult the syllabus for each course).
- Failure to pass a judicial record check, if required by the school or school board where the student is placed.
- Unprofessional behaviour; behaviour that contravenes the Code of Ethics for Student Teachers.
- Failure to make the improvements outlined on a Notification of Concern by the date indicated.

The final outcome for a Field Experience that is terminated will be decided by the director of Student Teaching. Possible outcomes are:

- Reassignment during the same term, subject to availability of placements.
- "W" – Withdrawal (normally without refund).
- "D" – Student will be permitted to register for the Field Experience again during the next regularly scheduled term.
- "F, J, KF, WF" – Failure in any Field Experience places the student in Unsatisfactory Standing.

If a student cannot continue the Field Experience due to illness, see section 5.8.4.2: Withdrawal from Field Experience.

If a student chooses to end his or her Field Experience, the director of Student Teaching will evaluate the circumstances and determine an outcome. Possible outcomes are the same as those listed above.

5.8.4.2 Withdrawal from Field Experience

- Withdrawal (with refund) for any reason must be done at least two weeks before the start date of the Field Experience. The student is responsible for notifying the OST in writing by this deadline.
- Students having to withdraw for any reason, including illness, from a Field Experience that begins in less than two weeks or that is underway must immediately inform the OST. Based on the circumstances of the withdrawal, the director of the OST will determine the final outcome of the Field Experience and the Student Affairs Office will determine eligibility for refund.

5.8.4.3 Exemption and Transfer Credit

Students who have acquired formal teaching experience prior to admission to the Bachelor of Education program may be granted exemption from the first Field Experience and corequisite seminar. Written requests must be made to the Director of the OST by August 31 of the year of admission. Requirements for supporting documentation can be found on the OST website, www.mcgill.ca/ost. Exemption does not reduce the number of credits students need to graduate. Students should consult an academic adviser to discuss their plan of study.

Students who previously completed a Field Experience at another university may be eligible for transfer credit (advanced standing). Contact an academic adviser to discuss this possibility. Students may need to submit a syllabus for the course so that the OST can determine equivalency.

For general information about exemptions and transfer credits at McGill, see www.mcgill.ca/students/transfercredit, as well as Faculty-specific information at www.mcgill.ca/edu-sao/new/advancedstanding.
5.8.5 Code of Professional Conduct: Code of Ethics for Student Teachers

5.8.5.1 Preamble – A Student-Centred Perspective

• Mandate
A joint subcommittee consisting of members from two standing committees of the Faculty of Education (Faculty of Education Ethical Review Board and Student Standing) was created to develop a Code of Ethics for Student Teachers and to examine the ways in which this Code will be communicated to students, faculty members, and educational partners.

• Goals and Rationale
The interests of the two Standing Committees of the Faculty of Education in promoting appropriate ethical and professional conduct have led us to develop the following Code of Ethics for Student Teachers. This code seeks to respond to and address the following needs:

1. The Code addresses the interdependent duties, rights, and responsibilities of student teachers, faculty members, and educational partners.
2. By addressing common issues and needs, the Code seeks to articulate and make explicit ethical principles that transcend disciplinary boundaries. These principles reflect the fundamental values that are expressed in the duties, rights, and responsibilities of all involved in Teacher Education.
3. The Code requires a reasonable flexibility in the implementation of common principles. It is designed to help those involved in Teacher Education, as a matter of sound ethical reasoning, to understand and respect the contexts in which they work and accommodate the needs of others.
4. The Code seeks to encourage continued reflection and thoughtful response to ethical issues. It does not seek definitive answers to all ethical questions or situations. Rather, it seeks to outline the guiding principles to ethical conduct and to identify major issues that are essential to the development and implementation of this Code.

• Context of an Ethics Framework for Student Teachers
The principles and norms guiding ethical conduct are developed within an ever-evolving complex societal context, elements of which include the need for reflective action and ethical principles.

Education is premised on a fundamental moral commitment to advance and construct knowledge and to ensure human understanding and respect for individual and collective well-being and integrity.

The moral imperative of respect translates into the following ethical principles that assume a student-centred perspective as articulated in the Quebec Curriculum Reform and Competencies outlined for Teacher Education.

5.8.5.2 Academic Freedom and Responsibilities
Teachers enjoy, and should continue to enjoy, important freedoms and privileges. However, with freedoms come responsibilities and ethical challenges.

This Code of Ethics is in keeping with the philosophy and spirit of the New Directions that are embedded in the document "Teacher Training: Orientations, Professional Competencies" (MEQ 2001) and the reflective practice literature.

The role of the teacher and the contexts of teaching have changed. Thus, new resources (knowledge, skills, attitudes) are required to practice the profession and to meet the challenges of teaching and learning in whatever contexts student teachers may find themselves, and to engage in professional development individually and with others.

5.8.5.3 Ethics and Law

"Teaching is governed by a legal and regulatory framework" (MEQ 2001, p. 120). The law affects and regulates the standards and norms of teaching behaviours in a variety of ways such as respecting privacy, confidentiality, intellectual property, and competence. Human rights legislation prohibits discrimination and recognizes equal treatment as fundamental to human dignity and well being. Teachers should respect the spirit of the Canadian Charter of Rights and Freedoms, particularly the sections dealing with life, liberty, and the security of the person, as well as those involving equality and discrimination and the Education Act that sets out the obligations and rights of teachers.

5.8.5.4 Guiding Ethical Principles
Ethical student teachers should respect the following guiding ethical principles:

1. Respect for Human Dignity
   • Speaks and acts toward all students with respect and dignity; and deals judiciously with them at all times, always mindful of their individual rights and personal sensibilities.
   • Respects the dignity and responsibilities of cooperating teachers, peers, principals, parents, and other professionals or para-professionals within the school, school board, and community.

2. Respect for Vulnerable Persons
   • Respects and recognizes ethical obligations toward vulnerable persons. This principle recognizes that students are in a vulnerable position and that student teachers are in a privileged relationship with students and their families and will always refrain from exploiting that relationship in any form or manner.

3. Respect for Confidentiality and Privacy
• Respects the confidential nature of all information related to students and their families and will share such information in an appropriate manner only with those directly concerned with their welfare.
• Respects the confidential nature of all information related to all school personnel and will share such information in an appropriate manner.

4. Respect for Justice
• Respects and recognizes the right of individuals to be treated with fairness and equity and the importance of avoiding conflicts of interest.

5. Respect for Safety of Students
• Respects the right of individuals to expect that student teachers will engage in practices that aim to ensure the physical, psychological, and emotional safety of students.

6. Respect for Existing Ethical Codes and Professional Standards
• Respects the authority, roles, and responsibilities of the cooperating teacher, and agrees to adhere to the responsibilities and obligations for teachers as outlined in the Education Act, Faculty, and University handbooks as well as all local agreements by host school boards and schools.

7. Balancing Harm and Benefits
• Acknowledges that any potentially harmful practices (e.g., science labs and physical education activities) must be balanced with anticipated benefits and conducted in a prudent, informed manner.

5.8.5.5 Putting Principles into Practice: Venues for Communication
More than one principle may apply to a given case or situation. For meaningful and effective implementation of these principles, they must be widely communicated and applied in appropriate contexts.

5.9 Department of Educational and Counselling Psychology

5.9.1 Location
Faculty of Education
3700 McTavish Street, Room 614
Montreal, Quebec H3A 1Y2
Telephone: 514-398-4242
Fax: 514-398-6968
Website: www.mcgill.ca/edu-ecp

5.9.2 About the Department of Educational and Counselling Psychology
Educational Psychology encompasses a) the theoretical and applied study of learning, cognition, and instruction in a variety of educational settings across ages and domains; b) instructional technology and computers as cognitive tools in learning; c) cognitive and social processes in learning; d) evaluation and enhancement of learning and teaching; e) methods for fostering inclusive education; f) relationships of phenomena related to teaching, learning, and assessment in human development; and g) the impact of family and community on children’s learning and development.

At the undergraduate level, the Department of Educational and Counselling Psychology is responsible for the B.A.; see Faculty of Arts > Educational Psychology Minor Concentration for more information and for a variety of undergraduate courses in the areas of learning, cognition and development, inclusive education, gifted education, educational media and computers, and educational measurement and evaluation.

In professional development, the Department offers diploma or certificate programs in Human Relations and Family Life Education, Inclusive Education, and First Nations and Inuit Student Personnel Services. For more information, please consult our website, www.mcgill.ca/edu-ecp/undergraduate, or contact the Undergraduate Program Coordinator in Educational and Counselling Psychology:

Dean Thomson
Undergraduate Program Coordinator
Telephone: 514-398-4248
Email: dea.thomson@mcgill.ca

At the graduate level, the Department of Educational and Counselling Psychology offers Master's degrees (M.A.) in Counselling Psychology, with major concentrations in Project (Research-based) or Professional/Internship (Practitioner-based) and in Educational Psychology with streams in Health Professions Education, Human Development, Learning Sciences, and School/Applied Child Psychology. Also offered are Master's of Education degrees (M.Ed.) in Educational Psychology with streams in General Educational Psychology, Inclusive Education, and Learning Sciences. Students can also obtain doctoral degrees (Ph.D.) in Counselling Psychology, School/Applied Child Psychology, and Educational Psychology with streams in Human Development or Learning...
Sciences. The department also offers a Postdoctoral Degree Graduate Diploma in School/Applied Child Psychology and a Graduate Certificate in Counselling Applied to Teaching. For further information, consult the most current Graduate and Postdoctoral Studies Programs, Courses and University Regulations publication at www.mcgill.ca/study.

Special services offered by the Department include the School and Counselling Psychology Clinic and the International Centre for Youth Gambling and High Risk Behaviour.

Graduate and Certificate Programs:
Telephone: 514-398-7149
Fax: 514-398-4529

5.10.2 About the Department of Integrated Studies in Education

The Department of Integrated Studies in Education, created in September 2001, incorporates the programs and staff previously associated with the Departments of Culture and Values in Education, Educational Studies, Second Language Education, and First Nations and Inuit Education.

The Department offers four-year programs for CEGEP graduates and five-year programs for out-of-province students leading to a B.Ed. degree.

For B.Ed. program overviews, see www.mcgill.ca/edu-dise/students/undergraduate/new.

5.10.3 Department of Integrated Studies in Education Faculty

Chair

Steven Jordan

Director of Undergraduate Programs

Caroline Riches

Director of Graduate Programs

Michael Hoechsmann

Emeritus Professors

Patrick X. Dias; B.A., M.A.(Karachi), B.Ed., Ph.D.(Montr.)
Margaret Gillett; B.A., Dip.Ed.(Syd.), M.A.(Russel Sage), Ed.D.(Col.) (William C. Macdonald Emeritus Professor of Education)
John B. Gradwell; B.A., M.A.(Calif.), Ph.D.(Iowa)
Denise Lussier; B.A.(Coll. Jesus Marie de Sillery), M.Ed.(Boston), M.A., Ph.D.(Laval)

Bernard Shapiro; B.A.(McG.), M.A.T., Ed.D.(Harv.)
David C. Smith; B.Ed., M.A.(McG.), Ph.D.(Lond.), F.C.C.T., F.R.S.A.
## Emeritus Professors

John R. Wolforth; B.Sc.(Sheff.), M.A., Ph.D.(Br. Col.)

## Professors

Lynn Butler-Kisber; B.Ed., M.Ed.(McG.), Ed.D.(Harv.)

David Dillon; B.A.(St. Columban's), M.S.(SW Texas St.), Ph.D.(Texas)

Ratna Ghosh; C.M., B.A.(Calc.), M.A., Ph.D.(Calg.) F.R.S.C. (William C. Macdonald Professor of Education) (James McGill Professor)

Barry Levy; B.A., M.A., B.Ed(Yeshiva), Ph.D.(NYU)

Roy Lyster; B.A.(Regina), M.A.(Paris VII), B.Ed., M.Ed., Ph.D.(Tor.)

Mary H. Maguire; B.A., M.Ed.(Montr.), M.Ed., Cert. Reading(McG.), Ph.D.(Ariz.)

Claudia A. Mitchell; B.A.(Bran.), M.A.(Mt. St. Vin.), Ph.D.(Alta.) (James McGill Professor)

Anthony Paré; B.Ed, M.Ed., Ph.D.(McG.)

Lise Winer; B.A.(Pitt.), M.A.(Minn.), Cert. Ped.(C'dia), Ph.D.(West Indies)

## Associate Professors

Helen Amoriggi; B.Sc., M.A.(Rhode Is.), Ed.D.(Boston)

Jon G. Bradley; B.A., M.A.(Sir G. Wms.)

Eric Caplan; B.A.(Tor.), M.A.(Hebrew), Ph.D.(McG.)

Michael Hoechsmann; B.A., M.A.(S. Fraser), Ph.D.(Tor.)

Steven Jordan; B.A.(Kent), M.Sc.(Lond.), Ph.D.(McG.)

Bronwen Low; B.A.(Qu.), M.A.(Br. Col.), Ph.D.(York)

Kevin McDonough; B.A., B.Ed., M.Ed.(Alta.), Ph.D.(Ill.)

Ronald Morris; B.Ed., M.A., Ph.D.(McG.)

Mela Sarkar; B.A.(McG.), M.A., Ph.D.(C'dia)

Gale Seiler; B.Sc.(Fairleigh Dickinson), M.Sc.(Montana), Ph.D.(Penn.)

Shaheen Shariff; B.A., M.A., Ph.D.(S. Fraser)

Doreen Starke-Meyerring; B.Ed.(Potsdam), M.A.(N. Dakota), Ph.D.(Minn.)

Shirley Steinberg; B.Ed., M.Ed.(Leth.), Ph.D.(Penn. St.)

Georges Terroux; B.A.(Montr.), M.A.(Essex), Ph.D.(Montr.) (Post-retirement)

Carolyn E. Turner; B.A.(Ariz.), M.Ed., Ph.D.(McG.)

Boyd White; B.A.(Sir G. Wms.), B.F.A.(C'dia), M.F.A.(Inst. Allende, Guanajuato), Ph.D.(C'dia)

## Assistant Professors

Anila Asghar; M.S.(Punjab), M.A.(Col.), M.Ed., Ed.D.(Harv.)

Spencer Boudreau; B.A.(Don Bosco), B.A., M.A.(Sher.), Ph.D.(C'dia)

Abdul Aziz Choudry; Grad.Dip., Ph.D.(C'dia)

Kara Jones Jackson; B.A.(Bates Col.), M.A., Ph.D.(Penn.)

Annie Savard; B.Ed., M.A., Ph.D.(Laval)

Sylvia Sklar; Dip.Ed.(McG.), B.A.(C'dia), M.Ed.(McG.)
Associate Member

Adrienne Carey Hurley; B.A.(Colo.), M.A.(Mich.), Ph.D.(Calif.)

Faculty Lecturers

Beverly Baker; B.A., B.Com.(St. Mary's), B.Ed.(McG.), M.A.(C'dia)
Fiona Benson; B.A.(Ott.), M.Ed., Ph.D.(McG.)
Charlotte Hussey; B.A.(Wheaton), M.A.(C'dia), M.F.A.(W. Wilson), Ph.D.(McG.)
Caroline Riches; B.A., M.Sc.(Alta.), Ph.D.(McG.)
Louise Savoie; B.S.S.(Laval), M.A.(Ott.)
Donna-Lee Smith; B.A., M.A.(C'dia)

Adjunct Professors

Colin J. Lankshear; B.A., M.A., Ph.D.(Cant.), M.Ed.(Qld.)
Robert E. Saggers; B.A.(Sir G. Wms.), M.Ed., Ph.D.(McG.)
Ruth Wells Sandwell; B.A.(Car.), M.A.(Vic., BC), Ph.D.(S. Fraser)
Ann L. Smith; B.A.(Natal), B.A., M.A., Ph.D.(Witw.)

5.10.4 Overview of Programs (Integrated Studies in Education)

The following is an overview of programs offered by the department of Integrated Studies in Education.

5.10.4.1 Bachelor of Education: Secondary Program (120 credits)

The aim of the B.Ed. Secondary program is to prepare strong beginning teachers for the secondary school level. This integrated 120-credit program (150 credits for out-of-province students) consists of academic studies to provide background depth in subjects taught in the secondary school, professional studies centred on school-based practicum, supported by studies in pedagogy, curriculum, and educational foundations. Students choose their teaching profiles from: English, Mathematics, Science and Technology, and Social Sciences (History and Citizenship, and one of Geography or Ethics and Religious Culture). Students applying to the B.Ed. Secondary in the areas of Mathematics or Science and Technology, depending on their academic record, may be required to complete additional courses in order to gain the appropriate subject area background.

5.10.4.2 Concurrent Bachelor of Music (Music Education)/Bachelor of Education in Music program (137 credits)

This program provides students with the opportunity to obtain a Bachelor of Music degree and a Bachelor of Education degree concurrently. The two degrees are awarded during the same convocation period. Students who have completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies are normally enrolled in a program requiring the completion of 137 credits.

5.10.4.3 Concurrent Bachelor of Science/Bachelor of Education (Secondary) (135 credits)

This program provides students with the opportunity to attain a Bachelor of Science degree and a Bachelor of Education degree concurrently. The two degrees are awarded during the same convocation period. Students who have completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies are normally enrolled in a program requiring the completion of 135 credits.

5.10.4.4 Bachelor of Education (Kindergarten and Elementary) (120 credits)

This program leads to certification to teach children between the ages of 5 and 11 years. It consists of four years of full-time study requiring the completion of 120 credits (150 credits or five years for out-of-province students) of academic and professional courses.

Options within the B.Ed. (Kindergarten and Elementary) program are:
- First Nations and Inuit Studies
- Jewish Studies (126 credits)
- Pédagogie de l’immersion française (pending approval to be offered 2011-2012)

5.10.4.5 Baccalauréat en enseignement du français langue seconde (120 credits) (B.Ed. TFSL)

No admissions for 2011-2012.

This four-year program (normally 120 credits or four years for students who have completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies) prepares specialist teachers to teach French as a second language, in Core French programs, immersion programs,
intensive programs, and classes d'accueil, at both the elementary and the secondary levels. Offered by the Department of Integrated Studies in Education jointly with the Université de Montréal (www.mcgill.ca/edu-dise/students/undergraduate/new/#TFSL).

5.10.4.6 Bachelor of Education in Teaching English as a Second Language (120 credits)

This program prepares specialist teachers to teach English as a second language at both the elementary level (including regular and intensive ESL) and the secondary level (including regular ESL and ES LA – English Second Language Arts). This integrated 120-credit program (150 credits for out-of-province students) consists of academic and professional components. The academic components provide students with opportunities to develop a broad liberal education and to study language and language learning from linguistic, social, cultural, and psychological perspectives. The professional components revolve around school-based Field Experiences, which are supported by studies in pedagogy and educational foundations.

5.10.4.7 Graduate Programs

At the graduate level, the Department offers M.A. programs with thesis and non-thesis options in the following areas: Education and Society, Educational Leadership, and Second Language Education.

The Department is offering a new Master of Arts in Teaching and Learning (MATL), leading to teacher certification at the secondary level for those meeting specific criteria. See www.mcgill.ca/edu-dise/prospective/matl.

The Department also offers graduate certificates in Leadership and Teaching English as a Second Language. See www.mcgill.ca/edu-dise/students/graduate.

5.10.4.8 In-Service Programs

The Department of Integrated Studies in Education offers a number of in-service programs through First Nations and Inuit Education: a Certificate in Education for First Nations and Inuit, a Certificate in Aboriginal Literacy Education, a Certificate in Middle School Education in Aboriginal Communities, a Certificate in First Nations and Inuit Educational Leadership, a Certificate in Aboriginal Education for Certified Teachers, and a Bachelor of Education for Certified Teachers.

The Department is also involved in a variety of in-service activities with administrators, teachers, consultants, and other educational leaders through the Centre for Educational Leadership (CEL).

5.10.5 Bachelor of Education (B.Ed.) - Secondary English (120 credits)

The Bachelor of Education (B.Ed.) - Secondary English program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Freshman courses (in addition to the 120 credits for the program) for a total of 150 credits.

The aim of the B.Ed. Secondary Education Program is to prepare strong beginning teachers for the secondary school level. This integrated program consists of academic studies, professional studies, and school-based practicum components. All of this is supported by studies in pedagogy, curriculum, and educational foundations.

The Secondary English program provides students with the learning opportunities needed to become proficient English teachers.

Please note that graduates of teacher education programs are recommended by the University for Quebec certification to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS). For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

Freshman Program

Students normally complete 30 credits in their Freshman (U0) year.

The Freshman year is the time to take introductory level courses in English, as well as to explore areas that are not normally taken as teachable subject areas within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

In addition, in consultation with the Program Adviser, students may select courses from the recommended course list below or other courses. The list includes English literature courses that may be used toward the academic component of the Secondary English course requirements. Also included are several French Second Language (FRSL) courses for which placement tests are required to determine the appropriate level.

**Required Courses (45 credits)**

- EDEC 201 (1) First Year Professional Seminar
- EDEC 215 (0) English Language Requirement
- EDEC 247 (3) Policy Issues in Quebec Education
- EDEC 254 (1) Second Professional Seminar (Secondary)
- EDEC 351 (2) Third Professional Seminar (Secondary)
- EDEC 404 (3) Fourth Year Professional Seminar (Sec)
- EDES 350 (3) Classroom Practices (Secondary)
- EDFE 200 (2) First Field Experience (K/Elem & Secondary)
- EDFE 254 (3) Second Field Experience (Secondary)
- EDFE 351 (8) Third Field Experience (Secondary)
- EDFE 451 (7) Fourth Field Experience (Secondary)
- EDPE 300 (3) Educational Psychology
- EDPE 304 (3) Measurement and Evaluation
- EDPI 309 (3) Exceptional Students
- EDPI 341 (3) Instruction in Inclusive Schools

**Complementary Courses (15 credits)**

- 15 credits selected as described below.

**Multicultural Education**

- 3 credits from:
  - EDEC 233 (3) First Nations and Inuit Education
  - EDEC 248 (3) Multicultural Education
  - EDEC 249 (3) Global Education and Social Justice

**Philosophy of Education**

- 3 credits from:
  - EDEC 260 (3) Philosophical Foundations
  - EDEC 261 (3) Philosophy of Catholic Education

**Media, Technology, Computers and Education**

- 3 credits from:
  - EDEC 262 (3) Media, Technology and Education
  - EDPT 200 (3) Integrating Educational Technology in Classrooms
  - EDPT 204 (3) Educational Media 1
For students with a background in computers or other media applications in education, the following courses may be substituted for the above:

EDPT 341 (3) Instructional Programming 1
EDPT 420 (3) Media Literacy for Education

Secondary Teaching Methods - English
6 credits:
EDES 361 (3) Teaching Secondary English 1
EDES 461 (3) Teaching Secondary English 2

Secondary English Subject Area (54 credits)
Note: Students selecting 18 credits of English as their second 'teachable subject' will take EDES 361 Teaching Secondary English 1 (3 credits) to count as an elective in their program.

Option 1
54 credits distributed as follows:

Required Course (3 credits)
EDES 366 (3) Literature for Young Adults

Complementary ‘Language/Linguistics’ courses (6 credits)
CEAP 250* (3) Research Essay & Rhetoric
EDEC 203* (3) Communication in Education
EDSL 305 (3) L2 Learning: Classroom Settings
EDSL 350 (3) Essentials of English Grammar
LING 200 (3) Introduction to the Study of Language
LING 201 (3) Introduction to Linguistics
LING 355 (3) Language Acquisition 1

*Note: Students may take either CEAP 250 OR EDEC 203 for credit but not both

Complementary Courses
45 credits selected from the English Department undergraduate complementary course list (www.mcgill.ca/english/undergrad/complimentary-courses/) distributed as follows (including at least one course in Shakespeare):

Literature (33 credits)
A minimum of 15 credits must be at the 300 level or higher

Cultural Studies (9 credits)
At least 3 credits must be at the 300 level or higher

Drama/Theatre (3 credits)

Option 2 (54 credits)
54 credits distributed as follows:

Required Course (3 credits)
EDES 366 (3) Literature for Young Adults
Complementary ‘Language/Linguistics’ courses. (6 credits)
Select 6 credits from the following course list:

- CEAP 250* (3) Research Essay & Rhetoric
- EDEC 203* (3) Communication in Education
- EDSL 305 (3) L2 Learning: Classroom Settings
- EDSL 350 (3) Essentials of English Grammar
- LING 200 (3) Introduction to the Study of Language
- LING 201 (3) Introduction to Linguistics
- LING 355 (3) Language Acquisition 1

*Note: Students may take either CEAP 250 OR EDEC 203 for credit but not both

Complementary Courses
27 credits selected from the English Department undergraduate complementary course list (www.mcgill.ca/english/undergrad/complimentary-courses/), distributed as follows (including at least one course in Shakespeare):

Literature (18 credits)
A minimum of 6 credits at the 300 level or higher.

Cultural Studies (6 credits)
A minimum of 3 credits at the 300 level or higher

Drama/Theatre (3 credits)

Second “Teachable” Subject Area (18 credits)
18 credits of of designated courses in a second “teachable” subject area (e.g., Mathematics, Social Sciences, Science courses, selected in consultation with an advisor).

Students must also take the corresponding 3 credits of Secondary Teaching Methods in for the second “teachable” subject area

Note: this additional Methods course counts as a 3 credit elective in the program.

English as Second “Teachable” Subject Area (18 credits)
Students in the Secondary Mathematics program who select English as their second “teachable” subject area follow the requirements below:

Required Course (3 credits)
- EDES 366 (3) Literature for Young Adults

Language Course (3 credits)
- CEAP 250* (3) Research Essay & Rhetoric
- EDEC 203* (3) Communication in Education
- EDSL 305 (3) L2 Learning: Classroom Settings
- EDSL 350 (3) Essentials of English Grammar
- LING 200 (3) Introduction to the Study of Language
- LING 201 (3) Introduction to Linguistics
- LING 355 (3) Language Acquisition 1

Note: students may select either EDEC 203 or CEAP 250

Complementary Courses (12 credits)
12 credits selected from the English Department undergraduate complementary course list (www.mcgill.ca/english/undergrad/complimentary-courses/). A minimum of 6 credits at the 300 level or higher

**Literature (6 credits)**

**Cultural Studies (3 credits)**

**Drama/Theatre (3 credits)**

5.10.6 Bachelor of Education (B.Ed.) – Secondary Mathematics (120 credits)

Revision, August 2011. Start of revision.

The Bachelor of Education (B.Ed.) – Secondary Mathematics program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Freshman courses (in addition to the 120 credits for the program) for a total of 150 credits.

The aim of the B.Ed. Secondary Education program is to prepare strong beginning teachers for the secondary school level. This integrated program consists of academic studies, professional studies, and school-based practicum components. All of this is supported by studies in pedagogy, curriculum, and educational foundations.

The Secondary Mathematics program provides students with the learning opportunities needed to become proficient Mathematics teachers.

Please note that graduates of teacher education programs are recommended by the University for Quebec certification to the Quebec Ministère de l’Éducation, du Loisir et du Sport (MELS). For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

**Freshman Program**

Students normally complete 30 credits in their Freshman (U0) year.

The Freshman year is the time to take introductory-level courses in Mathematics, as well as to explore areas that are not normally taken as teachable subject areas within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

Students in the Secondary Mathematics program must complete three Math prerequisite courses in their Freshman year, MATH 133, MATH 140, and MATH 141.

In addition, students select courses from the recommended list below or other courses in consultation with the Program Adviser. The French Second Language (FRSL) courses suggested require a placement test to determine the appropriate course level.

- CEAP 250 (3) Research Essay & Rhetoric
- EDEM 220 (3) Contemporary Issues in Education
- FRSL 101D1 (3) Beginners’ French
- FRSL 101D2 (3) Beginners’ French
- FRSL 207D1 (3) Elementary French 01
- FRSL 207D2 (3) Elementary French 01
- FRSL 211D1 (3) Oral and Written French 1
- FRSL 211D2 (3) Oral and Written French 1
- MATH 133 (3) Linear Algebra and Geometry
- MATH 140 (3) Calculus 1
- MATH 141 (4) Calculus 2
- RELG 204 (3) Judaism, Christianity and Islam
- RELG 207 (3) The Study of World Religions 1

**Required Courses (45 credits)**

- EDEC 201 (1) First Year Professional Seminar
- EDEC 215 (0) English Language Requirement
- EDEC 247 (3) Policy Issues in Quebec Education
- EDEC 254 (1) Second Professional Seminar (Secondary)

</tbody>
</table>
**Secondary Mathematics Subject Area (54 credits)**

Secondary Mathematics students complete 54 credits selected in consultation with the Program Adviser in one of two options. They are expected to have completed the prerequisite courses MATH 133, MATH 140, and MATH 141 or their equivalents. Freshman students will take them as part of their Freshman program.

Students entering from CEGEP should only choose this program if they have a strong background in their CEGEP Mathematics courses. The 100-level prerequisite courses (MATH 133, MATH 140, and MATH 141) are considered CEGEP level and only students entering a five-year program (out-of-province and directly from high school) are eligible to take them. Students entering with Advanced Standing without having completed these prerequisites will be required to make up any deficiencies in these courses over and above the degree requirements.

**Option 1**

27 credits from the list of "Required Mathematics Courses" and 27 credits from the list of "Complementary Mathematics Courses"

Or

**Option 2:**

27 credits from the list of "Required Mathematics Courses" and

9 credits from the list of "Complementary Mathematics Courses"

And

18 credits of designated courses in another "teachable" subject area (English, Social Sciences, or Science and Technology - see these Secondary Education programs for courses)

Students must also take:

3 credits of Secondary Teaching Methods for the teachable subject area

(Note: This additional Methods course counts as a 3-credit elective in the program.)

Students in the English Secondary Profile who select Mathematics as their other "teachable subject area" take:

18 credits from the list of "Mathematics Courses for Other Secondary Subject Areas"

And

3 credits of "Secondary Teaching Methods - Mathematics"

(Note: This additional Methods course counts as a 3-credit elective in the program.)

**Required Mathematics Courses**

27 credits for Secondary Mathematics Option 1 and Option 2 students

Note: Students with Mathematics as their "other teachable subject area" select from the list of "Mathematics Courses for Students in Other Secondary Subject Areas".

- **MATH 222** (3) Calculus 3
- **MATH 223** (3) Linear Algebra
- **MATH 235** (3) Algebra 1
- **MATH 242** (3) Analysis 1
- **MATH 315** (3) Ordinary Differential Equations
- **MATH 323** (3) Probability
- **MATH 324** (3) Statistics
- **MATH 338** (3) History and Philosophy of Mathematics
- **MATH 348** (3) Topics in Geometry

**Complementary Mathematics Courses**

27 credits from the list below for Secondary Mathematics Option 1 students or

9 credits from the list below for Secondary Mathematics Option 2 students

Note: Students with Mathematics as their "other teachable subject area" select from the list of "Mathematics Courses for Students in Other Secondary Subject Areas".

- **COMP 202** (3) Introduction to Computing 1
Mathematics Courses for Students in Other Secondary Subject Areas

Students in other secondary subject areas selecting Mathematics as their "other teachable subject area" take the following 18 credits.

- MATH 222 (3) Calculus 3
- MATH 223 (3) Linear Algebra
- MATH 315 (3) Ordinary Differential Equations
- MATH 323 (3) Probability
- MATH 324 (3) Statistics
- MATH 348 (3) Topics in Geometry

Electives (6 credits)

6 credits of electives

Note: Students who have chosen to do 36 credits in one teachable subject and 18 credits in another will use 3 credits of electives to take the Secondary Teaching Methods course needed for their second teachable subject.

Revision, August 2011. End of revision.

5.10.7 Bachelor of Education (B.Ed.) – Secondary Social Sciences – History and Citizenship, Ethics and Religious Culture (120 credits)

Revision, August 2011. Start of revision.

The Bachelor of Education (B.Ed.) - Secondary Social Sciences - History and Citizenship, Ethics and Religious Culture program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Freshman courses (in addition to the 120 credits for the program) for a total of 150 credits.

The aim of the B.Ed. Secondary Education Program is to prepare strong beginning teachers for the secondary school level. This integrated program consists of academic studies, professional studies, and school-based practicum components. All of this is supported by studies in pedagogy, curriculum, and educational foundations.
The Secondary Social Sciences - History and Citizenship, Ethics and Religious Culture program provides students with the learning opportunities needed to become proficient Social Science teachers with a strong knowledge base in the associated disciplinary areas.

Please note that graduates of teacher education programs are recommended by the University for Quebec certification to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS). For more information about teacher certification in Quebec, please refer to the Faculty of Education section under “Overview of Faculty Programs”, “Undergraduate Education Programs”, and “Quebec Teacher Certification”.

**Freshman Program**

Students normally complete 30 credits in their Freshman (U0) year.

The Freshman year is the time to take introductory-level courses in a teachable subject area, as well as to explore areas that are not normally taken as within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

In addition, in consultation with the Program Adviser, students may select courses from the recommended course list below or other courses. The list includes History, Geography, and Religious Studies courses that may be used toward the academic component of the Secondary Social Sciences course requirements. Also included are several French Second Language (FRSL) courses for which placement tests are required to determine the appropriate level.

- GEOG 311  (3)  Economic Geography
- GEOG 331  (3)  Urban Social Geography

Note: In consultation with the Program Adviser, students may choose their Geography courses from those that comprise the B.A. Minor Concentration Geography program.

**Electives (6 credits)**

6 credits

**Revision, August 2011. End of revision.**

**5.10.9 Bachelor of Education (B.Ed.) - Secondary Science and Technology (120 credits)**

The Bachelor of Education (B.Ed.) - Secondary Science and Technology program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Freshman courses (in addition to the 120 credits for the program) for a total of 150 credits.

The aim of the B.Ed. Secondary Education program is to prepare strong beginning teachers for the secondary school level. This integrated program consists of academic studies, professional studies, and school-based practicum components. All of this is supported by studies in pedagogy, curriculum, and educational foundations.

The Secondary Science and Technology program provides students with the subject matter expertise in the Living World, Earth and Space, the Material World, and the Technological World needed to teach the secondary science curriculum in Quebec schools.

Please note that graduates of teacher education programs are recommended by the University for Quebec certification to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS). For more information about teacher certification in Quebec, please refer to the Faculty of Education section under “Overview of Faculty Programs”, “Undergraduate Education Programs”, and “Quebec Teacher Certification”.

**Freshman Program - Basic Sciences**

Students who start their Education program in U0 normally complete 30 credits in their Freshman year.

Freshmen in the Science and Technology program must complete the 29 to 30 credits of Basic Science courses listed below in their first year of studies.

**Fall term:**
- BIOL 111, CHEM 110, MATH 139 or MATH 140 or MATH 150, PHYS 101 or PHYS 131

**Winter term:**
- BIOL 112, CHEM 120, MATH 141 or MATH 151, PHYS 102 or PHYS 142

Students should consult a program adviser for guidance on which fall and winter term Math and Physics courses should be taken. Course choices depend on a student's background in science and plans for upper-level Physics courses.

### Freshman Program - Complementary

For Freshman students with advanced standing in one or more of the basic sciences, the Faculty also recommends some of the courses listed below. French Second Language (FRSL) courses require a placement test to determine the course level.

### Complementary Courses (15 credits)

15 credits selected as described below.
Multicultural Education
3 credits from:
EDEC 233 (3) First Nations and Inuit Education
EDEC 248 (3) Multicultural Education
EDEC 249 (3) Global Education and Social Justice

Philosophy of Education
3 credits from:
EDEC 260 (3) Philosophical Foundations
EDEC 261 (3) Philosophy of Catholic Education

Media, Technology, Computers and Education
3 credits from:
EDEC 262 (3) Media, Technology and Education
EDPT 200 (3) Integrating Educational Technology in Classrooms
EDPT 204 (3) Educational Media 1

For students with a background in computers or other media applications in education, the following courses may be substituted for the above:
EDPT 341 (3) Instructional Programming 1
EDPT 420 (3) Media Literacy for Education

Secondary Teaching Methods - Science and Technology
6 credits
EDES 335 (3) Teaching Secondary Science 1
EDES 435 (3) Teaching Secondary Science 2

Secondary Science and Technology (54 credits)
54 credits in designated science courses selected to provide subject matter expertise in the four areas of:
- the Material World
- Earth and Space
- the Living World
- the Technological World

Note: Students entering this program from CEGEP should have completed the basic science equivalents in CEGEP. The 100-level basic sciences are considered CEGEP level and only students entering a five-year program (out-of-province and directly from high school) are eligible to take them. Students entering with advanced standing without having completed these prerequisites (or their equivalents) will be required to make up any deficiencies in these courses over and above the degree requirements.

Overview of the 54 credits for the program:
A minimum of 12 credits at the 300-level or above;
39 credits of courses across the four subject areas:
- 3 credits of Statistics
- 3 credits of History of Science
- 9 credits minimum from courses on the Living World
- 9 credits minimum from courses on Earth and Space
- 9 credits minimum from courses on the Material World
- 6 credits minimum from courses on the Technological World

15 credits of complementary courses either spread across the four subjects areas or concentrated in one subject area. Students who plan to teach Grade 11 Chemistry or Physics should concentrate their 15 complementary credits in the Material World.

All students need to plan their course selections with attention to the prerequisites.

Statistics
3 credits:

MATH 203 (3) Principles of Statistics 1

History of Science
3 credits from:

BIOL 210 (3) Perspectives of Science
HIST 238 (3) Histories of Science
HIST 319 (3) The Scientific Revolution
HIST 350 (3) Science and the Enlightenment

The Living World - Required
6 credits:
* Note: Students select either BIOL 200 or LSCI 202, but not both.

BIOL 200* (3) Molecular Biology
BIOL 206 (3) Methods in Biology of Organisms
LSCI 202* (3) Molecular Cell Biology

The Living World - Complementary
Students select a minimum of 3 credits to a maximum of 15 credits from courses on the Living World in the areas of:

Cell and Molecular Biology
Human and Organismal Biology
Populations, Ecosystems, and Evolution

The Living World - Cell and Molecular Biology

BIOL 201 (3) Cell Biology and Metabolism
BIOL 202 (3) Basic Genetics
BIOL 300 (3) Molecular Biology of the Gene
BIOL 301 (4) Cell and Molecular Laboratory
BIOL 313 (3) Eukaryotic Cell Biology

The Living World - Human and Organismal Biology

BIOL 205 (3) Biology of Organisms
EDKP 292 (3) Nutrition and Wellness
EDKP 395 (3) Exercise Physiology
NUTR 207 (3) Nutrition and Health
NUTR 307 (3) Human Nutrition
PHGY 209 (3) Mammalian Physiology 1
<table>

### Earth and Space - Complementary

Students select a minimum of 9 credits to a maximum of 24 credits from courses on Earth and Space with the following specifications:
- a minimum of 6 to a maximum of 21 credits from Earth and Space
- a minimum of 3 to a maximum of 18 credits from Environment

Earth and Space - Environment

ENVR 200  (3)  The Global Environment
ENVR 201  (3)  Society, Environment and Sustainability
ENVR 203  (3)  Knowledge, Ethics and Environment
ENVR 301  (3)  Environmental Research Design
GEOG 200  (3)  Geographical Perspectives: World Environmental Problems
GEOG 203  (3)  Environmental Systems
GEOG 205  (3)  Global Change: Past, Present and Future
GEOG 221  (3)  Environment and Health

The Material World - Required
Students complete 9 credits of required courses on the Material World as specified below.

CHEM 281  (3)  Inorganic Chemistry 1

One of:
CHEM 203  (3)  Survey of Physical Chemistry
CHEM 223  (2)  Introductory Physical Chemistry 1

One of:
CHEM 211  (3)  Organic Chemistry 1 Lectures
CHEM 212  (4)  Introductory Organic Chemistry 1
CHEM 232  (4)  Organic Chemistry Principles

The Material World - Complementary
Students select 0 to 15 credits of complementary courses on the Material World.

* Note: If CHEM 287 is selected, CHEM 297 must also be taken.

CHEM 222  (4)  Introductory Organic Chemistry 2
CHEM 243  (2)  Introductory Physical Chemistry 2
CHEM 253  (1)  Introductory Physical Chemistry 1 Laboratory
CHEM 263  (1)  Introductory Physical Chemistry 2 Laboratory
CHEM 287*  (2)  Introductory Analytical Chemistry
CHEM 297*  (1)  Introductory Analytical Chemistry Laboratory
CHEM 301  (3)  Modern Inorganic Chemistry 2
CHEM 302  (3)  Introductory Organic Chemistry 3
CHEM 307  (3)  Analytical Chemistry of Pollutants
CHEM 319  (3)  Chemistry of Energy, Storage and Utilization
CHEM 381  (3)  Inorganic Chemistry 2
CHEM 392  (3)  Integrated Inorganic/Organic Laboratory
MATH 222  (3)  Calculus 3
PHYS 224  (3)  Physics of Music
The Technological World
Students select a minimum of 6 credits to a maximum of 15 credits from courses on the Technological World.

* Note: Students may take either COMP 102 or COMP 280, but not both.

** Note: Credit will not be given for COMP 102 if it is taken concurrently with or after COMP 202.

- COMP 102* (3) Computers and Computing
- COMP 206 (3) Introduction to Computing 1
- COMP 202** (3) Introduction to Software Systems
- COMP 280* (3) History and Philosophy of Computing
- COMP 364 (3) Computer Tools for Life Sciences
- MATH 204 (3) Principles of Statistics 2
- PHYS 334 (3) Advanced Materials

5.10.10 Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Biology - Cell/Molecular with Minor Chemistry for Teachers (135 credits)

The Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Biology - Cell/Molecular with Minor Chemistry for Teachers is jointly offered by the Faculty of Science and the Faculty of Education. Separately, the Bachelor of Science degree requires 90 credits (or 120 credits for students who have not completed the basic sciences) and the Bachelor of Education degree requires 120 credits. In the concurrent program, the requirements for the two degrees are combined in such a way that students complete 135 (or 165 credits) to fulfill all the requirements for graduation for both the B.Sc. and the B.Ed.

Graduates of the B.Ed. degree are recommended by the University to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS) for Quebec Teacher Certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

The Major Concentration Biology - Cell/Molecular with Minor Chemistry is one of the nine variations of the program and allows students to focus their Science degree in Cell/Molecular Biology with a subspecialization in Chemistry.

To fulfil the requirements for graduation for the Concurrent Bachelor of Science and Bachelor of Education, the 135 credits (or 165 credits for students admitted without basic sciences) include the following:
(30 credits of Science Freshman Program (for students admitted without basic sciences))
60 credits of Education Component
69 credits of Science Component consisting of:
- 36 credits of Major Concentration Biology - Cell/Molecular
- 18 credits of Minor Chemistry
- 15 credits of Additional Science Courses
6 credits of Electives, of which at least 3 credits must be Science Electives, depending on how many credits count toward both the B.Sc. and the B.Ed. degrees.
For details on the counting of credits toward both degrees (double-counting) visit the program website http://www.mcgill.ca/scienceforteachers/.

B.Sc. Freshman Program

Students who enter Science in U0 will normally be registered in the Science Freshman Program until they complete their first year. They must consult an adviser in the Science Office for Undergraduate Student Advising (SOUA) to obtain advice and approval of their course selection. Full details are available on the SOUA website at http://www.mcgill.ca/science/sousa. Academic advising is also available by email. The address is newstudentadvising.science@mcgill.ca.

Students normally complete 30 credits which must include at least seven courses from the list of Approved Freshman Science courses, selected as follows:

**General Math and Science Breadth**
Six of the Freshman courses must satisfy one of the following:
Option 1) 2 courses from MATH and 4 courses from BIOL, CHEM or PHYS;
or
Option 2) 3 courses from MATH and 3 courses from BIOL, CHEM or PHYS.

**Science Complementary**
The seventh course is chosen from the list of Approved Freshman Science Courses.

Notes:
1. Students who have not studied all of Biology, Chemistry, and Physics at the grade 12 level or equivalent are strongly advised to include at least one course in the missing discipline in their Freshman Program.
2. Many students will complete more than seven courses from the Approved Freshman Science Courses list, particularly those who wish to leave several options open for their choice of major.
3. Students entering the Freshman Program must be aware of the department specific requirements when selecting their courses. Detailed advising information is available at http://www.mcgill.ca/science/sousa/new_students/u0/bsc_freshman/specif/.
4. The maximum number of courses per term, required, complementary, and elective, is five.

**List of Approved Freshman Science Courses**
Select the approved courses according to the instructions above.

Note:
* CHEM 115 (not open to students who are taking or have taken CHEM 110 or CHEM 120)
* CHEM 120 (not open to students who have taken CHEM 115)

Second physics course, one of:

PHYS 102 (4)  Introductory Physics - Electromagnetism
PHYS 142 (4)  Electromagnetism and Optics

Electives

Students wishing to take elective courses may choose them from introductory courses offered by departments in the Faculties of Science or of Arts. A list of recommended courses is found at http://www.mcgill.ca/science/sousa/new_students/u0/bsc_freshman/approved/. Certain courses offered by other faculties may also be taken, but some restrictions apply.

Consult the SOUSA website at http://www.mcgill.ca/science/sousa/continuing_students/bsc/outside/ for more information about taking courses from other faculties.

Education Component (60 credits)

60 credits of Education Component consisting of:

54 credits of required courses
6 credits of complementary courses

Required Courses

54 credits

* Note: The courses marked with an asterisk are counted toward both degrees. They will count as "electives" for the B.Sc. degree, although a grade of "C" or better is required.

The English Language Requirement (EDEC 215) must be taken in the Fall semester following the Freshman year.

Human Biochemical Genetics (3)  BIOL 575

or other appropriate course at the 300 level or higher with the permission of an adviser.

Minor Chemistry (18 credits)

Required Courses
18 credits selected as follows:
* Note: denotes courses with CEGEP equivalents.
Substitutions for these by more advanced courses may be made at the discretion of the Adviser.

Survey of Physical Chemistry (3)  CHEM 203
Introductory Organic Chemistry 1 (4)  CHEM 212*
Introductory Organic Chemistry 2 (4)  CHEM 222*
Introductory Physical Chemistry 1 Laboratory (1)  CHEM 253
Inorganic Chemistry 1 (3)  CHEM 281
Introductory Analytical Chemistry (2)  CHEM 287
Introductory Analytical Chemistry Laboratory (1)  CHEM 297

Additional Science Courses
15 credits selected as follows:
12 credits:
BIOL 210 (3)  Perspectives of Science
CHEM 381 (3)  Inorganic Chemistry 2
MATH 203 (3)  Principles of Statistics 1
MATH 222 (3)  Calculus 3

Plus 3 credits, one of:
CHEM 180 (3)  World of Chemistry: Environment
CHEM 181 (3)  World of Chemistry: Food
CHEM 182 (3)  World of Chemistry: Technology
CHEM 183 (3)  World of Chemistry: Drugs

Electives (6 credits)
6 credits, of which at least 3 credits must be Science Electives.
The electives must be chosen in such a way that the credit counts needed for graduation are satisfied.
The Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Biology - Cell/Molecular with Minor Physics for Teachers (135 credits)

The Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Biology - Cell/Molecular with Minor Physics for Teachers is jointly offered by the Faculty of Science and the Faculty of Education. Separately, the Bachelor of Science degree requires 90 credits (or 120 credits for students who have not completed the basic sciences) and the Bachelor of Education degree requires 120 credits. In the concurrent program, the requirements for the two degrees are combined in such a way that students complete 135 (or 165 credits) to fulfill all the requirements for graduation for both the B.Sc. and the B.Ed.

Graduates of the B.Ed. degree are recommended by the University to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS) for Quebec Teacher Certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

The Major Concentration Biology - Cell/Molecular with Minor Physics is one of the nine variations of the program and allows students to focus their Science degree in Cell/Molecular Biology with a subspecialization in Physics.

To fulfill the requirements for graduation for the Concurrent Bachelor of Science and Bachelor of Education, the 135 credits (or 165 credits for students admitted without basic sciences) include the following:

B.Sc. Freshman Program

Students who enter Science in U0 will normally be registered in the Science Freshman Program until they complete their first year. They must consult an adviser in the Science Office for Undergraduate Student Advising (SOUSA) to obtain advice and approval of their course selection. Full details are available on the SOUSA website at http://www.mcgill.ca/science/sousa. Academic advising is also available by email. The address is newstudentadvising.science@mcgill.ca.

Students normally complete 30 credits which must include at least seven courses from the list of Approved Freshman Science Courses, selected as follows:

General Math and Science Breadth

Six of the Freshman courses must satisfy one of the following:

Option 1) 2 courses from MATH and 4 courses from BIOL, CHEM or PHYS;

or

Option 2) 3 courses from MATH and 3 courses from BIOL, CHEM or PHYS.

Science Complementary

The seventh course is chosen from the list of Approved Freshman Science Courses.

Notes:

1. Students who have not studied all of Biology, Chemistry, and Physics at the grade 12 level or equivalent are strongly advised to include at least one course in the missing discipline in their Freshman Program.

2. Many students will complete more than seven courses from the Approved Freshman Science Courses list, particularly those who wish to leave several options open for their choice of major.

3. Students entering the Freshman Program must be aware of the department specific requirements when selecting their courses. Detailed advising information is available at http://www.mcgill.ca/science/sousa/new_students/u0/bsc_freshman/specifc/.

4. The maximum number of courses per term, required, complementary, and elective, is five.

List of Approved Freshman Science Courses

Select the approved courses according to the instructions above.

Note:
* CHEM 115 (not open to students who are taking or have taken CHEM 110 or CHEM 120)
* CHEM 120 (not open to students who have taken CHEM 115)

BIOL 111  (3)  Principles: Organismal Biology
BIOL 112  (3)  Cell and Molecular Biology
CHEM 110  (4)  General Chemistry 1
CHEM 115*  (4)  Accelerated General Chemistry: Giants in Science
CHEM 120*  (4)  General Chemistry 2
COMP 202  (3)  Introduction to Computing 1
ESYS 104  (3)  The Earth System
MATH 133  (3)  Linear Algebra and Geometry
PSYC 100  (3)  Introduction to Psychology

First calculus course, one of:
MATH 139  (4)  Calculus 1 with Precalculus
MATH 140  (3)  Calculus 1
MATH 150  (4)  Calculus A

Second calculus course, one of:
MATH 141  (4)  Calculus 2
MATH 151  (4)  Calculus B

First physics course, one of:
PHYS 101  (4)  Introductory Physics - Mechanics
PHYS 131  (4)  Mechanics and Waves

Second physics course, one of:
PHYS 102  (4)  Introductory Physics - Electromagnetism
PHYS 142  (4)  Electromagnetism and Optics

**Electives**

Students wishing to take elective courses may choose them from introductory courses offered by departments in the Faculties of Science or of Arts. A list of recommended courses is found at http://www.mcgill.ca/science/sousa/new_students/bsc/freshman/approved/. Certain courses offered by other faculties may also be taken, but some restrictions apply.

Consult the SOUSA website at http://www.mcgill.ca/science/sousa/continuing_students/bsc/outside/ for more information about taking courses from other faculties.

**Education Component (60 credits)**

60 credits of Education Component, consisting of:
54 credits of required courses
6 credits of complementary courses

**Required Courses**

54 credits
* Note: The courses marked with an asterisk are counted toward both degrees. They will count as "electives" for the B.Sc. degree, although a grade of "C" or better is required.

The English Language Requirement (EDEC 215) must be taken in the Fall semester following the Freshman year.

EDEC 201 (1) First Year Professional Seminar
EDEC 215 (0) English Language Requirement
EDEC 247* (3) Policy Issues in Quebec Education
EDEC 254 (1) Second Professional Seminar (Secondary)
EDEC 262* (3) Media, Technology and Education
EDEC 351 (2) Third Professional Seminar (Secondary)
EDEC 404 (3) Fourth Year Professional Seminar (Sec)
EDES 335 (3) Teaching Secondary Science 1
EDES 350 (3) Classroom Practices (Secondary)
EDES 435 (3) Teaching Secondary Science 2
EDFE 200 (2) First Field Experience (K/Elem & Secondary)
EDFE 254 (3) Second Field Experience (Secondary)
EDFE 351 (8) Third Field Experience (Secondary)
EDFE 451 (7) Fourth Field Experience (Secondary)
EDPE 300* (3) Educational Psychology
EDPE 304 (3) Measurement and Evaluation
EDPI 309* (3) Exceptional Students
EDPI 341 (3) Instruction in Inclusive Schools

**Complementary Courses**

6 credits selected as follows:

* Note: The courses marked with an asterisk are counted toward both degrees. They will count as "electives" for the B.Sc. degree, although a grade of "C" or better is required.

3 credits, one of the three following courses:

EDEC 233* (3) First Nations and Inuit Education
EDEC 248* (3) Multicultural Education
EDEC 249* (3) Global Education and Social Justice

3 credits, one of the two following courses:

EDEC 260* (3) Philosophical Foundations
EDEC 261* (3) Philosophy of Catholic Education

**Major Concentration Biology - Cell/Molecular (36 credits)**

The Major Concentration Biology - Cell/Molecular is a planned sequence of courses designed to permit a degree of specialization in cell/molecular biology.

Advising Note: Freshman students should be aware that PHYS 101 and/or PHYS 102 are required for some of the courses in the major and minor concentrations in Biology.

**Required Courses**

29 credits selected as follows:
Students who have already taken CHEM 212 or its equivalent will choose another appropriate complementary course, to be approved by the Adviser. Regardless of the substitution, students must take at least 36 credits in this program.

**Electives (6 credits)**

6 credits, of which at least 3 credits must be Science Electives.

The electives must be chosen in such a way that the credit counts needed for graduation are satisfied.

---

**5.10.12 Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Biology - Organismal with Minor Chemistry for Teachers (135 credits)**

The Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Biology - Organismal with Minor Chemistry for Teachers is jointly offered by the Faculty of Science and the Faculty of Education. Separately, the Bachelor of Science degree requires 90 credits (or 120 credits for students who have not completed the basic sciences) and the Bachelor of Education degree requires 120 credits. In the concurrent program, the requirements for the two degrees are combined in such a way that students complete 135 (or 165 credits) to fulfill all the requirements for graduation for both the B.Sc. and the B.Ed.

Graduates of the B.Ed. degree are recommended by the University to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS) for Quebec Teacher Certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

The Major Concentration Biology - Organismal with Minor Chemistry is one of the nine variations of the program and allows students to focus their Science degree in Organismal Biology with a subspecialization in Chemistry.

To fulfill the requirements for graduation for the Concurrent Bachelor of Science and Bachelor of Education, the 135 credits (or 165 credits for students admitted without basic sciences) include the following:

- (30 credits of Science Freshman Program (for students admitted without basic sciences))
- 60 credits of Education Component
- 69 credits of Science Component consisting of:
  - 36 credits of Major Concentration Biology - Organismal
  - 18 credits of Minor Chemistry
  - 15 credits of Additional Science Courses
- 6 credits of Electives, of which at least 3 credits must be Science Electives, depending on how many credits count toward both the B.Sc. and the B.Ed. degrees.
For details on the counting of credits toward both degrees (double-counting) visit the program website http://www.mcgill.ca/scienceforteachers/.

B.Sc. Freshman Program

Students who enter Science in U0 will normally be registered in the Science Freshman Program until they complete their first year. They must consult an adviser in the Science Office for Undergraduate Student Advising (SOUSA) to obtain advice and approval of their course selection. Full details are available on the SOUSA website at http://www.mcgill.ca/science/sousa. Academic advising is also available by email. The address is newstudentadvising.science@mcgill.ca.

Students normally complete 30 credits which must include at least seven courses from the list of Approved Freshman Science courses, selected as follows:

General Math and Science Breadth

Six of the Freshman courses must satisfy one of the following:

Option 1) 2 courses from MATH and 4 courses from BIOL, CHEM or PHYS;

or

Option 2) 3 courses from MATH and 3 courses from BIOL, CHEM or PHYS.

Science Complementary

The seventh course is chosen from the list of Approved Freshman Science Courses.

Notes:

1. Students who have not studied all of Biology, Chemistry and Physics at the grade 12 level or equivalent are strongly advised to include at least one course in the missing discipline in their Freshman Program.

2. Many students will complete more than seven courses from the Approved Freshman Science Courses list, particularly those who wish to leave several options open for their choice of major.

3. Students entering the Freshman Program must be aware of the department specific requirements when selecting their courses. Detailed advising information is available at http://www.mcgill.ca/science/sousa/bsc/freshman.

4. The maximum number of courses per term, required, complementary, and elective, is five.

List of Approved Freshman Science Courses

Select the approved courses according to the instructions above.

Note:

* CHEM 115 (not open to students who are taking or have taken CHEM 110 or CHEM 120)

* CHEM 120 (not open to students who have taken CHEM 115)

6 credits of complementary courses  

**Required Courses**  
54 credits  
*Note: The courses marked with an asterisk are counted toward both degrees. They will count as "electives" for the B.Sc. degree, although a grade of "C" or better is required. The English Language Requirement (EDEC 215) must be taken in the Fall semester following the Freshman Year.*  
EDEC 201  (1)  First Year Professional Seminar
EDEC 215 (0) English Language Requirement
EDEC 247* (3) Policy Issues in Quebec Education
EDEC 254 (1) Second Professional Seminar (Secondary)
EDEC 262* (3) Media, Technology and Education
EDEC 351 (2) Third Professional Seminar (Secondary)
EDEC 404 (3) Fourth Year Professional Seminar (Sec)
EDES 335 (3) Teaching Secondary Science 1
EDES 350 (3) Classroom Practices (Secondary)
EDES 435 (3) Teaching Secondary Science 2
EDFE 200 (2) First Field Experience (K/Elem & Secondary)
EDFE 254 (3) Second Field Experience (Secondary)
EDFE 351 (8) Third Field Experience (Secondary)
EDFE 451 (7) Fourth Field Experience (Secondary)
EDPE 300* (3) Educational Psychology
EDPE 304 (3) Measurement and Evaluation
EDPI 309* (3) Exceptional Students
EDPI 341 (3) Instruction in Inclusive Schools

Complementary Courses
6 credits selected as follows:
* Note: The courses marked with an asterisk are counted toward both degrees. They will count as "electives" for the B.Sc. degree, although a grade of "C" or better is required.

3 credits, one of the three following courses:
EDEC 233* (3) First Nations and Inuit Education
EDEC 248* (3) Multicultural Education
EDEC 249* (3) Global Education and Social Justice

3 credits, one of the two following courses:
EDEC 260* (3) Philosophical Foundations
EDEC 261* (3) Philosophy of Catholic Education

Major Concentration Biology - Organismal (37 credits)
The Major Concentration Biology - Organismal is a planned sequence of courses designed to permit a degree of specialization in organismal biology.
Advising Note: Freshman students should be aware that PHYS 101 and/or PHYS 102 are required for some of the courses in the major and minor concentrations in Biology.

Required Courses*
28 credits selected as follows:
* Students who have already taken CHEM 212 or its equivalent will choose another appropriate complementary course, to be approved by the Adviser. Regardless of the substitution, students must take at least 36 credits in this program.
BIOL 200 (3) Molecular Biology
BIOL 201 (3) Cell Biology and Metabolism

Electives (5 credits)
  5 credits, of which at least 2 credits must be Science Electives.

The electives must be chosen in such a way that the credit counts needed for graduation are satisfied.

5.10.14 Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Chemistry with Minor Biology for Teachers (135 credits)

The Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Chemistry with Minor Biology for Teachers is jointly offered by the Faculty of Science and the Faculty of Education. Separately, the Bachelor of Science degree requires 90 credits (or 120 credits for students who have not completed the basic sciences) and the Bachelor of Education degree requires 120 credits. In the concurrent program, the requirements for the two degrees are combined in such a way that students complete 135 (or 165 credits) to fulfill all the requirements for graduation for both the B.Sc. and the B.Ed.

Graduates of the B.Ed. degree are recommended by the University to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS) for Quebec Teacher Certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

The Major Concentration Chemistry with Minor Biology is one of the nine variations of the program and allows students to focus their Science degree in Chemistry with a subspecialization in Biology.

To fulfill the requirements for graduation for the Concurrent Bachelor of Science and Bachelor of Education, the 135 credits (or 165 credits for students admitted without basic sciences) include the following:

(30 credits of Science Freshman Program (for students admitted without basic sciences))
60 credits of Education Component
69 credits of Science Component consisting of:
- 36 credits of the Major Concentration Chemistry
- 24 credits of the Minor Biology
- 9 credits of Additional Science Courses

6 credits of Electives, of which at least 3 credits must be Science Electives, depending on how many credits count toward both the B.Sc. and the B.Ed. degrees.

For details on the counting of credits toward both degrees (double-counting) visit the program website http://www.mcgill.ca/scienceforteachers/.

**B.Sc. Freshman Program**

Students who enter Science in U0 will normally be registered in the Science Freshman Program until they complete their first year. They must consult an adviser in the Science Office for Undergraduate Student Advising (SOUA) to obtain advice and approval of their course selection. Full details are available on the SOUSA website at http://www.mcgill.ca/science/sousa. Academic advising is also available by email. The address is newstudentadvising.science@mcgill.ca.

Students normally complete 30 credits which must include at least seven courses from the list of Approved Freshman Science Courses, selected as follows:

**General Math and Science Breadth**

Six of the Freshman courses must satisfy one of the following:

Option 1) 2 courses from MATH and 4 courses from BIOL, CHEM or PHYS;

or

Option 2) 3 courses from MATH and 3 courses from BIOL, CHEM or PHYS.

**Science Complementary**

The seventh course is chosen from the list of Approved Freshman Science Courses.

Notes:

1. Students who have not studied all of Biology, Chemistry, and Physics at the grade 12 level or equivalent are strongly advised to include at least one course in the missing discipline in their Freshman Program.

2. Many students will complete more than seven courses from the Approved Freshman Science Courses list, particularly those who wish to leave several options open for their choice of major.

3. Students entering the Freshman Program must be aware of the department specific requirements when selecting their courses. Detailed advising information is available at http://www.mcgill.ca/science/sousa/new_students/u0/bsc_freshman/.

4. The maximum number of courses per term, required, complementary, and elective, is five.

**List of Approved Freshman Science Courses**

Select the approved courses according to the instructions above.

Note:

* CHEM 115 (not open to students who are taking or have taken CHEM 110 or CHEM 120)
* CHEM 120 (not open to students who have taken CHEM 115)

Second physics course, one of:

- PHYS 102 (4) Introductory Physics - Electromagnetism
- PHYS 142 (4) Electromagnetism and Optics

Electives

Students wishing to take elective courses may choose them from introductory courses offered by departments in the Faculties of Science or of Arts. A list of recommended courses is found at [http://www.mcgill.ca/science/sousa/new_students/u0/bsc_freshman/approved/](http://www.mcgill.ca/science/sousa/new_students/u0/bsc_freshman/approved/). Certain courses offered by other faculties may also be taken, but some restrictions apply.

Education Component (60 credits)

60 credits of Education Component, consisting of:

54 credits of required courses

6 credits of complementary courses

Required Courses

54 credits

*Note: The courses marked with an asterisk are counted toward both degrees. They will count as "electives" for the B.Sc. degree, although a grade of "C" or better is required.

The English Language Requirement (EDEC 215) must be taken in the Fall semester following the Freshman year.

- EDEC 201 (1) First Year Professional Seminar
- EDEC 215 (0) English Language Requirement
- EDEC 247* (3) Policy Issues in Quebec Education
- EDEC 254 (1) Second Professional Seminar (Secondary)
- EDEC 262* (3) Media, Technology and Education
- EDEC 351 (2) Third Professional Seminar (Secondary)
- EDEC 404 (3) Fourth Year Professional Seminar (Sec)
- EDES 335 (3) Teaching Secondary Science 1
- EDES 350 (3) Classroom Practices (Secondary)
- EDES 435 (3) Teaching Secondary Science 2
- EDFE 200 (2) First Field Experience (K/Elem & Secondary)
- EDFE 254 (3) Second Field Experience (Secondary)
- EDFE 351 (8) Third Field Experience (Secondary)
- EDFE 451 (7) Fourth Field Experience (Secondary)
EDPE 300*  (3)  Educational Psychology
EDPE 304  (3)  Measurement and Evaluation
EDPI 309*  (3)  Exceptional Students
EDPI 341  (3)  Instruction in Inclusive Schools

**Complementary Courses**

6 credits selected as follows:

* Note: The courses marked with an asterisk are counted toward both degrees. They will count as "electives" for the B.Sc. degree, although a grade of "C" or better is required.

3 credits, one of the three following courses:

- EDEC 233*  (3)  First Nations and Inuit Education
- EDEC 248*  (3)  Multicultural Education
- EDEC 249*  (3)  Global Education and Social Justice

3 credits, one of the two following courses:

- EDEC 260*  (3)  Philosophical Foundations
- EDEC 261*  (3)  Philosophy of Catholic Education

**Major Concentration Chemistry (36 credits)**

The Major Concentration Chemistry is not certified by the Ordre des Chimistes du Québec. Students interested in pursuing a career in Chemistry in Quebec are advised to take an appropriate B.Sc. program in Chemistry.

The Major concentration is a planned sequence of courses designed to permit a degree of specialization in this discipline.

**Required Courses***

18 credits

* Note: Required courses taken at CEGEP or elsewhere that are not credited toward the Concurrent B.Sc. and B.Ed. must be replaced by courses from the Complementary Course List equal to or exceeding their credit value. Regardless of the substitution, students must take at least 36 credits in this program.

- CHEM 203  (3)  Survey of Physical Chemistry
- CHEM 212  (4)  Introductory Organic Chemistry 1
- CHEM 222  (4)  Introductory Organic Chemistry 2
- CHEM 253  (1)  Introductory Physical Chemistry 1 Laboratory
- CHEM 281  (3)  Inorganic Chemistry 1
- CHEM 287  (2)  Introductory Analytical Chemistry
- CHEM 297  (1)  Introductory Analytical Chemistry Laboratory

**Complementary Courses**

18 credits selected from:

- CHEM 219  (3)  Introduction to Atmospheric Chemistry
- CHEM 263  (1)  Introductory Physical Chemistry 2 Laboratory
- CHEM 302  (3)  Introductory Organic Chemistry 3
- CHEM 307  (3)  Analytical Chemistry of Pollutants
- CHEM 334  (3)  Advanced Materials
CHEM 367 (3) Instrumental Analysis 1
CHEM 381 (3) Inorganic Chemistry 2
CHEM 382 (3) Organic Chemistry: Natural Products
CHEM 531 (3) Chemistry of Inorganic Materials
CHEM 571 (3) Polymer Synthesis
CHEM 582 (3) Supramolecular Chemistry
CHEM 591 (3) Bioinorganic Chemistry

Minor Biology (24 credits)

Electives (6 credits)

6 credits, of which at least 3 credits must be Science Electives.

The electives must be chosen in such a way that the credit counts needed for graduation are satisfied.

5.10.16 Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Physics with Minor Biology for Teachers (135 credits)

The Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Physics with Minor Biology for Teachers is jointly offered by the Faculty of Science and the Faculty of Education. Separately, the Bachelor of Science degree requires 90 credits (or 120 credits for students who have not completed the basic sciences) and the Bachelor of Education degree requires 120 credits. In the concurrent program, the requirements for the two degrees are combined in such a way that students complete 135 (or 165 credits) to fulfil all the requirements for graduation for both the B.Sc. and the B.Ed.

Graduates of the B.Ed. degree are recommended by the University to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS) for Quebec Teacher Certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

The Major Concentration Physics with Minor Biology is one of the nine variations of the program and allows students to focus their Science degree in Physics with a subspecialization in Biology.

To fulfil the requirements for graduation for the Concurrent Bachelor of Science and Bachelor of Education, the 135 credits (or 165 credits for students admitted without basic sciences) include the following:

(30 credits of Science Freshman Program (for students admitted without basic sciences))

60 credits of Education Component

69 credits of Science Component consisting of:

- 36 credits of Major Concentration Physics
- 24 credits of Minor Biology
- 9 credits of Additional Science Courses

6 credits of Electives, of which at least 3 credits must be Science Electives, depending on how many credits count toward both the B.Sc. and the B.Ed. degrees.

For details on the counting of credits toward both degrees (double-counting) visit the program website http://www.mcgill.ca/scienceforteachers/.

B.Sc. Freshman Program

Students who enter Science in U0 will normally be registered in the Science Freshman Program until they complete their first year. They must consult an adviser in the Science Office for Undergraduate Student Advising (SOU/S) to obtain advice and approval of their course selection. Full details are available on the SOUS website at http://www.mcgill.ca/science/sousa. Academic advising is also available by email. The address is newstudentadvising.science@mcgill.ca.

Students normally complete 30 credits which must include at least seven courses from the list of Approved Freshman Science courses, selected as follows:

General Math and Science Breadth

Six of the Freshman courses must satisfy one of the following:

Option 1) 2 courses from MATH and 4 courses from BIOL, CHEM or PHYS;

or

Option 2) 3 courses from MATH and 3 courses from BIOL, CHEM or PHYS.
Science Complementary

The seventh course is chosen from the list of Approved Freshman Science Courses.

Notes:

1. Students who have not studied all of Biology, Chemistry, and Physics at the grade 12 level or equivalent are strongly advised to include at least one course in the missing discipline in their Freshman Program.

2. Many students will complete more than seven courses from the Approved Freshman Science Courses list, particularly those who wish to leave several options open for their choice of major.

3. Students entering the Freshman Program must be aware of the department specific requirements when selecting their courses. Detailed advising information is available at http://www.mcgill.ca/science/sousa/new_students/u0/bsc_freshman/specific/.

4. The maximum number of courses per term, required, complementary, and elective, is five.

List of Approved Freshman Science Courses

Select the approved courses according to the instructions above.

Note:

* CHEM 115 (not open to students who are taking or have taken CHEM 110 or CHEM 120)
* CHEM 120 (not open to students who have taken CHEM 115)

Electives

Students wishing to take elective courses may choose them from introductory courses offered by departments in the Faculties of Science or of Arts. A list of recommended courses is found at http://www.mcgill.ca/science/sousa/new_students/u0/bsc_freshman/approved/. Certain courses offered by other faculties may also be taken, but some restrictions apply.

Consult the SOUSA website at http://www.mcgill.ca/science/sousa/continuing_students/bsc/outside/ for more information about taking courses from other faculties.

Education Component (60 credits)

60 credits of Education Component, consisting of:

54 credits of required courses
6 credits of complementary courses

Required Courses

54 credits

* Note: The courses marked with an asterisk are counted toward both degrees. They will count as "electives" for the B.Sc. degree, although a grade of "C" or better is required.

The English Language Requirement (EDEC 215) must be taken in the Fall semester following the Freshman year.

</tr>
</tbody>
</table>
3 credits, one of the two following courses:

- EDEC 260* (3) Philosophical Foundations
- EDEC 261* (3) Philosophy of Catholic Education

**Major Concentration Physics (36 credits)**

The Major Concentration Physics is a planned sequence of courses designed to permit a degree of specialization in this discipline.

**Required Courses**

30 credits selected as follows:

* Note: Required courses taken at CEGEP or elsewhere that are not credited toward the Concurrent B.Sc. and B.Ed. must be replaced by courses from the Complementary Course List equal to or exceeding their credit value. Regardless of the substitution, students must take at least 36 credits in this program.

- MATH 222 (3) Calculus 3
- MATH 223 (3) Linear Algebra
- MATH 314 (3) Advanced Calculus
- MATH 315 (3) Ordinary Differential Equations
- PHYS 230 (3) Dynamics of Simple Systems
- PHYS 232 (3) Heat and Waves
- PHYS 257 (3) Experimental Methods 1
- PHYS 333 (3) Thermal and Statistical Physics
- PHYS 340 (3) Majors Electricity and Magnetism
- PHYS 446 (3) Majors Quantum Physics

**Complementary Courses**

6 credits selected from:

- PHYS 214 (3) Introductory Astrophysics
- PHYS 224 (3) Physics of Music
- PHYS 241 (3) Signal Processing
- PHYS 258 (3) Experimental Methods 2
- PHYS 334 (3) Advanced Materials
- PHYS 534 (3) Nanoscience and Nanotechnology

or any 300- or 400-level course approved by an adviser.

**Minor Biology (24 credits)**

24-25 credits for the Minor Biology selected as follows:

15 credits of required courses
9-10 credits of complementary courses

**Required Courses**

15 credits

- BIOL 200 (3) Molecular Biology
- BIOL 201 (3) Cell Biology and Metabolism
- BIOL 202 (3) Basic Genetics
**Complementary Courses**

9-10 credits of complementary courses, CHEM 212 and 6 selected from the Biology Department's course offerings, at the 300 level or above.

* Note: Students who have already taken CHEM 212 or its equivalent will choose another appropriate course, to be approved by the Adviser.

**Additional Science Courses (9 credits)**

9 credits selected as follows:

6 credits:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 210</td>
<td>3</td>
<td>Perspectives of Science</td>
</tr>

- PHYS 258 (3) Experimental Methods 2
- PHYS 334 (3) Advanced Materials
- PHYS 334 (3) Nanoscience and Nanotechnology

or any 300- or 400-level course approved by an adviser.

Minor Chemistry (18 credits)

Required Courses
18 credits selected as follows:
* denotes courses with CEGEP equivalents.
Substitutions for these by more advanced courses may be made at the discretion of the Adviser.

**CHEM 203 (3) Survey of Physical Chemistry**
**CHEM 212* (4) Introductory Organic Chemistry 1**
**CHEM 222* (4) Introductory Organic Chemistry 2**
**CHEM 253 (1) Introductory Physical Chemistry 1 Laboratory**
**CHEM 281 (3) Inorganic Chemistry 1**
**CHEM 287 (2) Introductory Analytical Chemistry**
**CHEM 297 (1) Introductory Analytical Chemistry Laboratory**

**Additional Science Courses (15 credits)**
15 credits selected as follows:

9 credits
**BIOL 210 (3) Perspectives of Science**
**CHEM 381 (3) Inorganic Chemistry 2**
**MATH 203 (3) Principles of Statistics 1**

plus 3 credits, one of:
**CHEM 180 (3) World of Chemistry: Environment**
**CHEM 181 (3) World of Chemistry: Food**
**CHEM 182 (3) World of Chemistry: Technology**
**CHEM 183 (3) World of Chemistry: Drugs**

plus 3 credits, one additional Physics (PHYS) course approved by the Physics Department.

**Electives (6 credits)**
6 credits, of which at least 3 credits must be Science Electives.
The electives must be chosen in such a way that the credit counts needed for graduation are satisfied.

**5.10.18 Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Mathematics for Teachers (135 credits)**

The Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Mathematics for Teachers is jointly offered by the Faculty of Science and the Faculty of Education. Separately, the Bachelor of Science degree requires 90 credits (or 120 credits for students who have not completed the basic sciences) and the Bachelor of Education degree requires 120 credits. In the concurrent program, the requirements for the two degrees are combined in such a way that students complete 135 (or 165 credits) to fulfill all the requirements for graduation for both the B.Sc. and the B.Ed.

Graduates of the B.Ed. degree are recommended by the University to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS) for Quebec Teacher Certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

The Major Mathematics is one of the nine variations of the program and allows students to focus their Science degree in Mathematics.

To fulfill the requirements for graduation for the Concurrent Bachelor of Science and Bachelor of Education, the 135 credits (or 165 credits for students admitted without basic sciences) include the following:

(30 credits of Science Freshman Program (for students admitted without basic sciences))
60 credits of Education Component
54 credits of Science Component consisting of:
- 54 credits of the Major Mathematics
21 credits of Electives, of which at least 18 credits must be Science Electives, depending on how many credits count toward both the B.Sc. and the B.Ed. degrees.

For details on the counting of credits toward both degrees (double-counting) visit the program website http://www.mcgill.ca/scienceforteachers/.

**B.Sc. Freshman Program**

Students who enter Science in U0 will normally be registered in the Science Freshman Program until they complete their first year. They must consult an adviser in the Science Office for Undergraduate Student Advising (SOUSA) to obtain advice and approval of their course selection. Full details are available on the SOUSA website at http://www.mcgill.ca/science/sousa. Academic advising is also available by email. The address is newstudentadvising.science@mcgill.ca.

Students normally complete 30 credits which must include at least seven courses from the list of Approved Freshman Science Courses, selected as follows:

**General Math and Science Breadth**

Six of the Freshman courses must satisfy one of the following:

Option 1) 2 courses from MATH and 4 courses from BIOL, CHEM or PHYS; or

Option 2) 3 courses from MATH and 3 courses from BIOL, CHEM or PHYS.

**Science Complementary**

The seventh course is chosen from the list of Approved Freshman Science Courses.

Notes:

1. Students who have not studied all of Biology, Chemistry, and Physics at the grade 12 level or equivalent are strongly advised to include at least one course in the missing discipline in their Freshman Program.

2. Many students will complete more than seven courses from the Approved Freshman Science Courses list, particularly those who wish to leave several options open for their choice of major.

3. Students entering the Freshman Program must be aware of the department specific requirements when selecting their courses. Detailed advising information is available at http://www.mcgill.ca/science/sousa/new_students/u0/bsc_freshman/specif/.

4. The maximum number of courses per term, required, complementary, and elective, is five.

**List of Approved Freshman Science Courses**

Select the approved courses according to the instructions above.

Note:

* CHEM 115 (not open to students who are taking or have taken CHEM 110 or CHEM 120)

* CHEM 120 (not open to students who have taken CHEM 115)

- MATH 151 (4) Calculus B

First physics course, one of:

- PHYS 101 (4) Introductory Physics - Mechanics
- PHYS 131 (4) Mechanics and Waves

Second physics course, one of:

- PHYS 102 (4) Introductory Physics - Electromagnetism
- PHYS 142 (4) Electromagnetism and Optics

**Electives**

Students wishing to take elective courses may choose them from introductory courses offered by departments in the Faculties of Science or of Arts. A list of recommended courses is found at [http://www.mcgill.ca/science/sousa/new_students/bsc_freshman/approved/](http://www.mcgill.ca/science/sousa/new_students/bsc_freshman/approved/). Certain courses offered by other faculties may also be taken, but some restrictions apply.

**Education Component (60 credits)**

60 credits of Education Component, consisting of:

- 54 credits of required courses
- 6 credits of complementary courses

**Required Courses**

54 credits

* Note: The courses marked with an asterisk are counted toward both degrees. They will count as "electives" for the B.Sc. degree, although a grade of "C" or better is required.

The English Language Requirement (EDEC 215) must be taken in the Fall semester following the Freshman year.

- EDEC 201 (1) First Year Professional Seminar
- EDEC 215 (0) English Language Requirement
- EDEC 247* (3) Policy Issues in Quebec Education
- EDEC 254 (1) Second Professional Seminar (Secondary)
- EDEC 262* (3) Media, Technology and Education
- EDEC 351 (2) Third Professional Seminar (Secondary)
- EDEC 404 (3) Fourth Year Professional Seminar (Sec)
- EDES 350 (3) Classroom Practices (Secondary)
- EDES 353 (3) Teaching Secondary Mathematics 1
- EDES 453 (3) Teaching Secondary Mathematics 2
- EDFE 200 (2) First Field Experience (K/Elem & Secondary)
- EDFE 254 (3) Second Field Experience (Secondary)
- EDFE 351 (8) Third Field Experience (Secondary)
- EDFE 451 (7) Fourth Field Experience (Secondary)
Complementary Courses

6 credits selected as follows:

* Note: The courses marked with an asterisk are counted toward both degrees. They will count as "electives" for the B.Sc. degree, although a grade of "C" or better is required.

3 credits, one of the three following courses:

- EDEC 233* (3) First Nations and Inuit Education
- EDEC 248* (3) Multicultural Education
- EDEC 249* (3) Global Education and Social Justice

3 credits, one of the two following courses:

- EDEC 260* (3) Philosophical Foundations
- EDEC 261* (3) Philosophy of Catholic Education

Major Mathematics (54 credits)

Program Prerequisites

Students entering the Major program are normally expected to have completed the courses below or their equivalents. Otherwise they will be required to make up any deficiencies in these courses over and above the 54 credits for the program.

- MATH 133 (3) Linear Algebra and Geometry
- MATH 140 (3) Calculus 1
- MATH 141 (4) Calculus 2

Required Courses

27 credits

Where appropriate, Honours courses may be substituted for equivalent Major courses.

* Students select either MATH 249 or MATH 316 but not both.

- MATH 222 (3) Calculus 3
- MATH 235 (3) Algebra 1
- MATH 236 (3) Algebra 2
- MATH 242 (3) Analysis 1
- MATH 243 (3) Analysis 2
- MATH 249* (3) Honours Complex Variables
- MATH 314 (3) Advanced Calculus
- MATH 315 (3) Ordinary Differential Equations
- MATH 316* (3) Complex Variables
- MATH 323 (3) Probability
Complementary Courses

27 credits selected with the following specifications:

12 credits specifically required of students in the Concurrent B.Sc. and B.Ed. Major Mathematics:

- COMP 202 (3) Introduction to Computing 1
- MATH 324 (3) Statistics
- MATH 338 (3) History and Philosophy of Mathematics
- MATH 348 (3) Topics in Geometry

at least 3 credits from:

- MATH 317 (3) Numerical Analysis
- MATH 335 (3) Computational Algebra
- MATH 340 (3) Discrete Structures 2

12 credits from:

It is highly recommended that students include MATH 318, MATH 328, MATH 339 and MATH 346 in their complementary courses.

- MATH 204 (3) Principles of Statistics 2
- MATH 318 (3) Mathematical Logic
- MATH 319 (3) Introduction to Partial Differential Equations
- MATH 320 (3) Differential Geometry
- MATH 326 (3) Nonlinear Dynamics and Chaos
- MATH 327 (3) Matrix Numerical Analysis
- MATH 328 (3) Computability and Mathematical Linguistics
- MATH 329 (3) Theory of Interest
- MATH 339 (3) Foundations of Mathematics
- MATH 346 (3) Number Theory
- MATH 352 (1) Problem Seminar
- MATH 407 (3) Dynamic Programming
- MATH 410 (3) Majors Project
- MATH 417 (3) Mathematical Programming
- MATH 423 (3) Regression and Analysis of Variance
- MATH 430 (3) Mathematical Finance
- MATH 447 (3) Introduction to Stochastic Processes
- MATH 523 (4) Generalized Linear Models
- MATH 525 (4) Sampling Theory and Applications

In consultation with an adviser, 3 of the 12 credits may be selected from other MATH courses or related disciplines.

Electives (21 credits)

21 credits of electives, of which at least 18 credits must be Science Electives chosen in consultation with the Science Adviser.

The electives must be chosen in such a way that the credit counts needed for graduation are satisfied.
The Bachelor of Music (B.Mus.) - Major Music Education, when offered concurrently with the B.Ed. Music Elementary and Secondary, provides students with the opportunity to obtain a Bachelor of Music degree and a Bachelor of Education degree after the completion of 137 credits, normally five years (172 credits or six years for out-of-province students*). The concurrent program combines academic studies in music, professional studies, and field experience. The two degrees are awarded during the same convocation period.

* Out-of-province students or those who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the Concurrent program.

To be admitted to the Concurrent program, students must satisfy the regular admission requirements of the Schulich School of Music and Faculty of Education. Normally, students will be admitted to both components of the Concurrent Program simultaneously. Applicants who already hold a Bachelor of Music degree should apply to the Faculty of Education. Students who have completed 30 or more credits in a Bachelor of Music program, exclusive of the Freshman Year for out-of-province students, should apply for admission to the Concurrent program.

All applications for the Concurrent program are to be made to the Admissions Office of the Schulich School of Music.

The B.Mus. Major Music Education program in the Schulich School of Music focuses on the development of the prospective music educator as a musician. This is achieved not only through core music history, theory, musicianship, and performance courses but also through different instrumental, vocal, and conducting techniques courses. Laboratory experiences provide an opportunity to develop facility with basic music rehearsing/teaching techniques, with emphasis on the ability to diagnose and correct technical and musical problems. The B.Ed. Music Elementary and Secondary program in the Faculty of Education focuses on the development of the musician as an educator. This is achieved through courses in educational foundations, music pedagogy and pedagogical support, and a practicum component comprised of four field experiences and supporting professional seminars.

Students who decide to complete only a Bachelor of Music may transfer at any time into the Bachelor of Music, Faculty Program. Students who wish to complete only the Bachelor of Education Music program have the option of doing so after the successful completion of the first two years of the Concurrent Program and MUIN 283 "BMus Concentration Final Examination" or equivalent. They would be required to complete 61 music credits, 6 elective credits, and 55 education credits from the program given below.

The components of the 137-credit Concurrent Bachelor of Music - Major Music Education and Bachelor of Education - Music Elementary and Secondary are as follows:

- 55 professional Education credits
- 70 Music academic credits
- 9 music elective credits
- 3 non-music elective credits

**Program Prerequisites - Freshman Program**

35 credits

**Prerequisite Courses**

35 credits distributed as follows:

- 2 credits (1 credit per term) Assigned Small Ensemble
- 4 credits (2 credits per term) Basic Ensemble Training
- 6 credits of Non-Music Electives

Students who can demonstrate through auditions and placement tests that they have mastered the material in any of the courses below will be exempt from them and may proceed to more advanced courses. First-year students enrolled in the Bachelor of Music program who have completed the Quebec Diploma of Collegial Studies (Diplôme d'études collégiales) in a Music concentration or equivalent, or students transferring from other universities or colleges, who have successfully completed a course in the history of Western music, with a grade of C or better, will be exempted from the first-year Western Musical Traditions requirement (MUHL 186).

- MUHL 186 (3) Western Musical Traditions
- MUIN 180 (3) BMus Practical Lessons 1
- MUIN 181 (3) BMus Practical Lessons 2
- MUPD 135 (1) Music as a Profession 1
- MUPD 136 (1) Music as a Profession 2
- MUSP 140 (2) Musicianship Training 1
- MUSP 141 (2) Musicianship Training 2
Musicianship (Keyboard) 1
MUSP 170 (1) Musicianship (Keyboard) 1

Musicianship (Keyboard) 2
MUSP 171 (1) Musicianship (Keyboard) 2

Theory and Analysis 1
MUTH 150 (3) Theory and Analysis 1

Theory and Analysis 2
MUTH 151 (3) Theory and Analysis 2

Required Music Components (49 credits)
49 credits of required Music courses distributed as follows:
25 credits of Music Education
11 credits of Theory
4 credits of Musicianship
3 credits of Music History
6 credits of Performance

Music Education
25 credits:

MUCT 235 (3) Vocal Techniques
MUGT 215 (1) Basic Conducting Techniques
MUGT 354 (3) Music for Children
MUGT 358 (3) General Music for Adults and Teenagers
MUGT 401 (3) Issues in Music Education
MUIG 202 (3) Woodwind Techniques
MUIG 203 (3) Brass Techniques
MUIG 204 (3) Percussion Techniques
MUIG 356 (3) Jazz Instruction: Philosophy and Techniques

Theory
11 credits:

MUTH 250 (3) Theory and Analysis 3
MUTH 251 (3) Theory and Analysis 4
MUTH 350 (3) Theory and Analysis 5
MUTH 461 (2) Choral and Keyboard Arranging

Musicianship
4 credits:

MUSP 240 (2) Musicianship Training 3
MUSP 241 (2) Musicianship Training 4

Music History
3 credits:

MUHL 286 (3) Critical Thinking About Music

Performance
6 credits:
Complementary Music Components (21 credits)
21 credits of complementary Music courses distributed as follows:
9 credits of Music Education
2 credits of Musicianship
6 credits of Music History
4 credits of Performance

Music Education
3 credits, one of:
- MUIT 201 (3) String Techniques
- MUIT 250 (3) Guitar Techniques

3 credits, one of:
- MUCT 315 (3) Choral Conducting 1
- MUIT 315 (3) Instrumental Conducting

3 credits, select EDEA 362 or any course with a prefix of MUIT or MUGT.
- EDEA 362 (3) Movement, Music and Communication

Musicianship
2 credits from:
- MUSP 324 (2) Musicianship for Strings
- MUSP 330 (2) Musicianship for Woodwind
- MUSP 335 (2) Musicianship for Brass
- MUSP 346 (2) Post-Tonal Musicianship
- MUSP 350 (2) Musicianship for Pianists
- MUSP 353 (2) Musicianship for Voice
- MUSP 354 (2) Introduction to Improvisation and Ornamentation
- MUSP 355 (2) Musicianship for Percussion
- MUSP 381 (2) Singing Renaissance Notation

Music History
6 credits of courses with a MUHL or a MUPP prefix.

Performance
4 credits from:
- MUEN 563 (2) Jazz Vocal Workshop
- MUEN 572 (2) Cappella Antica
- MUEN 573 (2) Baroque Orchestra
### Electives (12 credits)
- 9 credits of free electives
- 3 credits of non-music electives

### Required Education Courses (45 credits)
*Note: Students take either EDEE 355 or EDPE 304, but not both.

3 credits from:
5.10.19.1 Admissions to the Concurrent Bachelor of Music (Major Music Education) and Bachelor of Education in Music Program

Applicants without a completed Bachelor of Music degree who wish to pursue a teacher education degree specializing in Music should apply to the Concurrent Bachelor of Music (Music Education)/Bachelor of Education in Music program. Students who have partially completed a Bachelor of Music program are eligible to apply for Advanced Standing in the Concurrent program.

Application to the Concurrent B.Mus./B.Ed. program may be made online at www.mcgill.ca/applying. Information is available on that site or may be obtained from:

Admissions Office
McGill University
Schulich School of Music
555 Sherbrooke Street West
Montreal, QC H3A 1E3
Telephone: 514-398-4546

Those who have completed a Bachelor of Music degree may apply for Advanced Standing in the Bachelor of Education in Music program in the Faculty of Education. Application to the Bachelor of Education in Music may be made online at www.mcgill.ca/applying. Information is available on that site or may be obtained from:

Enrolment Services
McGill University
Service Point
3415 McTavish Street
Montreal, QC H3A 1Y1
Telephone: 514-398-7878
Fax: 514-398-5544

Program details are available from:

Professor Caroline Riches, Program Director
Department of Integrated Studies in Education
Telephone: 514-398-4527

5.10.20 Bachelor of Education (B.Ed.) - Kindergarten and Elementary Education (120 credits)

The Bachelor of Education (B.Ed.) - Kindergarten and Elementary Education program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Freshman courses (in addition to the 120 credit program) for a total of 150 credits.

The Kindergarten and Elementary Education program leads to certification to teach children between the ages of 5 and 11 years (kindergarten and elementary school). The program consists of academic and professional courses, as well as studies in pedagogy and educational foundations. Each year of the program provides a school-based practicum.

Please note that graduates of teacher education programs are recommended by the University for Quebec certification to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS). For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

Freshman Program
Students normally complete 30 credits in their Freshman (U0) year.

The Freshman year is the time to take introductory-level courses in the subjects taught in elementary school, as well as to explore areas that are not normally taken as "teachable" subject area courses within B.Ed. programs (e.g. Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

In addition, in consultation with the Program Adviser, students may select courses from the recommended course list below or other courses. Included in the list are several French Second Language (FRSL) courses for which placement tests are required to determine the appropriate level. Also recommended are any 100- or 200-level courses with the subject codes of ANTH (Anthropology), ENGL (English), GEOG (Geography), HIST (History), MUAR (Music-Arts Faculty), POLI (Political Science), PSYC (Psychology), RELG (Religious Studies), and SOCI (Sociology). For 200-level courses, information about any required prerequisites is found in the Minerva Class Schedule by "clicking on" the course CRN for registration. Check prerequisites before registering.

### Required Courses (75 credits)

- **CEAP 250**  (3) Research Essay & Rhetoric
- **EDEE 325**  (3) Children's Literature
- **EDEM 220**  (3) Contemporary Issues in Education
- **EDES 366**  (3) Literature for Young Adults
- **FRSL 101D1**  (3) Beginners' French
- **FRSL 101D2**  (3) Beginners' French
- **FRSL 207D1**  (3) Elementary French 01
- **FRSL 207D2**  (3) Elementary French 01
- **FRSL 211D1**  (3) Oral and Written French 1
- **FRSL 211D2**  (3) Oral and Written French 1
- **MATH 111**  (3) Mathematics for Education Students
- **RELG 207**  (3) The Study of World Religions 1

### Courses (75 credits)

- **EDEC 201**  (1) First Year Professional Seminar
- **EDEC 203**  (3) Communication in Education
- **EDEC 215**  (0) English Language Requirement
- **EDEC 247**  (3) Policy Issues in Quebec Education
- **EDEC 253**  (1) Second Professional Seminar (Kindergarten/Elementary)
- **EDEC 405**  (3) Fourth Year Professional Seminar (K/Elem)
- **EDEE 223**  (3) Language Arts
- **EDEE 230**  (3) Elementary School Mathematics
- **EDEE 250**  (2) The Kindergarten Classroom
- **EDEE 260**  (3) Reading Methods - Early Childhood
- **EDEE 270**  (3) Elementary School Science
- **EDEE 275**  (2) Science Teaching
- **EDEE 280**  (3) Geography, History and Citizenship Education
- **EDEE 282**  (2) Teaching Social Sciences
- **EDEE 325**  (3) Children's Literature
- **EDEE 332**  (3) Teaching Mathematics 1
- **EDEE 353**  (3) Teaching and Learning in the Elementary Classroom
- **EDEE 355**  (3) Classroom-based Evaluation
- **EDER 360**  (2) Ethics and Religious Culture (K/Elementary)
- **EDFE 200**  (2) First Field Experience (K/Elem & Secondary)
- **EDFE 256**  (3) Second Field Experience (Kindergarten/Elementary)
- **EDFE 306**  (8) Third Field Experience (Kindergarten/Elementary)
Fourth Field Experience (K/Elem) (7)  
Educational Psychology (3)  
Exceptional Students (3)  
Instruction in Inclusive Schools (3)  

Complementary Courses (18 credits) 
18 credits of courses selected as described below.

Multicultural Education 
3 credits from:
- First Nations and Inuit Education (3)  
- Multicultural Education (3)  
- Global Education and Social Justice (3)  

Philosophy of Education 
3 credits from:
- Philosophical Foundations (3)  
- Philosophy of Catholic Education (3)  

Media, Technology, Computers, and Education 
3 credits from: 
* Note: Courses identified with an asterisk ("*") are recommended for students with a background in computers or other media applications in education.
- Media, Technology and Education (3)  
- Instructional Programming 1 (3)  
- Media Literacy for Education (3)  

Ethics, Values, or Religion 
3 credits from:
- The Religious Quest (3)  
- Moral Values and Human Action (3)  
- Living with Insight (3)  
- Ethics in Practice (3)  
- The Study of World Religions 1 (3)  

Kindergarten and Elementary Teaching Methods - Art, Drama, or Music 
3-6 credits from:
- Art Curriculum and Instruction - Elementary (3)  
- Curriculum and Instruction in Drama Education (3)  
- Music Curriculum and Instruction for Generalists (3)  

Kindergarten & Elementary Teaching Methods - Physical Education or English Second Language 
0-3 credits from:
Students may select both their Methods courses from the list above for Art, Drama, or Music.

* Note: Courses marked with an asterisk (*) have EDSL 350 "Essentials of English Grammar" as a prerequisite.

- EDK 332 (3) Physical Education Curriculum and Instruction
- EDSL 330* (3) Literacy 1: Teaching Reading in ESL
- EDSL 447* (3) Methods in TESL 1

**Kindergarten & Elementary Education - Subject Areas (21 credits)**

21 credits selected in consultation with the Program Adviser as follows:

12 credits in "teachable" subject area courses of the elementary school curriculum from the lists below for Art, English, Ethics and Religious Culture, French, Mathematics, Music, Natural Sciences, Physical Education, and Social Studies.

And

9 credits, 3 credits from each of any three subject areas not chosen above.

No more than 12 credits may be selected from any single course list.

**Art**

Students may select up to 12 credits from this list and from Art History (ARTH) courses.

- EDEA 204 (3) Drawing
- EDEA 205 (3) Painting 2
- EDEA 241 (3) Basic Art Media for Classroom
- EDEA 296 (3) Basic Design
- EDEA 304 (3) Painting 3
- EDEA 305 (3) Painting 4
- EDEA 307 (3) Drawing 2
- EDEA 410 (3) Aesthetics and Art for the Classroom
- EDEA 496 (3) Sculpture 1
- EDEA 497 (3) Sculpture 2

**English**

Students may select up to 12 credits from this list.

* Note: Starting with the 2009-2010 academic year, EDEE 325 Children's Literature is a required course for the Kindergarten and Elementary Education program and is included in the "Required Courses" list. Students admitted to the program in prior years may select this course as a teachable subject course for English.

- CLAS 203 (3) Greek Mythology
- COMS 200 (3) History of Communication
- COMS 210 (3) Introduction to Communication Studies
- COMS 300 (3) Media and Modernity in the 20th Century
- COMS 310 (3) Media and Feminist Studies
- COMS 320 (3) Media and Empire
- COMS 330 (3) Media in Cultural Life
- EDEE 325* (3) Children's Literature
- EDES 366 (3) Literature for Young Adults
- EDSL 350 (3) Essentials of English Grammar
- ENGL 200 (3) Survey of English Literature 1
- ENGL 201 (3) Survey of English Literature 2
- ENGL 204 (3) English Literature and the Bible

Electives (6 credits)

6 credits

5.10.21 Bachelor of Education (B.Ed.) - Kindergarten and Elementary Education - First Nations and Inuit Studies (120 credits)

The Bachelor of Education (B.Ed.) - Kindergarten and Elementary Education - First Nations and Inuit Studies program requires 120 credits and leads to teacher certification. Interested applicants must contact the office of First Nations and Inuit Education for admission information; please call 514-398-4533.

Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of freshman courses (in addition to the 120 credit program) for a total of 150 credits.

Students who are admitted as "mature students" are not required to complete the 30 credits of freshman courses. These students are admitted to U1.

Please note that graduates of teacher education programs are recommended by the University for Quebec Certification to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS). For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

Freshman Program

Students normally complete 30 credits in their Freshman (U0) year.

The Freshman year is the time to take introductory-level courses in the subjects taught in Elementary school, as well as to explore areas that are not normally taken as teachable subject area courses within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.).

Students admitted to the First Nations and Inuit Studies program in U0 should consult with their program adviser for guidance on course selection. More information is also found for newly admitted students to the B.Ed. Kindergarten and Elementary Education program on the Faculty of Education website at http://www.mcgill.ca/edu-dise/students/undergraduate/new/#KE.

5.10.22 Bachelor of Education (B.Ed.) – Kindergarten and Elementary Jewish Studies (120 credits)

Revision, August 2011. Start of revision.

Bachelor of Education (B.Ed.) - Kindergarten and Elementary Jewish Studies program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of freshman courses (in addition to the 120-credit program) for a total of 150 credits.

The Kindergarten and Elementary program leads to certification to teach children between the ages of 5 and 11 years (kindergarten and elementary school). The program consists of academic and professional courses, as well as studies in pedagogy and educational foundations. Each year of the program provides a school-based practicum.

The Jewish Studies option is addressed to students enrolled in the Kindergarten and Elementary program who wish to teach Jewish studies as well as general studies. Students are encouraged to acquire a strong background in Bible, Jewish prayer, Jewish holidays, and Jewish history prior to registering in the option. Students lacking the ability to teach in Hebrew should consider spending a semester at an Israeli university or seek other avenues to improve their language skills.

Please note that graduates of teacher education programs are recommended by the University for Quebec certification to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS). For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

Freshman Program

Students normally complete 30 credits in their Freshman (U0) year.

The Freshman year is the time to take introductory-level courses in the subjects taught in elementary school, as well as to explore areas that are not normally taken as teachable subject area courses within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

In addition, in consultation with the Program Adviser, students may select courses from the recommended course list below or other courses. Included in the list are several French Second Language (FRSL) courses for which placement tests are required to determine the appropriate level. Also recommended are any 100- or 200-level courses with the subject codes of ANTH (Anthropology), ENGL (English), GEOG (Geography), HIST (History), MUAR (Music-Arts Faculty), POLI (Political Science), PSYC (Psychology), RELG (Religious Studies), and SOCI (Sociology). For 200-level courses, information about any required prerequisites is found in the Minerva Class Schedule by clicking on the course CRN for registration. Check prerequisites before registering.

**Revision, August 2011. End of revision.**

5.10.22.1 Bachelor of Education Kindergarten and Elementary Program (Jewish Studies Option)

Students who wish to follow this option must contact:

Professor Eric Caplan  
Department of Integrated Studies in Education  
Faculty of Education  
Telephone: 514-398-6544  
Email: eric.caplan@mcgill.ca
5.10.23 Bachelor of Education (B.Ed.) – Kindergarten and Elementary Pédagogie de l'Immersion Française (120 credits)

Revision, August 2011. Start of revision.

The Major Pédagogie de l'Immersion Française is designed to meet the needs of students enrolled in the B.Ed. Kindergarten and Elementary program who wish to teach in French immersion contexts. It consists of 30 credits of French and second language education courses embedded within the regular B.Ed. Kindergarten and Elementary program. In addition, certain other course sections may be offered in French.

Competency in French

Students wishing to follow the PIF major must demonstrate a sufficient level of competency in French by passing the written and oral French Language Proficiency Test (FLPT) set by the Department of Integrated Studies in Education. Students should contact advisedise.education@mcgill.ca to indicate their desire to transfer into this major and will subsequently be contacted with a testing date. The test must be passed for the transfer to be accepted/processed.

For further information about the PIF major and/or the FLPT, please contact the Department at 514-398-4527.

### Bachelor of Education (B.Ed.) - Teaching French as a Second Language - TFSL - Joint Program with the Université de Montréal (120 credits)

(No admission for 2011-12)

The Bachelor of Education - Teaching French as a Second Language - Joint Program with the Université de Montréal (Baccalauréat en enseignement du français langue seconde) requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Freshman courses (in addition to the 120-credit program) for a total of 150 credits.

This jointly offered program prepares specialist teachers to teach French as a second language in Core French programs, immersion programs, intensive programs and classes d’accueil, at both the elementary and the secondary levels. Students will be admitted into, and registered at, either the Université de Montréal or McGill as their "home" university. Courses will be offered at the Université de Montréal during the Fall term and at McGill during the Winter term.

Additional Requirements for Students admitted to B.Ed. TFSL program:

Students admitted to the B.Ed. TFSL program are required to take a diagnostic test in French Language (written and oral). Based on test results, students may be required to successfully complete a remedial course above and beyond degree requirements. In addition, there will be a compulsory French language test for TFSL students prior to their third Field Experience. Students will be required to pass this test in order to continue in the program.

Please note that graduates of teacher education programs are recommended by the University for Quebec certification to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS). For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

### Freshman Program

The Freshman year is the time to take introductory-level courses in the subject field, as well as to explore areas that are not normally taken as academic subjects within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

In consultation with the Program Adviser, students select 30 credits of courses for their Freshman (U0) year of studies.

To ensure that students are able to function effectively in French, students may need to take French as a Second Language (FRSL) courses (placement tests are required to determine the appropriate level) in their Freshman year.

Recommended courses include language courses (selected from CLAS Greek/Latin; EAST Korean/Chinese/Japanese; GERM German; HISP Spanish; ISLA Arabic; ITAL Italian; RUSS Russian/Polish) and courses in the list below.

9 credits to increase the student's proficiency level in the teaching of French, the following courses (or equivalent courses if not available):

- FREN 239 (3) Stylistique comparée
- FREN 245 (3) Grammaire avancée
- FREN 334 (3) Analyse des textes littéraires

**Complementary Courses (40 credits)**

40 credits selected as described below.

3 credits from:

- EDEC 260 (3) Philosophical Foundations
- EDEC 261 (3) Philosophy of Catholic Education

8 credits, one of two sets of courses:

Either set:

- EDFE 362 (7) Stage d'enseignement en Français langue seconde
- EDSL 320 (1) Séminaire 3 professionnel

Or set:

- EDFM 361 (7) Stage d'enseignement 1
- EDUM 394 (1) Séminaire de stage-3e
11 credits, one of two sets of courses:

Either set:

EDFE 461 (9)  Stage d'enseignement - immersion
EDSL 420 (2)  Séminaire 4 professionnel

Or set:

EDFM 460 (9)  Stage d'enseignement 2
EDUM 499 (2)  Séminaire de stage-4e

3 credits from:

EDSL 345 (3)  Enseignement du FLS-immersion
EDUM 498 (3)  Didactique du français en accueil 2

3 credits from:

EDSL 472 (3)  Enseignement du français langue seconde-secondaire
EDUM 391 (3)  Didactique du français en accueil 1

3 credits from:

EDUM 493 (3)  Sciences humaines au primaire
EDUM 494 (3)  Didactique de l'univers social et TIC
EDUM 495 (3)  Recherche-résolution de problèmes
EDUM 496 (3)  Laboratoire de formation professionnelle
EDUM 497 (3)  Problématique en éducation préscolaire

3 credits from:

EDEC 248 (3)  Multicultural Education
LING 350 (3)  Linguistic Aspects of Bilingualism

6 credits of study of a second or third language, to be chosen from University offerings, so that students experience the learning processes that take place in the learning of a language.

5.10.25  Programme intensif de français Elementary Option

This option will be available for 2011-2012 (pending approval). Students interested in this option should apply to the B.Ed. Kindergarten and Elementary program. Information regarding selection of this option will be forthcoming from the Department.

5.10.26  Bachelor of Education (B.Ed.) - Teaching English as a Second Language - TESL Elementary and Secondary (121 credits)

The Bachelor of Education (B.Ed.) - Teaching English as a Second Language - TESL Elementary and Secondary program requires 121 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Freshman courses (in addition to the 121-credit program) for a total of 151 credits.

The program includes studies in language and language learning from linguistic, literary, social, cultural, and psychological perspectives, accompanied by field experiences. It prepares students to teach English as a Second Language (ESL) at both the elementary school level (including regular and intensive
ESL) and the secondary school level (including regular ESL and ESLA - English Second Language Arts), and provides a base for adult and other ESL teaching.

Please note that graduates of teacher education programs are recommended by the University for Quebec certification to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS). For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

The Department is committed to supporting students in the development and creation of their individual professional portfolios throughout their program.

**Freshman Program**

Students normally complete 30 credits in their Freshman (U0) year.

The Freshman year is the time to take introductory-level courses in the subject field, as well as to explore areas that are not normally taken as academic subjects within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

In consultation with the Program Adviser, students may select courses from the recommended course list below or other courses. Included in the list are several French Second Language (FRSL) courses for which placement tests are required to determine the appropriate level. In Quebec, ESL is taught within the French school system. Thus, proficiency in French is an asset for student teaching placements, and is a requirement for employment in Quebec.

To ensure that students are able to function effectively in French in the French school setting, EDSL 215 Effective Communication in French (placement test required) is a required course in the TESL program. This course is offered in alternate years and must be taken in students' first or second year of their program. Students may need to take prerequisite FRSL courses prior to taking EDSL 215. If so, the Freshman year is an ideal time in which to do so.

Other language courses (selected from CLAS Greek/Latin; EAST Korean/Chinese/Japanese; GERM German; HISP Spanish, ISLA Arabic; ITAL Italian; RUSS Russian/Polish) are also good choices for the Freshman year.

5.11 Programs for First Nations and Inuit

The following programs are offered in First Nations and Inuit communities for First Nations and Inuit teachers by the Faculty of Education.

Information may be obtained by contacting:

Faculty of Education
First Nations and Inuit Education (FNIE)
3700 McTavish Street, Room 244
Montreal, Quebec H3A 1Y2
Telephone: 514-398-4533
Fax: 514-398-2553
Website: www.mcgill.ca/edu-integrated

For details about the First Nations and Inuit Studies option within the Bachelor of Education Kindergarten and Elementary program, see section 5.10.21: Bachelor of Education (B.Ed.) - Kindergarten and Elementary Education - First Nations and Inuit Studies (120 credits).

5.11.1 Certificate in Education for First Nations and Inuit (60 credits)

This 60-credit program provides an opportunity for Algonquin, Cree, Inuit, Mi'kmaq, and Mohawk people to become qualified as teachers. It is offered on a part-time basis in Indigenous communities throughout Quebec in collaboration with, for example, the Cree School Board, the Kativik School Board, and various Mi'kmaq, Mohawk, and Algonquin education authorities.

Quebec graduates of this program receive Ministère de l'Éducation, du Loisir et du Sport (MELS) certification to teach at the elementary school level in First Nations and Inuit schools.

On completion of the Certificate requirements, trainees may apply for admission to the Bachelor of Education for Certified Teachers program with up to 30 credits advanced standing. Certain non-credit academic upgrading courses may be required of B.Ed. applicants.

Time Limit
The time limit for completion of the 60-credit Certificate in Education for First Nations and Inuit is 12 years. The University reserves the right to request that a student retake a course or courses after a five-year period if it is felt that too long a break has occurred in the ongoing nature of the training.

The following program requirements are for all students except those specializing in teaching physical education.

Required Courses (30 credits)

EDEC 203 (3) Communication in Education
EDEC 260 (3) Philosophical Foundations
EDEE 325 (3) Children's Literature
EDEM 202 (3) Native Family Dynamics & Supporting Institutions
EDPE 300 (3) Educational Psychology
EDPI 341 (3) Instruction in Inclusive Schools

12 credits of practicum courses:
EDEC 201 (1) First Year Professional Seminar
EDEC 253 (1) Second Professional Seminar (Kindergarten/Elementary)
EDFE 200 (2) First Field Experience (K/Elem & Secondary)
EDFE 256 (3) Second Field Experience (Kindergarten/Elementary)
EDFE 300 (5) Aboriginal Education Field Experience

Complementary Courses
30 credits selected as described below:

6 credits from the following language courses according to language group and fluency:

Algonquin
EDEC 234 (3) Algonquin Second Language 2
EDEE 293 (3) Algonquin Second Language 1
EDEE 294 (3) Algonquin Language 1
EDEE 295 (3) Algonquin Language 2

Cree
EDEC 241 (3) Cree Language 1
EDEC 242 (3) Cree Language 2

Inuktitut
EDEE 249 (3) Inuktitut Orthography and Grammar
EDEE 342 (3) Intermediate Inuktitut/Amerindian Language

Mi'kmaq
EDEC 237 (3) Mi'kmaq Second Language 1
EDEC 238 (3) Mi'kmaq Second Language 2
EDEC 239 (3) Mi'kmaq Language 1
EDEC 240 (3) Mi'kmaq Language 2

Mohawk
EDEC 236 (3) Mohawk Second Language 2
EDEE 296 (3) Mohawk Second Language 1
EDEE 297 (3) Mohawk Language 1
EDEE 298 (3) Mohawk Language 2

Naskapi
EDEC 227 (3) Naskapi Language 1
Cultural Skills and Language Arts

### 5.11.3 Admission to the Certificate in Education for First Nations and Inuit and to the Certificate in Education for First Nations and Inuit Physical Education

An applicant will normally be employed as a teacher or as a classroom assistant, have a valid teaching authorization from the appropriate teaching authority or a community education committee, be recommended by the school principal and an officer of the education authority, be recommended by a local community education committee, and be at least 21 years of age. Younger applicants will be considered for admission if they hold a Grade 12 Secondary School Diploma or a Diploma of Collegial Studies. The right of final decision for acceptance of candidates rests with McGill.

Those intending to complete the programs offered in cooperation with the Kativik School Board must be fluent and literate in Inuktitut/Inuinnaqtun. Fluency in Algonquin, Cree, Mi'kmaq, Mohawk, or Naskapi is not a condition for acceptance for applicants from these communities, but is considered an asset. Courses are available in all four of these languages for those teaching in immersion classes and other teaching situations where a knowledge of the first language is essential.
5.11.4 Certificate in Aboriginal Literacy Education (30 credits)

This 30-credit program is designed for Algonquin, Cree, Inuit, Mi’kmaq, and Kanienkehaka (Mohawk) students who wish to gain a deeper understanding of their Indigenous language, especially in its written form. It is aimed mainly at those who will be teaching their Indigenous language.

This certificate may be taken concurrently and completed within the Bachelor of Education for Certified Teachers program if the requirements for B.Ed. are fulfilled.

Required Courses (6 credits)

- EDEE 342 (3) Intermediate Inuktitut/Amerindian Language
- EDEE 344 (3) Advanced Inuktitut/Amerindian Language

Complementary Courses (18 credits)

18 credits selected as described below.

Language Courses

6 credits from the following language courses (or other courses as approved by the Director of Programs in First Nations and Inuit Education) including a beginning course (3 credits) in the Indigenous language as a first language (e.g., EDEC 241 Cree Language 1) and a second-level course (3 credits) in the same language (e.g., EDEC 242 Cree Language 2).

- EDEC 227 (3) Naskapi Language 1
- EDEC 228 (3) Naskapi Language 2
- EDEC 239 (3) Mi’kmaq Language 1
- EDEC 240 (3) Mi’kmaq Language 2
- EDEC 241 (3) Cree Language 1
- EDEC 242 (3) Cree Language 2
- EDEE 249 (3) Inuktitut Orthography and Grammar
- EDEE 294 (3) Algonquin Language 1
- EDEE 295 (3) Algonquin Language 2
- EDEE 297 (3) Mohawk Language 1
- EDEE 298 (3) Mohawk Language 2

Education Courses

12 credits from the list below:

- EDEA 242 (3) Cultural Skills 1
- EDEC 220 (3) Curriculum Development
- EDEC 403 (3) The Dialects of Inuktitut
- EDEE 223 (3) Language Arts
- EDEE 224 (3) Language Arts Part 2
- EDEE 240 (3) Use and Adaptation of Curricula
- EDEE 243 (3) Reading Methods in Inuktitut/Cree
- EDEE 247 (6) Individualized Instruction
- EDEE 248 (3) Reading and Writing Inuktitut/Cree
- EDEE 345 (3) Literature and Creative Writing 1
- EDEE 346 (3) Literature and Creative Writing 2
- EDES 365 (3) Experiences in Communications
- EDPE 304 (3) Measurement and Evaluation
Electives (6 credits)

6 credits of suitable courses approved by the Director of Programs in First Nations and Inuit Education.

5.11.4.1 Admission to the Certificate in Aboriginal Literacy Education

Students admitted to this program will be recommended by their communities. If the program is used for professional development, students will be Indigenous teachers employed in local schools. They must be mature students, or hold a Secondary V diploma or equivalent. The right of final decision for acceptance of candidates rests with McGill.

5.11.5 Certificate in Middle School Education in Aboriginal Communities (30 credits)

This 30-credit program focuses on developing the particular skills and abilities required of the Indigenous teacher in the middle school of his/her community. It does not lead to provincial certification. Rather, it prepares Indigenous teachers, who are bilingual or have some knowledge of their Indigenous language and who have already established themselves as teachers, to teach students at this level in ways that are developmentally and culturally appropriate. The program focuses on the particular psychological, emotional, and social needs of Aboriginal adolescents and the teacher's role in facilitating the transition between elementary and high school.

This certificate may be taken concurrently and completed within the Bachelor of Education for Certified Teachers program if the requirements for the B.Ed. are fulfilled.

</table>
5.11.5.1 Admission to the Certificate in Middle School Education in Aboriginal Communities

Applicants will normally have completed or be completing their B.Ed. for Certified Teachers. It is strongly recommended that they have some competence in their Indigenous language as indicated by the successful completion of at least two language courses. For those applying with degrees from other universities, additional courses may be required to match the McGill B.Ed. for Certified Teachers profile. As the program and courses will be delivered in the partnership communities, applicants must be recommended by their school boards or teaching authorities. The right of final decision for acceptance of candidates rests with McGill.

5.11.6 Certificate in First Nations and Inuit Educational Leadership (30 credits)

This 30-credit program is designed for First Nations and Inuit organizations to develop their role as leaders within the educational community. The program will focus on developing the core competencies of educational leaders, e.g., decision making and problem solving; fostering a self-reflective leader able to partner with parents to create community outreach; cultivating awareness of the holistic learning and developmental cycles of a child and the role of the educational leader in enhancing that development; maintaining the continuity of community and cultural values and aspirations within the structure of the administration of the school and other educational milieu; and understanding and supporting the pedagogical objectives and the administrative framework of the educational system.

This certificate may be taken concurrently and completed within the Bachelor of Education for Certified Teachers if the requirements for the B.Ed. are fulfilled. It may also be followed concurrently with the Certificate in Education - First Nations and Inuit.

Required Courses (15 credits)

EDEC 221 (3) Leadership and Group Skills
EDEC 222 (3) Personnel Management and Support
EDEC 233 (3) First Nations and Inuit Education
EDEC 311 (3) Resource Management
EDEC 312 (3) Practicum in Educational Leadership

Complementary Courses (15 credits)

15 credits from the list below or any other course approved by the Director of Programs in First Nations and Inuit Education.

EDEC 220 (3) Curriculum Development
EDEC 244 (3) Issues in Aboriginal Education
EDEE 240 (3) Use and Adaptation of Curricula
EDEE 245 (3) Orientation to Education
EDEE 340 (3) Special Topics: Cultural Issues
EDEM 202 (3) Native Family Dynamics & Supporting Institutions
EDES 365 (3) Experiences in Communications
EDPI 341 (3) Instruction in Inclusive Schools

5.11.6.1 Admission to the Certificate in First Nations and Inuit Educational Leadership

Students admitted to this program will be recommended by their communities. They must be mature students (21 years of age), or hold a Secondary V diploma or equivalent. Students must speak, read, and write fluently the language of instruction as agreed upon between the unit and the client School Board or Education Centre. For Nunavik applicants, students must have experience in a Nunavik educational or community organization. The right of final decision for acceptance of candidates rests with McGill.

5.11.7 Bachelor of Education for Certified Teachers — Elementary Education — Native and Northern (90 credits)

This 90-credit program is designed for teachers who are already certified to teach in elementary schools and who wish to earn a Bachelor of Education degree. Normally, a minimum of 60 credits must be taken in the program, and no more than 30 credits may be transferred from other institutions. Credits may be transferred from programs leading to the certificates in Educational Technology, Second Language Teaching, Inclusive Education, or Aboriginal Literacy Education taken concurrently. Credit may also be transferred from the Certificate in Education for First Nations and Inuit, which is normally completed before the B.Ed. Students completing the Bachelor of Education for Certified Teachers following the Certificate in Education for First Nations and Inuit will have accumulated a total of 120 credits, 60 for the certificate and a further 60 for the B.Ed.

The Certificate in Aboriginal Literacy Education, the Certificate in Middle School Education in Aboriginal Communities, or the Certificate in First Nations and Inuit Educational Leadership may be taken concurrently and completed within the Bachelor of Education for Certified Teachers if the required B.Ed. profile is fulfilled.
This program does not lead to further certification.

**Complementary Courses**
Candidates enrolled in the program complete 90 credits within the following general pattern.

**Academic Concentration (30 credits)**
30 credits in five (5) subject areas relevant to elementary education in a 12-9-3-3-3 pattern (i.e., 12 credits in one subject, 9 credits in a second subject, and 3 credits in each of three (3) other subject areas), or 30 academic credits in three subject areas in a 15-9-6 pattern.

Note: Subject areas relevant to elementary education, in broad terms, are the Arts (Art, Music and Drama), English, French, Science, Mathematics, Physical Education, Moral and Religious Education, Social Studies, Educational Technology, or an Aboriginal language.

**Cultural Development (15 credits)**
15 credits of courses that will enhance the candidate's cultural development. These are to be chosen in consultation with the Director of Programs in First Nations and Inuit Education.

**Education Concentration (30 credits)**
30 credits. Normally the Education concentration is completed within the Certificate in Education for First Nations and Inuit.

**Electives (15 credits)**
15 credits selected by the candidate after consultation with the Director of Programs in First Nations and Inuit Education.

5.11.7.1 **Admission Requirements for the B.Ed. for Certified Teachers**
Applicants apply on the basis of having completed the Certificate in Education for First Nations and Inuit or equivalent and must have the continued support of their education authority to attend the field-based program. The right of final decision for acceptance of candidates rests with McGill.

5.11.8 **Certificate in Aboriginal Education for Certified Teachers (30 credits)**
This 30-credit program provides training to assist mainstream teachers in becoming more effective teachers in First Nations and Inuit communities. It is designed to address subjects of particular interest and need in First Nations and Inuit schools, such as cultural socialization, cooperative learning, second-language teaching, and curriculum development.

**Required Courses (18 credits)**

5.11.8.1 Admission to the Certificate in Aboriginal Education for Certified Teachers

Applicants must provide the following:

- a Diploma of Collegial Studies (DEC) or its equivalent;
- evidence of having completed teacher training at an approved institution;
- a letter of recommendation from a competent authority.

All courses are normally given off campus and are normally limited to students enrolled in off-campus programs delivered through First Nations and Inuit Education. The right of final decision for acceptance of candidates rests with McGill.

5.11.9 Certificate in First Nations and Inuit Student Personnel Services (30 credits)

This program is offered by the Department of Educational and Counselling Psychology through First Nations and Inuit Education.

This 30-credit program is designed to provide Aboriginal school personnel advisers with a training program that will enable them to learn about the principles and practice of personnel services as generally applied in educational settings, to help Aboriginal student personnel advisers develop their personal skills, and to modify or adapt their services and the content to best suit the cultural and educational needs of Aboriginal students; to encourage Aboriginal student personnel advisers to take leadership in developing educational programs that address the social needs of their communities, to upgrade their academic qualifications and professional development; and to develop and make available, in English and in the languages of instruction, collections of professional and scholarly knowledge about students’ needs, and services in First Nations and Inuit communities.

Bearers of this certificate will be qualified to work as educational and school personnel advisers within the employ of an Aboriginal educational authority.

5.11.9.1 Admission to Certificate in First Nations and Inuit Student Personnel Services

Admission Requirements

- Speak, read, and write fluently the language of instruction as agreed upon between First Nations and Inuit Education and the contracting school board.
- Hold a student adviser position in an Aboriginal community. This may be a new appointment concurrent with registration in the program. The position must be sufficient to meet the practicum requirements of the program.
- Be recommended by the local education authority.
• Be at least 21 years of age (except for special permission). By this means, students will qualify for admission as Mature Students under McGill regulations, and thereby not be required to have a Diploma of Collegial Studies (DEC).
• Be recommended and selected by the school administration in collaboration with McGill personnel.

The right of final decision for acceptance of candidates rests with McGill.

5.12 Department of Kinesiology and Physical Education

5.12.1 Location

Currie Gym
475 Pine Avenue West
Montreal, Quebec H2W 1S4

Telephone: 514-398-4184

5.12.2 About the Department of Kinesiology and Physical Education

The Department of Kinesiology and Physical Education offers one program leading to a B.Ed. degree, one program leading to a B.Sc. degree, and a Minor in Kinesiology for Science students.

The Department also offers programs at the graduate level leading to an M.A. and M.Sc., and possibilities for doctoral studies. For further information, see the most current Graduate and Postdoctoral Studies Programs, Courses and University Regulations publication found at www.mcgill.ca/study.

Tanja Taivassalo; B.Sc., Ph.D.(McG.)

Adjunct Professors

Bernard Aguilaniu; M.D., Ph.D.(Grenoble)
Christian Duval; B.Sc.(UQTR), M.Sc.(UQAM), Ph.D.(McG.)
François Peronnet; M.Sc., Ph.D.(Montr.) Emeritus Professor

Associate Member

Robert Thomas Jagoe; B.A.(Camb.), M.B., B.Chir., MRCP(UK), CCST(Resp. and General (Internal) Med.), Ph.D.(Newcastle, UK), FRCP

Bachelor of Education (B.Ed.) - Physical and Health Education (120 credits)

The Bachelor of Education (B.Ed.) - Physical and Health Education is a 120-credit program leading to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Freshman courses (in addition to the 120 credit program) for a total of 150 credits.

The Physical and Health Education program prepares students to teach physical and health education at the elementary and secondary levels. In a unique structure interweaving academic studies, professional course work, and teaching practices over the course of study, students are rapidly given the opportunity to assume a teaching role; the extent of teaching involvement and expectations progressively building on additional academic and professional courses.

Please note that graduates of teacher education programs are recommended by the University for Quebec certification to the Quebec Ministère de l'Éducation, du Loisir et du Sport (MELS). For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

Freshman Program

Freshman students are required to complete 30 credits of introductory (100- or 200-level) courses. Students will not be granted permission to take first-year (U1) courses if the credits from the Freshman year have not been obtained. For students considering a second teachable subject, the following areas are recommended: history, geography, English, or mathematics.

From the "Required Courses" list, Freshman students take the 0-credit course EDEC 215 English Language Requirement. In addition, in consultation with the Program Adviser, students may select courses from the recommended course list below or other courses.

15 credits chosen from any of the University's course offerings to contribute to the student's academic proficiency and professional preparation.

### 5.12.5 Bachelor of Science (Kinesiology) (B.Sc.(Kinesiology)) - Kinesiology (90 credits)

The McGill Bachelor of Science (Kinesiology) program received accreditation from the Canadian Council of University Physical Education and Kinesiology Administrators (CCUPEKA) in April 2007.

The B.Sc.(Kinesiology) is a 90-credit program. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies are normally enrolled in a four-year B.Sc.(Kinesiology) program, which includes a 30-credit Freshman year for a total of 120 credits.

The focus of the Kinesiology program is a comprehensive understanding of human movement. Kinesiology is a multidisciplinary field viewing human movement from social, historical, psychological, or biological perspectives. The program provides students with a breadth of theoretical knowledge as well as an opportunity to explore related areas in greater depth, including minor programs available elsewhere within the University.

Students are encouraged to select a minor program in a given discipline or interdisciplinary area. A maximum of 6 credits of overlap is allowed between the Minor and the primary program. A minimum of 18 new credits must be completed in the Minor or Minor concentration. Science minors require from 18-24 credits. Arts Minor concentrations and Management Minors generally require 18 credits. For approved minors and minor concentrations, refer to the programs offered by the Faculty of Arts, the Desautels Faculty of Management, and the Faculty of Science.

An Honours program is available for particularly strong students. To qualify for the Honours program, students must obtain a CGPA of 3.3 after two years in Kinesiology and must retain this CGPA until graduation.

**Graduation Requirement:**

Prior to graduation, students are required to show proof of certification in Standard Level Safety Oriented First Aid/Level C in Cardiopulmonary Resuscitation, or equivalencies.

**Freshman Program**

29-30 credits of Basic Science courses depending on the Fall term MATH course selected.

Students admitted from CEGEP or with other Advanced Standing should have equivalencies for these courses to be exempt from Freshman program requirements.

**Fall term BIOL and CHEM courses:**

EDKP 542 (3) Environmental Exercise Physiology
EDKP 553 (3) Physical Activity Assessments
EDKP 566 (3) Advanced Biomechanics Theory
NUTR 503 (3) Bioenergetics and the Lifespan

**Elective Courses (20 credits)**

Students are encouraged to obtain some of their remaining credits by completing one of the minors or minor concentrations offered by the Faculty of Arts, the Desautels Faculty of Management, or the Faculty of Science.

A maximum of 6 credits of overlap is allowed between the Minor and the primary program. A minimum of 18 new credits must be completed in the Minor or Minor concentration. Science minors require 18-24 credits. Arts Minor concentrations and Management Minors generally require 18 credits.

**5.12.6 Bachelor of Science (Kinesiology) (B.Sc.(Kinesiology)) - Kinesiology - Honours (90 credits)**

The McGill Bachelor of Science (Kinesiology) program received accreditation from the Canadian Council of University Physical Education and Kinesiology Administrators (CCUPEKA) in April 2007.

The Honours version of the B.Sc.(Kinesiology) is a 90-credit program. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies are normally enrolled in a four-year B.Sc.(Kinesiology) program, which includes a 30-credit Freshman year for a total of 120 credits.

The Kinesiology - Honours program offers particularly strong students aspiring to continue their studies at the graduate level the opportunity to pursue more advanced coursework. The program requires the completion of a research project under the direction of a professor during the final year. To qualify for the Honours program, students must obtain a CGPA of 3.3 after two years in Kinesiology and must retain this CGPA until graduation.

Graduation Requirement:

Prior to graduation, students are required to show proof of certification in Standard Level Safety Oriented First Aid/Level C in Cardiopulmonary Resuscitation, or equivalencies.

**Freshman Program**

29-30 credits of basic science courses depending on the Fall term MATH course selected.

Students admitted from CEGEP or with other advanced standing should have equivalencies for these courses to be exempt from Freshman Program requirements.

Fall term BIOL and CHEM courses:
Principles: Organismal Biology (3) BIOL 111
General Chemistry 1 (4) CHEM 110

In consultation with a program adviser, one of the following Fall term MATH courses:
- Calculus 1 with Precalculus (4) MATH 139
- Calculus 1 (3) MATH 140
- Calculus A (4) MATH 150

In consultation with a program adviser, one of the following Fall term PHYS courses:
- Introductory Physics - Mechanics (4) PHYS 101
- Mechanics and Waves (4) PHYS 131

Winter term BIOL and CHEM courses:
- Cell and Molecular Biology (3) BIOL 112
- General Chemistry 2 (4) CHEM 120

One of the following Winter term MATH courses:
- Calculus 2 (4) MATH 141
- Calculus B (4) MATH 151

One of the following Winter term PHYS courses:
- Introductory Physics - Electromagnetism (4) PHYS 102
- Electromagnetism and Optics (4) PHYS 142

Required Courses (67 credits)
In addition to the 58 credits of required courses for the Major, Honours students complete EDKP 453 "Research Practicum in Kinesiology" and EDKP 499 "Undergraduate Honours Research Project".

Anatomy/Limbs and Back (4) ANAT 315

5.13.2 About the School of Information Studies

The School of Information Studies focuses upon the knowledge and skills necessary to identify, acquire, organize, retrieve, and disseminate information so as to meet people's varied information needs.

The School of Information Studies offers four programs at the graduate level. Its 48-credit Master of Library and Information Studies (MLIS) has three areas of specialization: Archival Studies, Knowledge Management, and Librarianship. Accredited by the American Library Association, the MLIS program prepares professionals to manage information resources and services in libraries and the wider information industries. Its 30-credit Graduate Diploma in Library and Information Studies and 15-credit Graduate Certificate in Library and Information Studies are designed to provide a formal environment in which information professionals can update, specialize, and redirect their careers for advanced responsibilities. Its Ph.D. program provides an opportunity to undertake research at the doctoral level in library and information studies within an interdisciplinary context.

For further information concerning programs, requirements, and courses, consult the School of Information Studies section of the most current Graduate and Postdoctoral Studies Programs, Courses and University Regulations publication available at www.mcgill.ca/study or the School website.

5.13.3 School of Information Studies Faculty

**Director**
France Bouthillier

**Professors**
J. Andrew Large; B.Sc.(Lond.), Ph.D.(Glas.), Dip.Lib.(Lond.) (*CN-Pratt-Grinstad Professor of Information Studies*)
Peter F. McNally; B.A.(W. Ont.), B.L.S., M.L.S., M.A.(McG.)

**Associate Professors**
Jamshid Beheshti; B.A.(S. Fraser), M.L.S., Ph.D.(W. Ont.)
France Bouthillier; B.Ed.(UQAM), M.B.S.I.(Montr.), Ph.D.(Tor.)
Kim Dalkir; B.Sc., M.B.A.(McG.), Ph.D.(C'dia)
Catherine Guastavino; B.Sc.(McG.), M.Sc.(Aix-Marseille), Ph.D.(Paris)
Eun Park; B.A.(Pusan), M.L.I.S.(Ill.), M.B.A.(Pitt.), Ph.D.(Calif.-LA)

**Assistant Professors**
Joan Bartlett; B.Sc., M.L.S., Ph.D.(Tor.)
Carolyn Hank; B.A.(Antioch), M.L.I.S.(Kent State), Ph.D. (N.Carolina)
Elaine Ménard; B.A., M.A., M.S.I., Ph.D.(Montr.)

**Adjunct Professor**
Joy Bennett; B.A., M.A.(C'dia), M.L.I.S.(McG.), Ph.D.(C'dia)

**Associate Members**
Gordon Burr; B.A., M.L.I.S.(McG.)
Associate Members

Pierre Pluye; M.D.(Toulouse), M.Sc., Ph.D.(Montr.)
Richard Virr; B.A.(Tulane), M.A.(Qu.), Ph.D.(McG.)

Affiliate Members

Charles Cole; B.A., M.L.I.S.(McG.), Ph.D.(Sheff.)
Frances Groen; B.A., B.L.S.(Tor.), M.A.(Pitt.)

Part-time Instructors

Nathalie Belanger; LL.B., D.D.N.(Montr.), M.L.I.S.(McG.)
Edward Bilodeau; B.Sc., M.L.I.S.(McG.)
Heather Brydon; B.Ed.(Saint-Boniface), M.L.I.S.(McG.)
Louise Carpentier; B.L.S.(Tor.), M.Bibl.(Montr.), M.P.P.PA.(C’dia)
Yusuke Fitzgibbons; M.L.I.S.(Dal.)
Catherine Jenner; B.A., LL.B., M.L.S.(Tor.), LL.B.(Montr.)
Rajiv Johal; B.Com., B.A., M.L.I.S.(McG.)
Laurie Mitchell; B.A., M.A.(C’dia)
David Tang; B.Eng.(He Hai U), M.L.I.S.(McG.)
Felicity Tayler; B.A.(C’dia), M.L.I.S.(McG.)
Dorothy Williams; B.A., M.A.(C’dia), Ph.D.(McG.)
Natasha Zwarich; B.A., M.A.(UQAM)

6 Faculty of Engineering

6.1 About the Faculty of Engineering

The Faculty currently includes five engineering departments and two schools, and houses three institutes:

Departments

Chemical Engineering
Civil Engineering and Applied Mechanics
Electrical and Computer Engineering
Mechanical Engineering
Mining and Materials Engineering

Schools

Architecture
Urban Planning

Institutes

Institute for Sustainability in Engineering and Design (ISEAD)
McGill Institute for Advanced Materials (MIAM) (Website: www.mcgill.ca/miam) (established by the Faculties of Engineering and Science)
McGill Institute for Aerospace Engineering (MIAE) (Website: www.mcgill.ca/miae)
The Faculty serves approximately 2,800 undergraduate students and 1,060 graduate students in a wide variety of academic programs. Undergraduate programs leading to professional bachelor's degrees are offered in all Engineering departments. These programs are designed to qualify graduates for immediate employment in a wide range of industries and for membership in the appropriate professional bodies. Additionally, a non-professional undergraduate degree is offered in the School of Architecture for those who plan to work in related fields not requiring professional qualification. The curricula are structured to provide suitable preparation for those who plan to continue their education in postgraduate studies either at McGill or elsewhere. The professional degrees in Architecture and Urban Planning are offered at the master's level and are described in the Graduate and Postdoctoral Studies Programs, Courses and University Regulations found at www.mcgill.ca/study.

The academic programs are divided into required and complementary sections. The required courses emphasize those basic principles which permit graduates to keep abreast of progress in technology throughout their careers. Exposure to current technology is provided by the wide variety of complementary courses which allow students to pursue in depth a particular interest. For program details, refer to section 6.13: Academic Programs.

The Engineering Internship Program provides engineering students with the opportunity to participate in four-, eight-, twelve-, or sixteen-month paid work experiences. Details can be found at www.mcgill.ca/careers4engineers/students/internship. In addition, co-op programs are offered in Mining Engineering and in Materials Engineering.

Postgraduate programs leading to master's and doctoral degrees are offered in all sectors of the Faculty. Numerous areas of specialization are available in each of the departments and schools. All postgraduate programs, including the professional degree programs in Architecture and in Urban Planning, are described in the Graduate and Postdoctoral Studies Programs, Courses and University Regulations found at www.mcgill.ca/study.

### 6.2 History of the Faculty

The Faculty of Engineering began in 1871 as the Department of Practical and Applied Science in the Faculty of Arts with degree programs in Civil Engineering and Surveying, Mining Engineering and Assaying, and Practical Chemistry. Diploma courses had been offered from 1859, and by 1871 the staff and enrolments had increased sufficiently to justify the creation of the Department. Continued growth led to the formation of the Faculty of Applied Science in 1878. By 1910 there were ten degree programs offered, including Architecture and Railroad Engineering. Subsequent changes in the overall pattern of the University led to the creation of the Faculty of the Engineering in 1931 with a departmental structure very similar to that which exists at present.

For a detailed history of the Faculty from 1811 to 2003, see [www.mcgill.ca/engineering/faculty/history](http://www.mcgill.ca/engineering/faculty/history).

### 6.3 Engineering Microcomputing Facility

In addition to the services provided by McGill’s Information Technology Services, the Faculty, in conjunction with its departments and schools, maintains specialized computing and information resources in support of teaching and research. These vary from desktop computers distributed throughout the Engineering complex to very high-performance scientific workstations found in the research laboratories. Each unit organizes and maintains facilities that are designed around specific roles, e.g., CAD/CAM, microelectronic design, software engineering, circuit simulation, process control, polymers, structural mechanics, metal processing, etc., in addition to systems dedicated to administrative support.

The role of the Faculty is to provide access to computing resources on a 24-hour basis and to provide services that are not covered by individual units. Further information is available at [www.mcgill.ca/emf](http://www.mcgill.ca/emf).

### 6.4 Schulich Library of Science and Engineering

Second largest of the 13 branches of the McGill Library, the Schulich Library of Science and Engineering provides resources and services to support the research and teaching programs in engineering and in the physical sciences. The Library holds more than 260,000 books, journals, and other materials covering the spectrum of engineering and the physical sciences. There is also an extensive collection of online resources, with thousands of electronic journals, e-books, and databases. The following other branch libraries will be of interest to students in the Faculty of Engineering: Blackader-Lauterman Library of Architecture and Art, Life Sciences Library, Macdonald Campus Library, Walter Hitchfield Geographic Information Centre, Edward Rosenthal Mathematics and Statistics Library, and the Howard Ross Library of Management.

The Schulich Library of Science and Engineering has over 100 networked computer workstations, and the entire building is a McGill wireless zone. You may choose to work in the quiet or group study areas, and there are copy and print facilities on site. The Library provides support for users with disabilities, including wheelchair access and an adaptive workstation. The Library also offers a range of tours and workshops designed to help users effectively find, assess, and use information.

Visit the website, phone or email us to learn more about the Library’s services, collections and facilities. We look forward to seeing you in the Library.

Telephone: 514-398-4769

Email: [schulich.library@mcgill.ca](mailto:schulich.library@mcgill.ca)
### 6.5 Revisions – Faculty of Engineering

**General Engineering**

*section 6.13.1.1: Bachelor of Engineering (B.Eng.) – General Engineering – Undeclared (30 credits)*

**Architecture**

*section 6.13.2.7: Bachelor of Science (B.Sc.) (Architecture) – Architecture (126 credits)*

**Chemical Engineering**

*section 6.13.3.6: Bachelor of Engineering (B.Eng.) – Chemical Engineering (141 credits)*

**Civil Engineering and Applied Mechanics**

*section 6.13.4.5: Bachelor of Engineering (B.Eng.) – Civil Engineering (139 credits)*

**Electrical and Computer Engineering**

*section 6.13.5.4: Bachelor of Engineering (B.Eng.) - Electrical Engineering (138 credits)*  
*section 6.13.5.5: Bachelor of Engineering (B.Eng.) – Honours Electrical Engineering (138 credits)*  
*section 6.13.5.6: Bachelor of Engineering (B.Eng.) - Computer Engineering (139 credits)*  
*section 6.13.5.7: Bachelor of Software Engineering (B.S.E.) - Software Engineering (135 credits)*

**Mechanical Engineering**

*section 6.13.6.4: Bachelor of Engineering (B.Eng.) – Mechanical Engineering (142 credits)*  
*section 6.13.6.5: Bachelor of Engineering (B.Eng.) – Honours Mechanical Engineering (142 credits)*

**Mining and Materials Engineering**

*section 6.13.7.4.3: Bachelor of Engineering (B.Eng.) – Materials Engineering CO-OP (147 credits)*  
*section 6.13.7.5.3: Bachelor of Engineering (B.Eng.) – Mining Engineering CO-OP (149 credits)*

**Minor Programs**

*section 6.13.10.3.1: Bachelor of Engineering (B.Eng.) - Minor Biotechnology (for Engineering Students) (24 credits)*  
*section 6.13.10.11.1: Bachelor of Engineering (B.Eng.) – Minor Materials Engineering (24 credits)*

### 6.6 About the Faculty of Engineering (Undergraduate)

Welcome to the Faculty of Engineering section of the *Undergraduate Programs, Courses and University Regulations* publication.

The mission of the Faculty of Engineering is to contribute to the advancement of learning and to the socio-economic development of Quebec and Canada, through teaching and research activities at the highest international standards of quality.

**Goals:**

- To prepare graduates for productive professional careers through the provision of accredited bachelor's programs
- To train students through focused professional programs to attain the forefront of their fields
- To perform research and other scholarly activities which achieve international recognition
- To ensure that technological innovations developed through research are transferred to industry
- To provide a stimulating environment for teaching, learning, and research

In this section, you will find up-to-date information about the Faculty and about the undergraduate programs and courses it offers. For information about graduate studies in the Faculty of Engineering, see the *Graduate and Postdoctoral Studies Programs, Courses and University Regulations* publication at [www.mcgill.ca/study](http://www.mcgill.ca/study).

You will find information on the following topics (and others):
For regulations that are specific to the Faculty of Engineering, see the University Regulations and Information section of this publication and watch for sections and notes that are specific to the Faculty of Engineering.

6.6.1 Location

Macdonald Engineering Building
817 Sherbrooke Street West
Montreal, Quebec H3A 2K6
Canada

Telephone: 514-398-7250
Faculty website: www.mcgill.ca/engineering

The Student Affairs Office and the Offices of the Associate Dean (Student Affairs) and Associate Dean (Academic) are located within the Engineering Student Centre, at the following address:

3450 University Street
Montreal, Quebec H3A 2A7
Frank Dawson Adams Building, Suite 22

Telephone: 514-398-7257
Student Affairs Office website: www.mcgill.ca/engineering/student/sao

6.6.2 Administrative Officers

Christophe Pierre; Ph.D.(Duke), M.Sc.(Princ.), B.Eng.(École Centrale, Paris) (Canada Research Chair) Dean

James Clark; B.A.Sc., Ph.D.(Br. Col.) Associate Dean (Academic)

Subhasis Ghoshal; B.C.E.(Jad.), M.S.(Missouri), Ph.D.(Carn. Mell) (William Dawson Scholar) Associate Dean (Student Affairs)

Andrew Kirk; B.Sc.(Brist.), Ph.D.(Lond.) (William Dawson Scholar) Associate Dean (Research and Graduate Education)

Lawrence Chen; B.Eng.(McG.), M.A.Sc., Ph.D.(Tor.) Associate Dean (Academic Affairs)

Michael Jenstrup; B.A., B.Sc., B.Arch.(Penn. St.), M.Arch.(McG.), M.R.A.I.C. Director, School of Architecture

Dimitrios Berk; B.Sc.(Bosphorus), M.E.Sc.(W. Ont.), Ph.D.(Calg.), P.Eng. Chair, Department of Chemical Engineering

Van Thanh Van Nguyen; B.Mech.Eng.(Vietnam), M.Civil Eng.(Thailand), Ph.D.(École Poly., Montr.), P.Eng. Chair, Department of Civil Engineering and Applied Mechanics

David V. Plant; M.S., Ph.D.(Brown), F.O.S.A. (James McGill Professor) Chair, Department of Electrical and Computer Engineering

George Haller; M.Sc.(Univ. Budapest), Ph.D.(Cal. Tech.) (Faculty of Engineering Distinguished Professor) Chair, Department of Mechanical Engineering

Steve Yue; B.Sc., Ph.D.(Leeds) Chair, Department of Mining and Materials Engineering

Raphaël Fischler; B.Eng.(V. Tech. Eindhoven), M.S.Arch.S., M.C.P.(MIT), Ph.D.(Calif., Berk.) Director, School of Urban Planning

Colin Rogers; B.A.Sc., M.A.Sc.(Wat.), Ph.D.(Syd.), P.Eng. Secretary of Faculty

Christine Tutt Director of Administration

Debbie Morzajew Manager, EMF

Debbie Morzajew Facilities Manager (Acting)
6.7 Degrees and Requirements for Professional Registration

Non-Professional

Bachelor of Science (Architecture)

The first professional degree in architecture is the Master of Architecture (Professional). Further information can be found in the Graduate and Postdoctoral Studies Programs, Courses and University Regulations publication at www.mcgill.ca/study.

Professional

Bachelor of Engineering
Bachelor of Software Engineering

The B.Eng. and B.S.E. programs are accredited by the Canadian Engineering Accreditation Board (CEAB) of Engineers Canada and fulfil the academic requirements for admission to the provincial engineering professional organizations. Engineers Canada has also negotiated agreements with engineering organizations in other countries to grant Canadian licensed engineers the same privileges accorded to professional engineers in those countries. For more information, visit the Engineers Canada website at www.engineerscanada.ca. All students are expected to seek professional registration after graduation.

To become a professional engineer in Canada, a graduate must pass an examination on legal aspects and on the principles of professional practice, and acquire two to four years of engineering experience, depending on the province. Only persons duly registered may use the title "engineer" and perform the professional activities reserved for engineers by provincial laws and regulations.

In Quebec, the professional engineering body is the Ordre des ingénieurs du Québec (OIQ). In order to better prepare new graduates for the practice of their profession, McGill organizes seminars in cooperation with the OIQ on various aspects of the profession. The OIQ also has a student section. As soon as you have accumulated 60 credits in a B.Eng. or B.S.E. program, you can join the student section of the OIQ. Registration is free. For more information, visit the OIQ website at www.oiq.qc.ca.

6.8 Admission Requirements

The Faculty of Engineering offers programs leading to the degrees of B.Eng., B.S.E., and B.Sc.(Arch.). Enrolment in Engineering programs is limited. For detailed information on admissions requirements, see the Undergraduate Admissions Guide at www.mcgill.ca/applying.

6.9 Student Progress

The length of the B.Eng., B.S.E., and B.Sc.(Arch.) programs varies depending on the program and basis of admission. You can find the curriculum for your program on the website of your department/school. See www.mcgill.ca/engineering/departments for links to department/school websites.

You must successfully complete the B.Eng., B.S.E., or B.Sc.(Arch.) program within six years of entry. Candidates admitted to a lengthened program, or to a shortened program because of advanced standing, or who are participating in a work term or in the Engineering Internship Program (EIP), will have a correspondingly greater or lesser period in which to complete their program.

Extensions may be granted by the Committee on Standing in cases of serious medical problems or where other similarly uncontrollable factors have affected your progress.

6.10 Student Activities

The campus offers a wide variety of extracurricular activities for students. All are encouraged to participate. Many of these are organized within the Faculty under the auspices of the Engineering Undergraduate Society (EUS). EUS publishes a handbook describing their operations and the activities of various Faculty clubs and societies; you can also find these on their website (see below). All undergraduate students automatically become members of the EUS. Each department and school also has a student association.

For more information about EUS and links to department/school student association websites, visit the EUS website at www.mcgilleus.ca.

For more information on extra-curricular activities and organizations, see www.mcgill.ca/engineering/student/sao/life.
For more information on student design teams and projects, see [www.mcgill.ca/engineering/student/sao/studentdesign](http://www.mcgill.ca/engineering/student/sao/studentdesign).

_FACULTY OF ENGINEERING_
6.12  Engineering Internship Program

Employers value experience. Internships (four, eight, twelve, or sixteen months) allow you to gain professional work experience during the course of your undergraduate studies while earning a salary within the average range for entry-level professional positions. Other benefits include the following:

- Improved employment prospects upon graduation, often at a higher starting salary
- The opportunity to explore career options prior to graduation
- The opportunity to develop communication skills and to acquire a business perspective that cannot be learned in school

An internship may begin in January, May, or September. Employers choose the most suitable students for their organization through an application and interview process. While employed by the participating companies, you work on assignments related to your field of study. Internships will be recognized on your transcript as one or more non-credit courses entitled "Industrial Practicum". Successful completion of an internship of eight or more months qualifies you to graduate with the Internship Program designation on your transcript.

6.12.1  Student Eligibility

To participate in the Engineering Internship Program, you must:

- have a CGPA of 2.00 or higher;
- be in good financial standing with the University;
- obtain approval from the Engineering Career Centre before registering for or starting your internship;
- be registered full-time in your program before and after your internship;
- remain a degree candidate while on internship;
- return to complete your undergraduate degree at McGill, with a minimum of 15 credits remaining in your program after your internship (i.e., you are not allowed to complete your degree during your internship).

Internship students will receive an automatic extension for the completion of their studies.

International students are eligible (a few restrictions may apply).

For more information, see www.mcgill.ca/careers4engineers or send an email to careers4engineers@mcgill.ca.

**Important Information:**

- While on internship, you are expected to complete any deferrals you may have been granted, regardless of the location of the internship. If you do not write a deferred exam as scheduled, you will receive a final grade of J. The J grade will calculate as a failure in both TGPA and CGPA.
- International students must ensure that their health coverage remains in force during their internship.
- During your time as an intern, you are not considered to be in full-time status. Your government loans will become due and payable within the prescribed grace period (usually six months).
- If you officially accept an internship position but subsequently decline the position, you will no longer be eligible for the Engineering Internship Program.

6.13  Academic Programs

The programs and courses in the following sections have been approved for the 2011-2012 session as listed, but the Faculty reserves the right to introduce changes as may be deemed necessary or desirable.

6.13.1  General Engineering Program

The General Engineering Program (GEP) is offered in addition to the Faculty of Engineering’s majors (Chemical, Civil, Computer, Electrical, Materials, Mechanical, Mining, and Software Engineering). The GEP permits students with strong mathematics, physics, and chemistry results in high school to pursue a common first-year curriculum without declaring a particular major program at the time of application. The GEP spans one academic year only (Year 0). Students then apply for placement and continue in an Engineering major program.

For more information about the General Engineering Program, see www.mcgill.ca/engineering/degrees/general.

6.13.1.1  Bachelor of Engineering (B.Eng.) – General Engineering – Undeclared (30 credits)

Revision, August 2011. Start of revision.

This is a 30-credit course of study for the first year of a Bachelor of Engineering degree for students who have not completed a Quebec CEGEP diploma. Upon successful completion of these requirements, students must apply for placement and continue in a B.Eng. or B.S.E. program.
Year 0 (Freshman) Courses

(30 credits)

CHEM 110 (4) General Chemistry 1
CHEM 120 (4) General Chemistry 2
FACC 100 (1) Introduction to the Engineering Profession
MATH 133 (3) Linear Algebra and Geometry
MATH 140 (3) Calculus 1
MATH 141 (4) Calculus 2
PHYS 131 (4) Mechanics and Waves
PHYS 142 (4) Electromagnetism and Optics

Humanities and Social Sciences, Management Studies, and Law

3 credits at the 200 level or higher from the following departments:

Anthropology (ANTH)
Economics (any 200- or 300-level course excluding ECON 217, ECON 227, and ECON 337)
History (HIST)
Philosophy (excluding PHIL 210 and PHIL 310)
Political Science (POLI)
Psychology (excluding PSYC 204 and PSYC 305, but including PSYC 100)
Religious Studies (RELG)
School of Social Work (SWRK)
Sociology (excluding SOCI 350)

OR one of the following:

ARCH 528 (3) History of Housing
BUSA 465* (3) Technological Entrepreneurship
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 400 (3) Environmental Thought
FACC 220 (3) Law for Architects and Engineers
FACC 500 (3) Technology Business Plan Design
FACC 501 (3) Technology Business Plan Project
INDR 294* (3) Introduction to Labour-Management Relations
MATH 338 (3) History and Philosophy of Mathematics
MGCR 222* (3) Introduction to Organizational Behaviour
MGCR 352* (3) Marketing Management I
ORGB 321* (3) Leadership
ORGB 423* (3) Human Resources Management

* Note: Management courses have limited enrolment and registration dates. See Important Dates at: http://www.mcgill.ca/importantdates/.

Students who successfully complete one or more Science Placement Exams will obtain credit(s) for the equivalent(s), i.e., CHEM 110, CHEM 120, MATH 140, MATH 141, MATH 133, PHYS 131, PHYS 142. Please see http://www.mcgill.ca/student-records/exam/science for information on Science Placement Exams.

Language Courses
If you are not proficient in a certain language, 3 credits will be given for one 6-credit course at the 100 level or higher in that language. A maximum of 3 credits of language courses will be counted toward the B.Eng./B.S.E. Complementary Studies requirement.

However, 3 credits may be given for any language course at the 200 level or higher that has a sufficient cultural component. This course must be approved by the Engineering Student Centre (Frank Dawson Adams Building, Room 22).

Revision, August 2011. End of revision.

6.13.2 School of Architecture

6.13.2.1 Location

Macdonald-Harrington Building, Room 201
815 Sherbrooke Street West
Montreal, Quebec H3A 2K6

Telephone: 514-398-6700
Fax: 514-398-7372
Website: www.mcgill.ca/architecture

6.13.2.2 About the School of Architecture

The School of Architecture at McGill University was founded in 1896. Our mission is to educate professionals who will contribute to the socio-economic and cultural development of Quebec, Canada and the broader global community through responsible participation in the process of the design, construction, and interpretation of the built environment.

The School offers the non-professional B.Sc.(Arch.) program, the M.Arch. (Professional) program, and post-professional research programs, including the M.Arch. (Post-professional) and Ph.D.

6.13.2.3 Architectural Certification in Canada

In Canada, all provincial associations recommend a degree from an accredited professional degree program as a prerequisite for licensure. The Canadian Architectural Certification Board (CAB), which is the sole agency authorized to accredit Canadian professional degree programs in architecture, recognizes two types of accredited degrees: the Bachelor of Architecture and the Master of Architecture. A program may be granted a five-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards.

Master's degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

Since all provincial associations in Canada recommend any applicant for licensure to have graduated from a CAB-accredited program, obtaining such a degree is an essential aspect of preparing for the professional practice of architecture. While graduation from a CAB-accredited program does not assure registration, the accrediting process is intended to verify that each accredited program substantially meets those standards that, as a whole, comprise an appropriate education for an architect.

6.13.2.4 Programs of Study

Students in the B.Sc.(Arch.) program who intend to proceed to the professional degree must satisfy certain minimum requirements. Students must:

- complete the B.Sc.(Arch.) degree, including the series of required and complementary courses stipulated for professional studies, with a minimum CGPA of 3.00;
- submit a portfolio of work executed in the sequence of six design studios, as well as samples of professional and personal work;
- complete the minimum period of relevant work experience according to the current Work Experience Guidelines (see www.mcgill.ca/architecture/bboard/gloma/workexperience).

Further information on the M.Arch. (Professional) program and application procedures is available at www.mcgill.ca/architecture.

6.13.2.4.1 Student Exchanges

A limited number of qualified students may participate in an exchange with schools of architecture at other universities that have agreements with the McGill School of Architecture, for a maximum of one term in the second year of the B.Sc.(Arch.) program. These include the following: Università Iuav di Venezia (Venice, Italy); Fakultät für Raumplanung und Architektur, Technische Universität Wien (Vienna, Austria); Institut Supérieur d'Architecture, Saint-Luc Bruxelles (Brussels, Belgium); École Nationale Supérieure d'architecture de Grenoble (Grenoble, France); École Nationale Supérieure d'architecture de Clermont-Ferrand (Clermont-Ferrand, France); Facoltà di Architettura Civile Politecnico di Milano (Bovisa) (Milan, Italy); The Royal Danish Academy of Fine Arts, School of Architecture (Copenhagen, Denmark).

6.13.2.5 Ancillary Academic Facilities

Laboratories and Workshops

Architectural Workshops – David Speller, Technician
## Laboratories and Workshops

- Communications Laboratory, including Photo Lab – Carrie Henzie, Media Technician
- Computers in Architecture Laboratories – Professor Aaron Sprecher

## Library

## Collections

- Visual Resources Collection, including slides, film, video and other materials – Dr. Annmarie Adams
- The John Bland Canadian Architecture Collection, housed in the Blackader-Lauterman Library – Ann Marie Holland, Liaison Librarian
- Orson Wheeler Architectural Model Collection – Professor Pieter Sijpkes
- Materials Resource Centre – Dr. Avi Friedman

### 6.13.2.6 School of Architecture Faculty

#### Director

Michael Jemtrud

#### Emeritus Professors

- Derek Drummond; B.Arch.(McG.), F.R.A.I.C., O.A.A. *(William C. Macdonald Emeritus Professor of Architecture)*
- Adrian Sheppard; B.Arch.(McG.), M.Arch.(Yale), F.R.A.I.C., O.A.Q., A.A.P.Q.

#### Professors

- Avi Friedman; B.Arch.(Technion), M.Arch.(McG.), Ph.D.(Montr.), O.A.Q., I.A.A.
- Alberto Pérez-Gómez; Dipl.Eng.(Nat. Pol. Inst., Mexico), M.A., Ph.D.(Essex) *(Saidye Rosner Bronfman Professor of Architectural History)*

#### Associate Professors

- Martin Bressani; B.Sc.(Arch.), B.Arch.(McG.), M.Sc.Arch., Diplômes des Études approfondies, Docteur de l’Université de Paris-Sorbonne(Paris IV)
- David Covo; B.Sc.(Arch.), B.Arch.(McG.), F.R.A.I.C., O.A.Q.
- Michael Jemtrud; B.Sc., B.A., B.Arch.(Penn. St.), M.Arch.(McG.)
- Pieter Sijpkes; B.Sc.(Arch.), B.Arch.(McG.)

#### Assistant Professors

- Nik Luka; B.A.A.(Ryerson), M.Arch.(Laval), Ph.D.(Tor.), M.C.I.P.
- Aaron Sprecher; B.Arch.(Bezalel), M.Arch.(Calif.-LA)

#### Adjunct Professors

- Howard Davies
- François Émond
- Julia Gersovitz
- Phyllis Lambert
Adjunct Professors

Visiting Critics and Lecturers

Each year, visitors are involved in the teaching of certain courses as critics and lecturers. These visitors change from year to year. The following were visitors for 2010:

6.13.2.7 Bachelor of Science (B.Sc.) (Architecture) – Architecture (126 credits)

Revision, August 2011. Start of revision.

Program credit weight: 126 credit
Program credit weight for CEGEP students: 100 credits

McGill's professional program in Architecture is divided into two parts. The first part is an eight-term design-based program (six-term program for students entering with the Quebec Diploma of Collegial Studies in Pure and Applied Science or the equivalent) leading to a non-professional degree, Bachelor of Science (Architecture). Applicants whose background includes a university degree in an area not related to architecture should apply to the B.Sc.(Arch.) program. For detailed information about admission procedures and requirements, please see the Undergraduate Admissions Guide at http://www.mcgill.ca/applying.

The second part, for students with the McGill B.Sc.(Arch.) degree or equivalent non-professional undergraduate architecture degree, is either a three-term (Fall/Winter/Summer) or a two-year program leading to the Master of Architecture (Professional) degree. There are two options for the completion of the M.Arch. (Professional) program: Design Studio (45 credits) and Design Studio-Directed Research (60 credits). The M.Arch. (Professional) degree is accredited
by the Canadian Architectural Certification Board (CACB), and is recognized as accredited by the National Council of Architectural Registration Boards (NCARB) in the U.S.

For more information on program structure and courses, visit the School of Architecture website at http://www.mcgill.ca/architecture.

**Required Year 0 (Freshman) Courses**

26 credits

Generally, students admitted to the Architecture program from Quebec CEGEPs are granted transfer credit for the Year 0 (Freshman) courses and enter a 100-credit (six-term) program.

Revision, August 2011. End of revision.

6.13.3 Department of Chemical Engineering

6.13.3.1 Location

M.H. Wong Building, Room 3060
3610 University Street
Montreal, Quebec H3A 2B2

Telephone: 514-398-4494
Fax: 514-398-6678
Website: www.mcgill.ca/chemeng

6.13.3.2 About the Department of Chemical Engineering

The central purpose of engineering is to pursue solutions to technological problems in order to satisfy the needs and desires of society. Chemical engineers are trained to solve the kinds of problems that are typically found in the "chemical process industries", which include the chemical manufacturing, plastics, water treatment, pulp and paper, petroleum refining, ceramics, and paint industries, as well as substantial portions of the food processing, textile, nuclear energy, biochemical, biomedical, and pharmaceutical industries. The technological problems and opportunities in these industries are often closely linked to social, economic, and environmental concerns. For this reason, practitioners of chemical engineering often deal with these questions when they are working in management, pollution abatement, product development, marketing, and equipment design.

By means of complementary courses, students can also obtain further depth in technical areas and breadth in non-technical subjects. Some students elect to complete a minor in biotechnology, management, materials engineering, computer science, environmental engineering, chemistry, or another minor (see section 6.13.10: Minor Programs for minors available to engineering students).

The solution to many environmental problems requires an understanding of technological principles. A Chemical Engineering degree provides an ideal background. In addition to relevant material learned in the core program, a selection of environmental complementary courses and minor programs is available. The involvement of many Chemical Engineering staff members in environmental research provides the opportunity for undergraduate students to carry out research projects in this area.

The curriculum also provides the preparation necessary to undertake postgraduate studies leading to the M.Eng. or Ph.D. degrees in Chemical Engineering. Students completing this curriculum acquire a broad, balanced education in the natural sciences with the accent on application. Thus, for those who do not continue in Chemical Engineering, it provides an exceptionally balanced education in applied science. For others, it will form the basis of an educational program that may continue with a variety of studies such as business administration, medicine, or law. Versatility is, then, one of the most valuable characteristics of the graduate of the Chemical Engineering program.

6.13.3.3 Academic Program

The Chemical Engineering program comprises 141 credits (115 credits for those who completed the Quebec CEGEP program in Pure and Applied Sciences). Certain students who take advantage of Summer session courses can complete the program in three calendar years.

In some cases, students from university science disciplines have sufficient credits to complete the requirements for the B.Eng. (Chemical) program in two years. Those concerned should discuss this with their adviser.

Students must obtain a grade of C or better in all core courses. For the Department of Chemical Engineering, core courses include all required courses (departmental and non-departmental) as well as complementary courses (departmental).

6.13.3.4 Canadian Society for Chemical Engineering

The Chemical Engineering Student Society has for many years been affiliated both with the CSChE (Canadian Society for Chemical Engineering) and with the AIChE (American Institute of Chemical Engineers). For a nominal fee, students receive Canadian Chemical News, a monthly publication, and the AIChE Student Members Bulletin as well as other privileges of student membership in the two societies. The student chapter also organizes a series of local social, educational, and sporting events. For example, recent events have included student-professor banquets and Christmas parties, dances, speakers, broomball games, and joint meetings with the Montreal Section of the CSChE. The latter gives students a chance to mix with practising chemical engineers.

6.13.3.5 Department of Chemical Engineering Faculty

Chair

Dimitrios Berk
### Emeritus Professors

John M. Dealy; B.S.(Kansas), M.S.E., Ph.D.(Mich.), Eng.
Musa R. Kamal; B.S.(Ill.), M.S., Ph.D.(Carn. Mell), Eng.
Juan H. Vera; B.Mat.(Chile), Ing.Quim.(U.T.E.), M.S.(Calif., Berk.), Dr.Ing.(Santa Maria), Ing.

### Professors

David G. Cooper; B.Sc., Ph.D.(Tor.)
Richard J. Munz; B.A.Sc., M.A.Sc.(Wat.), Ph.D.(McG.), Eng.
Alejandro D. Rey; B.Ch.Eng.(CCNY), Ph.D.(Calif., Berk.) *(James McGill Professor)*

### Associate Professors

Dimitrios Berk; B.Sc.(Bosphorus), M.E.Sc.(W. Ont.), Ph.D.(Calg.), P.Eng.
Sylvain Coulombe; B.Sc., M.Sc.A.(Sher.), Ph.D.(McG.), Ing.
Reghan James Hill; B.Eng., Ph.D.(C'nell)
Richard L. Leask; B.A.Sc., M.A.Sc.(Wat.), Ph.D.(Tor.), P.Eng.
Milan Maric; B.Sc., B.Eng. & Mgmt(McM.), Ph.D.(Minn.), P.Eng.
Jean-Luc Meunier; Dipl.Ing., EPFL(Lausanne), M.Sc., Ph.D., INRS(Varennes), Ing.
Sasha Omanovic; Dipl.Ing., Ph.D.(Zagreb), P.Eng.
Thomas Quinn; B.Sc.(Qu.), S.M., Ph.D.(MIT)
Phillip Servio; B.Sc., Ph.D.(Minn.)
Nathalie Tufenkji; B.Eng.(McG.), M.Sc., Ph.D.(Yale)
Viviane Yargeau; B.Eng., M.Sc.A., Ph.D.(Sher.), Ing.

### Assistant Professors

Elizabeth Jones; B.A.Sc.(Wat.), M.S., Ph.D.(Calif. Tech.)
Jeff Gostick; B.Eng.(Ryerson), M.A.Sc., Ph.D.(Wat.)
Anne-Marie Kietzig; B.Eng.(T.U. Berlin), Ph.D.(Br. Col.)

### Post-Retirement

W.J. Murray Douglas; B.Sc.(Qu.), M.S.E., Ph.D.(Mich.)

### PAPRICAN Adjunct Professor

George J. Kubes; B.Eng., M.Eng.(Prague), Ph.D.(Bratislava)

### Adjunct Professors

T. Addona
T. Alexakis
V. Bhambani
P. Bisaillon
R. Campeau
M. Davidovsky
M. Fokas
B. McNicoll
N. Peters
B.E. Sarkis
### Adjunct Professors

B. Théorét  
R.C. Urquhart  
L. Yerushalmi

#### 6.13.3.6 Bachelor of Engineering (B.Eng.) – Chemical Engineering (141 credits)

**Revision, August 2011. Start of revision.**

Program credit weight: 141-144 credits  
Program credit weight for CEGEP students: 115 credits

The discipline of chemical engineering is distinctive in being based equally on physics, mathematics, and chemistry. Application of these three fundamental sciences is basic to a quantitative understanding of the process industries. Those with an interest in the fourth fundamental science, biology, will find several courses in the chemical engineering curriculum that integrate aspects of the biological sciences relevant to process industries such as food processing, fermentation, biomedical, and water pollution control. Courses on the technical operations and economics of the process industries are added to this foundation. The core curriculum concludes with process design courses taught by practising design engineers. Problem-solving, experimenting, planning, and communication skills are emphasized in courses throughout the core curriculum.

Certain students who take advantage of Summer session courses can complete the departmental program in three calendar years.

In some cases, students from university science disciplines have sufficient credits to complete the requirements for the B.Eng. (Chemical) program in two years. Those concerned should discuss this with their adviser.

Students must obtain a grade of C or better in all core courses. For the Department of Chemical Engineering, core courses include all required courses (departmental and non-departmental) as well as complementary courses (departmental).

**Note to CEGEP students**

If you have successfully completed a course at CEGEP that is equivalent to CHEM 212 or CHEM 234, you may request exemption for either or both courses. However, you must replace each course with another university-level course of an equal number of credits or more — McGill courses beginning with subject codes ATOC, BIOL, CHEM, EPSC, ESYS, PHYS are acceptable substitutes.

#### Required Year 0 (Freshman) Courses

29 credits

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 115-credit program.

Required Chemical Engineering Courses
73 credits

CHEE 200 (4) Introduction to Chemical Engineering
CHEE 204 (3) Chemical Manufacturing Processes
CHEE 220 (3) Chemical Engineering Thermodynamics
CHEE 291 (4) Instrumental Measurement Laboratory
CHEE 310 (3) Physical Chemistry for Engineers
CHEE 314 (4) Fluid Mechanics
CHEE 315 (4) Heat and Mass Transfer
CHEE 340 (3) Process Modelling
CHEE 351 (3) Separation Processes
CHEE 360 (1) Technical Paper 1
CHEE 370 (3) Elements of Biotechnology
CHEE 380 (3) Materials Science
CHEE 392 (4) Project Laboratory 1
CHEE 393 (5) Project Laboratory 2
CHEE 423 (4) Chemical Reaction Engineering
CHEE 453 (4) Process Design
CHEE 455 (4) Process Control
CHEE 456 (2) Design Project 1
CHEE 457 (5) Design Project 2
CHEE 462 (1) Technical Paper 2
CHEE 474 (3) Biochemical Engineering
CHEE 484 (3) Materials Engineering

Technical Complementaries
9 credits

The purpose of this requirement is to provide students with an area of specialization within the broad field of chemical engineering. Alternatively, some students use the technical complementaries to increase the breadth of their chemical engineering training.

At least two courses (4-7 credits) must be chosen from the list below. The remaining course(s) (2-5 credits) may be taken from other suitable undergraduate courses in the Faculty of Engineering, with departmental permission.

BIOT 505* (3) Selected Topics in Biotechnology
CHEE 363 (2) Projects Chemical Engineering 1
CHEE 438 (3) Engineering Principles in Pulp and Paper Processes
CHEE 452 (3) Particulate Systems
CHEE 458 (3) Computer Applications
CHEE 464 (2) Projects Chemical Engineering 2
CHEE 487 (3) Chemical Processing: Electronics Industry
CHEE 494** (3) Research Project and Seminar 1
CHEE 495** (4) Research Project and Seminar 2
CHEE 496** (3) Environmental Research Project
CHEE 510 (3) Advanced Separation Processes
CHEE 515+ (3) Material Surfaces: A Biomimetic Approach
CHEE 541 (3) Electrochemical Engineering
CHEE 543 (3) Plasma Engineering
CHEE 561 (3) Introduction to Soft Tissue Biophysics
CHEE 562 (3) Engineering Principles in Physiological Systems
CHEE 563*** (3) Biofluids and Cardiovascular Mechanics
CHEE 571 (3) Small Computer Applications: Chemical Engineering
CHEE 582 (3) Polymer Science & Engineering
CHEE 584 (3) Polymer Processing
CHEE 585 (3) Foundations of Soft Matter
CHEE 591 (3) Environmental Bioremediation
CHEE 592+ (3) Industrial Air Pollution Control
CHEE 593+ (3) Industrial Water Pollution Control
CHEE 594 (3) Biocolloids in Environmental Systems
CHEE 595 (3) Energy Recovery, Use, & Impact
CIVE 430+ (3) Water Treatment and Pollution Control
MECH 534+ (3) Air Pollution Engineering
MECH 563*** (3) Biofluids and Cardiovascular Mechanics
MIME 515+ (3) Material Surfaces: A Biomimetic Approach

* BIOT 505 can only be chosen by students taking the Minor in Biotechnology.
** Students may choose only one project course: CHEE 494, CHEE 495, or CHEE 496.
*** Students choose either CHEE 563 or MECH 563.
+ Students may choose only one course in each of the following sets:
  - CHEE 515 or MIME 515
  - CHEE 592 or MECH 534
  - CHEE 593 or CIVE 430

Complementary Studies
6 credits (9 credits for students from Quebec CEGEPs)

Group A - Impact of Technology on Society
3 credits from the following:

ANTH 212 (3) Anthropology of Development
BTEC 502 (3) Biotechnology Ethics and Society
CIVE 469 (3) Infrastructure and Society
ECON 225 (3) Economics of the Environment
ECON 347 (3) Economics of Climate Change
ENVR 201 (3) Society, Environment and Sustainability
GEOG 200 (3) Geographical Perspectives: World Environmental Problems
GEOG 203 (3) Environmental Systems
GEOG 205 (3) Global Change: Past, Present and Future
GEOG 302 (3) Environmental Management 1
MECH 526 (3) Manufacturing and the Environment
MGPO 440* (3) Strategies for Sustainability
MIME 308 (3) Social Impact of Technology
PHIL 343 (3) Biomedical Ethics
RELG 270 (3) Religious Ethics and the Environment
SOCI 235 (3) Technology and Society
SOCI 312 (3) Sociology of Work and Industry
URBP 201 (3) Planning the 21st Century City

* Note: Management courses have limited enrolment and registration dates. See Important Dates at http://www.mcgill.ca/importantdates.

**Group B - Humanities and Social Sciences, Management Studies, and Law**

3 credits (6 credits for students from Quebec CEGEPs) at the 200 level or higher from the following departments:

Anthropology (ANTH)
Economics (any 200- or 300-level course excluding ECON 217, ECON 227, and ECON 337)
History (HIST)
Philosophy (excluding PHIL 210 and PHIL 310)
Political Science (POLI)
Psychology (excluding PSYC 204 and PSYC 305, but including PSYC 100)
Religious Studies (RELG)
School of Social Work (SWRK)
Sociology (excluding SOCI 350)
OR one of the following:

ARCH 528 (3) History of Housing
BUSA 465* (3) Technological Entrepreneurship
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 400 (3) Environmental Thought
FACC 220 (3) Law for Architects and Engineers
FACC 500 (3) Technology Business Plan Design
FACC 501 (3) Technology Business Plan Project
INDR 294* (3) Introduction to Labour-Management Relations
MATH 338 (3) History and Philosophy of Mathematics
MGCR 222* (3) Introduction to Organizational Behaviour
MGCR 352* (3) Marketing Management 1
ORGB 321* (3) Leadership
ORGB 423* (3) Human Resources Management

* Note: Management courses have limited enrolment and registration dates. See Important Dates at http://www.mcgill.ca/importantdates.

**Language Courses**

If you are not proficient in a certain language, no more than 3 credits will be given for one 6-credit course at the 100 level or higher in that language. A maximum of 3 credits of language courses will be counted toward the Complementary Studies requirement.
However, 3-6 credits may be given for language courses at the 200 level or higher that have a sufficient cultural component. These courses must be approved by the Engineering Student Centre (Frank Dawson Adams Building, Room 22).

Revision, August 2011. End of revision.

6.13.3.6.1 More about the B.Eng. Degree in Chemical Engineering

Courses CHEE 582 and CHEE 584 comprise a Polymeric Materials sequence. Additional courses in this area are available in the Chemistry Department (e.g., CHEM 455) or at the graduate level (CHEE 681 to CHEE 684). The Department has considerable expertise in the polymer area.

Courses CHEE 370 and CHEE 474 make up a sequence in Biochemical Engineering-Biotechnology. Students interested in this area may take additional courses, particularly those offered by the Department of Food Science and Agricultural Chemistry, Faculty of Agricultural and Environmental Sciences, and courses in biochemistry and microbiology. The food, beverage, and pharmaceutical industries are large industries in the Montreal area and these courses are relevant to these industries and to the new high-technology applications of biotechnology.

The third area in which there is a sequence of courses is Pollution Control. The Department offers three courses in this area: CHEE 591, CHEE 592, and CHEE 593. As some water pollution control problems are solved by microbial processes, course CHEE 474 is also relevant to the pollution control area.

Additional courses in this area are listed in the section 6.13.10.8: Environmental Engineering Minor.

A Minor in Biotechnology is also offered by the Faculties of Engineering and Science with emphasis on molecular biology and chemical engineering processes. A full description of the program appears in the section 6.13.10.3: Biotechnology Minor.

Note that many of the technical complementsaries are offered only in alternate years. Students should, therefore, plan their complementsaries as far ahead as possible. With the approval of the instructor and Academic Adviser, students may take graduate (500-level) CHEE courses as technical complementsaries.

6.13.4 Department of Civil Engineering and Applied Mechanics

6.13.4.1 Location

Macdonald Engineering Building, Room 492
817 Sherbrooke Street West
Montreal, Quebec H3A 2K6

Telephone: 514-398-6860
Fax: 514-398-7361
Website: www.mcgill.ca/civil

6.13.4.2 About the Department of Civil Engineering and Applied Mechanics

Civil engineers have traditionally applied scientific and engineering knowledge to the task of providing the built environment, from its conception and planning to its design, construction, maintenance, and rehabilitation. Examples include buildings, bridges, roads, railways, dams, and facilities for water supply and treatment, and waste disposal. With the ageing and deterioration of an already vast infrastructure, its maintenance and rehabilitation has become an increasingly important role of the civil engineering profession. Also, with worldwide concern about the detrimental impact of human activities on the environment, civil engineers are now in the forefront of developing and providing the means for both prevention and remediation of many aspects of environmental pollution.

Students who wish to extend their knowledge in certain areas beyond the range that the program complementary courses allow can also take a minor. Minors are available in fields such as Arts, Economics, Management, Environmental Engineering, Construction Engineering and Management, and others. These require additional credits to be taken from a specified list of topics relating to the chosen field. Further information on the various minors may be found in section 6.13.10: Minor Programs. Details of how minors can be accommodated within the Civil Engineering program will be made available at the time of preregistration counselling.

6.13.4.3 Academic Programs

Considerable freedom exists for students to influence the nature of the program of study which they follow in the Department of Civil Engineering and Applied Mechanics. A variety of advanced complementary courses is offered in five main groupings: Environmental Engineering, Geotechnical and Geoenvironmental Engineering, Water Resources and Hydraulic Engineering, Structural Engineering, and Transportation Engineering.

Guidance on the sequence in which required core courses should be taken is provided for students in the form of a sample program which covers the entire period of study. The technical complementary courses selected, usually in the last two terms of the program, will depend upon the student's interests. All students must meet with their adviser each term to confirm the courses for which they are registered.

Courses taken in Term 3 or later will depend on a student's interests and ability. Information and advice concerning different possibilities are made available in the Department prior to registration. All programs require the approval of a staff adviser. Programs for students transferring into the Department with advanced standing will be dependent upon the academic credit previously achieved, and such a program will be established only after consultation with a staff adviser.

6.13.4.4 Department of Civil Engineering and Applied Mechanics Faculty

Chair

Van-Thanh-Van Nguyen
Emeritus Professors

Stuart B. Savage; B.Eng.(McG.), M.S.Eng.(Cal. Tech.), Ph.D.(McG.), F.R.S.C.

Professors

Vincent H. Chu; B.S.Eng.(Taiwan), M.A.Sc.(Tor.), Ph.D.(MIT), Eng.
James Nicell; B.A.Sc., M.A.Sc., Ph.D.(Windsor), P.Eng. (William Dawson Scholar)
Suresh C. Shrivastava; B.Sc.(Eng.) (Vikram), M.C.E.(Delhi), Sc.D.(Cal.), Eng.

Associate Professors

Susan J. Gaskin; B.Sc.(Qu.), Ph.D.(Cant.), P.Eng.; Graduate Program Director
Ronald Gehr; B.Sc.(Eng.)(Rand), M.A.Sc., Ph.D.(Tor.), P.Eng.
Subhasis Ghoshal; B.C.E.(Jad.), M.S.(Missouri), Ph.D.(Carn. Mell), P.Eng.; Associate Dean (William Dawson Scholar)
Mohamed Abdel-Meguid; B.Sc.(Cairo, Azhar), M.Sc., Ph.D.(W. Ont.), P.Eng.
Colin Rogers; B.A.Sc., M.A.Sc.(Wat.), Ph.D.(Syd.), P.Eng.
Yixin Shao; B.Sc., M.S.(Tongji), Ph.D.(N'western), P.Eng., F.A.C.I.; Undergraduate Program Director

Assistant Professors

Andrew J. Boyd; B.Sc.Eng.(New Br.), M.A.Sc.(Tor.), Ph.D.(Br. Col.), P.Eng., F.A.C.I.
Naveen Eluru; B.Sc.(Indian IT), M.Sc., Ph.D.(Texas-Austin)
Dominic Frigon; B.Sc.(Agr.Sci.), M.Sc.(McG.), Ph.D.(Env.Sci.) (Ill.)
Marianne Hatzopoulos; B.Sc., M.Sc.(Beirut), Ph.D.(Tor.)
Dimitrios G. Lignos; B.Sc.(Nat. Tech., Athens), M.Sc., Ph.D.(Stan.)
Luis Miranda-Moreno; B.Sc., M.Eng.(Mexico), M.Sc., Ph.D.(Wat.)

Adjunct Professors

Sofia Babarutsi
Richard Edwards
John Hadjinicolaou
Jalal Hawari
Konrad Jones
Angela Keane
Zoubir Lounis
Pierre Lundahl
Patrick Maillard
Charles Manatakos
Thanh Son Nguyen
6.13.4.5 Bachelor of Engineering (B.Eng.) – Civil Engineering (139 credits)

Revision, August 2011. Start of revision.

Program credit weight: 139 credits
Program credit weight for Quebec CEGEP students: 110 credits

The Civil Engineering program is comprehensive in providing the fundamentals in mechanics and engineering associated with the diverse fields of the profession, in offering choices of specialization, and in fully reflecting the advances in science, mathematics, engineering, and computing that have transformed all fields of engineering in recent years. The resulting knowledge and training enables graduates to not only enter the profession thoroughly well prepared, but also to adapt to further change.

The required courses ensure a sound scientific and analytical basis for professional studies through courses in solid mechanics, fluid mechanics, soil mechanics, environmental engineering, water resources management, structural analysis, systems analysis, and mathematics. Fundamental concepts are applied to various fields of practice in both required and complementary courses.

By a suitable choice of complementary courses, students can attain advanced levels of technical knowledge in the specialized areas mentioned above. Alternatively, students may choose to develop their interests in a more general way by combining complementary courses within the Department with several from other departments or faculties.

Required Year 0 (Freshman) Courses

29 credits

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 110-credit program.

GROUP B - HUMANITIES AND SOCIAL SCIENCES, MANAGEMENT STUDIES, AND LAW

3 credits at the 200 level or higher from the following departments:

- Anthropology (ANTH)
- Economics (any 200- or 300-level course excluding ECON 217, ECON 227, and ECON 337)
- History (HIST)
- Philosophy (excluding PHIL 210 and PHIL 310)
- Political Science (POLI)
- Psychology (excluding PSYC 204 and PSYC 305, but including PSYC 100)
- Religious Studies (RELG)
- School of Social Work (SWRK)
- Sociology (excluding SOCI 350)

OR one of the following:

- ARCH 528  (3) History of Housing
- BUSA 465* (3) Technological Entrepreneurship
- ENVR 203 (3) Knowledge, Ethics and Environment
- ENVR 400 (3) Environmental Thought
- FACC 220 (3) Law for Architects and Engineers
- FACC 500 (3) Technology Business Plan Design
- FACC 501 (3) Technology Business Plan Project
- INDR 294* (3) Introduction to Labour-Management Relations
- MATH 338 (3) History and Philosophy of Mathematics
- MGCR 222* (3) Introduction to Organizational Behaviour
- MGCR 352* (3) Marketing Management I
- ORGB 321* (3) Leadership
- ORGB 423* (3) Human Resources Management

* Note: Management courses have limited enrolment and registration dates. See Important Dates at http://www.mcgill.ca/importantdates.
6.13.5.2 About the Department of Electrical and Computer Engineering

The Department of Electrical and Computer Engineering offers undergraduate degree programs in Electrical Engineering, Electrical Engineering (Honours), Computer Engineering, and Software Engineering. All programs provide students with a strong background in mathematics, basic sciences, engineering science, engineering design, and complementary studies, in conformity with the requirements of the Canadian Engineering Accreditation Board (CEAB).

In addition to technical complementary courses, students in all three programs take general complementary courses in humanities and social sciences and/or management studies and law. These courses allow students to develop specific interests in areas such as psychology, economics, management, or political science.

6.13.5.4 Bachelor of Engineering (B.Eng.) - Electrical Engineering (138 credits)

Revision, August 2011. Start of revision.

Program credit weight: 138-139 credits
Program credit weight for Quebec CEGEP students: 109-110 credits

This program gives students a broad understanding of the key principles that are responsible for the extraordinary advances in the technology of computers, micro-eletronics, automation and robotics, telecommunications, and power systems. These areas are critical to the development of our industries and, more generally, to our economy. A graduate of this program is exposed to all basic elements of electrical engineering and can function in any of our client industries. This breadth is what distinguishes an engineer from, say, a computer scientist or physicist.

In addition to technical complementary courses, students in the Electrical Engineering program take general complementary courses in social sciences, administrative studies, and humanities. These courses allow students to develop specific interests in areas such as psychology, economics, management, or political science.

Required Year 0 (Freshman) Courses

29 credits
Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 109- to 110-credit program.

Laboratory Complementaries

2-3 credits from the following:

- ECSE 426 (3) Microprocessor Systems
- ECSE 431 (3) Introduction to VLSI CAD
- ECSE 435 (3) Mixed-Signal Test Techniques
- ECSE 436 (3) Signal Processing Hardware
- ECSE 450 (3) Electromagnetic Compatibility
- ECSE 485 (2) IC Fabrication Laboratory
- ECSE 486 (2) Power Laboratory
- ECSE 487 (2) Computer Architecture Laboratory
- ECSE 488 (2) High Frequency Laboratory
- ECSE 489 (2) Telecommunication Network Laboratory
- ECSE 490 (2) Digital Signal Processing Laboratory
- ECSE 491 (2) Communication Systems Laboratory
- ECSE 492 (2) Optical Communications Laboratory
- ECSE 493 (2) Control and Robotics Laboratory

Complementary Studies

6 credits

Group A - Impact of Technology on Society

3 credits from the following:

- ANTH 212 (3) Anthropology of Development
- BTEC 502 (3) Biotechnology Ethics and Society
- CIVE 469 (3) Infrastructure and Society
- ECON 225 (3) Economics of the Environment
- ECON 347 (3) Economics of Climate Change
- ENVR 201 (3) Society, Environment and Sustainability
- GEOG 200 (3) Geographical Perspectives: World Environmental Problems
- GEOG 203 (3) Environmental Systems
- GEOG 205 (3) Global Change: Past, Present and Future
- GEOG 302 (3) Environmental Management 1
- MECH 526 (3) Manufacturing and the Environment
- MGPO 440* (3) Strategies for Sustainability
- MIME 308 (3) Social Impact of Technology
- PHIL 343 (3) Biomedical Ethics
- RELG 270 (3) Religious Ethics and the Environment
- SOCI 235 (3) Technology and Society
- SOCI 312 (3) Sociology of Work and Industry
- URBP 201 (3) Planning the 21st Century City

* Note: Management courses have limited enrolment and registration dates. See Important Dates at http://www.mcgill.ca/importantdates.
Group B - Humanities and Social Sciences, Management Studies, and Law

3 credits at the 200 level or higher from the following departments:

- Anthropology (ANTH)
- Economics (any 200- or 300-level course excluding ECON 217, ECON 227, and ECON 337)
- History (HIST)
- Philosophy (excluding PHIL 210 and PHIL 310)
- Political Science (POLI)
- Psychology (excluding PSYC 204 and PSYC 305, but including PSYC 100)
- Religious Studies (RELG)
- School of Social Work (SWRK)
- Sociology (excluding SOCI 350)

OR one of the following:

- ARCH 528 (3) History of Housing
- BUSA 465* (3) Technological Entrepreneurship
- ENVR 203 (3) Knowledge, Ethics and Environment
- ENVR 400 (3) Environmental Thought
- FACC 220 (3) Law for Architects and Engineers
- FACC 500 (3) Technology Business Plan Design
- FACC 501 (3) Technology Business Plan Project
- INDR 294* (3) Introduction to Labour-Management Relations
- MATH 338 (3) History and Philosophy of Mathematics
- MGCR 222* (3) Introduction to Organizational Behaviour
- MGCR 352* (3) Marketing Management I
- ORGB 321* (3) Leadership
- ORGB 423* (3) Human Resources Management

* Note: Management courses have limited enrolment and registration dates. See Important Dates at http://www.mcgill.ca/importantdates.

Language Courses

If you are not proficient in a certain language, no more than 3 credits will be given for one 6-credit course at the 100 level or higher in that language. A maximum of 3 credits of language courses will be counted toward the Complementary Studies requirement.

However, 3-6 credits may be given for language courses at the 200 level or higher that have a sufficient cultural component. These courses must be approved by the Engineering Student Centre (Frank Dawson Adams Building, Room 22).

Enhanced Power Concentration

Students following this program must complete 15 credits of technical complementary courses.

The Institute for Electrical Power Engineering was recently established as a province-wide centre for electrical power engineering education. It is funded by industry, mostly Hydro-Québec, and provides a comprehensive program and state-of-the-art laboratory facilities, and a point of contact between industry and universities involved in power engineering.

Note: This program is open to students in the regular Electrical Engineering program only.

Here are some benefits of the concentration:

- A complete and up-to-date final-year program in electrical power engineering, with industry-sponsored and supported courses
- Access to industry-sponsored projects, internships and new employment opportunities

ELIGIBILITY CRITERIA

To be considered in September 2011, the applicant must:

- be registered in the B.Eng. program (regular Electrical Engineering);
- have a cumulative GPA of at least 2.4
- have completed or be registered in ECSE 361 (Power Engineering);
- be able to complete the degree requirements by December 2012;
- agree to follow the curriculum requirements set out below.

SELECTION CRITERIA

The number of students selected, expected to be between five and ten, will be the subject of a specific agreement between the University and the Institute. Selection criteria to the Institute will be based on CGPA and on the curriculum vitae. The selection process for the scholarship may involve an interview with the committee presided by Hydro-Québec. There is a possibility of an internship with Hydro-Québec.

CURRICULUM REQUIREMENTS FOR SELECTED STUDENTS

Generally, unless the University has authorized specific substitutions, students must complete the degree requirements set out in this publication with the following specifications:

Technical Complementaries and Laboratories (15 credits)

All students must take (or have taken) five courses from the following:

**Required Courses**

9 credits

* Courses taught in French

Note: ECSE 460, ECSE 464 (Fall semester), ECSE 465, ECSE 467, ECSE 468, and ECSE 469 are courses sponsored by the Institute and taught at École Polytechnique de Montréal.

Revision, August 2011. End of revision.

6.13.5.5 Bachelor of Engineering (B.Eng.) – Honours Electrical Engineering (138 credits)

Revision, August 2011. Start of revision.

Program credit weight: 138-139 credits

Entry into the Electrical Engineering Honours Program

The Honours program is a limited enrolment program and entry is highly competitive. There is no direct entry to the Honours program in the first year. Students may enter the Honours program in the following ways:

- Students from CEGEP will be admitted, on the basis of their grades, at the start of the third term.
- Students from outside Quebec will be admitted, on the basis of their grades, at the start of the fifth term.

To remain in the Honours program and to be awarded the Honours degree, a student must have completed at least 14 credits in each term since entering Electrical and Computer Engineering, except for the final two terms of their degree, and maintained a CGPA of at least 3.30 since entering Electrical and Computer Engineering. In either of their final two full terms (i.e., Fall and Winter, or Winter and Fall) students may drop below 14 credits, provided the combined load for the two terms is at least 16 credits. For more information, please contact the Departmental office at 514-398-3943.

Revision, August 2011. End of revision.

6.13.5.6 Bachelor of Engineering (B.Eng.) - Computer Engineering (139 credits)
Revision, August 2011. Start of revision.
Program credit weight: 139-143 credits
Program credit weight for CEGEP students: 113-114 credits
The Computer Engineering program provides students with greater depth and breadth of knowledge in the hardware and software aspects of computers. Students are exposed to both theoretical and practical issues of both hardware and software in well-equipped laboratories. Although the program is designed to meet the growing demands by industry for engineers with a strong background in modern computer technology, it also provides the underlying depth for graduate studies in all fields of Computer Engineering.
In addition to technical complementary courses, students in the program take general complementary courses in social sciences, management studies, and humanities. These courses allow students to develop specific interests in areas such as psychology, economics, management, or political science.

Required Year 0 (Freshman) Courses
29 credits
Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 113- to 114-credit program.

### Complementary Courses

17-21 credits

**Basic Science Complementary Courses (for CEGEP students only)**

0-3 credits

Students from CEGEP are required to complete one 3-credit course at the 200 level or higher, chosen from the following science departments, approved by the Undergraduate Programs Office in the Department of Electrical and Computer Engineering:

- Atmospheric and Oceanic Sciences (ATOC)
- Biology (BIOL)
Chemistry (CHEM)
Earth and Planetary Sciences (EPSC)
Earth System Science (ESYS)
Physics (PHYS)

Technical Complementaries

9 credits from the following:

500-level ECSE courses are restricted to students with a minimum CGPA of 3.0 and B+ or better in prerequisite courses.

- COMP 424 (3) Artificial Intelligence
- ECSE 404 (3) Control Systems
- ECSE 411 (3) Communications Systems 1
- ECSE 412 (3) Discrete Time Signal Processing
- ECSE 420 (3) Parallel Computing
- ECSE 421 (3) Embedded Systems
- ECSE 422 (3) Fault Tolerant Computing
- ECSE 424 (3) Human-Computer Interaction
- ECSE 428 (3) Software Engineering Practice
- ECSE 429 (3) Software Validation
- ECSE 431 (3) Introduction to VLSI CAD
- ECSE 436 (3) Signal Processing Hardware
- ECSE 443 (3) Introduction to Numerical Methods in Electrical Engineering
- ECSE 450 (3) Electromagnetic Compatibility
- ECSE 530 (3) Logic Synthesis
- ECSE 532 (3) Computer Graphics
- ECSE 537 (3) Advanced Digital Integrated Circuits
- ECSE 548 (3) Introduction to VLSI Systems

Laboratory Complementaries

2-3 credits from the following:

- ECSE 434 (2) Microelectronics Laboratory
- ECSE 436 (3) Signal Processing Hardware
- ECSE 487 (2) Computer Architecture Laboratory
- ECSE 489 (2) Telecommunication Network Laboratory
- ECSE 490 (2) Digital Signal Processing Laboratory
- ECSE 491 (2) Communication Systems Laboratory
- ECSE 493 (2) Control and Robotics Laboratory

Complementary Studies

6 credits

Group A - Impact of Technology on Society

Language Courses

If you are not proficient in a certain language, no more than 3 credits will be given for one 6-credit course at the 100 level or higher in that language. A maximum of 3 credits of language courses will be counted toward the Complementary Studies requirement.

However, 3-6 credits may be given for language courses at the 200 level or higher that have a sufficient cultural component. These courses must be approved by the Engineering Student Centre (Frank Dawson Adams Building, Room 22).

Revision, August 2011. End of revision.

6.13.5.7 Bachelor of Software Engineering (B.S.E.) - Software Engineering (135 credits)

Revision, August 2011. Start of revision.

Program credit weight: 135-144 credits
Program credit weight for CEGEP students: 112-115 credits

This program offers students the opportunity to focus their studies on the skills needed to design and develop complex software systems. This emerging field of engineering is a major component of the growing Information Technology (IT) sector of the economy, in which the demand for qualified personnel continues to outstrip supply. Graduates of this program will have a solid foundation for careers in the software industry.

In addition to technical complementary courses, students take general complementary courses in social sciences, management studies, and humanities. These courses allow students to develop specific interests in areas such as psychology, economics, management, or political science.

Required Year 0 (Freshman) Courses

29 credits

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 112- to 115-credit program.

CHEM 110 (4) General Chemistry 1
CHEM 120 (4) General Chemistry 2
MATH 133 (3) Linear Algebra and Geometry
MATH 140 (3) Calculus 1
MATH 141 (4) Calculus 2
PHYS 131 (4) Mechanics and Waves
PHYS 142 (4) Electromagnetism and Optics

AND 3 credits selected from the approved list of courses in Humanities and Social Sciences, Management Studies, and Law, listed below under Complementary Studies (Group B).

Required Courses

68 credits

COMP 202 (3) Introduction to Computing 1
COMP 206 (3) Introduction to Software Systems
COMP 250 (3) Introduction to Computer Science
COMP 251 (3) Data Structures and Algorithms
COMP 302 (3) Programming Languages and Paradigms
COMP 360 (3) Algorithm Design Techniques
COMP 421 (3) Database Systems
ECSE 211 (3) Design Principles and Methods
ECSE 221 (3) Introduction to Computer Engineering
ECSE 321 (3) Introduction to Software Engineering
ECSE 322 (3) Computer Engineering
ECSE 420 (3) Parallel Computing
ECSE 427 (3) Operating Systems
ECSE 428 (3) Software Engineering Practice
ECSE 429 (3) Software Validation
ECSE 456 (3) ECSE Design Project 1
ECSE 457 (3) ECSE Design Project 2
FACC 100* (1) Introduction to the Engineering Profession
FACC 400 (1) Engineering Professional Practice
MATH 262 (3) Intermediate Calculus
MATH 263 (3) Ordinary Differential Equations for Engineers
MATH 264 (3) Advanced Calculus for Engineers
MATH 270 (3) Applied Linear Algebra
MATH 363 (3) Discrete Mathematics

* Note: FACC 100 (Introduction to the Engineering Profession) must be taken during the first year of study.

**Engineering Breadth Required Courses**
23 credits

CCOM 206 (3) Communication in Engineering
ECSE 200 (3) Electric Circuits 1
ECSE 210 (3) Electric Circuits 2
ECSE 291 (2) Electrical Measurements Laboratory
ECSE 305 (3) Probability and Random Signals 1
ECSE 306 (3) Fundamentals of Signals and Systems
ECSE 330 (3) Introduction to Electronics
MIME 310 (3) Engineering Economy

**Complementary Courses**
15-24 credits

**Basic Science Complementary Courses (for CEGEP students only)**
0-6 credits

Students from CEGEP are required to complete two 3-credit courses at the 200 level or higher, chosen from the following science departments, approved by the Undergraduate Programs Office in the Department of Electrical and Computer Engineering:

Atmospheric and Oceanic Sciences (ATOC)
Biology (BIOL)
Chemistry (CHEM)
Earth and Planetary Sciences (EPSC)
Earth System Science (ESYS)
Physics (PHYS)

**Technical Complementaries**
9-12 credits

500-level ESCE courses are restricted to students with a minimum CGPA of 3.0 and B+ or better in prerequisite courses.

Not all courses listed are offered in a given year. See the "Courses" section of this publication to know if a course is offered.

**List A**

Revision, August 2011. End of revision.

6.13.6 Department of Mechanical Engineering

6.13.6.1 Location

Macdonald Engineering Building, Room 270
817 Sherbrooke Street West
Montreal, Quebec H3A 2K6

Telephone: 514-398-6296
Fax: 514-398-7365
Website: www.mcgill.ca/mecheng

6.13.6.2 About the Department of Mechanical Engineering

Mechanical engineers are traditionally concerned with the conception, design, implementation, and operation of mechanical systems. Typical fields of work are aerospace, energy, manufacturing, machinery, and transportation. Because of the very broad nature of the discipline, there is usually a high demand for mechanical engineers.

Many mechanical engineers follow other career paths. Graduate studies are useful for the specialists working in research establishments, consulting firms, or in corporate research and development.

To prepare the mechanical engineer for a wide range of career possibilities, there is a heavy emphasis in our curriculum on the fundamental analytical disciplines. This is balanced by a sequence of experimental and design engineering courses, which include practice in design, manufacturing, and experimentation. In these courses, students learn how to apply their analytical groundwork to the solution of practical problems.

Concentrations in Aeronautical Engineering, Mechatronics*, and Design are available for students in either the regular or Honours program who wish to specialize in these areas.

While the program is demanding, there is time for many extracurricular activities. Students are active in such professional societies as CASI (Canadian Aeronautics and Space Institute), SAE (Society of Automotive Engineers), and ASME (American Society of Mechanical Engineers), and in various campus organizations.

Relations between faculty and students are extremely close. Social functions, at which students and professors meet to exchange views and get to know each other better, are organized frequently.

* The Mechatronics Concentration will not be offered until further notice.

Note: * The Mechatronics Concentration will not be offered until further notice.

6.13.6.3 Department of Mechanical Engineering Faculty

Chair

George Haller

Emeritus Professors

Abdul M. Ahmed; B.Sc.(Dhaka), M.Eng., Ph.D.(McG.), Eng. (Thomas Workman Emeritus Professor of Mechanical Engineering)
Stuart J. Price; B.Sc., Ph.D.(Brist.), P.Eng.

Post-Retirement

Professors

Marco Amabili; M.Eng.(Ancona), Ph.D.(Bologna) (Tier 1 Canada Research Chair)
Professors

Bantwal R. Baliga; B.Tech.(Indian IT, Kanpur), M.Sc.(Case West.), Ph.D.(Minn.)

Eliot Fried; A.B.(Calif., Berk.), M.S., Ph.D.(Calif. Tech.) (*Tier 1 Canada Research Chair*)

6.13.6.4 Bachelor of Engineering (B.Eng.) – Mechanical Engineering (142 credits)

Revision, August 2011. Start of revision.

Program credit weight: 142-148 credits

Program credit weight for CEGEP students: 119 credits

To prepare the mechanical engineer for a wide range of career possibilities, there is a heavy emphasis in our curriculum on the fundamental analytical disciplines. This is balanced by a sequence of experimental and design engineering courses which include practice in design, manufacturing, and experimentation. In these courses, students learn how to apply their analytical groundwork to the solution of practical problems.

Special interests are satisfied by selecting appropriate complementary courses from among those offered with a specific subject concentration, such as management, industrial engineering, computer science, controls and robotics, bio-engineering, aeronautics, combustion, systems engineering, etc.

Required Year 0 (Freshman) Courses

29 credits

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 118-credit program.

Group B - Humanities and Social Sciences, Management Studies, and Law
3 credits at the 200- level or higher from the following departments:

Anthropology (ANTH)

Economics (any 200- or 300-level course excluding ECON 217, ECON 227, and ECON 337)

History (HIST)

Philosophy (excluding PHIL 210 and PHIL 310)

Political Science (POLI)

Psychology (excluding PSYC 204 and PSYC 305, but including PSYC 100)

Religious Studies (RELG)

School of Social Work (SWRK)

Sociology (excluding SOCI 350)

Language Courses
If you are not proficient in a certain language, no more than 3 credits will be given for one 6-credit course at the 100-level or higher in that language. A maximum of 3 credits of language courses will be counted toward the Complementary Studies requirement. However, 3-6 credits may be given for language courses at the 200-level or higher that have a sufficient cultural component. Theses courses must be approved by the Engineering Student Centre (Frank Dawson Adams Building, Room 22).

Elective Courses
0-6 credits
Students from Quebec CEGEPs must take 6 credits of courses at the 200-level or higher from the following faculties/schools:
- Desautels Faculty of Management
- Faculty of Agricultural and Environmental Sciences
- Faculty of Arts
- Faculty of Engineering
- Faculty of Religious Studies
- Faculty of Science
- Schulich School of Music

Typical Program of Study
Students entering the program from Quebec CEGEPs follow a different curriculum from those entering from outside the province. Students will be advised by the Department as to which courses they should select from the course lists above.

For a detailed curriculum, please see http://www.mcgill.ca/mecheng/undergrad/curriculum.

For all minors and concentrations, students should complete a Course Authorization Form, available from the Student Affairs Office (Engineering Student Centre) or from the Undergraduate Program Coordinator, indicating their intention to take the minor or concentration.

Revision, August 2011. End of revision.

6.13.6.5 Bachelor of Engineering (B.Eng.) – Honours Mechanical Engineering (142 credits)

Revision, August 2011. Start of revision.

Program credit weight: 142-148 credits

Program credit weight for CEGEP students: 119 credits

To prepare the mechanical engineer for a wide range of career possibilities, there is a heavy emphasis in our curriculum on the fundamental analytical disciplines. This is balanced by a sequence of experimental and design Engineering courses, which include practice in design, manufacturing, and experimentation. In these courses, students learn how to apply their analytical groundwork to the solution of practical problems.

The Honours program is particularly suitable for those with a high aptitude in mathematics and physics and gives a thorough grounding in the basic engineering sciences.

Special interests are satisfied by selecting appropriate complementary courses from among those offered with a specific subject concentration, such as management, industrial engineering, computer science, controls and robotics, bio-engineering, aeronautics, combustion, systems engineering, etc.

Required Year 0 (Freshman) Courses
29 credits
Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 119-credit program.

Typical Program of Study
Students entering the program from CEGEP follow a different curriculum from those entering from out of province. Students will be advised by the Department as to which courses they should select from the course lists above.
For a detailed curriculum, see http://www.mcgill.ca/mecheng/undergrad/curriculum.
For all minors and concentrations, students should complete a Course Authorization Form, available from the Student Affairs Office (Engineering Student Centre) or from the Undergraduate Program Coordinator, indicating their intention to take the minor or concentration.

Revision, August 2011. End of revision.

6.13.6.6 Bachelor of Engineering (B.Eng.) - Mechanical Engineering - Aeronautical Engineering (15 credits)
Students in this concentration take five courses in the area of Aeronautical Engineering. All courses must be passed with a grade of C or better.
Students should discuss their course selection with their adviser and complete a Course Authorization Form, available from the Student Affairs Office (Engineering Student Centre, Frank Dawson Adams Building, Room 22) or from the Undergraduate Program Coordinator, indicating their intention to take the concentration.

Required Courses
6 credits
MECH 532 (3) Aircraft Performance, Stability and Control
MECH 533 (3) Subsonic Aerodynamics

Complementary Courses
9 credits
3-6 credits from the following:
MECH 535 (3) Turbomachinery and Propulsion
### Bachelor of Engineering (B.Eng.) - Honours Mechanical Engineering - Aeronautical Engineering (15 credits)

Students in this concentration take five courses in the area of aeronautical engineering. All courses must be passed with a grade of C or better. Students should discuss their course selection with their adviser and complete a Course Authorization Form, available from the Student Affairs Office (Engineering Student Centre, Frank Dawson Adams Building, Room 22) or from the Undergraduate Program Coordinator, indicating their intention to take the concentration.

6.13.7.2  About the Department of Mining and Materials Engineering

The Department of Mining and Materials Engineering offers programs leading to the Bachelor of Engineering degree in Materials Engineering or Mining Engineering. In addition to regular courses and laboratories, the curriculum includes seminars, colloquia, and student projects reinforced by field trips to industrial operations.

For more information, refer to:

- section 6.13.7.4.3: Bachelor of Engineering (B.Eng.) – Materials Engineering CO-OP (147 credits)
- section 6.13.7.5.3: Bachelor of Engineering (B.Eng.) - Mining Engineering CO-OP (149 credits)

6.13.7.2.1  Scholarships

The Department offers renewable Entrance Scholarships every year. A substantial number of other scholarships and bursaries are also awarded by the Department as well as by the Canadian Mineral Industry Education Foundation.

6.13.7.3  Department of Mining and Materials Engineering Faculty

6.13.7.4 About Materials Engineering
6.13.7.4.1 Materials Engineering (Co-op)

The Materials Engineering degree is a cooperative program leading to a B.Eng. and includes formal industrial work periods. It is built on a strong background of mathematics, basic sciences, computer skills and applications, and specific engineering and design courses to provide up-to-date training in materials engineering. Students take core courses covering processing, fabrication, applications, and performance of materials, namely metals, ceramics, polymers, and composites. The program is fully accredited by the Canadian Engineering Accreditation Board (CEAB) and is designed to offer students exceptional training for employment in the field. The core courses are supplemented by complementary courses, which provide a diverse selection of specialties for the graduating engineer. The course structure is reinforced with laboratory exercises. Graduates find employment in a wide range of industries, including the resource and manufacturing sectors. Students in the Co-op program benefit from practical learning experience gained from work-term employment in meaningful engineering jobs, as well as non-tangible learning experiences arising from the responsibilities required to obtain and successfully complete the work terms.

Regarding the Co-op program fees, an amount of $200 will be billed during ten consecutive terms for a total amount of $2,000 before graduation. These fees cover expenses directly related to the operation of the Co-op program. Students must register for each of their industrial training courses and pay the associated fees by the Minerva Course Change (drop/add) deadlines or late fees will apply. Before registering for any work term course, students must contact the Materials Co-op Liaison Officer for approval.

6.13.7.4.2 Student Advising

Students entering this program must plan their schedule of studies in consultation with one of the departmental advisers, Prof. Richard Chromik, Prof. Showan Nazhat, or Prof. Kristian Waters.

6.13.7.4.3 Bachelor of Engineering (B.Eng.) – Materials Engineering CO-OP (147 credits)

Revision, August 2011. Start of revision.

Program credit weight: 147-148 credits

Program credit weight for CEGEP students: 118-119 credits

In addition to regular courses and laboratories, the B.Eng. Materials Engineering curriculum includes seminars, colloquia, and student projects reinforced by field trips to industrial operations.

Students entering this program must plan their schedule of studies in consultation with the Departmental Adviser.

Required Year 0 (Freshman) Courses

29 credits

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 118- to 119-credit program.

CHEM 110 (4) General Chemistry 1
CHEM 120 (4) General Chemistry 2
MATH 133 (3) Linear Algebra and Geometry
MATH 140 (3) Calculus 1
MATH 141 (4) Calculus 2
PHYS 131 (4) Mechanics and Waves
PHYS 142 (4) Electromagnetism and Optics

AND 3 credits selected from the approved list of courses in Humanities and Social Sciences, Management Studies, and Law, listed below under Complementary Studies (Group B)

Note: FACC 100 (Introduction to the Engineering Profession) must be taken during the first year of study.

**Required Non-Departmental Courses**
29 credits

ENVR 400 (3) Environmental Thought
FACC 220 (3) Law for Architects and Engineers
FACC 500 (3) Technology Business Plan Design
FACC 501 (3) Technology Business Plan Project
INDR 294* (3) Introduction to Labour-Management Relations
MATH 338 (3) History and Philosophy of Mathematics
MGCR 222* (3) Introduction to Organizational Behaviour
MGCR 352* (3) Marketing Management I
ORGB 321* (3) Leadership
ORGB 423* (3) Human Resources Management

* Management courses have limited enrolment and registration dates. See Important Dates at http://www.mcgill.ca/importantdates.

Language Courses
If you are not proficient in a certain language, no more than 3 credits will be given for one 6-credit course at the 100 level or higher in that language. A maximum of 3 credits of language courses will be counted toward the Complementary Studies requirement. However, 3-6 credits may be given for language courses at the 200 level or higher that have a sufficient cultural component. These courses must be approved by the Engineering Student Centre (Frank Dawson Adams Building, Room 22).

Revision, August 2011. End of revision.

6.13.7.5 About Mining Engineering

6.13.7.5.1 Mining Engineering (Co-op)

McGill is proud to be the host of the oldest mining engineering program in Canada, which started in 1871. The program is known for the excellence of its courses as well as the training it provides in mining technology, mineral economics, and mine design. The minerals industry is currently going through an expansion phase that has never been seen before. This is highly beneficial to both our graduate and undergraduate students. Tremendous career opportunities are available in Canada and around the world. There have been rapid technical developments in recent years, presenting a challenge to the creative student with a strong interest in engineering and a taste for innovative solutions.

The Department offers a co-operative program leading to the accredited B.Eng. degree in Mining Engineering. It includes four paid industrial work terms. The Co-op program is offered in collaboration with the mining engineering program at École Polytechnique in Montreal. Students registered at McGill are required to take a series of Mining courses at École Polytechnique in the latter part of the program. These courses are designated by subject code MPMC in the program.

Students must register for each work term (MIME 290, MIME 291, MIME 392, MIME 494) and pay associated fees by the Course Change (add/drop) registration deadline or else late fees will apply. Before registering for any work term course, students must contact the Mining Co-op Liaison Officer for approval.

6.13.7.5.2 Student Advising

Students entering this program must plan their schedule of studies in consultation with one of the departmental advisers: Prof. Ferri Hassani or Mr. John Mossop.

6.13.7.5.3 Bachelor of Engineering (B.Eng.) - Mining Engineering CO-OP (149 credits)

Revision, August 2011. Start of revision.

Program credit weight: 149-151 credits
Program credit weight for CEGEP students: 120-122 credits

In addition to regular courses and laboratories, the curriculum of the B.Eng. Mining Engineering Co-op program includes seminars, colloquia, and student projects reinforced by field trips to industrial operations.

Students entering this program must plan their schedule of studies in consultation with a departmental adviser.

Required Year 0 (Freshman) Courses

29 credits

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 120- to 122-credit program.

### 6.13.8 School of Urban Planning

#### 6.13.8.1 Location

Macdonald-Harrington Building, Room 400
815 Sherbrooke Street West
Montreal, Quebec H3A 2K6

Telephone: 514-398-4075
Fax: 514-398-8376
Email: admissions.planning@mcgill.ca
Website: [www.mcgill.ca/urbanplanning](http://www.mcgill.ca/urbanplanning)

#### 6.13.8.2 About the School of Urban Planning

Modern urban planning developed into a profession in the early decades of the 20th century, largely as a response to the appalling sanitary, social, and economic conditions of rapidly developing industrial cities. Initially, the disciplines of architecture, landscape architecture, civil engineering, and public health provided the nucleus of concerned professionals; beautification schemes and infrastructure works marked the early stages of public intervention in the 19th century. Architects, engineers, and public health specialists were joined by economists, sociologists, lawyers, and geographers as the complexities of the city's problems came to be more fully understood and public pressure mounted for their solution. Contemporary urban and regional planning techniques for survey, analysis, design, and implementation developed from an interdisciplinary synthesis of these various fields, as did the practice of urban design.

Today, urban planning can be described as the collective management of urban development. It is concerned with the welfare of communities, control of the use of land, design of the built environment, including transportation and communication networks, and protection and enhancement of the natural environment. It is at once a technical and a political process that brings together actors from the public, private, and community spheres. Planners participate in that process in a variety of ways, as designers and analysts, advocates and mediators, facilitating the search for equitable and efficient solutions to problems of urban growth and development.

McGill University was the first institution in Canada to offer a full-time planning program. An interdisciplinary program was established in 1947, in which students combined a Master's degree in Urban Planning with one in a related field. An autonomous program was established in 1972. It became the School of Urban Planning in 1976, a unit within the Faculty of Engineering. It has strong links with the School of Architecture, which is housed in the same building.

Students come to the School from diverse backgrounds, the physical sciences, the traditional professions, such as architecture and engineering, and the social sciences. Alumni of the School work as planners and designers at various levels of government, in non-profit organizations, and with private consulting firms. Their expertise ranges from historic preservation to transportation planning, from housing development to computer imaging. They devote their efforts in increasing numbers to environmental planning and sustainable development.
The School has a rich track record of contribution to the community and to the profession. It devotes its energy to the study of urban problems and the formulation of policies in developing regions as well as in Montreal and other Canadian cities. Faculty and students collaborate actively with members of other McGill departments, notably Architecture, Geography, Civil Engineering, and Law, and with colleagues at other institutions in Canada and abroad.

The objective of the School is to produce qualified professional urban planners for the public and the private sectors. Training is provided at the postgraduate level; the degree offered is the Master of Urban Planning (M.U.P.). Two formal specializations are available: in Urban Design and in Transportation Planning. M.U.P. students in the core program may also opt to spend a semester in Barbados as part of the Barbados Field Study Semester, which focuses on Global Environmental Issues. Details concerning each of these concentrations can be found at www.mcgill.ca/urbandesign, www.tram.mcgill.ca, and www.mcgill.ca/bfss respectively.

Upon completion of the two-year program of studies, graduates are expected to have acquired basic planning skills, a broad understanding of urban issues, and specialized knowledge in a field of their own choice.

The program of study offered by the School is fully recognized by the Ordre des Urbanistes du Québec (O.U.Q.) and the Canadian Institute of Planners (C.I.P.). Graduates may become full members of the O.U.Q. and other provincial planning associations by completing their respective internship and examination requirements. Similar requirements must be met for admission to the American Institute of Certified Planners (A.I.C.P.) and other such organizations.

For details of the M.U.P. admission requirements and curriculum, consult the Graduate and Postdoctoral Studies Programs, Courses and University Regulations publication, available at www.mcgill.ca/study.

6.13.8.3 Undergraduate Courses in Urban Planning

The following courses taught by faculty in the School of Urban Planning are open to undergraduate students:

6.13.8.4 School of Urban Planning Faculty

**Director**

Raphaël Fischler

**Emerita Professor**

Jane Matthews-Glenn; B.A., LL.B.(Qu.), D. en droit(Strasbourg)

**Associate Professors**

Madhav G. Badami; B.Tech., M.S.(IIT, Madr.), M.E.Des.(Calg.), Ph.D.(Br. Col.) (*joint appit. with McGill School of Environment*)

Lisa Bornstein; B.Sc.(Calif., Berk.), M.R.P.(C’nell), Ph.D.(Calif., Berk.)

David F. Brown; B.A.(Bishop’s), M.U.P.(McG.), Ph.D.(Sheff.)

Raphaël Fischler; B.Eng.(V. Tech. Eindhoven), M.S. Arch.S., M.C.P.(MIT), Ph.D.(Calif., Berk.)
Assistant Professors

Ahmed Elgeneidy; B.Sc., M.Sc.(Alexandria), Ph.D.(Port. St.)

Nik Luka; B.A.(Ryerson), M.Arch.(Laval), Ph.D.(Tor.) (joint appt. with Architecture)

Instructors

Heather Braiden; B.E.S.(Wat.), M.L.Arch.(Tor.)

Marc-André Lechasseur; LL.B.(Sher.), LL.M.(Montr.)

Alain Trudeau; B.Sc.(UQAM), M.U.P.(McG.)

Adjunct Professors

Cameron Charlebois; B.Sc.(Arch.), B.Arch., M.B.A.(McG.)

David Farley; B.Arch.(McG.), M.Arch., M.C.P.(Harv.)

Mario Polese; B.A.(CUNY), M.A., Ph.D.(Penn.)

Ray Tomalty; B.A., M.P.A..(Qu.), Ph.D.(Wat.)

Guest Lecturers

Paul LeCavalier

Brenda Lee

Denis Lévesque

Pierre Morissette

Richard Shearmur

Larry Sherman

Martin Wexler

Joshua Wolfe

6.13.9 Faculty of Engineering Related Programs

6.13.9.1 Bioresource Engineering

The Faculty of Engineering cooperates with the Faculty of Agricultural and Environmental Sciences in providing courses of instruction for a curriculum in agricultural and biosystems engineering to meet requirements for a professional degree awarded in the Faculty of Agricultural and Environmental Sciences. For details, refer to the B.Eng.(Bioresource) program requirements in the Faculty of Agricultural and Environmental Sciences section of this publication.

Some of the courses offered by the Department of Bioresource Engineering (subject code BREE) may be of interest to students in the Faculty of Engineering.

The Department of Bioresource Engineering is located in the Faculty of Agricultural and Environmental Sciences on the Macdonald campus.

   Department of Bioresource Engineering
   Macdonald-Stewart Building, Room MS1-027
   21,111 Lakeshore Road
   Sainte-Anne-de-Bellevue, Quebec H9X 3V9
   Telephone: 514-398-7773
   Fax: 514-398-8387
   Website: www.mcgill.ca/bioeng

6.13.9.2 Department of Biomedical Engineering

   Lyman Duff Medical Sciences Building
   3775 University Street
   Montreal, Quebec H3A 2B4
   Telephone: 514-398-6736
   Website: www.bmed.mcgill.ca
Some of the courses offered by the Department of Biomedical Engineering (subject code BMDE) may be of interest to Engineering students, and may be approved as complementary courses. The Faculty of Engineering also offers a Minor in Biomedical Engineering; for more information, see section 6.13.10.2.1: Bachelor of Engineering (B.Eng.) - Minor Biomedical Engineering (21 credits).

6.13.10 Minor Programs

This section includes general information concerning minors that are designed for students in the Faculty of Engineering.

Minors are coherent sequences of courses taken in addition to the courses required for the B.Eng., B.S.E., or B.Sc.(Arch.) degree. Minors normally consist of 18-24 credits, allowing 9-12 credits of overlap with the degree program. The real credit cost to the student is typically 9-15 credits, representing one term beyond the B.Eng., B.S.E., or B.Sc.(Arch.) degree program. All courses in a minor must be passed with a grade of C or better.

Engineering students choose from a considerable variety of complementary courses under the categories of technical and complementary studies. Students should refer to their department for information concerning selection of complementary courses, and should see their department adviser. Departments also publish information regarding the choice of courses in this publication and in separate documents.

Note: Students are also permitted to register for minor concentrations offered by departments in the Faculty of Arts. Students must obtain approval from both the department in the Faculty of Arts and from the Engineering Student Centre Student Affairs Office (Frank Dawson Adams, Room 22), before registering in one of these minors.

Minor Programs:

- section 6.13.10.1: Arts Minor
- section 6.13.10.2: Biomedical Engineering Minor
- section 6.13.10.3: Biotechnology Minor
- section 6.13.10.4: Chemistry Minor
- section 6.13.10.5: Computer Science Courses and Minor Program
- section 6.13.10.6: Construction Engineering and Management Minor
- section 6.13.10.7: Economics Minor
- section 6.13.10.8: Environmental Engineering Minor
- section 6.13.10.9: Minor in Environment
- section 6.13.10.10: Minor Programs in Finance, Management, Marketing, and Operations Management
- section 6.13.10.11: Materials Engineering Minor
- section 6.13.10.12: Mathematics Minor
- section 6.13.10.13: Mining Engineering Minor
- section 6.13.10.14: Physics Minor
- section 6.13.10.15: Software Engineering Minor
- section 6.13.10.16: Technological Entrepreneurship Minor

6.13.10.1 Arts Minor

The Arts Minor is open to B.Sc.(Arch.), B.Eng., and B.S.E. students. In this Minor, students choose courses from two areas of concentration in the Faculty of Arts, approved by a Faculty Adviser in the Student Affairs Office, Engineering Student Centre, or by the Senior Faculty Adviser in the Faculty of Arts. B.Eng. and B.S.E. students may count some of their Complementary Studies courses toward this Minor.

Minor Adviser: Faculty Student Adviser in the Engineering Student Centre (Frank Dawson Adams, Room 22) OR Donald Sedgwick (Senior Faculty Adviser, Faculty of Arts)

6.13.10.1.1 Bachelor of Engineering (B.Eng.) - Minor Arts (24 credits)

Minor Adviser: Faculty Student Adviser in the Engineering Student Centre (Frank Dawson Adams Building, Room 22) OR Donald Sedgwick (Senior Faculty Adviser, Faculty of Arts)

B.Sc.(Arch.), B.Eng., and B.S.E. students may obtain the Arts Minor as part of their B.Eng., B.S.E., or B.Sc.(Arch.) degree by completing 24 credits, as described below.

Students must select courses for this Minor in consultation with one of the Advisers indicated above.

All courses in the Minor must be passed with a grade of C or better.

Requirements

24 credits as follows:

a) At least two areas of concentration in the Faculty of Arts must be chosen, with a minimum of 6 credits in any one area.

b) At least 12 credits must be at the 300 level or higher.
In general, B.Eng. and B.S.E. students may use courses from the Complementary Studies lists (Group A and Group B) in their program that are offered by the Faculty of Arts to satisfy some of these requirements. No more than 9 credits of these courses can be credited toward the Arts Minor.

6.13.10.2 Biomedical Engineering Minor

Biomedical engineering can be defined as the application of engineering principles to medicine and the life sciences. Students in the Biomedical Engineering Minor take courses in life sciences (anatomy, biology, chemistry, and physiology) and choose courses from area(s) within the field of biomedicine (artificial cells and organs; bioinformatics, genomics, and proteomics; biomaterials, biosensors, and nanotechnology; biomechanics and prosthetics; medical physics and imaging; and neural systems and bio signal processing).

Minor Adviser: Prof. R. Leask (Wong Building, Room 4120) or Prof. R. Mongrain (Macdonald Engineering Building, Room 369)

6.13.10.21 Bachelor of Engineering (B.Eng.) - Minor Biomedical Engineering (21 credits)

Minor Advisers: Prof. R. Leask (Wong Building, Room 4120) or Prof. R. Mongrain (Macdonald Engineering Building, Room 369)

Note: Open to all students in the Faculty of Engineering (including B.S.E. students).

Minor program credit weight: 21-25 credits

The Biomedical Engineering Minor allows access to courses in basic life sciences and is intended to expose students to the interdisciplinary tools used in biomedicine.

To complete this Minor, students must obtain a grade of C or better in all approved courses and satisfy the requirements of both the major program and the Minor.

Students considering this Minor should contact the Minor Advisers listed above.

Complementary Introductory Courses in Life Sciences

3-7 credits

One or two courses from the following list (equivalents can be approved):

- ANAT 212 (3) Molecular Mechanisms of Cell Function
- BIOC 212 (3) Molecular Mechanisms of Cell Function
- BIOL 200 (3) Molecular Biology
- BIOL 201 (3) Cell Biology and Metabolism
- CHEM 212 (4) Introductory Organic Chemistry 1
- PHGY 201 (3) Human Physiology: Control Systems
- PHGY 202 (3) Human Physiology: Body Functions
- PHGY 209 (3) Mammalian Physiology 1
- PHGY 210 (3) Mammalian Physiology 2

Specialization Courses

12-18 credits from the following:

Students must select 6 credits from courses outside their department and at least one BMDE course. These BMDE courses are best taken near the end of the program, when prerequisites are satisfied.

Artificial Cells and Organs

- BMDE 505 (3) Cell and Tissue Engineering
- CHEE 562 (3) Engineering Principles in Physiological Systems
- PHGY 311 (3) Channels, Synapses & Hormones
- PHGY 312 (3) Respiratory, Renal, & Cardiovascular Physiology
- PHGY 313 (3) Blood, Gastrointestinal, & Immune Systems Physiology
- PHGY 517 (3) Artificial Internal Organs
- PHGY 518 (3) Artificial Cells

Bioinformatics, Genomics and Proteomics
ANAT 365* (3) Cellular Trafficking
ANAT 458 (3) Membranes and Cellular Signaling
BIOC 311 (3) Metabolic Biochemistry
BIOC 312 (3) Biochemistry of Macromolecules
BIOC 458* (3) Membranes and Cellular Signaling
BMDE 506 (3) Molecular Biology Techniques
COMP 302 (3) Programming Languages and Paradigms
COMP 360 (3) Algorithm Design Techniques
COMP 421 (3) Database Systems
COMP 424 (3) Artificial Intelligence
COMP 462 (3) Computational Biology Methods
COMP 526 (3) Probabilistic Reasoning and AI

* Students choose either ANAT 365 or BIOC 458

**Biomaterials, Biosensors, and Nanotechnology**

BMDE 504 (3) Biomaterials and Bioperformance
BMDE 505 (3) Cell and Tissue Engineering
BMDE 508 (3) Introduction to Micro and Nano-Bioengineering
CHEE 380 (3) Materials Science
ECSE 424 (3) Human-Computer Interaction
MECH 553 (3) Design and Manufacture of Microdevices
MIME 360 (3) Phase Transformations: Solids
MIME 362 (3) Mechanical Properties
MIME 470 (3) Engineering Biomaterials
PHYS 534 (3) Nanoscience and Nanotechnology

**Biomechanics and Prosthetics**

BMDE 503 (3) Biomedical Instrumentation
CHEE 561 (3) Introduction to Soft Tissue Biophysics
CHEE 563* (3) Biofluids and Cardiovascular Mechanics
MECH 315 (4) Mechanics 3
MECH 321 (3) Mechanics of Deformable Solids
MECH 530 (3) Mechanics of Composite Materials
MECH 561 (3) Biomechanics of Musculoskeletal Systems
MECH 563* (3) Biofluids and Cardiovascular Mechanics
MIME 360 (3) Phase Transformations: Solids
MIME 362 (3) Mechanical Properties

* Students choose either CHEE 563 or MECH 563.

**Medical Physics and Imaging**

BMDE 519 (3) Biomedical Signals and Systems
COMP 302 (3) Programming Languages and Paradigms
Neural Systems and Biosignal Processing

BMDE 501 (3) Selected Topics in Biomedical Engineering
BMDE 502 (3) BME Modelling and Identification
BMDE 503 (3) Biomedical Instrumentation
BMDE 519 (3) Biomedical Signals and Systems
ECSE 526 (3) Artificial Intelligence
PHYS 413 (3) Physical Basis of Physiology

Complementary Courses

0-6 credits

Up to 6 credits in the B.Eng., B.S.E., or B.Sc.(Arch.) program can also be credited to the Minor, with the permission of the Departmental Adviser and approval of the Minor Adviser. In particular, courses at the 200- level or higher that are prerequisites for certain specialization courses would be eligible, with permission of the Minor Adviser. By careful selection of complementary courses, the Minor can be satisfied with 9 additional credits in the student's major program or a maximum of 12 credits of overlap with the major program.

6.13.10.3 Biotechnology Minor

Biotechnology can be defined as the science of understanding, selecting, and promoting useful organisms and specific gene products for therapeutic purposes. It requires a broad comprehension of biology and engineering and detailed knowledge of at least one basic subject such as molecular genetics, protein chemistry, microbiology, or chemical engineering.

The Minor in Biotechnology, offered by the Faculties of Engineering and of Science, emphasizes an area relevant to biotechnology that is complementary to the student's main program. It is designed specifically for Chemical Engineering students; other Engineering students interested in taking this Minor should contact the Program Supervisor, Dr. Hugh Bennett (see below for contact information).

Students who are interested in this Minor should inform their academic adviser and the Program Supervisor in Year 1 and at the time of registration in Year 2. With the agreement of their academic adviser, students should submit their course list to the Program Supervisor, who will certify that the proposed program conforms to the requirements for the Minor.

The Biotechnology Minor is administered by the Faculty of Engineering Student Affairs Office, Engineering Student Centre, and by the Faculty of Science by Dr. Hugh Bennett, Program Supervisor.

Minor Adviser: Faculty Student Adviser in the Engineering Student Centre (Frank Dawson Adams Building, Room 22) OR Dr. Hugh Bennett (contact information below).

Dr. Hugh Bennett
Sheldon Biotechnology Centre
3773 University Street
Montreal, Quebec H3A 2B4
Telephone: 512-398-8083
Email: hugh.bennett@mcgill.ca

6.13.10.3.1 Bachelor of Engineering (B.Eng.) - Minor Biotechnology (for Engineering Students) (24 credits)

Revision, August 2011, Start of revision.

Minor Adviser: Prof. Hugh Bennett, Program Supervisor (Sheldon Biotechnology Centre, Lyman Duff Building) OR a faculty student adviser in the Engineering Student Centre (Frank Dawson Adams Building, Room 22).
This Minor is offered by the Faculties of Engineering and Science for students who wish to take biotechnology courses that are complementary to their area. It has been designed specifically for Chemical Engineering students; other Engineering students who are interested in the Minor should contact one of the Minor advisers indicated above.

To obtain the Biotechnology Minor, students must complete 24 credits, 18 of which must be exclusively for the Minor. Approved substitutions must be made for any of the required courses that are part of the student's major program.

The Department of Chemical Engineering permits students taking this Minor to complete BIOT 505 (Selected Topics in Biotechnology) as one of their technical complementary courses. Chemical Engineering students complete 15 credits beyond their 141-credit (115-credit for CEGEP students) B.Eng. program to obtain this Minor.

**Required Courses**

12 credits

- BIOT 505 (3) Selected Topics in Biotechnology
- CHEE 200 (4) Introduction to Chemical Engineering
- CHEE 204 (3) Chemical Manufacturing Processes
- CHEE 474 (3) Biochemical Engineering

**OR**

**Alternative Required Courses (for Chemical Engineering students)**

A Chemical Engineering student may complete the Biotechnology Minor by taking the courses below plus one course from the list of complementary courses, not including MIME 310.

- BIOL 200 (3) Molecular Biology
- BIOL 201 (3) Cell Biology and Metabolism
- BIOL 202 (3) Basic Genetics
- BIOT 505 (3) Selected Topics in Biotechnology
- MIMM 211 (3) Introductory Microbiology

**Complementary Courses**

12 credits selected from courses outside the Department of the student's major program and/or from the lists below. If courses are chosen from the lists below, at least three courses must be taken from one area of concentration as grouped.

**Biomedicine**

- ANAT 541 (3) Cell and Molecular Biology of Aging
- EXMD 504 (3) Biology of Cancer
- PATH 300 (3) Human Disease

**Chemistry**

- CHEM 382 (3) Organic Chemistry: Natural Products
- CHEM 502 (3) Advanced Bio-Organic Chemistry
- CHEM 552 (3) Physical Organic Chemistry

**General**

- MIME 310 (3) Engineering Economy

**Immunology**

- ANAT 261 (4) Introduction to Dynamic Histology
- BIOC 503 (3) Immunochemistry
MIMM 314 (3) Immunology
MIMM 414 (3) Advanced Immunology
PHGY 513 (3) Cellular Immunology

Management
Note: Engineering students may not use these courses to count toward a Management minor, nor toward the Complementary Studies requirement.

ECON 208 (3) Microeconomic Analysis and Applications
MGCR 211 (3) Introduction to Financial Accounting
MGCR 341 (3) Finance 1
MGCR 352 (3) Marketing Management 1
MGCR 472 (3) Operations Management

Microbiology

MIMM 323 (3) Microbial Physiology
MIMM 324 (3) Fundamental Virology
MIMM 413 (3) Parasitology
MIMM 465 (3) Bacterial Pathogenesis
MIMM 466 (3) Viral Pathogenesis

Molecular Biology (Biology)

BIOL 300 (3) Molecular Biology of the Gene
BIOL 314 (3) Molecular Biology of Oncogenes
BIOL 520 (3) Gene Activity in Development
BIOL 524 (3) Topics in Molecular Biology
BIOL 551 (3) Molecular Biology: Cell Cycle

Molecular Biology (Biochemistry)

BIOC 311 (3) Metabolic Biochemistry
BIOC 312 (3) Biochemistry of Macromolecules
BIOC 450 (3) Protein Structure and Function
BIOC 454 (3) Nucleic Acids
PSYT 455 (3) Neurochemistry

Physiology

EXMD 401 (3) Physiology and Biochemistry Endocrine Systems
EXMD 502 (3) Advanced Endocrinology 01
EXMD 503 (3) Advanced Endocrinology 02
PHAR 562 (3) General Pharmacology 1
PHAR 563 (3) General Pharmacology 2
PHGY 517 (3) Artificial Internal Organs
PHGY 518 (3) Artificial Cells
Pollution
Note: Engineering students may not use these courses to count toward the Environmental Engineering Minor.

- CIVE 225 (4) Environmental Engineering
- CIVE 430 (3) Water Treatment and Pollution Control
- CIVE 553 (3) Stream Pollution and Control

Revision, August 2011. End of revision.

6.13.10.4 Chemistry Minor

The Departments of Chemistry and Chemical Engineering offer this Chemistry Minor, of particular interest to Chemical Engineering students, and a Chemical Engineering Minor, of interest to Chemistry students (described in the Faculty of Science section of this publication (see Chemistry programs)). Students taking the Chemistry Minor complete 10 credits of required courses in physical and organic chemistry, and choose an additional 15 credits of complementary courses from the areas of inorganic, analytical, organic, and physical chemistry.

Minor Adviser (program coordinator): Dr. Gonzalo Cosa (Chemistry)

For more information about the Chemical Engineering Minor, see Prof. David Cooper (Chemical Engineering).

6.13.10.4.1 Bachelor of Engineering (B.Eng.) - Minor Chemistry (25 credits)

Minor Adviser (program coordinator): Dr. Gonzalo Cosa (Department of Chemistry)

Program credit weight: 25 credits

A passing grade for courses in the Minor is a C.

**Required Courses**

10 credits

- CHEE 310* (3) Physical Chemistry for Engineers
- CHEM 212 (4) Introductory Organic Chemistry 1
- CHEM 233* (3) Topics in Physical Chemistry
- CHEM 234** (3) Topics in Organic Chemistry

* Students choose either CHEM 233 or CHEE 310
** or CEGEP equivalent

**Complementary Courses**

15 credits from the following lists, two courses of which must be laboratory courses (* indicates lab).

Note that CHEM 212 is a prerequisite for most of the courses listed below, and CHEM 223 (Introductory Physical Chemistry 1) and CHEM 243 (Introductory Physical Chemistry 2) or their equivalents are prerequisites for the Physical Chemistry courses. If students take CHEM 222 (Introductory Organic Chemistry 2), which includes a lab, instead of CHEM 234, they will receive credit for one of the two required laboratory courses, but they must complete a total of 25 credits in chemistry for the Minor.

**Inorganic Chemistry**

- CHEM 281 (3) Inorganic Chemistry 1
- CHEM 371* (2) Inorganic Chemistry Laboratory
- CHEM 381 (3) Inorganic Chemistry 2
- CHEM 591 (3) Bioinorganic Chemistry

**Analytical Chemistry**

- CHEM 287 (2) Introductory Analytical Chemistry
- CHEM 297* (1) Introductory Analytical Chemistry Laboratory
- CHEM 367 (3) Instrumental Analysis 1
- CHEM 377 (3) Instrumental Analysis 2
Organic Chemistry

6.13.10.5 Computer Science Courses and Minor Program

The School of Computer Science offers an extensive range of courses for Engineering students interested in computers. Engineering students may obtain a Computer Science Minor as part of their B.Eng., B.S.E., or B.Sc.(Arch.) degree by completing 24 credits of courses, passed with a grade of C or better.

Minor Adviser: Students interested in this Minor should see Liette Chin, Undergraduate Program Coordinator (School of Computer Science, Lorne Trottier Building, Room 2070) and the Minor Adviser in Computer Science.

6.13.10.5.1 Computer Science Courses

The School of Computer Science offers an extensive range of courses for Engineering students interested in computers. The course taken by students in most B.Eng. programs (COMP 208) and other courses included in the core of the various B.Eng. and B.S.E. programs are listed below.

See the Courses section of this publication to see other courses offered by the School of Computer Sciences (subject code COMP).

6.13.10.52 Bachelor of Engineering (B.Eng.) - Minor Computer Science (24 credits)

B.Eng. - Minor Computer Science (24 credits)

Minor Adviser: Students interested in this Minor should see Liette Chin, Undergraduate Program Coordinator, in the School of Computer Science (Lorne Trottier Building, Room 2070) to obtain the appropriate forms, and should see both the Minor Adviser in Computer Science and their department adviser for approval of their course selection. Forms must be submitted and approved before the end of the Course Change (drop/add) period of the student's final term.

Note: This Minor is open to B.Eng., B.S.E., and B.Sc.(Arch.) students in Engineering.

Engineering students may obtain the Computer Science minor as part of their B.Eng., B.S.E., or B.Sc.(Arch.) degree by completing the 24-credits of courses passed with a grade of C or better. In general, some complementary courses within B.Eng. and B.S.E. programs may be used to satisfy some of these requirements, but the Minor will require at least 12 extra credits from Computer Science (COMP) courses beyond those needed for the B.Eng. or B.S.E. degree. Students should consult their departments about the use of complementaries, and credits that can be double counted.

Note: COMP 202 and COMP 208 (compulsory for some Engineering students do not form part of the Minor in Computer Science.

For more information, see the School of Computer Science website: http://www.cs.mcgill.ca.

</thead>
<tbody>
<tr>
<td>COMP 206</td>
<td>(3)</td>
<td>Introduction to Software Systems</td>
</tr>
</tbody>
</table>

Complementary Courses
21 credits
3 credits from the following:

COMP 203  (3)  Introduction to Computing 2
COMP 250  (3)  Introduction to Computer Science

3 credits from the following:

COMP 302  (3)  Programming Languages and Paradigms
COMP 303  (3)  Software Development

3 credits from the following:

COMP 273  (3)  Introduction to Computer Systems
ECSE 221  (3)  Introduction to Computer Engineering

3 credits from the following:

COMP 350  (3)  Numerical Computing
MECH 309  (3)  Numerical Methods in Mechanical Engineering

0-3 credits from the following:

COMP 251  (3)  Data Structures and Algorithms

6-9 credits chosen from other Computer Science courses at the 300- level or higher.

Notes:
A. COMP 203 and COMP 250 are considered to be equivalent from a prerequisite point of view, and cannot both be taken for credit.
B. COMP 208 may be taken before COMP 250; however, it cannot be taken for credit in the same term or afterward.
C. COMP 396 (Undergraduate Research Project) cannot be taken for credit toward this Minor.

Courses that make considerable use of computing from other departments may also be selected, with the approval of the School of Computer Science. Students should consult with their advisers about counting specific courses.

6.13.10.6 Construction Engineering and Management Minor

Students taking the Minor in Construction Engineering and Management complete 15 credits of required courses in management and law. Students choose complementary courses from the areas of either building structures or heavy construction, and from other construction- and management-related courses. This Minor is particularly designed for Civil Engineering students.

Minor Adviser: Prof. L. Chouinard, Macdonald Engineering Building, Room 491 (Telephone: 514-398-6446)

6.13.10.6.1 Bachelor of Engineering (B.Eng.) - Minor Construction Engineering and Management (24 credits)

Minor Adviser: Prof. L. Chouinard, Macdonald Engineering Building, Room 491 (Telephone: 514-398-6446)

Minor program credit weight: 24-25 credits

Note: This Minor is particularly designed for Civil Engineering students but, is open to all B.Eng., B.S.E., and B.Sc.(Arch.) students.

All courses in the Minor must be passed with a grade of C or better.

**Prerequisites**

CIVE 208  (3)  Civil Engineering System Analysis
CIVE 302  (3)  Probabilistic Systems
COMP 208  (3)  Computers in Engineering
Required Courses: Management and Law

15 credits

- CIVE 324 (3)  Construction Project Management
- FACC 220 (3)  Law for Architects and Engineers
- INDR 294 (3)  Introduction to Labour-Management Relations
- MGCR 211 (3)  Introduction to Financial Accounting
- MGCR 341 (3)  Finance 1

Complementary Courses

3-4 credits (4 credits from List A OR 3 credits from List B)

List A - Building Structures

4 credits from the following:

- ARCH 447 (2)  Lighting
- ARCH 451 (2)  Building Regulations and Safety
- ARCH 554 (2)  Mechanical Services
- CIVE 492 (2)  Structures

OR

List B - Heavy Construction

3 credits from the following:

- MIME 322 (3)  Rock Fragmentation
- MIME 333 (3)  Materials Handling

Construction-Related Complementary Courses

6 credits from the following:

- BUSA 462 (3)  Management of New Enterprises
- CIVE 446 (3)  Construction Engineering
- CIVE 527 (3)  Renovation and Preservation: Infrastructure
- ECSE 461 (3)  Electric Machinery
- FINE 445 (3)  Real Estate Finance
- MIME 520 (3)  Stability of Rock Slopes
- MIME 521 (3)  Stability of Underground Openings
- MPMC 321* (3)  Mécanique des roches et contrôle des terrains

* Course offered in French at École Polytechnique in Montreal

6.13.10.7 Economics Minor

Engineering students who want to complete a minor in Economics are required to complete the following program rather than one of the minor concentrations offered by the Department of Economics in the Faculty of Arts section of this publication, unless they have obtained permission from the Faculty of Engineering.

Minor Adviser: Faculty Student Adviser in the Engineering Student Centre (Frank Dawson Adams Building, Room 22)
Bachelor of Engineering (B.Eng.) - Minor Economics (18 credits)

Minor Adviser: Faculty Student Adviser in the Engineering Student Centre (Frank Dawson Adams Building, Room 22)

Program credit weight: 18 credits

This Minor consists of 18 credits of required and complementary courses given in the Economics Department. In addition, it is presumed that all Engineering students will have a sufficient background in statistics. Engineering Economy, MIME 310, does not form part of this Minor. Engineering students who want to complete a minor in economics are required to complete the following program rather than one of the minor concentrations offered by the Department of Economics in the Faculty of Arts section of this publication, unless they have obtained permission from the Faculty of Engineering.

All courses in the Minor must be passed with a grade of C or better.

### Required Courses

<table>
<thead>
<tr>
<th>Course Code</th>

Note: Mining Engineering students are permitted to include (MIME 526) Mineral Economics among the Complementary Courses.

6.13.10.8 Environmental Engineering Minor

The Environmental Engineering Minor is offered for students in Engineering and in the Department of Bioresource Engineering wishing to pursue studies in this area. Students completing this Minor take an introductory course in environmental engineering, bio-environmental engineering, or environmental aspects of technology, then choose from a wide variety of complementary courses within and outside the Faculty of Engineering on environmental topics. Students may choose to participate in the Barbados Field Study Semester (BFSS) or in the Barbados Interdisciplinary Tropical Studies (BITS) field semester and have the field study courses count toward this Minor.

The Environmental Engineering Minor is administered by the Department of Civil Engineering and Applied Mechanics.

Minor Adviser: Prof. R. Gehr, Macdonald Engineering Building, Room 569E

For more information on the Barbados Field Study Semester, see www.mcgill.ca/bfss.

For more information on the Barbados Interdisciplinary Tropical Studies field semester, see www.mcgill.ca/bits.

For more information on environmental studies in the Faculty of Engineering, see www.mcgill.ca/enveng.

6.13.10.8.1 Bachelor of Engineering (B.Eng.) - Minor Environmental Engineering (21 credits)

Minor Adviser: Prof. R. Gehr, Macdonald Engineering Building, Room 569E

Minor program credit weight: 21-22 credits

The Environmental Engineering Minor is administered by the Department of Civil Engineering and Applied Mechanics and is offered for all students in Engineering (including B.S.E. students) and in the Department of Bioresource Engineering wishing to pursue studies in this area.

A maximum of 12 credits of coursework in the student's major may double-count with the Minor.

To complete the Minor in Environmental Engineering, students must obtain a grade of C or better in all approved courses in the Minor, and satisfy the requirements of both the Minor and their major program.

Note: Not all courses listed are offered every year. Students should see the "Courses" section of this publication to know if a course is offered.

Complementary Courses

21-22 credits

18 credits from Stream A, B, or C below

and

One course(3-4 credits) from the following list:

BREE 327 (3) Bio-Environmental Engineering
CHEE 230 (3) Environmental Aspects of Technology
CIVE 225 (4) Environmental Engineering

Stream A

15 credits* from the Engineering Course List and 3 credits from the Non-Engineering Course List below

*A minimum of 6 credits must be from outside the student's department. A maximum of 6 credits of research project courses may be counted toward this category, provided the project has sufficient environmental engineering content (project requires approval of project supervisor and coordinator of the Minor).

Stream B
15 credits of courses that make up the "Barbados Field Study Semester" below, provided the project for CIVE/AGRI/URBP 519 Sustainable Development Plans has sufficient environmental engineering content (project requires approval of the Coordinator of the Minor);

AND

One courses (3-4) credits chosen from the Engineering Course List below, excluding CHEE 496.

Barbados Field Study Courses

Required Courses

6 credits

URBP 507 (3) Planning and Infrastructure
URBP 520 (3) Globalization: Planning and Change

Complementary Courses

9 credits

One of the following cross-listed courses (3 credits):

AGRI 452 (3) Water Resources in Barbados
CIVE 452 (3) Water Resources in Barbados

AND

One of the following cross-listed project courses (6 credits):

AGRI 519 (6) Sustainable Development Plans
CIVE 519 (6) Sustainable Development Plans
URBP 519 (6) Sustainable Development Plans

Stream C

9 credits of courses specified from the "Barbados Interdisciplinary Tropical Studies (BITS)" field semester below, provided the project has sufficient environmental engineering content (project requires approval of the Coordinator of the Minor):

AEBI 425 (3) Tropical Energy and Food
AEBI 427 (6) Barbados Interdisciplinary Project

AND

9 credits chosen from the Engineering Course List below, excluding CHEE 496.

Engineering Course List

Courses offered at the Macdonald campus:

BREE 217 (3) Hydrology and Water Resources
BREE 322 (3) Organic Waste Management
BREE 416 (3) Engineering for Land Development
BREE 518 (3) Bio-Treatment of Wastes

Courses offered at the Downtown campus:

ARCH 377 (3) Energy, Environment and Buildings
CHEE 351 (3) Separation Processes
CHEE 370 (3) Elements of Biotechnology
CHEE 496 (3) Environmental Research Project
CHEE 591 (3) Environmental Bioremediation
CHEE 592 (3) Industrial Air Pollution Control
CHEE 593 (3) Industrial Water Pollution Control
CIVE 225 (4) Environmental Engineering
CIVE 323 (3) Hydrology and Water Resources
CIVE 421 (3) Municipal Systems
CIVE 428 (3) Water Resources and Hydraulic Engineering
CIVE 430 (3) Water Treatment and Pollution Control
CIVE 451 (3) Geoenvironmental Engineering
CIVE 550 (3) Water Resources Management
CIVE 555 (3) Environmental Data Analysis
CIVE 572 (3) Computational Hydraulics
CIVE 573 (3) Hydraulic Structures
CIVE 574 (3) Fluid Mechanics of Water Pollution
CIVE 577 (3) River Engineering
CIVE 584 (3) Groundwater Engineering
MECH 447 (3) Combustion
MECH 526 (3) Manufacturing and the Environment
MECH 534 (3) Air Pollution Engineering
MECH 535 (3) Turbomachinery and Propulsion
MIME 422 (3) Mine Ventilation
MIME 512 (3) Corrosion and Degradation of Materials
MPMC 328 (3) Environnement et gestion des rejets miniers
URBP 506 (3) Environmental Policy and Planning

Non-Engineering Course List

Courses offered at the Macdonald campus:

LSCI 230 (3) Introductory Microbiology
MICR 331 (3) Microbial Ecology
MICR 341 (3) Mechanisms of Pathogenicity
RELG 270 (3) Religious Ethics and the Environment
SOIL 210 (3) Principles of Soil Science
SOIL 331 (3) Soil Physics
WILD 375 (3) Issues: Environmental Sciences
WILD 415 (2) Conservation Law
WOOD 420 (3) Environmental Issues: Forestry

Courses offered at the Downtown campus:

ANTH 206 (3) Environment and Culture
BIOL 205 (3) Biology of Organisms
BIOL 432 (3) Limnology
CHEM 307 (3) Analytical Chemistry of Pollutants
Environment and the Law (3) CMPL 580
Economics of the Environment (3) ECON 225
Ecological Economics (3) ECON 326
Economics of Climate Change (3) ECON 347
Hydrogeology (3) EPSC 549
Geographical Perspectives: World Environmental Problems (3) GEOG 200
Introductory Geo-Information Science (3) GEOG 201
Environmental Systems (3) GEOG 203
Global Change: Past, Present and Future (3) GEOG 205
Environmental Management 1 (3) GEOG 302
Principles of Remote Sensing (3) GEOG 308
Climatic Environments (3) GEOG 321
Environmental Management 2 (3) GEOG 404
Introductory Microbiology (3) MIMM 211

6.13.10.9 Minor in Environment

Environmental studies focus on the interactions between humans and their natural and technological environments. Environmental problems are complex, and their satisfactory solutions require the synthesis of social, scientific, and institutional knowledge.

The Minor in Environment is offered and administered by the McGill School of Environment (MSE).

Since the program comprises a total of 18 credits for the Minor, additional credits beyond those needed for the B.Eng. degree are required. Students wishing to complete the Minor should prepare a program and have it approved by both their regular Engineering departmental adviser and the MSE Adviser. For program details, see the McGill School of Environment section of this publication (Minor in Environment).

Note: Engineering students interested in this Minor must submit a completed Course Authorization Form to the Engineering Student Centre (Frank Dawson Adams Building, Room 22).

Minor Adviser: Students interested in this Minor should contact Kathy Roulet, MSE Program Adviser (email: kathy.roulet@mcgill.ca; telephone: 514-398-4306).

6.13.10.10 Minor Programs in Finance, Management, Marketing, and Operations Management

Prerequisite: None

Management Minors Adviser: Students considering one of these minor programs should consult a Faculty Student Adviser in the Engineering Student Centre (Frank Dawson Adams Building, Room 22) or an adviser in the Desautels Faculty of Management.

Many engineers begin to assume management functions within a few years of graduation. They can, at this stage, take up the study of economics, behavioural science, and other management subjects. Students wishing to include such studies in their undergraduate program can take suitable courses from Engineering and Management.

Courses are available, subject to timetable requirements, from the core program of the Desautels Faculty of Management. Some courses from the Management core program have considerable overlap with Engineering courses and thus are not available to Engineering students.

A student embarking on a minor must be prepared to take credits additional to their Engineering program. Students in a B.Eng. or B.S.E. program may be able to count up to 6 credits of Complementary Studies Group B courses (Humanities and Social Sciences, Management Studies, and Law courses) toward both their Engineering major program and a Management minor where applicable. More information about Complementary Studies is given in the B.Eng./B.S.E. program section.

Students must have a CGPA of 3.0 or better to be considered for one of these Minor programs.

Students planning to take any course with statistics as a prerequisite must have completed MGCR 271 (Business Statistics) or an equivalent course approved by the BCom Student Affairs Office.

Detailed information on these Minor programs can be found in the Desautels Faculty of Management section of this publication (see Minors for Non-Management Students).

Further information can also be found at www.mcgill.ca/engineering/degrees/minors.

6.13.10.11 Materials Engineering Minor

Students taking the Materials Engineering Minor complete 15 credits of required courses in materials science, materials engineering, electronic properties of materials, metallic and ceramic powders processing, and applications of polymers, and choose three complementary courses in other areas related to materials engineering.
Minor Adviser: Prof. M. Brochu (Minor Coordinator), Wong Building, Room 2640

6.13.10.11 Bachelor of Engineering (B.Eng.) – Minor Materials Engineering (24 credits)

Revision, August 2011. Start of revision.

Minor Adviser: Prof. M. Brochu (Minor Coordinator), Wong Building, Room 2640

Engineering students may obtain a Materials Engineering Minor by completing 24 credits chosen from the required and complementary courses listed below. By a careful selection of complementary courses, Engineering students may obtain this Minor with a minimum of 15 additional credits.

Required Courses

15 credits

Revision, August 2011. End of revision.

6.13.10.12 Mathematics Minor

Students in the Minor in Mathematics for Engineering students complete 18 credits of Mathematics courses (subject code MATH), not including Mathematics courses that are required in their Engineering program (or equivalent courses), and choose 6 credits from other Mathematics-related courses.

Minor Adviser: Faculty Student Adviser in the Engineering Student Centre (Frank Dawson Adams Building, Room 22) AND an adviser designated by the Department of Mathematics and Statistics, normally beginning in Year 2 (please consult the Department of Mathematics and Statistics for this adviser). Course selection for this Minor must be done in conjunction with the Minor advisers.

6.13.10.12.1 Bachelor of Engineering (B.Eng.) - Minor Mathematics (24 credits)

Minor Adviser: Faculty Student Adviser in the Engineering Student Centre (Frank Dawson Adams Building, Room 22) AND an adviser designated by the Department of Mathematics and Statistics, normally beginning in the U2 year (please consult the Department of Mathematics and Statistics for this adviser). Selection of courses must be done in conjunction with the Minor advisers.

Note: The Mathematics Minor is open to all students in the Faculty of Engineering (B.Eng., B.S.E., and B.Sc.(Arch.).)

Engineering students must obtain a grade of C or better in courses approved for this Minor.

Course Selection

At least 18 credits must be chosen from the Mathematics and Statistics courses approved for the Mathematics Major or Honours program, or from the following courses:
MATH 249  (3)  Honours Complex Variables
MATH 363  (3)  Discrete Mathematics
MATH 381  (3)  Complex Variables and Transforms

The remaining credits may be chosen from mathematically-allied courses.

The following courses cannot be used toward the Minor:

MATH 222  (3)  Calculus 3
MATH 223  (3)  Linear Algebra
MATH 247  (3)  Honours Applied Linear Algebra
MATH 248  (3)  Honours Advanced Calculus
MATH 262  (3)  Intermediate Calculus
MATH 263  (3)  Ordinary Differential Equations for Engineers
MATH 264  (3)  Advanced Calculus for Engineers
MATH 270  (3)  Applied Linear Algebra
MATH 271  (3)  Linear Algebra and Partial Differential Equations
MATH 314  (3)  Advanced Calculus
MATH 315  (3)  Ordinary Differential Equations
MATH 319  (3)  Introduction to Partial Differential Equations
MATH 325  (3)  Honours Ordinary Differential Equations

### 6.13.10.13 Mining Engineering Minor

Students taking the Mining Engineering Minor complete 12 credits of required courses in mining engineering, including an introduction to the minerals industry, courses in mining science and technology, rock fragmentation and materials handling, and an industrial work term. Students choose 12 credits from mining-related courses within the Departments of Mining and Materials Engineering, Mechanical Engineering, Civil Engineering, and Chemical Engineering. One of the required courses is a work term for which enrolment may be limited.

Minor Adviser: Prof. Hani Mitri (Minor Coordinator), Frank Dawson Adams Building, Room 121

### 6.13.10.31 Bachelor of Engineering (B.Eng.) - Minor Mining Engineering (24 credits)

Minor Adviser: Prof. Hani Mitri (Minor Coordinator)

Frank Dawson Adams Building, Room 121

Program credit weight: 24 credits

One of the required courses is a work term for which enrolment may be limited.

#### Required Courses

12 credits

- **MIME 200**  (3)  Introduction to the Minerals Industry
- **MIME 291**  (2)  Industrial Work Period 2
- **MIME 313**  (1)  Mining Science and Technology Seminar
- **MIME 322**  (3)  Rock Fragmentation
- **MIME 333**  (3)  Materials Handling

#### Complementary Courses

12 credits

**List A: Mining Engineering**

6-12 credits from the following:
MIME 320 (3) Extraction of Energy Resources
MIME 323 (3) Rock and Soil Mass Characterization
MIME 325 (3) Mineral Industry Economics
MIME 341 (3) Introduction to Mineral Processing
MIME 419 (3) Surface Mining
MIME 422 (3) Mine Ventilation
MIME 426 (3) Development and Services
MIME 520 (3) Stability of Rock Slopes
MIME 521 (3) Stability of Underground Openings
MIME 526 (3) Mineral Economics

**List B: Mechanical Engineering**

0-6 credits from the following:

MECH 497 (3) Value Engineering
MECH 554 (3) Microprocessors for Mechanical Systems
MECH 557 (3) Mechatronic Design
MECH 572 (3) Introduction to Robotics
MECH 573 (3) Mechanics of Robotic Systems
MECH 577 (3) Optimum Design

**List C: Civil Engineering**

0-6 credits from the following:

CIVE 416 (3) Geotechnical Engineering
CIVE 451 (3) Geoenvironmental Engineering
CIVE 462 (3) Design of Steel Structures
CIVE 463 (3) Design of Concrete Structures
CIVE 527 (3) Renovation and Preservation: Infrastructure

**List D: Chemical Engineering**

0-6 credits from the following:

CHEE 453 (4) Process Design
CHEE 455 (4) Process Control
CHEE 484 (3) Materials Engineering

**6.13.10.14 Physics Minor**

Students in Honours Electrical Engineering taking the Physics Minor take 9 credits of required courses in thermal physics and honours quantum physics and choose three other Physics courses (subject code PHYS).

Minor Adviser: Prof. F. Buchinger (Department of Physics)

**6.13.10.14 Bachelor of Engineering (B.Eng.) - Minor Physics (18 credits)**

Minor Adviser: Prof. F. Buchinger, Department of Physics

Students in Honours Electrical Engineering may obtain this Minor as part of their B.Eng. degree by completing 18 credits of Physics courses, as listed below.

**Required Courses**

9 credits
PHYS 253 (3) Thermal Physics
PHYS 357* (3) Honours Quantum Physics 1
PHYS 457* (3) Honours Quantum Physics 2

* Students who take PHYS 357 and PHYS 457 can omit PHYS 271 from their normal Electrical Engineering program.

Complementary Courses

9 credits from the following:

PHYS 351 (3) Honours Classical Mechanics 2
PHYS 362 (3) Statistical Mechanics
PHYS 432 (3) Physics of Fluids
PHYS 514 (3) General Relativity
PHYS 551 (3) Quantum Theory
PHYS 557 (3) Nuclear Physics
PHYS 558 (3) Solid State Physics
PHYS 559 (3) Advanced Statistical Mechanics
PHYS 562 (3) Electromagnetic Theory
PHYS 567 (3) Particle Physics

6.13.10.15 Software Engineering Minor

This Minor will prepare an engineering student for a career in software engineering. It will provide a foundation in basic computer science, computer programming, and software engineering practice.

Minor Adviser: Faculty Student Adviser in the Engineering Student Centre (Frank Dawson Adams Building, Room 22)

6.13.10.151 Bachelor of Engineering (B.Eng.) - Minor Software Engineering (24 credits)

Minor Adviser: Faculty Student Adviser in the Engineering Student Centre (Frank Dawson Adams, Room 22)

The Software Engineering Minor will prepare an engineering student for a career in software engineering. It will provide a foundation in basic computer science, computer programming, and software engineering practice.

This Minor consists of 24 credits (eight courses). Up to four courses (12 credits) may be double-counted for credit toward the B. Eng. degree in Electrical Engineering or Computer Engineering. Students in other programs may double-count up to three courses (9 credits).

Students considering this Minor should consult with the Minor Adviser listed above.

Required Courses

9 credits

ECSE 221 (3) Introduction to Computer Engineering
ECSE 321 (3) Introduction to Software Engineering
ECSE 428 (3) Software Engineering Practice

Complementary Courses

15 credits

3 credits from the following:

COMP 203 (3) Introduction to Computing 2
COMP 250 (3) Introduction to Computer Science

Engineering Courses

3-12 credits from the following:
CHEE 458 (3) Computer Applications
CHEE 571 (3) Small Computer Applications: Chemical Engineering
CIVE 460 (3) Matrix Structural Analysis
CIVE 550 (3) Water Resources Management
CIVE 572 (3) Computational Hydraulics
ECSE 322 (3) Computer Engineering
ECSE 420 (3) Parallel Computing
ECSE 421 (3) Embedded Systems
ECSE 422 (3) Fault Tolerant Computing
ECSE 424 (3) Human-Computer Interaction
ECSE 427 (3) Operating Systems
ECSE 429 (3) Software Validation
ECSE 526 (3) Artificial Intelligence
ECSE 532 (3) Computer Graphics
MECH 524 (3) Computer Integrated Manufacturing
MECH 539 (3) Computational Aerodynamics
MECH 545 (3) Advanced Stress Analysis
MECH 576 (3) Geometry in Mechanics

Computer Science Courses
0-6 credits from the following (no more than 6 credits will count toward the Minor):
COMP 302 (3) Programming Languages and Paradigms
COMP 335 (3) Software Engineering Methods
COMP 421 (3) Database Systems
COMP 424 (3) Artificial Intelligence
COMP 527 (3) Logic and Computation

6.13.10.16 Technological Entrepreneurship Minor
This Minor is offered jointly by the Faculties of Engineering and Management. It will appeal to those students who have a concept, process, or product idea in mind and who want to explore the opportunity of commercializing it. It will also be of interest to students who have a general interest in entrepreneurship and intend to pursue a career in small- and medium-sized high-technology/engineering companies.

Students taking the Minor choose 18 credits from courses in technological entrepreneurship (entrepreneurship, marketing management, organization policy, marketing of technology, leadership, and human resources management). Students can also choose to take business plan design and project courses, which give students an opportunity to design a business plan and develop a technology or engineering project.

Minor Adviser: Faculty Student Adviser in the Engineering Student Centre (Frank Dawson Adams Building, Room 22)

6.13.10.16.1 Bachelor of Engineering (B.Eng.) - Minor Technological Entrepreneurship (18 credits)
Minor Adviser: Faculty Student Adviser in the Engineering Student Centre (Frank Dawson Adams, Room 22)

This Minor is offered jointly by the Faculties of Engineering and Management. It will appeal to those students who have a concept, process, or product idea in mind and who want to explore the opportunity of commercializing it. It will also be of interest to students who have a general interest in entrepreneurship and intend to pursue a career in small- and medium-sized high-technology/engineering companies.

Engineering students (including B.Eng., B.S.E., and B.Sc.(Arch.) students) may obtain the Technological Entrepreneurship Minor by completing six courses (18 credits). B.Eng. and B.S.E. students may double-count up to two courses (6 credits) of Complementary Studies (Group B, Humanities, and Social Sciences courses) toward the Minor.

Students considering this Minor should consult the Minor Adviser listed above.

Complementary Courses
18 credits (six courses) from the following:
McGill School of Environment

7.1 About the McGill School of Environment

McGill’s Faculties of Agricultural and Environmental Sciences, Arts, Science, and Law have forged a unique approach to the study of environment through the inter-faculty, trans-disciplinary McGill School of Environment (MSE).

The growth of technology, globalizing economies, and rapid increase in population have had dramatic and significant environmental impacts. These changes have been accompanied by an increasing awareness of the relationship between human activity and the environment. Environmental problems range from local and short-term degradation through to the perturbation observed over the entire globe and for many years. The importance of human-environment relations for environmental and social well-being, and the complexity and conflict involved in environmental analysis and decision making, requires a depth and breadth of knowledge. The MSE has developed its programs with the approach of introducing students to a broad range of ideas early in the program to provide a foundation and an openness upon which more specialized, disciplinary knowledge can be built.

7.2 Mission of the School

The mission of the McGill School of Environment is:

- to provide a program that will develop a broad-based environmental literacy in the undergraduate population;
- to develop opportunities for graduate students to pursue studies of the environment at an advanced level to create future leaders and researchers; and
- to generate new ideas, new insights, new technologies, and new approaches to understanding and redressing environmental problems through academic research and outreach that draws on the University's existing strength in research and spans disciplinary boundaries.

Through a range of research and educational initiatives, the MSE aims to aid society in making environmental choices, in the context of diverse environmental world views that will sustain healthy societies within a flourishing biosphere.

Focusing on six themes:

- Biodiversity, Ecosystem Function, and Services
- Climate and Energy
- Disease and Environment
- Environmental Ethics
- Food Security
- Water

7.3 Revisions – McGill School of Environment

Minor in Environment

*section 7.8.1: Bachelor of Arts (B.A.) – Minor Concentration Environment (18 credits)*
Minor in Environment

section 7.8.2: Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) – Minor Environment (18 credits)

B.A. Faculty Program in Environment

section 7.9.1.1: Bachelor of Arts (B.A.) – Faculty Program Environment – Ecological Determinants of Health in Society (54 credits)

section 7.9.2.1: Bachelor of Arts (B.A.) – Faculty Program Environment – Economics and the Earth's Environment (54 credits)

Bachelor of Arts and Science (B.A. & Sc.) – Interfaculty Program in Environment

section 7.10.1: Bachelor of Arts and Science (B.A. & Sc.) – Interfaculty Program Environment (54 credits)

Major in Environment – B.Sc.(Ag.Env.Sc.) and B.Sc.

section 7.11.1.1: Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) – Major Environment – Biodiversity and Conservation (63 credits)

section 7.11.2.1: Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) – Major Environment – Ecological Determinants of Health – Cellular (63 credits)

section 7.11.2.2: Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) – Major Environment – Ecological Determinants of Health – Population (63 credits)

section 7.11.4.1: Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) – Major Environment – Food Production and Environment (63 credits)

section 7.11.6.1: Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) – Major Environment – Renewable Resource Management (63 credits)

Major in Environment – B.Sc.

section 7.12.2.1: Bachelor of Science (B.Sc.) – Major Environment – Earth Sciences and Economics (66 credits)

section 7.14: Joint Honours Component Environment new

section 7.14.1: Bachelor of Arts (B.A.) - Joint Honours Component Environment (36 credits) new

Diploma in Environment

section 7.15.1: Diploma in Environment (30 credits)

7.4 About the School (Undergraduate)

The people and the programs of the McGill School of Environment are described in the following sections.

7.4.1 Location

For advising, contact:

Program Adviser, Ms. Kathy Roulet
Telephone: 514-398-4306
Fax: 514-398-1643
Email: kathy.roulet@mcgill.ca

Website: www.mcgill.ca/mse

Downtown Campus
3534 University Street
Montreal, Quebec H3A 2A7
Telephone: 514-398-2827
Fax: 514-398-1643
7.4.2 Administrative Officers

Chandra Madramootoo; B.Sc.(Agr.Eng.), M.Sc., Ph.D.(McG.)
Dean, Faculty of Agricultural and Environmental Sciences
Christopher Manfredi; B.A.(Calg.), M.A., Ph.D.(Claremont)
Dean, Faculty of Arts
Daniel Jutras; L.L.B.(Montr.), L.L.M.(Harv.)
Dean, Faculty of Law
Martin Grant; B.Sc.(PEI), M.Sc., Ph.D.(Tor.)
Dean, Faculty of Science
Marilyn Scott; B.Sc.(New Br.), Ph.D.(McG.)
Director
George McCourt; B.Sc., M.Sc.(Alta.), M.Sc.(McG.)
Associate Director, Undergraduate Affairs
Anthony Ricciardi; B.Sc.(Agr.), M.Sc., Ph.D.(McG.)
Associate Director, Research
Kathryn Roulet; B.Sc.(Trent), M.Sc.(Guelph)
Program Adviser

7.4.3 Academic Staff

Professors
Peter G. Brown; B.A.(Haver.), M.A., Ph.D.(Col.) (joint appt. with Geography and Natural Resource Sciences)
Colin Chapman; B.Sc., M.A., Ph.D.(Alta.) (joint appt. with Anthropology)

Associate Professors
Madhav Badami; B.Tech., M.Sc.(IIT), M.E.Des.(Calg.), Ph.D.(Br. Col.) (joint appt. with School of Urban Planning)
Sylvie de Blois; B.Sc.(Agr.)(McG.), M.Sc., Ph.D.(Montr.) (joint appt. with Plant Science)
Jaye Ellis; B.A.(Calg.), L.L.B., B.C.L.(McG.), L.L.M.(Br. Col.) (joint appt. with Law)
Frédéric Fabry; B.Sc., M.Sc., Ph.D.(McG.) (joint appt. with Atmospheric and Oceanic Sciences)
Brian Leung; B.Sc.(Br. Col.), Ph.D.(Car.) (joint appt. with Biology)
Gregory Mikkelsen; B.A.(Trinity), M.S., Ph.D.(Chic.) (joint appt. with Philosophy)
Anthony Ricciardi; B.Sc.(Agr.), M.Sc., Ph.D.(McG.) (joint appt. with Redpath Museum)
Raja Sengupta; B.Sc.(Bombay), M.Sc.(IIT), Ph.D.(S. Illinois) (joint appt. with Geography)

Assistant Professors
Elena Bennett; B.A.(Oberlin), M.Sc., Ph.D.(Wisc.) (joint appt. with Natural Resource Sciences)
Iwao Hirose; Ph.D.(St. And.) (joint appt. with Philosophy)
Nicolas Kosoy; B.Sc. (Universidad Simon Bolivar Venezuela), M.Sc. (Kent U at Canterbury), Ph.D. (Universidad Autonoma de Barcelona) (joint appt. with Natural Resource Sciences)
Jeanine Rhemtulla; B.Sc.(McG.), M.Sc.(Alta.), Ph.D.(Wisc.)
Ismael Vaccaro; B.A.(Barcelona), D.E.A.(Paris), M.A., Ph.D.(Wash.) (joint appt. with Anthropology)

Faculty Lecturers
George McCourt; B.Sc., M.Sc.(Alta.), M.Sc.(McG.)
Joan Marshall; B.A.(McG.), M.A.(Tor.), Ph.D.(McG.)
### Faculty Lecturers
Kathryn Roulet; B.Sc.(Trent), M.Sc.(Guelph)

### Associate Members
Animal Science: Sarah Kimmins  
Anthropology: Andre Costopoulos, John Galaty  
Atmospheric and Oceanic Sciences: Parisa Ariya  
Biology: Lauren Chapman, Andrew Gonzalez, Irene Gregory-Eaves, Martin Lechowicz, Catherine Potvin, Michel Loreau  
Bioresource Engineering: Jan Adamowski, Suzelle Barrington, Grant Clark, Chandra Madramootoo  
Chemical Engineering: Nathalie Tufenkji, Viviane Yargeau  
Civil Engineering and Applied Mechanics: Susan Gaskin, Van-Thanh-Van Nguyen, Jim Nicell  
Earth and Planetary Sciences: Jeanne Paquette  
Economics: Robert Cairns, Chris Green, Tom Naylor  
Electrical and Computer Engineering: Geza Joos  
Epidemiology and Biostatistics: Mark Goldberg  
Geography: Gail Chmura, Oliver Coomes, Thom Meredith, Tim Moore, Wayne H. Pollard, Navin Ramankutty, Nigel Roulet  
Law, Faculty of: Jane Glenn, Richard Janda  
Management, Desautels Faculty of: Dror Etzion, Steve Maguire, Vedat Verter  
Parasitology, Institute of: Marilyn Scott  
Pathology: Bruce Case  
Philosophy: Philip Buckley  
Plant Science: Caroline Begg, Pierre Dutilleul, Don Smith, Marcia Waterway  
Political Science: Philip Oxhorn  
Redpath Museum: David M. Green, Claire Seizilles de Mazancourt  
Urban Planning, School of: Nik Luka

### Adjunct Professors
Holly Dressel; B.A.(Ind.), M.A.(S. Fraser)  
Nicholas Ogden; B.V.Sc.(Liv.), D.Phil.(Oxf.)  
Jessica Rothman; B.Sc., M.Sc., Ph.D. (C'nell)

### 7.5 Admission, Registration, and Regulations
Information concerning admission to the McGill School of Environment and the regulations concerning the Environment programs is provided in these sections:

- section 7.5.1: Admission  
- section 7.5.2: Degree Requirements  
- section 7.5.3: Advising in the MSE  
- section 7.5.4: Important Information about Program Selection  
- section 7.5.5: Course Numbering System at McGill  
- section 7.5.6: Examination Regulations
section 7.5.7: Courses Outside the Student’s Faculty

7.5.1 Admission

You may be admitted to a B.A., B.A.&Sc., B.Sc.(Ag.Env.Sc.), or B.Sc. program offered by the MSE on the University’s two campuses: the Macdonald campus (B.Sc.(Ag.Env.Sc.) program) and the Downtown campus (B.A., B.A.&Sc., and B.Sc. programs). You register as a student within your faculty of admission and are governed by all rules and regulations of your faculty.

If you have already completed a Bachelor or an equivalent degree, you may be admitted to the Diploma in Environment through the Faculty of Agricultural and Environmental Sciences, the Faculty of Arts, or the Faculty of Science. You register as a student within your faculty of admission and are governed by all rules and regulations of your faculty relative to the Diploma.

Please see the Undergraduate Admissions Guide, found at www.mcgill.ca/applying.

7.5.2 Degree Requirements

To be eligible for a B.A. degree, you must fulfil all the faculty and program requirements as indicated in Faculty of Arts > Faculty of Arts Degrees.

To be eligible for a B.A. & Sc. degree, you must fulfil all the faculty and program requirements as indicated in Bachelor of Arts and Science > Degree Requirements.

To be eligible for a B.Sc.(Ag.Env.Sc.) degree, you must fulfil all the faculty and program requirements as indicated in Faculty of Agricultural and Environmental Sciences > Degree Requirements.

To be eligible for a B.Sc. degree, you must fulfil all the faculty and program requirements as indicated in Faculty of Science > Faculty Degree Requirements.

To be eligible for the Diploma in Environment, you must fulfil all program requirements as specified in Diploma in Environment.

To be eligible for an Honours degree, you must fulfil all the faculty and program requirements as indicated in the Honours and First Class Honours section under your home faculty. In addition, you must also fulfil the honours program requirements outlined in Honours Program in Environment.

7.5.3 Advising in the MSE

Each domain in the MSE has its own mentor who is available to answer your questions and offer you guidance about working and learning within the particular field of the domain. However, if you have questions about program requirements or rules, transfer credits, study abroad programs, course substitutions, or any forms that need to be signed, you should contact the MSE Program Adviser, Kathy Roulet, at kathy.roulet@mcgill.ca.

7.5.4 Important Information about Program Selection

The MSE uses students’ program selections to identify which students are in the School’s major programs (and, by extension, which students are in the McGill Environment Students’ Society).

While in U1, if you are unsure of the domain that you want to pursue, you may register in the Major or Faculty program in Environment without picking a domain. However, you must pick a domain by your U2 year.

Note: You must select a domain in order to graduate; you cannot graduate without choosing a domain.

(This section does not apply to students in the B.A.&Sc., Minor or Diploma programs.)

7.5.5 Course Numbering System at McGill

The first four characters of a McGill course number refer to the unit offering the course. For example, MSE courses begin with the Subject Code ENVR.

The three numbers following the Subject Code refer to the course itself, with 200-level courses usually taken by U1 students, 300-level by U2 students, and 400-level by U3 students. As a senior undergraduate student, you can also take some 500-level courses, but you should limit yourself to no more than one per term. See Course Information, Regulations and Descriptions in this publication for more information.

7.5.6 Examination Regulations

Regulations concerning the method of evaluation of any course (including those governing supplemental examinations) are those of the faculty that offers the course. You should note that supplemental exams are available for courses taught in the Faculties of Arts, of Science, and of Education, but not for courses taught in the Faculties of Agricultural and Environmental Sciences, Engineering, or Management.

Note: All ENVR courses, regardless of where they are taught, are offered only by the Faculty of Science.

See University Regulations and Resources > Examinations for more information on the University regulations and procedures.
7.5.7 Courses Outside the Student’s Faculty

Students in the School’s B.A., B.A. & Sc., B.Sc., and B.Sc.(Ag.Env.Sc.) programs may take courses outside their faculty according to the regulations of their faculty of admission.

These regulations are not identical:

- Arts students, see Faculty of Arts > Courses Outside the Faculties of Arts and Science.
- Arts and Science students, see Bachelor of Arts and Science > Courses Outside the Faculties of Arts and Science.
- Science students, see Faculty of Science > Courses Outside the Faculties of Arts and Science.
- Agricultural and Environmental Sciences students, see Faculty of Agricultural and Environmental Sciences > Minimum Credit Requirement.
- Faculty of Science students in particular should be aware that some courses are restricted and cannot be taken for credit. See the Science Office for Undergraduate Student Advising (SOUA) website at www.mcgill.ca/science/soua. Check under Bachelor of Science degree > General course requirements > Restricted courses outside the Faculty of Science > Policy concerning courses outside Faculty of Science.
- Students in the Diploma of Environment follow the program as specified; see section 7.15: Diploma in Environment.

7.6 Overview of Programs Offered

The McGill School of Environment has developed eight programs, which are offered on the Downtown and Macdonald campuses:

1. A Minor in Environment is open to all undergraduate students. For more information, see section 7.8: Minor in Environment.
2. A Faculty Program in Environment leading to a B.A. is open to students meeting the entrance requirements of the Faculty of Arts. For more information, see section 7.9: B.A. Faculty Program in Environment.
3. An Interfaculty Program in Environment leading to a B.A. & Sc. is open to students meeting the entrance requirements for the Bachelor of Arts and Science. For more information, see section 7.10: Bachelor of Arts and Science (B.A. & Sc.) – Interfaculty Program in Environment.
4. An Interfaculty Program in Sustainability, Science and Society leading to a B.A. & Sc. is offered by the McGill School of Environment in partnership with the Department of Geography. It is open to students meeting the entrance requirements for the Bachelor of Arts and Science. For more information, see Bachelor of Arts and Science > Bachelor of Arts and Science (B.A. & Sc.) – Interfaculty Program in Sustainability, Science and Society (54 credits).
5. A Major in Environment leading to a B.Sc.(Ag.Env.Sc.) is open to students meeting the entrance requirements of the Faculty of Agricultural and Environmental Sciences. For more information, see section 7.11: Major in Environment – B.Sc.(Ag.Env.Sc.) and B.Sc.
6. A Major in Environment leading to a B.Sc. is open to students meeting the entrance requirements of the Faculty of Science. For more information, see section 7.11: Major in Environment – B.Sc.(Ag.Env.Sc.) and B.Sc.
7. An Honours Program in Environment is open to senior Environment students in the B.A., B.A. & Sc., B.Sc.(Ag.Env.Sc.) and B.Sc. degrees. For more information, see section 7.12: Honours Program in Environment.
8. A Diploma in Environment is available only to students who have already completed a Bachelor or an equivalent degree, and who want to return to university for further undergraduate study. The Diploma is offered by the Faculty of Agricultural and Environmental Sciences, the Faculty of Arts, and the Faculty of Science. For more information, see section 7.15: Diploma in Environment.

These programs strive to offer the flexibility necessary to deal with the environment through a set of core courses that provide the general knowledge base of the program combined with a progressive series of courses in a trans-disciplinary area of environmental specialization, referred to as a domain. The programs are designed to prepare students for further study in environment or discipline-based graduate programs, and for employment in industry, government, and education.

7.7 Suggested Courses for Freshmen Students

The MSE does not recommend that students in their Freshman (U0) year take the ENVR Core courses. Students in their U1 to U3 years are welcome to take selected ENVR courses, even if they are not in the Environment programs. For Freshman year course selections, students should refer to the website of their respective faculty.

Students in the B.Sc. degree, see www.mcgill.ca/science/soua/new_students/u0/bsc_freshman/specific.
Students in the B.Sc.(Ag.Env.Sc.) degree, see www.mcgill.ca/macdonald/prospective/freshmenyear/courses.
Students in the B.A. & Sc. degree, see www.mcgill.ca/science/soua/new_students/u0/basc_freshman/requirements/#env.
Students in the B.A. degree, see www.mcgill.ca/oasis/ba/freshman/selection.
7.8  **Minor in Environment**

The Minor in Environment is intended to complement an expertise obtained through a major, major concentration, or Faculty program offered by an academic unit other than the MSE. Students taking the Minor in Environment are exposed to different approaches, perspectives, and world views that will help them gain an understanding of the complexity and conflicts that underlie environmental problems.

Students, after consulting with their adviser in their major program or concentration and the MSE Program Adviser, can declare their intention to do a Minor in Environment.

To obtain a Minor in Environment, students must:

- register for the Minor online, using Minerva;
- submit their program of courses already taken and to be taken for the Minor in Environment to the MSE Program Adviser for approval (only courses at the 200 level and above will be approved);
- pass all courses counted toward the Minor with a grade of C or higher;
- complete 18 credits from the courses listed under section 7.8.1: Bachelor of Arts (B.A.) – Minor Concentration Environment (18 credits) or section 7.8.2: Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) – Minor Environment (18 credits) in this publication and which are not otherwise counted towards the student's major program or concentration or a second minor program; and
- ensure that all 18 credits are taken outside the discipline or field of the student's major program or concentration.

7.8.1  **Bachelor of Arts (B.A.) – Minor Concentration Environment (18 credits)**

*Revision, August 2011. Start of revision.*

This 18-credit Minor Concentration Environment is intended for Arts students in the multi-track system and Law students.

**Advising Note:**

Consultation with the Program Adviser for approval of course selection to meet program requirements is obligatory. Only courses at the 200 level and above will be approved.

For more information, contact:

Ms. Kathy Roulet, MSE Program Adviser

Email: kathy.roulet@mcgill.ca

Telephone: 514-398-4306

**Complementary Courses (18 credits)**

18 credits of complementary courses are selected as follows:

- 12 credits of MSE core courses:
  - Location Note: Core courses are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

</tbody>
</table>

- 6 credits of environmentally related courses selected with the approval of the Program Adviser (at least 3 credits must be in natural sciences). A list of Suggested Courses is given below.

**Suggested Course List**

The Suggested Course List is divided into two thematic categories: Social Sciences and Policy; and Natural Sciences and Technology.

Most courses listed at the 300 level and higher have prerequisites. You are urged to prepare your program of study with this in mind.

This list is not meant to be exhaustive. You are also encouraged to examine the course lists of the various domains in the Environment program for other courses that might interest you. Courses not on the Suggested Course List may be included in the Minor with the permission of the Program Adviser.
Location Note:

When planning your schedule and registering for courses, you should verify where each course is offered because courses for this program are taught at both McGill’s Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Social Sciences and Policy

* Note: If WILD 415 is taken, 1 additional credit of complementary courses must be taken.

Revision, August 2011. End of revision.

Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) – Minor Environment (18 credits)

Revision, August 2011. Start of revision.

This 18-credit Minor is intended for Faculty of Agricultural and Environmental Science students and Faculty of Science students, but is open to students from other faculties as well, except Arts and Law.

Advising Note:
Consultation with the Program Adviser for approval of course selection to meet program requirements is obligatory. Only courses at the 200 level and above will be approved.
For information about the Minor in Environment, contact:
Ms. Kathy Roulet, MSE Program Adviser
Email: kathy.roulet@mcgill.ca
Telephone: 514-398-4306

Complementary Courses (18 credits)

18 credits of complementary courses are selected as follows:

12 credits of MSE core courses:
Location Note: MSE core courses are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

ENVR 200 (3) The Global Environment
ENVR 201 (3) Society, Environment and Sustainability
ENVR 202 (3) The Evolving Earth
6 credits of environmentally related courses selected with the approval of the Program Adviser (at least 3 credits must be in social sciences). A list of Suggested Courses is given below.

**Suggested Course List**

The Suggested Course List is divided into two thematic categories: Social Sciences and Policy; and Natural Sciences and Technology. Most courses listed at the 300 level and higher have prerequisites. You are urged to prepare your program of study with this in mind. This list is not meant to be exhaustive. You are also encouraged to examine the course lists of the various domains in the Environment program for other courses that might interest you. Courses not on the Suggested Course list may be included in the Minor with the permission of the MSE Program Adviser.

**Social Sciences and Policy**

* Note: If WILD 415 is taken, 1 additional credit of complementary courses must be taken.

7.9 B.A. Faculty Program in Environment

The B.A. Faculty Program has two components: Core and Domain. Students follow three steps in their degree program.

1. **Core**: The Core consists of four introductory courses and one intermediate-level course where students are exposed to the different approaches, perspectives, and world views that will help them gain an understanding of the complexity and conflicts that underlie most environmental problems. Through the core program, students go beyond the confines of their individual views of environment.

2. **Domain**: Domains provide a trans-disciplinary study of a particular theme or component of the environment. You can choose to follow one of three domains within the B.A. Faculty Program in Environment:
   - Ecological Determinants of Health in Society
   - Economics and the Earth's Environment
   - Environment and Development

3. **Senior Core and Research**: In the two senior courses of the core, students will apply the general and specialized knowledge that they have gained in the program to the analysis of some specific, contemporary environmental problems.
To obtain a B.A. Faculty Program in Environment, students must:

- register in a domain online, using Minerva;
- satisfy the co- and/or prerequisites for the program (Calculus and a Basic Science course);
- pass all courses counted towards the Faculty Program with a grade of C or higher;
- confirm that their course selection satisfies the required components of the MSE core and their chosen domain, and that the complementary courses are approved courses in their chosen domain; and
- fulfill all Faculty requirements as specified for the B.A. in the Arts, see Faculty of Arts > Faculty of Arts Degree Requirements, which include meeting the minimum credit requirement as specified in their letter of admission.

### 7.9.1 Ecological Determinants of Health in Society Domain

This domain is open only to students in the B.A. Faculty Program in Environment.

#### 7.9.1.1 Bachelor of Arts (B.A.) – Faculty Program Environment – Ecological Determinants of Health in Society (54 credits)

**Revision, August 2011. Start of revision.**

An understanding of the interface between human health and environment depends not only on an appreciation of the biological and ecological determinants of health, but equally on an appreciation of the role of social sciences in the design, implementation, and monitoring of interventions. Demographic patterns and urbanization, economic forces, ethics, indigenous knowledge and culture, and an understanding of how social change can be effected are all critical if we are to be successful in our efforts to assure health of individuals and societies in the future. Recognizing the key role that nutritional status plays in maintaining a healthy body, and the increasing importance of infection as a health risk linked intimately with the environment, this domain prepares students to contribute to the solution of problems of nutrition and infection by tying the relevant natural sciences to the social sciences.

**Program Prerequisites or Corequisites**

All B.A. Environment students MUST take these pre- or corequisite courses, or their equivalents. These courses should be taken in the Freshman year if possible. Quebec students can take them in U1.

**Calculus**

3 credits of calculus from the following, or equivalent (e.g., CEGEP objective 00UN):

- MATH 139 (4) Calculus 1 with Precalculus
- MATH 140 (3) Calculus 1

**Basic Science**

3 credits of basic science from the following, or equivalent (e.g., CEGEP objective 00UK):

- AEIB 120 (3) General Biology
- BIOL 111 (3) Principles: Organismal Biology

**Suggested First Year (U1) Courses**

For suggestions on courses to take in your first year (U1), you can consult the “MSE Student Handbook 2011-2012” available on the MSE website (http://www.mcgill.ca/mse), or contact Kathy Roulet, the Program Adviser (kathy.roulet@mcgill.ca).

**Program Requirements**

Note: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes core and required courses, but does not include the program prerequisites or corequisites listed above.

Location Note: When planning their schedule and registering for courses, students should verify where each course is offered because courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.
Core: Required Courses (18 credits)
Location Note: Core required courses are taught at both McGill’s Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

ENVR 200 (3) The Global Environment
ENVR 201 (3) Society, Environment and Sustainability
ENVR 202 (3) The Evolving Earth
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

Core: Complementary Course - Senior Research Project (3 credits)
Only 3 credits will be applied to the program; extra credits will count as electives.

AGRI 519 (6) Sustainable Development Plans
ENVR 401 (3) Environmental Research
ENVR 451 (6) Research in Panama

Complementary Courses (33 credits)
33 credits of complementary courses are chosen as follows:
18 credits of Fundamentals, maximum 3 credits from any one category
9 credits from List A
6 credits from List B

Fundamentals:
18 credits of Fundamentals (3 credits from each category):

Health and Environment
GEOG 221 (3) Environment and Health
NRSC 221 (3) Environment and Health

Health and Infection
GEOG 403 (3) Global Health and Environmental Change
PARA 410 (3) Environment and Infection

Health and Pollution
ANTH 227 (3) Medical Anthropology
NRSC 333 (3) Pollution and Bioremediation

Economics
AGEC 200 (3) Principles of Microeconomics
ECON 208 (3) Microeconomic Analysis and Applications

Nutrition
Statistics
One of the following Statistics courses or equivalent:
Note: Credit given for Statistics courses is subject to certain restrictions. Students should consult the "Course Overlap" information in the "Course Requirements" section for the Faculty of Arts.

AEMA 310 (3) Statistical Methods 1
MATH 203 (3) Principles of Statistics 1
SOCI 350 (3) Statistics in Social Research

List A:
9 credits from List A (maximum 3 credits from any one category):

Health and Society
GEOG 303 (3) Health Geography
SOCI 234 (3) Population and Society
SOCI 309 (3) Health and Illness

Hydrology and Climate
BREE 217 (3) Hydrology and Water Resources
GEOG 321 (3) Climatic Environments
GEOG 322 (3) Environmental Hydrology
NRSC 510 (3) Agricultural Micrometeorology

Agriculture
AGRI 210 (3) Agro-Ecological History
AGRI 340 (3) Principles of Ecological Agriculture
AGRI 411 (3) Global Issues on Development, Food and Agriculture

7.9.2 Economics and the Earth’s Environment Domain

This domain is open only to students in the B.A. Faculty Program in Environment.

Advisor: Ms. Kathy Roulet
Email: kathy.roulet@mcgill.ca
Telephone: 514-398-4306

Mentor: Professor Jeanne Paquette
Email: jeanne.paquette@mcgill.ca
Telephone: 514-398-4402

7.9.2.1 Bachelor of Arts (B.A.) – Faculty Program Environment – Economics and the Earth’s Environment (54 credits)

Revision, August 2011. Start of revision.

Understanding Earth's geologic processes provides us with the knowledge to mitigate many of our society's environmental impacts due to resource extraction and waste disposal. This knowledge is not always enough, as economics often plays a controlling role in how we use and abuse our environment.

This domain educates students in the fundamentals of economics and Earth sciences. The fundamentals of economics are provided, as is their application to the effects of economic choices on Earth's environment. Examples of these applications include the economic effects of public policy toward resource industries and methods of waste disposal, and the potential effects of global warming on the global economy. Students also learn of minerals, rocks, soils, and waters that define much of Earth’s environment and how these materials interact with each other and with the atmosphere. Courses in specific subdisciplines of Earth sciences combined with courses presenting a global vision of how the Earth and its environment operate provide the student with the necessary knowledge of geologic processes. Examples of this knowledge include the effects of mineral and energy extraction on the environment and how industrial waste interacts with solids and liquids in the environment. The Earth science and economics studies merge in the final year when the students apply what they have learned in the domain to current environmental issues.

Program Prerequisites or Corequisites

All B.A. Environment students must take these courses, or their equivalents. These courses should be taken in the Freshman year if possible. Quebec students can take them in U1.

Calculus

3 credits of Calculus, one of the following, or equivalent (e.g., CEGEP objective OOUN):

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 139</td>
<td>4</td>
<td>Calculus 1 with Precalculus</td>
</tr>
<tr>
<td>MATH 140</td>
<td>3</td>
<td>Calculus 1</td>
</tr>
</tbody>
</table>

Basic Science

3 credits of Basic Science, one of the following, or their equivalents (e.g., CEGEP objectives Biology OOUK, Chemistry OOUL, Physics OOUR):

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>

<td>4</td>
<td>Introductory Physics - Mechanics</td>
</tr>
</tbody>
</table>

Other Suggested First Year (U1) Courses
For suggestions on courses to take in your first year (U1), you can consult the "MSE Student Handbook 2011-2012" available on the MSE website (http://www.mcgill.ca/mse), or contact Ms. Kathy Roulet, the Program Adviser (kathy.roulet@mcgill.ca).

Program Requirements

Note: Students are required to take a maximum of 34 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes core and required courses, but does not include the domain prerequisites or corequisites listed above.

Location Note: When planning your schedule and registering for courses, you should verify where each course is offered because courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Core: Required Courses (18 credits)

Location Note: Core required courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

McGill University, Undergraduate Programs, Courses and University Regulations, 2011-2012 (Published August 17, 2011)
The quest for sustainable paths to economic development requires scholars and practitioners to transcend the boundaries of traditional disciplines. This domain offers students sufficient depth and breadth of study to acquire a strong grasp of current theories, concepts, and approaches to environment and development. It prepares them for graduate study in interdisciplinary programs (e.g., development studies or environmental studies) as well as in integrative social sciences (e.g., anthropology, geography, etc.).

Program Prerequisites or Corequisites
All B.A. Environment students must take these courses, or their equivalents. These courses should be taken in the Freshman year if possible. Quebec students can take them in U1.

Calculus
3 credits of calculus from the following, or equivalent (e.g., CEGEP objective OOUN):

MATH 139 (4) Calculus 1 with Precalculus
MATH 140 (3) Calculus 1

Basic Science
3 credits of basic science from the following, or equivalent (e.g., CEGEP objectives: Biology OOUK, Chemistry OOUL, Physics OOUR):

BIOL 111 (3) Principles: Organismal Biology
CHEM 110 (4) General Chemistry 1
PHYS 101 (4) Introductory Physics - Mechanics

Suggested First Year (U1) Courses
For suggestions on courses to take in your first year (U1), you can consult the "MSE Student Handbook 2011-2012" available on the MSE website (http://www.mcgill.ca/mse), or contact Ms. Kathy Roulet, the Program Adviser (kathy.roulet@mcgill.ca).

Program Requirements
Note: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes core and required courses.

Location Note: When planning their schedule and registering for courses, students should verify where each course is offered because courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Core: Required Courses (18 credits)
Location Note: Core required courses are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

ENVR 200 (3) The Global Environment
ENVR 201 (3) Society, Environment and Sustainability
ENVR 202 (3) The Evolving Earth
ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

Core: Complementary Course - Senior Research Project (3 credits)
Only 3 credits will be applied to the program; extra credits will count as electives.

AGRI 519 (6) Sustainable Development Plans
ENVR 401 (3) Environmental Research
ENVR 451 (6) Research in Panama
Domain: Required Courses (12 credits)

ANTH 339 (3) Ecological Anthropology
ECON 313 (3) Economic Development 1
ECON 314 (3) Economic Development 2
GEOG 302 (3) Environmental Management 1

Domain: Complementary Courses (21 credits)

21 credits of complementary courses are chosen from various domains as follows:

Microeconomics

One of:

AGEC 200 (3) Principles of Microeconomics
ECON 208 (3) Microeconomic Analysis and Applications

Statistics

3 credits, one of the following Statistics courses or equivalent:

Note: Credit given for Statistics courses is subject to certain restrictions. Students should consult the "Course Overlap" information in the "Course Requirements" section for the Faculty of Arts.

AEMA 310 (3) Statistical Methods 1
GEOG 202 (3) Statistics and Spatial Analysis
MATH 203 (3) Principles of Statistics 1
PSYC 204 (3) Introduction to Psychological Statistics

Advanced Development Courses

6 credits from:

AGEC 442 (3) Economics of International Agricultural Development
ANTH 418 (3) Environment and Development
GEOG 408 (3) Geography of Development
GEOG 410 (3) Geography of Underdevelopment: Current Problems

Natural Sciences

3 credits from:

AGRI 550 (3) Sustained Tropical Agriculture
BIOL 308 (3) Ecological Dynamics
BIOL 465 (3) Conservation Biology
BIOL 553 (3) Neotropical Environments
ENVB 305 (3) Population & Community Ecology
GEOG 305 (3) Soils and Environment
GEOG 322 (3) Environmental Hydrology
NUTR 403 (3) Nutrition in Society
NUTR 501 (3) Nutrition in Developing Countries
PARA 410 (3) Environment and Infection
# Social Sciences

6 credits from:

- **AGEC 333** (3) Resource Economics
- **AGEC 442** (3) Economics of International Agricultural Development
- **AGRI 210** (3) Agro-Ecological History
- **AGRI 452** (3) Water Resources in Barbados
- **ANTH 439** (3) Theories of Development
- **ANTH 445** (3) Property and Land Tenure
- **CANS 407** (3) Regions of Canada
- **ECO 326** (3) Ecological Economics

## 7.10 Bachelor of Arts and Science (B.A. & Sc.) – Interfaculty Program in Environment

The Interfaculty Program in Environment is open only to students in the B.A. & Sc. degree.

### Adviser

Ms. Kathy Roulet, MSE Program Adviser  
Email: kathy.roulet@mcgill.ca  
Telephone: 514-398-4306

To obtain a B.A. & Sc. Interfaculty Program in Environment, students must:

- register in the program online, using Minerva;
• satisfy the co-/prerequisites for the program;
• pass all courses counted toward the Interfaculty Program with a grade of C or higher;
• confirm that their course selection satisfies the required components of the program;
• fulfil all requirements specified for the B.A. & Sc. in Bachelor of Arts and Science > Degree Requirements, which include meeting the minimum credit requirement as specified in their letter of admission.

7.10.1 Bachelor of Arts and Science (B.A. & Sc.) – Interfaculty Program Environment (54 credits)

Revision, August 2011. Start of revision.

The growth of technology, globalization of economies, and rapid increases in population and per capita consumption have all had dramatic environmental impacts. The Interfaculty Program Environment for the Bachelor of Arts and Science is designed to provide students with a broad “Liberal Arts/Science” training. In combination with careful mentoring, this program offers a great degree of flexibility, allowing students to develop the skills and knowledge base required to face the myriad of environmental problems that currently need to be addressed.

Program Requirements

1. Students are required to take a maximum of 21 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes Required courses.
2. Students must complete at least 30 credits in the Faculty of Arts and at least 30 in the Faculty of Science as part of their interfaculty program and their minor or minor concentration. ENVR courses are considered courses in both Arts and Science, and so the credits are split between the two faculties for the purpose of this regulation.

Location Note: When planning your schedule and registering for courses, you should verify where each course is offered because courses for this program are taught on both McGill’s Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Required Courses (18 credits)

Location Note: Core required courses are taught at both McGill’s Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

For further information about this program, see Bachelor of Arts and Science > Bachelor of Arts and Science (B.A. & Sc.) - Interfaculty Program in Sustainability, Science and Society (54 credits).

7.11 Major in Environment – B.Sc.(Ag.Env.Sc.) and B.Sc.

Students in the Faculty of Agricultural and Environmental Sciences B.Sc.(Ag.Env.Sc.) program and students in the Faculty of Science B.Sc. program can register in the Major in Environment.

The Major has two components: core and domain. Students follow three steps in their degree program.

1. Core: The core consists of four introductory courses and one intermediate-level course where students are exposed to the different approaches, perspectives, and world views that will help them gain an understanding of the complexity and conflicts that underlie most environmental problems. Through the core program, students go beyond the confines of their individual views of environment.

2. Domain: Domains provide a trans-disciplinary study of a particular theme or component of the environment. B.Sc.(Ag.Env.Sc.) and B.Sc. students can choose to follow one of the following domains:
   • Biodiversity and Conservation
   • Ecological Determinants of Health (Population and Cellular stream options)
   • Environmetrics
   • Food Production and Environment
   • Land Surface Processes and Environmental Change
   • Renewable Resource Management
   • Water Environments and Ecosystems (Biological and Physical stream options)

B.Sc. students in the Faculty of Science can also choose from the following two domains:
   • Atmospheric Environment and Air Quality
   • Earth Sciences and Economics

3. Senior Core and Research: In the two senior courses of the core, students will apply the general and specialized knowledge that they have gained in the program to the analysis of some specific, contemporary environmental problems.

To obtain a Major in Environment, students must:
   • register in a domain online using Minerva;
   • pass all courses counted toward the Major with a grade of C or higher;
   • confirm that their course selection satisfies the required components of the MSE core and their chosen domain, and that the complementary courses are approved courses in their chosen domain; and
   • fulfill all faculty requirements as specified by the faculty in which they are registered: for the B.Sc.(Ag.Env.Sc.), refer to Faculty of Agricultural and Environmental Sciences > Faculty Information and Regulations; for the B.Sc., see Faculty of Science > Faculty Degree Requirements. This includes meeting the minimum credit requirement as specified in their letter of admission.

7.11.1 Biodiversity and Conservation Domain

This domain is open only to students in the B.Sc.(Ag.Env.Sc.) Major Environment or B.Sc. Major Environment program.
7.11.1.1 Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) – Major Environment – Biodiversity and Conservation (63 credits)

Revision, August 2011. Start of revision.

This domain (63 credits including core) is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc. Major in Environment program. This domain links the academic study of biological diversity with the applied field of conservation biology. The study of biological diversity, or "biodiversity", lies at the intersection of evolution with ecology and genetics, combining the subdisciplines of evolutionary ecology, evolutionary genetics, and ecological genetics. It has two main branches: the creation of diversity and the maintenance of diversity. Both processes are governed by a general mechanism of selection acting over different scales of space and time. This gives rise to a distinctive set of principles and generalizations that regulate rates of diversification and levels of diversity, as well as the abundance or rarity of different species. Conservation biology constitutes the application of these principles in the relevant social and economic context to the management of natural systems, with the object of preventing the extinction of rare species and maintaining the diversity of communities. As the impact of industrialization and population growth on natural systems has become more severe, conservation has emerged as an important area of practical endeavour.

Suggested First Year (U1) Courses

For suggestions on courses to take in your first year (U1), you can consult the "MSE Student Handbook 2011-2012" available on the MSE website (http://www.mcgill.ca/mse), or contact Ms. Kathy Roulet, the Program Adviser (kathy.roulet@mcgill.ca).

Program Requirements

Note: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes core and required courses.

Location Note: When planning their schedule and registering for courses, students should verify where each course is offered because courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Core: Required Courses (18 credits)

Location Note: Core required courses are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

Domain: Complementary Courses (42 credits)

42 credits of complementary courses are selected as follows:

9 credits - basic courses in the Biological Principles of Diversity, Systematics, and Conservation
3 credits - Ecology
3 credits - Statistics
9 credits - Interface between Science, Policy, and Management
3 credits - Field Courses
6 credits - General Scientific Principles
3 credits - Social Science
6 credits - Organisms and Diversity

**Biological Principles of Diversity/Systematics/Conservation:**
9 credits are chosen from basic courses in the biological principles of diversity, systematics, and conservation as follows:

One of:

7.11.2.1 Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) – Major Environment - Ecological Determinants of Health – Cellular (63 credits)

Revision, August 2011. Start of revision.
The Cellular concentration in this domain is open only to students in the B.Sc.(Ag.Env.Sc.) Major Environment or B.Sc. Major Environment program. This domain considers the interface between the environment and human well-being, with particular focus on the triad that ties human health to the environment through the elements of food and infectious agents. Each of these elements is influenced by planned and unplanned environmental disturbances. For example, agricultural practices shift the balance between beneficial and harmful ingredients of food. Use of insecticides presents dilemmas with regard to the environment, economics, and human health. The distribution of infectious diseases is influenced by the climatic conditions that permit vectors to coexist with man, by deforestation, by urbanization, and by human interventions ranging from the building of dams to provision of potable water.

In designing interventions that aim to prevent or reduce infectious contaminants in the environment, or to improve food production and nutritional quality, not only is it important to understand methods of intervention, but also to understand social forces that influence how humans respond to such interventions.

Students in the Cellular concentration will explore these interactions in more depth, at a physiological level. Students in the Population concentration will gain a depth of understanding at an ecosystem level that looks at society, land, and population health.

Suggested First Year (U1) Courses

For suggestions on courses to take in your first year (U1), consult the "MSE Student Handbook 2011-2012" available on the MSE website (http://www.mcgill.ca/mse), or contact Ms. Kathy Roulet, the Program Adviser (kathy.roulet@mcgill.ca).

Program Requirements

Note: Students are required to take a maximum of 31 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes core and required courses.

Location Note: When planning your schedule and registering for courses, you should verify where each course is offered because courses for this program are taught at both McGill's Downtown campus and the Macdonald campus in Sainte-Anne-de-Bellevue.

Core: Required Courses (18 credits)

Location Note: Core required courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

**Populations and Place**
Regions of Canada (CANS 407, 3 credits)
Human Ecology in Geography (GEOG 300, 3 credits)
Humans in Tropical Environments (GEOG 498, 3 credits)
International Health Psychology (PSYC 533, 3 credits)

Pollution and Pest Management
- Insect Biology and Control (BIOL 350, 3 credits)
- Organic Waste Management (BREE 322, 3 credits)
- Biocontrol of Pest Insects (ENTO 352, 3 credits)
- Pollution and Bioremediation (NRSC 333, 3 credits)

Basic Genetics (BIOL 202, 3 credits)
Genetics (LSCI 204, 3 credits)

Revision, August 2011. End of revision.

**7.11.3 Environmetrics Domain**

This domain is open only to students in the B.Sc.(Ag.Env.Sc.) Major Environment or B.Sc. Major Environment program.

**Adviser**
- Ms. Kathy Roulet
  - Email: kathy.roulet@mcgill.ca
  - Telephone: 514-398-4306

**Mentor**
- Professor Pierre Dutilleul
  - Email: pierre.dutilleul@mcgill.ca
  - Telephone: 514-398-7870

**Suggested First Year (U1) Courses**
For suggestions on courses to take in your first year (U1), you can consult the "MSE Student Handbook 2011-2012" (available on the MSE website at http://www.mcgill.ca/mse), or contact Kathy Roulet, the Program Adviser (kathy.roulet@mcgill.ca).

Prerequisites and equivalent courses are common with Math courses, so check with your adviser when choosing your courses. Be especially careful with Statistics courses, as you will receive no credit (and no warning!) for a course that is considered equivalent to one you have already taken. Note: Credit given for Statistics courses is subject to certain restrictions. Students in Science should consult the "Course Overlap" information in the "Course Requirements" section for the Faculty of Science.

Statistics courses BIOL 373 OR AEMA 310 can be taken in U1, but do not take them if you want to follow Option 1 (below), as they overlap with MATH 324.

**Program Requirements**
Note: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes core and required courses.

Location Note: When planning their schedule and registering for courses, students should verify where each course is offered because courses for this program are taught at both McGill’s Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

**Core: Required Courses (18 credits)**

Location Note: Core required courses for this program are taught at both McGill’s Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course if you want to take it on the Downtown campus, and in Section 051 of an ENVR course if you want to take it on the Macdonald campus.

**Basic Environmental Science:**

One of:

BREE 217 (3) Hydrology and Water Resources
CIVE 323 (3) Hydrology and Water Resources
ENVB 210 (3) The Biophysical Environment
GEOG 305 (3) Soils and Environment
GEOG 322 (3) Environmental Hydrology
GEOG 350 (3) Ecological Biogeography

**Statistics:**

6 credits of Statistics are selected from one of the following two options.

Note: Credit given for Statistics courses is subject to certain restrictions. Students in Science should consult the "Course Overlap" information in the "Course Requirements" section for the Faculty of Science. Several Statistics courses overlap (especially with MATH 324) and cannot be taken together. These rules do not apply to B.Sc.(Ag.Env.Sc.) students.

**Option 1**

MATH 323 (3) Probability
MATH 324 (3) Statistics

**Option 2**

One of:

AEMA 310 (3) Statistical Methods 1
BIOL 373 (3) Biometry

And one of:

AEMA 411 (3) Experimental Designs 01
CIVE 555 (3) Environmental Data Analysis
GEOG 351 (3) Quantitative Methods
SOCI 461 (3) Quantitative Data Analysis

A total of 15 credits are chosen from the following two lists.

**List 1**

3 credits minimum of statistics and mathematics chosen from:

* Note: or equivalent courses to BREE 252 or BREE 319.

**7.11.4.1 Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) – Major Environment – Food Production and Environment (63 credits)**

Revision, August 2011. Start of revision.
This domain (63 credits including core) is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc. in Environment program.

The business of food production is an area of human activity with a large and intimate interaction with the environment. Modern agriculturalists must strike a delicate balance between trying to provide food for themselves, their families, and urban dwellers and trying to minimize environmental damage. When negative effects due to agricultural activities do occur, they are not usually the classic point-source effects that we have come to associate with industry or large cities. Rather, the effects are over extremely large land areas cumulating, perhaps, in pollution of river systems or lakes some distance away. As world populations grow, and as diets change, potentially negative interactions between agricultural systems and other facets of the environment will become more frequent. In the same way, urban sprawl will make conflicts between agriculture and urbanites more common.

With a judicious choice of courses, graduates of this domain may be eligible to apply for membership in the Ordre des agronomes du Québec (OAQ) and the Agricultural Institute of Canada (AIC).

Program Prerequisites or Corequisites

All students in this program MUST take these pre- or corequisite courses, or their equivalents. These courses are taken as follows:

Location Note: When planning their schedule and registering for courses, students should verify where each course is offered because courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

One of the following courses or CEGEP equivalent (e.g., CEGEP objective 00XU):

- BIOL 112 (3) Cell and Molecular Biology
- LSCI 211 (3) Biochemistry 1

One of the following courses or CEGEP equivalent (e.g., CEGEP objective 00XV):

- CHEM 212 (4) Introductory Organic Chemistry 1
- FDSC 230 (4) Organic Chemistry

Suggested First Year (U1) Courses

For suggestions on courses to take in your first year (U1), you can consult the "MSE Student Handbook 2011-2012" available on the MSE website (http://www.mcgill.ca/mse), or contact Ms. Kathy Roulet, the Program Adviser (kathy.roulet@mcgill.ca).

Program Requirements

Note: Students are required to take a maximum of 34 credits at the 200 level and a minimum of 15 credits at the 400 level or higher in this program. This includes core and required courses, but does not include the domain prerequisites or corequisites listed above.

Location Note: When planning their schedule and registering for courses, students should verify where each course is offered because courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Core: Required Courses (18 credits)

Location Note: Core required courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

- ENVR 200 (3) The Global Environment
- ENVR 201 (3) Society, Environment and Sustainability
- ENVR 202 (3) The Evolving Earth
- ENVR 203 (3) Knowledge, Ethics and Environment
- ENVR 301 (3) Environmental Research Design
- ENVR 400 (3) Environmental Thought

Core: Complementary Course - Senior Research Project (3 credits)

Only 3 credits will be applied to the program; extra credits will count as electives.

- AGRI 519 (6) Sustainable Development Plans
- ENVR 401 (3) Environmental Research
- ENVR 451 (6) Research in Panama
Domain: Required Courses (9 credits)

AEBI 210 (3) Organisms 1
AGRI 210 (3) Agro-Ecological History
PLNT 300 (3) Cropping Systems

Domain: Complementary Courses (33 credits)

33 credits of complementary courses selected as follows:
15 credits - Basic Sciences
12 credits - Applied Sciences
6 credits - Social Sciences/Humanities

Basic Sciences:

15 credits of Basic Sciences selected as follows:

One of the following Statistics courses or equivalent:

Note: Credit given for Statistics courses is subject to certain restrictions. Students in Science should consult the "Course Overlap" information in the "Course Requirements" section for the Faculty of Science.

AEMA 310 (3) Statistical Methods 1
MATH 203 (3) Principles of Statistics 1

One of:

AGRI 340 (3) Principles of Ecological Agriculture
ANSC 250 (3) Principles of Animal Science

One of:

BIOL 202 (3) Basic Genetics
LSCI 204 (3) Genetics

One of:

ENVB 210 (3) The Biophysical Environment
GEOG 305 (3) Soils and Environment

One of:

BIOL 308 (3) Ecological Dynamics
ENVB 305 (3) Population & Community Ecology

Applied Sciences:

12 credits of Applied Sciences from the following:

* Note: you may take BREE 217 or GEOG 322, but not both; you may take FDSC 200 or NUTR 207, but not both.

AGRI 411 (3) Global Issues on Development, Food and Agriculture
AGRI 435 (3) Soil and Water Quality Management

7.11.5.1 Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.)-Major Environment - Land Surface Processes and Environmental Change (63 credits)

This domain (63 credits including core) is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc. Major in Environment programs.

The thin soil layer on the planet's land surfaces controls the vital inputs of water, nutrients, and energy to terrestrial and freshwater aquatic ecosystems. Widespread occurrences around the globe of desertification, soil erosion, deforestation, and land submergence over water reservoirs indicate that this dynamic system is under increasing pressure from population growth and changes in climate and land uses. Production of key greenhouse gases (water vapour, CO2, and methane) is controlled by complex processes operating at the land surface, involving climate change feedbacks that need to be fully understood, given current global warming trends.

The program introduces students to the interacting physical and biogeochemical processes at the atmosphere-lithosphere interface, which fashion land surface habitats and determine their biological productivity and response to anthropogenic or natural environmental changes. Through an appropriate selection of courses, students can prepare for graduate training in emerging research areas such as earth system sciences, environmental hydrology, and landscape ecology.

Suggested First Year (U1) Courses

For suggestions on courses to take in your first year (U1), you can consult the "MSE Student Handbook 2011-2012" available on the MSE website (http://www.mcgill.ca/mse), or contact Ms. Kathy Roulet, the Program Adviser (kathy.roulet@mcgill.ca).

Program Requirements

Note: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes core and required courses.

Location Note: Core required courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Core: Required Courses (18 credits)

Location Note: Core required courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

**Domain Required Course (3 credits)**

GEOG 203 (3) Environmental Systems

**Domain: Complementary Courses (39 credits)**

39 credits of complementary courses are selected as follows:

- 9 credits - 3 credits from each category of Statistics, GIS and Remote Sensing Techniques, Weather and Climate
- 9 credits of fundamental land surface processes
- 3 credits of environment and resource management
- 3 credits of field course
- 3 credits of social science
- 12 credits total of advanced studies chosen from the List A: Particular Environments and the List B: Surface Processes

**Statistics**

One of the following Statistics courses or equivalent:

Note: Credit given for Statistics courses is subject to certain restrictions. Students in Science should consult the "Course Overlap" information in the "Course Requirements" section for the Faculty of Science.

- AEMA 310 (3) Statistical Methods 1
- GEOG 202 (3) Statistics and Spatial Analysis
- MATH 203 (3) Principles of Statistics 1

**GIS and Remote Sensing Techniques**

One of:

- ENVB 430 (3) GIS for Natural Resource Management
- GEOG 201 (3) Introductory Geo-Information Science
- GEOG 308 (3) Principles of Remote Sensing

**Weather and Climate**

One of:

- ATOC 215 (3) Oceans, Weather and Climate
- ENVB 301 (3) Meteorology

**Fundamental Land Surface Processes:**

9 credits of fundamental land surface processes chosen as follows:

- GEOG 321 (3) Climatic Environments

**And/or one of:**

- GEOG 272 (3) Earth's Changing Surface
- SOIL 300 (3) Geosystems

- SOIL 331 (3) Soil Physics
- SOIL 510 (3) Environmental Soil Chemistry

**7.11.6 Renewable Resource Management Domain**
This domain is open only to students in the B.Sc.(Ag.Env.Sc.) Major Environment or B.Sc. Major Environment program.
7.11.6.1 Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) – Major Environment – Renewable Resource Management (63 credits)

Revision, August 2011. Start of revision.

This domain (63 credits including core) is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc. Major in Environment program. Renewable resource management is an emerging field that focuses on the ecosystem structures and processes required to sustain the delivery, to humanity, of ecosystem goods and services such as food, clean water and air, essential nutrients, and the provision of beauty and inspiration. Renewable resource management recognizes humans as integral components of ecosystems and is used to develop goals that are consistent with sustainability and ecosystem maintenance.

The Renewable Resource Management domain provides students with an understanding of: 1) the interactions between physical and biological factors that determine the nature and dynamics of populations and entities in the natural environment; 2) the ways in which ecosystems can be managed to meet specific goals for the provision of goods and services; 3) the economic and social factors that determine how ecosystems are managed; 4) the ways in which management of natural resources can affect the capability of natural ecosystems to continue to supply human needs in perpetuity; and 5) the approaches and technologies required to monitor and analyze the dynamics of natural and managed ecosystems.

Program Prerequisites or Corequisites

All students in this program MUST take the following pre- or corequisite courses:

One of the following biology courses or CEGEP equivalent (e.g., CEGEP objective 00XU):
- BIOL 112 (3) Cell and Molecular Biology
- LSCI 211 (3) Biochemistry 1

One of the following chemistry courses or CEGEP equivalent (e.g., CEGEP objective 00XV):
- CHEM 212 (4) Introductory Organic Chemistry 1
- FDSC 230 (4) Organic Chemistry

Suggested First Year (U1) Courses

For suggestions on courses to take in your first year (U1), you can consult the "MSE Student Handbook 2011-2012" available on the MSE website (http://www.mcgill.ca/mse), or contact Ms. Kathy Roulet, the Program Adviser (kathy.roulet@mcgill.ca).

Program Requirements

Note: Students are required to take a maximum of 30 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes core and required courses, but does not include the domain prerequisites or corequisites listed above.

Location Note: When planning their schedule and registering for courses, students should verify where each course is offered because courses for this program are taught at both McGill’s Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Core: Required Courses (18 credits)

Location Note: Core required courses for this program are taught at both McGill’s Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

- ENVR 200 (3) The Global Environment
- ENVR 201 (3) Society, Environment and Sustainability
- ENVR 202 (3) The Evolving Earth
- ENVR 203 (3) Knowledge, Ethics and Environment
ENVR 301 (3) Environmental Research Design
ENVR 400 (3) Environmental Thought

**Core: Complementary Course - Senior Research Project (3 credits)**

Only 3 credits will be applied to the program; extra credits will count as electives.

AGRI 519 (6) Sustainable Development Plans
ENVR 401 (3) Environmental Research
ENVR 451 (6) Research in Panama

**Domain: Complementary Courses (42 credits)**

42 credits of complementary courses are selected as follows:

9 credits - Basic Principles of Ecosystem Processes and Diversity
6 credits - 3 credits from each category of Statistics and GIS
6 credits - Advanced Ecosystem Components
6 credits - Advanced Ecological Processes
6 credits - Social Processes
9 credits - Ecosystem Components or Management of Ecosystems

**Basic Principles of Ecosystem Processes:**

9 credits of basic principles of ecosystem processes and diversity are selected as follows:

One of:

AEBI 210 (3) Organisms 1
AEBI 211 (3) Organisms 2
BIOL 305 (3) Animal Diversity

One of:

BIOL 308 (3) Ecological Dynamics
ENVB 305 (3) Population & Community Ecology

One of:

ENVB 210 (3) The Biophysical Environment
GEOG 305 (3) Soils and Environment

**Statistics**

One of:

AEMA 310 (3) Statistical Methods 1
BIOL 373 (3) Biometry

**GIS Methods**

One of:

ENVB 430 (3) GIS for Natural Resource Management
GEOG 201 (3) Introductory Geo-Information Science

**Advanced Ecosystem Components:**
6 credits of advanced ecosystem components selected from:

- BIOL 553 (3) Neotropical Environments
- GEOG 372 (3) Running Water Environments
- PLNT 358 (3) Flowering Plant Diversity
- SOIL 326 (3) Soils in a Changing Environment
- WILD 307 (3) Natural History of Vertebrates

**Advanced Ecological Processes:**
6 credits of advanced ecological processes selected from:

* Note: you may take BIOL 432 or ENVB 315, but not both; you can take BREE 217 or GEOG 322, but not both.

- BIOL 432* (3) Limnology
- BIOL 465 (3) Conservation Biology
- BREE 217* (3) Hydrology and Water Resources
- ENVB 315* (3) Science of Inland Waters
- ENVB 410 (3) Ecosystem Ecology
- GEOG 322* (3) Environmental Hydrology
- MICR 331 (3) Microbial Ecology
- NRSC 333 (3) Pollution and Bioremediation
- PLNT 460 (3) Plant Ecology

**Social Processes:**
6 credits of social processes selected as follows:

* If WILD 415 is taken, 1 additional credit of complementary courses must be taken.

** Note: you may take AGEC 333 and ECON 405, but not both.

- AGEC 242 (3) Management Theories and Practices
- AGEC 333** (3) Resource Economics
- ANTH 339 (3) Ecological Anthropology
- CANS 407 (3) Regions of Canada
- ECON 405** (3) Natural Resource Economics
- GEOG 382 (3) Principles Earth Citizenship
- GEOG 498 (3) Humans in Tropical Environments
- RELG 270 (3) Religious Ethics and the Environment
- SOCI 565 (3) Social Change in Panama
- URBP 520 (3) Globalization: Planning and Change
- WILD 415* (2) Conservation Law

**Ecosystem Components or Management of Ecosystems:**
9 credits of ecosystem components or management of ecosystems selected from:

- AGRI 435 (3) Soil and Water Quality Management
Water Environments and Ecosystems Domain

This domain is open only to students in the B.Sc.(Ag.Env.Sc.) Major Environment or B.Sc. Major Environment programs.

Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) - Major Environment - Water Environments and Ecosystems - Biological (60 credits)

This concentration (60 credits including core) is open only to students in the B.Sc.(Ag.Env.Sc.) Major in Environment or B.Sc. Major in Environment program.

To educate students in both the ecological and physical facets of the water environment, this domain offers two concentrations, with students choosing one or the other.

Those electing the Biological concentration will focus on the mechanisms regulating the different forms of life in water bodies. They will acquire, as well, a good understanding of the physical mechanisms controlling water properties. Students interested in studying the transport and transformation mechanisms of water on the planet, from rivers to the oceans and atmosphere, will select the Physical concentration. They will acquire, as well, a solid background in the biological processes taking place in water bodies.

Graduates of this domain are qualified to enter the work force or to pursue advanced studies in fields such as marine biology, geography, physical oceanography, and atmospheric science.

Suggested First Year (U1) Courses

For suggestions of courses to take in your first year (U1), you can consult the "MSE Student Handbook 2011-2012" available on the MSE website (http://www.mcgill.ca/mse), or contact Ms. Kathy Roulet, Program Adviser (kathy.roulet@mcgill.ca).

7.12 Major in Environment – B.Sc.

In addition to the domains available to students in the Major program in either the Faculty of Science or the Faculty of Agricultural and Environmental Sciences, “Major in Environment - B.Sc.” students in the Faculty of Science can choose from one of the following two domains:

- Atmospheric Environment and Air Quality, or
- Earth Sciences and Economics.

Refer to section 7.11: Major in Environment – B.Sc.(Ag.Env.Sc.) and B.Sc. for the general guidelines and regulations, which apply to all domains in the Major in Environment program.

7.12.1 Atmospheric Environment and Air Quality Domain

This domain is open only to students in the B.Sc. Major in Environment program in the Faculty of Science.

7.12.1.1 Bachelor of Science (B.Sc.) - Major Environment - Atmospheric Environment and Air Quality (60 credits)

The rapid expansion of industrialization has been accompanied by a host of environmental problems, many, if not most, involving the atmosphere. Some problems are of a local nature, such as air pollution in large urban centres, while others are global, or at least reach areas far removed from industrial activities.

The emphasis in this domain is on the mechanisms of atmospheric flow and on atmospheric chemistry. Courses examine how the atmosphere transports pollution, lifting it to great heights into the stratosphere or keeping it trapped near the ground, moving it around the globe or imprisoning it locally, or how it simply cleanses itself of the pollution through rainfall. The domain also gives students the training required to understand the important chemical reactions taking place within the atmosphere, as well as the know-how necessary to measure and analyze atmospheric constituents.

Suggested First Year (U1) Courses

For suggestions on courses to take in your first year (U1), you can consult the "MSE Student Handbook 2011-2012" available on the MSE website (http://www.mcgill.ca/mse).
Program Requirements

Note: Students are required to take a maximum of 31 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes core and required courses.

Location Note: When planning your schedule and registering for courses, you should verify where each course is offered because courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Core: Required Courses

Location Note: Core required courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

7.12.2.1 Bachelor of Science (B.Sc.) – Major Environment – Earth Sciences and Economics (66 credits)

Revision, August 2011. Start of revision.

The resources necessary for human society are extracted from the Earth, used as raw materials in our factories and refineries, and then returned to the Earth as waste. Geological processes produce resources humans depend on, and they also determine the fate of wastes in the environment. Understanding Earth's geologic processes provides us with the knowledge to mitigate many of our society's environmental impacts due to resource extraction and waste disposal. Additionally, economics frequently affects what energy sources power our society and how our wastes are treated. Earth sciences and economics are essential for our understanding of the many mechanisms, both physical and social, that affect Earth's environment.

This domain includes the fundamentals of each discipline. Students learn of minerals, rocks, soils, and waters and how these materials interact with each other and with the atmosphere. Fundamental economic theory and the economic effects of public policy toward resource industries, methods of waste disposal, and the potential effects of global warming on the global economy are also explored.

Suggested First Year (U1) Courses

For suggestions on courses to take in your first year (U1), you can consult the "MSE Student Handbook 2011-2012" available on the MSE website (http://www.mcgill.ca/mse), or contact Kathy Roulet, the Program Adviser (kathy.roulet@mcgill.ca).

Program Requirements

Note: Students are required to take a maximum of 34 credits at the 200 level and a minimum of 15 credits at the 400 level or higher in this program. This includes core and required courses.

Location Note: When planning your schedule and registering for courses, you should verify where each course is offered because courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Core: Required Courses (18 credits)

Location Note: Core required courses are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. </table>
This Program is open only to students in the B.Sc. Major in Environment, B.Sc.(Ag.Env.Sc.) Major in Environment, B.A. Faculty Program in Environment, and the B.A. & Sc. Interfaculty Program in Environment.

The Honours Program in Environment offers students the opportunity to undertake a year-long research project in close association with a professor. Honours research provides excellent preparation for graduate studies, but is not required for such studies. The Honours in Environment adds 6 credits of research to the regular Environment program. Since the Honours research is carried out in the final year at the same time as the regular courses, it does not add to the length (duration) of the degree. Students simply have 6 fewer credits of electives. If, for some reason, students cannot complete the Honours requirements, they may still graduate with the regular Environment program.

7.13 Bachelor of Arts (B.A.) - Honours Environment (60 credits)

This program is open only to students in the B.A. Faculty Program Environment. To be eligible for Honours, students must satisfy the requirements set by their B.A. degree.

In addition, students must satisfy the following:

1. Students apply for the Honours program in March of their U2 year. See the Program Adviser for details.

2. Applicants must have a minimum Program GPA (GPA of all required and complementary courses for the program in Environment taken at McGill) of 3.3 to enter the Honours program.

3. Students must earn a B grade (3.0) or higher for the Honours Research course (ENVR 495).

4. Students are required to achieve a minimum overall CGPA of 3.0 at graduation, and a minimum Program GPA of 3.3 to obtain Honours.

5. Arts (B.A.) students in the Honours Environment program must also complete a minor concentration in an academic unit other than the McGill School of Environment. Please refer to the Faculty of Arts regulations on Honours programs found under "Faculty Degree Requirements", "About Program Requirements" and "Departmental Programs".
Students in the B.A. Honours programs complete the core and domain courses (54 credits) according to their chosen domain as well as the 6 credits of Honours required courses.

At the completion of your Honours research, you are expected to present your results at an Honours Symposium, and are required to submit a copy of your final report to the MSE Program Adviser.

**Honours Required Courses (6 credits)**

Note: you take either ENVR 495D1 and ENVR 495D2 (6 credits over consecutive terms) or ENVR 495N1 and ENVR 495N2 (6 credits over non-consecutive terms).

### 7.13.2 Bachelor of Science (B.Sc.) - Honours Environment (72 credits)

This program is open only to students in the B.Sc. Major Environment. To be eligible for Honours, students must satisfy the requirements set by their B.Sc. degree.

In addition, students must satisfy the following:

1. Students apply for the Honours program in March of their U2 year. See the Program Adviser for details.
2. Applicants must have a minimum Program GPA (GPA of all required and complementary courses for the program in Environment taken at McGill) of 3.3 to enter the Honours program.
3. Students must earn a B grade (3.0) or higher for the Honours Research course (ENVR 495).
4. Students are required to achieve a minimum overall CGPA of 3.0 at graduation, and a minimum Program GPA of 3.3 to obtain Honours.

Students in the B.Sc. Honours programs complete the core and domain courses (60 to 66 credits) according to their chosen domain as well as the 6 credits of Honours required courses.

At the completion of your Honours research, you are expected to present your results at an Honours Symposium, and are required to submit a copy of your final report to the MSE Program Adviser.

**Honours Required Courses (6 credits)**

Note: you take either ENVR 495D1 and ENVR 495D2 (6 credits over consecutive terms) or ENVR 495N1 and ENVR 495N2 (6 credits over non-consecutive terms).

### 7.13.3 Bachelor of Arts and Science (B.A. & Sc.) - Honours Environment (60 credits)

This program is open only to students in the B.A. & Sc. Interfaculty Program Environment.

To be eligible for Honours, students must satisfy the requirements set by their B.A. & Sc. degree.

In addition, students must satisfy the following:

1. Students apply for the Honours program in March of their U2 year. See the Program Adviser for details.
2. Applicants must have a minimum Program GPA (GPA of all required and complementary courses for the program in Environment taken at McGill) of 3.3 to enter the Honours program.
3. Students must earn a B grade (3.0) or higher for the Honours Research course (ENVR 495).
4. Students are required to achieve a minimum overall CGPA of 3.0 at graduation, and a minimum Program GPA of 3.3 to obtain Honours.
5. B.A. & Sc. students must complete at least 30 credits in the Faculty of Arts and at least 30 in the Faculty of Science as part of their Honours program and their Minor concentration or Minor program. For a list of available Minor concentrations or Minor programs, see "Overview of Programs Offered" and "Minor Concentrations or Minors".

Students in the B.A. & Sc. Honours programs complete the coursework (54 credits) for the Interfaculty Program in Environment as well as the Honours required courses (6 credits).
At the completion of your Honours research, you are expected to present your results at an Honours Symposium, and are required to submit a copy of your final report to the MSE Program Adviser.

**Honours Required Courses (6 credits)**

Note: you take either ENVR 495D1 and ENVR 495D2 (6 credits over consecutive terms) or ENVR 495N1 and ENVR 495N2 (6 credits over non-consecutive terms).

### 7.13.4 Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) - Honours Environment (69 credits)

This program is open only to students in the B.Sc.(Ag.Env.Sc.) Major Environment. To be eligible for Honours, students must satisfy the requirements set by their B.Sc.(Ag.Env.Sc.) degree.

In addition, students must satisfy the following:

1. Students apply for the Honours program in March of their U2 year. See the Program Adviser for details.
2. Applicants must have a minimum Program GPA (GPA of all required and complementary courses for the program in Environment taken at McGill) of 3.3 to enter the Honours program.
3. Students must earn a B grade (3.0) or higher for the Honours Research courses (ENVR 496 and ENVR 497).
4. Students are required to achieve a minimum overall CGPA of 3.0 at graduation, and a minimum Program GPA of 3.3 to obtain Honours.

Students in the B.Sc.(Ag.Env.Sc.) Honours program complete the core and domain courses (60 to 63 credits) according to their chosen domain as well as the 6 credits of required Honours courses.

At the completion of your Honours research, you are expected to present your results at an Honours Symposium, and are required to submit a copy of your final report to the MSE Program Adviser.

**Honours - Required Courses (6 credits)**

### 7.14 Joint Honours Component Environment

**Revision, August 2011. Start of revision.**

**Adviser**

Ms. Kathy Roulet, MSE Program Adviser  
Email: kathy.roulet@mcgill.ca  
Telephone: 514-398-4306

This program is open only to students in the B.A. Faculty Program in Environment.

The Joint Honours Component Environment offers students the opportunity to undertake a year-long, interdisciplinary research project in their final year in close association with a professor. Honours research provides excellent preparation for graduate studies, but is not required for such studies. If, for some reason, students cannot complete the Joint Honours requirements, they may still graduate with a Minor Concentration Environment.

**Revision, August 2011. End of revision.**

### 7.14.1 Bachelor of Arts (B.A.) - Joint Honours Component Environment (36 credits)

**Revision, August 2011. Start of revision. New program.**

Students wishing to study at the honours level in two disciplines can combine joint honours program components in any two Arts disciplines. For a list of available joint honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Joint Honours students should consult an adviser in each department for approval of their course selection and their interdisciplinary honours research project.
Students will enter the Joint Honours at the end of their U1 year, and will be required to maintain a PGPA of 3.30 and an overall CGPA of 3.0. Whereas the Faculty Program Environment Honours requires the student to undertake a Minor as well, the Joint Honours Environment component does not.

This program comprises 36 credits, including: Honours research (6 credits); Environment core (21 credits); statistics (3 credits); and complementary courses (6 credits).

**Program Prerequisites or Corequisites**

The program corequisites (6-8 credits), which are common to the stand-alone Environment Honours program, are in addition to the overall credit account. Students are required to complete these courses by the end of their U1 year.

3 credits of Basic Science, one of the following, or their equivalents (e.g., CEGEP objectives Biology 00UK, Chemistry 00UL, Physics 00UR):

- **BIOL 111** (3) Principles: Organismal Biology
- **CHEM 110** (4) General Chemistry 1
- **PHYS 101** (4) Introductory Physics - Mechanics

And one of the following:

3 credits of Calculus or equivalent (e.g., CEGEP objective 00UN):

- **MATH 139** (4) Calculus 1 with Precalculus
- **MATH 140** (3) Calculus 1

**Required Courses (27 credits)**

21 credits of Environment core courses as follows:

- **ENVR 200** (3) The Global Environment
- **ENVR 201** (3) Society, Environment and Sustainability
- **ENVR 202** (3) The Evolving Earth
- **ENVR 203** (3) Knowledge, Ethics and Environment
- **ENVR 301** (3) Environmental Research Design
- **ENVR 400** (3) Environmental Thought
- **ENVR 401** (3) Environmental Research

And 6 credits of honours research from the following:

Note: you take either ENVR 495D1 and ENVR 495D2 (6 credits over consecutive terms) or ENVR 495N1 and ENVR 495N2 (6 credits over non-consecutive terms).

- **ENVR 495D1** (3) Honours Research
- **ENVR 495D2** (3) Honours Research
- **ENVR 495N1** (3) Honours Research
- **ENVR 495N2** (3) Honours Research

**Complementary Courses (9 credits)**

One of the following Statistics courses or equivalent:

- **BIOL 373** (3) Biometry
- **GEOG 202** (3) Statistics and Spatial Analysis
- **MATH 203** (3) Principles of Statistics 1
- **PSYC 204** (3) Introduction to Psychological Statistics

And 6 credits chosen with approval of the Program Adviser, at least 3 credits of which must be at the 400 level or higher.
7.15 Diploma in Environment

Adviser

Ms. Kathy Roulet, MSE Program Adviser
Email: kathy.roulet@mcgill.ca
Telephone: 514-398-4306

7.15.1 Diploma in Environment (30 credits)

Revision, August 2011. Start of revision.

The Diploma in Environment is designed for students with an undergraduate degree who wish to enrich or reorient their training, supplementing their specialization with additional undergraduate-level course work in Environment.

The diploma requires 30 credits of full-time or part-time studies at McGill; it may be started in either January or September. The diploma is a one-year program if taken full-time.

Students holding a B.Sc. or a B.A. degree or equivalent in good standing will be permitted to register for the diploma through the Faculty of Agricultural and Environmental Sciences, the Faculty of Arts, or the Faculty of Science, provided they are otherwise acceptable for admission to the University.

Advising Note:
Consultation with the Program Adviser for approval of course selection to meet program requirements is obligatory. All courses must be at the 200 level and above, and completed with a grade of C or better.

Location Note:
When planning your schedule and registering for courses, you should verify where each course is offered because courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Required Courses (18 credits)

Location Note: The ENVR courses are offered on both campuses. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

Complementary Courses (12 credits)

12 credits of complementary courses are selected as follows:

3 credits - must be taken with the approval of the Program Adviser in an area outside of the student's previous degree (e.g., those with a B.A. or equivalent degree must take at least 3 credits in the natural sciences; those with a B.Sc. or equivalent degree must take at least 3 credits in the social sciences). A list of Suggested Courses is given below.

9 credits - must be taken in an area of focus chosen by the student with the approval of the Program Adviser. At least 6 credits must be taken at the 400 level or higher. A list of Suggested Courses is given below.

Suggested Course List
The Suggested Course List is divided into two thematic categories: Social Sciences and Policy; and Natural Sciences and Technology.

Most courses listed at the 300 level and higher have prerequisites. You are urged to prepare your program of study with this in mind.
This list is not meant to be exhaustive. You are also encouraged to examine the course lists of the various domains in the Environment program for other courses that might interest you. Courses not on the Suggested Course List may be included in the diploma with the permission of the Program Adviser.

**Social Sciences and Policy**

* Note: If WILD 415 is taken, 1 additional credit of complementary courses must be taken.

7.16 Field Studies

Field study semesters are available in Africa, Barbados, and Panama. See Field Studies and Study Abroad. > Field Study Semesters and Off-Campus Courses in this publication for details.

8 Field Studies

8.1 Revisions – Field Studies

Field Study Minor

section 8.8.1: Field Studies – Minor Field Studies (18 credits)

8.2 Opportunities for Field Study and Study Abroad

Besides the many academic resources McGill offers on campus, there are also unparalleled opportunities to enrich your educational experience through exchange programs, internships, field study programs, and McGill courses taught abroad.

8.3 Study Abroad Options

There are four types of Study Abroad options available:

- section 8.3.1: Bilateral Student Exchanges
8.3.1 **Bilateral Student Exchanges**

Bilateral student exchange agreements are tuition exchange agreements that exist between McGill University and one other institution, which has been reviewed and approved by McGill. McGill University has bilateral agreements in many countries including: Australia, Austria, Belgium, Canada, China, Czech Republic, Denmark, Finland, France, Germany, Hong Kong, Hungary, Ireland, Italy, Japan, Korea, Mexico, the Netherlands, New Zealand, Norway, Russia, Singapore, Spain, Sweden, Switzerland, Thailand, Turkey, the United Kingdom, and the United States. Exchange programs can be university-wide or faculty-specific. Faculty-specific agreements are only open to students in the specified faculty.

The full listing of bilateral partners can be found at [www.mcgill.ca/students/international](http://www.mcgill.ca/students/international).

8.3.2 **CRÉPUQ Exchanges**

The Conférence des recteurs et principaux des universités du Québec has established tuition exchange agreements in which all Quebec university students may participate, regardless of whether or not they are Quebec residents. The listing of CRÉPUQ partners is accessible from [www.echanges-etudiants.crepuq.qc.ca](http://www.echanges-etudiants.crepuq.qc.ca).

8.3.3 **Field Study Semesters and Off-Campus Courses**

McGill offers you a chance to put theory into practice through local, regional, and international field study semesters and individual courses. Field studies provide practical experience and a chance to integrate and apply knowledge gained in the classroom. In many cases, field courses can be counted toward major program requirements. You should see your adviser for details.

Field Study Semesters are packages of McGill courses aimed at upper-year students that focus on the physical and social aspects of the environment. They are offered in various regions around the world in the Fall or Winter term. Currently, Field Study Semesters are offered in East Africa (Kenya, Uganda and/or Tanzania; see section 8.4: African Field Study Semester), Barbados (see section 8.5: Barbados Field Study Semester and section 8.6: Barbados Interdisciplinary Tropical Studies Field Semester), and Panama (see section 8.7: Panama Field Study Semester). Enrolment is limited, and application deadlines and costs vary, so you should consult the relevant sections of this publication for details. If you are interested in participating, you should begin planning your courses before the Field Study semester, as some of the field courses require prerequisites.

Students participating in any one of the field study semesters, i.e., the African Field Study Semester, the Barbados Field Study Semester, the Barbados Interdisciplinary Tropical Studies (BITS) Field Study Semester, or the Panama Field Study Semester, may complete the 18-credit Minor in Field Studies. See section 8.8: Field Study Minor for details.

Off-campus McGill courses are also offered to you and sometimes require separate departmental application. The courses are typically offered during the summer months and can be offered in places as varied as Italy, Mexico, or Brazil and in disciplines in Arts, Engineering (including Architecture), Science, Law, or Management. See section 8.13: Off-Campus Courses.

8.3.4 **Study Away On Your Own**

If you want to study as a Visiting student at a university with which McGill does not have a student exchange agreement, you must consult the Student Affairs Office of your McGill faculty, as well as the Admissions Office of the university to which you are applying regarding application requirements. You would pay tuition to the host institution.

8.4 **African Field Study Semester**

Website: [www.mcgill.ca/africa](http://www.mcgill.ca/africa)

Students from other universities are eligible to apply to the McGill CFSIA and must also meet the criteria for admission to McGill as a Visiting Student. Please see the AFSS website for details.

The AFSS comprises 15 credits of field study courses. Two courses (6 credits) in the natural and social sciences provide interdisciplinary academic context for field study. The other 9 credits are taken from the complementary courses list.

Visit the AFSS website [www.mcgill.ca/africa](http://www.mcgill.ca/africa), or go to [www.mcgill.ca/study](http://www.mcgill.ca/study) (Programs, Courses and University Regulations) in July for details of program updates.

**Offered:** Winter term

**Location:** East Africa

**Enrolment Limit:** 38 students

**Fees:** In addition to the regular McGill fees, students will be required to pay the additional costs associated with delivering the courses in the field. These costs include airfare, local travel, all food and accommodation, special admission fees for parks and museums, as well as other field costs. Airfares and
currency fluctuation will determine the amount of this charge. The 2011 trip cost is CAD$12,250. The actual cost for 2012 will be determined by September 2011.

Quebec residents may be eligible for a financial subsidy from the Ministère de l’Éducation, du Loisir et du Sport (MELS), see www.mcgill.ca/studentaid/exchangefunding for details.

Students can apply to the Mobility Award. See the website for details: www.mcgill.ca/students/international/financialsupport/mobility.

Application Deadline: April 29, 2011. Depending on space, there will be a second intake with a deadline date of November 1, 2011.

Application Details: Students must submit the CFSIA application (available on the AFSS website), a copy of their transcript, a letter of intent, and two reference letters to Martine Dolmière in the Faculty of Science, Dawson Hall, Room 408. See the website for details: www.mcgill.ca/africa/application.

Prerequisites: The AFSS is intended for students in their final two years. A CGPA of 3.00 and higher is recommended.

For more information and course lists, see section 8.8.1: Field Studies – Minor Field Studies (18 credits).

### 8.5 Barbados Field Study Semester

Website: www.mcgill.ca/bfss

Offered: Fall term

Location: Bellairs Research Institute in Barbados

Enrolment Limit: 27 students

Fees: In addition to the regular McGill fees, students will be required to pay the additional costs associated with delivering the courses in the field. These costs include airfare, accommodation, and most food, as well as other field costs. Fees for 2009 were CAD$6,750; this does not include airfare.

Quebec residents may be eligible for a Travel (Mobility) Award from the Québec Ministère de l’Éducation, du Loisir et du Sport (MELS); see www.mcgill.ca/studentaid/travelawards for details.

Application Deadline: March 14, 2012

Application Details: Students must submit a letter of intent, a CV, and a copy of their transcript to the Department of Bioresource Engineering, c/o susan.gregus@mcgill.ca. Further details are available at www.mcgill.ca/bfss.

Prerequisites: None

For more information and course lists, see section 8.8.1: Field Studies – Minor Field Studies (18 credits).

### 8.6 Barbados Interdisciplinary Tropical Studies Field Semester

Website: www.mcgill.ca/bits

Offered: Summer term

Location: Bellairs Research Institute in Barbados

Enrolment Limit: 22 students

Fees: In addition to the regular McGill fees, students will be required to pay the additional costs associated with delivering the courses in the field. These costs include accommodation and most food, as well as other field costs. Fees for 2012 are CAD$7,000 (on campus) and CAD$4,000 (off campus); this does not include airfare.

McGill students are eligible for a Mobility Award; see www.mcgill.ca/studentaid/travelawards for details or contact the Scholarships and Student Aid Office (SSAO) at mobilityaward@mcgill.ca.

Application Deadline: January 16, 2012 for Summer 2012. Depending on space, there will be a second intake with a deadline date of February 27, 2012.

Application Details: Students must submit a letter of intent, a CV, and a copy of their transcript to the Department of Plant Science, c/o carolyn.bowes@mcgill.ca. Further details are available at www.mcgill.ca/bits.

Prerequisites: None

For more information and course lists, see section 8.8.1: Field Studies – Minor Field Studies (18 credits).

### 8.7 Panama Field Study Semester

Website: www.mcgill.ca/pfss

Offered: Winter term

Location: Smithsonian Tropical Research Institute (STRI) in Panama
Enrolment Limit: 26 students

Fees: Students will be required to pay the additional costs associated with delivering the courses in the field. The cost of the program is approximately CAD$4,500 (subject to change). This amount does not include airfare, tuition, insurance, or food. A CAD$1,000 deposit is required and is non-refundable. Quebec residents may be eligible for a financial subsidy from the Ministère de l'Éducation, du Loisir et du Sport (MELS), see www.mcgill.ca/studentaid/exchangefunding for details.

Students can apply to the Mobility Award, see website for details: www.mcgill.ca/students/international/financialsupport/mobility

Application Deadline: March 25, 2011 for January 2012 (Winter term of the academic year 2011-12)

Application Details: Students must submit a letter of intent, CV, and copy of their transcript to: Martine Dolmière, in the Faculty of Science, Dawson Hall, Room 408. See the website for details: www.mcgill.ca/pfss/application.

Prerequisites: HISP 218 Spanish Language Elementary or equivalent proficiency, and MATH 203 Principles of Statistics 1 or equivalent. A CGPA of 3.00 and higher is recommended. The program is aimed at undergraduate students in their final year.

For more information and course lists, see section 8.8.1: Field Studies – Minor Field Studies (18 credits).

8.8 Field Study Minor

Field Study Coordinator:
Martine Dolmière (martine.dolmiere@mcgill.ca)
Faculty of Science, Dawson Hall, Room 408

Field Study Minor Adviser (Faculty of Science):
Ryan Bouma (ryan.bouma@mcgill.ca)
Faculty of Science, Dawson Hall, Room 405

8.8.1 Field Studies – Minor Field Studies (18 credits)

Revision, August 2011. Start of revision.

Students participating in any one of the field study semesters, i.e., the African Field Study Semester, the Barbados Field Study Semester, the Barbados Interdisciplinary Tropical Studies (BITS) Field Study Semester, or the Panama Field Study Semester may complete the 18-credit Minor in Field Studies. The Minor consists of the 15 credits of a field study semester plus three additional complementary credits chosen by the student in consultation with their departmental adviser and/or the Field Study Minor adviser.

For students in the B.Sc. Liberal Program, the Field Studies Minor can serve as the breadth component.

Program descriptions for each of the field study semesters are provided below.

Note: The field study semesters are not degree programs. Credits may be counted toward McGill degrees with the permission of program advisers. Students who complete a field study semester may consult the Field Study Minor adviser about completing the Minor program as part of their McGill degree.

African Field Study Semester (15 credits)

The African Field Study Semester (AFSS) is run through McGill's Canadian Field Study in Africa Program (CFSIA).

The AFSS provides one term of integrated field study in East Africa, with emphasis on environmental conservation, culture change, and sustainable development. Students investigate challenges of sustaining biological diversity and social justice in African environments subject to cultural change, economic development, and environmental stress. Cultural and ecological variation is examined in highland, montane, rangeland, desert, riverine, salt- and fresh-water lake, coastal, and urban settings.

African Field Study Semester - Required Courses

6 credits

Students select one course titled "Research in Society and Development in Africa" and one course titled "Research in Ecology and Development in Africa" from the courses below.

African Field Study Semester - Complementary Courses
9 credits from:
* Note: Courses marked with an asterisk ("*") are offered on a rotational basis, at least 3 credits annually.

- **ANTH 411 (3)** Primate Studies & Conservation
- **ANTH 416 (3)** Environment/Development: Africa
- **BIOL 428 (3)** Biological Diversity in Africa
- **BIOL 429 (3)** East African Ecology
- **GEOG 404* (3)** Environmental Management 2
- **GEOG 408 (3)** Geography of Development
- **GEOG 423 (3)** Dilemmas of Development
- **HIST 413 (3)** Independent Research
- **NRSC 405 (3)** Natural History of East Africa
- **NUTR 403* (3)** Nutrition in Society
- **REDM 405 (3)** Natural History of East Africa
- **WILD 420* (3)** Ornithology

**Barbados Field Study Semester (15 credits)**

The Barbados Field Study Semester (BFSS) provides one term of integrated field study for students with an interest in global issues related to natural resource use as affected by socio-economic, management, urban, and physical constraints. Offered at the Bellairs Research Institute in Barbados, this program challenges students to be more effective environmental decision makers, policy makers, and managers. There is a growing need for professionals with such skills at all levels of government, within NGOs, and in the private sector. The overall goal of the BFSS is to equip future leaders to address the complexity of issues associated with the formulation and implementation of organizational strategies compatible with the societal goal of sustainable use and development of our natural resources.

The BFSS is intended for senior undergraduate students from across the University. Students must apply to participate in the program. Selection will be based on the student's Academic Standing and demonstrated interests and involvement in international issues related to natural resource use.

**Barbados Field Study Semester - Required Courses**

- **6 credits**
  - URBP 507 (3) Planning and Infrastructure
  - URBP 520 (3) Globalization: Planning and Change

**Barbados Field Study Semester - Complementary Courses**

- **9 credits**
  Students select one 3-credit course titled "Water Resources in Barbados" and one 6-credit course titled "Sustainable Development Plans" from the list below.
  - **AGRI 452 (3)** Water Resources in Barbados
  - **AGRI 519 (6)** Sustainable Development Plans
  - **CIVE 452 (3)** Water Resources in Barbados
  - **CIVE 519 (6)** Sustainable Development Plans
  - **URBP 519 (6)** Sustainable Development Plans

**Barbados Interdisciplinary Tropical Studies Field Semester (15 credits)**

The Barbados Interdisciplinary Tropical Studies (BITS) Field Semester is an activity-filled, hands-on experience for students with an interest in international studies with a Caribbean flavour. The focus is on sustainable agri-food, nutrition, and energy production on a tropical island with a tourist-based economy. It is offered annually (in the Summer). It consists of two 2-hour orientation sessions conducted on the Macdonald campus and at the Bellairs Research Institute in Barbados, followed by three 3-credit and one 6-credit project courses at Bellairs Research Institute. This program integrates intensive course work with group project work and contributes to the formation of professionals with planning, managing, decision-making, and communication skills. The program addresses a global need for experienced professionals capable of interacting with various levels of government, non-governmental organizations, and the private sector. BITS welcomes applications from senior undergraduate students from across the University.
Barbados Interdisciplinary Tropical Studies Field Semester - Required Courses
15 credits

- AEBI 421 (3) Tropical Horticultural Ecology
- AEBI 423 (3) Sustainable Land Use
- AEBI 425 (3) Tropical Energy and Food
- AEBI 427 (6) Barbados Interdisciplinary Project

Panama Field Study Semester (15 credits)
This program is offered in Panama with the support of the Smithsonian Tropical Research Institute (STRI).

Hands-on experience is gained through research projects organized around multidisciplinary environmental issues. The nature of these projects will centre on practical environmental problems/questions important for Panama. Students will form teams that will work with Panamanian institutions (NGO, governmental, or research).

There is a one- or two-day period of transition and 13 weeks of course attendance in Panama. Field trips will be integrated into each of the courses offered.

Panama Field Study Semester - Required Courses
9 credits

- BIOL 553 (3) Neotropical Environments
- ENVR 451 (6) Research in Panama

Panama Field Study Semester - Complementary Courses
6 credits

Complementary courses change from year to year. Students will register for the 6 credits offered the Winter of their participation in the field study semester.

Winter 2011 complementary courses:
- AGRI 550 (3) Sustained Tropical Agriculture
- HIST 510 (3) Environmental History of Latin America (Field)

Winter 2012 complementary courses:
- GEOG 404 (3) Environmental Management 2
- GEOG 498 (3) Humans in Tropical Environments

Minor Field Studies - Complementary Course
In consultation with their departmental adviser and/or the Field Study Minor adviser, students who have completed one of the field study semesters described above may select a 3-credit complementary course to complete the requirements for the Minor and ask for it to be added to their academic records.

Revision, August 2011. End of revision.

8.9 Exchange Programs

McGill students can study on exchange while paying McGill tuition and earning credits toward their McGill degree.

8.9.1 Eligibility

Student exchange programs are open to McGill students of all nationalities. To participate, applicants must be currently registered as full-time, degree-seeking McGill students, meet the criteria of their faculty at McGill, and have a minimum CGPA of 3.0. Applicants must have completed at least one year of full-time study by the start of the exchange. Students can participate in exchanges for one term or for a full academic year (two terms).
The annual Study Abroad Fair will be held on Wednesday, October 5, 2011. Please check www.mcgill.ca/students/international for up-to-date information on the Study Abroad Fair.

8.9.2 Applying for an Exchange

Applications must be submitted on Minerva. Complete application details are found on the Student Exchanges and Study Abroad (SESA) website: www.mcgill.ca/students/international.

8.9.2.1 Deadlines

All deadlines regarding student exchanges are available at www.mcgill.ca/students/international/studyabroad. Your Faculty Approval deadline to participate in an exchange is in mid-January. The Faculty of Law has an earlier deadline. The deadline to submit the supporting documents (if required) for an application to participate in a student exchange for one or two terms of the 2012-2013 academic year is also available on the website.

Detailed information on the application process and deadlines is contained on the Student Exchanges and Study Abroad (SESA) website: www.mcgill.ca/students/international.

8.9.2.2 Bilateral or CRÉPUQ

If a university appears on both the Bilateral and CRÉPUQ listings of exchange partners, you must apply under the bilateral agreement.

8.9.3 Awards and Financial Assistance

Awards and financial assistance are available to students to help with the cost of participating in an exchange. Information on application deadlines and eligibility can be found at www.mcgill.ca/students/international and in this publication.

8.9.3.1 Financial Support

Financial support is available for eligible candidates. Information on available financial support can be found on the Student Exchanges and Study Abroad (SESA) website: www.mcgill.ca/students/international. Questions may be directed to servicepoint@mcgill.ca.

8.9.3.2 Universitas 21 Transportation Stipends

A limited number of Universitas 21 Transportation Stipends are available for McGill students who apply and are accepted to participate in a student exchange with one of McGill University’s Universitas 21 partners.

For more information, see section 8.10.2: Universitas 21.

8.9.3.3 McGill Scholarships and Awards

For students who are pursuing an approved program of study, renewable scholarships and awards may be retained for up to one year while on exchange. However, they will not be eligible for McGill’s yearly in-course awards.

8.10 Financial Assistance

Students participating in an official McGill University exchange program are eligible to apply for government student assistance as a McGill student, but are not eligible for McGill Student Aid. Students who “study away on their own” are not eligible to receive government student loans through McGill because they are not registered at McGill. Students should verify with the institution they will be attending whether or not they will be eligible to receive government student assistance.

8.10.1 Transfer of Credits from Host Institution

Grades received from the host institution do not appear on the McGill transcript nor are they calculated in the McGill CGPA. The McGill transcript includes a notation of participation in an exchange, the number of transfer credits granted by McGill, and where applicable, McGill course exemptions.

The transfer of credits process must be initiated by the student immediately upon return from exchange with the faculty Student Affairs office, and be completed no later than four months after the exchange.

Before leaving the host institution, students should order two (2) copies of the official transcript for their files, and ensure that the institution sends an official version of the transcript to Student Exchanges and Study Abroad at McGill.

8.10.2 Universitas 21

The Universitas 21 Consortium is an international network of leading research-intensive universities whose objective is to assist members’ plans for internationalization, particularly in facilitating student exchanges and short-term research visits. McGill University currently has bilateral student exchange agreements with the following institutions within the U21 Consortium:
8.10.3 The Killam Fellowships Program

McGill University participates in The Killam Fellowships Program, which provides exceptional undergraduate students from universities in Canada and the United States with the opportunity to study in the neighbouring country for either one semester or for a full academic year. Established in 2002 through a partnership between the Foundation for Educational Exchange between Canada and the United States of America and the American Killam Trusts, the goal of the program is to increase mutual understanding between Canada and the United States through academic exchange.

8.10.4 Further Information

Additional details regarding study abroad, including application procedures, deadlines, eligibility criteria, travel awards, etc., are on the Student Exchanges and Study Abroad (SESA) website: [www.mcgill.ca/students/international](http://www.mcgill.ca/students/international).

Student Exchanges and Study Abroad (SESA)
Telephone: 514-398-7878
Email: servicepoint@mcgill.ca

8.11 Internships and Co-op Programs

For information on internships and co-op programs, see University Regulations and Information > Internships and Co-op Programs.

8.12 Off-Campus Summer Programs

McGill offers a number of off-campus summer programs.

8.12.1 McGill Summer Courses in Italy

The Department of Italian Studies at McGill University offers up to 12 credits of courses given in Florence, Italy, during the months of May, June, and July, 2011.

**Location:** Florence, Italy

**Application Deadline:** March 28, 2011

**Application Details:** Applications and information are available at [www.mcgill.ca/italian](http://www.mcgill.ca/italian). Students must fill out the application form and contact either of the program coordinators, Ms. Vanna Fonsato or Dr. Enrica Quaroni, by email at florence.italian@mcgill.ca BEFORE registering on Minerva.

**Courses:**
Desautels Faculty of Management

Courses are given abroad in the Summer session and cover essentially the same material as the equivalent courses given in Montreal. They will, however, be heavily influenced by the local business environment. Courses are offered in various locations.

For the most up-to-date information concerning Summer Abroad courses, please visit the Minerva Class Schedule at www.mcgill.ca/minerva.

Application Details: For registration and/or advising, please contact the BCom Student Affairs Office at 514-398-4068.

Off-Campus Courses

McGill offers a number of off-campus courses.

Architecture

Course:

ARCH 324 (1) Sketching School

(Summer-Section 001 (TBD)) (Prerequisite: ARCH 218) An eight-day supervised field trip in the late summer to sketch places or things having specific visual characteristics. Students are required to complete Sketching School in the B.Sc.(Arch.) program.

Course:

ARCH 379 (3) Summer Course Abroad

(Summer-Section 001 (TBD)) (Prerequisite: ARCH 202 or permission of instructor) (Restriction: Departmental permission required) Studies in-situ of key buildings, landscapes, and urban settings; techniques of graphic documentations, analysis of physical configuration, constructional details, and present use. Excursions to neighbouring sites of architectural interest.

Course:

ARCH 519 (3) Field Course Abroad

(Summer-Section 001 (TBD)) (Prerequisite: ARCH 304 or permission of instructor) (Restrictions: Limited enrolment; departmental permission required) (Note: Excursions to neighbouring sites of architectural interest) Advanced and comprehensive studies in-situ of key buildings, landscapes and urban settings; techniques of graphic documentations, analysis of physical configuration, constructional details, and present use.

Art History & Communication Studies

Course:

ARTH 367 (3) Italian Renaissance Art 2

Not Offered: Summer 2011

Biology

The Faculty of Science offers the following biology courses off campus.
BIOL 240 (3) Monteregian Flora
BIOL 331 (3) Ecology/Behaviour Field Course
BIOL 334D1/D2 (3) Applied Tropical Ecology
BIOL 335 (3) Marine Mammals
BIOL 573 (3) Vertebrate Palaeontology Field Course

8.13.4 Classics

Course:

CLAS 348 (3) Greek and Roman Topography

Not Offered: Summer 2011

8.13.5 Earth & Planetary Sciences

Two-week field studies (May) in selected branches of the geosciences to examine processes in geology.

Courses:

EPSC 231 (3) Field School 1
EPSC 331 (3) Field School 2
EPSC 341 (3) Field School 3

8.13.6 Geography

The Faculty of Science offers the following Geography courses off campus.

Courses:

GEOG 290 (1) Local Geographical Excursion
GEOG 495 (3) Field Studies - Physical Geography
GEOG 496 (3) Geographical Excursion
GEOG 499 (3) Subarctic Field Studies

8.13.7 Italian Studies

The Department of Italian Studies at McGill University offers up to 12 credits of courses given in Florence, Italy.

Courses:

ITAL 206 (6) Beginners’ Italian Intensive
ITAL 216 (6) Intermediate Italian Intensive
ITAL 255 (6) Advanced Reading and Composition
ITAL 307* (3) Topics in Italian Culture
ITAL 308 (Not offered Summer 2011) (3) Business Italian 1
ITAL 309** (3) Perspectives on Italy

* Topic for May 2011: Landscapes of Struggle: The City and Modernity in Italian Post-War Cinema. Taught in English. For specific details on course content, please consult Prof. E. Bolongaro, Department of Italian Studies.

** Topic for May 2011: Florence and the Shaping of the Modern Imagination. Taught in English. For specific details on course content, please consult Prof. R. Castro, School of Architecture.

Offered: Please consult Class Schedule on Minerva.

Location: Florence, Italy

Application Deadline: March 28, 2011
Application Details: Applications and information are available at www.mcgill.ca/italian. Prior to registration on Minerva, students must contact Dr. E. Quaroni or Ms. V. Fonsato at florence.italian@mcgill.ca.

8.13.8  Music

Course:

MUAR 387  
(3)  
The Opera

Not Offered: Summer 2011

8.13.9  Political Science

Course:

POLI 359  
(3)  
Topics in International Politics 1

Topic for Summer 2011: The Art of Exchange: Medici Money and its Legacy. Florence and Venice, economic hubs in the Renaissance through international exchange, managed their economic relations quite differently. International exchange works through markets that require political underpinnings. The policies of the two cities are contrasted not only with modern practices, but with those developed by Amsterdam in the 1600s. Course will include visits to relevant sites including Venice. For specific details about course content, please consult Prof. M. Brawley, Department of Political Science.

Offered: Section 001 (May 9, 2011/June 3, 2011)

Location: Florence, Italy

Application Deadline: March 28, 2011

Application Details: Applications and information are available at www.mcgill.ca/italian. Prior to registration on Minerva, students must contact Dr. E. Quaroni or Ms. V. Fonsato at florence.italian@mcgill.ca.

9  Desautels Faculty of Management

9.1  About Desautels Faculty of Management

For over a century, the Desautels Faculty of Management has been among the world’s top international business schools. The Faculty is home to 10 research centres, four unique executive development programs, and 11 academic programs with 3,500 students at the undergraduate, master’s, executive, and Ph.D. levels. Nearly half of the Faculty’s students and 80% of its tenured professors come from outside of Canada, creating a truly rich global learning environment.

9.2  History of the Faculty

Management education began at McGill University in 1906. The department of Commerce was first established within the Faculty of Arts, offering commercial courses to train people as accountants, clerks, and the like. In 1912, the Commerce Program was named the School of Commerce, and the first B.Com. degrees were awarded by McGill in 1915. Five years later, McGill’s School of Commerce was founded, independent of the Faculty of Arts. In 1972, the Samuel Bronfman building, now home to the Desautels Faculty of Management, was opened at 1001 Sherbrooke Street West at the heart of downtown Montreal. A generous donation from the Bronfman family made the construction of the building possible. The Bronfman family is well known for their Seagram Company.

More than a century later, foundations for a world-class business school expanded to offer a B.Com. program; an M.B.A. program; specialized master’s programs; M.B.A. Japan, the first Canadian degree program offered in Japan; a joint bilingual E.M.B.A. with HEC Montréal, a program first of its kind in North America; a Ph.D. program; and numerous executive programs. On November 17, 2005, a landmark gift of $22 million from the Canadian Management Foundation through Mr. Marcel Desautels was donated to the Faculty, ushering in a new era in business education at McGill. The gift fostered changes to its facilities, revamping of the B.Com. and M.B.A. curriculums, and hiring of new professors. In honour of his gift, the Faculty was named the Desautels Faculty of Management.

9.3  Facilities

Management courses are mostly taught in the Samuel Bronfman building. The seven-floor building is located at 1001 Sherbrooke Street West, on the south-west corner of McGill’s downtown main campus. The building is adjacent to McGill’s Bookstore, McLennan, and Redpath Libraries, and the Service
Point across the street. Furthermore, the Bronfman building borders the main campus and other University buildings. It is a walk away from McGill’s Athletics Complex.

In recent years, the Bronfman building has witnessed major upgrades, including, thanks to Herschel Victor’s generosity, a complete renovation of the lobby and bistro. Thanks to Marcel Desautels, numerous large “learning-friendly” classrooms have been built throughout the building, including the Concourse level.

The Concourse is a floor entirely dedicated to Desautels undergraduate students, featuring medium- and large-sized classrooms, a modern computer lab, and a large student-living area. The living area includes a suite of offices for Desautels undergraduate student clubs as well as facilities for social activities. In addition, a small student-run shop, known as Dave’s, is located in the Concourse; it is dedicated to a former classmate.

The Faculty values its students’ participation in project teams for all Bronfman building renovations. Numerous areas throughout the building have been set up and are fully equipped for students to study in groups or individually. Products and furnishings are environmentally friendly and a wireless network is available throughout the building.

The Howard Ross Management Library is conveniently located in the Bronfman building and is modernly equipped for studying and research.

9.4  Revisions – Desautels Faculty of Management

Concentrations (General Management Major)

section 9.9.5.2: Bachelor of Commerce (B.Com.) – Concentration in Entrepreneurship (15 credits)

section 9.9.5.10: Bachelor of Commerce (B.Com.) - Concentration in Strategic Management - Global Strategy (15 credits)

Majors

section 9.9.8.6: Bachelor of Commerce (B.Com.) - Major Labour-Management Relations and Human Resources (30 credits)

9.5 About the Desautels Faculty of Management (Undergraduate)

For over a century, the Desautels Faculty of Management has been among the world’s top international business schools. The Faculty is home to 10 research centres, four unique executive development programs, and 11 academic programs with 3,500 students at the undergraduate, master’s, executive, and Ph.D. levels. Nearly half of the Faculty’s students and 80% of its tenured professors come from outside of Canada, creating a truly rich global learning environment.

9.5.1 Location

Samuel Bronfman Building
1001 Sherbrooke Street West
Montreal, Quebec H3A 1G5
Canada

Telephone: 514-398-4068
Faculty website: www.mcgill.ca/desautels
Degree website: www.mcgill.ca/desautels/bcom

The BCom Student Affairs Office of the Desautels Faculty of Management and the office of the Director, BCom Program are located in the Samuel Bronfman Building, Room 110. The BCom Student Affairs Office serves all students taking Management courses.

9.5.2 Administrative Officers

Peter Todd; B.Com.(McG.), Ph.D.(Br. Col.)  Dean
Emine Sarigöllü; B.A., M.B.A.(Bogazici), M.A., Ph.D.(Penn.)  Associate Dean, Student Affairs
Glenn Zabowski; B.Com., M.B.A.(McG.)  Director, BCom Program

9.5.3 The Bachelor of Commerce Program

Internationally acclaimed for its high academic standards and excellence in teaching/research, and widely recognized as Canada's leading international business school, McGill University consistently attracts top students and faculty members from around the world.
The primary objective of the McGill BCom program is to prepare you for an effective professional and managerial career. This preparation includes developing in you a capacity for critical thinking, for integrating knowledge across different disciplines, and for utilizing current theory in approaching practical business problems. You are also expected to become comfortable with taking risks, working as part of a team, and developing the necessary skills to lead others. You will acquire the critical management competencies which will enable you to offer the expertise organizations need to respond to the ever-changing and increasingly complex global marketplace.

The BCom's highly flexible curriculum offers you both breadth and depth. Breadth is achieved through a broad-based core of required courses which provide the necessary quantitative, analytical, and communication skills, while grounding you in applied theory and practice across the major management disciplines. Depth is achieved through three alternate specializations of study designed to meet the needs of a highly diverse student body with a wide range of career interests and priorities.

In the General Management concentration, you will pursue focused study in two different areas. You must choose one concentration in Management, and for your second area of study, you have two options: 1) choosing a second concentration in Management; or 2) pursuing a minor in another faculty. This option is ideal if you are looking for a general business education, are interested in continuing your education in a related field such as law or industrial relations, or want to pursue a career in a specific sector such as the arts, applied science, or public administration.

Majors and honours programs are available if you want to focus your study in primarily one area in order to get maximum exposure to your chosen field. This option is for students with clearly defined career objectives or those interested in further professional training, such as a CA, CMA, CGA, or CFA designation.

In International Management, you have a chance to pursue interdisciplinary global studies. All students in the Major complete the requirements of the International Business Concentration. You choose to complete social science and humanities courses in one of the following themes: comparative global studies, global politics and economy, or global well-being and development. You are also required to complete at least two levels of a language and 3 credits of research or internship work. Exchanges are recommended.

Candidates coming from the Quebec CEGEP system apply to a three-year program whereas out-of-province and international students follow a four-year program.

9.5.4 BCom Student Affairs Office

The BCom Student Affairs Office provides ongoing advice and guidance on programs and prerequisites, degree requirements, majors, minors and concentrations, registration, course changes, procedures for withdrawal, deferred final examinations, rereads, academic standings, inter-faculty transfers, exchanges or study abroad, transfer credits, scholarships, and graduation. Student advisers offer help managing academic situations during periods of personal, financial, or medical problems, by working with you to identify various possibilities and strategies for making informed decisions.

The BCom Office abides by everything in this publication: prerequisites, concentrations, majors, etc. The BCom Office will not make exceptions for students against this publication in any situation. No exceptions to this publication will be approved by the BCom Office or the Director, BCom program.

For more information, please refer to the BCom website at www.mcgill.ca/desautels/bcom.

9.5.5 Summer Studies

If you want to make up deficiencies in your background, or to accelerate your progress in your degree, you may do so by taking summer courses at McGill or at another institution.

Each summer, from early May to mid-August, many core courses and several elective courses are offered by the Desautels Faculty of Management for full credit. They are available to Management students, and to students from other faculties and universities who have the necessary course prerequisites. McGill also offers a number of summer courses in various disciplines at different levels. Information on summer courses is available from the BCom Student Affairs Office at 514-398-4068 or bcom.mgmt@mcgill.ca, or from the Summer Studies Office at 514-398-5212 or summer.studies@mcgill.ca.

You normally will be allowed to take only 6 credits in each of the two parts of Summer session. If you want to follow a full-time period of study, you will be permitted to enrol for more than 6 credits per part only with special permission of the Director, BCom program. In no circumstance will students be allowed to take more than 12 credits in either part of the Summer session, and students may take no more than 18 credits in a single summer.

If you want to pursue courses at another institution, credit will be granted for such courses only if they fit into your overall program, and if written permission to complete such courses for credit has been obtained in advance from the BCom Student Affairs Office. A course that overlaps with material already completed in your program, or a language course that does not substantially progress beyond corresponding language courses already taken, will not receive credit approval. See section 9.5.7: Transfer Credit and Advanced Standing for more information about transferring credits.

9.5.6 International Student Exchange Program

You are encouraged to take advantage of opportunities to study abroad for a term or year. The international exposure and academic experience gained by taking part in a student exchange are highly worthwhile. Through this program, you may study and earn academic credits at over 70 universities in countries around the world. Exchange opportunities are open to students in most specializations.

More information can be obtained from the BCom Student Affairs Office at 514-398-4068, bcom.mgmt@mcgill.ca, or on the McGill website at www.mcgill.ca/students/international/studyabroad. At least two-thirds of all departmental program requirements must be completed at McGill and there is a CGPA requirement of 3.0 to be eligible for exchange. Once accepted, you must obtain written faculty authorization for transfer credits before leaving on exchange. For more information about the International Student Exchange program, please visit: www.mcgill.ca/desautels/bcom/program_info/exchange.
9.5.7 Transfer Credit and Advanced Standing

Students are admitted to a four-year program requiring the completion of 120 credits, but advanced standing of up to 30 credits may be granted if you have obtained satisfactory results in the Diploma of Collegial Studies, International Baccalaureate, French Baccalaureate, Advanced Levels, and Advanced Placement Tests. Students who transfer course credit from another institution may transfer up to one-third of the credits required in their degree program, including the concentration, major, or honours requirements under the following conditions:

- Only courses passed with a grade of C or better at the host institution will be transferred. Grades of C- are not acceptable.
- Grades of P or S are acceptable only if transferred from faculties within McGill.
- The letter grades applied by the former home institution or host institution (for exchanges and study away) take precedence over the numerical grades if provided.
- For exchange or study away purposes, it is required that course and credit approval is obtained before courses are taken at the host institution.
- The four-year program will require a minimum 80-credit residency at McGill.
- The three-year program will require a minimum 60-credit residency at McGill.

9.6 BCom Degree Admission Requirements

The Desautels Faculty of Management offers programs that are highly selective and fulfillment of minimum admission requirements does not guarantee acceptance. For information about admission requirements to the BCom program, please refer to the Undergraduate Admissions Guide, found at www.mcgill.ca/applying. Students who have been asked to withdraw from a program in another faculty/university due to poor performance are not eligible for transfer into the BCom program. Information about interfaculty transfers can be obtained from the BCom Student Affairs Office at 514-398-4068 or the BCom website at www.mcgill.ca/desautels/bcom.

9.7 BCom Degree Requirements

The Bachelor of Commerce (BCom) degree program is a three- or four-year program when taken full-time. Although the language of instruction at McGill is English, those who plan to be part of the Quebec business environment are reminded of the importance of competence in both written and oral French. Students may submit assignments and write exams in French.

9.7.1 Academic Requirements for Graduation

Each student in the Desautels Faculty of Management must be aware of the Faculty regulations as stated in this publication and on the McGill and BCom websites. While BCom Office advisers and staff are always available to give advice and guidance, the ultimate responsibility for completeness and correctness of course selection and registration, for compliance with, and completion of, program and degree requirements, and for the observance of regulations and deadlines rest with you. It is your responsibility to seek guidance from the BCom Student Affairs Office if in any doubt; misunderstanding or misapprehension will not be accepted as cause for any exception from any regulation, deadline, program, or degree requirement.

For students entering with a Quebec CEGEP Diploma, the number of credits is generally 90. Students from outside the province of Quebec who have not completed the equivalent of a CEGEP Diploma are required to complete 120 credits.

It is your responsibility to make sure that your course of study conforms with the curriculum requirements as described in this publication. If you want to deviate from your program, you must obtain written permission from the Director, BCom program.

If you have transferred with advanced standing to the Desautels Faculty of Management from another university, you are required to complete a minimum of 60 credits while registered in the BCom program, including required courses that are deemed necessary, to become eligible for the degree of BCom.

9.7.2 Cumulative Grade Point Average (CGPA)

You will be eligible for graduation upon satisfactory completion of the minimum credit requirement for the degree as indicated in your letter of acceptance, subject to the curriculum and CGPA of 2.00 (3.00 for Honours) requirements.

9.7.3 Course Requirements

All required and complementary courses used to fulfill program requirements, including the Freshman program, must be completed with a grade of C or better. If you fail to obtain a satisfactory grade in a required course (core, part of a concentration, minor, major, or honours program), you must repeat the course. Course substitution will be allowed only in special cases; you should consult your academic adviser. Normally, you are permitted to repeat a failed course only once (failure is considered to be a grade of less than C or the administrative failures of J and KF). If the failed course is a complementary course required by the program, you may choose to replace it with another complementary course. If you choose to substitute another complementary course for a complementary course in which a D was received, credit for the first course will still be given, but as an elective. If you repeat a required course in which a D was received, credit will be given only once. In either case, both grades of D count toward the CGPA.
9.7.4 Academic Advising

If you are entering the Desautels Faculty of Management for the first time, you are required to attend an Orientation and Advising Session during the last week of August, at which time the staff from the BCom Student Affairs Office provide information on all aspects of the BCom program. If you have had difficulty registering for your courses, you will have the opportunity to resolve your problems after this session. For a detailed description of advising and registration procedures, you should refer to section 9.7.5: Registration; the website for newly admitted undergraduate students at www.mcgill.ca/newstudents, as well as the BCom website at www.mcgill.ca/desautels/bcom.

Academic advising for all returning students takes place in February and March for the upcoming academic year. "Drop-in" advising is available in the BCom Student Affairs Office from mid-August until the end of the add/drop period in the Fall term, and from the beginning of January until the end of the add/drop period in the Winter term. Appointments to discuss programs of study with student advisers may be made as soon as the add/drop period ends in September and then again in January, respectively. In February or March, an Information Session takes place that helps you to select a course of study for specialization. In April, as a student continuing in the BCom program, you will plan your studies for the following year using the requirements as listed in the Calendar, or in the Degree Evaluation Module available through Minerva, as a guide to your course selection. Advice is available at the BCom Student Affairs Office for students if you are having difficulty. Students register online using Minerva at www.mcgill.ca/minerva.

If you are a General Management student choosing to do a minor in another faculty as your second area of study, you should meet with the appropriate department adviser to plan your courses. It should be noted that minors must have a minimum of 18 credits not overlapping with other program requirements.

If you are taking the Minor, Major, or Honours in Economics, you must see an adviser in the BCom Student Affairs Office for approval of your program and course selection.

If you are in the Major concentration or Minor in Mathematics, or Statistics, you must have your program of study initially authorized by the appropriate department adviser prior to consulting with a student adviser in the BCom Student Affairs Office.

You should contact a student adviser as soon as possible if you are encountering difficulties (academic or personal) or are requesting specific information about the BCom program.

9.7.5 Registration

- It is your responsibility to register on time. Failure to register for courses when the registration periods begin may delay graduation and completion of program requirements. Space is limited.
- Registration for Fall and Winter courses will begin in late March and early April for BCom students. Priority registration in Management courses for Summer opens in early March. Exact dates may be obtained from www.mcgill.ca/importancedates.
- BCom students who are unable to register for required or complementary courses that they need in order to graduate on time should submit a copy of the Closed Management Course Request Form to the BCom Student Affairs Office with a copy of their Degree Evaluation and any relevant supporting documentation. During the add/drop periods, you must meet with an adviser; Closed Management Course Request Forms will not be accepted. Exact deadlines may be obtained from www.mcgill.ca/importancedates.
- BCom students are generally not permitted to take courses offered through the School of Continuing Studies (SCS) for credit toward their degree. If you want to receive special permission to take a course through SCS (i.e., to enable you to graduate on time or take an approved elective that is only offered by SCS), you must submit a Cont Ed Request Form to the BCom Student Affairs Office with a copy of your Degree Evaluation and any relevant supporting documentation. You cannot register for SCS courses via Minerva; if approved, the BCom Office will need to add this course to your record. You should not go to nor contact the School of Continuing Studies regarding registration for an SCS course.
- New students must select their area(s) of specialization online using Minerva before they are permitted to register for courses. The program options available are found in the Change your Curriculum module of the Student Menu.
- Full-time students must register for courses online using Minerva. Additional information for new students is distributed at the time of admission and is also available on the Faculty website at www.mcgill.ca/desautels under Degree Programs > BCom > Accepted Students and www.mcgill.ca/student-records. Information for returning students and part-time students is available in the BCom Office as of March.
- If you want to change the courses for which you are registered within the add/drop period, you must do so online using Minerva.
- If you want to withdraw from a course after the add/drop deadline, you must do so online using Minerva by the withdrawal deadline. A grade of "W" will be indicated on the transcript, which does not affect your GPA. Approval to withdraw after the withdrawal deadline will be granted only in exceptional circumstances. A written request for such consideration, accompanied by substantial documentation, must be submitted to the Director, BCom Program. If your circumstances require you to withdraw from your program completely, you should see an adviser in the BCom Student Affairs Office.
- All courses have limited enrolment. When your record is verified, any courses taken that violate the degree regulations will be flagged after the end of the course change period as "not for credit towards the BCom". As a result, your expected date of graduation may be delayed. If you believe that you have valid reasons to take a course that may not be credited toward your BCom, you must obtain permission from the Director, BCom Program.

9.7.6 Course Overlap

You will not receive credit toward your degree for any course that overlaps in content with a course taken for credit at McGill, CEGEP, another university, advanced placement exams, Advanced Level results, International Baccalaureate Diploma, or French Baccalaureate Diploma.

It is your responsibility to consult with the BCom Student Affairs Office as to whether or not credit can be obtained and to be aware of exclusion clauses specified in the course descriptions in this publication. Please refer to the following website for specific information about advanced standing credits and McGill course exemptions: www.mcgill.ca/student-records/transfercredits.

Credit for Statistics courses will be given with the following restrictions:
Credit will be given for ONLY ONE of the following Statistics courses: AEMA 310, BIOL 373, ECON 227D1/ECON 227D2 (max. 3 credits), ECON 257D1/ECON 257D2, GEOG 202, GEOG 351, MATH 204, MATH 324, MATH 357, MGCR 271, MGCR 273, MIME 209, PSYC 204, SOCI 350.

Credit will be given for ONLY ONE of the following intermediate Statistics courses: MGSC 272, ECON 257D1/ECON 257D2, ECON 337 & ECON 338, ECON 467.

For 500-level Statistics courses not listed above, you must consult a student adviser to ensure that no significant overlap exists. Where such overlap exists with a course for which you have already received credit, credit will not be allowed.

Credit for Statistics courses offered by faculties other than Management requires the permission of the Director, BCom program.

PSYC 204 may not be taken if a grade of 75% or better was received in an equivalent course completed at CEGEP.

Credit for computer courses offered by the School of Computer Science is governed by rules specified in its individual course descriptions.

Credit for Economics courses will be subject to the following restrictions:

- A maximum of 6 credits will be granted for Freshman Economics courses.
- A maximum of 6 credits will be granted for ECON 230D1/ECON 230D2, ECON 250D1/ECON 250D2, and MGCR 293.
- A maximum of 6 credits will be granted for ECON 330D1/ECON 330D2, ECON 352D1/ECON 352D2, and ECON 295.
- ECON 208 and ECON 209 are not permitted in the 90-credit program.

**Course Taken Under the Satisfactory/Unsatisfactory Option**

You may select or cancel the S/U option only during registration or the add/drop period through a request to the BCom Student Affairs Office. All S/U credits will be excluded when calculating the Grade Point Average. This option may only be used for elective courses, one course per term, to a maximum of 10% of the total credits taken at McGill to fulfill your degree requirements. Careful consideration should be given before using this option as it can affect scholarship and award consideration, where a minimum of 27 graded credits are required, as well as future admission to law or graduate schools.

For more information and restrictions, refer to *Courses Taken under the Satisfactory/Unsatisfactory (S/U) Option* in the *University Regulations and Resources* section of this publication.

**Electives**

**Non-Management Electives**

Students completing two concentrations, or Majors in Accounting, Finance, Information Systems, Labour-Management Relations, or Marketing, must take a minimum of 6 credits of non-Management electives. This requirement does not apply to those completing a minor or a major in Economics, Mathematics, Statistics, or Psychology, or an Honours or Joint Honours program.

Non-Management electives may be chosen from a broad range of faculties and departments, subject to the exclusions of *section 9.7.6: CourseOverlap* regarding Statistics, Computer, and Economics courses, and the restrictions listed below.

**Note 1:** Quantitative Methods, Statistics, and Research courses offered by any department must be approved by the Director, BCom program, prior to registration in the course. Failure to obtain the necessary approval will result in the course being excluded (E) from the credit count.

**Note 2:** A maximum of 6 credits can be taken in English for Academic Purposes and/or English as a Second Language: the relevant subject codes are CEAP, CEEN, CEGL, CESL, and EDEC.

**Faculty constraints**

**Agriculture & Environmental Sciences**

- All courses require approval by a student adviser in the BCom Student Affairs Office.

**Arts**

- All courses are approved, subject to *section 9.7.6: CourseOverlap* and the above notes, with a maximum of 6 credits approved in CEAP, CEEN, CEGL, CESL, and EDEC (combined), or SWRK (approved courses only). ECON 208 and ECON 209 may not be taken for credit within the BCom program.

**Continuing Studies**

- A maximum of 6 credits are approved from the language courses offered; no credit will be granted for other SCS courses with subject codes beginning with a “C”, such as CCTR or CMIS.

**Education**

- A maximum 6 credits are approved from the following subject codes (combined): EDEA 201, 204, 205, 296, 304, 305, 307, 496, 497; EDEC 200, 202, 205, 208, 236, 239, 241, 242, 247, 248, 260, 261, 305, 308, 309, 403; EDEE 325; EDEM 220; EDER 207, 209, 309, 394, 395, 461, 473, 494; EDES 366; EDK 205, 206, 261, 292, 293, 303, 330, 391, 395, 566; EDPC 500; EDPE 377; EDPE 526.
- No courses are approved from subject codes EDET, EDFC, EDPE, EDPT, or EDSL.

**Engineering**

- Most courses in subject codes ARCH, CHEE, CIVE, ECSE, MECH, MIME, URBP with approval of an adviser.
- No courses are approved from subject codes FACC or MPMC.
- The following courses are not approved: CHEE 291, 360, 462; CIVE 210, 432; ECSE 443; MECH 201, 260, 262, 289; MIME 202, 221, 280, 290, 291, 310, 380, 392, 480, 481, 494.

**School of Environment**
- All courses are approved.

**Music**
- All courses are approved in subject codes MUGT, MUHL, MUMT, MUPP, MUSR, MUTH, and MUAR (taught by Arts).
- A maximum of 6 credits is approved from the following (combined): MUCO, MUCT, MUEN, MUIN, MUIT, MUJZ, MUPG, and MUSP.

**Religious Studies**
- All courses are approved.

**Science**
- All courses are approved, subject to section 9.7.6: Course Overlap and the above note 1, except COMP 102; MATH 111, 112, 122, 123, 133, 139, 140, 141, 150, 151, 152, and 203.
- A maximum of 6 credits may be taken from the World of Chemistry courses CHEM 180, 181, 182, 183.

9.7.8.2 **Electives**

Subject to the requirements and restrictions for non-Management electives as outlined above, all remaining elective credits may be taken in any faculty, Management or otherwise.

9.7.9 **Academic Standing**

Academic Standing is based primarily on your cumulative grade point average (CGPA), but may also be affected by your term grade point average (TGPA). Academic Standing is assessed in January for the Fall term, in May for the Winter term, and in September for the Summer term. Academic Standing in each term determines whether you will be allowed to continue your studies in the next term and whether any conditions will be attached to your registration.

Decisions about Academic Standing in the Fall term are based only on grades that are available in January. Grades for courses in which you have deferred examinations and Fall-term grades for courses that span the Fall and Winter terms do not affect your Academic Standing for the Fall term, even though they will ultimately affect your Fall TGPA. Therefore, Academic Standings for the Fall term are designated as "Interim". Interim Standing decisions are mentioned below only if the rules for them differ from those for regular Standing decisions.

If you are not in Satisfactory Standing, you are strongly advised to consult with Naomi Neuburger or Heather McCombie in the BCom Student Affairs Office about your course selection before the withdrawal deadlines.

9.7.9.1 **Satisfactory/Interim Satisfactory Standing**

If you are in Satisfactory Standing, you may continue in your program.

- New students are admitted to Satisfactory Standing.
- Students with a CGPA of 2.00 or greater are in Satisfactory Standing.

9.7.9.2 **Probationary/Interim Probationary Standing**

If you are in Probationary Standing, you may continue in your program, but must carry a reduced load (maximum 14 credits per term) and raise your TGPA and CGPA to return to Satisfactory Standing (see above). You should see your student adviser to discuss your course selection.

If you are in Interim Probationary Standing, you may continue in your program, but should evaluate your course load and reduce it as appropriate. You are strongly advised to consult with your student adviser, before the withdrawal deadlines, about your course selection for the Winter term.

- If you were previously in Satisfactory Standing, you will be placed in Probationary Standing if your CGPA falls between 1.50 and 1.99.
- If you were previously in Probationary Standing, you will remain in Probationary Standing if your CGPA falls between 1.50 and 1.99 and your TGPA is 2.50 or higher (although the TGPA requirement will not apply to the Summer term).
- If you were previously in Interim Unsatisfactory Standing, you will be placed in Probationary Standing if your CGPA falls between 1.50 and 1.99 and your TGPA is 2.50 or higher.
- If you were previously in Unsatisfactory Standing and you were readmitted to the BCom program by the Director, you will be placed in Probationary Standing if your CGPA is lower than 2.00. To remain in the program, you must satisfy the relevant conditions specified in your letter of readmission.

9.7.9.3 **Unsatisfactory Readmitted Standing**

If you were previously in Unsatisfactory Standing and you were readmitted to the BCom program by the Director, you will have your Standing changed to Unsatisfactory Readmitted Standing. Your course load is specified in your letter of readmission, as are the conditions you must meet to be allowed to continue in your program. You should see your student adviser to discuss your course selection.

9.7.9.4 Unsatisfactory/Interim Unsatisfactory Standing

If you are in Interim Unsatisfactory Standing, you may continue in your program, but should evaluate your course load and reduce it as appropriate. You are strongly advised to consult a student adviser, before the withdrawal deadlines, about your course selection for the Winter term.

If you are in Unsatisfactory Standing, you have failed to meet the minimum standards set by the Faculty. You may not continue in your program, and your registration will be cancelled.

Appeals for readmission by students in Unsatisfactory Standing should be addressed to the Director, BCom program, no later than July 15 for readmission to the Fall term and November 15 for the Winter term. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (i.e., medical or other documentation) along with reassurances of future improvement. If you are in Unsatisfactory Standing for the second time, you must withdraw permanently.

- You will be placed in Unsatisfactory Standing (Winter or Summer term) or Interim Unsatisfactory Standing (Fall term) if your CGPA falls or remains below 1.50.
- If you were previously in Probationary, Unsatisfactory Readmitted, or Interim Unsatisfactory Standing, you will be placed in Unsatisfactory Standing if your TGPA falls below 2.50 and your CGPA is below 2.00.
- If you were previously in Unsatisfactory Standing and you were readmitted to the BCom program by the Director and you have not at least satisfied the conditions to attain Probationary Standing that were specified in your letter of readmission, you will be placed in Unsatisfactory Standing.

9.7.9.5 Incomplete Standings

Standing awaits deferred exam.

Standing Incomplete

If you have an Incomplete Standing in the Winter or Summer term, you may register for the Fall term, but your Standing must be resolved by the end of the add/drop period for that term. If your Incomplete Standing changes to Satisfactory, Probationary, or Interim Unsatisfactory Standing, you may continue in the program. If your Standing changes to Unsatisfactory Standing, you may not continue in your program, and your registration will be cancelled.

If your Standing changes to Unsatisfactory and you wish to ask for permission to continue in your program, you must meet with Heather McCombie as soon as you are placed in Unsatisfactory Standing. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (i.e., medical or other documentation) along with reassurances of future improvement.

9.7.10 Time and Credit Limit for Completion of the BCom Degree

If you need 90 or fewer credits to complete your degree requirements, you are expected to complete your degree in no more than eight terms after your initial registration for the BCom degree. If you are a student in the Freshman program, you become subject to these regulations one year after your initial registration. If you want to exceed this time limit or want to exceed the minimum credit requirement for your degree, you must apply in writing to the Director, BCom program, for permission to continue your studies. Permission for exceeding the time and/or credit limit will normally be granted only for valid academic reasons. Elective credits over the credit limit will be flagged for no credit and the grades will not count in your CGPA.

If you are readmitted after interrupting your studies for a period of one year or more, you must apply in writing to the Director, BCom program. When you are readmitted after a period of absence, you are normally subject to the program and degree requirements in effect at the time of readmission.

9.8 Grading and Credit

During the first week of lectures, each instructor will provide you with a written course outline that should include:

- A description of the topics to be considered in the course;
- A list of required or recommended textbooks and reading materials;
- A grading scheme or description of the methods of evaluation to be used in the course, along with due dates for assignments and dates/times of exams. All term work must be assigned early enough in the term for students to complete the assignment(s) by the last day of class. The due date for term work must be no later than the last day of classes. Changes in the distributed grading scheme are permitted only with the unanimous consent of all students registered in the course. In practice, therefore, the grading scheme is almost never changed during the term;
- The instructor's office hours for students, office location, telephone number for office appointments, and secretarial contact information;
- Academic Integrity statement: McGill University values academic integrity. Therefore, all students must understand the meaning and consequences of cheating, plagiarism, and other academic offences under the Code of Student Conduct and Disciplinary Procedures (see www.mcgill.ca/students/srr/honest for more information).

9.8.1 Examinations

For information about final examinations and deferred examinations, see also University Regulations and Resources > Examinations. Final examinations are centrally administered by Enrolment Services. Around the beginning of November and March, a final examination schedule will be posted on the McGill website (www.mcgill.ca) by Enrolment Services. The seating arrangements are posted on the McGill website toward the end of the last week of classes.
BCom students and non-Management students taking BCom courses are contacted by Enrolment Services via McGill email regarding final exam conflicts. Arrangements to resolve final exam conflicts are made and communicated by Enrolment Services via McGill email as well. You should also refer to the BCom website at www.mcgill.ca/desautels/bcom for more information. Students are warned not to make travel arrangements to leave Montreal prior to the posting of the official final examination schedule.

BCom courses cannot have examinations scheduled during the last two weeks of term worth more than 10% of the final grade. You must repeat any grades of D or F in core courses or courses as part of a concentration, minor, major, or honours program. However, D is a passing grade for elective courses.

9.8.1.1 Supplemental Examinations

Supplemental examinations are not offered in undergraduate courses administered by the Desautels Faculty of Management. If you are required to improve your standing in a course, you must repeat the course in a subsequent term, completing all course requirements to the satisfaction of the instructor. Faculty policy does not allow you to do additional work to improve your standing in a course.

9.8.1.2 Deferred Examinations

For missed final examinations, whatever the reason may be, professors and students are not to make alternate arrangements. You must complete an Application for Deferred Final Exam through your Minerva account as well as provide supporting documentation to the BCom Office. This online application must be completed within five working days of the date of the exam, and the supporting documentation must be submitted to the BCom Office within this time frame as well. The BCom Office will then review the reasons for the exam having been missed and will either give you permission to write a deferred final exam, or not. If approved, you will write the final exam during the University’s official deferred exam period—specific dates in May (Fall terms) and August (Winter and Summer terms). It is up to you to verify the deferral schedule, which the Registrar makes up and administers.

9.8.2 Verification of Grades and Rereads

In accordance with the Charter of Student Rights, and subject to its stated conditions, you have the right to consult any written submission for which you have received a mark and the right to discuss this submission with the examiner.

In a case where you feel that an error has been made in arriving at the final grade, a Verification of Grade Application must be completed in the BCom Student Affairs Office, requesting the instructor to carry out a detailed check that all questions have been marked, and that the final grade has been computed correctly on the basis of the term work, final examination, etc. However, during the course of the term, any requests to have term work re-evaluated should initially be made directly to the instructor.

The Desautels Faculty of Management recognizes two types of rereads or reassessments:

- reread of coursework (term papers, mid-terms, assignments, quizzes, etc.);
- reread of a final exam.

In both cases, rather than recorrect the work and then grade it as they would have done themselves, reviewers assess the appropriateness of the original grade based, for example, on the application of the grading key to the student's work. If a grade is deemed unfair, it is changed, whether the new grade is higher or lower than the original, i.e., the reviewer's grade takes precedence over the original grade.

9.8.2.1 Reread of Coursework

You may apply to the BCom Student Affairs Office for rereads of written coursework. You are assessed a fee of $35.00 for such rereads. Requests for rereads involving group work require the consent of all members of the group, but only one reread fee will be assessed. It is strongly recommended that you consult with the instructor of the course before requesting a reread of coursework. Requests for rereads must be made within 10 working days of the date of return of the graded materials. Reassessments should normally be completed within 20 working days of the request.

9.8.2.2 Rereads of Final Exams

These rereads are administered by the BCom Student Affairs Office. You must apply in writing to the BCom Student Affairs Office by March 31 for courses in the Fall term and by September 30 for courses in the Winter or Summer terms (these deadlines are strictly enforced, and no requests will be accepted past them). You are assessed a fee of $35.00 for such rereads. It is strongly recommended, but not required, that you consult with the instructor of the course before requesting a reread of a final exam.

Reassessments and rereads in courses not in the Desautels Faculty of Management are subject to the deadlines, rules, and regulations of the relevant faculty.

9.8.3 Awards and Honorary Designations: Honours and First-Class Honours

Grading students registered in an honours program may be awarded Honours or First-Class Honours under the following conditions:

- For Honours, the CGPA at graduation must be at least 3.0 overall and in the specified courses of the program.
- For First-Class Honours, the CGPA at graduation must be at least 3.5 overall and in the specified courses of the program.

Students in an honours program whose GPA or CGPA is below 3.0, or who did not satisfy certain additional program requirements, must consult their student adviser to determine whether they are eligible to graduate in a program other than honours.
9.8.4 Awards and Honorary Designations: Distinction

For information on the designation of Distinction awarded at graduation, see Distinction in the University Regulations and Resources section of this publication.

9.8.5 Awards and Honorary Designations: Dean’s Honour List

For information on the designation of Dean’s Honour List awarded at graduation, see Dean’s Honour List in the University Regulations and Resources section of this publication.

9.8.6 Awards and Honorary Designations: Scholarships, Prizes, and Medals

Various scholarships, prizes, and medals are open to returning and graduating students. Full details can be found in the Undergraduate Scholarships and Awards Calendar available at www.mcgill.ca/students/courses/calendars. For information, see University Regulations and Resources > Scholarships and Student Aid.

As a registered student, you are automatically considered by the Undergraduate Scholarships Committee for each award for which you are eligible, with the following exceptions for in-course scholarships: James Hartt Schurman Memorial Award, Rio Tinto Alcan – Richard Evans International Exchange Award, Danny and Monica Gold Award for Academic Excellence, Hundredth Anniversary MUS Graduating Class of 2007 Scholarship, Sheila Wellington BMO Financial Group Awards, KPMG Scholarship, Commerce ‘55 Scholarships, Hyman Herbert Stein Award, Donald R. McRobie Award, Great-West Life & London Life Scholarship, Hugh Howson Memorial Prize, Dr. Alex Paterson Scholarship, Paul-Hervé Desrosiers Scholarship in Entrepreneurial Studies, Shirin Yeganegi Memorial Scholarship, HSBC Bank Canada Management Awards, Bruce and Jocelyn Pearson Scholarship, and RSM Richter Scholarship in Accounting. The Stephen S. Goldbloom Memorial Prize is the exception for a graduating student. For these, the Undergraduate Scholarships Committee welcomes applications and recommendations, substantiated by curriculum vitae, from individual students, student groups, and clubs. Such information should be forwarded to Heather McCombie in the BCom Student Affairs Office. A minimum of 27 graded credits must have been completed in the year to be eligible; 14 credits in one term.

#### 9.9.1.1 Minors/Minor Concentrations for Management Students

Although only the Mathematics and Statistics Minors are outlined in this section, a wide variety of programs are available as listed in the sections for the Faculties of Arts and Science. Popular choices include Anthropology, Canadian Studies, Computer Science, English – Literature, Environmental Studies, Geological Sciences, German, History, International Development, Political Science, Women’s Studies, etc. Students interested in the Minor in Economics must see an adviser in the BCom Student Affairs Office for Faculty approval.

It should be noted that a minimum of 18 credits of the Minor’s requirements must not overlap with any other part of the student’s program.

- Economics/Accounting
- Economics/Finance
- Investment Management

9.9.3 120-Credit Program, Freshman Course Distribution

Students admitted to a program requiring 97-120 credits (four years) register in a Freshman Year in which they must complete MATH 122 and MATH 123 (or equivalents) as well as the 12 credits of complementary courses specified below.

A minimum grade of C is required for all MATH and Freshman complementary courses.

Please note that you are responsible for ensuring that the prerequisites and corequisites of all courses (required and complementary) are satisfied.

The Freshman Course Distribution is as follows:

U0 Required Courses (12 credits)

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 122</td>
<td>3</td>
<td>Calculus for Management</td>
</tr>
<tr>
<td>MATH 123</td>
<td>3</td>
<td>Linear Algebra and Probability</td>
</tr>
<tr>
<td>BUSA 100</td>
<td>3</td>
<td>Introduction to Management</td>
</tr>
<tr>
<td>BUSA 250</td>
<td>3</td>
<td>Expressive Analysis for MGMT</td>
</tr>
</tbody>
</table>

U0 Complementary Courses (9 credits)

9 credits chosen from the following three categories, but no more than 6 credits may be taken in one category:

- C1. Society, Culture & Language
- C2. Critical Thinking & Analysis
- C3. Global Perspective & Environment
Course listings can be found at the Desautels Faculty of Management's website at:
www.mcgill.ca/desautels/bcom/program_info/program_structure/120_credit_program/approved.

Students pursuing a 9-credit language course would count 6 credits toward their C1 requirement, while the remaining 3 credits would be elective.

Courses chosen from the categories above need to be approved by the offering department. Any language courses offered through the Faculty of Arts may be taken, with approval from the appropriate department. Additional courses may be taken with approval of a faculty adviser.

U0 Elective Courses (9 credits)

Subject to the restrictions for non-Management electives

Program Footnote:

1. Students considering a major or minor in Mathematics, or an honours or joint honours program in Economics, replace MATH 122 and MATH 123 with three of the following courses, or demonstrate proficiency through appropriate McGill Placement Tests.
   - MATH 122 is replaced with MATH 139 (4) Calculus 1 with Precalculus, or MATH 140 (3) Calculus 1 and MATH 141 (4) Calculus 2.
   - MATH 123 is replaced with MATH 133 (3) Vectors, Matrices and Geometry.
   - 6 of these credits would be counted in the U0 Required Courses and the remaining 3 credits would count toward C2. Critical Thinking & Analysis.

   Note: Management students cannot receive credit for ARET 150, COMP 102, ECON 208, ECON 209, ECON 217, ECON 227, ECON 230, ECON 250, ECON257, MATH 112, MATH 203, or MATH 204 as elective courses.

9.9.4 Management Core

All BCom students take the 36-credit core curriculum set out below, except where modifications are specifically required by a major or honours program.

A grade of C or better is required for all core courses. If a D is obtained in a core course, the course must be repeated.

9.9.4.1 Core Course Distribution

Macroeconomic Policy
Introduction to Financial Accounting
Introduction to Organizational Behaviour
Business Statistics
Managerial Economics
Information Systems
Finance 1
Marketing Management 1
Social Context of Business
International Business
Organizational Policy
Operations Management

Program Footnotes:

1. Students considering a major concentration in Mathematics, a major concentration in Statistics, or a minor in Statistics are exempted from MGCR 271 by MATH 324. Students considering an honours or joint honours program in Economics replace MGCR 271 with ECON 257D1/ECON 257D2. Students entering the Major in Economics will only count the 3 credits of MGCR 271 in core.
2. Students entering an Economics program are exempted from MGCR 293 by either ECON 230D1/ECON 230D2 (for the Majors program) or ECON 250D1/ECON 250D2 (for the Honours program), and are exempted from ECON 295 in U2 by either ECON 330D1/ ECON 330D2 (for the Majors program) or ECON 352D1/ ECON 352D2 (for the Honours program) taken in U2.

Also note that:

- A maximum of 6 credits will be permitted within the BCom program for MGCR 293 and ECON 230D1/ECON 230D2 or ECON 250D1/ECON 250D2.
- A maximum of 6 credits will be permitted within the BCom program for ECON 295 and ECON 330D1/ECON 330D2 or ECON 352D1/ECON 352D2.
9.9.5 **Concentrations (General Management Major)**

In order to complete a concentration, students must achieve a grade of C or better in all the courses that comprise the concentration. Students who have failed to earn 15 satisfactory credits will be required to embark on a new concentration, repeat the course(s) in question or, where possible, replace the course(s) with a satisfactory substitution from the complementary courses of the concentration.

In general, students will begin taking courses from the chosen concentration(s) in the U2 year.

Academic mentors are appointed for each Management concentration to assist students in choosing a concentration and provide additional information regarding course selection.

**Second Concentration:**

Students who choose to take a second concentration will be required to complete 15 non-overlapping credits at a satisfactory level with a minimum grade of C in each course.

9.9.5.1 **Bachelor of Commerce (B.Com.) — Concentration in Accounting (15 credits)**

Mentor: Professor J. Scott

The Accounting concentration is designed to meet the needs of Management students who want to have a good basic understanding of accounting, but do not intend to become professional accountants or accounting specialists. It is primarily oriented toward users of financial information and emphasizes breadth of knowledge in a coherent selection of courses.

This concentration complements or forms part of the B.Com., General Management program. The individual courses in the concentration also act as service courses for other areas in the Faculty for their majors or concentrations.

9.9.5.2 **Bachelor of Commerce (B.Com.) – Concentration in Entrepreneurship (15 credits)**

Revision, August 2011. Start of revision.

Mentors: Professors A. Burlton, G. Vit

The Entrepreneurship concentration is concerned with the genesis and development of entrepreneurial activities. It deals with the integration of marketing, finance, organization, and policy in the development and expansion of business enterprise. Included are the evaluation of new business ventures, the role of acquisitions, and the strategic issues and operating problems at various stages of a firm’s existence from its beginnings to maturity.

9.9.5.3 Bachelor of Commerce (B.Com.) - Concentration in Finance (15 credits)

Mentors: Professors L. Barras, M. Bouvard, A. Malkhozov, S. Betermier

International Stream Mentor: A. Durnev

Case Competition Mentors: Professors M. Chaudhury, V. di Pietro

The Finance concentration has been designed to provide understanding of key concepts in finance theory, financial institutions, investment analysis, risk management, and applied techniques. Graduates find a strong demand among financial organizations, governments, and non-financial firms where they pursue careers that lead to positions such as Managing Partner, Treasurer, and V.P. Finance.
Bachelor of Commerce (B.Com.) — Concentration in Information Systems (15 credits)

The Information Systems (IS) concentration is flexible and represents an ideal complement to the majors and concentrations of other areas, as information technology (IT) has the capacity to transform and improve all functions of organizations in every economic sector. This concentration emphasizes the importance of the interrelationships across technology, management, and strategy. The objective is to prepare students to be effective planners, users, and managers of IT in the digital economy. It provides students with assets that award them a unique competitive advantage.

Students with an IS concentration are well positioned to participate in IT-driven changes that continue to affect knowledge work, business processes, organizational design, and the operation of markets and industries. Former graduates have secured jobs in consulting, IT management, business analysis, etc. in various industries, e.g., banking, healthcare, finance, education, government, etc.

Bachelor of Commerce (B.Com.) - Concentration in International Business (15 credits)

Mentors: Professors H. Etemad, M.S. Jo, E. Sarigöllü

The objective of the International Business Concentration is to help the student develop conceptual and analytical skills needed to formulate feasible and effective management policies in an international setting. With economic and business activity becoming increasingly internationalized, the program provides useful preparation for careers in a variety of internationally-oriented organizations, including local business firms involved in international trade, licensing, or financial arrangements; headquarters or subsidiaries of multinational companies; banks and other international financial institutions; and various governmental organizations.

9.9.5.6 Bachelor of Commerce (B.Com.) - Concentration in Labour-Management Relations and Human Resources (15 credits)

Mentor: Professor R. Hebdon

The objective of this concentration is to provide a general understanding of employer-employee relations and human resources, both at the micro-level and in relation to the socio-economic context in which they occur. Students interested in more intensive study of this area are urged to consider the Major program in Labour-Management Relations and Human Resources that is pending University approval.

Bachelor of Commerce (B.Com.) — Concentration in Marketing (15 credits)

Mentors: Professors M.S. Jo, A. Mukherjee

The Marketing concentration prepares the student for a wide variety of career opportunities. Marketing graduates historically have found employment in the fields of product management, advertising, sales management, marketing management, pricing, marketing research, distribution, and retailing. The Marketing concentration provides a balance between courses focusing on fundamental, theoretical, and "need to know" material, and courses with a strong practical and applied orientation.

Bachelor of Commerce (B.Com.) - Concentration in Operations Management (15 credits)

Mentors: Professors T. Boyaci, M. Gumus, S. Li, S. Ray, M. Yalovsky

Operations Management is concerned with the design, planning, control, coordination, and improvement of business processes, systems, and resources integral to the creation of the firm's products and services. Emphasizing quantitative analysis and cross-functional thinking, the Operations Management concentration provides training on traditional as well as emerging operations strategies, concepts, models, and techniques that are essential to any firm in today's competitive marketplace. Operations management graduates find career opportunities in a variety of industries and fields including consulting, manufacturing, distribution, retail, transportation, health care, and public sector, among others.

* If ORGB 429 is taken, only 3 credits will count toward the Concentration; the other 3 will be counted as electives.

9.9.5.10 Bachelor of Commerce (B.Com.) - Concentration in Strategic Management - Global Strategy (15 credits)

Revision, August 2011. Start of revision.

Mentors: Professors L. Chauvin, P. Perez-Aleman

There are two options offered in the Strategic Management Concentration: Global Strategy and Social Context.

The Global Strategy Option is intended for students who want to learn strategic management and analysis in the context of globalization. Globalization is no longer the concern of a few large enterprises and financial institutions; it has consequences that affect all kinds of businesses and the environments in which they operate - economic, social, political, and ecological. Global Strategy allows students to assess the various opportunities and threats inherent in globalization, and requires them to explore the consequences and implications of business decisions for society and the environment. It also enables them to think through the requirements of doing business in different economic and political systems. Finally, it offers them the opportunity to understand and analyze industry structures and the kinds of business opportunities they either create or destroy.

Complementary Courses

At least 9 credits selected from the following:

<table>
<thead>
<tr>
<th>Course Code</th>

</thead>
<tbody>
<tr>
<td>MGPO 383</td>
<td>3</td>
<td>International Business Policy</td>
</tr>
</tbody>
</table>
Mentors: Professors L. Chauvin, P. Perez-Aleman

There are two options offered in the Strategic Management Concentration: Global Strategy and Social Context.

The Social Context option is intended for students who want to learn strategic management and analysis with special attention to the not-for-profit or civil sectors, or who want to focus on broader or more complex social issues within the for-profit sector. The civil sector, made up of voluntary and non-governmental organizations and foundations, is the sector that has been the fastest growing employer for the past decade. Students who focus on this stream will be challenged to place a high priority on environmental issues, as well as issues of sustainability, corporate social responsibility, and social impact. They will also investigate the social tools and mechanisms necessary to employ cross-sectoral collaboration to achieve desired social outcomes.

**Complementary Courses**

At least 9 credits selected from the following:

- MGPO 365 (3) Business-Government Relations
- MGPO 440 (3) Strategies for Sustainability
- MGPO 450 (3) Ethics in Management
- MGPO 468 (3) Managing Organizational Politics
- MGPO 475 (3) Strategies for Developing Countries

The remaining credits to be chosen from:

- BUSA 391 (3) International Business Law
- MGPO 383 (3) International Business Policy
- MGPO 434 (3) Topics in Policy 1
- MGPO 445 (3) Industry Analysis & Competitive Strategy
- MGPO 460 (3) Managing Innovation
- MGPO 469 (3) Managing Globalization
- MGPO 470 (3) Strategy and Organization
- MGPO 567 (3) Business in Society
9.9.6 Minors for Management Students

The Minor programs offered in the Faculties of Arts and Science may be taken in conjunction with any BCom program.

Students doing a Minor program must have a Desautels Faculty of Management Minor Approval Form, listing the courses being applied to the Minor, signed by the Minor adviser in the relevant department.

For the Minor in Economics, students must complete 18 credits of material that does not overlap with Management course content. A maximum of 6 credits will be permitted within the BCom program for MGCR 293 and ECON 230D1/D2 or ECON 250D1/D2, and a maximum of 6 for ECON 295 and ECON 330D1/D2 or ECON 352D1/D2. Students interested in this Minor must obtain approval from the BCom Office.

The Minor in Mathematics and the Minor in Statistics are detailed in this publication. For all other Minors, please refer to Faculty of Arts and Faculty of Science sections of this publication. Students should begin the Minor in Mathematics or the Minor in Statistics no later than the second-to-last year and should immediately consult the appropriate adviser in the Department of Mathematics and Statistics.

Students planning to take the Minor in Statistics are advised to substitute MATH 324 for MGCR 271. That course will then count as 3 credits toward the Minor. If the decision to take a Minor program is made after MGCR 271 has been taken, students who wish to take MATH 324 will receive three additional credits; however, MATH 324 will only count toward the 18-credit Minor requirement. Students should check for overlap between Statistics courses with the BCom Student Affairs Office.

9.9.6.1 Bachelor of Commerce (B.Com.) - Minor Mathematics for Management Students (18 credits)

### 9.9.6.2 Bachelor of Commerce (B.Com.) - Minor Statistics for Management Students (21 credits)

Mentor: Professor A. Kelome, Department of Mathematics and Statistics, Faculty of Science

#### Program Prerequisites

- **MATH 133**: Linear Algebra and Geometry (3 credits)
- **MATH 140**: Calculus 1 (3 credits)
- **MATH 141**: Calculus 2 (4 credits)

or their equivalents

#### Required Courses (15 credits)

- **MATH 222**: Calculus 3 (3 credits)
- **MATH 223**: Linear Algebra (3 credits)
- **MATH 323**: Probability (3 credits)
- **MATH 324**: Statistics (3 credits)
- **MATH 423**: Regression and Analysis of Variance (3 credits)

* Credits for MATH 324 are counted in the Management core, where they replace MGCR 271. MATH 324 is a required course in the program and may be double-counted for this Minor.

#### Complementary Courses (6 credits)

6 credits selected from:

- **MATH 204****: Principles of Statistics 2 (3 credits)
- **MATH 447**: Introduction to Stochastic Processes (3 credits)
- **MATH 523**: Generalized Linear Models (4 credits)
- **MATH 524**: Nonparametric Statistics (4 credits)
- **MATH 525**: Sampling Theory and Applications (4 credits)
- **MGSC 575**: Applied Time Series Analysis Managerial Forecasting (3 credits)
- **MGSC 578**: Simulation of Management Systems (3 credits)

** Students should consult the rules for credit for Statistics courses in the course overlap section of this publication. In particular, MATH 204 cannot be taken for credit after credit for MATH 324 has been obtained.

### 9.9.7 Minors for Non-Management Students

The Desautels Faculty of Management has introduced four minors that allow undergraduates to develop a variety of managerial skills that will serve them throughout their chosen careers. The minors have limited enrolment. Applicants for the minors must have a minimum CGPA of 3.0. Although successful completion of the minimum requirements does not guarantee acceptance. All minors are 18 credits split between a fixed set of required courses and a choice amongst complementary courses. Students can only pursue one of the minors offered by the Desautels Faculty of Management. On an exceptional basis, students may be permitted a maximum of one Continuing Studies course for credit within their chosen Management minor. All minors for non-Management students require an application. The form may be found at [www.mcgill.ca/desautels/bcom/prospective_students/minors](http://www.mcgill.ca/desautels/bcom/prospective_students/minors); hard copies of application forms are also available in the BCom Student Affairs Office, Bronfman 110. Applications must be submitted to the BCom Student Affairs Office by January 30 and decisions will be made by February 15, whereby students will be informed via their McGill email addresses. Courses for minors must be passed with grades of C or better. Courses for minors cannot be taken under the Satisfactory/Unsatisfactory option.

#### 9.9.7.1 Minor Finance (For Non-Management Students) (18 credits)

The Minor Finance consists of 18 credits of Management courses and is offered to non-Management students in the Faculties of Arts, Engineering, and Science.

The Minor has been designed to provide students with an understanding of the key concepts in corporate finance as well as investment banking.
Required Courses (9 credits)

FINE 342 (3) Finance 2
FINE 441 (3) Investment Management
MGCR 341* (3) Finance 1

Complementary Courses (9 credits)

9 credits selected from:

FINE 442 (3) Capital Markets and Institutions
FINE 443 (3) Applied Corporate Finance
FINE 444 (3) Risk Management and Insurance
FINE 445 (3) Real Estate Finance
FINE 448 (3) Financial Derivatives
FINE 449 (3) Market Risk Models
FINE 451 (3) Fixed Income Analysis
FINE 480 (3) Global Investments
FINE 482 (3) International Finance 1
FINE 492 (3) International Finance 2
FINE 541 (3) Applied Investments
FINE 547 (3) Advanced Finance Seminar

or other appropriate 300- or 400-level FINE courses with the approval of the Program Adviser.

* Prerequisite: MGCR 271, Business Statistics, or another equivalent Statistics course approved by the Program Adviser.

Note: Students should select their Statistics course only after consulting the "Course Overlap" section in the Faculty of Arts, the "Course Overlap" section in the Faculty of Science, and the "Course Overlap" section in the Desautels Faculty of Management to avoid overlapping Statistics courses.

9.9.7.2 Minor Management (For Non-Management Students) (18 credits)

The Minor Management consists of 18 credits of Management courses and is currently offered to non-Management students in the following Faculties: Arts, Engineering, Science, Agricultural & Environmental Sciences, Music, Religious Studies, and Kinesiology.

This Minor is designed to provide non-management students with the opportunity to obtain basic knowledge in various aspects of management.

Complementary Courses (18 credits)

Selected from categories A, B, and C:

Category A

3 credits selected from:

MGCR 211 (3) Introduction to Financial Accounting
MGCR 341* (3) Finance 1

Category B

9 credits selected from:

MGCR 222 (3) Introduction to Organizational Behaviour
MGCR 271** (3) Business Statistics
MGCR 293*** (3) Managerial Economics
MGCR 331 (3) Information Systems
Minor in Management for Economics Students

This Minor is no longer available and has been replaced by the Minor in Management (For Non-Management Students).

Minor in Management for Engineering Students

This Minor is no longer available and has been replaced by the Minor in Management (For Non-Management Students).

Minor in Management for Science Students

This Minor is no longer available and has been replaced by the Minor in Management (For Non-Management Students).

Minor Marketing (For Non-Management Students) (18 credits)

The Minor Marketing consists of 18 credits of Management courses and is currently offered to non-Management students in the Faculties of Arts, Engineering, Science, and the Schulich School of Music.

This Minor is designed to provide students with an understanding of the fundamental concepts in marketing and a framework for applying marketing in a decision-making context. Students will be introduced to the basic concepts in marketing. The use of marketing theory and concepts for decision making will be covered. Marketing research methods for marketing decisions is introduced. Subsequently, students will be able to specialize by choosing from the list of complementary courses.

* Students who have taken an equivalent Statistics course in another faculty may not count those credits toward the Minor; an additional 3-credit complementary course must be chosen from the course list above.

Note: Students should select their Statistics course only after consulting the "Course Overlap" section in the Faculty of Arts, the "Course Overlap" section in the Faculty of Science, and the "Course Overlap" section in the Desautels Faculty of Management to avoid overlapping Statistics courses.

9.9.7.7 Minor Operations Management (For Non-Management Students) (18 credits)

Mentor: Professor V. Verter

The Minor Operations Management consists of 18 credits of Management courses and is currently offered to non-Management students in the Faculties of Arts, Engineering, Science, and Agricultural & Environmental Sciences.

It provides non-Management students with the opportunity to pursue a career that involves decision making at the operational level. Graduates will be able to find employment in consulting, manufacturing, supply chain, distribution, retail operations, healthcare management and environmental management for profit and non-profit corporations. This Minor has been designed to provide students with an understanding of the key concepts in operations management theory and practice.

or other appropriate 300- or 400-level MGSC courses with the approval of the Program Adviser.

* 3 credits of Statistics: Students who have taken an equivalent Statistics course in another faculty may not count those credits toward the Minor; an additional 3-credit complementary course must be chosen from the course list above.

Note: Students should select their Statistics course only after consulting the "Course Overlap" section in the Faculty of Arts, the "Course Overlap" section in the Faculty of Science, and the "Course Overlap" section in the Desautels Faculty of Management to avoid overlapping Statistics courses.

9.9.7.8 Minor in Technological Entrepreneurship for Engineering Students

Detailed information on this Minor can be found under Faculty of Engineering; see the Technological Entrepreneurship Minor section.
9.9.7.9  Minor in Technological Entrepreneurship for Science Students

Detailed information on this Minor can be found under Faculty of Science; see the Technological Entrepreneurship for Science Students section.

9.9.8  Majors

Because of the heavier demands of Major programs, students desiring to pursue a program of this type are advised to declare their intention at the beginning of the program. Only grades of C or better may count towards the Major requirements.

9.9.8.1  Bachelor of Commerce (B.Com.) — Major Accounting (30 credits)

Mentors: Professors L. Goldsman, R. Cecere

This 30-credit Major is designed to meet the increased demand for accounting options within the BCom program.

* 3 of the 6 credits for Microeconomic Theory exempt MGCR 293 in Core.
** 3 of the 6 credits for Macroeconomic Theory exempt ECON 295 in Core.
*** 3 of the 3 credits for MGCR 271 will count in Core.

Complementary Courses (18 credits)
Selected from other 200-, 300-, and 400-level courses in Economics (ECON), excluding courses with numbers below 210. At least 6 of these 18 credits should be taken from courses with 400-level numbers. No more than 6 of the 18 credits may be taken at the 200 level.

9.9.8.3 Bachelor of Commerce (B.Com.) - Major Finance (30 credits)
Mentors: Professors L. Barras, M. Bouvard, A. Malkhozov, S. Betermier
International Stream Mentor: A. Durnev
Case Competition Mentors: Professors M. Chaudhury, V. di Pietro
The 30-credit Finance Major has been designed to meet the increasing demand for expertise in this rapidly growing functional area of business. This major is designed to provide in-depth knowledge of finance theory, financial institutions, investment analysis, risk management, and applied techniques. Employment for graduates is most often obtained in investment and commercial banking, manufacturing and service firms, non-profit organizations and governments, and non-financial firms.

Required Courses (15 credits)
FINE 342 (3) Finance 2
FINE 441 (3) Investment Management
FINE 443 (3) Applied Corporate Finance
FINE 448 (3) Financial Derivatives
FINE 482 (3) International Finance 1

Complementary Courses (15 credits)
At least 9 credits from:
FINE 434 (3) Topics in Finance 1
FINE 442 (3) Capital Markets and Institutions
FINE 449 (3) Market Risk Models
FINE 451 (3) Fixed Income Analysis
FINE 480 (3) Global Investments
FINE 492 (3) International Finance 2
FINE 541D1 (1.5) Applied Investments
FINE 541D2 (1.5) Applied Investments
FINE 547 (3) Advanced Finance Seminar

The remainder, if any, from:
ACCT 351 (3) Intermediate Financial Accounting 1
ACCT 352 (3) Intermediate Financial Accounting 2
ACCT 354 (3) Financial Statement Analysis
ACCT 385 (3) Principles of Taxation
9.9.8.4 Bachelor of Commerce (B.Com.) — Major Information Systems (30 credits)

This 30-credit Major prepares students for the multitude of IT-related career opportunities available in industry. It employs a blend of theoretical concepts, hands-on tools, and actual case studies to train students to identify business problems and opportunities, analyze business processes, and develop and implement information systems to support them. The IS Major covers a variety of topics including strategic planning and investment in information technologies, analysis, design, and deployment of information systems, understanding the opportunities and challenges of web-based businesses, and managing resistance to IT-initiated changes in organizations.

Graduates of this program may expect to find employment as business or systems analysts, consultants, IS quality assurance specialists, and project managers in diverse industries, including banking, insurance, manufacturing, retailing, and consulting.

9.9.8.5 Bachelor of Commerce (B.Com.) - Major International Management (48 credits)

The Major in International Management (MIM), 42-48 credits, is designed for students who wish to combine business studies with regional or thematic global studies and foreign language proficiency. MIM will acquaint students with the impact of managing in one of three themes:

1) Comparative Global Studies
2) Global Politics and Economy
3) Global Well-Being and Development

This Major is interdisciplinary and integrative and includes a business component: 15-credit International Business concentration; an Area of Study component: 27- to 33-credit Interdisciplinary Area of Specialization that includes an 18-credit Minor concentration outside the Management Faculty, 9-12 credits of language courses, and an experiential learning experience in the form of either exchange, internship or research.

Graduates will be well-suited to manage in culturally diverse environments, to work in a specific area of the world, or in a wide range of global positions in business, government, multilateral organizations, or NGOs.

International Business Concentration Component (15 credits)

Students are required to take the following 3-credit course:

Area of Study Component (18 credits)

Students choose either one minor concentration or courses from the selected list of courses from one of the three themes below:

Theme 1: Comparative Global Studies
Students can choose to study a region including Africa, East Asia, Middle East, South Asia, Europe, or the Americas, or several regions from a comparative global perspective in Religious Studies, Political Science, History, or Economics. This option focuses on aspects of global society and culture from a social science perspective. This theme is suitable for students who would like to work in a specific country or region or for students who want to work for a multinational company or government organization with global interests.

- B.A. Minor Concentration in African Studies (18 credits)
- B.A. Minor Concentration in Canadian Studies (18 credits)
- B.A. Minor Concentration in Comparative Politics (18 credits)
- B.A. Minor Concentration in East Asian Cultural Studies (18 credits)
- B.A. Minor Concentration in Economics* (18 credits)
- B.A. Minor Concentration in History (18 credits)
- B.A. Minor Concentration in Islamic Studies (18 credits)
- B.A. Minor Concentration in Jewish Studies (18 credits)
- B.A. Minor Concentration in Middle East Studies (18 credits)
- B.A. Minor Concentration in North American Studies (18 credits)
- B.A. Minor Concentration in Quebec Studies (18 credits)
- B.A. Minor Concentration in Russian Culture (18 credits)
- B.A. Minor Concentration in South Asia (18 credits)
- B.A. Minor Concentration in World Religions (18 credits)
* Students should choose Economics (ECON) courses with a regional focus. Course numbers above ECON 209 (excluding ECON 295) are required, with at least 6 credits at the 300, 400, or 500 levels. Credits for the introductory sequence MGCR 293 and ECON 295 that are prerequisites for 300-level courses in economics do not count as part of this Minor concentration. ECON 227 will not count if it is taken to meet other B.Com. requirements.

**Theme 2: Global Politics and Economy**

This theme focuses on aspects of public policy from the perspective of global transactions and finance. Students may select a minor concentration in the area of international relations and investigate policy on a global scale and its operations in the context of policy, war and peace, the economy, security, trade, human rights, and international organizations. Graduates with this option would be poised to apply their educational background to careers with world government, trade, or economic organizations, NGOs, national governments, or businesses with global interests. The choices of programs include Economics, Geography, Political Science, or a selected group of courses.

- B.A. Minor Concentration in Economics (18 credits)
- B.A. Minor Concentration in International Relations (18 credits)
- B.A. Minor Concentration in Political Economy (18 credits)
- B.A. Minor Concentration in Political Science (18 credits)
- B.A. Minor Concentration in Politics, Law and Society (18 credits)
- B.A. Minor Concentration in Political Theory (18 credits)

OR

**Global Governance, Conflict and Human Rights Concentration**

18 credits of the following courses with at least 6 credits at the 300 level or above:

- ANTH 212 (3) Anthropology of Development
- ANTH 214 (3) Violence, Warfare, Culture
- ANTH 222 (3) Legal Anthropology
- ANTH 333 (3) Class and Ethnicity
- CANS 307 (3) Canada in the World
- CANS 412 (3) Canada and Americas Seminar
- COMS 230 (3) Communication and Democracy
- COMS 320 (3) Media and Empire
- HIST 221 (3) United States since 1865
- HIST 302 (3) International Relations History 1: 1750-1950
- HIST 304 (3) International Relations History 2: Cold War
- HIST 339 (3) Arab-Israeli Conflict
- HIST 371 (3) American Civil Rights 1877-1940
- HIST 387 (3) The First World War
- HIST 388 (3) The Second World War
- HIST 438 (3) Topics in Cold War History
- JWST 240 (3) The Holocaust
- PHIL 237 (3) Contemporary Moral Issues
- PHIL 334 (3) Ethical Theory
- POLI 212 (3) Government and Politics - Developed World
- POLI 244 (3) International Politics: State Behaviour
- POLI 322 (3) Political Change in South Asia
- POLI 345 (3) International Organizations
- POLI 351 (3) The Causes of Major Wars
- POLI 360 (3) Security: War and Peace
- POLI 440 (3) Civil-Military Relations
- POLI 450 (3) Peacebuilding
RELG 370 (3)  Religion and Human Rights
RELG 371 (3)  Ethics of Violence/Non-Violence
SOCI 210 (3)  Sociological Perspectives
SOCI 230 (3)  Sociology of Ethnic Relations
SOCI 265 (3)  War, States and Social Change
SOCI 307 (3)  Sociology of Globalization
SOCI 386 (3)  Contemporary Social Movements
SOCI 511 (3)  Movements/Collective Action

Theme 3: Global Well-Being and Development

Broad-based, interdisciplinary topics will allow students to study current issues of social importance ranging from: poverty and inequality, health promotion and the environment, sustainability, and natural resource management. Students will be prepared to apply business practices to the protection of the vulnerable and the planet. Students will be poised to work for multinationals, governments, or non-governmental organizations.

B.A. Minor Concentration in Anthropology (18 credits)
B.A. Minor Concentration in Economics* (18 credits)
B.A. Minor Concentration in Geography (18 credits)
B.A. Minor Concentration in International Development Studies (18 credits)
B.A. Minor Concentration in Psychology (18 credits)
B.A. Minor Concentration in Social Studies of Medicine (18 credits)
B.A. Minor Concentration in Sociology (18 credits)
B.A. Minor Concentration in Environment: McGill School of Environment (18 credits)
B.Sc. Minor Concentration in Environment: McGill School of Environment (18 credits)
B.Sc. Field Study Minor (18 credits)

* Students should choose Economics (ECON) courses related to the environment, development, and health. Course numbers above ECON 209 (excluding ECON 295) are required, with at least 6 credits at the 300, 400, or 500 levels. Credits for the introductory sequence MGCR 293 and ECON 295 that are prerequisites for 300-level courses in economics do not count as part of this Minor Concentration. ECON 227 will not count if it is taken to meet other B.Com. requirements.

Language Component (9-12 credits)

9 credits of language in First- or Second-Level EAST (Asian Languages and Literature)*
or
9 credits of ISLA 521D1/D2 Introductory Arabic**

* Students may choose to complete additional credits in Japanese, Chinese or Korean for a total of 18 credits. Only 9 credits of EAST languages will count toward the Major and any optional additional credits will count as electives or toward another component if the student has sufficient credits to complete it within their degree. Students may not exceed the total credits required to graduate in order to complete these additional language credits.

** Students with no prior knowledge of Arabic may choose two levels of Arabic. Only ISLA 521 will count toward the Major and any additional optional credits in ISLA 522 or 523 will count as electives.

OR

12 credits of language courses, at the 500 level or lower, chosen from ONE of the following Subject Codes:
CLAS (Classics) [Modern Greek]
EAST (East Asian) - Third and Fourth Level
FREN (French)
FRSL (French as a Second Language)
GERM (German Studies) [German]
HISP (Hispanic Studies) [Spanish, Portuguese]
***ISLA (Middle East Studies) [Lower and Higher Intermediate Level Arabic, Turkish, Urdu, Persian]
****ITAL (Italian Studies) [Italian]
JWST (Jewish Studies) [Hebrew, Yiddish]
Students placed in Lower Intermediate Arabic will complete ISLA 522D1/D2 and ISLA 523D1/D2 for a total of 12 credits.

Students wishing to register for ITAL 205 should do so in their first year as this course is open only to U0 and U1 students. ITAL 206 is open to U0, U1, and U2 students. ITAL 210, ITAL 215, and ITAL 216 can be taken by all students.

Note: Registration processes for language courses vary by department, but usually involve placement tests or departmental approval. Students should consult with the individual departments to ensure that they register for the appropriate level.

**Experiential Learning Component (0-3 credits)**

**International Exchange Component**

Students complete at least one term of exchange or an international educational experience approved by the BCom SAO. Credits received for courses successfully completed while abroad will count towards other components of the Major in International Management as determined by the program/exchange adviser.

OR

**Internship Component**

Students may complete a 3-credit internship as part of their experiential credit. The internship will consist of a minimum of 150 hours of work over a period of 8-12 weeks at an approved host institution. The institution should be located either overseas or have an international focus. Major in International Management students who are enrolled in minor concentrations in the Faculty of Arts may choose to complete internship courses in the Faculty of Arts. Please see "Faculty of Arts Internship Program" or refer to the Arts Internships website for requirements, including hours and weeks required and CGPA cut-offs.

BUSA 497 (3) Internship in International Business

OR

**Research Component**

BUSA 401 (3) Independent Studies in International Business

NOTE: There are CGPA requirements for exchanges and internship courses. Students without the minimum CGPA requirement must consult the Major in International Management Adviser in the BCom office to arrange for an alternative.

**Bachelor of Commerce (B.Com.) - Major Labour-Management Relations and Human Resources (30 credits)**

**Revision, August 2011. Start of revision.**

Mentor: Professor R. Hebdon

This 30-credit Major provides students with a general understanding of employer-employee relations and human resources, including labour unions, laws that regulate the employment relationship, and human resource policies and practices. Students acquire knowledge in various required aspects of labour relations, labour markets, and human resources. The program provides flexibility for students to take a wide range of courses related to the required topics in the disciplines of law, organization behaviour, sociology, economics, and industrial relations.

**Required Courses (12 credits)**

INDR 294 (3) Introduction to Labour-Management Relations

INDR 494 (3) Labour Law

INDR 496 (3) Collective Bargaining

ORGB 423 (3) Human Resources Management

**Complementary Courses (18 credits)**

Selected from:

ECON 306 (3) Labour Markets and Wages

INDR 449 (3) Occupational Health and Safety

INDR 459 (3) International Employment Relations

INDR 492 (3) Globalization and Labour Policy
Revision, August 2011. End of revision.

9.9.8.7 Bachelor of Commerce (B.Com.) — Major Marketing (30 credits)

Mentors: Professors M.S. Jo, A. Mukherjee

This 30-credit Major is designed to provide students with a strong background in marketing to prepare them for the wide variety of marketing careers available. The Major is most appropriate for those students seeking a career in brand management, small business marketing, selling and sales management, and business-to-business marketing.

Required Courses (15 credits)

- MRKT 354 (3) Marketing Management 2
- MRKT 357 (3) Marketing Planning 1
- MRKT 451 (3) Marketing Research
- MRKT 452 (3) Consumer Behaviour
- MRKT 453 (3) Advertising Management

Complementary Courses (15 credits)

Five courses selected from:

- BUSA 464 (3) Management of Small Enterprises
- MRKT 351 (3) Marketing and Society
- MRKT 355 (3) Services Marketing
- MRKT 365 (3) New Products
- MRKT 438 (3) Brand Management
- MRKT 455 (3) Sales Management
- MRKT 456 (3) Business to Business Marketing
- MRKT 459 (3) Retail Management
- MRKT 461 (3) Advertising Practicum
- MRKT 483 (3) International Marketing Management
- MRKT 557 (3) Marketing Productivity

9.9.8.8 Bachelor of Commerce (B.Com.) - Major Concentration Mathematics for Management Students (39 credits)

Mentor: Professor A. Hundemer; Department of Mathematics and Statistics, Faculty of Science

This program is comprised of 39 credits.
Students entering the Major Concentration in Mathematics are normally expected to have completed MATH 133, MATH 140, and MATH 141 or their equivalents. Otherwise, they will be required to make up any deficiencies in these courses over and above the 39 credits required by the program.

**Required Courses (30 credits)**

** MATH 204 cannot be taken for credit after credit for MATH 324 has been obtained. The two courses can be taken concurrently. Students should consult the rules for credit for Statistics courses in the Course Overlap section.

*** MGSC 372 and MATH 423 cannot both be taken for program credit.

**9.9.8.9 Bachelor of Commerce (B.Com.) - Major Psychology for Management Students (30 credits)**

Mentor: Professor H. Vough

This Major is comprised of 30 credits, of which 24 are taken in Psychology and 6 are taken in Management.

The Desautels Faculty of Management, in collaboration with the Psychology Department, Faculty of Science, offers programs of study in organizational and consumer psychology leading to the B.Com. degree. These programs concentrate on providing an education in the fundamentals of experimental and social psychology. In view of rapid changes in practical methods and professional techniques employed by managers and professional consultants, broad training in such fundamentals is seen as excellent preparation for graduate school in psychology and management as well as for a successful managerial career.

9.9.8.10 Bachelor of Commerce (B.Com.) - Major Concentration Statistics for Management Students (39 credits)

Mentor: Professor R. Steele; Department of Mathematics and Statistics, Faculty of Science

This program is comprised of 39 credits.

Students entering the Major concentration in Statistics are normally expected to have completed MATH 133, MATH 140, and MATH 141 or their equivalents. Otherwise they will be required to make up any deficiencies in these courses over and above the 39 credits required by the program.

Required Courses (27 credits)

- MATH 222 (3) Calculus 3
- MATH 223 (3) Linear Algebra
- MATH 242 (3) Analysis 1
- MATH 243 (3) Analysis 2
- MATH 314 (3) Advanced Calculus
- MATH 323 (3) Probability
- MATH 324* (3) Statistics
- MATH 423 (3) Regression and Analysis of Variance
- MGSC 373 (3) Operations Research 1

* Credits for MATH 324 are counted toward Management Core, where they replace MGCR 271.

Complementary Courses (12 credits)

6 credits selected from:

- MGSC 479 (3) Applied Optimization
- MGSC 575 (3) Applied Time Series Analysis Managerial Forecasting
- MGSC 578 (3) Simulation of Management Systems

6 credits selected from:

- MATH 204** (3) Principles of Statistics 2
- MATH 315 (3) Ordinary Differential Equations
- MATH 340 (3) Discrete Structures 2
- MATH 410 (3) Majors Project
- MATH 447 (3) Introduction to Stochastic Processes
- MATH 523 (4) Generalized Linear Models
- MATH 524 (4) Nonparametric Statistics
- MATH 525 (4) Sampling Theory and Applications

** MATH 204 cannot be taken for credit after credit for MATH 324 has been obtained. The two courses can be taken concurrently. Students should consult the rules for credit for Statistics courses in the course overlap section.
9.9.9 Honours

An Honours program is available in Economics and in Investment Management. Joint Honours programs are available in Economics and Accounting and in Economics and Finance.

The difference between the Honours and Major programs is not one of quantity but rather of quality, the Honours program involving study in greater depth. Students normally register for the Honours programs in U1 but special arrangements may be made for students wishing to enter the program at the beginning of U2.

Graduation with an Honours standing normally requires a minimum CGPA of 3.00 and an average of 3.00 in the specified courses of the Honours programs, although academic units may set higher requirements for their program GPA. The minimum grade acceptable in an Honours course is B-, although academic units may set a higher requirement for grades in their program.

Honours students who satisfy the 6-credit Statistics requirement by taking MGCR 271 and MGSC 372 (or ECON 227D1 & D2) must complete ECON 468 and ECON 469 to fulfill the program requirements in Economics for the following programs: Honours in Economics for Management Students, Joint Honours in Economics and Accounting, and Joint Honours in Economics and Finance.

9.9.9.1 Bachelor of Commerce (B.Com.) - Honours Economics (42 credits)

Mentors in Economics: Professors M. Sinitsyn, E. Strumpf, and J-M Dufour; Department of Economics, Faculty of Arts

This program is comprised of 42 credits of Honours Economics courses (9 credits of which are counted as core credits). Graduation with an Honours standing requires a minimum CGPA of 3.00 and a minimum program GPA of 3.00.

Calculus 1 and 2 are required for entering this Honours program. Please see section “120-credit program, Freshman course distribution” for a detailed explanation regarding Calculus 1 and 2. It is also important to check on its Statistics requirements, which are listed on the Department's website at: http://www.mcgill.ca/economics.

Required Courses (27 credits)

and 12 credits of Economics courses at the 300, 400, or 500 level, approved by an Honours adviser. Normally at least 9 of the 12 will be at the 400 or 500 level.

Note: Honours students are not permitted to register for general Economics courses where an Honours course in the same field is offered.

9.9.9.2 Bachelor of Commerce (B.Com.) - Honours Investment Management (45 credits)

Mentors: Professors J. Ericsson and K. Lester
The B.Com. Honours Investment Management prepares students for a career in financial asset management, either on the buy side working with active portfolio allocation or on the sell-side, working for brokerage firms. The program gives students a rigorous training in accounting, statistics, and finance. The program enables students to analyze financial statements, perform company valuations, construct efficient portfolios with appropriate risk profiles, and manage risk using dynamic trading strategies and derivative instruments.

Students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.0. A grade of B- or better must be achieved in all courses counted toward this program. Students who do not satisfy all the requirements of the Honours program may still receive a Major in Finance.

The B.Com. Honours Investment Management is a limited enrolment program and is by application only for students entering their U2 year. For admission requirements, please refer to the website or contact the BCom Student Affairs Office.

### 9.9.9.3 Bachelor of Commerce (B.Com.) - Joint Honours Economics and Accounting (54 credits)

Mentor in Accounting: Professor P. Levy

Mentor in Economics: Professors M. Sinitsyn, E. Strumpf and J-M Dufour; Department of Economics, Faculty of Arts

Please consult the Economics Department website.

The B.Com. Joint Honours in Economics and Accounting requires the completion of 30 specified credits of Honours courses listed in the Economics Honours Program (9 credits of which are counted as core credits) and 24 specified credits for Accounting. This program is designed to take advantage of both McGill's Accounting and Economics course offerings to produce a student who is well trained in these two complementary areas.

Calculus 1 and 2 are required for entering this Honours program. Please consult the "120-credit program, Freshman course distribution" section for a detailed explanation regarding Calculus 1 and 2. It is also important to check on its statistics requirements, which are listed on the Department's website.

To earn the Joint Honours in Economics and Accounting designation, students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00. Students must achieve a grade of B- or better in all Accounting courses.

10 Schulich School of Music

10.1 About the Faculty

McGill’s Schulich School of Music is the largest university-based school for professional musical training and music research in Canada. Founded as the Conservatorium of Music in 1904, and incorporated as a Faculty in 1920, the School moved to its current location in the impressive and historic Strathcona Music Building (formerly the main section of Royal Victoria College) in 1972. During the 2004–2005 centennial season, the School added a new eight-storey building that contains the Marvin Duchow Music Library, Tanna Schulich Hall, CIRMMT (the Centre for Interdisciplinary Research in Music Media and Technology), the MMR (Multimedia Room), the Wirth Opera Studio and administrative offices.

McGill’s Schulich School of Music is renowned for its orchestral, choral, opera, jazz, chamber, contemporary, and early music programs, and for its award-winning creative and research work in composition, music theory, musicology, music education, sound recording, and music technology. Pollack Hall (capacity: 600), Redpath Hall (capacity: 300 and housing the University organ) and Tanna Schulich Hall (capacity: 187) are among the busiest and best concert venues in Montreal. The intimate Clara Lichtenstein Hall (capacity: 80) is scheduled for renovation in the summer of 2011. In addition, facilities include the Wirth Opera Studio (an opera rehearsal room), and the Multimedia Complex Suite, including the Multimedia Room (a scoring stage/acoustical research lab), three isolation booths, a small recording studio, and three control rooms of different sizes. The three floors of the Marvin Duchow Music Library contain well over 100,000 scores, recordings, books, and periodicals; in addition, the Gertrude Whitley Performance Library has performing parts for over 6,000 titles.

Both old and new buildings house labs for numerous specialized functions: digital composition and electronic music, music education research, multi-channel sound recording, music perception and cognition, sound processing and control, computational modeling, and more. There are state-of-the-art classrooms, teaching studios, and over 100 practice rooms. The Centre for Interdisciplinary Research in Music Media and Technology (CIRMMT) is an inter-faculty, inter-university, international consortium of scholars that brings together researchers in music, sound recording, music technology, psychology, neuroscience, engineering, and medicine.

Current student enrolment is approximately 550 at the undergraduate level and approximately 250 at the graduate level. Teaching staff includes 60 full-time and over 140 part-time members. Students, faculty, and staff play major roles in Montreal’s vibrant cultural scene, presenting over 700 concerts and events annually, as well as master classes, lectures, and symposia, all enhanced by active music student societies, a gig office, and stellar administrative and support staff.

10.2 History of the Faculty

Founded as the Conservatorium of Music in 1904, and incorporated as a Faculty in 1920, the School moved to its current location in the impressive and historic Strathcona Music Building (formerly the main section of Royal Victoria College) in 1972. It was renamed the Schulich School of Music in 2005 in honour of benefactor Seymour Schulich. During the 2004–2005 centennial season, the School added a new eight-storey building that houses the Marvin Duchow Music Library, the Gertrude Whitley Performance Library, Tanna Schulich Hall, CIRMMT (the Centre for Interdisciplinary Research in Music Media and Technology), the MMR (Multimedia Room), the Wirth Opera Studio, and administrative offices.

10.3 Academic Staff

10.3.1 Department of Music Research

Chair
Whitesell, Lloyd; B.A.(Minn.), M.A., Ph.D.(SUNY, Stony Brook); Associate Professor; History and Literature

10.3.2 Composition Area

Bouliane, Denys; B.Mus., M.Mus.(Laval), Graduate, Hochschule für Musik(Hamburg); Associate Professor; Composition, Orchestration
Cherney, Brian; B.Mus., M.Mus., Ph.D.(Tor.); Professor; Composition, Theory and Analysis, History and Literature
Ferguson, Sean; B.Mus.(Alta.), M.Mus., D.Mus.(McG.); Associate Professor; Composition; Director, CIRMMT; Director, Digital Composition Studios
Harman, Chris; Assistant Professor; Composition Area Chair; Composition
Hui, Melissa; B.Mus.(Br. Col.), M.F.A.(Calif. Inst. of Arts), D.M.A./M.M.A.(Yale); Associate Professor; Composition
Lesage, Jean; Concours, Diplôme d'études supérieures(Conservatoire de Montréal); Assistant Professor; Composition
Rea, John; B.Mus.(Wayne), M.Mus.(Tor.), M.F.A., Ph.D.(Princ.); Professor; Composition, Theory and Analysis

10.3.3 Music Education Area

Cossette, Isabelle; Premier Prix(Conservatoire de Québ.); M.Mus.(McG.), D.Mus.(Montr.); Assistant Professor; Music Education
Lorenzino, Lisa; B.Mus.(Tor.), B.Ed.(Sask.), M.A.(McG.); Faculty Lecturer; Music Education Area Chair; Music Education
Wapnick, Joel; B.A.(NYU), M.A.(SUNY), M.F.A.(Sarah L.), Ed.D.(Syrac.); Professor; Director, Music Education Research Lab; General Music Techniques

10.3.4 Music Theory Area

Biamonte, Nicole; B.F.A.(SUNY Purchase), Ph.D., M.Phil.(Yale); Assistant Professor; Theory and Analysis
Caplin, William; B.M.(USC), M.A., Ph.D.(Chic.); Professor; Theory and Analysis (James McGill Professor)
Daley, René; B.Mus.(Lawrence), M.A., M.Mus.(Mannes), Ph.D.(Mich.); Assistant Professor; Theory Area Chair; Theory and Analysis
Neidhöfer, Christoph; Graduate, Hochschule für Musik(Basel), Ph.D.(Harv.); Associate Professor; Theory and Analysis, Composition
Schubert, Peter; B.A., M.A., Ph.D.(Col.); Associate Professor; Theory and Analysis
Wild, Jonathan; B.Mus., M.A.(McG.), Ph.D.(Harv.); Assistant Professor; Theory and Analysis, Composition

10.3.5 Music Technology Area

Depalle, Philippe; B.Sc.(Paris XI & ENS Cachan), D.E.A.(Le Mans & ENS Cachan), Ph.D.(Le Mans & IRCAM); Associate Professor; Music Technology
Fujinaga, Ichiro; B.Mus., B.Sc.(Alta.), M.A., Ph.D.(McG.); Associate Professor; Music Technology Area Chair; Music Technology
McAdams, Stephen; B.Sc.(McG.), Ph.D.(Stan.), D.Sc.(Paris); Professor; Music Technology (Canada Research Chair)
Mulder, Axel; Drs. (Rijks Universiteit Groningen), Ph.D. (S. Fraser); Adjunct Professor
Scavone, Gary; B.A., B.S.(Syrac.), M.S., Ph.D.(Stan.); Associate Professor; Music Technology
Verge, Marc-Pierre; B.A., M.Sc. (Laval), Ph.D. (Eindhoven); Adjunct Professor
Wanderley, Marcelo; B.Eng.(UFPR), M.Eng.(UFSC), Ph.D.(Paris VI & IRCAM); Associate Professor; Music Technology, Gestural Control of Sound Synthesis

10.3.6 Musicianship Area

Asly, Monica; B.Mus.(McG.); Faculty Lecturer; Musicianship
Davidson, Thomas; B.Mus.(Qu.), M.Mus.(McG.), Cert. of Advanced Study(R.C.M., Lond.), A.R.C.M., L.T.C.L.; Assistant Professor; Musicianship Area Chair; Musicianship, Piano; Keyboard Proficiency Coordinator
Mariner, Justin; M.Mus., D.Mus.(McG.); Assistant Professor; Musicianship

10.3.7 Musicology Area

Barg, Lisa; B.A.(Antioch), M.A., Ph.D.(SUNY, Stony Brook); Assistant Professor; History and Literature
### 10.3.8 Sound Recording Area

### 10.3.10 Department of Performance

| Chair                  | Lesage, Jean; Concours, Diplôme d'études supérieures(Conservatoire de Montréal); Assistant Professor; Composition |

### 10.3.11 Brass Area

| French Horn            | Derome, Denys; L.Mus. (McG.); Montreal Symphony Orchestra; Instructor |
|                       | Gaudreault, Jean; L.L.L. (Montr.). Graduate, Conservatoire de musique de Québec; Montreal Symphony Orchestra; Assistant Professor |
|                       | Zirbel, John; B.Mus. (Wisc.); Principal Horn, Montreal Symphony Orchestra; Associate Professor |
Trumpet

Carroll, Edward; B.Mus., M.Mus.(Juilliard); Associate Professor
DeVuyst, Russell; B.Mus.Ed.(Boston Cons.), M.M.(New England Cons.); Assistant Professor; Associate Principal Trumpet, Montreal Symphony Orchestra; Assistant Professor
Dunn, Andrew; PCRAM, LRAM, PG Dip GSMD, M.A. (TVU); Assistant Professor; Brass Area Chair
Merkelo, Paul; B.Mus.(Eastman); Principal Trumpet, Montreal Symphony Orchestra; Instructor

Trombone

Box, James; M.M.(S. Methodist), M.M.(Cleveland Inst. Music); Principal Trombone, Montreal Symphony Orchestra; Assistant Professor
Dix, Trevor; M.Mus.(McG.); Instructor
Lee, Vivian; Montreal Symphony Orchestra; Instructor
Martin, David; Montreal Symphony Orchestra; Instructor

Tuba/Euphonium

Cazes, Alain; Premier Prix(Conservatoire de Montréal); Associate Professor
Johnson, Sasha; Instructor
Miller, Dennis; Principal Tuba, Montreal Symphony Orchestra; Associate Professor

10.3.12 Early Music Area

Beghin, Tom; Diplôme Supérieur(Louvain), M.A., D.M.A.(C'nell); Associate Professor; Fortepiano
Bergeron, Sylvain; B.Mus.(Laval); Instructor; Lute
Grew, John; L.T.C.L.(Lond.), B.Mus.(Mt. All.), M.Mus.(Mich.), D.D.(United Theological Coll.), LL.D.(Mt. All.); University Organist; Professor; Organ Area Chair; Organ, Harpsichord
Guimond, Claire; B.Mus.(McG.); Instructor; Baroque Flute
Haynes, Bruce; Ph.D. (Montr.); Adjunct Professor; Baroque Oboe
Jennejohn, Matthew; B.A.(Sask.), B.Mus.(Br. Col.); Instructor; Baroque Oboe
Kinslow, Valerie; B.A.(McG.); Assistant Professor; Early Music, Voice
Kirk, Douglas; B.S., B.A.Mus. Hons.(Iowa), M.M.(Texas-Austin), Ph.D.(McG.); Instructor; Cornetto
Knox, Hank; B.Mus., M.Mus.(McG.); Associate Professor; Continuo, Harpsichord (William Dawson Scholar); Early Music and Harpsichord Area Chair
Lortie, Dominique; Instructor; Sackbut
Lussier, Mathieu; Instructor; Baroque Bassoon
MacMillan, Betsy; B.Mus.(W. Ont.), M.Mus.(McG.); Instructor; Viola da Gamba
Maute, Matthias; Instructor; Recorder
Michaud, Nathalie; B.A.(Ott.), Cert. of Interpretation(The Hague), M.A.(Montr.); Instructor; Recorder
Napper, Suzie; Instructor; Baroque Cello
Plouffe, Hélène; Instructor; Baroque Viola; Baroque Violin
Rémillard, Chantal; B.Mus.(Montr.); Instructor; Baroque Violin
Simons, Mark; B. Mus. (McG.); Instructor; Early Clarinet

10.3.13 Ensembles

Guest Conductors; Contemporary Music Ensemble
Cazes, Alain; Premier Prix(Conservatoire de Montréal); Associate Professor; Wind Symphony, Wind Orchestra
10.3.14  Jazz Area

**Jazz Bass**
- Hollins, Fraser; Instructor
- Hurley, Brian; Instructor
- Lessard, Daniel; Instructor
- Pépin, Pierre; Instructor
- Walkington, Alexander; B.Mus., M.Mus.(McG.); Instructor

**Jazz Drums**
- Doxas, Jim; B.Mus.(McG.); Instructor
- Laing, David; B.A.(McG.); Instructor
- Lambert, Michel; Instructor
- McCann, Chris; Instructor
- White, André; B.A.(C'dia), M.Mus.(McG.); Associate Professor

**Jazz Flute**
- Gossage, Dave; Instructor

**Jazz Guitar**
- Amirault, Greg; B.Mus.(McG.); Instructor
- Bibace, Kenneth; B.Mus., M.Mus.(McG.); Instructor
- Clayton, Greg; Instructor
- Gauthier, Michael; Instructor
- Gearey, Jon; Instructor
- Jimenez, Carlos; B.Mus., M.Mus.(McG.); Instructor

**Jazz Piano**
- Amirault, Steve; Instructor
- Jarczyk, Jan; B.A., M.A.(Academy of Music, Cracow), Dip.(Berklee); Associate Professor
- Johnston, Jeffrey; Instructor
- Rager, Josh; B.Mus., M.Mus.(McG.); Instructor
- Roney, John; M.Mus.(McG.); Instructor
### Jazz Piano

White, André; B.A.(C’dia), M.Mus.(McG.); Associate Professor

### Jazz Saxophone

Bolduc, Rémi; Assistant Professor  
Doxas, Chet; B.Mus., M.Mus.(McG.); Instructor  
Foote, Gordon; B.Sc., M.A.(Minn.); Associate Professor  
Jensen, Christine; B.Mus., M.Mus.(McG.); Instructor  
Kennedy, Donny; B.Mus., M.Mus.(McG.); Instructor  
Leroux, André; B.Mus.(Montr.); Instructor  
Lozano, Frank; Instructor  
McLean, Allan; Instructor  
Miller, Joel; B.Mus.(McG.); Instructor  
Turner, Dave; Instructor

### Jazz Trombone

Abdul Al-Khabyr, Muhammad; Instructor  
Grott, David; Instructor

### Jazz Trumpet

Couture, Jocelyn; Instructor  
Dean, Kevin; B.M.E.(Iowa), M.Mus.(Miami); Professor  
Di Lauro, Ron; B.Mus., M.Mus.(McG.); Instructor  
Mahar, Bill; B.Mus.(McG.); Instructor  
Sullivan, Joe; B.A.(Ott.), M.M.(New England Cons.); Associate Professor; Jazz Area Chair

### Jazz Vibraphone

Stevenson, François; B.Mus.(McG.); B.Ed.(Ott.); Instructor

### Jazz Voice

Lee, Ranee; Instructor

### Opera Area

Hansen, Patrick; B.Mus.(Simpson), M.Mus.(Missouri); Associate Professor; Opera Director  
Wachner, Julian; B.Mus., Mus.Doc.(Boston); Associate Professor; Principal Conductor

### Organ Area

Gilbert, Kenneth; D.Mus. honoris causa(McG.), O.C., F.R.S.C., HonRAM; Adjunct Professor  
Grew, John; L.T.C.L.(Lond.), B.Mus.(Mt. All.), M.Mus.(Mich.), D.D.(United Theological Coll.), LL.D.(Mt. All.); University Organist; Professor; Organ Area Chair  
Porter, William; Associate Professor

## 10.4 Revisions – Schulich School of Music

**Department of Music Research: Composition; Music Education; Music History; Theory; Faculty Program**

- *section 10.9.1.7: Minor Music Education (18 credits)* [new](#)
- *section 10.9.1.8: Minor Music History (18 credits)*
- *section 10.9.1.9: Minor Music Theory (18 credits)* [new](#)
- *section 10.9.1.11: Minor Musical Science and Technology (18 credits)*

## 10.5 About the Schulich School of Music (Undergraduate)

McGill's Schulich School of Music is the largest university-based school for professional musical training and music research in Canada. The school is renowned for its orchestral, choral, opera, jazz, chamber, contemporary, and early music programs, and for its award-winning creative and research work in composition, music theory, musicology, music education, sound recording, and music technology. Pollock Hall (capacity: 600), Redpath Hall (capacity: 300 and housing the University organ) and Tanna Schulich Hall (capacity: 187) are among the busiest and best concert venues in Montreal. The intimate Clara Lichtenstein Hall (capacity: 80) is scheduled for renovation in the summer of 2011. In addition, facilities include the Wirth Opera Studio (an opera rehearsal room) and the Multimedia Complex Suite, including the Multimedia Room (a scoring stage/acoustical research lab), three isolation booths, a small recording studio, and three control rooms of different sizes. The three floors of the Marvin Duchow Music Library contain well over 100,000 scores, recordings, books, and periodicals; in addition, the Gertrude Whitley Performance Library has performing parts for over 6,000 titles.

Both old and new buildings house labs for numerous specialized functions: digital composition and electronic music, music education research, multi-channel sound recording, music perception and cognition, sound processing and control, computational modeling, and more. There are state-of-the art classrooms, teaching studios, and over 100 practice rooms. The Centre for Interdisciplinary Research in Music Media and Technology (CIRMMT) is an inter-faculty, inter-university, international consortium of scholars that brings together researchers in music, sound recording, music technology, psychology, neuroscience, engineering, and medicine ([www.cirmmt.mcgill.ca](http://www.cirmmt.mcgill.ca)).

Current student enrolment is approximately 550 at the undergraduate level and approximately 250 at the graduate level. Teaching staff includes 60 full-time and over 140 part-time members. Students, faculty, and staff play major roles in Montreal's vibrant cultural scene, presenting over 700 concerts and events annually, as well as master classes, lectures, and symposia, all enhanced by active music student societies, a gig office, and stellar administrative and support staff.

10.6 Overview of Programs

The Schulich School of Music offers degree programs leading to the B.Mus. and diploma programs leading to an L.Mus. and Artist Diploma. The Department of Music Research offers minors in Music History, Composition and two minors in the area of Music Technology.
The Schulich School of Music of McGill University also offers the opportunity to pursue courses that reflect your multiple interests through collaboration with McGill’s other faculties and departments. You may wish to consider partnering your music studies with subjects within other faculties that would lead to graduating with a double major or minor.

10.6.1 Degrees and Diplomas Offered

10.6.1.1 Degree of Bachelor of Music (B.Mus.)

The degree of Bachelor of Music may be obtained in any one of the following fields:

<table>
<thead>
<tr>

</tbody>
</table>

10.6.1.2 Faculty Program

This program is designed to accommodate those students who are either undecided about the area of music in which they wish to specialize, or who are interested in a pattern of specialization not provided in the established major programs, or who are interested in combining studies in music with studies in other disciplines.

All of the above B.Mus. programs normally require three years of study following completion of the Quebec Diploma of Collegial Studies or four years of study following completion of secondary school elsewhere.

10.6.1.3 B.A. Major Concentration in Music

The Faculty of Arts offers a Bachelor of Arts degree with a Major concentration in Music. Further details on the program can be found under Music in the Faculty of Arts section.

10.6.1.4 Minor Programs

A Minor in Music History is available to all students (with the exception of students in the Major in Music History). This option will take the place of music and/or free electives, as well as history, literature, and performance practice complementary courses.

A Minor in Composition is available to all students (with the exception of students in the Major in Composition). This option will take the place of Music course and/or free electives.

Minors in Musical Applications of Technology and Musical Science and Technology are available to Music students who wish to graduate with a knowledge of newer technologies and the impact they are having on the field of music. (Space permitting, these minors are also available to students from other faculties.)

A Minor in Marketing and a Minor in Management are available to B.Mus. students. Further information on these minors can be found under the Desautels Faculty of Management > section 9.9.7: Minors for Non-Management Students.

Minor programs in Music are also available to students in the Faculty of Arts and the Faculty of Science. Further information on these Minors can be found under the Faculty of Arts, section 3.11.38: Music (MUAR) and the Faculty of Science > section 12.14.23: Music.

10.6.1.5 M.Mus. Performance (Prerequisite courses)

Students wishing to prepare for the Master of Music in Performance should include, in their Bachelor of Music program, the courses listed under section 10.9.2.14: Special Prerequisite Courses for M.Mus. in Performance.

10.6.1.6 M.Mus. Sound Recording (Prerequisite courses)

Students wishing to prepare for the Master of Music in Sound Recording should include, in their Bachelor of Music program, the courses listed under section 10.9.1.5: Special Prerequisite Courses for M.Mus. in Sound Recording.

10.6.1.7 Licentiate in Music (L.Mus.)

The Licentiate in Music is offered in Performance and is designed for advanced instrumentalists, singers, and jazz performers who wish to concentrate on their practical subject while limiting their theoretical studies to basic areas in Music History, Theory, and Musicianship. This program normally requires
three years of study. For more information, please see: section 10.9.2.8: Licentiate in Music (L.Mus.) - Major Performance Piano (93 credits); section 10.9.2.9: Licentiate in Music (L.Mus.) - Major Performance (All Instruments except Piano, Voice and Jazz) (93 credits); section 10.9.2.10: Licentiate in Music (L.Mus.) - Major Performance Voice (105 credits); and section 10.9.2.11: Licentiate in Music (L.Mus.) - Major Performance Jazz (100 credits).

10.6.1.8 Artist Diploma

The Artist Diploma is available only to advanced instrumentalists and singers who demonstrate technical and musical maturity. Admission into the program requires completion of a Bachelor of Music degree in Performance, a Licentiate in Music, or the equivalent.

10.6.1.9 Degree of Master of Arts (M.A.)

The Master of Arts degree (M.A.) is available as a thesis option in Music Education, Music Technology, Musicology, and Theory and as a non-thesis option in Music Education, Musicology, and Theory.

10.6.1.10 Degree of Master of Music (M.Mus.)

The Master of Music degree (M.Mus.) is available in Composition, Performance, and Sound Recording. Within the Performance option are offered specializations in: piano, guitar, orchestral instruments, organ, conducting, chamber music, orchestral training, piano accompaniment, vocal, opera, opera coaching, vocal pedagogy, early music, church music – organ, and jazz.

10.6.1.11 Degree of Doctor of Music (D.Mus.)

The Doctor of Music degree (D.Mus.) is available in Composition and Performance Studies.

10.6.1.12 Degree of Doctor of Philosophy (Ph.D.)

The Doctor of Philosophy degree (Ph.D.) is available in Music Education, Musicology, Music Technology, Sound Recording, and Theory.

For details of the master’s and doctoral programs, please consult the Graduate and Postdoctoral Studies Programs, Courses and University Regulations publication, available at www.mcgill.ca/study.

10.6.2 Orchestral Training

Orchestral Training at McGill includes all students in the B.Mus., L.Mus., Artist Diploma, M.Mus., and D.Mus. degrees and diplomas whose major is one of the orchestral instruments. Many of its graduates are now members of professional orchestras throughout North America, Europe, and the rest of the world. Led by full-time conductors in residence and supported by a number of full-time staff as well as many members of the top professional orchestras in and around Montreal, Orchestral Training at McGill provides for regular private practical lessons as well as performance in one or more large instrumental ensembles including a full symphonic orchestra (approximately 100 players), a contemporary music ensemble, a percussion ensemble, and a variety of small chamber music groups. It also includes regular coached orchestral sectionals and orchestral repertoire classes.

10.6.3 Scholarships and Financial Aid

General information on scholarships, including McGill Entrance Scholarships, and a detailed listing of all awards are contained in the Undergraduate Scholarships and Awards Calendar, available at www.mcgill.ca/students/courses/calendars.

Schulich Scholarships valued at CAD$5,000/year (renewable) are available to outstanding prospective students. About 70 Schulich Scholars are present in the School during any academic year. A limited number of Music Entrance Scholarships (valued at $2,000 each) are also awarded to incoming Performance students on the basis of auditions held only in February. All instruments, including voice, are eligible. In addition, outstanding string players applying to the Schulich School of Music are encouraged to audition for the Lloyd Carr-Harris String Scholarships (valued at $10,000 each, renewable). Application for admission must be submitted by January 15.

While taking into account the stipulations of the individual awards, Schulich School of Music scholarships, awards, and prizes are given on the basis of a student's record for the academic session ending in April and are tenable during the next academic year beginning in September. Students must have successfully completed at least 27 credits (excluding courses completed under the Satisfactory/Unsatisfactory option) in the academic year preceding the award and must register for full-time studies during the subsequent year, unless fewer credits are needed to complete the program. Students whose records contain outstanding incompletes or deferrals will not be considered. No application is required.

10.6.4 Summer Studies

Summer Studies offers courses starting in May, June, and July.

Students may take a maximum of 18 credits during the Summer session. Those wishing to take more than 5 credits in any one month must obtain the permission of the Senior Student Adviser.

Information concerning course offerings and application forms may be obtained from the McGill Summer Studies Office website, www.mcgill.ca/summer, or by calling 514-398-5212.

10.6.5 Music Credit Options for Students in Other Faculties

The Schulich School of Music offers three groups of courses that may be taken for credit by students in other faculties.
The first group consists of Music Literature and Theory courses especially designed for students from other faculties who may not have taken formal studies in music but who wish to take elective courses in the cultural, historical, and theoretical aspects of music.

The second group is the sequence of courses in music theory and history which are part of the Schulich School of Music undergraduate curriculum. These courses may be taken by those having the necessary prerequisite studies in music.

The third group of courses consists of selected music ensembles open, by audition, to students in other faculties.

For further details on these courses, please see the Faculty of Arts > section 3.11.38: Music (MUAR). Other music courses may be taken by qualified students from other faculties providing they obtain permission from the relevant department in the Schulich School of Music and from the Associate Dean of their own faculty.

### 10.6.6 McGill Conservatory

The McGill Conservatory, Community Program of the Schulich School of Music, offers instruction in piano, guitar, harp, most orchestral instruments, and voice, as well as Theory and Ear Training from the elementary level up to and including Collegial levels.

In addition, the McGill Conservatory offers the Little Musicians course – an introduction to music for young children, Suzuki method instrumental instruction, orchestras, children’s, youth and adult choirs, chamber music ensembles, a variety of jazz courses: improvisation, theory, history, and combos, a garage band program, and a summer day camp.

Instrumental examinations to the Collegial II level and Theory and Ear Training examinations from the Secondary III to Secondary V levels are available to both internal and external students. Theory and Ear Training examinations at the Elementary and Collegial I and II levels are open to internal students only.

The McGill Conservatory also welcomes adult students (at any level) and encourages their participation not only in instrumental instruction but also in choir, orchestra, instrumental ensembles, and Theory and Ear Training courses.

For more information, contact the McGill Conservatory: 514-398-4543 (Downtown); 514-398-7673 (Macdonald campus); 514-398-5505 (Camp); website: [www.mcgill.ca/conservatory](http://www.mcgill.ca/conservatory).

### 10.7 Admission

As you plan for the next step in your education, we would be pleased to assist you in providing further information and/or assistance. Please take a few minutes to create an account on McGill in Mind. Here you can register for tours of the Schulich School of Music, learn about events, request publications, modify your personal profile, and receive messages from us concerning exciting developments at the School. Please note that certain materials in our packages are only available in English. (All information is confidential and will be used solely for McGill University recruiting purposes.)

#### 10.7.1 Application Procedure

All inquiries regarding admission should be directed to the Music Admissions Office, Schulich School of Music, McGill University, 555 Sherbrooke Street West, Montreal, Quebec, H3A 1E3.

Full information, including a web-based application form, is available at [www.mcgill.ca/music/prospective/undergraduate/applying](http://www.mcgill.ca/music/prospective/undergraduate/applying).

In order to ensure proper consideration, web applications for September must be submitted by January 15. The School normally does not admit students in January. Please consult the Music Admissions Office for exceptions. Applications received after these deadlines will be considered if places are still available.

Application information should include detailed descriptions of the applicant's musical background, training, and statement of intent including photocopies of diplomas, certificates, and/or transcripts. An official up-to-date transcript must also be sent directly by the school attended. All applicants must arrange to have a Music Evaluation form submitted on their behalf. All supporting documents for undergraduate applications must be mailed to: McGill University, Enrolment Services Documentation Centre, 688 Sherbrooke Street West, Suite 760, Montreal, Quebec, H3A 3R1. All screening and audition recordings and composition samples should be submitted directly to the Schulich School of Music: 555 Sherbrooke Street West, Montreal, Quebec, H3A 1E3.

Applicants are advised that satisfying the entrance requirements does not guarantee admission where instrumental places are limited.

#### 10.7.2 Music Entrance Requirements

The minimum music entrance requirements are the equivalent of McGill Conservatory Collegial I Instrument or Voice (Performance applicants: Collegial II) and Secondary V Theory and Ear Training.

<table>

</tr>
</tbody>
</table>
The above listing is intended only as a general guide. Admissibility to any program is determined by audition and academic record. Students wishing to major in Performance should be approximately two years more advanced, and be able to demonstrate potential as performers at their audition.

All applicants in female voice and in all jazz instruments will be required to submit screening material (CD, video, etc.) for preselection by January 15. Following a review of these recordings, selected applicants will be invited to attend a live audition. No live audition will be scheduled in female voice or in any jazz instrument until recordings have been received and reviewed. All applicants must perform an audition of approximately 15 minutes' duration. The student should choose material that will represent different musical periods and reveal musicianship and technical proficiency to best advantage. Applicants for the Artist Diploma program must prepare an audition of recital material lasting approximately 60 minutes.

Consult the Music Admissions website at www.mcgill.ca/music/future-students/undergraduate for specific information on entrance audition requirements and dates.

Recorded auditions (compact disc and/or video) are acceptable when distance prevents an applicant from attending an audition in person.

Applicants for Composition are asked to submit two or three samples of their written work.

Music Education applicants are asked to outline reasons for wishing to enter the Music Education field in their statement of intent and have a letter of reference sent from someone attesting to his or her suitability for teaching.

All screening and audition recordings and composition samples should be submitted directly to the Schulich School of Music of McGill University: 555 Sherbrooke Street West, Montreal, Quebec, H3A 1E3.

10.7.3 Academic Entrance Requirements

10.7.3.1 Bachelor of Music

The applicant's entrance audition and the academic record are considered when making an admission decision. As a limit is placed upon the number of students admitted to study a particular instrument, fulfillment of the minimum entrance requirements does not guarantee acceptance. TOEFL may be required of non-Canadian students whose mother tongue is not English. It is the applicant's responsibility to make the necessary arrangements with the examining board to write the test in the country of residence.

10.7.3.2 CEGEP Applicants

Students are expected to obtain the Quebec Diploma of Collegial Studies (Diplôme d'études collégiales) in the Music Concentration or equivalent. Applicants with a DCS/DEC in a field other than Music must have the equivalent Music prerequisites. The minimum overall average required is 75%. CEGEP graduates are considered for admission to a three-year or a four-year program.

10.7.3.3 Canadian High School (excluding Quebec) Applicants

Applicants are expected to obtain a high school graduation diploma which leads to university admission in the student's home province. Ontario high school students are normally expected to have obtained a minimum of six pre-university (4U, 4M) courses; at least four of the six must have been taken at the 4U level. There are no specific non-Music prerequisite courses required, and the minimum overall average should be 75%. Canadian high school graduates are admitted to a four-year program.

10.7.3.4 U.S. High School Applicants

Applicants are expected to obtain a high school graduation diploma that meets the requirements for university/college admission in the U.S. The minimum overall average required is B+. There are no specific non-Music prerequisite courses, or SAT and Achievement Test results required. Some credit will be granted for Advanced Placement Examinations in appropriate subjects. U.S. high school graduates are admitted to a four-year program.

10.7.3.5 International Applicants

In general, applicants must be eligible for admission to university in their country of origin and have above-average grades. Students who have completed an International Baccalaureate, a French Baccalaureate, or a minimum of three GCE “A” (Advanced) Level examinations are considered for admission into a three-year program. Normally, applicants with five GCE “O” (Ordinary) Level results, plus one year of schooling beyond the Ordinary Level, are admitted to a four-year program. Applicants with qualifications from other systems will be considered for either a three-year or a four-year program.

10.7.3.6 Transfer Students

Transfer students are considered on the basis of both their university or college work and previous studies. Normally, students are expected to complete a full year of university studies prior to applying for admission, and to be in good standing as defined by the university previously attended. The minimum overall average required is a CGPA of 3.00. Transfer credits for non-Music courses in which a grade of C or better has been received are granted following an evaluation of the student's transcript. Transfer credits, with certain restrictions, are granted for music complementary or elective courses following an evaluation of the student's transcript (a higher grade may often be required). Transfer students must complete a minimum of 60 credits at McGill in order to obtain a degree.

10.7.3.7 Mature Students

Applicants who are at least 21 years of age and are Canadian citizens or Permanent Residents at or before registration, who have not met the high school or CEGEP academic requirements, and who are able to demonstrate exceptional talent in their discipline may be considered for admission. Such applicants may be resident anywhere in Canada. All available academic/educational documents must be submitted. An interview may be required.
10.7.3.8 Special Students

Special Students do not need to fulfil any of the academic requirements outlined previously, but are required to have the necessary music prerequisites for the courses concerned. Registration is subject to the availability of space in the course(s) concerned. Special Students are normally not entitled to lessons in an instrument or in voice. Registration is permitted for one year only, after which time the student must apply for admission to either a degree or diploma program.

10.7.3.9 Visiting Students

Individuals wishing to take courses at McGill for credit at another university may be admitted as Visiting Students provided they have the prerequisites for the course(s) concerned and have official permission from their home university.

10.7.4 Diploma Programs

10.7.4.1 L.Mus. (All Applicants)

For admission to the Licentiate program, the applicant must have completed secondary school. The applicant's music qualifications must be equivalent to McGill Conservatory Collegial II Instrument or Voice and Secondary V Theory/Ear Training. An entrance audition is required. This program is normally three years in length.

10.7.4.2 Artist Diploma (All Applicants)

For admission to the Artist Diploma program, the applicant must have a Bachelor of Music degree in Performance, the Licentiate in Music of the McGill Schulich School of Music, or the equivalent, and must pass a performance audition. This program is normally two years in length.

10.7.5 Music Placement Examinations

All applicants must sit diagnostic placement examinations in Theory, Musicianship (Ear Training), Music History, Keyboard Proficiency, and, for Jazz majors, Jazz Materials, in order to determine their course levels. General placement/advanced standing examinations will be given during the entire weekend prior to the beginning of classes in September. Jazz Materials and Jazz Keyboard Proficiency placement exams are given on the first day of class.

First-year students enrolled in the Bachelor of Music program who have completed the Quebec Diploma of Collegial Studies (Diplôme d'études collégiales) in a Music concentration or equivalent, or students transferring from other universities or colleges, and who have completed a course in the history of Western music, with a grade of C or better, will be exempted from the first-year Western Musical Traditions requirement (MUHL 186).

First-year students enrolled in the Bachelor of Music program with a Major in Jazz Performance who have completed the Quebec Diploma of Collegial Studies (Diplôme d'études collégiales) in a Jazz concentration or equivalent, or students transferring from other universities or colleges, and who have completed a course in the history of Jazz, with a grade of C or better, will be exempted from the first-year Jazz History Survey requirement (MUJZ 187).

Students accepted into either the Licentiate Diploma (L.Mus.) or the Artist Diploma, who have completed the degree of Bachelor of Music at a Canadian or American university (or the equivalent elsewhere) within the preceding three (3) years will not be required to sit the Music Placement Examinations and will be exempted from required Theory, Musicianship, and Music History, Literature, or Performance Practice courses. Should such students wish to avail themselves of the diagnostic service that the Music Placement Examinations provide, they may sit them—without, however, being bound by the recommendation generated from their results. Nevertheless, should great difficulties arise in a specific class because of lack of adequate preparation, the Chair of the Department of Music Research, upon the advice of the instructor, reserves the right to counsel the student to undertake studies at a lower level.

10.7.6 Keyboard Proficiency Test (MUSP 170)

Students entering any of the B.Mus. or L.Mus. programs should be prepared to demonstrate, in a Keyboard Proficiency Test, keyboard skills sufficient to enable them to use the piano as a tool in their studies at McGill.

Those who are unable to do so must register continuously for Keyboard Proficiency MUSP 170 until they successfully complete the course. Majors in Jazz Performance must enrol in MUJZ 170. Students who have been admitted to a degree or diploma program with keyboard as their principal instrument are exempt from the MUSP 170 Test (but not from MUSP 171).

The requirements of the Keyboard Proficiency Test are as follows:

1. Sight-reading (simple two-part piece using treble, bass, and alto clefs).
2. Technique (scales, triads, and arpeggios). Two octaves, hands together.
3. Prepared piece (contrapuntal texture in two or three parts, or simple homophonic textures, level equivalent to McGill Conservatory Secondary III).
4. Keyboard rudiments (recognition/playing of intervals, chords, scalar patterns, etc.).

Students will not be allowed to proceed with higher-level Musicianship or Theory studies until these requirements are met. Exact test dates are determined by the Department of Music Research.
10.7.7 Readmission

Students in Satisfactory Standing, who have not been registered in the Schulich School of Music for one or two terms, may return to the program in which they were previously registered upon permission of the Faculty. Those who have been out for longer than two terms may be readmitted upon permission of the Faculty, subject to the student's previous record and current Faculty limitations on enrolment, but will be required to re-audition. Students who have completed their required practical examinations and are returning to fulfill academic courses are not required to re-audition. Students who are uncertain of the re-audition regulations are urged to contact the Senior Student Adviser.

Students wishing to return in the Winter or Summer term must submit a request in writing to the Music Student Affairs Office, giving a summary of their activities during their absence. The deadline for the Winter session is November 15; for the Summer session, April 1; for the Fall session, January 15 for students who must re-audition, and June 1 (no audition).

10.7.8 Tuition Fees

General information on Tuition and Other Fees will be found in University Regulations and Resources > Fees. The University reserves the right to make changes without notice in the published scale of fees.

Individual practical instruction on a main instrument or voice as indicated in the various degree and diploma programs (see section 10.6.1: Degrees and Diplomas Offered) is included at the per-credit rate and the practical instruction fee of $500 per term only while the student is full-time, and for a maximum number of years according to the following table:

Table 1: Entitlement

</table>

* Composition, Music Education, Music History, Theory, Faculty program

L.Mus. students are entitled to practical instruction at the per-credit rate for a maximum of four years, 1 hour per week; Artist Diploma students, two years, 1.5 hours per week.

The maximum of four years of practical instruction for L.Mus. students includes instruction received while in a B.Mus. program either during or prior to registration in the L.Mus. program.

Note: Part-time students in the B.Mus. and L.Mus. programs and those who have exhausted the above-listed maxima will be charged $785 per term ($1,570 per year) for practical instruction in addition to the per-credit fees and the practical instruction fee of $500. (Artist Diploma students: $1,175 per term or $2,350 per year.)

Special or part-time Visiting students who are permitted to enrol for practical instruction will also be charged an extra $785 per term, in addition to the per-credit fees and the practical instruction fee of $500, as will all other students taking instruction in a second practical subject.

Voice Coaching (MUIN 300, MUIN 301) is available at the per-credit rate for a maximum of two terms for full-time voice students only. In all other cases, the extra fee for this course is $550 per term.

Special students in the Opera Studio will be charged an additional $680 per term ($1,360 per year). Degree or diploma candidates registered in Opera Studio, as well as Special students taking practical instruction at $785 per term, will be charged the per-credit fee for Opera Studio.

10.8 Academic Information

Students are required to be punctual at all classes and lessons. Grades in theoretical subjects are calculated on the basis of class work and/or examinations. Students are warned that by missing examinations or class work they risk failure in the subject concerned.
10.8.1 Ensemble Policy and Regulations

10.8.1.1 Preamble

The ensemble program comprises areas of activity designed to provide an enriched and cohesive curriculum in practical musicianship for every student. Much of this training is accomplished in the context of an instrumental, choral ensemble or specialized ensembles, over the period that students normally spend on studies.

Students are responsible for checking their program requirements carefully in order to verify their basic (large) and small ensemble requirements; the Performance Department does not follow the particular enrollment of any student's participation in their small or large ensembles.

For each program's basic (large) and small ensemble requirements, refer to the appropriate section in this publication (all Undergraduate, Licentiate, and Artist Diploma requirements are found in section 10.9.2: Department of Performance; graduate programs are in the Graduate and Postdoctoral Studies Programs, Courses and University Regulations publication also available at www.mcgill.ca/study).

In those cases where a student in the orchestral training program is registered for additional academic sessions, he/she must also register for a basic (large) ensemble for each additional session. (For exemptions, see section 10.8.1.11: Exemption from a Required Ensemble.)

A student in the Performance Department who is not assigned a basic ensemble following the ensemble placement auditions may take a choral ensemble (after having a placement audition with the conductor(s)) or see the Ensemble Resource Administrator to examine if any other options are available to the student.

Small Ensembles: Generally, all students registered as full-time or part-time students in the Department of Performance must audition for, and participate in, a small ensemble. For each program's small ensemble requirements, please refer to the appropriate section in this publication (all Undergraduate, Licentiate and Artist Diploma requirements are found in section 10.9.2: Department of Performance; graduate programs are in the Graduate and Postdoctoral Studies Programs, Courses and University Regulations publication also available at www.mcgill.ca/study).

Performance majors as well as sufficiently advanced players and singers from other programs are encouraged to participate in one or more small ensembles that meet their particular interest.

Note: In all cases where the term “Director” of an ensemble is used, it is understood to mean the conductor, director, stage director, or coach of the ensemble.

The following policy and its regulations apply to all students performing in all ensembles, large or small, required, complementary, or elective. They apply also to all students who have been assigned to an ensemble for any reason, including conducting students, composers- and arrangers-in-residence, and others.

10.8.1.2 Large Ensemble (Basic) and Small Ensembles (Assigned)

Basic ensemble training requirements vary by program and according to the student's practical concentration. For ensemble purposes, the orchestral instruments include flute, oboe, clarinet, bassoon, saxophone, french horn, trumpet, trombone, tuba, percussion, harp, violin, viola, cello, and double bass. Voice majors may choose from a group of vocal and choral ensembles appropriate to the level of their development.

In all programs which specify an assigned small ensemble, the following are considered assigned small ensembles:

<table>

10.8.1.3 Additional Ensembles

Additional ensembles chosen by students to reflect their particular interests may, with Departmental approval, be applied as Music Elective credit. Students electing an ensemble will normally be required to participate in the ensemble placement auditions and will be placed accordingly.
10.8.1.4 Assignment and Auditions

All students registered as full-time or part-time students in the Department of Performance must audition for a basic (large) ensemble in the beginning of the school year. (If a mid-year audition is offered for a particular year or ensemble, notice will be given prior to the start of the academic year.) Auditions for basic (large) ensembles are mandatory.

A student who cannot audition for a basic ensemble at the times indicated on the website must give due notice to the Ensemble Resource Administrator in the Performance Department of their non-availability at least two (2) weeks before the date of the first audition. The student must submit, in writing, the reason for their lack of availability and (if applicable) submit a recording of their audition materials prior to the day of the auditions. If a student misses an audition with an accepted reason, but does not deliver the audition materials to the Department, or if a student misses an audition for reasons unacceptable to the Performance Department, that student will not be allowed to audition and his/her assignment will be left entirely to the discretion of the Performance Department.

Assignments are posted on the Large Ensemble notice boards (located in the main hallway of the Strathcona Music Building). Reassignments may be made from time to time during a term and will also be communicated to students.

In the case of the Jazz Ensembles, an open challenge system is used as follows:

1. At any time during a term, a student may challenge for a position in a Jazz Ensemble.
2. The challenger must speak to the band directors involved, specifying the chair being challenged.
3. The challenger will have a private audition with no fewer than two directors who will offer a non-binding recommendation to the student as to whether or not to proceed with the challenge.
4. Should the challenger wish to proceed, the student being challenged will be notified by the Coordinator of the Jazz Ensembles.
5. The challenge will take the form of an audition of both the regular member of the ensemble and the challenger in a full band rehearsal, following which the directors will make a decision.

10.8.1.5 Commitment

Ensembles are courses. Each student who has registered for an ensemble, or who has been assigned to an ensemble, has made a commitment to the ensemble and is required to attend all rehearsals, concerts, performances, field trips, recordings, and other activities, which constitute the course requirements of that ensemble. Except for reasons of ill health or in the case of an excused absence; any unexcused absence may result in a failing grade for the student.

10.8.1.6 Failing Grade

A failing grade in any of the ensembles (large, small, complementary, or elective ensembles) obliges the student to make up the credit during a later semester. A subsequent failure in the same course may result in the student being required to withdraw from the program.

10.8.1.7 Request to be Excused from a Rehearsal

ANY STUDENT WHO CANNOT ATTEND A REHEARSAL FOR ANY ENSEMBLE IS REQUIRED TO FILL OUT AN "ENSEMBLE EXCUSE FORM". THIS FORM IS AVAILABLE ON THE ENSEMBLE PAGE OF THE SCHULICH SCHOOL OF MUSIC (www.mcgill.ca/music/current-students/undergraduate/all-students/ensembles/policies-absences). For Opera McGill policies, please contact the Opera McGill Department directly (opera@music.mcgill.ca).

Students are required to submit a completed form at least eight (8) days prior to the rehearsal that will be missed, stating the reason for the request. Students who have missed a rehearsal due to illness must submit one of these forms within three (3) days of returning to school. In such cases, a doctor’s certificate or statement from the Student Health Service or equivalent medical service must be submitted electronically via email or in hard copy to the Office of the Ensemble Resource Administrator.

Students may be excused from a rehearsal of an ensemble for the following reasons; however, submitting a form with one of these reasons does not guarantee approval of a request:

1. Sickness, or emergency medical or dental work.
   IMPORTANT NOTE: ANY STUDENT WHO IS EXPERIENCING PAIN WHILE PLAYING OR SINGING SHOULD INFORM THEIR PRACTICAL TEACHER AND THE DIRECTOR OF THEIR ENSEMBLE(S), AND SHOULD SEEK APPROPRIATE MEDICAL ATTENTION. Students should not be reluctant to admit to injury, it is entirely acceptable for students to be excused from ensemble rehearsal(s) for health reasons. The Faculty does not want students to perform with pain or with injury. * If a student is experiencing pain while playing, then it is permitted to sit in rehearsal in their assigned place without playing in the rehearsal.
2. An audition for a permanent professional engagement.
3. A master class.
4. A major competition.
5. A professional engagement deemed to be very important for a student’s developing career.
6. Family emergency or an especially important family occasion.
7. A conflict between an irregularly scheduled ensemble rehearsal and a previous important commitment made by the student (proof required).
8. A field trip for another ensemble or class.
10. A religious holiday.

For reasons 2, 3, 4, and 5, the request must be accompanied by authorization from the student's practical teacher and the appropriate Area Chair. This permission is given for no more than three (3) rehearsals.

**Note:** NO PERMISSION IS GIVEN TO BE EXCUSED FROM A DRESS REHEARSAL OR FROM A CONCERT EXCEPT FOR REASONS 1 AND 2 ABOVE.

Students are not excused from ensemble rehearsals for either of the following reasons:

1. Gigs, including orchestra engagements
2. Non-emergency medical or dental appointments. Students should request appointment times that do not conflict with rehearsals.

Absences or delays (especially, but not limited to, tardiness) without an approved Ensemble Excuse Form will result in a final mark deduction as follows:

- Absences due to illness (with Medical Certificate, audition notification, or other accepted reasons) = no loss of grade
- Tardy to rehearsal, without approved Ensemble Excuse Form = loss of one grade point (i.e., B to B-)
- Absences without approval = loss of one entire letter grade (i.e., A to B)

### 10.8.1.8 Preparation

If the Director of an ensemble is not satisfied with the quality of preparation that a student has been making for the ensemble, the Director shall first warn the student. This warning shall be communicated by the Director to the Ensemble Resource Administrator and Area Chair, who shall inform the student in writing. If, in the Director's opinion, this lack of preparation continues, the student will be required to perform the music for a committee consisting of the Director of the ensemble, the Chair of the area (Strings, Woodwinds, Brass, Voice, etc.) and the Department Chair. If this committee decides that there has been a lack of sufficient preparation, the student will be required to appear before the Area Chair to show cause why he or she should not be required to withdraw.

For any particular performance, if – after a written warning to the student(s) at least two (2) weeks prior to the performance, with copies to the Ensemble Resource Administrator, practical instruction teacher, Area Chair, and Department Chair – the Director, in consultation with his/her coaches, feels that the performance of a student or group of students will not meet a certain minimum standard established by the Director, the Director may cancel the performance of the student(s).

### 10.8.1.9 Discipline

The Director of an ensemble may recommend that a student withdraw from an ensemble for disciplinary reasons. A student asked to do so will be required to appear before the Department Chair, Area Chair, and Director to show cause why he or she should not be required to withdraw.

Students who are required to withdraw from an ensemble for reasons of lack of preparation or discipline will be given a grade of F, which will be reflected in their Grade Point Average (GPA).

### 10.8.1.10 Withdrawal

Withdrawal for any reason obliges the student to make up the credit(s) during a later semester.

### 10.8.1.11 Exemption from a Required Ensemble

In order to be given permission not to participate in a required ensemble for a term or part thereof, a student must:

1. be a participant in a major national or international competition, or (in the case of voice students) be given a significant role with a recognized performing arts ensemble, and (in the case of all students) have completed the minimum number of required terms of the ensemble, and have the permission of:
   - his or her practical teacher
   - the area Chair
   - the Director of the ensemble
   - Chair of the String, Woodwinds, Brass, Opera, or Voice Area (where appropriate), or
2. have completed all program requirements except the final exam on his or her instrument, or
3. have completed all musical requirements of his or her program, having only non-music and/or free electives remaining, or
4. have a significant medical reason.

**Note:** Permission not to participate in a required or complementary ensemble for a term or part thereof is not an exemption and does not satisfy any credit requirements for a degree.
10.8.1.12 Substitution of an Ensemble

1. In order to be given permission to substitute another large ensemble for a required or complementary large ensemble for a term, a student must:
   • have completed the minimum number of terms in the required or complementary large ensemble;
   • however, if a student does satisfy the above requirements (first bullet) under section 10.8.1.11: Exemption from a Required Ensemble, the Director of the required or complementary large ensemble may refuse consent if the student is needed in that ensemble.

2. Keyboard and Guitar Performance majors in all programs may substitute up to two (2) terms of Studio Accompanying (MUEN 584) for two (2) terms of choral ensembles.

3. Performance majors are not permitted to substitute Basic (large) Ensemble credits for required or complementary assigned small ensemble credits.

10.8.1.13 Rotation

Whenever possible and musically satisfactory, and in order to ensure equal opportunity and experience for students in the large instrumental ensembles, the seating of students in these ensembles may be rotated periodically throughout the term or year. The Director of the ensemble, along with the guidance of the Area Chairs and/or practical instruction teachers, will determine whether or not rotation is possible and musically satisfactory.

10.8.1.14 Missed Classes due to Field Trips

Situations will arise where students are required to miss classes – both in the Schulich School of Music as well as in other faculties – because of field trips. Teaching staff in the Schulich School of Music are encouraged to assist students who approach them for information about course content and assignments that have been missed. Nonetheless, the onus remains on the student who goes on a field trip to complete class work, to fill in all necessary forms and hand in proper documentation of the trip. For Forms, please see section 10.8.1.7: Request to be Excused from a Rehearsal.

10.8.1.15 Transfer Credits

The previous ensemble participation of students coming to McGill from other universities will be recognized if their ensemble experience was similar to that required of McGill students; determination of this experience will be approved by the Area Chair and the Department Chair. In general, transfer credit is made on a term-for-term basis (not by credits) and usually does not exceed two (2) terms. Students are normally not permitted to reduce the basic (large) ensemble training requirements of their McGill program to less than the number of terms required for them to complete the rest of their program. In such cases, transfer credit may be given as Music Elective credit.

10.8.1.16 Extra Large Ensemble Credits

Basic Ensemble Training credits accumulated above the minimum may be applied as Music and/or Free Elective credits. Participation in additional large or small ensembles implies that the same policies will apply.

10.8.1.17 Performance Library

Students are responsible for the music that has been loaned to them for their use, and for its return in good condition to the Gertrude Whitley Performance Library. Students will be required to pay for the replacement of any music that has been lost, stolen, or damaged, and a hold on a student's Minerva account can be placed by the Performance Librarian should music or fines not be handed in to the Library.

10.8.2 Accompanying

Music students registered for practical instruction (including elective study) in one of the eligible instruments may request Accompanist Funding up to a maximum number of hours. Further details are available from the Department of Performance Office (performance.music@mcgill.ca).

10.8.3 Academic Category

All Music students are registered in one of the following categories:

Major: B.Mus. candidates may choose one or more of several majors as described under section 10.9: Programs of Study.

Faculty Program: A general B.Mus. program (see section 10.9.1.4: Bachelor of Music (B.Mus.) - Faculty Program Music (125 credits)).

L.Mus., Artist Dip.: Diploma programs are designed for advanced instrumentalists and singers who wish to concentrate on their practical subject.

Special: Those who are not proceeding towards a degree or diploma.

Visiting: Those taking courses at McGill for credit towards a degree at another university.
10.8.4 Auditing

For information on auditing, see University Regulations and Resources > Auditing of Courses.

10.8.5 Music/Free Electives

Unless otherwise specified, any music course numbered at the 200 level or higher that is not a required course in the student's program can be counted as a Music and/or Free Elective in the B.Mus. or Artist Diploma programs. Under certain conditions, three credits per term of practical instruction may be applied as Music and/or Free Electives only if the lessons are taken after completion of the final examination and/or completion of the number of terms designated in the student's program. Practical instruction in a second instrument at the 100 level, Jazz Materials 1 (MUJZ 160), and Jazz Materials 2 (MUJZ 161) may be taken for elective credit. Consult the Music Student Affairs Office for details. Basic Ensemble credits accumulated above the minimum may be applied as Music and/or Free Elective credits.

10.8.6 Non-Music Electives

In all B.Mus. programs, students are required to complete a minimum of three (3) elective credits from courses offered by other faculties. Students admitted from high schools outside Quebec, not holding a DCS, must complete an additional six (6) credits of non-Music electives (as part of the program prerequisites – Freshman program) for a total of nine (9) credits. Students holding a DCS in Music are exempt from six (6) credits, and students holding a DCS in a non-Music program are exempt from 12 credits of non-Music electives. These credits will be counted towards the non-Music and/or free elective requirement.

The Schulich School of Music allows up to a maximum of 12 credits of English Second Language courses, including academic writing courses for non-anglophones, to students whose primary language is not English and have studied fewer than five years in an English-language secondary institution. Placement tests are required for all ESL courses. For more information on placement tests, see www.mcgill.ca/mwc. Soon after the tests are evaluated, you will be issued a departmental approval for course registration.

Note: As of Summer 2011, the English as Second Language courses are being transferred to the School of Continuing Studies. Music students must obtain approval from the Music Student Affairs Office prior to registration.

10.8.7 Distance Education (online) Courses

Students may take a maximum of six credits of non-Music elective courses taught through distance education toward their B.Mus. degree at McGill. Courses taught through distance education from institutions other than McGill will be approved as transfer credits under the following conditions:

- The course is given by a government-accredited, degree-granting institution acceptable to McGill.
- The course counts for credit toward degrees granted at the institution giving the course.
- Prior approval for the course is obtained from the Music Student Affairs Office.

10.8.8 Course Changes

Students are permitted to change courses and/or sections of a course during the first two-week period of classes in each term. This is referred to as the official Course Change period. Course and section changes are made by the student, using Minerva to access his/her record directly. Worksheets for this purpose are available at the Music Student Affairs Office on the 7th floor of the New Music Building. For more information, see University Regulations and Resources > Course Change period.

Late course change requests, if approved, will be charged the applicable Late Course Change Fee. No charge will be made for late changes imposed by the Faculty. If students' registrations must be corrected after the Course Change period to bring their records into conformity with the courses they are actually taking, the students will be charged the late fee. For complete information on administrative fee charges and fines, please consult the Student Accounts website www.mcgill.ca/student-accounts/fees/adminfees.

10.8.9 Withdrawal from Course(s)

Students are permitted to withdraw from courses other than practical instruction or ensembles after the end of the Course Change period. In such cases, the student's mark in the course will be W. Course withdrawals are also processed on Minerva, within permissible dates. For more information, see University Regulations and Resources > Regulations Concerning Course Withdrawal.

The final deadlines for withdrawing from Music courses are:

- For a one-term course: The end of the seventh week of classes.
- For a two-term course: The end of the Course Change period in the second term.

THE DEADLINE FOR WITHDRAWING FROM PRACTICAL LESSONS AND ENSEMBLES IS THE END OF THE SECOND WEEK OF CLASSES IN ANY TERM.
Music students who, in special circumstances such as illness or injury, are given permission to withdraw from practical instruction after the end of the Course Change period will be charged $65 per week for 1-hour lessons and $97.50 per week for 1.5-hour lessons up to a maximum equivalent to the total fees charged for the course. Full refunds for practical instruction will be given up to the end of the Course Change period.

Note: Students who do not complete a course for which they remain registered will receive a grade of F or J.

For information on the REFUND POLICY, please see University Regulations and Resources > Regulations Concerning Course Withdrawal.

10.8.10 Incompletes

At the discretion of the instructor, a mark of K (Incomplete) may be given to a student who, due to extenuating circumstances, has not finished the coursework on time. The deadline for completion and submission of the required work shall be set by the instructor but may not be later than four months after the K was given. A special form for Incompletes, available from the Music Student Affairs Office, must be signed by the student and the instructor by the last day of lectures. If the final grade is not received within the specified timeline (as agreed by the instructor and student), the mark will be changed to KF (Incomplete Failed), unless an extension has been granted (KE). Completion of the course will cause the K to be replaced on official transcripts by the mark earned. A mark of K not cleared by mid-May makes the student ineligible for scholarships.

In exceptional cases, when research or an assignment cannot be completed for reasons beyond the student's control, students may be given permission by their Departmental Chair or the Associate Dean (Student Affairs) to leave a course permanently Incomplete (without penalty). The symbol K will be replaced by KK, in which case the student's Grade Point Average will be calculated without including this course.

10.8.11 Deferrals

Deferred examinations are permitted in the case of illness or other exceptional circumstances. Music students requesting a deferred examination in academic courses must submit the Request for a Deferred Examination form to the Senior Student Adviser. Students requesting a deferred examination in a practical music examination must submit the form to the Performance Department Chair. Supporting evidence such as an appropriate medical note is required. If the request is approved, an L (deferred) will appear in place of a grade. The grade obtained in the deferred examination will replace the grade of L (deferred) on the official transcript.

Deferred examinations in Music academic courses are given at the discretion of the instructor. A deferred examination in a Music practical examination will be held during the next examination period.

Deferred examinations in non-Music courses will be held in May for the Fall term and August for the Winter term. Examinations will follow the rules of the faculty concerned. It is the student's responsibility to check the date, time, and place of the deferred examination.

A mark of L (deferred) not cleared by mid-May makes the student ineligible for scholarships.

Students who are unable to write a deferred exam must contact the Music Student Adviser immediately to initiate a withdrawal from the deferred exam. Deferred examinations cannot be written at a later date. If the withdrawal is not approved, a final grade of J (absent) will be entered and will count as a zero in the TGPA/CGPA.

10.8.12 Supplemetals

Supplemental examinations in Music academic courses may be given at the discretion of the instructor. A student who receives a mark below 30% in a course is not permitted to take a supplemental examination but must repeat the course.

10.8.13 Rereading of Examinations

A student wishing to have an examination paper reread should apply in writing to the Associate Dean (Student Affairs). The mark given in the rereading, whether higher or lower, will replace the mark originally given. Any request to have a term paper or other coursework reassessed must be made directly to the instructor concerned.

10.8.14 Academic Standing

Academic Standing is based primarily on students' cumulative grade point average (CGPA), but may also be affected by their term grade point average (TGPA). Academic Standing, which is assessed after the end of each term, determines if students will be allowed to continue their studies in the next term and if any conditions will be attached to their registration.

Decisions about Academic Standing in the Fall term are based only on grades that are available in January. Grades for courses in which students have deferred examinations and Fall-term grades for courses that span the Fall and Winter terms do not affect Academic Standing for the Fall term, even though they will ultimately affect students’ Fall TGPA. Therefore, Academic Standings for the Fall term are designated as “interim” and should be interpreted as advisory; moreover, interim Standings will not appear on external transcripts. Interim Standing decisions are mentioned below only if the rules for them differ from those for regular Standing decisions.

10.8.14.1 Satisfactory/Interim Satisfactory Standing

Students in Satisfactory Standing may continue in their program.

- New students are admitted to Satisfactory Standing.
• Students with a CGPA of 2.00 or greater are in Satisfactory Standing.

10.8.14.2 Probationary/Interim Probationary Standing

Students in Probationary Standing may continue in their program, but must carry a reduced load (maximum 14 credits per term) and raise their TGPA and CGPA to return to Satisfactory Standing. They should see their departmental adviser to discuss their course selection.

Students in Interim Probationary Standing may continue in their program, but should evaluate their course load and reduce it as appropriate. They are strongly advised to consult their departmental adviser, before the withdrawal deadlines, about their course selection for the Winter term.

• Students who were previously in Satisfactory Standing will be placed in Probationary Standing if their CGPA falls between 1.50 and 1.99.
• Students who were previously in Probationary Standing will remain in Probationary Standing if their CGPA falls between 1.50 and 1.99 and their TGPA is 2.50 or higher, although the TGPA requirement will not apply to the Summer term.
• Students who were previously in Interim Unsatisfactory Standing will be placed in Probationary Standing if their CGPA falls between 1.50 and 1.99 and their TGPA is 2.50 or higher.
• Students who were previously in Unsatisfactory Standing and who were readmitted to the Faculty by the Associate Dean will be placed in Probationary Standing if their CGPA is less than 2.00, but if they satisfy relevant conditions specified in their letter of readmission.

10.8.14.3 Readmitted Unsatisfactory Standing

Students who were previously in Unsatisfactory Standing and who were readmitted to the Faculty by the Associate Dean will have their Standing changed to readmitted Unsatisfactory Standing. Their course load is specified in their letter of readmission, as are the conditions they must meet to be allowed to continue in their program. They should see the Senior Student Adviser to discuss their course selection.

10.8.14.4 Unsatisfactory/Interim Unsatisfactory Standing

Students in Interim Unsatisfactory Standing may continue in their program, but should evaluate their course load and reduce it as appropriate. They are strongly advised to consult the Senior Student Adviser, before the withdrawal deadlines, about their course selection for the Winter term.

Students in Unsatisfactory Standing who have failed to meet the minimum standards set by the Faculty may not continue in their program and their registration will be cancelled.

Appeals for readmission by students in Unsatisfactory Standing should be addressed to the Associate Dean no later than July 15 for readmission to the Fall term and November 15 for the Winter term. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation). Students in Unsatisfactory Standing for the second time must withdraw permanently.

Normally, supplemental examinations are not permitted; however, students in Unsatisfactory Standing may appeal to the senior student adviser for permission to write a supplemental examination, clearly stating the reasons for special consideration and providing proof as appropriate.

• Students will be placed in Unsatisfactory Standing (Winter or Summer term) or Interim Unsatisfactory Standing (Fall term) if their CGPA falls or remains below 1.50.
• For the Fall and Winter terms, students who were previously in Probationary, Readmitted Unsatisfactory, or Interim Unsatisfactory Standing will be placed in Unsatisfactory Standing if their TGPA falls below 2.50 and their CGPA is below 2.00.
• Students who were previously in Unsatisfactory Standing and who were readmitted to the Faculty by the Associate Dean (Student Affairs) who have not at least satisfied the conditions to attain Probationary Standing that were specified in the letter of readmission will be placed in Unsatisfactory Standing.

10.8.14.5 Incomplete Standings

Standing awaits deferred exam.

Must clear K's, L's, or Supplementals.

Standing Incomplete

Students with Incomplete Standings in the Winter or Summer term may register for the Fall term, but their Standing must be resolved by the end of the Course Change Period for that term. Students whose Incomplete Standing changes to Satisfactory, Probationary, or Interim Unsatisfactory Standing may continue in their program. Students whose Standing changes to Unsatisfactory Standing may not continue in their program.

Students whose Standing changes to Unsatisfactory and who wish to ask for permission to continue in their program must make a request to the Associate Dean (Student Affairs) as soon as they are placed in Unsatisfactory Standing. Readmission will be considered only when proof of extenuating circumstances that affected academic performance can be provided (e.g., medical or other documentation).

Students whose Standing is still Incomplete by the end of the Course Change period should immediately consult with the Music Student Affairs Office.

10.8.15 Graduation Requirements

1. Completion of all courses and proficiency requirements specified in the candidate's program. Students registered in two programs must fulfill all requirements for both programs. A minimum grade of C (or higher, depending on the program) must be achieved in all required courses, all complementary courses specified by course number, and in those courses which are prerequisites or corequisites. A grade of D (non-continuation pass) is acceptable only in elective courses or complementary courses that are not specified by course number.
2. Minimum cumulative grade point average of 2.00.
3. Completion of a minimum of credits in residence at McGill University (B.Mus.: 60 credits, L.Mus.: 48 credits, Artist Dip.: 32 credits).

For more information on applying to graduate, see [www.mcgill.ca/student-records/graduation/graduation-info](http://www.mcgill.ca/student-records/graduation/graduation-info).

10.8.16 Graduation Honours

For information on the designation of Dean’s Honour List awarded at graduation, see University Regulations and Resources > Dean’s Honour List.

For information on the designation of Distinction awarded at graduation, see University Regulations and Resources > Distinction.

Departments may recommend to the Faculty that students be awarded Outstanding Achievement in recognition of superior performance on an instrument or in an academic discipline.

10.9 Programs of Study

The Department of Music Research offers undergraduate degrees in Composition, Music Education, Music History, Theory, and the Faculty Program. The Department also offers Minors in Music History and Composition and two Minors in the area of Music Technology.

The Department of Performance offers undergraduate degrees in Performance, Early Music Performance, and Jazz Performance and diploma programs in L.Mus. and the Artist Diploma.

10.9.1 Department of Music Research: Composition; Music Education; Music History; Theory; Faculty Program

At both the undergraduate and graduate levels, the Department embraces the disciplines of Composition, Music Education, Music History, and Theory; and at the graduate level, Music Technology and Sound Recording. The philosophy of the Department is to encourage integration of the disciplines as much as possible within the learning process in each program of study: the development of basic musicianship, the absorption of the grammar and syntax of musical discourse, and the study of the world of ideas are understood as interconnected.

Major programs offer the student some focus with the flexibility to pursue other areas of interest. The Faculty program is intended to offer an option for individual and creative plans of study. All of the Department's programs give a solid grounding in analytic, synthetic, and writing skills that are useful preparation not only for the musical profession but also for professions as diverse as law, journalism, management, and librarianship.

The Music Education program combines an orientation towards a professional career in primary and secondary schools with sensitivity to broader intellectual frameworks against which teachers should understand their roles. This program is offered concurrently with the B.Ed., Music (see section 10.9.3: B.Mus./B.Ed. Bachelor of Music and Bachelor of Education Concurrent Program).

The Department also offers a Minor in Music History and a Minor in Composition to students who seek to place their work in a larger context, as well as a Minor in Musical Applications of Technology and a Minor in Musical Science and Technology to Music students and to students from other faculties.

For each program, all courses listed are REQUIRED courses unless otherwise indicated.

10.9.1.1 Bachelor of Music (B.Mus.) - Major Composition (126 credits)

The Bachelor of Music (B.Mus.) - Major Composition program requires 91 credits (plus 35 credits for the Freshman requirement for out-of-province students).

It includes 21 credits of non-music and free elective courses so that students may pursue other academic interests outside of music.

Program Prerequisites - Freshman Program (35 credits)

35 credits selected as described below, in consultation with the Program Adviser:

23 credits of Prerequisite Courses
2 credits of Assigned Small Ensemble
4 credits of Basic Ensemble Training
6 credits of Non-Music Electives

Prerequisite Courses

23 credits, all of the courses below:

Note: Students who can demonstrate through auditions and placement tests that they have mastered the material in any of the courses below will be exempt from them and may proceed to more advanced courses.

## Complementary Courses (40 credits)

40 credits selected as follows:
- 30 credits of Theory (Complementary)
6 credits of Music History
4 credits of Performance

**Theory**
30 credits
6 credits selected from:

- MUTH 202 (3) Modal Counterpoint 1
- MUTH 204 (3) Tonal Counterpoint 1
- MUTH 302 (3) Modal Counterpoint 2
- MUTH 304 (3) Tonal Counterpoint 2

6 credits selected from:

- MUTH 321 (3) Topics in Tonal Analysis
- MUTH 322 (3) Topics in Post-Tonal Analysis
- MUTH 426 (3) Topics in Early Music Analysis
- MUTH 541 (3) Topics in Popular Music Analysis

6 credits selected from:

- MUTH 528 (3) Schenkerian Theory and Analysis
- MUTH 529 (3) Proseminar in Music Theory
- MUTH 538 (3) Mathematical Models for Musical Analysis

12 credits selected from courses not taken above and the following:

- MUCO 462 (3) Advanced Tonal Writing
- MUCO 575 (3) Topics in Composition
- MUCH 539 (3) Topics in Advanced Writing Techniques

**Music History**
6 credits of courses with an MUHL or MUPP prefix.

**Performance**
4 credits selected from:

- MUEN 563 (2) Jazz Vocal Workshop
- MUEN 572 (2) Cappella Antica
- MUEN 573 (2) Baroque Orchestra
- MUEN 587 (2) Cappella McGill
- MUEN 590 (2) McGill Winds
- MUEN 592 (2) Chamber Jazz Ensemble
- MUEN 593 (2) Choral Ensembles
- MUEN 594 (2) Contemporary Music Ensemble
- MUEN 595 (2) Jazz Ensembles
- MUEN 597 (2) Orchestral Ensembles
Non-Music Electives (9 credits)

Free Electives (18 credits)

10.9.1.4 Bachelor of Music (B.Mus.) - Faculty Program Music (125 credits)

The Bachelor of Music (B.Mus.) - Faculty Program Music requires 125 credits and has been designed to accommodate those students who are either undecided about the area of music in which they wish to specialize, or who are interested in a pattern of specialization not provided in the established major programs, or who are interested in combining studies in music with studies in other disciplines. Students registered in the Faculty Program may, with the approval of a staff adviser, design their own programs around specific interests or develop programs with a broader base by incorporating courses from other disciplines and faculties.

Program Prerequisites - Freshman Program (35 credits)

35 credits selected as described below, in consultation with the Program Adviser:

23 credits of Prerequisite courses
2 credits of Assigned Small Ensemble
4 credits of Basic Ensemble Training
6 credits of non-Music electives

Prerequisite Courses

23 credits, all of the courses below:

Note: Students who can demonstrate through auditions and placement tests that they have mastered the material in any of the courses below will be exempt from them and may proceed to more advanced courses.

MUHL 186 (3) Western Musical Traditions
MUIN 180 (3) BMus Practical Lessons 1
MUIN 181 (3) BMus Practical Lessons 2
MUPD 135 (1) Music as a Profession 1
MUPD 136 (1) Music as a Profession 2
MUSP 140 (2) Musicianship Training 1
MUSP 141 (2) Musicianship Training 2
MUSP 170 (1) Musicianship (Keyboard) 1
MUSP 171 (1) Musicianship (Keyboard) 2
MUTH 150 (3) Theory and Analysis 1
MUTH 151 (3) Theory and Analysis 2

Required Courses (22 credits)

22 credits of the required courses are selected as follows:

9 credits of Theory
4 credits of Musicianship
3 credits of Music History
6 credits of Performance

Theory

9 credits

MUTH 250 (3) Theory and Analysis 3
MUTH 251 (3) Theory and Analysis 4

Music Electives (20 credits)

Non-Music Electives (3 credits)

Free Electives (33 credits)

10.9.1.5 Special Prerequisite Courses for M.Mus. in Sound Recording

Note: changes are anticipated in the Special Prerequisite Courses for M.Mus. in Sound Recording. For the most up-to-date information, consult the Sound Recording Program website: www.music.mcgill.ca/sr/build.

Students wishing to follow this package of prerequisite courses while registered in the Faculty Program or in any other B.Mus. program must notify the Sound Recording Area Chair of their intent to do so.

Schulich School of Music (27 credits)

MU260 (3) Instruments of the Orchestra
MUMT 202 (3) Fundamentals of New Media
MUMT 203 (3) Introduction to Digital Audio
MUSR 232 (3) Introduction to Electronics
MUSR 300D1 (3) Introduction to Music Recording
MUSR 300D2 (3) Introduction to Music Recording
MUMT 310 (3) Music and the Internet
MUSR 339 (3) Introduction to Electroacoustics
One of (complementary):
MUMT 302 (3) New Media Production 1
MUMT 306 (3) Music and Audio Computing 1

Faculty of Science (3 credits)

PHYS 224 (3) Physics of Music

Note: Students admitted as a Special Student in the prerequisite package for Sound Recording must meet with the Sound Recording Adviser prior to registering in MUMT (Music Technology) courses. In order to be considered for admission to the Master of Music in Sound Recording, students must attain a minimum grade of B in all of the above courses and must have a B.Mus. degree with a minimum CGPA of 3.00.

10.9.1.6 Minor Composition (18 credits)

The Minor Composition is available to all students with approval (with the exception of students in the Major Composition.) This option will take the place of music and/or free electives.

Required Courses

MU230 (3) The Art of Composition
MU260 (3) Instruments of the Orchestra
MU341 (3) Digital Studio Composition 1

Complementary Courses (9 credits)

9 credits selected from
MUHL 385 (3) Early Twentieth-Century Music
MUHL 391 (3) Canadian Music
MUHL 392 (3) Music since 1945
MUTH 322 (3) Topics in Post-Tonal Analysis
MUTH 539 (3) Topics in Advanced Writing Techniques
10.9.1.7 Minor Music Education (18 credits)

The Minor in Music Education is available to all students, with the exception of students in the concurrent B.Mus.; Major in Music Education/B.Ed.; Major in Music Elementary and Secondary program, subject to the approval of the Schulich School of Music. This Minor will take the place of free electives. The Minor Music Education has limited enrolment. Students must choose complementary courses from one of the three available streams.

10.9.1.10 Minor Musical Applications of Technology (18 credits)

The goal of this Minor is to provide instruction in practical and creative applications of technology for musical purposes. This program will help prepare students for production-oriented jobs in the creative arts.

This program is open to students from any discipline and has no prerequisites other than familiarity with computers. Application forms will be available from the Department of Music Research (research.music@mcgill.ca; Room A726A) in the Schulich School of Music from February 1 and must be completed and returned to the Department of Music Research by June 1. Late applications will not be accepted and no students will be admitted to the Minor in January. Successful applicants will be notified by June 20. Registration will be limited to available lab space.

Students will be selected on the basis of their previous background or experience in music technology and/or sound recording, their computer programming skills, their expressed interest in the program, and their Cumulative Grade Point Average.

Advising for the Minor is available from the Area Chair for the Music Technology Program, (Prof. Ichiro Fujinaga - ichiro.fujinaga@mcgill.ca). Further information on this program is available on the Music Technology website at: http://www.music.mcgill.ca/musictech/programmes_and_admissions.

Minor Musical Science and Technology (18 credits)

Revision, August 2011. Start of revision.

This Minor focuses on interdisciplinary topics in science and technology as applied to music. The goal of the program is to help prepare students for commercial jobs in the audio technology sector and/or for subsequent graduate research study. This Minor is designed to serve students who already have a good background in the sciences and prior experience with Math and Computer Science courses.

Application forms will be available from the Department of Music Research (research.music@mcgill.ca; Room A726C) in the Schulich School of Music from February 1, and must be completed and returned to the Department of Music Research by June 1. Late applications will not be accepted and no students will be admitted to the Minor in January. Successful applicants will be notified by June 20.

Registration will be limited to available lab space. Selection is based on previous experience in math, computer programming, and related sciences, expressed interest in the program, and Cumulative Grade Point Average.

Advising for the Minor is available from the Area Chair for the Music Technology program, (Prof. Ichiro Fujinaga - ichiro.fujinaga@mcgill.ca). Further information on this program is available on the Music Technology website at: http://www.music.mcgill.ca/musictech/programmes_and_admissions.

Required Courses (15 credits)

15 credits, select all of the following:

- MUMT 203 (3) Introduction to Digital Audio
- MUMT 250 (3) Music Perception and Cognition
- MUMT 306 (3) Music and Audio Computing 1
- MUMT 307 (3) Music and Audio Computing 2
- MUMT 501 (3) Digital Audio Signal Processing

Complementary Courses (3 credits)

3 credits selected from:

- MUMT 402 (3) Advanced Multimedia Development
- MUMT 502 (3) Senior Project: Music Technology
- PHYS 224 (3) Physics of Music

Revision, August 2011. End of revision.

Department of Performance

The Department offers undergraduate and graduate degree programs leading to the B.Mus., M.Mus., and D.Mus., and diploma programs leading to the L.Mus. and Artist Diploma in all areas of musical performance and a Graduate Diploma in Professional Performance. Programs include regular practical instruction available on all instruments and a highly developed ensemble program. The programs offer a number of major options including Orchestral Training, Solo, Jazz, and Early Music. The Orchestral Training program is one of the largest performance programs in North America. Many of its graduates are now members of professional orchestras throughout North America and Europe. McGill ensembles perform many concerts each year, including a number in centres across North America. McGill ensembles have performed at Carnegie Hall, Le Grand Théâtre [Quebec], the National Arts Centre, the International...
Buxtehude-Scheidt Festival, Lincoln Center, Roy Thomson Hall, Salle Wilfrid Pelletier, the International Association of Jazz Educators Convention in New Orleans, in Washington and Boston, Paris, London, and Cork [Ireland], at the Holetown Festival in Barbados, in Mexico, and throughout the United States and Canada. In addition, they have recorded for McGill Records. These recordings have received considerable critical acclaim and a number of awards, including a Noah Greenberg Award, three Grand Prix du Disques, and a Juno Award.

For each program, all courses listed are REQUIRED courses unless otherwise indicated.

10.9.2.1 Bachelor of Music (B.Mus.) - Major Performance Piano (125 credits)

The Bachelor of Music (B.Mus.) - Major Performance Piano program requires 90 credits (plus 35 credits for the freshman requirement for out-of-province students).

125 credits are selected as follows:
35 credits - Prerequisite Requirements (for out-of-province students)
28 credits - Required Performance
14 credits - Complementary Performance
18 credits - Required Courses (Theory, Musicianship and Music History)
6 credits - Complementary Courses (Music History, Literature or Performance Practice)
21 credits - Free Electives
3 credits - Non-Music Electives

Special Requirements:
1. Continuation in the program requires a minimum grade of B- in practical instruction/exams and ensembles.

Program Prerequisites - Freshman Program (35 credits)

35 credits selected as described below, in consultation with the Program Adviser:
23 credits of Prerequisite Courses
2 credits of Assigned Small Ensemble
4 credits of Basic Ensemble Training
6 credits of Non-Music Electives

Prerequisite Courses

23 credits, all of the courses below:

Note: Students who can demonstrate through auditions and placement tests that they have mastered the material in any of the courses below will be exempt from them and may proceed to more advanced courses.

Students who have been admitted to a degree or diploma program with keyboard as their principal instrument are exempt from MUSP 170 (but not from MUSP 171); see section on Keyboard Proficiency testing for complete information.

MUPG 212 (2) English Diction
MUPG 213 (2) German Diction

**Complementary History/Literature (6 credits)**
Two of:

- MUHL 372 (3) Solo Song Outside Germany and Austria
- MUHL 377 (3) Baroque Opera
- MUHL 387 (3) Opera from Mozart to Puccini
- MUHL 388 (3) Opera After 1900
- MUHL 390 (3) The German Lied

**Electives (18 credits)**

3 credits of non-Music Electives

15 credits of Free Electives (may not include courses with a MUEN prefix)

Prior to, or concurrent with registration in the corresponding Diction courses, the Voice Major must furnish evidence of having completed English Second Language courses, ITAL 205D1/ITAL 205D2, GERM 202, and FRSL 207, or their equivalent. This language requirement may be fulfilled by appropriate high school or CEGEP courses, or as part of the non-music and/or free elective requirements above, or by extra university courses.

**10.9.2.4 Bachelor of Music (B.Mus.) - Major Performance (Orchestral Instruments) (125 credits)**

The Bachelor of Music (B.Mus.) - Major Performance (Orchestral Instruments) program requires 90 credits (plus 35 credits for the Freshman requirement for out-of-province students).

125 credits are selected as follows:

- 35 credits - Prerequisite Requirements (for out-of-province students)
- 18 credits - Required Performance
- 27 credits - Complementary Performance
- 16 credits - Required Courses (Theory, Musicianship, and Music History)
- 8 credits - Complementary Courses (Musicianship and Music History, Literature, or Performance Practice)
- 18 credits - Free Electives
- 3 credits - Non-Music Electives

**Ensemble Requirements:**

1. Students majoring in violin, viola, or cello must commence their assigned ensembles with four terms of string quartets.
2. Violin Majors will be required to complete two terms of ensemble playing on viola.

**Special Requirements:**

Continuation in the program requires a minimum grade of B- in practical instruction/exams and ensembles.

**Program Prerequisites - Freshman Program (35 credits)**

35 credits selected as described below, in consultation with the Program Adviser:

- 23 credits of Prerequisite Courses
- 2 credits of Assigned Small Ensemble
- 4 credits of Basic Ensemble Training
- 6 credits of Non-Music Electives

**Prerequisite Courses**

23 credits, all of the courses below:

Note: Applicants who can demonstrate through auditions and placement tests that they have mastered the material in any of the courses below will be exempt from them and may proceed to more advanced courses.

- MUHL 186 (3) Western Musical Traditions
- MUIN 180 (3) BMus Practical Lessons 1
- MUIN 181 (3) BMus Practical Lessons 2
- MUPD 135 (1) Music as a Profession 1
- MUPD 136 (1) Music as a Profession 2
**Musicianship Training 1(2)**  
Musicianship Training 1

**Musicianship Training 2(2)**  
Musicianship Training 2

**Musicianship (Keyboard) 1(1)**  
Musicianship (Keyboard) 1

**Musicianship (Keyboard) 2(1)**  
Musicianship (Keyboard) 2

**Theory and Analysis 1(3)**  
Theory and Analysis 1

**Theory and Analysis 2(3)**  
Theory and Analysis 2

Non-Music Electives* (3 credits)

Free Electives* (18 credits)
(May not include courses with a MUEN prefix)

* Prior to, or concurrent with registration in the corresponding Diction courses, the Voice Major must furnish evidence of having completed English Second Language courses, ITAL 205D1/ITAL 205D, GERM 202, and FRSL 207, or their equivalent. This language requirement may be fulfilled by appropriate high school or CEGEP courses, or as part of the non-music and/or free elective requirements above, or by extra university courses.

10.9.2.7 Bachelor of Music (B.Mus.) - Major Performance Jazz (Saxophone, Trumpet, Trombone, Drums, Piano, Guitar, Bass, Voice) (126 credits)

The Bachelor of Music (B.Mus.) - Major Jazz Performance (Saxophone, Trumpet, Trombone, Drums, Piano, Guitar, Bass, Voice) program requires 91 credits (plus 35 credits for the Freshman requirement for out-of-province students).

126 credits are selected as follows:

35 credits - Prerequisite Requirements (for out-of-province students)
18 credits - Required Performance
18 credits - Complementary Performance
30 credits - Required Courses (Jazz improvisation, Theory and History)
4 credits - Complementary Music
3 credits - Non-Music Electives
18 credits - Free Electives

Special Requirements:
1. Students majoring in Jazz Performance must achieve a minimum grade of B- in all Jazz courses and Practical Instruction/Exams, including Jazz Combo and Ensembles, excluding MUJZ 100-level courses.
2. Non-Quebec jazz students must take four credits of non-jazz Basic Ensemble in the prerequisite year.

Program Prerequisites - Freshman Program (35 credits)

35 credits selected as described below, in consultation with the Program Adviser:

25 credits of Prerequisite Courses
4 credits of Basic Ensemble Training
6 credits of Non-Music Electives

Prerequisite Courses

25 credits, all of the courses below:

Note: Students who can demonstrate through auditions and placement tests that they have mastered the material in any of the courses listed below, will be exempt from them and may proceed to more advanced courses.

Incoming jazz students must take 4 credits of non-jazz Basic Ensemble in the prerequisite year. They may substitute, with the approval of the Department of Performance, non-jazz basic ensemble from another college or university for the extra credits required of non-Quebec applicants. Incoming jazz guitarists and pianists are automatically exempt from MUJZ 170 and MUJZ 171.
First-year students who have completed the Quebec Diploma of Collegial Studies (Diplôme d'études collégiales) in a Jazz concentration or equivalent, or students transferring from other universities or colleges, and have completed a course in the history of Jazz, with a grade of C or better, will be exempted from the first-year Jazz History Survey requirement (MUJZ 187).

Note: Jazz Combo MUEN 570 is taken in each term (1 credit + 1 credit)

10.9.2.11 Licentiate in Music (L.Mus.) - Major Performance Jazz (100 credits)
The Licentiate in Music (L.Mus.) Major Performance Jazz is a 100-credit program with options in various instruments.
Special Requirements:
1. Continuation in the program requires that a grade of A- be maintained in practical instruction/exams and ensembles.
2. Candidates must take the L.Mus. Jazz Performance 1 Examination at the end of their first year of study and the L.Mus. Jazz Performance 2 and 3 Examinations in each of the next two years if they hope to complete the program in the normal length of time.

Required Performance (48 credits)
All of the following courses:
MUIN 250 (8) L.Mus. Practical Instruction 1
MUIN 251 (8) L.Mus. Practical Instruction 2
MUIN 252 (0) L.Mus. Performance 1 Examination
MUIN 350 (8) L.Mus. Practical Instruction 3
MUIN 351 (8) L.Mus. Practical Instruction 4
MUIN 352 (0) L.Mus. Performance 2 Examination
MUIN 450 (8) L.Mus. Practical Instruction 5
MUIN 451 (8) L.Mus. Practical Instruction 6
MUIN 452 (0) L.Mus. Performance 3 Examination

Complementary Performance (18 credits)
Large Ensemble Training – during every term of enrolment as a full-time or part-time student.
18 credits selected as follows:

12 credits from:
MUEN 563 (2) Jazz Vocal Workshop
MUEN 572 (2) Cappella Antica
MUEN 573 (2) Baroque Orchestra
MUEN 587 (2) Cappella McGill
MUEN 590 (2) McGill Winds
MUEN 592 (2) Chamber Jazz Ensemble
MUEN 593 (2) Choral Ensembles
MUEN 594 (2) Contemporary Music Ensemble
MUEN 595 (2) Jazz Ensembles
MUEN 597 (2) Orchestral Ensembles

6 credits, select Jazz Combo Training - during every term of enrolment as a full-time or part-time student. MUEN 570 Jazz Combo (1 credit x 6 semesters).
MUEN 570 (1) Jazz Combo

Required Courses (30 credits)
30 credits selected as follows:
12 credits of Theory
12 credits of Improvisation/Musicianship
6 credits of History

**Theory**

- MUJZ 260 (3) Jazz Arranging 1
- MUJZ 261 (3) Jazz Arranging 2
- MUJZ 340 (3) Jazz Composition 1
- MUJZ 341 (3) Jazz Composition 2

**Improvisation/Musicianship**

- MUJZ 223 (3) Jazz Improvisation/Musicianship 1
- MUJZ 224 (3) Jazz Improvisation/Musicianship 2
- MUJZ 423 (3) Jazz Improvisation/Musicianship 3
- MUJZ 424 (3) Jazz Improvisation/Musicianship 4

**History**

- MUJZ 187 (3) Jazz History Survey
- MUJZ 493 (3) Jazz Performance Practice

**Complementary Courses**

4 credits from the following:

Note: Students select EITHER MUJZ 440D1 and MUJZ 440D2 OR MUJZ 461D1 and MUJZ 461D2.

- MUJZ 440D1 (2) Advanced Jazz Composition
- MUJZ 440D2 (2) Advanced Jazz Composition
- MUJZ 461D1 (2) Advanced Jazz Arranging
- MUJZ 461D2 (2) Advanced Jazz Arranging

**10.9.2.12 Artist Diploma - Major Performance Voice (65 credits)**

The Artist Diploma Major Performance Voice is a 65-credit program.

Special Requirements:
1. Continuation in the program requires a minimum grade of A- in practical instruction/exams, ensembles, and voice coaching.
2. Candidates who have not taken the courses in Italian, French, English, and German Diction as specified in the L.Mus. program must add them to the above requirements.
3. A leading operatic or oratorio role may substitute for one recital.

Note:
Courses taken as credit toward a B.Mus. or L.Mus. may not be applied to the Artist Diploma requirements except for the required courses in Theory, Musicianship and Music History or Performance Practice.

**Required Performance (41 credits)**

41 credits, select all the courses below:

- MUIN 460 (8) Artist Diploma Practical Instruction 1
- MUIN 461 (8) Artist Diploma Practical Instruction 2
- MUIN 462 (0) Artist Diploma Recital 1
Complementary Performance (8 credits)
Large Ensemble Training - during every term of enrolment as a full-time or part-time student.

8 credits from:
MUEN 496 (2) Opera Studio
MUEN 563 (2) Jazz Vocal Workshop
MUEN 572 (2) Cappella Antica
MUEN 578 (1) Song Interpretation 1
MUEN 579 (1) Song Interpretation 2
MUEN 580 (1) Early Music Ensemble
MUEN 587 (2) Cappella McGill
MUEN 593 (2) Choral Ensembles
MUEN 594 (2) Contemporary Music Ensemble

Required Courses (10 credits)
10 credits selected as follows:
6 credits of Theory
4 credits of Musicianship

Theory
MUTH 310 (3) Mid and Late 19th-Century Theory and Analysis
MUTH 311 (3) 20th-Century Theory and Analysis

Musicianship
MUSP 329 (2) Musicianship 5
MUSP 331 (2) Musicianship 6

Complementary Music History or Performance Practice (6 credits)
6 credits selected from courses with a MUHL or MUPP prefix. These may include MUHL 362 or MUHL 393, but not both.

10.9.2.13 Artist Diploma - Major Performance (All Instruments) (62 credits)
The Artist Diploma is a 62-credit program offered in all areas of musical performance.

Ensemble Requirement:
1. Violin Majors will be required to complete two terms of ensemble playing on viola.

Special Requirements:
1. Continuation in the program requires a minimum grade of A- in practical instruction/exams and ensembles.
2. Guitarists may present a third recital, which may be counted as a substitute for 4 credits of ensemble. Organists may present a third recital or Concerto 1 and 2, which may be counted as a substitute for 4 credits of ensemble. For concerto requirements, refer to the "Postgraduate Study" section.

Note:
Courses taken as credit toward a B.Mus. or L.Mus. may not be applied to the Artist Diploma requirements except for the required courses in Theory, Musicianship and Music History or Performance Practics.

**Required Performance (34 credits)**

34 credits, select all the courses below:

- MUIN 460 (8) Artist Diploma Practical Instruction 1
- MUIN 461 (8) Artist Diploma Practical Instruction 2
- MUIN 462 (0) Artist Diploma Recital 1
- MUIN 469 (1) Artist Diploma Concerto 1
- MUIN 560 (8) Artist Diploma Practical Instruction 3
- MUIN 561 (8) Artist Diploma Practical Instruction 4
- MUIN 562 (0) Artist Diploma Recital 2
- MUIN 569 (1) Artist Diploma Concerto 2

**Complementary Performance (12 credits)**

Large Ensemble Training - during every term of enrolment as a full-time or part-time student.

8 credits from:

- MUEN 563 (2) Jazz Vocal Workshop
- MUEN 572 (2) Cappella Antica
- MUEN 573 (2) Baroque Orchestra
- MUEN 587 (2) Cappella McGill
- MUEN 590 (2) McGill Winds
- MUEN 592 (2) Chamber Jazz Ensemble
- MUEN 593 (2) Choral Ensembles
- MUEN 594 (2) Contemporary Music Ensemble
- MUEN 595 (2) Jazz Ensembles
- MUEN 597 (2) Orchestral Ensembles

Assigned Small Ensemble – during every term of enrolment as a full-time or part-time student.

4 credits from:

- MUEN 560 (1) Chamber Music Ensemble
- MUEN 578 (1) Song Interpretation 1
- MUEN 579 (1) Song Interpretation 2
- MUEN 580 (1) Early Music Ensemble
- MUEN 585 (1) Sonata Masterclass
- MUEN 589 (1) Woodwind Ensembles
- MUEN 591 (1) Brass Consort
- MUEN 598 (1) Percussion Ensembles

**Non-Orchestral Instruments (8 credits)**
Complementary ensembles, to be approved by the Department (minimum of two 1-credit ensembles per term for four terms).

**Required Courses (10 credits)**

10 credits of required courses are selected as follows:

- 6 credits of Theory
- 4 credits of Musicianship

**Theory**

6 credits, select the courses below:

<table>
<thead>
<tr>
<th>Course</th>

### 10.9.3 B.Mus./B.Ed. Bachelor of Music and Bachelor of Education Concurrent Program

The Bachelor of Education in Music is an integrated four-year 120-/121-credit program of initial teacher training that leads to certification as a teacher in the Province of Quebec. When offered concurrently with the Bachelor of Music (Major in Music Education), the program offers students the opportunity to obtain a Bachelor of Education degree and a Bachelor of Music degree after the completion of 137 credits, normally five years (172 credits or six years for out-of-province students). The Concurrent program combines academic studies in music, professional studies, and field experience. The two degrees are awarded during the same convocation period.

The components of the 137-credit Bachelor of Education in Music/Bachelor of Music (Music Education) are as follows:

- 55 professional credits
- 70 Music academic credits
- 12 elective credits (which must include 3 credits of non-Music electives)

Students in the Concurrent B.Mus./B.Ed. who receive an F or J in any Field Experience course are placed in Unsatisfactory Standing. Although they may complete their term, they are required to withdraw from the Concurrent program; however, they may apply to transfer to the B.Mus. Faculty program.

### 10.9.3.1 Concurrent Bachelor of Music (B.Mus.) - Major Music Education and Bachelor of Education (B.Ed.) - Music Elementary and Secondary (137 credits)

The Bachelor of Music (B.Mus.) - Major Music Education, when offered concurrently with the The Bachelor of Education - Major Music Elementary and Secondary, provides students with the opportunity to obtain a Bachelor of Music degree and a Bachelor of Education degree after the completion of 137 credits, normally five years (172 credits or six years for out-of-province students*). The Concurrent program combines academic studies in music, professional studies, and field experience. The two degrees are awarded during the same convocation period.
* Out-of-province students or those who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the Concurrent program.

To be admitted to the Concurrent program, students must satisfy the regular admission requirements of the Schulich School of Music and Faculty of Education. Normally, students will be admitted to both components of the Concurrent program simultaneously. Applicants who already hold a Bachelor of Music degree should apply to the Faculty of Education. Students who have completed 30 or more credits in a Bachelor of Music program, exclusive of the Freshman year for out-of-province students, should apply for admission to the Concurrent program.

All applications for the Concurrent program are to be made to the Admissions Office of the Schulich School of Music.

The B.Mus. Major Music Education program in the Schulich School of Music focuses on the development of the prospective music educator as a musician. This is achieved not only through core music history, theory, musicianship, and performance courses, but also through different instrumental, vocal, and conducting techniques courses. Laboratory experiences provide an opportunity to develop facility with basic music rehearsing/teaching techniques, with emphasis on the ability to diagnose and correct technical and musical problems. The B.Ed. Music Elementary and Secondary program in the Faculty of Education focuses on the development of the musician as an educator. This is achieved through courses in educational foundations, music pedagogy and pedagogical support, and a practicum component comprised of four field experiences and supporting professional seminars.

Students who decide to complete only a Bachelor of Music may transfer at any time into the Bachelor of Music, Faculty Program. Students who wish to complete only the Bachelor of Education Music program have the option of doing so after the successful completion of the first two years of the Concurrent Program and MUIN 283 "BMus Concentration Final Examination" or equivalent. They would be required to complete 61 music credits, 6 elective credits, and 55 education credits from the program given below.

The components of the 137-credit Concurrent Bachelor of Music - Major Music Education and Bachelor of Education - Music Elementary and Secondary are as follows:

- 55 professional Education credits
- 70 Music academic credits
- 9 Music elective credits
- 3 non-Music elective credits

**Program Prerequisites - Freshman Program**

35 credits

**Prerequisite Courses**

35 credits distributed as follows:

- 2 credits (1 credit per term) Assigned Small Ensemble
- 4 credits (2 credits per term) Basic Ensemble Training
- 6 credits of non-Music electives
- and 23 credits in the following course list:

Students who can demonstrate through auditions and placement tests that they have mastered the material in any of the courses below will be exempt from them and may proceed to more advanced courses. First-year students enrolled in the Bachelor of Music program who have completed the Quebec Diploma of Collegial Studies (Diplôme d'études collégiales) in a Music concentration or equivalent, or students transferring from other universities or colleges, who have successfully completed a course in the history of Western music, with a grade of C or better, will be exempted from the first-year Western Musical Traditions requirement (MUHL 186).

- MUHL 186 (3) Western Musical Traditions
- MUIN 180 (3) BMus Practical Lessons 1
- MUIN 181 (3) BMus Practical Lessons 2
- MUPD 135 (1) Music as a Profession 1
- MUPD 136 (1) Music as a Profession 2
- MUSP 140 (2) Musicianship Training 1
- MUSP 141 (2) Musicianship Training 2
- MUSP 170 (1) Musicianship (Keyboard) 1
- MUSP 171 (1) Musicianship (Keyboard) 2
- MUTH 150 (3) Theory and Analysis 1
- MUTH 151 (3) Theory and Analysis 2

**Required Music Components (49 credits)**
49 credits of required Music courses distributed as follows:
25 credits of Music Education
11 credits of Theory
4 credits of Musicianship
3 credits of Music History
6 credits of Performance

**Music Education**
25 credits:
- MUCT 235 (3) Vocal Techniques
- MUGT 215 (1) Basic Conducting Techniques
- MUGT 354 (3) Music for Children
- MUGT 358 (3) General Music for Adults and Teenagers
- MUGT 401 (3) Issues in Music Education
- MUIT 202 (3) Woodwind Techniques
- MUIT 203 (3) Brass Techniques
- MUIT 204 (3) Percussion Techniques
- MUIT 356 (3) Jazz Instruction: Philosophy and Techniques

**Theory**
11 credits:
- MUTH 250 (3) Theory and Analysis 3
- MUTH 251 (3) Theory and Analysis 4
- MUTH 350 (3) Theory and Analysis 5
- MUTH 461 (2) Choral and Keyboard Arranging

**Musicianship**
4 credits:
- MUSP 240 (2) Musicianship Training 3
- MUSP 241 (2) Musicianship Training 4

**Music History**
3 credits:
- MUHL 286 (3) Critical Thinking About Music

**Performance**
6 credits:
- MUIN 280 (3) BMus Practical Lessons 3
- MUIN 281 (3) BMus Practical Lessons 4
- MUIN 283 (0) BMus Concentration Final Examination

**Complementary Music Components (21 credits)**
21 credits of complementary Music courses distributed as follows:
9 credits of Music Education
2 credits of Musicianship
6 credits of Music History
4 credits of Performance

**Music Education**
3 credits, one of:
- MUIT 201 (3) String Techniques
- MUIT 250 (3) Guitar Techniques

3 credits, one of:
- MUCT 315 (3) Choral Conducting 1
- MUIT 315 (3) Instrumental Conducting

3 credits, select EDEA 362 or any course with a prefix of MUIT or MUGT.
- EDEA 362 (3) Movement, Music and Communication

**Musicianship**
2 credits from:
- MUSP 324 (2) Musicianship for Strings
- MUSP 330 (2) Musicianship for Woodwind
- MUSP 335 (2) Musicianship for Brass
- MUSP 346 (2) Post-Tonal Musicianship
- MUSP 350 (2) Musicianship for Pianists
- MUSP 353 (2) Musicianship for Voice
- MUSP 354 (2) Introduction to Improvisation and Ornamentation
- MUSP 355 (2) Musicianship for Percussion
- MUSP 381 (2) Singing Renaissance Notation

**Music History**
6 credits of courses with a MUHL or a MUPP prefix.

**Performance**
4 credits from:
- MUEN 563 (2) Jazz Vocal Workshop
- MUEN 572 (2) Cappella Antica
- MUEN 573 (2) Baroque Orchestra
- MUEN 587 (2) Cappella McGill
- MUEN 590 (2) McGill Winds
- MUEN 592 (2) Chamber Jazz Ensemble
- MUEN 593 (2) Choral Ensembles
- MUEN 594 (2) Contemporary Music Ensemble
- MUEN 597 (2) Orchestral Ensembles
Electives (12 credits)
9 credits of free electives
3 credits of non-Music electives

Required Education Courses (45 credits)
* Note: Students take either EDEE 355 or EDPE 304, but not both.

10.9.4 Management Minor Programs

The Desautels Faculty of Management offers a Minor in Management and a Minor in Marketing to B.Mus. undergraduates that allow Music students to include courses in their undergraduate program that will help prepare them for a career in music. All minors for non-Management students require the completion of an application; the form may be found at www.mcgill.ca/desautels/bcom/prospective_students/minors.

Detailed information on these minors can be found on the Desautels Faculty of Management website, www.mcgill.ca/desautels/bcom/prospective_students/minors, and under Desautels Faculty of Management > section 9.9.7: Minors for Non-Management Students.

10.10 Practical Subjects

All returning students must submit a green Lesson Assignment Card and/or orange Voice Coaching Assignment Card to the Performance Department by April 30 of each year they wish to register for lessons.

Students taking practical instruction, but who are registered for less than 12 credits per term, will be charged $785 in addition to the practical instruction fee ($500) and per-credit fee for their instrument lessons for each term in which they are, or become, part-time students (Artist Diploma students: $1,175 per term). This is the same fee applied to students who have used up their quota of lessons at the per-credit fee.

10.10.1 Practical Assignment and Lessons

10.10.1.1 Registration/Withdrawal

Registration for practical instruction and examinations (MUIN courses) is not available on Minerva. Students are reminded to submit a Lesson Assignment Card to the Department of Performance by the specified deadlines. Practical Instruction will then be added onto students’ records.

The deadline for withdrawing from practical lessons is the end of the second week of classes in any term.

10.10.1.2 Assignment of Teachers

The assignment of students to teachers for private lessons is the responsibility of the Chair of the Department of Performance. Student requests for specific teachers will be taken into consideration where possible.

It is understood that returning students will study with the same teacher unless prior arrangements have been made with the Chair of the Department in consultation with the teachers concerned. However, those students who do not return the Lesson Assignment Card (including Voice Coaching) by the specified deadline cannot be guaranteed the teacher of their choice, and they will be assessed a late fee of $50. Teacher assignments will be made soon after the period of enrollment and confirmed during the first week of classes. Following this assignment, it is the students’ responsibility to contact their teachers and arrange lesson times.

Individual lessons missed as a consequence of the instructor’s absence will be made up at the mutual convenience of the instructor and student. Lessons missed as the result of the student’s absence will be made up only if notice of cancellation has been given 48 hours in advance, or if a doctor’s certificate is produced and prior notice of the cancellation is given.

Note: Students who are taking practical lessons in fulfillment of the requirements for any degree are required to study with teachers on the staff of the Schulich School of Music.

10.10.2 Examinations and Goals in Practical Subjects

Different levels of achievement are required of students depending upon the program of study for which they are registered. These levels are defined in part by the difficulty of material and length of program required at the various examinations, and in part by the examiners’ assessment of how well the student plays this material.

In general, there are five categories of practical study: Concentration Study, Major Study, Licentiate Study, Postgraduate Study, and Elective Study.

10.10.2.1 Concentration Study

A student in the Faculty program or specializing in Composition, Music Education, Music History, Music Technology, or Theory is obliged to present one examination in order to fulfil the practical requirement of these programs: the Concentration Final Examination (MUIN 283).

The sequence would normally be:

| MUIN 180 | BMus Practical Lessons 1 |
| MUIN 181 | BMus Practical Lessons 2 |
| MUIN 280 | BMus Practical Lessons 3 |
| MUIN 281 | BMus Practical Lessons 4 |
| MUIN 283 | BMus Concentration Final Examination |

**BMus Concentration Final Examination (MUIN 283)**

*Purpose:* To determine that the student is sufficiently accomplished to qualify for the degree of Bachelor of Music. In the event that the student is inadequately prepared, the panel may recommend to the department in which the student is registered that: a) the student be asked to withdraw from the program; or, b) the student be permitted to redo the examination.

*Panel:* A minimum of two staff members (not including the teacher), one of whom must be from the area. The panel is appointed by the Chair of the Department of Performance. At the discretion of the Departmental Chair, the teacher may be included on panels of three or more examiners.

*Distribution of Marks:* For students registered in practical lessons through the Schulich School of Music, the teacher submits a term mark which is included as 50% of the final mark. In instances where the student’s teacher is on the panel, the teacher’s global evaluation will nevertheless be equal to 50% of the final mark. This grade will also be entered in the student’s current or most recent term of practical instruction. When a student is not registered for lessons through the Schulich School of Music, the final mark will be the average of the marks submitted by the examination panel and will also be entered in the most recent term of practical instruction.

10.10.2.2 Major Study

A student majoring in Performance (B.Mus. or L.Mus.) must show talent for this field before being admitted to the program. The practical requirement for these programs comprises examinations and recitals as specified in the programs.

10.10.2.2.1 B.Mus. Major in Performance, Major in Early Music Performance, and Major in Jazz Performance

The sequence would normally be:

| MUIN 180 | BMus Practical Lessons 1 |
| MUIN 181 | BMus Practical Lessons 2 |
| MUIN 280 | BMus Practical Lessons 3 |
| MUIN 281 | BMus Practical Lessons 4 |
| MUIN 282 | BMus Performance Examination 1 |

| MUIN 380 | BMus Practical Lessons 5 |
| MUIN 333 | Piano Techniques 2 |
| MUIN 381 | BMus Practical Lessons 6 |
| MUIN 382 | BMus Performance Examination 2 |

| MUIN 480 | BMus Practical Lessons 7 |
| MUIN 433 | Piano Techniques 3 |
BMus Practical Lessons 8
BMus Performance Examination 3
Concerto (mandatory test for pianists)

BMus Performance Examination 1 (MUIN 282)

*Purpose:* To assess the student’s progress in the practical area and determine whether or not the student may continue in the program. The panel may recommend to the Department that the student be: a) asked to withdraw from the program; b) permitted to continue to the BMus Performance Examination 2.

*Panel:* A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.

*Distribution of Marks:* The teacher submits a term mark, which is included as 50% of the final mark. In instances where the student’s teacher is on the panel, the teacher’s global evaluation will nevertheless be equal to 50% of the final mark. This grade will also be entered in the student’s current or most recent term of practical instruction.

BMus Performance Examination 2 (MUIN 382)

*Purpose:* To assess the student’s ability to perform a program of sufficient length and suitable repertoire as specified in the requirements for each instrument.

*Panel:* A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.

*Distribution of Marks:* Each member of the panel submits a mark for the examination, with the final mark being the average. This grade will also be entered in the student’s current or most recent term of practical instruction.

BMus Performance Examination 3 (MUIN 482)

*Purpose:* All recitals are to be performed in public before a jury and are intended to demonstrate technical mastery of their instrument/voice as well as an understanding of different musical styles appropriate to their level of study.

*Panel:* A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.

*Distribution of Marks:* Each member of the panel submits a mark for the examination, with the final mark being the average. This grade will also be entered in the student’s current or most recent term of practical instruction.

10.10.2.3 Licentiate Study

Students must show talent for this field before being admitted to the program. Grades of A- in all practical requirements are mandatory for continuation in the program.

10.10.2.3.1 L.Mus. Performance

The sequence would normally be:

MUIN 250  L.Mus. Practical Instruction 1
MUIN 251  L.Mus. Practical Instruction 2
MUIN 252  L.Mus. Performance 1 Examination

MUIN 350  L.Mus. Practical Instruction 3
MUIN 333  Piano Techniques 2
MUIN 351  L.Mus. Practical Instruction 4
MUIN 352  L.Mus. Performance 2 Examination

MUIN 450  L.Mus. Practical Instruction 5
MUIN 433  Piano Techniques 3
MUIN 451  L.Mus. Practical Instruction 6
MUIN 452  L.Mus. Performance 3 Examination
MUIN 369  Concerto (mandatory test for pianists)

L.Mus. Performance 1 Examination (MUIN 252)

Purpose: To assess the student’s progress in the practical area and determine whether or not the student may continue in the program. The panel may recommend to the Department that the student be: a) asked to withdraw from the program; or b) permitted to continue to the L.Mus. Performance 2 Exam. Panel: A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance. Distribution of Marks: The teacher submits a term mark, which is included as 50% of the final mark. In instances where the student’s teacher is on the panel, the teacher’s global evaluation will nevertheless be equal to 50% of the final mark. This grade will also be entered in the student’s current or most recent term of practical instruction.

L.Mus. Performance 2 Examination (MUIN 352)

Purpose: The recital is a public presentation, before a jury, intended to demonstrate competence in public solo performance. Non-keyboard performers and singers must use appropriate accompaniment. Panel: A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance. Distribution of Marks: Each member of the panel submits a mark for the examination, with the final mark being the average. This grade will also be entered in the student’s current or most recent term of practical instruction.

L.Mus. Performance 3 Examination (MUIN 452)

Purpose: All recitals are to be performed in public before a jury and are intended to demonstrate technical mastery of their instrument/voice as well as an understanding of different musical styles appropriate to their level of study. Panel: A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance. Distribution of Marks: Each member of the panel submits a mark for the examination, with the final mark being the average. This grade will also be entered in the student’s current or most recent term of practical instruction.

10.10.2.4 Postgraduate Study

Artist Diploma candidates must present a number of public recitals and fulfil various special performance requirements (concertos, chamber music, orchestral passages, etc.). Grades of A- in all practical requirements are mandatory for continuation in the program.

M.Mus. candidates should consult the Graduate and Postdoctoral Studies Programs, Courses and University Regulations publication for requirements of their program, available at www.mcgill.ca/study.

Candidates for the Graduate Diploma in Professional Performance should consult the Graduate and Postdoctoral Studies Programs, Courses and University Regulations publication for requirements of their program, available at www.mcgill.ca/study.

10.10.24.1 Artist Diploma

The sequence would normally be:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUIN 460</td>
<td>Artist Diploma Practical Instruction 1</td>
</tr>
<tr>
<td>MUIN 461</td>
<td>Artist Diploma Practical Instruction 2</td>
</tr>
<tr>
<td>MUIN 462</td>
<td>Artist Diploma Recital 1</td>
</tr>
<tr>
<td>MUIN 560</td>
<td>Artist Diploma Practical Instruction 3</td>
</tr>
<tr>
<td>MUIN 561</td>
<td>Artist Diploma Practical Instruction 4</td>
</tr>
<tr>
<td>MUIN 562</td>
<td>Artist Diploma Recital 2</td>
</tr>
<tr>
<td>MUIN 563</td>
<td>Artist Diploma Recital 3</td>
</tr>
</tbody>
</table>

In addition, the Artist Diploma program in orchestral instruments, piano, and voice requires the candidate to present two concertos:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUIN 469</td>
<td>Artist Diploma Concerto 1</td>
</tr>
<tr>
<td>MUIN 569</td>
<td>Artist Diploma Concerto 2</td>
</tr>
</tbody>
</table>
Applications for Artist Diploma Concerto hearings must be submitted to the Department of Performance Office five (5) weeks prior to the proposed date. The concerto examinations may be planned for any time during the academic session subject to the availability of examiners and facilities.

**Artist Diploma Recital 1 (MUIN 462)**

*Purpose:* Recital programs are intended to demonstrate that the student is qualified to engage in professional performance activities, and has attained the high level of performing ability required for the Artist Diploma.

*Panel:* The panel consists of the Chair of the Department of Performance or delegate, as well as two staff members from the area concerned (in Voice recitals, one voice teacher plus one staff member from another area).

*Distribution of Marks:* Examiners judge the recital independently and submit their evaluation without consulting the other examiners. All of the examiners must judge the recital to be satisfactory for the candidate to pass. This grade will also be entered in the student’s current or most recent term of practical instruction.

**Artist Diploma Recital 2 (MUIN 562)**

*Purpose:* Recital programs are intended to demonstrate that the student is qualified to engage in professional performance activities, and has attained the high level of performing ability required for the Artist Diploma.

*Panel:* The panel consists of the Chair of the Department of Performance or delegate, as well as two staff members from the area concerned (in Voice recitals, one voice teacher plus one staff member from another area).

*Distribution of Marks:* Examiners judge the recital independently and submit their evaluation without consulting the other examiners. All of the examiners must judge the recital to be satisfactory for the candidate to pass.

**Artist Diploma Recital 3 (MUIN 563)**

*Purpose:* Recital programs are intended to demonstrate that the student is qualified to engage in professional performance activities, and has attained the high level of performing ability required for the Artist Diploma.

*Panel:* The panel consists of the Chair of the Department of Performance or delegate, as well as two staff members from the area concerned.

*Distribution of Marks:* Examiners judge the recital independently and submit their evaluation without consulting the other examiners. All of the examiners must judge the recital to be satisfactory for the candidate to pass.

**Artist Diploma Concerto 1 (MUIN 469)**

*Purpose:* The Artist Diploma program in orchestral instruments, piano, and voice requires the candidate to present concertos which are normally examined only by a jury. The concerto examinations may be planned for any time during the academic session subject to the availability of examiners and facilities.

*Panel:* A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.

*Distribution of Marks:* Examiners judge the concerto independently and submit their evaluation without consulting the other examiners. All the examiners must judge the concerto to be satisfactory for the candidate to pass.

**Artist Diploma Concerto 2 (MUIN 569)**

*Purpose:* The Artist Diploma program in orchestral instruments, piano, and voice requires the candidate to present concertos which are normally examined only by a jury. The concerto examinations may be planned for any time during the academic session subject to the availability of examiners and facilities.

*Panel:* A minimum of three staff members, one of whom may be the student’s teacher. The panel is appointed by the Chair of the Department of Performance.

*Distribution of Marks:* Examiners judge the concerto independently and submit their evaluation without consulting the other examiners. All the examiners must judge the concerto to be satisfactory for the candidate to pass.

**10.10.2.5 Elective Study**

Students may elect to pursue further practical study in addition to their curricular requirements. The student is not expected to follow a specific program. Additional fees apply.

**10.11 Practical Examinations**

Details of specific examination requirements for each area (Brass, Early Music, Guitar, Harp, Jazz, Organ, Percussion, Piano, Strings, Voice, Woodwinds) may be obtained from the Department of Performance Office.
10.11.1 Application for Examination

Examinations and recitals must be presented in one of the examination periods. When a student and his/her teacher agree to present a required practical examination, the student must make an application by the deadline specified below. Permission to withdraw from a practical examination will normally be granted only in the case of illness. A medical certificate must be submitted to the Department of Performance Office within seven days after the withdrawal request has been received. Withdrawal from a practical examination on other than medical grounds must be authorized by the Chair of the Department of Performance.

Application for the above examinations must be made on the appropriate form available at the Performance Office. Applicants must obtain their teacher's approval on this form and submit it according to the following schedule.

<table>
<thead>
<tr>
<th>Examination Period</th>
<th>Application Deadline*</th>
<th>Withdrawal Deadlines</th>
</tr>
</thead>
<tbody>
<tr>
<td>September 6-9, 2011**</td>
<td>June 1***</td>
<td>August 1</td>
</tr>
<tr>
<td>Specific dates for the Fall Examination Period are available at <a href="http://www.mcgill.ca/importantdates">www.mcgill.ca/importantdates</a></td>
<td>October 14</td>
<td>November 15</td>
</tr>
<tr>
<td>Specific dates for the Winter Examination Period are available at <a href="http://www.mcgill.ca/importantdates">www.mcgill.ca/importantdates</a></td>
<td>February 1</td>
<td>March 1</td>
</tr>
</tbody>
</table>

* All students must apply by this deadline. Applications may be withdrawn without penalty any time up to the withdrawal deadline given above.

** The September examination period is available only for Summer graduands. No supplemental examinations will be given at this time.

*** It is recommended that students planning to take an examination in September submit the program for approval before the end of May; otherwise, the program may not be seen by the Area Committee until September.

Applications received after these deadlines will only be accepted with special permission from the Chair of the Department of Performance, and on payment of a $50 late application fee.

10.11.2 Examination Marking

Normally, the final mark for any practical examination is the average of all the marks submitted by the individual examiners. In addition, however, at least half of the examiners on the panel must pass the student in order to continue to the next level of examination. (N.B.: the passing grade in the L.Mus. and Artist Diploma programs is A-; in the Major Performance programs, it is B-) In instances where the average mark is a passing grade but a majority of the panel has failed the student, the final mark will be the letter grade immediately below the required passing grade.

11 Faculty of Religious Studies

11.1 About the Faculty of Religious Studies

The Faculty of Religious Studies has a long and distinguished history at McGill University and offers programs for those seeking to pursue the academic study of religion at both the undergraduate and graduate level. The Faculty recognizes the crucial role played by religion throughout history, as well as in contemporary society, and focuses on the study and analysis of the world’s religions as phenomena of human society. The Faculty takes a multidisciplinary approach to religious scholarship, incorporating a wide range of perspectives and methods.

The programs of study explore the many cultural, historical, and political issues related to both Eastern and Western religions and to religion in comparative perspective. The Faculty has four major teaching areas: (1) Asian Religions, (2) Biblical Studies, (3) Christian Thought and History, and (4) Religion and Culture. Currently, the Faculty of Religious Studies offers or contributes to six degrees – B.A., B.Th., and M.Div. (in affiliation with the Montreal School of Theology), as well as the graduate degrees S.T.M., M.A., and Ph.D. The B.A. Honours, Major, and Minor programs in Religious Studies are offered in cooperation with the Faculty of Arts.

Students in the Faculty develop expertise in one or more of the areas of Religious Studies at the undergraduate and graduate level. In the B.Th./M.Div. program, students prepare for the ordained ministry and for other professional careers in pastoral settings such as hospitals and schools.

The Colleges affiliated with the Faculty are the Montreal Diocesan Theological College of the Anglican Church of Canada; the Presbyterian College, Montreal; and the United Theological College of the United Church of Canada. They are all located close to the University campus.

The Faculty of Religious Studies is also the home of McGill’s Centre for Research on Religion/Centre de Recherche sur la Religion. CREOR coordinates and supports research on the main religions of the world, their differences and their common grounds, and how they contribute to a better understanding of past and present-day culture, ethics, and politics.
11.2 History of the Faculty

11.2.1 The Faculty and the Colleges

During the 19th century, several Theological Colleges in Montreal became affiliated with McGill. In 1912, they formed a Joint Board for the academic study of Theology, leaving each denominational College to provide its own professional training for Christian ministry. This relationship between the Colleges and the University led naturally to the creation in 1948 of a Faculty of Divinity, which assumed the academic functions of the Joint Board, now designated the Montreal School of Theology. In 1970, the name of the Faculty was changed to the Faculty of Religious Studies. This University Faculty now offers the Bachelor of Theology (B.Th.) degree and several graduate degree programs.

11.3 Facilities

The Faculty of Religious Studies is located in the handsome William and Henry Birks Building, erected in 1931, formerly known as Divinity Hall, at 3520 University Street. Besides the usual classrooms, offices, and common rooms, this building accommodates the Birks Heritage Chapel and the Birks Reading Room.

11.4 Birks Lectures

An annual series was established in 1950 through the generosity of the late William M. Birks. The lectures are given by distinguished visitors, usually in late September or early October. The first lecturer was the Right Reverend Leslie Hunter. More recent lecturers have included Huston Smith, Northrop Frye, Wilfred Cantwell Smith, Gregory Baum, Robert McAfee Brown, Krister Stendahl, Charles Adams, Jon Levenson, David Little, Azim Nanji, Paul Griffiths, Bernadette J. Broote, Harvey Cox, John S. Hawley, Gabriel Vahanian, Oliver O'Donovan, and Jan Assmann.

11.5 Numata Visiting Professor in Buddhist Studies

In recognition of the strong Buddhist Studies program in the Faculty of Religious Studies, the Numata Foundation has given a 20-year grant to the Faculty to bring a visiting scholar in Buddhist Studies to McGill each year.

The visiting professor teaches one course at the 500 level, gives a public lecture, and is available to students for conferences and consultation. The first Numata Professor, in 1999-2000, was Dr. Mahinda Deegalle (Ph.D., Chicago), a Theravada Buddhist Sri Lankan monk. Subsequent visiting professors have included Dr. John Pettit, Professor Robert Morrison, Dr. Thupten Jinpa, Dr. Kate Crosby, Ven. Yifa, Dr. Robert Kritzer, Dr. Andrew Skilton, Dr. Joel Tatelman, Dr. Miriam Levering, Dr. Hiroko Kawanami, and Dr. Dorji Wangchuk. Dr. Martin Adam will be the visiting professor for 2011-2012.

11.6 About the Faculty of Religious Studies (Undergraduate)

Cultivating a thorough understanding of the world’s religions and the roles of religion throughout history and in contemporary society is at the heart of the Faculty of Religious Studies’ teaching at the undergraduate level. The Faculty takes a multidisciplinary approach to scholarship on a plurality of religions and incorporates a broad range of perspectives and methods. In studying the world’s religious traditions, we emphasize the ways in which religious expression and practices are embedded in culture, politics, aesthetics, and social change. Texts and traditions, languages and literatures, philosophy, and ethics are all integral to our undergraduate programs.

The Faculty’s undergraduate teaching supports two degrees, the B.A. and the B.Th. The Bachelor of Theology (B.Th.) offers an intensive study of Christianity primarily for students preparing for the ordained ministry and for other professional careers in pastoral settings such as hospitals and schools. The B.Th. contributes to the professional degree (M.Div.) offered through the Montreal School of Theology with which the Faculty is affiliated.

The B.A. programs in Religious Studies are offered in conjunction with the Faculty of Arts. These programs explore the many cultural, historical, and political issues related to both Eastern and Western religions and to religion in comparative perspective. Majors and minors in World Religions are available, as well as honours and joint honours programs in Religious Studies. In addition, a distinctive strength of the Faculty’s offerings is the Major in Scriptures and Interpretations which allows for a concentration on a particular scriptural tradition (Jewish, Christian, or Hindu and Buddhist scriptures); the Minor in Scriptural Languages supports all these concentrations by providing intensive study of either Indo-Tibetan languages or Biblical Languages. Students frequently combine majors and minors in World Religions with a wide range of other B.A. concentrations, highlighting the importance of the rigorous study of religion to many other areas of inquiry.

11.7 Overview of Degrees Offered

Degrees Offered by the Faculty

section 11.7.1: Bachelor of Arts in Religious Studies
section 11.7.3: Bachelor of Theology
section 11.7.2: Master of Divinity

11.7.1 Bachelor of Arts (B.A.) in Religious Studies

Honours concentration, Major concentration and Minor concentration in Religious Studies are offered in cooperation with the Faculty of Arts.

Admission is to the Faculty of Arts and all admission requirements and procedures, academic rules, and regulations of that Faculty apply to students in these programs.

For general information on B.A. Honours, Major concentrations, and Minor concentrations, consult the advisers. Check the Faculty’s website for a list of advisers. Detailed descriptions of the Religious Studies programs for Arts students are found in the Faculty of Arts > Religious Studies (RELG) section of this publication. Religious Studies B.A. Honours, Major, and Minor students may take any of the courses described in the programs except where otherwise indicated. For specific course information, consult the instructor.

Students who are interested in the Bachelor of Theology (B.Th.) (section 11.7.3: Bachelor of Theology (B.Th.)) or Master of Divinity (M.Div.) (section 11.7.2: Master of Divinity (M.Div.)) programs should refer to the appropriate section.

11.7.2 Master of Divinity (M.Div.)

Students who have completed a first degree prior to the B.Th. with a minimum CGPA of 2.7 are eligible to apply the B.Th. degree towards the Master of Divinity (M.Div.) degree conferred by the Theological Colleges. This degree requires, in addition to the B.Th. degree, successful involvement in integrative
seminars during the two B.Th. years and a year of professional pastoral study beyond the B.Th. This is called the “In-Ministry Year” (IMY) and is offered by the three affiliated Theological Colleges under the auspices of the Montreal School of Theology.

Students from the affiliated colleges may be eligible for bursary assistance if they are properly registered candidates for the ministry. Information about church requirements and the professional year should be sought from the principals of the appropriate colleges.

One biblical language, usually Greek, is required by some of the colleges. Ministerial candidates should consult with the College advisers regarding biblical language requirements.

Prospective candidates for ordination with a B.A. Honours or Major in Religious Studies and a CGPA of 3.3 (B+) may apply for the Master of Sacred Theology (S.T.M.) degree, followed upon completion by the professional year (IMY).

**Applicants for the M.Div. program** must apply to the McGill B.Th. program as well as to one of the Theological Colleges. College application forms should be requested from one of the following:

- The Montreal School of Theology
  (formerly the Joint Board of Theological Colleges)
  École théologique de Montréal (affiliée à l'Université McGill)
  3475 University Street
  Montreal, Quebec H3A 2A8

- Montreal Diocesan Theological College
  Séminaire Diocésain de Montréal
  3475 University Street
  Montreal, Quebec H3A 2A8

- The Presbyterian College
  Le Collège Presbytérien
  3495 University Street
  Montreal, Quebec H3A 2A8

- The United Theological College
  Le séminaire Uni
  3521 University Street
  Montreal, Quebec H3A 2A9

Prospective students should contact the Chair of the B.Th. Committee to discuss their qualifications, expectations, and objectives. Appointments can be made by emailing Professor Douglas Farrow at douglas.farrow@mcgill.ca.

### 11.7.3 Bachelor of Theology (B.Th.)

The main goals of the Bachelor of Theology (B.Th.) program are:

1. to offer academic instruction in the disciplines of theology within a university setting;
2. to contribute to preparation for ministry in the contemporary world by giving special attention to the Canadian and North American contexts, the Quebec context, and religious pluralism.

The Bachelor of Theology (B.Th.) may be taken as a first or second baccalaureate degree.

As a first degree (90 or 120 credits), it offers a more intensive study of Christianity than is available within the Bachelor of Arts (B.A.) programs, while also permitting the student to combine this specialization with other academic or professional interests, whether in Religious Studies or in other faculties and schools of the University.

As a second bachelor’s degree (60 credits), the Bachelor of Theology (B.Th.) program is designed primarily for those who intend to qualify for the ordained ministry in a Christian denomination, although here too, some students pursue the degree out of an interest in the academic study of theology for its own sake, or with a view to combining these studies with proficiency gained in other disciplines. The 60-credit program forms the core of the Bachelor of Theology (B.Th.) degree.

Those studying for the ordained ministry usually pursue the Bachelor of Theology (B.Th.) as part of a Master of Divinity (M.Div.) offered by one of the three Theological Colleges affiliated with McGill University in the Montreal School of Theology: Montreal Diocesan Theological College (Anglican Church of Canada), the Presbyterian College (Presbyterian Church in Canada), and United Theological College (United Church of Canada).

### 11.7.3.1 ATS Accreditation

The B.Th. program offered by McGill and the M.Div. program offered by the Theological Colleges are together fully accredited by the Association of Theological Schools in the U.S. and Canada (ATS).

### 11.7.3.2 Admission Requirements

The B.Th. program has three points of entry:
1. To enter the 120-credit degree program from outside Quebec, you must hold a high school diploma, unless you qualify as a mature student. A maximum of 60 credits from another institution of higher learning can be considered for transfer into the 120-credit program.

2. To enter the 90-credit first-degree program, you are expected to have completed the Diploma of Collegial Studies (DCS) from a Quebec CEGEP with a minimum average of cote R of 24, or the equivalent elsewhere. A maximum of 30 credits from another institution of higher learning can be considered for transfer into this program.

3. To enter the 60-credit program, you must have completed a B.A. or other Bachelor's degree with a minimum CGPA of 2.7 (B-). No credits can be transferred from another institution of higher learning into the 60-credit program.

Any McGill student in good standing, with a minimum of 30 credits, may apply for transfer from their current degree program into the B.Th. program.

11.7.3.2.1 Mature Student Admissions Policy

Those who will be 23 years of age or older by September 1 of the year that they seek admission (or by January 1 for admission to the Winter term) and who lack the academic qualifications normally required for entry into the B.Th. program may apply as mature students for admission to a qualifying year in the B.Th. program.

Admitted students enrol in a qualifying year (30 credits) of designated Religious Studies and Arts courses (determined by the Chair of the B.Th. Committee). Those who, during the qualifying year, earn a CGPA of 2.5 to 2.9 (with no grade less than 60%) normally will be granted admission to the 120-credit B.Th. program. Credits completed during the qualifying year may be applied toward the 120 credit requirement.

Those who, during the qualifying year, earn a CGPA of at least 3.0 (having taken 30 credits, including at least two 300-level courses and with no grade less than 65%) normally will be granted admission to the 90-credit B.Th. program. Credits completed during the qualifying year may be applied toward the 90 credit requirement.

Students who, during the qualifying year, do not earn a minimum CGPA of 2.5 or who have grades less than 60%, may apply to retake courses, pending approval of the Chair of the B.Th. Committee.

11.7.3.3 Competence in English

Please note that for non-Canadian applicants whose mother tongue is not English, documented proof of competency in oral and written English by an appropriate examination is required. A Test of English as a Foreign Language (TOEFL) is required, with a minimum score of 577 for the paper-based version and of 90 for the Internet-based composite (iBT). For the iBT, a minimum score of 21 is also required in each individual component of reading, writing, listening, and speaking. Permanent residents of Canada may be required to submit a TOEFL score as well. All official documents must be sent to the Faculty of Religious Studies address given in section 11.7.3.4: Applying to the B.Th. Program.

11.7.3.4 Applying to the B.Th. Program

All applications must be made online at the McGill University website for prospective students: www.mcgill.ca/applying. The online application process should take about 20 minutes and a credit card is required for payment of the application fee. Once completed, the online application form may be printed for your own records.

Note: Owing to McGill University's implementation of a comprehensive online application system, paper applications to the B.Th. Program can no longer be accepted. All applicants must apply online.

11.7.3.4.1 Required Documents

- Two letters of reference, at least one of which should be from an instructor in an academic institution previously attended.
- A personal statement, according to the directions in the application.
- Official transcript(s) of all previous post-secondary academic work.

A complete set of these required documents must be sent to the Faculty of Religious Studies (see address below).

If you are applying for admission to one of the Theological Colleges, another complete set of these required documents must also be sent to the College concerned.

Please note that your file will not be considered by the Admissions Committee until all the required documents have been received.

11.7.3.5 Application Deadlines

Applicants to the B.Th. program may be accepted into the Fall, Winter, or Summer term. The online application deadline is May 1 (June 15 for college affiliate applicants) for September admissions; November 1 for January admissions; and March 1 for May admissions. Please note that all required documents listed in section 11.7.3.4: Applying to the B.Th. Program must be received by the Faculty of Religious Studies prior to these deadlines in order for the applicant to be considered by the Admissions Committee.

11.7.3.6 Tuition Fees and Funding

Information concerning current tuition fees can be found at: www.mcgill.ca/student-accounts. Applicants for admission to one of the affiliated Colleges should contact the institution concerned for information regarding College-related fees.

11.7.3.7 Admissions Review Procedure

An unsuccessful applicant, or a Faculty of Religious Studies Council member acting on behalf of an unsuccessful applicant, who believes that not all factors having a bearing on the application have been fully considered may submit a request for a review of the decision.

The request must be made in writing and directed to the Chair of the B.Th. Admissions and Awards Committee. A CAD$40 certified cheque or money-order made payable to McGill University must accompany the request.

The request for review must include information in support of reconsideration, such as: a description of significant change in the applicant's circumstances since the initial consideration, correction of any missing or erroneous information in the application, or information that the applicant believes may have been overlooked when the original decision was made.

Requests for reconsideration must be received at McGill no more than two weeks after notification of refusal.

The review procedure will be carried out by the B.Th. Admissions and Awards Committee. Please note that the original admission decision will stand unless the Committee is persuaded that admissions standards have been misapplied or that an applicant’s academic record has been misapprehended.

Decisions on Special, Visiting, and Exchange applications are final; requests for reconsideration will not be considered.

11.7.3.8 Registration Procedures

Students register online at www.mcgill.ca/minerva.

Minerva provides web access to registration, class schedules, course descriptions, and address changes.

- Returning students must register via Minerva between March 29 and the first day of classes. After this period, a late registration fee will be applied.
- New students accepted from CEGEP should register via Minerva between June 9 and September 13, 2011. All other new students should register via Minerva between July 26 and September 13, 2011. After September 1, a late registration fee will be applied.
- All B.Th. students should consult their adviser before registration.

11.7.3.9 Withdrawal Procedures

Dropping or adding courses must be done via Minerva, prior to the deadline listed in this publication (see section 11.7.3.8: Registration Procedures). Permission of the adviser is required for all changes to course selection. In case of withdrawal from the University prior to the published course withdrawal deadline, you must withdraw from all courses via Minerva. In addition, you must contact the Chair of the Bachelor of Theology (B.Th.) Committee and complete the necessary withdrawal form.

11.7.3.10 Graduation Requirements

1. The B.Th. is either a 120-credit program (if you were admitted from outside Quebec and without a prior Bachelor's degree), a 90-credit program (if you were admitted on the basis of a Quebec D.C.S. or equivalent), or a 60-credit program (if you were admitted on the basis of a recognized Bachelor's degree).
2. Qualification for the degree must include Satisfactory Standing (a grade of C or better) in all required courses and the complementary courses specified in Year 3, and the accumulation of enough acceptable credits to make a total of either 60, 90, or 120 credits. It should be noted that if you take the B.Th. program as part of the M.Div. program, you need to maintain a minimum CGPA of 2.5 to be eligible for the M.Div. degree.
3. Normally, the program credits must be earned within five years from the date of entrance.
11.7.3.11 Course Selection
You are to seek the guidance of your adviser(s) when registering for courses. You must have your courses approved and your Minerva form signed by the Chair of the Bachelor of Theology (B.Th) Committee before classes begin. If you are affiliated with one of the Theological Colleges, your Minerva form must first be approved and signed by your College adviser.

11.7.3.12 Academic Standing and Course Loads
11.7.3.12.1 Satisfactory Standing
You enter the University in Satisfactory Standing and remain in this Standing unless your grade point average (GPA) or cumulative grade point average (CGPA) for any year drops below 2.00. The normal course load in any academic session is five courses per term (15 credits per term). If you have a high GPA (at least 3.00), you may take more than the normal five courses per term.

11.7.3.12.2 Probationary Standing
You are placed in Probationary Standing if either your CGPA or your term GPA falls between 1.50 and 1.99. (If you are a part-time student, your GPA is calculated on the basis of your last 9 credits.) While in Probationary Standing, you may take a minimum of 6 credits and a maximum of 12 credits per term. While in Probationary Standing, you may return to Satisfactory Standing by completing 12 additional credits with a GPA of at least 2.50, or by completing 12 credits with a GPA and a CGPA of 2.00 or greater.

As a student in Probationary Standing, if you fail to achieve the levels of performance specified above, you will be placed in Unsatisfactory Standing, unless you obtain a GPA of 1.50-1.99 while continuing to have a CGPA of 2.00 or greater.

11.7.3.12.3 Unsatisfactory Standing
You are placed in Unsatisfactory Standing if you have a GPA of less than 1.50. As a student in Unsatisfactory Standing, you will have to withdraw, or seek readmission as a probationary student with special permission from the B.Th. Committee and the Dean. If you are a student who is readmitted on Probationary Standing, you may have additional restrictions or conditions to meet over and above those required of students referred to above under “Probationary Standing”. In the event that you are placed in Unsatisfactory Standing for a second time, you must withdraw permanently.

11.7.3.12.4 Incomplete Standing
If, in any year, your record shows a mark of K, K*, L, L*, or &&, you will have no GPA or CGPA calculated for that year, and your record will show “Standing Incomplete”. After completing the appropriate course requirements, your GPA and CGPA will be calculated and your Standing determined as described above. If your Standing is still “Incomplete” at the time of registration for the next academic year, you must obtain a Letter of Permission to Register from the Chair of the B.Th. Committee.

11.7.3.13 Academic Achievement
Several designations are used to acknowledge the superior academic achievement of in-course and graduating students. These designations are awarded at the discretion of the Faculty.

Dean’s Honour List: to designate in-course students who have completed a minimum of 27 credits during regular session (14 credits for those registered for one term) and have attained a GPA placing them in the top 5% - 10% of their class.

11.7.3.13.1 Graduation Honours
Dean’s Honour List: For information on the designation of Dean’s Honour List awarded at graduation, see the University Regulations and Resources section of this publication.

Distinction: For information on the designation of Distinction awarded at graduation, see the University Regulations and Resources section of this publication.

Honours: to designate graduating students who have completed a minimum of 60 credits at McGill and have fulfilled the Honours course requirements with a CGPA of 3.20, or 3.50 for First Class Honours.

11.7.3.14 Evaluation
Competence in a course may be determined by examinations and/or essays, or by other means chosen by the instructor and approved by the Dean.

11.7.3.15 Bachelor of Theology (B.Th.) - Religious Studies (120 credits)
The Bachelor of Theology (B.Th.) degree requires 120 credits. Many students enter the program with advanced standing, and their credit requirement for the degree is adjusted accordingly.

All students must discuss their course selection with their program adviser.

The required and complementary course requirements below describe the program for students who enter in Year 1 (U1) with 30 credits of advanced standing based on a Quebec Diploma of Collegial Studies (DEC).

Students admitted directly from high school into U0 must consult their program adviser regarding appropriate courses for their first year of study.
Students admitted on the basis of a bachelor degree will have advanced standing and should consult their program adviser to determine any course equivalencies completed during their first degree and how these affect their program requirements for the Bachelor of Theology. Normally, these students start in Year 2 (U2) and follow the requirements below starting with Year 2.

The normal course load in the degree for full-time students is 15 credits per term, five 3-credit courses.

By permission of the Dean and the Chair of the B.Th. Committee, students may also enrol for courses at any university in the province of Quebec. For further information, see “Quebec Inter-University Transfer Agreement: McGill Students” in the “University Regulations and Information” section under “Registration”. Professional and vocational courses (e.g., leading to ordination) are available through the In-Ministry Year (Master of Divinity (M.Div.)) upon the completion of the B.Th. degree.

**First Year (U0) - Courses (30 credits)**

Courses are to be selected in consultation with the student's program adviser for students admitted from high school into U0.

**Year 1 (U1) - Required Courses (9 credits)**

Students admitted to U1 on the basis of a Quebec Diploma of Collegial Studies (DEC) will take these required courses in their first year.

Students admitted to the B.Th. on the basis of a bachelor degree should consult their program adviser about their first year requirements, if any. By permission of the B.Th. Committee, students may substitute courses for any of the required courses if they have already taken them or similar courses for credit elsewhere.

12 Faculty of Science

12.1 About the Faculty of Science

The Faculty of Science aims to be a leader in finding solutions critical to economic and human development, including key questions in the environmental sciences, new materials, and new technologies.

To help us achieve these goals, the Faculty has recruited the best scientific minds of this generation and is committed to ensuring that our undergraduate and graduate students receive an education that prepares them for a lifetime of accomplishment. Not only will these new recruits perform key research work, they will also take on an equally important task: teaching the scientists and leaders of tomorrow. Over the next decade, many of these dynamic young academics will become world leaders in their disciplines. The process has already begun in fields as diverse as neuroscience, astrophysics, green chemistry, and earth system science.

Moreover, we are in the process of boldly transforming the way science is taught, with an increased emphasis on student/professor interaction and outreach. This new approach is reflected in the Faculty’s slogan, Learning Through Discovery, which emphasizes hands-on research at the undergraduate level and a more personal, one-on-one style between professors and students that traditionally did not begin until the graduate level. In 2005, the Faculty opened its Office for Undergraduate Research in Science and launched a new Freshman Interest Groups program, which allows groups of 10 to 15 freshman students to meet with a professor weekly.

The Faculty counts undergraduate students as one of its key strengths. The calibre of McGill’s undergraduates is very high – they boast the highest average entrance grades in Canada – and the Faculty understands that these brilliant young minds are the key to its future.

12.2 History of the Faculty of Science

The study of science at McGill goes back almost two centuries, when the lower campus was a rough and muddy cow pasture and the University struggled to establish itself. In 1855, the job of principal was given to a Nova-Scotia-born geologist, John William Dawson. When he arrived at McGill, Dawson laid out plans for walks and roads, and at his own expense arranged the planting of trees on the entrance avenue. More importantly, Dawson worked diligently to transform McGill from a poorly equipped provincial college into one of the best scientific institutions in the world. In 1882, he successfully lobbied for the creation of the Royal Society of Canada and brought international renown to McGill.

In the century and a half since Dawson steered the Faculty of Science onto the path of excellence, the Faculty has received numerous honours for its groundbreaking research, including Nobel prizes to seven Science alumni or Faculty members, as well as over 100 fellowships in the Royal Society of Canada. More importantly, McGill’s scientists have made the world a better place in which to live and have provided answers to the deepest mysteries facing humanity. Examples of McGill’s breakthroughs include the world’s first effective anti-retroviral HIV drug, the theory explaining photosynthesis, and the discovery of the fastest-spinning pulsar in the known universe.

McGill’s Faculty of Science has a long tradition of discovery and innovation that no other Canadian university, and only a handful of U.S. schools can match. Our long tradition of scientific leadership, and the illustrious roster of McGill researchers who changed the world – Sir Ernest Rutherford, Harriet Brooks, Ronald Melzak, Bernard Belleau, Leo Yaffe, and Vicky Kaspi, to name only a few – are key attributes.

The Faculty of Science’s roots are not only strong, but they display a deep commitment to excellence. Whether it’s bringing the best scientists in the world to our new Life Sciences Complex, or studying and suggesting ways in which we can help heal the Earth’s fragile ecosystem, the Faculty remains committed to Dawson’s vision of bringing the best to the world.

12.3 Programs and Teaching in Science

The Faculty of Science is committed to providing outstanding teaching and research facilities. The Faculty draws on its involvement in cutting-edge research to ensure teaching excellence at the undergraduate level. Professors who spearhead projects that change people’s understanding of the world teach regularly at the undergraduate level. Also, research-based independent study courses offer you the opportunity to contribute to your professors’ work, rather than just learn about it.

In an effort to supplement classroom learning with real life experience, the Faculty of Science has increased opportunities for undergraduate students to participate in fieldwork. All B.Sc. programs include an internship component. This is on top of the many undergraduate students the Faculty hires for Work Study projects and other research programs. As a McGill Science student, you have an opportunity to get involved in the structuring of your own education.

The Faculty of Science offers programs leading to the degree of Bachelor of Science (B.Sc.). Admission is selective; fulfillment of the minimum requirements does not guarantee acceptance. Admission criteria are described in the Undergraduate Admissions Guide, found at www.mcgill.ca/applying.

There are also two Diploma programs offered in Science. The Diploma in Environment, under McGill School of Environment > Diploma in Environment (30 credits), is a 30-credit program available to holders of a B.Sc. or B.A. or equivalent. The Diploma in Meteorology is a one-year program available to holders of a degree in Mathematics, Engineering, Physics and other appropriate disciplines who wish to qualify for a professional career in Meteorology;
see section 12.14.3: Atmospheric and Oceanic Sciences (ATOC) > section 12.14.3.11: Diploma in Meteorology (30 credits). All credits for these diplomas must be completed at McGill.

The Concurrent B.Sc. and B.Ed. program is designed to provide you with the opportunity to obtain both a B.Sc. and a B.Ed. after a minimum of 135 credits of study. For more information, see section 12.14.34: Science or Mathematics for Teachers and the Faculty of Education.

In addition to the Major program in Software Engineering offered in the Faculty of Science, there is also a Bachelor of Software Engineering program offered jointly with the Faculty of Engineering (refer to Faculty of Engineering > Department of Electrical and Computer Engineering).

Finally, the Faculties of Arts and Science jointly offer the Bachelor of Arts and Science (B.A. & Sc.), which is described under Bachelor of Arts & Science.

- section 12.14.2.6: Bachelor of Science (B.Sc.) - Honours Anatomy and Cell Biology (73 credits)

**Atmospheric and Oceanic Sciences**

- section 12.14.3.8: Bachelor of Science (B.Sc.) – Major Atmospheric Science and Physics (67 credits)

**Biochemistry**

- section 12.14.4.6: Bachelor of Science (B.Sc.) - Major Biochemistry (67 credits)
- section 12.14.4.7: Bachelor of Science (B.Sc.) - Honours Biochemistry (76 credits)

**Biology**

- section 12.14.5.4.8: Neurobiology Concentration
- section 12.14.5.5: Biology (BIOL) Faculty
- section 12.14.5.12: Biology (BIOL) Related Programs and Study Semesters

**Biotechnology**

- section 12.14.6.5: Bachelor of Science (B.Sc.) - Minor Biotechnology (for Science Students) (24 credits)

**Microbiology and Immunology**

- section 12.14.22.6: Bachelor of Science (B.Sc.) - Honours Microbiology and Immunology (73 credits)

**Neuroscience**

- section 12.14.25.3: Bachelor of Science (B.Sc.) - Minor Neuroscience (24 credits)
- section 12.14.25.4: Bachelor of Science (B.Sc.) - Major Neuroscience (65 credits)

**Pharmacology and Therapeutics**

- section 12.14.28.5: Bachelor of Science (B.Sc.) - Major Pharmacology (65 credits)
- section 12.14.28.6: Bachelor of Science (B.Sc.) - Honours Pharmacology (74 credits)

### 12.5 About the Faculty of Science (Undergraduate)

- McGill’s second-largest faculty: 14 schools and departments, including the Redpath Museum, Canada’s oldest museum of natural history focusing on teaching, research, and outreach; 20 research centres and institutes.
Students: 4361 undergraduate, 906 graduate, and 131 postdoctoral researchers, for a total of 5398 students.

265 faculty members, including tenured and tenure-track professors.

Has produced seven Nobel laureates: five were Faculty of Science graduates, while two winners were Science faculty members.

Research budget of approximately $40 million, including $18 million from the Natural Sciences and Engineering Research Council of Canada, $5 million from Quebec and increasing annually. Approximately $150,000 generated annually per professor. Average of four papers per year.

Faculty renewal: aided by a pool of innovative government initiatives such as the Canada Foundation for Innovation and its Canada Research Chairs program, as well as the Quebec Tax Holiday for technical workers; the Faculty has recruited 160 new professors since 2000.

Canadian leader in Astrophysics and Cosmology, Climate Change and Extreme Weather, Green Chemistry, Life Sciences (developmental biology and cell information transfer), Earth Systems Science, Biodiversity and Conservation, Nanoscience and Social Neuroscience.

Lead faculty in the establishment of the multidisciplinary McGill School of Environment in 2000.

Offers top students an important Field Studies Program which takes students out of the classroom and into the world to conduct research in biodiversity, climate change, volcanology, geology, marine biology, and to work with native populations, governments, and NGOs in countries as wide-ranging as Africa, Panama, Barbados, the US, and Canada – all the way to Axel Heiberg Island, the University’s Arctic research station.

Established the Reginald Fessenden Professorships and Prizes in Science Innovation, the first such endowed program in Canada, to encourage and support the commercialization of research in Science conducted by world-class scholars.

McGill’s most multidisciplinary faculty, which conducts teaching and research in collaboration with many of the University’s other faculties, including Medicine, Engineering, Music, Arts, Education, Management, and the Montreal Neurological Institute in neuroengineering and brain imaging.

Spearheaded the largest and most recent construction project at McGill, the $120 million McGill Life Sciences Research Complex, consisting of the Francesco Bellini Building and Cancer Research Building, which are physically linked to the McIntyre Medical and the Stewart Biology buildings.

Established Canada’s first comprehensive Earth System Science Program in 2006-07, to study and research new forms of energy and gain a better understanding of climate change and natural hazards.

Innovative: the Tomlinson University Science Teaching Project conducts groundbreaking university-level science education research, and develops innovative and effective teaching methods for science instructors.

Inaugurated the Office for Undergraduate Research and the Science Undergraduate Research Awards to encourage top students to connect with professors during their degree program and pursue research projects in fields of interest, and established the Freshman Interest Group program, which provide an opportunity to meet other students, and help young students become more comfortable talking to and interacting with other professors.

12.5.1 Location

Dawson Hall
853 Sherbrooke Street West
Montreal, Quebec H3A 2T6
Canada

Telephone: 514-398-5442
Facility website: www.mcgill.ca/science
Science Office for Undergraduate Student Advising (SOUSA): www.mcgill.ca/science/sousa

The Science Office for Undergraduate Student Advising (SOUSA) and the Office of the Director of Advising Services of the Faculty of Science are located in Dawson Hall, on the ground floor. SOUSA serves students in the B.Sc. and B.A. & Sc. degrees.

12.5.3 Science Office for Undergraduate Student Advising (SOUSA)

The Science Office for Undergraduate Student Advising (SOUSA) provides ongoing advice and guidance on academic issues related to programs, degree requirements, registration, course change, withdrawal, deferred exams, supplemental exams, academic standing, inter- and intra-faculty transfer, year or term away, transfer credits, second programs, second degrees, and graduation.

Every student in the B.Sc. degree is assigned an adviser in SOUSA. The adviser’s name appears near the top of your Advising Transcript on Minerva. You can contact your adviser directly, or if you do not yet have a SOUSA adviser, at adviser.science@mcgill.ca.
SOUSA advisers provide assistance with degree planning and are a valuable referral source. They are a good place to start if you are not sure where to address your question. They also offer help managing academic situations during periods of personal, financial, or medical problems, by working with you to identify various possibilities and strategies for making informed decisions.

Special requests can be made, in writing, to the Director of Advising Services.

The Committee on Student Standing (CSS) will consider appeals of the Director of Advising Services’ decisions. For information about CSS, see the Director of Advising Services’ assistant.

12.6 Faculty Admission Requirements

For information about admission requirements for the B.Sc., please refer to the Undergraduate Admissions Guide, found at www.mcgill.ca/applying.

For information about inter-faculty transfers, refer to University Regulations and Information > Inter-Faculty Transfer as well as the relevant information posted on the SOUSA website at www.mcgill.ca/science/sousa/general/transfer.

12.7 Faculty Degree Requirements

Each student in the Faculty of Science must be aware of the Faculty regulations as stated in this publication and on the McGill, Science, and SOUSA websites.

While departmental and faculty advisers and staff are always available to give advice and guidance, the ultimate responsibility for completeness and correctness of course selection and registration, for compliance with, and completion of, program and degree requirements, and for the observance of regulations and deadlines, rests with you. It is your responsibility to seek guidance from the Science Office for Undergraduate Student Advising (SOUSA) if in any doubt; misunderstanding or misapprehension will not be accepted as cause for dispensation from any regulation, deadline, program, or degree requirement.

To be eligible for a B.Sc. degree, you must fulfill all Faculty and program requirements as indicated below:

**Faculty and program requirements**

- section 12.7.1: Minimum Credit Requirement
- section 12.7.2: Residency Requirement
- University Regulations and Information > section 1.6.3: Grading and Grade Point Averages (GPA)
- section 12.7.3: Time and Credit Limit for the Completion of the Degree
- section 12.7.4: About Program Requirements
- section 12.7.5: Course Requirements

12.7.1 Minimum Credit Requirement

The minimum credit requirement for your degree is determined at the time of acceptance and is specified in your letter of admission.

Students are normally admitted to a four-year degree requiring the completion of 120 credits.

12.7.1.1 Advanced Standing

Advanced Standing of up to 30 credits may be granted to students who obtain satisfactory results in International Baccalaureate, French Baccalaureate, Advanced Levels, Advanced Placement tests, or the Diploma of Collegial Studies (DCS). Quebec students with a DCS in Science are granted 30 credits Advanced Standing and will have normally completed the equivalent of, and are therefore exempt from, the basic science courses in biology, chemistry, mathematics, and physics. Students with satisfactory results in International Baccalaureate, French Baccalaureate, Advanced Levels, and Advanced Placement tests may be exempt from some or all of the basic science courses. You will not be given additional credit toward your degree for any McGill course where the content overlaps substantially with any other course for which you have already received credit, such as for Advanced Standing results.

AP Examination results with a score of 4 or 5 must be declared by you at the time of initial registration at the University.

For more information about Advanced Standing, consult: www.mcgill.ca/students/transfercredit.

12.7.1.2 Equivalencies for Non-Basic Science Courses

Note that equivalencies for some non-basic science courses, such as CHEM 212 and 222 and PSYC 204, are granted on a per-CEGEP basis. In some cases, a grade greater than the minimum passing grade may be required. For more information about equivalences for non-basic Science courses, please consult: www.mcgill.ca/students/transfercredit/prospective/cegep.

If the CEGEP and/or course is not listed on this website, you should refer to the SOUSA website and follow the instructions for advanced standing for students admitted to McGill from CEGEP: www.mcgill.ca/science/sousa/new_students/u1/orientation.
12.7.3 **Readmission after Interruption of Studies for a Period of Five Consecutive Years or More**

If you are readmitted after interrupting your studies for a period of five consecutive years or more, you may be required to complete a minimum of 60 credits and satisfy the requirements of a program. In this case, a new CGPA will be calculated. The Director of Advising Services, in consultation with the appropriate department, may approve a lower minimum for students who had completed 60 credits or more before interrupting their studies.

If you are readmitted after a period of absence, you are subject to the program and degree requirements in effect at the time of readmission. The Director of Advising Services, in consultation with the department, may approve exemption from any new requirements.

12.7.2 **Residency Requirement**

To obtain a B.Sc. degree, you must satisfy the following residency requirements: a minimum of 60 credits of courses used to satisfy the B.Sc. degree requirements must be taken and passed at McGill, exclusive of any courses completed as part of the Science Freshman program; see section 12.14.1: B.Sc. Freshman Program. At least two-thirds of all departmental program requirements (Honours, Major, Core Science Components, or Minor) must normally be completed at McGill not including courses completed in a prior McGill degree. Exceptionally, students in major concentrations or interfaculty or honours programs who pursue an approved Study Away or Exchange program may, with prior approval from both their department and the Director of Advising Services, Faculty of Science, be exempted from the two-thirds rule. In addition, some departments may require that their students complete specific components of their program at McGill.

The residency requirement for diploma programs is 30 credits completed at McGill.

12.7.3 **Time and Credit Limit for the Completion of the Degree**

If you need 96 or fewer credits to complete your degree requirements, you are expected to complete your degree in no more than eight terms after your initial registration for the degree.

If you are a student in the Freshman Program, you become subject to these regulations one year after your initial registration. If you want to exceed this time limit, you must seek permission of the Director of Advising Services of the Faculty of Science.

If you are registered in the B.Sc., you are expected to complete the requirements of your program and your degree within 120 credits. You will receive credit for all courses (subject to degree regulations) taken up to and including the semester in which you obtain 120 credits. If you want to remain at McGill beyond that semester, you must also seek permission of the Director of Advising Services, Science. Permission for exceeding the time and/or credit limits will normally be granted only for valid academic reasons, such as a change of program (subject to departmental approval) and part-time status. If permission is granted, you will receive credit only for required and complementary courses necessary to complete your program requirements.

12.7.4 **About Program Requirements**

The Faculty of Science offers a vast array of study and research opportunities at the undergraduate level, and it is very important that you familiarize yourself with all the alternatives open to you before deciding on a program of study. For an overview of programs offered in the B.Sc., see the Faculty of Science Programs of Study at: www.mcgill.ca/science/prospective/programs.

12.7.4.1 **Liberal, Major, and Honours Programs**

As a Science student, if you need 96 or fewer credits to complete your degree requirements, you are required to select your courses in each term with a view to timely completion of your degree and program requirements. You must register in one of the following types of departmental programs leading to the degree of Bachelor of Science:

12.7.4.1.1 **Liberal Programs**

Liberal programs provide students with the opportunity to study the core of one science discipline along with a breadth component from another area of science or from many other disciplines. In a liberal program, you must complete a Core Science Component (CSC) (45-50 credits), plus a Breadth Component (at least 18 credits). The requirements for the Core Science Components are given under departmental sections of this publication whenever applicable.

For the Breadth Component, you must complete one of the following:

- Minor Program (18-24 credits) – one of the programs listed in section 12.11.2: Minor Programs.
- Arts Minor or Major Concentration (18 or 36 credits) – one of the programs listed in section 12.11.6: Faculty of Arts Major and Minor Concentration Programs Available to Science Students.
- A Core Science Component in a second area (45-50 credits) – at least 24 credits must be distinct from the courses used to satisfy the primary Core Science Component. Note that a second Core Science Component can be selected from any of the Science groups.

12.7.4.1.2 **Major Programs**

Major programs are more specialized than liberal programs and are usually centred on a specific discipline or department. For prospective teachers, the Faculty also offers major programs that can constitute the Science component of the Concurrent B.Sc. and B.Ed. Program. For more information about this joint degree, refer to section 12.11.3: Concurrent B.Sc. and B.Ed. Program (Science or Mathematics for Teachers).

12.7.4.1.3 **Honours Programs**

Honours programs typically involve an even higher degree of specialization, often include supervised research, and require students to maintain a high academic standard. Although honours programs are specially designed to prepare you for graduate studies, graduates of the other degree programs may also
be admissible to many graduate schools. If you intend to pursue graduate studies in your discipline, you should consult a departmental adviser regarding the appropriate selection of courses in your field.

### 12.7.4.2 Minor and Minor Concentration Programs

In addition to the liberal, major, and honours degree programs, as a student in the Faculty of Science, you may select a minor or approved minor concentration program. These are coherent sequences of courses in a given discipline or interdisciplinary area that may be taken in addition to the courses required for the degree program.

Science minors consist of up to 24 credits.

Arts minor concentrations consist of 18 credits.

A minimum of 18 new credits must be completed in the Minor or Minor concentration.

For a list of "Minor Programs", see section 12.11.2: Minor Programs; for minor concentrations that are approved for Science students, see section 12.11.6: Faculty of Arts Major and Minor Concentration Programs Available to Science Students.

### 12.7.4.3 Other Second Programs

In addition to a major or honours program, you may pursue a second major or honours program, or an Arts major concentration program. A minimum of 36 new credits must be completed in the second program.

### 12.7.4.4 Concurrent B.Sc. and B.Ed. Program

The Concurrent B.Sc. and B.Ed. program described in section 12.14.34: Science or Mathematics for Teachers is designed to provide you with the opportunity to obtain both a B.Sc. and a B.Ed. after a minimum of 135 credits of study.

As a Science student, you might want to enter the program by visiting the B.Sc. and B.Ed. website or contact Pete Barry, email: pete.barry@mcgill.ca.

### 12.7.4.5 Internship Year in Science (IYS)

All B.Sc. programs can include an internship component. For more details, students should refer to section 12.13.1: Industrial Practicum (IP) and Internship Year in Science (IYS), section 12.11.5: Internship Programs – Industrial Practicum (IP) and Internship Year in Science (IYS), and www.mcgill.ca/science/internships-field/internships.

### 12.7.4.6 McGill School of Environment

The Faculty of Science is one of the four faculties in partnership with the McGill School of Environment. For more information, see the McGill School of Environment section of this publication.

### 12.7.5 Course Requirements

All required and complementary courses used to fulfill program requirements, including the basic Science requirements, must be completed with a grade of C or better. If you fail to obtain a Satisfactory grade in a required course, you must either pass the supplemental examination in the course or do additional work for a supplemental grade, if these options are available, or repeat the course. Course substitution will be allowed only in special cases; you should consult your academic adviser.

Normally, you are permitted to repeat a failed course only once. (Failure is considered to be a grade of less than C or the administrative failures of J and KF) If a required course is failed a second time, you must appeal to the Director of Advising Services for permission to take the course a third time. If permission is denied by the Director of Advising Services and/or by the Committee on Student Standing, on appeal, you must withdraw from the program.

If the failed course is a complementary course required by the program, you may choose to replace it with another appropriate complementary course. If you choose to substitute another complementary course for a complementary course in which a D was received, credit for the first course will still be given, but as an elective. If you repeat a required course in which a D was received, credit will be given only once.

Full details of the course requirements for all programs offered are given in each unit’s section together with the locations of departmental advisory offices, program directors, and telephone numbers should further information be required.

### 12.7.5.1 Course Overlap

You will not receive additional credit towards your degree for any course that overlaps in content with a course for which you have already received credit at McGill, at another university, at CEGEP, or for Advanced Placement, Advanced Level, International Baccalaureate, or French Baccalaureate results. It is your responsibility to consult the Science Office for Undergraduate Student Advising (SOUSA) or the department offering the course as to whether or not credit can be obtained and to be aware of exclusion clauses specified in the course description in this publication. Please refer to the following website for specific information about advanced standing credits and McGill course exemptions: www.mcgill.ca/students/transfercredit.

Sometimes the same course is offered by two different departments. Such courses are called "double-prefix" courses. When such courses are offered simultaneously, you should take the course offered by the department in which you are obtaining your degree. For example, in the case of double-prefix courses CHEM XYZ and PHYS XYZ, Chemistry students take CHEM XYZ and the Physics students take PHYS XYZ. If a double-prefix course is offered by different departments in alternate years, you may take whichever course best fits your schedule.

Credit for computer and statistics courses offered by faculties other than Science requires the permission of the Director of Advising Services and will be granted only under exceptional circumstances.
Credit for statistics courses will be given with the following stipulations:

- Credit will be given for ONLY ONE of the following introductory statistics courses: AEMA 310, BIOL 373, ECON 227D1/D2, ECON 257D1/D2, GEOG 202, MATH 203, MGCR 271, MGCR 273, PSYC 204, SOCI 350.
- Credit will be given for ONLY ONE of the following intermediate statistics courses: AEMA 411, ECON 227D1/D2, ECON 257D1/D2, GEOG 351, MATH 204, PSYC 305, SOCI 461 with the exception that you may receive credit for both PSYC 305 and ECON 227D1/D2 or ECON 257D1/D2.
- If you have already received credit for MATH 324 or MATH 375, you will NOT receive credit for any of the following: AEMA 310, AEMA 411, BIOL 373, ECON 227D1/D2, ECON 257D1/D2, GEOG 202, GEOG 351, MATH 203, MATH 204, MGCR 271, MGCR 273, PSYC 204, PSYC 305, SOCI 350.
- For 500-level statistics courses not listed above, you must consult a program adviser to ensure that no significant overlap exists. Where such overlap exists with a course for which you have already received credit, credit for the 500-level course will not be allowed.
- Credit for statistics courses offered by faculties other than Arts and Science requires the permission of the Director of Advising Services, Science, except for students in the B.Sc. Major in Environment, who may take required statistics courses in the Faculty of Agricultural and Environmental Sciences necessary to satisfy their program requirements.
- PSYC 204 may not be taken if a grade of 75% or better was received in an equivalent course completed at CEGEP.

12.7.5.2 Courses Outside the Faculties of Arts and Science

As a student in the Faculty of Science, you should consult the statement of regulations for taking courses outside the Faculties of Arts and of Science (see below). A list of approved/not approved courses in other faculties is posted on the SOUSA website (www.mcgill.ca/science/sousa/continuing_students/bsc/outside). You may take courses on the approved list and may not, under any circumstances, take courses on the not-approved list for credit. Requests for permission to take courses that are not on either list should be addressed to the Director of Advising Services.

The regulations are as follows:

- You may take only 6 credits per year, up to 18 credits in all, of courses outside the Faculties of Arts and of Science.
- For a list of courses considered to be “in the Faculty of Science”, or “in the Faculty of Arts”, consult the PDF version of this publication available at www.mcgill.ca/study. Go to Courses and look under Faculty of Science or Faculty of Arts.
- Courses in other faculties that are considered as taught by Science (e.g., BIOT, EXMD, and PHAR) are so designated under the Faculty of Science section of this publication.
- Courses in Music are considered as outside the Faculties of Arts and of Science, except MUAR courses, which are considered as Arts courses.
- All courses listed in the Religious Studies section (RELG) are considered as courses in Arts and Science except for courses restricted to B.Th. or S.T.M. students and courses that require permission of the Chair of the B.Th. Committee.
- Students should consult the list of restricted courses outside of the Faculties of Arts and of Science on the SOUSA website (www.mcgill.ca/science/sousa).
- You must have the necessary prerequisites and permission of the instructor for such courses.
- Credit for computer and statistics courses offered by faculties other than Arts and Science requires the permission of the Director of Advising Services and will be granted only under exceptional circumstances.
- If you use Minerva to register for a course, and it exceeds the specified limitations or it is not approved, the course will be flagged for no credit after the course change period.
- Credit will not be given for any “how to” courses offered by other faculties that are intended to provide you with only practical or professional training in specific applied areas. Examples include courses that teach the use of certain computer packages (databases, spreadsheets, etc.) or computer languages (SQL, COBOL, FORTRAN, etc.), machine shop or electronic shop courses, technical drawing courses, and professional practice courses.
- As a student in the McGill School of Environment, you may exceed the 18-credit limit for courses outside the Faculties of Arts and of Science, provided that all such courses are necessary to complete your program of study.
- As a student in the Major in Software Engineering, you may exceed the 18-credit limit for courses outside the Faculties of Arts and of Science, provided that all such courses are necessary to complete your program of study.
- As a student in the B.Sc. Liberal Program taking a Major Concentration in Music, you may exceed the 18-credit limit for courses outside the Faculties of Arts and of Science, provided that all such courses are necessary to complete your program of study, up to a maximum of 36 Music credits.
- If you registered in the Minor in Management before September 2007, you may take 21 credits of courses outside the Faculties of Arts and of Science.
- The 18-credit limit applies to students taking the Minor in Nutrition: equivalent courses in Science should be taken instead of courses in the Faculty of Agricultural and Environmental Sciences.

12.7.5.3 Correspondence, Distance Education or Web-based Courses

As a Science student, you may obtain transfer credit for correspondence, distance education, or web-based courses if you receive prior approval from the appropriate McGill department for the course content and prior approval from the Director of Advising Services, Science, for the method of delivery and evaluation. Courses taught through distance education from institutions other than McGill will only be considered for transfer credits under the following conditions:

- The course is given by a government-accredited, degree-granting institution acceptable to McGill.
- The course counts for credit towards degrees granted at the institution giving the course.
- The combined total of regular course credits and distance education course credits do not exceed the permitted maximum number of credits per term according to Faculty regulations.
Courses taught through distance education may not be used to complete program requirements, except on an individual basis when serious, documented circumstances warrant it.

12.7.5.4 Courses in English as a Second Language (ESL)

ESL courses are only open to students whose primary language is not English and who have studied for fewer than five years in English-language secondary institutions. As a student in the B.Sc., you may take a maximum of 12 credits, including academic writing courses for non-anglophones, from the list of ESL courses published at www.mcgill.ca/science/sousa/continuing_students/bsc/outside.

12.7.5.5 Registration for First-Year Seminars

Registration for First-Year Seminars is limited to students in their first year of study at McGill, i.e., newly admitted students in U0 or U1. These courses are designed to provide a closer interaction with professors and better working relations with peers than is available in large introductory courses. These seminars endeavour to teach the latest scholarly developments and expose participants to advanced research methods. Registration is on a first-come, first-served basis. The maximum number of students in any seminar is 25, although some are limited to even fewer than that.

You may take only one First-Year Seminar. If you register for more than one, you will be obliged to withdraw from all but one of them. Please consult the departmental listings for course descriptions and availability.

<table>
<thead>
<tr>
<th>Course Code</th>

<td>FYS: Mental Illness and the Brain</td>
</tr>
</tbody>
</table>

The First-Year Seminars offered by the Faculty of Arts are also open to Science students. For a complete listing, please consult Faculty of Arts > First-Year Seminars.

12.7.5.6 Course Credit Weight

The credit assigned to a particular course should reflect the amount of effort it demands of you. Normally, one credit will represent three hours total work per week for one term – including a combination of lecture hours, other contact hours, such as laboratory periods, tutorials, and problem periods, as well as personal study time.

12.8 Advising

If you need 96 or fewer credits to complete your degree requirements, you must consult an academic adviser in your proposed department of study to obtain advice and approval of your course selection. Quebec students with a Diploma of Collegial Studies in Science have normally taken the equivalent of, and are therefore exempt from, the 100-level basic science courses in Biology, Chemistry, Mathematics, and Physics. Such students may also be exempt from some 200-level courses. If you are a student with satisfactory results in International Baccalaureate, French Baccalaureate, Advanced Levels, and Advanced Placement tests, you may also be exempt from some or all of the Science Freshman courses. To facilitate program planning, you must present your transcript(s) and letter of admission. For a detailed description of advising and registration procedures, you should refer to University Regulations and Information > Registration, to University Regulations and Information > Undergraduate Advising, and to the website for newly admitted undergraduate students at www.mcgill.ca/newstudents, as well as to the information posted on the SOUSA website at www.mcgill.ca/science/sousa/new_students/u1, and the departmental websites.

If you need 97-120 credits to complete your degree requirements, you will normally be registered in a Freshman program until you complete your first year. You must consult a SOUSA adviser in the Science Office for Undergraduate Student Advising to obtain advice and approval of your course selection. For a detailed description of advising and registration procedures as a Freshman student, you should refer to the website for newly admitted undergraduate students at www.mcgill.ca/newstudents, and to the information on the SOUSA website at www.mcgill.ca/science/sousa/new_students/u0.

Advising for all returning students takes place in March for the upcoming academic year. For more information, you should refer to the information on the SOUSA website, www.mcgill.ca/science/sousa/continuing_students.

12.9 Freshman Interest Groups

Freshman Interest Groups (FIGs) are groups of approximately 15 U0 students and U1 students in their first semester, in the B.Sc. or B.A. & Sc., led by a professor in the Faculty of Science or Faculty of Medicine and an upper-year undergraduate student. They meet once every two weeks in the Fall semester to discuss a wide range of topics, such as science in the news, program choices, undergraduate research opportunities, or just aspects of life in Montreal. The purpose of a FIG is to ease the transition to McGill and Montreal and to provide you an opportunity to interact with a professor and with other U0 students in a small group. FIGs carry no credit and there is no charge. For more information and to see how to register, refer to www.mcgill.ca/science/student/fig.
12.10 Examinations

Students should refer to University Regulations and Information > Examinations: General Information in this publication for information about final examinations and deferred examinations. Note that for the Faculty of Science, Final Examinations: University Regulations Concerning Final Examinations under University Regulations and Information, applies to courses up to and including the 500 level.

The exam schedules are posted on the McGill website, www.mcgill.ca/students/exams, normally one month after the start of classes for the Tentative Exam Schedule, and two months after the start of classes for the Final Examination Schedule.

Students are warned not to make travel arrangements to leave Montreal prior to the scheduled end of any examination period.

12.11 Overview of Programs Offered

Science Program Groups, section 12.11.1: Bachelor of Science Program Groups, which may include Liberal Program – Core Science Components, Major Programs, Joint Major Programs, Honours Programs, and Joint Honours Programs

Minor Programs, section 12.11.2: Minor Programs

Concurrent B.Sc. and B.Ed. Program, section 12.7.4.4: Concurrent B.Sc. and B.Ed. Program

Bachelor of Arts and Science, section 12.11.4: Bachelor of Arts and Science

Internship Year in Science (IYS), section 12.7.4.5: Internship Year in Science (IYS)

Science Internships and Field Studies, section 12.13: Science Internships and Field Studies

Faculty of Arts Major and Minor Concentration Programs Available to Science Students, section 12.11.6: Faculty of Arts Major and Minor Concentration Programs Available to Science Students

12.11.1 Bachelor of Science Program Groups

Science students admitted after September 2009 are limited to choosing liberal, majors or honours programs within the Science group to which they were admitted, but may continue to choose freely from all available minor programs. Students pursuing a Liberal Science Program – Core Science Component (CSC) may also select a second CSC from any group. See section 12.7.4.1: Liberal, Major, and Honours Programs.

The groups within the B.Sc. are:

- Biological, Biomedical & Life Sciences
- Microbiology & Immunology
- Neuroscience
- Physical, Earth, Math & Computer Science
- Concurrent B.Sc./B.Ed.

For a list of specific programs in each group, see:

- section 12.11.1.1: Biological, Biomedical & Life Sciences Group
- section 12.11.1.2: Microbiology and Immunology Group
- section 12.11.1.3: Neuroscience Group
- section 12.11.1.4: Physical, Earth, Math & Computer Science Group
- section 12.11.1.5: Concurrent B.Sc. and B.Ed. Program (Science or Mathematics for Teachers)

To change to a major or honours program in another Science group, students must make an Intra-Faculty Transfer application.

12.11.1.1 Biological, Biomedical & Life Sciences Group

12.11.1.1.1 Liberal Program – Core Science Components

- Anatomy and Cell Biology, section 12.14.2.4: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Anatomy and Cell Biology (48 credits)
- Biochemistry, section 12.14.4.5: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Biochemistry (47 credits)
- Biology, section 12.14.5.7: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Biology (47 credits)
- Physiology, section 12.14.30.4: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Physiology (50 credits)
12.11.1.2 Major Programs

- Psychology, section 12.14.32.6: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Psychology (45 credits)

12.11.1.3 Joint Major Programs

- Biology and Mathematics, section 12.14.5.10: Bachelor of Science (B.Sc.) - Major Biology and Mathematics (76 credits)

12.11.1.4 Honours Programs

- Psychology, section 12.14.32.7: Bachelor of Science (B.Sc.) - Major Psychology (54 credits)

12.11.2 Microbiology and Immunology Group

12.11.2.1 Liberal Program – Core Science Component

- Microbiology and Immunology – application required, see section 12.14.22: Microbiology and Immunology (MIMM) for information, and section 12.14.22.4: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Microbiology and Immunology (48 credits)

12.11.2.2 Major Program

- Microbiology and Immunology – application required, see section 12.14.22: Microbiology and Immunology (MIMM) for information, and section 12.14.22.5: Bachelor of Science (B.Sc.) - Major Microbiology and Immunology (67 credits)

12.11.2.3 Honours Programs

- Immunology (Interdepartmental) – application required, see section 12.14.17: Immunology Interdepartmental Honours for information, and section 12.14.17.3: Bachelor of Science (B.Sc.) - Honours Immunology (Interdepartmental) (75 credits)

12.11.3 Neuroscience Group

12.11.3.1 Major Program

- Neuroscience - application required, see section 12.14.25: Neuroscience for information, and section 12.14.25.4: Bachelor of Science (B.Sc.) - Major Neuroscience (65 credits)

12.11.4 Physical, Earth, Math & Computer Science Group

12.11.4.1 Liberal Program – Core Science Components

- Atmospheric Science, section 12.14.3.5: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Atmospheric and Oceanic Sciences (46 credits)
- Chemistry: Biological Option, section 12.14.7.7: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Chemistry - Biological (47 credits)
• Chemistry: General Option, section 12.14.7.8: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Chemistry - General (49 credits)
• Chemistry: Physical Option, section 12.14.7.9: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Chemistry - Physical (47 credits)
• Computer Science, section 12.14.9.8: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Computer Science (45 credits)
• Earth and Planetary Sciences, section 12.14.10.6: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Earth and Planetary Sciences (45 credits)
• Geography, section 12.14.16.7: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Geography (49 credits)
• Mathematics, section 12.14.21.7: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Mathematics (45 credits)
• Physics, section 12.14.29.8: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Physics (48 credits)
• Software Engineering, section 12.14.9.9: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Software Engineering (49 credits)
• Statistics, section 12.14.21.8: Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Statistics (45 credits)

12.11.1.42 Major Programs

• Atmospheric Science, section 12.14.3.6: Bachelor of Science (B.Sc.) - Major Atmospheric Science (61 credits)
• Atmospheric Science (Atmospheric Chemistry option), section 12.14.3.7: Bachelor of Science (B.Sc.) - Major Atmospheric Science - Atmospheric Chemistry (61 credits)
• Chemistry, section 12.14.7.10: Bachelor of Science (B.Sc.) - Major Chemistry (59 credits)
• Chemistry (Bio-organic option), section 12.14.7.12: Bachelor of Science (B.Sc.) - Major Chemistry - Bio-organic (63 credits)
• Chemistry (Atmosphere and Environment option), section 12.14.7.11: Bachelor of Science (B.Sc.) - Major Chemistry - Atmosphere and Environment (63 credits)
• Chemistry (Materials option), section 12.14.7.13: Bachelor of Science (B.Sc.) - Major Chemistry - Materials (62 credits)
• Computer Science, section 12.14.9.10: Bachelor of Science (B.Sc.) - Major Computer Science (63 credits)
• Computer Science (Computer Games option), section 12.14.9.12: Bachelor of Science (B.Sc.) - Major Computer Science - Computer Games (67 credits)
• Earth and Planetary Sciences, section 12.14.10.7: Bachelor of Science (B.Sc.) - Major Earth and Planetary Sciences (66 credits)
• Earth System Science, section 12.14.11.3: Bachelor of Science (B.Sc.) - Major Earth System Science (57 credits)
• Environment (Atmospheric Environment and Air Quality domain) - see McGill School of Environment > Bachelor of Science (B.Sc.) - Major Environment - Atmospheric Environment and Air Quality (60 credits)
• Environment (Biodiversity and Conservation domain) - see McGill School of Environment > Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) - Major Environment - Biodiversity and Conservation (63 credits)
• Environment (Earth Sciences and Economics domain) - see McGill School of Environment > Bachelor of Science (B.Sc.) - Major Environment - Earth Sciences and Economics (66 credits)
• Environment (Ecological Determinants of Health domain - Cellular) - see McGill School of Environment > Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) - Major Environment - Ecological Determinants of Health - Cellular (63 credits)
• Environment (Ecological Determinants of Health domain - Population) - see McGill School of Environment > Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) - Major Environment - Ecological Determinants of Health - Population (63 credits)
• Environment (Environmetrics domain) - see McGill School of Environment > Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) - Major Environment - Environmetrics (63 credits)
• Environment (Food Production and Environment domain) - see McGill School of Environment > Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) - Major Environment - Food Production and Environment (63 credits)
• Environment (Land Surface Processes and Environmental Change domain) - see McGill School of Environment > Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) - Major Environment - Land Surface Processes and Environmental Change (63 credits)
• Environment (Renewable Resource Management domain) - see McGill School of Environment > Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) - Major Environment - Renewable Resource Management (63 credits)
• Environment (Water Environments and Ecosystems domain - Biological) - see McGill School of Environment > Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) - Major Environment - Water Environments and Ecosystems - Biological (60 credits)
• Environment (Water Environments and Ecosystems domain - Physical) - see McGill School of Environment > Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) - Major Environment - Water Environments and Ecosystems - Physical (63 credits)
• Geography, section 12.14.16.8: Bachelor of Science (B.Sc.) - Major Geography (58 credits)
• Mathematics, section 12.14.21.9: Bachelor of Science (B.Sc.) - Major Mathematics (54 credits)
• Physics, section 12.14.29.9: Bachelor of Science (B.Sc.) - Major Physics (60 credits)
• Software Engineering, section 12.14.9.13: Bachelor of Science (B.Sc.) - Major Software Engineering (63 credits)

12.11.1.43 Joint Major Programs

• Atmospheric Science and Physics, section 12.14.3.8: Bachelor of Science (B.Sc.) – Major Atmospheric Science and Physics (67 credits)
• Biology and Mathematics, section 12.14.5.10: Bachelor of Science (B.Sc.) - Major Biology and Mathematics (76 credits)
• Computer Science and Biology, section 12.14.9.11: Bachelor of Science (B.Sc.) - Major Computer Science and Biology (73 credits)
• Mathematics and Computer Science - see Mathematics and Statistics, section 12.14.12.10: Bachelor of Science (B.Sc.) - Major Mathematics and Computer Science (72 credits)
• Physics and Computer Science - see Physics, section 12.14.29.11: Bachelor of Science (B.Sc.) - Major Physics and Computer Science (66 credits)
• Physics and Geophysics, section 12.14.29.10: Bachelor of Science (B.Sc.) - Major Physics and Geophysics (69 credits)
• Physiology and Mathematics, section 12.14.30.6: Bachelor of Science (B.Sc.) - Major Physiology and Mathematics (77 credits)
• Physiology and Physics, section 12.14.30.7: Bachelor of Science (B.Sc.) - Major Physiology and Physics (80 credits)
• Statistics and Computer Science, section 12.14.21.11: Bachelor of Science (B.Sc.) - Major Statistics and Computer Science (72 credits)

12.11.1.4 Honours Programs

• Applied Mathematics, section 12.14.21.13: Bachelor of Science (B.Sc.) - Honours Applied Mathematics (60 credits)
• Atmospheric Science, section 12.14.3.9: Bachelor of Science (B.Sc.) - Honours Atmospheric Science (70 credits)
• Atmospheric Science (Atmospheric Chemistry option), section 12.14.3.10: Bachelor of Science (B.Sc.) - Honours Atmospheric Science - Atmospheric Chemistry (70 credits)
• Chemistry, section 12.14.7.14: Bachelor of Science (B.Sc.) - Honours Chemistry (71 credits)
• Chemistry (Bio-organic option), section 12.14.7.15: Bachelor of Science (B.Sc.) - Honours Chemistry - Bio-organic (75 credits)
• Chemistry (Atmosphere and Environment option), section 12.14.7.16: Bachelor of Science (B.Sc.) - Honours Chemistry - Atmosphere and Environment (75 credits)
• Chemistry (Materials), section 12.14.7.17: Bachelor of Science (B.Sc.) - Honours Chemistry - Materials (74 credits)
• Computer Science, section 12.14.9.14: Bachelor of Science (B.Sc.) - Honours Computer Science (75 credits)
• Earth Sciences, section 12.14.10.8: Bachelor of Science (B.Sc.) - Honours Earth Sciences (75 credits)
• Environment, section 7.13.2: Bachelor of Science (B.Sc.) - Honours Environment (72 credits)
• Planetary Sciences, section 12.14.10.9: Bachelor of Science (B.Sc.) - Honours Planetary Sciences (81 credits)
• Geography, section 12.14.16.9: Bachelor of Science (B.Sc.) - Honours Geography (66 credits)
• Mathematics, section 12.14.21.12: Bachelor of Science (B.Sc.) - Honours Mathematics (60 credits)
• Physics, section 12.14.29.12: Bachelor of Science (B.Sc.) - Honours Physics (78 credits)
• Probability and Statistics, section 12.14.21.14: Bachelor of Science (B.Sc.) - Honours Probability and Statistics (64 credits)
• Software Engineering, section 12.14.9.15: Bachelor of Science (B.Sc.) - Honours Software Engineering (75 credits)

12.11.1.4.5 Joint Honours Programs

• Mathematics and Computer Science, section 12.14.21.15: Bachelor of Science (B.Sc.) - Honours Mathematics and Computer Science (75 credits)
• Mathematics and Physics, section 12.14.29.13: Bachelor of Science (B.Sc.) - Honours Mathematics and Physics (81 credits)
• Physics and Chemistry, section 12.14.29.14: Bachelor of Science (B.Sc.) - Honours Physics and Chemistry (80 credits)
• Statistics and Computer Science, section 12.14.21.16: Bachelor of Science (B.Sc.) - Honours Statistics and Computer Science (79 credits)

12.11.2 Minor Programs

Revision, August 2011. Start of revision.

Atmospheric Science, section 12.14.3.4: Bachelor of Science (B.Sc.) - Minor Atmospheric Science (18 credits)
Biology, section 12.14.5.6: Bachelor of Science (B.Sc.) - Minor Biology (25 credits)
Biotechnology, section 12.14.6.5: Bachelor of Science (B.Sc.) - Minor Biotechnology (for Science Students) (24 credits)
Chemical Engineering, section 12.14.7.6: Bachelor of Science (B.Sc.) - Minor Chemical Engineering (24 credits)
Chemistry, section 12.14.7.5: Bachelor of Science (B.Sc.) - Minor Chemistry (18 credits)
Computer Science, section 12.14.9.7: Bachelor of Science (B.Sc.) - Minor Computer Science (24 credits)
Education for Science Students, section 12.14.34.4: Bachelor of Science (B.Sc.) - Minor Education for Science Students (18 credits)
Electrical Engineering, section 12.14.29.7: Bachelor of Science (B.Sc.) - Minor Electrical Engineering (24 credits)
Environment – see McGill School of Environment > Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) or Bachelor of Science (B.Sc.) - Minor Environment (18 credits)
Field Study – see Field Studies and Study Abroad > Field Studies - Minor Field Studies (18 credits)

Finance for Non-Management Students – see Desautels Faculty of Management > Minor Finance (For Non-Management Students) (18 credits)

General Science, section 12.14.15.3: Bachelor of Science (B.Sc.) - Minor General Science (18 credits)

Geochemistry, section 12.14.10.5: Bachelor of Science (B.Sc.) - Minor Geochemistry (18 credits)

Geography, section 12.14.16.5: Bachelor of Science (B.Sc.) - Minor Geography (18 credits)

Geographic Information Systems, section 12.14.16.6: Bachelor of Science (B.Sc.) - Minor Geographic Information Systems (18 credits)

Geology, section 12.14.10.4: Bachelor of Science (B.Sc.) - Minor Geology (18 credits) (previously named Earth and Planetary Sciences)

Human Nutrition – see Faculty of Agricultural and Environmental Sciences > School of Dietetics and Human Nutrition > Minor Human Nutrition (24 credits)

Interdisciplinary Life Sciences, section 12.14.18.3: Bachelor of Science (B.Sc.) - Minor Interdisciplinary Life Sciences (24 credits)

Kinesiology, section 12.14.19.3: Bachelor of Science (B.Sc.) - Minor Kinesiology (24 credits)

Management for Non-Management Students – see Desautels Faculty of Management > Minor Management (For Non-Management Students) (18 credits)

Marketing for Non-Management Students – see Desautels Faculty of Management > Minor Marketing (For Non-Management Students) (18 credits)

Mathematics, section 12.14.21.5: Bachelor of Science (B.Sc.) - Minor Mathematics (24 credits)

Musical Applications of Technology – see Schulich School of Music > Bachelor of Music (B.Mus.) - Minor Musical Applications of Technology (18 credits)

Musical Science and Technology – see Schulich School of Music > Bachelor of Music (B.Mus.) - Minor Musical Science and Technology (18 credits)

Natural History – see section 12.14.33.4: Bachelor of Science (B.Sc.) - Minor Natural History (24 credits)

Neuroscience, section 12.14.25.3: Bachelor of Science (B.Sc.) - Minor Neuroscience (24 credits)

Operations Management for Non-Management Students – see Desautels Faculty of Management > Minor Operations Management (For Non-Management Students) (18 credits)

Pharmacology, section 12.14.28.4: Bachelor of Science (B.Sc.) - Minor Pharmacology (24 credits)

Physics, section 12.14.29.6: Bachelor of Science (B.Sc.) - Minor Physics (18 credits)

Psychology, section 12.14.32.5: Bachelor of Science (B.Sc.) - Minor Psychology (24 credits)

Statistics, section 12.14.21.6: Bachelor of Science (B.Sc.) - Minor Statistics (24 credits)

Technological Entrepreneurship for Science Students – application required, see program listing: section 12.14.35.3: Bachelor of Science (B.Sc.) - Minor Technological Entrepreneurship for Science Students (18 credits) (Please note that this Minor is currently under review.)

Revision, August 2011. End of revision.

Notes:
1. The Minor in Chemical Engineering is only available to students in Chemistry.
2. The Minor in Electrical Engineering is only available to students in the Major program in Physics.
3. The Minor in General Science is only available to students in B.Sc. Liberal programs.

12.11.3 Concurrent B.Sc. and B.Ed. Program (Science or Mathematics for Teachers)

Major in Mathematics for Teachers – see Science or Mathematics for Teachers, section 5.10.18: Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Mathematics for Teachers (135 credits)

Major Concentration in Biology with a Minor in Chemistry for Teachers – see Science or Mathematics for Teachers, section 5.10.10: Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Biology - Cell/Molecular with Minor Chemistry for Teachers (135 credits) or section 5.10.12: Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Biology - Organismal with Minor Chemistry for Teachers (135 credits)

Major Concentration in Biology with a Minor in Physics for Teachers – see Science or Mathematics for Teachers, section 5.10.11: Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Biology - Cell/Molecular with Minor Physics for Teachers (135 credits) or section 5.10.13: Concurrent Bachelor of Science (B.Sc.) and Bachelor of Education (B.Ed.) - Major Concentration Biology - Organismal with Minor Physics for Teachers (135 credits)
12.11.4 Bachelor of Arts and Science

Please see the Bachelor of Arts and Science section of this publication for details.

12.11.5 Internship Programs – Industrial Practicum (IP) and Internship Year in Science (IYS)

The Faculty of Science offers an internship program which features the Industrial Practicum (4 months) and the Internship Year in Science (8, 12, 16 months). Participating in an internship offers you the chance to add a practical element to your studies, to solidify your career goals, to gain some valuable experience, and to earn money.

It will also give you the opportunity to enhance your degree: if you complete two IPs or participate in an IYS, the name of your program will change to include the word internship (e.g., Bachelor of Science - Internship Program - Biology).

To learn more about the Science internship programs, visit www.mcgill.ca/science/internships-field/internships.

12.11.6 Faculty of Arts Major and Minor Concentration Programs Available to Science Students

For more information, please see the relevant departmental entries under the Faculty of Arts section.

12.11.6.1 Major Concentrations

African Studies, section 3.11.4.5: Bachelor of Arts (B.A.) - Major Concentration African Studies (36 credits)

Anthropology, section 3.11.5.7: Bachelor of Arts (B.A) - Major Concentration Anthropology (36 credits)

Art History, section 3.11.6.6: Bachelor of Arts (B.A.) – Major Concentration Art History (36 credits)

Canadian Studies, section 3.11.8.5: Bachelor of Arts (B.A.) – Major Concentration Canadian Studies (36 credits)

Classics, section 3.11.10.6: Bachelor of Arts (B.A.) - Major Concentration Classics (36 credits)

East Asian Studies, section 3.11.13.7: Bachelor of Arts (B.A.) - Major Concentration East Asian Studies (36 credits)

Economics, section 3.11.14.5: Bachelor of Arts (B.A.) - Major Concentration Economics (36 credits)

English - Cultural Studies, section 3.11.17.11: Bachelor of Arts (B.A.) – Major Concentration English – Cultural Studies (36 credits)

English - Drama and Theatre, section 3.11.17.10: Bachelor of Arts (B.A.) - Major Concentration English - Drama and Theatre (36 credits)

English - Literature, section 3.11.17.9: Bachelor of Arts (B.A.) - Major Concentration English - Literature (36 credits)

Geography (Urban Systems), section 3.11.23.8: Bachelor of Arts (B.A.) - Major Concentration Geography (Urban Systems) (36 credits)

German Language and Literature, section 3.11.24.10: Bachelor of Arts (B.A.) - Major Concentration German Studies - Language and Literature (36 credits)

German Literature and Culture, section 3.11.24.11: Bachelor of Arts (B.A.) - Major Concentration German Studies - Literature and Culture (36 credits)

German Studies, Contemporary, section 3.11.24.9: Bachelor of Arts (B.A.) - Major Concentration Contemporary German Studies (36 credits)

Hispanic Languages, section 3.11.25.7: Bachelor of Arts (B.A.) - Major Concentration Hispanic Studies - Languages (36 credits)

Hispanic Literature and Culture, section 3.11.25.8: Bachelor of Arts (B.A.) - Major Concentration Hispanic Studies - Literature and Culture (36 credits)

History, section 3.11.26.6: Bachelor of Arts (B.A.) - Major Concentration History (36 credits)

International Development Studies, section 3.11.30.5: Bachelor of Arts (B.A.) - Major Concentration International Development Studies (36 credits)

Italian Studies, section 3.11.32.5: Bachelor of Arts (B.A.) - Major Concentration Italian Studies (36 credits)

Jewish Studies, section 3.11.33.6: Bachelor of Arts (B.A.) - Major Concentration Jewish Studies (36 credits)

12.12 Undergraduate Research Opportunities

Because McGill is a research-intensive university, research informs the curriculum. There are many opportunities for talented students to take part in research during their undergraduate studies, whether at McGill, in affiliated hospitals, at other universities, or in the field. Many of these are organized through formal courses or programs organized by the Faculty of Science or its departments. For more information, see the following:

- section 12.12.1: Research Project Courses
- section 12.12.1.1: "396" Undergraduate Research Project Courses
- section 12.12.2: Undergraduate Student Research Awards – NSERC USRA, NSERC Industrial USRA, SURA, FRSQ USRA.
- section 12.12.3: Undergraduate Research Conference
- section 12.12.4: Other opportunities

Dean's Multidisciplinary Undergraduate Research List - see description elsewhere in this publication: University Regulations and Information > Graduation > Graduation Honours: Faculty of Science Dean's Multidisciplinary Undergraduate Research List

The Office for Undergraduate Research in Science (OURS) coordinates several of the aforementioned programs, and can help students find out about other opportunities. Visit the OURS website at www.mcgill.ca/science/ours to find out more.

Because internships and field study programs may include a research component, please also see:

- section 12.13.1: Industrial Practicum (IP) and Internship Year in Science (IYS)
- section 12.13.2: Field Study and Study Abroad

12.12.1 Research Project Courses

Departments offer a variety of research-based courses which allow you to perform research under the supervision of a McGill researcher for academic credit. Depending on the unit, courses featuring undergraduate research may bear names such as: majors project, honors project, advanced lab, independent research, technical project, independent study, or research project and seminar. For more information, see the research course list online at www.mcgill.ca/science/ours/researchcourses or browse the course listings at www.mcgill.ca/students/courses/calendars/keyword.

12.12.1.1 "396" Undergraduate Research Project Courses

"396" undergraduate research project courses are offered by most departments and schools – ANAT 396, ATOC 396, BIOC 396, BIOL 396, etc. – plus COGS 396 and NSCI 396. They are elective courses, which can be taken outside your own department, and can be taken after one term of undergraduate studies. Note that for Microbiology and Immunology, MIMM 396 is for microbiology projects whereas MIMM 397 is for immunology; otherwise, for all practical purposes MIMM 397 should be treated as a "396" course. There is also a BASC 396 course for B.A. & Sc. students.

Students can consult a list of past projects and currently available projects on the Science website at www.mcgill.ca/science/ours/396, or they can devise a new project in consultation with a McGill professor and submit the required paperwork online.

12.12.2 Undergraduate Student Research Awards

There are several award programs that fund undergraduate student research projects at McGill (and sometimes off-campus), usually in the summer. Please see the following:

- section 12.12.2.1: NSERC Undergraduate Student Research Awards
- section 12.12.2.2: NSERC Industrial Undergraduate Student Research Awards
- section 12.12.2.3: SURA: Science Undergraduate Research Awards
- section 12.12.2.4: FRSQ Undergraduate Student Research Awards

Please also consult the Office for Undergraduate Research in Science website at www.mcgill.ca/science/ours for any new programs that may have been added.

12.12.2.1 NSERC Undergraduate Student Research Awards

The Natural Sciences and Engineering Research Council of Canada Undergraduate Student Research Awards (NSERC USRA) in Universities program supports 16 consecutive weeks of paid full-time research under the supervision of a professor who holds an NSERC grant. It is an excellent way to prepare for graduate studies or a future career in science. This program is offered at other universities across Canada, and a travel allowance from NSERC is available.
To apply, students must first identify a proposed supervisor who holds an NSERC grant. Students should apply at the university where they wish to hold the award. Applicants must be Canadian citizens or permanent residents of Canada. See www.mcgill.ca/science/ours/nserc for more information.

12.12.2.2 NSERC Industrial Undergraduate Student Research Awards

In cooperation with a company, students can also apply for an Industrial NSERC Award to provide salary support and gain industrially relevant experience. Students apply for these awards through one or more companies (not through McGill). For more information on forms, student eligibility, and company eligibility, please visit the NSERC website www.nserc.ca and look for the Industrial Undergraduate Student Research Awards.

12.12.2.3 SURA: Science Undergraduate Research Awards

Science Undergraduate Research Awards – SURAs – are for both Canadian and international McGill students registered in a science undergraduate program. SURAs are broadly similar to the NSERC USRA; two differences are, on the student side, that international students may apply, and on the supervisor side, while they must still hold a research grant, the grant may be from one of the other funding agencies, namely CRC, NSERC, CIHR, SSHRC, FQRNT, or FRQS (not only NSERC).

12.12.2.4 FRQS Undergraduate Student Research Awards

This program is meant to stimulate interest in research on the part of students registered in an undergraduate program in Health Sciences or other disciplines offering specialization in health sciences, including social sciences, natural sciences, and engineering. For more information, see www.mcgill.ca/gps/students/fellowships/frqs-usra.

12.12.3 Undergraduate Research Conference

Each fall, the Faculty of Science holds an Undergraduate Research Conference to celebrate the research accomplishments of our undergraduate students. The conference also includes a public lecture by a Nobel laureate or other luminary on a topic related to scientific discovery.

Students who wish to present their research posters should contact their departments in the preceding winter or summer, since departments nominate participants for the conference.

Everyone is welcome to attend. This is an excellent opportunity to see what McGill undergraduates undertake as research projects.

For more details and the date, please see www.mcgill.ca/science/ours/urc.

12.12.4 Other opportunities

Science internships and field study programs may have a research component or focus. Please see their descriptions under section 12.11.5: Internship Programs – Industrial Practicum (IP) and Internship Year in Science (IYS) and section 12.13.2: Field Study and Study Abroad in this publication.

Individual departments and researchers offer many other research opportunities. These may be paid or unpaid, for academic credit or not for credit. Some of these opportunities are formal programs and are described in other sections of this publication (section 12.11.1: "396" Undergraduate Research Project Courses, section 12.11.2: NSERC Industrial Undergraduate Student Research Awards, and section 12.12.2: Undergraduate Student Research Awards) or on the Office for Undergraduate Research in Science website (www.mcgill.ca/science/ours); however, many opportunities arise as a result of students talking with their professors. For advice on approaching professors, and more generally on how to get involved in research, see www.mcgill.ca/science/ours/how.

In addition to opportunities available at McGill, there are several external opportunities at other institutions. Many of these are catalogued at www.mcgill.ca/science/ours/opportunities. You may also want to look for additional opportunities funded or offered by the relevant research agencies, institutions, and universities of interest: for example, a provincial cancer research society, a national science funding agency, or a national psychological association.

12.13 Science Internships and Field Studies

The Science Internships & Field Studies Office promotes field studies and internship opportunities to interested students seeking hands-on experience. The office coordinates the field study semesters offered through the Faculty of Science and provides internship opportunities to students who are in Science programs at McGill. Whether you decide to participate in a field study semester or apply classroom theory to practice, the Science Internships & Field Studies Office will offer you assistance in your decision.

12.13.1 Industrial Practicum (IP) and Internship Year in Science (IYS)

These programs are open to all Science undergraduate students. An internship is a career-related, professionally supervised, paid work term and done during your undergraduate degree in a field related to your studies. Internships may have a basis in research. To be eligible to apply:

- You must be a full-time undergraduate student in Science before and after the IP or the IYS is completed.
- You must have completed at least 27 credits and should have at least 12 credits remaining in your degree program.
- Your CGPA must be 2.7 or higher.
• International students are eligible to apply to all IYS positions (unless otherwise indicated in the job posting) and to summer IPs (provided the student has an off-campus work permit).

For more information on IP and IYS, please see section 12.7.4.5: Internship Year in Science (IYS) and www.mcgill.ca/science/internships-field/internships.

12.13.2 Field Study and Study Abroad

McGill’s Field Study Semester programs (in Africa, Barbados, and Panama) are research-based, as are many shorter field courses offered by the Departments of Biology, Earth & Planetary Sciences, and Geography. See Field Studies and Study Abroad and www.mcgill.ca/science/student/internships-field/field for more information about these programs and courses.

12.14 Academic Programs (Faculty of Science)

What is a Major Program?

A major is a versatile, comprehensive primary area of study. Most major programs require about two-thirds of your total credits. With the remaining credits, you can choose electives, or you may want to use those additional credits to take a minor which can be chosen from a wide variety of areas both within and outside of Science.

What is an Honours Program?

Honours programs typically involve an even higher degree of specialization than majors, include supervised research, and require students to maintain a high academic standard. An honours program provides solid preparation for graduate school. With an honours program, you will have fewer elective credits.

What is a B.Sc. Liberal Program?

This is a flexible and modular program. You combine a core science component (CSC) in a Science discipline with a breadth component which may be a minor from a wide variety of areas, a major concentration from the Faculty of Arts, or a second CSC from Science. Consider the Liberal program if you do not want to overly specialize – plus, you will still have room left over for elective courses.

What about Joint Programs?

The Faculty of Science also has quite a few joint programs. These programs combine two different disciplines, which allow you to gain expertise in two fields.

What about Interdisciplinary Programs?

There are many ways to create interdisciplinary programs in the Faculty of Science. You can add a minor to a major or honours program, you can take a liberal program which contains both a core science component and a breadth component, or you can select an explicit interdisciplinary major. The Faculty of Science offers three such interdisciplinary programs: Earth System Science, Environment, and Neuroscience.

12.14.1 B.Sc. Freshman Program

If you need 97-120 credits (four years) to complete your degree requirements, you must register in the Science Freshman Program, which is designed to provide the basic science foundation for your subsequent three-year Liberal, Major, or Honours program. For a detailed description of the Science Freshman Program, you should consult section 12.14.1.1: Bachelor of Science (B.Sc.) - Freshman Program (30 credits) and the Science Freshman Student information available on the SOUSA website, www.mcgill.ca/science/sousa/new_students/u0.

If you have completed the Diploma of Collegial Studies, Advanced Placement exams, Advanced Levels, the International Baccalaureate, the French Baccalaureate, or McGill placement examinations, you may receive exemption and/or credit for all or part of the basic science courses in biology, chemistry, mathematics, and physics. Similarly, if you have completed courses at other universities or colleges, you may receive exemptions and/or credits. You should consult www.mcgill.ca/students/transfercredit for more information.

12.14.1.1 Bachelor of Science (B.Sc.) - Freshman Program (30 credits)

Students who need 97-120 credits to complete their degree requirements will normally be registered in the Science Freshman Program until they complete their first year. They must consult an adviser in the Science Office for Undergraduate Student Advising (SOUSA) to obtain advice and approval of their course selection. Full details are available on the SOUSA website at http://www.mcgill.ca/science/sousa/new_students/u0. Academic advising is also available by email. The address is newstudentadvising.science@mcgill.ca.

Students normally complete 30 credits which must include at least seven courses from the list of Approved Freshman Science Courses, selected as follows:

General Math and Science Breadth

Six of the Freshman courses to satisfy one of the following:

Option 1) 2 courses from MATH and 4 courses from BIOL, CHEM or PHYS;

or

Option 2) 3 courses from MATH and 3 courses from BIOL, CHEM or PHYS.
**Science Complementary**

The seventh course is chosen from the list of Approved Freshman Science Courses.

**Notes:**

1. Students who have not studied all of Biology, Chemistry, and Physics at the grade 12 level or equivalent are strongly advised to include at least one course in the missing discipline in their Freshman Program.

2. Many students will complete more than seven courses from the Approved Freshman Science Courses list, particularly those who wish to leave several options open for their choice of major.

3. Students entering the Freshman Program should be aware of the department specific requirements when selecting their courses. Detailed advising information is available at [http://www.mcgill.ca/science/sousa/new_students/u0/bsc_freshman especific/](http://www.mcgill.ca/science/sousa/new_students/u0/bsc_freshman/).

4. The maximum number of courses per term, required, complementary, and elective, is five.

5. Some medical and dental schools have specific freshman course requirements. Check the admission requirements of the school(s) to which you intend to apply.

**List of approved Freshman Science Courses**

Select the approved courses according to the instructions above.

Electives
Students wishing to take elective courses may choose them from introductory courses offered by departments in the Faculties of Science or of Arts. A list of recommended courses is found at http://www.mcgill.ca/science/sousa/new_students/u0/bsc_freshman/approved/. Certain courses offered by other faculties may also be taken, but some restrictions apply. Consult the SOUSA website at http://www.mcgill.ca/science/sousa/continuing_students/bsc/outside/ for more information about taking courses from other faculties.

12.14.2 Anatomy and Cell Biology (ANAT)

12.14.2.1 Location
Strathcona Anatomy and Dentistry Building, Room 1/60
3640 University Street
Montreal, Quebec H3A 2B2
Telephone: 514-398-6335
Website: www.mcgill.ca/anatomy

12.14.2.2 About Anatomy and Cell Biology
The Department of Anatomy and Cell Biology offers courses that deal with cell biology, histology, embryology, neuroanatomy, and gross anatomy. The Honours program is designed as the first phase in the training of career cell and molecular biologists. The Major and Liberal programs offer decreasing levels of specialization in Anatomy and Cell Biology but with a broader base in other biological sciences. These programs also form a sound background for graduate studies in Anatomy and Cell Biology, or for further professional training. Students should choose their major based on their interest and also consider the Interdisciplinary Minor in Life Sciences. A B.Sc. in Anatomy and Cell Biology provides an excellent preparation for technical and administrative positions in laboratories of universities, research institutions, hospitals, pharmaceutical and biotechnological industries.

The Department is equipped to perform protein purification, recombinant DNA technology, micro-injection of molecules into single cells, cytochemical, immunocytochemical and fluorescent analysis and electron microscopy, proteomics and genomics. The Department has a well-equipped centre for electron microscopy as well as a centre for confocal and immunofluorescence. The new cryo-electron microscope facility in the Department is unique and represents a cutting edge technology to apply fundamental discoveries to therapeutic applications.

Inquiries about programs should be directed to the Department of Anatomy and Cell Biology.

12.14.2.3 Anatomy and Cell Biology (ANAT) Faculty
Chair
Nathalie Lamarche-Vane (Acting Chair)

Emeritus Professors
Gary C. Bennett; B.A., B.Sc.(Sir G. Wms.), M.Sc., Ph.D.(McG.)
Yves Clermont; B.Sc.(Montr.), Ph.D.(McG.), F.R.C.S.
Dennis G. Osmond; C.M., B.Sc., M.B., Ch.B., D.Sc.(Brist.), M.R.C.S., L.R.C.P., F.R.S.C.
H. Warshawsky; B.Sc.(Sir G. Wms.), M.Sc., Ph.D.(McG.)

Professors
Chantal Autexier; B.Sc.(C’dia), Ph.D.(McG.)
Philip Barker; B.Sc.(S. Fraser), Ph.D.(Alta.) (joint appt. with Neurology & Neurosurgery)
Alain Beaudet; M.Sc., Ph.D., M.D.(Montr.) (joint appt. with Neurology & Neurosurgery)
James R. Brawer; B.S.(Tufts), Ph.D.(Harv.)
Miguel Burnier; M.D., M.Sc., Ph.D.(Brazil) (joint appt. with Ophthalmology)
Samuel David; Ph.D.(Manit.) (joint appt. with Neurology & Neurosurgery)
Louis Hermo; B.A.(Loyola), M.Sc., Ph.D.(McG.)
Nathalie Lamarche-Vane; B.Sc., Ph.D.(Montr.)
### Professors

Marc D. McKee; B.Sc., M.Sc., Ph.D.(McG.) (*joint appt. with Dentistry*)

Peter McPherson; B.Sc.(Manit.), Ph.D.(Iowa) (*joint appt. with Neurology and Neurosurgery*)

Sandra C. Miller; B.Sc.(Sir G. Wms.), M.Sc., Ph.D.(McG.)

Carlos R. Morales; DVM.(U.N., Argentina), Ph.D.(McG.)

Barry I. Posner; M.D.(Manit.), F.R.C.P.(C) (*joint appt. with Medicine*)

Alfredo Ribeiro-da-Silva; M.D., Ph.D.(Oporto) (*joint appt. with Pharmacology and Therapeutics*)

Wayne Sossin; S.B.(MIT), Ph.D.(Stan.) (*joint appt. with Neurology & Neurosurgery*)

Stefano Stifani; Ph.D.(Rome), Ph.D.(Alta.) (*joint appt. with Neurology & Neurosurgery*)

Dominique Walker; B.Sc., Ph.D.(Geneva) (*joint appt. with Psychiatry*)

### Associate Professors

Orest W. Blaschuk; B.Sc.(Winn.), M.Sc.(Manit.), Ph.D.(Tor.) (*joint appt. with Surgery*)

Eugene Daniels; M.Sc., Ph.D.(Manit.)

Elaine Davis; B.Sc., M.Sc.(W. Ont.), Ph.D.(McG.)

Timothy Kennedy; B.Sc.(McM.), M.Phil., Ph.D.(Col.) (*joint appt. with Neurology & Neurosurgery*)

M.F. Lalli; B.Sc., M.Sc.(Bowling Green), Ph.D.(McG.)

Craig Mandato; B.Sc., Ph.D.(Wat.)

John F. Presley; B.A., Ph.D.(Texas)

Dieter Reinhardt; M.S.(Kaiserslautern), Ph.D.(Munich) (*joint appt. with Dentistry*)

Hojatollah Vali; B.Sc., M.Sc., Ph.D.(Munich) (*joint appt. with Earth and Planetary Sciences*)

### Assistant Professors

Fiona Bedford; B.Sc.(Birm.), Ph.D.(Lond.)

Isabelle Rouiller; Ph.D.(UK)

### Associate Members

John J.M. Bergeron (*Medicine*)

Albert Berghuis (*Biochemistry*)

Colin Chalk (*Neurology & Neurosurgery*)

Jean-François Cloutier (*Neurology & Neurosurgery*)

Claudio Cuello (*Pharmacology & Therapeutics*)

Giovanni DiBattista (*Medicine*)

Alyson Fournier (*Neurology & Neurosurgery*)

Janet Henderson (*Medicine*)

Robert Scott Kiss (*Biochemistry*)

Bartha Knoppers (*Human Genetics*)

Svetlana Komarova (*Dentistry*)

Paul Lasko (*Biology*)

Andrea Leblanc (*Neurology & Neurosurgery*)

Peter Metrakos (*Department of Surgery*)

Tommy Nilsson (*Medicine*)

Edward S. Ruthazer (*Neurology & Neurosurgery*)

Michael Sacher (*Biology*)
### Associate Members

Philippe Seguela (*Neurology & Neurosurgery*)

Peter Siegel (*Medicine & Biochemistry*)

Thomas Stroh (*Neurology & Neurosurgery*)

David Y. Thomas (*Biochemistry*)

Jacalyn Vogel (*Biology*)

Xiang-Jiao Yang (*Medicine*)

### Adjunct Professors

Michel Cayouette; Ph.D.(Laval)

Frederic Charron; B.Sc.(Montr.), Ph.D.(McG.)

Eric Chevet; Ph.D.(Paris)

Mirosław Cygler; M.Sc., Ph.D.(Lodz, Poland)

Daniel Cyr; B.Sc., M.Sc.(C’dia), Ph.D.(Manit.)

Michel Desjardins; M.Sc., Ph.D.(Montr.)

Jacques Drouin; B.Sc., D.Sc.(Laval)

David Hipfner; B.Sc., Ph.D.(Qu.)

Marko Horb; Ph.D.(SUNY)

Artur Kania; Ph.D.(Baylor)

André Nantel; B.Sc., M.Sc.(Laval), Ph.D.(Chapel Hill)

Alexei Pshezhetsky; Ph.D.(Russia)

Joseph Schrag; M.Sc., Ph.D.(Ill.)

Atilla Sik; M.Sc., Ph.D.(Hungary)

Pierre Thibault; Ph.D.(Montr.)

### Faculty Lecturers

Ayman Behiery; M.B., Ch.B.(Cairo)

Geoffroy P. Noël; Ph.D.(Br. Col.)

### Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Anatomy and Cell Biology (48 credits)

Students may complete this program with a minimum of 47 credits or a maximum of 48 credits depending on their choice of complementary courses.

### Required Courses (32 credits)

* Students who have taken the equivalent of CHEM 212 and/or MATH 203 in CEGEP (as defined at http://www.mcgill.ca/students/courses/plan/transfer/) are exempt and must replace these credits with elective course credits to satisfy the total credit requirement for their degree.

**Revision, August 2011. End of revision.**

**12.14.2.6 Bachelor of Science (B.Sc.) - Honours Anatomy and Cell Biology (73 credits)**

**Revision, August 2011. Start of revision.**

Students should register at the Major level in U1 and, if accepted, may enter the Honours program at the beginning of U2. To enter the program, the student must obtain a CGPA of at least 3.20 at the end of U1. For promotion to the U3 year of the Honours program, or for entry into the program at this level, the student must have a CGPA of at least 3.20 at the end of their U2 year. It is expected that at the beginning of the third year, the students who wish to continue in the Honours program will be those who feel that they are seriously interested in a career in Cell Biology. The Honours degree will be recommended after successful completion of the program with a CGPA of at least 3.20.

**Required Courses (52 credits)**

Note: ANAT 261 must be taken in U1.

* Students who have taken the equivalent of CHEM 212, CHEM 222, and/or MATH 203 in CEGEP (as defined at http://www.mcgill.ca/students/courses/plan/transfer/) are exempt and must replace these credits with elective course credits to satisfy the total credit requirement for their degree.

12.14.3 Atmospheric and Oceanic Sciences (ATOC)

12.14.3.1 Location

Burnside Hall, Room 945
805 Sherbrooke Street West
Montreal, Quebec H3A 2K6

Telephone: 514-398-3764
Fax: 514-398-6115
Email: undergraduateinfo@meteo.mcgill.ca
Website: www.mcgill.ca/meteo

12.14.3.2 About Atmospheric and Oceanic Sciences

The Department of Atmospheric and Oceanic Sciences offers, at the undergraduate level, a broad range of courses and degree programs in atmospheric science (meteorology). At the postgraduate level, programs of study are offered in physical oceanography, air-sea interaction, and climate research as well as in different branches of atmospheric science. The study of atmospheric science is based largely on physics and applied mathematics. All required courses except those at the introductory level generally have prerequisites or corequisites in physics, mathematics, and atmospheric science. One of the goals of the discipline is to develop the understanding necessary to improve our ability to predict the weather, but atmospheric science is more than weather forecasting.

Another important area of study focuses on the possible changes in global climate caused by the changing chemical composition of the atmosphere. The approach is always quantitative. Like other parts of physics, atmospheric science attempts to create theoretical models of its complex processes, as a means of analyzing the motion and composition of the air, its thermodynamic behaviour, and its interaction with radiation and with the solid or liquid surface beneath it.

From one viewpoint, the atmosphere may be studied as a large volume of gas by the methods of fluid mechanics: winds, circulation patterns, turbulence, and energy and momentum exchanges are the ideas employed in this approach. Alternatively, the atmosphere may be studied from the point of view of its detailed physics: how water condenses in the air, how cloud droplets make rain, how sunlight warms the ground and the ground warms the air above it by radiation and convection, and how the atmosphere and ocean interact to shape the weather and climate. A comprehensive understanding requires both viewpoints, and these are reflected in the curriculum.

The Department of Atmospheric and Oceanic Sciences offers four main programs in Atmospheric Science: Honours, Major, Minor, and a Joint Major in Atmospheric Science and Physics. The Honours program is meant for students with high standing. It is based on courses similar to those in the Major program, but provides the opportunity to take advanced optional courses. The Major program, although somewhat less intensive, satisfies the requirements for a professional career as a meteorologist, and like the Honours program equips the student to undertake postgraduate study in meteorology, atmospheric science, and related sciences (physical oceanography) at any of the leading universities. The Department also offers a special one-year Diploma program to B.Sc. or B.Eng. graduates.

A degree in Atmospheric Science can lead to a professional career in government service or private industry. The Meteorological Service of Canada has traditionally been the main employer of graduating students, but certain provincial governments and environmental consulting and engineering firms also employ graduates trained in atmospheric science. Positions in teaching and research are available to graduates with M.Sc. and Ph.D. degrees. Students interested in any of the undergraduate programs should consult the undergraduate adviser, Room 946, Burnside Hall.

12.14.3.3 Atmospheric and Oceanic Sciences (ATOC) Faculty

Chair

John R. Gyakum

Emeritus Professors

Jacques F. Derome; M.Sc. (McG.), Ph.D. (Mich.), F.R.S.C.
Emeritus Professors

Henry G. Leighton; M.Sc.(McG.), Ph.D.(Alta.)
Lawrence A. Mysak; B.Sc.(Alta.), M.Sc.(Adel.), A.M., Ph.D.(Harv.), F.R.S.C.
Roddy R. Rogers; B.S.(Texas), S.M.(MIT), Ph.D.(NYU)
Edward J. Stansbury; M.A., Ph.D.(Tor.)
Isztar I. Zawadzki; B.Sc.(Buenos Aires), M.Sc., Ph.D.(McG.), F.R.S.C.

Professors

John R. Gyakum; B.Sc.(Penn.), M.Sc., Ph.D.(MIT)
Man Kong (Peter) Yau; S.B., S.M., Sc.D.(MIT)

Associate Professors

Parisa Ariya; B.Sc., Ph.D.(York) (William Dawson Scholar) (joint appt. with Chemistry)
Peter Bartello; M.Sc., Ph.D.(McG.) (joint appt. with Mathematics and Statistics)
Frédéric Fabry; B.Sc., M.Sc., Ph.D.(McG.) (joint appt. with McGill School of Environment)
David Straub; B.S., M.S.(SW Louisiana), Ph.D.(Wash.)
Bruno Tremblay; B.Sc.(McG.), M.Sc.(Car.), Ph.D.(McG.)

Assistant Professors

Michel Bourqui; B.Sc., M.Sc.(EPFL, Switzerland), Ph.D.(ETHZ, Switzerland) (joint appt. with Chemistry)
Yi Huang; B.S., M.S.(Pekin), Ph.D.(Princ.)
Pavlos Kollias; B.Sc., M.Sc.(Athens), Ph.D.(Miami) (Canada Research Chair)
Jaime Palter; B.Sc., Ph.D.(Duke)
Seok-Woo Son; B.Sc., M.Sc.(Seoul National), Ph.D.(Penn.)

Adjunct Professors

Pierre Gauthier; Ph.D.(McG.)
Charles A. Lin; B.Sc.(Br. Col.), Ph.D.(MIT)
Hai Lin; Ph.D.(McG.)
Damon Matthews; Ph.D.(Vic., BC)
Stella Melo; Ph.D.(INPE)
Ronald Stewart; Ph.D.(Tor.)

Bachelor of Science (B.Sc.) - Minor Atmospheric Science (18 credits)

This Minor may be taken in conjunction with any program in the Faculty of Science.

Computers in Engineering (3) COMP 208
Calculus 3 (3) MATH 222
Linear Algebra (3) MATH 223
Advanced Calculus (3) MATH 314
Ordinary Differential Equations (3) MATH 315
Dynamics of Simple Systems (3) PHYS 230
Heat and Waves (3) PHYS 232
Experimental Methods 1 (3) PHYS 257

Complementary Courses (15 credits)

3-6 credits to satisfy a statistics requirement.
Students usually take MATH 203 or both MATH 323 and MATH 324.

MATH 203 (3) Principles of Statistics 1
MATH 323 (3) Probability
MATH 324 (3) Statistics

3 credits selected from:
PHYS 333 (3) Thermal and Statistical Physics
PHYS 340 (3) Majors Electricity and Magnetism

6-9 credits ordinarily selected from the courses below:

* Students may take either ATOC 419 or CHEM 419
** Students may take either PHYS 432 or MATH 555

ATOC 419* (3) Advances in Chemistry of Atmosphere
ATOC 515 (3) Turbulence in Atmosphere and Oceans
ATOC 521 (3) Cloud Physics
ATOC 525 (3) Atmospheric Radiation
CHEM 419* (3) Advances in Chemistry of Atmosphere
GEOG 322 (3) Environmental Hydrology
GEOG 372 (3) Running Water Environments
MATH 317 (3) Numerical Analysis
MATH 319 (3) Introduction to Partial Differential Equations
MATH 423 (3) Regression and Analysis of Variance
Fluid Dynamics (4) MATH 555**
Signal Processing (3) PHYS 241
Topics in Classical Mechanics (3) PHYS 331
Majors Electricity and Magnetism (3) PHYS 340
Majors Electromagnetic Waves (3) PHYS 342
Physics of Fluids (3) PHYS 432**

12.14.3.7 Bachelor of Science (B.Sc.) - Major Atmospheric Science - Atmospheric Chemistry (61 credits)

Required Courses (55 credits)

* Students take either ATOC 419 or CHEM 419.

ATOC 214 (3) Introduction: Physics of the Atmosphere
ATOC 215 (3) Oceans, Weather and Climate
ATOC 309 (3) Weather Radars and Satellites
ATOC 315 (3) Thermodynamics and Convection
ATOC 412 (3) Atmospheric Dynamics
ATOC 419* (3) Advances in Chemistry of Atmosphere
ATOC 540 (3) Synoptic Meteorology 1
ATOC 541 (3) Synoptic Meteorology 2
ATOC 546 (1) Current Weather Discussion
CHEM 223 (2) Introductory Physical Chemistry 1
CHEM 243 (2) Introductory Physical Chemistry 2
CHEM 253 (1) Introductory Physical Chemistry 1 Laboratory
CHEM 263 (1) Introductory Physical Chemistry 2 Laboratory
CHEM 419* (3) Advances in Chemistry of Atmosphere
COMP 208 (3) Computers in Engineering
MATH 222 (3) Calculus 3
MATH 223 (3) Linear Algebra
MATH 314 (3) Advanced Calculus
MATH 315 (3) Ordinary Differential Equations
PHYS 230 (3) Dynamics of Simple Systems
PHYS 232 (3) Heat and Waves
PHYS 257 (3) Experimental Methods 1

Complementary Courses (6 credits)

3 credits to satisfy a statistics requirement.
Students usually take MATH 203 or MATH 324.

MATH 203 (3) Principles of Statistics 1
MATH 324 (3) Statistics

3 credits selected from the courses below:

ATOC 515 (3) Turbulence in Atmosphere and Oceans
12.14.3.8 Bachelor of Science (B.Sc.) – Major Atmospheric Science and Physics (67 credits)

Revision, August 2011. Start of revision.

This Major provides a solid basis for postgraduate study in meteorology, atmospheric physics, or related fields, as well as the necessary preparation for embarking on a professional career as a meteorologist directly after the B.Sc.

The program is jointly administered by the Department of Physics and the Department of Atmospheric and Oceanic Sciences. Students should consult undergraduate advisers in both departments.

Required Courses (64 credits)

- ATOC 214 (3) Introduction: Physics of the Atmosphere
- ATOC 215 (3) Oceans, Weather and Climate
- ATOC 309 (3) Weather Radars and Satellites
- ATOC 315 (3) Thermodynamics and Convection
- ATOC 412 (3) Atmospheric Dynamics
- ATOC 540 (3) Synoptic Meteorology 1
- ATOC 541 (3) Synoptic Meteorology 2
- ATOC 546 (1) Current Weather Discussion
- MATH 222 (3) Calculus 3
- MATH 223 (3) Linear Algebra
- MATH 314 (3) Advanced Calculus
- MATH 315 (3) Ordinary Differential Equations
- PHYS 230 (3) Dynamics of Simple Systems
- PHYS 232 (3) Heat and Waves
- PHYS 257 (3) Experimental Methods 1
- PHYS 258 (3) Experimental Methods 2
- PHYS 331 (3) Topics in Classical Mechanics
- PHYS 333 (3) Thermal and Statistical Physics
- PHYS 339 (3) Measurements Laboratory in General Physics
- PHYS 340 (3) Majors Electricity and Magnetism
- PHYS 342 (3) Majors Electromagnetic Waves
**Majors Quantum Physics (3) PHYS 446**

**Complementary Course (3 credits)**

Students select one of the following courses:

- PHYS 432 (3) Physics of Fluids
- PHYS 434 (3) Optics
- PHYS 439 (3) Majors Laboratory in Modern Physics

---

**Revision, August 2011. End of revision.**

**12.14.3.9 Bachelor of Science (B.Sc.) - Honours Atmospheric Science (70 credits)**

Students can be admitted to the Honours program after completion of the U1 year of the Major in Atmospheric Science program with a minimum GPA of 3.30. Students having completed a U1 year in a different program with high standing may be admitted to the Honours program on the recommendation of that department.

A minimum GPA of 3.30 in the Honours program courses (taken as a whole) is required to remain in the program. A CGPA of 3.30 on the total program is also required to graduate with honours.

**Required Courses (52 credits)**

- ATOC 214 (3) Introduction: Physics of the Atmosphere
- ATOC 215 (3) Oceans, Weather and Climate
- ATOC 309 (3) Weather Radars and Satellites
- ATOC 315 (3) Thermodynamics and Convection
- ATOC 480 (3) Honours Research Project
- ATOC 512 (3) Atmospheric and Oceanic Dynamics
- ATOC 531 (3) Dynamics of Current Climates
- ATOC 540 (3) Synoptic Meteorology 1
- ATOC 546 (1) Current Weather Discussion
- COMP 208 (3) Computers in Engineering
- MATH 222 (3) Calculus 3
- MATH 223 (3) Linear Algebra
- MATH 314 (3) Advanced Calculus
- MATH 315 (3) Ordinary Differential Equations
- MATH 319 (3) Introduction to Partial Differential Equations
- PHYS 230 (3) Dynamics of Simple Systems
- PHYS 232 (3) Heat and Waves
- PHYS 257 (3) Experimental Methods 1

**Complementary Courses (18 credits)**

3-6 credits to satisfy a statistics requirement.

Students usually take MATH 203 or both MATH 323 and MATH 324.

- MATH 203 (3) Principles of Statistics 1
- MATH 323 (3) Probability
- MATH 324 (3) Statistics
3 credits selected from:

- PHYS 333 (3) Thermal and Statistical Physics
- PHYS 340 (3) Majors Electricity and Magnetism

3-6 credits ordinarily selected from the courses below:

- * Students may take either ATOC 419 or CHEM 419
- ** Students may take either PHYS 432 or MATH 555

1230 2011-2012, Undergraduate Programs, Courses and University Regulations, McGill University (Published August 17, 2011)
12.14.3.11 Diploma in Meteorology (30 credits)

The Department offers an intensive, one-year program in theoretical and applied meteorology to B.Sc. or B.Eng. graduates of suitable standing in physics, applied mathematics or other appropriate disciplines, leading to a Diploma in Meteorology. The program is designed for students with little or no previous background in meteorology who wish to direct their experience to atmospheric or environmental applications, or who need to fulfill academic prerequisites in meteorology to qualify for employment. For further information, consult the Administrative Officer, Burnside Hall, Room 946.

An exemption of up to 6 credits may be allowed for courses already taken. Students granted such exemptions are required to add complementary courses from an approved list to maintain a total credit count of 30 completed at McGill.

Required Courses (15 credits)

- **ATOC 512** (3) Atmospheric and Oceanic Dynamics
- **ATOC 521** (3) Cloud Physics
- **ATOC 531** (3) Dynamics of Current Climates
- **ATOC 540** (3) Synoptic Meteorology 1
- **ATOC 541** (3) Synoptic Meteorology 2

Complementary Courses (15 credits)

6 credits selected from the courses below.

- Students take either **ATOC 419** or **CHEM 419**.

- **ATOC 309** (3) Weather Radars and Satellites
- **ATOC 315** (3) Thermodynamics and Convection
- **ATOC 419** (3) Advances in Chemistry of Atmosphere
- **CHEM 419** (3) Advances in Chemistry of Atmosphere

9 credits ordinarily selected from:

- Students take either **PHYS 432** or **MATH 555**.

- **ATOC 513** (3) Waves and Stability
- **ATOC 515** (3) Turbulence in Atmosphere and Oceans
- **ATOC 525** (3) Atmospheric Radiation
- **ATOC 530** (3) Paleoclimatic Dynamics
- **GEOG 522** (3) Advanced Environmental Hydrology
- **MATH 317** (3) Numerical Analysis
- **MATH 319** (3) Introduction to Partial Differential Equations
- **MATH 555** (4) Fluid Dynamics
- **PHYS 331** (3) Topics in Classical Mechanics
- **PHYS 340** (3) Majors Electricity and Magnetism
- **PHYS 342** (3) Majors Electromagnetic Waves
- **PHYS 432** (3) Physics of Fluids

12.14.3.12 Atmospheric and Oceanic Sciences (ATOC) Related Programs

**12143121 Internship Year in Science (IYS)**

IYS is a pregraduate work experience program available to eligible students and normally taken between their U2 and U3 years. For more information, see section 12.11.5: Internship Programs – Industrial Practicum (IP) and Internship Year in Science (IYS).
The following programs are also available with an internship component:

- Major in Atmospheric Science
- Honours in Atmospheric Science

A Science major concentration in Earth, Atmosphere and Ocean Sciences is available to students pursuing the B.A. & Sc. degree. This Major concentration is described in the Bachelor of Arts and Science section of this publication; see section 12.14.10: Earth, Atmosphere and Ocean Sciences for details.

**12143122 Earth System Science Interdepartmental Major**

This program is offered by the Department of Atmospheric & Oceanic Sciences, Earth & Planetary Sciences, and Geography.

Students in the Department of Atmospheric & Oceanic Sciences interested in this program should contact Professor Bruno Tremblay (bruno.tremblay@mcgill.ca). For more information, see section 12.14.11: Earth System Science Interdepartmental Major (ESYS).

### 12.14 Biochemistry (BIOC)

**12.14.4.1 Location**

McIntyre Medical Building, 9th Floor
3655 Promenade Sir-William-Osler
Montreal, Quebec H3G 1Y6

Christine Laberge, Student Affairs Officer
Telephone: 514-398-2423
Email: christine.laberge@mcgill.ca
Website: [www.mcgill.ca/biochemistry](http://www.mcgill.ca/biochemistry)

**12.14.4.2 About Biochemistry**

Biochemistry is the application of chemical, genetic and biophysical approaches to the study of biological processes at the cellular and molecular level. We are interested in, for example, mechanisms of brain function; cellular differentiation; energy utilization by animals and microorganisms; and in the molecular basis of inheritance and disease. The researcher seeks to determine how specific molecules such as proteins, nucleic acids, lipids, vitamins, and hormones function in various cellular processes. Particular emphasis is placed on the regulation of reactions in living cells. The knowledge and methods developed by researchers are applied in all fields of medicine, in agriculture, and in many chemical and health-related industries. Biochemistry is unique in providing basic theoretical training, as well as basic practical laboratory training and research in both enzymology and genetic engineering, which are the two basic components in the rapidly expanding field of Biotechnology.

There are three programs offered by the Department of Biochemistry: Major, Honours, and Liberal. The Major and Honours programs provide a sound background for students who wish to have a professional career in biochemistry, and can lead to postgraduate studies and research careers in hospital, university, or industrial laboratories. The Liberal program is less specialized, offering students opportunities to select courses in other fields of interest.

During the first year, each program provides basic training in organic, physical, and analytical chemistry, as well as in biology and physiology. The Honours and Major programs become more specialized in biochemistry during the following two years, with additional work in chemistry and biology.

Students interested in pursuing an *ad hoc* Joint Major or Joint Honours degree between Biochemistry and a second discipline may consult with our Chief Academic Adviser, Dr. Albert Berghuis (albert.berghuis@mcgill.ca).

The increasing involvement of complex technology in modern society requires personnel trained in both chemistry and biology. With the advent of biotechnology, the combination of chemistry, molecular biology, enzymology, and genetic engineering found in the biochemistry program provides the essential background and training. The researcher is in an advantageous position to fulfil this role and assume a wide variety of positions in industry and the health field. These positions include: research and development in the chemical and pharmaceutical industries; testing and research in government and hospital laboratories; and management. Many graduates pursue higher degrees in research and attain academic positions in universities and colleges.

**12.14.4.3 Adviser**

New students interested in Biochemistry should refer to our website for information regarding orientation and program advising: [www.mcgill.ca/biochemistry/undergraduates/advising](http://www.mcgill.ca/biochemistry/undergraduates/advising).

Returning students must schedule an advising appointment directly with the academic adviser assigned to them in their first year in Biochemistry.

**12.14.4.4 Biochemistry (BIOC) Faculty**

**Chair & Professor**

David Y. Thomas; B.Sc.(Brist.), M.Sc., Ph.D.(Univ. Coll., Lond.), F.R.S.C. (*Canada Research Chair in Molecular Genetics*)

**Associate Chair & Professor**

Kalle Gehring; B.A.(Brown), M.Sc.(Mich.), Ph.D.(Calif., Berk.) (*Chercheur National du FRSQ*)

---

1232 2011-2012, Undergraduate Programs, Courses and University Regulations, McGill University (Published August 17, 2011)
### Emeritus Professors

Rhoda Blostein; B.Sc., M.Sc., Ph.D.(McG.), F.R.S.C. (*joint appt. with Medicine*)

Peter E. Braun; B.Sc., M.Sc.(Br. Col.), Ph.D.(Calif., Berk.)

Robert E. MacKenzie; B.Sc.(Agr.)(McG.), M.N.S., Ph.D.(C’nell.)

Edward A. Meighen; B.Sc.(Alta.), Ph.D.(Calif., Berk.)

Walter E. Mushynski; B.Sc., Ph.D.(McG.)

Theodore L. Sourkes; M.Sc.(McG.), Ph.D.(C’nell), F.R.S.C.

Clifford P. Stanners; B.Sc.(McM.), M.A., Ph.D.(Tor.)

### Professors

Nicole Beauchemin; B.Sc., M.Sc., Ph.D.(Montr.) (*joint appt. with Oncology and Medicine*)

Albert Berghuis; B.Sc., M.Sc.(Rijks Univ. Groningen, The Netherlands), Ph.D.(Br. Col.) (*Canada Research Chair in Structural Biology*)

Philip E. Branton; B.Sc., M.Sc., Ph.D.(Tor.), F.R.S.C. (*Gilman Cheney Professor of Biochemistry*)

Vincent Giguère; B.Sc., Ph.D.(Laval) (*joint appt. with Oncology and Medicine*)

Philippe Gros; B.Sc., M.Sc.(Montr.), Ph.D.(McG.), F.R.S.C. (*James McGill Professor*)

Roderick McInnes; B.Sc., M.D.(Dal.), Ph.D.(McG.) (*Canada Research Chair in Neurogenetics*)

William Muller; B.Sc., Ph.D.(McG.) (*Canada Research Chair in Molecular Oncology*)

Alain Nepveu; B.Sc., M.Sc.(Montr.), Ph.D.(Sher.) (*James McGill Professor*)

Morag Park; B.Sc., Ph.D.(Glasgow), F.R.S.C. (*Diane & Sal Guererra Chair in Cancer Genetics*)

Jerry Pelletier; B.Sc., Ph.D.(McG.) (*James McGill Professor*)

Gordon C. Shore; B.Sc.(Guelph), Ph.D.(McG.)

Joseph Shuster; B.Sc.(McG.), Ph.D.(Calif.), M.D.(Alta.)

John R. Silvius; B.Sc., Ph.D.(Alta.)

Nahum Sonenberg; M.Sc., Ph.D.(Weizmann Inst.), F.R.S.C., F.R.S. (*James McGill Professor*)

Michel L. Tremblay; B.Sc., M.Sc.(Sher.), Ph.D.(McM.), F.R.S.C. (*James McGill Professor*)

Maria Zannis-Hadjopoulos; B.Sc., M.Sc., Ph.D.(McG.) (*joint appt. with Oncology and Medicine*)

### Associate Professors

Maxime Bouchard; B.Sc., Ph.D.(Laval) (*Canada Research Chair in Kidney Disease*)

Imed Gallouzi; Maitrise, DEA, Ph.D.(Montpellier, France) (*Canada Research Chair in Cellular Information Systems*)

Arnim Pause; B.Sc., M.Sc.(U. Konstanz, Germ.), Ph.D.(McG.) (*Canada Research Chair in Molecular Oncology*)

Jason C. Young; B.Sc.(Tor.), Ph.D.(McM.) (*Canada Research Chair in Molecular Chaperones*)

### Assistant Professors

Josée Dostie; B.Sc.(Sher.), Ph.D.(McG.) (*CIHR New Investigators Award; Chercheur Boursier du FRSQ*)

Thomas Duchaine; B.Sc., Ph.D.(Montr.) (*Chercheur Boursier du FRSQ*)

Bhushan Nagar; B.Sc., Ph.D.(Tor.) (*Canada Research Chair in the Structural Biology of Signal Transduction*)

Martin Schmeing; B.Sc.(McG.), Ph.D.(Yale)

Julie St-Pierre; B.Sc., M.Sc.(Laval), Ph.D.(Camb.)

Jose Teodoro; B.Sc.(W. Ont.), Ph.D.(McG.) (*CIHR New Investigators Award; Chercheur Boursier du FRSQ*)

### Associate Members

Karine Auclair (*Chemistry*)

Jacques Genest (*Medicine*)
Associate Members

Matthias Götte (Microbiology and Immunology)
Michael Hallett (Bioinformatics)
Qutayba Hamid (Medicine and Pathology Meakins-Christie Labs)
Robert Scott Kiss (Medicine)
Gregory Miller (Pharmacology & Therapeutics)
Vassilios Papadopoulos (Medicine)
Janusz Rak (Pediatrics)
Reza Salavati (Parasitology)
Maya Saleh (Medicine)
Erwin Schurr (Ct. for Study of Host Resistance, MGH)
Peter Siegel (Medicine)

Jacques Drouin (IRCM)
Anny Fortin (Dafra Pharma)
Tarik Möröy (IRCM)
Donald Nicholson (Merck Frosst)
Maureen D. O'Connor-McCourt (NRC/BRI)
Enrico Purisima (NRC/BRI)
René Roy (UQAM)
Alex Therien (Merck Frosst)

12.14.4.5 Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Biochemistry (47 credits)

U1 Required Courses (20 credits)

* Students with CEGEP-level credit for CHEM 212 and/or CHEM 222 should replace these courses with elective courses.

BIOL 200 (3) Molecular Biology
BIOL 202 (3) Basic Genetics
CHEM 204 (3) Physical Chemistry/Biological Sciences 1
CHEM 212* (4) Introductory Organic Chemistry 1
CHEM 222* (4) Introductory Organic Chemistry 2

U1 Complementary Courses** (6 credits)

** Complementary courses listed for U1 and U2 may be taken in later years if necessary to accommodate courses that must be taken in U1 and U2 as part of the breadth component of the program.

6 credits selected from:

BIOL 205 (3) Biology of Organisms
MIMM 211  (3)  Introductory Microbiology
PHGY 209  (3)  Mammalian Physiology 1
PHGY 210  (3)  Mammalian Physiology 2

U2 Required Courses (15 credits)
BIOC 300D1  (3)  Laboratory in Biochemistry
BIOC 300D2  (3)  Laboratory in Biochemistry
BIOC 311  (3)  Metabolic Biochemistry
BIOC 312  (3)  Biochemistry of Macromolecules
CHEM 302  (3)  Introductory Organic Chemistry 3

U2 Complementary Courses** (3 credits)
** Complementary courses listed for U1 and U2 may be taken in later years if necessary to accommodate courses that must be taken in U1 and U2 as part of the breadth component of the program.
3 credits selected from:
BIOL 373  (3)  Biometry
COMP 202  (3)  Introduction to Computing 1
MATH 203  (3)  Principles of Statistics 1
MATH 222  (3)  Calculus 3
PSYC 204  (3)  Introduction to Psychological Statistics

U3 Complementary Courses (3 credits)
3 credits selected from:
BIOC 450  (3)  Protein Structure and Function
BIOC 454  (3)  Nucleic Acids

12.14.4.6 Bachelor of Science (B.Sc.) - Major Biochemistry (67 credits)
Revision, August 2011. Start of revision.
Students may transfer into the Major program at any time, provided they have met all course requirements.

U1 Required Courses (23 credits)
* Note: Students with CEGEP-level credit for the equivalents of CHEM 212 and/or CHEM 222 (see http://www.mcgill.ca/students/courses/plan/transfer/ for accepted equivalents) may not take these courses at McGill and should replace them with elective courses to satisfy the total credit requirement for their degree.
BIOC 212  (3)  Molecular Mechanisms of Cell Function
BIOL 200  (3)  Molecular Biology
BIOL 202  (3)  Basic Genetics
CHEM 204  (3)  Physical Chemistry/Biological Sciences 1
CHEM 212*  (4)  Introductory Organic Chemistry 1
CHEM 222*  (4)  Introductory Organic Chemistry 2
CHEM 287  (2)  Introductory Analytical Chemistry
CHEM 297  (1)  Introductory Analytical Chemistry Laboratory

Revision, August 2011. End of revision.

### 12.14.4.7 Bachelor of Science (B.Sc.) - Honours Biochemistry (76 credits)

Revision, August 2011. Start of revision.

Admission to the Honours program will not be granted until U2. Students who wish to enter the Honours program in U2 should follow the U1 Major program. Those who satisfactorily complete the U1 Major program with a GPA of at least 3.20 and a mark of B- or better in every required course are eligible for admission to the Honours program.

Students seeking admission to the Honours program must obtain permission from the Departmental Student Affairs Officer, Christine Laberge (christine.laberge@mcgill.ca), during the Add/Drop period in September of their second year.

Promotion to U3 year is based on satisfactory completion of U2 courses with a GPA of at least 3.20 and a mark of B- or better in every required course. In borderline cases, the marks received in BIOC 311 and BIOC 312 will be of particular importance for continuation in the U3 Honours year.

For graduation in the Honours program, students must complete a minimum of 90 credits, pass all required courses with no grade less than B-, and achieve a CGPA of at least 3.20.

### U1 Required Courses (23 credits)

*Note: Students with CEGEP-level credit for the equivalents of CHEM 212 and/or CHEM 222 (see http://www.mcgill.ca/students/courses/plan/transfer/ for accepted equivalents) may not take these courses at McGill and should replace them with elective courses to satisfy the total credit requirement for their degree.*

Revision, August 2011. End of revision.

12.14.4.8 Biochemistry (BIOC) Related Programs

12.14.4.8.1 Interdepartmental Honours in Immunology

For more information, see section 12.14.17: Immunology Interdepartmental Honours. This program is offered by the departments of Biochemistry, Microbiology and Immunology, and Physiology. Students interested in the program should contact Dr. C. Piccirillo, Microbiology and Immunology (ciro.piccirillo@mcgill.ca, 514-934-1934 extension 45135), or Dr. Monroe Cohen, Physiology (monroe.cohen@mcgill.ca, 514-398-4342).

12.14.5 Biology (BIOL)

12.14.5.1 Location

Stewart Biology Building, Room W4/7
1205 avenue Docteur Penfield
Montreal, Quebec H3A 1B1

Telephone: 514-398-6400
Fax: 514-398-5069

12.14.5.2 About Biology

Biology is the study of living things at the molecular, cellular, organismal, and ecosystem levels. It deals with fundamental questions such as the origin and evolution of plants and animals, interactions between living organisms and their environment, mechanisms of embryonic development, structure and function of the living cell and individual molecules within it, molecular basis of inheritance, biochemical and genetic basis of human diseases, and how the brain and the nervous system control behavior. The study of biology also has vast practical applications. The knowledge, methods, and concepts developed through research in the various fields of biology are applied extensively in agriculture, medicine, pharmaceutical development, biotechnology, genetic engineering, environmental protection, and wildlife management.

The Department of Biology offers a Liberal program, a Major program, Joint Majors with Computer Science and with Mathematics, an Honours program, a Minor program, a Minor concentration in Science for Arts students and an option in Quantitative Biology.

The programs in Biology offer students an opportunity to gain knowledge in more than one area of biology and they provide a broader training than the more specialized programs in Biochemistry, Microbiology, Physiology, or Anatomy and Cell Biology. Nevertheless, or perhaps as a consequence, many of our graduates continue on to M.D. programs and successful careers in health care and delivery. A B.Sc. degree in Biology also prepares students for a wide range of employment opportunities, including entry to professional schools in veterinary science, dentistry, agriculture, nursing, education, and library science. It provides a solid background for students who are interested in careers related to environmental protection, wildlife management, biotechnology, and the pharmaceutical industry. A B.Sc. degree in Biology often leads to graduate studies at the M.Sc. and Ph.D. levels, and then on to research careers in universities, research institutes, hospitals, and industrial or governmental laboratories.

The Department of Biology has well-equipped teaching laboratories located in the Stewart Biology Building, and research labs located in the Stewart Biology Building and the Bellini Life Sciences Building. Much of the Department's research space has been renovated or newly constructed in the last several years thanks to extensive support from the Canadian Foundation for Innovation, the *Ministère de la développement économique, innovation, et exploration du Québec*, and the generosity of private benefactors. Our undergraduates are encouraged to take advantage of these facilities by pursuing independent research projects, either as 3-, 6- and 9-credit stand-alone courses or as part of the Honours program. Department members carry out research in areas of molecular biology, cell biology, ecology, animal behaviour, developmental biology, bioinformatics, neurobiology, marine biology, plant biology, and evolution. The Department also includes many associate faculty members, many of whom are located in McGill-affiliated teaching hospitals or in departments of the Faculty of Medicine, and others who are affiliated with the Redpath Museum, the McGill School of Environment, and remote sites such as the Smithsonian Tropical...
Research Institute (STRI) in Panama and the Bellairs Research Institute in Barbados. Field courses are given at STRI and Bellairs, at the nearby Gault Nature Reserve, and also at the Huntsman Marine Science Centre in New Brunswick. The Department is also a very active contributor to the Africa Field Study Semester.

The Biology Department Undergraduate Programs 2011-2012 booklet (“Blue Book”) describes in detail the content of each course and the level at which it is given, the aims and methods used, lectures, references, grading procedures, and other important information. The “Blue Book” also contains more information on registration, counselling, committee structure, and the research interests and facilities that are provided in the Department. It is available at http://biology.mcgill.ca/undergrad/bluebook.html.

Inquiries about undergraduate programs should be directed to the Student Affairs Office, Room W3/25B, Stewart Biology Building, telephone 514–398–7045.

**Note to those interested in the B.A. & Sc. program:** Two major concentrations in Biology as well as two minor concentrations in Biology (Organismal and Cell/Molecular Options) are available to students pursuing the B.A. & Sc. degree. These major concentrations are described in the Bachelor of Arts and Science section of this publication; see Bachelor of Arts and Science > Biology (BIOL) for details.

### 12.14.5.3 Preprogram Requirements

Requirements for the Major and Honours programs in Biology are two courses in elementary Biology, two courses in general Chemistry, two courses in Mathematics (as per the Freshman requirements), and two courses in Physics (Mechanics and Electromagnetism). Students entering into the B.A. & Sc., the Liberal Program and the Biology Science Minor have the same Biology, Chemistry, and Mathematics requirements. The Physics requirements will vary according to their future direction. Note that satisfying the minimum Freshman Mathematics requirements may not necessarily qualify for medical or dental school admissions requirements.

Students planning to take one of the joint majors or the new Quantitative Biology Major should consult the Undergraduate Adviser to ensure they are taking the appropriate prerequisites.

### 12.14.5.4 Biology Concentrations

**Note:** The concentrations set out below are only guidelines for specialized training. They do not constitute sets of requirements.

Students interested in advanced studies in any biological discipline are strongly advised to develop their skills in computing as appropriate. As an aid to students wishing to specialize, key and suggested courses are listed by discipline.

#### 12.14.5.4.1 Animal Behaviour Concentration

Understanding the diverse ways in which animals feed, mate, care for their offspring, avoid predators, select their habitats, communicate, and process information constitute the subject matter of behaviour. Several approaches are used to study these questions. Some focus on ecological consequences and determinants, some on physiological, genetic, and developmental mechanisms, others on evolutionary origins.

Key courses: BIOL 304, BIOL 305, BIOL 306, BIOL 307, BIOL 331 or BIOL 334D1/BIOL 334D2 or another field course with a significant behavioural component, BIOL 373, BIOL 397.

Other suggested courses: BIOL 377, BIOL 466, BIOL 467, BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2.

Most courses from the fields of behaviour, ecology, and evolutionary biology will be relevant for this concentration. Some courses that focus on a particular taxonomic group such as birds (Natural Resource Sciences WILD 420), amphibians and reptiles (BIOL 427), and marine mammals (BIOL 335) include a significant amount of behaviour.

#### 12.14.5.4.2 Biological Diversity and Systematics

The study of biological diversity deals with the maintenance, emergence, and history of the inexhaustible variety of different kinds of organisms. It is deeply concerned with the particular characteristics of different organisms and therefore emphasizes the detailed study of particular groups and forms the basis of comparative biology. Our knowledge of diversity is organized through the study of systematics, which seeks to understand the history of life and the phylogenetic and genetic relationships of living things. Appreciation and knowledge of diversity and systematics are essential in ecology and evolutionary biology and underlie all work in resource utilization and conservation biology.

Key courses: BIOL 304, BIOL 305, BIOL 373.

Other suggested courses: BIOL 240, BIOL 310, BIOL 324, BIOL 331, BIOL 334D1/BIOL 334D2, BIOL 335, BIOL 350/ENTO 350, BIOL 352, BIOL 355, BIOL 377, BIOL 418, BIOL 427, BIOL 428, BIOL 429, BIOL 463, BIOL 465, BIOL 466 or BIOL 467, BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2, BIOL 540, BIOL 555D1/BIOL 555D2, BIOL 569, BIOL 571, BIOL 573, BIOL 594, REDM 400, REDM 405.

#### 12.14.5.4.3 Conservation Biology Concentration

Conservation biology is the study and protection of biological diversity. It is a scientific discipline closely connecting ecology and evolutionary biology with applications in public policy and management. Conservation biology focuses on keeping normal evolutionary processes working within a functional ecological context and deals with issues of how the wide variety of organisms and ecosystems can be maintained and prevented from declining. It considers population and habitat viability and complexity in the face of threats and perturbations. Cognizance of biological diversity, knowledge, and expertise in both ecology and evolutionary biology, and appreciation for the political, social, and economic contexts of the biodiversity crisis underlie all work in conservation biology.

Key courses: BIOL 308, BIOL 310, BIOL 373, BIOL 465, plus at least one of the following field courses: BIOL 331 or BIOL 334D1/BIOL 334D2 or BIOL 428 or BIOL 429 or BIOL 553.
Other suggested courses: BIOL 304, BIOL 305, BIOL 307, BIOL 324, BIOL 335, BIOL 350/ENTO 350, BIOL 355, BIOL 377, BIOL 413, BIOL 427, BIOL 434, BIOL 466, BIOL 467, BIOL 468D1/BIOI 468D2, BIOL 469D1/BIOI 469D2, BIOL 510, BIOL 540, BIOL 590, BIOL 594, ECON 225, ECON 326, GEOG 370, GEOG 380, GEOG 470, REDM 400.

Macdonald Campus: NRSC 437, PLNT 358, WILD 350, WILD 415, WILD 420, WILD 421.

12.14.5.4.4 Concentrations Available Within the Area of Ecology

Ecology is the study of the interactions between organisms and environment that affect distribution, abundance, and other characteristics of the organisms. A strong analytical and quantitative orientation is common to all areas of ecology, and thus students wishing to specialize in these areas are strongly encouraged to develop their background in statistical analysis, computing, and mathematical modelling. Many of the ecology courses feature a strong analytical component, and students will find that background preparation in this area is very useful, if not essential. Ecology depends heavily on field research, and thus BIOL 331 and/or other field courses should be considered as vital to all concentrations in this area.

12.14.5.4.4.1 General and Applied Ecology Concentration

The concentration in general and applied ecology is designed to introduce the breadth of contemporary ecology, at the levels of the ecosystem, communities, and populations, and at the level of the individual organism, with an accent on the application of this science to practical problems in environmental management, and the management of resources and pests. In addition to general courses dealing with general principles, there is a selection of courses dealing with particular groups of organisms. Since it is essential to know how knowledge is obtained, the concentration includes a field course in ecology.

Key courses: BIOL 305, BIOL 308, BIOL 331 or BIOL 334D1/334D2, BIOL 350/ENTO 350, BIOL 373, COMP 202, COMP 273.

Other suggested courses: BIOL 307, BIOL 324, BIOL 342, BIOL 377, BIOL 418, BIOL 427, BIOL 428, BIOL 429, BIOL 432, BIOL 434, BIOL 441, BIOL 465, BIOL 466, BIOL 467, BIOL 468D1/BIOI 468D2, BIOL 469D1/BIOI 469D2, BIOL 510, BIOL 515, BIOL 540, BIOL 571, BIOL 590, BIOL 594, GEOG 302, REDM 405.

Macdonald Campus: PLNT 460.

12.14.5.4.4.2 Aquatic Ecology Concentration

This concentration is designed to introduce the principles of ecology as they pertain to aquatic ecosystems and aquatic biota. Since it is essential to know how knowledge is obtained, as well as what has been learned, one of the courses (Limnology) involves field work, and one of the courses (Biological Oceanography) a laboratory component, that stress the techniques used to study aquatic ecology. In addition, the concentration includes a field course in ecology. There is also a variety of courses in aquatic disciplines offered in other departments that supplement the aquatic ecology courses offered in Biology.

Key courses: BIOL 305, BIOL 308, BIOL 331 or another field course, BIOL 342, BIOL 373, BIOL 418, BIOL 432 (or ENVB 315), BIOL 441, BIOL 465, COMP 202, COMP 273.

Other suggested courses: BIOL 307, BIOL 429, BIOL 434, BIOL 466, BIOL 467, BIOL 468D1/BIOI 468D2, BIOL 469D1/BIOI 469D2, BIOL 540, BIOL 590, GEOG 305, GEOG 306, GEOG 308, GEOG 322, REDM 405.

12.14.5.4.4.3 Marine Biology Concentration

This concentration is designed to offer students a broad introduction to marine biology and marine ecology, which will form the basis for graduate studies in the fields, or for employment in aquatic biology and oceanography.

Key courses: BIOL 305, BIOL 308, BIOL 335, BIOL 342, BIOL 373, BIOL 441.

Other suggested courses: ATOC 512, ATOC 550, BIOL 331, BIOL 334D1/BIOI 334D2, BIOL 418, BIOL 429, BIOL 432, BIOL 434, BIOL 465, BIOL 515, BIOL 540, BIOL 590, EPSC 542.

For students intending to proceed to graduate work, one independent studies course (BIOL 466 or BIOL 467, BIOL 468D1/BIOI 468D2, BIOL 469D1/BIOI 469D2) is recommended. Because of the importance of numerical analyses in all fields of ecology, courses in Biometry (e.g. BIOL 373) and Computer Science (COMP 202 or COMP 273) are recommended.

12.14.5.4.5 Evolutionary Biology Concentration

Evolutionary biology is the study of processes that change organisms and their characteristics through time. Evolutionary biologists are concerned with adaptations of organisms and the process of natural selection.

Key courses: BIOL 304, BIOL 305, BIOL 307, BIOL 324, BIOL 331, BIOL 352, BIOL 373, BIOL 377, BIOL 435, BIOL 463, BIOL 466 or BIOL 467, BIOL 468D1/BIOI 468D2, BIOL 469D1/BIOI 469D2, BIOL 555 D1/BIOI 555 D2, BIOL 569, BIOL 570, BIOL 571, BIOL 572, BIOL 573, BIOL 585, BIOL 594.

Other suggested courses in Organismal Biology: BIOL 240, BIOL 355, BIOL 350/ENTO 350, BIOL 355, BIOL 427, BIOL 428, BIOL 463.

Macdonald Campus: PLNT 358, WILD 420.

Genetics and Development: BIOL 300, BIOL 303.

12.14.5.4.6 Human Genetics Concentration

The courses recommended for students interested in human genetics are designed to offer a broad perspective in this rapidly advancing area of biology. Genetics is covered at all levels of organization (the gene, the chromosome, the cell, the organism, and the population), using pertinent examples from all species, but with special emphasis on humans.

Key courses: BIOL 301, BIOL 370, BIOL 373, BIOL 416, BIOL 520, BIOL 568, BIOL 575.

Other suggested courses: BIOC 311, BIOL 314, BIOL 466, BIOL 467 BIOL 468D1/BIOI 468D2, BIOL 469D1/BIOI 469D2; CHEM 203 or CHEM 204 and CHEM 214, MIMM 314.
12.14.5.4.7 Molecular Genetics and Development Concentration
The discoveries that have fuelled the ongoing biomedical and biotechnology revolution have been derived from the fusion of a number of fields of biological investigation, including molecular biology, genetics, cellular and developmental biology, and biochemistry. A substantial amount of this research has been conducted upon model eukaryotic organisms, such as yeast, the fruit fly (Drosophila), the nematode (C. elegans), and the mustard weed (Arabidopsis). In the molecular genetics and development concentration, students will obtain a comprehensive understanding of how these “model eukaryotes” have advanced our knowledge of the mechanisms responsible for cellular function and organismal development. Graduates from this concentration will be well prepared to pursue higher degrees in the fields of basic biology, biotechnology, and biomedicine or to assume a wide variety of positions in government, universities, and medical and industrial institutions.

Key courses: BIOL 300, BIOL 301, BIOL 303, BIOL 373, BIOL 569; CHEM 203 or CHEM 204 combined with CHEM 214, CHEM 212, CHEM 222.
Other suggested courses: BIOL 313, BIOL 314, BIOL 316, BIOL 416, BIOL 466, BIOL 467, BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2, BIOL 518, BIOL 520, BIOL 524, BIOL 544.

12.14.5.4.8 Neurobiology Concentration
Nervous systems are perhaps the most complex entities in the natural world, being composed of up to trillions of interconnected cells that must operate in a coordinated manner to produce behaviour which can range from the mundane (e.g., regulation of heart rate) to the magnificent (e.g., musical composition). The neurobiology discipline, one of the fastest growing areas of modern biology, seeks to understand the evolution, development, and operation of nervous systems. The neurobiology concentration addresses these issues by examining neural structure, function, and development at levels of organization that range from the molecular to the organismal. As a result of exposure to a wide range of experimental and intellectual approaches, students receive a sound, broadly based education in biology.

Key courses: BIOL 306, BIOL 373, BIOL 389, BIOL 507, BIOL 514, BIOL 530, BIOL 532, BIOL 588.

Revision, August 2011. Start of revision.
Other suggested courses: ANAT 321, ANAT 322, BIOL 300, BIOL 303, BIOL 466, BIOL 468D1/BIOL 468D2, BIOL 469D1/BIOL 469D2, NEUR 310, NSCI 200, NSCI 201, PHAR 562, PHGY 311, PHGY 314, PHGY 425, PHGY 451, PHGY 556, PSYC 311, PSYC 318, PSYC 342, PSYC 410, PSYC 470, PSYT 455, PSYT 500.

Revision, August 2011. End of revision.

12.14.5.5 Biology (BIOL) Faculty
Revision, August 2011. Start of revision.

Chair

Graham A.C. Bell; B.A., D.Phil.(Oxf.), F.R.S.C. (James McGill Professor)

Revision, August 2011. End of revision.

Emeritus Professors
A. Howard Bussey; B.Sc., Ph.D.(Brist.), F.R.S.C.
Robert L. Carroll; B.S.(Mich.), M.A., Ph.D.(Harv.), F.R.S.C.
Ronald Chase; A.B.(Stan.), Ph.D.(MIT)
Jacob Kalff; M.S.A.(Tor.), Ph.D.(Ind.)

MGH: Yong Rao, Donald Van Meyel  
MNI: Robert Dunn, Kenneth Hastings, Stefano Stifani  
Physics: Paul Francois  
Redpath Museum: David Green, Hans Larsson, Claire de Mazancourt (Program Coordinator for Joint Major in Biology and Mathematics), Virginie Millien, Anthony Ricciardi  
RVH: Hugh J. Clarke, Daniel Dufort, Teruko Taketo

**Revision, August 2011. Start of revision.**

**Adjunct Professors**

IRCM: Michel Cayouette, Frédéric Charron, Artur Kania, Marie Kmita  
NRC Lab: Malcolm S. Whiteway  
U. of Montreal: Pierre Drapeau, Louis St-Amant

**Revision, August 2011. End of revision.**

12.14.5.6 Bachelor of Science (B.Sc.) - Minor Biology (25 credits)

The Minor Biology may be taken in conjunction with any primary program in the Faculty of Science (other than programs offered by the Department of Biology). Students are advised to consult the undergraduate adviser in Biology as early as possible (preferably during their first year), in order to plan their course selection. See Nancy Nelson, Stewart Biology Building, W3/25, 514-398-4109, email: nancy.nelson@mcgill.ca.

6 credits of overlap are allowed between the Minor and the primary program.

**Required Courses (15 credits)**

- BIOL 200 (3) Molecular Biology  
- BIOL 201 (3) Cell Biology and Metabolism  
- BIOL 202 (3) Basic Genetics  
- BIOL 205 (3) Biology of Organisms  
- BIOL 215 (3) Introduction to Ecology and Evolution

**Complementary Courses (10 credits)**

Students complete a minimum of 9 or a maximum of 10 complementary course credits depending on their choice of complementary courses.

To include:

- CHEM 212* (4) Introductory Organic Chemistry 1

* Students who have already taken CHEM 212 or its equivalent will choose another appropriate course, to be approved by the Adviser.

12.14.5.7 Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Biology (47 credits)

Students may complete this program with a minimum of 45 credits or a maximum of 47 credits depending on their choice of complementary courses.

**Required Courses (19 credits)**

* If a student has already taken CHEM 212 or its equivalent, the 4 credits can be made up with a 3-credit complementary.
Molecular Biology (3) BIOL 200
Cell Biology and Metabolism (3) BIOL 201
Basic Genetics (3) BIOL 202
Biology of Organisms (3) BIOL 205
Introduction to Ecology and Evolution (3) BIOL 215
Introductory Organic Chemistry 1 (4) CHEM 212*

**Complementary Courses (28 credits)**
Students complete a minimum of 27 credits or a maximum of 28 complementary course credits selected as follows:

3 or 4 credits selected from:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 206</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 301</td>
<td>4</td>
</tr>
<tr>

<td></td>
</tr>
<tr>
<td>Cell and Molecular Laboratory</td>
<td></td>
</tr>
</tbody>
</table>

24 credits of Biology courses
9 credits of which, in consultation with the Program Adviser, can be replaced with appropriate Science courses from other departments.
No more than 6 of the 24 credits can be taken at the 200 level.

12.14.5.8 Bachelor of Science (B.Sc.) - Major Biology (59 credits)
The Major requires 58 or 59 credits depending on a student's choice of complementary courses.
Students in the Major program are permitted to take a maximum of 9 credits of research courses.

**U1 Required Courses (18 credits)**

<table>

</tbody>
</table>
Other Complementary Courses
21-24 credits selected in consultation with the Program Adviser. All courses must be at the 300 level or higher; they are to include Biology courses of which at most three courses may be substituted, given the Adviser's consent, with science courses offered by other departments. Unless required by the Major, prerequisites for these courses must be taken as electives.

12.14.5.9 Bachelor of Science (B.Sc.) - Major Biology - Quantitative Biology (72 credits)
Interdisciplinary research that draws from the natural and physical sciences is an important aspect of modern biology. The Quantitative Biology option is designed for students with a deep interest in biology who wish to gain a strong grounding in physical sciences and their application to biological questions. The Quantitative Biology option has two streams: an ecology and evolutionary biology stream and a physical biology stream. Both streams provide a balance of theory and experimental components.

Students may complete this program with a minimum of 68 credits or a maximum of 72 credits depending on whether MATH 222 is completed.

Advising notes for U0 students
It is highly recommended that freshman BIOL, CHEM, MATH, and PHYS courses be selected with the program Adviser to ensure they meet the core requirements of the Quantitative Biology option.

This program is recommended for U1 students achieving a CGPA of 3.20 or better; and entering CEGEP students with a Math/Science R-score of 28.0 or better.

### Bachelor of Science (B.Sc.) - Major Biology and Mathematics (76 credits)

This program is built on a selection of mathematics and biology courses that recognizes mathematical biology as a field of research, with three streams within biology: Ecology and Evolutionary Ecology, Molecular Evolution, and Neurosciences.

**Advising notes for U0 students:**

It is highly recommended that freshman BIOL, CHEM, MATH, and PHYS courses be selected with the program Adviser to ensure they meet the core requirements of the program.

This program is recommended for U1 students achieving a CGPA of 3.2 or better; and entering CEGEP students with a Math/Science R-score of 28.0 or better.

**Required Courses (34 credits)**

* If a student has already taken CHEM 212 or its equivalent, the credits can be made up with a complementary course in consultation with the program Adviser.

** Students who have sufficient knowledge in a programming language should take COMP 250 (3) Introduction to Computer Science rather than COMP 202.

*** Students may take either MATH 223 or MATH 247.

MATH 315   (3)    Ordinary Differential Equations
MATH 323   (3)    Probability

**Complementary Courses (42 credits)**

For the 42 credits, students complete 24 credits of BINF, BIOL, NEUR, PHGY, PSYC courses including one of three Streams (Ecology and Evolutionary Ecology, Molecular Evolution, Neurosciences) and 18 credits of MATH courses.

**Math or Biology Research Course**

Note: Students selecting a BIOL course count this toward their 24 credits of BINF, BIOL, NEUR, PHGY, PSYC courses while students selecting a MATH course count this toward their 18 credits of MATH courses.

3 credits from the following Math or Biology Research courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 466</td>
<td>3</td>
<td>Independent Research Project 1</td>
</tr>
<tr>
<td>BIOL 467</td>
<td>3</td>
<td>Independent Research Project 2</td>
</tr>
<tr>
<td>MATH 410</td>
<td>3</td>
<td>Majors Project</td>
</tr>
</tbody>
</table>

Of the remaining complementary courses, at least 6 credits must be at the 400 level or above.

**Math Courses**

15-18 credits of MATH courses chosen from Sequence 1 or 2 and from "Remaining Math Courses" as follows:

**Sequence 1**

12 credits from the following courses:

* Students may take either MATH 317 or MATH 327
** Students may take either MATH 326 or MATH 437

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 314</td>

<td>4</td>
<td>Generalized Linear Models</td>
</tr>
<tr>
<td>MATH 524</td>
<td>4</td>
<td>Nonparametric Statistics</td>
</tr>
</tbody>
</table>
Sampling Theory and Applications

BIOL, NEUR, PHGY, PHYS, PSYC Courses
21-24 credits of BIOL, NEUR, PHGY, PHYS, PSYC courses including one of three Streams.
Note: Some courses in the Streams may have prerequisites.

Ecology and Evolutionary Ecology Stream
At least 15 credits selected as follows:

Stream Required Course
3 credits of:
BIOL 206 (3) Methods in Biology of Organisms

Stream Complementary Courses
3 credits from the following field courses or any other field course with permission:
BIOL 240 (3) Monteregian Flora
BIOL 331 (3) Ecology/Behaviour Field Course
BIOL 334D1 (1.5) Applied Tropical Ecology
BIOL 334D2 (1.5) Applied Tropical Ecology
BIOL 432 (3) Limnology

At least 9 credits chosen from the following list, of which 6 credits must be at the 400 level or above:
BIOL 202 (3) Basic Genetics
BIOL 304 (3) Evolution
BIOL 308 (3) Ecological Dynamics
BIOL 310 (3) Biodiversity and Ecosystems
BIOL 324 (3) Ecological Genetics
BIOL 434 (3) Theoretical Ecology
BIOL 435 (3) Natural Selection
BIOL 466 (3) Independent Research Project 1
BIOL 467 (3) Independent Research Project 2
BIOL 468 (6) Independent Research Project 3
BIOL 585 (3) Game Theory and Evolutionary Dynamics
BIOL 590 (3) Linking Community and Ecosystem Ecology
BIOL 594 (3) Advanced Evolutionary Ecology

Molecular Evolution Stream
At least 16 credits selected as follows:

Stream Required Courses
7 credits from:
BIOL 202 (3) Basic Genetics
BIOL 301 (4) Cell and Molecular Laboratory
Stream Complementary Courses
At least 9 credits selected from the following list, of which 6 credits must be at the 400 level or above.
* Students may take either BINF 511 or BIOL 592.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>

<td>3</td>
<td>Sensorimotor Behaviour</td>
</tr>
</tbody>
</table>

Remaining BINF, BIOL, NEUR, PHGY, PSYC
For the remaining BINF, BIOL, NEUR, PHGY, PSYC complementary course credits, if any, students top up their credits to the necessary 24 with any course listed in the above streams in Biology or any other course in Biology with the approval of the program Adviser.

12.14.5.11 Bachelor of Science (B.Sc.) - Honours Biology (75 credits)
Students may complete this program with a minimum of 71 credits or a maximum of 75 credits depending on their choice of complementary courses.

The Honours program in Biology is designed expressly as a preparation for graduate studies and research, and provides students with an enriched training in biology and some research experience in a chosen area. Acceptance into the Honours program at the end of U2 requires a CGPA of 3.50 and approval of a 9- or 12-credit Independent Studies proposal (see listing of BIOL 479 and BIOL 480 for details). Students also complete a 4-credit Honours Seminar course, BIOL 499. For an Honours degree, a minimum CGPA of 3.50 in the U3 year and adherence to the program as outlined below are the additional requirements.

U1 Required Courses (18 credits)
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Credits</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 200</td>
<td>3</td>
<td>Molecular Biology</td>
</tr>
<tr>
<td>BIOL 201</td>
<td>3</td>
<td>Cell Biology and Metabolism</td>
</tr>
<tr>
<td>BIOL 202</td>

**12.14.5.12 Biology (BIOL) Related Programs and Study Semesters**

12.14.5.12 Joint Major in Computer Science and Biology

For more information, see section 12.14.9.11: Bachelor of Science (B.Sc.) - Major Computer Science and Biology (73 credits).
12145122 Panama Field Study Semester

The program is a joint venture between McGill University and the Smithsonian Tropical Research Institute (STRI) in Panama. For more information, see Field Studies and Study Abroad > Panama Field Study Semester. You can also visit the following website for details: www.mcgill.ca/science/student/internships-fieldfield.

12145123 African Field Study Semester

Revision, August 2011. Start of revision.

The Department of Geography, Faculty of Science, coordinates the 15-credit interdisciplinary African Field Study Semester; see Field Studies and Study Abroad > African Field Study Semester. You can also visit the following website for details: www.mcgill.ca/science/student/internships-fieldfield.

Revision, August 2011. End of revision.

12.14.6 Biotechnology (BIOT)

12.14.6.1 Location

Sheldon Biotechnology Centre
Lyman Duff Building
3775 University Street
Montreal, Quebec H3A 2B4

Telephone: 514-398-3998

12.14.6.2 About Biotechnology

Biotechnology, the science of understanding, selecting, and promoting useful organisms and specific gene products for commercial and therapeutic purposes, is the success story of this generation. It demands a broad comprehension of biology and engineering as well as detailed knowledge of at least one basic subject such as molecular genetics, protein chemistry, microbiology, or chemical engineering.

The Minor in Biotechnology is offered by the Faculties of Engineering and of Science, and students combine the Minor with the regular departmental Major (or Honours or Faculty) program. The Minor emphasizes an area relevant to biotechnology which is complementary to the main program.

Students should identify their interest in the Biotechnology Minor to their departmental academic adviser and to the program supervisor of the Minor and, at the time of registration for the U2 year, should declare their intent to embark on the Minor. Before registering for the Minor, and with the agreement of the academic adviser, students must submit their course list to the program supervisor, who will certify that the student's complete program conforms to the requirements for the Minor. Students should ensure that they will have fulfilled the prerequisite requirements for the courses selected.

The course BIOT 505 Selected Topics in Biotechnology is considered as a course taught by the Faculty of Science.

12.14.6.3 General Regulations

To obtain the Minor in Biotechnology, students must:

- satisfy the requirements both for the departmental program and for the Minor;
- complete 24 credits, 18 of which must be exclusively for the Minor program;
- obtain a grade of C or better in the courses presented for the Minor.

12.14.6.4 Biotechnology (BIOT) Faculty

Program Supervisor

Professor Hugh P.J. Bennett; B.A.(York, UK), Ph.D.(Brunel)

12.14.6.5 Bachelor of Science (B.Sc.) - Minor Biotechnology (for Science Students) (24 credits)

Revision, August 2011. Start of revision.

To obtain the Minor Biotechnology, Science students must:

a) satisfy both the requirements for the departmental program and for the Minor;
b) complete 24 credits, 18 of which must be exclusively for the Minor program.*

* Approved substitutions must be made for any of the required courses which are part of the student's main program.

Required Courses (15 credits)

* Students usually take either BIOL 201 or BIOC 212.
<table>

Student Advisory Office: Room 314  
Website: www.chemistry.mcgill.ca/advising/index.htm

12.14.7.2 Office for Science and Society

The Office for Science and Society is dedicated to the promotion of critical thinking and the presentation of practical scientific information to the public, educators, and students in an accurate and responsible fashion. The Office answers queries from the public as well as from the media, with a view towards establishing scientific accuracy. The Office also offers a variety of educational and interesting presentations on scientific topics and its members contribute to a number of courses under the umbrella of “The World of Chemistry”.

Director

Joseph A. Schwarcz; B.Sc., Ph.D.(McG.)

Members

Ariel Fenster; L.Sc., D.E.A.(Paris), Ph.D.(McG.)

12.14.7.3 About Chemistry

Chemistry is both a pure science, offering a challenging intellectual pursuit, and an applied science whose technology is of fundamental importance to the economy and society. Modern chemists seek an understanding of the structure and properties of atoms and molecules to predict and interpret the properties and transformations of matter and the energy changes that accompany those transformations. Many of the concepts of physics and mathematics are basic to chemistry, while chemistry is of fundamental importance to many other disciplines such as the biological and medical sciences, geology, metallurgy, etc.

A degree in chemistry leads to a wide variety of professional vocations. The large science-based industries (petroleum refining, plastics, pharmaceuticals, etc.) all employ chemists in research, development, and quality control. Many federal and provincial departments and agencies employ chemists in research and testing laboratories. Such positions are expected to increase with the currently growing concern for the environment and for consumer protection. A background in chemistry is also useful as a basis for advanced study in other related fields, such as medicine and the biological sciences. For a business career, a B.Sc. in Chemistry can profitably be combined with a Master's degree in Business Administration, or a study of law for work as a patent lawyer or forensic scientist.

Chemistry courses at the university level are traditionally divided into four areas of specialization: 1) organic chemistry, dealing with the compounds of carbon; 2) inorganic chemistry, concerned with the chemistry and compounds of elements other than carbon; 3) analytical chemistry, which deals with the identification of substances and the quantitative measurement of their compositions; and 4) physical chemistry, which treats the physical laws, kinetics, and energetics governing chemical reactions, behavior of materials, and molecular structure. Naturally, there is a great deal of overlap between these different areas, and the boundaries are becoming increasingly blurred. After a general course at the introductory level, courses in organic, inorganic, analytical, and physical chemistry are offered throughout the university years. Since chemistry is an experimental science, laboratory classes accompany most undergraduate courses. In addition, courses are offered in polymer, theoretical, green, nano, and biological chemistry to upper-year undergraduates.

There are two main programs in the Department of Chemistry: Honours and Major. The Honours program is intended primarily for students wishing to pursue graduate studies in chemistry. While the Major program is somewhat less specialized, it is still recognized as sufficient training for a career in chemistry. It can also lead to graduate studies although an additional qualifying year may be necessary. There are also a number of B.Sc. Liberal and other programs available. Interested students may inquire about these at the Student Advisory Office, Room 314, Otto Mass Chemistry Building, or see www.chemistry.mcgill.ca/advising/index.htm.

12.14.7.4 Chemistry (CHEM) Faculty

Chair

R. Bruce Lennox
## Emeritus Professors

Tak-Hang Chan; B.Sc.(Tor.), M.A., Ph.D.(Princ.), F.C.I.C., F.R.S.C. (*Tomlinson Emeritus Professor of Chemistry*),

Arthur S. Perlin; M.Sc., Ph.D.(McG.), F.R.S.C. (*E.B. Eddy Emeritus Professor of Industrial Chemistry*),

William C. Purdy; B.A.(Amh.), Ph.D.(MIT), F.C.I.C. (*William C. Macdonald Emeritus Professor of Chemistry*),

Leon E. St-Pierre; B.Sc.(Alta.), Ph.D.(Notre Dame), F.C.I.C.,

Michael A. Whitehead; B.Sc., Ph.D., D.Sc.(Lond.), F.C.I.C.

## Professors

Bruce Arndtsen; B.A.(Car. College), Ph.D.(Stan.) (*William Dawson Scholar*),

D. Scott Bohle; B.A.(Reed College), M.Phil., Ph.D.(Auck.) (*CRC Tier I Chair*),

David H. Burns; B.Sc.(Puget Sound), Ph.D.(Wash.),

Masad J. Damha; B.Sc., Ph.D.(McG.) (*James McGill Professor*),

Derek G. Gray; B.Sc.(Bel.), M.Sc., Ph.D.(Manit.), F.C.I.C. (*NSERC Paprican Chair*),

David N. Harpp; A.B.(Middlebury), M.A.(Wesl.), Ph.D.(N. Carolina), F.C.I.C. (*William C. Macdonald Professor of Chemistry*),

R. Bruce Lennox; B.Sc., M.Sc., Ph.D.(Tor.) (*Tomlinson Professor of Chemistry*),

C.J. Li; B.Sc.(Zhengzhou), M.Sc.(C.A.S.), Ph.D.(McG.) (*CRC Tier I Chair*),

David Ronis; B.Sc.(McG.), Ph.D.(MIT),

Eric D. Salin; B.Sc.(Calif.), Ph.D.(Ore. St.),

Bryan C. Sanctuary; B.Sc., Ph.D.(Br. Col.),

Hanadi Sleiman; B.Sc.(A.U.B.), Ph.D.(Stan.) (*William Dawson Scholar*),

Theo G.M. van de Ven; Kand. Doc.(Utrecht), Ph.D.(McG.) (*NSERC Paprican Chair*),

## Associate Professors

Mark P. Andrews; B.Sc., M.Sc., Ph.D.(Tor.),

Parisa Ariya; B.Sc., Ph.D.(York) (*William Dawson Scholar*) (*joint appt. with Atmospheric & Oceanic Sciences*),

Karine Auclair; B.Sc.(UQAC), Ph.D.(Alta.),

Christopher J. Barrett; B.Sc., M.Sc., Ph.D.(Qu.),

William C. Galley; B.Sc.(McG.), Ph.D.(Calif.),

James Gleason; B.Sc.(McG.), Ph.D.(Virg.),

Ashok K. Kakkar; B.Sc.(Punjab), M.Sc.(H.P.U.), Ph.D.(Wat.),

Patanjali Kambhampati; B.A.(Car. Coll.), Ph.D.(Texas),

Nicolas Moitessier; B.Sc., M.Sc., Ph.D.(Nancy),

Dmitrii Perepichka; B.S., M.Sc., Ph.D.(Ukraine),

Joan F. Power; B.Sc., Ph.D.(C’dia)
Associate Professors
Linda Reven; B.A.(Car. Coll.), Ph.D.(Ill.)
Youla Tsantrizos; B.Sc., M.Sc., Ph.D.(McG.)
Paul Wiseman; B.Sc.(St. FX), Ph.D.(W. Ont.) (joint appt. with Physics)

Assistant Professors
Amy S. Blum; B.S.(Princ.), M.S., Ph.D.(Wash.)
Michel Bourqui; B.Sc.(EPF Lausanne), Ph.D.(ETH Zürich) (joint appt. with Atmospheric & Oceanic Sciences)
Gonzalo Cosa; B.Sc.(Rio Cuarto), Ph.D.(Ott.)
Anthony Mittermaier; B.Sc.(Guelph), Ph.D.(Tor.)
Audrey Moores; B.Sc., M.Sc., Ph.D.(École Poly., Palaiseau, Fr.) (Fac. Sci. Tier II Chair)
Bradley Siwick; B.A.Sc., M.Sc., Ph.D.(Tor.) (joint appt. with Physics)

Associate Members
James A. Finch (Mining & Metallurgical Engineering)
P. Grütter (Physics)
Esther Schirrmacher (Medicine)
Ralf Schirrmacher (Medicine)

Adjunct Professors
Yvan Guindon; B.Sc., Ph.D.(Montr.), F.C.I.C., F.R.S.C.
Christian Reber; B.Sc., Ph.D.(Berne)
Ivor Wharf; B.Sc., Ph.D.(Lond.), A.R.C.S., D.I.C.
Robert Zamboni; B.Sc., Ph.D.(McG.)

12.14.7.5 Bachelor of Science (B.Sc.) - Minor Chemistry (18 credits)

Required Courses (18 credits)

* Denotes courses with CEGEP equivalents.
Substitutions for these by more advanced courses may be made at the discretion of the Adviser.

12.14.7.6 Bachelor of Science (B.Sc.) - Minor Chemical Engineering (24 credits)

A Chemical Engineering Minor will be of interest to Chemistry students who wish to study the problems of process engineering and its related subjects. A student completing this Minor will be able to make the important link between molecular sciences and industrial processing. This Minor will not provide Professional Engineering accreditation.

Required Courses (7 credits)

CHEE 204 (3) Chemical Manufacturing Processes

**Complementary Courses (17 credits)**

At least one of:

CHEE 220 (3) Chemical Engineering Thermodynamics
CHEE 314 (4) Fluid Mechanics

with the remainder chosen from the following:

* Students select CHEE 392 and CHEE 393

** Students select either CHEE 494 or CHEE 495

CHEE 230 (3) Environmental Aspects of Technology
CHEE 315 (4) Heat and Mass Transfer
CHEE 351 (3) Separation Processes
CHEE 370 (3) Elements of Biotechnology
CHEE 380 (3) Materials Science
CHEE 392* (4) Project Laboratory 1
CHEE 393* (5) Project Laboratory 2
CHEE 438 (3) Engineering Principles in Pulp and Paper Processes
CHEE 452 (3) Particulate Systems
CHEE 487 (3) Chemical Processing: Electronics Industry
CHEE 494** (3) Research Project and Seminar 1
CHEE 495** (4) Research Project and Seminar 2
CHEE 592 (3) Industrial Air Pollution Control
CHEE 593 (3) Industrial Water Pollution Control
MATH 314 (3) Advanced Calculus

12.14.7.7 Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Chemistry - Biological (47 credits)

**Program Prerequisites**

PRE-PROGRAM REQUIREMENTS:

Students entering from the Freshman program must have included CHEM 110 and CHEM 120 or CHEM 115, BIOL 111 or BIOL 112, MATH 133, MATH 140/MATH 141 or MATH 150/MATH 151, PHYS 131/PHYS 142, or their equivalents in their Freshman year. Quebec students must have completed the DEC with appropriate science and mathematics courses. Note that students who have successfully completed MATH 150 and MATH 151 do not have to take MATH 222.

Required Basic Core Courses (26 credits)

The required courses in this program consist of 26 credits in chemistry and mathematics, listed below. The courses marked with an asterisk (*) are omitted from the program of students who have successfully completed them at CEGEP. Students from outside Quebec or transfer students should consult the Academic Adviser.

The Liberal Program: Core Science Component in Chemistry - Biological Option is not certified by the Ordre des chimistes du Québec. Students interested in pursuing a career in Chemistry in Quebec are advised to take an appropriate B.Sc. program in Chemistry.

A computer science course, either COMP 202 or COMP 208, is strongly recommended during U1 for students who have no previous introduction to computer programming. Students should contact their adviser on this matter. Completion of Mathematics MATH 222 during U1 is strongly recommended.

* Denotes courses with CEGEP equivalents.

** Students who have successfully completed MATH 150 and MATH 151 are not required to take MATH 222.

12.14.7.13 Bachelor of Science (B.Sc.) - Major Chemistry - Materials (62 credits)

**Program Prerequisites**

**PRE-PROGRAM REQUIREMENTS:**

Students entering from the Freshman program must have included CHEM 110 and CHEM 120 or CHEM 115, BIOL 111 or BIOL 112, MATH 133, MATH 140/MATH 141 or MATH 150/MATH 151, PHYS 131/PHYS 142, or their equivalents in their Freshman year. Quebec students must have completed the DEC with appropriate science and mathematics courses. Note that students who have successfully completed MATH 150 and MATH 151 do not have to take MATH 222.

**Required Courses (59 credits)**
The required courses in this program consist of 59 credits in chemistry, physics and mathematics, listed below. The courses marked with an asterisk (\*) are omitted from the program of students who have successfully completed them at the CEGEP level but the Chemistry courses must be replaced by courses in that discipline if students wish to be eligible for admission to the Ordre des chimistes du Québec. Students from outside Quebec or transfer students should consult the Academic Adviser.

A computer science course, either COMP 202 or COMP 208, is strongly recommended during U1 for students who have no previous introduction to computer programming. Students should contact their adviser on this matter. Completion of Mathematics MATH 222 and MATH 315 during U1 is also strongly recommended. Physics PHYS 242 should be completed during U2.

* Denotes courses with CEGEP equivalents.

** Students who have successfully completed MATH 150 and MATH 151 are not required to take MATH 222.

**12.14.7.14 Bachelor of Science (B.Sc.) - Honours Chemistry (71 credits)**

Note: Attainment of the Honours degree requires a CGPA of at least 3.00.

**Program Prerequisites**

McGill University, Undergraduate Programs, Courses and University Regulations, 2011-2012 (Published August 17, 2011)
PRE-PROGRAM REQUIREMENTS:
Students entering from the Freshman program must have included CHEM 110 and CHEM 120 or CHEM 115, BIOL 111 or BIOL 112, MATH 133, MATH 140/MATH 141 or MATH 150/MATH 151, PHYS 131/PHYS 142, or their equivalents in their Freshman year. Quebec students must have completed the DEC with appropriate science and mathematics courses. Note that students who have successfully completed MATH 150 and MATH 151 do not have to take MATH 222.

Required Courses (53 credits)
The required courses in this program consist of 53 credits in chemistry, physics and mathematics, listed below. The courses marked with an asterisk (*) are omitted from the program of students who have successfully completed them at the CEGEP level but the Chemistry courses must be replaced by courses in that discipline if students wish to be eligible for admission to the Ordre des chimistes du Québec. Students from outside Quebec or transfer students should consult the Academic Adviser.

A computer science course, either COMP 202 or COMP 208, is strongly recommended during U1 for students who have no previous introduction to computer programming. Students should contact their adviser on this matter. Completion of Mathematics MATH 222 and MATH 315 during U1 is also strongly recommended. Physics PHYS 242 should be completed during U2.

* Denotes courses with CEGEP equivalents.

** Students who have successfully completed MATH 150 and MATH 151 are not required to take MATH 222.

CHEM 212* (4) Introductory Organic Chemistry 1
CHEM 222* (4) Introductory Organic Chemistry 2
CHEM 223 (2) Introductory Physical Chemistry 1

CHEM 381 (3) Inorganic Chemistry 2
CHEM 392 (3) Integrated Inorganic/Organic Laboratory
CHEM 393 (2) Physical Chemistry Laboratory 2
MATH 222** (3) Calculus 3
MATH 315 (3) Ordinary Differential Equations
PHYS 242 (2) Electricity and Magnetism

Complementary Courses (18 credits)

6 credits of research*:
* Students may take up to 12 Research Project credits but only 6 of these may be used to fulfil the program requirement.

CHEM 470 (6) Research Project 1
CHEM 480 (3) Research Project 2
CHEM 490D1 (1.5) Research Project 3
CHEM 490D2 (1.5) Research Project 3
12 credits of additional Chemistry courses as follows:
6 credits of which must be at the 300 level or higher, and
6 credits of which must be at the 400 level or higher.

12.14.7.15 Bachelor of Science (B.Sc.) - Honours Chemistry - Bio-organic (75 credits)

Note: Attainment of the Honours degree requires a CGPA of at least 3.00.

Program Prerequisites

PRE-PROGRAM REQUIREMENTS:

Students entering from the Freshman program must have included CHEM 110 and CHEM 120 or CHEM 115, BIOL 111 or BIOL 112, MATH 133, MATH 140/MATH 141 or MATH 150/MATH 151, PHYS 131/PHYS 142, or their equivalents in their Freshman year. Quebec students must have completed the DEC with appropriate science and mathematics courses. Note that students who have successfully completed MATH 150 and MATH 151 do not have to take MATH 222.

Required Courses (57 credits)

The required courses in this program consist of 57 credits in chemistry, biology and mathematics, listed below. The courses marked with an asterisk (*) are omitted from the program of students who have successfully completed them at the CEGEP level but the Chemistry courses must be replaced by courses in that discipline if students wish to be eligible for admission to the Ordre des chimistes du Québec. Students from outside Quebec or transfer students should consult the Academic Adviser.

A computer science course, either COMP 202 or COMP 208, is strongly recommended during U1 for students who have no previous introduction to computer programming. Students should contact their adviser on this matter. Completion of Mathematics MATH 222 and MATH 315 during U1 is also strongly recommended.

* Denotes courses with CEGEP equivalents.

** Students who have successfully completed MATH 150 and MATH 151 are not required to take MATH 222.

12.14.7.17 Bachelor of Science (B.Sc.) - Honours Chemistry - Materials (74 credits)

Note: Attainment of the Honours degree requires a CGPA of at least 3.00.

Program Prerequisites

PRE-PROGRAM REQUIREMENTS:

Students entering from the Freshman program must have included CHEM 110 and CHEM 120 or CHEM 115, BIOL 111 or BIOL 112, MATH 133, MATH 140/MATH 141 or MATH 150/MATH 151, PHYS 131/PHYS 142, or their equivalents in their Freshman year. Quebec students must have completed the DEC with appropriate science and mathematics courses. Note that students who have successfully completed MATH 150 and MATH 151 do not have to take MATH 222.

Required Courses (65 credits)

The required courses in this program consist of 65 credits in chemistry, physics and mathematics, listed below. The courses marked with an asterisk (*) are omitted from the program of students who have successfully completed them at the CEGEP level but the Chemistry courses must be replaced by courses in that discipline if students wish to be eligible for admission to the Ordre des chimistes du Québec. Students from outside Quebec or transfer students should consult the Academic Adviser.

A computer science course, either COMP 202 or COMP 208, is strongly recommended during U1 for students who have no prior introduction to computer programming. Students should contact their adviser on this matter. Completion of Mathematics MATH 222 and MATH 315 during U1 is also strongly recommended. Physics PHYS 242 should be completed during U2.

* Denotes courses with CEGEP equivalents.

** Students who have successfully completed MATH 150 and MATH 151 are not required to take MATH 222.

*** Students may take up to 12 Research Project credits but only 6 of these may be used to fulfill the program requirement.

- MIME 542* (3)  Transmission Electron Microscopy

12.14.7.18 Chemistry (CHEM) Related Programs
12.14.7.18.1 Joint Honours in Physics and Chemistry

For more information, see section 12.14.29: Physics (PHYS).

12.14.8  Cognitive Science

12.14.8.1 About Cognitive Science

Cognitive Science is the multidisciplinary study of cognition in humans and machines. The goal is to understand the principles of intelligence and thought with the hope that this will lead to a better understanding of the mind and learning, and to the development of intelligent devices that constructively extend human abilities.

Students wishing to enrol in the Minor Cognitive Science must meet with the Interdisciplinary Programs Adviser.

12.14.8.2 Bachelor of Science (B.Sc.) - Minor Cognitive Science (24 credits)

The Minor Cognitive Science is intended to allow students in the Faculty of Arts or the Faculty of Science to explore the interdisciplinary study of cognition. The goal is to understand the principles of intelligence with the hope that this will lead to a better understanding of the mind and learning.

Students wishing to complete this Minor must meet with the Interdisciplinary Programs Adviser in the Science Office for Undergraduate Student Advising (SOUSA).

Required Course (3 credits)

- PSYC 532 (3)  Cognitive Science

Complementary Courses (21 credits)

Note:
Students must take a minimum of 6 credits at the 400 to 500 level.
Students may not take any courses from their home department(s).
Students complete a minimum of 9 credits each in two areas.

12.14.9.2 About Computer Science

Computer Science covers the theory and practice behind the design and implementation of computer and information systems. Fundamental to computer science are questions about how to describe, process, manage, and analyze information and computation. A fundamental building block is the study of algorithms. An algorithm presents a detailed sequence of actions solving a particular task. A computer program is the implementation of an algorithm in a specific programming language so that a computer can execute the algorithm. Software generally refers to a computer program or a set of related computer programs.

Based on the building blocks of algorithms and programs, computer science is split into many different areas such as the study of algorithms and data structures, programming languages and methodology, theory of computation, software engineering (the design of large software systems), computer architecture (the structure of the hardware), communication between computers, operating systems (the software that shields users from the underlying hardware), database systems (software that handles large amounts of data efficiently), artificial intelligence (algorithms that imitate human information processing), computer vision (algorithms that let computers see and recognize their environment), computer graphics, robotics (algorithms that control robots), and computational biology (algorithms and methods that address problems inspired by biology). Computer science also plays an important role in many other fields, including Biology, Physics, Engineering, Business, Music, and Neuroscience, where it is necessary to process and reason about large amounts of data. Computer Science is strongly related to mathematics, linguistics, and engineering.

A degree in Computer Science offers excellent job prospects. As the use of computers and specialized software plays a crucial role in business, science, and our personal life, computer graduates are in high demand. Computer scientists find jobs in software development in many areas of computer science, in consulting, and in project management. As computer scientists often develop the software for a specific application domain (e.g., business, engineering, medicine), they must be prepared and willing to get to know their application area.

The School of Computer Science offers a wide range of programs. Most programs start with the same set of basic courses allowing students to decide on their exact program once they get a basic understanding of the discipline. Within the Faculty of Science, there are a major, an honours, a liberal and a minor program in Computer Science, a major and a liberal program in Software Engineering, a major in Computer Science: Computer Games Option, a minor in Computational Biology, a minor in Mathematics and Statistics (MATH), a joint major and a joint honours program in Physics and Computer Science, and a joint major in Computer Science and Biology. The School also offers a major concentration and minor concentrations in Computer Science through the Faculty of Arts or as part of a Bachelor of Arts and Science.

The School's courses are available as electives to Engineering students. Engineering students interested in a minor in Computer Science should consult Faculty of Engineering > Computer Science Courses and Minor Program.

Most course instructors are Faculty members of the School that do research in the areas they teach. Students will learn in a small classroom environment, get to know their professors and have opportunity to do cutting-edge research. Some graduate courses in Computer Science are available to suitable qualified senior undergraduates. The School offers their students large computing labs in the Lorne Trottier Building that is dedicated to undergraduate students. All students planning to enter Computer Science programs should make an appointment with an academic adviser through the School's Undergraduate Student Affairs Office.
12.14.9.3 Internship Opportunities

Students who want to get practical experience in industry before graduation are encouraged to participate in one of the following internship programs:

The Internship Year in Science (IYS) is an academic program offered for a duration of 8, 12, or 16 months. It will be reflected on your transcript and is included in your program name (Bachelor of Science - Internship Program).

The Industrial Practicum (IP) has a duration of 4 months and is usually carried out starting in May. It will appear as a 0-credit, Pass/Fail course on your transcript. If you complete two IPs, the name of your program will change to include the word internship.

For more information on these programs, consult section 12.13.1: Industrial Practicum (IP) and Internship Year in Science (IYS), or, www.mcgill.ca/science/internships-field/internships.

12.14.9.4 Research Opportunities

Computer science undergraduates have excellent opportunities to participate in research. Each summer, several awards are available, such as the NSERC Undergraduate Student Research Awards; these offer financial support for a research experience in an academic setting. As well, students may take undergraduate research project courses such as COMP 396 Undergraduate Research Project, COMP 400 Technical Project and Report (for honours students), and COMP 401 Project in Biology and Computer Science. Students who have participated in substantial and broad undergraduate research may qualify for the Dean's Multidisciplinary Undergraduate Research List at graduation time. For more information, consult University Regulations and Information > Graduation Honours: Faculty of Science Dean's Multidisciplinary Undergraduate Research List.

12.14.9.5 Admissions

Students intending to pursue a major in Computer Science or Software Engineering should have a reasonable mathematical background and should have completed MATH 140 (or MATH 150), MATH 141 (or MATH 151) and MATH 133, or their CEGEP equivalents. These three mathematics courses should have been completed with at least an average of B-. A background in computer science is not necessary as students may start their studies with the introductory course COMP 202. However, taking COMP 202 in the Freshman year, or completing an equivalent course in CEGEP, would be an asset and allows students to take more advanced courses earlier in their program.

More information about the admission process and the programs is available at www.cs.mcgill.ca.

12.14.9.7 Bachelor of Science (B.Sc.) - Minor Computer Science (24 credits)

This Minor is designed for students who want to gain a basic understanding of computer science principles and get an overview of some computer science areas. Basic computer science skills are important in many domains. Thus, the Minor is useful for students majoring in any discipline. It can be taken in conjunction with any program in the Facilities of Science and Engineering (with the exception of other programs in Computer Science).

Students must obtain approval from the adviser of their main program. Students are strongly encouraged to talk to an adviser of the School of Computer Science before choosing the complementary courses. Approval must be given by the School for the particular selection of courses to be credited towards the Minor. This should be done before registering for the final term of studies.

Students may receive credit towards their Computer Science Minor by taking certain approved courses outside the School of Computer Science. These courses must have a high computer science content. A student will not be permitted to receive more than 6 credits from such courses. These courses must be approved by the School of Computer Science in advance. If a student's Major program requires Computer Science courses, up to 6 credits of Computer Science courses may be used to fulfill both Major and Minor requirements.

Required Courses (9 credits)

* Students who have sufficient knowledge in a programming language do not need to take COMP 202, but it must be replaced with an additional computer science complementary course.

** Students may take either COMP 203 or COMP 250, but not both.

COMP 202* (3) Introduction to Computing 1
COMP 203** (3) Introduction to Computing 2
COMP 206 (3) Introduction to Software Systems
COMP 250** (3) Introduction to Computer Science

Complementary Courses (15 credits)

15 credits selected from the courses below and computer science courses at the 300 level or above (except COMP 364, COMP 396, COMP 400, COMP 431).

* Note: COMP 251 is a prerequisite for many of the other complementary courses.

COMP 251* (3) Data Structures and Algorithms
COMP 273 (3) Introduction to Computer Systems
MATH 222 (3) Calculus 3
MATH 240 (3) Discrete Structures 1

12.14.9.8 Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Computer Science (45 credits)

This program provides an introduction to the principles of computer science and offers opportunity to get insight into some of its sub-areas. Having only 45 credits, it allows students to combine it with minor or major concentrations in other disciplines.

Required Courses (21 credits)

* Students who have sufficient knowledge in a programming language do not need to take COMP 202, but it must be replaced with an additional computer science complementary course.

COMP 202* (3) Introduction to Computing 1
COMP 206 (3) Introduction to Software Systems
COMP 250 (3) Introduction to Computer Science
COMP 251 (3) Data Structures and Algorithms
COMP 273 (3) Introduction to Computer Systems
MATH 222 (3) Calculus 3
MATH 240 (3) Discrete Structures 1
Complementary Courses (24 credits)

3-6 credits from:

- MATH 223 (3) Linear Algebra
- MATH 318 (3) Mathematical Logic
- MATH 323 (3) Probability
- MATH 324 (3) Statistics
- MATH 340 (3) Discrete Structures 2

At least 3 credits from:

- COMP 330 (3) Theoretical Aspects: Computer Science
- COMP 350 (3) Numerical Computing
- COMP 360 (3) Algorithm Design Techniques

At least 3 credits from:

- COMP 302 (3) Programming Languages and Paradigms
- COMP 303 (3) Software Development

The remaining complementary courses should be selected from any COMP courses at the 300 level or above except COMP 364, COMP 396, COMP 400 and COMP 431.

Note: Advanced COMP courses have more prerequisites than the required courses for this program. Students have to make sure that they have the appropriate prerequisites when choosing upper-level courses.

12.14.9.9 Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Software Engineering (49 credits)

This program covers a core of programming and software engineering courses and allows students to select courses that aim at practical aspects of software development.

Students may complete this program with a minimum of 48 credits or a maximum of 49 credits depending on their choice of complementary courses.

Required Courses (36 credits)

* Students who have sufficient knowledge in a programming language do not need to take COMP 202 and can replace it with additional computer science complementary course credits.

- COMP 202* (3) Introduction to Computing 1
- COMP 206 (3) Introduction to Software Systems
- COMP 250 (3) Introduction to Computer Science
- COMP 251 (3) Data Structures and Algorithms
- COMP 273 (3) Introduction to Computer Systems
- COMP 302 (3) Programming Languages and Paradigms
- COMP 303 (3) Software Development
- COMP 310 (3) Operating Systems
- COMP 361D1 (3) Software Engineering Project
- COMP 361D2 (3) Software Engineering Project
- MATH 223 (3) Linear Algebra
- MATH 240 (3) Discrete Structures 1
Complementary Courses (13 credits)

3 credits selected from:

- COMP 330 (3) Theoretical Aspects: Computer Science
- COMP 360 (3) Algorithm Design Techniques

9-10 credits selected from the courses below:

* Students take either COMP 435 or COMP 535, but not both.
- COMP 322 (1) Introduction to C++
- COMP 409 (3) Concurrent Programming
- COMP 421 (3) Database Systems
- COMP 435* (3) Basics of Computer Networks
- COMP 520 (4) Compiler Design
- COMP 525 (3) Formal Verification
- COMP 529 (4) Software Architecture
- COMP 533 (3) Object-Oriented Software Development
- COMP 535* (3) Computer Networks 1

Or any computer science course at the 300 level or above, excluding COMP 364, COMP 396, and COMP 431.

12.14.9.10 Bachelor of Science (B.Sc.) - Major Computer Science (63 credits)

This program is the standard Major program offered by the School of Computer Science. It provides a broad introduction to the principles of computer science and offers ample opportunity to acquire in-depth knowledge of several sub-disciplines. At the same time, its credit requirements allow students to take an additional minor.

Students may complete this program with a maximum of 63 credits or a minimum of 60 credits if they are exempt from taking COMP 202.

Required Courses (30 credits)

* Students who have sufficient knowledge in a programming language do not need to take COMP 202.
- COMP 202* (3) Introduction to Computing 1
- COMP 206 (3) Introduction to Software Systems
- COMP 250 (3) Introduction to Computer Science
- COMP 251 (3) Data Structures and Algorithms
- COMP 273 (3) Introduction to Computer Systems
- COMP 302 (3) Programming Languages and Paradigms
- COMP 310 (3) Operating Systems
- MATH 222 (3) Calculus 3
- MATH 223 (3) Linear Algebra
- MATH 240 (3) Discrete Structures 1

Complementary Courses (33 credits)

Students should talk to an academic adviser before choosing their complementary courses.

At least 6 credits selected from:

- COMP 330 (3) Theoretical Aspects: Computer Science
COMP 350  (3) Numerical Computing
COMP 360  (3) Algorithm Design Techniques

At least 3 credits selected from:
COMP 303  (3) Software Development
COMP 304  (3) Object-Oriented Design

3-9 credits selected from:
* Must include at least one of MATH 323 and MATH 340.

MATH 318  (3) Mathematical Logic
MATH 323*  (3) Probability
MATH 324  (3) Statistics
MATH 340*  (3) Discrete Structures 2

The remaining credits selected from computer science courses at the 300 level or above (except COMP 364, COMP 396, COMP 400, COMP 431) and ECSE 508.

Note: Students have to make sure that they have the appropriate prerequisites when choosing upper-level courses.

12.14.9.11 Bachelor of Science (B.Sc.) - Major Computer Science and Biology (73 credits)
This program will train students in the fundamentals of biology - with a focus on molecular biology - and will give them computational and mathematical skills needed to manage, analyze, and model large biological datasets. Two integrative features of the program are a three-credit joint independent studies course, and a one-credit seminar.

Students may complete this program with a maximum of 73 credits or a minimum of 69 credits. This depends upon the student's choice of required courses and whether or not the student is exempt from taking COMP 202.

Advising notes for U0 students:
It is highly recommended that Freshman BIOL, CHEM, MATH, and PHYS courses be selected with an adviser to ensure they meet the core requirements of the COMP-BIO program.

Required Courses (49 credits)

Required Mathematics and Statistics Courses
6 credits from the following:
MATH 222  (3) Calculus 3
MATH 223  (3) Linear Algebra

Required Computer Science Courses
12-16 credits from:
* Students who have sufficient knowledge in a programming language are not required to take COMP 202.
** Students take either COMP 462 or COMP 561.

COMP 202*  (3) Introduction to Computing 1
COMP 206  (3) Introduction to Software Systems
COMP 250  (3) Introduction to Computer Science
COMP 251  (3) Data Structures and Algorithms
COMP 462**  (3) Computational Biology Methods
COMP 561**  (4) Computational Biology Methods and Research
Required Biology Courses

20 credits from:

- BIOL 200 (3) Molecular Biology
- BIOL 201 (3) Cell Biology and Metabolism
- BIOL 202 (3) Basic Genetics
- BIOL 215 (3) Introduction to Ecology and Evolution
- BIOL 301 (4) Cell and Molecular Laboratory
- CHEM 212 (4) Introductory Organic Chemistry 1

Required Joint Courses

4 credits from:

- COMP 401 (3) Project in Biology and Computer Science
- COMP 499 (1) Undergraduate Bioinformatics Seminar

Complementary Courses (27 credits)

6 credits, ONE of the following pairs of courses as follows:

- MATH 203 and MATH 204 or MATH 323 and MATH 324 or BIOL 309 and BIOL 373.

- BIOL 309 (3) Mathematical Models in Biology
- BIOL 373 (3) Biometry
- MATH 203 (3) Principles of Statistics 1
- MATH 204 (3) Principles of Statistics 2
- MATH 323 (3) Probability
- MATH 324 (3) Statistics

At least 21 credits selected from the following blocks, with the following requirements:
- at least 9 credits from each of the following two blocks
- at least 9 credits at the 400 level or above
- at least 3 credits at the 400 level or above from each block

Computer Science Block

Note: All COMP courses at the 400 level (except 401, 462, and 499) and all courses at the 500 level (except 561).

- COMP 273 (3) Introduction to Computer Systems
- COMP 302 (3) Programming Languages and Paradigms
- COMP 303 (3) Software Development
- COMP 304 (3) Object-Oriented Design
- COMP 310 (3) Operating Systems
- COMP 330 (3) Theoretical Aspects: Computer Science
- COMP 335 (3) Software Engineering Methods
- COMP 350 (3) Numerical Computing
- COMP 360 (3) Algorithm Design Techniques
- MATH 240 (3) Discrete Structures 1

12.14.9.12 Bachelor of Science (B.Sc.) - Major Computer Science - Computer Games (67 credits)

This program is a specialization within Computer Science. It fulfills all the basic requirements of the Major Computer Science. Complementary courses focus on topics that are important to understanding the technology behind computer games and to gaining experience in software development and design needed for computer game development.

Students may complete this program with a minimum of 62 credits or a maximum of 67 credits depending if they are exempt from taking COMP 202 and their choice of complementary courses.

Required Courses (50 credits)

* Students who have sufficient knowledge in a programming language do not need to take COMP 202 and can replace it with additional computer science complementary course credits.

**Complementary Courses (17 credits)**

Students complete a minimum of 15 or a maximum of 17 complementary credits selected as follows:

3 credits selected from:
- COMP 350 (3) Numerical Computing
- COMP 360 (3) Algorithm Design Techniques

6-8 credits selected from:
- COMP 424 (3) Artificial Intelligence
- COMP 507 (3) Computational Geometry
- COMP 521 (4) Modern Computer Games
- COMP 522 (4) Modelling and Simulation
- COMP 529 (4) Software Architecture
- COMP 533 (3) Object-Oriented Software Development
- COMP 559 (4) Fundamentals of Computer Animation

6 credits selected from:
* Students take either COMP 435 or COMP 535, but not both.
- COMP 409 (3) Concurrent Programming
- COMP 421 (3) Database Systems
- COMP 435* (3) Basics of Computer Networks
- COMP 535* (3) Computer Networks 1

---

### Bachelor of Science (B.Sc.) - Major Software Engineering (63 credits)

This program provides a broad introduction to the principles of computer science and covers in depth the design and development of software systems. Students may complete this program with a maximum of 63 credits or a minimum of 60 credits if they are exempt from taking COMP 202.

**Required Courses (39 credits)**

* Students who have sufficient knowledge in a programming language do not need to take COMP 202.
** Students may select either COMP 310 or ECSE 427, but not both.

- COMP 202* (3) Introduction to Computing 1
- COMP 206 (3) Introduction to Software Systems
- COMP 250 (3) Introduction to Computer Science
- COMP 251 (3) Data Structures and Algorithms
- COMP 273 (3) Introduction to Computer Systems
- COMP 302 (3) Programming Languages and Paradigms
- COMP 303 (3) Software Development
- COMP 310** (3) Operating Systems
- COMP 361D1 (3) Software Engineering Project
- COMP 361D2 (3) Software Engineering Project
- ECSE 427** (3) Operating Systems
- ECSE 429 (3) Software Validation
MATH 223 (3)  Linear Algebra
MATH 240 (3)  Discrete Structures 1

Complementary Courses (24 credits)
At least 9 credits selected from groups A and B, with at least 3 credits selected from each:

Group A:
MATH 222 (3)  Calculus 3
MATH 323 (3)  Probability
MATH 324 (3)  Statistics

Group B:
COMP 330 (3)  Theoretical Aspects: Computer Science
COMP 360 (3)  Algorithm Design Techniques

At least 15 credits selected from the following, with at least 6 credits selected from Software Engineering Specializations, and at least 6 credits selected from Applications Specialties.

Software Engineering Specializations
* Students may select either COMP 409 or ECSE 420, but not both.
COMP 409* (3)  Concurrent Programming
COMP 523 (3)  Language-based Security
COMP 525 (3)  Formal Verification
COMP 529 (4)  Software Architecture
COMP 533 (3)  Object-Oriented Software Development
ECSE 420* (3)  Parallel Computing

Application Specialties
* Students may select either COMP 557 or ECSE 532, but not both.
COMP 350 (3)  Numerical Computing
COMP 417 (3)  Introduction Robotics and Intelligent Systems
COMP 421 (3)  Database Systems
COMP 424 (3)  Artificial Intelligence
COMP 512 (4)  Distributed Systems
COMP 520 (4)  Compiler Design
COMP 521 (4)  Modern Computer Games
COMP 522 (4)  Modelling and Simulation
COMP 535 (3)  Computer Networks 1
COMP 557* (3)  Fundamentals of Computer Graphics
COMP 558 (3)  Fundamentals of Computer Vision
ECSE 424 (3)  Human-Computer Interaction
ECSE 532* (3)  Computer Graphics
**12.14.9.14 Bachelor of Science (B.Sc.) - Honours Computer Science (75 credits)**

Students may complete this program with a maximum of 75 credits or a minimum of 72 credits if they are exempt from taking COMP 202. Honours students must maintain a CGPA of at least 3.00 during their studies and at graduation.

**Required Courses (45 credits)**

* Students who have sufficient knowledge in a programming language do not need to take COMP 202.

** Students take either MATH 340 or MATH 350.

The remaining credits selected from computer science courses at the 300 level or above (except COMP 364, COMP 396, COMP 400, COMP 431) and ECSE 508. At least 12 credits must be at the 500 level.

**12.14.9.15 Bachelor of Science (B.Sc.) - Honours Software Engineering (75 credits)**

This program provides a more challenging and research-oriented version of the Major Software Engineering program.

Students may complete this program with a maximum of 75 credits or a minimum of 72 credits if they are exempt from taking COMP 202. Honours students must maintain a CGPA of at least 3.00 during their studies and at graduation.

**Required Courses (42 credits)**
* Students who have sufficient knowledge in a programming language do not need to take COMP 202.

** Students may select either COMP 310 or ECSE 427, but not both.

At least 6 credits selected from any COMP courses at the 500 level or above. These may include courses on the Software Engineering Specializations and Application Specialties lists.

12.14.9.16 Computer Science (COMP) Related Programs

12.14.9.16.1 Joint Major in Mathematics and Computer Science

For more information, see section 12.14.21: Mathematics and Statistics (MATH).

12.14.9.16.2 Joint Honours in Mathematics and Computer Science

For more information, see section 12.14.21: Mathematics and Statistics (MATH). Students must consult an Honours adviser in both departments.

12.14.9.16.3 Joint Major in Statistics and Computer Science

For more information, see section 12.14.21: Mathematics and Statistics (MATH).

12.14.9.16.4 Joint Honours in Statistics and Computer Science

For more information, see section 12.14.21: Mathematics and Statistics (MATH). Students must consult an Honours adviser in both departments.

12.14.9.16.5 Joint Major in Physics and Computer Science

For more information, see section 12.14.29: Physics (PHYS).

12.14.9.16.6 Minor in Cognitive Science

Students following Major or Honours programs in Computer Science may want to consider the Minor in Cognitive Science.

12.14.10.1 Location

Frank Dawson Adams Building, Room 238
3450 University Street
Montreal, Quebec H3A 2A7

Telephone: 514-398-6767
Fax: 514-398-4680
Email: kristy.thornton@mcgill.ca

12.14.10.2 About Earth and Planetary Sciences

The domain of Earth and Planetary Sciences includes the solid Earth and its hydrosphere and extends to the neighbouring terrestrial planets. It is a multidisciplinary field in which the principles of chemistry, physics, and mathematics are applied to the rich problems of the real world in order to understand how planets like the Earth work; in the past, the present, and the future.
Career opportunities are many and varied for graduates in the Earth and Planetary Sciences. There is presently a demand for graduates with expertise in many disciplines of the Earth Sciences. Our students are recruited for employment in the petroleum and mining industries, and in the environmental sector.

During the summer months, undergraduate students are generally able to obtain employment from industry or government agencies, providing them with both financial benefits and first-hand geoscientific experience. Career opportunities in planetary science are present in universities and research organizations.

The Department has a full-time staff of 17 professors and one faculty lecturer. There are approximately 55 graduate and 50 undergraduate students. Classes are therefore small at all levels, resulting in an informal and friendly atmosphere throughout the Department in which most of the faculty and students interact on a first-name basis. Emphasis is placed equally on quality teaching and research providing undergraduate students with a rich and exciting environment in which to explore and learn.

The undergraduate curriculum is designed to provide both a rigorous foundation in the physical sciences and the flexibility to create an individualized program in preparation for careers in industry, teaching, or research. In addition to the Major and Honours undergraduate programs, the Department is part of the Earth System Science Interdepartmental program, and also offers a Joint Major in Physics and Geophysics which provides a rigorous mathematics and physics preparation and a geological background in the geosciences.

The Minor in Geology offers students from other departments the opportunity to obtain exposure to the Earth Sciences, while the Minor in Geochemistry is oriented towards Chemistry Major students who want to see the application of chemistry to problems in Earth and Planetary Sciences.

A Science Major concentration in Earth, Atmosphere and Ocean Sciences is available to students pursuing the B.A. & Sc. degree. This Major concentration is described in the Bachelor of Arts and Science section of this publication; see Bachelor of Arts and Science > Earth, Atmosphere and Ocean Sciences for details.

Students interested in any of the programs should inquire at Room 238, Frank Dawson Adams Building, 514-398-6767, or should consult the Undergraduate Director:

Professor Jeanne Paquette

12.14.10.3 Earth and Planetary Sciences (EPSC) Faculty

Chair
Andrew Hynes

Emeritus Professors
Jafar Arkani-Hamed; B.Eng.(Tehran), Ph.D.(MIT)
Wallace H. MacLean; B.Geol.Eng.(Colorado Sch. of Mines), M.Sc.(Appl.), Ph.D.(McG.)
Robert F. Martin; B.Sc.(Ott.), M.S.(Penn. St.), Ph.D.(Stan.)
Colin W. Stearn; B.Sc.(McM.), M.S., Ph.D.(Yale), F.R.S.C.

Professors
Don R. Baker; A.B.(Chic.), Ph.D.(Penn. St.)
Don M. Francis; B.Sc.(McG.), M.Sc.(Br. Col.), Ph.D.(MIT) (Dawson Professor of Geology)
Andrew J. Hynes; B.Sc.(Tor.), Ph.D.(Cant.) (William E. Logan Professor of Geology)
Olivia G. Jensen; B.Sc., M.Sc., Ph.D.(Br. Col.)
Alfonso Mucci; B.Sc., M.Sc.(Montr.), Ph.D.(Miami)
John Stix; A.B.(Dart.), M.Sc., Ph.D.(Tor.)
A.E. (Willy) Williams-Jones; B.Sc., M.Sc.(Natal), Ph.D.(Qu.)

Associate Professors
Galen Halverson; B.A.(Mont.), M.A.(Harv.), Ph.D.(Harv.) (T.H. Clark Chair in Sedimentary and Petroleum Geology)
Jeanne Paquette; B.Sc., M.Sc.(McG.), Ph.D.(Stonybrook) (Undergraduate Director)
Hojatollah Vali; B.Sc., M.Sc., Ph.D.(Munich) (Director, Electron Microscopy Centre)

Assistant Professors
Eric Galbraith; B.Sc.(McG.), Ph.D.(Br. Col.)
Assistant Professors
Sarah Hall; B.A.(Hamilton), Ph.D.(Calif.-Santa Cruz)
Yajing Liu; B.Sc.(Peking), Ph.D.(Harv.)
Jeffrey McKenzie; B.Sc.(McG.), M.Sc., Ph.D.(Syrac.)
Christie Rowe; A.B.(Smith), Ph.D.(Calif.-Santa Cruz)
Vincent van Hinsberg; Propadeuse(Utrecht), Doctorandus(Utrecht), Ph.D.(Brist.)
Boswell Wing; A.B.(Harv.), M.A., Ph.D.(Johns Hop.) (Canada Research Chair in Earth Systems Science (Geochemistry))

Faculty Lecturer
W. Minarik; B.A.(St. Olaf), M.Sc.(Wash.), Ph.D.(Rensselaer)

Adjunct Professors
M. Duchesne
M. Riedel
H. Short
B. Sundby

Retired Professor
R. Hesse

12.14.10.4 Bachelor of Science (B.Sc.) - Minor Geology (18 credits)
The Minor Geology offers students from other departments the opportunity to obtain exposure to the Earth Sciences.

Required Courses (6 credits)

EPSC 210 (3) Introductory Mineralogy
EPSC 212 (3) Introductory Petrology

Complementary Courses (12 credits)

3 credits, one of:
EPSC 201 (3) Understanding Planet Earth
EPSC 233 (3) Earth and Life History

9 credits selected from the list below and other 300-level and higher courses in Earth and Planetary Sciences may be substituted with permission.
EPSC 203 (3) Structural Geology
EPSC 231 (3) Field School 1
EPSC 334 (3) Invertebrate Paleontology
EPSC 350 (3) Tectonics
EPSC 451 (3) Hydrothermal Mineral Deposits
EPSC 452 (3) Mineral Deposits
EPSC 542 (3) Chemical Oceanography
EPSC 561 (3) Ore-forming Processes 1
12.14.10.5 Bachelor of Science (B.Sc.) - Minor Geochemistry (18 credits)

Required Courses (9 credits)

EPSC 201 (3) Understanding Planet Earth
EPSC 210 (3) Introductory Mineralogy
EPSC 212 (3) Introductory Petrology

Complementary Courses (9 credits)

9 credits selected from:

EPSC 220 (3) Principles of Geochemistry
EPSC 501 (3) Crystal Chemistry
EPSC 519 (3) Isotope Geology
EPSC 542 (3) Chemical Oceanography
EPSC 545 (3) Low-Temperature Geochemistry
EPSC 561 (3) Ore-forming Processes 1
EPSC 570 (3) Cosmochemistry
EPSC 590 (3) Applied Geochemistry Seminar

12.14.10.6 Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Earth and Planetary Sciences (45 credits)

The B.Sc. (Liberal) program in Earth and Planetary Sciences provides the graduate with a solid core of knowledge of Geology, Geophysics, Earth Systems Science, and Planetary Science while allowing for a broadening of the student's educational experience with courses from the other sciences or the arts. The program is flexible, allowing students to assemble a truly interdisciplinary degree.

Required Courses (21 credits)

EPSC 203 (3) Structural Geology
EPSC 210 (3) Introductory Mineralogy
EPSC 212 (3) Introductory Petrology
EPSC 220 (3) Principles of Geochemistry
EPSC 231 (3) Field School 1
EPSC 233 (3) Earth and Life History
EPSC 320 (3) Elementary Earth Physics

Complementary Courses (24 credits)

3 credits, one of:

EPSC 331 (3) Field School 2
EPSC 341 (3) Field School 3

plus 21 credits chosen from the following:

Note: Courses at the 300 or higher level in other departments in the Faculties of Science and Engineering may also be used as complementary credits, with the permission of the Director of undergraduate studies.

EPSC 312 (3) Spectroscopy of Minerals
EPSC 330 (3) Earthquakes and Earth Structure
EPSC 334 (3) Invertebrate Paleontology

**12 14 10 10 Earth and Planetary Sciences (EPSC) Related Programs**

**12 14 10 10 1 Earth System Science Interdepartmental Major**

This program is offered by the Department of Atmospheric & Oceanic Sciences, Earth & Planetary Sciences, and Geography. Students in the Department of Earth & Planetary Sciences who are interested in this program should contact: Professor Jeffrey McKenzie (jeffrey.mckenzie@mcgill.ca).
For more information, see section 12.14.11: Earth System Science Interdepartmental Major (ESYS).

12.14.11 Earth System Science Interdepartmental Major (ESYS)

12.14.11.1 Location

Program Adviser
Professor Jeffrey McKenzie
Frank Dawson Adams, Room 131C
Email: jeffrey.mckenzie@mcgill.ca
Telephone: 514-398-3833

12.14.11.2 About Earth System Science Interdepartmental Major

The McGill program in Earth System Science (ESYS) is designed to equip students with the skills and knowledge to address six “Grand Challenges” that are fundamental to our understanding of the way in which the Earth operates. These are:

- Global biogeochemical cycles
- Climate variability and change
- Land use and land cover change
- Energy and resources
- Earth hazards: volcanoes, earthquakes, and hurricanes
- Earth-atmosphere observation, analysis, and prediction

The ESS Major is offered jointly by the Department of Atmospheric and Oceanic Sciences (ATOC), the Department of Earth and Planetary Sciences (EPSC), and the Department of Geography (GEOG).

The individual departments, their disciplines, and specific courses offered by them are described in their respective entries in this publication.

12.14.11.3 Bachelor of Science (B.Sc.) - Major Earth System Science (57 credits)

The Major in Earth System Science (ESYS) is offered jointly by the following departments:

- Atmospheric and Oceanic Sciences (ATOC)
- Earth and Planetary Sciences (EPSC)
- Geography (GEOG)

Earth System Science (ESYS) views Earth as a single integrated system that provides a unifying context to examine the interrelationships between all components of the Earth system. The approach concentrates on the nature of linkages among the biological, chemical, human, and physical subsystems of the Earth. Earth System Science primarily involves studying the cycling of matter and energy through the atmosphere, biosphere, cryosphere, exosphere, and hydrosphere. It examines the dynamics and interrelationships among these processes at time scales that range from billions of years to days, and seeks to understand how these interrelationships have changed over time.

Required Courses (36 credits)

- ATOC 214 (3) Introduction: Physics of the Atmosphere
- BIOL 215 (3) Introduction to Ecology and Evolution
- ENVR 200 (3) The Global Environment
- ENVR 201 (3) Society, Environment and Sustainability
- ESYS 200 (3) Earth System Processes
- ESYS 300 (3) Investigating the Earth System
- ESYS 301 (3) Earth System Modelling
- ESYS 500 (3) Earth System Applications
- GEOG 203 (3) Environmental Systems
- GEOG 308 (3) Principles of Remote Sensing
- MATH 203 (3) Principles of Statistics 1
- MATH 222 (3) Calculus 3
Complementary Courses (21 credits)

3 credits, one of the following courses:

- **EPSC 210** (3) Introductory Mineralogy
- **EPSC 220** (3) Principles of Geochemistry

18 credits from the following course list, with at least 3 credits from each of subject codes ATOC, EPSC, and GEOG. At least 9 of the 18 credits must be at the 400 level or higher.

Note: Courses at the 300 level or higher in other departments in the Faculties of Science and Engineering may also be used as complementary credits, with the permission of an academic adviser. Please see the list posted on the Departmental web page.

- **ATOC 215** (3) Oceans, Weather and Climate
- **ATOC 309** (3) Weather Radars and Satellites
- **ATOC 315** (3) Thermodynamics and Convection
- **ATOC 412** (3) Atmospheric Dynamics
- **ATOC 419** (3) Advances in Chemistry of Atmosphere
- **ATOC 512** (3) Atmospheric and Oceanic Dynamics
- **ATOC 513** (3) Waves and Stability
- **ATOC 530** (3) Paleoclimatic Dynamics
- **ATOC 531** (3) Dynamics of Current Climates
- **ATOC 540** (3) Synoptic Meteorology 1
- **ATOC 541** (3) Synoptic Meteorology 2
- **BIOL 308** (3) Ecological Dynamics
- **BIOL 309** (3) Mathematical Models in Biology
- **BIOL 432** (3) Limnology
- **BIOL 434** (3) Theoretical Ecology
- **BIOL 441** (3) Biological Oceanography
- **BIOL 465** (3) Conservation Biology
- **BIOL 540** (3) Ecology of Species Invasions
- **BREE 319** (3) Engineering Mathematics
- **ECON 347** (3) Economics of Climate Change
- **ECON 405** (3) Natural Resource Economics
- **EPSC 212** (3) Introductory Petrology
- **EPSC 312** (3) Spectroscopy of Minerals
- **EPSC 320** (3) Elementary Earth Physics
- **EPSC 330** (3) Earthquakes and Earth Structure
- **EPSC 331** (3) Field School 2
- **EPSC 334** (3) Invertebrate Paleontology
- **EPSC 341** (3) Field School 3
- **EPSC 350** (3) Tectonics
- **EPSC 423** (3) Igneous Petrology
- **EPSC 425** (3) Sediments to Sequences
- **EPSC 445** (3) Metamorphic Petrology
- **EPSC 451** (3) Hydrothermal Mineral Deposits

12.14.14 Field Study

For details about the Minor program in Field Study, see Field Studies and Study Abroad > Field Study Minor.
12.14.15 General Science Minor

12.14.15.1 Location

Interdisciplinary Programs Adviser
Ryan Bouma, Interim Adviser
Email: ryan.bouma@mcgill.ca
Telephone: 514-398-7330

12.14.15.2 About General Science

The Minor in General Science is only open to students in a B.Sc. Liberal program. Students interested in completing this Minor must consult with the Adviser for this program. See the program description in section 12.14.15.3: Bachelor of Science (B.Sc.) - Minor General Science (18 credits) for more information.

12.14.15.3 Bachelor of Science (B.Sc.) - Minor General Science (18 credits)

The Minor General Science is restricted to students in the B.Sc. Liberal program and may be used for the breadth component in this option. Students should consult their program adviser for their core science component and the Interdisciplinary Programs Adviser when selecting courses for this Minor.

Complementary Courses (18 credits)
Courses are to be chosen according to the following guidelines:

All courses must be offered by the Faculty of Science and must be at or above the 200 level*.

All courses must be different from the student's core science component courses.

Two options:
9 credits at the 300 level or above and at least 9 credits outside the student's core science component subject.

or
12 credits at the 300 level or above and at least 6 credits outside the student's core science component subject.

* Note: All Undergraduate research project courses with the 396 or 397 course number cannot be used toward the Minor General Science.

12.14.16 Geography (GEOG)

12.14.16.1 Location

Burnside Hall, Room 705
805 Sherbrooke Street West
Montreal, Quebec H3A 2K6

Telephone: 514-398-4951 or 514-398-4111
Fax: 514-398-7437
Website: www.geog.mcgill.ca

12.14.16.2 About Geography

The Department of Geography offers programs in both Arts and Science. All B.A. programs in Geography (including Urban Systems) can be found under Faculty of Arts > Geography (GEOG).

Geography is a broad, holistic discipline: both a natural and a social science because it examines people and their environment and serves as a bridge between physical and cultural processes. Human Geography (a social science, thus B.A. programs) is concerned especially with the political, economic, social, and cultural processes and resource practices that create spatial patterns and define particular places. Physical Geography (B.Sc. programs) integrates disciplines such as climatology, geomorphology, geology, biology, hydrology, ecology, soil science, and even marine science. Whether considering greenhouse gas emissions, the spread of disease, or threats to biodiversity, in all cases geographers are interested in where things happen, why, and with what consequences.

Our graduates go on to careers in environmental consulting, social agencies, or non-governmental organizations. Skills in Geographic Information Science (GIS) are very marketable. Students are well prepared for graduate work in social sciences, urban planning, and environmental studies at leading schools.

12.14.16.3 Prerequisites

There are no departmental prerequisites for entrance to the B.Sc. Geography programs. Students who have completed college or pre-university geography courses fully equivalent to those in the first year of university may, with an adviser's approval, substitute other courses as part of their program.
A Science Major Concentration in Geography - Physical Geography option is available to students pursuing the B.A. & Sc. degree. This Major concentration is described in the Bachelor of Arts and Science section of this publication; see Bachelor of Arts and Science > Geography (GEOG) for details.

12.14.16.4 Geography (GEOG) Faculty

Chair
Michel M.F. Lapointe (until August 2011), T.R. Moore (as of September 2011)

Emeritus Professor
B.J. Garnier; M.A.(Camb.)

Professors
P.G. Brown; B.A.(Haver.), M.A., Ph.D.(Col.) (joint appt. with McGill School of Environment and Natural Resource Sciences)
T.R. Moore; B.Sc.(Swansea), Ph.D.(Aberd.)
N.T. Roulet; B.Sc., M.Sc.(Trent), Ph.D.(McM.) (James McGill Professor)
G.W. Wenzel; M.A.(Manit.), Ph.D.(McG.)

Associate Professors
G.L. Chmura; B.S.(Mass.), M.S.(Rhode Is.), Ph.D.(L.S.U.)
O.T. Coomes; B.Sc.(Vic., BC), M.A.(Tor.), Ph.D.(Wisc.)
B. Forest; A.B.(Chic.), M.A., Ph.D.(Calif.-LA)
M.F. Lapointe; B.Sc., M.Sc.(McG.), Ph.D.(Br. Col.)
T.C. Meredith; B.E.S.(Wat.), M.Sc., Dip.Cons.(Lond.), Ph.D.(Camb.)
W.H. Pollard; B.A., M.Sc.(Guelph), Ph.D.(Ott.)
N.A. Ross; B.A., M.A.(Qu.), Ph.D.(McM.)
R. Sengupta; B.Sc.(Bombay), M.Sc.(IT, Mumbai), M.S., Ph.D.(S. Ill.-Carbondale) (joint appt. with McGill School of Environment)
I.B. Strachan; B.Sc.(Tor.), M.Sc., Ph.D.(Qu.) (cross appt. with Natural Resource Sciences)
S. Turner; B.Soc.Sci., M.Soc.Sc.(Waikato), Ph.D.(Hull)
J. Unruh; B.A.(Kansas), M.S.(Wisc.), Ph.D.(Ariz.) (on leave Winter 2011 and Fall 2011)

Assistant Professors
L. Berrang Ford; B.Sc.(Guelph), M.Sc.(Oxf.), Ph.D.(Guelph)
S. Breau; B.A.(Moncton), M.A.(Laval), Ph.D.(Calif.-LA)
J. Ford; B.A., M.Sc.(Oxf.), Ph.D.(Guelph)
M. Kalácska; B.Sc., M.Sc., Ph.D.(Alta.)
B. Lehner; Dip. Hydrol.(Freiburg), Ph.D.(Frankfurt)
N. Oswin; B.A. Hons.(Tor.), M.A.(Dal.), Ph.D.(Br. Col.)
N. Ramankutty; B.E.(P.S.G. Coll. of Tech.), M.S.(Ill.), Ph.D.(Wisc.)
J. Rhemtulla; B.Sc.(McG.), M.Sc.(Alta.), Ph.D.(Wisc. Madison)

12.14.16.5 Bachelor of Science (B.Sc.) - Minor Geography (18 credits)

The Minor Geography is expandable into the B.Sc. Major Geography.

The Minor Geography is designed to provide students in the Faculty of Science with an overview of basic elements of geography at the introductory and advanced level.

This Minor permits no overlap with any other programs.
Required Courses (12 credits)

- GEOG 203 (3) Environmental Systems
- GEOG 216 (3) Geography of the World Economy
- GEOG 217 (3) Cities in the Modern World
- GEOG 302 (3) Environmental Management 1

Complementary Courses (6 credits)

6 credits of Geography courses at the 300 and 400 level.

12.14.16.6 Bachelor of Science (B.Sc.) - Minor Geographic Information Systems (18 credits)

The Minor Geographic Information Systems (GIS) is designed to provide students in the Faculty of Science who have an interest in GIS with a basic, but comprehensive, knowledge of concepts and methods relating to the analysis of geospatial data.

Required Courses (15 credits)

- GEOG 201 (3) Introductory Geo-Information Science
- GEOG 306 (3) Raster Geo-Information Science
- GEOG 307 (3) Socioeconomic Applications of GIS
- GEOG 308 (3) Principles of Remote Sensing
- GEOG 506 (3) Advanced Geographic Information Science

Complementary Course (3 credits)

One course to be chosen from:

* Note prerequisites.

- ATOC 309 (3) Weather Radars and Satellites
- COMP 557* (3) Fundamentals of Computer Graphics
- GEOG 535 (3) Remote Sensing and Interpretation
- GEOG 551 (3) Environmental Decisions
- URBP 505 (3) Geographic Information Systems

12.14.16.7 Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Geography (49 credits)

Required Courses (22 credits)

- GEOG 201 (3) Introductory Geo-Information Science
- GEOG 203 (3) Environmental Systems
- GEOG 216 (3) Geography of the World Economy
- GEOG 217 (3) Cities in the Modern World
- GEOG 272 (3) Earth’s Changing Surface
- GEOG 290 (1) Local Geographical Excursion
- GEOG 302 (3) Environmental Management 1
- GEOG 351 (3) Quantitative Methods

Complementary Courses (27 credits)

One course (3 credits) from the following statistics* courses.
* Note: Credit given for statistics courses is subject to certain restrictions. Students in Science should consult the “Course Overlap” information in the “Course Requirements” section for the Faculty of Science.

Bachelor of Science (B.Sc.) - Major Geography (58 credits)

The Major is designed to provide a coverage of the main elements of physical geography.

**Required Courses (22 credits)**

- GEOG 201 (3) Introductory Geo-Information Science
- GEOG 203 (3) Environmental Systems
- GEOG 216 (3) Geography of the World Economy
- GEOG 217 (3) Cities in the Modern World
- GEOG 272 (3) Earth's Changing Surface
- GEOG 290 (1) Local Geographical Excursion
- GEOG 302 (3) Environmental Management 1
- GEOG 351 (3) Quantitative Methods

**Complementary Courses (36 credits)**

3 credits of statistics:

Note: Credit given for statistics courses is subject to certain restrictions. Students in Science should consult the "Course Overlap" information in the "Course Requirements" section for the Faculty of Science.

- BIOL 373 (3) Biometry
- GEOG 202 (3) Statistics and Spatial Analysis
- MATH 203 (3) Principles of Statistics 1
- PSYC 204 (3) Introduction to Psychological Statistics
- SOCI 350 (3) Statistics in Social Research

3 credits of GIS techniques:

- GEOG 306 (3) Raster Geo-Information Science
- GEOG 308 (3) Principles of Remote Sensing

12 credits of systematic physical geography:

- GEOG 305 (3) Soils and Environment
- GEOG 321 (3) Climatic Environments
- GEOG 322 (3) Environmental Hydrology
- GEOG 372 (3) Running Water Environments
- GEOG 470 (3) Wetlands

3 credits of field courses:

(Field course availability is determined each year in February.)

- GEOG 495 (3) Field Studies - Physical Geography
- GEOG 496 (3) Geographical Excursion
- GEOG 497 (3) Ecology of Coastal Waters
- GEOG 499 (3) Subarctic Field Studies
15 credits from approved courses in Geography, or elsewhere in the Faculty of Science, or in the Faculty of Engineering; at least 9 credits of which are to be taken outside Geography. Students may also include any courses that are not already counted towards the GIS techniques or the systematic physical geography requirements. Admission to 500-level courses in Geography requires the instructor's permission. It is not advisable to take more than one 500-level course in a term.

Advising Note: See the Geography website for the list of approved courses in the Faculty of Science. Some courses require the permission of the Department and from the Associate Dean of Science, Student Affairs.

12.14.16.9 Bachelor of Science (B.Sc.) - Honours Geography (66 credits)

The Honours program is designed to provide specialized systematic training in physical geography. In addition to the Faculty requirement that Honours students maintain a minimum CGPA of at least 3.00, students who enter a Geography Honours program on or after September 2006 must have a program GPA of 3.30.

Honours students are encouraged to participate in 500-level seminars with graduate students, but it is not advisable to take more than one per term.

Required Courses (24 credits)

12.14.16.10 Geography (GEOG) Related Programs and Study Semesters

12.14.16.10.1 African Field Study Semester

The Department of Geography, Faculty of Science, coordinates the 15-credit interdisciplinary African Field Study Semester; see www.mcgill.ca/africa.

12.14.16.10.2 Panama Field Study Semester

The program is a joint venture between McGill University and the Smithsonian Tropical Research Institute (STRI) in Panama. For more information, see www.mcgill.ca/pfss.

12.14.16.10.3 Earth System Science Interdepartmental Major

For more information, see section 12.14.11: Earth System Science Interdepartmental Major (ESTS).

This program is offered by the Department of Atmospheric & Oceanic Sciences, Earth & Planetary Sciences, and Geography. Students in the Department of Geography interested in this program should contact: Professor Jeffrey McKenzie (jeffrey.mckenzie@mcgill.ca).

12.14.16.10.4 Bachelor of Arts and Science (B.A. & Sc.) Interfaculty Program in Sustainability, Science and Society

The Interfaculty Program in Sustainability, Science and Society is open only to students in the B.A. & Sc. degree.

Adviser: Prof. Navin Ramankutty
Email: navin.ramankutty@mcgill.ca
Telephone: 514-398-8428

For further information about this program, see Bachelor of Arts and Science > Bachelor of Arts and Science (B.A. & Sc.) - Interfaculty Program in Sustainability, Science and Society (54 credits).

12.14.17 Immunology Interdepartmental Honours

12.14.17.1 Location

Montreal General Hospital
Room L1.132-44
1650 Cedar Avenue
Montreal, Quebec H3G 1A4

or

McIntyre Medical Sciences Building, Room 1136
3655 Promenade Sir-William-Osler
Montreal, Quebec H3G 1Y6

12.14.17.2 About Immunology Interdepartmental Honours

Three departments offer the Honours program in Immunology: Biochemistry, Microbiology and Immunology, and Physiology, combining elements of each. The program is a demanding one, which will prepare the student for graduate work in immunology.

This program is comprised of a core of 48 credits in basic science courses in cell and molecular biology, microbiology, biochemistry, and physiology. An additional 27 complementary credits may be selected from a broad selection of science courses. The remaining 13 credits are free electives, enabling the student to explore related science disciplines. Finally, an undergraduate research project, seminar, and thesis provides an opportunity to directly experience research work in a laboratory with a professor of immunology.

Students who do not maintain Honours standing must transfer their registration to a program in one of the three participating departments.

Apply to Dr. C. Piccirillo, Microbiology and Immunology, Room L1.132-44, Montreal General Hospital, 1650 Cedar Avenue, Montreal, QC, H3G 1A4; ciro.piccirillo@mcgill.ca; 514-398-2872 or Dr. Monroe Cohen, Physiology, Room 1136, McIntyre Medical Sciences Building, 3655 Promenade Sir-William-Osler, Montreal, QC, H3G 1Y6; monroe.cohen@mcgill.ca; 514-398-4342.

12.14.17.3 Bachelor of Science (B.Sc.) - Honours Immunology (Interdepartmental) (75 credits)

Students must obtain a U1 GPA or a U2 CGPA of 3.30 for admission to this enrolment-limited program. U1 students should inform one of the program coordinators of their intent to enter the Honours Immunology (Interdepartmental) program during their U1 Winter term and confirm their intention in writing by April 1. U2 or U3 students can apply for admission at any time.

For graduation in the Honours program, the student must complete a minimum of 90 credits, and achieve a CGPA of not less than 3.30. The immunology courses (BIOC 503, MIMM 314, MIMM 414, MIMM 509, PHGY 419D1/D2, PHGY 513, PHGY 531) must all be passed with a grade not less than B.

Required Courses (48 credits)
U1 Required Courses

20 credits selected as follows:
* Students select either BIOC 212 or BIOL 201.
** Students select either CHEM 203 or CHEM 204.
*** Students select either PHGY 209 or MIMM 211.

- BIOC 212* (3) Molecular Mechanisms of Cell Function
- BIOL 200 (3) Molecular Biology
- BIOL 201* (3) Cell Biology and Metabolism
- CHEM 203** (3) Survey of Physical Chemistry
- CHEM 204** (3) Physical Chemistry/Biological Sciences 1
- CHEM 212 (4) Introductory Organic Chemistry 1
- CHEM 222 (4) Introductory Organic Chemistry 2
- MIMM 211*** (3) Introductory Microbiology
- PHGY 209*** (3) Mammalian Physiology 1

U2 Required Courses

13 credits from the following:

- ANAT 261 (4) Introduction to Dynamic Histology
- BIOC 311 (3) Metabolic Biochemistry
- BIOC 312 (3) Biochemistry of Macromolecules
- MIMM 314 (3) Immunology

U3 Required Courses

15 credits from the following:

- MIMM 414 (3) Advanced Immunology
- PHGY 419D1 (4.5) Immunology Research Project
- PHGY 419D2 (4.5) Immunology Research Project
- PHGY 513 (3) Cellular Immunology

Complementary Courses (27 credits)

U1 Complementary Courses

6 credits chosen for U1 complementary courses in the following manner.
3 credits selected from:

- BIOL 373 (3) Biometry
- MATH 203 (3) Principles of Statistics 1
- PSYC 204 (3) Introduction to Psychological Statistics

plus 3 credits selected from the following:
* Students take CHEM 287 and CHEM 297.

- ANAT 214 (3) Systemic Human Anatomy
- ANAT 262 (3) Introductory Molecular and Cell Biology

**12.14.18 Interdisciplinary Life Sciences Minor**

**12.14.18.1 Location**

Interdisciplinary Programs Adviser
Ryan Bouma, Interim Adviser
Email: ryan.bouma@mcgill.ca
Telephone: 514-398-7330

**12.14.18.2 About Interdisciplinary Life Sciences Minor**

The Interdisciplinary Life Sciences Minor allows students to obtain exposure to Life Sciences and life science-related areas. Students must consult with the Adviser to review course selection.
Please note: Students studying in Anatomy and Cell Biology, Biochemistry, Microbiology and Immunology, and Physiology, are not permitted to complete this Minor.

12.14.18.3 Bachelor of Science (B.Sc.) - Minor Interdisciplinary Life Sciences (24 credits)

The Interdisciplinary Life Sciences Minor will allow students from the earth, physical, math, and computational science areas to broaden their studies with some basic life sciences, health social science, and empirical technological science. The Minor is 24 credits and allows students flexibility in their course selections. Students must take 9 credits from an extensive list of basic life science courses, 3 credits from an extensive list of health and social science courses, and 3 credits from an empirical and technological science list. The remaining 9 credits may be taken from courses listed in any of the three categories.

This Minor is not open to students taking a major, honours, or core science component in the following units: Anatomy and Cell Biology, Biochemistry, Microbiology and Immunology, and Physiology.

Interested students should contact the Interdisciplinary Programs Adviser.

Complementary Courses (24 credits)

The 24 credits required for this program must satisfy the following criteria:

At least 18 credits must be new credits that are not used to satisfy any other program.
At least 18 credits must be outside the student's main discipline.

Depth requirement:
at least 6 credits must be at the 300 level or above.

Breadth requirement:
at least 9 credits must be taken from the Basic Life Sciences List,
at least 3 credits from the Health Social Sciences List,
at least 3 credits from the Empirical Science and Technology List.
The remaining 9 credits may be selected from any of the lists.

Basic Life Sciences

At least 9 credits from:

* Students take either ANAT 212 or BIOC 212, but not both.

**Empirical Science and Technology**

At least 3 credits from:

* Students who have already received credit for MATH 324 will NOT receive credit for GEOG 202, MATH 203, PSYC 204, BIOL 373, MATH 204, or PSYC 305.

Credit given for statistics courses is subject to certain restrictions. Students should consult the "Course Overlap" information in the "Course Requirements" section for the Faculty of Science.

12.14.19 Kinesiology for Science Students

12.14.19.1 Location

Department of Kinesiology and Physical Education
Currie Gymnasium
475 Pine Avenue West
Montreal, Quebec H2W 1S4

Telephone: 514-398-4184
Fax: 514-398-4186
Website: www.mcgill.ca/edu-kpe
Email: kin.physed@mcgill.ca

12.14.19.2 About Kinesiology for Science Students

Students planning a career in the health sciences, whether as a health professional or a biomedical researcher, will find courses in Kinesiology to be of interest from both theoretical and applied perspectives. There is a focus on the benefits of physical activity for health and well-being, as well as appropriate prescription of exercise in the treatment of various diseases, injuries, and disabilities. Courses deal with both prevention and rehabilitation.

12.14.19.3 Bachelor of Science (B.Sc.) - Minor Kinesiology (24 credits)

The Minor Kinesiology is designed to provide students in B.Sc. programs with basic but comprehensive knowledge of scientific bases of human physical activity and its relationship with health and well-being.

Students registered in the Minor Kinesiology may not take additional courses outside the Faculties of Arts and of Science.

Required Courses (15 credits)

EDKP 206 (3) Biomechanics of Human Movement
EDKP 261 (3) Motor Development
EDKP 395 (3) Exercise Physiology
PHGY 209 (3) Mammalian Physiology 1
PHGY 210 (3) Mammalian Physiology 2

Complementary Courses (9 credits)

9 credits, three of the following courses:
EDKP 330 (3) Physical Activity and Health
EDKP 394 (3) Historical Perspectives
EDKP 396 (3) Adapted Physical Activity
EDKP 405 (3) Sport in Society
EDKP 444 (3) Ergonomics
EDKP 445 (3) Exercise Metabolism
EDKP 446 (3) Physical Activity and Ageing
EDKP 447 (3) Motor Control
EDKP 448 (3) Exercise and Health Psychology
12.14.20 Management Minor Programs

The Desautels Faculty of Management offers four programs for non-Management students open for application to students in the Faculty of Science. Please refer to the Desautels Faculty of Management section of this publication for detailed information about program requirements and applying.

- Finance for Non-Management Students; see Desautels Faculty of Management > Minor Finance (For Non-Management Students) (18 credits).
- Management for Non-Management Students; see Desautels Faculty of Management > Minor Management (For Non-Management Students) (18 credits).
  
  As of the 2008-09 academic year, the Minor in Management for Science students was retired. Students currently registered in the program should consult with their program adviser and refer to the Calendar for the academic year in which they began the program for guidance about program requirements.
- Marketing for Non-Management Students; see Desautels Faculty of Management > Minor Marketing (For Non-Management Students) (18 credits).
- Operations Management for Non-Management Students; see Desautels Faculty of Management > Minor Operations Management (For Non-Management Students) (18 credits).

Also available to Science students is the Minor in Technological Entrepreneurship for Science students; see section 12.14.35: Technological Entrepreneurship for Science Students. (Please note that this Minor is currently under revision.)

12.14.21 Mathematics and Statistics (MATH)

12.14.21.1 Location

Burnside Hall, Room 1005
805 Sherbrooke Street West
Montreal, Quebec H3A 2K6

Telephone: 514-398-3800
Fax: 514-398-3899
Website: www.math.mcgill.ca

Mathematics has evolved to a discipline that is mainly characterized by its method of proof, its concern for a progressive broadening of its concepts, and by the search for mathematical entities and operations that represent aspects of reality. It is a subject that is pursued by many for its own sake, and regarded as part of the mainstream of human culture. Mathematics pervades modern society with an impact which, already immense, is rapidly growing.

The two principal divisions of mathematics are pure mathematics and applied mathematics. The pure mathematician is interested in abstract mathematical structures and in mathematics as an intellectual enterprise. The primary concern may not be with its utilitarian aspects or with the current needs of science and technology, although many problems in pure mathematics have developed from the sciences.

The applied mathematician is more interested in how mathematics can be used to study some aspects of the world. Mathematicians are engaged in the creation, study and application of advanced mathematical methods relevant to scientific problems. Statistical science and methodology today is concerned with phenomena in which there is a background of uncertainty arising from inherent variability and the investigator is obliged to arrive at decisions from limited data. A key tool in statistics is probability.

Some of the fields in which pure mathematicians work are algebra, analysis, geometry, topology, number theory, and foundations. Applied mathematics, which once referred to the application of mathematics to such disciplines as mechanics and fluid dynamics, has currently assumed a much broader meaning and embraces such diverse fields as communication theory, theory of optimization, theory of games, and numerical analysis.

Mathematics offers many vocational possibilities. Such fields as teaching, computing, applied statistics, and actuarial science offer opportunities for B.Sc. graduates. Opportunities to do original research in pure and applied mathematics are available in universities and research institutions. Employment is to be found in financially or technologically oriented business firms. The Department of Mathematics and Statistics through its various programs attempts to provide courses to suit the diverse interests within mathematics and statistics.

The Honours program demands of the student a talent for abstraction in addition to a high level of competence in the use of mathematical tools. This program is intended for students who plan to work in an area where mathematical innovations may be needed. It is almost essential for students contemplating a career in mathematical research.
The Major program involves the same subjects as the Honours program but is less demanding in terms of abstraction. It is designed primarily for students who will need mathematical tools in their work but whose creative activity will involve applications of mathematics to other areas. Within the framework of the Mathematics Major, various combinations of courses are suggested to meet the needs of different students. These include course suggestions for secondary school teachers, careers in management, and for careers in industry, government, or actuarial sciences.

It is possible for Major students to include a number of Honours courses in their programs. This will be an advantage for those students who plan to use their mathematics in graduate studies.

Students interested in a Mathematics program linked to other disciplines are advised to consider the B.Sc. Liberal program with a core component in Mathematics or Statistics, or our joint programs with Computer Science, Physiology, and Physics.

In planning their programs, students are advised to seriously consider developing some depth in another discipline – preferably one for which mathematics has some relevance and use. Mathematics has been closely linked to areas such as computer science, physics, and engineering but has recently come to play an increasingly important role in fields such as biology, linguistics, management, and psychology. Students should consider completing the requirements for minor programs such as those available in Cognitive Science, Computer Science, and Statistics.

Students considering programs in Mathematics and Statistics should contact the Department to arrange for academic advising.

The student's attention is called to the fact that a B.Com. degree with a Major in Mathematics is available from the Desautels Faculty of Management. In addition, the Schulich School of Music offers the B.Mus. degree with Honours in Theory with Mathematics Option.

### 12.14.21.3 Internship Opportunities

Students who want to get practical experience in industry before graduation are encouraged to participate in one of the following internship programs:

- The Internship Year in Science (IYS) is an academic program offered for a duration of 8, 12, or 16 months. It is reflected on the transcript and included in the program name (Bachelor of Science - Internship program). Eligible students usually take this program between their U2 and U3 years.
- The Industrial Practicum (IP) has a duration of 4 months and is usually carried out starting in May. It will appear as a 0-credit, Pass/Fail course on your transcript.

For more information on these programs, consult section 12.13.1: Industrial Practicum (IP) and Internship Year in Science (IYS).

**Note:** Students entering a program listed below that has MATH 222 (Calculus 3) as a required course and who have successfully completed a course equivalent to MATH 222 with a grade of C or better may omit MATH 222 (Calculus 3) from the program, but must replace it with 3 credits of elective courses.

### 12.14.21.4 Mathematics and Statistics (MATH) Faculty

**Chair**

Jacques Hurtubise

**Emeritus Professors**

Michael Barr; A.B., Ph.D.(Penn.) (*Peter Redpath Emeritus Professor of Pure Mathematics*)

William G. Brown; M.A.(Col.), B.A., Ph.D.(Tor.)

Marta Bunge; M.A., Ph.D.(Penn.)

Jal R. Choksi; B.A.(Cant.), Ph.D.(Manc.)

Ian Connell; B.Sc., M.Sc.(Manit.), Ph.D.(McG.)

Kohur GowriSankaran; B.A., M.A.(Madr.), Ph.D.(Bom.)

Paul Koosis; B.A., Ph.D.(Calif., Berk.)

Joachim Lambek; M.Sc., Ph.D.(McG.), F.R.S.C. (*Peter Redpath Emeritus Professor of Pure Mathematics*)

Michael Makkai; M.A., Ph.D.(Bud.) (*Peter Redpath Emeritus Professor of Pure Mathematics*)

Sherwin A. Maslowe; B.Sc.(Wayne State), M.Sc., Ph.D.(Calif.)

Arak M. Mathai; M.Sc.(Kerala), M.A., Ph.D.(Tor.)

Karl Peter Russel; Vor.Dip.(Hamburg), Ph.D.(Calif.)

Georg Schmidt; B.Sc.(Natal), M.Sc.(S. Af.), Ph.D.(Stan.)

V. Seshadri; B.Sc., M.Sc.(Madr.), Ph.D.(Okla.)

George P.H. Styan; M.A., Ph.D.(Col.)

Kwok Kuen Tam; M.A., Ph.D.(Tor.)

John C. Taylor; B.Sc.(Acad.), M.A.(Qu.), Ph.D.(McM.)

Armel Djivede Kelome; M.Sc.(Benin), M.Sc.(McG.), Ph.D.(Georgia Tech.)

**12.14.21.5 Bachelor of Science (B.Sc.) - Minor Mathematics (24 credits)**

The Minor may be taken in conjunction with any primary program in the Faculty of Science (other than programs in Mathematics). Students should declare their intention to follow the Minor Mathematics at the beginning of the penultimate year and should obtain approval for the selection of courses to fulfil the requirements for the Minor from the Departmental Chief Adviser (or delegate).
It is strongly recommended that students in the Minor program take MATH 323. The remaining credits may be freely chosen from the required and complementary courses for majors and honours students in Mathematics, with the obvious exception of courses that involve duplication of material. Alternatively, up to 6 credits may be allowed for appropriate courses from other departments.

Generally, no more than 6 credits of overlap are permitted between the Minor and the primary program. However, with an approved choice of substantial courses, the overlap restriction may be relaxed to 9 credits for students whose primary program requires 60 credits or more, and to 12 credits when the primary program requires 72 credits or more.

**Required Courses (9 credits)**

* MATH 223 may be replaced by MATH 235 and MATH 236. In this case, the complementary credit requirement is reduced by 3 credits.

- MATH 222 (3) Calculus 3
- MATH 223* (3) Linear Algebra
- MATH 315 (3) Ordinary Differential Equations

**Complementary Courses (15 credits)**

15 credits selected from the required and complementary courses for majors and honours students in Mathematics, with MATH 323 strongly recommended; alternatively, up to 6 credits may be allowed for appropriate courses from other departments.

**12.14.21.6 Bachelor of Science (B.Sc.) - Minor Statistics (24 credits)**

The Minor may be taken in conjunction with any primary program in the Faculty of Science. Students should declare their intention to follow the Minor Statistics at the beginning of the penultimate year and must obtain approval for the selection of courses to fulfil the requirements for the Minor from the Departmental Chief Adviser (or delegate).

All courses counted towards the Minor must be passed with a grade of C or better. Generally, no more than 6 credits of overlap are permitted between the Minor and the primary program. However, with an approved choice of substantial courses, the overlap restriction may be relaxed to 9 credits for students whose primary program requires 60 credits or more, and to 12 credits when the primary program requires 72 credits or more.

**Required Courses (15 credits)**

* MATH 223 may be replaced by MATH 235 and MATH 236. In this case the complementary credit requirement is reduced by 3 credits.

- MATH 222 (3) Calculus 3
- MATH 223* (3) Linear Algebra
- MATH 323 (3) Probability
- MATH 324 (3) Statistics
- MATH 423 (3) Regression and Analysis of Variance

**Complementary Courses (9 credits)**

9 credits selected from:

- CHEM 593 (3) Statistical Mechanics
- GEOG 351 (3) Quantitative Methods
- MATH 447 (3) Introduction to Stochastic Processes
- MATH 523 (4) Generalized Linear Models
- MATH 525 (4) Sampling Theory and Applications
- MATH 556 (4) Mathematical Statistics 1
- MATH 557 (4) Mathematical Statistics 2
- PHYS 362 (3) Statistical Mechanics
- PHYS 559 (3) Advanced Statistical Mechanics
- SOCI 504 (3) Quantitative Methods 1
- SOCI 505 (3) Quantitative Methods 2

No more than 6 credits may be taken outside the Department of Mathematics and Statistics.
Further credits (if needed) may be freely chosen from the required and complementary courses for majors and honours students in Mathematics, with the obvious exception of courses that involve duplication of material.

12.14.21.7 Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Mathematics (45 credits)

Program Prerequisites

Students entering the Core Science Component in Mathematics are normally expected to have completed the courses below or their equivalents. Otherwise, they will be required to make up any deficiencies in these courses over and above the 45 credits required for the program.

<table>

Guidelines for Selection of Courses

The following informal guidelines should be discussed with the student's adviser. Where appropriate, Honours courses may be substituted for equivalent Major courses. Students planning to pursue graduate studies are encouraged to make such substitutions.

Students interested in computer science are advised to choose courses from the following: MATH 317, MATH 318, MATH 327, MATH 328, MATH 335, MATH 340, MATH 407, MATH 417 and to complete the Computer Science Minor.

Students interested in probability and statistics are advised to take MATH 204, MATH 222, MATH 324, MATH 326, MATH 327, MATH 407, MATH 417.

Students considering a career in secondary school teaching are advised to take MATH 318, MATH 328, MATH 338, MATH 339, MATH 346, MATH 348.

Students interested in careers in business, industry or government are advised to select courses from the following list:

MATH 317, MATH 319, MATH 327, MATH 329, MATH 407, MATH 417, MATH 423, MATH 430, MATH 447, MATH 523, MATH 525.

Required Courses (27 credits)

* Students may select either MATH 249 or MATH 316 but not both.

** Students who have successfully completed a course equivalent to MATH 222 with a grade of C or better may omit MATH 222, but must replace it with 3 credits of elective courses.

- MATH 417 (3) Mathematical Programming
- MATH 430 (3) Mathematical Finance

12.14.21.9 Bachelor of Science (B.Sc.) - Major Mathematics (54 credits)

Program Prerequisites

Students entering the Major program are normally expected to have completed the courses below or their equivalents. Otherwise, they will be required to make up any deficiencies in these courses over and above the 54 credits of required courses.

- MATH 133 (3) Linear Algebra and Geometry
- MATH 140 (3) Calculus 1
Calculus 2 (4) MATH 141

Guidelines for Selection of Courses in the Major Program

The following informal guidelines should be discussed with the student's adviser. Where appropriate, Honours courses may be substituted for equivalent Major courses. Students planning to pursue graduate studies are encouraged to make such substitutions.

Students interested in computer science are advised to choose courses from the following: MATH 317, MATH 318, MATH 327, MATH 328, MATH 335, MATH 340, MATH 407, MATH 417 and to complete the Computer Science Minor.

Students interested in probability and statistics are advised to take MATH 204, MATH 324, MATH 407, MATH 423, MATH 447, MATH 523, MATH 525.

Students interested in applied mathematics should take MATH 317, MATH 319, MATH 324, MATH 326, MATH 327, MATH 407, MATH 417.

Students considering a career in secondary school teaching are advised to take MATH 318, MATH 328, MATH 338, MATH 339, MATH 346, MATH 348.

Students interested in careers in business, industry or government are advised to select courses from the following list:

MATH 317, MATH 319, MATH 327, MATH 329, MATH 407, MATH 417, MATH 423, MATH 430, MATH 447, MATH 523, MATH 525.

Required Courses (27 credits)

Note: Students who have done well in MATH 235 and MATH 242 should consider entering the Honours stream by registering in MATH 251 and MATH 255 instead of MATH 236 and MATH 243.

* Students may select either MATH 249 or MATH 316 but not both.

** Students who have successfully completed a course equivalent to MATH 222 with a grade of C or better may omit MATH 222, but must replace it with 3 credits of elective courses.

MATH 222** (3) Calculus 3
MATH 235 (3) Algebra 1
MATH 236 (3) Algebra 2
MATH 242 (3) Analysis 1
MATH 243 (3) Analysis 2
MATH 249* (3) Honours Complex Variables
MATH 314 (3) Advanced Calculus
MATH 315 (3) Ordinary Differential Equations
MATH 316* (3) Complex Variables
MATH 323 (3) Probability

Complementary Courses (27 credits)

27 credits selected as follows:

21 credits selected from the following list, with at least 6 credits selected from:

MATH 317 (3) Numerical Analysis
MATH 324 (3) Statistics
MATH 335 (3) Computational Algebra
MATH 340 (3) Discrete Structures 2

the remainder of the 21 credits to be selected from:

MATH 204 (3) Principles of Statistics 2
MATH 318 (3) Mathematical Logic
MATH 319 (3) Introduction to Partial Differential Equations
MATH 320 (3) Differential Geometry
MATH 326 (3) Nonlinear Dynamics and Chaos
MATH 327 (3) Matrix Numerical Analysis
MATH 328 (3) Computability and Mathematical Linguistics
MATH 329 (3) Theory of Interest
MATH 338 (3) History and Philosophy of Mathematics
MATH 339 (3) Foundations of Mathematics
MATH 346 (3) Number Theory
MATH 348 (3) Topics in Geometry
MATH 352 (1) Problem Seminar
MATH 407 (3) Dynamic Programming
MATH 410 (3) Majors Project
MATH 417 (3) Mathematical Programming
MATH 423 (3) Regression and Analysis of Variance
MATH 430 (3) Mathematical Finance
MATH 447 (3) Introduction to Stochastic Processes
MATH 523 (4) Generalized Linear Models
MATH 525 (4) Sampling Theory and Applications

6 additional credits in Mathematics or related disciplines selected in consultation with the Adviser.

121421.10 Bachelor of Science (B.Sc.) - Major Mathematics and Computer Science (72 credits)

Program Prerequisites
Students entering the Joint Major in Mathematics and Computer Science are normally expected to have completed the courses below or their equivalents. Otherwise, they will be required to make up any deficiencies in these courses over and above the 72 credits of courses in the program specification.

MATH 133 (3) Linear Algebra and Geometry
MATH 140 (3) Calculus 1
MATH 141 (4) Calculus 2

Required Courses (54 credits)
* Students who have sufficient knowledge in a programming language do not need to take COMP 202 but can replace it with an additional Computer Science complementary course.

COMP 202* (3) Introduction to Computing 1
COMP 206 (3) Introduction to Software Systems
COMP 250 (3) Introduction to Computer Science
COMP 251 (3) Data Structures and Algorithms
COMP 273 (3) Introduction to Computer Systems
COMP 302 (3) Programming Languages and Paradigms
COMP 310 (3) Operating Systems
COMP 330 (3) Theoretical Aspects: Computer Science
COMP 360 (3) Algorithm Design Techniques
MATH 222 (3) Calculus 3
MATH 235 (3) Algebra 1
MATH 236 (3) Algebra 2
MATH 242 (3) Analysis 1
Ordinary Differential Equations

Numerical Analysis

Mathematical Logic

Probability

Discrete Structures 2

**Complementary Courses (18 credits)**

9 credits from the set of courses recommended for a major or honours program in Mathematics.

9 credits selected from Computer Science courses at the 300 level or above (except COMP 364, COMP 396, COMP 400, COMP 431) and ECSE 508.

**12.14.21 Bachelor of Science (B.Sc.) - Major Statistics and Computer Science (72 credits)**

This program provides students with a solid training in both computer science and statistics together with the necessary mathematical background. As statistical endeavours involve ever increasing amounts of data, some students may want training in both disciplines.

**Program Prerequisites**

Students entering the Joint Major in Statistics and Computer Science are normally expected to have completed the courses below or their equivalents. Otherwise they will be required to make up any deficiencies in these courses over and above the 72 credits of required courses.

MATH 133 (3) Linear Algebra and Geometry

MATH 140 (3) Calculus 1

MATH 141 (4) Calculus 2

**Required Courses (51 credits)**

* Students who have sufficient knowledge in a programming language do not need to take COMP 202 but can replace it with an additional Computer Science complementary course.

** Students take either COMP 350 or MATH 317, but not both.

*** Students take either MATH 223 or MATH 236, but not both.

COMP 202* (3) Introduction to Computing 1

COMP 206 (3) Introduction to Software Systems

COMP 250 (3) Introduction to Computer Science

COMP 251 (3) Data Structures and Algorithms

COMP 273 (3) Introduction to Computer Systems

COMP 302 (3) Programming Languages and Paradigms

COMP 330 (3) Theoretical Aspects: Computer Science

COMP 350** (3) Numerical Computing

COMP 360 (3) Algorithm Design Techniques

MATH 222 (3) Calculus 3

MATH 223*** (3) Linear Algebra

MATH 235 (3) Algebra 1

MATH 236*** (3) Algebra 2

MATH 242 (3) Analysis 1

MATH 314 (3) Advanced Calculus

MATH 317** (3) Numerical Analysis

MATH 323 (3) Probability

MATH 324 (3) Statistics

MATH 423 (3) Regression and Analysis of Variance
Complementary Courses (21 credits)

12 credits in Mathematics selected from:
* Students take either MATH 340 or MATH 350, but not both.
** MATH 578 and COMP 540 cannot both be taken for program credit.

- MATH 327 (3) Matrix Numerical Analysis
- MATH 340* (3) Discrete Structures 2
- MATH 350* (3) Graph Theory and Combinatorics
- MATH 352 (1) Problem Seminar
- MATH 410 (3) Majors Project
- MATH 447 (3) Introduction to Stochastic Processes
- MATH 523 (4) Generalized Linear Models
- MATH 524 (4) Nonparametric Statistics
- MATH 525 (4) Sampling Theory and Applications
- MATH 578** (4) Numerical Analysis 1

9 credits in Computer Science selected as follows:
At least 6 credits selected from:

- COMP 423 (3) Data Compression
- COMP 424 (3) Artificial Intelligence
- COMP 462 (3) Computational Biology Methods
- COMP 490 (3) Introduction to Probabilistic Analysis of Algorithms
- COMP 526 (3) Probabilistic Reasoning and AI
- COMP 540** (3) Matrix Computations
- COMP 547 (4) Cryptography and Data Security
- COMP 564 (3) Computational Gene Regulation
- COMP 566 (3) Discrete Optimization 1
- COMP 567 (3) Discrete Optimization 2

The remaining Computer Science credits are selected from COMP courses at the 300 level or above (except COMP 396, COMP 400, and COMP 431) and ECSE 508.

12.14.21.12 Bachelor of Science (B.Sc.) - Honours Mathematics (60 credits)

Program Prerequisites

The minimum requirement for entry into the Honours program is that the student has completed with high standing the following courses below or their equivalents. In addition, a student who has not completed the equivalent of MATH 222 must take it in the first term without receiving credits toward the credits required in the Honours program.

Students who transfer to Honours in Mathematics from other programs will have credits for previous courses assigned, as appropriate, by the Department.

To remain in an Honours program and to be awarded the Honours degree, the student must maintain a 3.00 GPA in the required and complementary Mathematics courses of the program, as well as an overall CGPA of 3.00.

- MATH 133 (3) Linear Algebra and Geometry
- MATH 140 (3) Calculus 1
- MATH 141 (4) Calculus 2
## Required Courses (48 credits)

*MATH 314 may be substituted for MATH 248 if MATH 222 had to be taken in the Fall.*

Dynamic Programming (3) MATH 407
Mathematical Methods in Biology (3) MATH 437

Students may select other courses with the permission of the Department.

Bachelor of Science (B.Sc.) - Honours Applied Mathematics (60 credits)

Applied Mathematics is a very broad field and students are encouraged to choose a coherent program of complementary courses. Most students specialize in "continuous" or "discrete" applied mathematics, but there are many sensible combinations of courses, and the following informal guidelines should be discussed with the student's adviser. Also, aside from seeking to develop a sound basis in Applied Mathematics, one of the objectives of the program is to kindle the students' interest in possible areas of application. To develop an appreciation of the diversity of Applied Mathematics, students are advised to develop some depth (e.g., by completing a minor) in a field related to Applied Mathematics such as Atmospheric and Oceanic Sciences, Biology, Biochemistry, Chemistry, Computer Science, Earth and Planetary Sciences, Economics, Engineering, Management, Physics, Physiology, and Psychology.

Required Courses (42 credits)

* COMP 250 may be preceded by COMP 202.

COMP 250* (3) Introduction to Computer Science
COMP 252 (3) Algorithms and Data Structures
MATH 235 (3) Algebra 1
MATH 242 (3) Analysis 1
MATH 248 (3) Honours Advanced Calculus
MATH 251 (3) Honours Algebra 2
MATH 255 (3) Honours Analysis 2
MATH 325 (3) Honours Ordinary Differential Equations
MATH 350 (3) Graph Theory and Combinatorics
MATH 356 (3) Honours Probability
MATH 357 (3) Honours Statistics
MATH 375 (3) Honours Partial Differential Equations
MATH 376 (3) Honours Nonlinear Dynamics
MATH 470 (3) Honours Research Project

Complementary Courses (18 credits)

Advising Notes:

Students interested in continuous applied mathematics are urged to choose these as part of their Complementary Courses: MATH 354 and MATH 355, and are advised to choose additional courses from MATH 387, MATH 397, MATH 555, MATH 556, MATH 560, MATH 574, MATH 578, MATH 579, MATH 580, MATH 581.

Students interested in discrete applied mathematics are advised to choose from these as part of their Complementary Courses: COMP 362, COMP 490, MATH 370, MATH 371, MATH 407, MATH 547, MATH 487, MATH 550, MATH 552, MATH 560.

3 credits selected from:

MATH 249 (3) Honours Complex Variables
MATH 366 (3) Honours Complex Analysis

at least 3 credits selected from:

MATH 387 (3) Honours Numerical Analysis
MATH 397 (3) Honours Matrix Numerical Analysis

The remaining credits should be selected from honours courses given by the Department of Mathematics and Statistics.

12 credits in Computer Science, selected from Computer Science courses at the 300 level or above excluding COMP 364, COMP 396 and COMP 431. ECSE 508 may also be taken.

**121421.16 Bachelor of Science (B.Sc.) - Honours Statistics and Computer Science (79 credits)**

This is a challenging program providing students with a solid training in both computer science and statistics suitable for entry into graduate school in either discipline.

Students may complete this program with a minimum of 76 credits or a maximum of 79 credits depending on whether or not they are exempt from taking COMP 202.

**Program Prerequisites**

Students entering the Joint Honours in Statistics and Computer Science are normally expected to have completed the courses below or their equivalents. Otherwise, they will be required to make up any deficiencies in these courses over and above the 76-79 credits of courses in the program.
MATH 133 (3) Linear Algebra and Geometry
MATH 140 (3) Calculus 1
MATH 141 (4) Calculus 2

**Required Courses (49 credits)**

* Students who have sufficient knowledge in a programming language are not required to take COMP 202.
** Students take either MATH 251 or MATH 247, but not both.

COMP 202* (3) Introduction to Computing 1
COMP 206 (3) Introduction to Software Systems
COMP 250 (3) Introduction to Computer Science
COMP 252 (3) Algorithms and Data Structures
COMP 273 (3) Introduction to Computer Systems
COMP 302 (3) Programming Languages and Paradigms
COMP 330 (3) Theoretical Aspects: Computer Science
COMP 362 (3) Honours Algorithm Design
MATH 235 (3) Algebra 1
MATH 242 (3) Analysis 1
MATH 247** (3) Honours Applied Linear Algebra
MATH 248 (3) Honours Advanced Calculus
MATH 251** (3) Honours Algebra 2
MATH 255 (3) Honours Analysis 2
MATH 256 (3) Honours Probability
MATH 257 (3) Honours Statistics
MATH 533 (4) Honours Regression and Analysis of Variance

**Complementary Courses (30 credits)**

15 credits in Mathematics selected as follows:
3 credits selected from:
MATH 387 (3) Honours Numerical Analysis
MATH 397 (3) Honours Matrix Numerical Analysis

At least 8 credits selected from:
MATH 523 (4) Generalized Linear Models
MATH 524 (4) Nonparametric Statistics
MATH 525 (4) Sampling Theory and Applications
MATH 556 (4) Mathematical Statistics 1
MATH 557 (4) Mathematical Statistics 2

The remaining Mathematics credits selected from:
** MATH 578 and COMP 540 cannot both be taken for program credit.

MATH 350 (3) Graph Theory and Combinatorics
MATH 352 (1) Problem Seminar
MATH 354 (3) Honours Analysis 3
MATH 355 (3) Honours Analysis 4
MATH 578** (4) Numerical Analysis 1

15 credits in Computer Science selected as follows:

At least 6 credits selected from:

COMP 423 (3) Data Compression
COMP 424 (3) Artificial Intelligence
COMP 462 (3) Computational Biology Methods
COMP 490 (3) Introduction to Probabilistic Analysis of Algorithms
COMP 526 (3) Probabilistic Reasoning and AI
COMP 540** (3) Matrix Computations
COMP 547 (4) Cryptography and Data Security
COMP 552 (4) Combinatorial Optimization
COMP 564 (3) Computational Gene Regulation
COMP 566 (3) Discrete Optimization 1
COMP 567 (3) Discrete Optimization 2

The remaining Computer Science credits are selected from COMP courses at the 300 level or above excluding COMP 396 and COMP 431.

12.14.17 Mathematics and Statistics (MATH) Related Programs
12.14.17.1 Joint Major in Biology and Mathematics
For more information, see section 12.14.5: Biology (BIOL) > section 12.14.10: Bachelor of Science (B.Sc.) - Major Biology and Mathematics (76 credits).

12.14.17.2 Joint Major in Physiology and Mathematics
For more information, see section 12.14.30: Physiology (PHGY) > section 12.14.30.6: Bachelor of Science (B.Sc.) - Major Physiology and Mathematics (77 credits).

12.14.17.3 Joint Honours Program in Mathematics and Physics
For more information, see section 12.14.29: Physics (PHYS) > section 12.14.29.13: Bachelor of Science (B.Sc.) - Honours Mathematics and Physics (81 credits).

12.14.22 Microbiology and Immunology (MIMM)

12.14.22.1 Location
Lyman Duff Medical Sciences Building, Room 511
3775 University Street
Montreal, Quebec H3A 2B4

Telephone: 514-398-3915
Fax: 514-398-7052
Email: office.microimm@mcgill.ca
Website: www.mcgill.ca/microimm

12.14.22.2 About Microbiology and Immunology
Microbiology is the study of microorganisms such as bacteria, viruses, unicellular eukaryotes, and parasites. Microorganisms play an important role in human and animal disease, food production (bread, cheese, wine), decay and spoilage, contamination and purification of water and soil. Microbiologists study these tiny, self-replicating machines to understand the basic principles of life: growth, metabolism, cell division, control of gene expression, response to environmental...
stimuli. Microbiologists are also concerned with controlling or harnessing microorganisms for the benefit of people, by isolating antibiotics or producing vaccines to protect against disease, and by developing and perfecting microorganisms for industrial uses.

Immunology is the study of the molecular and cellular basis of host resistance and immunity to external agents such as pathogenic microorganisms. Immunologists study the mechanisms by which the body recognizes foreign antigens, generates appropriate antibodies to an enormously diverse spectrum of antigens, and sequesters and kills invading microorganisms. Their discoveries lead to vaccination against disease, transfusions and organ transplants, allergies, cancer, autoimmune diseases and immune-deficiency diseases such as AIDS. Antibodies may soon be used in conjunction with antibiotics or chemical agents as specific "magic bullets" to diagnose disease and attack microbes and cancers.

The disciplines of microbiology and immunology are natural partners in research, and both fields use the modern methods of cell biology, molecular biology, and genetics to study basic life processes. The members of the Department of Microbiology and Immunology perform research on microbial physiology and genetics, microbial pathogenesis, molecular virology, cellular and molecular immunology, and parasitology. Students registered in the Department therefore are exposed to these related areas and receive an excellent background in basic biology and chemistry as well as in the more applied areas of biotechnology and medicine.

Many opportunities exist for careers in basic or applied microbiology and immunology, medical microbiology, environmental microbiology, and biotechnology. They include positions in industry (pharmaceutical and biotechnology), hospitals, universities, and government (environment, public health, and energy). A degree in microbiology also provides an excellent basis for entering professional and postgraduate programs in medicine, dentistry, the veterinary sciences, research, and education.

**Notes on admission to Microbiology and Immunology programs:**

Please note that enrolment in Microbiology and Immunology programs is limited to a total of 120 students per year. Students seeking admission to the Liberal, Majors and Honours programs must have completed BIOL 112, CHEM 110, CHEM 120, MATH 139 or MATH 140, MATH 141, PHYS 101 and PHYS 102 or their equivalent with an overall average of at least B+ (75%).

Students transferring from other programs may be admitted with a B+ average up to the maximum program capacity of 120 students. Applicants not admitted will be placed on a waiting list and will be considered should vacancies occur. Application deadline for U0 or transfer students from other departments and faculties is the third Monday in April. Students who want to transfer to Microbiology and Immunology should consider taking MIMM 211, or equivalent, as a complementary course.

An undergraduate handbook, containing detailed course descriptions, a listing of faculty research interests, and information on careers in microbiology and immunology, is available from the Student Affairs Office in Room 511 of the Lyman Duff Building and at www.mcgill.ca/microimm.

All students (U1, U2, U3) must attend an advising session. Please check www.mcgill.ca/microimm for dates.

### 12.14.22.3 Microbiology and Immunology (MIMM) Faculty

**Chair**

Malcolm Baines (*until June 2011*) (*new Chair TBA*)

**Professors**

Zafer Ali-Khan; B.Sc.(Bilar), M.Sc.(Karachi), Ph.D.(Tulane)
James W. Coulton; B.Sc.(Tor.), M.Sc.(Calg.), Ph.D.(W. Ont.)
John Hiscott; B.Sc., M.Sc.(W. Ont.), Ph.D.(NYU)
Greg Matlashewski; B.Sc.(C'dia), Ph.D.(Ott.)
Robert A. Murgita; B.Sc.(Maine), M.S.(Vermont), Ph.D.(McG.)
Mark A. Wainberg; B.Sc.(McG.), M.Sc., Ph.D.(Col.)

**Associate Professors**

Albert Berghuis; M.Sc.(The Netherlands), Ph.D.(Br. Col.)
Dalius J. Briedis; B.A., M.D.(Johns H.)
Benoît Cousineau; B.Sc., M.Sc., Ph.D.(Montr.)
Sylvie Fournier; Ph.D.(Max Planck)
Matthias. Gotte; Ph.D.(Montr.)
Hervé Le Moual; Ph.D.(Montr.)
Gregory T. Marcynski; B.Sc., Ph.D.(Ill.)
Martin Olivier; B.Sc.(Montr.), Ph.D.(McG.)
Ciriaco Piccirillo; B.Sc., Ph.D.(McG.)
Donald Sheppard; M.D.(Tor.)
Assistant Professors
Jorg Friz; Ph.D.(Vienna)
Samantha Gruenheid; B.Sc.(Br. Col.), Ph.D.(McG.)

Associate Members
Institute of Parasitology: Florence Dziersinski, Armando Jardim, Paula Ribeiro
Microbiology & Immunology: Lawrence Kleiman
Medicine: Marcel Behr, Ines Colmegna, Andre Dascal, Sabah Hussain, Arnold Kristof, Chen Liang, Vivian Loo, Amee Manges, Mark A. Miller, Jay Nadeau, Marianna Newkirk, Kostas Pantopoulou, Joyce E. Rauch, Michael Reed, Maya Saleh, Christos Tsoukas, Bernard Turcotte, Brian J. Ward, Ji Zhang
Neuroimmunology: Amit Bar-Or
Neurology & Neurosurgery: Jack Antel
Oncology: Anne Gatignol, Antonis E. Koromilas, Andrew Mouland, Stephane Richard
Ophthalmology: Miguel Burnier
Surgery: Nicolas V. Christou

Adjunct Professors
Jacques Archambault; B.Sc.(Montr), Ph.D.(Tor.)
Vibhuti Dave; M.Sc., Ph.D.(Bombay)
Albert Descoteaux; B.Sc., M.Sc.(Montr), Ph.D.(McG.)
Peter Lau; Ph.D.(Ott.)
Byong Lee; B.Sc.(Kangwon), M.Sc., Ph.D.(Laval)
Shan-Lu Liu; Ph.D.(Wash.)
Andrew Makrigiannis; B.Sc., Ph.D.(Dal.)
Yael Mamane; B.Sc., Ph.D.(McG.)
Woong-Kyung Suh; B.Sc., M.Sc.(Seoul), Ph.D.(Tor.)
Dan Ziberstein; B.Sc., M.Sc., Ph.D.(Hebrew)

Affiliated Centre
Centre for Host Resistance
Montreal General Hospital
1650 Cedar Avenue
Montreal, Quebec H3G 1A4
Telephone: 514-398-8038
Director: E. Skamene

12.14.22.4 Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Microbiology and Immunology (48 credits)

U1 Required Courses (15 credits)
* Students who have taken CHEM 212 in CEGEP are exempt and must replace these credits with an elective course(s).

12.14.22.5 Bachelor of Science (B.Sc.) - Major Microbiology and Immunology (67 credits)

The Major program is designed for students who want to acquire a substantial background in microbiology and immunology and related disciplines (chemistry, biology, biochemistry) which will prepare them for professional schools, graduate education, or entry into jobs in industry or research institutes.

U1 Required Courses (25 credits)

* Students who have taken CHEM 212 in CEGEP are exempt and must replace these credits with an elective course(s).

** Students who have taken CHEM 222 in CEGEP are exempt and must replace these credits with an elective course(s).

- PHGY 209 (3) Mammalian Physiology 1
- PHGY 210 (3) Mammalian Physiology 2
12.14.22.6 Bachelor of Science (B.Sc.) - Honours Microbiology and Immunology (73 credits)
Revision, August 2011. Start of revision.

The Honours program is designed to offer, in addition to the substantial background given by the Major program, a significant research experience in a laboratory within the Department during the U3 year. Students are prepared for this independent research project by following an advanced laboratory course in U2. This program is intended to prepare students for graduate study in microbiology and immunology or related fields, but could also be chosen by students intending to enter medical research after medical school, or intending to enter the job market in a laboratory research environment.

Students intending to apply to Honours must follow the Major program in U1 and U2 and must obtain a CGPA of at least 3.50 at the end of their U2 year. For graduation in Honours, students must pass all required courses with a C or better, and achieve a sessional GPA of at least 3.30 in the U3 year.

U1 Required Courses (25 credits)

* Students who have taken CHEM 212 in CEGEP are exempt and must replace these credits with an elective course(s).

** Students who have taken CHEM 222 in CEGEP are exempt and must replace these credits with an elective course(s).

Revision, August 2011. End of revision.

12.14.22.7 Microbiology and Immunology (MIMM) Related Programs

12.14.22.7.1 Interdepartmental Honours in Immunology

For more information, see section 12.14.17: Immunology Interdepartmental Honours.

This program is offered by the departments of Biochemistry, Microbiology and Immunology, and Physiology.

Students interested in immunology may choose between this Honours program and the Honours program of the Department of Microbiology and Immunology.

Details of this program may also be obtained from Professor Piccirillo in the Department of Microbiology and Immunology, Room L11.132, Montreal General Hospital; Telephone: 514-934-1934 ext. 45135; ciro.piccirillo@mcgill.ca.

12.14.23 Music

12.14.23.1 Location

Strathcona Music Building
555 Sherbrooke Street West
Montreal, Quebec H3A 1E3

Telephone: 514-398-4535
Fax: 514-398-8061
Website: www.mcgill.ca/music

12.14.23.2 About Music

For more information, see Schulich School of Music.
12.14.23.3 Music Faculty

Department of Music Research Chair
Lloyd Whitesell

Department of Performance Chair
Jean Lesage

Adviser (B.A./B.Sc. Music programs)

B. Minorgan
Telephone: 514-398-4535 ext. 6333

12.14.23.4 Music Related Programs

12.14.23.4.1 Minor in Musical Applications of Technology and Minor in Musical Science and Technology

Science students may apply for admission to either the Minor in Musical Applications of Technology, see Schulich School of Music > Minor in Musical Applications of Technology, or the Minor in Musical Science and Technology, see Schulich School of Music > Minor in Musical Science and Technology. Enrolment in Music Technology programs is highly restricted. Application forms will be available from the Department of Music Research in the Schulich School of Music from February 1 and must be completed and returned to that office by May 15 of each academic year. Late applications will not be accepted and no students will be admitted in January. Successful applicants will be notified by June 1. Registration will be limited to available lab space.

12.14.23.4.1.1 Science Minor in Music Technology (24 credits)

This program was retired as of the 2008-09 academic year. Students currently registered in the program should consult with their program adviser and refer to the Calendar for the academic year in which they began the program for guidance about program requirements. Science students are eligible to take the Arts Minor Concentration in Music; see Faculty of Arts > Music (MUAR). Music courses listed as MUAR (see Faculty of Arts courses) are considered to be Arts courses. All other Music courses are considered by the Faculty of Science to be courses outside of Arts and Science (see section 12.7.5.2: Courses Outside the Faculties of Arts and Science for the relevant regulations).

12.14.24 Neurology and Neurosurgery (NEUR)

12.14.24.1 Location
Montreal Neurological Institute and Hospital
3801 University Street, Room 141
Montreal, Quebec H3A 2B4

12.14.24.2 About Neurology and Neurosurgery

There are no B.Sc. programs in Neurology and Neurosurgery, but the course NEUR 310 Cellular Neurobiology, which is part of the Minor in Neuroscience, is a course taught by the Faculty of Science.

12.14.25 Neuroscience

12.14.25.1 Location

Director of Neuroscience
Professor Monroe Cohen
Department of Physiology
McIntyre Medical Sciences Building, Room 1150
3655 Promenade Sir-William-Osler
Montreal, Quebec H3G 1Y6

Interdisciplinary Programs Adviser

Ryan Bouma, Interim Adviser
Email: ryan.bouma@mcgill.ca
12.14.25.2 About Neuroscience

Neuroscience is a multidisciplinary science devoted to the understanding of the nervous system. The brain is one of the most complex systems in the universe, and understanding how it functions is among the most challenging questions in science. Scientists are investigating the brain at many levels, from the molecules at synapses to complex forms of behaviour, and use methods of inquiry that are drawn from a number of disciplines, including molecular and cellular biology, physiology, behavioural sciences and cognitive psychology, computer science and artificial intelligence. In addition, scientists are investigating the nervous system of many different animals, from simple invertebrates to humans. These wide-ranging investigations are providing a clearer understanding of how neurons work; how they communicate with one another; how they are organized into local or distributed networks; how the connections between neurons are established and change with experience; how neuronal function is influenced by pharmacological agents, and during disease states. As a result, we are gaining deeper insights into the neural basis of mental activity, as well as developing new therapeutic approaches to alleviate neurological and psychological diseases.

Please note: New students are required to attend an information session held at the end of August. Please consult the neuroscience website in early August for the date and location.

12.14.25.3 Bachelor of Science (B.Sc.) - Minor Neuroscience (24 credits)

Revision, August 2011. Start of revision.

The Minor is composed of 24 credits, 18 of which must be selected from two of the five topic areas listed below. Twelve credits of the 18 must be at the 400 or 500 level and from two different departments. A maximum of 6 credits can be counted both for the student's primary program and for the Minor Neuroscience, where appropriate. A maximum of 6 credits can be counted from the student's home department.

All course selections for the Minor Neuroscience must be approved by an adviser. Contact Ryan Bouma at ryan.bouma@mcgill.ca.

Complementary Courses (24 credits)

6 credits selected from:

* Students may select one of NSCI 201 or BIOL 306 or PHGY 311.

The Major program in Neuroscience is a focused program for students interested in how the nervous system functions. It is highly interdisciplinary and borrows principles and methodologies from a number of fields including: biology, biochemistry, physiology, psychology, as well as mathematics, physics, computer science, and immunology. To ensure that students have the appropriate foundation, they are required to take 29 credits in lower-level courses from physiology, biology, mathematics, computer science, psychology, and ethics. While flexible, the program offers students a concentrated selection of 15 credits to be taken from one of three areas of current scientific activities in the neurosciences: Cell/Molecular, Neurophysiology/Computation, or Cognition/Behaviour. In addition, students select 21 credits from a wide array of upper-level complementary courses to obtain more specialized training in areas of neuroscience that best suit their interest.

All course selections for the Major Neuroscience MUST be approved by an adviser. Contact Ryan Bouma at ryan.bouma@mcgill.ca.

Students must take a minimum of 64 credits to complete this Major.

Program Prerequisites
Notes on admission to the Neuroscience Major program: Please note that enrolment in the Neuroscience Major is limited to a total of 50 students per year. U0 students seeking admission to this program must have a minimum CGPA of 3.2 and have completed the courses listed below or equivalent.

* Students complete either MATH 139 OR MATH 140, but not both.

<table>

Complementary Courses (45 credits)

9 core credits selected as follows:
3 credits from:
- BIOL 373 (3) Biometry
- PSYC 305 (3) Statistics for Experimental Design

3 credits completed by taking the course below or an equivalent in Computer Science.
- COMP 202 (3) Introduction to Computing 1

3 credits from:
- BIOL 309 (3) Mathematical Models in Biology
- MATH 222** (3) Calculus 3

** Note: Students who have successfully completed an equivalent to MATH 222 at CEGEP or elsewhere, may substitute another 3-credit course for MATH 222.

Streams
15 credits selected from one of the following streams:

A. Cell and Molecular Stream
15 credits selected as follows:
* Students take either BIOL 201 OR BIOC 212, but not both.
- BIOC 212* (3) Molecular Mechanisms of Cell Function
- BIOC 311 (3) Metabolic Biochemistry
- BIOL 201* (3) Cell Biology and Metabolism
- BIOL 202 (3) Basic Genetics
- MIMM 314 (3) Immunology
- PHGY 311 (3) Channels, Synapses & Hormones

B. Neurophysiology/Neural Computation Stream
15 credits selected as follows:
9 credits from:
* Students take either BIOL 201 OR BIOC 212, but not both.
- ANAT 321 (3) Circuitry of the Human Brain
- BIOC 212* (3) Molecular Mechanisms of Cell Function
- BIOL 201* (3) Cell Biology and Metabolism
- PHGY 311 (3) Channels, Synapses & Hormones

3 credits from:
- BIOL 306 (3) Neural Basis of Behaviour
- PHGY 314 (3) Integrative Neuroscience
3 credits from:

- BIOL 309 (3) Mathematical Models in Biology
- COMP 206 (3) Introduction to Software Systems
- MATH 222** (3) Calculus 3

** Note: Students who have successfully completed an equivalent to MATH 222 at CEGEP or elsewhere, may substitute another 3-credit course for MATH 222.

C. Cognitive/Behavioural Stream

15 credits selected as follows:

12 credits as follows:

* Students take either BIOL 306 OR PHGY 314, but not both.

- ANAT 321 (3) Circuitry of the Human Brain
- BIOL 306* (3) Neural Basis of Behaviour
- PHGY 314* (3) Integrative Neuroscience
- PSYC 213 (3) Cognition
- PSYC 318 (3) Behavioural Neuroscience 2

and 3 credits from:

- LING 390 (3) Neuroscience of Language
- PSYC 317 (3) Genes and Behaviour
- PSYC 342 (3) Hormones and Behaviour

Other Complementary Courses

(21-23 credits)

3-16 credits from:

- BIOL 301 (4) Cell and Molecular Laboratory
- BIOL 389 (3) Laboratory in Neurobiology
- NSCI 410 (6) Independent Research 1
- NSCI 420D1 (4.5) Independent Research 2
- NSCI 420D2 (4.5) Independent Research 2

The remainder of the credits should be taken from the following lists. At least 15 of the 21-23 credits must be at the 400 or 500 level, which could include the above NSCI 410 or NSCI 420D1/D2 research courses:

200- and 300-level courses:

* Students take either BIOL 201 OR BIOC 212, but not both.

** COMP 206 or equivalent 300- or 400-level Computer Science course.

- BIOC 212* (3) Molecular Mechanisms of Cell Function
- BIOC 311 (3) Metabolic Biochemistry
BIOL 201* (3) Cell Biology and Metabolism
BIOL 300 (3) Molecular Biology of the Gene
BIOL 306 (3) Neural Basis of Behaviour
CHEM 222 (4) Introductory Organic Chemistry 2
COMP 206** (3) Introduction to Software Systems
LING 390 (3) Neuroscience of Language
MATH 315 (3) Ordinary Differential Equations
MATH 323 (3) Probability
MATH 324 (3) Statistics
MIMM 314 (3) Immunology
NEUR 310 (3) Cellular Neurobiology
PHGY 311 (3) Channels, Synapses & Hormones
PHGY 314 (3) Integrative Neuroscience
PSYC 302 (3) The Psychology of Pain
PSYC 315 (3) Computational Psychology
PSYC 317 (3) Genes and Behaviour
PSYC 318 (3) Behavioural Neuroscience 2
PSYC 342 (3) Hormones and Behaviour

400- and 500-level courses:
BIOL 514 (3) Neurobiology Learning and Memory
BIOL 530 (3) Advances in Neuroethology
BIOL 532 (3) Developmental Neurobiology Seminar
BIOL 588 (3) Advances in Molecular/Cellular Neurobiology
BMDE 519 (3) Biomedical Signals and Systems
MATH 437* (3) Mathematical Methods in Biology
MIMM 414 (3) Advanced Immunology
MIMM 509 (3) Inflammatory Processes
NEUR 550 (3) Free Radical Biomedicine
PHGY 425 (3) Analyzing Physiological Systems
PHGY 451 (3) Advanced Neurophysiology
PHGY 513 (3) Cellular Immunology
PHGY 520 (3) Ion Channels
PHGY 556 (3) Topics in Systems Neuroscience
PHYS 413* (3) Physical Basis of Physiology
PSYC 410 (3) Special Topics in Neuropsychology
PSYC 427 (3) Sensorimotor Behaviour
PSYC 470 (3) Memory and Brain
PSYC 501 (3) Auditory Perception
PSYC 502 (3) Psychoneuroendocrinology
PSYC 522 (3) Neurochemistry and Behaviour
PSYC 526 (3) Advances in Visual Perception
PSYC 532 (3)  Cognitive Science
PSYT 455 (3)  Neurochemistry
PSYT 500 (3)  Advances: Neurobiology of Mental Disorders
PSYT 505 (3)  Neurobiology of Schizophrenia

* Students may select either MATH 437 OR PHYS 413, but not both.

Revision, August 2011. End of revision.

12.14.26 Nutrition (NUTR)

12.14.26.1 Location

School of Dietetics and Human Nutrition
Macdonald-Stewart Building, Room MS2-039
21,111 Lakeshore Road
Sainte-Anne-de-Bellevue, Quebec H9X 3V9

The School of Dietetics and Human Nutrition offers a Minor in Human Nutrition which can be taken by Science students; see Faculty of Agricultural and Environmental Sciences > Bachelor of Science (Nutritional Sciences) - B.Sc.(Nutr.Sc.).

NUTR 307 is considered as a course taught by the Faculty of Science and is offered simultaneously on both campuses.

12.14.27 Pathology (PATH)

12.14.27.1 Location

Department of Pathology
Duff Medical Building
3775 University Street
Montreal, Quebec H3A 2B4

12.14.27.2 About Pathology

There are no B.Sc. programs in Pathology, but the course PATH 300 Human Disease is considered as one taught by the Faculty of Science.

12.14.28 Pharmacology and Therapeutics (PHAR)

12.14.28.1 Location

McIntyre Medical Building, Room 1325
3655 Promenade Sir-William-Osler
Montreal, Quebec H3G 1Y6

Telephone: 514-398-3623
Website: www.medicine.mcgill.ca/pharma

12.14.28.2 About Pharmacology and Therapeutics

Pharmacology is the science that deals with all aspects of drugs and their interactions with living organisms. Thus, it involves the physical and chemical properties of drugs, their biochemical and physiological effects, mechanisms of action, pharmacokinetics, and therapeutic and other uses. Since the word “drug” encompasses all chemical substances that produce an effect on living cells, it is evident that pharmacology is a very extensive subject. Pharmacology is a multidisciplinary science. It has developed its own set of principles and methods to study the mode of the action of drugs, but it has also utilized many techniques and approaches from various disciplines including biochemistry, physiology, anatomy, and molecular biology, as well as others. Pharmacology encompasses a number of different areas such as pharmacogenomics, molecular biology, bioinformatics, neuropharmacology, reproductive pharmacology, endocrine pharmacology, receptor pharmacology, cardiovascular pharmacology, toxicology, developmental pharmacology, autonomic pharmacology, biochemical pharmacology, and therapeutics.
Training in pharmacology is conducted at both the undergraduate and graduate levels. Because of its breadth, students may be attracted to the subject from a variety of viewpoints; this includes those completing a Bachelor's degree in any number of basic science disciplines, such as biology, zoology, chemistry, physics, biochemistry, microbiology, anatomy, and physiology. At the undergraduate level, seven lecture courses are offered. A course involving research projects in pharmacology is also available to provide the student with the opportunity to get first-hand experience in a pharmacology research laboratory. These courses provide students with knowledge concerning the actions of drugs on living systems and insight into approaches to basic pharmacological research.

### 12.14.28.3 Pharmacology and Therapeutics (PHAR) Faculty

#### Chair
Hans H. Zingg

#### Emeritus Professors
Radan Capek; M.D., Ph.D.(Prague)
Brian Collier; B.Sc., Ph.D.(Leeds)
Theodore Sourkes; Ph.D.(C’nell)

#### Professors
Guillermina Almazan; Ph.D.(McG.)
Paul B.S. Clarke; M.A.(Cant.), Ph.D.(Lond.)
A. Claudio Cuello; M.D.(Buenos Aires), M.A., D.Sc.(Oxf.), F.R.S.C.
Barbara Hales; M.Sc.(Phil. Coll. of Pharm. and Science), Ph.D.(McG.)
Dusica Maysinger; Ph.D.(USC)
Peter J. McLeod; M.D.(Manit.), F.R.C.P(C.)
Alfredo Ribeiro-da-Silva; M.D.(Oporto)
Bernard Robaire; B.A.(Calif.), Ph.D.(McG.)
H. Uri Saragovi; Ph.D.(Miami)
Moshe Szyf; M.Sc., Ph.D.(Hebrew)
Jacquetta Trasler; M.D.,C.M., Ph.D.(McG.)
Daya R. Varma; M.D.(Lucknow), Ph.D.(McG.)
Hans H. Zingg; M.D., Ph.D.(McG.)

#### Associate Professors
Daniel Bernard; Ph.D.(Johns Hop.)
Derek Bowie; B.Sc., Ph.D.(Lond.)
Terence Hébert; M.Sc.(Windsor), Ph.D.(Tor.)
Anne McKinney; Ph.D.(Ulster)
Stanley Nattel; B.Sc., M.D.,C.M.(McG.)
Ante L. Padjen; M.D., M.Sc., D.Sc.(Zagreb)
Edith A. Zorychta; B.Sc.(St. FX), M.Sc., Ph.D.(McG.)

#### Assistant Professors
Greg Miller; Ph.D.(W. Ont.)
Jason Chaim Tanny; Ph.D.(Harv.)

#### Associate Members
Moulay Alaoui-Jamali; Ph.D.(Sorbonne)
Gerald Batist; M.D.,C.M.(McG.)

**Associate Members**

Martine Culty; Ph.D.(INSERM, Grenoble)
Giovanni Di Battista; B.Sc., Ph.D.(Montr.)
Lesley Fellows; M.D.(McG.), Ph.D.(Oxf.)
Pierre Fiset; M.D.(Laval), F.R.C.P.S.(C)
Serge Gauthier; M.D.(Montr.)
Timothy Geary; Ph.D. (Mich.)
Bertrand Jean-Claude; M.Sc.(Moncton), Ph.D.(McG.)
Sarah Kimmins; Ph.D.(Dal.)
Stephane Laporte; Ph.D.(Sher.)
Cristian O’Flaherty; Ph.D.(McG.)
Vassilios Papadopoulos; Ph.D.(Université Pierre et Marie Curie)
Roger Prichard; B.Sc., Ph.D.(N.S.W.)
Remi Quirion; M.Sc., Ph.D.(Sher.)
Simon Rousseau; Ph.D.(Laval)
Yoram Shir; M.D.(Israel), Ph.D.(Johns Hop.)
Laura Stone; Ph.D.(Minn.)
Marc Ware; M.D.(Univ. West Indies, Kingston, Jamaica)
Tak Pan Wong; Ph.D.(McG.)

**Adjunct Professors**

Bruce Allen; Ph.D.(Br. Col.)
Martin Bruno; Ph.D.(McG.)
Sylvain Chemtob; M.D.(Montr.), Ph.D.(McG.)
Jeffrey Coull; Ph.D. (McG.)
Yves De Koninck; Ph.D.(McG.)
Lorella Garofalo; Ph.D.(McG.)
Jennifer M.A. Laird; Ph.D.(Brist.)
Joseph Mancini; M.Sc., Ph.D.(McG.)
Karen Meerovitch; Ph.D.(McG.)
Thomas Sanderson; Ph.D.(Br. Col.)

**Bachelor of Science (B.Sc.) - Minor Pharmacology (24 credits)**

The Minor Pharmacology is intended for students registered in a complementary B.Sc. program who are interested in a focused introduction to specialized topics in pharmacology to prepare them for professional schools, graduate education, or entry into jobs in industry or research institutes. Students should declare their intent to enter the Minor in Pharmacology at the beginning of their U2 year. They must consult with, and obtain the approval of, the Coordinator for the Minor Program in the Department of Pharmacology and Therapeutics. (Please contact the coordinator: Dr. Terry Hébert; terence.hebert@mcgill.ca; 514-398-1398).

All courses in the Minor program must be passed with a minimum grade C or better. Generally, no more than 6 credits of overlap are permitted between the Minor and the primary program.

**Required Courses (12 credits)**

Complementary Courses (12 credits)

12 credits selected as follows:

3 credits, one of:
- BIOC 212 (3) Molecular Mechanisms of Cell Function
- BIOL 200 (3) Molecular Biology
- BIOL 201 (3) Cell Biology and Metabolism

3 credits, one of:
- PHGY 209 (3) Mammalian Physiology 1
- PHGY 210 (3) Mammalian Physiology 2

6 credits, chosen from:

* PHAR 504 can be taken with PHAR 503 only.
- PHAR 303 (3) Principles of Toxicology
- PHAR 503* (3) Drug Design and Development 1
- PHAR 504* (3) Drug Design and Development 2
- PHAR 558 (3) Pharmacology Selected Topics
- PHAR 599 (6) Pharmacology Research Project

12.14.28.5 Bachelor of Science (B.Sc.) - Major Pharmacology (65 credits)

Revision, August 2011. Start of revision.

This program incorporates extensive studies in Pharmacology with a strong component of related biomedical sciences, providing a solid preparation for employment opportunities or for entry into graduate or professional training programs. Students must consult an adviser upon entering the program and at the beginning of U2 to verify courses and progress. Additional consultation at regular intervals is encouraged.

U1 Required Courses (22 credits)

- BIOL 200 (3) Molecular Biology
- BIOL 202 (3) Basic Genetics
- CHEM 212 (4) Introductory Organic Chemistry 1
- CHEM 222 (4) Introductory Organic Chemistry 2
- PHGY 209 (3) Mammalian Physiology 1
- PHGY 210 (3) Mammalian Physiology 2
- PHGY 212 (1) Introductory Physiology Laboratory 1
- PHGY 213 (1) Introductory Physiology Laboratory 2

U2 Required Courses (16 credits)

- BIOC 311 (3) Metabolic Biochemistry
- BIOL 301 (4) Cell and Molecular Laboratory
- PHAR 300 (3) Drug Action
- PHAR 301 (3) Drugs and Disease
PHAR 303 (3) Principles of Toxicology

U3 Required Courses (12 credits)

PHAR 503 (3) Drug Design and Development 1
PHAR 558 (3) Pharmacology Selected Topics
PHAR 562 (3) General Pharmacology 1
PHAR 563 (3) General Pharmacology 2

Complementary Courses (15 credits)

15 credits selected as follows:

3 credits selected from:
ANAT 212 (3) Molecular Mechanisms of Cell Function
BIOC 212 (3) Molecular Mechanisms of Cell Function
BIOL 201 (3) Cell Biology and Metabolism

3 credits selected from:
CHEM 203 (3) Survey of Physical Chemistry
CHEM 204 (3) Physical Chemistry/Biological Sciences 1

3 credits selected from:
BIOL 373 (3) Biometry
MATH 203 (3) Principles of Statistics 1
PSYC 204 (3) Introduction to Psychological Statistics

6 credits selected from the following upper-level science courses:
Committee approval is required to substitute an upper-level science course not in the list below.
PHAR 599D1 and PHAR 599D2 are taken together.

* Note: Students may take either ANAT 458 or BIOC 458.
** Note: Students may take either CHEM 504 or PHAR 504.

ANAT 321 (3) Circuitry of the Human Brain
ANAT 365 (3) Cellular Trafficking
ANAT 458* (3) Membranes and Cellular Signaling
BIOC 312 (3) Biochemistry of Macromolecules
BIOC 450 (3) Protein Structure and Function
BIOC 454 (3) Nucleic Acids
BIOC 458* (3) Membranes and Cellular Signaling
BIOL 300 (3) Molecular Biology of the Gene
BIOL 303 (3) Developmental Biology
BIOL 306 (3) Neural Basis of Behaviour
BIOL 314 (3) Molecular Biology of Oncogenes
BIOT 505  (3)  Selected Topics in Biotechnology
CHEM 302  (3)  Introductory Organic Chemistry 3
CHEM 502  (3)  Advanced Bio-Organic Chemistry
CHEM 504**  (3)  Drug Design and Development 2
EXMD 504  (3)  Biology of Cancer
EXMD 511  (3)  Joint Venturing with Industry
MIMM 314  (3)  Immunology
MIMM 387  (3)  Applied Microbiology and Immunology
MIMM 414  (3)  Advanced Immunology
NEUR 310  (3)  Cellular Neurobiology
PATH 300  (3)  Human Disease
PHAR 504**  (3)  Drug Design and Development 2
PHAR 599D1  (3)  Pharmacology Research Project
PHAR 599D2  (3)  Pharmacology Research Project
PHGY 311  (3)  Channels, Synapses & Hormones
PHGY 312  (3)  Respiratory, Renal, & Cardiovascular Physiology
PHGY 313  (3)  Blood, Gastrointestinal, & Immune Systems Physiology
PHGY 314  (3)  Integrative Neuroscience
PHGY 520  (3)  Ion Channels
PSYC 311  (3)  Human Cognition and the Brain
PSYT 455  (3)  Neurochemistry

Revision, August 2011. End of revision.

12.14.28.6 Bachelor of Science (B.Sc.) - Honours Pharmacology (74 credits)

Revision, August 2011. Start of revision.

The Honours program is designed as a preparation for graduate studies and research. In addition to the strong training provided by the Major program, it requires students to have direct research experience in a chosen area during their final year of study. Acceptance into the Honours program takes place in the Winter term of U2 and requires a CGPA of 3.30. Students who wish to enter the Honours program should follow the Major program; those who satisfactorily complete the first three terms with a CGPA of at least 3.30 and a mark of B or higher in core Pharmacology courses are eligible for admission. Applications can be obtained from the office of the Department of Pharmacology in the McIntyre Medical Building or on the departmental website.

U1 Required Courses (22 credits)
* Students with prior credit for CHEM 212 may take an elective in place of this course.

BIOL 200  (3)  Molecular Biology
BIOL 202  (3)  Basic Genetics
CHEM 212*  (4)  Introductory Organic Chemistry 1
CHEM 222  (4)  Introductory Organic Chemistry 2
PHGY 209  (3)  Mammalian Physiology 1
PHGY 210  (3)  Mammalian Physiology 2
PHGY 212  (1)  Introductory Physiology Laboratory 1
PHGY 213  (1)  Introductory Physiology Laboratory 2

U2 Required Courses (16 credits)

BIOC 311  (3)  Metabolic Biochemistry

12.14.29 Physics (PHYS)

12.14.29.1 Location

Rutherford Physics Building, Room 108
3600 University Street
Montreal, Quebec H3A 2T8

Telephone: 514-398-6477
Fax: 514-398-8434
Email: secretariat@physics.mcgill.ca
Website: www.physics.mcgill.ca

12.14.29.2 About Physics

Physics is in many ways the parent of the other natural sciences and its discoveries and laws continually affect their development. Its range and scope extend in space and time from subnuclear particles to the universe itself. The subfields of physics such as mechanics, thermodynamics, electricity, atomic physics, and quantum mechanics, to mention but a few, permeate all other scientific disciplines. People trained in physics are employed in industry, government, and educational systems where they find many challenges as teachers, researchers, administrators, and in the rapidly developing area of scientific business.

The two main undergraduate programs in Physics at McGill are the Honours and the Major. The Honours program is highly specialized and the courses are very demanding. This program is appropriate for students who wish to make an in-depth study of the subject in preparation for graduate work and an academic or professional career in physics. The two joint honours, one in Mathematics and Physics and the other in Physics and Chemistry, are even more specialized and demanding. They are intended for students who wish to develop a strong basis in both physics and the other discipline and are intended as preparation for graduate work and a professional or academic career. Although these two programs have a bias for theoretical work, they are broad enough and strong
enough to prepare students for further study in either experimental physics or respectively mathematics or chemistry. High standing in CEGEP or Freshman-year mathematics and physics is a requirement for admission to these honours programs.

The Major program, on the other hand, offers a broad training in classical and modern physics and yet leaves room for the student to take a meaningful sequence of courses in other areas. It is intended primarily for students who wish to pursue careers in fields for which physics provides a basis. However, this program also provides a preparation for graduate studies.

It is possible for students to transfer from the Major program to the Honours program after the first year of studies; see section 12.14.29.9: Bachelor of Science (B.Sc.) - Major Physics (60 credits).

There are also a number of other major programs: Atmospheric Sciences and Physics, Physics and Computer Science, Physics and Geophysics, and Physiology and Physics, offered jointly with other departments, and a minor program in Electrical Engineering, available only to students in the Physics Major program. In addition, there is a minor in Physics and a core Physics component of the Liberal Science program, for students less interested in a specialized education.

For those interested in a career as a high school science teacher, the concurrent program leading to both a B.Sc. and a B.Ed. degree provides several physics options. These combine physics courses from the Major and Minor programs with courses from either Biology or Chemistry and with Education courses. (For details, see section 12.14.34: Science or Mathematics for Teachers.)

Students from outside of the Province of Quebec will ordinarily register in the Science Freshman program. Physics offers two sequences of courses for this program: they are described below.

The list of pre- and corequisites is not absolute. In many cases permission of the Department may be sought to have a specific prerequisite waived. The procedure is to ask the professor in charge of the course to review the request for such a waiver. The prerequisites of the 100-level courses are described in the following section entitled Science Freshman Program.

Students interested in any of the Physics programs should contact the Department for an adviser.

A Science major concentration in Physics is available to students pursuing the B.A. & Sc. degree. This Major concentration is described in the Bachelor of Arts and Science section of this publication; see Bachelor of Arts and Science > Physics (PHYS) for details.

12.14.29.3 Internship Year in Science (IYS)

IYS is a pregraduate work experience program available to eligible students and normally taken between their U2 and U3 years. For more information, see section 12.13.1: Industrial Practicum (IP) and Internship Year in Science (IYS).

The following programs are also available with an internship component:

- Major in Physics
- Honours in Physics
- Joint Honours Program in Physics and Chemistry
- Joint Honours Program in Physics and Mathematics
- Joint Major Program in Atmospheric Science and Physics
- Joint Major Program in Physics and Computer Science
- Joint Major Program in Physics and Geophysics

12.14.29.4 Science Freshman Program

Students entering McGill with a Quebec CEGEP profile in Science will normally begin their programs in Physics with courses at the 200 level.

Students without this profile should normally take courses PHYS 131 and PHYS 142 if they have previously taken physics at the high school level and who intend to do programs in the Biological Sciences may instead take courses PHYS 101 and PHYS 102. All students are expected to have reasonable fluency in algebra, geometry, and trigonometry at the high school level. If this is not the case, then MATH 112 should be taken concurrently with PHYS 101. Those for whom this is not necessary are advised to take MATH 139 concurrently with PHYS 101.

12.14.29.5 Physics (PHYS) Faculty

Chair

C. Gale

Emeritus Professors

Subal Das Gupta; B.A., M.Sc.(Calc.), Ph.D.(McM.) (William C. Macdonald Emeritus Professor of Physics)

Curator (Rutherford Museum and McPherson Collection)

Jean Barrette; B.Sc., M.Sc., Ph.D.(Montr.)

12.14.29.6 Bachelor of Science (B.Sc.) - Minor Physics (18 credits)

The 18-credit Minor permits no overlap with any other programs. It contains no Mathematics courses, although many of the courses in it have Math pre- or corequisites. It will, therefore, be particularly appropriate to students in Mathematics, but it is also available to any Science student with the appropriate mathematical background.

Students in certain programs (e.g., the Major Chemistry) will find that there are courses in the Minor that are already part of their program, or that they may not take for credit because of a substantial overlap of material with a course or courses in their program. After consultation with an adviser, such students may complete the Minor by substituting any other physics course(s) from the Major or Honours Physics programs.

Required Course (3 credits)

PHYS 257 (3) Experimental Methods 1

Complementary Courses (15 credits)

15 credits to be selected as follows:
One of:

- PHYS 230 (3) Dynamics of Simple Systems
- PHYS 251 (3) Honours Classical Mechanics 1

One of:

- PHYS 232 (3) Heat and Waves
- PHYS 253 (3) Thermal Physics

One of:

- PHYS 241 (3) Signal Processing
- PHYS 258 (3) Experimental Methods 2

One of:

- PHYS 214 (3) Introductory Astrophysics
- PHYS 224 (3) Physics of Music
- PHYS 260 (3) Modern Physics and Relativity
- PHYS 271 (3) Introduction to Quantum Physics

One of:

- PHYS 340 (3) Majors Electricity and Magnetism
- PHYS 350 (3) Honours Electricity and Magnetism

12.14.29.7 Bachelor of Science (B.Sc.) - Minor Electrical Engineering (24 credits)

[Program registration done by Student Affairs Office]

The Minor program does not carry professional recognition. Only students who satisfy the requirements of the Major Physics are eligible for this Minor. Students registered for this option cannot count PHYS 241 toward the requirements of the Major in Physics, and should replace this course by another Physics or Mathematics course. Students who select ECSE 334 in the Minor cannot count PHYS 328 toward the requirements of the Major in Physics, and should replace this course by another Physics or Mathematics course.

**Required Courses (12 credits)**

- ECSE 200 (3) Electric Circuits 1
- ECSE 210 (3) Electric Circuits 2
- ECSE 303 (3) Signals and Systems 1
- ECSE 330 (3) Introduction to Electronics

**Complementary Courses (12 credits)**

3 credits from the following and 9 credits of ECSE courses at the 200, 300, or 400 level subject to approval by the Department of Electrical and Computer Engineering.

- ECSE 305 (3) Probability and Random Signals 1
- ECSE 334 (3) Introduction to Microelectronics
# Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Physics (48 credits)

## Program Prerequisites

Students entering Physics programs from the Freshman program must have successfully completed the courses below or their equivalents. Quebec students must have completed the DEC with appropriate science and mathematics courses.

</tbody>
</table>

It is possible for students to transfer from the Major to the Honours program after the U1 year if they have passed all U1 Required courses and MATH 314 and MATH 315 with a C or better, and obtained a GPA of 3.5 or better in these courses. The written permission of an adviser is required for this change of program.

Note: The missing MATH 249 and PHYS 260 from the U1 Honours Year should be taken in U2.

### 12:14:29:10 Bachelor of Science (B.Sc.) - Major Physics and Geophysics (69 credits)

This joint program in Physics and Geophysics provides a firm basis for graduate work in geophysics and related fields as well as a sound preparation for those who wish to embark on a career directly after the B.Sc.

### Program Prerequisites

Students entering Physics programs from the Freshman program must have successfully completed the courses below or their equivalents. Quebec students must have completed the DEC with appropriate science and mathematics courses.

PHYS 446 (3) Majors Quantum Physics

**12.14.29.11 Bachelor of Science (B.Sc.) - Major Physics and Computer Science (66 credits)**

The Major Physics and Computer Science is designed to give motivated students the opportunity to combine the two fields in a way that will distinguish them from the graduates of either field by itself. The two disciplines complement each other, with physics providing an analytic problem-solving outlook and basic understanding of nature, while computer science enhances the ability to make practical and marketable applications, in addition to having its own theoretical interest. Graduates of this program may be able to present themselves as being more immediately useful than a pure physics major, but with more breadth than just a programmer. They will be able to demonstrate their combined expertise in the Special Project course which is the centrepiece of the final year of the program.

**Program Prerequisites**

Students entering Physics programs from the Freshman program must have successfully completed the courses below or their equivalents. Quebec students must have completed the DEC with appropriate science and mathematics courses.

**12.14.29.12 Bachelor of Science (B.Sc.) - Honours Physics (78 credits)**

Students entering this program for the first time should have high standing in mathematics and physics. In addition, a student who has not completed the equivalent of MATH 222 must take it in the first term without receiving credit toward the 78 credits required in the Honours program.

A student whose average in the required and complementary courses in any year falls below a GPA of 3.00, or whose grade in any individual required or complementary course falls below a C (unless it is improved to a C or higher in a supplementary examination or by retaking the course), may not register in the Honours program the following year, or graduate with the Honours degree, except with the permission of the Department.

**Program Prerequisites**

Students entering Physics programs from the Freshman program must have successfully completed the courses below or their equivalents. Quebec students must have completed the DEC with appropriate science and mathematics courses.

**12.14.29.13 Bachelor of Science (B.Sc.) - Honours Mathematics and Physics (81 credits)**

This is a specialized and demanding program intended for students who wish to develop a strong basis in both Mathematics and Physics in preparation for graduate work and a professional or academic career. Although the program is optimized for theoretical physics, it is broad enough and strong enough to prepare students for further study in either experimental physics or mathematics.

The minimum requirement for entry into the program is completion with high standing of the usual CEGEP courses in physics and in mathematics, or the Physics Program Prerequisites as explained below. In addition, a student who has not completed the equivalent of MATH 222 must take it in the first term without receiving credit toward the 81 credits required in the Honours program.

A student whose average in the required and complementary courses in any year falls below a GPA of 3.00, or whose grade in any individual required or complementary course falls below a C (unless the student improves the grade to a C or higher through a supplemental exam or by retaking the course), may not register in the Honours program the following year, or graduate with the Honours degree, except with the permission of both departments. The student will have two advisers, one from Mathematics and the other from Physics.

**Program Prerequisites**

Students entering Physics programs from the Freshman program must have successfully completed the courses below or their equivalents. Quebec students must have completed the DEC with appropriate science and mathematics courses.

3 credits from:

- MATH 355 (3) Honours Analysis 4
- MATH 370 (3) Honours Algebra 3

6 credits selected from:

- PHYS 432 (3) Physics of Fluids
- PHYS 479 (3) Honours Research Project
- PHYS 514 (3) General Relativity
- PHYS 521 (3) Astrophysics
- PHYS 551 (3) Quantum Theory
- PHYS 557 (3) Nuclear Physics
- PHYS 558 (3) Solid State Physics
- PHYS 559 (3) Advanced Statistical Mechanics
- PHYS 562 (3) Electromagnetic Theory
- PHYS 567 (3) Particle Physics
- PHYS 580 (3) Introduction to String Theory

3 credits in Honours Mathematics.

**1214214 Bachelor of Science (B.Sc.) - Honours Physics and Chemistry (80 credits)**

This is a specialized and demanding program intended primarily, although not exclusively, for students with a theoretical bias who are interested in working in fields of study at the crossroads of physical chemistry and physics. The program will prepare students for either theoretical or experimental graduate work in departments where there is an emphasis on such cross-disciplinary areas as condensed matter physics, chemical physics, or material science.

A student whose average in the required and complementary courses in any year falls below a GPA of 3.00, or whose grade in any individual required or complementary course falls below a C (unless the student improves the grade to a C or above by taking a supplemental exam or retaking the course), may not register in this Honours program the following year, or graduate with the Honours degree, except with permission of both departments.

The student will have two advisers, one from Chemistry and the other from Physics.

**Program Prerequisites**

Students entering Physics programs from the Freshman program must have successfully completed the courses below or their equivalents. Quebec students must have completed the DEC with appropriate science and mathematics courses.

- CHEM 110 (4) General Chemistry 1
- CHEM 120 (4) General Chemistry 2
- PHYS 131 (4) Mechanics and Waves

12.14.29.15 Physics (PHYS) Related Programs
12.14.29.15.1 Joint Major in Atmospheric Science and Physics

See section 12.14.3: Atmospheric and Oceanic Sciences (ATOC). This program provides a firm basis for graduate work in atmospheric science and related fields as well as a sound preparation for those who wish to embark on a career directly after the B.Sc. Students should consult undergraduate advisers in both departments.

12.14.29.15.2 Joint Major in Physiology and Physics

See section 12.14.30: Physiology (PHGY). This program provides a firm basis for graduate work in bio-physics and other interdisciplinary fields involving the physical and biological sciences.

12.14.30 Physiology (PHGY)

12.14.30.1 Location

McIntyre Medical Sciences Building, Room 1021
3655 Promenade Sir-William-Osler
Montreal, Quebec H3G 1Y6

Telephone: 514-398-4316
Fax: 514-398-7452
Website: www.medicine.mcgill.ca/physio

12.14.30.2 About Physiology

Physiology has its roots in many of the basic sciences including biology, chemistry, mathematics, and physics. Physiology overlaps with other biomedical sciences such as anatomy, biochemistry, pathology and pharmacology, and with psychology and biomedical engineering, and is one of the prime contributors of basic scientific knowledge to the clinical medical sciences.

Members of the Department of Physiology at McGill are engaged in studies dealing with molecules, single cells, or entire systems in a variety of vertebrates, including man. A wide range of interest and expertise is represented, including cardiovascular, respiratory, gastrointestinal and renal physiology, the physiology of exercise, neurophysiology, endocrinology, immunology, biophysics, and biomathematics. Some faculty members have formal or informal links with the departments of mathematics, physics, electrical engineering, and chemistry, and with clinical departments (medicine, surgery, pediatrics, neurology, obstetrics, psychiatry, anesthesia), reflecting and reinforcing the close ties between physiology and other disciplines.

Graduates at the B.Sc. level have found rewarding careers in teaching, in secondary schools and CEGEPs, government service, and laboratory technical assistance, such as in pharmaceutical houses, hospitals, and institutions of higher learning. Moreover, physiology provides an excellent background for medicine, dentistry or other postgraduate work, in such fields as physiology, experimental medicine, pharmacology, biochemistry, or physiological psychology.

The programs offered in Physiology differ in their orientation but they all have a common core of material covering cardiovascular, respiratory, gastrointestinal and renal physiology, neurophysiology, endocrinology, and immunology. The specified U1 courses are identical for all programs except the Joint Major programs in Physiology and Physics, Physiology and Mathematics, and the Joint Honours program in Immunology, and thus afford the student maximal flexibility before deciding on a particular program to follow in U2 and U3.
Academic advising is compulsory. All new students to the Department, Freshman and CEGEP, must see an adviser upon entering the program. Contact the Student Affairs Officer at 514-398-3689 for more information.

Returning students are required to consult with their advisers during the advising period for returning students, and regularly throughout the year. It is important that graduating students have their record checked by their adviser at the beginning of their final year.

**PLEASE NOTE:** Complementary courses are not electives.

The difference between Complementary courses and Required courses is that Complementary courses are defined as offering an element of choice, however small that choice may be. Students may choose from the two (or more) courses specified within Complementary Course segments of a program description, but ONLY from those. For further information, refer to *University Regulations and Information > Course Information and Regulations.*

### 12.14.30.3 Physiology (PHGY) Faculty

**Chair**

John Orlowski

**Emeritus Professors**

Thomas M.S. Chang; B.Sc., M.D.,C.M., Ph.D.(McG.), F.R.C.P.(C)
Kresmir Krmjevic; O.C., B.Sc., Ph.D., M.B., B.Ch.(Edin.), F.R.S.C
Wayne Lapp; M.S.A.(Tor.), Ph.D.(McG.)
Mortimer Levy; B.Sc., M.D.,C.M.(McG.), F.R.C.P.(C) (*joint appt. with Medicine*)
George Mandl; B.Sc.(C'dia), Ph.D.(McG.)
G. Melvill Jones; B.A., M.A., M.B., B.Ch., M.D.(Cant.)
J. Milic-Emili; M.D.(Milan)
C. Polosa; M.D., Ph.D.

**Professors**

Monroe W. Cohen; B.Sc., Ph.D.(McG.)
Ellis J. Cooper; B.Eng.(Sir G. Wms.), M.Sc.(Sur.), Ph.D.(McM.)
Kathleen Cullen; B.Sc.(Brown), Ph.D.(Chic.) (*William Dawson Scholar*)
Leon Glass; B.S.(Brooklyn), Ph.D.(Chic.) (*Isadore Rosenfeld Professor of Cardiology*)
Phil Gold; C.C., B.Sc., M.Sc., Ph.D., M.D.,C.M.(McG.), F.R.C.P.(C.), F.R.S.C. (*joint appt. with Medicine*)
David Goltzman; B.Sc., M.D.,C.M.(McG.) (*Antoine G. Massabki Professor of Medicine*) (*joint appt. with Medicine*)
John Hanrahan; Ph.D.(Br. Col.)
Gergely Lukacs; M.D., Ph.D.(Budapest)
Michael Mackey; B.A., Ph.D.(Wash.) (*Joseph Morley Drake Professor of Physiology*)
Sheldon Magder; M.D.(Tor.) (*joint appt. with Medicine*)
Jacapo P. Mortola; M.D.(Milan)
John Orlowski; B.Sc.(McG.), M.Sc., Ph.D.(Qu.) (*James McGill Professor*)
Premsyl Ponka; M.D., Ph.D.(Prague)
Alvin Shrier; B.Sc.(C'dia), Ph.D.(Dal.) (*Hosmer Professor of Physiology*)
Douglas G.D. Watt; M.D., Ph.D.(McG.)
John White; B.Sc., M.Sc.(Car.), Ph.D.(Harv.)

**Assistant Professors**

Maurice Chacron; Ph.D.(Ott.)
Russell Jones; Ph.D.(Tor.)
Associate Professors

Erik Cook; Ph.D.(Baylor College, Houston)
Riaz Farookhi; B.Sc., M.Sc.(MIT), Ph.D.(Tufts)
Mladen Glavinovic; B.Sc.(Zagreb), M.Sc.(Tor.), Ph.D.(McG.)
Michael Guevara; B.Sc., M.Eng., Ph.D.(McG.)
Pejmun Haghighi; Ph.D.(McG.)
Julio Martinez-Trujillo; Ph.D.(Tübingen)
Ursula Stochaj; Ph.D.(Cologne)
Ann Wechsler; B.A.(Tor.), M.Sc., Ph.D.(McG.)

Associate Professor (Part-time)

Nicole Bernard; B.Sc.(McG.), Ph.D.(Duke)

Associate Members

Anaesthesia: Steven Backman, Fernando Cervero
Biomedical Engineering: Robert E. Kearney, Satya Prakash
Electrical and Computer Engineering: Sam Musallam
Kinesiology and Physical Education: Dilson Rassier
Nephrology: Serge Lemay, Tomoko Takano
Neurology: David Ragsdale
Neurology and Neurosurgery: Jack Antel, Massimo Avoli, Charles Bourque, Sal T. Carbonetto, Daniel Guitton, Christopher Pack, Melissa Vollrath
Ophthalmology: Curtis Baker
Otolaryngology: Bernard Segal
Pediatrics: Charles Rohlicek
Pharmacology: Terence Hebert
Psychiatry: Nicolas Cermakian, Bernardo Dubrovsky, Christina Gianoulakis

Adjunct Professors

Roy Caplan, Montreal
Peter Swain, London

12.14.30.4 Bachelor of Science (B.Sc.) - Liberal Program - Core Science Component Physiology (50 credits)

Required Courses (38 credits)

* Students who have taken CHEM 212 and/or CHEM 222 in CEGEP are exempted and must replace these credits with an elective course(s).

PHGY 314 (3) Integrative Neuroscience

**Complementary Courses (12 credits)**
12 credits selected as follows:

3 credits selected from:
- BIOC 212 (3) Molecular Mechanisms of Cell Function
- BIOL 201 (3) Cell Biology and Metabolism

3 credits selected from:
- BIOL 309 (3) Mathematical Models in Biology
- BIOL 373 (3) Biometry

**Upper-Level Physiology (ULP) Courses**
6 credits selected from the Upper-Level Physiology (ULP) course list as follows:

All Physiology courses 400 level and above.

Note:
The 6-credit course PHGY 459D1/D2 equals 3 credits of ULP and 3 credits of electives.
The 9-credit course PHGY 461D1/D2 equals 3 credits of ULP and 6 credits of electives.

- ANAT 541 (3) Cell and Molecular Biology of Aging

- PSYC 470 (3) Memory and Brain
- PSYT 500 (3) Advances: Neurobiology of Mental Disorders

**12.14.30.5 Bachelor of Science (B.Sc.) - Major Physiology (65 credits)**
The Major program includes, in addition to some intensive studies in Physiology, a strong core content of related biomedical sciences. Admission to the Major program will be in U2, upon completion of the U1 required courses, and in consultation with the student's adviser.
If not previously taken, CHEM 212 "Introductory Organic Chemistry 1" must be completed in addition to the 64-65 program credits. Students may complete this program with a minimum of 64 credits or a maximum of 65 credits depending on their choice of complementary courses.

**U1 Required Courses (18 credits)**

- MATH 437 (3) Mathematical Methods in Biology
- PHYS 413 (3) Physical Basis of Physiology

U3 Required Courses (18 credits)
- BMDE 519 (3) Biomedical Signals and Systems
- MATH 319 (3) Introduction to Partial Differential Equations
- MATH 324 (3) Statistics
- PHGY 461D1 (4.5) Experimental Physiology
Bachelor of Science (B.Sc.) - Major Physiology and Physics (80 credits)

This program provides a firm foundation in physics, mathematics, and physiology. It is appropriate for students interested in applying methods of the physical sciences to problems in physiology and allied biological sciences.

U1 Required Courses (17 credits)

* The corequisite BIOL 200, BIOL 201 is waived for this program.

**12.14.30.8 Bachelor of Science (B.Sc.) - Honours Physiology (75 credits)**

All admissions to the Honours program will be in U2, and the student must have a U1 GPA of 3.30, with no less than a B in PHGY 209 and PHGY 210. Admission to U3 requires a U2 CGPA of 3.20 with no less than a B in U2 Physiology courses. Decisions for admission to U3 will be heavily influenced by student standing in U2 courses.

The Department reserves the right to restrict the number of entering students in the Honours program. Students who do not maintain Honours standing may transfer their registration to the Major program in Physiology.

The deadline to apply to the Honours program is June 13. Application forms are available in McIntyre 1021. Students should include in their letters telephone numbers where they can be reached during the last week of August. Students are responsible for picking up their letters of decision in McIntyre 1021 no later than one week before classes start.

Graduation: To graduate from the Honours Physiology program, the student will have a CGPA of 3.20 with a mark no less than a B in all Physiology courses. If not previously taken, CHEM 212 Introductory Organic Chemistry 1 must be completed in addition to the 75 program credits.

**Required Courses (60 credits)**

12.14.32.2 About Psychology

The Department of Psychology offers programs in both Arts and Science. All B.A. programs in Psychology can be found under Faculty of Arts > Psychology (PSYC).

Psychology is the scientific study of mind and behaviour. It is both a social and a biological science. As a social science, psychology studies social interactions. As a biological science, it regards humans as the product of evolution and so studies them in biological perspective, comparing and contrasting human behaviour with that of other species.

The data of psychology are collected within the psychological laboratory by the use of experimental methods in the study of behaviour, and outside the laboratory by systematic observation of the behaviour of humans and animals. The aim is to formulate general principles of perception, learning, motivation, cognition, and social psychology that are relevant to different aspects of human life. Experimentation, laboratory techniques, observational procedures, measurement, and statistical methods are important tools of the psychologist.
Psychology has many interdisciplinary aspects. The study of psychological problems often involves knowledge drawn from other disciplines such as biology, physiology, linguistics, sociology, philosophy, and mathematics. For this reason, a student with varied interests can frequently find a place for these in psychology.

Psychology is a young science so that explanations of the processes underlying observed phenomena are often theoretical and speculative. The major objectives of psychological study are to reduce the discrepancy between theory and fact and to provide better answers about why humans think and behave as they do.

Although a number of undergraduate courses in Psychology have applied implications, applied training is not the purpose of the undergraduate curriculum. Its purpose is to introduce the student to an understanding of the basic core of psychological knowledge, theory, and method, regardless of questions of practical application.

The B.Sc. or B.A. with a Major or Honours degree in Psychology is not a professional qualification. It does not qualify the individual to carry on professional work in psychology. In the province of Quebec the minimum requirement for membership in the Order of Psychologists, the professional association governing the work of psychologists in the province, is a doctoral degree. All students planning to practice in the province of Quebec will be examined on their proficiency in French before being admitted to the professional association. Undergraduate courses in Psychology may prove of considerable value to students planning careers in professional fields other than psychology. These include but are not restricted to medicine, education, social work, human communication sciences, or business and industry.

Students who are interested in psychology as a career must pursue graduate studies. Persons who hold graduate degrees in Psychology, usually the Ph.D., may find employment in universities, research institutes, hospitals, community agencies, government departments, large corporations, or may act as self-employed consultants. At the graduate level, psychology has many specialized branches including social psychology, physiological psychology, experimental psychology, clinical psychology, child psychology, industrial psychology, community psychology, educational psychology, and others.
