Elimination of Water Bottles at IGSF

2. Please enter your project leader's name. *

(First Name Last Name)

Kim Reany

3. Please briefly summarize the project and its key accomplishments. *

(max 5 sentences)

IGSF has eliminated the usage of the Labrador Water Bottle system at the office and usage of water bottles at events. We have replaced the Labrador system with a Brita Filter system on the kitchen sink (after having the water quality tested) and we were successful in obtaining funding to purchase a large Brita pitcher so that cold water will be readily available to staff and students. Providing safe drinking water to our staff and students while helping the environment has been our objective. Unfortunately this has been a challenge lately since we are under major construction on Peel Street and have been experiencing constant "Boil Water Advisories". So we have had to walk to other buildings on campus to fill containers to provide drinking water at the office. But once the construction is completed we expect that the Brita Filter system will be a wonderful solution to our previous usage of water bottles. Our students are behind us on this project 100%

4. If applicable, how many volunteers were involved in your project? *
