**Elective Duration**

Electives are normally 4 weeks in duration, which is recommended. However, 2-week rotations will be considered. The student must have 75% attendance for the rotation to be considered completed.

**Educational Objectives**

The goal for students during this elective is to become familiar with the Dermatologists' approach to diagnosis and management of patients with various skin diseases, including cutaneous manifestations of systemic disease. The student should learn the common skin diseases and their first line treatments.

**Recommended Reading/Preparation**

Textbook: Fitzpatrick's Color Atlas and Synopsis of Dermatology
