Elective Description
<p>This full-time elective is available to clerkship students who wish to gain practical experience in conducting initial intake assessments and screening interviews of patients referred to the Unit. Students will be able to conduct interviews in a closely supervised setting, in a closed-circuit setting, as well as observe extensive interviews conducted by senior staff. The Unit can only accommodate a maximum of one student at any time.</p> <p>At the end of this elective, the student will be able to conduct initial interviews in this modality of psychotherapy, assess suitability of patients to be treated and initiate Short-Term Dynamic Psychotherapy on a variety of patients with neurotic conflicts and emotional crisis.</p>
Elective Duration
4 weeks
