of Management

Dear Partners,

This past year has been an unprecedented year for the Dobson Centre and we are very grateful to our community of Entrepreneurs, Donors, Sponsors and Volunteers who jointly made it possible.

During our academic year of 2020-2021, The Centre has reached a remarkable milestone: The startups it has supported have now raised over \$1 billion in seed funding (source: [Crunchbase](#)), a sign that investors are being persuaded by our entrepreneurs' vision and see meaningful opportunities to contribute to our economy.

As we continuously scale our programming, we were grateful to announce this year a new \$3-million gift from the John Dobson Foundation to help drive entrepreneurship at McGill University.

Founded in 1988 by the late John Dobson, BCom '49, the [McGill Dobson Centre for Entrepreneurship](#) supports entrepreneurs from all 11 faculties at McGill University. The Dobson community has grown to include 450 active startups which operate in over 35 countries and have generated more than 6,000 new jobs. More than 40 per cent of Dobson startups are cofounded by women and the Centre engages with 24 partner universities around the world.

This success is a direct result of the seminal work of John Dobson, the Dobson Centre's founding director Professor Peter R. Johnson, and former director Professor Gregory Vit who established the signature Dobson Cup competition and McGill X-1 Startup Accelerator program. We now have the privilege of building on this strong foundation.

In 2020, The McGill Dobson Centre has also been recognized as one of the [Top 20 University Business Incubators](#) by the UBI Global World Rankings of Business Incubators and Accelerators and [PitchBook University Rankings](#) named the Dobson Centre second in Canada for undergraduate programs for entrepreneurs — and first in the country for developing successful female entrepreneurs.

As we pursue our mission to help entrepreneurs across the University to build innovative companies with purpose, we intend to continue to expand our offering of programs tailored to the different stages of the entrepreneurial journey, as well as mentorship opportunities and access to a wide network of resources and investors.

In the coming year, The Dobson Centre is set to open a new location in the Bronfman Building with a main entrance on Sherbrooke Street, where it will house flexible, state-of-the-art collaboration spaces and cutting-edge technologies designed to fuel and ignite the entrepreneurial spirit among all members of the McGill community.

As the University enters its third century amid a critical time for the economy, we look forward to fostering the McGill entrepreneurial ecosystem as a driver of future job creation and strong, sustainable growth.

Celebrating Entrepreneurship Day

LEAN STARTUP

“Lean Startup has been integral to getting closer to launching the first stage of our product, since starting the Lean Start-up Incubator, we have gone back and spoken to potential customers and from there developed and streamlined our ideas.”

Ffion Lewis, Co-Founder,
Aglet PR

An eye-opening program to initiate early-stage startups into the exciting world of entrepreneurship.

The Lean Startup Program is an integral part of the center’s programming.

Startups work on moving from the idea stage to developing a viable startup concept.

Through exposure to business frameworks and tools to diagnose ideas, they have the opportunity to test the feasibility of their concept and generate challenging, yet feasible goals for their startup. They acquire the confidence and the clarity to pursue the next steps in building a successful startup.

Neuroscience tailored program:

In partnership Healthy Brains Healthy Lives, we also offer an entrepreneurship program tailored specifically for scientific researchers in neuroscience.

[MORE DETAILS](#)

McGILL
LEAN STARTUP

NEUROSCIENCE LEAN STARTUP

“[The program] Helped us come together as a team and think about the viability of the project, our value proposition, and opened up many discussions about our business plan in general.”

Viviana Romero, Founder,
8 Bit Cortex

Turning scientific ideas into startups

We are delighted to partner with NeuroSphere, McGill's neuroscience accelerator funded through Healthy Brains Healthy Lives, to offer an entrepreneurship program tailored specifically for scientific researchers in neuroscience.

The program takes scientific innovation from the idea stage to developing and launching a viable startup.

Teams acquire a general understanding of key business concepts needed to bring their vision to life, while being immersed into the world of entrepreneurship.

2020-21 LEAN START UP COHORT

24 Startups

54 Co-Founders

9 McGill faculties
7 universities

“It has helped give clarity around setting up a company, but mainly focused our thoughts on product, how viable it is for the market, and how can we build our user base, as without user base demand we wouldn't be there.”

Thomas Durcan, Founder of MBrainBio

“All of the speakers were knowledgeable and offered great insights. I learned how fundamental the process of getting user feedback and iterating is. In particular, I learned how to ask these questions to hear the genuine problems of the intended audience, as opposed to presenting my solution.”

Colleen Chang, Founder of Sobremesa

McGILL
LEAN STARTUP

DOBSON CUP

“The program surpassed our expectations in many regards, the opportunity to gain feedback from the judges and program coordinators along the way was one notable takeaway for us. We believe that the MDC program has better prepared us for our upcoming investor pitches.”

Kyle Feigenbaum, Co-founder
MyHealthy Bud

The 13th edition of the **McGill Dobson Cup powered by National Bank**, was the first to be held fully online. Over 56 teams were initially selected to be a part of the highly competitive program in January.

The finals, which were held on March 29 and 30, saw the 26 finalist teams competing in four tracks to win over \$200 000 in funding:

- Health Sciences Enterprise (HSE)
- Innovation or Technology Driven Enterprise (ITDE)
- Social Impact Enterprise (SIE)
- Environmental Enterprise (EE)

The 135 founders, 96 of which stem from McGill, were accompanied throughout the program by more than 60 seasoned business experts through mentoring sessions, workshops and judging.

“The team at Keen to Help learned immensely from the workshops, sharpened our pitching skills, and improved our business model. With the funding and the support of the Dobson Center we know that Keen to Help will continue to make an impact within Canadian communities.”

Jack Turner, Founder of Keen to Help.

“McGill Dobson Cup is easily one of the best university affiliated competitions for startups. Win or lose doesn't matter, one always comes out as a more knowledgeable person on the other side of it.”

Sanjay Thakur, Co-Founder, RydeSafely

McGILL
DOBSON CUP

POWERED BY

X-1 ACCELERATOR

“The X-1 program helped us to get closer to our next milestones and provided us tools to generate some investment opportunities.”

Charles Couture-Lebrun, Co-Founder, Off The Grid

This program offers an immersive experience, aimed at launching startups to the next phase – investment readiness.

Designed to **accelerate** McGill startups, X-1 offers a wealth of learning opportunities as teams engage with experienced industry leaders through weekly workshops and one-on-one mentorship meetings.

Startups benefit from up to \$15,000 in funding as they work over the summer to develop greater clarity of their market and customers, as well as the business acumen to effectively sell their vision to investors.

“This entrepreneurship program opened my eyes to a new world of opportunity that made me think about healthcare from a business perspective. It provided the tools and strategies necessary to take innovation from lab to market.”

Ahmed Abou-Sharkh,
Co-Founder, PhysioBiometrics

“The X-1 Accelerator equipped us with the tools needed to successfully scale our business and develop our vision even further. We are so grateful to have participated in such an extensive, well-thought-out program that will help us grow our business for years to come.”

Ophelia Sarakinis
Co-founder of Vertité

DOBSON MENTORSHIP CIRCLE

"Mentorship has played an invaluable role in the progress of Algi. Being able to learn from experienced entrepreneurs and industry leaders has helped us to make smart decisions and grow more quickly."

Alessandra Amato, Co-Founder, Algi

Mentorship to get to the next level

The **Dobson Mentorship Circle**, is a new program to support startups that have graduated from our entrepreneurship programs, and who are looking to receive mentorship as they navigate the challenges and opportunities of growing their business.

Our distinguished group of prominent business leaders, each with twenty or more years of expertise with startups, business innovation and leadership, provide a source of inspiration, a listening ear and new perspectives to broaden the horizons of fledging Dobson founders to help them grow.

INTERNATIONAL STARTUP TOUR

“The Dobson International Startup Tour was a great opportunity to pitch our business to investors on the West Coast and in Europe. We made great connections and received amazing feedback from an impressive panel of investors including one of the original Dragons from Dragons’ Den. We are looking forward to continuing our conversations with them as we close our seed round this summer.”

Lucas Francioli

With the support of the Ministère de l'Économie et de l'Innovation du Québec, the Dobson Centre for Entrepreneurship launched its first virtual International Startup Tour.

Showcasing Dobson's most promising startups, the goal of the International Startup Tour is to promote entrepreneurial innovation stemming from all faculties, while creating opportunities for our founders with regards to fund raising and new business partnerships on an international scale.

Spanning seventeen (17) cities, the programming included three (3) separate virtual events, anchored around Eastern Time, Pacific Time and Central European Time. For each geography, our startups presented their innovative solutions, followed by a question-and-answer period led by top caliber industry experts. The events were rounded out with panel discussions and one-on-one investor meetings

In addition, The Dobson New York City Retail Startup Tour introduced and connected a select group of Dobson entrepreneurs to a dynamic startup ecosystem composed of Finance Executives, Retail Giants and Tech Executives from across the globe.

[MORE DETAILS](#)

NEW YORK CITY RETAIL STARTUP TOUR

“This tour was a great experience. We continued to refine our pitch, and had the chance to tell our story countless times to all different types of people through the TechDay and ShopTalk events. I think that the program was a success, and we were honored to be included in this year's edition.”

Interius Farms

The Dobson New York City Retail Startup Tour introduced and connect a select group of Dobson entrepreneurs to a dynamic startup ecosystem composed of Finance Executives, Retail Giants and Tech Executives from across the globe.

The programming, included personalized coaching and mentoring, as well as the opportunity to attend flagship tech and retail industry events based in New York City (online).

Teams gained invaluable exposure to key players and pitched their innovative business solutions to potential clients and investors, with the hope of encouraging international investment, partnership opportunities and strong business growth.

Québec

SUPPORT EMERGING BUSINESSES TO ACCELERATE THEIR RAPID DEVELOPMENT

LUCIE LECOURS
Ministre déléguée à
l'Économie

Québec abounds in talented individuals who dare to initiate and innovate. More than 2000 start-ups with strong growth potential are operating in different areas of activity. They are noteworthy for their original business models and bold reliance on new technologies. Ensuring the development of this thriving ecosystem is essential to maintain the Québec economy's competitiveness.

The Québec government is delighted to encourage the Dobson Centre for Entrepreneurship at McGill University in conjunction with the McGill International Startup Tour. I would especially like to emphasize the multi-disciplinarity of the sectors covered and the scientific relations that have developed between major Québec universities. Moreover, this project is brilliantly helping to better match research and its practical applications through the marketing of products stemming from university research.

The tour will raise the international profile of Québec innovations and is another example that shows that our knowledge-based economy creates collective wealth. I salute all the participants for their commitment to showcasing Québec ingenuity and creativity the world over.

Best wishes to the innovative young entrepreneurs for a successful tour!

CELEBRATING ENTREPRENEURSHIP DAY

“Just believe in yourself. If you know what’s right keep walking forward and don’t stop! And celebrate the little things along the way.”

Gary Hoberman, CEO of Unqork

In a special event celebrating Entrepreneur’s Day, we were delighted to present a lively conversation with leading New York City based Entrepreneurs and investors – and friends of the Dobson Centre.

Animated by McGill alumnus, Gregory Larkin, Founder at Punks & Pinstripes and best-selling author of *This Might Get Me Fired*, the event, which was live streamed, featured special guests: Charles Bonello, Founder of Vivvi and Grand Central Tech – the biggest incubator in NYC, Peter Crysedale, SVP of Minerva, Gary Hoberman, CEO of Unqork and former CIO of Metlife, JJ Kasper, one of the most respected VCs in NYC and former McKinsey partner, Amanda Kirby, former SVP Tech Startup Partnerships at Bank of America.

The discussion focused on the journey of entrepreneurship and celebrated the important contribution that entrepreneurs bring to our economy and society.

Lean Startup

2020-2021 DOBSON STARTUPS

RailVision Analytics specializes in artificial intelligence and software for the rail industry. Our projects are focused on reducing fuel consumption, preventing locomotive failure and improving the safety of rail operations.

International Startup Tour

Reconsolidation Therapy offers an efficient treatment method for treating psychiatric symptoms stemming from a bad memory. The treatment has the potential to be improved and patented, and used for a variety of mental disorders locally and globally.

X-1 Accelerator

Remote Optical provides medical devices that allow ophthalmologists and optometrists to remotely examine, diagnose and track optical diseases, disorders, and damage.

McGill Dobson Cup

Remote Optical

3rd PLACE
WINNER

Health and Science
Enterprise Track

RELIEFAI measures physical symptoms of childhood disorders as well as inputs from family and mentors with the highest technology to detect any mental disorder using machine-learning algorithms.

Lean Startup

2020-2021 DOBSON STARTUPS

The Rydesafely platform validates that autonomous systems can perceive unforeseen dangers - or edge cases - around them. This unblocks automotives to mandated assisted driving in 2021 and the \$2.5 trillion self-driving future.

1st PLACE
WINNER

Innovation and
Technology Driven
Enterprise Track

McGill Dobson Cup

SEEDAI offers services across the whole data value chain, and builds and maintains custom AI solutions and products. We have also developed a unique and proven methodology to help organizations in their transformation towards AI.

X-1 Accelerator
NYC Retail Startup Tour

ShuttleControl is a Software-as-a-Service designed to revolutionize the way courtesy shuttle services are offered around the world. We offer an all-in-one solution to increase customer satisfaction and make shuttle operations easy.

NYC Retail Startup Tour

"It [Neuroscience Lean Startup program] transformed my idea into something more palpable. I am less scared to see my idea as a startup."

Dr. Patricia Pelufo Silveira, Founder, ePRS Cluster

2020-2021 DOBSON STARTUPS

Simmunome Inc. builds AI-driven disease simulations to predict outcomes of clinical trials in the drug discovery process. Using their approach, researchers could avoid costly late-stage failures before stepping into the lab.

McGill Dobson Cup

Skтч.io is a no-code platform that allows anyone to build dynamic websites and apps.

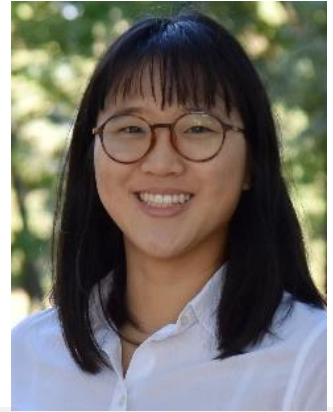

McGill Dobson Cup

SOBREMESA

Sobremesa is an AI matcher that helps solo diners find quality companions to virtually converse with over meals. Using mealtimes as social opportunities, we strive to foster meaningful conversations and forge new friendships.

Lean Startup

SquareFeet.ai optimizes the revenue of a new residential development project by offering automated market research, automated initial price list generation and a demand driven dynamic price optimization.

McGill Dobson Cup

2020-2021 DOBSON STARTUPS

Stocate connects local sellers with their customers through an online platform to make local businesses more accessible to their community.

McGill Dobson Cup

X-1 Accelerator

Toujours en Groupe Foundation is a non-profit organization that aims at reaching vulnerable people, in order to empower them economically, mentally, and socially. They aim to change lives today for a better tomorrow.

McGill Dobson Cup

TRAQC is an easily integrated solution for non-destructive and in-line quality control of printed electronics, reducing the production cost by up to 80% and the production time by up to 90%.

International Startup Tour

“We learned a lot from the opportunities for one-on-one mentorship – both sessions allowed us to take away something that completely changed an aspect of our current plan (both our pitch and our financial projections). The visibility that the Dobson Cup gives you is also fantastic, and I truly believe will open many doors for us!”

Chloë Ryan, Co-Founder, Acrylic Designs

2020-2021 DOBSON STARTUPS

We give bodegas in Latin America a frictionless, AI-powered app that automates orders, optimizes inventory using AI and saves them time, increases revenue and allows them to compete with larger chains.

International Startup Tour

Our tech-enabled urban farms cultivate local, pesticide-free strawberries all year long to provide consumers with a healthier, higher quality, and more sustainable product.

X-1 Accelerator

International Startup Tour

Vertité

VitalTracer focuses on personalized medicine. We use biomedical sensors through the wrist to continuously detect bio-signals and store them in a secure cloud-based environment. By using machine learning algorithms, a complete assessment of vital signs can be provided and shared with the doctor or caregiver as needed.

International Startup Tour

WALK-AI

With the help of WALK-AI, physicians will be better equipped to diagnose ataxia at an earlier stage and prescribe appropriate intervention, improving patients' prognoses and quality of life. By harnessing the power of machine learning, WALK-AI is programmed to detect close to 100 well-known features from gait and balance before disease onset.

Neuroscience Lean Startup

2020-2021 DOBSON STARTUPS

XCOV19 aims to build a software application that will help patients and hospitals in third world countries overcome the pre-admission challenges that they face. Specifically, we will provide a service to route patients to the nearest hospital and to pre-register them to allow for an accelerated admission.

Lean Startup

8 BIT CORTEX

Our app uses gamified micro-tests to measure changes in cognition, mood, and health behaviors over time to automate the psychiatric assessment process and expand its scope to be more informative for clinician treatment planning.

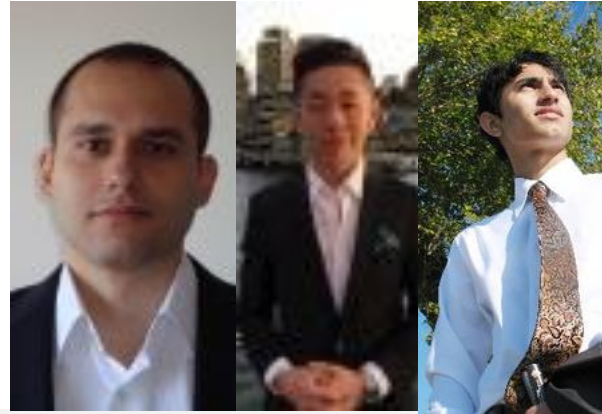

Neuroscience Lean Startup

UNTITLED PROJECT

A non-profit start-up at the intersection of genomics, machine learning (ML) and neuropsychiatric disease to help physicians in diagnosing patients with neuropsychiatric diseases.

Neuroscience Lean Startup

“It has been really great in helping compartmentalize the overwhelming amount of work of a startup into more manageable and specific goals (making it easier to get things done efficiently and also avoiding forgetting potentially important aspects).”

Ashley Bock, Co-Founder, Just Imagine
